**INQUIRY INTO PROPOSED ENERGY FROM WASTE
FACILITIES**

Name: Name suppressed

Date Received: 24 October 2025

Partially
Confidential

They are not truly an energy provider, it is greenwashing the actual burning of waste

What is actually being put in the incinerator? Think asbestos

They pollute our waterways

Why place in the food bowl of Australia that puts food on our tables

Why compromise our health and food safety

Education is key, stop the waste – then there is no need for such facilities

Overseas incinerators have to import waste to keep the facility running

If regulators can't regulate current waste facility managers, why give them management over a highly dangerous facility
