LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROADS.

(MEMORANDUM RESPECTING CESSNOCK ROAD ACCOUNTS.)

Ordered by the Legislative Assembly to be Printed, 7 October, 1869.

Memo. respecting delay in verification of Cessnock Road Accounts.

I WAS busy preparing the Abstracts of the Public Accounts for 1868 when the Cessnock Road papers were referred to me ; and as they appeared to refer only to the adjustment of advances, and not of an urgent nature, I put them aside, intending to deal with them on the completion of these Statements. Before I had time, however, to take them up, I received instructions to commence the preparation of the Supplementary Estimates, and Estimates for 1870, which, in addition to my ordinary duties, more than occupied the whole of my time, and I have frequently had to remain in the office to 10 o'clock at night.

GEORGE LAYTON,
Accountant.

The Treasury,
7 October, 1869.

1869.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROADS.

(MEMORANDA RELATIVE TO APPOINTMENT OF TRUSTEES FOR THE ROAD FROM THE MAIN HUNTER'S RIVER ROAD TO CESSNOCK.)

Ordered by the Legislative Assembly to be Printed, 6 October, 1869.

HAVING made a statement in the Legislative Assembly, upon information supplied from this office, to the effect that Mr. Eckford, M.P. for the Electoral District of The Wollombi, had recommended certain persons as Trustees for the Road from the Main Hunter's River Road to Cessnock, and that these appointments had been made on the recommendation of that honorable gentleman, and having now reason to doubt the accuracy of this statement, which is denied by Mr. Eckford,—I request that the minute or other authority upon which such appointments were made may be placed before me, and that, if there be any reason to believe that an error has been committed by myself or any officer of the department, the fullest report may be furnished, in order that the matter may be thoroughly understood.

[Urgent.]

W.F.
October 6, 1869.

After careful inquiry into the circumstances of this case, I am inclined to think that the nomination by Mr. Eckford of Trustees was intended by that gentleman for the portion between Wollombi and Cessnock, and not also for the Maitland end—Cessnock to Maitland.

This impression in my mind is confirmed by the tenor of the minutes indorsed on the papers, which state that Mr. Eckford merely desired to name new Trustees for road *in his Electorate*.

If this is the fact, it is clear that the money available for the portion in question, viz., Cessnock to Maitland, was by an oversight—clearly not by Mr. Eckford's advice—handed over to the new Trust. This clerical error was solely through my failure to realize and understand the result of the substitution of the new Trustees for the Maitland Road Trust, who legally have charge of the portion of road. I offer, therefore, this as an explanation of *my* blunder, as I am afraid it must be considered.

H.F.

1869.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CESSNOCK ROAD.
(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 19 October, 1869.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 29th September, 1869, That there be laid upon the Table of this House,—

“ A copy of all Correspondence, Documents, and Minutes, which have
“ passed between the Government and any person or persons respecting the
“ expenditure of the grant for the repair of the Cessnock Road for the year
“ 1868.”

CESSNOCK ROAD.

No. 1.

J. ECKFORD, Esq., M.L.A., to THE SECRETARY FOR LANDS.

Sydney, 11 December, 1868.

SIR,

I herewith enclose a report of the proceedings of the Maitland District Council, as taken from the *Maitland Mercury*, in which my name is mentioned. You will perceive it was moved and seconded the matter should lie over until the next meeting. As I am not aware what the report can mean only from hearsay, I trust the Government will not take any action upon it without first hearing me. I respectfully beg leave further to refer you to some remarks of the Warden, which are underlined, wherein he has stated I have had frequent opportunities of giving information if I desired to do so. The fact is I distinctly stated, at the last meeting held on the third Tuesday in last month, that any information the Warden or Councillors required of me I was prepared to give; this, therefore, does not show I was not willing to give any information in my power.

I have, &c.,
JOSEPH ECKFORD.

[Enclosure in No. 1.]

Extracts from *Maitland Mercury*.

CESSNOCK Road Matters.—The Warden, referring to a statement made at the last meeting, questioning the power of the Council to appoint Committees of investigation out of its body, read the charter appointing the Council, which gave the power which had been disputed. The District Council Act imparted similar authority. The Warden also made allusion to a threat made by a Commissioner recently, that he would, if he got another Councillor with him, remove the Warden; and pointed out that the Warden was placed in his position, not by the Commissioners but by the Governor under charter, and that therefore no vote of the Council could remove him, or operate to remove him; if by any chance his removal was desired, he would be called upon by the Government to show cause against it. He further went on to define the powers of the Warden, and the responsibilities of his office, and regretted that inquiry into what he considered demanded inquiry had been arrested by the action of a Commissioner. A charge had been made against the Warden and the Secretary for permitting a man named Sheridan to inspect certain vouchers in the office, but this charge he begged most distinctly and emphatically to deny. He also denied that he had imputed fraud to any Commissioner. He proceeded to defend himself against what he conceived to be aspersions upon his character as an honest man, and pointed to his career in East Maitland as a defence against such aspersions.

Under legal advice he had visited Sydney and seen the Minister for Lands, who had directed that a report in writing, detailing all the particulars of the case, should be submitted to him, and he (the Minister for Lands) had promised to take such action as was necessary, without casting any responsibility of the proceedings upon either him as Warden or upon the Council. The Minister had directed him to submit the statement to the Council, and have it adopted by the Trust if possible, but whether it was agreed to or not, to forward it to him. A report of the circumstances of the case in which the Committee of investigation had made inquiries, had accordingly been drawn up by Mr. R. W. Thompson, and was now before the Council. This report was made up from the documents in the office, and from the result of the Committee's inquiry. He begged to move that the report be adopted.

Councillor Bowden seconded the motion.

Councillor Keating thought the Council ought to wait till Councillor Eckford was present—he was the person referred to principally in the report, and perhaps if he were present he might give some information to the Council which would clear up some of the matters referred to. He moved, as an amendment, that the discussion be deferred to the next meeting, and that Councillor Eckford be called upon to explain.

Councillor M'Mahon seconded the amendment, as he agreed that it was most advisable that Councillor Eckford should be present.

Councillor Bowden did not recognize the necessity for delay in adopting the report which would give the information desired by the Minister for Lands; the matter would come before the Council again when Councillor Eckford was present, and no charge of imputation was made against that Councillor.

Councillors Noble and O'Brien agreed with Councillor Bowden that there was nothing to be gained by delay, nor would any injustice be done to Councillor Eckford.

The Warden replied, and pointed out that Councillor Eckford had had previous opportunities of giving information if he had desired to do so, and as he had not furnished such information it was to be presumed that he was either unable or unwilling to furnish it; therefore nothing would be gained by delay in adopting the report, and he trusted the resolution would be carried. He hoped the mover of the amendment would withdraw it. This Councillor Keating declined to do; and the amendment and motion being then put, the motion was then carried by a majority of one.

After a short interval Councillor Keating moved that the Editor of the *Maitland Mercury* be requested to withhold the report of the preceding discussion till after next meeting.

Councillor M'Mahon seconded the motion.

The Warden must oppose the motion, as he could not see why the report should be withheld from the public. It would make the Council very little if any portion of its business was suppressed—any attempt at suppression would throw suspicion on the proceedings of the Council. Whatever he had said he was not ashamed of, and he thought it would be inadvisable to withhold any reports of their business. He did not think there should be any dictation to the Press as to the course it should take in reporting their proceedings.

Councillor Bowden did not think the usual course of things should be interfered with in this case.

The motion was put and lost; and this being all the business, the Council rose.

No. 2.

[N.B.—This Report was originally received at the Lands Department, on 17th December, *unsigned*, and was returned again signed, on 5th January, 1869.]

S. SCHOLEY—REPORT OF MAITLAND DISTRICT COUNCIL.

REPORT of the Maitland District Council respecting the alleged expenditure of a portion of the sum of three hundred and fifty pounds voted by the Legislative Assembly for the repairs of a portion of the Wollombi Road between West Maitland and Cessnock, submitted for the information of the Honorable the Minister for Lands.

The Council does itself the honor to report that on or about the 4th day of June last, the sum of £350 was placed by the Colonial Treasurer to the credit of the Council in the Bank of New South Wales, Sydney, for the purpose of enabling the Council to execute certain necessary repairs on the Wollombi Road, between West Maitland and Cessnock, a distance of fourteen miles or thereabouts, and that six months was granted for the expenditure of that sum.

That in the month of May last the various roads within the Maitland District were allotted to the charge of various Councillors by vote of the Council, and amongst others the Wollombi Road was allotted to the charge of Mr. Joseph Eckford, assisted by the Warden, Mr. Stephen Scholey, but by some error of the Clerk of the Council, the Warden's name was not inserted in the minutes.

2. That on the 6th of October last the Warden obtained certain information which induced him, on the 12th of October, before 6 o'clock a.m., to visit that part of the Wollombi Road which was then immediately under repair, for the purpose of ascertaining whether the men who were said to be working on the said road came to their work in due time, and as to how the work generally was being carried on. The Warden then found that nearly all the men were not at work in due time, that up to a quarter past 7 the overseer, Patrick Doran, whose duty it was to set the men to work, to keep their time, and to carry out the instructions of the directing Councillor, was not on the ground.

3. That at the time the said Patrick Doran was lodging on week-days at the house of Mr. Joseph Eckford, at the charge of 5s. per week.

4. That one Solomon Israel and one Patrick Kinneally were carters said to be employed on the said work, neither of whom were at work up to half-past 8 o'clock on the morning of the 12th of October; but the Warden ascertained from one of the labourers, named James Moylan, that Mr. Eckford had instructed the carter, Solomon Israel, not to come to work until Wednesday the 14th of October.

5. That on Tuesday the 27th of October, the usual pay-day, Mr. Eckford presented to the Warden, at the office of the Council, the order bearing that date, a copy of which is sent herewith, and on inquiry being made it was ascertained from Mr. Eckford that Solomon Israel, the carter, claimed for thirteen days' work with his horse and cart, at 12s. per day, and that Patrick Kinneally, the other carter, claimed for nine days' work, at the same rate. Mr. Eckford had at that time all the vouchers for the expenditure of the said sum in his possession, and on Mr. Eckford's requiring a cheque, in accordance with the order before mentioned, the Warden refused to give a cheque until all the vouchers were produced and in the office. The Warden believing, from information which had been previously furnished to him, that both Israel's and Kinneally's accounts of their work were false, sent the Secretary of the Council to them to endeavour to obtain from them a written statement of these accounts, which, however, the Secretary was unable to obtain from them; but the Warden the same evening obtained further information from John Sheridan, who had been keeping a book of the time of all the men, which at once confirmed the impression he had previously formed, that Israel's and Kinneally's accounts (as stated by Mr. Eckford) were both false, inasmuch as Israel had only worked nine days instead of thirteen, for which he claimed, and Kinneally had only worked two days instead of nine, for which he claimed.

See enclosure to
No. 6, dated
27 October, 1868.

6. That at the time of the Warden's refusing to give Mr. Eckford a cheque, he requested Mr. Eckford to have all the workmen down at the office on Thursday the 29th of October, that he might examine them as to the work they had really done, and Mr. Eckford promised that the men should be there.

7. That on Thursday all the men, including Israel and Kinneally, but excepting Doran, the overseer, came to the office of the Council, and the Warden then examined all the labourers, particularly as to the time made by Israel and Kinneally. None of the men at first appeared willing to give any information, but at length Moylan and Sheridan made certain statements, copies of which are hereto annexed, marked A and B. Israel was afterwards brought in and examined by the Warden, in the presence of the Secretary and of Mr. Eckford, and he then stated that he had worked thirteen days, commencing from Monday the 12th of October; that he had worked that very day, and begun work at 6 o'clock, and had carried Doran, Sheridan, Hennessy, Moylan, and Walsh, out to the work in his cart, this being the very day on which the Warden was on the work, and found that up to half-past 8 o'clock he was not on the work nor going to it; and that Sheridan, Moylan, and Hennessy were on the ground—the first at ten minutes past 6 and the two latter at ten minutes past 7; and that Doran and Walsh were not there at all. The Warden then declined to pay Israel for any more than nine days, which he at last accepted, but persisted to the last that he had worked thirteen days and was entitled to be paid for them. Kinneally also insisted that he had worked nine days, but he could not say when he begun work or when he finished, and he was only paid for two days.

See Enclosures to
No. 6.

8. The Warden being convinced, from what he had seen himself and from the information derived from Sheridan and Moylan, that Israel had attempted, by false pretences, to obtain payment from the Council for four days' work which he had never performed, caused proceedings to be taken against him for the attempt; but on the case being brought before the Bench at East Maitland, an objection was raised by Israel's attorney, Messrs. Mullen and O'Meagher, that no offence had been committed in law. The Bench however dismissed the case, not upon the grounds so raised, but because, in their opinion, the Warden had the means within his power of ascertaining whether the statement made by Israel was true or false.

9. That a Committee, consisting of the Warden and Councillors Keating and Bowden, was appointed to inquire into the whole matter relating to the expenditure of the said money; and from the inquiries which they have made, they believe that the sum of £109 5s. 10d., as shown by the account sent herewith, marked C, has been paid in excess of what has been really earned; that several amounts are entered in the vouchers, copies of which are also sent herewith, marked respectively D, E, F, G, H, I, J, K, and L, which were never paid, particularly a sum of £4 10s., said to have been paid to John Sheridan, whereas Sheridan declares that he only received £3 12s., and that he signed the voucher in blank, which shows

See Enclosure to
No. 6.
See Enclosures to
No. 6.

shows that sum of £4 10s. as paid to him, and his signature to which is witnessed by Mr. Eckford; and, as far as the Committee has been able to ascertain, no such person as William Thomas, who is said to have earned £7 4s. 8d. by the voucher of the 16th of June, and whose mark or cross to the said voucher is witnessed by Mr. Eckford, was ever known to any of the other men employed on the work, and, as it is believed, no such person was ever employed there.

See Enclosure to
No. 6.

10. That the document marked J, sent herewith, is a copy of a memorandum furnished by Mr. Eckford of the work said to have been done between the 6th and 26th days of October.

See Enclosure to
No. 6.
See Enclosure to
No. 6.

11. That the overseer, Patrick Doran, did not make his appearance before the Council until the 17th day of November, when he came for his wages earned up to the 26th of October, and he was then examined by several of the Councillors, and his examination was written down by the clerk, and a copy thereof is also sent herewith, marked M.

12. That a copy of the time-table kept by John Sheridan, marked N, is sent herewith, to be compared with the vouchers signed by the workmen and witnessed by Mr. Eckford.

STEPHEN SCHOLEY, Warden.
PATRICK O'BRIEN.
JOHN BOWDEN.
JOHN NOBLE.

Dated 15 December, 1868.

No. 3.

THE UNDER SECRETARY FOR LANDS to THE COMMISSIONERS OF THE MAITLAND ROAD TRUST.

Department of Lands,
Sydney, 24 December, 1868.

GENTLEMEN,

The enclosed document, purporting to be a report from the Maitland District Council, in connection with the expenditure of a sum of money on the Wollombi Road, has been handed to the Secretary for Lands by the Warden of your Council, but it is noticed that the communication in question bears no signature, nor is it otherwise authenticated, and I am directed by Mr. Secretary Forster to return the document to you for that purpose.

I have, &c.,
M. FITZPATRICK.

No. 4.

THE UNDER SECRETARY FOR LANDS to J. ECKFORD, Esq., M.L.A.

Sydney, 11 January, 1869.

SIR,

In forwarding for your perusal accompanying document (with enclosures), being a report of the Maitland District Council respecting expenditure on the Wollombi Road between West Maitland and Cessnock, I am directed by the Secretary for Lands to invite you to favour me with any observations you may desire to offer on the subject.

I have, &c.,
M. FITZPATRICK.

No. 5.

J. ECKFORD, Esq., M.L.A., to THE SECRETARY FOR LANDS.

West Maitland,
12 February, 1869.

SIR,

At the first meeting of the Maitland District Council which was held after receiving your letter and report of the Warden of the Council, I attended there for the purpose of having the matter opened up, in order that I might be enabled to forward a proper reply, when, as I arose to speak, I was met by the Warden's moving a resolution, as though he anticipated me in the matter, that anything I had to say should be postponed until next meeting, or for a week. I at once moved as an amendment that I be heard at once, and spoke to the amendment, as being the only possible chance I had of opening up the affair. After I had done, the Warden moved and carried a resolution the matter be postponed until the next monthly meeting, which will take place on Tuesday next, soon after which I will give you my reply, which I am sure must be satisfactory. It is a very good way for Mr. Scholey to try and get himself out of a difficulty, which he knows full well he has placed himself in, both by his treatment to me in this matter, and his collision with members of the Trust, to enable him to get their support, and making up accounts as he said himself was unsatisfactory at the death of the late Secretary, Samuel Wallace, and who he was a bondsman for. His statement in the Council was that several documents were missing, full particulars of which will be given by other members of the Trust.

I am, &c.,
JOSEPH ECKFORD.

P.S.—You are aware the meeting was held and report adopted without me being present, notwithstanding an adjournment was asked and refused to enable me to be present, a report of which I forwarded to you some time ago.

No. 1.

J.E.

No. 6.

No. 6.

J. ECKFORD, ESQ., M.L.A., to THE SECRETARY FOR LANDS.

West Maitland,
23 February, 1869.

SIR,

I beg leave to acknowledge receipt of your letter of the 11th ultimo, accompanied by a Report No. 4 from the Maitland District Council, signed by the Warden and three other of its members, in which letter I am requested to favour you with any observations I may desire on the subject.

In reply thereto, I beg to state in the accompanying report I have touched upon every paragraph (1) that seems to me necessary, giving a full and satisfactory explanation.

I also beg to refer you to the accompanying letters forwarded herewith from Messrs. Keating and (2) M'Mahon (both Councillors), the former a member of the Committee referred to in said report. You will (3) also please refer to a letter I also send, from Mr. Tarpsee, Reporter to the *Maitland Mercury*. The reply (4) would have been forwarded long since, had it not been for the Warden's obstruction at the first meeting of the Council which was held after my receiving said report. I attended for the purpose of bringing the whole matter prominently before the public, making a full statement of everything connected with the case. Scholey, Warden, then succeeded in getting all further discussion postponed for a month, by stating important business matters compelled him to leave immediately for the Clarence. Such does not appear to have been the case, as he never left Maitland other than to go to Sydney—his object evidently was to gain time, no doubt for the purpose of laying some further plot.

I, at the last meeting, held on the 16th instant, succeeded in carrying a resolution that I should be furnished with a copy of the minutes of Committee and which I herewith forward, viz. :—

A desultory conversation took place on 2nd November—no minutes taken; decided in the street by Keating, Scholey, and Bowden, to summon Israel for attempting to obtain money by false pretences, which was done; reply to report showing the result; no further action taken by Committee; Scholey acting solely by himself in his directions to Mr. Thomson to prepare the report, the signatures to which have been improperly obtained, those signing knowing nothing whatever of its truthfulness or otherwise, this being admitted by Mr. Bowden, which will also be seen on reference to the reply.

I therefore, with every confidence, leave this matter in your hands, feeling sure a statement made by Sheridan (after having acted as I have stated in report), a labourer on the road, will not be accepted by you as against mine.

I may further mention, that I have just been informed by Mr. Keating, that long before there was any talk of the Cessnock Road, Scholey told him he knew if I ever got a chance of him I would walk it into him.

I am, &c.,
JOSEPH ECKFORD.

[Enclosures in No. 6.]
(1.)

West Maitland,
23 February, 1869.

Reply to Report of the Warden of Maitland District Council; commencing at paragraph No. 1.

No. 1.—In reply thereto, I beg to state the first paragraph alluded to and marked No. 1 is a falsehood, knowingly made for the purpose of trying to show that he, the Warden, had a right to interfere with the workmen and management of Cessnock Road; he also states that it was a mistake of the Secretary in not entering his name in the minutes of the Council's proceedings; this is untrue, which can be proven by the Councillors, and also the minutes of their proceedings.

No. 2.—With reference to this paragraph, I of course cannot account for the Warden's accusations as to the time the men reached the works; if, as he states, they did not arrive out until nearly 7 o'clock, such might have been the case on some Monday mornings, as they very often had to wait at the blacksmith's for their tools. From conversations I have heard which have taken place, and from what Scholey told myself, others of the men besides Sheridan were there at twenty minutes past 6 o'clock on the same morning. I can further state that I have been in the habit of looking out of my back bed-room window from 5 o'clock to half past 5 o'clock in the mornings, for the express purpose of seeing what time the men went to their work; moreover, on this particular morning I was up earlier than usual (owing to my going to Sydney), and saw the men going through the paddocks (in the direction of where they were employed) at twenty-five minutes past 5 o'clock in the morning, which gave ample time for them to reach their work. It is also stated Doran was the time-keeper. I have asked Doran (for the purposes of scrutiny) when he has come in of an evening before pay-day what time the men had worked, although at the same time I had a tolerable knowledge of these facts, having seen the men in most instances going to and returning from work. I may mention my reasons for being anxious to know the time of the men going to their work in the mornings was in consequence of Sheridan's telling me some time previous (when finding fault with him and others for not doing their work); his statement was the other men idled their time away by not going out at proper hours.

No. 3.—This paragraph speaks of Doran lodging at my house on week-days. Such is not true; but through my having known Doran for the last twelve years, he having worked for me two years out of that time, and knowing him to be a faithful and trustworthy man I allowed him to have his tea and bed five nights in the week at 5s. per week; but I am at a loss to know what this has to do with a charge of misappropriation of money on the roads.

No. 4 speaks of Israel and Kinneally—referring first to Israel. I gave one of the men instructions (on Saturday, 10th of October) to tell Israel not to go out to work before the Wednesday morning following, and on my return from Sydney on the Thursday, 15th, I found he had not been so informed and had gone out to his work as usual; and in my presence he told the Warden, Scholey, he had turned off the main road and went as he always previously had done to the gravel quarry, where he had been employed in carting gravel. From Moylan's statement to Scholey, I am informed by Moylan that on the day in question he never mentioned my name with reference to Israel's time.

No. 5.—As regards me presenting an order for payment of £43 4s. 6d., it is quite correct, believing it then to be due, and I believe so now. Israel claimed for thirteen days; I believe it is justly due to him, notwithstanding I was in Sydney portions of two weeks out of the three weeks that he claims to have worked. Patrick Kinneally's claim is also, I believe, correct; he was sent by me on Tuesday morning the 7th October, to repair some logging beyond Bishop's Bridge (a distance of more than 8 miles from Maitland), with instructions to join Israel on Wednesday 14th of October, for the purpose of carting gravel, where he worked two days, making his claim nine days. The Warden speaks insinuatingly—the vouchers were all in my possession. Such was the case, but it was not a new thing for me to keep the vouchers for the works on the Cessnock Road until the money had been worked out—that duty having been first imposed upon me (the Warden having a protégé and drunken Secretary, Mr. Samuel Wallace) at least two and a half years ago (the said Warden being his bondsman). The Warden asked for the vouchers and said he would not trouble me to take them over, but would send the Secretary the following morning. After having presented the order, I gave the Secretary all the vouchers, telling him there were other men besides those who were working just beyond Stony Creek where our regular workmen were employed. The Warden would wish to make it appear I was the only Councillor who held vouchers, whereas it was the case with others.

No. 6 states, at the time the Warden refused the cheque he requested me to send the men over on Thursday. *Such is not true*, as will be seen by a letter sent herewith from Secretary, marked A, of Wednesday's date, requesting me to send the men over on the following day; and notwithstanding on *same Wednesday* I travelled several miles out on the road in company with the Warden Scholey, he never once mentioned to me anything as to his wishes about paying the men; it was not until half-past 8 o'clock in the evening, when I called at the Secretary's house to know why the money had not been forwarded to enable me to pay the men, the Secretary said "Have you not received my note?" I said I had not, when he informed me the Warden had told him to write me that day, saying he would adhere to the resolutions of the trust, that no more money was to be paid out of the office. I replied I was very glad—that it was an irregularity which had crept in through the acts of a drunken Secretary. Subsequently I went to the post office and there got the note I previously alluded to, and which I annex hereto. I merely mention this to show you what an *unscrupulous* man this Warden is, and the danger men are placed in who come in contact with him. The same evening I saw two of the men and informed them they would have to go to the office, East Maitland, for their money; one of whom (*Israel*) replied he knew it—that Hughes the Secretary had informed him.

Marked A.

No. 7.—The men (with the exception of Doran) went on the following day (Thursday) to the office, and were questioned by the Warden as to their time, Israel and Kinneally persisting in their demand. Israel commenced work on Tuesday, October 7th, and *not* the 12th, as stated by the Warden in *his* report, and I believe he was at work on the Monday, as stated in a previous paragraph. The report further states he Israel had told him, the Warden, on the Tuesday, he had carried out in his cart on that morning, Doran, Hennessy, Sheridan, Moylan, and Walsh. This is another *false statement* of the Warden, *flatly denied* by Israel, and must have been *knowingly* made. The Warden's statement is further untrue, as the men Moylan and Hennessy told him, in *my presence*, that they saw him just riding up to Sheridan as they hove in sight, which would not be more than 150 yards from where Scholey and Sheridan were at the time standing; and from a statement made in a previous portion of *his* report, they must evidently have met by appointment. With regard to the payments to Israel and Kinneally, I believe them to be justly due as demanded by them. The Warden on this particular Thursday called in Walsh, and told him he was demanding a day's pay (*viz.* 6s.) more than was due to him, stating he had not been at work, but at home sick in bed; notwithstanding this, he the Warden paid Walsh this day's wages, and has that amount put on the side of what he is desirous of showing, if possible, as a deficit. As therefore stated, *I believe* the claims made by the men to me are strictly correct.

No. 8.—The report refers to a statement having been made by Moylan in conjunction with Sheridan, as being the cause of the Warden's instituting proceedings against Israel. If you will refer to slip marked A* attached to the report sent in, it will be seen there is not anything to justify the Warden in making such statement on the proceedings taken against Israel; the Bench did not, as stated by the Warden's Solicitor in his report, dismiss the case on such grounds as therein stated, as reference being had to the proceedings will make more fully appear.

No. 9.—This paragraph of the report speaks of a Committee having been appointed, consisting of the Warden and Councillors Keating and Bowden. It's true; but how have they acted? never sat, but met in the street, and decided to summon Israel, which was done, and the foregoing paragraph shows how the matter was disposed of. The report further states, as by the Warden £109 5s. 10d. has been paid in excess of what was really earned, *that several amounts* are entered in the vouchers *which were never paid*. That man Sheridan declares he at one time received payment of £3 12s., whereas £4 10s. had been charged against him; also, that he, Sheridan, had signed vouchers in blank. *The whole of this man's statements* I positively assert *are false*. The report further states *the Committee* cannot ascertain the name of any such person as William Thomas, thereby implying that inquiry had been made, and the other *men found to be correct*, so that this large sum of £109 5s. 10d. dwindles down to £7 4s. 8d. as charged to Thomas, and 18s. as charged to Sheridan, making the *asserted deficiency*, as shown by the report, to be only £3 2s. 8d. But I am *prepared to swear* the whole of those amounts were paid. The paragraph further states a man of that name (William Thomas) was not known to any of the other men. I again assert the signatures and marks were genuine, and were not signed in blank. The report reads in this paragraph as though *it* had been prepared by *the Committee* appointed to report on the expenditure of the Cessnock Road, whereas *no Committee* meetings were ever held, other than a desultory conversation in the street, when Israel was ordered to be summoned, and as admitted by Scholey, the Warden, *no meetings* were held. Bowden, who signed the report, admitted same. Mr. Keating, although one of the Committee appointed as before referred to, was kept in *perfect darkness* as to the proceedings of those with whom he should have been associated in the matter referred to, from Bowden's admission that he did not go to Mr. Thompson, the solicitor. Scholey Warden *did all the work himself*. It will therefore be borne in mind that the Committee never sat upon this report, which they ought to have done; it should have been signed by the Chairman, on behalf of *that Committee*, and *submitted* to the full Council for approval, which was not done. The signatures attached were obtained by the Secretary carrying the report round (*by special request of the Warden*) to the residences of the different persons whose names are appended; the whole of whom could not have had (and indeed which they admit) any knowledge of the circumstances. Bowden, one of the Committee who was appointed, distinctly stated that he signed it, *because he believed what the Warden* had stated. Noble knew of nothing other than the Warden's statements, as also O'Brien, the other *Committee-man* who was on the Committee. Mr. Keating, I need only refer you to his letter, and for Mr. M'Mahon's opinion, by his letter. Also, both these gentlemen *refused* to sign the report when they were *waited on*, giving, as their reasons, that they didn't believe in one word of it (the report) contained.

(2)
(1)

No. 10.—This paragraph is the only truthful one in the whole report. I mentioned the items to the Warden, and he took them down.

No. 11.—With reference to this paragraph, stating *Doran* did not put in an appearance to ask for his wages until November 17th,—this is another falsehood, knowingly put forth by the Warden, as he knows full well on the Tuesday Israel's case was disposed of. Doran, in the presence of at least thirty people, *asked* the Warden for his money, and the Warden *refused* to pay him, when Doran replied he would not come again. The Warden then told him he would make him come many more times yet, notwithstanding this was a regular pay day to labourers by the Council.

No. 12.—This paragraph speaks of Sheridan giving information to the Warden, and of his having kept a time-table. This I know nothing about, further than the time-table as sent by the Warden Scholey in his report, and forwarded to me, is *untrue*, and I give it a *flat denial*, as a most *outrageous* production. I may say, commencing work in June, until Monday, October 12th, I did not miss seeing most of the men going to, returning from, and very frequently *at work*—in the former cases more than half a dozen times. It's very seldom I'm away from home until after 7 o'clock in the evening. Now, to show what this man Sheridan is, I have been compelled (in my capacity as District Councillor) upon many occasions to find fault with him—he *idled his time* away, and put it on the other men. He also *wanted* me to give him work to put up a wooden culvert on the road, me to pay him a certain sum, and then he would *return me* a portion back again. For *daring* to make such a proposal, I rebuked him severely, telling him he should never work an hour on the road whilst I had anything to do with it. *Subsequently* he asked me to give him a promise of employment with a horse and cart on the road, he stating that he had an offer of one on credit so long as I would give the *owner* of it *my word*, he, Sheridan, should have the employment asked for. This I also refused, telling him again it was not my intention to allow him to do any more work on the road. This will give a *specimen* of Mr. Warden's informant, who is capable of *doing* or *saying* anything to suit his own ends, and make friends of "the mammon of unrighteousness."

JOSEPH ECKFORD.

(2.)

Mr. W. Keating to Joseph Eckford, Esq., M.L.A.

Morpeth, 18 February, 1869.

My dear Sir,

As I was present at the district meeting held on the 16th instant, I beg to address the following remarks to you, solely in the cause of truth and justice, and my respect for yourself. As you are aware, I was one of the Committee of *three* appointed to investigate matters in connection with the Cessnock Road; but I was never consulted in any way as to the course the Warden intended to pursue; and I have since learned that he has been carrying out his action in this matter on his own account, as the above Committee, of which I am a member, *never met* to draw up any report whatsoever. A report was drawn up and brought before the Council on the 10th of December, 1868; the Warden moved its adoption; it was carried. How strange that one of those who signed it has since acknowledged that he knew nothing of its contents! I have learned that this

this report, for the most part, was drawn up from the information of a man whom you discharged from the works, and on no account should be relied upon without careful investigation, as it is my opinion the information is unfounded from beginning to end. Although the statement was made that the Warden was connected with you in the supervision of the Cessnock Road, I am perfectly satisfied that such was not the case, and that you, and you only, had the charge of the same. It was also stated that you had ample opportunity of explaining matters to the Council with regard to the report. To this, I can certify that you stated repeatedly that you were willing at any time to explain any of the statements made to the Warden by Sheridan and others, or to rebut any portion of the information of the Warden, and to render every satisfaction to your brother Councillors on all matters connected with the Cessnock Road. It is my opinion that the Warden was determined to follow up the statements of the report upon the mere word of the person referred to.

I should much like to know if the following is true, as stated by the Warden, viz.—that the Hon. the Minister for Lands had directed him to draw up a report, in writing, to forward the same at an early date, and that not only would the Minister take active and necessary measures with regard to it, but also, that no responsibility should be placed either upon the Warden or the Councillors. It really seems singular that the Warden should find it necessary, *under legal advice*, to proceed to Sydney to consult with the Minister, and omit to bring the subject before the Committee appointed by the Council, of which I am a member, for that purpose.

From these and other considerations, I feel dissatisfied with the course pursued by the Warden, and agree with the course you have taken, and your prompt and energetic defence on the first opportunity afforded you of doing so, that there is nothing wrong, and that you are able to justify the expenditure of the Cessnock Road, and rebut the charges contained in the report referred to.

I am, &c.,
WILLIAM KEATING.

(3.)

Mr. T. M'Mahon to Joseph Eckford, Esq., M.L.A.

Phoenix Park, 23 February, 1869.

Sir,

I purpose to state here as briefly as possible my opinion as regards the Cessnock affair. Firstly, I hold that the Warden, although this affair has plainly shown his malice against Mr. Eckford personally, because he does all that lies in his power to hinder (and has attained that end) Mr. Eckford making his explanation in connection with this affair, although Mr. Eckford has at more than one meeting of the Trust declared his willingness to clear the matter up satisfactorily. I confess that I cannot see any justification whatever for such a charge being made, or grounds for such a report. I have looked over all the so-called evidence, and made inquiries of respectable persons that should of necessity know something of the affair; and after giving the matter my fullest consideration I fail to see anything more or less than this;—the Warden is prejudiced against Mr. Eckford, the man Sheridan is more so, because of Mr. Eckford having discharged him (and let me here remark, that it is on this discharged man's statements uncorroborated the whole affair is grounded). The Warden brings this man's statements before the "Trust"—Mr. Eckford being absent at Sydney the same time, and then the majority of the Trust indict him behind his back; and although requested to allow the matter to stand over for a week in order that Mr. Eckford might be present and explain this man's statements away, they, the majority, positively refuse. In conclusion, I cannot refrain from expressing the opinion that Mr. Eckford's name has been unjustifiably dragged before the public in this affair, and have only further to state that I have every confidence in Mr. Eckford now as I had then, that if an opportunity was allowed him to explain, he would have done so satisfactorily to the Trust and creditably to himself.

THOMAS M'MAHON.

(4.)

Mr. W. J. Tarplee to Joseph Eckford, Esq., M.L.A.

West Maitland, 12 January, 1869.

Dear Sir,

In reply to your's, I am sorry to inform you that I have not preserved my notes of the meeting of the Maitland District Council to which you refer, and which I attended in my capacity of Reporter to the *Maitland Mercury*. However, I remember the occasion well, and I have a distinct recollection that you expressed your willingness to give a full report of all proceedings connected with the Cessnock Road, if required by the other Commissioners.

I remain, &c.,
W. J. TARPLEE.

A.

Mr. Thomas Hughes to Joseph Eckford, Esq., M.L.A.

Maitland District Council,
East Maitland, 28 October, 1868.

Dear Sir,

I am requested by the Warden to inform you that it is his intention to adhere to the late decision of the Trust, viz., to pay no more money out of the office. If therefore your men will be in attendance to-morrow afternoon, he will be happy to give them their cheques.

I am, &c.,
THOMAS HUGHES.

Maitland Road Trust.

West Maitland, 16 June, 1868.

Commissioner.

A.*

Moylan did not know how many days Israel worked since the last payment; commenced work on a Wednesday, and worked all that week and following week; first stated that he had been working all the time; afterwards was not sure.

Hennessy did not know how long Israel had been working; never took any notice who were at work; only had a knowledge of his own time.

B.

Sheridan believed that Israel worked nine days, Carnailly only two days.

Walsh at first did not know what time Israel had made, but afterwards said he thought he was idle for a week.

Israel said he had made thirteen days—commenced work on a Monday.

Carnailly said he (Carnailly) had worked nine days.

Treasury Voucher No.

ROAD ACCOUNT.

STATEMENT of Payments by the Commissioners, Maitland Road Trust, out of the sum of £350, received from the Treasury, 4th June, 1868, for Road from Maitland to Cessnock, and for the expenditure of which the period of six months was allowed.

This form, if properly filled up, will render unnecessary any separate vouchers; but if found more convenient, as in the case of wages, to use a separate form, it can be so used and referred to, in the place where otherwise the acquittances would be inserted, opposite the amount of such voucher, which should invariably be stated in the money column. It is essential that an acquittance or receipt be produced for every payment made, and that when written contracts may be made they should accompany the contractor's vouchers.

Statement of Payments on account of the Road from Maitland to Cessnock, out of the sum of £350, received from the Treasury on the 4th June, 1868, and for the expenditure of which the period of six months was allowed.

Report marked M.

Maitland District Council,
East Maitland,
November 17, 1868.

Patrick Doran, examined by the Warden:—Do you keep a book by which you can give us an idea of Israel's time on the road? No, I keep no book.

Do you know your own time—were you at work on Monday, 12th October? I worked on 12th October.

Was Israel there that day? I do not know.

Did you keep a return of the men's time? I was in the habit of doing so, and gave it to Mr. Eckford.

Was Welsh at work on that day? Could not say with confidence—have forgotten.

Was Israel at work on the day I was out at Bishop's Bridge? I do not know; I cannot say.

By Mr. Bowden.] Can you tell how long each man worked? I only remember from day to day.

By the Warden.] Was Hennessy at work full time? I do not know.

Do you know how long each man worked during last pay time? I did, and gave a return to Mr. Eckford. I do not know how long Israel worked, nor Carnailly, nor Moylan, Hennessy, Welsh, Sheridan, nor myself.

Where was Mr. Eckford when you gave the last account of time? I was giving an account of last time to Mr. Eckford, at his house, when he was called away. I did not give it to him in High-street, to my recollection. I only kept an account of the men's time for a fortnight at a time on a slip in my pocket.

August, 1868.

No. 7.

JOSEPH ECKFORD, Esq., M.L.A., to THE SECRETARY FOR LANDS.

West Maitland,
20 May, 1869.

SIR,

I have the honor to forward herewith a statement of charges against the Warden of the Maitland District Council, which I think will show clearly the reason that induced him to make the unjust attack upon me he did in December last, whilst I was in Sydney, knowing as he did that I was aware of the accounts being all in a state of disorder, and that he had with James Wallace made them up, with a view no doubt of saving himself from being called upon to make up the deficient amounts, and also of bond entered into by him for the faithful discharge of the duties of the deceased Secretary, Samuel Wallace.

I may also mention, that shortly after the accounts were made up, Mr. Jas. Wallace got in as Station-master on the Railway line at Stony Creek, having obtained it, as the Warden Scholey told me, by his influence with the late Minister for Works.

With reference to the abstracts of accounts, you have nothing to do but send to Mr. Lane at the Treasury, who will furnish you with the originals of what I now send extracts.

It has been reported the Warden intends resigning. If such is the case, I trust his resignation will not be accepted until these matters are all properly cleared up.

I am, &c.,
JOSEPH ECKFORD.

Honorable Colonial Treasurer, for such verification as may be necessary, and such information as can be afforded on the subject of the accounts submitted.

W.F.—June 4th, 1869.

Under Secretary for Finance. B.C. of M.F.—7 June, /69.

[Enclosures in No. 7.]

West Maitland,
20 May, 1869.

STATEMENT of charges against the Warden of the Maitland District Council, for the consideration of the Minister for Lands.

1. That Stephen Scholey, Warden, after the death of Samuel Wallace, Council Clerk, on 13th of August, 1867, did, according to his own admission, make up accounts which were then in arrear, and which he stated were so. It will be remembered the Warden was the bondsman of Samuel Wallace for the faithful discharge of his duties.

2. That it will be seen, in reference to the abstracts of expenditure for 1867, on the Roads from East Maitland to Oak Vale, from Oak Vale to Brokenback Gap, from East Maitland to Raymond Terrace, from Morpeth to Four-mile Creek, and from East Maitland to Paterson *via* Dunmore Bridge, out of seventy-one payments made in favour of the different parties, only six payments have been witnessed by Samuel Wallace; whilst on the other hand, I find on inquiry at the Treasury the whole of the cheques have been countersigned by the deceased, Samuel Wallace, with the exception of nineteen, which were countersigned by James Wallace, who succeeded his brother Samuel on the 20th of August, some seven days after his death, as will be seen by the statement of accounts sent herewith, and which can be verified by applying to the Treasury for the original abstracts, and to the Bank for copies of cheques.

3. With regard to the signatures of some of the men, more especially John Scotling and William Marters, you will find that in several instances they appear as marksmen, yet at the same time they appear as having written their names. It is also desirable to draw your attention to the difference of the dates of payments as shown by the abstracts, being in every instance prior to the dates of the cheques, which will be also found on inquiry at the Treasury and as shown by the accompanying statement of accounts.

4. That it is also desirable to draw your attention to an item of 2s. 10d. appearing in the abstract of expenditure on the Road from Oak Vale to Brokenback, whilst at the same time I have information from the Treasury that it appears in ledger as (£1 5s. 6d.) one pound five shillings and sixpence.

5. The next matter is two payments which will be found in the abstract of expenditure on the Road from Maitland to Raymond Terrace, in brackets, for three pound cheque, No. 101,141, in payments of thirty shillings each. It will be found on inquiry at the Treasury, the cheque thus numbered is made payable to Scotling, and not Farry, as the abstract would make it appear.

6. That it will be also found on inquiry at the Treasury, that a payment of four pounds appears on the abstracts of 1867, for the Road leading from East Maitland to Paterson *via* Dunmore Bridge, to have been made to John Ford, by a cheque No. A 8,591, and which is entered in the cash book one pound ten shillings, as given me from the Treasury, four pounds not in it. I have stated before, the dates of the cheques are all subsequent to the dates of payments as shown on the abstracts, but in this latter case (Ford's) it is most glaring; as the date of payment as shown on the abstract is July 1st, and the cheque dated August 13th. I may here mention, in every instance that payments are made by the District Council to the party who is receiving payments in person, the abstract is signed and the cheque handed over immediately after; and when it happens that payments are made by the Warden and Secretary, the party receiving the cheque, or whoever he may have passed it to, would have to go to one of the Commissioners and get his signature; I have in that way signed many.

7. As a further proof, I also forward copies of statements from three men, *viz.*:—Michael Martin, who appears on the abstract of expenditure from Morpeth to Four-mile Creek as having received a sum of (£33 1s. 3d.) thirty-three pounds one shilling and three-pence, and who positively asserts he never received any such sum of money in his life from the Maitland Road Trust, and that he never received any payments from James Wallace in his life but once, neither did he ever sign any abstracts for payments but the once. John Farry also states he never received a cheque for (£11 19s. 6d.) eleven pounds nineteen shillings and sixpence, as you will find charged against him in the abstract of expenditure from Morpeth to Four-mile Creek, and that he never received any payments in his life from James Wallace, nor ever did he sign any abstracts to any person other than the deceased Secretary, Samuel Wallace, in these matters. Perhaps it would be advisable to ascertain from the Treasury the number of blank cheques forwarded to the District Council, and the number returned as mutilated (if any), and also as having been given in payment. Another instance is that of a man named William Lloyd, who asserts that James Wallace went to him a year or two after he had received a payment from Samuel Wallace, to obtain his signature, and did so obtain it to an abstract for the amount, notwithstanding he had, at the time he received the money from the deceased Samuel Wallace, signed abstract for its payment.

8. That Stephen Scholey, Warden, did also pay for repairing a punt which was sunk in the river at Largs Ferry, when it was so paid for, and who has stated to me, in reply to a question I asked relative to it, that such payment was made upon the certificate of James Herp. If I am rightly informed by Councillors Keating and M'Mahon, Herp met the Committee where the punt was lying, including the Warden, who takes upon himself the duties of a member of all Committees *ex-officio*, owing to his position. He, Herp, only stated he thought the punt would tighten after a little, so as to be able to do its work, but gave no certificate to that effect. In this case I shall also refer you to copies of documents in my possession, sent herewith, obtained by me from Councillors M'Mahon and Keating, both being members of this Punt Committee, and who objected strongly to its being paid for—even went so far as to enter a written protest against it; District Councillor O'Brien being also one of the Punt Committee, his brother-in-law, Robert Lloyd, the contractor for its repair, which is said to have been executed under the supervision of this Councillor O'Brien, and paid for by him, and who has not sought the honor of re-election.

9. This said punt has since been raised at a very great expense, and a man for some days prior to Tuesday last, 18th instant, been kept for the purpose of baling out the water, when in the absence of the Warden at our last meeting we passed a resolution that she should be floated on to the slip, to save further expense.

JOSEPH ECKFORD.

MEMORANDUM

MEMORANDUM of Expenditure on Roads under supervision of M.D.C., as obtained from Colonial Treasurer, and copied from Abstracts sent in by the Warden as correct.

Memorandum as to Tender.

COUNCILLORS Keating, M'Mahon, and O'Brien, Committee for Falls Punt, on a certain day opened tenders, when we found one of them not signed. Of course we felt angry. When O'Brien intimated he knew something about it, we ordered him out; he brought it back signed by Robert Lloyd, it being the second honest tender, and which we accepted. We saw the punt after she was reported as completed; we said we could not consent to take her, as the work was not performed according to contract, and we, of course, brought up a report to that effect, marked *. At that meeting the Warden and Council were all but unanimous that the punt could not be accepted if it did not meet the approval of the Sub-committee appointed to supervise it, and further affirmed it. The meeting had no power to interfere in the matter. These remarks were from the Warden's lips; and we now declare that the punt repairs were paid for against our consent, as we are certain no further repairs were done to her between the date of our report and the acceptance, and therefore, consistently with our duty, could not accept the punt as properly repaired according to annexed specification.*

WILLIAM KEATING.
THOMAS M'MAHON.

Copy of Specification.

THE two underneath ends old zinc taken off, thoroughly scraped, to be lined with inch hardwood boards, to be inspected by at least two of the persons appointed for that purpose, to be caulked, pitched and tarred outside on the Hinton side as the punt now lies, two planks to be replaced, to be caulked, pitched, and tarred, and one new stanchion, and on the opposite side, same end, to be served in like manner, between decks to be scraped and tarred, and floor to be replaced, to be caulked and tarred same as above. This work to be done either by tender for the whole or labour only.

We certify the within was not carried out in any respect.

WILLIAM KEATING.
THOMAS M'MAHON.

* Morpeth, 13 May, 1869.

Report in Committee with the Falls Punt.

MR. O'BRIEN, one of the Committee, reports her completed, and yesterday we with Mr. O'Brien inspected her; and as we considered her not according to contract, we have thought better to lay the matter before the whole of the Commissioners, for their consideration:—

1st. On examination we find that the punt makes from 2 to 3 inches of water as she now lies on the slip at a tide; should she be loaded, there is a possibility of her even making more.

2nd. The deck seams are open, and until the same are caulked and tarred she is not fit for use. This work we consider to be in the contract, and ought therefore to be done before accepting her as completed.

3rd. The extras which were pointed out, and for which the charge was £4 10s. The next is the painting. If we are correct, there was, I believe, a resolution authorizing £2 10s. The charge made is £5, which was thought excessive by a majority of those appointed for that purpose.—Dated 22 October, 1868, and laid before Council.

WILLIAM KEATING.
THOMAS M'MAHON.

True copy of papers in our possession.

After the Falls Punt being accepted.

She was placed in charge of James Elsely and Richard Elsely who gave us a report, being placed there for the purpose of ascertaining her true state (a minute of which, as follows, was read to the Council), viz. :—

From 7 p.m. to 4 a.m. next morning, 89 zinc buckets was leaked in; on following day, 94 buckets, from 4 a.m. to 6 p.m.; and then from 6 p.m. to 5 a.m. next morning, 86 buckets.

The above-named men were employed to take the Punt to Largs Ferry, where she was supposed to be worked. After arriving at Largs, they said unless the punt was kept continually pumped out, they were of opinion she would not float, which was verified by the fact that she was at the bottom of the river in the morning, and the contractor paid for her whilst in that position, notwithstanding we as members of the Committee appointed for the purpose of seeing into the proper repair of this punt, protested against her being paid for.

WILLIAM KEATING.
THOS. M'MAHON.

West Maitland, 19th May, 1869.

I, John Farry, beg to certify that I never received in my life a cheque £11 18s. 6d. from the Maitland Road Trust, neither did I ever in my life receive any payment from James Wallace, for work performed by me on account of the said Maitland Road Trust; and further, if any abstracts are witnessed by James Wallace, for payments received by me, they are forgeries, having been always paid by the deceased, Samuel Wallace, to whom I always signed abstracts.

Witness—J. HOLMES.

his
JOHN × FARRY.
mark.

I, Michael Martin, do hereby certify that I never received any moneys from James Wallace, on account of work performed by me for the Maitland Road Trust, but once, and for which I signed an abstract. I further state that I never received a sum of thirty-three pounds one shilling and threepence, in one cheque, in my life, from the said Trust; neither did I ever put my mark to any abstract for moneys received by me from the Maitland Road Trust to any person but the deceased Samuel Wallace, with the exception of the once, as above stated. If there are any abstracts signed by me and witnessed by James Wallace, they are forgeries.

West Maitland, May, 14th, 1869.

Witness—J. HOLMES.

his
MICHAEL × MARTIN.
mark.

Morpeth, 18th May, 1869.

I, William Lloyd, do hereby certify that I did, at the request of Mr. James Wallace, sign a voucher, he being then Secretary to the Maitland Road Trust, for moneys that I did receive from his brother, the then Secretary, between one and two years before the time of the said James Wallace requesting me to sign again, which I do now assert I signed at the time of my receiving payment of the money in question.

Witness—THOS. M'MAHON.

WILLIAM LLOYD.

Copy of Registration of the death of Samuel Wallace.

Samuel Wallace, 30 years; died at East Maitland, 13 August, 1867, of ramollissement of the brain; buried 15 August, 1867, in the Wesleyan Burial-ground, Oakhampton Road.

J. Eckford, Esq., M.L.A., to The Minister for Lands.

West Maitland,

15 February, 1869.

MEMORANDUM as against Scholey's report. He says his name was proposed in conjunction with Mr. Eckford's to take charge of the Wollombi Road, and that by mistake the Secretary omitted his name from the minutes. Such is not true—Messrs. M'Mahon and Keating, both Councillors, can prove to the contrary, as the road was placed under my entire control. He further states there is a deficiency amounting to £109 5s. 10d., and upon making inquiry he further states he cannot find out the name of William Thomas, and that John Sheridan states £4 10s. is charged against him; whereas he had only received £3 10s. Now William Thomas' account, amounting to £7 4s. 8d., added to 18s. he states Sheridan denies receiving, will only make £8 2s. 8d.; this report implies further that, after his (Scholey's) inquiry not finding the man Thomas, the remainder of the men not being mentioned, he must be satisfied they were on the works, or why particularize the name of Thomas. The report further states Sheridan said he signed the vouchers in blank. Such is not truth, which the original vouchers, when produced, will show that the different payments were all completed at one time with the same ink and pen. Scholey is well aware the Secretary told him, when I gave him the vouchers I distinctly stated there were names in them of men who had been working miles beyond where the party regularly kept were working, and that those men were placed at different parts where the road required most looking to. The Warden has stated I had promised to have all my men over at the office for the last payment. This is not true. I knew nothing of Scholey's intentions, notwithstanding I travelled several miles with him on the same day he alludes to, until 9 o'clock on the same evening. He states I made him that promise, and then it was not from him Scholey, but personally from the Secretary, and a short time afterwards by letter through the post from the Secretary asking me to send over my men to the office. With regard to the report, it was prepared by a solicitor, and afterwards taken back to the same solicitor to copy. Councillors M'Mahon and Keating both state the report is not the same as that passed at the meeting, when it was brought back, and notwithstanding three Councillors signed it, viz. :—Bowden, Noble, and O'Brien, certifying to its truthfulness, and when asked subsequently by me why they signed a document they knew nothing about, their answer was they believed Mr. Scholey—so that upon his statement they stake their honor. Scholey has also stated I had been repeatedly asked to give an explanation, which is not true; I challenged discussion upon the matter only through what I had heard from parties in no way connected with the District Council, and from the Warden's manner he seemed satisfied. About a month afterwards he was in Sydney, and telegraphed to the Secretary on Friday, January 1st, to call a special meeting for Wednesday, January 6th, of the *Maitland Road Trust*, knowing as he (the Warden) did full well, Parliament was to meet on the day previous, and that notice would be given of Parkes' want of confidence motion for the following day, so that it was impossible for me to be in both places. It was most singular, when I arrived in Sydney the day previous to the session opening under the then Government, I met a gentleman returning from the picnic given to the late Government by the present Opposition, and he said to me—"Why they said you would not be here." It would therefore seem as the Warden Scholey, knowing as I do he is a strong partisan of the late Government, more especially Parkes, it was a matter made up amongst them, that if I attended Parliament they would have the chance of carrying what they liked in the District Council; and on the other hand, if I stayed here, his friend Parkes would have had another chance for power. I say, unhesitatingly, Scholey never should have been placed in such a position as that of Warden; and further, I may say, I prevented Mr. Cowper, four years and upwards ago, from placing this man in the Commission of the Peace, he having been recommended as a person fitted for that position; that is one thing why this man should try to injure me. Upon serious reflection I concluded that my parliamentary duties were of more importance than attending the District Council, and I wrote to Mr. Councillor Keating requesting him, if any discussion took place relative to the Cessnock Road under my charge, to move it be postponed until the regular monthly meeting to be held on the Tuesday following, which was refused by the meeting; one of them (Bowden) stating it was of importance it should be entered upon at once, therefore the report, drawn up by Thomson, solicitor, cut and dried by Bowden and Scholey, was submitted and adopted, with instructions that it should be forthwith sent to the Minister for Lands. At the next meeting Mr. Councillor Keating asked the Warden "had any answer been received to the report?" and was told "no"; he then asked "whether or not the report had been forwarded?" and the Warden answered "it had only that moment been received from the lawyer who had it for copying." Keating then moved it should be forwarded forthwith; Bowden, who only a few days previous said it was of so much importance to adopt and forward the report, moved an amendment that it be not sent forthwith. The Warden is fully aware that he has done wrong, he knows full well the man Israel intends to enter an action against him for the way in which he has acted towards him as regards myself. He (the Warden) is a man I have not spoken to for some time past, having at a public meeting heard him tell a gross falsehood against a gentleman of high position and character. I shall, as soon as the District Council Meeting is over to-morrow, send you a proper reply, and would have done so long before this, had it not been for the obstacles thrown in my way by the Warden. The first opportunity I had, which was at our monthly meeting, to-morrow is four weeks ago, I rose in my place to move resolutions relative to the matter. The Warden at once stopped me, and moved a resolution that I should not be heard, which was seconded by Bowden. I immediately moved, as an amendment, that I be heard at once, and spoke to the amendment, after which the Warden moved and carried that no further discussion take place until the next meeting, which is to-morrow. I may also add, the Warden is aware it is the intention of Councillors M'Mahon and Keating to report him for misappropriation of public funds, and also for making up accounts himself upon the death of the Secretary, Wallace, who (he the Warden stated) had left the accounts all in a mess, and that several documents were missing. I forward you a letter received from one of the *Mercury* reporters, as also one each from Keating and M'Mahon, both Councillors. The excuse Scholey made for so long a postponement was that he wanted to go to the Clarence, which could not have been the case, as he did not go. The Secretary, Samuel Wallace, after his death, was succeeded by his brother, James Wallace; the former's surety was Mr. Scholey, the present Warden. I may also add, the fact of me having been elected for the Municipal Council, polling 570 votes in a small place like this, is a sufficient refutation in itself to such trumped-up statements as those made by Scholey. This statement should read December instead of January, that Scholey called the meeting, when I went down to the opening of Parliament by your Government.

JOSEPH ECKFORD.

Mr. John Keating to The Minister for Lands.

Sydney, 2 June, 1869.

Sir,

I beg leave most respectfully to inform you that I have known Mr. Joseph Eckford for the last twenty years, a great part of which he has been before the public as a consistent Member of the Legislative Assembly. He has recently been returned, for the third time, as a Member of the Maitland District Road Trust, by the united Electorates of West Maitland, East Maitland, and Morpeth. I believe the above-named gentleman to be thoroughly honest and straightforward in principle, and incapable of degrading his name and character, as also of ruining his family prospects and future public usefulness, by the misappropriation of public money. He informs me he can account for every farthing that has been placed in his hands by the Trust, for road construction and improvement. Should this be borne out, Mr. Eckford has been much injured regarding the Cessnock Road; and, under present circumstances, I feel satisfied that he will come out of the matter with clean hands, and prove himself to be a man of sterling honesty and truth.

I have, &c.,

JOHN KEATING,
Morpeth.

The Warden.—Councillor Eckford, in a long address, in which he gave his reasons for the course he was taking, moved,—“That this meeting is of opinion that the last resolution be transmitted to the Government, in order that they may inquire into the desirability and fitness of the present Warden, Stephen Scholey, being allowed to preside over the deliberations of this Council any longer, being one of importance, and second to no other in this Colony, save the Legislature.” This resolution was seconded by Councillor William Keating, and supported by Councillor John Keating, and carried unanimously.

Maitland District Council.—An adjourned meeting of this Council was held in the office, East Maitland, on Tuesday afternoon. Present—The Warden, Councillors Eckford, J. Keating, Bowden, W. Keating, and M'Mahon. The minutes of the last meeting were read and confirmed, after some little discussion as to an alleged omission.

Motion

Motion for adjournment.—The Warden moved the adjournment of the Council for a week, in order to have the opportunity of disclaiming any intention to act discourteously to any member of the Council, in postponing the last meeting, or to offer an insult to any Councillor. In postponing the meeting on the ground that the newly-elected Councillors were not gazetted, he had only followed a course that had been pursued under similar circumstances about four years ago. He had asked Mr. Hughes (the Secretary) to write circulars postponing the meeting, because he had thought it far better to do so, and he had been particular in desiring that the circular should contain all necessary apologies for the necessity that had arisen for taking the step. With respect to the fence across the road at the Hinton Ferry, he thought the Commissioners were wrong in entering upon that matter, and listening to the statements of a man in his (the Warden's) absence; he denied most strongly that he had anything to do with the erection of the fence in question; that had been the work of Councillor O'Brien, who had been empowered by the Council to superintend the erection of a fence at the Hinton Punt-house, and he (the Warden) had never interfered with the fencing. He trusted these explanations would clear him from the charge of intending to act discourteously, and that the Council would withdraw the motion, which involved a censure upon him for interfering with work without warrant. A desultory discussion followed, in which Councillors M'Mahon, J. Keating, J. Eckford, and W. Keating took part, and it was stated by Commissioners, and by Lloyd, the contractor for the fencing, that the Warden had given the requisite authority for the construction of the cross-fence. This the Warden again denied, and Councillor Eckford was proceeding to address the Council on the motion for adjournment, and was making some allusion to the manner in which charges against him had been treated, when Councillor Bowden withdrew, and the Warden intimated that if Councillor Eckford continued to speak on the matter he was then referring to, he would leave the Chair. Councillor Eckford said he did not intend to refrain from the course he was taking; whereupon the Warden left the Chair, saying, as he did so, that he adjourned the meeting for a week. Councillor M'Mahon was then moved into the Chair, and after a lengthy speech from Councillor Eckford, the latter moved the following resolution:—"That the conduct of the Warden, in quitting his Chair this evening, without the slightest provocation, is an insult to the Council; more especially as it was an adjourned meeting. His object could only be for the purpose of preventing public business from being transacted, as he stated, on abruptly vacating the Chair, that he adjourned the meeting." Councillor John Keating seconded the resolution, and after being supported by Councillor William Keating, it was carried unanimously.

Charter of the Trust.—After some conversation it was decided to make application to the Colonial Secretary for a dozen copies of the Charter of the Maitland Road Trust, for the use of members of the Council.

No. 8.

JOSEPH ECKFORD, Esq., M.L.A., to THE SECRETARY FOR LANDS.

West Maitland, 11 June, 1869.

SIR,

I herewith forward a statement of expenditure on the Road from East Maitland towards Newcastle for 1867, under the supervision of Stephen Scholey, Warden, and which has been verified by the Treasury officers. You will find, on looking at the abstracts themselves, James Wallace has signed them as Secretary on July 20th, July 26th, and August 5th, whereas you will see Samuel Wallace was Secretary and signed the cheques on those days as per accompanying statement. The Warden cannot make any excuse, as this irregularity or improper entry is for works carried on under his own control, no person whatever having anything to do with the supervision of said road but himself.

I find from information received from the Treasury yesterday, there is a slight mistake made in my report against Scholey with reference to the dates of cheques being subsequent to the dates of payments; now being more fully informed, I find what I believe to be dates of cheques was dates of payments in bank—every other thing is correct.

I need not again remind you as to cheque No. 101141, made in favour of Scolting for £3 on October 29th, and which shows by the abstracts to have been paid to John Farry, in two payments of 30s. each. The payment, if my information from the Treasury is correct, was witnessed by Jas. Wallace and cheque signed by Saml. Wallace, who had as you will see died on 13th August previously. The names written in red ink were done at the Treasury.

I am, &c.,

JOSEPH ECKFORD.

No. 9.

THE UNDER SECRETARY FOR LANDS to THE WARDEN, DISTRICT COUNCIL, MAITLAND.

Department of Lands,
Sydney, 23 June, 1869.

SIR,

In forwarding the accompanying copy of a statement made to this office by Mr. Eckford, on ^{11 June, 1869.} the subject of certain irregularities in the accounts of your Trust, carried out under your supervision, I am directed by the Secretary for Lands to request that you will favour me with any observations that you may think fit to offer in the matter.

I have, &c.,
M. FITZPATRICK.

No. 10.

THE WARDEN, DISTRICT COUNCIL, MAITLAND, to THE MINISTER FOR LANDS.

East Maitland,
29 June, 1869.

SIR,

I do myself the honor to acknowledge the receipt of your communication dated 23rd June, 1869, accompanied by a statement of irregularities supposed by Mr. Eckford to exist in the accounts of the Maitland Road Trust, and have much pleasure in furnishing herewith such observations as may plainly show to you that the object of Mr. Eckford's letter is not to promote or protect the public interest, nor yet to ensure a more efficient system in the working of the Trust of which he is a member. Referring to the first subject endeavoured to be formed into the substance of a complaint as to the expenditure of public moneys on the Road from East Maitland to Newcastle for 1867, and stated as follows—"You will find, on looking at the abstracts themselves, James Wallace has signed them as Secretary, on July 20th, July 26th, and August 5th, whereas you will see Samuel Wallace was Secretary and signed the cheque on those days as per accompanying statement. The Warden cannot make excuse, as this irregularity or improper entry was for works carried on under his own control, no person whatever having anything to do with the said road but himself." This egregious irregularity may be easily explained. In compliance with the unanimous consent of the Maitland Road Trust, Mr. James Wallace acted in conjunction with his brother, Mr. Samuel Wallace, as Secretary to that body, for several months previous to the death of the latter, which took place on the 13th August, 1867. Mr. Samuel Wallace, as the duly appointed Secretary, continued to countersign the cheques, and the signatures upon abstracts referred to may have been witnessed as stated by James Wallace, or they may form portion of several abstracts which were not completed until after Mr. Samuel Wallace's decease, although the cheques were signed and paid by him on the dates named.

Mr. Eckford is fully cognizant of this, and with every circumstance connected with these matters, and his retentive memory must still retain the fact that he waited with me (by appointment of the Trust), upon the Under Secretary for Finance and Trade, to confer with him with reference to their adjustment. In consequence of Mr. Samuel Wallace's illness previous to his death, and his brother, James Wallace, having only performed a portion of the labour which devolved upon the Secretary, the abstracts were not prepared as usual; we consequently requested to be supplied with a statement of cheques which had been given in payment of wages. The Under Secretary advised that a declaration should be made by the members of the Trust, to the effect that they believed the moneys voted had been faithfully expended. To this I objected, and determined to trace the matter from the information in my possession. Having no data but the butts of cheque books, I had every payment transcribed, waited upon every individual who had received payments and obtained their signatures, thus preparing the required abstracts, which upon completion corresponded *in toto* with the sums received from the Government.

These abstracts were received by the Auditor General without any comment, and as stated in Mr. Eckford's letter of the 11th instant, verified by the Treasury. Mr. Eckford having concurred and willingly assisted in carrying out these matters, it is certainly strange that in his capacity of Commissioner he should have so long retained to himself these imaginary errors without bringing them under the notice of the Trust or the Government. With reference to the second discrepancy, the information from the Treasury seems to imply that a previous report was sent in by Mr. Eckford, and the inaccuracy having been proved to have emanated from an oversight by himself, his satisfaction is expressed in the second clause of his letter of the 11th June, hence requiring no answer from me. With reference to the third paragraph, which reads thus—"I need not remind you as to the cheque No. 101141, made in favour of Scotling, for three pounds, on October 29th, and which shows by the abstract to have been paid John Farry in two payments of thirty shillings each. The payment, if my information from the Treasury is correct, was witnessed by James Wallace, and cheque signed by Samuel Wallace, who had, as you will see, died on 13th August previously. The names written in red ink was done at the Treasury." I find, upon reference to the books of the Trust, that upon the 29th October, 1867, cheque 101141, value £3, drawn in favour of John Scotling for work performed on Road East Maitland to Oakvale, and cheque 101142, for a similar amount to labourers on Road East Maitland to Raymond Terrace, where John Farry was employed. The latter cheque was probably received by Farry on account of himself and others engaged with him, and the abstract signed for £1 10s. in two distinct places, which, in the aggregate, would be correct. I believe this to be the reason why Farry's name appears on the abstract, the cheque being entered on the butt and in the day-book as payable to labourers and not an individual.

The cheque could not have been signed by Saml. Wallace, as I find by the minutes of the proceedings of the Trust, dated 20th August, 1867, the following resolution:—"The Warden proposed that the resolution empowering the Secretary to draw cheques be rescinded, and that for the future all cheques be drawn by the Warden. Mr. O'Brien seconded the motion, which was carried unanimously." The purport of this resolution

resolution having been sent to the bank, it is improbable that any cheques would have been paid in contravention to its terms. It is impossible then that the statement with reference to this cheque can be correct if drawn subsequent to the passing of the above resolution, and it certainly must have been unless there is an error in the date. Prior to this all cheques were countersigned by the Secretary, in compliance with the terms of a resolution passed by the Trust on the 18th December, 1865.

If there are any other questions you wish answered, or any additional information required, I will gladly furnish it; and, in addition to my source of proof, the records of the Council and the cheques paid away, which are at any time available upon application to the bank. I believe, without an exception, I can bring forward the several men whose names appear on the abstracts to testify that they are the parties the signatures represent, and received the amounts fixed opposite their respective names.

I have, &c.,
STEPHEN SCHOLEY.

MINUTE OF MINISTER.

THE explanation includes statements at variance with those of Mr. Eckford; some of which may be capable of verification at the Treasury. These papers may therefore accompany the former papers in Mr. Eckford's case already forwarded to that department. W.F.—July 16, 1869.

The Under Secretary for Finance and Trade. B.C., 22 July, /69.—M.F.

No. 11.

J. ECKFORD, Esq., M.L.A., to THE SECRETARY FOR LANDS.
West Maitland,
20 August, 1869.

SIR,

It has been asserted by the Warden, upon two occasions, that he has received an official reply from your office that the charges I made against him amounted to nothing more than a slight irregularity, and that to his charges made against me no reply has yet been received; indeed, he spoke in such a way as would lead the public to think I have, in the opinion of the Government, been guilty of a very gross offence. There was a balance of £22 17s. from last year's grant unexpended, out of which there was due to Israel and Kinnaillly £6 8s., which has been paid these men, leaving still a balance of £16 5s. unexpended. That amount has been forwarded to the Treasury, by order of the Council, the time having long since passed over which was allowed for its expenditure.

I forward herewith a scrip taken from the *Maitland Mercury*, which is an abridged report of the proceedings of the meeting I have already alluded to, in which you will see he has stated you ordered him to pay no money on that road. Believing this statement to be untrue, and only in keeping with his general conduct, I trust you will favour me with a reply as to his truthfulness or otherwise, because the fact of him stating at a public meeting a Minister of the Crown had desired him to do a particular act must leave his hearers in doubt as to its truthfulness or otherwise. He, the Warden, ran away, under the pretence of business matters, to Sydney, and Bowden, as you will see, left under a pretence of illness in his family, which I am informed is untrue. The fact is, these men now know full well they have done me an injustice, and they have left themselves open to me to bring an action against them for slander.

Under the circumstances, I trust you will give me a reply as to the Warden's statements.

I have, &c.,
JOSEPH ECKFORD.

[Enclosures in No. 11.]

Extract from *Maitland Mercury*.

