Coal Mining in NSW

Background information

Coal is NSW’s largest export. The value of coal exports rose from $3,853 million in 2002-03 to $12,898 million in 2008-09, whereas the next largest export (aluminium) was worth $2,058 million in 2008-09. The largest importers of NSW coal are Japan (54.5%), the Republic of Korea (16.5%), Taiwan (12%) and China (4.7%).\(^1\) Coal mining generated $1,226 million in State royalties in 2008-09.\(^2\)

Coal mining is mainly concentrated in the Sydney-Gunnedah Basin within the State’s five coalfields: Hunter; Newcastle; Gunnedah; Western; and Southern. A further two mines are located within the Gloucester Basin north of Newcastle. A mine has also recently been proposed for the Oakland Basin southwest of Wagga Wagga. 15,387 people were employed in the coal mining industry in June 2008.\(^3\) The degree to which this industry stands to be affected by the Commonwealth Government’s recently announced Resource Super Profits tax is a matter of current debate.

Coal mining in NSW is regulated by the Environmental Planning & Assessment Act 1979 (NSW) and the Mining Act 1992 (NSW). Two environmental planning instruments under the Environmental Planning & Assessment Act 1979 (NSW) apply to coal mining: the State Environmental Planning Policy (Major Development) 2005; and the State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007. These instruments regulate the impact of coal mining on such matters as: Aboriginal culture and heritage; noise levels; air quality; water quality; and groundwater. Nonetheless, negative environmental and health impacts from coal mining remain important issues in the public debate.\(^4\)

This Issues Backgrounder contains links to material on issues and debates relevant to coal mining in NSW. It should be read in conjunction with the following Research Service papers: Mining and the Environment; and Mining and the Economy.

Parliamentary Material

NSW legislation

Coal mining is regulated by the following legislation:

*Environmental Planning & Assessment Act 1979*;

*Mining Act 1992*; and

*Mining Amendment Act 2008*.

A Public Consultation Draft of the *Mining Regulation 2010* has recently been released. This is intended to replace the *Mining Regulation 2003* under the *Mining Act 1992*.

On 31 December 2008, a Ministerial Determination was made under section 283(5) of the *Mining Act 1992* to alter the ad valorem coal royalty rates.

Two environmental planning instruments under the *Environmental Planning & Assessment Act 1979* apply to coal mining:

*State Environmental Planning Policy (Major Development) 2005*; and

*State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007*.

Other legislation relevant to coal mining includes:

*Coal Industry Act 2001*;

*Coal Industry (Joint Coal Board Employees’ Superannuation) Transitional Regulation 2002*;

*Coal Mine Health and Safety Act 2002*;

*Coal Mine Health and Safety Regulation 2006*;

*Coal Mine Health and Safety Amendment Act 2010*;

*Mine Health and Safety Act 2004*;

*Mine Safety (Cost Recovery) Act 2005*;

*Mine Subsidence Compensation Act 1961*; and

*Mining and Petroleum Legislation Amendment (Land Access) Bill 2010*.

The **Coal Acquisition Repeal Act 2007** will repeal the following legislation, and will itself be repealed once all its provisions have come into effect: the [Coal Acquisition Act 1981](#); the [Coal Acquisition (Compensation) Arrangements 1985](#); the [Coal Acquisition (Re-acquisition Arrangements) Order 1997](#); the [Coal Ownership (Restitution) Act 1990](#); and the [Coal Ownership (Restitution) Regulation 2005](#).

The **Contribution of Primary Industries to the NSW Economy: Key Data 2010** (April 2010)

**Coal Mine Safety Audit Report: Mine Safety Operations February 2010**

All holders of mining leases proposing to undertake underground coal mining are required to prepare a **Subsidence Management Plan**. The NSW Government policy that regulates these plans is the **New Approval Process For Management of Coal Mining Subsidence Policy** (2003). The **Department of Primary Industries** also released a fact sheet on **Mine Subsidence** in February 2006.

The **Department of Primary Industries** (a part of Industry & Investment) has a number of policies and guidelines to regulate the environmental impacts of mining.

Department of the Environment, Water, Heritage and the Arts (DEWHA)

DEWHA maintains the National Pollutant Inventory. The coal mining industry is required to monitor, measure and report their emissions under the National Environment Protection Measures (Implementation) Act 1998 and the National Environment Protection (National Pollutant Inventory) Measure 1998. The most recent Summary Report available was released in 2009. DEWHA also maintains a searchable online database of all emissions released by coal mining.
