## **INQUIRY INTO DEVELOPMENT OF THE TRANSPORT ORIENTED DEVELOPMENT PROGRAM**

**Name:** Miss Cindy Timms

**Date Received:** 17 March 2024

---

A major investigation by the people of Australia into the corruption of so many aspects they control that are destroying the very country we all as Australians live and love. The destruction causing our wildlife to be displaced and become extinct, the massacre of native trees because of development, the destruction of heritage sites because of greed and the displacement of Aussies because too many non citizens allowed to purchase properties that are driving prices up in purchasing and rentals that Aussies can no longer afford. The government is not protecting its citizens and not protecting Australia. Simple things as buying groceries are also another problem the government are not addressing. Allowing criminals in the back door because of immigration lawyers instead of the government protecting its people.. Australia has never ever been in a state of emergency as it is now..