At this stage of the proceedings the Warden said he was obliged to leave for Sydney by the afternoon train, and must vacate the Chair. After some discussion Councillor Eckford was voted into the Chair; but previous to the Warden's withdrawal he was asked the following question by Councillor M'Mahon:—"Has any reply come to hand from the Government to the report sent by you against Councillor Eckford, or to the report sent by Councillor Eckford against you?" The Warden said, in reply to the question—"In reference to the charge sent down against myself, I have received an official reply that the charges amount to a mere irregularity, according to the reading of the Minister for Lands. I am willing to place the documents before the Council. In reference to the charges against Mr. Eckford, there has been no reply from the Government." Councillor M'Mahon then moved—"That the vouchers belonging to Cessnock Road for 1868 be laid upon this table, for the information of the Commissioners, and if correct, to be certified and transmitted to the Government." Councillor J. Keating seconded the motion. The Warden said: In reference to this matter, the whole of the money voted for this road had not been expended, so that the vouchers cannot be returned. There is £16 to be expended, and the Minister for Lands ordered me to pay no money on this road. I object to the vouchers being produced until we have had some communication from the Government. Councillor J. Keating: Have the vouchers ever been kept back before? The Warden: Yes; no vouchers are sent until the money has been all expended. The Warden then left the room, and Councillor Eckford took the Chair. He proceeded to state, at length, the circumstances connected with his management of the Cessnock Road, and to explain the nature of the charges made by the Warden against him, the substance of his remarks being similar to what we have already published; and ultimately the motion was carried unanimously, and the vouchers were laid upon the table. During the speech of Councillor Eckford, Councillor Bowden retired, pleading illness in his family that necessitated his attendance at home. The vouchers being produced, Councillor Eckford explained that he wished to make one correction in them; the sum of 5s. was placed to one man's name, whereas another man ought to have been charged with it. The Councillors would see, if they examined the signatures upon the vouchers, that they were all written at one and the same time with the amounts acknowledged, and not, as was falsely alleged, signed blank and the sums placed against the names afterwards. Councillor M'Mahon moved—"That the balance due to Kinneally, viz., £4 4s., and Israel £2 8s., as per order of Councillor Eckford, on October 27, 1868, be paid at once." Councillor W. Keating seconded the motion, which was agreed to unanimously. The vouchers were then certified to by two Councillors besides Councillor Eckford, and it was determined to forward them to the Audit Office forthwith.

The Council went into committee upon the application of the Fall's puntman, but arrived at no decision; and on resuming, rose.

MINUTE

MINUTE OF THE UNDER SECRETARY FOR LANDS.

HAVE any such communications been addressed to the Warden as herein referred to? What was the nature of the instructions and subsequent communication about payment to the District Council?

M.F.

21 August, 1869.

As such letter as that mentioned by Mr. Scholey has been sent from this office. The communication addressed to the Warden (23 June, 1869) enclosed a statement which had been made to this office that certain irregularities had occurred in connection with his management of the business of the Trust, and requested him to explain; he has not replied, and should perhaps be reminded.

The papers are still at the Treasury, where they were sent for such verification as might be necessary, and such information as could be afforded on the subject of the accounts in dispute.

In the meantime, the issue of further advances to the Maitland Road Trust has been delayed by instructions of the Minister.—27.

No. 12.

THE WARDEN OF THE MAITLAND DISTRICT COUNCIL to THE SECRETARY FOR LANDS.

Maitland District Council,

East Maitland, 24 August, 1869.

SIR,

I do myself the honor to bring under your notice certain proceedings which took place in this Council Chamber, on Tuesday, 17th instant, when the following Commissioners were present, viz.:—Mr. Joseph Eckford, Mr. John Keating, Mr. William Keating, and Mr. Thomas M'Mahon.

On the day in question, after conducting the usual preliminary business of opening the meeting, I vacated the Chair, explaining to the Commissioners that I had to leave for Sydney that afternoon, and accordingly left the Chamber. During the course of the meeting it was proposed by Mr. M'Mahon,—“That the vouchers belonging to Cessnock Road for 1868 be laid on this table, for the information of the Commissioners, and if correct to be certified and transmitted to the Government.” Motion seconded by Mr. John Keating, and carried unanimously.

The Secretary produced the vouchers, which were examined by the Commissioners; and on being asked by Mr. Eckford if they were satisfied that they were correct, and the Commissioners expressing themselves in the affirmative, Mr. M'Mahon moved—“That the balance of moneys due to Kinneally, £4 4s., and Israel, £2 8s., as per order drawn by Mr. Eckford on October 27th, 1868, be paid at once.” Motion seconded by Mr. Wm. Keating, and carried unanimously.

Proposed by Mr. M'Mahon—“That the vouchers being considered correct be forwarded, together with cheque for balance to the Treasury at once.” Motion seconded by Mr. John Keating, and carried unanimously. Cheques were then drawn, signed by Mr. Joseph Eckford as Chairman, Mr. John Keating, and Mr. Wm. Keating, and handed over to the parties named; that in favour of Treasury has also been forwarded to the Auditor General.

From information in my possession, I am led to believe that the money thus paid to Kinneally and Israel was not earned by them, and is portion of a dispute in reference to the Cessnock Road grant for 1868, and of which full particulars are now in your office.

I have to call your attention also to the following resolution of 20th August, 1867, which was moved by the Warden, seconded by Mr. O'Brien (then a Commissioner), and carried unanimously, Messrs. Eckford and M'Mahon being present,—“That for the future all cheques be drawn by the Warden.”

I have, &c.,

STEPHEN SCHOLEY,

Warden.

MINUTE OF MINISTER FOR LANDS.

I CANNOT quite understand why this information is given, as it is not the duty of the Government to regulate the proceedings of elective bodies such as District Councils, whose members are responsible to their constituents and to the district—not to the Government. There is undoubtedly a responsibility due to the Government by the District Council of any district, not by individual members, with reference to moneys entrusted by the Government, or by a Parliament, to be expended by the Council. For this money the Council in such case has to account to the Government. This paper however may be submitted with the other papers at the Treasury.

W.F.—August 30th, 1869.

Under Secretary for Finance. B.C., 30 Aug., /69.—M.F.

No. 13.

THE WARDEN OF THE MAITLAND DISTRICT COUNCIL to THE SECRETARY FOR LANDS.

West Maitland,

30 September, 1869.

SIR,

With reference to my former report on the subject of the appropriation of the sum of £350, No. 2. placed to the credit of the Maitland District Council in the Bank of New South Wales, to be expended on that portion of the Wollombi Road lying between Maitland and Cessnock, I now do myself the honor to report further, that I have made inquiries personally from a great number of people who were able to

give me information on the subject of the names, business, and residences of persons living in the district of Wollombi, particularly in the neighbourhood of Cessnock, as well as along the Wollombi Road on this side of Cessnock, and in the neighbouring districts of Mount Vincent and Black Creek, which inquiries have extended from February last to the present time; and that I have also caused similar inquiries to be made by others, with the view of ascertaining whether such persons as William Thomas (a marksman), William Avery (a marksman), and John Anderson, mentioned in my previous report as having been paid certain amounts for work alleged to be done on the before-mentioned portion of the Wollombi Road, such payments being made by Mr. Joseph Eckford, did work, as was alleged, on that portion of the road between Bishop's Bridge and Cessnock, at or about the time mentioned in the vouchers, or whether in fact there were any persons of those names, and answering the descriptions given, in those districts.

The result of these inquiries is, that there were not, at or about the time stated in the abstracts and vouchers, any men of the names of William Thomas, William Avery, and John Anderson, at work on the before-mentioned road, nor were there at that time, nor for some time before nor since that time, any men of that description or of those names residing in the before-mentioned districts.

I have, &c.,
STEPHEN SCHOLEY.

No. 14.

MINUTE OF SECRETARY FOR LANDS.

PENDING investigation into certain charges and counter-charges between and against the Warden of the District Council of Maitland upon matters of account, I consider it advisable that no issues of public money to the Council in question shall be made for the time being; or, in case there should be any cases of urgency having reference to local expenditure under supervision of the Council, let all cases of the kind be submitted, without delay, for further inquiry and decision.

W.F.—5 June, 1869.

THE whole of the papers connected with the questions in dispute between Mr. Eckford and the Maitland District Council have been despatched to the Treasury, for verification of the facts stated by the former, and for other information. The moneys usually allotted to the Maitland District Council have been already placed to the credit of that body, but I find are not yet operated on by them; they stand unexpended in the bank. In accordance with this decision, a sum of £14, proposed to be issued to the Council for the Embankment and Approaches to Pitnacree Bridge will I conclude be retained for the present.

The matter to await report from Treasury?

Yes. W.F.—14 June, 1869.

Memo. respecting delay in verification of Cessnock Road Accounts.

I WAS busy preparing the Abstracts of the Public Accounts for 1868 when the Cessnock Road papers were referred to me; and as they appeared to refer only to the adjustment of advances, and not of an urgent nature, I put them aside, intending to deal with them on the completion of these Statements. Before I had time, however, to take them up, I received instructions to commence the preparation of the Supplementary Estimates, and Estimates for 1870, which, in addition to my ordinary duties, more than occupied the whole of my time, and I have frequently had to remain in the office to 10 o'clock at night.

GEORGE LAYTON,
Accountant.

The Treasury,
7 October, 1869.

1869.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROAD-METAL QUARRIES AT PROSPECT.

(CORRESPONDENCE, &c., RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 8 October, 1869.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 2nd February, 1869, That there be laid upon the Table of this House,—

- “ Copies of all Correspondence, Minutes, and other Papers, in the possession of the Government, having reference to—
- “ (1.) The granting or handing over by any less tenure the ‘ Road-Metal Quarries’ at Prospect, to the Municipal Council of Sydney.
- “ (2.) Any Branch, or proposed Railway Branch or other Road, to the Prospect Quarries, for conveying ‘ Metal’ to Sydney.
- “ (3.) The resumption by the Government of the land about the Prospect Quarries, together with a tracing of all Plans or Surveys in connection with the above subjects.
- “ (4.) The cost of the Surveys, a Book of Reference giving the data from which the original survey commenced, and the data from which the subsequent survey commenced; also, particulars as to what portion of the said reserved land formed the original driftway; the area of the reserved land, distinguishing the area of the driftway from the whole area resumed.”

(*Mr. Tunks.*)

SCHEDULE.

NO.	PAGE.
1. E. J. Statham to Commissioner for Roads, respecting management of Quarry. 11 July, 1865	3
2. Commissioner for Roads to Surveyor General, for tracing of boundaries. 28 July, 1865	3
3. Surveyor General to Commissioner for Roads, forwarding tracing. 1 August, 1865	3
4. E. J. Statham to Commissioner for Roads, suggesting re-survey. 8 September, 1865	3
5. R. W. Cox to Secretary for Lands—that certain roads through his property be closed, and requesting that he be allowed to purchase the same. January, 1867	4
6. Licensed Surveyor Hallen to Surveyor General—Report on Mr. Cox's application. (Tracing.) 2 May, 1867	4
7. Do. do. —Reporting upon and re-survey of Quarries. 18 May, 1867	5
8. Surveyor General to Licensed Surveyor Hallen, for sketch shewing position and extent of Quarries—Driftways. 1 June, 1867	5
9. Licensed Surveyor Hallen to Surveyor General, in reply. (Sketch.) 31 August, 1867	5
10. Surveyor General to Under Secretary for Lands, suggesting that the Under Secretary for Works should indicate what portions of the driftway are required. 2 October, 1867	6
11. P. J. Douglas to Commissioner for Roads, in reference to above. 6 November, 1867	6
12. Commissioner for Roads to the Secretary for Works—Report on above. 13 November, 1867	6
13. Surveyor General to Licensed Surveyor Hallen, to mark the roads on the ground and report which of them may be sold. 27 November, 1867	7
14. Licensed Surveyor Hallen to Surveyor General—Report on roads and unalienated land at Prospect, with tracing. 17 February, 1868	7
15. Town Clerk, Sydney, to Under Secretary for Lands—for authority to the City Council to take metal from the quarries at Prospect, for the streets of Sydney. 17 October, 1868	8
16. Under Secretary for Lands to Town Clerk, Sydney, in reply. 20 October, 1868	8
17. P. Doyle to Commissioner for Roads, reporting steps taken by Corporation. 14 November, 1868	9

ROAD-METAL QUARRIES AT PROSPECT.

No. 1.

MR. E. J. STATHAM *to* THE COMMISSIONER FOR ROADS.

Parramatta, 11 July, 1865.

SIR,

I think it extremely desirable that some steps be taken for the proper management and control of the Prospect Quarry.

This quarry is of great extent, is near the road, and has considerable natural advantages for working. The Western Road depends on it for its supply of metal for a length of twenty miles, and there is sufficient stone in the quarry to last many years. I have been informed that there is a Government reserve of 2 acres at the quarry, with a right of road to it. The boundaries of this reserve are at present undefined. Proprietors of adjoining land lay claim to portions of the quarry, to which I think they are not entitled, and exact a royalty from contractors. The road fenced off, as an approach to the quarry, is so narrow that in wet weather it soon cuts up and becomes impassable, the only egress then being through adjoining land, for which the proprietor exacts a toll of 3d. a load.

The contractors, when quarrying stone, take no trouble to remove the spoil, which they merely throw back; consequently the best parts of the quarry are choked up.

I beg leave to suggest that I be authorized to take possession and management of the quarry. For that purpose it will be necessary to furnish me with a description of the reserve, in order to mark the boundaries.

I have, &c.,
E. J. STATHAM.

No. 2.

THE COMMISSIONER FOR ROADS *to* THE SURVEYOR GENERAL.

Department of Public Works,
Roads Branch,
Sydney, 28 July, 1865.

SIR,

It being desirable that the boundaries for the Prospect Quarry should be defined, in order to arrange for its proper management and control, will you be good enough to favor me with a tracing of the boundaries of said quarry, with statement of any particulars respecting same which may be in your possession.

I have, &c.,
WILLIAM C. BENNETT,
Commissioner and Engineer for Roads.

No. 3.

THE SURVEYOR GENERAL *to* THE COMMISSIONER FOR ROADS.

Surveyor General's Office,
Sydney, 1 August, 1865.

SIR,

In reference to the request made in your letter of the 28th ultimo, I have the honor to forward a tracing showing the position of the quarry at Prospect.

2. The 2 acres embracing the quarry were obtained by Government in exchange for 200 acres at Shoalhaven. Appendix A.

I have, &c.,
W. R. DAVIDSON,
S.G.

No. 4.

MR. E. J. STATHAM *to* THE COMMISSIONER FOR ROADS.

Parramatta, 8 September, 1865.

SIR,

On examination I find that the boundaries, as shown in the tracing received from the Surveyor General, are obliterated by the cutting up of the properties, so that I cannot define the position of the quarry with any degree of accuracy. It would be better to have a proper survey made, and the boundaries of the quarry and road definitely marked.

I have, &c.,
E. J. STATHAM.

This

This can only be done by the local surveyor, or some one acquainted with the boundaries. The Surveyor General might be requested to have the quarry marked out, as there appears to be serious encroachment on it.—W.C.B.—11/9/65.

Under Secretary for Lands, B.C., 14 Sept., 1865.—J.R.

Surveyor General, B.C., 16 Sept., 1869.—M.F.

Forwarded to Mr. Surveyor Armstrong, who will be good enough to make the necessary survey, and furnish a plan shewing the position of the quarry., W.R.D., B.C., 20 September, 1865.

Transferred to Mr. Licensed Surveyor Hallen for his attention, B.C., 11 May, 1866.—Wm. THOMAS, for the Sur. Genl.

No. 5.

MR. RICHARD W. COX *to* THE SECRETARY FOR LANDS.

Greystanes, Prospect,
January, 1867.

SIR,

I have the honor, under the provisions of section (10) ten of the Crown Lands Alienation Act of 1861, and of rule 15, made in pursuance thereof, to apply to you to cause the roads over my estate, called Greystanes, in the parish of Prospect and county of Cumberland (a tracing whereof is appended hereto, and which roads are on such plan coloured yellow), *to be closed*, and to request that I may become the purchaser thereof, under the provisions of the aforesaid section.

Appendix B.

The road marked blue on the plan, and running along the eastern boundary of the estate, is a public road, and is regularly used as such.

The roads intersecting my estate were reserved in accordance with the old practice with respect to Veterans' Grants, of which the estate is composed, but are not now required for public use or convenience, and have been rendered unnecessary by the road above mentioned.

The roads sought to be closed have never been used as such, but have been fenced in with the estate for a period of upwards of forty years, to the best of my information and belief.

I have, &c.,
RICHARD W. COX.

Referred to Mr. Licensed Surveyor Hallen for his report, as to whether the closing of the roads herein applied for would inconvenience the public, either now or at some future time.—F. P. ADAMS, D. Surv. G., B.C., 17 Feb., /67.

No. 6.

MR. LICENSED SURVEYOR HALLEN *to* THE SURVEYOR GENERAL.

108, Pitt-street, Sydney,
2 May, 1867.

SIR,

In conformity with instructions from the Deputy Surveyor General, B.C. 17 February, 1867, I have visited the estate called "Greystanes," belonging to Richard W. Cox, Esq., situate in the parish of Prospect and county of Cumberland, and inspected the boundaries of the estate as now fenced in, but am unable to state the area of these roads in consequence of one of them being 5 chains wide in Meehan's plan of portion of Prospect, and the others appearing of various widths.

I would therefore respectfully suggest that the present boundaries of the estate be surveyed (which would not exceed four days), and then, supposing the straight road on its eastern side (blue) to be in its correct place, to deduct the areas of the farms from the gross contents to give the area of the roads. Until this be done it will be impossible to place the roads, so as accurately to judge (if stopped up) whether the public would be inconvenienced now or at any future time. I would further state that it is highly important for the interest of the Government that the position of these roads should be ascertained, as very valuable blue-stone for road-making abounds in these hills; and if the roads in question run through where this stone is, valuable public quarries may be made.

These hills being very lofty the quantity of metal will be serviceable for ages; and by making a tramroad from them to run over Prospect Creek, to join the road from Smithfield to Fairfield Railway Station, the metal could be distributed thence along the line.

These quarries would be far more valuable than that at the driftway at Pennant Hills, the metal of better quality, less laborious to get, and being situated on high hills the loaded carriages by judicious management may be made, to a great extent, draw up the empty ones.

I have, &c.,
EDWARD HALLEN.

No. 7.

MR. LICENSED SURVEYOR HALLEN to THE SURVEYOR GENERAL.

108, Pitt-street, Sydney,
18 May, 1867.

SIR,

In accordance with your minute of instructions, B.C. 11 May, 1866, I have made a survey of ^{See No. 4.} the Quarry at Prospect, purchased by the Government from Mr. John Tarlington, and find that where the contractors are now quarrying is not upon it but partly upon a reserved road 2 chains wide, and on Butler's 50 acres grant (now Mrs. Fitzpatrick's). The site of the purchased quarry is now under cultivation and is cropped with corn, and has no indication of having stone upon it.

The ridge (*vide plan*) runs along the crooked fence and rises from the opening of the quarry to K, ^{Appendix C.} its highest point, whence it slopes towards the west more abruptly than towards the east.

I would suggest respectfully that the reserved road be marked out till it reaches the Western Road, and that its entire width of 2 chains be kept, in order that the rubbish may be deposited thereon to keep the front of the quarry (now used) open, for at present it is so blocked up that there is no escape for the water, in consequence of this rubbish not being carted away.

There is abundance of blue-stone on this ridge, extending from north to south as far as the southern side of Prospect Hills, and from their elevation favourable for cartage to the main road.

I had great difficulty in fixing the purchased quarry, in consequence of the fences in its vicinity being in their wrong places, which caused me to take a wider range to fix it from some point which I could not doubt, which point I found at Rowe's south-west corner of his 60 acres grant.

I have, &c.,
EDWARD HALLEN.

Tracing from plan of Mr. Hallen's survey now forwarded for the use of the Commissioner and Engineer for Roads.—J. S. ADAM, for S.G., June 19, '67.

No. 8.

THE SURVEYOR GENERAL to MR. LICENSED SURVEYOR HALLEN.

MR. LICENSED SURVEYOR HALLEN is requested at his early convenience to furnish a sketch, showing the position and extent of the driftways, roads, unalienated lands, and the quarry referred to in his report on the application of R. W. Cox to purchase certain roads and driftways at Prospect.—P.F.A.—B.C., 1 June, 1867.

Report and sketch returned, 31st August, 1867.—EDWARD HALLEN, Licensed Surveyor.

No. 9.

MR. LICENSED SURVEYOR HALLEN to THE SURVEYOR GENERAL.

108, Pitt-street, Sydney,
31 August, 1867.

SIR,

In conformity with a minute of instructions of the Deputy Surveyor General, B.C., 1st June, 1867, to furnish a sketch showing the position and extent of the driftways, roads, unalienated land, and the quarry referred to in my report, 67/13, on the application of R. W. Cox, Esquire, to purchase certain roads and driftways at Prospect, county of Cumberland,—I do myself the honor to report that I have made a general survey of the boundaries of the Prospect Hill—from Hassall's 100 acres grant, on the south side of Prospect Creek, along the whole of the 5 chains driftway to Deveny's 100 acres, on the south side of Toongabee Creek, as well as westerly from the western side of this driftway to the road bounding the west side of Kennedy's grant of 160 acres—and find that the length between Hassall's and Deveny's 100 acres grant is 2 chains 85 links longer than specified in all the grants and roads on that driftway, and that from the north-east corner of Williams's grant of 50 acres, on the Prospect Creek, the distance running west to Morley's 100 acres grant, is 64 chains 45 links. These lengths I have taken as a basis to compile the accompanying sketch, and find that the unlocated piece of land of 5 acres, marked A, is on the top of Prospect range well cropped with blue-metal, of which I send you a sample; and that the 2½-chain and 2 chain roads, which bound its south and east sides, are full of the same metal; also, that the 2-chain road, along Kilby's No. 26 allotment, is equally well provided with the same material.

The farms from No. 20 (Herbert's Grant) to Butler's Farm No. 32, are with the road contiguous, and no doubt were laid out originally from the same starting point; but the farms Nos. 7, 4, 3, 8, and 8, to the south of the 2½-chain road between Nos. 7 and 20 farms, have evidently been run from a line between Hassall's 100 acres, and Nos. 4 and 3, as the existing fences show, thus leaving this 2½-chain road 285 links wider, as shown on the sketch.

The driftway between Williams' and the Limeburner's 50 acres is the balance left after marking off Martin's 30, and the Limeburner's and Williams's 50, acres. Vide E on plan.

Nos. 8 and 8 are two farms of 30 and 20 acres, afterwards made into one grant of 50 acres to Morley, with the 2½-chain road left between to give access to Trace's 50 acres. Vide D on plan.

The position of Trace's 50 acres I have fixed by starting from a point 650 links south of the termination of the dividing line between Harris and Smith's 65 acres and Dunlop's 30 acres, and working round Donovan's, Cleaver's, and Boaghan's farms to the south-west corner of Trace's 50 acres, by the lengths and bearings given in Mechan's plans; but Trace's farms, instead of 50 acres is a 60 acre farm, according to his dimensions. The

Vide C on plan.
Vide D on plan.

The balance left shows the space between Morely and Trace's farms, and also between Trace's, Slaughter's, and Stanbury's farms.

From what I have seen during my survey I am of opinion that it would be contrary to the public interest that any of the roads or driftways should be shut up till the corners of the unalienated land be defined from actual survey, and durable corner-posts fixed to define the boundaries of public property.

I have, &c.

EDWARD HALLEN,
Licensed Surveyor.

No. 10.

THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

It is recommended that this matter be referred to the Under Secretary for Public Works, with a view to ascertain the portions of driftway required for public quarries, after which the necessary roads may be proceeded with. The Surveyor is of opinion that land to the value of £500 is available.

For the Surveyor General,
P. F. ADAMS.

The Under Secretary for Lands, B.C., 2 October, 1867.
Under Secretary for Works, B.C., 10 October, 1867.—M.F.
Mr. Bennett, for report, B.C., 11/10/67.;

No. 11.

MR. P. J. DOUGLAS to THE COMMISSIONER FOR ROADS.

Cleveland House, Redfern,
6 November, 1867.

SIR,

I have the honor to report that in accordance with your instructions [verbal] I have examined the Prospect Hill in order to ascertain what portions of the reserved roads and driftways it would be desirable, in view of their probable sale, to keep in possession of the Government, as quarries for the supply of blue-metal for the Western Road.

On examining the locality I found it evident that, by retaining possession of two reserved roads unused, and for other purposes useless, in the immediate neighbourhood of the present quarry, stone in unlimited quantity and of easy access could be permanently secured.

On referring to Mr. Surveyor Hallen's sketch it will be seen that there is a reserved road 2 chains wide, leading from the Main Western Road up the northern slope of the hills to the present quarry, crossing the first ridge and extending beyond to the second or southern ridge of hills near Fenton's grant. It will also be seen that where it crosses the first ridge this road is joined at right-angles by another road $2\frac{1}{2}$ chains wide.

By keeping possession of the 2-chain road as far as the summit of the northern ridge, and reserving also the $2\frac{1}{2}$ -chain road for a distance of (say) 5 chains on each side of the point of intersection, a quarry of more than 5 acres in extent, with abundance of stone cropping out from the surface, would be secured within little more than a mile of the Western Road, the heavy traffic to which would be all down hill. This quarry, however, would hardly be required for years yet, as the 2-chain road itself leading up to it would produce an almost inexhaustible supply of metal if the present quarry, which is partly upon it, were worked on within its boundaries in a southerly direction. To work it more effectually, however, it would be desirable to make the road run along the back-bone of the northern slope instead of as at present, just on the western side. An arrangement no doubt could be made with the owners of the land to give a chain's width on its eastern slope in exchange for a chain's width on the western, so that the centre of the road might coincide with the line of the ridge, and thus more stone would be gained.

The unalienated plot of 5 acres, marked by Mr. Hallen for a quarry, is on the western slope and not so rich in stone as the summit of the ridge.

If the Government should determine to reserve for quarries the portions of the roads I have mentioned, I would beg to suggest that the areas should as soon as possible be definitely marked out on the ground and fenced in, so that when quarrying begins on a large scale in the early part of next year there need be no encroachment on private property.

I have, &c.,

P. J. DOUGLAS.

No. 12.

THE COMMISSIONER FOR ROADS to THE UNDER SECRETARY FOR PUBLIC WORKS.

MR. Douglas recommends that the portion shown in red be reserved, and reports that it contains sufficient stone to maintain the Western Road for the next fifty years. Mr. Douglas has only looked at the question as it affects the *Western Road*, but as it is difficult to define what quantity of metal will be required for other purposes—the streets of Sydney, Parramatta, and the general roads in the county of Cumberland—I am of opinion that it would be desirable to reserve *all* unalienated land containing blue-metal, with sufficient approaches to same, both from the Western and Southern Railway. The land not containing blue-metal, or not required for approaches to quarries, to be at the disposal of the Survey Department. The land reserved should be defined by permanent marks, and if a plan of it is made a copy or tracing would be useful to this department.

W. C. BENNETT,
13/11/67.
Approved

Approved as suggested by Commissioner for Roads. J.B.—14/11/67.
 Under Secretary for Lands, B.C., 14 Nov., 1867.—J.R.
 For Surveyor General, for report, B.C., 20 Nov., /67.—J.B.W.
 The area which it is proposed to retain appears large, but it may be well to retain it. The roads may now be marked out and any that do not contain metal and not otherwise necessary may be alienated. For the Surveyor General. P. F. ADAMS.—21 Nov.

No. 13.

THE SURVEYOR GENERAL to MR. LICENSED SURVEYOR HALLEN.

MR. Licensed Surveyor Hallen will be good enough to mark the roads on the ground, and report which of them may be sold under the decision of the Honorable the Secretary for Lands.

P.F.A.,
 27 Nov., /67.

No. 14.

MR. LICENSED SURVEYOR HALLEN to THE SURVEYOR GENERAL.

108, Pitt-street, Sydney,
 17 February, 1868.

SIR,

In conformity with a minute of instructions of the Deputy Surveyor General, 27th November, 1867, I do myself the honor to report that I have made a careful survey of the various roads and driftways shown on a plan* sent herewith, have marked the same with stakes with an R thereon, well lock-spitted the ground, and notched and painted in large letters all fences where these lines cross them, so as clearly to define their boundaries. * Appendix E.

I would strongly recommend that regular morticed corner-posts be fixed at all the corners of roads, driftways, and Government land, as I find already that some of the stakes have been removed.

As the local attraction in many places was very great, I found it impossible to conduct the survey by the needle, and therefore worked by angles after I had satisfied myself with a meridian and true starting point.

All the roads, driftways, and unalienated lands are tinted pale green; and as the two portions marked A and F are in the possession of Mr. Cox, I have coloured them a deeper green, and copied the description of the grant of 110 acres to Charles Bishop (under whose grant Mr. Cox claims them), which describes his grant as bounded on the north by a road and divided by the main cross roads.

Now as Rowe's 60 acres grant bounds A and F on the north, and no road is shown between them and Rowe, the description does not include them in Bishop's grant, and I have therefore considered them as unalienated to Bishop and the property of the Crown.

This grant was made in 1803, August 15th, and said to be 110 acres, and is a consolidated grant, formerly Kilby's. This grant is the only one in this locality which mentions roads, other grants simply written "so many acres, situate at the foot of Prospect Hill," a description so vague that it is impossible to fix them without reference to plans in the Survey Office.

The description of many old grants state the contiguous grants as boundaries without naming the roads leading to or dividing them, while others (as in the cases before alluded to) do not even give the adjacent farms.

Such grants require revising to prevent the confusion and litigation arising, through their descriptions being so vague. Much valuable blue-metal is contained in the 2½-chain road which lies between Kilby's and Parish's grants, bearing west from the 5-chain road, and rises abruptly to where it crosses the 2-chain road from which it descends so abruptly towards Graves' grants, in which there is a conical hill entirely composed of blue-metal.

That part of the 2½-chain road between Graves' grant (now Mr. Lawson's) leads to nothing and contains no metal.

From the intersection of the 2½-chain road with the 5-chain road, an excellent tramway, 100 feet wide, may be made to the Western Railway, which runs through Peck's 50 acres grant, with a descent thereto, and if it be made on the eastern side of this 5-chain road it will be in the best position for draining to the creek west of it, and the extra width of 3½ chains not required for the tramway may be sold to the adjoining farms, care being taken that a sufficient quantity of it is reserved for depositing the rubbish from the quarries so as to keep the latter always clear; and for the establishment of a stockade, should the Government deem it advisable to employ convicts for quarrying; or for the residence of persons employed as contractors, &c. From this intersection it would be advisable to sell 1½ chains of the 2½-chain road as far as the road which now runs along the east boundary of Kilby's and Parish's grants, leaving 1 chain wide for a road to connect that road with the eastern side of the 5-chain road.

If the eastern side of the 5-chain road be made 100 feet wide from the above intersection as far as the 2½-chain road leading to Morley's grant of 50 acres, there will be a good opportunity of forming a tramway along it, to bring the stone from the quarry between Fenton's and Morley's grants to the Western Railway, as there are only two moderate undulations to fill up between the southern portions of Pugh's and Herbert's grants.

The remaining portion of the 5-chain road (not required for Government purposes) may be sold to the proprietors of adjacent grants, or others.

I also recommend that the eastern side of the 5-chain road be continued 100 feet wide southerly along Gardiner's west boundary, till it joins a road which runs on the north side of Hassall's 100 acres grant, which road divides that grant from Gardiner's, Brown's, and a portion of Williams' grant, and communicates with Smithfield township. The western side of the 5-chain road remaining to be sold to Castle and Brown's representatives.

This

This would require a bridge or ford over the Prospect Creek, running through Gardiner's and Brown's grants.

This line along the eastern side of the 5-chain road would form almost a direct line between Hassall's 100 acres and Deveney's 100 acres on the Toongabei Creek, crossing the Western Road till it joins the Western Railway and the road lately applied for by Bates and others, leading to the Seven Hills Railway Station.

That portion of the 2-chain road which forms the eastern boundary of Cummings' grant, and runs through Kilby's and as far as the east side of Miles' grant, abounds with blue-metal (except a portion which runs through the orchard enclosed by Mr. Cox), the whole of which could be delivered to the tramway for conveyance to the Western Railway.

The unalienated land, situate between the grants of Fenton, Stanbury, Slaughter, Harris, and Smith, on its northern side, and Morley, Trace, and Boughan's grants, on its southern side, is the highest and most rocky part of the Prospect Ranges, abounding in blue-metal and granite.

As the 2-chain road, which runs between Fenton and Griffiths' grants, does not run further than Morley's grant, I beg to suggest that it be continued through the 2½-chain road, which divides that grant; and that that portion which is enclosed as a vineyard, beyond its northern boundary, and encroaches on Government land, be given as an equivalent. This would enable the Government to commence another quarry between Fenton and Morley's grants, so as to deliver the stone from its eastern side.

Should this suggestion be entertained 1½ chains of the 2½-chain road across Morley's grant could be sold, and all that portion of unlocated land between Trace's and Morley's grant, north of the 2½-chain road, could be sold equally between the proprietors of Morley and Trace's grants, as far as their northern boundaries.

Should the Government prefer delivering the stone from this quarry to the Southern Railway, a good tramway may be laid along Herbert's southern boundary, Taylor's and Rowe's northern boundaries, through reserved roads of the Sherwood Estate (now fenced in on both sides), and the Church and School Lands, without crossing the Prospect Creek, as the country is well adapted for it.

If tramways be laid down a saving of at least 8s. per ton will be effected, besides establishing a permanent traffic on the line, which would amply pay for the outlay, and employ such of Barlow's rails as are not now required for the Railway.

As there is a permanent spring (which has never been known to fail) supplying the swamp on the unlocated land between Trace and Morley's land, I beg to recommend that a reserve for water be made there, and that a road 1 chain wide should run from the southern side of the 2½-chain road (shewn by dotted lines on the plan), and continue thence through the driftway between Williams' and Limeburner's grants to its southern boundary, so as to communicate with the lands belonging to Chisholm and others.

As the Minister for Works has expressed a wish to inspect the roads, driftways, and unalienated lands when staked out, to judge what will be required for public service, as soon as his engagements with the Duke of Edinburgh will permit him, I am unable to further report than to say that should the Government decide upon forming a stockade for the purpose of employing convicts, there are ample materials to employ them for centuries to come at these quarries and the roads which contain metals, as they are invaluable to the Government for such a purpose.

Such parts of my former reports as do not correspond with this, I trust that you will attribute to the want of information which I now possess.

I have, &c.,
EDWARD HALLEN.

No. 15.

THE TOWN CLERK, SYDNEY, to THE UNDER SECRETARY FOR LANDS.

Town Clerk's Office,
Sydney, 17th October, 1868.

SIR,

Referring to the recent inspection by certain Government and Municipal Officials of the blue-metal quarries at Prospect, I have the honor, by direction of the Right Worshipful the Mayor, respectfully to request that the Honorable the Minister for Lands may be solicited to grant to the City Council the necessary authority to enable them to enter upon the lands belonging to the Government, at Prospect, for the purpose of procuring a supply of metal for the streets of the City.

No. 17.

MR. P. DOYLE to THE COMMISSIONER FOR ROADS.

Parramatta, 14 November, 1868.

SIR,

In accordance with your instructions of the 13th instant, I have the honor to inform you that I have examined the Prospect stone quarry and the works that is being carried out with the Sydney Corporation at the said quarry, and I find they have erected two weatherboard huts for the men (skilling fashion) at the quarry, and there are ten men, three horses, and three carts employed moving the dirt and putting a face on the quarry, and in about another week's time there will be a very good quarry opened and a very good supply of stone to be had.

The man in charge seems quite satisfied with the quarry; he has got a tolerable good face on the work, and the men will commence to haul stone to the railway shortly.

There is about 90 cubic yards of rubble now ready to send away, and a very good face of stone to work at, though the men at present are chiefly employed stripping and moving away the dirt, and in so doing they come across a good deal of stone.

I have, &c.,

PETER DOYLE.

Mr. Doyle was verbally instructed to report what steps the Corporation had taken. W.C.B.—

No. 20.

MINUTE OF THE COMMISSIONER FOR ROADS.

WHEN the transfer of the Prospect Quarries is being made to the Municipality of Sydney, it would be advisable to reserve the right to enter thereon and take stone for the Cumberland roads. I believe possession has been taken, and I will require permission for the road contractors to enter immediately on the passing of the Estimates.

W. C. BENNETT,
22/12/68.

The Honorable the Minister for Lands will probably cause the necessary steps to be taken.—J.S.
Under Secretary for Lands. B.C., 24 December, 1868.—J.R.

No. 21.

MR. LICENSED SURVEYOR HALLEN to THE SURVEYOR GENERAL.

108, Pitt-street, Sydney,
26 December, 1868.

SIR,

For B.C. see No.
19.

In conformity with your minute of instructions, B.C., dated 21 December, 1868, to mark the true position of the fences of a two-chain road at Prospect Hill, from the Western Road, as far as Lisk's south boundary,—I do myself the honor to report that I have pointed out to Mr. Bell, the Engineer for the City of Sydney, the true position of the above road, as indicated by substantial stakes and lockspits, and where the said road crosses fences by legible marks and large letters painted thereon.

I have, &c.,

EDWARD HALLEN.

No. 22.

MINUTE OF THE SECRETARY FOR LANDS.

QUARRY at Prospect.—The Mayor and Corporation ask no more than to be granted permission, as they phrase it,—“the necessary authority to enable them to enter upon the land belonging to the Government at Prospect, for the purpose of procuring a supply of metal for the streets of the City.” Of course there can be no objection to grant such authority, which however involves no exclusive possession or use of the quarry by the Municipal authorities, nor is there anything to shew that they desire such exclusive possession or use. I take it for granted, therefore, that the Mayor and Corporation will have no right to exclude from entry upon, and use of the quarry, any person who may be at any time authorized by the Government to enter and take stone, whether for the Cumberland roads or for any other purpose whatsoever. It may be as well, however, as the question has been raised, that the Mayor and Corporation should fully understand this.

W. F.,

31 December, 1868.

No. 23.

MINUTE OF THE COMMISSIONER FOR ROADS.

No. 20. IN reference to my Minute of the 22nd December, requesting that power be reserved to the Government to take metal from the Prospect Quarries for the Western and Southern Roads, I have to state that representations have been made by intending contractors that the quarries have been taken possession of by the Mayor for the Corporation of Sydney, one man, Harpur, last year's contractor, stating that he had received notice from the Mayor to remove some stone and to leave the quarry.

As contractors are unable to tender it would be well to come to some understanding with the Corporation as soon as possible on this matter.

W. C. B.,

13 January, 1869.

No. 24.

THE UNDER SECRETARY FOR LANDS to THE TOWN CLERK, SYDNEY.

Department of Lands,
Sydney, 19 January, 1869.

SIR,

No. 2.

Adverting to my letter to you, dated 20th October, conveying permission to the Sydney Corporation to enter on the Crown Lands at Prospect, for the purpose of obtaining blue-metal for the Sydney streets,—I am directed by Mr. Secretary Forster to point out that this permission must be understood as involving no exclusive use at the quarry, and that under it the Corporation will have no right to exclude from entry upon or use of the quarry, any person who may be at any time authorized by the Government to enter and take stone for any purpose whatsoever.

I have, &c.,

M. FITZPATRICK.

No. 25.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY FOR PUBLIC WORKS.

Department of Lands,
Sydney, 19 January, 1869.

SIR,

No. 20.

Referring to your blank cover of the 24th ultimo, respecting the Prospect Quarries, I am directed to inform you that permission has been granted to the Sydney Corporation to enter on the Crown Land at Prospect, for the purpose of obtaining blue-metal for the Sydney streets, but that such permission does not involve the exclusive possession or use of the quarry by the Municipal authorities.

I have, &c.,

M. FITZPATRICK.

No. 26.

11

No. 26.

MEMORANDUM OF SURVEYOR GENERAL.

IN January, 1867, Mr. Cox applied to purchase roads intersecting his property at Prospect. A survey was made from the original plans and field books, which showed a considerable amount of valuable land under roads and driftways now unnecessary as such. The question was then referred to the Minister for Works as to any portion of said driftways that might be required by the Government for quarries. The reply was that no alienation should take place, as it was impossible to say how much might be ultimately required. In this state the matter has since remained. Before closing the case attention is called to the fact that the road and driftways referred to, having been in the occupation of various individuals on an average sixty years, and that it appears to me that further delays, after knowledge of these facts, may prejudice any claim that the Crown may have. The case is therefore submitted.

B.C., 21 May, /69.

P. F. ADAMS.

THE state of the question raised with reference to these roads or driftways renders it obviously desirable that a distinct report should be obtained, pointing out what portions it may be necessary to reserve and what may be alienated without public injury. I recommend that steps should be taken for this purpose, and that the concurrence of the Works Department be invited. W.F., 15 June, 1869.

Surveyor General, B.C., 16 June, /69.—M.F.

No. 27.

MEMORANDUM OF SURVEYOR GENERAL.

PERHAPS the Surveyor General will be good enough to furnish the information, tracings, &c., required by the 3rd and 4th paragraphs of this Order.

No steps have been taken to resume any land at Prospect.

Tracings of all plans.

Cost of surveys by Mr. Hallen since 1st January, 1867—£203 14s.

There is no Book of Reference, but the plan by Mr. Hallen, and the original one by Mr. Mehan, embrace all the information preserved by this office.

P. F. ADAMS,

5 Oct., 1869.

RETURN

RETURN of the Correspondence which has taken place with respect to the construction of a Siding at Seven Hills, and a Platform at the Darling Harbour Branch Railway, for the conveyance of metal for the streets of Sydney, from the Quarries at Prospect.

(Return of the Expenditure incurred upon these Works.)

SCHEDULE.

	PAGE.
1. Town Clerk to Under Secretary for Works, inquiring when survey of proposed line of railway to the Blue-Metal Quarry at Prospect will be completed. 29 July, 1868	12
2. Under Secretary to Town Clerk, in reply. 3 August, 1868	12
3. Town Clerk to Under Secretary, inquiring what progress has been made in survey. 8 September, 1868	13
4. Under Secretary to Town Clerk, in reply—Survey finished, and an early day will be fixed for inspection of locality. 15 September, 1868	13
5. Do. do., appointing day for inspection of quarries. 8 October, 1868	13
6. Town Clerk to Under Secretary, for the construction of a siding at Seven Hills. 23 October, 1868	13
7. Do. do., reminding him of subject. 28 October, 1868	13
8. Under Secretary to Town Clerk, informing him that instructions had been given for siding to be put in. 28 October, 1868	14
9. Town Clerk to Under Secretary, that a platform may be erected at Darling Harbour Branch for storage, &c., of metal. 30 October, 1868	14
10. Engineer for Existing Railway Lines, reporting favourably on proposed platform. 4 November, 1868	14
11. Town Clerk to Under Secretary, that provision may be made for a branch railway line from Seven Hills to quarries at Prospect. 23 December, 1868	14
12. Report of Engineer-in-Chief for Railways thereon. 16 January, 1869	14
13. Under Secretary to Town Clerk, informing him that his letter of 23 December is under reference to railways. 20 January, 1869	15

15 & 16. Returns showing expenditure	15

No. 1.

THE TOWN CLERK to THE UNDER SECRETARY FOR PUBLIC WORKS.

Town Clerk's Office,
Sydney, 29 July, 1868.

SIR,

I have the honor, by direction of the Right Worshipful the Mayor, to inquire when the plan of the proposed line of railway to the blue-metal quarry at Prospect, which it is understood is in course of preparation by the Government, will be completed, as his Worship is desirous of bringing under the consideration of the Municipal Council the question of the advisability of the supply of metal for the City being procured from that locality.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

Inform that before any plan can be undertaken the locality must be carefully inspected; that such inspection will take place as soon as the Minister is sufficiently recovered; and that notice will be sent to the Mayor as soon as the day is fixed.—31/7/68.

No. 2.

THE UNDER SECRETARY FOR PUBLIC WORKS to THE TOWN CLERK.

Department of Public Works,
Sydney, 3 August, 1868.

SIR,

In reference to your letter of the 29th ultimo, inquiring with respect to the completion of the plan of the proposed line of railway to the blue-metal quarry at Prospect, from which place it is proposed that the city should be supplied with metal, I am directed to state that before any plan can be undertaken the locality must be carefully inspected, and that such inspection will take place as soon as the Minister is sufficiently recovered. I am to add that, as soon as the day is fixed for this undertaking, notice thereof will be sent to his Worship the Mayor.

I have, &c.,
JOHN RAE.

No. 3.

THE TOWN CLERK to THE UNDER SECRETARY FOR PUBLIC WORKS.

Town Clerk's Office,
Sydney, 8 September, 1868.

SIR,

I have the honor, by direction of the Right Worshipful the Mayor, to inquire what progress has been made with the surveys in connection with the metal quarry at Prospect, his Worship being very desirous that the intended inspection of that locality by the Members of the Government and the Municipal Council should take place previous to the meeting of Parliament.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

Inform. Survey made, and an early day will be fixed.—J.B., 14/9/68.

No. 4.

THE UNDER SECRETARY FOR PUBLIC WORKS to THE TOWN CLERK.

Department of Public Works,
Sydney, 15 September, 1868.

SIR,

In acknowledging the receipt of your letter of the 8th instant, with reference to the metal quarry at Prospect, I am directed by the Honorable the Secretary for Public Works to state, for the information of his Worship the Mayor, that the survey in connection with the quarry has been made, and that an early day will be fixed for an inspection of the locality, as proposed in my letter of the 3rd ultimo.

I have, &c.,
GERALD HALLIGAN,
(For the Under Secretary.)

No. 5.

THE UNDER SECRETARY FOR PUBLIC WORKS to THE TOWN CLERK.

Department of Public Works,
Sydney, 8 October, 1868.

SIR,

In reference to my letter of the 3rd August last, I am now directed to inform you that Saturday next, the 10th instant, has been appointed the day for the inspection, by the Government and the Municipal authorities, of the locality of the blue-metal quarry at Prospect.

2. I am to request that you will apprise his Worship the Mayor accordingly, and state that the train to convey the party will leave Sydney at half-past 9 a.m.

I have, &c.,
JOHN RAE.

No. 6.

THE TOWN CLERK to THE UNDER SECRETARY FOR PUBLIC WORKS.

Town Clerk's Office,
Sydney, 23 October, 1868.

SIR,

Permission having been given to the Municipal Council to enter on Crown Lands at Prospect, for the purpose of obtaining a supply of blue-metal for Sydney streets, I have the honor, by the direction of the Right Worshipful the Mayor, to inquire whether the Honorable the Minister for Works will give instructions for the construction of a siding at the Seven Hills Station, sufficient to accommodate ten trucks to receive the metal from the quarry.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

Engineer for Existing Lines to make immediate arrangements for carrying out this project, which will largely increase the revenue of the railway traffic. J.B.—23/10/68.

Seen. J.H.T.—23/10/68.

No. 7.

THE TOWN CLERK to THE UNDER SECRETARY FOR PUBLIC WORKS.

Tuesday.

DEAR RAE,

Can you reply to my letter as to constructing a siding at Seven Hills for metal trucks, by Thursday, upon which day our Council will meet?

Yours, &c.,
CHAS. H. WOOLCOTT.

Inform what has been done.—J.R., 28/10/68.

No. 8.

14

No. 8.

THE UNDER SECRETARY FOR PUBLIC WORKS to THE TOWN CLERK.

Department of Public Works,
Sydney, 28th October, 1868.

SIR,

In reference to your letter of the 23rd instant, requesting that instructions may be given for the construction of a siding at the Seven Hills Railway Station, for trucks conveying metal from Prospect, for the Corporation of Sydney,—I am directed to inform you that the Honorable the Secretary for Public Works has approved of the request of the City Council for this convenience being complied with, and instructions have been given to the Engineer for Existing Lines to lose no time in carrying out the work.

I have, &c.,
JOHN RAE.

No. 9.

THE TOWN CLERK to THE UNDER SECRETARY FOR PUBLIC WORKS.

Town Clerk's Office,
Sydney, 30th October, 1868.

SIR,

I have the honor, by direction of the Right Worshipful the Mayor, to state that under the sanction and assistance already obtained from the Government, arrangements are now being made for procuring a supply of blue-metal from the quarries at Prospect, to be brought by rail from the Station at Seven Hills to Sydney, but that it seems to his Worship desirable that some additional accommodation should be provided for the discharge and storage of the metal upon its arrival in Sydney.

Upon an inspection of the branch line from Redfern to Darling Harbour, it appears that the required convenience can be obtained by the construction of a platform on the eastern side of the Railway at the proposed extension of the line of Macarthur-street, as shewn upon the tracing submitted herewith, and his Worship would respectfully request that the Honorable the Minister for Works will be pleased to take into his consideration the advisability for instructions being given for carrying out such works in the locality indicated, as he may think sufficient for the purpose mentioned.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

Railways, for report of Engineer for Existing Lines, B.C., 3/11/68.—J.R.

No. 10.

THE site suggested for a platform from which the Corporation carts could load the blue-metal brought down by rail is a very good one, as it does not interfere with anything, and is out of the way of the ordinary traffic.

I would therefore recommend that it be erected there.

J.H.T.,
4/11/68.Submitted. 7/11/68.
Approved. J.S., 11/11/68.

No. 11.

THE TOWN CLERK to THE UNDER SECRETARY FOR PUBLIC WORKS.

Town Clerk's Office,
Sydney, 28th December, 1868.

SIR,

I have the honor, by direction of the Right Worshipful the Mayor, to request that you will be pleased to bring under the consideration of the Honorable the Minister for Works, the question of the advisability of some provision being made upon the Estimates for his Department for the construction of a branch railway line from the Seven Hills Station to the blue-metal quarries at Prospect, as in the opinion of the Municipal Council the revenue which will be derived from the carriage of the metal (say 24,000 tons yearly), will justify the Government in incurring the expenditure necessary for such a work.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.Railways—B.C. 29/12/68—J.R.
Mr. Whitton—30/12/68.

No. 12.

THERE are no surveys of the line upon which an estimate can be made so as to ascertain the cost.—J.W., 16/1/69.
To the Commissioner.

Inform that the matter has been referred for the report of the Engineer for Railways.—J.R., 20/11/69.

THE

No. 13.

THE UNDER SECRETARY FOR PUBLIC WORKS to THE TOWN CLERK.

Department of Public Works,
Sydney, 20th January, 1869.

SIR,

In reference to your letter of the 28th ultimo, with respect to provision being made for the construction of a branch line of railway to connect the Seven Hills Station with the blue-metal quarries at Prospect,—I am directed by the Honorable the Secretary for Public Works to inform you that this matter has been referred to the Engineer-in-Chief for Railways for report.

2. When the required information has been obtained, a further communication on the subject will be made to you.

I have, &c.,
JOHN RAE.

Nos. 14, 15, and 16.

5th February, 1869.

LET me have a statement, for the information of the Minister, of all expenditure at Seven Hills and Darling Harbor Branch, for the facility of carrying road-metal from the Quarries at Prospect.—J.R.

Railways—B.C. Urgent.

Total amount spent on blue-metal stage, Darling Harbour Branch, to 31st January, 1869, £167 2s. 11d.

There has been no expenditure at Seven Hills, charged to capital or revenue that we have advice of.—A.A., Accountant, 9/2/69.

SUBMITTED—Might be informed that no surveys are to be made till fresh arrangement for haulage of metal, the present rates being unremunerative. Up to 31st Jan., 1869, there has been an expenditure of £167 2s. 11d., at Darling Harbour Branch. No account has been received of the expenditure at Seven Hills.—J.R., 9/2/69.

Approved. Ascertain the amount spent at Seven Hills.—J.S.

Mr. Thomas, Railways, B.C., 11/2/69.

Total cost, £126 11s. 9d., Old Barlow rails and sleepers were used, the cost of which are not included in this amount.—J.H.T., 18/2/69.

What was the estimated cost of the Barlow rails and sleepers?—The Minister wishes to know the total outlay, to enable him to arrive at the proper tariff.

Mr. Thomas, Railways, B.C., 24/2/69.—J.R.

ROADS.

No. 1.

THE REV. R. W. YOUNG AND OTHERS to THE SECRETARY FOR LANDS.

Shoalhaven, 8 September, 1864.

SIR,

We, the undersigned, interested in the Road from Terrara to the South Coast Road, have the honor to call your attention to the fact that no appropriation has been made for the repairs of the said road, although it is the oldest and most useful road in the district, having carried the traffic of the South Coast Road for upwards of twenty years, and being the only highway of convenient approach to the river, and to the English, Scotch, and Wesleyan Churches.

The total length of road not covered by grant is 4 miles, and it seems to us that the grant of £7 per mile is equally due to it as to other lines proclaimed under the 4th Wm. IV. No. 11.

Moreover we may observe that the road has been proclaimed for some years, and that therefore we are entitled to arrears; but as we waived our right of application because of the ill-feeling and jealousy then existing in the district, and would not now have applied but that the road has become absolutely impassable, we shall be satisfied to get the sum of £28 wherewith to repair it. Trusting that a speedy reply may enable us to remove the obstructions,—

We have, &c.,

Richd. W. Young, Clerk, Holy Orders.
W. Lovegrove, C.P.S.
Thos. Holme, storekeeper.
Jas. Armstrong, saddler.
John Howard, hotelkeeper.

Wm. Connolly, farmer.
J. M'Arthur, storekeeper.
Thos. Joyers, junr., storekeeper.
W. Mornson, hotelkeeper, &c.
David Hyam, hotelkeeper.

Surveyor General, B.C., 16 Sept.—M.F.

Mr. Surveyor Arnheim will be good enough to report. B.C., 5 Nov., 1864.—P.F.A.

No. 2.

MR. SURVEYOR ARNHEIM to THE SURVEYOR GENERAL.

Camp, Meroo,

25 January, 1865.

SIR,

As directed by your B.C. instructions of the 5th November, requesting my report on the Road from Terrara to the South Coast Road, for the repair of which £7 per mile has been petitioned for,—I have the honor to inform you that on inquiry at the Police Office, Nowra, I ascertained that a sum of £130 had been granted in 1860 for clearing and opening this road, which is fenced on both sides, and has ever since been kept in repair by private subscriptions.

2. It is at present in want of repair, and I would recommend that the amount petitioned for be granted, on the ground that this road is and will be the South Coast Road until the road from Kiama, *via* Broughton Creek, to Bomaderry (where a Government Ferry is in course of erection) is made practicable, which is at present impassable, and the traffic is necessarily carried along the Nine-mile Beach, *via* Cooloomgatta, crossing the river at the private ferry at Numba; thence, *via* Terrara, to the South Coast Road.

I have, &c.,

E. H. ARNHEIM,

Surveyor.

Under the report of Mr. Surveyor Arnheim, it is recommended that the sum of £28 be granted for the repair of the road.

(For the Surveyor General),

Under Secretary for Lands, B.C., 16 February, 1865.

P. F. ADAMS.

To whom is it proposed to entrust the money—Shall the C.P.S., Shoalhaven, be invited to propose names of Trustees?

Ask the Member for the District as usual. M.F.

THE UNDER SECRETARY FOR LANDS to THE TRUSTEES.

Department of Lands,
Sydney, 24 March, 1865.

GENTLEMEN,

I am directed by the Secretary for Lands to apprise you that the Under Secretary for Finance and Trade has been requested to cause the sum of £28 to be placed at your credit in the Bank of New South Wales, for the repair of the Road from Terrara to the South Coast Road.

I have, &c.,
MICHL. FITZPATRICK.

No. 7.

T. GARRETT, Esq., M.L.A., to THE SECRETARY FOR LANDS.

Sydney, 19 July, 1866.

SIR,

Last year a grant was made for the repair and improvement of the Road from Terrara Wharf, Shoalhaven River, to the South Coast Road. This year however no such grant has been issued.

I have now, however, at the request of the parties interested, the honor to indorse any application that has already been made by Mr. De Mestre and others for a continuance of the grant for the repair of this very important road.

The Trustees I recommend are Messrs A. De Mestre, A. M'Kay, and B. Brown, who expended the former grant.

I have, &c.,
THOMAS GARRETT.

Surveyor General, 20 July, 1866.—M.F.

£28 recommended to be granted. (For the Surveyor General), P. F. ADAMS.—30 July.

Under Secretary for Lands.

Approved. J.B.W.—4 August.

No. 8.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY FOR FINANCE AND TRADE.

Department of Lands,
Sydney, 15 August, 1866.

SIR,

I am directed by the Secretary for Lands to request that you will be good enough to cause the sum of £28 to be placed to the credit of Messrs. A. De Mestre, A. Mackay, and Bernard Brown, in the Bank of New South Wales, for repairs of the Road from the Terrara Wharf to the South Coast Road.

2. This expense will be charged against the Vote for Minor Roads not classified, 1866.

I have, &c.,
MICHL. FITZPATRICK.

No. 9.

THE UNDER SECRETARY FOR LANDS to THE TRUSTEES.

Department of Lands,
Sydney, 15 August, 1866.

GENTLEMEN,

I am directed by the Secretary for Lands to apprise you that the Under Secretary for Finance and Trade has been requested to cause the sum of £28 to be placed at your credit in the Bank of New South Wales, for the repair of the Road from the Terrara Wharf to the South Coast Road.

I have, &c.,
MICHL. FITZPATRICK.

No. 10.

THE UNDER SECRETARY FOR LANDS to T. GARRETT, Esq., M.L.A.

Department of Lands,
Sydney, 15 August, 1866.

SIR,

I am directed to inform you that, in accordance with the recommendation contained in your letter of the 19th ultimo, the Under Secretary for Finance and Trade has been requested to cause the sum of £28 to be placed to the credit of the parties named in the margin, for the repair of the Road from Terrara Wharf to the South Coast Road.

Messrs. A. De
Mestre,
A. Mackay, and
Bernard Brown.

I have, &c.,
MICHL. FITZPATRICK.

No. 11.

BERNARD BROWN, Esq., to THE UNDER SECRETARY FOR LANDS.

Shoalhaven, 20 August, 1866.

SIR,

I beg to acknowledge the receipt of yours of the 15th instant, informing the Road Committee for the portion of Road from Terrara Wharf to the South Coast Road of the grant of £28 being placed in the Bank of New South Wales to their credit for repairs of said road.

I have, &c.,
BERNARD BROWN.

No. 12.

W. LOVEGROVE, Esq., to THE UNDER SECRETARY FOR LANDS.

Sydney, 6 May, 1867.

SIR,

I have been requested to bring under your notice that the amount annually granted for the repair of the Road from Terrara to the South Coast has not as yet reached the hands of the Trustees, Messrs. A. De Mestre, J.P., A. K. Mackay, J.P., and B. Brown; and I am desired further to observe that as it is practically the Main Road of the District, having a weekly traffic of more than 100 tons, they trust that it may no longer be left to them to apply yearly for an amount so inadequate to its importance, but that, after inquiry, it may be placed on the Schedule as a 2nd class road.

I have, &c.,
W. LOVEGROVE,
C.P.S.

No. 13.

THE TRUSTEES to THE SECRETARY FOR LANDS.

Shoalhaven, 18 June, 1867.

SIR,

We have the honor to apply for the sum of £28 which has been yearly granted for the Main Southern Road from Shoalhaven, usually known as the Terrara and South Coast Road.

We have been placed in an invidious position in this matter, as the road has gone to pieces under the heavy rains, and the inhabitants have been forced to resort to a private subscription, whilst other roads of not one-tenth the importance are supplied with funds for repairs.

Mr. Lovegrove, the Clerk of Petty Sessions, was requested to apply personally for the money, and he informs us that he did so, and reduced it to writing; and we request that the Government Surveyor may be instructed to report whether the said road is not entitled to a higher class of subsidy than we have hitherto had.

We have, &c.,
A. K. MACKAY, J.P.
A. DE MESTRE, J.P.
BERNARD BROWN.

Surveyor General. B.C., 28 June, 1867.—M.F.

Mr. Arnheim, for report, 4 July, 1867.

In addition to my former report on this road, on the 25th January, I think the reasons given therein for its support hold equally good now, and more so on account of the recent floods.—B. H. ARNHEIM.—5 July, 1867.

Recommended. (For the Surveyor General), P. F. ADAMS.—6 July.

Under Secretary for Lands.

Approved. J.B.W.—10 July.

No. 1.

MR. R. MAYO AND OTHERS *to* THE SURVEYOR GENERAL.

Miller's Forest,
Alnwick, 24 May, 1859.

SIR,

We, the undersigned purchasers of certain lands and allotments situate in the town of Alnwick, having no right of road to the Government township of East Maitland, Mr. Hickey having caused all communication and traffic to be stopped by fencing and otherwise causing annoyance to us, being on the Raymond Terrace side of Mr. Hickey's land from Maitland,—we now beg of you, as Surveyor General, to cause a Government road to be surveyed through the respective grounds; and further beg if we have applied through a wrong channel that you will be pleased to direct us what course to pursue in the matter. Waiting your early answer,

We have, &c.

RICHARD MAYO,
JOHN SIMONS,
ALEXANDER PHILLIPS,
PATRICK WELSH,—
And several others.

No. 2.

THE SURVEYOR GENERAL *to* MR. R. MAYO AND OTHERS.

Surveyor General's Office,
Sydney, 24 June, 1859.

GENTLEMEN,

With reference to your communication of the 24th ultimo, I have to request that you will be good enough to state the precise position of your lands, and if not of the reserve in the parish of Alnwick, of what grant or purchase from the Crown they form parts.

2. It would appear that your access to Maitland should be either by the Maitland and Newcastle or Maitland and Raymond Terrace Road, and what you require is a way of access to one of these roads; on this point also I have to request that you will favor me with information.

I have, &c.,

GEO. BARNEY,
S.G.

No. 3.

MR. R. MAYO AND OTHERS *to* THE SURVEYOR GENERAL.

Miller's Forest,
Alnwick, 25 August, 1859.

SIR,

I have received information of your having received my application of the 24th May last, and since that I have neither heard nor seen any notice being taken in the matter.

For your information I beg to inform you that lately there has been several police cases for trespass, which cannot be avoided. There have been two or three cases of threatening life for trespass. You must be aware that Alnwick is a Government township, and when we seventy or eighty individuals purchased and paid our money to Government, we were expecting to see everything surveyed out truly; but owing to some neglect or oversight in your department there has been no right of road surveyed or laid out from that township to Raymond Terrace or Maitland.

May I beg that you will be pleased to cause such right of road to be surveyed out immediately; if not done immediately myself and others, through our attorney, must lay our case before the whole House on the opening of Parliament.

Trusting that you may immediately answer; and by so doing you will oblige your humble servant,—

RICHARD MAYO,
And others in the township of Alnwick.

No. 4.

THE ACTING SURVEYOR GENERAL *to* MR. LICENSED SURVEYOR MAITLAND.

Surveyor General's Office,
Sydney, 14 September, 1859.

SIR,

I have to request that you will survey for Proclamation as a parish road, a road from the village of Alnwick to the road from Maitland to Raymond Terrace, and furnish me with a plan and book of reference as usual.

I have, &c.,

A. G. MACLEAN,
A.S.G.

No. 5.

THE ACTING SURVEYOR GENERAL to MR. R. MAYO.

Surveyor General's Office,
Sydney, 14 September, 1859.

SIR,

In acknowledging the receipt of your letter of the 25th ultimo, I beg to inform you that I have issued instructions to Mr. Licensed Surveyor Maitland for the survey for Proclamation of a road from the village of Alnwick to the road from Maitland to Raymond Terrace, having learned from a conversation with that gentleman that this is what is required.

2. I at the same time enclose the copy of a letter which I addressed to you in reference to your previous letter, but which, from the tenor of your communication under reply, it would appear you had not received.

24 June
(See No. 2.)I have, &c.,
A. G. MACLEAN,
Actg. Sur. Genl.

No. 6.

MR. LICENSED SURVEYOR MAITLAND to THE SURVEYOR GENERAL.

Maitland, 30 September, 1859.

SIR,

Referring to instructions conveyed to me in your favor of the 14th of this month, I do myself the honor to report that I have examined the access to the village reserve of Alnwick, and taking all local circumstances into due consideration I have no hesitation in recommending as by far the best route for a road, the one of which I enclose a plan* and book of reference. (See No. 4.)

2. I am truly sorry for the loss (unless compensated) sustained by the poor fellow Nally, but I trust the law has provided for him a remedy against the parish at large; if not it cannot be helped, as the route indicated, though surrounded by swampy soft (though occasionally cultivated) soil is at all times dry and easily made practicable. *Appendix A.

I have, &c.,
D. M. MAITLAND,
Licensed Surveyor.

FORWARDED for Proclamation under the Act 4th William IV, No. 11. Copies of the plan and book of reference have been sent to the Police Office, Raymond Terrace. A. G. MACLEAN, A.S.G., B.C., 19 December, 1859.

Under Secretary for Lands.

For the Governor General and Executive Council. J.B.—31 Decr.
Clerk of the Council, B.C., 3 Jan., 1860.—M.F.

[Enclosure.]

BOOK OF REFERENCE OF ROAD FROM ALNWICK TO MAITLAND AND RAYMOND TERRACE, TO BE OPENED AS A PARISH ROAD, UNDER THE ACT OF COUNCIL, 4 WILLIAM IV, NO. 11 :—

No.	Portion of Road.	Reputed Owner.	Occupier.	Character of land.	Bearings.	Length in chains.	Enclosures.	Character and state of preservation of Fencing.	Cultivation.	Breadth of Road.	Area.	Remarks.
1	Commencing on the north boundary of the village reserve of Alnwick at its intersection by the northerly prolongation of Frudhoe-street; thence to the north boundary of Roderick and Alexander Macaulay's land.	R. & A. Macaulay..	The same	Good, but swampy.	Northerly..	32.40	2 fences	a. r. p. 16 0 0	50 links	a. r. p. 1 2 19	Messrs. Macaulay do not object.
2	From the north boundary of Messrs. Macaulay's land to the north boundary of John Eales' land.	John Eales, Esq. ...	Wm. Woods and others.	Good cultivation land on lin of road.	do. ...	19.50	1 fence	19 50 0	do.	0 3 36	
3	From the north boundary of John Eales' land to the north boundary of John Nalley's land, being the main road from Maitland to Raymond Terrace.	John Nalley	The same	do. ...	do. ...	28.50	do.	28 0 0	do.	1 1 28	John Nalley strongly objects.

D. MAITLAND,

No. 12.

THE CLERK OF THE EXECUTIVE COUNCIL to THE UNDER SECRETARY FOR LANDS.

Executive Council Office,
Sydney, 29th February, 1860.

SIR,

In compliance with the request contained in your letter of the 9th instant, I do myself the honor to forward to you a communication from Mr. W. H. Mullen, solicitor, of Maitland, transmitting objections therein enumerated to the formation, as a Parish Road, of the proposed line from Alnwick to the Maitland and Raymond Terrace Roads; and which objections are the only ones lodged with me against the formation of this road.

I have, &c.,

EDWARD C. MEREWETHER,
Clerk of the Council.

[Enclosures to No. 12.]

Mr. W. H. Mullen, solicitor, to The Clerk of the Executive Council.

Maitland, 17th February, 1860.

Sir,

In compliance with the notice published in the public papers, relative to the opening of the proposed Parish Road from Alnwick to the road from Maitland to Raymond Terrace, I have the honor to transmit herewith—

- 1st. The objection of John Nally as to the formation of the road in question.
- 2nd. The Petition of the inhabitants of Alnwick and surrounding district, including those persons who applied in the first instance for a Parish Road may be formed and stated in the Petition. And
- 3rd. The plan* referred to in both documents.

These papers I beg the favour of your laying before His Excellency Sir William Denison and the Executive Council, with every convenient despatch. And you will also oblige me with an acknowledgment of their receipt.

I have, &c.,

W. H. MULLEN,
Solicitor, Maitland.

*Appendix B.

To His Excellency Sir WILLIAM THOMAS DENISON, Knight, Governor-in-Chief of the Colony of New South Wales and its dependencies, &c., &c., and the Honorable the Executive Council.

The humble Petition of the undersigned inhabitants of the Town of Alnwick, situate on the River Hunter, in the Colony aforesaid, and surrounding District,—

HUMBLY SHOWETH:—

That it is in contemplation by your Excellency, with the advice of the Executive Council, to open and make a Parish Road (to be maintained at the expense of the parishes through which it passes) from Alnwick to the road from Maitland to Raymond Terrace, running through the lands granted to or now occupied by Messrs. R. and A. Macaulay, John Eales, and John Naley, and that, in conformity with the provisions of the Act 4th William IV, No. 11, a plan and book of reference, showing the intended line of the road above-mentioned, are now deposited at the Office of the Surveyor General in Sydney, and at the Police Office, Raymond Terrace.

That your Petitioners are desirous that the Parish Road to the road from Maitland to Raymond Terrace as aforesaid, should be made through the lands and according to the direction as pointed out and shown by the dotted line on the plan hereunto annexed.

That such line would be a better and nearer route for your Petitioners than the one now proposed by your Excellency and Executive Council.

That such road would be more acceptable and be of greater benefit to your Petitioners than now proposed.

Your Petitioners therefore humbly pray that your Excellency, with the advice of the Honorable the Executive Council, will, under the powers vested in you by the Act for that purpose, order the road to be altered and made through the lands and according to the line as dotted and shown on the plan hereto annexed.

