INTRODUCTION

This paper presents data from the Australian Bureau of Statistics (ABS) 2016 Census of Population and Housing for the 93 NSW State Electoral Districts (SEDs) as redistributed in 2021. Where available, figures from the 2011 Census have also been included to show change over time. A companion Background Paper – [NSW Electorate Profiles: 2016 Census \(2021 Redistribution\)](#) – presents the same data by electorate. A political party affiliation has been given for each electoral district. As the electoral districts have been redistributed since the most recent election in 2019, the party affiliation shown is notional only. The affiliation is based on the 2019 election results adjusted by the new boundaries as calculated by Antony Green in [2020/21 NSW Redistribution: Analysis of Final Electoral Boundaries](#), NSW Parliamentary Research Service Background Paper No 01/2021. Notional party affiliations may differ from the party affiliation of a sitting Member due to events such as the redistribution or recent by-elections.

A summary of key findings is presented on pages 2 to 4. The Background covers general information on the Census of Population and Housing including undercount, changes between the 2011 and 2016 Censuses, and data quality and interpretation. Note that 2011 figures are not provided for family and household weekly income because the income brackets used in the Census changed between 2011 and 2016.

This publication is arranged by selected census characteristics. For each characteristic, three numbers from the 2016 Census are provided for all 93 NSW SEDs:

- A count of persons/families/dwellings;
- The count expressed as a percentage of the total electoral division population, or a subset of that population (where relevant); and
- The electorate's rank in relation to all electorates (in most cases based on the percentage).

In many cases, the percentage provided for a census characteristic was calculated in relation to the total number of persons in the electoral district. However, for a number of these characteristics, the percentage was calculated in relation to a *subset* of the electoral district's total population. For example, the total number of employed persons in an electoral district is expressed as a percentage of the total number of persons in the electoral district aged 15 and over. A table showing the population used when calculating the percentage for each characteristic is provided on pages 19 to 20.

Data for each census characteristic is presented in two tables. The first lists the SEDs according to their rank. Note that 2011 figures are not provided for family and household weekly income because the income brackets used in the Census changed between 2011 and 2016. The second table presents the same information with the SEDs listed in alphabetical order. Each Table includes the State average. Averages for 12 regions are also provided. The electorates that make up these regions are identified on page 21.

SUMMARY OF KEY FINDINGS

The following table summarises the key findings of this paper. For each characteristic, it shows the SED with the greatest and smallest proportion. The NSW average is also shown.

Characteristic	Greatest proportion		Smallest proportion		Average
Population					
Total population	Sydney	106,075	Londonderry	66,921	80,296
Population growth (2011 to 2016)	Heffron	29.2%	Barwon	-3.2%	8.2%
Population density (persons per sq km)	Newtown	7,801.7	Barwon	0.2	9.3
Area (square kilometres)	Barwon	356,310.7	Newtown	10.8	8,626.1
Number of females	North Shore	53.0%	Sydney	46.9%	50.7%
Number of males	Sydney	53.1%	North Shore	47.0%	49.3%
Persons (18+) who are Australian citizens	Charlestown	91.7%	Sydney	52.2%	80.9%
Persons who changed address in the last five years	Sydney	56.8%	Barwon	28.1%	39.0%
Age					
Persons aged under 5	Riverstone	9.0%	Sydney	3.0%	6.2%
Persons aged between 5 and 14	Kellyville	16.6%	Sydney	3.2%	12.3%
Persons aged between 15 and 24	Heffron	18.3%	Bega	8.6%	12.5%

Flat or apartment dwellings	Sydney	79.6%	Leppington	0.2%	20.7%
Public housing	Mount Druitt	13.4%	Davidson	0.1%	3.8%
Dwellings which are caravans	Tweed	5.2%	Seven electorates	0.0%	0.8%
Other					
Dwellings with an internet connection	Kellyville	93.4%	Barwon	60.1%	78.2%
Persons requiring assistance with core activities	Fairfield	9.1%	Sydney	2.2%	5.4%
Persons providing unpaid assistance to a person with a disability	Lake Macquarie	14.1%	Sydney	5.8%	11.6%
Persons who contributed to voluntary work	Wahroonga	27.4%	Fairfield	8.6%	18.1%

BACKGROUND

2016 Census data additions

The 2018 and 2022 editions of the *NSW Electorate Profiles* publication include eight new census characteristics when compared to the [2014 editions](#), the first six of which relate to **equivalised total household weekly income**:

- Households with nil income;
- Households with income from \$1 to \$399;
- Households with income from \$400 to \$799;
- Households with income from \$800 to \$1,499;
- Households with income from \$1,500 to \$2,499;
- Households with income of \$2,500 and above;
- Youth unemployment rate; and
- Female labour force/participation rate.

