Partially  
Confidential

I am an Australian citizen who has been proud of our cultural awareness and protection of wildlife and animals in general.

I have also felt protected with the tight sane gunlaws that protect our safety and wellbeing.

Australia has an extraordinary and precious natural ecosystem that has space and capacity to honour animals unlike most other countries in our overpopulated world.

It is also wonderful that we have so many shared public spaces that accommodate our population with sanity and care.

I am a devoted labour fan and have been for 30 years.

I am horrified and devastated at the proposed request from the hunters and fishermen party to relax gunlaws and have open access to 50,000 hectares of public space.

This will open up a very dangerous potential for abuse of using guns and encouraging aggression and violence with in our culture. It will also prevent the rest of our population from accessing this public space with safety and confidence.

Animals only have our voice as their protection. They are so so vulnerable to humans and depend on us to preserve and protect their natural spaces.

Please honour Australians with a compassionate and kind nature. A nature that enables sanity and respect towards ourselves and our environment.

Please do not make a decision to support and encourage brutal thoughtless harm and killing of our animals by humans who aren't even necessarily aware or connected to the harm and suffering they are causing. This loose brutality and use of guns can easily in time, be directed towards other humans like America.

Please honour and protect human integrity and compassion

Thank you.