And your Petitioners will ever pray.

To

To His Excellency Sir WILLIAM THOMAS DENISON, Knight, Governor-in-Chief of the Colony of New South Wales and its Dependencies, &c., &c., and the Honorable the Executive Council.

The objections of John Nally, of Miller's Forest, Hunter River, in the Colony of New South Wales, farmer,—

That the said John Nally has seen a notice in the *Gazette* that it is in contemplation by your Excellency, with the advice of the Executive Council, to open and make a parish road, to be maintained at the expense of the parishes through which it passes, from Alnwick to the road from Maitland to Raymond Terrace, running through the lands granted to or now occupied by Messrs. R. and A. Macauley, John Eales, and John Nally, and that in conformity with the provisions of the Act 4th William IV, No. 11, a plan and book of reference, showing the intended line of the road above-mentioned, are now deposited at the office of the Surveyor General, in Sydney, or at the Police Office, Raymond Terrace; and all persons interested therein are requested to transmit, in writing, to the Clerk of the Executive Council, within one month from 24th January, any well-grounded objections which may exist to the formation of the road in question.

That the said John Nally objects to said parish road being formed and made through his land, on the following grounds:—

First.—That a much nearer and better road for the purpose aforesaid may be made through the lands, and according to the direction as pointed out and shown by the dotted line on the plan hereto annexed.

Second.—That such road would be at least half a mile shorter than the one at present contemplated.

Third.—That such road would be acceptable, and of greater benefit to the inhabitants of the town of Alnwick and surrounding district.

Fourth.—That the inhabitants of the said township have sent a petition herewith to your Excellency and the Honorable Executive Council, to have the road altered according to the plan hereto.

Fifth.—That the said John Nally is a small farmer, having a wife and nine children to support by his own manual labour on the said land, and is too poor to fence in that portion of the contemplated road running through his farm; and that the said road deprives him of the best portion of his land.

And therefore the said John Nally objects to the road as at present proposed by your Excellency and the Honorable the Executive Council, and begs that your Excellency and the Honorable the Executive Council will take his objections into your serious consideration.

I have, &c., his
JOHN × NALLY.
mark.

R. PIGON, witness,—the same having been previously read over and explained to him.

See previous
paper.

No. 13.

THE ACTING SURVEYOR GENERAL to MR. DISTRICT SURVEYOR HENDERSON.

“JOHN NALLY.”—Petition against opening of Parish Road from Alnwick to the road from Maitland to Raymond Terrace.

The injury which Nally would suffer by the opening of the proposed road is unquestioned.

The possibility of selecting a line equally good from the village to the Raymond Terrace road is however very doubtful.

Mr. District Surveyor Henderson is requested to examine the locality, and to report on the line suggested by Nally, and on any other which might be substituted for that proposed to be opened; the relative cost of the proposed line, or any other, to the public, should occupy Mr. Henderson's special consideration, and the injury to any other property from an alteration in the line should also be borne in mind, and reported on.

30 April, 1860.

A. G. MACLEAN,
A.S.G.

No. 14.

MR. DISTRICT SURVEYOR HENDERSON to THE SURVEYOR GENERAL.

Maitland, 25 July, 1860.

SIR,

In obedience to instructions conveyed to me under blank cover of the 30th April, 1860, I examined the site of the proposed road from the village of Alnwick to the road from Raymond Terrace to Maitland, protested against by Mr. Nally, also the line he proposes to substitute for that surveyed by Mr. Maitland, and have the honor to report that the line proposed by Mr. Nally is no ways suitable, being through a swamp, over lower ground—a very great objection in a country so liable to be overflowed as this is, and being in the direction opposite to that required, as most of the traffic is toward Maitland; and that the only variation I should be disposed to recommend from Mr. Maitland's surveyed line would be to leave it at Station No. 9, and come out on the Maitland Road, at the north-west corner of Nally's land, which would be more distasteful to Nally than Mr. Maitland's proposal.

As for the Petition in his favour, I have good reason to believe it has been signed more as an expression of sympathy to Nally than as a matter of belief.

I have, &c.,
P. H. HENDERSON,
District Surveyor.

Under this report, which concurs so entirely with Mr. Maitland's, the line of road should be confirmed so soon as the parties interested make arrangements for its fencing in its entire length, which is through enclosed lands.

The extent of fencing will be upwards of 550 rods.

Under Secretary for Lands.

A. G. MACLEAN.

No. 15.

THE UNDER SECRETARY FOR LANDS to R. MAYO AND OTHERS.

Department of Lands,
Sydney, 14 September, 1860.

GENTLEMEN,

Adverting to your application of the 24th May, 1859, for the formation of a road from Alnwick to East Maitland, I am directed to inform you, that so soon as you shall have made arrangements for fencing in the line of road, as marked out by Mr. Surveyor Maitland, on your application, which runs entirely through enclosed lands, the road will be confirmed and formally opened by the Government.

2. The Acting Surveyor General estimates the extent of fencing to be about 550 rods.

I have, &c.,

MICHL. FITZPATRICK.

No. 16.

B. WHITE AND OTHERS to THE SURVEYOR GENERAL.

Alnwick, 22 May, 1868.

SIR,

Eight or nine years ago there was a road marked out by Mr. Maitland, from the township of Alnwick to the Raymond Terrace Road, which road has been opened and used by us up to the present time, but is now stopped by John Nally, through whose land it passes for a little distance. We the undersigned, purchasers of land in the township of Alnwick, humbly pray you will open the road for us as soon as it can be done, as it is a very serious inconvenience to us in going to Raymond Terrace, and prevents our children from going to their school, which is only $1\frac{1}{2}$ mile distant by this road, but is nearly 3 miles by any other way. The number of scholars that want to go to school by this road every day is from fifteen to twenty.

We have, &c.,

Benjamin White,
John Simons,
R. Mayo,
John Burgess,
John Hill,Martin Hill,
Denis Grady,
John Flanagan,
James Saunders,
Charles Phelps.

No. 17.

H. J. BOLDING, P.M., to THE SECRETARY FOR LANDS.

Raymond Terrace, 30 May, 1868.

SIR,

I have the honor to inform you that several purchasers of allotments in the township of Alnwick, county of Northumberland, and in this district, have asked me to support their application to the Surveyor General to open a road which was proposed as a Parish Road in 1859, and has not been opened and *Gazetted*. It passes partly through land belonging to one John Nally, who has recently closed it, although used since the survey in 1859.

Being aware that the road is very necessary for the public convenience, I beg to request that it may be finally opened as soon as practicable.

I have, &c.,

H. J. BOLDING, J.P., P.M.

No. 18.

THE UNDER SECRETARY FOR LANDS to B. WHITE AND OTHERS.

Department of Lands,
Sydney, 1 July, 1868.

GENTLEMEN,

Referring to your communication of the 22nd May last, in which you renewed the application made some years since for the formal opening of a road (preliminarily notified in the *Government Gazette* in January, 1859) from Alnwick to the Maitland and Raymond Terrace Road, I am directed by the Secretary for Lands to inform you, that for the reasons already given the opening of the road in question cannot be proceeded with, unless the persons interested are prepared to pay the cost of fencing the line in its entire length through the enclosed lands it would intersect. See letter of 14 September, 1860.

I have, &c.,

MICHL. FITZPATRICK.

No. 19.

THE UNDER SECRETARY FOR LANDS *to* B. WHITE AND OTHERS.

Department of Lands,
Sydney, 10th March, 1869.

GENTLEMEN,

Referring to my letter of the 1st July last, in which you were informed that steps might be taken for the opening of the road from Alwick to the Raymond Terrace Road, so soon as the parties interested in the line had made provision for its fencing through enclosures, I am directed by the Secretary for Lands to enquire whether any steps had been taken for the fencing of the line hitherto?

I have, &c.,

MICHL. FITZPATRICK.

Mr. Wisdom, M.P., states, in reply to this letter, that no steps have been taken for fencing the line.—M.F., 10 June, 1869.

No. 20.

THE UNDER SECRETARY FOR LANDS *to* R. WISDOM, Esq., M.L.A.

Department of Lands,
Sydney, 29 June, 1869.

SIR,

Referring to your personal representations on the 10th instant, on the subject of opening the road from Alwick to the Raymond Terrace Road, I am directed by the Secretary for Lands to inform you that the opening of the road in question must be deferred until provision shall have been made by parties interested for fencing the line where it passes through enclosures.

I have, &c.,

MICHL. FITZPATRICK.

RAILWAY EXTENSION.

PROGRESS REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on 28th October, 1869, "*with power to send for persons and papers,*"—"to inquire into and report upon the best mode of facilitating inland traffic, and upon the subject of *Railway Extension generally,*"—have agreed to the following Progress Report:—

Your Committee find that they have not time to complete the inquiry entrusted to them by your Honorable House; but the Evidence taken by them, which is appended hereto, contains much information which may prove of value in any future inquiry.

WILLIAM MACLEAY,

Chairman.

No. 2 Committee Room,

Sydney, 11th November, 1869.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 29 OCTOBER, 1869.

MEMBERS PRESENT :—

Mr. Macleay, Mr. Lackey,		Mr. Morrice, Mr. Hoskins,
Mr. Stimpson.		

Mr. Macleay called to the Chair.

Entry in Votes and Proceedings appointing the Committee, *read*.

Committee deliberated.

Ordered,—That John Whitton, Esq., be summoned for next meeting.

[Adjourned to Tuesday next, at 11 o'clock.]

TUESDAY, 2 NOVEMBER, 1869.

MEMBERS PRESENT :—

Mr. Macleay in the Chair.

Mr. Lackey, Mr. Alexander,		Mr. Stimpson, Mr. Hoskins,
Mr. Morrice.		

John Whitton, Esq. (*Engineer-in-Chief for Railways*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That A. Ashdown, Esq., R. Moody, Esq., and W. C. Bennett, Esq., be summoned for next meeting.

[Adjourned to Thursday next, at 10:30 o'clock.]

THURSDAY, 4 NOVEMBER, 1869.

MEMBERS PRESENT :—

Mr. Macleay in the Chair.

Mr. Lackey, Mr. Hoskins, Mr. Alexander,		Mr. Morrice, Mr. Stimpson, Mr. Sutherland.
---	--	--

A. Ashdown, Esq. (*Accountant, Railway Department*), called in and examined.

Witness withdrew.

R. Moody, Esq. (*Traffic Manager*), called in and examined.

Witness withdrew.

W. C. Bennett, Esq. (*Commissioner for Roads*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That E. C. Cracknell, Esq., and R. Moody, Esq., be summoned for next meeting.

[Adjourned to Friday next, at 10:30 o'clock.]

FRIDAY, 5 NOVEMBER, 1869.

MEMBERS PRESENT :—

Mr. Macleay in the Chair.

Mr. Lackey, Mr. Stimpson,		Mr. Morrice, Mr. Hoskins.
------------------------------	--	------------------------------

R. Moody, Esq., called in and further examined.

Witness withdrew.

Committee deliberated.

Ordered,—That John L. Beeston, Esq., Thomas Dalton, Esq., and E. C. Cracknell, Esq., be summoned for next meeting.

[Adjourned to Wednesday next, at 10:30 o'clock.]

WEDNESDAY,

WEDNESDAY, 10 NOVEMBER, 1869.

MEMBERS PRESENT :—

Mr. Macleay, | Mr. Hoskins.

In the absence of a Quorum, the meeting called for this day lapsed.

THURSDAY, 11 NOVEMBER, 1869.

MEMBERS PRESENT :—

Mr. Macleay in the Chair.

Mr. Sutherland, | Mr. Morrice,
Mr. Lee, | Mr. Hoskins.

J. Beeston, Esq. (*Traffic Manager, Great Northern Railway*), called in and examined.
Committee deliberated.
Chairman handed in letter from W. C. Bennett, Esq., in explanation of a portion of his evidence.
Ordered to be appended. (*Vide Appendix.*)
Chairman submitted Progress Report.
Same read and agreed to.
Chairman to report to the House.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

RAILWAY EXTENSION.

TUESDAY, 2 NOVEMBER, 1869.

Present:—

MR. ALEXANDER,
MR. HOSKINS,MR. LACKEY,
MR. MACLEAY,

MR. MORRICE.

WILLIAM MACLEAY, ESQ., IN THE CHAIR.

John Whitton, Esq., Engineer-in-Chief for Railways, called in and examined:—

1. *Chairman.*] We want to ascertain from you, in the first place, the length of the different lines of railway now completed or authorized, and the average cost per mile? The southern line, from Sydney to Goulburn, is 134 miles in length; the total amount of its cost I have not with me, but the average cost from the Parramatta Junction to Goulburn, 121 miles, will be about £13,000 per mile. From the Parramatta Junction to Bathurst, about 132 miles, the estimated cost is about £14,000 per mile, that is, taking the actual cost, so far as it is ascertained, and the estimated cost of completing it to Bathurst. From Newcastle to Murrurundi, about 120 miles, the average cost will be about £11,884 per mile. Of course there may be some alterations in these figures when the lines are completed.
2. Does that include bridges? Yes.
3. *Mr. Hoskins.*] Stations too? Yes.
4. *Chairman.*] Rolling stock? No.
5. You have made an estimate, I suppose, of the further extensions proposed or about to be proposed by the Government? I have made no careful estimate—there are not sufficient sections in the office to enable me to do so—but I do not think they will cost more than £10,000 per mile; that is, from Goulburn to the Murrumbidgee.
6. Do you estimate the cost of these extensions at as much as £10,000 a mile? About £10,000 will do, I think, but it is impossible to say until surveys are made and careful estimates taken out.
7. Have you any return of the amount of traffic upon the different lines? I have not. I have made out as near as I could from the returns made of the number of waggons taken from Penrith to Mount Victoria, and I think it will be about 114 tons from Penrith to Mount Victoria in a day, and about 60 tons the other way to Penrith. The returns to Goulburn I have not got at all. But of course this information could be more accurately obtained from the Traffic Department.
8. You do not know anything about the traffic on the southern or northern line? I do not.
9. Do you know anything of the amounts received from each line? No; except from the Statistical Register; I have no official knowledge.
10. Do you know anything of the working expenses? No, I know nothing of the working expenses at the present time, as I believe no proper statement of the working expenses of the railways has been published since 1865. The Accountant should be able to furnish that information.
11. You are aware, I suppose, that the railways scarcely pay any interest on the money expended? I understand they are paying something like 2 per cent.; but it is not to be wondered at if they do not pay, from the rates we have in comparison with other Colonies. If the Committee will allow, I will state the

J. Whitton,
Esq.

2 Nov., 1869.

J. Whitton, Esq., the rates charged in New South Wales, Victoria, Queensland, and South Australia, respectively:—

2 Nov., 1869.

Passenger Fares.	First Class.	Second Class.
New South Wales <i>under</i>	d. 3	d. 2
Victoria	3½	2½
South Australia	4	2½
Queensland	4	3

Goods rates per ton per mile.

	Special.			First.	Second.	Third.	Fourth.
	d.	d.	d.	d.	d.	s. d.	d.
New South Wales	1	1½	1½	4	4½	5½	9
Victoria	5	6	7	9
South Australia.....	3	4½	6	9
Queensland	2½	5½	6½
Do. owner's risk.....	8½	10½
Do. Commissioner's risk	10	1 1½

12. Do you think that if these rates were charged in New South Wales, they would be sufficient to make a great difference—that the railways would pay 5 per cent. then? I have not a shadow of doubt about it. If the lines were properly worked and proper rates charged, I have no doubt they would pay a good percentage upon the cost of construction. During the time the drays were carrying on the western line, the lowest amount ever paid by the contractors was 2s. 2d. per ton per mile, and our special rates are, as I have stated, from 1d. to 1½d., while the other rates are absurdly low when compared with the other Colonies. The difficulty in working these lines has been in assuming that we must approach as near as possible to the English rates, whereas our working expenses are nearly three times greater, and there is not one-tenth of the traffic. Some of our passenger trains run to Goulburn with probably half a dozen passengers. It is the same on the western lines—the carriages are rarely filled.

13. *Mr. Hoskins.*] In your opinion, would not one passenger train each way per day, from Sydney to Goulburn, and from Sydney to Mount Victoria, be quite sufficient? Quite sufficient. In fact, so far as I can understand, the only reason for running the second train is to carry the mails, for which we actually get nothing—literally nothing. I think all we get for the mails is 7s. 6d. per mile per quarter—about the expense of running one train. Whether we get the money or not, we certainly ought to take credit for it.

14. In point of fact, you are of opinion that one train a day each way would be sufficient to supply the travelling public. Yes.

15. *Chairman.*] Do you think it possible, in a newly peopled country like this, to expect such costly railways to pay at all? I think costly is a comparative term. My own impression is that the railways in this Colony are the cheapest railways ever constructed.

16. Is it possible they can pay interest on the cost of construction if continued on the present scale? I am satisfied that if we charged the Victorian rates they would pay not only the working expenses but a fair rate of interest on their cost as well. If they pay 2 per cent. with the present rates, there is no doubt that with a very small increase of the rates the receipts would largely increase. It is quite a mistake to suppose that by lowering the rates the receipts will increase; it is quite the reverse in every Colony.

17. I presume you mean an increase in the charges on goods going up the country from Sydney—not upon the produce of the country? The produce of the country might have special rates, no doubt, but I would increase everything as far as the carriage is concerned.

18. Would not an increase of the rates have the effect of stopping a great deal of traffic, for instance, coal or grain? I may have peculiar notions in reference to coal traffic, but I cannot see why the Government should expend public money, by running trains at a loss, to assist private enterprise. We are asked to bring down coals from Bowenfels, to compete with Newcastle, at rates which are perfectly absurd to dream they could ever be carried for. Considering the rates we have been charging for a number of years past, the wonder to me is that our railways pay anything at all. We carry for a penny or three half-pence a mile—a rate hardly heard of even in England.

19. Have you ever made any estimate of the probable result of further extensions as regards the quantity of traffic? I have made no estimate of the traffic. I can only assume, from what I am told the traffic is, that railways would pay to some extent beyond the present limit; indeed I think the southern line should be continued to Albury to join the Victorian Railway.

20. Have you made any calculations as to the effect, as regards traffic, of a junction between the Melbourne and Sydney lines? No, I have made no estimate of the traffic, but the traffic must be very considerably increased in that case. No doubt we should have the whole of the passenger traffic which now goes by sea, besides opening up a very fine country between Goulburn and Albury, which, whether a portion of the traffic went to Melbourne or not, would certainly be of great importance to this Colony.

21. Have you considered the question of having cheaper lines at less speed than the present ones? I have never considered it much. Of course if there be no traffic for lines such as we are now constructing, lines with a lighter permanent way might be made for locomotives.

22. Is not the weight of the locomotive the chief cause of the cost? It is no doubt the chief cause of the cost of renewals; but if you have steep gradients you must have heavy engines to work them.

23. However light the traffic, the locomotive must be very heavy where the gradients are steep? Where the gradients are steep the engines must be heavy.

24. What is the weight of the locomotive now used on the mountain line? 31½ tons, without the tender.

25. *Mr. Hoskins.*] Do you think engines weighing from 15 to 20 tons would suffice for the traffic beyond

beyond the authorized extensions? That depends altogether upon the gradients—it is not so much the traffic as the gradients that have to be considered—but I should never recommend a line to be constructed with a worse incline than 1 in 40, where it was possible to get that.

J. Whitton,
Esq.

2 Nov., 1869.

26. *Chairman.*] There are steeper gradients on the present lines, are there not? There are. It is very seldom supposed that there is any difficulty with the southern line, but there is a much worse incline on the southern line than on the western—1 in 30 for 3 miles.

27. *Mr. Morrice.*] That has to be ascended going towards Goulburn? Yes, from Picton to Mittagong. In 15 miles from Picton towards Mittagong we rise 1,500 feet. Returning from Mittagong there is an incline at Bargo of 1 in 33.

28. *Chairman.*] In going through level country—and I believe a large portion of the extensions would go through level country, either west, north, or south—would it not be possible to make the railways much cheaper? They could be made for much less money, no question about it; but it would depend entirely upon the amount of traffic as to whether it would be advisable to have substantially constructed railways with the present speed, or cheaper lines with a lower rate of speed. If you put down a lighter railway you must reduce the speed.

29. Not if the line is straight and level? Yes; you must have a thoroughly good road and maintain it well, or you cannot have high speed without danger.

30. The cost of the heavy rail is one very considerable item, is it not? Yes, one item of cost; the rail now in use is 75 lbs. to the yard—about 117 tons to the mile.

31. At £10 per ton? They cost more than that before they get into the country, say about £12 a ton; they cost something like £10 a ton delivered in Sydney.

32. In a level country a much lighter rail than that would do? A lighter rail would do, but I question whether it would be good economy. If railways were being constructed by a private company to sell to the Government then I would advise the use of as light a rail as possible, but making them for the Government I would put down the best rail I could get, which would be economy in the end. A 75-lb. rail of thoroughly good iron, with a light engine, would last perhaps forty years, whereas a 40-lb. rail would probably not last more than ten years.

33. *Mr. Hoskins.*] How long would you estimate 60-lb. rails, with engines of about 15 or 20 tons, would last? There is such a great difference in the quality of rails. I have known some to wear out in twelve months. 55 lbs. is the weight of the rail now on the Windsor line; the gradients are steep, and the engines too light to work the traffic satisfactorily, but we cannot put on heavier engines on account of the lightness of the rails.

34. *Chairman.*] What is the weight of the locomotive in use on that line? About 16 tons.

35. *Mr. Alexander.*] You say a rail 75 lbs. to the yard will last forty years. Do you think one of 55 lbs. would last twenty years, with engines of 15 or 16 tons? Probably it might. If you have lighter rails you must have lighter engines; everything depends upon the quality of the rail. Some of the rails made now will not last more than twelve months, and some rails we have had down for fourteen years and they are very good yet; but if we were to pay more for our rails, and get them made without competition, they would, I have no doubt, last five times as long as they do now, and cost very little more. There is nothing so destructive to good work as competition; the more you get of competition, the worse article you get.

36. *Chairman.*] You think that our railways ought to be of the very best description, if we make them at all? I do.

37. You disapprove of cheap railways,—that is to say, inferior descriptions of railway? I do entirely; but if a line be wanted through a district the traffic of which will not justify the construction of a heavy permanent way, we might put down lighter rails and use lighter engines. I will give an instance to show the difference in economy between light and heavy rails. In Victoria they have used rails of 60 lbs. and rails of 80 lbs. to the yard; but the 60-lb. rail will not turn, and the consequence is they do not last half the time that the heavy rails do.

38. Where the traffic is light, do you not think horse power might be substituted for locomotive power? I do not think that with economy you could substitute horse power for locomotive power. Wherever a railway can be made, horses should be dispensed with, and light locomotives used, if there is not sufficient traffic for a heavier railway. But so much depends on the nature of the district that, before any estimate could be given, a complete survey should be made of the whole country, and then a recommendation should be made upon the facts as you find them. To say a railway can be made for two or three thousand pounds a mile, without knowing the difficulties to be contended with, is simply an imaginary estimate. Bridges and culverts may be required, which cannot be estimated for beforehand, or the inclines may not be so favourable as may be supposed. The only thing that could be determined upon would be the weight of the rail you wish to use, and then you might have a survey made of the country with a view to the construction of a railway of corresponding character.

39. The use of an iron rail would of course enable a horse to draw much more than even on a macadamized road? No doubt of it. On a rail the friction is not more than about 8 lbs. to the ton; on a macadamized road it is from 44 to 60 lbs., and on gravel 150 lbs. to the ton.

40. A horse upon a rail alongside the ordinary roads, without any cuttings, could draw as much as five or six horses could draw on the road itself? No doubt.

41. And could travel at greater speed? Yes.

42. So that there would be a saving in the number of horses employed, and in the time? No doubt; but that again depends upon the country. Suppose there is much down-hill—say from Mount Victoria to Penrith—a certain number of horses would be required to take the load over the steepest gradient, yet with a little alteration of the gradients the road might be so made that the load could be run down with scarcely any power at all; yet on account of a few steep places these horses must travel over the whole road.

43. When we have got to Goulburn on the south, Bathurst on the west, and a little beyond Murrurundi on the north, are we not past all the mountain country? Yes.

44. And then it is a rare thing on the ordinary roads of the country to come across a gradient of more than 1 in 12? On the western line there are many of 1 in 8.

45. Beyond Bathurst? I do not know beyond Bathurst, but even on the other roads there are some very steep inclines. It is notorious that the roads of the Colony have been taken over the very worst places—

J. Whitton, Esq. wherever there is a hill the road goes over it. Therefore, the assumption is that by adopting new lines we might get round these hills.

- 2 Nov., 1869.
46. I suppose a horse will draw with ease, on an iron rail, 4 tons, upon a gradient of 1 in 15? No.
47. 3 tons and the dray? The gravity and friction on an incline of 1 in 15 is 160 lbs. to the ton, and the ordinary power of a horse is only 125 lbs. It would therefore require 3 horses to take up 2 tons. Of course for a short distance he will exert greater power, but at a speed of 3 miles an hour he can only exert 125 lbs. for any distance. No doubt there are horses that would do more.
48. I have seen eight horses taking a dray with over 4 tons on it, on a macadamized road, up a gradient of quite 1 in 12? Yes, it may be so, but that is an extraordinary exertion for a horse to make.
49. In a level country I suppose there could be no doubt one horse could draw 4 tons on an iron rail with the greatest ease—I mean in undulating country, but with no steep gradients? It depends entirely upon the gradients.
50. On a railway, whether for horse or locomotive power, where the speed would never exceed seven or eight miles an hour, or at the most ten, there would be no necessity for having such a broad gauge as is required for a higher speed? The broader gauge adds very little to the expense of a railway.
51. It must add to the cost of sleepers? Very little indeed. In some districts sleepers are a very heavy item, no doubt, but in making a horse tramway you would lay saplings from the bush, which might or might not be easily accessible according to the country passed through.
52. You think there would be no advantage in making very narrow gauges? No; the rails must be the same in any case; and if the tramway is to be laid on the ordinary roads, with no cuttings, the breadth of gauge cannot affect the expense in that respect. There is nothing but the sleepers and ballast on which any saving could be effected, and the amount would be so slight as to be hardly worth while making a difference of gauge.
53. The chief cost of a railway is owing to the necessity for making cuttings and embankments in order to keep the gradients as easy as possible? Yes.
54. Then in a perfectly level country, where there was nothing to do but form and ballast and lay the rails, it would not surely cost above £2,000 a mile? With a light rail it might be done for about £2,000, but it is difficult to say what the cost of a railway complete would be till we know what bridges and culverts would be required. Our railways cost about £3,700 a mile for rails, ballast, and sleepers. In a level country, all that would have to be done would be to cut side drains and form a bank to keep the rails above the level of the country; but how many bridges and culverts would be required it would be impossible to say.
55. I presume an open culvert, or a bridge on timber, does not cost more than any other portion of the line? Yes, it would cost more than earth-work, of course.
56. It would not be necessary to drive piles in cases of that kind, simply for drainage gutters? That would depend entirely upon what the soil was; if there was sand to deal with, you would be compelled to drive piles; sand makes the best foundation where it can be confined, and the worst where you cannot; if you can drive sheet piling to keep sand in its place, no better foundation can be had. If there are no works—that is to say, no bridges, no culverts, no cuttings nor embankments—no doubt a line might be made for £3,000 a mile; but I never saw a country yet that did not require something of that kind.
57. That is to say, a railway necessary for carrying a heavy locomotive? I mean for a locomotive.
58. Do you think a horse railway, say for light traffic, could possibly cost more for forming and making than the macadamized road alongside of it—It is just as necessary to have the gradients easy on a macadamized road as on a horse railway? No doubt it would be more useful if they were, but that has never been studied in this country; there are inclines of all sorts which might have been avoided. In laying a railway alongside a roadway you adopt these gradients, whether good or bad; and as the bridges on the roads are rarely made more than 15 feet wide they are not too wide for the ordinary traffic, therefore bridges must be made for the tramway. If the rails were laid on the existing bridges, probably the first dray that came over would displace them—I think the teamsters would take a special pleasure in displacing them.
59. The returns of the traffic and the receipts can be got from the Accountant or the Commissioner? The Commissioner is of course the proper person, but they have to be supplied to him by the Accountant. I may mention that in 1868 I find the receipts in New South Wales were £224,359, expenditure £144,080, and the net receipts £80,279; in Victoria the receipts were £581,402, the expenditure £282,976, and the net receipts £298,426.
60. You attribute the difference to the different charges? Almost entirely.
61. You are aware that the country population in Victoria is much greater than it is in New South Wales—that there are some large cities some distance inland, while there are none in New South Wales? Of course I am aware there is a larger population in Victoria, but whether they are a greater travelling population I cannot say. They have tried to increase the revenue by lowering the rates, and found it a mistake, but we have done nothing but reduce the rates since I came to the Colony, and have not yet found it a mistake.
62. You are aware that Ballarat and Sandhurst are large cities? I believe so.
63. And both must be supplied from Melbourne? No doubt. I believe our total tonnage, including mineral traffic, is almost equal to that of Victoria, but as we carry everything for almost nothing it can hardly be expected that our railways will pay. I think it an unfair argument that because these railways do not pay, no further extensions should be made; for the fact is, they do not pay because they have been badly managed; the rates are too low, and the mileage run is excessive.
64. When we get beyond those portions of the Colony where the population is comparatively dense, will there not be still less chance of these railways paying? I do not think so. Of course they will not pay if you take them into a country where there is no population and no traffic for them; but I do not think it follows that because these railways have been so worked that they have not paid, further extensions should not pay if properly worked. I think we require further extensions to make these pay, with proper management and proper rates of course.
65. When you go 30 miles west of Bathurst for instance, there is no direction beyond that in which you will find any large population? I do not know what the population may be now, but I think there is some of the finest land between Bathurst and Orange that I have seen in the Colony. The land in the vicinity

vicinity of Orange and Blaney is very fine agricultural land, and appears to be nearly all bought up; and no doubt if facilities were given for bringing produce to Sydney there would be a very large population there.

J. Whitton,
Esq.

2 Nov., 1869.

66. When you get beyond that limit, say 30 miles west of Bathurst, is not the population very thinly scattered over the country? That I do not know. I have not been beyond Orange.

67. Would you not consider that it would be impossible for a costly line of railway to pay for a long long time in that country? I do not know that it would be impossible. The further we get into these districts the more cheaply we can make the lines, because I understand the country is more level. In such a country the difference in the cost of the two descriptions of lines is so small as to make it scarcely worth while to adopt the inferior kind; and the difference in the expense of working the two lines would be in favour of the heavier line, for with a heavy rail and heavy engine you could take as much in one trip as in four or five on the lighter rail. The only advantage in favour of the lighter line would be in the cost of construction.

68. Putting a locomotive railway aside as too costly, if we wish to make good roads into the western interior, do you not think a horse railway would answer the purpose better than a macadamized road? I do not think it would. In the case of a horse tramway you have the road as well to keep up; you cannot compel any one to use the tramway—they would compete with you by the road.

69. That would be the case with steam also? They cannot possibly do it, either with regard to rates or speed. But the horse-tramway would have but slight advantage over the road for ordinary traffic. Most of the inhabitants of these districts keep their own horses and teams, and they might prefer to cart their own produce instead of paying for it on a horse-tramway.

70. A horse railway could not cost more than a macadamized road, if so much? That would depend entirely on the facilities for getting metal.

71. If there were no metal in the district, a macadamized road would be much the more costly? No doubt.

72. But in the event of there being plenty of stone on the spot, they would cost about the same? Probably they might; but the cost of maintaining a horse tramway would be more than that of maintaining a railway, in consequence of the necessity for continually renewing the ballast worn away by the horses' feet. I may be prejudiced, but my impression is that wherever steam power can be used, animal power should be abandoned.

73. *Mr. Hoskins.*] Which do you think would involve the largest cost of maintenance, a macadamized road or a horse tramway? It is very difficult to say. I do not think there would be much difference. A macadamized road if properly formed with good metal, will last a long time. Probably a macadamized road would cost more.

74. *Chairman.*] There would be a clear saving as regards the traffic on a horse railway as compared with a macadamized road—in men, time, and the amount of horse traction required? No doubt.

75. *Mr. Lackey.*] Do you recollect the cost of the Windsor and Richmond line—the total cost per mile? I think it was over five thousand pounds and not quite six.

76. Does that include rails and station-houses? Everything—land, rails, and station-houses.

77. What is the weight of the rails per yard? Fifty-five or fifty-six pounds—I am not positive.

78. The line is worked by much lighter locomotives than the ordinary lines? Yes.

79. To your mind has that line proved a successful one? Quite the reverse; it is a very unsuccessful experiment. The traffic is limited by the steep inclines, 1 in 33, which there was no occasion ever to have made, and by the lightness of the rails. We have engines that can take up three times the traffic, but we cannot put them on the line, and therefore we are obliged to use small engines, taking very small loads.

80. Would it have entailed much greater expense to have reduced the gradients? Not much greater. The line I proposed to make would have cost about £7,000 a mile, exclusive of land, with no incline worse than 1 in 80, and with 75-lb. rails, precisely the same as we are using on the other lines.

81. Have there been any changes in the passenger and goods rates during the time the railways have been under your surveillance? There have been frequent reductions.

82. No increases? There have been slight increases, but not throughout the whole of the rates. The increases have been confined to some very small matters. But perhaps I had better explain to the Committee that I have nothing to do with the management of the railways—nothing whatever to do with the traffic or rates.

83. You are strongly of opinion that if the rates were increased, the revenue from the railways would be much greater? Yes, I have no doubt about it.

84. When increases were made some time ago, did you notice whether the receipts corresponded with your ideas? I do not know whether they did, but I know that whenever the rates have been lowered the net receipts have always decreased. I am not aware that any increases have been attempted to any extent.

85. The rates are lower than they were some two years ago? Everything has been lowered. We have special classes that we carry at a penny and three half-pence a mile, and we carry the great bulk of the traffic at these rates. The season tickets also have been lowered.

86. There is no difference between the down traffic and the up traffic? No, they are both the same I believe.

87. *Mr. Morrice.*] What was the cost of construction of the Melbourne railways per mile? About £37,000 per mile.

88. What was the cost of the Queensland lines? The last report I saw of the Queensland lines, the cost was given at a little over £15,000 per mile; but I believe the average has been reduced lately by the making of many miles on almost level ground. I find that in New South Wales we have special rates for goods, of 1d., 1½d., and 1¾d., and for first class 4d., for second class 4½d., for third class 5½d., for fourth class 9d. In Victoria there are, I believe, no special classes; but the first class rates are 5d. against our 4d., the second 6d., the third 7d., and the fourth 9d. In Queensland they have one special class 2½d., a second special class 5¼d., first class 6½d., and in the second and third classes they make a difference between the owner's risk and the Commissioner's risk. If the Commissioner takes the risk the second class is charged 10d., owner's risk 8½d.; the third class is 10½d. owner's risk, and 13½d. Commissioner's risk. They have adopted what they call low rates for the purpose of running the drays off the road.

89. What is the greatest weight of goods you can take up by one train from Sydney to Goulburn? We cannot

J. Whitton, Esq. cannot take more than about 130 tons up the incline beyond Picton; from here to Picton we can take between three and four hundred tons; from here to Goulburn, to run through, about 130 tons.

90. *Chairman.*] Is that loading or the entire weight of the train? The entire weight of the train; the weight of goods would be about 60 tons.

91. *Mr. Morrice.*] What weight could you bring down from Goulburn to Sydney? Not more than 60 or 65 tons, for we have nearly the same incline to come up—1 in 33 instead of 1 in 30.

92. What is about the average weight of the trains? I do not know. I limited them at first to 12 waggons. We work the line between Picton and Mittagong as a distinct portion, and that engine makes two or three trips between Picton and Mittagong for one that is made by the engines on the other parts of the line.

93. Have you any idea what is the average weight of goods you could take? If you mean to take them direct from Sydney to Goulburn, we could not take more than I have mentioned, but by dividing the trains at Picton and Mittagong we can take very heavy trains—say 150 tons.

94. Coming Sydney way, how much can you take? About the same.

95. Although the steepest gradient to go up is only 1 in 33? Yes, but you must remember it is more dangerous to take a very heavy train down an incline than up it. The incline of 1 in 33 is between Picton and Mittagong, and would be worked as previously stated.

96. When the trucks return from Goulburn do any of them come back empty? I do not know; I am very seldom on the line; the Traffic Manager could give you that information.

97. Supposing half these waggons do come down empty, would it not be better that they should bring down loading than come down empty? It would be better of course to bring down loading at a fair price, but it would not be at all advisable to bring loading that would not pay expenses.

98. No matter how low the rate, it would help to pay the expenses of the railway? No doubt, but if the working expenses of bringing traffic were more than we should get for the carriage of it, it would be better to leave it behind.

99. Would it not be the same expense to bring these waggons back empty? No; a waggon of eight tons will surely cost more to haul than one of four tons.

100. You would have the same expense for engine-drivers and engines? You might argue in the same way with regard to the whole railway policy,—that it would be better, if we run trains at all, to have them loaded at any price than have them empty. In my opinion, so long as we run trains at all, we ought to have a paying price for the traffic. If I understand the question you are asking me, it is as to the return empties, whether it would not be more advisable to bring down produce than to bring down empty waggons. Well, I should say that if those who grow the produce will not pay a reasonable price, I should leave it behind and bring down the empty trucks.

101. But supposing there were more goods to take up than you had to bring back, and you had to bring back half the trucks empty, would it not be better to have them loaded with goods at a reduced price than to bring empty trucks back? If I had the management of the railways, I should make the rates as low as possible, with due regard to the working expenses; but I would not, for the accommodation of people in the country, who would refuse to pay a reasonable rate, bring down produce at a rate that would not pay. I think produce should be brought down at reasonable rates; but if the owner refused to pay reasonable rates, I should let him bring it down in any way he pleased.

102. Suppose it would not pay him unless he could get it brought down very cheaply? Then he should not grow it. We have most absurd applications made to us to bring down things for nothing, simply because the trains are run.

103. I want to get an answer whether it would not be better to have these trucks loaded coming down, at a reduced price, than to bring them down empty? At a reduced price, unquestionably, but not at a losing price. My view is this: the Commissioner is in the position of a trustee for the whole country, and it is his duty to see that the railways pay working expenses and interest on the money they cost in construction, and he has no right to compel those who never use the railways to contribute as much towards the interest of the money expended upon them as those who do use them. As I have said before, I do not think the Government should spend the public money in assisting private enterprise, by carrying on the railways at losing rates.

104. You think then that private enterprise at Newcastle or Illawarra should be protected, while private enterprise in the southern or western districts should not be protected? I should not protect any private enterprise.

105. You think then that imposing a charge that prevents coals coming from the southern or western districts is not a protection to the northern? I would not prevent any one bringing coals from the south or west, but I should object to bring coals from the south or west at the public cost to benefit a private company.

106. You think it would be better not to bring coals at all? If they would not pay a reasonable rate for carrying, I think so. I would not with public funds assist a private company or person to compete with any other company or person.

107. Do you know what is the lowest paying price they can carry coals at in England? I believe there are not more than four or five railways in England that are paying at all; they are simply running their enormous traffic at low rates in consequence of the great competition. They are carrying, I believe, at $\frac{3}{4}$ d. per ton per mile, and can take forty waggons in one train, but it does not follow that it pays them. If you look to the dividends of all the English railways, you will find that very few are paying. When I was at home, two years ago, there were many of them in a state of insolvency.

108. Do you not think it would pay better to take $\frac{3}{4}$ d. a ton per mile for coals on the southern or western lines, coming to Sydney, than to bring back the trucks empty? If the coal-owners had to find their own waggons they would come back empty from Sydney, and this price would not pay working expenses.

109. Supposing the Government did find the waggons, do you not think it would be better that these waggons should bring down coals at $\frac{3}{4}$ d. a ton per mile, rather than come down empty? No, I do not. I believe the greatest portion of our waggons come down loaded. I do not know what proportion may come down empty; some do, no doubt; but even at $\frac{3}{4}$ d. a ton per mile it would not pay. If our own waggons had to come to Sydney, and we could load them as we might find it convenient, no doubt we could afford to bring them at a much less cost than in owners' waggons; but where, as in the case of the Bowenfels coal-owners, they propose to find their own waggons and pay $\frac{3}{4}$ d. a ton per mile for bringing

down

down the coal, and then ask to have the waggons taken back for nothing, it can only be done at a great loss. On that line the empty waggons would cost more to have them taken back than the full ones coming down.

J. Whitton,
Esq.

2 Nov., 1869.

110. Where you say the gradient is 1 in 33 on the southern line, what is the distance for which it extends? About a mile I think; the incline of 1 in 30 is about three miles.

111. *Mr. Hoskins.*] Do you not consider that railway traction is the cheapest mode of land traction? Unquestionably.

112. And therefore, while you say that in your opinion loading ought not to be conveyed at unremunerative rates, it is your opinion further that by no other mode of land traction could produce or loading of any kind be conveyed so cheaply as by railway? Certainly not. In fact, I may say the traffic we are carrying for 1d. and 1½d. was charged for by drays not long ago at 2s. If we could get one-fourth of the price that used to be charged by drays, and one-half the price charged to passengers, our lines would pay uncommonly well.

113. I will give you a case. I was at the Waterview Bay Works the other day, and saw a boiler being loaded on a waggon for Lambing Flat; I expressed astonishment at its not being sent by railway, and they said the rates were too high. How do you account for that? I cannot understand it at all. How did they intend to take it?

114. By 8-horse waggon all the way through? I should let them have the benefit of it decidedly. I may give an instance to show how unremunerative our rates are in some cases. A clerk in my office got leave of absence for a fortnight, and wanted to go to Richmond for a boating excursion. He wanted to take a boat with him from Sydney. He paid 5s. for carting the boat from the harbour to the railway station; 6s. from Richmond to the Hawkesbury; and all that we could charge him for taking that boat 34 miles, from Sydney to Richmond, was 2s. 10½d. It was taken by weight instead of by measurement, and we had to send two trucks with it.

115. Would you not consider, as a matter of policy in the management of the railways, it might be desirable to have a difference between the rates for down country goods and those for goods going up, so as to ensure the conveyance of all produce and raw material by railway rather than by road? Yes. The rates are such now as they never could be brought by road for; but I think all agricultural produce should be brought down by rail.

116. I believe you have had some experience of railway traffic in England? Yes.

117. I believe traffic managers in England never think of running passenger trains to accommodate the public, unless they find they can make a profit by doing so? Not that I am aware of.

118. And if they found trains they were in the habit of running did not pay, they would withdraw them? Certainly.

119. Do you not think we run a good number of passenger trains on our railways here which might be very profitably withdrawn? I have no hesitation in saying we run double the number required. We run trains every hour to Burwood, and we could take the whole population of Burwood in one train. I understand we run trains for the express purpose of taking season-ticket holders to lunch, and bringing them back again.

120. That is comparatively a small matter. Do you not think we run too many trains to Bowenfels and Goulburn? I cannot quite agree that the suburban traffic is a very small matter. The engines are constantly running, and the trains do not pay. I think the trains to the interior should only go once a day.

121. One passenger train each way from Sydney to Goulburn, and from Sydney to Bowenfels, would be quite sufficient? I think so—quite sufficient.

122. Could you favour me, if not with an actually reliable estimate, with an approximate estimate of the cost of the railway from the Parramatta Junction to Picton, and from the Parramatta Junction to Penrith, and from Maitland to Muswellbrook? I could not give it now.

123. Can you state it roughly? From the Parramatta Junction to Picton it would be about sixteen or seventeen thousand pounds a mile, but that includes the Menangle Bridge and some other very heavy works. From Parramatta to Penrith, about £13,000 a mile, and from Maitland to Muswellbrook about £11,000.

124. I assume that the reason why these lines have cost so much, arises from the large and costly structures in the shape of bridges which it was necessary to erect? To some extent it does. The Menangle bridge, I think, cost nearly £100,000, the Singleton bridge about £42,000.

125. Have you been over the country through which it is proposed to take a railway from Goulburn to a navigable part of the Murrumbidgee or to Yass? I have been beyond Yass to Binalong, and also from Bathurst to Orange, and from Murrurundi about 16 miles further north—over the range as far as Warrah.

126. May I ask you whether you consider that in the direction in which it is proposed to make the railway from Goulburn to Yass, the country is more easy than that from Parramatta to Picton? Yes.

127. And therefore a railway constructed in as solid a manner as that from Parramatta to Picton would be less costly? Far less costly. I have the estimates made for a line from Goulburn to Yass, to cost about £10,000 a mile—not more, perhaps less.

128. From Bathurst to Orange ———? That is a more difficult country than I thought it was, but still there are no great difficulties—no inclines worse than 1 in 50, and no expensive works.

129. And when you have surmounted the Liverpool Range there will be no difficulties between that and Tamworth? No.

130. Do you not think one of the primary reasons why our railways have cost so much in constructing, say from Parramatta to Goulburn, and from Parramatta to Penrith, has been the extremely difficult character of the country, the lower part of the country having to receive the watersheds of the various tributaries of large rivers, and in the upper part the mountain range having to be surmounted? Not between the Parramatta Junction and Penrith; there have been very few important works; but beyond that no doubt it has been so.

131. Could you give me an idea what the railway has cost from Nattai to Goulburn? About £13,000 a mile I think, not more. We have got through now the most difficult country we shall have to pass in extending the railways; but it should be borne in mind that our railways, which have cost on the average about £14,000 a mile, are remarkably cheap lines, if you take into consideration the cost of labour in this country compared with the cost of labour in England. We pay 2s. 6d. for earth-work, whereas in England

J. Whitton,
Esq.

2 Nov., 1869.

England they only pay 9d. ; and we have paid 5s. for rock as against 2s. ; and the importation of our rails adds £2 or £3 a ton on them.

132. Do you not consider that the country from Goulburn south, Bathurst west, and Murrurundi north, is of a character favourable to the construction of railways at a moderate cost? Yes ; on the southern line there will be no incline all the way to the Murrumbidgee worse than 1 in 50, and the works will be tolerably light.

133. I presume you are aware that the ordinary traffic beyond Goulburn, Bathurst, and Murrurundi, is much less than it is in the lower part of the country? I dare say it is.

134. The lower country is more thickly settled? Yes, no doubt.

135. Do you not think we might have what we may term good substantial railways, which you could approve of, and adapted to the requirements of the people south of Goulburn, west of Bathurst, and north of Murrurundi, of a less costly character than those you have hitherto supervised the construction of? Yes, I think they could be made in these districts for three or four thousand pounds a mile less. As I have said before, the estimates for the extensions amount to about £10,000 a mile, whereas the railways that have as yet been made have cost respectively about thirteen, fourteen, and twelve thousand pounds a mile. When these proposed lines are all thoroughly worked up, I may find that they may be constructed for something even less than I have stated.

136. Do you not think that railways with a smaller quantity of ballast under the rails, and with lighter rails, say of 60 or 65 lbs. to the yard, should be sufficient for these interior districts? I should not advise that for the southern line, because if you make a line to join the Melbourne line, it ought to be of a sufficiently substantial character to carry the traffic as fast as we are now doing ; but if you have a lighter rail and less ballast, the engines must be lighter and the speed less. The real difference in expense between a 60-lb. rail and a 75-lb. rail is not so much as to justify a departure from a rail sufficiently heavy for any engine we could possibly use.

137. What is the depth of the ballast on the present lines? It was 12 inches underneath the sleepers, but I have now reduced it to 6 inches. It is 18 inches altogether in the centre of the road.

138. Do you not think a foot of ballast would quite suffice? Then the sleepers would be on the formation.

139. I fully understand what you say with reference to the injudiciousness of running trains at a high velocity on cheaply constructed lines ; but do you not think an average speed of ten or twelve miles an hour would suffice for our extensions? I think it would never please anybody to run at those speeds. The speed is now too slow ; there is incessant grumbling at the speed of our trains.

140. We want to penetrate the country with improved means of communication, and our borrowing power is limited—the question is, whether we cannot do it more cheaply? If there is only a certain amount of money to be expended, the proper plan would be to have careful surveys made, and then see how the expense can be cut down to the lowest possible amount, so as to make the most of the money.

141. If we constructed a cheaper line of railway in the first instance, which would tend to the settlement of the country, could we not renew the line with a superior description of permanent way, when the population of these districts had largely increased and the traffic would warrant it? It could be done, on this assumption, of course,—that the railway you lay down shall be taken by the best route between any two places, that the line shall be properly surveyed, and that the necessary earth-works for a better description of line should be made ; and then, if you please, in time you may take up the light rails and put down heavy ones. But the difference in cost will be simply the difference between a heavy and a light rail. I am quite satisfied in my own mind that the heavier rail is the cheaper rail in the long run.

142. Do you not think less costly structures for station-houses would suffice for a country like this, especially beyond Bathurst, Goulburn, and Murrurundi? I do not believe any line in the world can show such miserable station-houses as some we have here.

143. They have much more flimsy structures in America? There the lines are made by private companies, whose object is to make them at the cheapest possible rate and then sell them at the dearest.

144. They seem to have found these cheap railways best adapted for the settlement of the country? If we were in the habit of killing as many people here as they kill there we should soon have a decrease in the population.

145. Do you not think timber buildings would be sufficient for ordinary stations? I should certainly not like to see worse stations than we put up here. After all, the cost of stations amounts to a very small proportion of the total cost of the lines.

146. Do you not think the stations would be much cheaper if made of timber? I do not think so ; in a very few years they would have to be renewed. My own impression has always been that if we put up buildings of any kind for the Government, they should be respectable buildings ; all ornamentation should be avoided, but the buildings should be substantial and fit to look at. Can anybody conceive anything worse than that wretched building of ours at Redfern? It ought to have been set fire to years ago.

147. I suppose you would be in favour of having railways enclosed in every case? Decidedly I should.

148. You have expressed an opinion that it is undesirable that our railways should be inferior to those of Victoria? I believe ours are quite equal to theirs ; and they are certainly superior to those the Committee reported in favour of constructing the other day.

149. I assume you do not think there is any necessity for our having a better railway than will suffice for the people of Victoria? If, after having expended £37,000 a mile on their railways, they think proper to go to the other extreme and make railways for £6,000 a mile, I do not see why that should be a guide for us. But I believe they are making a great mistake. They will not be able to run their trains, over railways costing only £6,000 a mile, at more than 12 or 14 miles an hour, while we could run express trains at something like 28 miles an hour including all stoppages.

150. Do you not think 12 miles an hour would suffice? People are never satisfied with a low rate of speed, and if we adopt such lines as you speak of there will be constant grumbling. When we first commenced our lines we were told if we could only beat the bullock-drays it would do, but the moment we began to run, the public called out for increased speed.

151. Are you aware that Mr. Higginbotham, the Engineer-in-Chief in Victoria, estimated the cost of constructing their north-eastern line, which is to tap our border, at £9,300 a mile, including stations and all, and that now he has sent in another estimate reducing it to £7,220 a mile, and that the Committee appointed to inquire into the best means of constructing a railway, and who sat for some months, sent in a report recommending a railway to cost £6,000 a mile? No doubt. I am quite aware of that ; but you will

will pardon me for saying I do not think the Committee are the persons to judge of a proper sort of railway. They may be carried away by prejudice to refuse to vote more than a certain sum of money, but it does not follow that the railway they recommend is the best sort of railway for the Colony.

J. Whitton,
Esq.

152. Would you not think the Engineer-in-Chief for Railways qualified to judge? No doubt he is. I 2 Nov., 1869.

153. Would you not consider that his estimate must have been given on authentic data, having in view the circumstances of the country? I have not the slightest doubt about it. His original estimate was £9,000, and possibly, to meet the wishes of the Committee, he has gone over his estimate and made reductions, and has made his estimate so that he can construct a line for £7,000 a mile. No doubt you can construct a line for almost anything; but the question is, whether that is the best thing to do.

154. If the Government told you they wanted to reach certain points, and that they had only £7,000 a mile to spend, do you think you could make that sufficient to give them a railway? I am not quite clear on that point; I should like to go through the country before I gave an estimate. All I could do would be to report to the Government my opinion, and then say that as there was only a certain amount of money for the purpose of constructing these lines, I would make the best use I possibly could of it, and state what I proposed to do.

155. Do you not think such a railway as you could construct for £7,000 a mile would answer all purposes for years to come? Possibly it might; but you would not be able to travel at the same speed, and the railway would cost more to maintain, and not be so serviceable to the country.

156. Do you not think that light railways and engines weighing from 15 to 20 tons would suffice for all the traffic for years to come? An engine weighing from 15 to 20 tons would take a very small load up an incline of 1 in 50. No doubt there are some things we could make less; we could make the ballasting a little less and the rails less, but there would be no permanent saving I am sure.

157. I believe you said the Richmond line cost between five and six thousand pounds a mile? Yes.

158. Was it not the fact that a great deal of the land the line intersects was purchased? Yes.

159. Therefore if that railway had intersected Crown lands the cost would have been very much less? Yes.

160. And you say you could have made a railway through private lands, the same as the Richmond Railway intersects, for £7,000 a mile, without having such steep gradients? Between £7,000 and £8,000.

161. Could you not apply that principle to these other parts of the country? You must admit that the line to Richmond was a very favourable one—the works are exceedingly light.

162. Could you not give us a railway in the interior for something like the same amount? No doubt in a level country a line could be constructed for £7,000 a mile with the present rails. But before any decision should be arrived at, proper surveys and estimates should be made, and then if we found the country sufficiently favourable to reduce the cost to about £4,000 a mile for works, we might be able to lay down then almost the same permanent way that we have now.

163. Take the country from Bathurst to Orange, or from Goulburn to Yass? The Yass extension would be through a tolerably easy country, where the cost would probably be about £3,000 a mile, and the western line about the same by adopting a little steeper gradients. The permanent way is a very small matter in comparison with the works.

164. Would you advise that the Government should import steel rails for the railways instead of iron ones? Yes.

165. What would be the difference in cost? Probably about £2 a ton.

166. As a matter of fact, on all portions of the English railways where there is great traffic, are they not relaying the lines with steel rails? Yes.

167. Have you heard that in America they use malleable iron? Yes. The Americans are also using Bessemer steel; I would propose to use puddled steel. The great objection to the rails we are using now is that they are piled in thin slabs before rolling, and instead of wearing out they laminate—that is to say the top pile comes off; the surface of the rail strips off before they are half worn out.

168. You have recently returned from England? Yes.

169. Is it not a matter of fact that our permanent way from the Parramatta Junction west and south is in better order than most of the lines in England? It is.

170. Did you read the last report of Captain Tyler, the inspecting officer of the Board of Trade, on the Bremaer Pass Railway on the Brindisi route? I did.

171. Did you observe the remark he made about the description of engines used? Yes.

172. Do you not think relatively they do more work than our engines do here? I cannot say I remember what he said on that point.

173. *Mr. Stimpson.*] I think I understood you to say you had travelled from Bathurst to Orange? Yes.

174. Are there any great obstacles in the way in the shape of watercourses? No.

175. Are there any main creeks to cross? There are a few creeks to cross, but nothing of great importance. I did not go over all the country where the survey has been taken, but from the sections it does not appear that there is anything important to cross between Bathurst and Orange.

176. What is your opinion of the Orange District as an agricultural district? It appears to be a very fine district, but I place more confidence on what I hear from others in that respect than on my own judgment.

177. Do you think a railway from Bathurst to Orange would be a paying speculation? I dare say it would.

178. Do you not think a great deal of labour and expense might be spared by using round timber, instead of having it sawn or squared, for viaducts and culverts? We have been using round timber for a very long time in all the timber bridges, but so far as my knowledge of timber bridges now goes I should never put up another if I could possibly avoid it.

179. *Mr. Hoskins.*] Why? On account of the white ant.

180. Do you not think the ravages of the white ant might be obviated by having the timber kyanized? You cannot kyanize timber here—the grain is too close.

181. *Mr. Stimpson.*] Have you ever noticed the white ant in the western district? I have not noticed it. But there is another objection to timber bridges in the western district. I believe there is no suitable timber there. In my travels I saw none likely to be made use of for railway purposes, either in the shape of sleepers or bridge timber, and the general impression at Bathurst appears to be that there is none fit for sleepers or bridges.

J. Whitton, Esq. 182. You are aware that there is a large population located round Orange towards Molong? I have been told so.

2 Nov., 1869. 183. Do you think the railway at present surveyed between Bathurst and Orange, if it diverged a little more to the south-west, so as to go through Blaney, would not be a greater benefit to the people in the district of Carcoar? It might be to Carcoar, but there are difficulties in going that way. It has been laid out as the best line to get through the district, and the cheapest line to construct. It has not been finally determined upon yet, but there are difficulties in getting through Blaney, I can see from the map.

184. Do you think a railway would certainly be much more suitable for that part of the country than a tramway? A tramway, I presume, would be a railway laid upon the existing roads of the country, and I think on the road from Bathurst to Orange it would be a difficult line to work. No doubt if there is sufficient traffic to justify the construction of a railway, a railway is the cheapest road you can make.

185. *Mr. Hoskins.*] Are you aware that Lord Lawrence, the late Governor General of India, left a minute at Calcutta, before he resigned his government, in which he recommended that the railways proposed to be constructed by the Government of India should be of a light description, as being better adapted to the circumstances of the people than a heavy line? I am not aware that he did so, but if he did it would amount only to an expression of his individual opinion. I may say that on one of the most pretentious lines in India about two thousand bridges and culverts will have to be reconstructed, at a cost of £1,800,000.

186. *Mr. Morrice.*] Do you think a railway constructed to join the Victorian line at Albury would be a paying line? I think it would if the rates were increased.

187. Do you not think more trains are devoted to the passenger traffic about Sydney than there ought to be? We are running too many trains I think.

188. The trains are not paying? The railways are not paying generally, and I think the suburban traffic is about the worst paying traffic we have; but I do not think the suburban traffic will ever be a paying traffic till we bring the station to Hyde Park—so long as the station is in its present position the omnibuses will always compete with the railway.

189. Do you not think that if a coal trade from the southern and western districts to Sydney were encouraged, it would cause a great many vessels to come to Sydney harbour? Yes, if you had a coal trade no doubt it would, but you would have to meet with competition from the north.

190. Do you not think that if coal mines were opened in the southern and western districts it would cause an increase of population in these parts? No doubt it would if you had thoroughly good coal; but from what I have seen of the coal from the southern district it is scarcely fit to use.

191. Do you think by the population being increased it would cause a great increase to the revenue of the railway? No doubt of it.

192. *Mr. Lackey.*] Have you formed any opinion with reference to railway extension generally beyond the present contemplated termini at Bathurst, Goulburn, and Murrurundi? The only extension I have formed a strong opinion upon is in reference to the south,—that the southern line ought to be extended to Albury at once to meet the Melbourne trains, so as to have a through line to Melbourne.

193. *Mr. Morrice.*] Are you aware that there is a great deal of fine agricultural land at the Tumut, Wagga Wagga, and the whole district towards Albury? I have heard it described as being the finest district in the Colony, but I have heard precisely the same thing of the district about Orange, and the same of that about Tamworth. It is very possible that when these lines are thoroughly examined it may be found that they can be constructed for something like £7,000 or £8,000 a mile—it depends entirely upon the works which may be found necessary upon them.

THURSDAY, 4 NOVEMBER, 1869.

Present:—

MR. ALEXANDER,
MR. HOSKINS,

MR. STIMPSON.

MR. LACKEY,
MR. MORRICE,

WILLIAM MACLEAY, Esq., IN THE CHAIR.

Archibald Ashdown, Esq., called in and examined:—

A. Ashdown, Esq. 194. *Chairman.*] You are Accountant of the Railway Department? Yes.

4 Nov., 1869. 195. We wish to ascertain the total receipts of the railways in the different districts? I have prepared a memorandum for the present year, commencing from the 1st of January, from which I will quote the figures. Taking the southern line first. The extension to Goulburn from Marulan was opened on the 1st of June, and therefore I must divide the amounts between the periods before and after the extension. The traffic to and from Marulan and Sydney, and all other places between those points, during the first five months of the present year, was:—Coaching (that is passenger traffic) £13,990 1s. 9d., goods £16,649 0s. 3d.; equal, on the coaching traffic, to £24 6s. 7d., and on the goods to £28 19s. 1d., per mile per month, or together to £53 5s. 8d. Then, after the opening to Goulburn, I have just taken the returns for the next month (June), and I find it keeps at about the same rate, notwithstanding the increased mileage. The coaching traffic for June was £2,805 2s. 0d., or £20 18s. 8d. per mile per month, and the goods traffic £3,709 14s. 2d., or £27 13s. 8d. per mile per month; or together, £48 12s. 4d.

196. A reduction in fact? Yes. I have the amounts also for July and August, and I see it has not altered these rates much. For the western line I have taken the amounts for the whole six months, because there has been no extension. The value of the traffic on the western line, to and from Mount Victoria and Sydney and all other places, for the six months ending June, was:—Coaching £15,801 13s. 1d., or £33 15s. 6d. per mile per month; the goods traffic, £21,089 18s. 10d., or £46 5s. per mile per month; together £80 0s. 6d. per mile per month. On the Windsor and Richmond line from the Blacktown Junction, including also the value on the trunk line to the Parramatta Junction, the value of the traffic to and from Richmond and Sydney during the same period of six months was:—Coaching traffic £2,714 17s. 3d., or £12 14s. 1d. per mile per month; goods traffic £2,441 14s. 2d., or £11 6s. 1d. per mile per month; together, £24 0s. 2d. per mile per month. The value of the suburban traffic between Sydney and Parramatta

matta Junction and Parramatta for the six months was as follows:—Coaching £5,201 1s. 9d., or £66 13s. 7d. per mile per month; goods £477 1s. 5d., or £6 2s. 6d.; together, £72 16s. 1d. per mile per month. This is exclusively the traffic between these places. On the northern line I have also taken only the first five months, because the extension from Singleton to Muswellbrook was opened at the end of May. For the five months the coaching traffic was £9,069 16s. 6d., or £34 17s. 8d. per mile per month; goods £16,071 19s., or £61 16s. 4d.; together, £96 14s. per mile per month. After the extension to Muswellbrook, an additional 31 miles, the value for three months (June, July, and August) was: Coaching, £7,222 5s. 8d., or £29 0s. 1d. per mile per month; goods £12,986 15s. 7d., or £52 3s. 1d. per mile per month; together, £81 3s. 2d.

A. Ashdown,
Esq.
4 Nov., 1869.

197. Have you any return of the working expenses of the different lines? I have not. The manner of keeping the accounts until recently was not such as to show the earnings and expenditure of each line. As the accounts were kept, they were utterly fallacious. For instance, the accounts published in the Statistical Register for 1867-8 profess to give the total earnings and total expenses, but they are utterly fallacious—not truthful.

198. Have you no way of ascertaining with tolerable correctness what the actual cost of running the trains is? I have introduced a system which came into operation during the first six months up to the end of June; and if my plan is carried out, it will show the actual cost of working on each division—keeping separate the earnings and expenditure on the different lines.

199. Have you got that? I cannot do that at present. As the accounts were kept, the earnings were credited in this manner:—Taking the Southern, Western, and Richmond lines, the way they applied the earnings was this: All sums received at all stations between Sydney and the southern terminus were credited to the south, including therein all amounts received for western traffic—all passengers booked going west. If the money was received within that area from Sydney, all went to the credit of the south. The western line had credit only for all amounts received at stations west of Parramatta Junction. The effect therefore was that all passengers that were booked beyond Parramatta Junction, and all amounts received for goods sent from Sydney which were paid for beyond Parramatta Junction, were credited to the west, but all goods coming to Sydney from the west, for which the amount was payable in Sydney, although they came from the west, would be credited to the south. In this way it was made to appear, in the accounts published in the Statistical Register for 1867-8, that the earnings from the south were £108,191 13s. 8d., while the total earnings for the west were put down as £46,936 17s. 8d. Then the appropriation of the expenditure was equally fallacious.

200. You could tell us the entire amount, I suppose? That I can give—I can get it for the last six months.

201. Can you tell us what is the cost per month per mile for working? You mean the number of train miles the engines have been running?—I have not been furnished with that yet.

202. Why? The Engineer-in-Chief has charge of that. I made application to be furnished with the mileage for six months ending 30th June, but I have not yet been supplied with it. If that be done, I shall be able to furnish a statement showing the actual expenditure upon the different divisions of the railways.

203. Is the Traffic Manager likely to have that information? No; that is quite with the Engineer-in-Chief, Mr. Whitton.

204. You can give us no idea of the cost? I can give you the actual amounts per month, but I have not got them with me. They can be furnished.

205. *Mr. Stimpson.*] Did I understand you to say that the goods booked or paid for at Redfern would go to the credit of the south, whereas they actually went to the west? That was as the accounts used to be prepared; but they have been prepared on another plan since the beginning of this year.

206. Consequently, more than three-parts of the goods going to the west would be credited to the south? All amounts that were payable here were credited to the south.

207. *Mr. Morrice.*] I suppose all the expenses as far as the junction were charged to the south? The expenses were charged in an extraordinary manner. If you refer to the Statistical Register you will see that the total working expenses charged against the south for 1868 were £87,780 6s. 11d., while the total expenses against the west were £14,805 16s. 10d.; the amount charged against the south being greatly more than it should have been, and that against the west greatly less. In fact, the whole expenses of wear and tear of engines and carriages—the whole rolling stock—was charged to the south, no portion being charged to the west.

208. The construction of the line as far as the junction was also charged to the south? Yes, I suppose it was.

Richard Moody, Esq., Traffic Manager, Southern and Western Railways, called in and examined:—

209. *Chairman.*] Can you give us a statement of the number of passengers and the number of tons of goods carried on the different railways? I am not in a position to do so at present. It was only late last evening that I received an intimation that I was required to attend the Committee, but I was not informed for what purpose. However, anticipating in part the questions that would be asked me, I set my clerks to extract certain information from the books, but I have not been able, for want of time, to obtain all that I wished. I have here some information which may be useful to the Committee—the total tonnage of goods carried, the number of bales of wool, and the values.

R. Moody,
Esq.
4 Nov., 1869.

210. Will you give us the weights? The total tonnage of goods carried through to the southern district proper, that is from Sydney to Goulburn, for the last twelve months, amounted to 9,294 tons. On the western line the through traffic amounted to 19,915 tons; but a large proportion of this would necessarily be permanent way materials for extensions very recently opened or now in progress.

211. *Mr. Hoskins.*] Would not that apply to the south also? No, the very small extent of permanent way material carried from Marulan to Goulburn is scarcely worth mentioning.

212. *Chairman.*] Is there any way of ascertaining exactly the amount of goods going up by the different lines for the supply of the districts beyond the termini? It would require a little time to supply that information.

213. How long? I could probably obtain it, in a form that would answer the purposes of the Committee, by to-morrow.

R. Moody, Esq. 214. *Mr. Hoskins.*] Could you favour us with the same information with reference to the northern line? The northern line is not under my control. The information could be obtained more directly from the auditor, who is now engaged on the particular duty of summarizing it.