In discussing the use of income data to evaluate the well-being of individuals, the ABS states:

Household¹ income, rather than personal or income unit income, is generally the preferred measure for analysis of people's economic well-being as the major determinant of economic wellbeing for most people is the level of income they and other family members living in the same dwelling receive. While income is usually received by individuals, it is normally shared between partners in a couple relationship and with dependent children. To a lesser extent, it may be shared with other children, other relatives and possibly other people living in the same household, for example through the provision of free or cheap accommodation. Even when there is no transfer of income between members of a household, nor provision of free or cheap accommodation, members are still likely to benefit from the economies of scale that arise from sharing a dwelling.

When the household is used as the unit of analysis for income, adjustments to the actual incomes of households should be made to enable analysis of the relative wellbeing of households of different sizes and composition ...²

The ABS defines equivalised total household weekly income as the:

... household income adjusted by the application of an equivalence scale to facilitate comparison of income levels between households of differing size and composition, reflecting that a larger household would normally need more income than a smaller household to achieve the same standard of living.

¹ The ABS nominal definition of a 'household' is 'One or more persons usually resident in the same private dwelling'.

² Australian Bureau of Statistics, [1287.0 – Standards for Income Variables, 2010](#), 15 March 2010

Equivalised total household income is derived by calculating an equivalence factor according to the 'modified OECD' equivalence scale, and then dividing income by the factor. The equivalence factor is built up by allocating points to each person in a household (1 point to the first adult, 0.5 points to each additional person who is 15 years and over, and 0.3 to each child under the age of 15) and then summing the equivalence points of all household members.

Equivalised total household income can be viewed as an indicator of the economic resources available to a standardised household. For a lone person household it is equal to household income. For a household comprising more than one person, it is an indicator of the household income that would be needed by a lone person household to enjoy the same level of economic wellbeing.³

Equivalised total household income is also used in the measurement of poverty. As described by the Productivity Commission in its report [Deep and Persistent Disadvantage in Australia](#):

The measurement of relative poverty, as a proxy for disadvantage, requires the choice of a specific threshold or distance from median income. The main threshold used by the OECD is 50 per cent of median equivalised household income — that is, income adjusted for the composition of the household ... The European Union countries most commonly use a poverty line set at 60 per cent of median income (Besharov and Couch 2012). The specific threshold chosen is somewhat arbitrary.⁴

The **youth unemployment rate** has been added due to the significance of this issue in current public debate. In [December 2021](#), the NSW youth unemployment rate of 11.0% was over twice the total unemployment rate of 5.0%. Regional rates can often be much higher; for example, the Southern Highlands & Shoalhaven region had the highest youth unemployment rate in December 2021 at 18.1%.

A new census characteristic (**Female labour force/participation rate**) provides a measure of the participation of women in the labour force by expressing the number of women in the labour force as a percentage of the total population of women aged 15 and over. The 2018 and 2022 editions also retains the census characteristic “Women in the labour force”, which addresses the question of what proportion of an electorate’s labour force is made up of women by expressing the number of women in the labour force as a percentage of the total labour force.

A different definition of “total households” has been used in the 2018 and 2022 editions. In the 2014 edition, “total households” was equivalent to the sum of:

- One family households;

³ Australian Bureau of Statistics, [2901.0 – Census of Population and Housing: Census Dictionary, 2016, Equivalised Total Household Income \(weekly\) \(HIED\)](#), 23 August 2016.

⁴ McLachlan R et al., [Deep and Persistent Disadvantage in Australia](#), Productivity Commission Staff Working Paper, July 2013, p 33-34.

- Multiple family households;
- Non-family (“Lone person” and “Group”) households;
- “Visitors only” households; and
- “Other non-classifiable” households.

The last two categories have been excluded from the count of total households in the 2018 and 2022 editions in order to be consistent with ABS Census publications.

The 2018 and 2022 editions include one change to the name of a characteristic: “Labour force” has been retitled “Labour force/participation rate” because the associated percentage is equivalent to the participation rate (i.e. the labour force expressed as a percentage of the total population aged 15 and over).

