It costs a lot to have medical cannabis. If we had same laws to grow as the others it'd be cheaper and no one standing over you or mixing anything else to the product. CBD would be great for me cancer as it's not cheap either. Im told id feel much better as it cures cancer. Life's hard when you know people get behind the wheel of a car after taking meds that are more dangerous than this simple herb plant. Many still suffering because it's too dear from the government .

Please think about all the sufferings that could be stopped by legalising this herb.
