INQUIRY INTO BIRTH TRAUMA

Name: Amanda Perrin

Date Received: 11 August 2023

In 2021 I birthed early (miscarried) twin daughters at 20 weeks. Then becoming pregnant again I had another miscarriage which led to excessive blood loss at home and then ambulance transfer. The doctors ordered a blood transfusion before I returned to consciousness. Very traumatic with excessive blood loss and doctors removing blood clots from my vagina. As this was During covid with the restrictions in place, I was forced to be alone while loosing another baby and experiencing something very scary. My partner was left at home and simply told he wasn't allowed to come.