The 2016 Census of Population and Housing

Privacy concerns

Prior to the 2016 Census, public concerns were raised about data retention and privacy.⁵ This is because the ABS had announced on 18 December 2015 that it had:

... decided to retain names and addresses collected in the 2016 Census of Population and Housing in order to enable a richer and dynamic statistical picture of Australia through the combination of Census data with other survey and administrative data.⁶

On this issue, the [Census Independent Assurance Panel](#) noted that:

Impacts [on responses to the census] are apparent with more persons reporting age rather than date of birth and the percentage of persons agreeing to have their Census form archived for 99 years declining when compared with previous Censuses. However, the Panel has concluded that while some changes in response were observed, their impact on the accuracy of the Census data was minimal.⁷

Data quality

On Census night, 9 August 2016, the online Census website experienced a series of [Distributed Denial of Service attacks](#). In response, the ABS made the decision to take down the online Census form as a “precautionary step ... to

⁵ See for example: Biddle N and Phillips B, [Benefits of the census retaining names and addresses should outweigh privacy fears](#), *The Conversation*, 6 April 2016 [website – accessed 21 March 2018]; Grattan M, [The battle over the census is likely to continue well beyond census night](#), *The Conversation*, 9 August 2016 [website – accessed 21 March 2018].

⁶ Australian Bureau of Statistics, [Retention of names and addresses collected in the 2016 Census of Population and Housing](#), 18 December 2015, page last updated 14 April 2016.

⁷ Harding S et al., [Report on the quality of 2016 Census data](#), 2017, p iv.

protect people's data"⁸. As a result, the then Prime Minister of Australia, the Hon Malcolm Turnbull MP, asked the Special Adviser to the Prime Minister on Cyber Security, Alastair MacGibbon, to conduct a review into the events of Census night. The [*Review of the Events Surrounding the 2016 eCensus Improving institutional cyber security culture and practices across the Australian government*](#) (the Review) found that:

On Census night, and in the subsequent outage period, system failure and the slow and inadequate communication with the public caused confusion, contributed to concerns about data security and reduced public confidence in the Census. The actual impact on data quality is uncertain, but the outages have raised public concerns about Census quality.

...

The current perception, even among many well-informed users, is that Census quality will be significantly affected by the outage.⁹

The Australian Statistician established the [*Census Independent Assurance Panel*](#) to provide an independent view of the quality of statistical outputs from the 2016 Census of Population and Housing. The Panel was tasked with:

... reviewing the 2016 Census data, having considered issues including, but not limited to the Census design, enumeration, processing and quality assurance, and using the quality of outputs from the 2011 and 2006 Censuses as benchmarks.¹⁰

The Panel concluded:

... that the 2016 Census data is fit-for-purpose and can be used with confidence. The 2016 Census data is of comparable quality to the 2011 and 2006 Census data.

The 2016 Census continued to collect a comprehensive, detailed picture of Australia's population with the retention of all 45 topics from the 2011 Census. The Panel examined a number of key topics including population counts, sex, age, income, Indigenous status, country of birth, language, ancestry and family structure. The Panel's analysis revealed that the levels and distribution of characteristics matched expectations well and were comparable to other independent data sources where applicable.

The response rate for the 2016 Census is lower but comparable to that from the 2011 and 2006 Censuses, and is similar to response rates seen in other countries, such as New Zealand, Canada, and the United Kingdom.

The 2016 Census population counts compare well against the preliminary 2016

⁸ Australian Bureau of Statistics, [*Still time to complete your Census*](#), Media release, 17 August 2016 [website – accessed 22 March 2018]

⁹ MacGibbon A., [*Review of the Events Surrounding the 2016 eCensus Improving institutional cyber security culture and practices across the Australian government*](#), Office of the Cyber Security Special Adviser, 13 October 2016, pp 80-81.

¹⁰ Harding S et al., [*Report on the quality of 2016 Census data*](#), 2017, p iii.

Estimated Resident Population data with key quality indicators from the Post Enumeration Survey lending further support for the comparability of the 2016 and 2011 Censuses. Net undercount for persons on Census forms is comparable to 2011, while over-imputation is larger in 2016 than in 2011, largely due to some non-responding dwellings being incorrectly classified as occupied on 2016 Census night.¹¹

Question changes

Changes were made to some of the questions asked in the 2016 Census.¹² Four of these are relevant to the census characteristics included in this paper.

Sex

The default question asked people whether they are male or female. [Special procedures](#) were introduced for both the paper and online forms to enable people to report as neither male nor female. The 2016 Census counted 1,260 sex and/or gender diverse people in Australia. However, the ABS does not consider this to be an accurate count, “due to limitations around the special procedures and willingness or opportunity to report as sex and/or gender diverse. People who have been treated with disrespect, abuse and discrimination because of their sex or gender may be unwilling to reveal their sex in an official document”¹³.

Religion

For the Censuses between 1991 and 2011, “No religion” was the last response category in the question. On the 2016 Census form, “No religion” was at the top of the list of responses for the question. The ABS reviews the order of response options before each Census, and generally places:

... the most commonly reported response option at the top in order to make the Census form easier and quicker to complete. Increases in reporting of ‘no religion’ in 2011 meant that this was the second most reported option, and likely to become the most reported option in 2016.

