**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL
INFRASTRUCTURE IN NEW SOUTH WALES**

Name: Mrs Sally Bromage

Date Received: 10 February 2022

This government has failed Gillieston Public school and in turn is failing the children and staff. This school lacks the basic necessities that every school should have. Your home is connected to the town septic system... well this school isn't! We are not living in the 1800s anymore. Why hasn't the government done something about this? The area has grown tenfold in the last 15 years, but there are no permanent classrooms. We need to do better for our children!

School pick up and drop off is an absolute bloody nightmare. Parking is dreadful around the school, some days I have to park over 400 metres away to collect my child from the school gates.. this is not ideal with a baby in 38° weather. And tell me, who will be to blame when a child gets hit by a car?? Wake you pen pushers.. get out and have a look at this poor little school.
