**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL
INFRASTRUCTURE IN NEW SOUTH WALES**

Name: Mrs Sharon Sellers

Date Received: 11 February 2022

Build permanent classrooms, stop building demountable buildings.

- Connect the toilet to proper sewerage system to protect the well being and health of the students and staff.
- Build proper canteen facilities and seats for children to enjoy their lunch/snacks – not sitting on the concrete.
- Parking spaces for families, staffs and teachers to use for safety and security.
- Proper and equip infrastructure for students and teachers to enjoy and utilize – I wish the students have a consistent teachers in their Year. My theory is because Gillieston Public School don't have the facilities to support the teachers and students - they will move or invest more on transferring to a better school.
- Provide computer; laptops; iPad's and alike for children to be competitive in technology investing for future leaders for the 21st Century.