This change was made following the 2016 Census topic review process, where many submissions recommended changes to the Religious affiliation question due to perceived bias in the question format and consequent potential underestimates of the number of people who stated they had no religion.¹⁴

¹¹ Harding S et al., [Report on the quality of 2016 Census data](#), 2017, p iii.

¹³ Australian Bureau of Statistics, [2071.0 - Census of Population and Housing: Reflecting Australia - Stories from the Census, 2016: Sex and gender diversity in the 2016 Census](#), 28 June 2017.

¹⁴ Australian Bureau of Statistics, [2900.0 - Census of Population and Housing: Understanding](#)

Note that the question on religious denomination has [always been optional](#), as provided for in the legislation.

Dwelling internet connection

In the 2011 Census, the dwelling internet connection question asked whether the dwelling was connected to the internet and connection type. In 2016, the [question was changed](#) to a simple yes/no question asking “Does anyone in this household access the internet from this dwelling”.

Country of birth of parents

These questions were [amended](#) to allow respondents to provide details of the country of birth of their mother and father (where it is not Australia). The question previously used a generic “overseas” category, however consultation with key users of the data during the 2016 Census topic review showed opportunity for a greater understanding of the heritage and ancestries of Australia's population through changes to the questions.

Undercount and overcount

Following every Census, the ABS conducts a [Census Post Enumeration Survey](#) (PES) in order to provide an independent measure of Census coverage:

The 2016 PES included people from approximately 42,000 fully responding households across Australia. Information was collected for everyone present in the household. In addition to obtaining basic demographic information, questions were asked about each person's usual residence, their location on Census night, and any other addresses where they might have been counted in the Census.

PES results are used to determine how many people should have been counted in the Census, how many people were missed (undercount) and how many were counted more than once or in error (overcount).

Reasons why people may have been missed in the Census (i.e. undercounted) include:

- they were travelling and were difficult to contact;
- they mistakenly thought they were counted elsewhere;
- they did not wish to be included due to concerns about confidentiality or a more general reluctance to participate; and
- the dwelling in which they were located was missed because it was difficult to find (e.g. in a remote or non-residential area) or the dwelling was not included on the ABS Address Register.

Reasons why people may have been counted more than once (i.e. overcounted) include:

- they were included on the Census form at the dwelling where they usually live, even though they stayed and were counted elsewhere on Census night; and
- they were overseas on Census night and so should not have been counted at all, but were included on the Census form at the dwelling where they usually live.

Census **net undercount** “is the difference between the PES estimate of how many people should have been counted in the Census and the actual Census count”.¹⁵

In 2016, the net undercount in NSW was 0.8%. This means that 59,194 NSW residents were not counted on Census night. This is a marked decrease from the net undercount of 1.9% in 2011. For comparison, the net undercount for Australia was 1.0% in 2016 and 1.7% in 2011.

Net undercount varies by population characteristics. For the Australian population, the 0-4 age group recorded highest net undercount for any age group (5.1%); males were more likely to be missed than females (1.5% and 0.4% respectively); and persons born in Australia had the highest net undercount rate (8.1%).

Indigenous peoples experience the highest rates of net undercount in the Census. The 2016 PES estimated that 786,689 Aboriginal and Torres Strait Islander peoples should have been counted across Australia in the Census, compared with 648,939 persons who were counted. This is equivalent to a net undercount of 137,750 persons, or 17.5%. This continues an [upward trend](#) in the net undercount, with rates of 17.2%, 11.5% and 10.9% in the 2011, 2006 and 2001 Censuses respectively. It appears that the undercount is due to changing enumeration methods rather than an increased refusal to return Census forms. The ABS [notes](#) that Indigenous status is a characteristic that some people consider personal and sensitive, and consequently may not wish to divulge this information on their Census forms.¹⁶

Data confidentiality

As the ABS notes, “Under the [Census and Statistics Act 1905](#), it is an offence to release any information collected under the Act that is likely to enable identification of any particular individual or organisation. [Introduced random error](#) is therefore used by the ABS to ensure that no data are released which could risk the identification of individuals in the statistics.” In the case of [TableBuilder](#), which was used to access the data presented in this publication, the ABS maintains [confidentiality](#) by introducing small random errors so that the

¹⁶ See further: Angus C., [Indigenous NSW: Findings from the 2016 Census](#), NSW Parliamentary Research Service, Statistical Indicators 02/2018, March 2018.

rows and columns of a table may not always sum to the displayed totals. The ABS also notes that no reliance should be placed on small counts, namely 20 or less.¹⁷

Data interpretation

Drawn from relevant ABS publications like the [2016](#) and [2011](#) Census Dictionaries, the following material provides the reader with a guide for interpreting the data¹⁸ included in the electorate profiles.

