**INQUIRY INTO PROPOSED ENERGY FROM WASTE
FACILITIES**

Name: Mrs Katie Collins

Date Received: 31 October 2025

Partially
Confidential

I object to the proposed waste incinerator at Tarago, particularly one that is operated by the current Veolia Woodlawn Eco Precinct.

In summary it is my experience as a local within the Goulburn Mulwaree council area, and someone with qualifications in the natural sciences, that the hydrogeological context of the Tarago area, with complications of the landfill, mining operations, and agricultural industries, is a higher risk for contamination from incinerator activities and that such a development should only be approved following an extensive Environmental Impact Assessment, which includes the cumulative impact of the landfill and mining operations and their impact on hydrology and air quality for the area, including the methane production from the existing landfill and mining activities.
