INQUIRY INTO PRIVATISATION OF BUS SERVICES

Name: Mr Gary McGregor

Date Received: 27 March 2022

The changes to services significantly increase travel times for me near Malabar Beach and I now need to drive and park in the Sydney CBD. It would take me over an hour by public transport which is very slow for a suburb around 12km from the CBD. There are no express services from my locale and I would need to travel all bus stops to Kingsford then change to a slow light rail service with a relatively poor frequency for a key trunk service which everyone needs to change to (every 8min). I call for the reinstatement of express services from Malabar Beach to the CBD and for all day express services to the CBD via Anzac Pde. I also call for a moratorium on any increases in urban density in this corridor while this poor level of public transport service is provided.
