The quiet Drummoyne street where our family lives has now become full of cars, many speeding to catch the green traffic light, and is very dangerous to the many young children who live here.

Our commute to school is taking on average 60-80 minutes return trip. This is prior to starting work. The loss of productivity to myself, my family, my business and the community is massive.

Victoria Road has now become a literal carpark in peak hours. The noise of cars, frustrated commuters and car fumes has made Victoria Rd shopping a hazard zone during these peak hours.
