**INQUIRY INTO IMPACT OF THE REGULATORY
FRAMEWORK FOR CANNABIS IN NEW SOUTH WALES**

Name: Mrs Crystal White

Date Received: 31 July 2024

I am heavily in support of cannabis legalisation for NSW and Nationally. Australia is so far behind many other countries on this. This area is highly scientifically studied and supported. Data shows NO deaths from cannabis consumption worldwide!

I am not a consumer but I believe it is harmless and am in support of people having greater access to cannabis for health benefits.

This is in all forms, edibles, oils, juicing of leaves, leaves in cooking, growing and consuming.

This is after all just a natural plant with so many benefits.

There are many benefits that don't have an intoxicating effect such as other cannabinoids like CBD and CBG which help with anxiety and sleep but have no psychoactive effect at all.

By denying this to people is very sad and controlling.

People should be able to grow their own.
