**INQUIRY INTO PROPOSED ENERGY FROM WASTE
FACILITIES**

Name: Name suppressed

Date Received: 26 October 2025

Partially
Confidential

Living in the town of Parkes my family and I are Ming the population who are totally horrified about the idea of an incinerator coming to our town. This is unacceptable for our community, for our farmland, for our environment and for our future population. The consequences of having this incinerator have been pushed aside by the government saying Sydney will not be the place for it. Why on earth would the government risk anyone's health or livelihood by putting an incinerator in any populated area. Financial cost seems to be the main point for this construction. Build this incinerator out in the middle of nowhere and have fly in fly out workers to monitor it, destroying our county lifestyle and replacing it with health issues and drop in market value of our homes and land. Once again people who don't live in Sydney are being regarded as of less value. Our country needs sustainable farming land and yet the government seems to think an incinerator is more important, keep the rubbish where it belongs and that is not out here in our small country town . Our council is not fighting hard enough against this proposal and the people have no choice but to stand up and be loud about being heard .please have mercy on our town, our land and our future and take this incinerator elsewhere. If you insist on placing this incinerator in our town then you also need to come and live here. Risk your health , your land loss, your livelihood loss and the future of the next generation. It's just not good enough. Please intercede and take this incinerator idea away from Parkes.
