**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING  
THE TRANSMISSION INFRASTRUCTURE FOR  
RENEWABLE ENERGY PROJECTS**

**Name:** Mr Charlie Webb

**Date Received:** 13 July 2023

---

I consider that it is paramount that powerlines are placed underground. Decreased fire issues. Declining rural population means less people available to fight fires. Decreasing chance of devastating fires on the communities infrastructure and cultural devastation. Social and environmental impacts of horrific powerlines invading peoples property and personal space. As most of the infrastructure will be imported to build these powerlines. Why do we need to do this reduce the devastation to roads transporting all this infrastructure.

Thank you for considering my opinion. Charlie Webb
