INQUIRY INTO DEVELOPMENT OF THE TRANSPORT ORIENTED DEVELOPMENT PROGRAM

Name: Ms Linda Christian

Date Received: 18 March 2024

The NSW government's new planning policies are being rushed through. I believe we need to have the government consult and work with the Councils to keep some protections in place for natural and built heritage, and to maintain green corridors throughout the areas affected by the new building zones. Also it is necessary to invest in additional infrastructure to support the thousands of extra people who will be living in the additional housing .

To just give permission to developers to build high density housing within 400 metres of each rail hub is lazy policy, the worst I have ever come across.

You can do better. Please do!
