**INQUIRY INTO IMPACT OF THE REGULATORY
FRAMEWORK FOR CANNABIS IN NEW SOUTH WALES**

Name: Miss Elizabeth Grant

Date Received: 30 June 2024

I have Endometriosis, a chronic health condition and cannabis has been a life saver for me when it comes to reducing pain and inflammation. Without cannabis, my quality of life would be subpar at best. It would be against the financial interests of Australia to not legalise cannabis nationwide. From a business stand point, it would be dumb not too. The cannabis industry is worth over 4.5 billion dollars in annual revenue... why would you not legalise this beautiful medicine if not only those with illness, but business executives would agree this would be a missed opportunity and you would continue to halt Australia's economical progression and progressive values. Enough Aussies already partake in cannabis use. Just legalise it ALREADY! we have been having this conversation for far too long and Australians are fed up with it. Legalise it NOW. I NEED MY MEDICINE AND WE NEED TO RELEASE ALL THOSE WHO HAVE BEEN CHARGED WITH CANNABIS RELATED CRIMES TO BE FREE FROM THOSE absolutely barbaric laws. It's 2024, it's time Australia caught up.
