**INQUIRY INTO IMPACT OF THE ROZELLE
INTERCHANGE**

Name: Name suppressed

Date Received: 21 March 2024

Partially
Confidential

How can the government spend billions of dollars to improve the roadways and get it SO WRONG? The Rozelle Interchange is a disaster. Commuting times are LONGER not shorter. For example, coming down Victoria Road in the morning.

Signage is very poor and there is no forewarning before a decision has to be made to choose one roadway versus another. For example, at the end of the Anzac Bridge coming from the city, I have seen a number of cars deciding at the last moment that they do NOT want to go into the tunnel (towards Drummoyne) so they BACK OUT of the tunnel.

There are a number of places where lanes merge all of a sudden and yet there is no forewarning so there are a lot of honking and angry people ... an accident waiting to happen.

Please address these issues asap.
