**INQUIRY INTO CLIMATE CHANGE (NET ZERO
FUTURE) BILL 2023**

Name: Ms Penny Cooke

Date Received: 20 October 2023

To Whom it may Concern

I am writing to express my gratitude regarding the Climate Bill (net zero reduction S) 2023. Obviously this is required for Australian s safety re carbon emissions and the resulting impacts of climate change.

I would like this bill to be extended to include no more newly funded coal stations with a massive investment in renewables. Coal stations and a reduction in carbon emissions do not corralate Currently the number of proposed coal stations need to be drastically reduced to find a safe way forward for us a Pacific national and the world to meet current world targets.

Thank you,

PENNY COOKE
