**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING
THE TRANSMISSION INFRASTRUCTURE FOR
RENEWABLE ENERGY PROJECTS**

Name: Ms Jocelyn Guy

Date Received: 14 July 2023

The environmental damage being caused by these wind turbines and solar panels is terrible. To add to the scaring of our landscape the idea of massive transmission lines is so irresponsible. We should be protecting our bush and farming land, not destroying it. What about the impact to our wildlife? Don't let foreign investors destroy it. There's no going back once we go down this path. Remember wind turbines and solar panel have a limited lifespan, 10-20 years. So what happens when their life is over. Do transmission lines stay? This is so terrible. Such transmission lines must go underground.
