Dear members of parliament,

I am writing this letter as a medical cannabis patient and lifelong illness sufferer who is legally allowed to drive high on prescription pills (but I don't) and this has held me back to only holding a learner's permit. With medicinal cannabis I feel true symptom relief without the need for the heavy hard opiate painkillers and benzodiazepines but because I may have THC left in my system from the night before 24 hours later I am unable to legally drive, so I don't. It's not a just law, how is morphine okay but this is not? Thank
