**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING
THE TRANSMISSION INFRASTRUCTURE FOR
RENEWABLE ENERGY PROJECTS**

Name: Mr Paul Hewitt

Date Received: 11 July 2023

No argument with the need for more clean energy

No argument with the TransGrid easement

However, the bush is doing the heavy lifting on accommodating renewable energy infrastructure

Underground will be intrusive enough for affected landholders

More expensive up front but with long term benefits, environmentally, emotionally & economically, all whilst delivering the desired outcomes

Fair is fair, would you like to live under these proposed monstrosities...
