

**Submission  
No 213**

**INQUIRY INTO IMPACT OF THE REGULATORY  
FRAMEWORK FOR CANNABIS IN NEW SOUTH WALES**

**Name:** Mr Darren Lloyd

**Date Received:** 10 May 2024

---

My name is Darren Lloyd. I have had to move to Queensland to look after my elderly mother. I also have X/linked Spastic Paraplegia & suffer from severe Dermatitis. And whilst being up here I have been supported by my doctor and CDA Clinics to legally have Medicinal Cannabis which has helped improve my quality of life as I was walking very stiff legged and joints and living in pain to go with painful Dermatitis, Now I have freedom to move a lot more normal then usual and my skin has improved dramatically. This can help So Many People like me & others. They also need to make a breathalyser to gauge intoxication because ,you can drive safely. Assure me I can be put under a test to prove it. However you wouldn't drive if you felt that it was unsafe you would only need to wait a day or 2 sometimes a couple of hours with weak cannabis not everyone uses it to be wiped out. Thank you please hear Me
