INQUIRY INTO TEACHER SHORTAGES IN NEW SOUTH WALES

Name: Mrs Faye Aspiotis

Date Received: 20 June 2022

My teaching job was taken away from me because I did not want to get the covid vaccine. I was told by the NSW Department of Education that I had to have it otherwise it was no longer safe for me to work at the school. I was told by unelected bureaucrats, politicians, media and keyboard warriors that I had to have it to prevent me from infecting others with covid, filling up the hospitals and dying from it.

As a Mathematics Teacher, I've always liked data. Today I found some interesting data that tells me that the OPPOSITE IS ACTUALLY TRUE. Many more people who have been vaccinated are dying with covid. From 264 people who died with covid recently, ONE was unvaccinated, 96 had 2 doses and 167 had 3 doses.

This is from the last 3 weeks of data from the NSW Government Health surveillance report - Covid 19 and it is very telling. This can be found at <https://www.health.nsw.gov.au/Infectious/covid-19/Pages/weekly-reports.aspx>

Week ending 11 June 2022.

"There were 80 COVID-19 deaths reported this week. Of these, all were eligible for a third dose of a COVID-19 vaccine but only 49 (61%) had received a third dose."

So that says to me that all 80 people who unfortunately lost their lives had 2 doses of the vaccine, with 49 of them having had 3 doses.

I wondered if maybe it had just been a good week for us unvaccinated folk, with no record of anyone unvaccinated passing away with the virus. So I checked out the other weekly surveillance reports available -

Week ending 4 June 2022

"There were 86 COVID-19 deaths reported this week. Of these, all were eligible for a third dose of a COVID-19 vaccine but only 54 (63%) had received a third dose."

Week ending 28 May 2022

"There were 98 COVID-19 deaths reported this week. Of these, 97 were eligible for a third dose of a COVID-19 vaccine but only 64 (66%) had received a third dose."

So, that sounds like over these 3 weeks, there were 264 COVID-19 deaths with 263 of them vaccinated with 2 doses and 167 of them having had 3 doses. It appears that there may have been 1 unvaccinated death, in the week ending 28 May 2022. The language used is a little confusing, but that's how I am interpreting it.

We need our jobs back. It has been over 7 months of torture being shut out of our careers and for what!? The vaccine is not doing what it was supposed to do, so why are us teachers who chose not to get it being punished and shut out of our jobs?

This vaccine does not do anything to stop the virus from spreading or killing people. It is experimental and has a long list of adverse reactions. We need to stop it being mandatory at the very least. Personally, I think it should be banned, before more people are harmed.