4 Nov., 1869.

William Christopher Bennett, Esq., called in and examined:—

W. C. Bennett, Esq.

4 Nov., 1869.

215. *Chairman.*] You are Commissioner and Engineer for Roads? Yes.
216. You have all the main roads of the country under your charge? Yes, and all the minor roads that are in the hands of the Government—that are not in the hands of trustees. There are three main roads by law—from Sydney to Albury, Sydney to Wellington, and Morpeth to Armidale.
217. What is the annual grant for these roads? The annual grant for the portions of these roads outside the railway termini is £50 a mile; inside the railway termini nothing.
218. What are the chief minor roads under your supervision? From Armidale through Glen Innes to Tenterfield. There are three roads radiating from Grafton to the table-land, one to Armidale, one to Glen Innes, and one to Tenterfield. It would be rather a long statement to tell you all the roads.
219. I mean the principal ones? There is the road from Bowenfels to Mudgee —
220. Is that a first-class road? Yes.
221. How are these other roads rated? They are different grades. There is one of the roads from Grafton at £50 a mile.
222. Is that the road from Muswellbrook to Cassilis? The road from Muswellbrook to Denman was classified at £50 a mile, but it has been lately transferred to trustees.
223. I suppose you have a tolerable acquaintance with all these roads? Yes, I have been over most of them myself—there are very few of them I have not been over.
224. From your knowledge of the country beyond the present railway termini, do you think there are many difficulties in the way of railway extension—I mean as regards the character of the country? Nothing like the difficulties the railways have surmounted.
225. What are the ordinary gradients upon these roads? In order to answer the question thoroughly, I have brought the sections of the roads (*sections produced*). These are diagram sections of the roads, compiled from time to time as the officers in the field had leisure.
226. Take the line from Bathurst to Wellington if you please? From Bathurst as far as Evans' Plains Creek, if anything in the way of a modification of a railway were made, it would not follow the present main road, because a more level line might be found by going round to the right, following the river.
227. Would that go by Orange? Yes; that is only a minor deviation as far as Evans' Plains Creek. Then there is a gradient of 1 in 15.
228. Is that the heaviest on that part of the line? No, the heaviest is at the Rocks, 1 in 8 for a third of a mile.
229. Could that be obviated very easily? I do not think it could without heavy cuttings.
230. *Mr. Stimpson.*] The railway line is marked for miles? The railway line is altogether different from the road. Then come the following gradients; 1 in 26, 1 in 14 for half a mile, 1 in 15 for half a mile; then a very undulating country with varying gradients—1 in 8 and so on for short distances; 1 in 12; then it is tolerably easy to Orange, all metalled road. Beyond Orange there is a gradient of 1 in 17, going down to Mandillion Ponds, 1 in 18, 1 in 23, and several shorter gradients that are sharper, but which do not show on this section. Then from Molong towards Wellington it is tolerably easy, 1 in 11, 1 in 20 for 2 miles, then nothing to speak of to Wellington. These are characteristic gradients of a piece of country; in many places there are short bits which are very sharp.
231. It is a very easy country, is it not, from Muswellbrook, through the range to Cassilis? I have never been over the road further than Hall's Creek. There is one difficulty between there and Cassilis—Pike's Gap—but nothing considerable. It is a gap in the range through which the road passes.
232. In the country from the Liverpool Range, near Murrurundi, to Tamworth and Armidale, are there any great difficulties on the road? By the present road from Murrurundi to Goonoo Goonoo there would be the main range.
233. I say beginning from the west side of the main range? No; the country is rather rough, but nothing very heavy. But there is a better line, if anything like a railway were made, round by Currububula. The road did not go there because it is a detour and over black soil. Beyond Tamworth as far as the Moonbi, the country is easy, but the present road at the Moonbies has rather steep gradients.
234. What are the gradients? 1 in $5\frac{1}{2}$ at one place, but that can be avoided. Next year I think of bringing the main road away from that. It will cost about £3,500 to go up by New England Gully, where the main road ought to have gone in the first instance, and the worst gradient there will be 1 in 9 or 10. There will be two bad gradients north of that—I mean characteristically bad—one rising from Bendemeer, and one rising from Carlisle Gully. Then the rest of it is tolerably easy to Armidale.
235. Is much of the road made from Murrurundi in a northerly direction? I should think there is 60 miles of metal road between Doughboy Gap and Armidale. That is a very rough guess; I should like to give you the exact figures.
236. What is the entire distance? About 130 miles.
237. You have tolls on that road, I suppose? Not beyond Murrurundi; the country is too open—too many tracks; they would evade the tolls.
238. The tolls are let to people, I suppose? Yes.
239. Do these people keep any sort of account of the traffic? No. They naturally would not let us know if they did.
240. Is there much completed road—made macadamized road—on the western line? With the exception of about five or six miles near Bathurst, all the line from Bathurst to Orange is metalled.
241. The main road goes as far as Wellington? Yes.
242. Are many portions made between Wellington and Orange? There are several portions between Molong and Orange at short intervals, and there has been recently about a mile made at Wellington. If you will allow me, I will append to my evidence the exact lengths.
243. At what rate do you find yourself able to get on with the making of macadamized roads—how many miles in each year? I would not like to say absolutely, but will append a return to that effect also.

244. What is the utmost quantity your funds will enable you to do in a year? A great deal depends upon what sort of year it is. If it is a year that does not require much maintenance, we are able to get on with the metal road. W. C. Bennett, Esq.
245. What is the average cost of macadamized road, supposing good metal can be got at no great distance? The average cost might be put down at about £1,000 a mile, including culverts and small bridges. 4 Nov., 1869.
246. What width do you make the road? 18 feet.
247. What depth of metal do you put on? From 6 to 9 inches; about a cubic yard and a half to the yard forward.
248. At how much per cubic yard? It varies from five to eight shillings.
249. What do you calculate in average seasons is the cost of keeping these roads in repair? It varies very much in different localities.
250. I mean where the traffic is heavy—for instance, from Bathurst to Orange? I should not like to say without reference to figures.
251. Does it cost half the sum voted—£25 a mile? I should think it does.
252. So that in reality you have only £25 a mile left for the formation of new road? And the tolls.
253. Do the tolls yield any considerable sum? About £20,000 a year altogether, on the three main lines.
254. In reality the annual vote of £50 a mile amounts to about the interest on the cost of a mile of macadamized road, that is to say, £50 would be the interest on £1,000. You say macadamized roads can be made for £1,000 a mile? Yes.
255. So that in voting £50 a year for these roads per mile, we are paying as much without having the roads made, as if we borrowed £1,000 a mile, and paid the interest? I cannot admit you are paying it without having the roads made, because there have been considerable extensions of metal road as far as Orange, and as far as Yass; and there have been bridges made, and clearing, and other things done to facilitate the traffic on other portions not metalled.
256. If it were determined at once to form a road from Orange to Dubbo—to make the whole road—do you believe that it could be macadamized throughout for £1,000 a mile? Yes; but you would require some allowance for consolidating, which is done now by the traffic. The traffic would be unable to consolidate such an immense length of road at once, and we should have to employ steam road-rollers; but I question if that would be possible, because water is an essential requisite with steam road-rollers.
257. Then there would be great difficulty in getting a great length of macadamized road consolidated and brought into working order? Yes.
258. And still it would require £25 a year per mile for keeping it in repair? Yes.
259. Do you not think, under these circumstances, that a railroad not costing more than £1,000 a mile would be an improvement? Decidedly, if you can make a railroad that would not cost more than £1,000 a mile.
260. Have you ever given the subject of tramways, or light railways drawn by horses, any consideration? Yes.
261. Carriages drawn on rails? Yes.
262. Did you ever make any estimate of the probable cost of it? No; because I never could arrive at what sort of works to have. When I was in Europe in 1861, I made some inquiries on the subject. The question had been mooted before I went home, and before I came out here I went to the Secretary of the Institute of Engineers, and asked him if there was any work of the sort for general traffic in use anywhere on the Continent or in the United Kingdom, as I had made up my mind to make myself acquainted with it. He said he was not aware of any, but he said the honorary secretary was more acquainted with the Continent, and he would ask him. I consulted both, but neither knew of anything of the sort for general use.
263. Did they give any reasons for not —? They said that a locomotive line was economically preferable, and had been always found to be so.
264. Does not that depend upon the amount of traffic? They have all gradations of traffic in Europe and the United States, and they invariably find a locomotive line the cheapest.
265. Where the traffic was large? Whether large or small.
266. Would locomotive traction be cheaper than horse traction, where the tonnage to be drawn per day did not exceed some seven or eight tons? Yes, if you take the maintenance of the road into account, because the maintenance of a horse road with a railway line and sleepers across is the most expensive possible—more expensive than an ordinary railway or an ordinary road; you combine the disadvantages of both.
267. That is, that 3 feet of roadway on which the horses would walk would be more costly to keep up than 18 feet of macadamized road? Yes, under the circumstances. The vibration of the sleepers would never allow the metal to consolidate.
268. Where there is merely the weight of the horse? The weight of the horse and the weight of the carriage. Every time the load passes over the sleepers it must impinge on the sleepers to some extent, and cause the sleepers to vibrate.
269. Do you think that the ballasting on a railway line suffers in that way because of the jar of a heavy locomotive? The ballasting never does consolidate; it never gets a solid surface like a macadamized road; it is not wanted, too, for a horse to walk on.
270. Must not the wear and tear of a macadamized road be infinitely greater, for the amount of tonnage, than on an iron rail—As against the wear of one horse on a 3-foot road, have you not got the wear and tear of perhaps eight horses and four wheels on a macadamized road? If both were on a level, that would hold good; but when you have to draw up a gradient, the difference in haulage between a macadamized road and a rail decreases very much indeed. On an ordinary level, the difference is as one to eight in favour of the rail; but as you go up, the force of gravity becomes more sensible with the rail, and you arrive at a point where there is very little difference between the two. On a level it requires that a force of 10 pounds should be exerted to draw a ton; on a road, 80 pounds; that is to say, a weight of 80 pounds would-haul a ton.
271. Could you give us the calculation in horse-power? One horse will haul on a rail on a level as much as eight will haul on a macadamized road.
272. Surely much more than that in reality? No.
273. On a level on a rail a horse will move 15 tons? This is the usual allowance. Eight horses will haul as much on a road as one on a rail, on a level; at a grade of one in a hundred, three horses will haul

W. C.
Bennett, Esq.
4 Nov., 1869.

as much on a road as one on a rail ; at a grade of one in twenty-five a horse and three-quarters will haul as much on a road as one on a rail ; at a gradient of one in twelve, a horse and a third will haul as much on a road as one on a rail ; and so on.

274. So that on a gradient of one in twelve, a horse will do nearly as much on a macadamized road as on a rail ? Very nearly as much.

275. *Mr. Hoskins.*] How do you arrive at that result ? It is the ordinary calculation. You take 10 lbs. per ton, the usual allowance for haulage, on a rail on a level, and 80 lbs., the usual allowance for haulage on a road. Then the ordinary way of calculating is to divide the ratio of inclination by the number of pounds in a ton, which will give the force of gravity ; add the force of gravity on the incline to the haulage on a level, and you will arrive at the amount. That is the calculation.

276. Would not the force of gravity be equal in both cases ? The force of gravity on an incline is equivalent to the number of pounds in a ton divided by the ratio of inclination.

277. *Chairman.*] It is confidently asserted by many that a horse, on a gradient of 1 in 15, can draw, on an iron rail, three tons, and that the same horse has drawn only one ton on a macadamized road ? This is the established rule as laid down by all writers on mechanics. It is a very old rule.

278. Then you are not disposed to favour the system of horse railways ? Decidedly not. Besides the objection I have stated, there is this further objection that you must have roads, in addition to whatever railway you have, for the ordinary purposes of traffic. Every person has a wheeled vehicle of one sort or other, and will want to go from place to place, to get access to towns, and so on, so that you would have to keep up a duplicate system.

279. It would be the same with a locomotive railway—you must have roads—the same objection may be urged in that case ? Yes ; but you have the advantage of speed, and greater power of haulage.

280. You are aware that the costly railways we are making do not pay ? Not directly.

281. You are aware, too, that the further we go into the interior the smaller must be the population to supply, and consequently the less the chance of the railway paying ? Yes, if you go right into the interior the railways will pay less *per se*, but their collateral advantages will be greater.

282. Have you ever considered the question of cheaper and less expensive lines of railway than we have at present ? I am not a railway engineer, and that is a matter that would come more under the consideration of the Chief Engineer for Railways. It is all matter of opinion as to what degree of stability is necessary, but I do not think any outlay on permanent way is wrong ; it will always be reproductive in stability and safety. The question of outlay on stations and so on is matter altogether for the public. The public are very exacting, and will require expensive accommodation, and it is impossible to put them off with less. I think no outlay would be injudicious to secure stability and safety, and the larger the outlay the more economical it will be ultimately.

283. Seeing the impossibility of carrying these costly railways to any great extent into the interior, could you not suggest any other way in which the wants of the distant districts might be met by improving the present mode of communication ? I think the country to some extent is committed to macadamized roads. All the lengths of road we have made, and which could be connected by a small outlay, would be useless for through traffic if any intermediate mode of transit were adopted.

284. Is not that practically the case now—the macadamized road was scarcely completed to Goulburn before the railway caught it up ? Yes, unfortunately that was the case.

285. And the same will be the case at Yass and in other parts of the country ? Yes. Then these macadamized roads were absolutely necessary to enable traffic to be kept up at all. All intercourse between Sydney and Goulburn would have been suspended if it had not been for that road.

286. You cannot suggest any better mode of facilitating the traffic of the interior than the present ? No, I cannot, and I have given it a good deal of consideration.

287. And you would not propose that the present system of roads should be carried on more rapidly—that larger lengths of macadamized road should be made at one time ? No, for the reason I have given—the difficulty of getting it consolidated.

288. The country for the most part beyond the present railway termini is of a much easier description for making roads than that already passed ? Yes, up to a certain distance ; but when you get into the flat Riverine country there is no material for making roads—no stone ; you must have a railway ultimately.

289. *Mr. Lackey.*] How would you propose to ballast, in case of the construction of a railway, without stone ? With burnt clay. All the lines near Sydney were ballasted with burnt clay before they used stone.

290. To Parramatta and Liverpool ? Yes.

291. It was not found to answer, was it ? Not very well ; stone answered better.

292. Have you had much experience of railway construction in the mother country ? No. I have had experience in laying out railways, but not in their construction. My experience at home and in France and South America was entirely in hydraulic works.

293. *Mr. Hoskins.*] Were not the roads from Bathurst West, Murrurundi North, and Goulburn South—and generally those that you call main roads—originally made by persons travelling, but since improved upon in various places, where there were bad pinches and bad places, by some deviations you have made. They were not originally surveyed as roads ? No ; the way they grew up was that as people settled and wanted to go from point to point the roads were made to facilitate intercourse.

294. I infer that if you were required to survey lines of road from the points I have mentioned, you could find a much better country to make the roads through, and with less severe gradients ? Totally irrespective of any towns you could.

295. To reach certain termini ? From Sydney to Albury, for instance, I have no doubt you could.

296. As a matter of policy, if there is danger of the trade of Sydney being tapped from Victoria by more improved means of communication than a macadamized road, would you not think it desirable to find some better means on our side also ? I have on another occasion given very forcible evidence on that point in reference to the south, and that is, that New South Wales ought to abandon every other work and make the southern railway. If you do not do it you cannot prevent the Victorians pushing on theirs—you cannot be the dog in the manger ; and whatever country makes the railway possesses all the advantage, and you have merely the expense of governing.

297. On a tramway could not some sort of road be devised between the rails which would not suffer unusual deterioration through a horse travelling over it ? I think not. The vibration of the sleepers will

will prevent the metal ever settling. In several cases on the western roads, where there were corduroy roads laid down, we thought it would be most economical to make the metal road on the corduroy—that it would make a good foundation. We tried it, but the vibration entirely prevented the metal settling.

298. I will take the liberty of pointing out that the sleepers on which it is proposed to place rails for a tramway would most probably be dressed sleepers and larger pieces of timber, and that the weight would be more equally distributed? I do not think you will find they will be larger. Some of the timbers on the western road were 2 feet thick.

299. You will observe that these pieces were laid on the road, and no means were taken to keep them in their places? If you are going to have longitudinal sleepers in addition to cross sleepers, you will have a first-class road, equal to the Great Western permanent way, which would come very expensive.

300. It would be less expensive than a first-class railway? I question whether the maintenance of it would not make it come dearer. We have the experience of the whole world to guide us. Everybody has been trying the same as we are. But I do think, as this question has taken so much hold, that it would be a very judicious thing of the Government to make ten or fifteen miles of the road it is proposed to have, just as an experiment. Of course it is only my opinion, which must be taken *quantum valeat*, but I do not think it would succeed.

301. Have you not observed that in England horse tramways are used very extensively for coal-pit lines, to bring coal to the port of shipment? They are used.

302. Do they not appear to answer very well? They are not used for general traffic, and the traffic generally is all one way, and comes down almost by gravitation, so that all the horses have to haul are the empty waggons back again.

303. Have you not seen long lengths of tramway—ten or twelve miles? No.

304. Would you favour us with your opinion as to whether some cheaper mode of railway for locomotive traction could not be devised, to suit the more sparsely settled districts? I think the extension of the present railway, with any modifications the Chief Engineer may suggest, the cheapest thing you can have. Before the Deniliquin Committee I said I thought about £6,000 a mile would make a good railway, and I do not think you can get any tramway or anything else cheaper than that. That is exclusive of stations and rolling stock.

305. We all know that our population is limited, that the area of New South Wales is very large and that consequently our borrowing power is limited, yet we are anxious for self-protection to extend improved means of communication to our borders—Do you not think we should have some system of locomotive traction somewhat cheaper than we have had hitherto? The natural facilities of the country will enable you to have it much cheaper. I think it very desirable indeed to have it. I would wish to add that when I say the present system of roads is the best that occurs to me, I do not say I think £50 a mile the best possible sum that could be given. The Treasurer would know best what the country could afford to give from revenue. I do not think any of these road works should be done from loan, but by whatever the country could afford to give from revenue. The present way, rough and ready as it is, is the most judicious that can be devised, because it utilizes the great length of natural good road in the Colony, by making all these small pieces connecting the good natural roads. If, instead of doing as we are doing at present, another means were devised, the tramway would have to be made throughout the whole length before it could be used; but by following the present mode, we utilize all the length of good natural road, by making a few lengths of metalling, bridges, and improving bad places.

306. *Mr. Alexander.*] How about the facilities which the country offers for raising and manufacturing iron for locomotive purposes—There are iron mines and works at Nattai—If the Government were to go into extensions of the railways, would it answer for them to take up these works? I am very chary of recommending the Government to do anything of the kind. I think they do too much in this country. No doubt it would be very advantageous to the country if the iron could be used.

307. Would it be worth while for the Government to exert themselves to take some action in the matter? Most decidedly. I think they might offer encouragement. I go so far as to advocate something like protection in matters of that sort.

308. You are aware the proprietors of these works have made some application to the Government? Yes.

FRIDAY, 5 NOVEMBER, 1869.

Present:—

MR. MORRICE,
MR. LACKEY,

MR. STIMPSON,
MR. HOSKINS,

WILLIAM MACLEAY, ESQ., IN THE CHAIR.

Richard Moody, Esq., called in and further examined:—

309. *Chairman.*] Have you procured the information asked for by the Committee? I have, as regards the goods traffic up and down, including the wool, from Mount Victoria, and from the southern districts. On the southern railway, the tonnage of goods on the down line—that is, from Sydney to Goulburn—for the twelve months past, including the goods forwarded to Marulan—Marulan having been opened for some nine months, and Goulburn only three—amounts to 9,294 tons for the whole year, from October to October. On the western line the whole through traffic to Mount Victoria amounted to 19,915 tons. The permanent way materials carried on the south, which should be deducted from the general traffic, amounted to 2,146 tons, and on the west to 4,365 tons, giving a total for the south of 7,148 tons of goods, as against 15,550 tons for the west, actual traffic. From Goulburn, including Marulan, the southern traffic to Sydney for the like period was 1,759 tons; from Mount Victoria, 3,560 tons. The bales of wool, which are not included in the tonnage I have just given, received in Sydney from the south, amounted to 14,348 in number, and from the west to 19,868 in number. These are in addition to the traffic in merchandise generally. The number of passengers I have been unable to get out for the whole year. I have taken the past three months, as they are a fair average three months for the year, and give a very fair estimate

W. C.
Bennett, Esq.

R. Moody,
Esq.

5 Nov., 1869.

R. Moody,
Esq.
5 Nov., 1869.

estimate of the actual travelling during the year. The single tickets from Sydney to Goulburn for the three months were 695½, the return tickets 68½. These return tickets are extended for a week.

310. That is only just commenced? Within the last two months; but I have taken the return tickets for the other month also. The tickets issued from Goulburn to Sydney—and it is a singular thing that the through traffic is the same both ways—were, single, 695 for the quarter; return, 22. The tickets from Sydney to Marulan I can give for a like period. A great number of passengers going to the Braidwood district travel to the south, *viâ* Marulan. The tickets we have issued show the traffic to Marulan —

311. This is since the railway was opened to Goulburn? Yes.

312. The number of people who have actually stopped at Marulan? Yes. From Sydney to Marulan, 129 single tickets, return 30; Marulan to Sydney, single 132, return 48½. On the western line, from Sydney to Mount Victoria, single tickets 1,513, return 117½; Mount Victoria to Sydney, 1,288½ single, return 213.

313. This is for the three months? For the three months only; and it is an average three months for travelling, as we find on comparison with our books. The travelling in the winter months is very small; but in December and January it is very large, so that August, September, and October, are a very fair average quarter; they always give us the annual receipts as near as possible.

314. You know nothing of the northern traffic? No, it does not come under my supervision at all.

315. Can you give us any idea of the working expenses of the railways? The working expenses have not yet been furnished to me. So far as I am aware, they are not yet in a reliable form.

316. We cannot get the slightest information on that point? Nor can I, I am sorry to say. So far as I have been able to approximate it, it would come to about 3s. 11d. per train mile run; but I have been furnished with no data upon which I could rely. During the current year the accounts are being kept in a way to enable us to obtain any information we require; but it is not yet tabulated.

317. Taking the entire expense of working the three lines, or any one of them, what is an approximation to the amount per mile? The mile run costs about 3s. 11d. That is the only way in which we can as yet obtain the information. The trains run so many miles during the year, and the cost is, so far as I have yet been informed, about 3s. 11d. per mile; but I have no reliable information on the subject.

318. That is to say, every train to Goulburn, for instance, will cost about £26? Yes, about that.

319. That allows for wear and tear and everything? Covers all expenses. Of course this is not yet furnished in a definite form to deal with—it is a mere approximation. We ought to be able to say exactly what the working expenses are from point to point, to enable us to work the railway efficiently.

320. The size of the trains must make a difference? Unquestionably. The accounts are now being kept on a plan which will enable us to ascertain the cost of the different trains from point to point; for instance, the suburban traffic, the traffic south as far as Campbelltown and Picton, and from the Junction to Penrith, and from Penrith to the Mountains, are all kept separately; but I believe at present no reliable information has been obtained; at all events I have seen none, although I ought to have it.

321. Taking one line with another, you believe about 4s. a mile is an approximation? Yes. I believe the expenses have been considerably reduced of late; and that may arise in great measure from new lines being opened which require less expense in keeping in repair.

322. *Mr. Morrice.*] Do you think that if the southern line were extended to Yass, Wagga Wagga, and Albury, to join the Victorian line, it would increase the traffic? No doubt a very large amount of traffic must necessarily pass backwards and forwards along the extension, but how far it may be diverted to Sydney is of course a mere matter of time to ascertain.

323. *Chairman.*] Passenger traffic I presume you mean? Passenger and goods traffic. No doubt we should have all the through traffic for passengers; I can hardly suppose people would travel by water when the railway was opened to Melbourne. The passenger traffic is very great.

324. *Mr. Morrice.*] Do you not think a great deal of grain and other produce would come down from Wagga Wagga? As far as our freights would enable the people to compete, and only to that extent. Our rates are considerably lower than Melbourne rates, and would enable us to carry grain nearly treble the distance for the same money.

325. Do you think, if facilities were given to open coal mines and any minerals from the south or west, that it would not increase both the passenger traffic and the other traffic? Unquestionably it would increase the passenger traffic as well as the carriage of goods. Then comes the question as to the freight of the coal, how far it would pay the freights. If a coal trade could be established on the western or southern line at a point where it could pay the railway freight into Sydney, unquestionably it would increase the railway revenue, on account of the large population that would be required to work the coal, which would necessitate the sending of large supplies as well as a good deal of passenger travelling.

326. *Chairman.*] I suppose you have no means of knowing what portion of the tonnage of goods that cross the Blue Mountains goes to Bathurst, and what portion to Mudgee? Since I have held the office of Traffic Manager, I have made every endeavour to ascertain that, but I have yet no reliable information. I hope to be able to give that information by and by, as I have taken means to procure it. The consigning notes brought to us seldom describe for whom the goods are intended. It is the same with wool—we do not know where the wool comes from; but in the southern districts I have some information showing that the greater portion of the wool comes *viâ* Wagga Wagga to us.

327. *Mr. Lackey.*] In your estimate of the expenses of the lines, have you taken into consideration the relative cost of working short lines and long ones? The information as supplied is simply a rough estimate given to me, and I believe it is a general estimate including all the lines, because unquestionably one length could be worked very much cheaper than another. The western traffic, for instance, from Penrith to Mount Victoria, is dreadfully expensive, and must be so; but larger quantities of goods will shortly be taken up the mountains at each trip than has hitherto been the case. At present the trucks come down in two journeys from the Tank at Wascoe's.

328. *Chairman.*] How will you manage to effect the change? Because the points on the Zig-zag will be lengthened, to enable us to put in double the number of trucks in coming down, so that we shall make but one trip, bringing down double the number of trucks.

329. *Mr. Lackey.*] Since you have been in the position of Traffic Manager, has it come under your notice that the working expenses of the western line are greater than any others? No, not specially under my notice; it has only been occasionally talked of in the office as a fact.

330. It is a fact? It is a fact, I believe.

331. Are they considerably greater? I should imagine they are; but I am not in a position to say how much. The expenses will, no doubt, be greatly reduced shortly.
332. The return of information you have includes the Windsor and Richmond line? The whole of the lines were amalgamated in that way to give a general impression. We have no reliable returns; the information was simply given verbally.
333. In the returns you have furnished to the Committee, under what heading do you put live stock? They would come under goods, but are not included in the return.
334. Is there not a tolerably large traffic in that respect? Very large, and increasing beyond our means of supplying trucks.
335. Are you able to state from what part of the country the greater quantity comes? At present there are more sheep from Mount Victoria, and the larger number of cattle from Sutton Forest.
336. Is that only temporarily, or does it date back any time? It is very recent; we have recently commenced what I call the cattle and sheep traffic.
337. Since the commencement of the cattle and sheep traffic, has it come under your notice which line has most of it to do? I could not speak from memory, but I am satisfied that the greater number of sheep have come from the west,* and the greater number of cattle from the south.
338. Altogether? Altogether.
339. Have you special rates for fat stock? We have.
340. Have you had applications for increased facilities for supplying the market with fat stock? I have had several applications, and have made applications to the head of my department to increase the facilities; in fact, increased facilities are absolutely necessary to carry on the present traffic.
341. At what stations have you yards for putting fat cattle on the train? At Goulburn there is a very large one; we have one also at Sutton Forest, but these are the only yards for cattle worth mentioning.
342. It is necessary to have these yards specially built? Absolutely necessary.
343. There are no yards of that description on the western line? Not yet.
344. Are you aware whether there are any on the northern line? I am not aware; I am aware there has been some conversation about it, but whether it has been carried out or not I cannot say.
345. Is there any accommodation in the metropolitan districts for transmitting fat stock from the sale yards here into the interior? No facility which can be regarded as real facility for carrying out the traffic. We have a large traffic to Homebush, and really no facilities for carrying it on. It is a haphazard sort of thing.
346. Has there been any alteration in the passenger rates since you became traffic manager? The passenger rates have been decreased slightly since I took office. The suburban rates were left as they were, and the same rate carried throughout the whole length of the line.
347. Has the traffic increased since the reduction in the fares, or decreased? I have not yet had the opportunity of comparing the returns, but so far as I am aware from the total amount, the increase in the receipts is something between three and four thousand pounds a month.
348. There have been several alterations in the passenger rates within the last few years? They have been frequently altered within the last few years.
349. Are not the passenger rates rather lower now than they have ever been? I think not; I think they were lower in Mr. Eagar's time than they are now.
350. The passenger rates generally? I think so, speaking from memory.
351. Are they as high now as they were during Mr. Holroyd's tenure of office? That I could not say without comparison.
352. Are the goods rates as low now as they have always been? The goods rates have been much lower than they are now. The special class rates are not so high by 1 mile in 5,† but the general rates are higher than they have been for a long time.
353. Much higher? The great increase is upon the third class rates, in which is the great bulk of the traffic. The special class rates one can hardly say pay working expenses. The greater the quantity we carry in the special class, the greater the loss to the country.
354. Does the increase in the passenger traffic correspond with the increase in goods? That I have not been furnished with, but I apprehend the greater increase would be in the goods.
355. There is an increase in the passenger traffic? That I cannot say; I have not been furnished with the returns.
356. How often are the returns of the Railway Department furnished? They are made up month by month, but they seldom come to hand until the middle of the next month. With the present staff, it is utterly impossible to work them up sooner.
357. In what way are the railway finances managed now—I mean with regard to their custody and care? The cash received by the station-masters, who are all responsible by bond, mostly in the Guarantee Society, is all made up daily, forwarded by the first train in the morning, and received by the cashier at Sydney in locked boxes, the bag at each station being put in in the presence of the guard, who gives a receipt for it. The money is counted by the cashier at the Sydney station and conveyed by him to the bank, the bank receipt being carried back by him to the accountant, who furnishes a copy to the Treasury every morning.
358. Then the guard for the time being is the sole custodian of the money from the different stations? It is in a locked box, which he can have no control over. The bags are put in through a trap-door with a spring, so that a bag once in cannot be got out again.
359. It is a portable box? Yes, rather a heavy one, but not too heavy for two men to carry with facility.
360. The guard gives no security? No.
361. By whom is this cash conveyed from the station to the bank? By the cash clerk.
362. What means of conveyance has he? He is supplied with a cab; and I believe he gives security for £500.
363. What are the methods of checking the railway receipts at the various stations? The system at present I believe is quite perfect; it is the same system that is in use on all the great railways in England. It is probably not carried out to its fullest extent for want of an efficient and sufficient staff; but I believe

* NOTE (on revision):—I have since got out returns, and I find the largest number of sheep come south.

† NOTE (on revision):—If I said this I was wrong. I should have said, and meant to say, that "special rates are higher by 1 mile in 5," as previously 1 mile was allowed in every 5.

R. Moody,
Esq.

5 Nov., 1869.

- believe the audit is very efficient, so much so that we discover the discrepancy of a penny at any time.
364. In goods or passengers? In goods or passengers. Then in the event of any discrepancy being found at the stations, no matter to what extent, the auditor immediately communicates with me.
365. Are the stations on the various lines, to your mind, suitable for the purposes they are erected for—the station-houses and buildings? Some of them certainly are good stations, but there are some that can scarcely be called stations. The station-masters' houses are perhaps hardly the sort of thing they ought to be—at Blacktown, for instance—the rooms being badly lighted, not ventilated, and the roof almost touching your head as you go in.
366. How many rooms are there at Blacktown? I believe three or four.
367. Is there a post office there? Yes.
368. As well as the railway station? Yes. The station-master's office is about six feet by five.
369. Is the station-master a married man? He is, with a large family; and unfortunately, has lost several of his children there, I believe through the ill-adapted house he is living in.
370. *Mr. Hoskins.*] Do the station-masters at the different stations send up train-sheets to the head office, these train sheets specifying the number of passengers that have left their stations, where the passengers have been booked to, the number of horses, cattle, and sheep, and the quantity of goods? Yes, that is sent every day. A train report leaves every station every day, but a weekly sheet is forwarded to the auditor.
371. You said the system is the same as on the principal lines in England. The system in England is that every day a train-sheet is sent by the station-master of each station to the accountant's office? Yes, that is so on some of the lines.
372. Always; and the different classes of passengers, as well as other merchandise and stock, are specified? Yes, we have all the goods traffic every day sent to the audit office. The auditor has sufficient information to enable him to check all the traffic. The passenger traffic is checked by the daily issue of tickets.
373. How can you check the daily issue of tickets if you have not a train-sheet to show how many tickets were issued? The train report shows the number of passengers.
374. I will explain the English system. A large train-sheet, showing every station on the line, is printed in tabulated form, with columns for the different classes of passengers, merchandise, and stock. The tickets are numbered consecutively from one to ten thousand; therefore, in making out the train-sheet for to-day, the station-master has to put down the last number issued on the previous day and the last number issued to-night; and then has to account for that number——? We have no form of that kind at present in use. I know it has been in use in England, but a great many of the railways have discontinued it. The auditor who checks the accounts could, I think, furnish the Committee with information which would show that we have a sufficient check.
375. How long would the auditor be before he discovered a discrepancy in the accounts between the cash received and the amount remitted? I cannot say from practice, but I should say he would be able to discover any discrepancy of importance in a week.
376. Did you not say you would shortly be able to work a larger traffic on the mountain line? Yes, in consequence of the Zig-zag being lengthened we shall be able to put on more trucks coming down.
377. But you cannot take up more? We cannot take up more than the engines will draw.
378. You cannot increase the number of trucks ascending the mountain lines? Yes. I believe five trucks were formerly considered the limit; now we take eight or nine; I think I have seen more.
379. *Chairman.*] What weight of goods do you put on a truck? The average is about five tons.
380. *Mr. Hoskins.*] Has this proposal to increase the number of trucks behind an engine coming down Mount Victoria, received the sanction of the Engineer-in-Chief for Railways? I believe it will not meet with any objection from him. He will have, in fact, to make the length on the Zig-zag for the purpose. It has been as yet only matter of conversation, but I have no doubt it will be carried out.
381. You have not commenced this? No, but we have it in contemplation. It will reduce the working expenses very much, because now the engine has to make two journeys instead of one. Suppose there were 36 trucks at Wascoe's, the engine would bring down 18, and then have to go back for the others; but as soon as the Zig-zag is a little lengthened we can bring down a larger number.
382. Do you propose to bring down 36 loaded trucks at once? No, I am not speaking of loaded trucks. We bring 8 or 9 loaded trucks.
383. *Chairman.*] A large number of trucks must come down empty both from Goulburn and One-tree Hill? A very large number from One-tree Hill. On the Goulburn line a great number of trucks are filled with hay and other things at Campbelltown and other places, and a great number are filled with lime and limestone from Marulan.
384. During a great part of the year a number of trucks must return from Goulburn empty? Necessarily.
385. Is there much difference between the cost of bringing down an empty train and bringing down a full one? The cost is considerably enhanced by loading a truck, in wear and tear of the axles and rails. Bringing down trucks empty costs less than bringing them full. The wear and tear of axles and friction on rails is very great. The weight of the truck is about half the weight of the load carried.
386. Would it make a difference of half the cost of running the train? I could not put it in that way. I am talking about the actual friction on the rails and axles being about half what it would be if the trucks were loaded; but it would scarcely make a difference of half the working expenses, because we must have an engine.
387. The actual outlay would be very little additional—it would be simply the wear and tear? That is all.
388. In that case cannot you afford to bring down any wheat or anything grown in the country at a very cheap rate indeed? That we are doing. It was to meet that that grain is now carried to Sydney at a penny a ton per mile—grain of all kinds is carried on the up journey at a penny a ton per mile, with of course the terminal rate of 2s. 6d.
389. Is that the case with all things coming from the interior—minerals for instance? We have a special class rate under which certain articles are brought to Sydney for the purpose of working up these empty trucks—limestone, general agricultural produce, and other things. Sometimes we are compelled to send empty trucks to Campbelltown, for instance, to bring hay at this special rate. So far as I can see, I should hazard an opinion that this special class rate does not pay working expenses.

390. *Mr. Morrice.*] Is there any difference where there is only one ton or four tons? A number of articles we only carry in four ton lots; we must have a truck load.
391. *Mr. Hoskins.*] What is the maximum number of loaded trucks you have hitherto considered it safe to follow behind an engine down the inclines at Lapstone Hill? I do not think there would be any difficulty in bringing down thirty-six.
392. What has been the maximum hitherto? About eighteen.
393. There will be no attempt to increase the number without the knowledge and consent of the Engineer-in-Chief? Certainly not.
394. *Mr. Lackey.*] What train is the mail brought down in? By the 7.45 in the morning.
395. From both west and south? Yes.
396. Is it received at the various station-houses on the line by the guard? By the guard, who gives a receipt for the bags.
397. Are the bags in charge of the guard? Entirely.
398. Is he the same official who has charge of the money collected on the line? No, the money comes down by the half-past 9 train. It comes part of the way by the mail train, and the other part by the half-past 9 train.
399. Where is it taken from one train to another? I believe the accountant has made some arrangement by which the western money comes down to Penrith, and is there locked up in a safe until it comes down by the half-past 9 train.
400. At what time would it get to Penrith? 5 o'clock. This is an arrangement with which I have nothing to do. I am aware there has been some arrangement of the kind—that the cash clerk is waiting to receive the bags at half-past 9.
401. Is there no stated average, in the department, of the relative cost of a loaded and of an empty train per mile? No. The information obtained in a statistical form hitherto has been very unreliable; but I believe now a system is adopted which will give us every information as soon as a sufficient and efficient staff is provided.
402. Then the staff is not sufficient? I am sure it is not sufficient in scarcely any branch of the service where real skill is required.
403. Is there not a large trade springing up, from some portions of the southern district, in limestone? I believe there will be a very large trade even from Marulan.
404. What is the rate for limestone? A penny a mile; that for lime is about double. It requires, I have been informed, 2 tons of limestone to make 1 ton of lime, and the rate has been so arranged as to cover the same expense.
405. Have you to send special trucks for it? Not yet.
406. It is brought to Sydney in the ordinary way? Yes, in the empty trucks at present.
407. Do you think it would be a great tax upon the railway traffic to bring coal from the same district, or from Bowenfels on the west? There is this difference between the coal and lime traffic,—that if the coal mining succeeded, where we have to carry 10 tons of lime we should have to carry 1,000 tons of coal, and to send trucks empty for carrying it, which would enhance the expense considerably, so much so that the two are not to be compared. To send empty trucks for coal at the same price, to any distance, could not pay.
408. *Mr. Hoskins.*] Have you ever given any consideration to this point,—the number of passenger trains that are run—Do you think the number could not be reduced? No doubt we run one too many both west and south. The mail train we run in the morning is run specially for the mails; we seldom carry half a dozen passengers either way. It comes in to Sydney at 7.45.
409. Is it your opinion that one passenger train per day either way would be quite sufficient? It would be ample for the passenger traffic.
410. Would you suggest that as a recommendation? Unquestionably. I have already done so. For the mails we get only 7s. 6d. per mile per quarter—just the price of one special train per quarter; and the passenger traffic by the mail train is very small indeed. I myself have travelled by it, when on business, when I have had something like two fellow-passengers for the journey. As regards the passenger traffic one train a day would be ample, and if that train were run at a more convenient hour the line would be more used than it is. I believe it is very objectionable to run trains in the night; a great many persons are deterred from the journey in consequence of the night travelling.
411. Do you think a reduction could be made in the number of suburban trains without inconveniencing the public? I am quite sure it could, if any Minister can be found with sufficient courage to do it.
412. Is it not the fact that many of these trains are run at a considerable loss? At a serious loss. There are very few persons travelling by some of them. For instance, in the middle of the day one train is called the “lunch” train—half a dozen people travel by it to get lunch; another is called the “ladies’ market” train, by which there are half a dozen passengers or so. Several trains are positively run for nothing.
413. Does not a train leave Sydney for Parramatta at 11 o'clock at night—Does that pay? No, nor never will. We use it for the goods, and so make it pay. We put on a passenger carriage.
414. Still you might run the goods trucks in another train? It is convenient to run at that hour with goods to Penrith.
415. Are there any other trains that might be discontinued with profit, and without inconvenience? I believe the time-table might be so revised as to save £10,000 a year.
416. Would you recommend that this revision should be made? I certainly should recommend it, so as to give the general public sufficient trains to the suburbs, as well as the reduction of one train off the long journey.
417. *Chairman.*] Do you not send a goods train to Goulburn every day? Every night at 9 o'clock. There is a general impression that it is dangerous to run passengers with goods trains, and I really think it is objectionable. My instructions are never to run passenger carriages with goods trains when it can be avoided.
418. Could not the mails be carried by the goods train? They could; but I believe great objection has been made by the Post Office authorities that the detention would materially interfere with the working of their arrangements throughout the country.
419. Of course if there were only one passenger train to Goulburn in the twenty-four hours, the most convenient would be the day train? Yes.
420. And that would not at all suit the postal arrangements? It will not. The only way in which the postal

R. Moody,
Esq.
5 Nov., 1869.

postal arrangements could then be carried out would be for the Post Office authorities to take a special train to themselves, letting their own guards take charge of the mails, so as to save a good deal of expense in that department; and, as is done in England, the mails might be sorted on the journey.

421. *Mr. Morrice.*] Could not the mails and passengers go with goods trains? I would not advise that a passenger train should be attached to a goods train.

422. It is done now? We are compelled to bring goods up with the mail train, and we have to run that goods train at a particular time to suit the Post Office; otherwise we could work it with greater economy, and under circumstances that would be more convenient.

423. *Mr. Stimpson.*] Do you think one train would be sufficient to bring the wool from the western districts in January, February, and March? I have no doubt that one train properly worked would be sufficient to bring the wool down. The wool comes in, as a rule, pretty regularly on the average; sometimes there is a little flush, but only for two or three days.

424. I have noticed a large quantity lying about for want of accommodation? Yes, that has been so. The arrangements were not then so well matured as at the present time; although I fear there will be a good deal of annoyance this year for want of sufficient engines. We have only a limited number, and if there is any accident we shall have to use another class of engine which would not be sufficiently powerful. We are very short of engine-power at present.

425. There appears to be an immense number of them about? Only half the number they have at Melbourne.

426. Does the engine require to be more powerful for the western line than for the southern line? It requires to be very heavy for the heavy gradients. We have a very large engine on the southern line for the heavy gradients.

427. *Mr. Lackey.*] Is it your duty, as Traffic Manager, to make any suggestions or recommendation in working the line, with regard to economy? I believe that that should be part of my duty, and I shall make it part of my duty, although I am aware it has not been looked upon as a popular portion of the Traffic Manager's duty hitherto.

428. I suppose the whole line is under your surveillance? I hope it will be. Hitherto, I believe, the Traffic Manager has been very much hampered, so far; but my instructions lead me to believe I shall not be so hampered.

429. For instance, suppose you were travelling on the line, and found half a dozen porters on a station where your experience showed you two would be quite sufficient, is it within your province to have the extra men removed? At present I believe that question is under consideration. I believe the Traffic Manager, to perform his duty faithfully to the public, should be in a position to do what you now put to me—that where two men are employed to do one man's work, he should have power to dismiss one of them.

430. Who does that at present? I believe up to the present time that has been more in the hands of the Minister than anybody else—the Commissioner in fact.

431. How does the Minister obtain his knowledge of the working of the line or the number of men required at any particular station? I could not answer that question.

432. *Chairman.*] Has the station-master anything to do with it? The station-master has simply to work the station with the least number of men the Traffic Manager should consider he is fairly entitled to. He knows the tonnage and the general duties, and that a man can do so much work in a day. But unfortunately, hitherto a class of men have been employed on the railways who are utterly unsuited for the working of the lines. I could point out instances where two or three men are employed to do one efficient man's work. I have already taken steps in that direction, and some changes are now going on by which I believe we shall get more efficient hands and less men. There is one thing certainly which is very important in the management of the railways: if the men for one moment supposed the Traffic Manager's power does not extend to dismissal he would be a mere puppet in his position. It is a matter which requires prompt action. If a man commits himself he should be at once dealt with on the spot. It is a very serious matter to let the affair stand over, because in the meantime other accidents may happen.

433. *Mr. Stimpson.*] I should think the Minister would have very little knowledge of the proper qualifications required? Very little indeed. Unless the Traffic Manager be vested with full power, of course with power of appeal to the supreme authority, the men will not be brought into a state of discipline. He should have the power to dismiss, but the men should have a right of appeal to the Minister against his decision.

434. *Mr. Morrice.*] I suppose you mean suspend? The worst thing that can happen to any man, as regards the efficiency of the service, is to suspend him. In the meantime every kind of interest is sought for, influence of all kinds is brought to bear, and no matter what the man's delinquency may have been, the thing generally blows over in a few weeks, and the man is restored to his position. It is a most unfortunate thing for the public, and most unfair to any gentleman placed in a position of trust.

THURSDAY, 11 NOVEMBER, 1869.

Present:—

MR. HOSKINS,
MR. LEE,

MR. MORRICE,
MR. SUTHERLAND.

WILLIAM MACLEAY, ESQ., IN THE CHAIR.

John Lievesley Beeston, Esq., Traffic Manager, Northern Railway, called in and examined:—

J. L. Beeston,
Esq.
11 Nov., 1869.

435. *Chairman.*] Can you give us the total traffic carried up and down upon the northern line for any specific period? Since we opened to Muswellbrook, the total traffic for four months, commencing 1st June and ending 30th September, has been as follows:—43,621 passengers, and 17,442 tons of goods, exclusive of wool and hay. The number of tons of coal carried during the same period was 204,704, and the number of bales of wool 1,790, but the wool season had not then commenced. The number of bales of hay was 3,107; the receipts for parcels were £706; for horses, carriages, and dogs, £525; miscellaneous £146.

436. Can you tell us the quantity of goods arriving at Muswellbrook, and departing from it in the direction of Newcastle, during the same period—that is, to and from Muswellbrook and Morpeth or Newcastle? The inwards tonnage to Muswellbrook for the past three months is 4,642 tons—an average of about 1,500 tons per month; that is, arriving at Muswellbrook. 257 tons have left Muswellbrook. The number of bales of wool for the past three months was 3,200 bales for August, September and October. J. L. Beeston,
Esq.
11 Nov., 1869.
437. How long have you been Traffic Manager? Since June 1859.
438. Can you give us any estimate of the number of bales of wool in the year? The number of bales carried in 1868 was about 18,500.
439. What has been the passenger traffic to and from Muswellbrook since the opening of the line to that place? _____
440. *Mr. Hoskins.*] Before the line was opened to Muswellbrook what was the passenger traffic to Singleton for a similar period? _____
441. *Chairman.*] Can you give us any idea of the direction which the goods carried to Muswellbrook take after they leave the railway station—There are two roads, are there not, from Muswellbrook; one towards Murrurundi and one towards Cassilis, northward and westward? Yes.
442. What proportion of goods goes in each direction? I should think about three-fifths Murrurundi way.
443. The chief population on that line is in the direction of Tamworth and Armidale—these are the largest places? Yes.
444. Do you think the Armidale traffic goes chiefly by Muswellbrook and Murrurundi? Yes.
445. Not by the coast? No. We have a deal of traffic to Armidale, I know.
446. *Mr. Sutherland.*] Can you give us any idea of the increase of your traffic for the last six months, or any other period? The increase of the traffic, taking the four months I have before quoted, since the opening to Muswellbrook, is about 34 per cent.—that is the increase on the receipts. I may mention that the figures I have given you are not audited, and there may be some slight discrepancy.
447. *Mr. Lee.*] Do you anticipate that on the completion of the line to Murrurundi the quantity of goods carried by the railway will be decreased or increased, by the carrying out of the Clarence and New England road—Will that have a prejudicial or other effect when the present line of railway reaches Murrurundi? I should say it would have a prejudicial effect.
448. What is your general experience, as Traffic Manager, of the working of the northern railway—take the present fares and rates? The present fares and rates are giving a steady increase of trade.
449. Do they give general satisfaction or dissatisfaction? Since the present rates have been established I have not heard a single complaint, therefore I assume the people are satisfied.
450. Is your traffic generally increasing? Yes.
451. You say 4,642 tons of goods arrived at Muswellbrook in three months—Can you give us the quantity for the corresponding period last year to Singleton? _____
452. *Mr. Hoskins.*] Can you tell us whether the through traffic from Newcastle or Maitland, by the Great Northern Railway to Muswellbrook—the goods intended for New England—has increased since the railway was extended to Muswellbrook? It has increased, I have every reason to believe.
453. Taking into consideration that the returns you have given us, of the goods received at Muswellbrook, are returns for the dullest season of the year—Can you say whether the quantity of goods dispatched from Muswellbrook for New England has increased in comparison over the same period last year, when the goods were dispatched from Singleton? I believe there is a general increase in the goods traffic since we opened to Muswellbrook, but I cannot say whether it is to New England, or to what part, because I am not stationed at Muswellbrook.
454. This Committee is appointed to consider whether it is desirable to extend railways beyond the termini at present sanctioned, and we would like to know whether the through traffic has increased since the railway has been extended? I am satisfied it has increased.
455. Can you say of your own knowledge whether there is much loading taken down by the road past Muswellbrook? I should say 15 per cent. of the through traffic still goes by the road, but we catch part of that again at Singleton. Some of the carriers live about Singleton, others about Maitland, and we catch the traffic brought down by some of them at Singleton.
456. *Mr. Lee.*] Does your statement apply generally, or only to the wool traffic? Generally.

RAILWAY EXTENSION.

APPENDIX.

A.

(To Evidence given by *W. C. Bennett, Esq., Commissioner for Roads, 4 November, 1869.*)

The Commissioner and Engineer for Roads to The Chairman of Select Committee on Railways.

Department of Public Works,
Roads Branch,
Sydney, 5 November, 1869.

Sir,

In reference to your question on yesterday, as to whether I considered the present system of internal communication in the Colony susceptible of improvement, I should wish to qualify my answer by stating that it was intended to convey the opinion that no general change in the system by the introduction of any mode of transit intermediate between railways and roads was desirable, and not that the road system in present use did not admit of improvement in details.

The chief improvements I would suggest are those pointed out in my general Report of 31st March, 1865 :—

1st. The restriction of the weight to be carried on specified widths of tires, as in England, and—

2nd. The transfer of the charge of the roads and bridges to local bodies, as in Victoria, as soon as possible, under the conditions set forth in Report referred to.

The additional experience since gained in the management of the department has still further strengthened my views on both these points.

With reference to my reply as to the advisability of *at once* metalling long lengths of road, as from Orange to Dubbo, throughout,—while I do not think such a course advisable, for the reasons stated by me, I do not at the same time wish to convey that a larger sum than at present allocated could not be spent with advantage. The amount to be expended on the roads has always been determined by the state of the Treasury, and the duty of the department has hitherto been to expend that amount in the most advantageous manner possible. If a larger sum were available, of course a greater length of road could be metalled. The greatest amount to be profitably expended each year would entirely depend on the character of the season. Weather like the present is the best time for making roads—extremes of wet or dry weather are equally bad.

May I respectfully ask the favour of your attaching this amendment to my evidence in any way you think proper.

I have, &c.,

WILLIAM C. BENNETT,
Commissioner and Engineer for Roads.

1869.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(CORRESPONDENCE RESPECTING RAILWAY PLANT AND STATISTICS.)

Ordered by the Legislative Assembly to be Printed, 6 October, 1869.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 12 March, 1869, That there be laid upon the Table of this House,—

- “ (1.) Copies of all Letters, Reports, and any other Papers, referring to the
 “ imperfect construction and inferior workmanship of eighteen Railway
 “ Carriages, lately imported for the Great Western Line; together with
 “ Invoices for the same.
- “ (2.) Copies of all Reports on the condition and proposed relaying of the
 “ permanent line of Railway between Sydney and the Parramatta Junction.
- “ (3.) Number and condition of Engines employed in working the Great
 “ Southern, Western, Windsor and Richmond lines of Railway, number of
 “ Engines in steam daily, average number of miles run daily by each
 “ Engine, number of Carriages of each description, and all other rolling
 “ stock, classified, with their state and condition clearly set out, and the
 “ number of years each description has been in use.
- “ (4.) Number of Break-vans, Trucks, Carriages, and any other rolling
 “ stock constructed, or ordered to be constructed in the Colony, for the
 “ Railway Department, during the tenure of office of the late Government.
- “ (5.) Copies of all Specifications and Schedules prepared by the Engineer
 “ for Existing Lines, by order of the late Government, for additional rolling
 “ stock; with Advertisements for Tenders.
- “ (6.) Number of Tenders received for such rolling stock by present
 “ Government, and names of parties who tendered.”

(*Mr. Byrnes.*)

SCHEDULE.

I.

(Correspondence respecting defective railway carriages.)

NO.	PAGE.
1. Storekeeper, reporting damage by sea-water. 26 February, 1868	3
2. Do. enclosing report on survey. 3 March, 1868	4
3. Surveyor's reports	4
4. Commissioner to Captain Mayne, informing him of damage. 27 March, 1868	6
5. Do. to do. inferior quality of. 27 March, 1868	6
6. Engineer for Existing Lines to Commissioner, respecting state of carriages. 4 April, 1868	6
7. Messrs. Robertson and Russell, reporting on carriages. 21 April, 1868	7
8. Captain Mayne to Commissioner, in reply to letter of 27 March; damage by sea-water. 22 May, 1868	7
9. Do. to do. in reply to letter of 27 March; inferior quality. 21 May, 1868	7
10. Commissioner to Captain Mayne, enclosing report of Messrs. Robertson and Russell. 22 April, 1868	8
11. Commissioner to Colonial Secretary, requesting that Government will write to the Colonial Agent on subject. 30 May	8
12. Principal Under Secretary to Captain Mayne. 1 June, 1868	8
13. Commissioner to do. 15 July, 1868	8
14. Do. to do. respecting amount retained for defective packing. 15 July, 1868	9
15. Captain Mayne to Commissioner, enclosing reports from Mr. Fowler, carriage manufacturer, &c. 17 July	9
16. Do. to Under Secretary of Government, in reply to letter of 1st June, 1868. 1 August, 1868	13
17. Commissioner to Captain Mayne; unsatisfactory nature of his reply. 7 September, 1868	13
18. Under Secretary of Public Works to Principal Under Secretary, enclosing estimate of repairing carriages. 9 October, 1868	13
19. Colonial Secretary to Captain Mayne, enclosing estimate of cost of repairs, &c. 9 October, 1868	14
20. Captain Mayne to Commissioner, reporting that damage by sea-water must be paid for by manufacturers. 11 September, 1868	14
21. Commissioner to Captain Mayne, in reply to his letter of 11th September, and forwarding certificate. 6 November, 1868	15
22. Engineer-in-Chief to Commissioner, suggesting inquiry into state of rolling stock. Mr. Thomas' report thereon. 5 November, 1868	15
23. Engineer for Existing Lines to Commissioner, reporting damage to carriage. 19 November, 1868	16
24. Do. to do. do. 27 November, 1868	16
25. Do. to do. unsafe condition of radial carriages; Mr. Whitton's report thereon. 29 December, 1868, and 16 January, 1869	16
26. Engineer for Existing Lines to Commissioner; defective state of Krupp's best steel tires, just arrived. 24 August, 1868	17
27. Commissioner to Captain Mayne, on subject of tires. 28 August, 1868	17
28. Captain Mayne to Commissioner, in reply. 5 November, 1868	17
29. Colonial Secretary to Captain Mayne, on subject of tires. 1 September, 1868	20
30. Captain Mayne, in reply. 5 November, 1868	20
31. Colonial Secretary to Captain Mayne, acknowledging receipt. 31 December, 1868	21
32. Captain Mayne to Colonial Secretary; steps taken as regards defective carriages. 3 December, 1868	21
33. Do. to do. on same subject (with enclosures). 31 December, 1868	22
34. Do. to do. do. do. 29 January, 1869	22
35. Engineer for Existing Lines to Commissioner; radial carriages. 29 April, 1869	23
36. Captain Mayne to Colonial Secretary, promising attention to complaints about carriages. 25 March, 1869	24
37. Do. to do. do. 16 April, 1869	25
38. Do. to do. do. 14 May, 1869	25
39. Do. to do. enclosing letter from Carriage Company, stating that on investigation complaints will prove unfounded. 16 July, 1869	25
40. Abstract of invoices	26

II.

(Correspondence respecting relaying line to Parramatta.)

1. Superintendent of Way and Works; necessity for more rails to relay line; with Mr. Whitton's report. 31 October, 1865	27
2. Superintendent of Way and Works, reporting on material required. 22 May, 1866	28
3. Do. reporting as to progress of relaying. 11 June, 1866	28
4. Engineer for Existing Lines; deficiency of rails for relaying. 19 June, 1867	29
5. Do. forwarding indent of rails required. 21 December, 1868	29
6. Do. reporting delay in ordering rails. 12 February, 1869	30
7. Do. do. that ballast required for relaying. 25 January, 1869	30
8. Engineer-in-Chief to Commissioner, reporting on state of permanent way, &c., &c., between Sydney and Parramatta. 15 February, 1869	30
9. Commissioner to Engineer-in-Chief, with instruction to supply from stocks on hand rails for relaying. 18 February, 1869	32
10. Engineer for Existing Lines, requesting that papers on which works have been ordered to be proceeded with may be sent him. 24 February, 1869	32
11. Engineer for Existing Lines, suggesting that Mr. Whitton has made complaints against him, and requesting to be informed, 4 March, 1869, with Minister's Minute of 9 March, 1869	32
12. Commissioner to Engineer for Existing Lines, as to portion of line he proposes to relay, &c.; with estimate. 9 March, 1869	33
13. Engineer-in-Chief to Commissioner, enclosing report on state of line between Burwood and 12th mile. 29 June, 1869	33
14. Minute for Cabinet, advising the anticipation of £25,000 for relaying line. 3 August, 1869	34
15. Minute of Executive Council, approving of anticipation. 30 August, 1869	34

III.

Number and conditions of engines employed; number of engines in steam daily; miles run daily; number of carriages and rolling stock, with their state and condition; number of years each description has been in use 34

IV.

Number of break-vans, trucks, carriages, &c., &c., constructed, or ordered to be constructed in the Colony, during tenure of office of late Government 34

V.

Copies of all specifications and schedules prepared by Engineer for Existing Lines, by order of the late Government, for additional rolling stock, with advertisement for tenders 37

VI.

Number of tenders received for such rolling stock by present Government, and names of parties who tendered .. 56

RAILWAYS.

No. 1.

THE STOREKEEPER to THE COMMISSIONER.

Government Railways, Store Branch,
26 February, 1868.

I have the honor to report for the information of the Commissioner, that several portions of the 2nd class carriages now being discharged from the "Canaan" and "Landsborough" are more or less damaged by sea-water and breakage to such an extent that I consider it would be advisable to hold a survey with a view to ascertain the amount of damage sustained.

I enclose bills of lading—Messrs. Willis, Merry, & Co., Lloyd's Agents.

EDWARD FIELDING.

Mr. Moody to see Messrs. Willis, Merry, & Co. J.B.—28/2/68.

Arranged for survey. R.M.—28/3/68.

[Enclosures.]

COPY OF BILL OF LADING.

SHIPPED in good order and well-conditioned, by William C. Mayne, Esq., the Agent of the Colony of New South Wales, in and upon the good ship or vessel called the "Landsborough," whereof Maxwell is master for this present voyage, and now lying in the port of London, and bound for Sydney, New South Wales, 81 pieces and packages, six second-class carriages complete, as per indorsement, being marked and numbered as per indorsement, and to be delivered in the like good order and well-conditioned at the aforesaid port of Sydney, at the Government Wharf (the act of God, the Queen's enemies, fire, all and every other dangers and accidents of the seas, rivers, and navigation, of whatever nature or kind soever, excepted) unto the Commissioner for Railways, or to his assigns, freight for the said goods to be paid in London, as per margin, with 5 per cent. primage, and average accustomed. In witness whereof the master of the said ship or vessel hath affirmed to three bills of lading all of this tenor and date, one of which bills being accomplished the others to stand void.

WM. MAXWELL.

Dated in London, this 16th day of October, 1867.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,
Railway Branch,

Sydney, 27 March, 1868.

Carriages per "Landsborough."

SIR,

I regret to state that much damage has arisen to the packages, by which the carriages have been injured, and damage has also arisen to some portion by sea-water, the entire estimated cost of repairs amounting to nearly £100.

I have, &c.,

JAMES BYRNES,

Commissioner for Railways.

No. 5.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,
Railway Branch,

Sydney, 27 March, 1868.

Carriages per "Globe," "Landsborough," "Canaan," and "Earl Dalhousie."

SIR,

I have the honor to inform you circumstances have been brought under my notice in reference to the alleged inferior quality of above, and that I have in consequence considered it my duty to direct a most rigid inspection of the whole of the carriages to be made, and a full report thereof to be furnished to me, with as little delay as possible, a copy of which I shall cause to be forwarded to you by next mail for your information and guidance.

I may perhaps remark my fears that these shipments will not turn out satisfactory.

I have, &c.,

JAMES BYRNES,

Commissioner for Railways.

No. 6.

REPORT ON NEW CARRIAGES.

I FORWARD a report from Mr. Bingham, the foreman carriage-builder, regarding the recently imported carriages for Western Extensions.

It would perhaps be advisable for the Commissioner, before taking any further action in this matter, to call upon two competent persons (say Mr. Russell and Mr. Robertson the coach-builder), unconnected with the Service, to hold a survey upon these carriages.

JAS. HY. THOMAS.

Mr. Moody.—14/9/68.

[Enclosure.]

Engineer for Existing Lines.

Sir,

I respectfully report to you as requested, as to the quality of materials and workmanship put into the carriages for the Great Western Extensions. I believe the materials of the wood-work, likewise the framing, to be of good quality, but the style of framing the sides is not suitable for a warm climate, and is not according to specification, as it states that no nails are to be used in the construction, whereas all the panels on the sides and ends are nailed in and mouldings nailed over the joints, and badly nailed, for several of the panels are split by nailing when constructed, and as soon as exposed to the weather they will open and go further across the panel. If they had been grooved into the pillars, nails would not have been required, and would have allowed the panels to give to the weather.

There are some iron plates inside to strengthen the body and form battens to the panels. The panels run the same way of the grain as the plate, which should have been the reverse way. Screwing the plate to the panel causes it to buckle and split from each screw-hole, as they are bored through to the outside in a line with the grain of the wood. The roofs of first-class carriages are very slightly constructed, the outer roof especially not having sufficient roof-sticks to properly support the roof.

The painting, in my opinion, has not been done to specification, as the grain of the wood is so plainly to be seen, which could not have been the case if the quantity as specified had been put on to the wood. As to the workmanship, it is not first-class.

The inside trimmings and workmanship are of the best class of that description of work.

G. BINGHAM.

No. 7.

REPORT ON RAILWAY CARRIAGES.

THIS is to certify that we, the undersigned, at the request of the Honorable the Minister for Works, held a survey this day, at the Railway Station, Redfern, on a number of railway carriages imported from England, said to be manufactured by the Midland Waggon Company, Birmingham, and the Oldbury Railway Carriage Company, Birmingham, and find as follows, viz. :—

- No. 1. First-class saloon carriage put together and put on the line on the 1st March. We have carefully examined this carriage. The workmanship on the wood-work is very inferior; the timber put in the panels must have been worked green, as many of them have shrunk to the extent of $\frac{3}{8}$ ths to $\frac{1}{2}$ an inch, and many of them split, having been nailed to keep them in their place; the mouldings or beading are planted on to cover the joints, the panels not being grooved into the framework as is usual; the painting is also very inferior workmanship, and we are of opinion that the painting has not been done according to the specification. We also find the upper roof very slightly constructed, the roof-sticks being too far apart and the framework too narrow, so that the scroll ends rest on the roof-boards instead of on the frame. From the present appearance of this carriage, it looks as if it had been in use for the last two years.
- No. 2. First-class saloon carriage, put on the line 1st February. This carriage we find in a similar condition to No. 1.
- No. 3. First-class saloon carriage, put on the line 1st April. This carriage is in a very bad condition, ten panels having split and shrunk out of their places, showing the joint outside the bead.
- No. 4. First-class saloon carriage, put on the line on the 10th April.—This carriage is also in very bad order, many of the panels being split and shrunk from the beads. We find that all the blinds of these carriages have been altered by putting a batten on the centre of the louvres to keep them in place, being too light.

We have also examined the iron under-frames of Nos. 5 and 6 first-class saloon carriage, not yet put together, and find some of the riveting badly done, many of the rivets not drawn up, particularly where the cross beams are riveted to the frames, also the plates for radial bars badly fitted and riveted.

We also find that the springs in all first-class carriages are set too low, the buckles pressing up against the brackets, cutting into both. The buffers do not stand the height specified, being 3 inches below the other carriages on the line.

We have also examined the second-class carriages, and find the windows are fixtures, which we consider objectionable in this climate. One of the buffer rods of No. 10 second-class carriage we find broken, being bad workmanship, the shank being welded on the plate, and not forged out of the solid.

JOHN ROBERTSON.

JOHN RUSSELL.

Sydney, April 21st, 1868.

Received the sum of three pounds three shillings sterling each for this our survey and report in duplicate.

CAPTAIN MAYNE to THE COMMISSIONER.

(No. 169.)

New South Wales Agency,
118, Cannon-street, London, E.C.,
22 May, 1868.

SIR,

I have the honor to acknowledge receipt (on the 18th instant) of your letter No. 68/102, dated March 27, 1868.

With reference to carriages shipped by the "Landsborough," I beg to call your attention to my letter of No. 143, dated November 26th, 1867, in which I advise you that I have retained £250 from the Oldbury Carriage Company, to meet possible damage for defective packing of carriages by that vessel, and I shall wait the full information and certificates as to amount and cause of damage, which I shall hope to receive by an early mail, before I part with any portion of that sum.

I have, &c.,
W. C. MAYNE.

No. 9.

CAPTAIN MAYNE to THE COMMISSIONER.

(No. 166.)

New South Wales Agency,
118, Cannon-street, London,
21 May, 1868.

SIR,

I have the honor to acknowledge the receipt of your letter, No. 68/104, of the 27th of March, respecting the railway carriages per "Globe," "Landsborough," "Canaan," and "Earl Dalhousie."

2. It is with much concern that I have received the intimation that doubt is felt as to the work in these carriages, and that you fear that they will not prove satisfactory. I shall look with anxiety for the result of the inspection which you inform me has been ordered.

3. I have before me the reports made by Mr. Fowler's inspector on the spot from time to time during the progress of the work and up to its completion. These evidence constant and generally stringent inspection over, and watchful attention to the details of the specifications, with certainly no leaning towards the contractors, and justify hope that the result of the examination will as regards work and materials show that their contracts were fairly carried out, except in the putting together of the undersides of the second class carriages—a matter now just brought to my knowledge by the inspector's report, and respecting which I am in correspondence with Mr. Fowler.

4. As regards the particular kind of carriage, I learn that the form has worked so well on the Metropolitan Lines, that the Company has recently had 30 new carriages of the same kind.

5. From the accounts of the misfortune which befell the "Earl Dalhousie" I should quite look for serious damage to the carriages shipped in her; such however would be covered by the insurance.

I have, &c.,
W. C. MAYNE.

No. 10.

No. 10.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,
Railway Branch,
Sydney, 22 April, 1868.

SIR,

See No. 7 in
Schedule.

With reference to my letter, No. 68/104, respecting bad condition of carriages, &c.,—I have now the honor to enclose herewith a joint report of Messrs. John Robertson and John Russell, which you will be so good as to bring under the notice of Mr. Fowler, and request his explanation thereon. You will also take such steps as may be necessary to protect the interest of this Government, in having the matter brought under the notice of the manufacturer, as it is the intention of the Government to have the carriages put into proper condition, and charge the account to whom it may concern.

I may remark that the gentlemen reporting on this matter are well known here; Mr. Robertson being the leading coach-builder, and Mr. John Russell a member of the firm of P. N. Russell & Co., the well-known iron-founders and engineers of this city.

I have, &c.,
JAMES BYRNES.

No. 11.

THE COMMISSIONER to THE COLONIAL SECRETARY.

Department of Public Works,
Sydney, 30 May, 1869.

SIR,

See No. 7 in
Schedule.

I have the honor to enclose herein a copy of a joint report which has been obtained from Mr. John Russell, of the firm of Messrs. P. N. Russell & Co., engineers, and Mr. Robertson, the well-known coach-builder of this city, relative to the inferior construction of a number of railway carriages recently imported from England, through the Government Commercial Agent, Captain Mayne.

2. By the mail which left Sydney on the 22nd ultimo, I addressed a letter to Captain Mayne on this subject, in my capacity of Commissioner for Railways; but on more mature consideration, I am of opinion that the matter is of so much importance, involving as it does such serious interests, as to render it imperative that it should be brought under the attention of the Government, with a view to steps being taken to prevent a repetition of such reprehensible carelessness and neglect as have been evinced in carrying out the instructions of this department in the present case. I have the honor further to state that since the receipt of the report in question, some of the carriages referred to have been tried on the line, and the result has confirmed the averments of Messrs. Russell and Robertson.

From personal observation, I am in a position to state that portions of these carriages are literally falling to pieces.

I have, &c.,
JAMES BYRNES.

Letter sent to Captain Mayne with enclosures, 1/6/68.
Captain Mayne, 1 June, 1868.
(See Messrs. Russell and Robertson's report.)

No. 12.

THE PRINCIPAL UNDER SECRETARY to CAPTAIN MAYNE.

Colonial Secretary's Office,
1 June, 1868.

SIR,

I have the honor to transmit duplicate copy of Mr. Byrnes' letter of April 22 to yourself, enclosing copy of report on railway carriages.

I have desired the Colonial Secretary to impress on you the very serious injury sustained by the Railway Branch of the Public Service by the defective manufacture of these carriages, independently of the money loss which must result.

2. In ordering from English manufacturers, the Government expected to be supplied with carriages in all respects of the best class, and relied upon your vigilance in seeing that every possible guarantee for this end was secured. It is hoped that you have made such conditions in the contract with the manufacturers as will enable the Government to recover the cost of repairing and completing these carriages so as to render them fit for use.

3. Particulars of the necessary reconstructing will be transmitted to you by an early mail.

I have, &c.,
HENRY HALLORAN.

No. 13.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,
Railway Branch,
Sydney, 15 July, 1868.

SIR,

I have the honor to acknowledge the receipt of your letter, No. 166; and, in reply to paragraph 3, have to refer you to my previous correspondence as well as to the report of the gentlemen who have inspected these carriages, which, as I am informed, has been forwarded through this Government to you,
by

by last mail; from which you will perceive that, however constant and generally stringent the inspection is reported to have been, it has undoubtedly failed in the obvious object in view by the appointment of an inspecting engineer.

As to paragraph 5, claim has been made on the ship, "Earl Dalhousie," in the usual manner, the result of which shall be communicated to you as soon as the necessary information has been received.

