

**Submission  
No 10**

**INQUIRY INTO CLIMATE CHANGE (NET ZERO  
FUTURE) BILL 2023**

**Name:** Dr Claudia Koller

**Date Received:** 20 October 2023

---

Based on scientific and observational evidence, we are rapidly heading into climate chaos. To keep the pleasant environment most of us are used to, we must act now in any way we can to reduce and eliminate all greenhouse gas emissions. We can no longer delay. Profits for a few do not justify further emissions. And we all must get used to live within our sustainable limits to protect our planet for younger and future generations. Adding more mines and gas fields is irresponsible. Please desist.
