INQUIRY INTO PROPOSAL TO DEVELOP ROSEHILL RACECOURSE

Name: Ms Janelle Dilger

Date Received: 26 June 2024

Horse racing is unnecessary. The abuse of animals for sport and entertainment is archaic. We should know better. We are breeding horses to compete for us and when they don't win and meet our demands for huge sums of prize money, we discard them. They are overbred, mistreated and used as commodities. We can't even manage to regulate the system because we are scared of exposing those who prosper from the system. Its an appalling abuse of sentient animals and it needs to stop. We are advanced humans, we can have fun without creating misery for helpless animals. Its time we grew up and took accountability for those who don't have a voice. Please stop glamourising this atrocious sport.