Counts of persons, families, households and dwellings

All counts of persons are based on their [place of usual residence](#) (i.e. the place where a person usually lives), not their [place of enumeration](#) (i.e. the place at which a person is counted on Census night). All counts of families, households and dwellings are based on their place of enumeration.

All dwelling counts relate to the total number of **occupied private dwellings**, not the total number of dwellings. In 2016, occupied private dwellings accounted for 90.48% of all dwellings in NSW. The remaining dwellings fell into the unoccupied private dwellings (9.28%) and non-private dwellings (0.24%) categories.

Percentages and ranks

In many cases, the percentage provided for a census characteristic was calculated in relation to the total number of persons in the electoral district. However, for approximately half of the characteristics provided, the percentage was calculated in relation to a *subset* of the electoral district's total population. A table showing the population used when calculating the percentage for each characteristic is provided on pages 16 to 17.

All ranks are based on percentages except for the census characteristics "Total population" and "Population density", as well as for the area of the electorate. In these cases, the rank is based on the number provided.

Total State population

The ABS divides the total NSW population into the 93 State electorates and two additional categories: "No usual address (NSW)" (12,288 persons in 2016); and "Migratory – Offshore – Shipping (NSW)" (419 persons in 2016). Because these persons are not recorded as living in any of the 93 State electorates, they are excluded from the total NSW population used in the publication *NSW State*

¹⁷ Australian Bureau of Statistics, [2916.0 - Census of Population and Housing - QuickStats, Community Profiles and DataPacks User Guide, Australia, 2016: Confidentiality and protecting your data](#), 27 June 2017.

¹⁸ Some total figures reported in this publication may differ slightly from those available using ABS Census publications such as [QuickStats](#) and [Community Profiles](#) publications. This is due to variations in the construction of the total variables used across the series of different publications.

Electoral Districts Ranked by 2016 Census Characteristics for the purposes of calculating a NSW average for comparative purposes.

Not Stated

Recorded as “Not Stated” by the ABS, the [rate of non-responses](#) to a Census question varies by census characteristic. In 2016 in NSW, characteristics such as proficiency in spoken English (1.1%) and method of travel to work (1.0%) recorded some of the lowest non-response rates. In contrast, characteristics such as religious affiliation (9.1%), highest year of school completed (8.6%) and the number of motor vehicles at a dwelling (8.6%) recorded relatively high non-response rates. In some cases, the number of non-responses can exceed the count of significant variables. For example, the number of people who identified as being of Aboriginal and/or Torres Strait Islander origin in NSW in 2016 was 216,171, a much smaller number than the number of people who provided no response (437,765). It is worth noting here that the [majority of item non-response](#) is attributable to the people who did not respond to the Census at all.

Non-English speaking countries

The census characteristic, “Persons born in non-English speaking countries”, includes a few countries where English is spoken together with other languages; for example, [India](#). This publication uses the ABS definition of [Main English-speaking countries](#) when deriving this census characteristic, where these countries include:

- Australia;
- Canada;
- Republic of Ireland;
- New Zealand;
- South Africa;
- United Kingdom;
- England;
- Scotland;
- Wales;
- Northern Ireland; and
- United States of America.

Income data

The Census [asked](#), What is the *total* of all income the person *usually* receives? (emphasis in original). The respondent is instructed not to deduct tax, superannuation contributions or any other automatic deductions, and include:

- Wages and salaries;

- Government pensions, benefits and allowances;
- Profit or loss from unincorporated businesses, farms or rental properties; and
- Any other income from sources such as superannuation, dividends from shares, and workers' compensation.

Some respondents recorded a response of negative or nil income. [Negative income](#) is defined by the ABS as occurring when:

... the operating expenses are higher than the gross receipts (or revenue) of a self-employed person, business or a rental property. A person has negative income if these losses are greater than any income, benefits or allowances received from other sources.

ABS studies of income and expenditure have found that households in the bottom income decile (i.e. the bottom 10% of households), and those with negative gross incomes, tend to have expenditure levels that are comparable to those of households with higher income levels being slightly above the average expenditures recorded for the fifth income decile. According to the ABS:

This suggests that these households have access to economic resources such as wealth, or that the instance of low or negative income is temporary, perhaps reflecting business or investment start up. Other households in the lowest income decile in past surveys had average incomes at about the level of the single pension rate, were predominantly single person households, and their main source of income was largely government pensions and allowances. However, on average, these households also had expenditures above the average of the households in the second income decile, which is not inconsistent with the use of assets to maintain a higher standard of living than implied by their incomes alone.¹⁹

For this reason, families and households recording negative or nil income have been grouped together in a census characteristic in this publication, rather than using them at the bottom of an income range. For example, this publication includes a census characteristic "Families with income from \$1 to \$499".

