## INQUIRY INTO BIRTH TRAUMA

**Name:** Mrs Josephine Orman

**Date Received:** 15 August 2023

---

I gave birth to my daughter on the 1st of September 2022, and as a woman having an an ivf pregnancy I went past due dates all was going well with my pregnancy but when my water broke and I was admitted into the labour ward, I was coerced into starting syntocinon and in order to start syntocinon I was blackmailed into having the fetal scalp electrode I was also denied intermittent monitoring and was coerced into having continuous monitoring which was something else against my wishes. I feel like my birth wishes were never even considered.