I have, &c.,
JAMES BYRNES.

No. 14.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,
Railway Branch,
Sydney, 15 July, 1868.

SIR,

I have the honor to acknowledge the receipt of your letters, Nos. 167, 168, 169, and 170.

No. 169—*carriages shipped per "Landsborough."*

Nos. 167, 168,
and 170, have no
reference to this
subject.

With reference to the amount of £250 retained by you to meet possible damage by defective packing, I have the honor to inform you that I am unable to perceive in what way any portion of this money can be made available in the present case, as the entire damage to the carriages appears, by the marine surveyor's report, to have been mainly owing to sea-water; and as the cost of repairs is under 3 per cent. on insurance, I fear there is no remedy, and that the Government will have to lose the entire amount estimated for repairs, viz., £89.

I have, &c.,
JAMES BYRNES.

No. 15.

CAPTAIN MAYNE to THE COMMISSIONER.

(No. 180.)

New South Wales Agency,
118, Cannon-street, London, E.C.,
17 July, 1868.

SIR,

I have the honor to enclose for your information Mr. Fowler's report, with reference to the first and second class railway carriages, made respectively by the Midland Wagon Company and the Oldbury Carriage Company, accompanied by the replies to his reference to the manufacturers, and to his inspector who resided on the spot while the carriages were under construction.

2. From repeated conversations which I had with Mr. Fowler's principal assistant, Mr. Baldry, I know that he took a particular interest in the construction of those carriages, and felt an absolute confidence that they would prove not satisfactory merely, but that they would be regarded with approval and admiration.

3. The shrinking of the panels reported on in the Colony appears to me conclusive of the fact that the wood used was not such seasoned wood as was required by the specifications, assuming that none of the panels in question were on board the "Earl Dalhousie," which caught fire on her voyage out.

The contractors, I do not doubt, did their best to obtain properly seasoned wood, and thought they had done so, but that would not relieve them from responsibility for defective materials.

It must be admitted that, unless wood has been actually in the possession of contractors for the full time required to render it perfectly seasoned, it is almost impossible for them to have positive certainty that it is in such seasoned state; and the contractors in this instance may have been, and were probably misled. Of course neither Mr. Fowler nor his assistants could, by examination of the wood, ascertain its exact state as regarded length of seasoning.

I have, &c.,
W. C. MAYNE,
Agent for the Colony of New South Wales.

[Enclosures.]

John Fowler, Esq., to Captain Mayne.

No. 2, Queen's Square Place,
Westminster, 17 July, 1868.

New South Wales Railways.

Dear Sir,

I beg to acknowledge the receipt of your letter of the 19th June, enclosing copies of reports received from the Colony as to the condition of the 1st class carriages made by the Midland Wagon Company, and 2nd class carriages made by the Oldbury Carriage Company.

I have no doubt that the report is a fair and impartial one—indeed the names of the gentlemen whose signatures are attached are a sufficient guarantee that it is so—but I do not think the defects mentioned are of a serious or important character.

With regard to the shrinkage of the panels, I am at a loss to account for it. I know that the manufacturers took every possible pains to procure the wood perfectly dry.

The mode objected to, of fixing the panels by pins and by beadings over the joints, is the usual practice when it is required, as in this case, to keep the framing as light as possible.

The framing of the Venetian blinds was necessarily light, and two patterns were made for my decision, the first of mahogany, and the second of teak, and I selected the latter in preference.

The upper roof, which is complained of as being weak, was made in strict accordance with the drawings, and I think will be found in practice to answer the purpose very well.

The riveting of the under-frames where the cross beams intersect is certainly not particularly neat work, but this is accounted for by reason of the difficulty of its position; but the work is strong, and the neatness is immaterial, as it cannot be seen.

The setting of the springs, which are referred to as being too low, I presume are now set right; they were at the proper level in England.

In respect of the other complaints, I cannot agree with them, as the specification was in all instances strictly adhered to, and in some cases, such as painting, &c., excess of work was done,

As regards the buffer rods of the second class carriages, I am assured the disc and the rod were forged out of the solid. It is perhaps hardly fair to judge of the carriages as they stand immediately after re-erection, as it is always understood that they must be cleaned and varnished after a long voyage before being brought into use.

Personally I paid more than usual attention to these carriages, and on the several occasions on which I visited the works I experienced the greatest anxiety on the part of the makers to do everything that was suggested or required to make them satisfactory.

I enclose herewith the replies from the manufacturers, and from my inspector who resided on the spot during the time the carriages were under construction.

I am, &c.,
JOHN FOWLER.

Mr. E. M. Wood to John Fowler, Esq.
New South Wales Railway carriages.

30 June, 1868.

Sir,

In respect of a report from Sydney, dated April 21st, 1868, complaining of the workmanship and materials of the railway carriages forwarded to the Colony during the latter part of last year, under indent R. 28,—I have gone very carefully through my notes and memoranda, and beg to lay before you the following information:—

I have read the complaints and made a re-examination of the contract drawings and specification; and, from being on the spot during the time the carriages were under construction, and having had considerable experience in similar work, I am able to state that I have known no instance in which plans and specification have been more closely adhered to.

Both firms showed great desire to do justice to the work, and in the few cases of workmanship that I objected to it was replaced by new materials.

The following are the particulars of the complaints:—

Shrinkage of panels of first class carriages.

No doubt the shrinkage of the panels to the extent reported, namely $\frac{3}{8}$ ths to $\frac{1}{2}$ an inch, is a serious defect, and one which if it were the fault of the makers they should be requested to make good; but I am bound to say that great care was taken to secure the best material, which not only had every appearance of being properly seasoned but was also fairly tested—the carriages having had the panels fixed during the cold weather of the spring, and remaining in the shops till completion, throughout the hottest part of the summer, without showing any signs of shrinkage. To all appearance they seemed made of the proper and fit material to send abroad.

Nails.

It is the usual practice to cover a joint with beadings, in fact I do not think it would be possible to make the joint water-tight without some cover, and pins (mentioned in the report as nails) are required to keep the panels to their places. An alternative plan of grooving the panels as suggested could have been adopted, but would have necessitated a framing still heavier than the present, which has already been thickened to the utmost limit, to allow the double sashes and balance weights to be used.

Painting of first class carriages.

Referring to the remark "We are of opinion that the painting has not been done according to the specification,"—the bodies of carriages received two coats of filling, two of lead colour, and two of varnish, *beyond* the specified number.

Outer roof.

Though the outer roof is reported too slight, it is a part of the carriage which is so easily strengthened, and which if it had shown signs of weakness would have been stiffened before it was sent out, that I can hardly think it will cause an inconvenience, and I beg to remark that there was no deviation from the drawing in the mode of fixing the outer roof to the scrolls.

Under-frames.

"We have also examined the iron under-frames of Nos. 5 and 6 first-class saloon carriages not yet put together, and find some of the riveting badly done, many of the rivets not drawn up, particularly where the cross beams are riveted to the frames." Referring to the above, I have no doubt the riveting complained of is at the corners where the cross beams and diagonals meet, and where from the confined space it is very difficult to give the rivets the neat appearance they have in the other parts of the frame, and to a person unacquainted with this reason it may have appeared bad workmanship, but which practically is no defect. As regards the plates for the radial bars being badly fitted and riveted, I am not aware of any deficiency in the construction, nor do I think that there can possibly be any serious defect in this part, as the fitting of these plates is one of the simplest pieces of work about the frame.

Springs.

"We also find that the springs in all the first class carriages are set too low, the buckles pressing up against the brackets cutting into both; the buffers do not stand the height specified, being 3 inches below the other carriages on the line."

In answer to the above complaints, I beg to state the greatest care was taken to make the carriages to the specified heights, and which they stood at in a satisfactory manner when in England. If the carriages were carefully put together, and the instructions for arranging the springs made use of, I cannot see any reason why they should not stand at the same height when put together in the Colony.

Blinds.

The Venetians were not considered to require the bar mentioned in the report, and which was not fitted to the blinds in England. A pattern blind was made and sent up to London, and it was considered to be quite strong enough, and was therefore adopted.

Second class carriages.

The mode of arrangement of windows in the second class was carried out in accordance with the specification; but I beg to mention that if the fixed windows are found objectionable, the window-frames may easily be entirely removed and replaced again when required, being held to their places by fillets of wood fixed by brass screws.

Respecting the breakage of a buffer rod, it is one of the failures to which any work is liable; but as this carriage was run up to London, it received a fair trial before being forwarded to its destination, without showing any flaws in the buffer rods; but I beg to remark that none of the shanks were welded on the plates, as these buffer faces and rods were all forged in the *solid* for some length from the disc.

I remain, &c.,
E. M. WOOD.

Mr. A. Driver to John Fowler, Esq.

Midland Wagon Company,
Birmingham, 6 July, 1868.

Dear Sir,

We beg leave to acknowledge the receipt of your communication of the 20th ult., enclosing copy of report which you have received from the Government of New South Wales, complaining of some defects in the six first class carriages we lately built for that Government, under your specification.

We have carefully examined into the questions raised, and greatly regret that there should be any cause of complaint, as we were most anxious to carry out your specification in a workmanlike and efficient manner in every respect, both as regards quality of materials used in their construction and accuracy of workmanship generally.

We observe that shrinkage of some of the panels is complained of. Our reply to this is that we were careful to use nothing but thoroughly seasoned and especially selected panel board for this purpose; and we feel confident that had we to build further carriages, we could not obtain better seasoned or more suitable mahogany panel board than we have used.

As regards some of the panels having split, this is also not an unusual occurrence, and is what all carriages are liable to; and in all cases where mouldings are used to cover the joints, it is the practice of the trade to pin the panel board in its place.

The

The painting is also complained of as being not equal to specification. Our reply to this is that several extra coats of both paint and varnish were used by us, as we were most desirous to finish the carriages in this respect in every way as perfect as possible, regardless of expense.

As regards the present appearance of the carriages, we are not surprised at their not looking so fresh and new after a long sea voyage as they did before they left our works, but we suggest that if they are properly washed off and one coat of varnish applied, they will be perfectly satisfactory in this respect.

As regards the construction of the outer roof and its mode of fixing to the body, we trust that in course of wear the complaint of its being too light and improperly fixed will prove to be groundless.

The louvre blinds complained of as being too light are made as heavy as the framework would admit of, and are in this respect fully as strong as we have been used to make them in numerous similar cases. The batten referred to as having been placed on the centre of the louvres must have been added in the Colony, as we know nothing of this arrangement, and were of opinion that it was entirely unnecessary.

We regret the complaint of a portion of the riveting in the under-frames not being properly executed; this only refers to a small portion of the work which was very difficult to get at, and in which in any future contract we will endeavour to adopt a different mode of riveting, but we do not think it detracts from the strength.

The bearing springs, which are complained of as being too light, were in each case properly placed under their respective carriage and the body loaded with upwards of forty men to try the springs—being a far greater weight than they will ever have to carry in work. The result was that they performed this duty entirely to the satisfaction of your inspector as well as of ourselves, admitting as they did of the buffers being of the specified height when empty, and carrying the loaded carriage in a most efficient manner; we cannot therefore understand that they are now 3 inches below the specified height when empty, and think there must be some error in this part of the report. We suggest whether it is possible that in putting the carriages together in New South Wales the wood cushions between top of axle-box and bottom of spring have been fixed in their places or omitted altogether.

In conclusion, we beg to remark that after an experience of more than twenty years in the manufacture of rolling stock of all descriptions both for home railways and also abroad, we are convinced that it would be impossible to turn out carriages having less cause of complaint than these; that there may be some slight defects we readily admit—such things always occur with the most rigid care and supervision possible, and small defects are of course more prejudicial to the manufacturer after a long sea voyage; but we would beg to submit that the greatest care was taken during their construction as we should always feel it our duty to take in carrying out any order entrusted to us, and we rely on the wear of the carriages as the best test of the excellence of their manufacture.

Yours faithfully,
ALFRED DRIVER, Manager.

Captain Mayne to the Commissioner.

Agency of the Government of New South Wales,

11 September, 1868.

(No. 188.)

Sir,

I have the honor to acknowledge receipt (on the 7th instant) of your letter 68/485, dated July 15th, 1868.

Damage to carriages per "Landsborough."

1. I think it would be very desirable to forward me full certificates of the damage to these carriages, in order that I may come to a proper decision as to who is responsible for the same.

2. If the damage is caused by sea-water a claim would be against the Insurance Company, provided they cannot successfully resist such claim in consequence of the clause being on the bill of lading "No. 55—1 case, water running out when taken on board," in reference to any damage to the case therein specified.

3. In such event the loss would in my opinion clearly fall on the manufacturers, and it is my intention to retain the sum of £89 from them until this question is decided.

4. The policy states that the goods are insured to pay average on each package as if separately insured, which covers any damage over 3 per cent. upon the value of *each separate package*, not as you seem to infer of 3 per cent. upon the whole value of the shipment.

5. In making a claim on the Insurance Company it will therefore be necessary to have certificates of the sound value of each package upon which any claim for damage is made, and these I have to request you will furnish me with, together with the certificates of damage above referred to.

I have, &c.,

W. C. MAYNE,
Agent for the Colony of New South Wales.

3 December, 1868.

(No. 89.)

Sir,

I do myself the honor to acknowledge the receipt of your letter (No. 158) of the 9th of October last, enclosing a copy of the communication from the Under Secretary for Public Works, with reference to the inferior construction of certain 8 Oct. 1868. railway carriages, and instructing me, on behalf of the Government of New South Wales, to call upon the manufacturers of 68/2887. the carriages in question to pay the actual cost of putting them in repair, estimated by the Railway authorities at £280 7s.

2. In pursuance of those instructions, I have lost no time in communicating with the consulting engineer, in order that the manufacturers may be at once called on to make good the expense caused to the Colony by the defective material and work in the carriages supplied by them respectively.

3. The short period intervening between the receipt of your letter and the despatch of the mail precludes my being in possession of the result of this call upon the manufacturers; but by the next Suez mail I shall, I have no doubt, be able to report it to you.

I have, &c.,

W. C. MAYNE,
Agent for the Colony of New South Wales.

(No. 93.)

Sir,

Having reference to my letter (No. 89) of the 3rd instant, I have now the honor to enclose for your information copies of the communications addressed to Mr. Fowler by the Railway Carriage Company, and by the Midland Wagon Company, in reply to his call upon them to repay to the Government of New South Wales the charges incurred through defective work in the railway carriages respectively supplied by them under their contracts with the Colony.

2. By next mail I hope to transmit the further communications promised; and as both Companies expressly state that they have no desire to evade any proper responsibility, I shall, I trust, be able then to report to you a satisfactory settlement of the matter.

3. Drawing your attention to that part of the letter from the Railway Carriage Company in which reference is made to the £89 (already deducted from them by me) for damage to case 55, per "Landsborough," I have to request to be informed whether the cost of repairing the damage to the contents of that case is included in the £280 7s. set forth in the statement forwarded to me in your letter of the 9th October last (No. 158), as, if included, the claim on that Company will to that extent have been satisfied.

I have, &c.,

W. C. MAYNE,

The Secretary for Public Works. JOHN R.—23 February, 1869.

Agent for the Colony of New South Wales.

The Under Secretary for Public Works. B.C., 23 February, 1869.—H.H.

Noted.—24/2/69.

Forwarded to Railways, to be placed with previous papers sent to that branch on the 30th ultimo. B.C., 25/2/69.—J.R.

John Fowler, Esq., to Captain Mayne.

2, Queen's Square Place, Westminster,
30 December, 1868.

Sir,

Referring to your letter of December 1, enclosing copies of letters from the Colony of 8th and 9th October, on the subject of carriages made by the Midland Company and by the Oldbury Company, I beg leave to enclose the replies made by those firms on the subject.

So soon as I receive the further communications referred to I will forward them; in meantime can I say anything in reply to the Oldbury Company as to the sum they have already paid?

I am, &c.,

JOHN FOWLER,

p. J. D. BALDREY.

Mr. W. Stableford to John Fowler, Esq.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
28 December, 1868.

Dear Sir,

We beg to acknowledge your letter of the 10th, containing a statement, and requesting payment of £97 8s. for making good the defects in second-class carriages made by us.

We need hardly say that it occasions us extreme regret that a complaint of that nature should have been made. We have no desire to evade the proper responsibility for the character of our work. We have entered into a close investigation as to the missing paints, &c., and we would call your attention to our having already paid the sum of £89 to Captain Mayne, for partial damage to case No. 55 by sea; and as this amount must have far exceeded the damage done to that case, for which alone we were liable, we think that this payment has not been taken into consideration, or that the advice of it had not reached Sydney.

I am, &c.,

WM. STABLEFORD.

Mr. H. Bridges to John Fowler, Esq.

Midland Wagon Company,
Birmingham, 24 December, 1868.

Dear Sir,

Your communication of the 10th instant, respecting the New South Wales carriages, has been duly submitted to my Directors, and they have given to it their most earnest attention, so much so that they have gone into the matter in detail; but as some of the claims are of so peculiar a character they have desired the staff to look into them in *closer* detail, and our Manager Mr. Drum is, as soon as this is done, to see you and explain the result of such examination in detail—the spirit of which is that we desire not to evade any costly responsibility fairly chargeable to us.

Yours truly,

H. BRIDGES,

Secretary.

Mr. J. B. Goodlad to Mr. W. Stableford.

New South Wales second-class carriages.

Dear Sir,

The door lights are movable, according to drawings. The buffers were made out of blooms forged under steam hammers, and I am at a loss to know how the head could come off, as we never made our buffers with plates for heads.

Yours obediently,

J. B. GOODLAD.

Mr. W. Stableford to John Fowler, Esq.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
24 June, 1868.

Dear Sir,

Your favour of 23rd, with report on New South Wales Railway Company's carriages, to hand. On the other side I send copy of my assistant's reply to the questions, regretting anything should be found fault with.

I am, &c.,

WM. STABLEFORD.

13

No. 16.

CAPTAIN MAYNE to THE UNDER SECRETARY OF THE GOVERNMENT.

(No. 78 a.)

Agency of the Government of New South Wales,
118, Cannon-street, London, E.C.,
1 August, 1868.

Sir,

I have the honor to acknowledge the receipt (on the 29th ultimo), by the Panama mail, of your letter of the 1st June last (No. 82), enclosing the duplicate copy of Mr. Byrnes' letter of the 22nd April, with a copy of report on railway carriages.

2. My letter of 17th ultimo (No. 180) to the Honorable the Commissioner for Railways, enclosing Mr. Fowler's report, will have placed the Government in possession of the steps I had taken with reference to the complaints as to the defects in the railway carriages.

3. The Government of the Colony, in ordering from English manufacturers, had unquestionably the right to expect to be supplied with carriages in all respects of the best class, and to look to me, as its Agent, for the adoption of all due and usual steps to secure their being so supplied.

Reference to the notices calling for tenders, to the specifications, and to the accepted tenders, will show that no one of the usual or proper preliminary steps was omitted. The repeated minute and detailed reports of Mr. Fowler's inspector—constantly at the works during the progress and up to the completion of the carriages—show that a most strict supervision of the work was exercised; and I can state, from repeated conversations with Mr. Baldry (Mr. Fowler's principal assistant), that he took a particular interest in these carriages being, in design and in construction, all that could be desired; and that after inspecting them in my presence, he felt (and expressed to me) the utmost confidence that they would not merely give satisfaction and merit approval, but that they would be highly commended and admired.

4. In my letter to Mr. Byrnes I stated my opinion that, for the defect of wood not sufficiently seasoned having been used in the construction of the carriages, the contractors, however misled and innocent, were justly responsible; and I shall, you may rest assured, do all that lies in my power to enforce that responsibility; but, under the usual and necessary conditions—making payment dependent on Mr. Fowler's certificate—the contractor's position is, I imagine, at law impregnable. I need not point out to Mr. Parkes that the certain effect of introducing into contracts any unusual condition as to payment, any terms involving doubt or delay with regard to that, would be to make contractors demand considerably advanced rates.

5. Mr. Parkes is doubtless aware that, as intimated in my letter of the 26th November, 1867 (No. 143), to Mr. Byrnes, I have retained in my hands from the contracts, to meet any damage that may be shown to have resulted, certain of the cases having admitted water previous to shipment, the sum of £250.

I have, &c.,
W. C. MAYNE,
Agent for the Colony of New South Wales.

For the Secretary for Public Works. J.D.—3/10/68.

The Under Secretary for Public Works. B.C., 3/10/68.—W.G.

No. 17.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,
Railway Branch,
Sydney, 7 September, 1868.

SIR,

With reference to your No. 180, enclosing reports, &c., in reply to complaints respecting railway carriages, I have the honor to inform you that I consider the excuses offered therein for such palpable carelessness are of such a nature as to compel me again to bring the subject under the notice of the Cabinet, before replying fully on the matter.

I have, &c.,
JAMES BYRNES,
Commissioner for Railways.

No. 18.

THE UNDER SECRETARY FOR PUBLIC WORKS to THE PRINCIPAL UNDER SECRETARY.

Department of Public Works,
Sydney, 9 October, 1868.

SIR,

In reference to the Honorable the Colonial Secretary's blank cover of the 3rd instant, forwarding to this department a letter with enclosures from the Agent of the Colony in London, in reply to our complaint of the inferior construction of a number of railway carriages imported from England through the Government Agent, I am directed by the Honorable the Secretary for Public Works to request that Captain Mayne may be informed that the explanation afforded in his communication and in the enclosures (which consist of explanatory letters from the manufacturers and from the inspecting engineer and his assistant) is most unsatisfactory.

2.

2. In the opinion of Mr. Secretary Byrnes, it is evident that Mr. Fowler has been deceived by his assistant, who could never have given the attention necessary to a proper inspection of the work.

3. The carriages are a disgrace to the manufacturers and to the inspector; and although we now make a charge only for the actual cost of putting the carriages in repair (as per accompanying specification and estimate), the Honorable the Secretary for Public Works is quite satisfied that the amount (£280 7s.) falls far short of what should be charged the manufacturers for repairing such discreditable and unworthy work, and for the delay and annoyance occasioned thereby; indeed, it would not be an extreme step, Mr. Byrnes considers, if the Government were to at once return the carriages to England.

Papers herewith to be returned.
Agent for the Colony, 9 Oct., 1868.

I have, &c.,
JOHN RAE.

[Enclosure.]

GOVERNMENT RAILWAYS.

Office of Engineer for Existing Lines,

No. 22.

THE ENGINEER-IN-CHIEF to THE COMMISSIONER.

Department of Public Works,

Railway Branch, Engineer's Office,

5 November, 1869.

Rolling stock, Existing Lines.

I SUGGEST, for the consideration of the Commissioner, the advisability of calling for a return of all wagon axles that have broken during transit, accompanied by the name of the maker of the wagon, and the date at which each wagon commenced running. This return to extend to the Northern, Western, and Southern lines.

It might also be desirable to inquire into the truth of the statement made in one of the daily papers, that "it is a fact that no less than eighteen carriages, lately imported at a cost of £1,250 each, are now in stock as lumber, being found, for some reason or other, entirely unfit for use." The carriages alluded to are no doubt those imported for the Western line—twelve second-class, and six first-class. As some of these are daily running on the Western line, it may be advisable to know how many, and why the other carriages are not in use.

I should not have noticed any statement contained in the *Empire* newspaper, had I not good reason to believe that the information was obtained from official sources.

JOHN WHITTON.

Mr. Thomas, for report. J.S.—6/11/68.

(Received 10/11/68.)

There are no records in this office by which it can be shown how many axles have broken since the lines have been opened for traffic. I only know of two; and these, as far as I can gather, were made by the Patent Shaft and Axletree Company.

With regard to anything that has appeared in the *Empire*, I of course cannot be held responsible, unless indeed it could be shown that the information was derived from me; and I can assure Mr. Whitton I should not hesitate a moment to say so, had such been the case.

The carriages referred to were found to be of such bad workmanship that I advised the late Commissioner to appoint a Board of practical men, totally unconnected with the department, to examine them; and their report, I have no doubt, is among the records of the Commissioner's Office.

Having

Having heard great complaints made by passengers as to the motion in these carriages, and knowing from experience that these complaints were well-grounded, I wrote the following Memo. (No. 1393) to the Traffic Manager:—"If there is sufficient rolling stock to work the traffic between Sydney and Penrith without necessitating the use of the long radial carriages imported for the Western Extension, I should by all means do so, as the lateral motion in these carriages, when running on a straight road, is very disagreeable, if not dangerous."

No. 1 second class is an exception, having radial axle-boxes in place of the bar arrangement, and I propose altering the others to this plan.

JAS. H. THOMAS.—11/11/68.

Mr. Thomas will have the whole of these carriages altered without delay. J.S.—13/11/68.

Engineer for Existing Lines. R.M.—13/11/68.

As I find it would take too long a time to get these alterations done in our workshops, I would recommend that tenders be called for the performance of the work. Draft advertisement herewith. J.H.T.—15/12/68.

Sydney, 15 December, 1868.

Tenders will be received at this office until Tuesday, the 5th January, 1869, at 11 o'clock, a.m., from persons willing to contract for making alterations to seventeen railway carriages. Specification and form of tender may be seen, and further particulars obtained, at the Office of Engineer for Existing Lines, Sydney Station. Tenders for which are to be indorsed "Tender for alterations to railway carriages."

JOHN SUTHERLAND,
Commissioner for Railways.

This must stand over for the present. J.S.—18/12/68.

No. 23.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.

Link of new carriage broken.

I HAVE to report that No. 4 first-class radial carriage came in yesterday morning with one of the suspending links of bearing spring broken.

The cause of fracture is evidently that of bad workmanship. A link of this description, upon which so much depends, should have been worked out of the solid, and not, as this appears to have been, made from a bar bent round and welded, thus depending on one shut, which, in this case, was a very bad one.

It is frightful to contemplate what might be the result in the event of one of these links giving, when running at any speed, seeing there is always such a very great lateral strain on them.

I forward herewith the link for your inspection.

JAS. H. THOMAS.—19/11/68.

This clearly shows gross, if not criminal carelessness, on the part of the inspectors of this work in England; and it appears to me that it will be necessary to test the whole of the imported work before any dependence can be had on goods so defective in workmanship. This matter must come before the Cabinet. J.S.—19/11/68.

Mr. Thomas to note and return at once. J.S.—19/11/68.

Noted. J.H.T.—23/11/68.

No. 24.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.

No. 4 saloon carriage—G.W.R.

Mr. Bingham, the foreman carriage-builder, reports that he has been compelled to take in No. 4 saloon carriage (one of those imported for the Western Extension) to be lifted in consequence of the flanges of tires being worn so thin as to render it unsafe to run.

As this carriage was erected on the 11th of April, 1868, it has been running *off and on but little over seven months*.

This will give some idea of the great wear and tear on the Western Extension, as, notwithstanding they are fitted with the radial axles to facilitate their going round the sharp curves, yet the flanges have worn away in half the time they would on any other portion of the lines.

JAS. H. THOMAS.—27/11/68.

Seen. J.S.—27/11/68.

No. 25.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.

Unsafe condition of radial carriages.

YESTERDAY the lateral motion in one of the long radial carriages attached to the 5 p.m. down train was to such an extent as to greatly alarm the passengers. I was in the carriage at the time, and I am certain that if the use of these radial carriages is not discontinued, they will sooner or later cause a most frightful accident. On this occasion, it being close to the engine, with a very heavy train behind descending towards Duck River, had it swung across the line, every carriage in the train must have gone over the one we were in.

Two months ago I wrote to say they should not be used until certain alterations had been made.

I have sent in a draft advertisement calling for tenders for performing the work, but as yet it has not appeared in either *Gazette* or daily papers.

I feel it is my duty, in order to clear myself of all responsibility, to warn the Commissioner against allowing these carriages to run, and (seeing that we are short of rolling stock) to urge the necessity of getting them altered without delay.

JAS. H. THOMAS.—29/12/68.

Can Mr. Whitton advise with me in this matter? It seems very clear something must be done.

Mr. Whitton.

J.S.—14/1/69.

These carriages were ordered specially for working the sharp curves on the Western line beyond Penrith, and were not intended to run at a higher speed than twenty miles an hour. I have protested ever since my return from England against the use of these carriages on the line between Penrith and Sydney, as frequently the speed is at the rate of forty miles an hour. I warned the late Commissioner, Mr. Byrnes, as to the danger of allowing these carriages to be run at so great a speed as forty miles an hour; also, the Traffic Manager (Mr. Owen), and the Inspector (Higgs) at Penrith. It is to me marvellous that the danger has not been previously apparent to Mr. Thomas. If any of these carriages be required for the traffic between Sydney and Penrith, I advise that the radial axle-box be supplied instead of the radial link, and that the alteration be made in the locomotive department. The alteration can readily be made, as there is one carriage, No. 18, supplied with the radial axle-box.

J.W.—16/1/69.

Commissioner. 16/1/69.

No. 26.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.

Government Railways—Existing Lines.

Steel tires.

In October, 1867, I indented for 72 best Krupp's steel engine tires, shut and blocked. These have just arrived, but I find that instead of the inner diameter of the tires for the 4 feet wheels being 3 feet 6½ inches, they are 3 feet 6¼ inches, while those for the bogie wheels are 2 feet 6½ inches in place of being 2 feet 6¾ inches. The difficulty of turning out these steel tires, as well as the waste of metal, induced us to attempt to stretch them, but on doing so broke the large centre screw of the blocking machine.

I think the Colonial Agent's attention should be called to this matter; as in this, as well as other cases of a similar kind, we have suffered great loss of time and money by the careless way that orders have been executed.

J. H. THOMAS.—24/8/68.

Inform Colonial Secretary it appears to me that the business of the Colony is performed in a manner by no means beneficial to the Government; all our indents are executed in a way which incurs unnecessary expense and loss to the Department of Works.

J.B.—27/8/68.

P. Works, 28/8/68.

P. Under Secretary, 28/8/68.—J.R.

Copy to Capt. Mayne, for information, 28/8/68.—R.M.

Capt. Mayne, 1 Sept., 1868.

No. 27.

THE COMMISSIONER to CAPTAIN MAYNE.

Department of Public Works,

Railway Branch,

Sydney, 28 August, 1868.

SIR,

I have the honor to enclose herewith for your information a copy of a report received from the Engineer for Existing Lines, complaining of insufficient inspection of 72 Krupp's steel engine tires, and of the very careless way in which the orders generally have been executed.

As the present mode of supplying orders appears to call for further action, I have laid the matter before the Government, from whom you will, I doubt not, receive a further communication.

I have, &c.,

JAMES BYRNES,

Commissioner for Railways.

No. 28.

CAPTAIN MAYNE to THE COMMISSIONER.

Agency of the Government of New South Wales,

118, Cannon-street, London, E.C.,

5 November, 1868.

(No. 193.)

SIR,

I have the honor to acknowledge the receipt, on the 28th ultimo, of your letter of the 28th of August last (68/561), enclosing a copy of a report received from the Engineer for Existing Lines, complaining of insufficient inspection of 72 Krupp's steel engine tires.

2. On receiving this letter, I at once placed myself in communication with Mr. Fowler on the subject, and I now enclose for your information a copy of his report, together with copies of its enclosures. The originals I retain, as I do also the gauging rods used in measuring the tires, which Mr. Fowler has forwarded to me.

3. I would beg your attention to the date of the report from Mr. Tulk, by whom the inspection was made, which will satisfy you that the document is a report at the time, and not one drawn forth now.

4. In this conflict of testimony, I can see but one course by which a conclusion satisfactory to all concerned can be arrived at, viz., that tires (say six or eight) be taken at random from among the tires

3.—6½.
2.—6½.

sent (of both the dimensions), and that these (being of course in the precise state in which they reached Sydney) be forwarded to me under seal, in order that I may, on receiving them, have them carefully measured in my own presence, and in that of Mr. Fowler, of Messrs. Krupp's representative here, and of some absolutely disinterested person to be named by you.

I have, &c.,
W. C. MAYNE,
Agent for the Colony of New South Wales.

6 November.

3. P.S.—I have this morning received from Mr. Fowler a further communication forwarding letters from Messrs. Krupp, and from the member of the firm in London; copies of these I also enclose.

W.C.M.

[Enclosures.]

John Fowler, Esq., to Captain Mayne.

2, Queen's Square Place,
Westminster, 5 November, 1868.

New South Wales Railways.

Sir,

I beg to acknowledge the receipt of your letter of October 28th, with enclosures, viz.: Minute of August 24th, complaining that the 72 Krupp's steel tires indented for in October, 1867 (and sent out from England, February, 1868) were respectively $\frac{1}{4}$ inch and $\frac{1}{8}$ inch too small in diameter; a letter from the Commissioner of Railways, of August 28th, and also a letter from the Colonial Secretary, of September 1st, reflecting on the manner in which the inspection of materials is made in this country.

I regret exceedingly that the Minister should have felt it to be his duty to write that letter; but I feel sure that the same feeling of duty and of fairness will prompt him to retract his reflection, when I explain the manner in which the inspection in this case has been carried out.

On the receipt of the indent in December, 1867, no one but Messrs. Krupp was or could be applied to, and a letter was accordingly forwarded in the usual terms, repeating the exact words of the indent and calling on Messrs. Krupp for a tender (copy of letter enclosed). On the receipt of the tender, and on its acceptance by yourself, the order was given.

In cases of this kind where a speciality is required, the mode of manufacture is not interfered with, but when the order is completed the materials are carefully examined as to size and compliance with requisition.

On the arrival of these tires in London, one of my inspectors, Mr. Tulk, the son of a locomotive engine manufacturer, and who has been for seven years my assistant, received orders to inspect them with rods prepared for the purpose, and which I have tested and can certify to be correct to within $\frac{1}{100}$ of an inch. After making his inspection he sent in his report, which I enclose, and I also forward the rods which were used.

I have since requested Mr. Tulk to report respecting the alleged discrepancies, and he reiterates his former report so emphatically that it leaves me no alternative but to say that I believe that a mistake has been made in the Colony, and that the tires were as he states, not differing more than $\frac{1}{32}$ inch from the required diameter.

Suppose, however, that the tires really were in one case $\frac{1}{4}$ inch, and in the other case $\frac{1}{8}$ inch smaller than ordered, it would merely be necessary to bore out in one case $\frac{1}{4}$ inch more, and in the other case $\frac{1}{8}$ inch more all round than intended by the indent, which would really be immaterial, as not affecting the fitting of the wheel and tire, and not involving any appreciable additional expense. I am therefore led to the conclusion that the men engaged upon the work, although no doubt first class mechanics, were not accustomed to manipulate steel tires, which are comparatively of recent introduction, and may have attempted to deal with them as they would have done with wrought iron tires, viz., by stretching them.

I may observe that stretching steel tires has been found to be at all times a hazardous operation—they should always be bored out before being fitted on; and that being so, even if they had been $\frac{1}{4}$ inch or $\frac{1}{8}$ inch too small, it would be an easy and inexpensive matter to bore them to the exact size.

I believe that I cannot add anything more to this report, except to say that I have taken the opinion of some of the most eminent manufacturers in the country, and that they entirely concur with me as to the necessity of boring out in all cases.

I am, &c.,
JOHN FOWLER.

John Fowler, Esq., to Messrs. Krupp.

2, Queen's Square Place, Westminster, S.W.,
17 December, 1867.

New South Wales Railways.

Dear Sirs,

I shall feel obliged by your sending a tender addressed to Captain Mayne, No. 118, Cannon-street, E.C., on or before 12 o'clock on Tuesday, December 24th, for the supply of the following materials:—

54 best Krupp's steel engine tires, shut and blocked—				18 best Krupp's steel engine tires, shut and blocked—			
			ft. in.				ft. in.
Inside diameter	3 6½	Inside diameter	2 6½
Width	0 6	Width	0 5½
Tread	0 2½	Tread	0 2½
(For wheels 3 ft. 6½ in. diameter.)				(For wheels 2 in. 6½ in. diameter.)			

The tender must include all cost of packing and protection from injury, and delivery free on board in London or Liverpool, and must state the time at which delivery will be guaranteed.

The work to be carried out under my inspection, and to my entire satisfaction as to quality of materials and workmanship, and also as to mode of packing and the general completion of the order.

Payment will be made by Captain Mayne, the Representative Agent to the Government of New South Wales, one month after the production of the bill of lading accompanied by my certificate.

I am, &c.,
JOHN FOWLER,
per J. D. BALDRY.

P.S.—Time being of great importance, I have to draw your attention to the part underlined [*Italic*] above.

Mr. E. J. Tulk to John Fowler, Esq.

2, Queen's Square Place, Westminster,
14 February, 1868.

New South Wales Railways.

Contract for Krupp's best steel engine tires, let to Messrs. Krupp, December, 1867.

Sir,

In accordance with your instructions, I made an inspection of the above, in the barge "Cavour," for shipment in the export ship "Strathdon."

The order is as enumerated below:—

54 best steel engine tires, shut and blocked—				18 best steel engine tires, shut and blocked—			
			ft. in.				ft. in.
Inside diameter	3 6½	Inside diameter	2 6½
Width	0 6	Width	0 5½
Tread	0 2½	Tread	0 2½
(For wheels 3 ft. 6½ in. diameter.)				(For wheels 2 ft. 6½ in. diameter.)			

I gauged the internal diameter of each tire as it was being slung up; this I was able to do with considerable exactness with gauge rods prepared for the purpose. I found the diameter uniformly in accordance with that specified, being generally about $\frac{1}{32}$ less, in. and in no case in excess.

The width and tread of the tires are correct, and a proper allowance has been made for reduction of section in turning.

All the tires are without welds, and generally they appear to be round and carefully finished. They are stamped with the maker's name, and have been properly dipped in linseed oil.

I am, &c.,
EDWARD J. TULK.

KRUPP'S ENGINE TIRES.—SCALE FULL SIZE.

NOTE.—The wavy lines show the section of flange as manufactured.

John Fowler, Esq., to Captain Mayne.

2, Queen's Square, Place,
Westminster, S.W.,
6 November, 1868.*Krupp's tires.*

Dear Sir,

I am just in receipt of the enclosed letters from Krupp & Co., one from Essen, the other from the London member of the firm—Mr. Longsdon. I beg to draw your attention to the latter part of Mr. Longsdon's letter.

I am, &c.,
JOHN FOWLER,
p. J. D. BALDRY.

L. Wiegund to John Fowler, Esq.

Essen, 2 November, 1868.

Dear Sir,

By your favours of 29th and 30th ultimo, you give me notice about a complaint respecting the 72 tires ordered for the New South Wales Railways, December 17th, 1867, and supplied to my invoice of February 1st. I have examined with greatest accuracy all particulars about this order, from which it is evident that there have been supplied from these works—

54 tires of 3 feet 6½ inches inside diameter	} In the rolled state.
18 " " 2 " 6¾ " " " "	

which is throughout in accordance with the dimensions ordered.

I am, &c.,

5 November, 1868.

New South Wales railway tires.

Dear Sir,

In reference to the order we had the pleasure of receiving from you for 72 tires for the New South Wales Railway, I was sorry to hear that certain complaints had been made in Australia as to their want of accuracy in the inside diameter. I directly wrote my firm at Essen upon the subject, and requested that a searching inquiry might be made; and my firm has replied to me with the enclosed letter stating that the tires have been delivered in strict accordance with the dimensions given on the order. I feel certain that the tires have been supplied to the size ordered, viz., 3 feet 6½ inches and 2 feet 6¾ inches inside diameter; and to test this I shall be very happy that six tires or more should be returned to London for re-measurement, and to abide this ordeal of the accuracy of our work, or any other means that you may consider best.

I am, &c.,
p. pro FRIED KRUPP,
ALFRED LONGSDON.

No. 29.

THE PRINCIPAL UNDER SECRETARY to CAPTAIN MAYNE.

Colonial Secretary's Office,
Sydney, New South Wales,
1 September, 1868.

SIR,

In reference to the letter which I had the honor, by the direction of the Colonial Secretary, to address to you on the 10th June last (No. 68.82), on the subject of the defective manufacture of railway carriages supplied to the Colony, I am now desired to forward to you the enclosed copy of a report submitted by the Commissioner of Railways as to a supply of Krupp's best shut engine tires, shut and blocked, indented for in October, 1867, and to observe that the business performed for the Colony appears to be executed in a manner by no means beneficial to its interests; and to call your especial attention to the serious loss which the Colony sustains in these transactions, and to the indispensable necessity for your watching unremittingly over its interests therein.

I have, &c.,
HENRY HALLORAN.
(For Colonial Secretary.)

No. 30.

CAPTAIN MAYNE to THE COLONIAL SECRETARY.

Agency of the Government of New South Wales,
118, Cannon-street, London,
5 November, 1868.

(No. 85.)

SIR,

I do myself the honor to acknowledge the receipt, on the 28th ultimo, of your letter, No. 68-4757, 137, of the 1st of September last, enclosing a copy of the report submitted by the Commissioner of Railways as to a supply of Krupp's best steel engine tires, shut and blocked, indented for in October, 1867, calling my special attention to the serious loss which the Colony sustains in this and in the matter of defective manufacture of carriages referred to in your letter, No. 68-82, of the 10th June last, and to the indispensable necessity for my watching unremittingly over its interests in these transactions.

2. With regard to the particular matter of the steel engine tires supplied by Krupp, I beg to enclose for your information a copy of a letter I have addressed to the Honorable the Commissioner of Railways, in reply to his communication on the subject, with copies of the enclosures in that letter; and I

would

would ask your attention to the suggestion I have made in paragraph 4; it appearing to me that in the conflict of testimony in this matter, by the course indicated alone can a conclusion satisfactory to all interested be arrived at.

3. With regard to the general question as to the way in which the supply of railway material for the Colony is constructed, I beg to assure you that I give to every order I receive my most prompt, earnest, and anxious consideration and attention; consulting, and being in every case, as regards scientific material and mechanical detail, guided by the Consulting Engineer, who is, I consider, responsible to the Government for the faithful and efficient discharge of the duties of his office.

4. The Colony retains, and it is indispensable that it shall do so, the services of such an officer; and at the very commencement of my duties as its Resident Agent here I gave this point the very best and most careful consideration in my power; and that consideration led me to the absolute conclusion that any interference whatever on my part with the mode of conducting the duties strictly attaching to the Consulting Engineer would have but one result, and that one most mischievous and dangerous to the interests of the Colony, namely, to relieve him from his proper and full responsibility. I have, therefore, once I have accepted a tender, guardedly abstained from such interference, and have, as in the case of the railway carriages (when, at Mr. Fowler's request, I visited the works and saw these carriages), in distinct terms beforehand impressed that my doing so was not to be regarded as in any—the very slightest degree—removing from him any of the responsibility attaching to him for securing the full and faithful execution of the contract.

5. The terms of our contracts, as you are aware, provide that payment shall be made on Mr. Fowler's certificate, and without it it never is made. Mr. Fowler stands in the very foremost rank in his profession; he maintains a staff of highly trained, thoroughly competent, and, I have every reason to believe, trustworthy assistants: his professional credit, his pecuniary interest, impose upon him the necessity of doing so; and while I have no grounds for supposing that any of these are lax in the discharge of the duties entrusted to them, or inclined to leaning in favour of contractors executing the work for the Colony, I have repeated testimony, in their constant and minute reports to Mr. Fowler during the progress of work, to the highly stringent supervision they exercise, the severe tests they apply, and the promptness with which they check any deviation from the precise terms of a specification. In Mr. Tulk's report on Krupp's springs (a report I would point out made at the time—not a document now drawn forth) you will observe that he states that he measured *each tire* with gauge-rods prepared for the purpose. These rods have been forwarded to me by Mr. Fowler, and I retain them in view of the suggestion I have made being acted on, that I may compare them with a standard measure and test the tires as being in accordance with them or otherwise.

I have, &c.,

W. C. MAYNE,

Agent for the Colony of New South Wales.

Submitted, 28 December, 1868.

Secretary for Public Works, 30/12/68.—J.R.

3 December, 1868.

(No. 89.)

SIR,

I do myself the honor to acknowledge the receipt of your letter, No. 158, of the 9th of October last, enclosing a copy of the communication from the Under Secretary for Public Works, with reference to the inferior construction of certain railway carriages; and instructing me, on behalf of the Government of New South Wales, to call upon the manufacturers of the carriages in question to pay the actual cost of putting them in repair, estimated by the railway authorities at £280 7s.

In pursuance of those instructions, I have lost no time in communicating with the Consulting Engineer, in order that the manufacturers may be at once called on to make good the expense caused to the Colony by the defective material and work in the carriages supplied by them respectively.

The short period intervening between the receipt of your letter and the dispatch of the mail precludes my being in possession of the result of this call upon the manufacturers, but by the next Suez mail I shall, I have no doubt, be able to report it to you.

I have, &c.,

W. C. MAYNE,

Agent for the Colony of New South Wales.

Under Secretary for Public Works. B.C., 28/1/69.—J.R.

Under Secretary for Public Works. B.C., 28/1/69.—H.H.

31 December, 1868.

(No. 93.)

SIR,

Having reference to my letter of 3rd instant, No. 89, I have now the honor to enclose for your information copies of the communications addressed to Mr. Fowler by the Railway Carriage Company and by the Midland Wagon Company, in reply to his call upon them to repay to the Government of New South Wales the charges incurred through defective work in the railway carriages respectively supplied by them under their contracts with the Colony.

2. By next mail I hope to transmit the further communications promised; and as both Companies expressly state they have no desire to evade any proper responsibility, I shall I trust be able then to report to you a satisfactory settlement of the matter.

3. Drawing your attention to that part of the letter from the Railway Carriage Company in which reference is made to the £89 (already deducted from them by me) for damage to case 55 per "Landsborough," I have to request to be informed whether the cost of repairing the damage to the contents of that case is included in the £280 7s. set forth in the statement forwarded to me in your letter of the 9th of October last, No. 158, as if included the claim on that Company will to that extent have been satisfied.

I have, &c.,

W. C. MAYNE,

Agent for the Colony of New South Wales.

The Secretary for Public Works, 23 February, 1869.—J.R.

The Under Secretary for Public Works, 23 February, 1869.—H.H.

Noted, 24/2/69.

[Enclosures.]

John Fowler, Esq., to Captain Mayne.

2, Queen Square Place, Westminster,
30 December, 1868.

Sir,

Referring to your letter of 1st December, enclosing copies of letters from the Colony of 8th and 9th October, on the subject of carriages made by the Midland Company and by the Oldbury Company, I beg leave to enclose the replies made by those firms on the subject.

So soon as I receive the further communications referred to I will forward them. In meantime can I say anything in reply to the Oldbury Company as to the sum they have already paid?

I am, &c.,

JOHN FOWLER,

p. J. D. BALDREY.

Mr. W. Stableford to John Fowler, Esq.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
28 December, 1868.

Dear Sir,

We beg to acknowledge your letter of the 10th, containing a statement, and requesting payment of £97 8s. for making good the defects in second-class carriages made by us.

We need hardly say that it occasions us extreme regret that a complaint of that nature should have been made. We have no desire to evade the proper responsibility for the character of our work. We have entered into a close investigation as to the missing paints, &c., and we would call your attention to our having already paid the sum of £89 to Captain Mayne for partial damage to case No. 55 by sea; and as this amount must have far exceeded the damage done to that case, for which alone we were liable, we think that this payment has not been taken into consideration, or that the advice of it had not reached Sydney.

I am, &c.,

WM. STABLEFORD.

Mr. H. Bridges to John Fowler, Esq.

Midland Wagon Company, Birmingham,
24 December, 1868.

Dear Sir,

Your communication of the 10th inst., respecting the New South Wales carriages, has been duly submitted to my Directors, and they have given to it their most earnest attention, so much so that they have gone into the matter in detail; but as some of the claims are of so peculiar a character, they have desired the staff to look into them in closer detail; and our Manager, Mr. Drinn, is, as soon as this is done, to see you and explain the result of such examination in detail, the spirit of which is that we desire not to evade any costly responsibility fairly chargeable to us.

H. BRIDGES,

Secretary.

No. 34.

CAPTAIN MAYNE to THE COLONIAL SECRETARY.

Agency of the Government of New South Wales,
118, Cannon-street,
London, 29 January, 1869.

(No. 98.)

SIR,

Having reference to my letter No. 89, of the 3rd of December last, I do myself the honor to enclose for your information copies of the letters received from the Railway Carriage Company and the Midland Wagon Company respectively, in reply to the call made on each by the Inspecting Engineer, to make good the expense caused to the Colony by the defective material and work in the carriages severally supplied by them.

2. Those letters have reached me only yesterday and to-day.

3. I have informed Mr. Baldry (Mr. Fowler is at present in Egypt, to meet H.R.H. the Prince of Wales) that I shall transmit copies of them to you by this mail; and I have pointed out that the Midland Wagon Company, in estimating the extra cost of material and workmanship in the Colony at 50 per cent. only over English rates, have under-estimated that considerably.

4. Having regard to all the circumstances, I beg to recommend to your consideration, in order to avoid any litigation—certain to be costly and doubtful in result—that the reference proposed by the Midland Wagon Company for the settlement of the claim on them be adopted.

5. The information required as to the carriage springs, I have to request that I may have furnished to me.

I have, &c.,
W. C. MAYNE,
Agent for the Colony of New South Wales.

[Enclosures.]

Mr. H. Bridges to John Fowler, Esq.

Midland Wagon Company,
Birmingham, 27 January, 1869.

New South Wales carriages.

Dear Sir,

In further reply to your communications enclosing copies of reports and charges for repairs to the six 1st class carriages which we built for the Government of New South Wales, and in continuation of our replies to the same, dated 6th July and 24th December last respectively, we have to inform you that we have carefully investigated the statement of charges for work done in the Colony, which you forwarded to us on the 10th December last.

In answer to the above, we can only again express our great regret that any necessity for these complaints should have arisen, as every endeavour was made by us to build carriages that would be entirely satisfactory to yourself personally, and that should be approved in the Colony; and in fact when they left these works we were sanguine that they would prove so satisfactory in work that we should have the pleasure of building further carriages for that Government.

We have, however, now to deal with the complaints as reported from the Colony, and we cannot help protesting in the strongest manner at the large amount charged in remedying these enumerated defects thus:—

Panels as charged £120:—The total value of (say at the outside) one-fourth of the entire number of panels in the six carriages (if it were possible that so many should fail, including labour for taking out old and refixing new, repainting, varnishing, and heraldry, in this country, should be £40; say we allow 50 per cent. for extra costs in the Colony, this would equal £60.

On the subject of the cracked panels, you will pardon us for saying that we attribute it entirely to exposing the carriages too soon after being taken out of the ship.

180 Venetian blinds as charged £18.—This is a charge that does not belong to us at all, as we faithfully worked to drawings, and first made a sample door with louvre blind complete, which was sent up to London and approved, and to which all the remainder of the blinds were constructed, and the whole of them when tried in these works were found to be quite satisfactory.

48 new rollers for glass frames charged £9.—We cannot understand this, as we completed the carriages in every respect, of course including the above; but under any circumstances the charge is excessive; they would not cost in this country more than 1s. 6d. each; allow 50 per cent. for extra value in the Colony, would be 2s. 3d. each, which on 48 rollers would amount to £5 8s.

Setting and hardening 32 bearing springs, charged £32.—The springs used in the 1st class carriages were made by Chas. Cammell & Co., Cyclops Works, Sheffield; and as this is a matter for them to deal with, we must be quite certain that the springs are all or any part of them of their make. Our reason for asking this information is, that the springs for the 2nd class carriages, supplied by the Oldbury Company, were manufactured by J. Brown and Co., Atlas Works, Sheffield. This information can be obtained by examining the springs themselves, which all bear the name of the manufacturer on the top plate, and will thus show to which firm this charge has to be referred.

12 new shackles to screw couplings to suit 8-chain curves, charged £1 4s.—This, we think, is not a claim on us.

20 new spring clips, £1 10s.—This, as before, has reference to the manufacturer of the springs.

120 bolts for fixing bodies to under-frames, £1 5s.—These we are quite certain were sent out.

In justice to ourselves, we have thus given a truthful explanation in a manner which we think is fair and reasonable. Our reputation and good name are of far greater value to us than the amount in question now; and if we felt ourselves to be in the wrong, or not to have executed the work in the *bonâ fide* spirit of good faith and honesty, we should be but too glad at once to pay the amount claimed; but if after what we have said the Government still think we are liable for what took place beyond our own control, we are quite prepared to leave the settlement of the claim made unreservedly to the decision of the Engineer-in-Chief of the Government of New South Wales, and by which we will be bound.

We trust that this proposed arrangement will meet with the approval of the Colonial Government, and that we may thus retain their confidence in future requirements.

Yours truly,
H. BRIDGES,
Secretary.

Mr. H. Wheeler to John Fowler, Esq.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
27 January, 1869.

Dear Sir,

Our Manager has been called away to Russia on an important contract. I regret that his absence prevents my replying on the subject of the 2nd class carriages supplied to the Government at Sydney in time for this mail, but I trust his return will so enable me to reply in time for the next mail.

I am, &c.,
H. WHEELER,
Secretary.

No. 35.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.

Government Railway—Existing Lines.

Radial carriages.

If there was anything wanted to convince the Government of the shameful treatment they receive at the hands of contractors and others in England, this correspondence will supply it.

The Colonial Secretary, moved by the Secretary for Works, addresses a letter to the Colonial Agent, animadverting in strong terms upon the discreditable and unworthy workmanship in these carriages. The Colonial Agent writes to the inspecting engineer, conveying the remonstrances from the Government, and calling for an explanation, and demanding amount of claim. The inspecting engineer writes to his inspector, who is supposed to have inspected the work as it progressed. The

The contractors are also written to regarding the matter and the particulars of the claim; and their reply is a mass of quibbles, such as might be expected. Take, for instance, their remarks on the item of bearing springs. They coolly tell us they were manufactured by Chas. Cammell & Co., who are responsible for them, and not themselves, leaving the Government, I presume, to deal with their subs. on the contract.

Then, again, the bolts, which we never received, they state they are certain were sent out. The failure of the shackles, they assert, is not fairly chargeable against them. If not, who is it against, I would ask?

There are several other letters from foremen and others employed by the contractors, the result of all of which is, that, the Colonial Agent informs us we have no legal claim, and that the mode proposed by the contractors for settling it be adopted! Would any one in their senses expect the contractors and their foremen to say they had sent out a lot of rubbish; or would they expect the inspectors to say they had not done their duty?

Here we have the articles before us: and although it is evident to any practical man that the workmanship and materials are disgraceful, yet, upon an appeal being made on the contractors for the actual cost of putting them in running order, they coolly assure us that we are mistaken in our judgment of what is good or bad; and in this they are backed up by the officers appointed by the Government to protect their interests.

At the present time we are expending upwards of £800 on the under-frames alone of these very carriages; besides which, they must all be newly panelled and painted, at a cost of another £1,000.

I have, in previous papers, pointed out what the result of appeals such as this would be, as it is hardly to be expected that parties blamed would acknowledge their own shortcomings; and it is only a sample of what the Government may expect, if they continue to submit to such treatment.

It will be seen, by a recent article in the *Herald*, that the Government of South Australia are in a similar position.

There is a minute in this correspondence, written by Mr. Whitton on 16/1/69, which has not previously come under my notice, where he says he has protested against their use, &c.; and goes on to say,—“It is to me marvellous that the danger has not been previously apparent to Mr. Thomas.” Now, notwithstanding his statement that he had protested against the use of these carriages on any portion except the mountain line, I do not, nor have I ever seen a single word in *writing* from him on the subject, except in his minute of 5/11/68 (a copy of which is with these papers), wherein he wished to be informed, with reference to an article which had appeared in the *Empire* about these carriages being entirely unfit for use, why others than those required for the mountain line *were not in use*; which, in my opinion, is anything but a protest against their being employed, as two (at the most) are ample for working the Western Line.

Now, the course pursued by me in the matter was, that no sooner had they been tested by running, than I wrote *first* to the Traffic Manager, *then* to the acting Traffic Manager, and *finally* to the Commissioner, warning them of the danger incurred by their use, all of which correspondence is on record.

J. H. THOMAS.

No. 36.

CAPTAIN MAYNE to THE COLONIAL SECRETARY.

(No. 103.) Agency of the Government of New South Wales,
118, Cannon-street, London,
25 March, 1869.

SIR,

Referring to my letter, No. 98, dated January 29th, on the subject of inferior construction of railway carriages, I have now the honor to forward you copy of a letter I have received through Mr. Baldry, Mr. Fowler's principal assistant, from the Oldbury Company, in which they promise attention to the matter on return of their Manager from Russia, probably in two or three weeks.

I have, &c.,

W. C. MAYNE,
Agent for the Colony of New South Wales.

For the Secretary for Public Works.

Under Secretary for Public Works, 18 May, 1869.—H.H.

Railways, with reference to previous papers sent to that Branch on 1st April last. B.C., 20/5/69. J.R.

[Enclosure.]

Mr. H. Wheeler to Mr. J. D. Baldry.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
5 March, 1869.

Dear Sir,

Mr. Stapleford is still in Russia. I should think from his letters that he will not be here for the next two or three weeks. The matter to which you refer shall have attention immediately he returns.

Yours faithfully,

H. WHEELER,
Secretary.

No. 37.

No. 37.

CAPTAIN MAYNE to THE COLONIAL SECRETARY.

(No. 107.)

Agency of the Government of New South Wales,
118 Cannon-street,
London, 16 April, 1869.

SIR,

Referring to my letter, No. 103, dated 25th March, on the subject of claim on the Railway Carriage Company, Oldbury, I have now the honor to enclose copy of a further communication from that Company, dated the 14th instant, in reply to a further reference advising that their Manager is not yet returned from Russia, but is expected very shortly.

I have, &c.,

W. C. MAYNE,

Agent for the Colony of New South Wales.

The Under Secretary for Public Works with reference to previous papers. B.C., 10 June, 1869.—H.H.
Railways. 12/6/69.—J.R.

[Enclosure.]

Mr. T. P. Stableford to Mr. J. D. Baldry.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
14 April, 1869.

Dear Sir,

Mr. Stableford has not yet returned from Russia, and I don't think will be home in time to give explanation to Captain Mayne by the 20th instant, though he is expected very shortly. On his return you shall immediately hear from him.

Yours faithfully,

THOMAS P. STABLEFORD.

No. 38.

CAPTAIN MAYNE to THE COLONIAL SECRETARY.

(No. 110.)

Agency of the Government of New South Wales,
118, Cannon-street, London,
14 May, 1869.

SIR,

Referring to my letter, No. 107, dated 16 April, 1869, on the subject of claim on the Railway Carriage Company, Oldbury, I have now the honor to enclose copy of further communication from that Company, dated the 7th instant (in reply to a further inquiry), advising that their Manager is not yet returned from Russia, but is expected in two or three weeks from that date.

I have, &c.,

W. C. MAYNE,

Agent for the Colony of New South Wales.

The Under Secretary for Public Works, with reference to previous papers. B.C., 10 July, 1869.—H.H.

This may be forwarded to Railways, for the purpose of being placed with other papers on the subject. B.C., 14/7/69.—J.R.

[Enclosure.]

Mr. H. Wheeler to Mr. J. D. Baldry.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,
7 May, 1869.

Dear Sir,

Mr. Stableford has not yet returned. He talks of returning in a fortnight or three weeks' time.

Yours faithfully,

H. WHEELER,

Secretary.

No. 39.

CAPTAIN MAYNE to THE COLONIAL SECRETARY.

(No. 119.)

Agency of the Government of New South Wales,
8, Adam-street, Adelphi, London,
16 July, 1869.

SIR,

Having reference to previous correspondence on the subject of inferior construction of railway carriages, I have now the honor to enclose a copy of the letter addressed to Mr. Fowler by the Manager of the Oldbury Carriage Company, in answer to the call made on that Company for explanation. This has reached me too late to admit, ere the mail *via* Marseilles closes, of my commenting on it, but I shall by next mail forward my observations in connection with it.

I have, &c.,

W. C. MAYNE,

Agent General for New South Wales.

The Secretary for Public Works. J.R.—2 Sept., 1869.

The Under Secretary for Public Works. B.C., 2 Sept., 1869.—H.H.

Railway. B.C., 6/9/69.

[Enclosure.]

Mr. W. Stableford to John Fowler, Esq.

Railway Carriage Company (Limited),
Oldbury, near Birmingham,

14 July, 1869.

New South Wales carriages.

Dear Sir,

We beg to refer to your letter of the 10th of December last, containing a statement of complaints received from the Government of Sydney. We need not say that it is with extreme surprise and regret that so serious a complaint should have been made, but we feel assured that when the circumstances are more fully investigated it will be seen the complaint is entirely unfounded.

As you are aware, we have already paid to Captain Mayne a large sum (£89), for making good the second class carriages in the Colony, in consequence of alleged damage caused during the voyage. We think that possibly this may not have been taken into consideration, or that the advices of this payment had not reached the Colony. Some of the charges now made direct from the Colony are repetitions of those made by Captain Mayne, and for which we have paid. It is therefore only just to ourselves that the account now furnished, which contains ascertained damages, should be taken as the one to be considered; and as we can clear ourselves on some of the charges, a balance will remain to our credit, although we do not admit our liability for any of them, as in the first instance the screw couplings were made in accordance with drawings supplied to us. The radial arm and buffer rod we have paid for, although the buffer certainly was not one of ours, if made as reported, as we never make our buffers with plates for heads, but forge them out of the solid bloom. As to the charge of cracked panels and repainting sides of bodies, this we are at a loss to understand, as during shipment, we received a report that one of the cases leaked water; consequently we had it taken from the ship, landed, and opened in the presence of your inspector and the shipping agents. The case was found perfectly dry, and contents uninjured in the slightest degree. Complaints against case 55 were not made until it was in the ship's hold, and when we applied for permission to examine it, were refused. Under these circumstances we consider it very unfair to make us responsible, as there was no more reason for complaint against this case, so far as could be seen when shipped, than there was against the one complained of opened and found perfect; and we feel sure that if the vehicles have received damage, such as panels cracked, paint scratched, it was after arrival in Sydney, either in unloading, during erection, or being allowed to remain exposed to the extreme heat of the sun. The paint was sent direct to the ship from the makers, whose receipt we hold.

I am, &c.,

WILLIAM STABLEFORD,
Manager.

Correspondence respecting relaying Line to Parramatta.

No. 1.

THE SUPERINTENDENT OF WAY AND WORKS to THE ENGINEER-IN-CHIEF FOR RAILWAYS.

Redfern Station,
31 October, 1865.

SIR,

I had the honor, in my report on the state of the lines, dated September 16th,* and again on the 18th instant,* when I forwarded you a statement of the quantity of permanent way material required for renewals and repairs, to draw you attention to the urgent necessity existing for procuring a supply of Barlow rails, sufficient to enable me to keep the line from Sydney to Parramatta in tolerable repair for the present. I recommended that a mile of the line should be relaid with double-headed rails, and that the supply of Barlow's, thus obtained, would probably be sufficient to maintain the line until the projected relaying could be done. I beg respectfully that you will furnish me at once with the necessary rails, chairs,

*General report on lines.
*Do. do.

chairs, &c., to do this work, as the line is daily getting worse, and I have no rails left to replace those now requiring renewal. The sleepers also, for which I forwarded specification a few days since, ought to be procured as soon as possible and put in. I feel the responsibility of maintaining this piece of line without a proper stock of rails for renewals to be very heavy, and I am in constant dread of an accident.

I have, &c.,

DURANT TROTTER.

Something should be at once done towards the reconstruction of the line between Sydney and Parramatta Junction. Originally the length was badly ballasted, the sleepers deficient in number and those used bad, being only saplings of small size, and the rails of a defective description. The cost of maintenance is consequently heavy, and the rails are being rapidly worn out. £20,000 has been placed on the Estimates for 1866 towards relaying a portion of this length, and I propose to lend from the stock received for the Extensions* one mile of single way of rails, &c., so that the relaying may commence at once.

* Order No. 574.
4 May, 1866.
W.H.Q.

These rails to be returned when the vote has passed the Assembly and the rails imported.

Fourteen thousand sleepers are required immediately, and I suggest that tenders be at once called for them, to be delivered at the rate of 2,000 per month, and charged for this year to Revenue or until the vote asked for is passed. J.W.—1/11/65.

To Commissioner. Submitted, 2/11/65.—J.R.

Submitted. This matter is very urgent, and I recommend that Mr. Whitton's suggestions be adopted. J.R.—3/11/65.

Approved, and I hope the recommendations will be carried out without any delay. T.W.S.—3/11/65.

Mr. Whitton, for form of advertisement. B.C., 3/11/65.—J.R.

Advertisement herewith. W.H.Q.—4/11/65.

Mr. Trotter. J.W., *pro* W.H.Q.—6/11/65.

£20,000 to be reserved for the purchase of permanent way materials and sleepers only. Ballast and labour to be charged to Revenue. J.W.—6 Nov.,/65.

Seen. D.T.—6/11/65.

The sum of £20,000 has been voted under Loans on the Estimates for 1866, towards relaying the railway line from Sydney to Parramatta Junction. Mr. Whitton, for information. B.C., 9/4/65.—J.R.

I recommend that an indent be sent home by this mail for nine miles of rails, &c., for single way. (Estimated cost, £13,500.) J.W.—16/4/66.

Submitted, 17/4/66.—J.R.

Approved. J.B.—19/4/66.

Indent enclosed. W.H.Q.—19/4/66.

No. 2.

THE SUPERINTENDENT OF WAY AND WORKS to THE ENGINEER-IN-CHIEF.

G.S.R.

THE additional length of relaying to complete the double-headed rail from Newtown to Sydney on the down line is half a mile, and the additional permanent way material required will be

Order No. 578, 29 May, 1866.	}	1,760 yards rail.
		1,760 chairs.
		3,520 spikes.
		2,000 keys = 4 casks.
		250 pairs fish-plates.
		1,000 fish-bolts.

As ballast has been ordered for one mile only, perhaps the extra quantity now required should be supplied by the same contractor, and at the same rate. The quantity that should be ordered to make a good job of the work is 880 cubic yards.

DURANT TROTTER,

18/5/66.

The use of one mile of rails for this purpose has been sanctioned by the Minister, but whilst relaying I think it would be better to complete the down road as far as Newtown. This I suggested to Mr. Trotter. The sanction of the Minister is now asked for the additional half-mile of rails and the requisite ballast. J.W.—22/5/66.

Submitted, 23/5/66.—J.R.

Approved, 23/5/66.—J.B.

Mr. Whitton. B.C., 29/5/66.—J.R.

J.W.—29/5/66.

Order No. 578. W.H.Q.—29/5/66.

Mr. Trotter to order 880 cubic yards of ballast from the contractor. J.W.—29/5/66.

To be returned. Seen. D.T.—30/5/66.

Memo. No. 2,545. 8 June, 1866. The up-line from Sydney to Newtown to be re-laid with the D.H. rail, by order of the Minister for Public Works. (Order No. 581, of 8th June, /66. W.H.Q.—11 June, /66.

No. 3.

THE SUPERINTENDENT OF WAY AND WORKS to THE ENGINEER-IN-CHIEF.

G.S.R.

THE relaying of the down-line between Sydney and Newtown was commenced on Monday the 28th; and on Saturday evening, the whole being a length of a little more than $1\frac{1}{2}$ mile, was packed and ready for traffic. Owing to instructions received, however, on Friday afternoon, directing me to relay the up-line between the before-mentioned stations, and also to relay that portion of the down-line between Sydney yard and a few chains beyond the southern end of the Botany-street tunnel as soon as possible, the portion of the down-line already relaid will not now be opened for traffic till the close of the present week.

The

The relaying of the up-line will be commenced immediately that the down-line is opened. I have, in addition to those men I could spare from the regular staff on other parts of the lines, employed fifty-three extra men and six boys to do this work; they are now all at work, and will continue so till the up-line is relaid.

DURANT TROTTER.
11/6/66.

Authority of the Minister required for the purchase of 3,600 cubic yards of ballast for relaying the up-line from Newtown to Sydney.

J.W.—12/6/66.

Submitted, 12/6/66.—J.R.

Approved, 12/6/66.—J.B.

Mr. Whitton, B.C., 13/6/66.

Mr. Trotter to get the ballast from present contractor at accepted rates. J.W.—13/6/66.

No. 4.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.
Government Railways—Existing Lines.

Rails for relaying.

THE number of double-headed rails in course of being discharged from the "Dartmouth" and "Sir John Lawrence" I find are only equal to one and a half miles of single way; and as I am most desirous, now that we have commenced relaying, to continue it up to the Petersham Viaduct at least, which will require nearly four miles of rails, I should be glad if the deficiency (two and a half miles of single way) could be lent from the stock now on hand for the Extensions until the arrival of the remainder of the nine miles ordered for this purpose.

The additional traffic during the last three months between Sydney and Burwood (32 trains daily as against 23 formerly) has told very materially upon the old Barlow rails on the length at present proposed to be relaid—to such an extent indeed as to cause me great anxiety, and I do not consider it would be safe to delay their removal a single day beyond what is absolutely necessary.