With [total family weekly income](#), the ABS includes separate "negative income" and "nil income" categories, which are combined in this publication in the census characteristic "Families with negative/nil income". In the 2016 Census, 3,954 families in NSW reported negative income and 22,207 reported nil income, respectively equivalent to 0.20% and 1.14% of total NSW families.

For [equivalised total household weekly income](#), the ABS [sets negative income to zero](#); this publication therefore has a census characteristic "Households with nil income". In the 2016 Census, 42,794 households in NSW recorded nil equivalised total household weekly income, equivalent to 1.64% of all households.

¹⁹ Australian Bureau of Statistics, [6523.0 - Household Income and Income Distribution, Australia, 2015-16: Explanatory notes](#), 13 September 2017.

Definitions

Count of persons	By place of usual residence
Count of families	By place of enumeration
Count of households and dwellings	By place of enumeration
Place of usual residence	The place where a person usually lives
Place of enumeration	The place where a family, household or dwelling was counted on Census night
Family	Two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household
Household	One or more persons, at least one of whom is at least 15 years of age, usually resident in the same private dwelling
Dwelling	A structure which is intended to have people live in it, and which is habitable on Census night. Some examples of dwellings are houses, motels, flats, caravans, prisons, tents, humpies and houseboats
Private dwellings	Separate houses; semi-detached, row or terrace houses, townhouses, etc.; flats or apartments; caravans; cabins and houseboats; improvised homes, tents or sleepers-out; and houses or flats attached to a shop, office, etc.
Population	Population in electoral district
Population growth	Percentage change between 2006 and 2011 total electoral district population
Population density	Population of electoral district per square kilometres
Area	The size of each electoral district in square kilometres
Persons (18+) who are Australian citizens	Total number of persons aged 18 and over who are Australian citizens
Persons who changed address in the last five years	Persons who were residing at a different address five years prior i.e. they lived elsewhere in Australia or they lived overseas in 2011
Persons of Christian religion	Anglican, Baptist, Brethren, Catholic, Churches of Christ, Jehovah's Witnesses, Latter-day Saints, Lutheran, Oriental Orthodox, Assyrian Apostolic, Eastern Orthodox, Presbyterian and Reformed, Salvation Army, Seventh-day Adventist, Uniting Church, Pentecostal, Other Protestant and Other Christian

Persons of non-Christian religion	Buddhism, Hinduism, Islam, Judaism and Other Religions, where Other Religions includes the categories Australian Aboriginal Traditional Religions, Baha'i, Chinese Religions, Druse, Japanese Religions, Nature Religions, Sikhism, Spiritualism and Miscellaneous Religions
Persons of no religion	Persons who stipulated on the census form: No religion, so described, Secular Beliefs, Agnosticism, Atheism, Humanism and Rationalism
Aboriginals and Torres Strait Islanders	Persons who identified themselves as being of Australian Aboriginal and/or Torres Strait Islander origin
Persons born in UK and Ireland	Channel Islands, England, Guernsey, Ireland, Isle of Man, Jersey, Northern Ireland, Scotland, UK and Wales
Persons born in Southern Europe	Andorra, Gibraltar, Holy See, Italy, Malta, Portugal, San Marino and Spain
Persons born in South Eastern Europe	Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Former Yugoslav Republic of Macedonia, Greece, Kosovo, Moldova, Montenegro, Romania, Serbia and Slovenia
Persons born in the Middle East	Bahrain, Gaza Strip and West Bank, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates and Yemen
Persons born in South East Asia	Brunei Darussalam, Burma (Republic of the Union of Myanmar), Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Timor-Leste and Vietnam
Persons born in North East Asia	China (excludes SARs and Taiwan), Democratic People's Republic of Korea (North), Hong Kong (SAR of China), Japan, Macau (SAR of China), Mongolia, Republic of Korea (South) and Taiwan
Persons born in Southern Asia	Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka
Persons born in non-English speaking countries	Persons born overseas except in Canada, Ireland, New Zealand, South Africa, the UK and the USA
Persons not fluent in English	Persons who speak another language and English 'not well' or 'not at all'
Couple family with children	All couple families with children under 15 years of age and/or dependent students aged 15 to 24 years. This excludes couple families with non-dependent children living at home

