INQUIRY INTO IMPACT OF THE ROZELLE INTERCHANGE

Name: Sharon Webster

Date Received: 21 March 2024

To the Committee

Why was the company responsible for cleanup of the asbestos mulch given an extension ? Access to The Biennale at White Bay via the Lightrail & parkland pedestrian & cycle access is totally blocked . I have seen a few worker's digging around trees with shovels on & off for months . Surely priority for cleanup should have been enforced for a quicker resolution .

Given the lack of parking at White Bay and the local traffic congestion caused by the WestConnex project public transport must be upgraded urgently & given priority at all levels of decision making . This should have included extensions for the asbestos cleanup .

Yours in total frustration

Sharon Webster
