**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING  
THE TRANSMISSION INFRASTRUCTURE FOR  
RENEWABLE ENERGY PROJECTS**

**Name:** Name suppressed  
**Date Received:** 14 July 2023

---

Partially  
Confidential

It is brainless not to insist on underground infrastructure for HumeLink's proposal. Ugly, perishable, weatherbeaten towering structures represent a blight on our countryside and greatly diminish the value of our properties - ugly eyesore, open to the elements, dangerous to human and pastoral health (radiation, etc). In comparison, underground infrastructure lasts longer, as evidenced in EU, is harmless & not a visual train wreck. Slightly higher installation costs are far outweighed by long term efficiency, viability and healthiness. Ban HumeLink's overhead transmission proposal immediately to enable our residents to live healthier and more viably without the bane of this ugly, toxic, depressing, self- imposed transmission Hades.