<u>One parent family</u>	All one parent families with children under 15 years of age and/or dependent students aged 15 to 24 years. This excludes one parent families with non-dependent children living at home
<u>Couple family with no children</u>	Includes couple families who have never had children and couple families who have no resident children
<u>Lone person households</u>	Households with only one person usually resident
<u>Total family income (weekly)</u>	The summation of the personal incomes reported by all family members aged 15 years and over
<u>Equivalised total household income (weekly)</u>	Total household income adjusted by the application of an equivalence scale to facilitate comparison of income levels between households of differing size and composition, where <u>total household income</u> is the summation of the personal incomes reported by all household members aged 15 years and over
<u>Total employed persons</u>	Includes people in full-time work, part-time work and 'away from work'
<u>Employed persons in part-time work</u>	Persons who worked less than 35 hours in all jobs during the week prior to Census night
<u>Labour force</u>	Total number of employed and unemployed people
<u>Unemployed persons</u>	Persons looking for full-time or part-time work
<u>Unemployment rate</u>	For all persons aged 15 and over, the number of unemployed persons expressed as a proportion of the total labour force
<u>Youth</u>	All persons aged 15 to 24
<u>Youth unemployment rate</u>	For all persons aged 15 to 24, the number of unemployed persons expressed as a proportion of the total labour force
<u>Industry of employment</u>	Employment in 11 of 19 industries is included in this publication: agriculture, forestry and fishing; mining; manufacturing; construction; retail trade; accommodation and food services; financial and insurance services; professional, scientific and technical services; public administration and safety; education and training; and health care and social assistance
<u>Occupation</u>	Five of eight occupations are included: managers; professionals; technicians and trades workers; community and personal service workers; and labourers
<u>Persons employed in professional occupations</u>	Includes Managers and Professionals

<u>Persons with tertiary education qualifications</u>	Persons whose highest educational qualification is a postgraduate degree, graduate diploma, graduate certificate, bachelor degree, advanced diploma or diploma
<u>Persons with trade qualifications</u>	Persons with certificate level qualifications
<u>Persons attending private schools</u>	Infant, primary and secondary school students attending Catholic or Other Non Government schools
<u>Persons attending a tertiary education institution</u>	Persons attending a Technical or Further Educational Institution (including TAFE colleges), University or other Tertiary Institution
<u>Persons with highest level of school completed Year 10 or below</u>	Persons aged 15 and over whose highest year of school completed is Year 10, Year 9 or Year 8, or they did not go to school
<u>Persons using public transport to travel to work</u>	Persons who used public transport (train, bus, tram and/or ferry) as one mode of travelling to work
<u>Households with two or more motor vehicles</u>	Occupied private dwellings where two or more registered vehicles owned or used by the occupants of the dwelling were garaged or parked near the dwelling on Census night
<u>Tenant dwellings</u>	Occupied private dwellings which are rented from all sources including: real estate agents; State or territory housing authorities; persons not in the same household; and housing co-operatives, community groups and church groups
<u>Owner or purchaser dwellings</u>	Occupied private dwellings owned outright, owned with a mortgage, being purchased under a rent/buy scheme and being occupied under a life tenure scheme
<u>Flat or apartment dwellings</u>	Occupied private dwellings which are in a one or two storey block, a three storey block, a four or more storey block, or attached to a house
<u>Public housing</u>	Occupied private dwellings rented from a State or territory housing authority
<u>Dwellings which are caravans</u>	Occupied private dwellings which are caravans, cabins or houseboats

Electorate population used in calculating percentage

Indicator	Electorate Population
Population	
Total population	-
Population growth	-
Population density (persons per square kilometre)	-
Area (square kilometres)	-
Number of females	Total persons
Number of males	Total persons
Persons (18+) who are Australian citizens	Persons 18+
Persons who changed address in the last five years	Persons 5+
Persons aged under 5	Total persons
Persons aged between 5 and 14	Total persons
Persons aged between 15 and 24	Total persons
Persons aged between 25 and 64	Total persons
Persons aged 65 and over	Total persons
Religion	
Persons of Christian religion	Total persons
Persons of Catholic religion	Total persons
Persons of Anglican religion	Total persons
Persons of non-Christian religion	Total persons
Persons of Islamic religion	Total persons
Persons of Buddhist religion	Total persons
Persons of Hindu religion	Total persons
Persons of Jewish religion	Total persons
Persons of no religion	Total persons
Ethnicity	
Aboriginals and Torres Strait Islanders	Total persons
Persons born overseas	Total persons
Persons born in UK and Ireland	Total persons
Persons born in Southern Europe	Total persons
Persons born in South Eastern Europe	Total persons
Persons born in the Middle East	Total persons
Persons born in South East Asia	Total persons
Persons born in North East Asia	Total persons
Persons born in Southern Asia	Total persons
Persons born in non-English speaking countries	Total persons
Persons with both parents born overseas	Total persons
Persons with at least one parent born overseas	Total persons
Persons not fluent in English	Total persons
Persons speaking a language other than English at home	Total persons
Households and Families	
Couple family with children	Total families
One parent family	Total families
Couple family with no children	Total families
Lone person households	Total households
Total family income (weekly)	
Families with negative/nil income	Total families
Families with income from \$1 to \$499	Total families
Families with income from \$500 to \$1,249	Total families
Families with income from \$1,250 to \$2,499	Total families
Families with income from \$2,500 to \$4,499	Total families
Families with income of \$4,500 and above	Total families

