**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL
INFRASTRUCTURE IN NEW SOUTH WALES**

Name: Mr Anthony Peachman

Date Received: 10 February 2022

Imagine this, the year is 2022, your kids go to a school in a rapidly expanding area called gillieston heights public school and the school is just a bunch of demountable buildings surrounded by a wire fence that's more commonly used as a cow paddock fence which doesn't really keep the kids safe! That same school has toilets which use a septic tank system that went out of date when the newcastle knights won the nrl grand final! Surely something has to be done to give these kids a decent start at school and life in general
