**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING
THE TRANSMISSION INFRASTRUCTURE FOR
RENEWABLE ENERGY PROJECTS**

Name: Name suppressed
Date Received: 14 July 2023

Partially
Confidential

If any one had lived through the catastrophic bushfires of 2019/2020, as we did, they would automatically advise that the proposed power lines, go under ground. It is also 2023-not 1963-the idea of ugly, obtrusive power structures scarring the environment is outrageous. Please take the time needed to change to renewable energy-get the necessary infrastructure right & put the power lines underground. Generations to come will praise you for it.
