**INQUIRY INTO USE OF PRIMATES AND OTHER ANIMALS
IN MEDICAL RESEARCH IN NEW SOUTH WALES**

Name: Name suppressed

In my opinion, animal testing is an outdated and ineffective way to test product safety. Human and primates may have similarities but also many differences. Not only is animal testing cruel but its results are not necessarily the same as testing on humans. Invitro testing on human tissue grown in a lab is a better way to test products for human safety. We have the technology to bring an end to cruel and outdated testing methods.
