## INQUIRY INTO IMPACT OF THE ROZELLE INTERCHANGE

**Name:** Name suppressed

**Date Received:** 20 March 2024

---

Partially  
Confidential

1. Having had time away from Rozelle with the anticipated plan to return and finding the unforeseen circumstances of asbestos in Rozelle parkland has now cause myself and wife uncertainty about the environment and how safe it would be to resume living in Rozelle again given our age and health concerns!

We request government to show cause of the management plan that ought to have been implemented that could be seen they did not and hold those responsible accountable

2. Traffic within the area of Rozelle has been an ongoing issue given the increase of students at the local schools and further development that forms part of the Rozelle traffic congestion which seems now the government or local council had turned a blind eye ?

In order the cater household occupancy has already show since 2010 the heavily traffic issues that hasn't to date been addressed!

What is government doing about this ?
