**INQUIRY INTO IMPACT OF THE REGULATORY
FRAMEWORK FOR CANNABIS IN NEW SOUTH WALES**

Name: Mr Zachary McGill

Date Received: 9 May 2024

I use cannabis to help with my epilepsy and other health problems. But the product is way too expensive and hard to get. Why can't I just grow my own? Why do I have to pay through the nose for cannabis that's not even good quality, and isn't even checked by the TGA?

It doesn't make sense that I can't grow my own medicine at home, but companies can charge me an arm and a leg for it.

It's clear that cannabis is a big money-maker for investors, which I'm okay with, as long as I can grow my own. That way, I know it's good quality and I get to choose the strain I want, and I don't have to rely on a system that seems to care more about companies than patients like me.