I believe that the whole nine miles of permanent way materials ordered for relaying the Parramatta line were received some time ago, but being required on the Extensions, were used, and a similar quantity again indented for from England.

JAS. H. THOMAS.—19/6/67.

Engineer-in-Chief for Railways will say whether this suggestion can be carried out. J.B.—19/6/67.

Mr. Whitton, 19/6/67.

Previous papers required. W.H.Q.—20/6/67.

67/1441 and papers herewith. R.M.—24/6/67. Mr. Whitton.

Yes. Six miles of rails, including the length now asked for, have been taken from rails for Extensions; therefore three miles only out of the nine miles ordered for renewals will be available for that purpose.

J.W.—1/7/67.

Order No. 639 herewith. W.H.Q.—5 June, 1867.

Mr. Thomas, 5/7/67.

Seen. J.H.T.—15/7/67.

No. 5.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.
Government Railways—Existing Lines.

Indent for rails, stores, &c.

I FORWARD herewith, for transmission by the next mail, an indent for rails, stores, &c., to be obtained from England.

The mile of rails for the Richmond Railway are required for renewals, as I find there were only the exact quantity required to lay the line imported, and the consequence is we have not more than a dozen rails at present available.

The rails, eight miles of 75-lb. (four miles of single way) are required for replacing the old Barlow metals between Ashfield and Burwood, and chargeable to the special vote of £20,000 for relaying line between Sydney and Parramatta, of which I find there is a balance of £6,686.

As the work is urgently required, I would recommend that some of the rails now lying in the yard for the Extensions be used for it, and replaced with these.

The estimated cost is—

	£	s.	d.
Patent packing	560	0	0
Hose pipe	60	0	0
55-lb. rails	418	0	0
75-lb. rails	5,280	0	0
	<u>£6,318</u>	<u>0</u>	<u>0</u>

JAS. H. THOMAS.—21/12/68.

Withdraw portion for permanent way Sydney to Parramatta, and forward remainder by this mail.

J.S.—29/1/69.

Indent sent, 29/1/69.

Government Railways,
Office of Engineer for Existing Lines,
Sydney Station, 21 December, 1868.

Indent for rails, stores, &c., to be ordered through the Colonial Agent, London.

Patent packing for locomotive purposes—the same as indented for 15/2/67.

10 cwt. $\frac{3}{4}$ inch diameter.

15 " $\frac{5}{8}$ " "

15 " $\frac{1}{2}$ " "

NOTE.—This is very urgently required.

Hose-pipe for locomotive purposes—the same as indented for in 15/2/67.

200 feet India-rubber hose-pipe, 2 inches inside diameter, 3-ply canvas, and capable of withstanding a pressure of 200 lbs. to the square inch.

Rails for renewals, Richmond Line:—

1,760 yards of Ω rails, 55 lbs. to the yard. The same as indented for the Richmond Railway, 17/9/62, with the necessary fish-plates and bolts.

NOTE.—Ebbor Vale Company were the contractors for the last rails of this description.

Rails for relaying Sydney to Parramatta:—

14,080 yards of double-headed rails, 75 lbs. to the yard, with the necessary fish-plates, bolts, chairs, spikes, and keys. The same pattern as imported for the Extensions.

JAS. H. THOMAS.
21/12/68.

No. 6.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.

Government Railways—Existing Lines.

Relaying line, Sydney to Parramatta.

On the 21st December, 1868, I forwarded indent for rails for relaying line between Ashfield and Burwood, and suggested that as the work was urgently required, some of the rails which have been so long lying in the Sydney yard should be used in the meantime, and replaced by those ordered from England.

On the 12th January, 1869, I again drew attention to the matter, pointing out that as we had no more Barlow rails for renewals, the work of relaying was still more urgently required to be proceeded with.

On the 25th January, I forwarded draft advertisement calling for tenders for ballast and sleepers, which I recommended should be inserted at once.

Up to the present time no steps whatever have been taken; and as the rails on this portion of the line are rapidly getting worse, I feel it my duty to call the Commissioner's most serious attention to the matter, as if the traffic should be interrupted through my recommendations not being carried out, I cannot be held responsible.

JAS. H. THOMAS.
12/2/69.

Mr. Whitton to supply P. W. materials.

Minute.—69/568. 18/2/69.

Advertisement for tenders may now go to *Gazette*. As I understand from Mr. Whitton, this should be done at once. J.S.—15/2/69.

Gazette, 15/2/69.

No. 7.

Government Railways—Existing Lines.

Relaying Sydney to Parramatta.

As we shall require some 3,000 yards of ballast, and 4,500 sleepers, for relaying between Ashfield and Burwood, it will be as well to call for tenders at once. I enclose draft advertisement.

JAS. H. THOMAS.
25/1/69.

This must stand over until I receive Mr. Whitton's report on the condition of this line. J.S.—6/2/69.

No. 8.

THE ENGINEER-IN-CHIEF to THE COMMISSIONER.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 15 February, 1869.

Great Southern Railway—Sydney to Parramatta Junction.

SIR,

In attention to your verbal instructions, I have examined the condition of the permanent way on the Southern Railway, between Sydney and Parramatta Junction, and have the honor to submit the following report:—

From

From Sydney to the Parramatta Junction, Barlow rails were originally laid down for a double line of way, and this length was opened for public traffic in September, 1855.

These rails being of a peculiar pattern (and the form of course patented), it was assumed by the inventor that sleepers would be unnecessary, and consequently only one sleeper was placed at the joints, and one sleeper under the middle of the rails.

Shortly after the opening it was found that more sleepers were necessary, and as the line was being worked by the contractor for the construction of the railway, under a lease for twelve months, saplings only were used for sleepers, being split down the middle, and laid with the round side down, to avoid, I presume, the expense of adzing a bed for the rails.

These in the course of a few years began to decay, and other sleepers were substituted of larger dimensions, and more in number, but still without being able to maintain with the patent rails anything approaching to a satisfactory permanent way.

It was therefore deemed advisable as these rails began to wear, to relay the line with rails and chairs similar to the other portions of the Railway beyond the Parramatta Junction; and during the years 1866 and 1867, the double-headed rail with chairs was laid from Sydney to Ashfield, a distance of five miles of double line.

Although this length has been relaid within the last three years, with rails and chairs of the most approved description, so completely has the maintenance been neglected, that some portions of it are more like a contractor's temporary road than the main line of a Government Railway.

There is scarcely a quarter of a mile on any part of this length in a satisfactory state—the whole requires lifting, straightening, and ballasting.

It is of little use relaying unless more attention is paid to the maintenance, as nothing but the greatest carelessness could have allowed a road composed of such good materials to fall into such a disgraceful state.

There was not one man on the line between Newtown and Sydney on the day of my inspection (the 9th instant); and as this is the worst part of the whole length, it was a gross neglect of duty to take off (as I ascertained had been the case) men to attend to works in connection with the proposed new carriage-shed south of the Sydney Tunnel.

From Ashfield to near the 12-mile post the line is still laid with the original Barlow rails, but in such a condition from defective rails and rotten sleepers, that I consider it unsafe for the trains to run over at the present rate, and I strongly advise the Commissioner to limit the speed of all trains over this portion (between Ashfield and the 12-mile post) to twenty miles an hour.

There is literally no ballast on this length but sand and a little burnt clay; the few stones that have been thrown in various places on the top of the sleepers are of little use, being much too large for packing. In fact the whole of this length should be relaid at once; but in doing so proper stone ballast should be laid for at least six inches under the sleepers, and after the rails are laid the road should be properly boxed up to within two inches of the level of the rails between, and within one inch of the level on the outside of the rails, and in the space between the two lines of way.

In several instances the embankments on this length are too narrow to receive the full width of ballast, and some of the cuttings to allow of the proper width of ballast being used with the open side drains now existing.

These, however, are defects which can be easily remedied, and should be attended to at once.

From near the 12-mile post to the Parramatta Junction, a distance of about a mile, the road is in much better condition. It was relaid in 1863 with a single-headed rail, fish-pointed, and fastened to cross sleepers with wrought iron spikes, but even this length requires additional ballast before its condition can be considered satisfactory.

The bad state into which the road has been allowed to fall can be attributed only to ignorance of what constitutes a good permanent way, or to negligence in its maintenance.

True economy is shown in the management of a railway when the whole of the works are maintained in the best possible condition; and there is no more certain sign of incompetence on the one hand and extravagance on the other, than to allow the permanent way to fall into the lowest stage of disrepair before any expenditure is considered desirable.

New Carriage-shed.

I wish to draw attention to the position selected for a new carriage-shed, which is being erected about a quarter of a mile on the Newtown side of the Sydney Tunnel, adjoining the main (up) line.

Whenever carriages are taken into or removed from this shed, both the main lines must be blocked, or the engine must run on the wrong line. In either case it will be extremely inconvenient, if not absolutely dangerous. This shed should have been erected in the station-yard, where easy access could have been had to it at all times, without in any way interfering with the main line beyond the immediate station-yard.

To provide a convenient space for the additional shops and sheds, the whole station-ground should be excavated to the level of that portion of the yard on which the new goods shed is being erected, and I recommend that this be done at once.

Signals.

I feel it an imperative duty again to call attention to the defective signal arrangements in the station-yard at Sydney, which are totally inadequate for the protection of the public travelling on the railway.

To protect the station-yard as it ought to have been protected long ago, proper junction signals should be erected near to the tunnel, at the junction of the goods lines with the main lines.

These signals should be above the tunnel, so as to be seen a considerable distance from the station-yard. The pointsman's box should also be above the tunnel, so as to give him a clear view of the whole yard, and of trains approaching the station from the south.

Distance signals should also be erected for the various branch lines, as well as for the main line, and the whole should be worked and controlled by one man.

Junction

Junction for goods lines.

I may remark that the goods lines have only what is termed a single junction, and this is formed with the down line; consequently, all up-trains will have to run (with a long train) down to the passenger station, shunt back through a crossover road on to the down-line before being able to place the trucks into the goods sidings. A proper double line junction must be formed before the goods traffic can be satisfactorily worked.

I have, &c.,
JOHN WHITTON.

THE COMMISSIONER to THE ENGINEER-IN-CHIEF.
Government Railways.

Permanent way materials required for relaying line Parramatta to Sydney.

WITH reference to my verbal request, I now direct that the Engineer-in-Chief will give the necessary instructions to supply from stocks on hand the requisite permanent way materials for relaying the Sydney and Parramatta Line—the materials to be replaced by indent.

JOHN SUTHERLAND.

Mr. Whitton. 19/2/69.—R.M.

18/2/69.

Order No. 825.—17 Feb., 1869. Eight miles of rails = four miles of road, with the necessary chairs, fish-plates, bolts, nuts, spikes, and keys. W.H.Q.—19/2/69.

No. 10.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.
Government Railways—Existing Lines.

Relaying line between Ashfield and Burwood.

HAVING observed that the sleepers and ballast have been advertised for, and also informed that the storekeeper has had a requisition sent to him to deliver the necessary quantity of rails, I should be glad to have the papers forwarded to me for my information, that no time may be lost in commencing this important work.

J. H. THOMAS,
p. ROBT. SHERIDAN.

This work should be commenced and carried out as quickly as possible. The papers in question are with the Cabinet.

J.S.—24/2/69.

Mr. Thomas, B.C.

Seen. As I understand that Mr. Whitton has made a report on the state of the Parramatta line, I respectfully request that in justice I may have at least an opportunity afforded me of seeing it; and this, I submit, is not an unreasonable request, seeing that I alone am responsible for this as well as all other portions of the existing lines of railway.

J.H.T.—25/2/69.

Mr. Thomas will perceive, in reference to my Minute of 24/2/69, the papers in question are with the Cabinet.

J.S.—26/2/69.

Mr. Thomas, 26/2/69.

No. 11.

THE ENGINEER FOR EXISTING LINES to THE COMMISSIONER.
Government Railways—Existing Lines.

I GATHER from the discussion (as reported in the papers) on the Estimates for this branch of the department, that there were some charges against me now under the consideration of the Government. If such is the case it has never been intimated to me, and I certainly feel that I have been unfairly dealt with.

I am aware that an officer of the department, who both the present and late Minister have remarked the animus he has ever displayed in any matters touching my management, had been appointed by the Government to report on the rolling-stock and the Parramatta line, and have heard various rumours regarding these reports, but I have not seen them; and if they contain charges questioning my management, I think that in justice I ought to have been called upon to make any remarks before being considered by the Cabinet, for as it is they have but an *ex parte* statement before them, and that from a personal enemy, and one also interested in proving that my management is a failure, as I felt bound to alter the system adopted by him when he had charge of the same department, more especially with regard to my efforts to have the rolling-stock made in the Colony.

It may be unusual for officers to notice any discussion that takes place in the Assembly, but this being one in which my personal and professional reputation is questioned, I feel I am perfectly justified in asking that an opportunity at least may be given me of rebutting such charges.

JAS. H. THOMAS.—4/3/69.

Mr. Thomas' impressions as to the discussions referred to are not quite correct: no charges have been preferred against him, but Mr. Whitton has been requested to and has reported on the condition of the rolling-stock and on the condition of the Parramatta line, which reports are now under the consideration of the Cabinet. Mr. Thomas may rest assured that if any charges arise from the reports in question, he shall have every opportunity of meeting them at the proper time.

Mr. Thomas.

No. 12.

Government Railways.—Minute Paper.

Relaying line, Sydney to Parramatta.

WITH reference to previous papers in this case, I shall be glad to be informed what portion of the line Mr. Thomas proposes to relay.

I also require an estimate of cost—

Permanent way materials
Laying
Sleepers
Ballasting

as I desire to obtain the sanction of the Government for the expenditure, which will far exceed the available balance on the vote.

Mr. Thomas.

J.S.—9/3/69.

I only propose relaying with the double-headed rail from Ashfield to half a mile beyond Burwood at the present time, as there is more running between Sydney and Burwood than upon any other portion of our lines; keeping the best of the Barlow rails taken up to renew when required on the remaining distance to the Junction.

The following is the estimate of cost, viz. :—

Permanent way materials	£5,280	0	0
Laying	1,200	0	0
Sleepers	1,162	10	0
Ballasting	1,150	0	0
	£8,792	10	0

I give the estimate as asked for; but as the ballast and laying is not paid from capital, but working expenses, no sanction of the Government is required for these items.

J.H.T.—11/3/69.

No. 13.

THE ENGINEER-IN-CHIEF to THE COMMISSIONER.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 29 June, 1869.

Relaying Parramatta Line.

I ENCLOSE for the information of the Commissioner a memorandum from Mr. Mason relative to the condition of that portion of the Southern Railway between the Burwood Station and the 12th mile post from Sydney. I reported in February last that no time should be lost in relaying this portion of the line, and I take this opportunity of again drawing the Commissioner's attention to the matter, and advise that it be immediately relaid.

A sufficient number of permanent way rails &c., can be spared from the stock ordered for the Extensions to relay as far as the 12th mile post, but not up to the Parramatta Junction; and I therefore recommend that the relaying from the 12th mile post to the Junction be postponed until rails &c., can be obtained from England.

The cost of relaying, taking up the old road, and ballasting, is charged to revenue, but the permanent way materials and sleepers are charged to capital. The vote however of £20,000 obtained for this service is nearly exhausted, and I advise that executive authority be requested to anticipate a vote of £25,000 to be afterwards obtained from Parliament.

Twenty-five
thousand pounds

I consider it absolutely necessary that this work be at once carried out, in order to provide for the public safety.

JOHN WHITTON.

Mr. Whitton's attention should be invited to previous papers, especially 69/883. J.S.—12/7/69.

Mr. Whitton.

See memo. 69/326 herewith. H.H.Q.—15/7/69.

Cabinet, 3/8/69.—J.S.

[Enclosure.]

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 28 June, 1869.

Memorandum to Engineer-in-chief.

On inspecting the permanent way and works on the 26th instant, between Burwood Station and Parramatta Junction, I found the permanent way from Burwood to about 10 chains beyond the 12th mile post in very bad condition; the sleepers are nearly all rotten, and the rails cannot be properly secured to them. There is very little ballast on the line of a suitable character; the rails in some instances are down to formation level. The whole of this length is laid with the Barlow rails, which are nearly worn out; in fact the whole of the materials forming the permanent way on this portion are so bad that it is impossible to keep the line in proper repair, and I therefore strongly recommend for the public safety that no time be lost in relaying this portion of the line.

From a little beyond the 12th mile post to Parramatta Junction this line is tolerably well ballasted with broken stone, and laid with the T rails; but as these rails are very much worn and will very soon require to be renewed, I think it would be advisable and most economical to relay this at the same time.

From Homebush Station to the 9½ mile post I found the permanent way so exceptionally bad that I consider it unsafe to run trains over that portion at a greater speed than 15 miles an hour.

It is my intention to report fully upon the condition of the works on all the lines, as soon as I shall have finished their inspection; but I deemed it prudent that no time should be lost in reporting upon this portion, owing to its very defective state and requiring immediate attention.

WILLIAM MASON.

See memo. 69/278. W.H.Q.—29/6/69.

No. 14.

MINUTE FOR CABINET.

Department of Public Works,
Sydney, 3 August, 1869.

THERE are submitted herewith papers on the subject of relaying the Parramatta Line.

Mr. Whitton reports that this work is an urgent one, and proposes that executive authority should be obtained for anticipating a sum of £25,000 to be voted by Parliament for this service.

Minute of Ex. Council, 27 August, 1869.

Submit Executive Minute. J.S.—29 8/69.

Cabinet approve.—JOHN R.

No. 15.

MINUTE FOR THE EXECUTIVE COUNCIL.

Department of Public Works,
Sydney, 29 August, 1869.

I HAVE the honor to request the authority of His Excellency the Governor and the Executive Council for the anticipation of a sum of £25,000 which it is intended to provide for on the Supplementary Estimates of this year for relaying the Railway Line to Parramatta.

JOHN SUTHERLAND.

THE Executive Council advise that authority be granted in anticipation of the sanction of the Legislature for the appropriation of the sum of twenty-five thousand pounds (£25,000) to the service herein referred to.

ALEX. C. BUDGE,
Clerk of the Council.

Minute 69/35, 30 August, 1869.

Confirmed, 3 September, 1869.

Appd. B.—6/9/69.

Mr. Whitton, for information. To be returned.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

*Specification for Locomotive Engines.**Class 1.*

Tender engine, with inside cylinders, 16 in. diameter and 24 in. stroke; leading and driving wheels 5 ft. 6 in. (coupled), and trailing wheels 3 ft. 9 in.

To be constructed in every respect the same as Nos. 1, 2, 3 and 4 engines, built by Messrs. Stephenson & Co., and now employed on the Southern and Western Railways.

Class 2.

Tender engine, with inside cylinders, 14 in. diameter and 22 in. stroke; leading and driving wheels 4 ft. 6 in. diameter (coupled), and trailing wheels 3 ft. 6 in. in diameter, to be constructed in every respect the same as No. 5 engine, built by Messrs. Hawthorn & Co., and now employed on the Southern and Western Railways.

Class 3.

Tender engine, with outside cylinders, 14 in. diameter and 22 in. stroke; driving wheels, 5 ft. 6 in. diameter, and leading and trailing wheels 3 ft. 6 in. diameter.

To be constructed in every respect the same as No. 6 engine, built by Messrs. Fairbairn & Co., and now on the Great Southern and Western Lines.

Class 4.

Tender engine, with outside cylinders, 15 in. diameter and 22 in. stroke; driving wheels, 5 ft. 6 in. diameter, and leading and trailing wheels, 3 ft. 6 in. diameter.

To be constructed in every respect the same as No. 7 engine, built by Messrs. Manning, Wardle & Co., and now on the Great Southern and Western Railways.

Class 5.

Tank engine, with outside cylinders, 15 in. diameter and 22 in. stroke; driving wheels 5 ft. 6 in. diameter, and leading and trailing wheels 3 ft. 6 in. diameter.

To be constructed in every respect the same as Nos. 8 and 12 engines, built by Messrs. Manning, Wardle & Co., and now on the Southern and Western Lines.

Class 6.

Tender engine, with outside cylinders, 15 in. diameter and 20 in. stroke; driving wheels 5 ft. 9 in. diameter, and leading and trailing wheels 3 ft. 6 in. diameter.

To be constructed in every respect the same as Nos. 9 and 11 engines, built by Messrs. Manning, Wardle & Co., and now on the Southern and Western Lines.

Class 7.

Tender engines, with outside cylinders, 16 in. diameter and 22 in. stroke; driving and leading wheels (coupled) 5 ft. diameter, and trailing wheels 3 ft. 6 in. diameter.

To be constructed in every respect the same as No. 13 engine, built by Messrs. Manning, Wardle & Co., and now on the Great Southern and Western Lines.

Class 8.

Tender engine, with inside cylinder, 16 in. diameter and 20 in. stroke; driving wheels 6 ft. diameter, and leading and trailing wheels 3 ft. 6 in. diameter.

To be constructed in every respect the same as Nos. 14, 15, and 16 engines, built by Messrs. Beyer, Peacock & Co., and now on the Southern and Western Lines.

Class 9.

Tender engine, with inside cylinders, 18 in. diameter and 24 in. stroke; leading, driving, and trailing wheels, 4 ft. in diameter, and all coupled.

To be constructed in every respect the same as Nos. 17 to 22 inclusive, built by Messrs. R. Stephenson & Co., and now on the Great Southern and Western Lines.

Class 10.

Tender engine, with outside cylinders, 18 in. diameter and 24 in. stroke; leading wheels 3 ft. in diameter, with bogie arrangements: driving and trailing wheels 5 ft. 6 in. diameter, coupled.

To be constructed in every respect the same (with the exception of the diameter of driving and trailing wheels being 5 ft. 6 in., in place of 5 ft. 9 in.) as Nos. 23 to 28 inclusive, built by Messrs. Beyer, Peacock & Co., and now on the Great Southern and Western Railways.

Class 11.

Tank engines, with inside cylinders, 11 in. diameter, and 18 in. stroke; leading, driving, and trailing wheels, 3 ft. in diameter, and all coupled.

To be constructed in every respect the same as Nos. 29, 30, and 31 engines, built by Messrs. Manning, Wardle & Co., and now on the Windsor and Richmond Railway.

Class 12.

Tank engines, for working steep gradients, see detailed specification.

J. H. THOMAS,
Engineer.

NEW SOUTH WALES RAILWAYS—EXISTING LINES BRANCH.

Specification of Goods Tank Engines for the Great Railway.

The work to be executed under this contract comprises the supplying and delivering of engines that class known as six-wheeled coupled tank engines, having the following general dimensions:—

	ft.	in.
Diameter of cylinder	0	17
Length of stroke	0	24
Diameter (outside) of boiler	4	4
Number of tubes, 196 (more or less).		
Length of do.	11	1
Diameter of do. (external)	0	2
Distance from centre to centre of cylinders	2	5½
From head of frame to centre of leading wheels	5	8½
Distance between centres of leading, driving, and trailing wheels	5	9
Wheel base	11	6
From centre of trailing wheel to end of foot plate	7	3
Total length of frame	24	0½
Width between frames (inside measurement)	4	1
Thickness of frames	0	1½
Diameter of wheels	3	9
Length of fire-box (casing)	5	9
Do. do. inside	5	3
Area of fire-grate	19	3
Diameter of axle bearings	0	7½
Length of do. do.	0	6½
Ports (cylinder)	14 in. × 0	1½
Exhaust... ..	14 in. × 0	3½
From centre to centre of buffers	5	9
Height of buffers above rail	3	4

BOILER.

The boiler is to be constructed of the form and dimensions shown on the drawings, lap-jointed, and all the plates used in manufacture must be $\frac{3}{8}$ inch thick; and both these and the angle irons must be of the very best Low Moor iron, or such other as may be approved of by the Engineer for Existing Lines of Railway. Plates and angle iron.

The rivets to be $\frac{3}{4}$ in. diameter, of the best Yorkshire iron; the lap of plates to be $2\frac{3}{4}$ inches, and the pitch or distance between centres of rivets to be $1\frac{1}{4}$ inch. Great care must be observed that all the plates and angle irons are brought together before any rivets are put in, and that all the holes perfectly correspond with each other. Should any of them not do so exactly, they must be rimmed out until perfectly fair one with another, and a rivet made expressly to fit the enlarged opening thus caused. The heads of all the rivets must be properly set up, and all the joints perfectly caulked on both sides, care being taken in so doing that the plates are not injured. Rivets and riveting.

The fire-box casing is to be 5 ft. 9 in. long, and made of half-inch plates of the same quality of iron as that on the barrel of the boiler, and bent on the edges to a curve of 4 in. radius. The rivets and riveting to be performed in the same careful manner, and with the best material as that specified for the other portions of the boiler. Fire-box casing.

The fire-box is to be of copper, 5 ft. 3 in. long, and to have a tube plate 1 in. in thickness; the crown to be $\frac{5}{8}$ in. and the other plates $\frac{1}{2}$ in. The tube plate is to be pierced to receive 196 tubes (more or less), of 2 in. diameter, and the holes must be so set out as to insure a uniform distance between them; and no more chamfer is to be taken off their edges than is necessary to prevent them cutting the tubes. The fire-box stays to be made of copper, $\frac{7}{8}$ in. diameter; those for securing the fire-box to the casing to be placed 4 in. from centre to centre. They are to be screwed with a good sharp clean thread, with that portion in the water space turned off. Each stay must fit perfectly tight, with a full thread in the hole as well as on the stay. The holes in casing and fire-box must be true to each other, so that the stay through both may be perfectly square. Each stay must be well riveted over on both ends. Fire-box.

The boilers to be stayed by gussets and double angle iron at smoke-box end, most carefully fixed; crown of the fire-box must be secured as shown on the drawings.

Four mud-plugs and doors must be placed on the sides of the fire-box casing, level with the top of the fire-box, two being on each side, and placed alternately with each other. Four at the corners of the casing, immediately above the water space, bosses of which to be forged on, and two in the smoke-box, fair with the inside of the bottom of the barrel. In this latter case the plug must be secured directly into the plate without a brass seating. There must also be two lead safety plugs in the top of the fire-box. Mud-plugs and doors.

The tubes to be brass, of the best description of metal, 196 (more or less) in number, and No. 12 gauge; they are to be 2 inches outside diameter, secured by approved steel ferrules. Tubes.

The ordinary working pressure will be 120 lbs., and the boiler must be tested by hydraulic pressure; hot water being employed to 240 lbs. on the square inch, and afterwards in steam to 120 lbs. Testing.

The smoke-box top, front, and door to be $\frac{1}{2}$ inch thick; the two former to be made of good plate, with a smooth face, and the latter to be made of best Yorkshire iron; the rivets countersunk and filed flush on the outside. Door and fastenings to be made, and a tube plate of the best $\frac{7}{8}$ inch Low Moor plate. Smoke-box.

To be 16 inches diameter, and made of $\frac{1}{2}$ inch plate, flush-jointed outside, and welt inside, with the top standing 14 feet above the rails, having 3 inches taper. Chimney.

Frame-bolts of all kinds must be turned and accurately fitted and driven into their places, the holes being rimmed out perfectly fair and true to receive them. Frame-bolts.

The ash-pan to be constructed of $\frac{1}{4}$ inch plate and $1\frac{1}{2}$ inch angle iron; both the front and back ends must be provided with doors of $\frac{1}{4}$ inch plate, hinged by upper edge, and gear to work each from the foot-plate. A well is to be formed on bottom, by $1\frac{1}{4}$ inch angle iron, riveted all round. Ash-pan.

The

- Spark-catcher.** The mouth of the blast pipe is to be covered by one of Moriarty's Spark-arresters, with $\frac{1}{8}$ inch spaces at top.
- Fire-bars.** The fire-bars must be made not only to change with each other, but with other engines of the same class.
- Wheels.** All the wheels are to be entirely made of wrought iron; they must be turned and bored, and have keyways cut strictly to a gauge, that they may all be precisely alike; and each wheel must be drawn on to its respective axle by hydraulic power, hot water being used to expand the boss; all the rims must be correctly turned to one gauge to receive the tires, so that the tires bored for one will fit any of the wheels equally as well on either of the engines.
- Gauge of Railway.** The gauge of Railway is 4 feet $8\frac{1}{2}$ inches.
- Tires.** The best steel rolled weldless tires are to be provided from Monk Bridge, Leeds, those on the driving wheels being without flanges; they must be bored out to the exact shape of the rims of the wheels, into which they are to be shrunk, and properly secured; they are to be turned or ground to a template.
- Axles.** The axles to be of the very best manufacture, having journals 7 inches diameter and 9 inches long.
- Gear.** Eccentrics to be of cast iron, $5\frac{1}{4}$ inches throw, and to be keyed fast on their places, the greatest possible care being taken before this is done that their correct positions upon the shaft have been ascertained. The eccentric straps and other portions of the gearing to be of the best Low Moor iron, case-hardened, and re-cleaned up. The wrought iron-work to be all composed of Low Moor, or of equally approved iron, and got up with the best finish. All the pins must be of shear steel, and hardened.
- Frames.** Longitudinal frames to be of the best iron in one plate, 2 feet 10 inches extreme depth, and $1\frac{1}{2}$ inch thick, planed inside. All the holes must be marked and drilled to one template, and rimmed out to the exact size given; and every bolt securing the cylinders, stays, &c., &c., to be turned to gauge, fitted and driven tight into its place. All the bolts must be carefully made, and turned up to the exact size. When the frames, cylinders, &c., are all bolted and riveted together, and before the boiler and wheels and axles are put into their places, the correctness of all the dimensions, and the truth and accuracy of all the work, must be carefully checked by diagonal as well as longitudinal and transverse measurement. The frames must be strictly square and free from cross windings, and the guard-plate perfectly square with the engine in all directions.
- Cross stays.** The feet and angle irons on every stay, and of every kind, where they bed upon the frames, must be planed perfectly true, and to the exact length required, so that they fit perfectly to their places without setting or twisting; and every hole must be rimmed out that it may be perfectly fair throughout, as specified for the frames. No liners or filling pieces will be allowed to make up imperfect work for dimensions.
- Axle-boxes.** The axle-boxes to be of best cast iron, fitted carefully to template both inside for the steps and outside for the rubbing pieces. The steps to be of best hard gun-metal, and to be confined by iron boxes underneath the journals. Care must be taken in fixing the oil pipes in the top of the axle-boxes, that they be so placed as to convey all the oil directly on the top of the journals, and that it is not wasted by running away between the side of the brass and the inside of the box. The axle-box bottoms, or oil cellars, are kept up in their places by bolts as shown. All the steps must be perfectly bedded into their respective axle-boxes, and well fitted on the journals. The leading and trailing wheel boxes are to have half-inch lateral play, but the driving wheel boxes must have no more space allowed between the boxes and rubbing pieces than just sufficient to allow each axle-box to slip readily and freely into its place.
- Rubbing pieces on horn plates.** The rubbing pieces on horn plates to be of hard and strong cold blast cast iron, correctly fitted.
- Springs.** All the springs must be made of the very best spring steel. Each spring must be tested before being put in its place, by being weighted until the camber has been taken off, and on the removal of the weight the spring is found to resume its original form.
- Cylinders.** The cylinders to be 17 inches diameter, and 24 inches stroke, placed inside the framing, and inclined as shown, made of the very best iron, perfectly free from honeycomb or any defects whatever; they must be truly bored out, the front and end being bell-mouthed $\frac{1}{8}$ of an inch, so that the pistons may be easily put in their places. All the joints to be planed, turned, or scraped to a true surface, so that perfect joints can be made with a coat of very thin linseed oil laid on with a brush. Each cylinder to be bolted to the frames with $1\frac{1}{2}$ -inch bolts. It is most essential that those as well as all the other bolts should be carefully turned, fit perfectly tight in good true holes. Steam ports, 14 x $1\frac{3}{8}$. Exhaust port, 14 x $3\frac{1}{2}$. Lap of valve, $1\frac{1}{4}$ inch outside, $\frac{1}{8}$ inside, lead bare $\frac{1}{4}$ inch, full travel 5 inches.
- Pistons.** The body and plate of the pistons to be of the best toughened cast iron, and the rings of gun-metal; the latter must be turned $\frac{1}{8}$ inch larger than the diameter of the cylinders with a $\frac{1}{4}$ inch cut out of them, and then the two ends brought close together, and returned to the exact diameter of cylinder, and properly fitted with a stop. The weight of the piston must be carried upon the packing rings, and not upon the body of the piston. All the flat surfaces must be well and perfectly scraped, and made steam-tight.
- Piston rod.** The piston rods to be $2\frac{3}{8}$ inches diameter, and made of steel.
- Slide valves.** The slide valves to be set with a lead of $\frac{3}{16}$ of an inch, and to be made of the best gun-metal.
- Regulator.** The regulators to be made of gun-metal in joints, scraped up to a perfect surface, and the lever that works the valve must fit on without shaking, and work smoothly throughout the whole stroke of the valve.
- Slide bars.** The slide bars to be of steel.
- Slide blocks.** The slide blocks to be of cast iron, and to have lubricating boxes.
- Connecting rod.** The connecting rod to be of the best fagoted iron, and to be bright all over.
- Injectors.** The boiler is to be fed by a pair of No. 10 Giffard's Injectors.
- Feed pipes.** The feed pipes to be of copper, No. 8 wire gauge, and must be brazed on the inside with hard solder; care to be taken that the pipes are so set that the flanges of the joints come fairly to their places without any spring upon the pipes.
- Steam pipes.** The steam pipes to be of copper, No. 14 gauge, and all the flanges must have scraped surfaces.
- Hand rails.** The hand rails to be of iron, $1\frac{1}{2}$ inch diameter, and secured to saddle tank with brass studs.

The whole of the boiler and fire-box to be covered with white pine, well-seasoned, in strips of not more than $2\frac{1}{2}$ inches wide by 1 inch thick, tongued into each other by hoop iron $\frac{7}{8}$ inch wide, and the whole well and neatly covered by sheet iron, No. 18 wire gauge, and well secured by brass hoops. Cleaving.

Two $3\frac{1}{2}$ -inch safety-valves, of Naylor's or Ramsbottom's arrangement, to be placed over the fire-box. Safety-valves.

One glass gauge, and three gauge-cocks, from pattern to be supplied. Gauges.

The whistle to be made of hard brass, to pattern. Whistle.

All bolts and nuts must in every instance be to Whitworth's standard thread. Bolts and nuts.

The saddle tank, placed over the barrel of boiler, is to be made of $\frac{1}{8}$ -inch best sheet iron, stiffened with ties inside, to be well riveted together, and the points of the rivets neatly snapped. The heads of all the rivets must be properly set up; all joints properly caulked. The plates to be riveted together with $\frac{1}{2}$ -inch rivets. Tank.

Buffer beams, $1\frac{1}{4}$ inch rolled iron, well gusseted, to be fitted with draw-hooks and chains at both ends of the engines. The buffers to be Corlett's patent. Buffer beams and buffers.

Four sand-boxes to be provided, with copper pipes, &c., complete. Sand-boxes.

All the working parts to be furnished with perfect means of lubricating. General fittings.

The glass water-gauge must be so placed that the lowest visible part of the glass is 3 inches above the highest part of crown of the fire-box. Lamp-holders to pattern to be fixed as instructed.

Cocks to be supplied and fitted for cylinders, blow-off, scum-water, &c. (of which patterns will be supplied); to be of gun-metal.

The boiler and fire-box casing to have two coats of red oxide paint, previous to having the lagging put on, and the wood with two coats of lead colour. Painting.

The frames, wheels, tank, and all other necessary parts of the engine, to have two good coats of lead colour previous to the filling, which must be done with three coats rubbed to a perfectly smooth surface, and with another coat of lead colour previous to the finishing, which is to be done in the usual way adopted at the Redfern Railway Works.

GENERAL STIPULATIONS.

Throughout the whole the very best materials and workmanship is to be used in every way equal to the best class of locomotive engines; and the manufacturer will be held responsible for their safe delivery at Material and workmanship.

and for all defects of whatever kind which may arise from imperfect workmanship or material, until they shall have run a distance of (1,000) one thousand miles with proper loads upon some portion of the Railway for which they are intended.

The whole of the engines are to be completed, delivered, and set to work entirely to the satisfaction of the Engineer for Existing Lines of Railway, within Time.

The Engineer, or any officer appointed by him, shall have full liberty, at all reasonable times during the construction, to examine all material or work which may be intended for them, and to reject the whole or any portion that may be thought necessary; and any so rejected shall immediately be replaced in a satisfactory manner by the contractor, and at his cost. Inspection.

The dimensions figured upon the drawings to be preferred in all cases to measurement by scale. Dimensions on drawings.

While the foregoing specification sets forth the general detail of the engines, the Engineer reserves the option of such modifications as he may find necessary as the work proceeds, so long as the general dimensions are not interfered with, without any claim of extra payment being allowed. The drawings and specification must be taken to explain each other; but should there be any work and materials which may be reasonably and obviously considered necessary for the proper completion of the engines, but which has not been shown on the drawings or described in the specification, or that may be mentioned or implied in one only, the same must be considered as in the contract, and the contractor must find whatever may be necessary to complete the engines according to the true intent and meaning of the specification and drawings; and in all cases of defective description or any ambiguity, the explanation given by the Engineer shall be binding upon the contractor. Right of altering details.

The Engineer reserves to himself the power of making any deviation from or additions to the engines, without invalidating the contract; the value of such deviations, alterations, or additions to be ascertained and allowed for by the Engineer, at such rates as he shall consider to bear a due proportion to the other work of the engines, and the value thereof added to or deducted from the amount to be paid to the contractor, as the case may be.

In the event of the construction of the engines not proceeding with that despatch which the Engineer may consider necessary, or the contractor fails from any cause to proceed in the execution of his contract, the Commissioner shall have full power and authority to cancel the contract, as far as relates to the work remaining to be done; and in such case the moneys which shall have been previously paid to the contractor on account of the work executed shall be taken by him as full payment for all the work done and materials supplied under the contract; and upon notice in writing, under the hand of the Commissioner, that he, under the authority of this condition, cancels the contract, being served upon the contractor, or left at his last known place of abode, the contract shall be cancelled; and thereupon all sums of money that may be due or unpaid to the contractor, together with the portions of the engines left unfinished, and all sums of money named as penalties for the non-fulfilment of the contract, shall be forfeited and become payable to the Commissioner, and the said portions of the engines shall become and be the absolute property of the Commissioner, and with the moneys so forfeited and payable as aforesaid, shall be considered as ascertained damages for breach of contract. Cancellation of contract.

The Commissioner will afford every facility to parties undertaking this contract, so far as the selling of any stores, for which cost price, with 10 per cent. added, is to be paid, or the loan of any tools he may possess, and which can be conveniently spared at the time, to be charged for as may be arranged. Facilities afforded.

The contractor will have to satisfy himself of the accuracy of the drawings, and lay down a full-size working drawing of the engine, showing all the details.

The tender is to include all expenses of removing, delivery, and trials, as well as all the necessary working plans, tracings, &c.

If the contractor become insolvent, have his estate placed under sequestration, or shall make an assignment of his estate for the benefit of his creditors, it shall be lawful for the Commissioner, without previous notice to the contractor, or to the Official or other Assignee, or Assignees of his insolvent estate, Bankruptcy or insolvency.

or to the Trustee or Trustees under the assignment, to take such of, and all portions of the engines, whether completed or not, from the contractor and of the Assignees or Trustees of his estate, and re-contract with any other person or persons to proceed with and complete the said engines, upon such terms, stipulations, and conditions as shall be deemed expedient.

Security.

The contractor will be required to provide two approved persons as sureties, to enter with him into a bond to the Commissioner for Railways, in the penal sum of for the proper performance and completion of the contract. The names of the persons proposed by him as sureties must be stated in the tender, the Commissioner for Railways reserving to himself the power of rejecting such proposed sureties, should he deem it advisable to do so.

Should the contractor fail to procure such persons as may be deemed by the Commissioner to be eligible sureties, within days from the acceptance of the tender, or should the contractor fail to execute the contract for the due performance of the work, or to execute and to procure the due execution, by the persons so approved of, as sureties of the bond required for securing the due completion of the work to be done under the said contract, within days after the acceptance of such persons as sureties has been notified to him, the Commissioner will have the option of, and full power and authority to declare such acceptance to be annulled.

Payment.

Payment will be made on the Engineer's certificate as the engines progress, unless same shall become not payable by reason of anything contained in these conditions up to the date specified for the completion of the contract, in the proportion of of the value of the work satisfactorily executed, and the remaining will be paid after the Engineer has certified that the whole of the engines have been completed to his entire satisfaction.

Interpretation clause.

The words "or any officer appointed by him," in these general conditions, shall mean any person who may from time to time be appointed by the Engineer for Existing Lines of Railway, to supervise the work; and the words "Engineer for Existing Lines" or "Engineer" shall mean the Engineer for Existing Lines of Railways for the time being of the Commissioner for Railways.

J. H. THOMAS,
Engineer for Existing Lines of Railways.

GOVERNMENT RAILWAYS, NEW SOUTH WALES.—EXISTING LINES BRANCH.

Specification for 1st and 2nd class Radial Carriages for Western Extension.

1st class.

These are to be saloon carriages with first class compartments at each end, to have wrought-iron under-frames running on eight wheels, the end pairs working in radial axle-boxes, same as No. 18 second class, and not with the bar, as in the imported cars of this class. The length to be 35 ft.; width, 7 ft. 9 in.; and height, 7 ft.

They are to be fitted with spring seats and backs, covered with morocco leather.

The panelling and painting is to be performed as specified for the other first class carriages. In all other respects they are to be the same as the imported carriages.

Composite.

These are to be divided into three compartments, the centre being fitted up as first class, and the two ends as second class. To have wrought-iron under-frames, running on eight wheels, the end pairs working in radial axle-boxes, the same as No. 18 second class. The length to be 35 ft.; width, 7 ft. 9 in.; and height 7 ft.

The painting and panelling to be executed in the same manner as specified for the other first class carriages.

In all other respects they are to be the same as the imported carriages.

2nd class.

The second class are to be divided into five compartments, that in the centre being used as a break and luggage van.

They are to have wrought-iron under-frames, running on eight wheels, the end pairs working in radial axle-boxes, as in No. 18 of the same class.

Panelling and painting as specified for other second class carriages.

In all other respects they are to be the same as the imported carriages.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES.—EXISTING LINES BRANCH.

Specification of First-class Carriage.

General arrangement to be the same as No. , now on the Great Southern and Western Railways.

The first class carriages are to be 18 ft. long, 7 ft. 4 in. wide, and 6 ft. 4 in. high, divided into three compartments, fitted with spring seats, and in all other respects the same as that specified for the composite carriages.

The panels must be of well-seasoned cedar, or other approved timber; no nails, or wood screws being used in their fixture, but they are to be grooved into bottom, sides, rails, and pillars, with canvas glued on to them previous to fixing, and when fixed to receive a second lining of canvas and glue, then painted with two coats of oil colour.

Cloth, lace, and trimmings for the interior to be of the best quality.

Inside fittings to be of well-seasoned cedar and receive three coats of varnish.

All the glass in the windows to be of the best plate, and not less than $\frac{1}{4}$ inch thick.

J. H. THOMAS,
Engineer.

GOVERNMENT

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification of Composite Carriage.

The carriages required under this specification are known as "Composite Carriages," the general arrangement being the same as No. 17 built by Messrs. P. N. Russell, and are to consist of three compartments, the centre being a first-class saloon, and the ends second-class compartments with single row of seats.

The 1st class or saloon compartments to be 12 ft. 6 in., and the 2nd class compartments 3 ft. 9 in. each, making the extreme length of the body 20 ft. out to out; the extreme width to be 7 ft. 9 in. over elbow with turn under of $2\frac{1}{2}$ inches on each side, making width of bottom 7 ft. 4 in.; the height from under part of bottom side to roof to be 6 ft. 3 in., exclusive of the outer roof, with a rise in centre of 5 in., making the total height in clear inside 6 ft. 4 in.

The whole of the framing of body and carriage to be of blue-gum or other approved timber, inside partitions Baltic deal, panels and inside fittings of cedar, and inside and outside roof to be of the best Baltic deals, and the floor boards the best Baltic deals in two thicknesses of $\frac{3}{4}$ in. each laid diagonally.

The 1st class quarter lights and the doors to be provided with sliding Venetian blinds inside and glass frames outside, the latter being fitted with balance weight and spring arrangements; the glazing to windows and doors throughout to be of the best British plate not less than $\frac{1}{4}$ in. thick.

The inside to be fitted up with seats all round 2 ft. deep, having elbow partitions at each end, the seats and backs to be spring-stuffed in the best manner, lined and canvased, and covered with superfine cloth of an approved colour; the side elbows and rests to be covered with morocco of same colour as seats, and properly finished and trimmed; the whole of the stuffing to be the best steel springs and curled horsehair. Silk cord hat-lines to be fixed over seats, and nets carried by brass brackets extending the width of the compartments at each end. The whole of the body above the backs and inside roof to be lined with fancy oil-cloth of pattern to be approved, and the floor covered with floor-cloth and carpets.

The 2nd class compartments to be provided with cushions and backs stuffed with best horsehair and covered with American leather-cloth. The sashes of the doors to have the balance weight and spring arrangements same as centre compartment, but not Venetian blinds.

The extreme length of under carriage to be 19 ft. 11 in., and extreme width 6 ft. 10 in. outside dimensions; the sides to be 11 ft. x 4 ft., beaded top and bottom. Two bearers framed in the sides 11" x $3\frac{1}{2}$ ", 4 ft. 4 in. apart in centre of sides, and secured by a $\frac{5}{8}$ -in. strap-bolt at each end, 9 ft. long and $2\frac{1}{4}$ " x $\frac{1}{2}$ "; the strap fixed with two $\frac{1}{2}$ -in. bolts through the bearers and along through $\frac{5}{8}$ -in. bolt; at each bar on the top side two bearers $9\frac{1}{2}$ in. x 3 in. framed into carriage sides and secured in same manner as those in centre, 22 in. from inside of head-stock, which is to be 11 in. x 4 in., framed on the sides, and secured with two corner plates inside at each corner, $\frac{5}{8}$ -in. thick, bolted to carriage sides and diagonals; the head-stock on outside to be secured to carriage sides with $\frac{3}{4}$ -in. corner plates, 14 in. on side, and head-stock by 11 in. deep. Two spring bearers, 6 in. x 3 in., let into the centre of middle bearers and supported by an iron plate at each end, 2 in. x $\frac{5}{8}$ -in., fixed to the middle bearers, with two $\frac{5}{8}$ in. bolts to each. Two iron plates on top, 2 in. x $\frac{1}{4}$ in., for buffer springs to slide on, and two plates above buffer springs, 2 in. x $\frac{1}{2}$ -in., with lugs at ends bolted to the bearers. Four diagonals, 11 x 3, framed into the head-stocks, and middle bearers let into the narrow bearers, and fixed with $\frac{1}{2}$ -in. bolts through them, and secured to the head-stocks with the inside corner plates mentioned above. Two longitudinal pieces, 4 x 3, framed into the head-stock and middle bearers, and lapped into the narrow bearers, fixed with a five-inch $\frac{5}{8}$ nut-headed screw through the lap, secured at the head-stock with a T plate, $2\frac{1}{2}$ x $\frac{3}{8}$, fixed with three $\frac{3}{8}$ -in. coach screws and to the middle teams with iron plate, $2\frac{1}{2}$ by $\frac{3}{8}$; 1 ft. 10" along the bearers secured with $4\frac{1}{2}$ bolts, and 5 in. along the longitudines and diagonals secured with four $\frac{1}{2}$ bolts.

The draw rods are to be $1\frac{1}{2}$ round iron, to pass through the head-stocks, where a strong hook is attached to receive the coupling screw. Couplings to be provided for each end.

The buffer rods are to be made with solid W. I. discs, with kauri facings, and to work through cast iron blocks at each end of the under-carriage frame, and in the framing, through best gun-metal sockets, bolted to the bearers and carriage sides. The rods are to be turned and squared, and the bushes bored and squared to fit them.

The buffer springs to be of 18 plates, 3 by $\frac{5}{16}$, and a back plate of $\frac{3}{8}$, with solid forged ends, and a compass of 15 inches.

The bearing springs are to be made of the best quality of spring steel, each spring 5 ft. 6 in. long from centre to centre of tension bars, when weighted. To have 9 plates spear-pointed, 3 by $\frac{5}{16}$, and a short plate, which is to be $\frac{3}{8}$. The buffer and bearing springs to be of Turton's, Cammell's, or Brown's make. The tension bar to be of the best scrap iron, 3 by $\frac{1}{2}$, solid eyes and links.

The scroll irons to be of form shown in No. 17, of best scrap iron, made with solid eyes, and to be bolted up to the sole bars in the usual way.

The wheels are to be 3 ft. 6 in. diameter, on running surface; 8 double spokes (Losh's pattern) of wrought iron, 3 by $\frac{3}{8}$ at run and 3 by $\frac{3}{4}$ at nave, formed in segments, welded together with glut pieces at the rim, and turned on the circumference to receive the tires. Rim to be $3\frac{3}{8}$ by $1\frac{1}{8}$. The nave to be of wrought iron, 8 in. diameter, 7 in. through, to be bored out to fit the axle. Tires to be 5 in. broad, bored and turned to 2 in. thick at the tread, and properly shrunk on the wheel. They are to be fastened to the wheel by 4 taper rivets. Each wheel is to be balanced separately on its axle.

The axles to be 4 in. diameter in middle for space of 2 ft. 6 in., and tapering to $4\frac{3}{4}$ at back of nave, and through nave $4\frac{1}{2}$; the journals to be 3 in. diameter, and 8 in. long, and 6' 5" from centre to centre (turnplate to be supplied); the wheels to be forced on the axle by hydraulic pressure, and secured each by one steel key. The wheels and axles are to be Bowling's "Low Moor" or "Taylor's" (Leeds) make.

The axle-boxes to be as shown, and the bearings to be of Stirling's patent metal, or best gun-metal; the grooves of the guides in axle-box, and the joint between the two halves, to be planed.

The axle-guards to be $\frac{3}{4}$ thick, to be properly fitted and bolted to the inside of sole bars exactly square and at right angles to the frame, with washer plates on outside; the surface against which the axle-box works to be made perfectly true; the ends of each guard are to be bound by a short strap, and connected together by a $1\frac{1}{2}$ rod, and to be properly fitted and bolted together.

An additional external roof to be provided, with the proper hoop-sticks, and to be attached to the inner roof, with ornamental cast-iron brackets to project 6 inches at sides and 3 inches at ends, and to have bearers underneath at intervals, and both roofs to be covered with prepared canvas.

One roof lamp, of the best construction, to be placed in centre of saloon, and one at each partition, so as to throw light into 2nd class compartments, and also into saloon.

The general dimensions of framing are as follows:—

		<i>Body.</i>					
		in.	in.			in.	in.
Bottom sides	...	8½	x 3	Cant rails	...	3	x 3
End bars	...	7	x 3	Side framing rails	...	2½	x 2½

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification of Open and Enclosed Second-Class Carriage.

These carriages are to have four compartments, the partition in centre extending to roof, and the other two partitions to height of top of door as shown in No. 25 second-class carriage now on Southern and Western Lines, with double row of seats in each compartment.

The extreme length of body to be 20 ft. out to out, extreme width at elbows, 7 ft. 9 in. straight on sides, height from underpart of bottom sides to be 6 ft. 3 in. with a rise in centre of roof of 5 in., making total height in clear inside 6 ft. 4 in. There is to be no outer roof.

The whole of the under and upper frame-work to be of blue-gum, or other approved timber, roof of Baltic deal, partition, lining boards, panels, &c., to be of cedar, sound and free from defects. The floor to be of the best Baltic deals, in two thicknesses of ¾" each laid diagonally.

The seats are to be slightly raised in front, the edges round, and to have ½-inch bent boarding at the lower part of the back.

The under-frame, wheels, axles, springs, buffing apparatus, and coupling, to be in all respects similar to the composite carriages.

The dimensions of framing to be as follows:—

		<i>Body.</i>					
		in.	in.			in.	in.
Bottom sides	...	10½	x 3	Partition pillars	...	2¾	x 2½
End bars	...	7	x 3	Cant rails	...	3	x 3
Partition do.	...	6	x 3	Hoop sticks	...	2½	x 2
Intermediate do.	...	6	x 1½	Centre do. (in centre)	...	7¼	x 2½
Bottom longitudinals	...	6	x 1½	End compass rails do.	...	7¼	x 2½
Corner pillars	...	3	x 3	End battens and rails	...	2½	x 2
Standing do.	...	3	x 3	Door pillars	...	3	x 2½
Top light do.	...	2½	x 1½	Top partition rails	...	4	x 2
Light uprights	...	2½	x 1½	Cornices	...	2	x 2
Short standing pillars	...	3	x 3				

Under-frames.

		<i>Under-frames.</i>					
		in.	in.			in.	in.
Soles	...	11	x 4	Cradles for buffer springs	...	6	x 3
Head-stocks	...	11	x 4	Step boards	...	8	x 1½
Middle bearers	...	11	x 3½	Do. ledges	...	3	x 1¼
Front do.	...	9½	x 3	Centre buffer back piece	...	10	x 3
Diagonals	...	11	x 3	Buffer spring top blocks	...	3½	x 2½
Longitudinals	...	4	x 3				

There is to be a roof lamp of best construction provided, to be placed in centre of carriage.

The handles, hinges, and other mountings to be of brass; the patterns to be submitted to the Engineer for Existing Lines.

Enclosed

Enclosed Second Class.

The enclosed Second-class will be in every respect the same, with the exception that all the standing, intermediate, and door pillars are to be continued to the roof, and the doors to be fitted with sliding window frames, glazed with the best plate glass not less than $\frac{1}{4}$ -inch thick, two intermediate quarters on each side to be fitted with sliding Venetian blinds, the whole being in general arrangement the same as No. 15.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Horse-boxes.

To consist of one compartment, having two divisions, and a dog-box at each end.

The whole of the framing of under carriage and body to be of the best blue-gum; bottom, roof, and inside board of best Baltic deals; roof and outside board of pitch pine; and the panels of dog-box doors of blue gum.

The outside length of upper portion of body, including head stalls, to be 10 ft. 3 in.; lower portion, 8 ft. 10 $\frac{1}{2}$ in.; the height from top of under carriage to under side of roof-boards in centre, 7 ft. 6 in.; and the extreme width 7 ft. 9 in.

The extreme length of under carriage to be 14 ft. 6 in., and the extreme width 6 ft. 10 in.

The general dimensions of under and upper framing, &c., are as follows:—

	in.	in.		in.	in.
Carriage sides	11	x 4	Breast-piece for manger ...	6	x 1 $\frac{1}{2}$
Headstocks	11	x 4	Hoopsticks	2 $\frac{1}{2}$	x 2
Middle bearers	12 $\frac{1}{2}$	x 3 $\frac{1}{2}$	End compass rails	7	x 3 in centre.
Diagonals	11	x 3	Do. do.	7	x 2 $\frac{3}{4}$ do.
Longitudinals	4	x 3	Top sockets for stall posts ...	3	x 1 $\frac{1}{2}$
Cradles	6	x 3	1 floor bearer	6	x 2
Bottom sides	5	x 3	Dog-box, bottom side	5	x 2
Corner pillars	4 $\frac{1}{4}$	x 4	Do. end bars	5	x 2
Cant rails	3 $\frac{1}{2}$	x 3	Do. corner pillars	3	x 3
2 pillars	3 $\frac{1}{2}$	x 3	Do. cross rails	3 $\frac{1}{4}$	x 1 $\frac{1}{2}$
2 do.	4	x 3	Do. upright battens	3	x 1 $\frac{1}{2}$
2 do.	3 $\frac{1}{2}$	x 2 $\frac{1}{2}$	Do. shutting pillars	2 $\frac{1}{2}$	x 1 $\frac{1}{4}$
Cross rails	3	x 3	Do. side uprights	2 $\frac{1}{4}$	x 1
End uprights	3 $\frac{1}{2}$	x 3	Do. intermediate side rails ...	2 $\frac{1}{2}$	x 2
Stall posts	3	x 3	Do. top rails	2 $\frac{1}{4}$	x 1 $\frac{1}{2}$
Flap pieces	3 $\frac{1}{2}$	x 1	Do. roof batten rails	4 $\frac{3}{4}$	x 1 $\frac{1}{2}$
Do. uprights	3 $\frac{1}{4}$	x 1 $\frac{1}{2}$	Do. 8 door pieces	5 $\frac{1}{4}$	x 1 $\frac{1}{4}$
2 short rails for ends	4 $\frac{1}{2}$	x 3 $\frac{1}{2}$	Do. 8 do.	8 $\frac{1}{4}$	x 1 $\frac{1}{4}$
2 do. do.	3 $\frac{1}{2}$	x 3 $\frac{1}{2}$	Cornices	2	x 2

The body to be provided with stall flaps, fitted to carry three horses, and the dog-boxes at each end extending the width of under carriage.

The roof of horse-box and dog-boxes to be covered with prepared canvas.

The interior to be properly stuffed with horsehair and covered with best ox-hides, in the usual manner, to protect the horses, and the fittings similar to those used on the Great Southern and Western Railways.

The under-framing springs, axles, wheels, and buffing apparatus, &c., to be in all respects similar to the carriage trucks.

Each horse-box to have a lever break, as with D trucks.

The general arrangement to be the same as No. 10 on the Southern and Western Lines.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Carriage Trucks.

To consist of one open compartment, extreme length 14 ft. 6 in., and extreme width 7 ft. 9 in., and height from under bottom side to top of side-rail 17 in., including cap-plate.

The whole of the under and upper framing to be of the best blue-gum, and the floor-boards best Baltic deals.

The extreme length of under-carriage to be 14 ft. 6 in., and extreme width 6 ft. 10 in.

The general dimensions of under and upper framing as follow:—

	in.	in.		in.	in.
2 soles	11	x 4	2 top side rails	3	x 3
2 head-stocks	12 $\frac{1}{2}$	x 4	4 corner pillars	4	x 3
2 middle bearers	11	x 3 $\frac{1}{2}$	6 side pillars	4	x 3
4 diagonals	11	x 3	3 floor-bearers	6	x 2
2 longitudinalinals	4	x 3	1 centre buffer, back piece ...	10	x 3
2 cradles	6	x 3	4 buffer spring stop blocks ...	3 $\frac{1}{2}$	x 2 $\frac{1}{2}$
2 false-bottom sides	6	x 3	2 sliding bars	2 $\frac{1}{2}$	x 2 $\frac{1}{2}$

The draw-rods to be 1 $\frac{1}{2}$ in. round iron to pass through the head-stocks, where a strong hook is attached to receive the screw-coupling; one screw-coupling to be provided to each truck.

The

The buffer-rods are to be made with solid wrought iron discs with kauri facings, and to work through cast-iron blocks at each end of the under carriage frame, and through best gun metal sockets bolted to the bearers and carriage sides; the rods are to be turned and squared and the bushes bored and squared to fit them.

The buffer springs to be of 18 plates 3 in. x $\frac{1}{8}$ in., and a back plate of $\frac{3}{8}$ in. with solid forged ends and a compass of 15 in.; the bearing spring to be 4 ft. long from centre to centre of tension bars when weighted, to have 7 plates spear-pointed 3 in. x $\frac{5}{16}$ in., and a short one $\frac{3}{8}$ in., the buffer and bearing springs to be of "Turton's," "Cammell's," or "Brown's" make, the tension bar to be 3 in. x $\frac{1}{8}$ in.

The wheels are to be 3 ft. 6 in. diameter on running surface, 8 double spokes (Losh's pattern) of wrought iron 3 in. x $\frac{5}{8}$ in. at rim, and 3 in. x $\frac{3}{4}$ in. nave, the rim to be $3\frac{3}{8}$ in. x $\frac{1}{8}$ in., the nave to be of wrought iron 8 in. diameter, 7 in. through, to be bored out and to fit the axle; tires to be 5 in. broad, bored and turned to 2 in. thick at the tread, and properly shrunk on the wheel, and fastened to it by 4 taper rivets.

The axles to be 4 in. diameter in middle for space of 2 ft. 6 in., and tapering to $4\frac{1}{2}$ in. at back of nave, and through nave $4\frac{1}{2}$ in.; the journals to be 3 in. diameter, and 8 in. long, and 6 ft 5 in. centre to centre; wheels to be forced on by hydraulic pressure and secured by one steel key; the wheels and axles are to be of Low Moor or Taylor's (Leeds) make.

The axle-box bearings to be of Sterling's patent metal, or best gun-metal, the grooves of the guides of axle-boxes and the joint between the two halves to be planed; the lower half of the axle-boxes to be made so that Bricogne's method of lubrication can be applied to them.

The axle-guards to be $\frac{3}{4}$ in. thick, to be properly fitted and bolted to the inside of sole bars exactly square, and at right angles to the frame, with washer plates on outside, the surface in contact to be made perfectly true, the ends of the guard bound by a strap as shown.

Two sliding bars, with the necessary straps of leather, buckles, &c., to secure carriages, to be provided to each truck.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Passengers' Luggage and Break Van.

These vans are to consist of two compartments; the extreme length to be 18 ft.; the width of the luggage compartment 7 ft. 4 in. out to out, and clear height inside in centre 6 ft. 3 in., and width of the front or break compartment 7 ft. 9 in., with a clear height inside of 1 ft. 6 in. above the luggage compartment; the roof of both front and after part to rise 5 in.

The under-frame wheels, axles, buffers, and draw gear, ironwork, &c., will be the same as described for composite carriages, except that the length of the under-carriage will be 17 ft. 11 in., and that the wheels will be placed 10 ft. apart, centre to centre; all other dimensions remaining the same.

The framing, pillars, and rails to be of blue-gum or other approved timber, and panels to be of the best Baltic deal; the inside boarding, partition, and door of Baltic deal; and the floor-boards of Baltic deal, in two thicknesses of $\frac{3}{4}$ in. each, laid diagonally, with blue-gum battens properly screwed down at intervals of 15 in.

The dimensions of the framing to be as follows, measured full when finished:—

		in.		in.				in.		in.	
<i>Body.</i>											
Bottom sides	8	x	3	Front compass rails in centre	...	$7\frac{1}{2}$	x	$2\frac{3}{4}$

Cradles	6	x	3	Buffer spring stop blocks	...	$3\frac{1}{2}$	x	$2\frac{1}{2}$	
Diagonals	11	x	3						

The interior of the van to have a double door-way communicating from the guard's compartment to the luggage part. Side-doors of guard's compartment to have a sliding glass frame.

A roof lamp to be provided and fixed in the centre of luggage compartment.

Two strong shelves to be fixed at end of luggage compartment, $1\frac{1}{2}$ inch thick, with supporting brackets and ledge in front, and stout hooks for letter-bags, &c., one on each side, to be fixed, and also a letter-rack. A lock-up box, fixed to flooring, to form a step for getting to break; and a seat is also to be fitted in guard's compartment, so placed that he can see over and on one side of the train when sitting.

The windows at top of guard's compartment are to be fixed; the ventilation, as in No. 7, is to be carefully attended to, and is to be continued along part of the end of the van for the side of dog-box, and properly protected on the inside.

A powerful and efficient break apparatus of the best construction, as in No. 7, is to be fixed, having a wheel lever, and so arranged as to be under the most perfect control of the guard. The

The roof is not to be double; but the inside is to be set up and lined with $\frac{1}{2}$ -inch boarding, and spaces left in the hoop-sticks for ventilation.

The luggage doors are to slide outside on a projecting iron bar, the glazing in same to be fixed, the quality of the glass being British plate.

The mountings are to be of brass, lacquered patterns, to be submitted for approval; the projecting rail round the van to be of wrought iron.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Passenger, Luggage, and Break Vans.

General arrangement to be the same as No. 15.

These vans are to consist of two compartments, the extreme length to be 18 ft. 1 in., the width of the luggage compartment 7 ft. 4 in. out to out, and clear height inside in centre 6 ft. 3 in., and width of the front or break compartment 7 ft. 9 $\frac{1}{2}$ in., with a clear height inside of 1 ft. 6 in. above the luggage compartment; the roof of both front and after parts to rise 5 inches.

The dimensions of the framing to be as follows—measured full when finished.

		<i>Body.</i>					
		in.	in.			in.	in.
Bottom sides	...	8	x 3	End compass rails in centre	...	7 $\frac{1}{2}$	x 2 $\frac{1}{2}$

Cant rails	...	3 $\frac{1}{2}$	x 2 $\frac{1}{2}$	Top dog-box rail	...	4 $\frac{1}{2}$	wide
				Bottom do.	...	4 $\frac{1}{2}$	do.
<i>Under-frame.</i>							
Soles	...	11	x 4 $\frac{1}{2}$	Longitudinals	...	4	x 4
Head-stocks	...	11	x 4 $\frac{1}{2}$	Step-boards	...	8	x 1 $\frac{1}{2}$
Middle bearers	...	11	x 4	Do. ledges	...	3	x 1 $\frac{1}{4}$
Front do.	...	7	x 4	Centre buffer, back piece	...	10	x 3
Cradles	...	6	x 3 $\frac{1}{2}$	Buffer spring stop block	...	3 $\frac{1}{2}$	x 2 $\frac{1}{2}$
Diagonals	...	11	x 4				

The whole of the framing to be of the best description of blue-gum, well seasoned, and put together with the best white lead.

Roof boards to be of the best Baltic deal 7 in. x 1 in. grooved to receive an inch iron tongue, and put together with white lead. Roof boards to be secured with 2 $\frac{1}{4}$ in. screws to roof sticks, side rails, and ends.

Top of roof to be covered with No. 1 best navy canvas secured to the top with hard-wood battens across the roof, and on the sides and ends by cornice screwed on as shown in drawing. Roof to have two coats of paint previous to being covered with canvas, and three coats of white lead and oil afterwards. Sides and ends to be panelled with the best Baltic deal 1 in. thick, and not more than 5 in. wide, grooved to receive an inch iron tongue, and put together with white lead.

The interior of van to have two doors on hinges, each 13 in. clear of opening, communicating from the guard's compartment to the luggage part.

A hole, 8 $\frac{1}{2}$ in. x 4 $\frac{1}{4}$ in., to be cut in centre of roof of luggage compartment, with wrought iron cover for lamp.

The breakwork to be constructed as shown on No. 15 Van of the same class.

The glass windows at the top of the guard's compartment, and the glass hood over break wheel, shown in drawing, are to be fixtures. The luggage doors are to be run on brass pulleys outside, on a projecting iron bar 2 in. x $\frac{5}{8}$ in., as shown in drawing, the glass windows in which are to be fixed.

The whole of the glass used to be of the best British plate.

Two strong shelves to be fixed at the sides of luggage compartment 14 in. wide by 1 $\frac{1}{2}$ in. thick, with supporting brackets and ledge in front, also stout hooks for letter-bags, &c., one to be fixed on each side. A lock-up box to be fixed to the flooring to form a step for getting to a seat which will have to be fixed and placed so that the guard can see over the train when sitting. Two cast-iron sand-boxes 16 in. x 12 in., x 14 in. deep, one fixed at each end, inside the van.

The door handles and hinges are to be of brass—patterns to be submitted for approval. The projecting hand-rail to be of wrought iron, and fixed as in No. 15. Two lamp-irons to be fixed with bolts on corner pillars of guard's compartment, and one on each end for tail lamp, as shown.

The flooring of body to consist of ten cast-iron plates, as shown, the bottom sides and bars of body to be rebated 1 $\frac{1}{2}$ in. wide by 1 $\frac{3}{8}$ in. deep, to receive the plates, which are 2 $\frac{7}{8}$ in. thick, with flanges to fit into the rebates, to be bedded in rebates, and on the top of framing with the best roofing felt and white lead, and screwed down with No. 20 2 $\frac{3}{4}$ in. screws.

The under-frame to be of blue-gum, well seasoned, and perfectly sound, and square on all edges; the extreme length to be 18 ft., and width 6 ft. 10 in., the sides and ends to be beaded top and bottom.

The

The wheels to be placed 5 ft. 6 in. apart, 11 ft. over all from centre to centre of axles. Two spring bearers or cradles, 6 in. x $3\frac{1}{2}$ in., to be let into centre of middle bearers, and supported by an iron plate 2 in. x $\frac{5}{8}$ in. at each end, fixed to middle bearers with two $\frac{5}{8}$ bolts to each. Two iron plates 2 in. x $\frac{3}{8}$ in. on top, for buffer springs to slide on, and two plates 3 in. x $\frac{1}{2}$ in. above buffer springs, with lugs at ends, bolted to bearers; four diagonals 11 in. x 4 in., framed into the head-stocks and middle bearers, let into the narrow bearers, and fixed with $\frac{1}{2}$ in. bolts through them, and secured to head-stocks with inside corner plates, as shown in drawing. Two longitudinal pieces, framed into the head-stocks and middle bearers, and lapped into the narrow bearers, fixed with a $5\frac{5}{8}$ in. nut-headed screw through the lap, and secured at the head-stock with a T plate $2\frac{1}{2}$ in. x $\frac{3}{8}$ in. fixed with three $\frac{1}{2}$ -in. nut-headed coach screws, and to the middle bearers with an iron plate $2\frac{1}{2}$ in. x $\frac{3}{8}$ in. 1 foot 10 in. along the bearers, secured with $\frac{5}{8}$ -in. bolts, and 5 inches along the longitudinals and diagonals, also secured with $\frac{5}{8}$ -in. bolts.

