Submission to Parliamentary Inquiry into proposed Energy From Waste Incinerators in NSW from

My name is . I am 10. I live with my little sister, my dad, my mum and our dog. We live in . I go to . I had a liver transplant when I was 16 months old. I have a special heart. It has two left sides instead of one left and one right side. I have to go to the hospital every 3 months so they can check on me. Sometimes I go to and sometimes I go to . My best friend's name is . He lives in too. He had cancer when he was little. Its good we are both okay now.

The recycling people came to our school. They said don't burn rubbish because it traps the heat in the atmosphere. It is unsafe to burn rubbish because it can make the air bad.

I don't think we should have the incinerator near where people are living. It might make the air bad. No one is allowed to build one in Canberra. And no one is allowed to build one in Sydney. I don't think it makes a difference building it in Sydney or out here because there's still lots of people here.

Near Paris they can't eat their eggs because the air and the ground are contaminated because of their incinerator. We don't want to not eat our eggs here. I love eating eggs and they are so healthy for us. I can't have chickens on our farm because of my liver transplant but I can eat chickens and eggs. Our friend gives us eggs from his farm.

We moved out here for the fresh air. Mum said it is better for our health. Now the people who want to build an incinerator near my house say they can't make sure the air will stay as safe as it is now. I don't like that. I don't want getting sick again and I don't want to be sick. I don't think we should make incinerators in Australia.