Electorate population used in calculating percentage

Indicator	Electorate Population
Equivalised total household income (weekly)	
Households with nil income	Total households
Households with income from \$1 to \$399	Total households
Households with income from \$400 to \$799	Total households
Households with income from \$800 to \$1,499	Total households
Households with income from \$1,500 to \$2,499	Total households
Households with income of \$2,500 and above	Total households
Labour force	
Total employed persons	Persons 15+
Employed persons in part-time work	Persons 15+
Unemployment rate	Labour force
Youth unemployment rate	Youth labour force
Labour force	Persons 15+
Women in the labour force	Labour force
Female labour force/participation rate	Female person 15+
Employees (Agriculture, Forestry and Fishing)	Total employed persons
Employees (Mining)	Total employed persons
Employees (Manufacturing)	Total employed persons
Employees (Construction)	Total employed persons
Employees (Retail Trade)	Total employed persons
Employees (Accommodation and Food Services)	Total employed persons
Employees (Financial and Insurance Services)	Total employed persons
Employees (Professional, Scientific and Technical Services)	Total employed persons
Employees (Public Administration and Safety)	Total employed persons
Employees (Education and Training)	Total employed persons
Employees (Health Care and Social Assistance)	Total employed persons
Persons employed in professional occupations	Total employed persons
Persons employed as technicians and trades workers	Total employed persons
Persons employed as community and personal service workers	Total employed persons
Persons employed as labourers	Total employed persons
Education	
Persons with tertiary education qualifications	Persons 15+
Persons with trade qualifications	Persons 15+
Persons with no post-school qualifications	Persons 15+
Persons attending infant, primary or secondary school	Total persons
Persons attending private schools	Total attending school
Persons attending a tertiary education institution	Total persons
Persons with highest level of school completed Year 12	Persons 15+
Persons with highest level of school completed Year 10 or below	Persons 15+
Transport	
Persons using public transport to travel to work	Total employed persons
Households with two or more motor vehicles	Total occupied private dwellings
Dwellings	
Tenant dwellings	Total occupied private dwellings
Owner or purchaser dwellings	Total occupied private dwellings
Flat or apartment dwellings	Total occupied private dwellings
Public housing	Total occupied private dwellings
Dwellings which are caravans	Total occupied private dwellings
Other	
Dwellings with an internet connection	Total occupied private dwellings
Persons requiring assistance with core activities	Total persons
Persons providing unpaid assistance to a person with a disability	Persons 15+
Persons who contributed to voluntary work	Persons 15+

Regions

Blacktown-Parramatta electorates	Auburn, Blacktown, Epping, Granville, Mount Druitt, Parramatta, Prospect, Riverstone, Winston Hills
Eastern/Inner Sydney electorates	Balmain, Coogee, Drummoyne, Heffron, Maroubra, Newtown, Strathfield, Summer Hill, Sydney, Vaucluse
Northern Sydney electorates	Davidson, Hornsby, Lane Cove, Manly, North Shore, Pittwater, Ryde, Wahroonga, Wakehurst, Willoughby
North West Sydney electorates	Blue Mountains, Castle Hill, Hawkesbury, Kellyville, Londonderry, Penrith
Southern Sydney electorates	Bankstown, Canterbury, Cronulla, East Hills, Heathcote, Kogarah, Miranda, Oatley, Rockdale
South West Sydney electorates	Badgerys Creek, Cabramatta, Camden, Campbelltown, Fairfield, Holsworthy, Leppington, Liverpool, Macquarie Fields, Wollondilly
Central Coast electorates	Gosford, Terrigal, The Entrance, Wyong
Hunter electorates	Cessnock, Charlestown, Lake Macquarie, Maitland, Newcastle, Port Stephens, Swansea, Upper Hunter, Wallsend
Illawarra Shoalhaven electorates	Keira, Kiama, Shellharbour, South Coast, Wollongong
North Coast electorates	Ballina, Clarence, Coffs Harbour, Lismore, Myall Lakes, Oxley, Port Macquarie, Tweed
North West NSW electorates	Barwon, Bathurst, Dubbo, Northern Tablelands, Orange, Tamworth
Riverina & South East NSW electorates	Albury, Bega, Cootamundra, Goulburn, Monaro, Murray, Wagga Wagga