The draw-rods to be of $1\frac{5}{8}$ in. round iron, to pass through the head-stocks, where a strong hook is attached to receive couplings. Two side chains also are required, which, with the draw rod, must be of the best iron. The buffer rods with solid wrought iron disc, with kauri facings, two to be convex and two flat, with $\frac{1}{4}$ wrought-iron plate, as in No. 15. Buffer rods to work through cast-iron blocks at each end, and across bars of carriage frame, are to be turned in the round parts, and squared to fit bushes through bearers, with cast-iron shoes for buffer springs.

The scroll irons to be of the form in No. 15, made of BBH or other iron of equal quality, with solid eyes, and to be bolted up to the sole bars, one end let $\frac{3}{4}$ into under-frame as shown in drawing.

The axle-boxes to be as in No. 15 and the bearings to be of the best gun-metal; the grooves in the sides of axle-boxes and the joints between the halves to be planed and jointed with leather. The axle guards to be $\frac{3}{4}$ inch thick, to be properly fitted and bolted to the inside of sole bars, exactly square, and at right angles with frame, with washer plates on outside; the surface against which the axle-box works to be made perfectly true; the end of each guard to be bound with a short strap, and connected together by $1\frac{1}{4}$ inch rod as shown, and to be properly bolted together.

The wheels, axles, springs, and all other materials not herein specified, must be the same as in pattern van No. 15.

Dimensions of
iron-work.

Plates on buffer heads, $\frac{1}{4}$ in. thick, 14 in. diameter.

Disc 13 in. x $\frac{1}{2}$ in. at edge, and $1\frac{1}{2}$ in. at root.

Rods—

Round part, 2 ft. 6 in. long by $2\frac{1}{2}$ in. diameter.

Square do., 6 ft. 4 in. do. do. $1\frac{1}{2}$ in. diameter.

Cast iron shoe, as per drawing.

Draw bar, &c.—

Draw bar rod, 2 in. square, for 12 in. from hook remainder, $1\frac{5}{8}$ in. round iron.

Do. do. plate, $6\frac{1}{2}$ in. x 1 in. thick at hook.

$4\frac{1}{2}$ in. x $\frac{1}{2}$ do. do. side.

18 in. long.

13 in. from centre to centre of eye bolts.

Side chains—

Side chain, 5 links of $\frac{7}{8}$ in. iron.

Eye bolt collar, 3 in. x $\frac{1}{4}$ in.

Eye, 1 in. thick.

Do. $2\frac{1}{2}$ in. from collar to centre of eye.

Eye bolt, $5\frac{1}{2}$ in. x 1 in. between collar and nut.

Do. do. washer, 4 in. x 4 in. x $\frac{1}{4}$ in.

Tie rods for under-frame, all $\frac{3}{4}$ in. diameter.

Nut bolts through spring bearers and plates, above springs $\frac{5}{8}$ in. diameter.

Bolts—

All bolts in under-frame not otherwise specified, $\frac{3}{4}$ in. diameter.

Corner plates—

3 in. x 1 in. and $\frac{3}{4}$ in. at ends, and 11 in. from angle, secured with $\frac{3}{4}$ in. nut bolts.

Outside corner plates of body, 6 in. each way, x $\frac{3}{8}$ in. thick.

Handrails, all $\frac{5}{8}$ in. diameter.

Break-work—

Bracket for carrying break hangers, $2\frac{1}{2}$ in. x 2.

$3\frac{1}{2}$ over collar, and $1\frac{1}{8}$ in. bolt.

Pins for break hangers, $1\frac{1}{4}$ in. diameter.

Hangers, 3 in. x 1 in.

Eyes of do., $2\frac{1}{2}$ in. diameter.

Tie rods for do., $\frac{3}{4}$ in. do.

Break block bolts, 4 in. x $\frac{5}{8}$ in. with nuts let into B. block.

Break connecting rod, $2\frac{1}{2}$ x $\frac{1}{2}$ and 1 through eye.

Ditto shaft, 3 in. diameter.

Nut lever of do. $2\frac{3}{4}$ in. x $1\frac{1}{4}$ x $5\frac{1}{2}$ over eye.

Nut, 3 in. diameter.

Break rod and screw.

2 in. under wheel, $1\frac{1}{2}$ in. in middle.

2 in. diameter of screw.

3 threads to the inch.

Screw, 16 in. long.

Hanging brackets, 3 x 1 x $4\frac{1}{2}$ over boss, and 3 in. through.

Do. levers, 1 in. thick.

Pillar bolts, $\frac{3}{4}$ diameter.

Break wheel and gearing wheels, to be the same as in No. 15.

Scroll irons—

3 in. wide, 1 in. thick, tapering to $\frac{3}{4}$ at ends.

Links, $2\frac{1}{4}$ in. x $\frac{3}{4}$ and $3\frac{1}{4}$ between centres of holes.

Pins for do., $\frac{3}{4}$ diameter.

Axle box bolts, $\frac{1}{2}$ in. square.

Horn plate, 3 in. x $\frac{3}{4}$ in.

Washer plate, $2\frac{3}{4}$ in. x $\frac{1}{2}$ in.

Horn plate connecting rod—

Flat part, $1\frac{3}{4}$ in. x $\frac{3}{4}$ in.

Round do., $1\frac{1}{4}$ in. diameter.

Secured to horn plate by $\frac{5}{8}$ in. bolts.

Step hangers—

Round part, $1\frac{1}{4}$ in. diameter.

Flat do., 2 in. wide.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Sheep-wagons.

To consist of four compartments, the extreme length being 18 ft., the extreme width 7 ft. 11 in., and the height from top of floor to underside of roof-boards at centre 6 ft. 4 in.

The under-framing wheels, axles, &c., to be in all respects the same as the cattle-wagons on the Southern and Western Railways.

The separate compartments to be 3 ft. 1 in. clear height in centre, and to have sliding doors 4 ft. wide framed as shown, and the sides to be strengthened with diagonals 4 x 4 properly tenoned into frame and fitted in with $\frac{3}{4}$ iron rods; the middle partition to be framed with diagonals 3 x 3.

The upper floor to be supported by joists 5 x 2 $\frac{1}{2}$ tapered at sides, and the flooring-boards of lower and upper compartment to be of Baltic deals 1 $\frac{1}{2}$ thick, grooved and tongued, and with kauri battens screwed down to them.

The roof to have the ventilator running along the whole length, as in No. 2.

In all respects, as to scantlings, corner posts, &c., the dimensions to be the same as the cattle-wagons in use on the existing lines.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Cattle-wagons.

To consist of one compartment; the extreme length being 18 ft., the extreme breadth 7 ft. 11 in., and the height from top of floor to underside of roof boards at centre, 6 ft. 8 in.

The whole of the under and upper framing to be of best blue-gum, and the boarding best Baltic deals or pitch-pine.

One flap, hung on hinges, to be provided on each side of wagon, 4 ft. wide and 3 ft. 6 in. high, the top rail ranging with side rails when closed; the boarding in flaps to be of kauri pine 1 $\frac{1}{4}$ thick, with blue-gum battens firmly screwed on the inside of each flap, $\frac{3}{4}$ round rods to be fixed in lower part as shown, and 1-in. rods round the upper part.

The roof to be covered with prepared canvas.

The extreme length of under-frame to be 18 ft., and extreme width 6 ft. 10 in.

The general dimensions of framing to be as follow:—

	in.	in.		in.	in.		
2 soles	11	x	4	2 compass end rails	7	x	3
2 head-stocks	12 $\frac{1}{2}$	x	4	(rounded to 3 $\frac{1}{2}$ at ends)			
2 middle beams	11	x	4	7 hoop-sticks	2 $\frac{1}{2}$	x	2
2 front beams	9	x	3 $\frac{1}{2}$	12 ventilator side rails	3	x	3 $\frac{1}{4}$
2 cradles	6	x	3	6 side braces	3 $\frac{1}{2}$	x	2 $\frac{1}{4}$
4 diagonals	11	x	3	10 door boards	7 $\frac{1}{2}$	x	1 $\frac{1}{4}$
2 longitudinals	4	x	3	4 end ventilator end rails	3	x	3 $\frac{1}{4}$
2 false sides	4	x	4	4 do. intermediate do.	4	x	2 $\frac{1}{4}$
4 corner pillars	4	x	4	4 do. uprights	4	x	2 $\frac{1}{4}$
6 side pillars	4	x	3 $\frac{1}{4}$	1 centre buffer spring piece	10 $\frac{1}{4}$	x	3 $\frac{1}{4}$
6 side rails	4	x	3 $\frac{1}{4}$	4 buffer spring stop blocks	3 $\frac{3}{4}$	x	2 $\frac{3}{4}$
2 cant rails	4	x	2 $\frac{1}{2}$	4 buffer backs	11	x	2 $\frac{1}{4}$
4 door rails	4	x	3 $\frac{1}{4}$	10 pedestals	4	x	3 $\frac{1}{4}$
4 door pillars	4	x	3 $\frac{1}{4}$	floor			2
4 door braces	3 $\frac{1}{2}$	x	2				

The draw-rods are to be 1 $\frac{5}{8}$ round iron, to pass through the head-stocks, where a strong hook is attached to receive the coupling. Coupling links to be provided at each end, and safety chains.

The buffer and buffer springs to be same as specified for D Trucks.

Wheels, axles, and axle-boxes to be the same as specified for D Trucks.

The axle-guards to be $\frac{3}{4}$ in. thick, properly fitted and bolted to inside of sole bars, perfectly true and square, and the parts in contact with axle-box to be planed.

The flooring to be laid (across the frame) $\frac{1}{4}$ in. apart, the sides of planks bevelled inward, and throated underneath for drainage, and to have stout kauri battens screwed down at intervals of 15 in.

In all other respects not herein specified, it must be the same as No. 20 on the Southern and Western Lines.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification of Covered Goods-vans and Powder-vans.

The general arrangement of these vans to be the same as No. 15 Van, at present on the Southern and Western Lines. General arrangement.

The frame to be 15 ft. long, and 7 ft. 6 in. wide over all.

Each sole to be in one piece, 14 in. by 4 in., framed into the head-stocks with two 1 $\frac{1}{2}$ in. tenons, and further secured by two knees at each corner of the sole, head-stock, and diagonal braces, and by 10 $\frac{3}{4}$ in. bolts in each, independent of the buffer bolts. Frames.

The nuts to screw on to washer-plates outside the head-stock, and soles 2 in. broad by $\frac{1}{4}$ in. thick.

The head-stocks to be 7 ft. 6 in. long by 12 $\frac{1}{2}$ in. deep, by 4 in. thick, and to be framed level with the bottom side of sole.

The two transverse bearers to be 11 in. by 4 in., and to be framed into the sole with two 1 $\frac{1}{2}$ in. tenons at each end, and housed $\frac{1}{4}$ in. into the sole; four $\frac{3}{4}$ in. bolts to pass through the soles across the frames with nuts at each end, and washer-plate 2 $\frac{1}{4}$ in. square by $\frac{1}{4}$ in. thick.

The four diagonal braces to be 11 in. by 3 in., framed fair with the upper side of the cross bearers and soles, and tenoned into the head stock and transverse bearer with two $1\frac{1}{2}$ in. tenons on each, housed into each $\frac{1}{4}$ of an inch, and further secured by a knee $4\frac{1}{2}$ in. deep by $\frac{3}{4}$ in. thick, in the root, and with eight $\frac{3}{4}$ in. bolts, independent of the two tie bolts.

The centre of this knee is to be placed in the centre line of draw bar, so that a hole $1\frac{1}{2}$ in. diameter must be punched in the knee to allow the draw bar to pass through it.

Two $\frac{3}{4}$ in. bolts screwed at each end, and with washers, $2\frac{1}{4}$ in. square and $\frac{1}{4}$ in. thick, draw the two transverse bearers on to the tenons of the two inside longitudinal short bearers, and two $\frac{3}{4}$ in. bolts at each end of the frame, screwed at one end, and with the nut and washer on the transverse cross bearer, bring the whole frame well together.

Two short longitudinal bearers, 9 in. by $3\frac{1}{2}$ in. are to be tenoned into the two transverse bearers, and also housed at $\frac{1}{4}$ in. in each end.

Horn plates.

To be bolted with $\frac{3}{4}$ in. bolts against the inside of sole, and to be 8 ft. 6 in. from centre to centre; the nuts to be placed on the outside, and screwed up securely against washer-plates, as shown in No. 15.

Great care must be taken that these plates are correctly fixed vertically, by transverse and longitudinal measurement. They must be of form shown in No. 15, and planed on the inside, where they pass over axle-boxes.

Buffers.

Cases and rams of cast iron, and fitted with vulcanized India-rubber springs, $8\frac{1}{2}$ in. long and 5 in. diameter, having a 2 in. hole through the centre.

The cases must be bored, and the rams turned to fit them well; and great care must be taken that the ram will touch the end of the casing before the compression is wholly taken off the spring. The cases are packed off from the frames with pieces of kauri pine, 1 in. thick.

The buffer-facings must be of good and well-seasoned kauri pine, free from knots and shakes, neatly turned, and securely bolted to the rams, care being taken that the bolt-heads fit well, and do not project at all beyond the buffer-facing.

By means of the pin at the back end of the casing, $\frac{1}{2}$ an in. of compression must be put upon the spring before the buffer is put in its place. It will be seen that the centre bolt is square under the head, and passes through the ram in a square hole to prevent its turning round.

Draw-bar.

To be made of the best cable-iron, and with a vulcanized India-rubber spring, 6 in. diameter and 8 in. long, with a 3 in. hole through it, to work in a cast-iron cylinder.

Wheels.

There are to be four 3 ft. diameter on the tread, wrought iron wheels, which must be turned and bored for the reception of the tire and axle, to the exact diameter and gauge.

Tires.

To be of the best Low Moor manufacture, 5 in. wide and 2 in. thick on the thin edge, turned and bored to gauge.

Great care must be taken that the tires are shrunk securely on the wheels, and that no undue strain is put on either.

The diameter of the tire after it is bored, and before it is heated for expanding, must be precisely that of the wheel; it must be riveted to the rim of the wheel with four $\frac{7}{8}$ in. rivets coned into the tire, and with the head of the rivet on the inside of the rim of the wheel.

Axles.

To have journals $3\frac{1}{4}$ in. diameter by $7\frac{1}{2}$ in. long; diameter of wheel seating, $4\frac{1}{2}$ in.; length of do., $8\frac{3}{8}$ in.; diameter behind wheel, 5 in.; diameter in middle of axle, 4 in.; length between centres of journal, 6 ft. $3\frac{1}{4}$ in.; length between bosses of wheel, 4 ft. 3 in.; total length of axle, 7 ft.; nose of journal to be 4 in. diameter, and $\frac{5}{8}$ in. wide.

Axle-boxes.

To be made in halves, and fitted with gun-metal steps.

Care must be taken that the steps are fitted and bedded securely in the box, and that they be bored so that they bear on the journal on the top only, for a space equal to one-third of the circumference of the journal. The cores for the grooves for the horn-plates must be carefully fixed in the mould, so that they be out of winding, and perfectly opposite to each other.

Springs.

To be of the best spring steel, and tested before put in by being twice weighted, until the whole camber has been taken off, and the spring found to resume its original form. Length between centres, when unweighted, to be 2 ft. $8\frac{1}{2}$ in., with holes in the ends 1 in. diameter, to be perfectly true, and at right angles to the spring.

Each spring is to be formed of ten plates of steel, nine being 3 in. by $\frac{3}{8}$ ths of an in., and one 3 in. by $\frac{1}{2}$ an in.; compass, 7 in. from top of eyes to top of back-plate.

Break.

Each van is to be fitted with a break, as in the D trucks.

Spring hangers.

Are to be of wrought iron, 3 in. wide and $\frac{3}{4}$ in. thick; they are to be blocked off from the bottom of the soles with cast-iron blocks, 3 in. wide, and secured to it by three $\frac{5}{8}$ in. bolts.

Great care must be taken that they are securely and correctly fixed, and out of winding in every direction.

Coupling and Safety chains.

To be as in D trucks.

Pillars.

To be of well-seasoned blue-gum.

Door pillars to be 4 in. by $3\frac{1}{2}$ in., rebated to receive the side plates; centre pillars, 4 in. by 3 in.; corner pillars, 4 in. by 4 in., rebated to receive side and end plates of iron.

Side-door pillars to be 4 in. by $2\frac{1}{4}$ in.; end pillars, $4\frac{1}{2}$ in. by 4 in., tenoned into head-stock and top end rail; and to have a plate of iron, $2\frac{1}{2}$ in. by $\frac{3}{8}$ in., bolted to them.

Plates for corner pillars to be $2\frac{1}{4}$ in. by $\frac{1}{2}$ in., and each arm 14 in. long, secured by $4\frac{5}{8}$ in. bolts in each plate.

Iron knees, 2 in. by $\frac{3}{4}$ in., are also to be fitted at the foot of doorway pillars, each arm being 9 in. long, secured to pillar and bottom side by four $\frac{5}{8}$ bolts.

Inside of doorway pillars and bottom side to have screwed on a plate $3\frac{1}{4}$ in. by $\frac{1}{4}$ in.

There are to be distance pieces, 3 in. by 3 in., between the feet of the side pillars; the tops to be tenoned into top rail with $\frac{5}{8}$ in. tenons.

The corner and doorway pillars are mortised into the head-stocks.

Sides, ends, and roof of body.

To be of galvanized sheet iron, No. 12 wire gauge, 5 ft. 3 in. high above the level of the top of the floor; and the ends rounded, so as to give a clear height in the middle of the van, underneath the covering plate of the roof, of 5 ft. 9 in.

The sheet iron, forming the sides to be screwed to the pillars, the top rail, and bottom side, with screws No. 18— $1\frac{3}{4}$ in. long, $3\frac{3}{4}$ in. between centres. Care must be taken that these and all other sheets composing the body, are perfectly straightened before they are fixed in their places; and that whenever they

they bed upon and are screwed to the framing or pillars, that strips of canvas, well covered with white lead underneath, and that when screwed up they are a sound, tight, and good job.

Two roof-sticks of well-seasoned English ash, 3 in. by $2\frac{1}{4}$ in., two ditto, $2\frac{1}{2}$ in. by $2\frac{1}{4}$ in.; two short roof-sticks, $2\frac{1}{2}$ in. by $2\frac{1}{4}$ in.

Longitudinal pieces on centre of roof, $4\frac{1}{2}$ in. by 3 in., to be lapped into end rail; bottom sides 5 in. by 4 in. rebated $\frac{1}{2}$ in. into the sole to stand up the thickness of bottom boards above the under-frame, and bolted to the sole with eight $\frac{5}{8}$ in. bolts on each side.

Top rails, $4\frac{1}{2}$ in. by $3\frac{1}{4}$ in., rebated to receive the iron plates, and bevelled to compass of roof.

There is to be a space of $\frac{1}{2}$ in. between the sheets on the roof, and they are to be screwed to the roof-sticks by wood screws, No. 20, $1\frac{1}{2}$ in. long, $3\frac{1}{4}$ in. between centres. The space of $\frac{1}{2}$ in. is to be covered by a piece of hoop iron, 2 in. wide, 16 wire gauge, screwed down on canvas and white lead with wood screws, No. 20, $1\frac{1}{4}$ in. long, 3 in. between centres.

There must be two doors, each 3 ft. 1 in. wide, on each side of the van, as in No. 15, moving in ^{Doors.} slides on two rollers, let into bottom of doors; the bottom slide is to be a bar of $2\frac{1}{2}$ in. iron upon the bottom, secured with wood screws, No. 20, $1\frac{1}{2}$ in. long, not more than 6 in. apart.

The frame of each door is to be of blue gum, $4\frac{1}{2}$ in. by $2\frac{1}{4}$ in., chamfered on the inside edges, and rebated on the outside of the bottom side, to secure the bar on which it slides, which must be 2 in. wide, and $\frac{3}{8}$ in. thick.

Great care must be taken that all these parts are made and fixed perfectly true, and with the necessary play, so that they may move easily backward and forward.

The bar for securing the door to be $\frac{7}{8}$ in. diameter, and to be fastened as in No. 15.

To be the same width in the clear as the doors, but open on one side only, so that on the other ^{Roof slides.} side the roof runs the entire length of the body, and forms a stay for the ends; the slide to be framed as in No. 15, of well-seasoned wood, covered with sheet iron, No. 12 wire gauge, which is secured to the frame by wood screws, No. 20, $1\frac{1}{2}$ in. long, $3\frac{1}{4}$ in. between centres. Strips of iron, $1\frac{1}{4}$ in. by $\frac{3}{8}$ in., must be screwed to the sides of the door by wood screws, No. 20, $1\frac{1}{2}$ in. long, and not more than 6 in. between centres on which it slides; other strips, $2\frac{3}{4}$ in. by $\frac{3}{8}$ in., must be screwed on the sides of the two centre roof-sticks, with wood screws, No. 20, $1\frac{1}{2}$ in. long, and not more than 6 in. between centres, on which the roof slide moves.

A strip of wood is to be laid upon the outside of the roof, bedded in canvas and white lead, and screwed to the sheet iron by wood screws, No. 20, $1\frac{1}{4}$ in. long, to serve as a guide, and on the top of which, a strip of hoop iron, $3\frac{1}{2}$ in. wide, 14 wire gauge, is screwed with wood screws, No. 20, $1\frac{1}{4}$ inch long.

This sliding door must be well and truly put together, to insure its perfect working.

Handles are to be fixed on the top slide and on the door.

To be of the best blue-gum, well-seasoned, and free from all defects, 2 in. thick and about 7 in. ^{Floor-boards.} wide, laid longitudinally, and each plank well secured on the head-stocks. Cross bearers and diagonal braces, with $3\frac{1}{2}$ in. wrought iron rose-headed nails.

Powder-vans.

The powder-vans are to be the same as the covered or C vans, with the exception, that they are to be without sliding roof doors; and in all other respects like No. 1 Powder-van on the Great Southern and Western Railways.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for Meat-van.

These vans are to be 17 ft. long, 8 ft. wide, and 6 ft. 10 in. high; and the same, in general arrangement, as No. 7 Meat-van on the Southern and Western Lines.

The under-framing, wheels, axles, buffers, springs, &c., to be the same as specified for D Trucks.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for A Trucks.

The under-frame (15 ft. long and 7 ft. 6 in. wide), wheels, axles, buffers, and all iron-work, to be the same as specified for D trucks.

Height of body outside to be 11 in., and inside, above flooring, $6\frac{5}{8}$ in.

Round the top edge of body is to be fixed a plate of iron, 2 in. by $\frac{3}{8}$ in., secured by wooden screws, and six $\frac{1}{2}$ -in. bolts on the sides, and four do. at each end.

The top sides to be of kauri pine, $6\frac{5}{8} \times 3$, bevelled on the inside to $2\frac{1}{4}$ in. on the upper edge. The corners to be strengthened with a $\frac{1}{4}$ -in. wrought iron plate, 12 in. long on sides and ends, and 10 $\frac{1}{8}$ in. deep, bolted to bottom side, head-stock, top side, and end boards, with ten $\frac{1}{2}$ -in. bolts in each corner plate.

In centre of each truck is to be fixed transversely a bolster of blue-gum, 10 x 5; the ends to be shod for a length of 12 in. with a $\frac{1}{2}$ -in. iron plate, lapped 3 in. over the sides, each being secured by six wood screws on the top and two $\frac{5}{8}$ -in. bolts through the sides. These plates are to have $1\frac{3}{4}$ -in. square holes to receive the pins. The pins are to be of wrought iron, 2 ft. long, $1\frac{1}{4}$ -in. square, with a shoulder 3 in.; they enter the bolster 6 in., and have fastenings with eye-bolt and $\frac{1}{2}$ -in. chain.

The bolster is to be secured to under-frame by two $\frac{5}{8}$ -in. bolts 2 ft. long, and two $\frac{5}{8}$ -in. bolts 15 in. long, at ends, through bolster, and bottom side of bottom.

J. H. THOMAS,
Engineer.

GOVERNMENT

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for B Trucks.

The under-framing, 15 ft. long, and 7 ft. 6 in. wide, to be the same as specified for D trucks.

The height from floor to top of sides 3 ft., and ends to be 3 ft. 4 in. in centre.

The general dimensions of body framing:—

	in.	in.		in.	in.
4 corner pillars	4½	4½		8 side diagonals	3½ x 3½
4 doorway do	4½	4½		2 end rails	4½ x 4½
8 side rails	4½	4½		2 do. 4½ thick,	ends 4½ 8½ in centre.
8 do. battens				3 x 3½	

Two side flaps, each constructed of four 7 in. x 2½ in., and one 8 in. x 2½ in. planks.

The whole of the framing to be of the best blue-gum, and the flaps and ends of kauri pine, planed, grooved and tongued, with 1 in. x ½ in. iron tongues.

The corner pillars are to be framed into head-stocks with two 1½ in. tenons.

The wheels, and axles buffers, and all other iron-work, to be the same as specified for D trucks.

The trucks are to be constructed in every respect (where not specified to the contrary) the same as B truck No. 30.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

*Specification of D Trucks.*General arrange-
ment.

The general arrangement to be as in Truck No. 240, on the Southern, Western, and Richmond Railways.

Frames.

The frame to be 15 ft. long, and 7 ft. 6 in. wide over all, and 6 ft. 1 in. inside soles.

Each sole to be in one piece, 11 in. x 4 in., framed into the head-stocks with two 1½ in. tenons, and further secured by two knees at each corner of the sole, head-stock, and diagonal braces, and by five ⅝ in. bolts in each, independent of the buffer bolts.

The head-stock to be 7 ft. 6 in. long, 12½ in. deep, by 4 in. thick, and to be level to the bottom side of the sole.

Two transverse bearers 11 in. x 4 in., and two do. 6 in. x 4 in., to be framed into the sole with two 1½ in. tenons at each end, and housed ¼ in. into the sole.

Four ⅝ in. bolts to pass through the soles across the frame, with nuts and washer plates at each end.

The four diagonal braces to be 11 in. x 3 in., framed fair with the upper side of the cross bearers and soles, and tenoned into the head-stock and transverse bearer with two 1½ in. tenons on each, housed into each ¼ of an inch, and further secured by a 3 in. x ½ in. plate, 26 in. long on transverse bar, and 14 in. long on each diagonal bar, bolted by ⅝ in. bolts, 12 in. long.

Two longitudinal bearers 11 in. x 4 in., and two do. 4 in. x 3 in. are tenoned into the two transverse bearers, and also housed in ¼ in. at each end.

Horn-plates.

To be bolted with ⅝ in. bolts against the inside of sole, and to be 8 ft. 6 in. from centre to centre of each.

The nuts to be placed on the outside, and screwed up securely against washer-plates, as shown in Truck No. 240.

Great care must be taken that these plates are correctly fixed vertically, and by transverse and longitudinal measurement.

The horn-plate must be 3 in. x ¾ in. iron, and wings to do. 2½ in. x ¾ in. They must be the same form as No. 240, and planed on the inside where they pass over the axle-boxes.

Buffers.

Cases and rams of cast-iron, and fitted with vulcanized India-rubber springs 5 in. diameter and 8½ in. long, with a 2 in. hole through the centre.

The cases must be bored and the rams turned to fit them well, and great care must be taken that the ram will touch the end of the casing before the compression is wholly taken off the spring.

The cases are to be packed off from the end frames with pieces of kauri pine 1 in. thick.

The buffer facings must be of good and well-seasoned kauri pine, free from knots and shakes, neatly turned, and securely and carefully bolted to the rams—care being taken that the bolt-heads fit well, and do not project at all beyond the buffer facing.

By means of the pin at the back end of the casing, ⅓ an inch of compression must be put upon the spring before the buffer is put into its place.

It will be seen that the centre bolt is square hole under the head, and passes through the ram in a square to prevent its turning round.

Draw-bar.

To be made of the best cable iron, with an India-rubber spring 6 in. diameter, 8 in. long, and a 3 in. hole through the centre—the spring working in a cast-iron cylinder to pattern provided.

Wheels.

There are to be four wrought-iron wheels to each truck, of the same pattern as those imported by the Commissioner from Lloyd, Foster & Co., &c., and to be 3 ft. in diameter on the tread.

They must be turned and bored for the reception of the tire and axle to the exact diameter.

Tires.

To be of best Low Moor manufacture, 5 in. wide, and 2 in. thick on the thin edge—turned and bored to gauge.

Great care must be taken that the tires are shrunk securely upon the wheels, and that no undue strain is put on either; the diameter of the tire, after it is bored and before it is heated for expanding, must be precisely that of the wheel. It is to be riveted to the rim of the wheel with four ⅞ in. rivets coned into the tire, and with the head of the rivet on the inside of the rim of the wheel.

Axles.

To have journals 3¼ in. diameter by 7½ in. long; diameter of wheel seating, 4½ in.; length of ditto, 8½ in.; diameter behind wheel, 5 in.; diameter in middle of axle, 4 in.; length between centres of journals, 6 feet 3¼ in.; length between bosses of wheels, 4 feet 3 in.

Total length of axle, 7 feet. Nose of journal to be 4 in. diameter, and ⅝ in. wide.

Axle-boxes.

To be made in halves, and fitted with gun-metal steps.

Care

Care must be taken that the steps are fitted and bedded securely in the box, and that they be bored so that they bear on the journal on the top only for a space equal to one-third of the circumference of the journal.

The cores for the grooves for the horn-plates must be carefully fixed in the mould, so that they be out of winding, and perfectly opposite to each other,

To be made of the best spring steel, and tested before put in by being twice weighted until the whole camber has been taken off and the spring found to resume its original form. Springs.

Length between centres, when unweighted, to be 2 ft. 8½ in., with holes in the ends 1 in. in diameter. To be perfectly true, and at right angles to the spring.

There are to be ten plates in each spring, nine being 3 in. by ⅜ of an in., and one 3 in. by ½ in.

Compass, 7 in. from top of eyes to top of back plate.

The centres of the springs must correspond with the centres of the journals over which they are placed, and be secured to the axle-boxes by (4) four ½ in. bolts and nuts, and two spring plates.

Each truck is to have a break fitted of the form and dimensions of that on No. 240. Break.

The spring hangers are to be made of wrought-iron, 3 in. wide and ⅜ in. thick. They are blocked off from the bottom of the soles by cast-iron blocks 3 in. wide, and secured to it by three ⅝ in. bolts. Spring hangers.

Great care must be taken that these are securely and correctly fixed, and out of winding in every direction.

To be made of the dimensions of those in No. 240, and of the very best cable iron. Coupling and safety chains.

The end standards are to be 4 in. by 3½ in. End standards.

To be of the best clean kauri pine; the ends and side-flaps are each to be constructed of two 7 in. by 2½ in. planks, and one 8 in. by 2½ in. Sides and end planking.

The depth of the side above the level of the floor is 22½ in.

Four ½ in. bolts to pass directly down through the whole depth of the ends and flaps, with cup-heads on the top of the sides, and nuts underneath.

Wrought-iron knees, 2½ in. by 1 in. the full depth of end, and 14 in. into the sole bar.

A band of iron, 2½ in. wide by ⅜ in. thick, to be secured with wood screws, No. 18, 1½ in. long, and not more than 18 in. apart, to run round the top of truck.

To be of the best well-seasoned blue-gum, free from all defects, 2½ in. thick and 7 in. wide, laid longitudinally, and each plank well secured on the head-stocks; cross-bearers, and diagonal braces, with 3½ in. wrought-iron rose-headed nails. Floor-boards.

Wherever bolts are used, the washers underneath the nuts must not be less than 2¼ in. square by ¼ in. thick. Bolts and washers.

The whole of the work must be of the very best quality and finish in every respect. Quality of work.

Every part must be framed perfectly square and true in every direction, and all the tenons must fit well into the mortises, and be bedded in with white lead; and all the holes for bolts must be bored slightly less in diameter than the bolt itself, that the whole may be solid and firm when fixed together.

J. H. THOMAS,
Engineer.

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Specification for the Painting of Rolling Stock.

Locomotive Engines.

Paint, in two coats of red lead, the inside of boiler and water-tank.

Previous to new lagging being fixed, the whole exterior of the boiler is to receive two coats of red lead.

The lagging to have two coats of lead colour; and under-side of iron lagging sheets, two coats of red lead.

After the lagging is fixed, the whole of the exterior of engine and tender to receive two coats of colour, stopped and filled up with not less than three coats of Noble and Hoare's patent filling, to be rubbed down to a smooth surface. It is then to receive one coat of lead colour and two coats of green, picked out with black, and edged with white.

The under-frame to be in every respect painted in a like manner, the buffer plank being finished in vermilion, picked out with black.

The wheels to be painted with two coats of lead colour, stopped up, and to receive two coats of green, picked out with black.

The whole of the outside of the painted portion of the engine, tender, frames, wheels, &c., &c., to receive over all two coats of varnish.

Chains, springs, &c., to receive two coats of lead colour, and one of black or Japan.

Sufficient time must be allowed to elapse to enable each of the foregoing coats of paint, &c., to become perfectly dry before the application of another.

Carriages.

They are first to be given three coats of lead colour, and four of filling up; then to be well rubbed down with pumice-stone, and receive two more coats of lead colour, and stopped with hard stopper; and then again faced down to a smooth surface with pumice-stone; then receive an additional coat of lead, and two coats of pattern colour.

The mouldings and framework to be picked out. The letters, garters, and number, to be in gold, shaded with vermilion, lake, white, and black.

The whole to be finished with three coats of best copal varnish.

Roof to be covered with No. 1 navy canvas, but previous to this the wood-work is to receive two coats of paint and three coats over all.

Inside of under-frame and bottom of body, steps, springs, wheels, axles, and other iron-work, to receive two coats of colour.

Sufficient time must be allowed to elapse to enable each of the foregoing coats of paint to become perfectly dry before the application of another.

Blinds, glass frames, and all inside fittings, to receive three coats of varnish. C.

C. Vans, Sheep-vans, Cattle-wagons, and Meat-vans.

Paint body both inside and outside, as well as the under-frame, with four coats of colour, and one coat of pattern colour.

The outside of body and the under-frame to receive, in addition to the above, one coat of colour and varnish, and one coat of varnish to be given over all.

Sufficient time must be allowed to elapse to enable each of the foregoing coats of paint to become perfectly dry before the application of another.

The numbering and the lettering to be performed in a like manner to that which is done on the same class of vans and wagons as are at present on the Government Railways.

All the exposed iron-work, springs, wheels, axles, chains, and bottom, &c., to be painted one coat of lead colour and one of black.

A, B, D, and E, Goods-wagons, and Carriage-trucks.

Body to be painted both inside and outside, as well as the under-frame, in two coats of oil colour, and one coat of pattern colour.

The outside of body and the under-frame to receive, in addition to the above, one coat of colour and varnish.

Sufficient time must be allowed to elapse to enable each of the foregoing coats of paint to become perfectly dry before the application of another.

The numbering and lettering to be performed in a like manner to that which is done on the same class of wagons and carriage-trucks as are at present on the Government Railways.

All exposed iron-work, springs, wheels and axles, chains, and bottoms, &c., to be painted one coat of lead colour and one of black.

Funeral-cars.

To receive two coats of lead colour, three coats of filling up, one of staining, and then well rubbed down with hard pumice-stone.

It is then to be painted with two more coats of lead colour, and well stopped up with hard and soft stopper, after which it is to be faced to a smooth surface.

The panels to be finished with two coats of clean lead colour, and the frame-work, cornice, and moulding, with two coats of black paint.

Two coats of body varnish is to be given over all outside work.

The inside to receive three coats of clean light lead colour and two coats of varnish.

Roof, buffers, exposed iron-work, wheels, axles, chains, bottom, &c., to be given one coat of lead colour and one of black.

Sufficient time must be allowed to elapse to enable each of the foregoing coats of paint to become perfectly dry before the application of another.

Goods and Passenger Break-vans, and Horse-boxes.

These vans to receive three coats of lead colour, stopped up, and two coats of brown oil colour, according to sample supplied, and one coat of oil and varnish mixed, to be picked out with buff, and the whole to be finished with two coats of varnish.

The inside to receive three coats of paint, and afterwards grained oak, and finished with a coat of varnish.

The iron-work to have three coats of paint in oil finished black. The inside of under-frame to receive two coats of paint.

The numbering and lettering to be performed in a like manner to that which is done on the same class of vans at present on the Government Railways.

Sufficient time must be allowed to elapse to enable each coat of paint to become perfectly dry before the application of another.

J. H. THOMAS,
Engineer,

GOVERNMENT RAILWAYS, NEW SOUTH WALES—EXISTING LINES BRANCH.

Contracts for Rolling Stock.

General Stipulations and Conditions.

Material and workmanship.

The whole of the materials used in the construction of the rolling stock must be of the very best description, except where specified otherwise, and the work is to be executed in a sound, substantial, and workmanlike manner, and with a finish equal in all respects to the best class of their respective kinds of English manufacture.

Gauge.

The gauge of the railways for which the rolling stock is required is that of 4 feet 8½ inches.

Position of buffers.

The distance from centre to centre of buffers is in every case to be 5 feet 9 inches; and the height, above the upper surface of rail to centre of buffers, is to be 3 feet 4 inches.

Blinds, &c.

Venetian blinds in all the carriages are to be placed inside, and the glass frames outside, as in the imported carriages for the Western Line.

Panels.

It must be clearly understood that all the panels in carriages are to be grooved into the framing, and upon no account are nails or wood screws to be used in their fixture.

Contractor must provide all labor and materials. Bolts and nuts.

The contractor is to provide labour, materials, tools, machinery, and all other matters necessary for the due performance of the contract.

Delivery.

All bolts and nuts used throughout to be of Whitworth's standard threads.

It is to be distinctly understood that all the rolling stock required for either the Northern or Southern Lines are to be delivered at the Newcastle or Sydney Stations, as the case may be, free of all expenses for packing, cases, &c., &c.; and no allowance will be made for these, or for freight, insurance, or any other charges in connection with the delivery.

Tenders.

The Commissioner does not bind himself to accept the lowest or any tender.

All

All timber, whether Colonial or Foreign, is, before being used, to be thoroughly well seasoned, free from wanes, shakes, or other imperfections, and worked full to the dimensions given. Timber.

The tenders are to include the cost of all patent rights. Patent rights.

The probable amount of rolling stock which will be required during the first year will be about one-third of that set down for all the Lines in the schedule attached to the form of tender. Rolling stock required for first year.

The contractor is to be responsible for the period of one year from date of delivery, for all breakages arising from defective construction, or the use of inferior materials. Responsibility.

The whole of the rolling stock to be completed, delivered, and set to work entirely to the satisfaction of the Engineer for Existing Lines of Railway, within Time.

The Engineer, or any officer appointed by him, shall have full liberty, at all reasonable times during the construction, to examine all material or work which may be intended for them, and to reject the whole or any portion that may be thought necessary; and any so rejected shall immediately be replaced in a satisfactory manner by the contractor, and at his cost. Inspection.

The dimensions figured upon the drawings to be preferred in all cases to measurement by scale. Dimensions on drawings.

While the foregoing specification sets forth the general detail of the rolling stock, the Engineer reserves the option of such modifications as he may find necessary as the work proceeds, so long as the general dimensions are not interfered with, without any claim of extra payment being allowed. The drawings and specification must be taken to explain each other; but should there be any work and materials which may be reasonably and obviously considered necessary for the proper completion of the rolling stock, but which has not been shown on the drawings or described in the specification, or that may be mentioned or implied in one only, the same must be considered as included in the contract, and the contractor must find whatever may be necessary to complete the rolling stock according to the true intent and meaning of the specification and drawings; and in all cases of defective description or any ambiguity, the explanation given by the Engineer shall be binding upon the contractor. Right of altering details.

The Engineer reserves to himself the power of making any deviation from or additions to the rolling stock, without invalidating the contract; the value of such deviations, alterations, or additions to be ascertained and allowed for by the Engineer, at such rates as he shall consider to bear a due proportion to the other work, and the value thereof added to or deducted from the amount to be paid to the contractor, as the case may be.

In the event of the construction of the rolling stock not proceeding with that despatch which the Engineer may consider necessary, or the contractor fails from any cause to proceed in the execution of his contract, the Commissioner shall have full power and authority to cancel the contract, as far as relates to the work remaining to be done; and in such case the moneys which shall have been previously paid to the contractor on account of the work executed, shall be taken by him as full payment for all the work done and materials supplied under the contract; and upon notice in writing, under the hand of the Commissioner, that he, under the authority of this condition, cancels the contract, being served upon the contractor, or left at his last known place of abode, the contract shall be cancelled; and thereupon all sums of money that may be due or unpaid to the contractor, together with the portions of the rolling stock left unfinished, and all sums of money named as penalties for the non-fulfilment of the contract, shall be forfeited and become payable to the Commissioner, and the said portions of the rolling stock shall become and be the absolute property of the Commissioner, and with the moneys so forfeited and payable as aforesaid, shall be considered as ascertained damages for breach of contract. Cancellation of contract.

If the contractor become insolvent, have his estate placed under sequestration, or shall make an assignment of his estate for the benefit of his creditors, it shall be lawful for the Commissioner, without previous notice to the contractor, or to the Official or other Assignee or Assignees of his insolvent estate, or to the Trustee or Trustees under the assignment, to take such of, and all portions of the rolling stock, whether completed or not, from the contractor and of the Assignees or Trustees of his estate, and re-contract with any other person or persons to proceed with and complete the said rolling stock, upon such terms, stipulations, and conditions as shall be deemed expedient. Bankruptcy or insolvency.

The contractor will be required to provide two approved persons as sureties, to enter with him into a bond to the Commissioner for Railways, in the penal sum of Security. for the proper performance and completion of the contract. The names of the persons proposed by him as sureties must be stated in the tender, the Commissioner for Railways reserving to himself the power of rejecting such proposed sureties, should he deem it advisable to do so.

Should the contractor fail to procure such persons as may be deemed by the Commissioner to be eligible sureties, within days from the acceptance of the tender, or should the contractor fail to execute the contract for the due performance of the work, or to execute and to procure the due execution, by the person so approved of, as sureties of the bond required for securing the due completion of the work to be done under the said contract, within days after the acceptance of such persons as sureties has been notified to him, the Commissioner will have the option of, and full power and authority to declare such acceptance to be annulled.

Payment will be made on the Engineer's certificate as the work progresses, unless same shall become not payable by reason of anything contained in these conditions up to the date specified for the completion of the contract, in the proportion of of the value of the work satisfactorily executed, and the remaining will be paid after the Engineer has certified that the whole of the rolling stock has been completed to his entire satisfaction. Payment.

The words "or any officer appointed by him," in these general conditions, shall mean any person who may from time to time be appointed by the Engineer for Existing Lines of Railway, to supervise the work; and the words "Engineer for Existing Lines" or "Engineer" shall mean the Engineer for Existing Lines of Railways for the time being of the Commissioner for Railways. Interpretation clause.

J. H. THOMAS,
Engineer for Existing Lines of Railways.

Department of Public Works,
Railway Branch,
Sydney, 5 October, 1868.

TENDERS will be received at this Office, until Tuesday, the 3rd day of November next, at noon, from persons willing to contract for making, at a schedule of prices, the whole of the rolling stock (inclusive or exclusive of locomotive engines) which may be required on the Government Railways, for a period of five years, from 1st January, 1869.

Plans, specifications, and form of tender may be seen, and further particulars obtained, at the Office of the Engineer for Existing Lines, Sydney Station.

Tenders to be endorsed "*Tender for Rolling Stock.*"

JAMES BYRNES,
Commissioner for Railways.

VI.

NUMBER of Tenders received for rolling stock by present Government, and names of parties who tendered:—

Nine Tenders received on 17th November, 1868, as under:—

1. Vale and Lacy.
2. Duncan Sim.
3. John Robertson.
4. Hally and Clyde.
5. Joseph Mather.
6. Wm. Williams.
7. Thos. M'Arthur.
8. P. N. Russell.
9. Larkin and Wakeford.

Crown Lands Office,
Sydney, 14 October, 1869.

A. O. MORIARTY,
Chief Commissioner of Crown Lands.

1869.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS.

(CORRESPONDENCE RESPECTING LEASING OF RUNS IN THE WARREGO DISTRICT.)

Ordered by the Legislative Assembly to be Printed, 3 November, 1869.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23rd March, 1869, That there be laid upon the Table of this House,—

- “ (1.) Copies of all Correspondence between T. G. Dangar and the Chief
“ Commissioner of Crown Lands; and the Chief Commissioner of Crown
“ Lands and the Commissioner of the Warrego District, and all other
“ persons—relative to the Bunnawannah Runs, and the acceptance of the
“ Tenders for Georgy and Georgy East, and copies of the original Tenders
“ for Georgy and Georgy East.
- “ (2.) Copies of the Maps furnished the Commissioner of the Warrego
“ District. for his guidance by the Chief Commissioner of Crown Lands,
“ having reference to the Bunnawannah Runs and Georgy and Georgy
“ East.
- “ (3.) Copies of the Report submitted by the Commissioner of the Warrego
“ to the Chief Commissioner of Crown Lands, upon the alleged encroach-
“ ment of Georgy and Georgy East upon the Bunnawannah Runs.
- “ (4.) Copy of the final decision of the Land Board, and the Report upon
“ which it was made.
- “ (5.) Copies of all Tenders accepted for land between the junction of the
“ Culgoa and Bree, and the Bree and Darling.
- “ (6.) Copies of accepted Tenders for the Mohanna, Bunnawannah, West
“ Bunnawannah, Upper Turee, Birree, Kunreberee, East Kunreberee,
“ Gueranara, Georgy, and Georgy East.
- “ (7.) Also copies of all Correspondence and Minutes between the Minister
“ for Lands and the Chief Commissioner of Crown Lands, relative to the
“ licensing of Georgy and Georgy East.
- “ (8.) Also copies of all Correspondence between the Minister for Lands
“ and T. G. Dangar, on the subject of the leasing of Georgy and Georgy
“ East.
- “ (9.) Copy of Tender for block A, at the junction of the Bree with the
“ Culgoa.
- “ (10.) Copies of T. G. Dangar’s Tender for Bree, Culgoa, and Upper Bree.”

(*Mr. S. Brown.*)

SCHEDULE.

NO.	PAGE.
1. T. G. Dangar to Chief Commissioner of Crown Lands, protesting against any interference with his Bunnawannah Runs by tenders for Georgy, Georgy East, or any other runs. 17 December, 1860	3
2. The C.C.C. Lands to Mr. Dangar, in reply. 3 June, 1861	3
3. T. G. Dangar to the C.C.C. Lands, protesting against the acceptance of any tenders for land at the back of his Bunnawannah Runs by Messrs. Colless, or others. 13 July, 1861	4
4. The C.C.C. Lands to Mr. Dangar, in reply. 2 August, 1861	4
5. T. G. Dangar to the C.C.C. Lands, respecting the acceptance of Messrs. Lord's and Smith's tenders for Georgy and Georgy East Runs, with tracing of the country referred to. 24 August, 1861	4
6. T. G. Dangar to the C.C.C. Lands, stating that his protest refers to the Bunnawannah and Bunnawannah West Runs. 27 August, 1861... ..	5
7. The C.C.C. Lands to Mr. Dangar, in reply to his letters of the 24th and 27th August. 7 October, 1861	5

CROWN LANDS.

No. 1.

T. G. DANGAR, Esq., to THE CHIEF COMMISSIONER OF CROWN LANDS.

Bullerawa, Wee Waa,
Namoi River, 17 December, 1860.

SIR,

I do myself the honor to protest in the strongest terms against any interference with the established boundaries of my Bunnawannah and Turee Runs by the alienation of any part thereof, either under the name of "Georgy" and "Georgy East," or in any other name; and in support of my claim to the land in question I beg leave to submit the grounds on which I protest:—

1st. That the position of the Bokira being erroneously marked upon the charts has led to the belief that there is more ground than really exists between the true junction of that river and the junction of the Culgoa or Bree.

2nd. That the tree marked wl has always been considered the western boundary of Moharma Run as originally taken up by the late Mr. W. Lawson, which can be proved by the evidence of numerous persons fully conversant with the position of the marked tree alluded to.

3rd. That the wl tree, being the original western boundary of the Moharma Run, is consequently the eastern boundary of the Bunnawannah Run and the commencing point of the same.

4th. That after having obtained the Bunnawannah Run, I tendered for the country lying between the western boundary thereof and Upper Turee under the name of Bunnawannah West, as will be seen by reference to the description inserted in my tender. The western boundary thereof was made the eastern boundary of Upper Turee Run, so as to include the whole of the vacant land lying between Bunnawannah and the land called Upper Turee, and the Government accepted my tender as such.

5th. That, being no surveyor, I estimated to the best of my ability the intermediate distance between the western boundary of Bunnawannah Run and the eastern boundary of the Upper Turee Run when tendering for the vacant country between these runs.

6th. That having every belief that the distance did not exceed the number of miles stated in my tender for West Bunnawannah, and having occupied the land ever since, I consider that even should the distance prove to be a little greater than my estimation, still, as the terms of my description intended to and do embrace all the vacant land from Bunnawannah to Upper Turee, that I ought not to be deprived of it, but rather that if in excess I should be permitted to pay arrears if any considerable excess should prove to exist, although I demur even to this sacrifice in support of a right authorized and confirmed by judicial precedents.

For the above reasons I protest against the acceptance of the tenders for land under the names of "Georgy" and "Georgy East," or under any other name, the object of which bears the intention of a desire to deprive me of a part of my property, and perpetrate an injustice that must lead eventually to expensive litigation.

Under these circumstances I trust you will see the justice of my claim to land in dispute, and withhold your final acceptance of any tender that will interfere with my runs above referred to; or if accepted that the same may be cancelled or some satisfactory method adopted to determine the validity of my claim to the land in question.

I have, &c.,
THOS. G. DANGAR.

No. 2.

THE CHIEF COMMISSIONER OF CROWN LANDS to T. G. DANGAR, Esq.

Crown Lands Office,
Sydney, 3 June, 1861.

SIR,

In reply to your letter dated 17th of December, 1860, I have now to inform you that the tenders of Messrs. Lord and Smith had been accepted, and the rent paid by the parties prior to the receipt of your letter, and that I find upon investigation that the claims of the respective holders of the licensed runs in the vicinity were fully considered and provided for prior to the acceptance of the tenders. The frontage of Mohanna, as claimed in the demand for a lease, extends only to 12 miles below the junction of the Bokhara, and the runs Bunnawannah and Bunnawannah West are entitled only to the frontages of 5 miles each below the lower boundary of Mohanna. The upper boundary of Turee Upper is also a fixed point.

The Tender Board adopting these views recommended the acceptance of a tender from Mr. Lord for the country found to be vacant between the lower boundary of Bunnawannah West and the Birie, and of one from Mr. Smith for that between the Birie and Upper Turee. Upon a careful review of the whole matter I think the course taken by the Board was that which was proper under the circumstances.

The value of the claims to the marked tree referred to by you must depend upon whether its position is consistent with the estimated distance of 12 miles from the Bokhara junction, which is about to be ascertained.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 3.

No. 3.

T. G. DANGAR, Esq., to THE CHIEF COMMISSIONER OF CROWN LANDS.

Bullerawa, Wee Waa,
Namoi River, 13 July, 1861.

SIR,

I do myself the honor to enter my protest against the acceptance of any tender for land upon the Bree Creek, at the back of Bunnawannah and part of West Bunnawannah, by the Messrs. Colless or others, as the same, if licensed, will be an infringement upon my rights as the licensee of the abovenamed runs. This protest also applied to land on the north side of the Bree, now illegally occupied at the instance of the Commissioner of the Warrego District by the Messrs. Colless; such proceedings on the part of the Commissioner being inconsistent with the regulations, I beg that the Messrs. Colless may be removed at the instance of the Crown as trespassers.

I have, &c.,
THOS. G. DANGAR.

No. 4.

THE CHIEF COMMISSIONER OF CROWN LANDS to T. G. DANGAR, Esq.

Crown Lands Office,
Sydney, 2 August, 1861.

SIR,

In reply to your letter dated the 13th ultimo, protesting against the acceptance of any tender for land upon the Bree Creek, at the back of Bunnawannah and part of West Bunnawannah, I have to inform you that due care will be taken that no land forming part of your run Bunnawannah West is leased to other parties, but that beyond this I cannot entertain your protest.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 5.

T. G. DANGAR, Esq., to THE CHIEF COMMISSIONER OF CROWN LANDS.

Bullerawa, Wee Waa,
Namoi River, 24 August, 1861.

SIR,

I do myself the honor to acknowledge your letter of the 3rd June last, in reply to mine of the 17th December, 1860, respecting the acceptance of Messrs. Lord's and Smith's tenders for land supposed to be vacant between my Bunnawannah West and Upper Turee Runs, and informing me that the claims of the respective holders of the said runs were fully considered and provided for prior to the acceptance of the tenders.

In reply I beg to state that, although the Board have fully considered the matter, I do not feel myself justified in acting upon their mature deliberations, the result of which, however plausible, are contrary to fact.

The Tender Board have, without doubt, acted innocently in accepting the tenders alluded to before the definite position of the Bokira was confirmed by survey, and in doing so I beg to observe that some indecent haste has been exhibited, amounting to a denial of justice to myself rather than admit an error.

That I should occupy a portion of Messrs. Loder and Capps' run of Mohanna, by conforming to the wish of the Land Board is, painfully ridiculous, as I would thereby lay myself open to an action for trespass (even if there were spare country beyond the twelve miles frontage to Mohanna, from the junction of the Bokira to the WL tree), in the expense of which I fear, notwithstanding the right the Land Board desire to invest me with, the Government would be disinclined to pay.

I regret that you yourself have confirmed the decision of the Board founded on an impression, no doubt, conveyed by erroneous maps and prejudiced reports, perhaps emanating from the Commissioner, at whose instance Messrs. Lord and Smith, or either one or other of them, tendered for the land in question.

With regard to the latter part of your letter I beg to observe that the position of the river alluded to ought to have been determined before the tenders of Lord and Smith upon *reconsideration* were confirmed by your acquiescence in the report of the Land Board; the survey will ultimately confirm what I have already asserted in previous letters.

By one of the Government maps published under the authority of the Surveyor General the distance from Brewarrina to Bunnawannah hut is 22 miles in a direct west line—the map must be correct as the opposite side has been surveyed by an officer of the Survey Department; he has, however, made an error which requires correction. The "Mohanna" marked on the plan should be "Walgra," which is $5\frac{1}{2}$ miles higher up the river than Mohanna. The Mohanna old yard is 5 miles, if so much by the road, as nearly as I can estimate from Bunnawannah; the error in this respect may have led the Land Board to adhere to an opinion inconsistent with facts, but merely gleaned from the incorrect details of an official map.

The labour of reinvestigating this *questio vexata* I will not inflict on those who have given it so much attention, but I shall take that remedy in the event of trespass which will hereafter insure me from annoyance.

I regret that the numerous verdicts in the squatting actions that have recently been tried had no effect to prevent the discredit which must attach to individuals acting upon impulse or arriving at conclusions upon incorrect data.

In my opinion the Commissioner of the Warrego was never on the land in dispute in his official capacity, nor did he ever survey it before sending in his report, although furnished with expensive instruments—the use of which it is *surmised* he is fully acquainted with.

In

Six months after
having been
written.Georgy and
Georgy East.

In conclusion I beg to say that I hold possession of the land licensed to Messrs. Lord and Smith as Georgy and Georgy East, in the pastoral district of Warrego, and I have no intention to relinquish my claim, unless compelled to do so by a verdict in the Supreme Court. I am perfectly convinced from the opinions I have received from the most eminent lawyers in the Colony that the labours of the Board in deciding against my rights are in opposition to the true state of the case.

I enclose a tracing* from the map of the surveyed runs on the Bogan and Darling Rivers, * Appendix A. showing the approximate position of Brewarrina, Bokira, Walgra, Mohanna, Bunnawannah, and the Bree Creek, for your information. This map may not be correct, nor do I consent to abide or be bound by it; it will however show that there can at the outside be only a narrow strip of country to meet Lord and Smith's tenders; even if the land were not included within the limits of the description inserted in my tender for West Bunnawannah, and accepted by the Government, it would be a great injustice to deprive me of such a small area and insert *two runs* between mine when there is not room for one, and by the Orders in Council and old regulations no run can be granted unless it contains an area of 16,000 acres.

It is asserted that Messrs. Lord and Smith are bounded by my runs; if so, I contend that when my claims are satisfied there will be no room for them—the land included within the two Georgy Runs I claim by virtue of my Bunnawannah and West Bunnawannah license, even if it is in excess of the proper distance you allege I have only a right to.

I notice that Messrs. Lord and Smith named no area for their runs—a rather peculiar circumstance, and quite at variance with the regulations—while Mr. Suttor's have been accepted for areas in excess of the regulations.

In the event of your persistence in refusing me redress I must petition Parliament, and if refused any satisfaction there trust to a decision of the Supreme Court.

I cannot resist observing that Smith's Georgy Run would extend up the Bree, and besides depriving me of frontage take away the back of my West Bunnawannah Run—another monstrous injury to me.

I have, &c.,
THOS. G. DANGAR.

No. 6.

T. G. DANGAR, Esq., to THE CHIEF COMMISSIONER OF CROWN LANDS.

Bullerawa, Wee Waa,
Namoi River, 27 August, 1861.

SIR,

I am in receipt of your letter of the 2nd instant, informing me that no land forming a part of my run, *Bunnawannah West*, will be leased to other parties, and to state that the protest contained in my letter of the 10th July last applied to both Bunnawannah and Bunnawannah West.

I have, &c.,
THOS. G. DANGAR.

No. 7.

THE CHIEF COMMISSIONER OF CROWN LANDS to T. G. DANGAR, Esq.

Crown Lands Office,
Sydney, 7 October, 1861.

SIR,

In reply to your letter of the 27th August last, I have the honor to inform you that my reply, dated the 2nd of the same month, to your previous communication, may be considered to apply to the case of Bunnawannah Run as well as to that of Bunnawannah West.

Your former letter, dated 13th July, was so worded that it was understood to refer to the latter Run alone, which was accordingly that named in my reply.

I have further to add, with reference to your communication of the 24th August last, that I do not see any object to be gained by further correspondence upon the subject at present.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 8.

T. G. DANGAR, Esq., to THE SECRETARY FOR LANDS.

Bullerawa, Wee Waa,
Namoi River, 6 July, 1862.

SIR,

I do myself the honor to request that I may be favoured with a reply to my letters respecting the encroachment made by Mr. G. W. Lord on my Bunnawannah Runs, by virtue of his accepted tenders for Georgy East, and Mr. Smith's Georgy Run. The letter referred to was accompanied with a tracing explaining the encroachment, and was handed to you personally by Mr. Rusden.

I have, &c.,
THOS. G. DANGAR.

Chief Commissioner of Crown Lands, B.C., 12 Aug.—M.F.

Will the Surveyor General be so good as to say whether Mr. Roland's survey has afforded the materials for determining the junction of the Boekhara with the Darling; and, if so, will he favour me with a tracing of the Darling from the junction to that of the Culgoa?—A.O.M.—B.C., 27 Aug., 1862.

Mr.

Mr. Rowland's survey does not show what is required, but the enclosed tracing from Mr. Davidson's survey and Mr. R. Mitchell's sketch of the Darling will perhaps be of some service to the Chief Commissioner of Crown Lands in dealing with this case.

For the Surveyor General,
HENRY HALLORAN,
B.C., 19 Sept., 1862.

No. 9.

THE CHIEF COMMISSIONER OF CROWN LANDS to THE COMMISSIONER OF CROWN LANDS, WARREGO.

Crown Lands Office,
Sydney, 9 December, 1862.

SIR,

I have the honor to refer to you the accompanying correspondence respecting the alleged encroachment by Mr. Lord on Mr. Dangar's Bunnawannah Runs, and I have to request that you will be good enough to take the opportunity of reporting fully thereupon as to the several points which have been raised, when you visit the locality for the appraisalment of Georgy East.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

61-688.

To be returned.

No. 10.

THE CHIEF COMMISSIONER OF CROWN LANDS to T. G. DANGAR, ESQ.

Crown Lands Office,
Sydney, 9 December, 1862.

SIR,

With reference to your letter of the 6th July last, requesting a reply to your letter respecting the encroachments made by Mr. Lord on your Bunnawannah Runs, I have the honor to inform you that I have referred all the correspondence on the subject to the Commissioner for the Warrego, and have requested him to report fully thereupon as to the several points which have been raised, when he visits the locality for the appraisalment of Georgy East.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 11.

THE CHIEF COMMISSIONER OF CROWN LANDS to T. G. DANGAR, ESQ.

Crown Lands Occupation Office,
Sydney, 10 December, 1863.

SIR,

In reply to the inquiry contained in your letter of the 26th ultimo, I have the honor to inform you that the Warrego Commissioner has not yet reported upon the matter of the alleged encroachment by Mr. Lord on the Bunnawannah Run.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 12.

THE COMMISSIONER OF CROWN LANDS, WARREGO, to THE CHIEF COMMISSIONER OF CROWN LANDS.

Report upon Mohana, Bunnawannah, Bunnawannah West.

Crown Lands Office,
Warrego, 20 April, 1865.

SIR,

Referring to your letter, dated 9th December, 1862, No. 9,198, I do myself the honor to inform you that, having made a very careful investigation into the extent of country lying between the junction of the Bockhara River and the junction of the Birie River with the Barwon, I have come to the following conclusions:—

1. That the distance from the Bokhara River to the Old Walgra Hut is not more than 3 miles.
2. That from the Walgra Hut to Old Mohana Station is not more than 6 miles.
3. That the distance from Mohana to the WL tree, on the banks of the Barwon, does not exceed two miles and a half.
4. It is my opinion that the distance from the Bockhara to the WL tree does not exceed 12 miles.
5. The lessees of Mohana Run claim the WL tree as the boundary between Mohana and Bunnawannah Runs; and from various statements which I have heard on the subject it is my impression that the WL tree has always been the western boundary on the Mohana Run.

6. With reference to the Bunnawannah and Bunnawannah West Runs, I beg to state that—
7. The distance from the WL tree to the Bunnawannah Head Station is not more than two miles and a half.
8. The distance from the Head Station to the junction of the Birie with the Barwon River does not exceed nine miles and a half.
9. It is my opinion that there is not room between the WL tree and the junction of the Birie and Barwon for any more runs than Bunnawannah and Bunnawannah West.
10. I do myself the honor of enclosing an illustration* showing the result of observations, which I believe to be quite correct, and which perfectly satisfy me that there is not room between the Bockhara and Birie Rivers for any more runs than Mohana, Bunnawannah, and Bunnawannah West. * Appendix B.
11. I have not been able yet to make any inquiry into the western side of the Birie River, but will do so as soon as possible, and will furnish you with a further report.

I have, &c.,
J. G. GRENFELL,
C.C. Lands.

No. 13.

THE CHIEF COMMISSIONER OF CROWN LANDS to MESSRS. WATT & WALKER.

Crown Lands Office,
Sydney, 27 September, 1865.

GENTLEMEN,

Referring to the Bunnawannah and Bunnawannah West Runs, formerly held by Mr. Dangar, and of which you are now the Lessees, and to a correspondence which has taken place in reference to an alleged encroachment thereon by Mr. Lord's Georgy and Georgy East Runs, I have the honor to inform you that it appears from a recent report of the Commissioner of the Warrego District, that the extent of country has been over-estimated, but I am unwilling to take any further action in the matter pending some further expression of opinion from yourselves and Mr. Lord as to your present respective claims, to which effect Mr. Lord has been apprised.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 14.

THE CHIEF COMMISSIONER OF CROWN LANDS to G. W. LORD, Esq.

Crown Lands Office,
Sydney, 27 September, 1865.

SIR,

Referring to the runs Georgy and Georgy East in the Warrego District, and to the alleged encroachment by them on the Bunnawannah Runs (formerly Mr. Dangar's), I have the honor to inform you that it appears from a recent report of the Commissioner of Crown Lands for the Warrego District, that the country has been over-estimated, but I am unwilling to take any further action in the matter, pending some further expression of opinion from yourself and Messrs. Watt & Walker as to your present respective claims; to which effect those gentlemen have been apprised.

I have, &c.,
A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 15.

W. G. WALKER, Esq., to THE CHIEF COMMISSIONER OF CROWN LANDS.

DEAR SIR,

In reply to your favour of the 27th September, addressed to Mr. Watt and myself, I would remark that Mr. Grenfell, the Commissioner of Crown Lands for the District, personally informed me that he had measured the frontage of Bunnawannah and Bunnawannah East, and found that they extended to within half a mile of Georgy West, or junction of Culgoa and Darling.

I am authorized to say, on behalf of all parties now interested in the Bunnawannahs, Georgy E. & W., Turrees, and Burie, that we shall be satisfied to have the block Georgy East as it is, provided the country on Culgoa, between Colliss and Georgy, inside of Thully Springs, is granted, as comprised in Mr. Lord's tender, Looden, and also provided a small corner, or perhaps two, of vacant country adjoining Burie, of not more area than 20 square miles, utterly valueless to any person other than owner of adjoining blocks, be granted us, instead of Georgy West's deficiency, and in accordance with my tenders. I make this proposal with concurrence of Mr. Cornish, who is pecuniarily interested now in Mr. Lord's country.

I am, &c.,
W. GLEN WALKER,
For Mr. Watt and Self.

Referred for the report of Mr. Grenfell on this proposal. A.O.M., B.C., 22 Jany., 1866.

No. 16.

THE CHIEF COMMISSIONER OF CROWN LANDS to W. G. WALKER, Esq.

Crown Lands Office,
Sydney, 23 January, 1866.

SIR,

I have the honor to inform you that I have referred for the report of Mr. Grenfell your letter of the 5th October last, on behalf of yourself and Mr. Watt, proposing certain arrangements with reference to country in the vicinity of the Bunnawannah, Georgy, and other runs in that locality.

I have, &c.,

A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 17.

MR. COMMISSIONER GRENFELL to THE CHIEF COMMISSIONER OF CROWN LANDS.

Crown Lands Office, Warrego,
Bourke, 22 March, 1866.

SIR,

Referring to your B.C., dated 22nd January last, requiring my report upon a proposition made by Mr. W. G. Walker on the subject of his runs on the Barwon River, I do myself the honor to inform you that I forward by this mail a report upon Mr. Lord's tender for Block C, or Looden, recommending its acceptance, and also a description showing the portion of vacant land between the Birie and Barwon.

The portion of vacant land tendered for by Mr. Walker, in his Tender No. 16, of April, 1865, is too small to constitute a run, and as it adjoins Mr. Walker's other runs I beg to suggest that his proposal may be entertained.

I have, &c.,

J. G. GRENFELL,
C. C. Lands.

No. 18.

EXTRACTS from letter from W. G. Walker to The Chief Commissioner of Crown Lands, dated 4 January, 1867.

[Tenders for Country in the Warrego District.]

"Being informed that the late Mr. Grenfell had favourably reported on several tenders in which those whom I represent are interested, and especially of one in name of Mr. Lord, called Looden, and another for country adjoining it, tendered for by myself, as well as some country behind Burie and Bunnawannah, I would esteem it a favour (if I have been correctly informed) if these were considered with as little delay as may be found practicable."

* * * * *

"I have discontinued paying rent on Georgy East, which either has no existence at all, or if any, only a nominal one, and is not worth paying any rent for; and to squeeze in this nominal run, Georgy East, the adjoining runs Burie and Georgy, by their amended descriptions would be curtailed much under 25 square miles. In a former correspondence I have intimated that the acceptance of Mr. Lord's tender for Looden, of my tender for an irregular corner of land between Thully Springs, the Turies, and the Guririrus, and of my tender for country behind Bunnawannah and Burie (the acceptance of all which I believe the local Commissioner has recommended), would be considered as a fair settlement of my claim in respect to loss of Georgy East and curtailment of extent of adjoining blocks."

* * * * *

W. G. WALKER.

Appendix C.

Enclosed is a rough sketch of the Georgy and Bunnawannah Blocks, &c.

No. 19.

THE CHIEF COMMISSIONER OF CROWN LANDS to W. G. WALKER, Esq.

Crown Lands Office,
Sydney, 8 March, 1867.

SIR,

With reference to your letter of the 4th January last, I have the honor to inform you that the applications for water reserves, referred to in the second paragraph thereof, have not been yet reported on by the District Commissioner.

With respect to Mr. Lord's tender for block C, or Looden, and your own tender for Back Bunnawannah, referred to in the third and fourth paragraphs of your letter, I have now recommended the acceptance of the respective tenders.

This, I think, meets your proposal as to the deficient area of Georgy East; and as it appears from the report of the late Mr. Grenfell that the space supposed to be occupied by the run of that name is really included in the adjacent runs of the same parties, I am prepared to recommend the cancellation of that tenure should the parties concerned so desire.

