Submission  
No 11a**

**INQUIRY INTO PROPOSED AERIAL SHOOTING OF  
BRUMBIES IN KOSCIUSZKO NATIONAL PARK**

**Name:** Kathy Cercone

**Date Received:** 5 September 2023

---

I'm writing to you because there have been more Brumbies shot and killed! I would like to know if you all are working towards killing them all. I would like to know how you all think this is alright? It's Cruel and Inhumane and I pray that you all will eventually be prosecuted to the fullest. You're not above the law! Animal Cruelty is Animal Cruelty!!! If the people can't get you all prosecuted I pray that KARMA comes around and makes you pay.

The numbers are impossible. Even if every mare had a foal every year it isn't possible. Horses have the longest gestation, 11 months and they only have 1 foal. Not all foals and mares survive the birth. And most mares don't have a foal every year. Not to mention the ratio of mares is about one third to two thirds Stallions.

I have seen thousands of pictures of yours parks. Horses aren't damaging Parks. Pigs and deer are. Deer eat plants and bushes along with flowers not the grasses. Pigs eat roots and underground bugs along creeks where it's easy to dig. Horses eat the grasses that burn extremely fast and hot. The horses can help keep the massive fires from happening. I find it hard to believe that Parks are being damaged so badly. One acre of grasses will support one horse for life as they move from area to area. So 100 acres will have support 100 horses.

Please do your job and take care of these animals welfare. Please don't allow them to be extincted
