**INQUIRY INTO PROPOSED AERIAL SHOOTING OF
BRUMBIES IN KOSCIUSZKO NATIONAL PARK**

Name: Mrs Louise Gladman

Date Received: 29 September 2023

How can you live with what you're doing.

Pregnant, full term mares, killed for no reason.

Foal that should have had its whole life

ahead of it, didn't even get born. Became food for wild dogs

and pigs.

The numbers of these creatures are not accurate. Will you be held accountable when there is none left after the promise of 3000 to remain? Enough is enough! This country is not Australia any more.

I am ashamed to be Australian, that hurts to say.

The corruption, cheating and lying governments and agencies, is just appalling. It gets worse daily.

I am not going to write this nicely any more, I am angry, upset and mentally drained and scarred from what has happened. You will have not just lives of the innocent animals but also human lives on your hands!

How will you deal with that? This is traumatic and murder. Open your eyes, the damn horses are not doing all the claimed damage for God sakes! Get out of your comfort

zone and flash offices and do some proper work before signing death orders.

Stand up for what is right! Research yourself, don't just take the words of those who have one agenda of complete slaughter. Their "facts" don't add up at all. One main one is the frogs, dying from fungus, nothing to do with horses.

The destruction of streams and ecosystems systems. Tantangara dam should show you that is bullshit! Hardly any horses left, and look at the conditions of it..Snowy 2.0.

Regularly fined by EPA for pollution into waterways. The destruction they are causing throughout the park is horrendous. Blowing up tunnels and God knows what.

How is that appropriate?

Trout is introduced species in the waterways, and is also killers of the smaller spawns and galaxes, yet again, the horses are destroying and killing them? Maybe if more

money was to be made from the horses it would be a different story then? Joke is, it could be. People love seeing them in their natural habitat, living as they should be. God help us the day someone decides they can do better than us humans and wipe us out in the process. One word, KARMA!
