# INQUIRY INTO TEACHER SHORTAGES IN NEW SOUTH WALES

**Organisation:** Computer Coach Australia

**Date Received:** 20 June 2022

---

Computer Coach Australia has provided one on one technology support and skills building for NDIS participants, seniors, small business, students and other disadvantaged people who struggle with technology.

We witnessed in our clients isolation from the government mandates and fear.

This was totally unnecessary as we see now anyone can transmit and catch the virus whether they have taken part in this world wide clinical trial or not. And we also see it is no where near as dangerous as reported for those with no underlying conditions.

We took our classes online and hired teachers who have been unfairly dismissed due to these unlawful mandates to try and relieve some pressure.

Many teachers who chose bodily autonomy have lost their long earned careers, and been unfitly dismissed.

Australian children and parents have also suffered and what for? The country is now in debt and the people still suffer as the media and politicians act as if we have moved on. Only a small handful of politicians had the courage to speak up - and it is well known doctors were afraid of losing their license if they gave their honest opinion.

Teachers need to be reinstated into their professions with apologies and receive back pay - along with an apology.

For the teachers who were coerced into taking part in this clinical trial the cost is on the governments shoulders here - not the people who were coerced or convinced they were doing the right thing.

If it was the right thing and if the country is now 95% jabbed - why is Australia experiencing more cases, more deaths, more in ICU? Surely common sense shows this?

An enquiry needs to be held for the hospital staff to be honest what there are shortages due to mandates.

Shame on anyone who took part in what has happened over the last two years and more shame for not being honest and stating what is truly happening.

It is the adverse events and staff shortages are stressing the hospitals - with 95% jabbed then 95% are filling up the beds.

Anyone with an ounce of common sense knows thousands have lost their jobs due to the mandates = they are not working = staff shortages

Show some integrity and open this case up to the country to see what our politicians have done to the people!
