**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING
THE TRANSMISSION INFRASTRUCTURE FOR
RENEWABLE ENERGY PROJECTS**

Name: Name suppressed

Date Received: 14 July 2023

Partially
Confidential

To Whom it may concern:

I oppose overhead powerlines and support undergrounding new transmission lines.

The reasons why are as follows:

- 1) The way to achieve net-zero emissions is to put powerlines underground and protect the environment.
- 2) Overhead lines start bushfires. On days of extreme fire danger, the risk of bushfires from electrical infrastructure rises dramatically.
- 3) The rest of the world is progressive and are shocked that Australia is building more overhead transmission lines.

Please do not allow the overhead powerlines to go ahead - put the powerlines underground.

Thank you.
