**INQUIRY INTO FEASIBILITY OF UNDERGROUNDING
THE TRANSMISSION INFRASTRUCTURE FOR
RENEWABLE ENERGY PROJECTS**

Name: Name suppressed
Date Received: 8 November 2023

Partially
Confidential

OBJECTION: I object to the proposed project as it is ruining arable land, destroying both natural habitat and agricultural land for use in the future. I was never consulted about a REZ and do not believe the state has the right to place these monstrous structures over our land. If they insist in persisting with the REZs, the transmission should all be placed underground as they have the technology, and will not impact the land to the same extent.
