**Make the laws here the same as the approach Canada has taken! The comparison between two similar recreational drugs, one legal (alcohol) one not (cannabis), shows how logical full legalisation of cannabis should be.**

**Make it recreationally legal and let people use an alternative to alcohol that brings completely oppositional and drastically better health outcomes. If alcohol is not a medicine but can be bought legally to alter your state of mind and sobriety, then cannabis can provide the same mind-altering, anxiety self-medicating, fun and recreational benefits AND the same socio-economic benefits but with less negative outcomes.**

**More money in from tax, less money spent on alcohol related hospitalisations and**

**property damage. The money made on cannabis tax could actually treat economic burden on health caused by alcohol, tobacco and covid.**

**You would have to be unequivocally short-sighted and uneducated to still believe cannabis should be illegal, for whatever reason!**
