INQUIRY INTO IMPACT OF THE ROZELLE INTERCHANGE

Name: Name suppressed

Date Received: 20 March 2024

Partially
Confidential

Dear committee

I am contacting you as a resident of the Leichhardt area .

Since the opening of the Rozelle interchange there has been a significant detrimental change in the flow of traffic in the Leichhardt / Annandale / Rozelle/ Balmain / Drummoyne link roads Local residential streets in Leichhardt are now in certain times backed up for in some cases & times up to 800 meters to gain access to the City West Link

This includes lengthy delays on cross roads approaching & around the Iron Cove Bridge plus the city west link has been reduced to a slow moving parking lot city bound in the AM as the interchange has a funnel affect on traffic volumes at the Victoria rd city west intersection As a traveler to the City & Balmain & Gladesville directions regularly I am amazed that such poor outcomes have eventuated .

The changes have left me no alternatives than to re route my trips both time wise & directional routes .

It is a poor situation when previous excellent suburbs have there liveability reduced by some quite substandard planning .

Yours sincerely
