**INQUIRY INTO USE OF PRIMATES AND OTHER ANIMALS
IN MEDICAL RESEARCH IN NEW SOUTH WALES**

Name: Ms Gwen Ferry
Date Received: 21 February 2022

There is no reason to use any animals in horrific laboratory experiments in a dim hope of finding a cure for humans. Animals do not equate in these disgustingly cruel experiments. Scientists seem to have no morals, ethics or compassion and some of the abuse animals are subjected to is totally inappropriate and cruel. Why pay for animals to be abused? If you spent the money educating children in schools and their parents what wholesome food is and how it protects your body against a host of diseases and also treats your body against a host of diseases (all well documented by literally thousands and thousands of scientific evidence), which is either overlooked by doctors or they simply cannot be bothered to read and learn when it is much easier to write out a script for toxic medication which does not work or causes more sickness. Doctors should as part of their degree, look into the benefits of food, herbs, seeds, etc as a cure for disease. That way, animals are not needed for these gruesome sick experiments done by psychopaths who are paid to abuse animals by the drug companies. Get out of bed with them and stop abusing animals on worthless information gained by the horrific suffering inflicted on innocent sentient beings. You know as well as i do how unethical it is to be paid by drug companies to continue to abuse animals and not look at scientific evidence of whole foods as a cure for all sickness.
