**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING
THE TRANSMISSION INFRASTRUCTURE FOR
RENEWABLE ENERGY PROJECTS**

Name: Name suppressed

Date Received: 10 July 2023

Partially
Confidential

INQUIRY – Feasibility of undergrounding the transmission infrastructure for renewable energy projects We are a beef cattle and sheep farmers in the Yaven Creek area. The Humelink line will go through the Darlow area and I am concerned about the following.

- Fire Risk & Fighting Fires
- Diminished regional development (overhead lines make areas less desirable to live)
- Agricultural Impacts
- Environmental Impacts
- Visual Amenity
- Industrialisation of Landscape
- Future Duplication of Lines
- Potential Health Problems We previously went through a fire that was very damaging to the area and the power lines were a hinderance to the fighting of the fire.

I advocate for the lines go underground

Thanking you
