INQUIRY INTO IMPACT OF THE ROZELLE INTERCHANGE

Name: Name suppressed

Date Received: 24 March 2024

Partially
Confidential

Thank you, for the opportunity to make a submission to the Rozelle Interchange Inquiry. I want to add my voice to that of many other residents of the Canada Bay Local Government Area who have raised concerns about the impact that design decisions for the Rozelle Interchange (the Interchange) have had on our LGA, particularly Drummoyne.

Since the opening of the Interchange, I have noticed a decrease in traffic flow, and an increase in traffic congestion and gridlock along Victoria Road and the Iron Cove Bridge. As a result, frustrated commuters seek alternative routes through the residential streets of Drummoyne, turning previously low traffic areas into busy and unsafe rat runs.

Alongside fellow residents of Canada Bay LGA, I urge Transport for NSW to revamp its approach to community consultation. Genuine collaboration with affected communities will foster timely delivery of much-needed effective solutions.

Regards,

Five Dock Resident.
