**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL
INFRASTRUCTURE IN NEW SOUTH WALES**

Name: Mr David Bentham

Date Received: 10 February 2022

Jordan Springs is a lovely new area , designed for over 11000 people.(currently 9000.). We have a well designed primary school with over1,000 children. This school however has a major defect. The arrangement to collect pupils is totally inadequate and very dangerous. Maybe a lesson can be taken from this defective planning for our new school. Our older children need to travel and because of over crowding and reputation issues many families are electing to attend privet schools. This leads to a less cohesive community and has long term social negative impacts. Please build a senior high school with pupil safety front of mind.
Thank You. David Bentham OAM
