## **INQUIRY INTO BIRTH TRAUMA**

**Name:** Mrs Kelly-Anne Grace

**Date Received:** 12 August 2023

---

I was undiagnosed by two different hospitals, eventually diagnosed with Acute Fatty Liver Of Pregnancy. I feel through all the cracks in the system. My blood tests were not followed up. I'm not sure what I'm supposed to write here but my baby was born I responsive, put on a ventilator and transferred by helicopter to NICU. I didn't see her for got 24 hours. My condition deteriorated over 4/5 days. Ended up needing two more surgeries after the emergency C-section. Incredible amount of trauma both physically and mentally for me. And mentally for my entire family.