I have, &c.,

A. O. MORIARTY,
Chief Commissioner of Crown Lands.

No. 20.

No. 20.

W. G. WALKER, Esq., to THE CHIEF COMMISSIONER OF CROWN LANDS.

Sydney, 11 March, 1867.

SIR,

In reply to your favour of the 8th instant, I will feel obliged by the run supposed to exist, called Georgy East, having its tenure cancelled, as being included in the adjoining blocks.

When I have seen the accepted description of the run known as Block C, or Looden, I shall again communicate with you as to compensation for the deficient area of Georgy East.

I am, &c.,

W. GLEN WALKER,

(For self and others concerned.)

No. 21.

THE CHIEF COMMISSIONER OF CROWN LANDS to W. G. WALKER, Esq.

Crown Lands Office,

Sydney, 23 March, 1867.

SIR,

With reference to the second paragraph of your letter of the 11th instant, relative to your intention to claim compensation for the deficient area of Georgy East, I have the honor to inform you that I must not be misunderstood as implying that any claim for compensation exists in this matter.

I have, &c.,

A. O. MORIARTY,

Chief Commissioner of Crown Lands.

No. 22.

THE CHIEF COMMISSIONER OF CROWN LANDS to THE COMMISSIONER OF CROWN LANDS, WARREGO.

Crown Lands Office,

Sydney, 11 April, 1867.

SIR,

Referring to your predecessor's letter of the 22nd of March, 1866, and previous correspondence, I have the honor to inform you that the tenure of Georgy East, in the Warrego District, has now been cancelled in the books of this office.

I have, &c.,

A. O. MORIARTY,

Chief Commissioner of Crown Lands.

No. 23.

T. G. DANGAR, Esq., to THE SECRETARY FOR LANDS.

Sydney, 15 October, 1867.

SIR,

On the 9th and 10th December, 1862 and 1863, I received the enclosed copies of letters from the Chief Commissioner of Crown Lands, respecting an encroachment made upon my Bunnawannah runs.

Not having, up to this time, received any further intimation on the subject, perhaps you would do me the kindness to cause the matter to be looked up and the result made known to me.

I have, &c.,

THOS. G. DANGAR.

Chief Commissioner of Crown Lands.—16 October.—M.F.

Mr. Dangar was not further communicated with in the matter referred to, because it was presumed, the runs having passed into the hands of other parties who took up the correspondence, that he had no further interest in it.

The results of the enquiries that were instituted were duly communicated to the parties over two years ago.—A.O.M.—B.C., 21 Oct., /67.

The Under Secretary for Lands.—Inform.—J.B.W.

Mr. Dangar informed to the above effect.—30th Oct., 1867.

Enclosures referred to—
62-9193, dated 9 Dec., 1862;
63-4105, dated 10 Dec., 1863;—
For which see previous correspondence, page 6. (Nos. 9 and 11 of Schedule.)

No. 23 A.

THE UNDER SECRETARY FOR LANDS to T. G. DANGAR, Esq.

Department of Lands,

Sydney, 30 October, 1867.

SIR,

Referring to your letter of the 15th instant, I am directed to inform you that the reason why you were not communicated with since 10th December, 1863, as therein represented, respecting an encroachment made upon the Bunnawannah Runs, was because it was presumed, the runs having passed into the hands of other parties who took up the correspondence, that you had no further interest in the matter, and the result of the enquiries that were instituted on the subject were therefore communicated to them.

I have, &c.,

M. FITZPATRICK.

No. 24.

T. G. DANGAR, ESQ., to THE SECRETARY FOR LANDS.

Bullerawa, Wee Waa,
9 December, 1867.

SIR,

In acknowledging the receipt of your letter of the 30th October last, in reply to mine of the 15th of the same month, on the subject of the encroachment on the Bunnawannah Runs, I do myself the honor to state that the presumption was erroneous, that because I had parted with those runs my interest in the matter had ceased. It was I alone who suffered by this encroachment, and sustained a very heavy loss by depreciation of property in consequence thereof.

Under these circumstances I have to request the favour of your directing a copy of the correspondence, and the result of the inquiries that were instituted, to be sent to me.

I have, &c.,
THOS. G. DANGAR.

The Chief Commissioner for Crown Lands.—B.C., 18 Dec.—M.F.

The result of the investigation of the case has been to prove that Mr. Dangar was so far justified in his representations, that no sufficient area of vacant land existed to constitute a run in the position occupied by the description of Georgy. I do not perceive, however, that Mr. Dangar sustained any injury by the acceptance of the tender of Mr. Lord for a run of that name, for which the Government are responsible. No alteration whatever was made in the boundaries of his own runs; and the description of the new run was drawn up by the late Surveyor General in the obvious belief that but little if any vacant land existed, and in a manner carefully to avoid conflict with the descriptions of existing runs. A.O.M.—B.C., 2 January, /68.

The Under Secretary for Lands. Inform Mr. Dangar.—J.B.W., 12 Jany.

Mr. Dangar informed to the above effect.—17 Jany., /68.

No. 25.

T. G. DANGAR'S TENDER FOR "CULGOA RUN."

Tender for a Lease of a new Run of Crown Lands.—Intermediate or Unsettled Districts.

IN accordance with the provisions contained in Her Majesty's Order in Council, published in the *New South Wales Government Gazette* of the 7th October, 1847, and of the Regulations of the Local Government, published in pursuance thereof, I, Thomas Gordon Dangar, of Bullerawa, Wee Waa, do hereby propose to take a lease for fourteen years, of the Crown Lands known as Culgoa, in the District of Wellington; which lands are particularly described in the Schedule annexed to this tender.

2. And in consideration of such lease I am willing and hereby offer to pay in advance, minimum rent, below which it is provided by the said Order in Council that no run shall be let, namely, £10 per annum, with £2 10s. per annum added thereto for every thousand sheep, or their equivalent in cattle beyond 4,000 sheep or their equivalent, which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also in consideration of such lease, and by way of premium for the same, I do offer to pay yearly in advance, the further sum of £1 in addition to the amount of the said minimum rent.

3. And I do agree that in the event of this tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the *New South Wales Government Gazette*, I will within sixty days after such notification pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of £11, being the amount, according to my computation, of the grazing capabilities of the run, of the payments which I have above offered to make, viz. :—

Minimum yearly rent below which no run can be let	£10 0 0
Further payment, at the rate of £2 10s. per thousand for the number of	}	
stock above 4,000 sheep, or their equivalent, which the run applied for is		
estimated to be capable of carrying	1 0 0
Additional yearly payment offered by way of premium	
Total	£11 0 0

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And I do agree that in the event of this tender being accepted, to subscribe to the following conditions, viz. :—That in addition to all other terms prescribed by the present Regulations, the occupancy of the said run and the lease to be ultimately issued, shall be subject to any new or modified conditions which the Legislature may impose.

5. And in consideration of this tender being accepted, and in the event of such payment not being made within the before-mentioned period of sixty days, I further agree to forfeit to Her Majesty the sum of £20 by way of liquidated damages, and to forfeit any right acquired by virtue of this tender, and such acceptance thereof as aforesaid.

Given under my hand, this 10th day of June, A.D. 1859,—

THOS. G. DANGAR.

To the Chief Commissioner of Crown Lands, Sydney.

SCHEDULE referred to in the foregoing Tender.

Commissioner's District, and general locality.	Name of Run.	Estimated number of Acres.	Estimated capability.		Description of lands by reference to leading geographical features and marked or determined boundary-lines.
			Cattle.	Sheep.	
District of Wellington, near the junction of the Culgoa with the Lower Barwon River.	Culgoa ...	16,000	640	Commencing at a point where the Bunnawannah line cuts the Culgoa, at a tree on its north bank, marked TD over G, extending up the Culgoa on both sides 10 miles to a tree marked TD over G, with a back run of two and a half miles on each side.

No. 26.

T. G. DANGAR'S TENDER FOR "UPPER BREE" RUN.

Tender for a Lease of a new Run of Crown Lands—Intermediate or Unsettled Districts.

In accordance with the provisions contained in Her Majesty's Order in Council, published in the *New South Wales Government Gazette* of the 7th October, 1847, and of the Regulations of the Local Government, published in pursuance thereof, I, Thomas Gordon Dangar, of Bullerawa, Wee Waa, do hereby propose to take a lease for fourteen years of the Crown Lands known as The Upper Bree, in the district of Wellington, which lands are particularly described in the schedule annexed to this tender.

2. And in consideration of such lease I am willing and hereby offer to pay in advance, minimum rent, below which it is provided by the said Order in Council that no run shall be let, namely, £10 per annum, with £2 10s. per annum added thereto for every 1,000 sheep or their equivalent in cattle beyond 4,000 sheep or their equivalent, which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also in consideration of such lease, and by way of premium for the same, I do offer to pay yearly, in advance, the further sum of £1 in addition to the amount of the said minimum rent.

3. And I do agree that in the event of this tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the *New South Wales Government Gazette*, I will within sixty days after such notification pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of £11, being the amount, according to my computation, of the grazing capabilities of the run, of the payments which I have above offered to make, viz. :—

Minimum yearly rent below which no run can be let	£10 0 0
Further payment, at the rate of £2 10s. per thousand for the number of stock above 4000 sheep, or their equivalent, which the run applied for is estimated to be capable of carrying
Additional yearly payment offered by way of premium	1 0 0
Total	£11 0 0

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent, according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And I do agree that in the event of this tender being accepted, to subscribe to the following conditions, viz. :—That, in addition to all other terms prescribed by the present Regulations, the occupancy of the said run and the lease to be ultimately issued shall be subject to any new or modified conditions which the Legislature may impose.

5. And in consideration of this tender being accepted, and in the event of such payment not being made within the before-mentioned period of sixty days, I further agree to forfeit to Her Majesty the sum of £20 by way of liquidated damages, and to forfeit any right acquired by virtue of this tender, and such acceptance thereof as aforesaid.

Given under my hand this 10th day of June, A.D. 1859,—

THOS. G. DANGAR.

To the Chief Commissioner of Crown Lands, Sydney.

SCHEDULE referred to in the foregoing Tender.

EBEN ORR'S TENDER FOR "KUNREEBEREE EAST BACK."

Tender for a lease of a new Run of Crown Lands.—Second Class Settled and Unsettled Districts.

In accordance with the provisions of the Crown Lands Occupation Act of 1861, and on the Regulations made in pursuance thereof, I, Eben Orr, of Coonabarabran, do hereby propose to take a lease of the Crown Lands known as Kunreeberee East Back Block, in the District of Warrego, which lands are particularly described in the Schedule annexed to this tender.

2. And in consideration of such lease I am willing and hereby offer to pay yearly, in advance, the rent of the said Crown Lands, as the same may be determined by appraisalment under the said Act.

3. And I do agree that in the event of this tender being accepted and of such acceptance being notified in the *Gazette*, I will within sixty days after such notification pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, and pending such appraisalment as aforesaid, the sum of £10, together with the sum of £20, being the assessment payable under the Increased Assessment and Rent Act of 1858, and also the sum of £1 1s. sterling, by way of premium for the said lease: that is to say:—

Rent, pending appraisalment	£	s.	d.
Assessment do.	20	0	0
Additional yearly payment, offered by way of premium (if any)	1	1	0
								£31	1	0

And in default of such payments I agree to forfeit my deposit on this tender.

Given under my hand this 22nd day of January, A.D. 1862.

(Signature of Applicant.)

To the Honorable the Minister for Lands, Sydney.

EBEN ORR.

SCHEDULE referred to in the foregoing Tender.

No. 40.

W. LAWSON'S DEMAND FOR A LEASE OF "MOHENIA RUN."

Application for a lease of waste lands of the Crown beyond the Settled Districts, in the Colony of New South Wales.

I, WILLIAM LAWSON, sen., of Prospect, do hereby claim to have issued to me, under and in pursuance of Her Majesty's Order in Council, published in the *Government Gazette* of New South Wales of the 7th day of October, 1847, a lease of the waste lands of the Crown, described in the Schedule hereunder written.

The said lands are now in my licensed occupation; and at the date of the publication of the above Royal Order, and for twelve months previously thereto, the same were held under license to me.

Given under my hand, this 5th day of April, A.D. 1848.

WM. LAWSON.

To the Honorable the Colonial Secretary, Sydney.

SCHEDULE.

Commissioner's District and general locality.	Name of Run.	Estimated number of Acres.	Estimated grazing capabilities.		Description of lands by reference to leading geographical features and marked or determined boundary-lines.
			Cattle.	Sheep.	
Liverpool Plains	Mohenia	38,400	600	Bounded on the east by a line running 5 miles north from the junction of the Bokhira River with the Barwon River, and thus divided from Mr. Druitt's Station, Brewannia; bounded on the south by the Barwon River, a distance of 12 miles; on the west and north by unoccupied Crown Lands.

(Signature of Applicant.)

WM. LAWSON.

No. 41.

G. W. LORD'S TENDER FOR BLOCK No. 3 (ACCEPTED AS "GEORGY EAST.")

Tender for a lease of a new Run of Crown Lands—Intermediate or Unsettled Districts.

(For form of tender see Tender No. 139 of July, 1859, preceding.—Name of tenderer, George William Lord; name of run, Block No. 3; premium offered, £5; date of tender, 2nd April, 1859.)

SCHEDULE referred to in the foregoing Tender.

Commissioner's District and general locality.	Name of Run.	Estimated number of Acres.	Estimated capabilities.		Description of lands by reference to leading geographical features and marked or determined boundary-lines.
			Cattle.	Sheep.	
Wellington, North Bank, Darling.	Block No. 3 ...	46,000	640	4,000	Block No. 3: Commencing at a point on the River Darling, and bounded on the west 6 miles by Block No. 2; thence by a line east to the junction of the Culgoa and Ballandool Rivers; thence by a line south to the River Darling; thence by that river, downwards, to the starting-point, being a continuation of Block No. 2.

G. W. LORD.

No. 42.

COMMISSIONER SIBTHORPE'S REPORT.

Crown Lands Office,
Molong, 6th August, 1859.

RESPECTING the Run named in the margin I have the honor to report,—

- 1st. The land does not comprise any land under lease or promise of lease, or applied for in any other tender.
- 2nd. In my opinion the public interests do not require any portion of the land tendered for should be reserved from lease.
- 3rd. The description given in the tender correctly indicates the land tendered for.
- 4th. There being no other tender for the land there can be no identity for the same.
- 5th. Nil.
- 6th. Nil.
- 7th. Nil.
- 8th. The land is situated in the Unsettled Districts.

54—April, 1859.
Block No. 3.
Unobjectionable.L. H. SIBTHORPE,
C.C.L.

No. 43.

MINUTE OF THE LAND BOARD.

Tender No. 54, of April, 1859—Geo. Wm. Lord.

THE Board find that this tender embraces an area very largely in excess of what is estimated by Mr. Commissioner Huthwaite (in his letter of 9th May, 1860) to be necessary to support 4,000 sheep or 640 head of cattle, and that it embraces, apparently, the entire runs of Bunnawanna and Bunnawanna West, and part or all of the land for which Samuel Smith's tender, No. 48, of April, 1856, has been recommended to be accepted.

Accepted—18
October, 1860.

The Board beg to recommend, with reference to their special report of this date, that the tender be accepted under the amended description enclosed, any land not already granted on tenders, but embraced by this tender, being left open for future tenderers.

W. C. MAYNE.
EDWARD C. MEREWETHER.
A. G. M'LEAN.

No. 44.

AMENDED DESCRIPTION OF GEORGY EAST RUN.

Tender 54, of April, 1859—G. W. Lord.

Amended description.

District—Warrego. Name—Georgy East. Area—Supposed to be about 30 square miles. Commencing on the Darling River, at the south-west corner of Bunnawanna West; and bounded thence by a line bearing north, dividing it from that run, to the Culgoa or Birie River; on the north and west by that river to its confluence with the Darling; and on the south by the Darling River, upwards, to the point of commencement.

No. 45.

MINUTE OF THE LAND BOARD.

Tender No. 48, of April, 1856—S. Smith.

Accepted—30
October, 1860.

THE Board, with reference to their special report of this date, beg to recommend the acceptance of this tender under the amended description enclosed.

W. C. MAYNE.
EDWARD C. MEREWETHER.
A. G. M'LEAN.

*Amended description above referred to.**Tender 48, of April, 1856—Samuel Smith.*

Amended description.

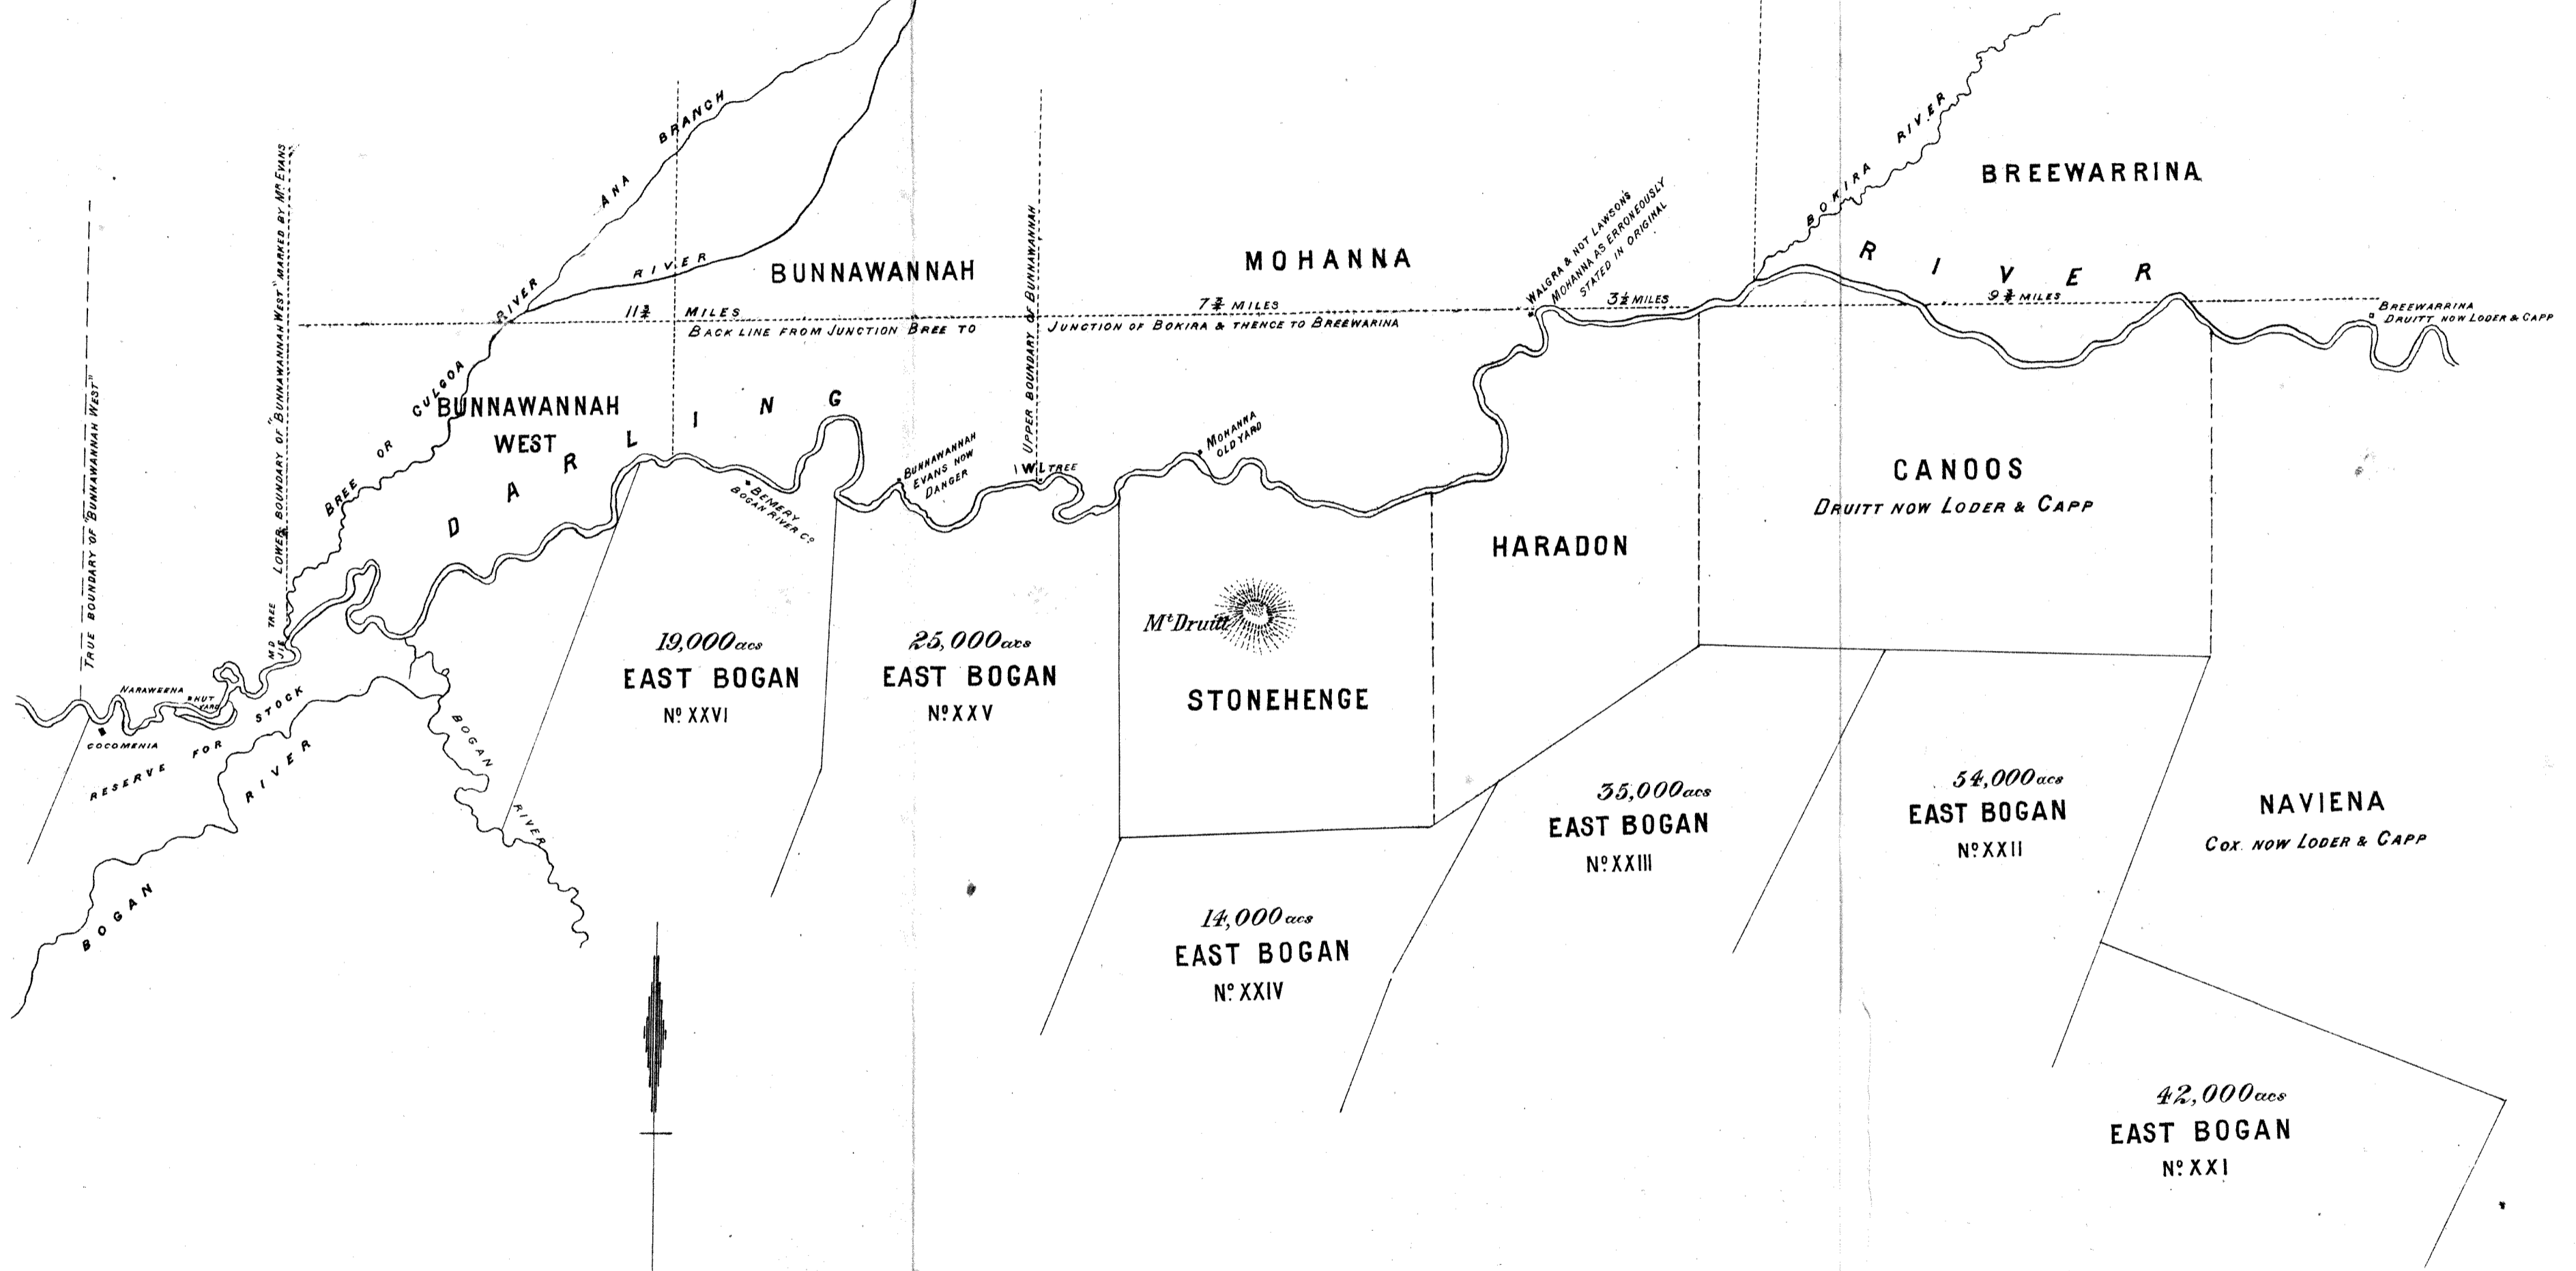

District—Warrego. Name—Georgy. Area—About 20 square miles. Commencing on the Darling River, at the south-east corner of Upper Turee, being a point 3 miles below the junction of the Culgoa or Birie with the Darling; and bounded thence on the west by the eastern boundary of Upper Turee, bearing north 5 miles; on the north by a line bearing easterly, parallel with the Darling River to the Culgoa River, should it meet that river within 5 miles or otherwise for 5 miles; on the east either by the Culgoa River or by a line south to that river; and then by that river to the River Darling; and on the south by the Darling, downwards, to the point of commencement.

A. G. M'LEAN,
A.C.C.L.

5th July, 1860.

NEW SOUTH WALES.

CROWN LANDS ALIENATION ACT OF 1861.

(ADDITIONAL REGULATIONS UNDER.)

Presented to Parliament, pursuant to Act 25 Vict., No. 1, sec. 30.

Department of Lands,
Sydney, 21 September, 1869.

ADDITIONAL REGULATIONS UNDER THE CROWN LANDS ALIENATION ACT OF 1861

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following additional Regulations, under the Crown Lands Alienation Act of 1861, having reference to payment of interest and balance upon conditional purchases.

WILLIAM FORSTER.

Payments authorized at Land Agent's office.

1. Any conditional purchaser or his alienee, or the authorized agent of either, may tender, at the office of the Land Agent for the district, at any time during office-hours, upon a Land Office day, any payment of interest or balance upon his conditional purchase, authorized or required by any Regulations under the Crown Lands Alienation Act of 1861, to be made at the office of the Colonial Treasurer; and any amount so tendered shall be received by such Land Agent, and held to the credit of such conditional purchaser or his alienee, as if the same had been tendered at the office of the Colonial Treasurer.

Payment by way of instalment upon conditional purchases.

2. Any conditional purchaser or his alienee, or the authorized agent of either, after expiry of the three years necessary to complete his conditional purchase, may tender, at the office of the Colonial Treasurer, at any time during office-hours, or at the office of the Land Agent for the district, at any time during office-hours, upon a Land Office day, payment by way of instalment of any portion of the balance upon such conditional purchase, at the rate of one shilling, or any multiple of one shilling, per acre, of the whole quantity of land included in such conditional purchase; and the amount so tendered shall be received by the Colonial Treasurer, or Land Agent, as the case may be, and held to the credit of such conditional purchaser, in proportionate reduction of the said balance: Provided, however, that unless such payment be made within the first quarter of the year, no rebate or reduction of interest shall be allowed for that year on account of such instalment.

When to take effect.

3. The above Regulations will take effect from the 1st day of January, 1870.

1869.

NEW SOUTH WALES.

CROWN LANDS.

(DEDICATED TO RELIGIOUS AND PUBLIC PURPOSES.)

Ordered by the Legislative Assembly to be Printed, 5 October, 1869.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23rd March, 1869, That there be laid upon the Table of this House,—

“ A Return of all Mineral Lands situate in the Hunter River Districts, examined and reported upon by the Government Examiner of Coal Fields, from the 1st January, 1867, to the 31st December, 1868, together with all Minutes, Reports, Correspondence, and other documents connected therewith.”

(Mr. Lucas.)

SCHEDULE.

NO.	PAGE.
1. Examiner of Coal Fields to Under Secretary for Lands, reporting the discovery of beds of limestone near Clarence Town. 28 January, 1868	2
2. Same to Deputy Surveyor General, respecting discovery of limestone, and requesting sketch map of the locality, &c. 28 January, 1868	2
3. Under Secretary for Lands to Examiner of Coal Fields, forwarding sketch. 18 February, 1868.	2
4. Telegram from Examiner of Coal Fields to Secretary for Lands, reporting the discovery of a seam of petroleum coal at Greta. 29 April, 1868	3
5. Telegram from Acting Under Secretary for Lands, in reply to above. 30 April, 1868.	3
6. Examiner of Coal Fields to Under Secretary for Lands—Samples from seam of petroleum coal opened at Greta, near Branxton. 30 April, 1868	3
7. Do. to Under Secretary for Lands—Telegram to reserve unsold land at Greta and vicinity, and send diagram of it. 1 May, 1868	3
8. Do. to Under Secretary for Lands, further about petroleum seam. 15 May, 1868	3
9. Do. Do. Do. 28 May, 1868	3
10. Do. Do. Do. 4 July, 1868	4
11. Senior Chief Clerk, Department of Lands, to Examiner of Coal Fields—Approval of researches being proceeded with on Greta Coal Field. 21 July, 1868	4
12. Examiner of Coal Fields to Under Secretary for Lands, with Plans and Sections, Greta and Greta Coal Fields. 14 January, 1869	4
13. Do. to Under Secretary for Lands, respecting Mr. G. Vindin's mineral selection—Village of Greta. 15 January, 1869	5

APPENDIX.

1. G. Vindin to Under Secretary for Finance and Trade, forwarding £10 for authority to select land for Mineral purposes. 6 May, 1868	5
2. Under Secretary to G. Vindin, replying to above. 6 May, 1868	5
3. G. Vindin to Under Secretary for Lands, selecting 40 acres. 6 May, 1868	6
4. Surveyor General to Under Secretary for Lands, reporting on Greta Reserve. 7 May, 1868	6
5. Under Secretary for Lands to G. Vindin—Selection objectionable. 20 May, 1868	6
6. G. Vindin to Under Secretary for Lands, for permission to select elsewhere. 24 June, 1868	6
7. Under Secretary for Lands to G. Vindin—Reply to above. 6 July, 1868	6
8. Chief Draftsman to Licensed Surveyor Biden—to measure 40 acres for Mr. Vindin, as shown on accompanying tracing. 15 March, 1869	6
9. Licensed Surveyor Biden to Surveyor General, in reply (description). 12 April, 1869	7

MINERAL LANDS IN THE HUNTER RIVER DISTRICT.

No. 1.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

Sydney, 28 January, 1868.

Ridge of Limestone (Paleozoic Oolite) near the Williams River steamers' wharf.

SIR,

I have the honor to report to you, for the information of the Honorable the Secretary for Lands, the discovery of fine beds of limestone, the outcrops of which I have traced for two miles, and to within about seven miles of the steamers' wharf at Clarence Town on the Williams River. I purpose making a more minute examination, in the expectation that I may be able to trace it further—even to the river itself.

2. Very imperfect attempts have been made to burn some of it at one end of the ridge; but I have engaged to send to the Engineer-in-Chief for Harbours, Mr. Moriarty, sufficient to burn in a kiln in Sydney and test its quality, for I believe it will turn out a very strong lime.

3. The stone bears as high a polish as marble, and abounds sufficiently in marine fossils to be ornamental. It can be got out in large blocks useful to the marble mason.

4. I will wait upon the Surveyor General to point out the locality and obtain from him a sketch-map to aid in my further examination.

5. So far as at present observed, the limestone passes from the Australian Agricultural Company's to the Church and School Lands, in the direction of the Williams River.

I have, &c.,

WILLIAM KEENE,
Examiner of Coal Fields.

No. 2.

THE EXAMINER OF COAL FIELDS to THE DEPUTY SURVEYOR GENERAL.

Sydney, 28 January, 1868.

DEAR SIR,

I have reported to the Honorable the Secretary for Lands, in a letter dated this day, the discovery of a ridge of limestone, which I have traced over a distance of two miles, from the lands of the Australian Agricultural Company to the Church and School Lands, in the parish of Malata, bordering the Williams River, and to within seven miles of the steamers' wharf at Clarence Town.

2. I shall be much obliged if you will furnish me with a sketch-map of the locality, as I purpose returning there to make a more minute examination, in the expectation that I may be able to track this limestone to the river side, and even across to the western side of the Williams River.

I have, &c.,

WILLIAM KEENE.

P.S.—I shall be much obliged if you will furnish me with two copies of the last maps of the Colony—one for use in the field, the other for my office.

[Annexure to No. 2, with tracing.]

Minute of Surveyor General.

MR. ADAM,

The tracing should be made from the map which shows the lands on the east side the river opposite and above Clarence Town; when ready I will point out what is to be traced.

Mr. Hogan to supply the Colony maps. P.F.A.—30.

Mr. Hogan to supply the Colony maps, which may, with enclosed tracing*, be forwarded to the Under Secretary for Lands with view to transmission to Mr. Keene. P.F.A.—7 Feb.

Supplied two copies of the Colony map on the 31st Jan., 1868. P. J. HOGAN,—7 Feb., 1868.

No. 4.

TELEGRAM from THE EXAMINER OF COAL FIELDS to THE SECRETARY FOR LANDS.

THE anticipation in my reports to you are realized. Have found a seam of petroleum oil coal in the lower coal measures below the spirifer beds at Greta, near Branxton, and the Great Northern Railway—have men at work opening the seam, and will send a box by Friday's steamer.

No. 5.

TELEGRAM from THE ACTING UNDER SECRETARY FOR LANDS to THE EXAMINER OF COAL FIELDS.

Telegram received. Should the land therein alluded to be reserved or not?

No. 6.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

Newcastle, 30 April, 1868.

Samples from the seam of Petroleum Coal opened at Greta, near Braidwood.

SIR,

Having charged some miners at Greta Colliery to examine the adjoining creek as the lowering of the waters might permit, I have the satisfaction of reporting to you, for the information of the Honorable the Secretary for Lands, that a seam of petroleum coal has been discovered in the creek at Greta, of which I send samples in a box by this afternoon's steamer, and which will be delivered to you in the course of to-morrow morning.

2. It will take a few day's work to clear the creek and bale out the water so as to ascertain the importance of the seam, and which, when done, I will report to you. It will be seen that what I send is of good quality, and readily ignites in a candle flame.

3. I shall be glad to receive as soon as possible, from the Surveyor General, a plan, on as large a scale as the Survey Office may possess, of the village of Greta, marking the allotments unsold, and of the land to the west and north of the village. The unsold land should be reserved till further examined.

I have, &c.,

WILLIAM KEENE,

Examiner of Coal Fields.

Surveyor General.—Please forward the plan.—B.C. J.B.W.—7 Mar.

No. 7.

TELEGRAM from THE EXAMINER OF COAL FIELDS to THE ACTING UNDER SECRETARY FOR LANDS.

1 May, 1868.

RESERVE unsold land at village of Greta and vicinity, and send me diagram of it.

Surveyor General.—G.J.A. (for the U.S.)—B.C., 1 May.—Very urgent.

Tracing now ready, but the Surveyor General wishes it to await a letter which he understands is in No. 6. the Office on this subject.—May 6/68.

No. 8.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

West Maitland,

15 May, 1868.

Coal and Petroleum Coal and "Resinite" at Greta, Anvil Creek.

SIR,

I am still occupied in opening the most remarkable seam of coal which has yet come under my observation, the discovery of which I had the honor to report in a previous letter.

2. So now, as the work, so far as I intend to carry it, is finished, and which will be in the course of the next week, I will further report with diagram and sections for the information of the Honorable the Secretary for Lands. ^{No. 6.} ^{30 April, 1868.}

Seen. J.B.W.—21 May.

I have, &c.,

WILLIAM KEENE.

No. 9.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

Coal Fields Office, Newcastle,

28 May, 1868.

Petroleum Coal and Coal Seam at Greta, near Branxton.

SIR,

I beg to acknowledge receipt this day, under blank cover from Surveyor General, of my preliminary report to you and papers relating to the opening of a petroleum coal and coal seam at Greta near Branxton, as also the application of Mr. George Vindin to lease mineral land; and I have read the minutes thereon. ^{See Appendix No. 4.}

2. I am glad to see by these minutes that my recommendation to reserve Crown Lands in the vicinity, awaiting my further report, has been resolved on.

3.

3. After much trouble in keeping back and baling out the water, I have gone through the seam, and find that there is a total of about 22 feet,—giving seven varieties of coal, with the brown cannel or petroleum coal, and all good.

4. I have the satisfaction to tell you, I am informed by Mr. Mitchell that himself and Mr. Vindin have arranged with the owners (Messrs. Clift) of the land adjoining the Crown Land on which I am working to work the coal on the Messrs. Clift's land to which the coal seam immediately extends.

5. It will therefore be of little consequence to Mr. Vindin that his request for mineral lease may not be complied with, whilst his operations will greatly augment the value of the village allotments and land still unsold.

6. It will, I am sure, be desirable that these allotments should be still further divided; and of this I will give my more decided opinion on the completion of my examination, for the further information of the Honorable the Secretary for Lands.

Seen. J.B.W.—4 June.

I have, &c.,
WILLIAM KEENE,
Examiner of Coal Fields.

No. 10.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

Opening of Greta Coal Fields.

Newcastle, 4 July, 1868.

SIR,

No. 6.

I had the honor to report to you, for the information of the Minister for Lands, under date of the 30th April, 1868, the discovery of petroleum coal in the Greta field.

2. A continuation of the research has led to the further discovery in the last few days of what I believe to be the bottom seam of the carboniferous deposits in our coal fields, and this coal—like to that of the seam above it, and which contains the petroleum coal—is of most excellent quality; I have not yet been able to ascertain the thickness of this bottom seam.

3. I have carried on these researches under the exceptional circumstances of the drought, and which made it urgent to proceed in the work without delay.

4. When finished, the expenditure for labour will not exceed £40, and will give great value to more than a thousand acres of Crown Land at Greta. I therefore hope for approval of what I am doing, as I shall take care that this expenditure shall be within the limit of the annual vote for the contingent amount of the coal fields.

Approved J.B.W.—11 July.

I have, &c.,
WILLIAM KEENE,
Examiner of Coal Fields.

No. 11.

THE SENIOR CHIEF CLERK, DEPARTMENT OF LANDS, to THE EXAMINER OF COAL FIELDS.

Department of Lands,
Sydney, 21 July, 1868.

SIR,

Referring to your letter of the 4th instant, respecting the further discovery of petroleum coal on the Greta Coal Field, I am directed to inform, that Mr. Secretary Wilson has approved of the researches being proceeded with on the understanding mentioned by you, namely, that the expenditure for labour will not exceed £40.

I have, &c.,
S. B. WARBURTON,
(For the Under Secretary).

No. 12.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

Newcastle, 14 January, 1869.

Village of Greta and Greta Coal Fields, with plan and sections.

SIR,

I have the honor to forward herewith, for the further information of the Honorable the Secretary for Lands, plan and sections showing the great seam opened by me in Anvil Creek at Greta, in which petroleum oil coal and other varieties of coal are found in a thickness altogether of 22 feet.

2. The dip of the coal is to the west (10 degrees), and I have indicated by a line A.B. on the plan that portion of the Crown Lands on which no coal will be found.

3. I am of opinion that the village allotments as already laid out may be disposed of as at present surveyed, and that the portion of the Crown Land unsurveyed, upon which I believe workable coal to exist, may be left to be taken up under mineral lease.

4. It is mainly however the bottom seam and not the petroleum seam which will be found on this land; but the land will become of value for the surface, from the numerous working population which will in all probability be settled at Greta, when the main seam shall be opened on the private lands to the west of the township and for the working of which a Private Bill is now before the Parliament.

5. The Surveyor General is well acquainted with the locality, and can well decide on the disposal of the Crown Lands as yet unsurveyed and unsold, and I shall be glad to be of any assistance in the work.

6. Referring to the coal seam, I cannot refrain from saying that it is more remarkable for variety and quantity of coal than any which has come under my observation in any part of the world. Its geological position is below the spirifer beds; it is the lowest seam but one of our carboniferous deposits, and will be found to extend from Greta over a large area. Its proximity to the Great Northern Railway, and the excellent quality of the coal, will insure its being extensively worked.

I have, &c.,
WILLIAM KEENE,
Examiner of Coal Fields.

Seen. W.F.—21 January, 1869.
Surveyor General. B.C., 22 January. M.F.

No. 13.

THE EXAMINER OF COAL FIELDS to THE UNDER SECRETARY FOR LANDS.

Newcastle, 15 January, 1869.

Village of Greta, Mineral Selection of Mr. George Vindin.

SIR,

I have had the honor to send to you* plan and section of the Greta Coal Field, and now return ^{*Separate Appendix B.} the application of Mr. George Vindin for mineral lease of allotments 7, 8, 9, and 21, subject to my letter ^{No. 9.} to you of 28th May, 1868.

2. I am now of opinion that the survey of Greta should be maintained as needful and appropriate for the mining population likely to settle down in this quarter, and the reserves for access to water will be eminently needful.

3. I see however no objection to the allotment 21 being appropriated to mineral working, and an equal area of land to the north-east of lot 21 may be permitted to be taken up by Mr. Vindin in lieu of the water reserves 7, 8, and 9.

4. I advise that further allotments should be surveyed for sale or for mineral selections as the Surveyor General who is well acquainted with the locality may think proper, and I will take early opportunity of seeing and conferring with him on the subject.

I have, &c.,
WILLIAM KEENE,
Examiner of Coal Fields.

Surveyor General. B.C., 20 January, 1869.
See Appendix No. 8.

APPENDIX.

G. Vindin, Esq., to The Under Secretary for Finance and Trade.

Sydney, 6 May, 1868.

Sir,
purposes.

I beg to hand you the sum of £10, being deposit on application for authority to select 40 acres of land for mineral

I have, &c.,
GEO. VINDIN.

Land desired to be selected:—Reserves 7, 8, 9, and 21, township Greta, county Northumberland.
The Under Secretary for Lands. B.C., 6 May, 1868. H.L.

No. 2.

The Under Secretary for Lands to G. Vindin, Esq.

Department of Lands,
Sydney, 6 May, 1868.

Sir,

In compliance with the request contained in your* application of this date, I am instructed by the Secretary for ^{*Verbal.} Lands to convey to you authority to select, within twelve months from this date, 40 acres from any available Crown Lands, for the purpose of working minerals,—subject of course to all prior claims, and to all the conditions of the Crown Lands Occupation Act of 1861 and the regulations founded thereon.

2. If no unobjectionable selection be reported to this Department, within twelve months from this date, the present authority will be considered obsolete, and the first year's rent already paid by you will be forfeited.

I have, &c.,
M. FITZPATRICK.

No. 3.

6

No. 3.

G. Vindin, Esq., to The Under Secretary for Lands.

Sydney, 6 May, 1868.

Mineral Lease.

Sir,

I have the honor to report to you, that in pursuance of the authority conveyed to me in your letter of the 6th May, 1868, I have selected the portion of Crown Lands hereunder described for the purpose of working coal, viz., 40 acres, county of Northumberland, parish of _____, situated in the town of Greta, being reserves Nos. 7, 8, 9, and 21.

I have, &c.,
GEO. VINDIN.

Surveyor General, B.C., 16 May. M.F.

No. 4.

Report of Surveyor General.

THE design for the Village of Greta was submitted to the Executive Council, approved on 30th May, 1842, and allotments sold in accordance therewith. The reserves mentioned were shown in the design as "for access to water," but have not been dedicated otherwise. They are separated from one another by streets, and each of them is of a less area than 40 acres. As the separation by streets would, it is presumed, prevent the leasing of the land in one portion, as prescribed by the 58th clause of the Regulations, this application appears to be inadmissible. Were it not that the Inspector of Coal Fields has recommended the reservation from sale of all lands within the Greta Reserve, this and other land within it might probably, with advantage, be sold at auction after measurement into portions of suitable area.

P. F. ADAMS.
7 May.

The Surveyor General should consult Mr. Keene as to the size of the lots. J.B.W.—17 May.
Surveyor General, B.C., 22 May, 1868.

Mr. Keene will perhaps be good enough to state his views as to the size and form of the lots. J. S. ADAM, 26 May, 1868. No. 18.

No. 5.

The Under Secretary for Lands to G. Vindin, Esq.

Department of Lands,
Sydney, 20 May, 1868.

Sir,

In reference to your letter of the 6th instant, reporting that you have selected the Reserves Nos. 7, 8, 9, and 10, at Greta, for the purpose of working coal, I am directed to inform you that, under the report obtained by the Surveyor General, it appears that your selection is objectionable, the land being part of that comprised within the boundaries of the village of Greta.

I have, &c.,
M. FITZPATRICK.

No. 6.

G. Vindin, Esq., to The Under Secretary for Lands.

West Maitland,
24 June, 1868.

Sir,

In reply to your letter respecting my application for reserves in Greta, I now beg to request that I may be permitted to select (40) forty acres elsewhere.

I have, &c.,
GEO. VINDIN.

I conclude he may select any available land within twelve months from date of order. If so, inform.

No. 7.

The Under Secretary for Lands to G. Vindin, Esq.

Department of Lands,
Sydney, 6 July, 1868.

Sir,

In reference to your letter of the 24th ultimo, respecting your selection for mineral purposes of 40 acres at Greta, which you were informed was objectionable as being partly within the town boundary, I am directed to invite your attention to the first subdivision of the 2nd clause of the Crown Lands Occupation Act, and to state that the authority under which you made your selection entitles you to select any other available land within twelve months from the date thereof.

I have, &c.,
M. FITZPATRICK.

No. 9.

No. 9.

Mr. Licensed Surveyor Biden to The Surveyor General.

Singleton, 12 April, 1869.

Sir,

I have the honor to transmit herewith plan* of a portion of 40 acres, No. LX, parish of Branxton, county of *Separate Ap-
Northumberland, surveyed the 9th April, 1869, in compliance with instructions 15 March, 69/17, on application of George pendix D.
Vindin, under the 22nd clause of the Crown Lands Occupation Act, 1861, with plan of sections XI, XII, XVIII, XIX, in the
village of Greta, laid out in allotments for sale. In determining a datum from which to commence these surveys, I have
adopted the south-east boundary-line of sections X and XX, upon which I found three pegs of old survey, and the south side
of High-street as defined by the peg and marked line in section XIII; and I have accordingly taken as the bearings of the
main outlines lines running north 44 degrees 42 minutes west, and east 44 degrees 42 minutes north. The only other indica-
tions of old survey seen by me were (6) six pegs on the south-west side of section XII corresponding in portions with present
corners.

The allotments are measured and marked in accordance with regulations, and were so measured and marked during the
periods from March 29 to April 8, 1869.

I have, &c.

W. D. BIDEN,
Licensed Surveyor.

Description :—

40 acres : County of Northumberland, parish of Branxton, at Greta, mineral lease No. 319, portion 60 : Commencing on
the north-eastern side of High-street, town of Greta, at the western corner of allotment 4 of section 21, and bounded
thence on the south-west by that street, bearing west 39 degrees 24 minutes north 6 chains 39 links to the eastern boundary-line of
William Holden's 6 acres ; on the west by the eastern boundary-line of that 6 acres, bearing about north 13 degrees 31 minutes
east 15 chains 13 links ; on the north by part of the southern boundary-line of Samuel Clift senr's. 421 acres, bearing east
14 degrees 9½ minutes south 4 chains 54 links ; on the north-west by a line bearing east 42 degrees 44 minutes north 14 chains
and 85 links ; on the north-east by a line bearing south 44 degrees 42 minutes east 14 chains and 44 links ; and on the south-
east by a line bearing west 44 degrees 42 minutes south 18 chains 15 links to Branxton-street ; thence by that street, bearing
north 44 degrees 42 minutes west 2 chains ; thence by a line forming the north-western end of Branxton-street and the
western boundary of allotment 5, bearing west 44 degrees 42 minutes south 6 chains and 25 links ; thence by the north-
eastern boundaries of allotments 3 and aforesaid 4, of section 21, being a line bearing north 44 degrees 42 minutes west in all
2 chains ; and thence by the north-western boundary-line of the last-mentioned allotment, bearing west 44 degrees 42 minutes
south 5 chains to the point of commencement. N.B.—Lease not issued.

[Four plans.]

COMMONAGES FOR THE TOWN OF MERRIWA.

No. 1.

JAMES WHITE, ESQ., M.L.A., to THE SECRETARY FOR LANDS.

Sydney, 23 September, 1867.

SIR,

On behalf of the inhabitants of Merriwa I beg to request that 1,000 acres of land in the vicinity of that town may be granted as a Permanent Common, and that the remainder of the Crown lands within the population boundary may be granted as a Temporary Common. The most suitable portion for the Permanent Common would be the land immediately to the east of the town, adjoining the eastern boundary of J. M. Blaxland's 903 acres.

I have, &c.,

JAMES WHITE, M.L.A.

Surveyor General, B.C., 24 September, 1867.—M.F.

Very urgent. It is stated that some of the land is under lease expiring this year.

No. 2.

REPORT OF SURVEYOR GENERAL.

Commons, Merriwa.

REFERRING to the Under Secretary for Lands' B.C., 24 September, Ms. 67-3291, application for 1,000 acres for Permanent Common, Merriwa, through J. White, Esq., M.L.A., the land applied for is part of 1,536 acres shown on the map of the county of Brisbane, published by the Government in 1857 as a reserve for town pasturage, Merriwa; but since 1857 a reserve has been noted on the map in use of that county, in this office, of a similar area for pasturage, fronting Smith's or Merriwa Rivulet, but no dedication has been made of either portion, the present application being for one thousand (1,000) acres, part of the original reserve for pasturage, and included within the reserve on account of population of Merriwa. It is submitted that the application be favourably entertained and the land permanently dedicated, and that the portions of land referred to, fronting Smith's or Merriwa Rivulet, with the unalienated land within the population reserve of Merriwa, be devoted to Temporary Commonage until required for sale, and placed in trust with the 1,000 acres for all freeholders and householders within the boundaries of the village of Merriwa.

Appendix A.

A tracing,* showing the portions of land referred to, is enclosed.

W. R. DAVIDSON.

B.C., 27 September, 1867.

APPENDIX A.

Temporary Common Reserve.

COUNTY of Brisbane, parish of Merriwa, at Merriwa, 2,700 acres: The Crown Lands within the following boundaries: Commencing on Merriwa or Smith's Rivulet, at the south-west corner of J. M. Blaxland's 903 acres; and bounded thence on the north by the south boundary of that land, bearing easterly to the south-eastern corner; thence by part of the east boundary of that land, northerly, to the south-western corner of 1,000 acres, appropriated for Permanent Common; and thence by the south boundary of that 1,000 acres, bearing east 120 chains to the east boundary of the reserve on account of population of town of Merriwa; on the east by part of that boundary, bearing south about 116 chains 55 links to the north boundary of G. Wyndham's 2,560 acres; on the south by the north boundary of that land west to Merriwa or Smith's Rivulet; and on the west by that rivulet upwards to the point of commencement. And the Crown Lands in the county of Brisbane, parishes of Watt and Howard, containing about 980 acres within the following boundaries: Commencing on the south boundary of A. K. Mackenzie's 5,000 acres, at the north-west corner of J. H. Bettington's 776 acres, and bounded on the north by a part of the south boundary of the 5,000 acres aforesaid, westerly, about 30 chains; on the west by part of the west boundary of the reserve on account of population of the town of Merriwa, bearing south 200 chains; on the south by part of the south boundary of the reserve aforesaid, bearing east 31 chains to the west boundary of C. Blaxland's 996 acres; on the east by the west boundary of that land, bearing north to its north-west corner; again on the south by the north boundary of that 996 acres, bearing east to C. Blaxland's 320 acres, thence again on the east by the west boundary of that land, bearing north, and the south and the west boundaries of C. Blaxland's northern 320 acres westerly and northerly, and the south and the west boundaries of J. H. Bettington's 776 acres aforesaid, westing and northing to the point of commencement.

Proposed Permanent Common at Merriwa.

COUNTY of Brisbane, parish of Merriwa, at Merriwa, 1,000 acres: Commencing on the south boundary of J. Blaxland's 7,680 acres, at the north-eastern corner of J. M. Blaxland's 903 acres; and bounded thence on the west by part of the eastern boundary of that 903 acres, bearing southerly 83 chains and 45 links; on the south by a line bearing east 120 chains; on the east by part of the eastern boundary of the reserve on account of population of the town of Merriwa, bearing north 83 chains and 45 links; and on the north by part of the south boundary of J. Blaxland's 7,680 acres aforesaid, westing 120 chains to the point of commencement.

Temporary Common, county of Brisbane, parish of Merriwa, at Merriwa.

No. 3.

MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Department of Lands,
Sydney, 21 October, 1867.

It is recommended to His Excellency the Governor and the Executive Council, that the portion of land within described, containing 1,000 acres, and situated near Merriwa, be dedicated for a Permanent Common, under the 5th clause of the Crown Lands Alienation Act of 1861; and that the within described portions, 2,700 acres and 980 acres, situated within the parishes of Merriwa, Watt, and Howard respectively, be set apart for Temporary Commonage, under clause 29 of the Crown Lands Occupation Act of 1861.

It is further recommended to His Excellency and the Council that the boundaries, of which a description is enclosed, shall be those the freeholders and householders within which shall have the use of the Permanent and Temporary Commonages of Merriwa, subject to the reservations provided by clause 52 of the Regulations under the Alienation Act, and clause 87 of the Regulations under the Occupation Act.

J. BOWIE WILSON.

Minute 61/46, 25th October, 1867.—Confirmed 5th November.

THE Executive Council advise, as herein recommended, that the portions of land described in the accompanying schedules be dedicated for Permanent and Temporary Commonages, respectively, at Merriwa, in terms of the Crown Lands Alienation and Occupation Acts of 1861.

The Council further advise that the boundaries herein described be those within which freeholders and householders shall have the use of the said Commonages, subject to the reservations herein referred to.

ALEX. C. BUDGE,
Clerk of Council.

6th November, 1867. Approved.—J.Y.

No. 4.

PETITION FROM INHABITANTS OF MERRIWA.

[Left by Mr. White, 17 January, 1868.]

THE Petition of the undersigned inhabitants of Merriwa humbly sheweth, that in the opinion of your Petitioners the appointment of Trustees to manage the Merriwa Commonage is very necessary and would be beneficial to those concerned therein.

That it is desirable that such appointment be made at as early a date as possible.

That in the absence of some authority entitling them to deal with the Commonage in question it is comparatively useless to your Petitioners. That on the 10th August instant a public meeting of the inhabitants was held for the purpose of initiating the steps necessary to compass the object above stated. That at and by such meeting the following gentlemen were duly nominated as fit and proper persons for appointment to the office of "Trustees of the Merriwa Commonage," namely:—Messrs. James B. Bettington, Esq., J.P., James M. White, Esq., William Tuite, William Gallagher, senr., and William Gallagher, junr.

Your Petitioners therefore pray that you will be pleased take this their Petition into your favourable consideration, and grant their request.

And your Petitioners, as in duty bound, will ever pray,—

Jas. B. Bettington.	W. L. Bettington.
Chas. Andrews.	Frank B. M. Brown.
Peter Andrews.	John T. White, M.L.A.
Jas. White.	W. Tuite, senr.
Jas. Cape.	Robert Tuite.
M. Spratt.	William Tuite, senr.
William Sheppard, J.P.	Henry Tuite.
Thos. Roach.	Edward Murry.
W. Gallagher.	Thos. Morgan.
Chas. Malone.	William Wilson.
John Simmons.	Alex. Bowie.
Thos. Gallagher.	Joseph Bumite.
William Simmons.	Willm. Walmsley.
W. M. White.	Joseph Murphy.
William Gallagher, junr.	P. Cronin.
Patk. Lawless.	W. Hall.
Danl. Gallagher.	Jas. Bumite.
Owen Lawless.	John M'Naught.
John Lawless.	M. Boyle.

THE UNDER SECRETARY FOR LANDS to J. B. BETTINGTON, ESQ., AND OTHERS.

Department of Lands,
Sydney, 6 February, 1868.

GENTLEMEN,

In reference to your Petition praying for the appointment, as Trustees for the Commonage at Merriwa, of certain gentlemen nominated at a public meeting held for the purpose, I am directed to inform you that the appointment of Trustees must await the dedication of the land, which will shortly be carried into effect.

I have, &c.,
M. FITZPATRICK.

No. 6.

DEDICATION OF PERMANENT COMMON.

Department of Lands,
Sydney, 19 May, 1868.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to dedicate the Crown Lands hereunder described to the several public purposes mentioned in connection therewith, an abstract of such intended dedication having been duly laid before Parliament in accordance with the 5th section of the Crown Lands Alienation Act of 1861.

J. BOWIE WILSON.

EXTRACT from Schedule of Crown Lands authorized to be dedicated to Religious and Public purposes in accordance with the 5th section of the Act 25 Vic., No. 1.

No. 7.

NOTICES IN GOVERNMENT GAZETTE.

*Commons, Merriwa.*Department of Lands,
Sydney, 10 July, 1868.

HIS Excellency the Governor, with the advice of the Executive Council, directs it to be notified, that all freeholders and householders within the undermentioned boundaries will be entitled to the use of the Permanent and Temporary Commonage at Merriwa.

J. BOWIE WILSON.

County of Brisbane, parish of Merriwa, at Merriwa: Commencing on Merriwa or Smith's Rivulet, at the south-west corner of J. B. Blaxland's 7,680 acres, and bounded thence on the north by part of the south boundary of that land easterly about $65\frac{1}{2}$ chains; and on the east by the west boundary of J. M. Blaxland's 903 acres, bearing south 40 chains; on the south by a north boundary of that 903 acres, bearing west to Merriwa or Smith's Rivulet; and on the west by that rivulet, upwards, to the point of commencement.

[No. 7A.]

*Temporary Commonage, Merriwa.*Department of Lands,
Sydney, 10 July, 1868.

HIS Excellency the Governor, with the advice of the Executive Council, directs it to be notified, that in pursuance of the provisions contained in the Regulations under the Crown Lands Occupation Act of 1861, the land described hereunder shall be devoted to Temporary Commonage.

J. BOWIE WILSON.

County of Brisbane, parish of Merriwa, at Merriwa, 2,700 acres. The Crown Lands within the following boundaries: Commencing on Merriwa or Smith's Rivulet, at the south-west corner of J. M. Blaxland's 903 acres; and bounded thence on the north by the south boundary of that land easterly to its south-eastern corner; thence by part of the east boundary of that land northerly to the south-west corner of 1,000 acres appropriated for Permanent Common; and then by the south boundary of that 1,000 acres, bearing east 120 chains to the east boundary of the reserve on account of population of the town of Merriwa; on the east by part of that boundary, bearing south about 116 chains 55 links to the north boundary

boundary of G. Wyndham's 2,560 acres; on the south by the north boundary of that land westerly to Merriwa or Smith's Rivulet; and on the west by that rivulet upwards to the point of commencement. And the Crown Lands in the County of Brisbane, parishes of Watt and Howard, containing about 980 acres, within the following boundaries: Commencing on the south boundary of A. K. Mackenzie's 5,000 acres, at the north-west corner of J. H. Bettington's 776 acres; and bounded on the north by part of the south boundary of the 5,000 acres aforesaid westerly about 30 chains; on the west by part of the west boundary of the reserve on account of population of the town of Merriwa, bearing south 200 chains; on the south by part of the south boundary of the reserve aforesaid, bearing east 31 chains to the west boundary of C. Blaxland's 996 acres; on the east by the west boundary of that land, bearing north to the north-west corner; again on the south by north boundary of that 996 acres, bearing east to C. B. Blaxland's 320 acres; thence again on the east by the west boundary of that land, bearing north, and the south and the west boundaries C. Blaxland's northern 320 acres westerly and northerly, and the south and the west boundaries of J. H. Bettington's 776 acres aforesaid westerly and northerly, to the point of commencement.

J. H. BETTINGTON AND G. STABLER to THE SURVEYOR GENERAL.

Brindley Park, Merriwa,
13 August, 1868.

SIR,

We have the honor to request that you may be pleased to issue instructions to the District Surveyor resident at Merriwa to survey for sale all that parcel of Crown lands situate on west side of Merriwa Creek, about $1\frac{1}{2}$ mile distant, and adjoining J. H. Bettington's grant of 776 acres on south and west side,—also adjoining M'Kenzie's grant of 5,000 acres on south side, as we and others are desirous of purchasing, in order to enable us to complete the fencing of our runs. The land alluded to has lately been gazetted as a portion of the Temporary Reserve for Commonage at Merriwa.

We have, &c.,
JAS. H. BETTINGTON,
GEO. STABLER,
Trustees of the late J. B. Bettington.

No. 9.

THE UNDER SECRETARY FOR LANDS to THE POLICE MAGISTRATE, SCONE.

Department of Lands,
Sydney, 11 September, 1868.

SIR,

His Excellency the Governor, with the advice of the Executive Council, having approved of the application of certain land at Merriwa as a Permanent Common, I am directed to call your attention to the notice in the *Government Gazette* of the 10th July last, and to request that you will convene a meeting of persons entitled to use the Common, for the purpose of electing five Trustees in accordance with the 54th clause of the Regulations under the Crown Lands Alienation Act of 1861.

I have, &c.,
M. FITZPATRICK.

J. H. BETTINGTON AND G. STABLER to THE SURVEYOR GENERAL.

Brindley Park, Merriwa,
16 October, 1868.

SIR,

We have the honor to request that you will cause instructions to be issued to the surveyor resident at Merriwa to survey for sale, in blocks of 320 acres, or as the Government may direct, all that portion of land known as part of the Merriwa Temporary Commonage, and situated as under:—

County of Brisbane, parish of Merriwa, about 1,000 acres, and bounded on the west side by Merriwa Rivulet, on the north by J. M. Blaxland's 903 acres, on the west by Crown lands, and on the south by northern boundary of G. Wyndham's 2,560 acres.

We have, &c.,
JAS. H. BETTINGTON,
GEO. STABLER,
Trustees for the Estate of J. B. Bettington.

No. 15.

PETITION OF TRUSTEES OF MERRIWA COMMON AND OTHERS.

To His Excellency the Right Honorable Somerset Richard, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council of Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

The humble Petition of the undersigned Trustees of the Merriwa Common and of the Temporary Common of Merriwa, and of the inhabitants of the Town of Merriwa,—

Nos. 7 and 7A.

1st. Showeth unto your Excellency that, by a notice contained in the *Government Gazette*, dated 10th day of July last, a Permanent and Temporary Commons were granted by Your Excellency, with the advice of your Executive Council, for the use of the inhabitants of the Town of Merriwa.

2. That the Temporary Common so dedicated by Your Excellency, containing 2,700 acres, is the portion of land adjacent to the Town most desirable for the purpose of Commonage for the use of the inhabitants, owing to the fact that it is in closer proximity to the Town than the Permanent Commonage and the temporary one of 980 acres; and because the same is partly bounded by the only permanent water in the town or near to the same; and also because most of the inhabitants who would require the use of the Common reside nearer to the same than they do to the Permanent Common dedicated by Your Excellency; because the same is better and more permanently supplied with water than that portion of the land which Your Excellency has dedicated as a Permanent Common, or than that portion of 980 acres dedicated as a Temporary Common.

Your Petitioners therefore humbly pray that Your Excellency will be pleased to grant to us, in lieu of the present Permanent Common and of the 980 acres Temporary Common, the one now dedicated to us as a Temporary one, containing 2,700 acres.

And Your Petitioners will ever pray, &c.

JOHN WALKER, WILLIAM GALLAGHER, CHARLES SPRATT, HENRY WHITNEY, JOHN ISAAC,	}	Trustees Elected.
--	---	----------------------

Presented by Mr. Wisdom.
Surveyor General, B.C., 14 October, 1868.—J.B.W.

And about sixty others.

7

No. 16.

THE POLICE MAGISTRATE, SCONE, to THE UNDER SECRETARY FOR LANDS.

Police Office, Scone,
17 October, 1868.

SIR,

Referring to your letter of the 11th ultimo, I now do myself the honor to inform you that at a public meeting of the persons entitled to use the Common granted for the use of the inhabitants of Merriwa, such meeting being duly called and presided over by me, the following persons were elected as Trustees of the said Common, namely:—

John Walker,	Henry Whitney,
William Gallagher,	Charles Spratt, and
John Isaac.	

I have, &c.,
JAMES SMITH P.M.

No. 17.

THE SURVEYOR GENERAL'S REPORT.

Commons, Merriwa.

REFERRING to the late Minister for Lands' Minute, 14th October, the Schedule of Lands dedicated under the 5th section of the Crown Lands Alienation Act, dated 19th May, 1868, 1,000 acres appears for Permanent Common at Merriwa. And by notice 10th July, 1868, about 3,680 acres has been devoted to Temporary Commonage for Merriwa, about 2,700 acres of which fronts Smith's Rivulet, and is bounded by Mr. Blaxland's 903 acres on the north and G. Wyndham's 2,560 acres on the south, and the population reserve boundary of Merriwa on the east, and the remainder portion of the 3,680 acres is back land lying between Blaxland's and Bettington's lands and the western boundary of the population reserve.

The 1,000 acres, referred to as dedicated, was asked for and described as the most suitable for the purpose by J. White, M.L.A., in a letter to the Minister for Lands of the 23rd September, 1867; and whilst under B.C. 27th September, 1867, the late Surveyor General submitted that the application should be favourably entertained and the land dedicated, it was at the same time represented that a similar area was noted as a reserve for town pasturage on the office maps, with frontage to Smith's Rivulet.

It is now represented in the enclosed Petition to His Excellency that the portion of land fronting Smith's Rivulet, and last referred to, is the most desirable for the purpose, from its close proximity to the town and having the only permanent water, and desire that the same may be granted in lieu of the 980 acres dedicated, and that the dedicated land should be devoted to Temporary Commonage.

The land dedicated is shown on the enclosed tracing by red edging, and the notified Temporary Commonage by green tint, and the portion of land now applied for in lieu of the dedicated is marked thus *, and includes a frontage to Smith's Creek of about 1 mile and 26 chains.

The 1,000 acres dedicated is stated in the Schedule laid before Parliament and in the published notice of dedication to be situate at Merriwa, Parish of Merriwa, County of Brisbane, boundaries undefined; but in the notice of the Temporary Commonage it is shown to be on the eastern boundary of J. Blaxland's land, the Temporary Commonage being bounded by it; and it would appear to me a question whether the application can now be entertained without the consent of Parliament.

Four applications have been received for the subdivision of the land applied for, namely, from Messrs. Bettington and Webber (*sic.*), Trustees of the late J. B. Bettington, of Brindley Park, J. Cooper, of Cullingral, H. O. Hewitt, of Brindley Park, and G. H. Yates. Complying with these applications will now depend on the decision of the Honorable the Minister for Lands respecting the commonage application. Probably the Petition may be referred for the consideration of the Crown Law Officers. The names set out for Trustees in Police Magistrate J. Smith's letter of 17th October, 1868, appear among names in the Petition.

P. F. ADAMS.

Under Secretary for Lands, B.C., 17 November, 1868.

I should like to have the opinion of the present Member of the Upper Hunter on this matter.—
W.F.—3rd Dec.

No. 18.

MR. J. B. BETTINGTON to THE SECRETARY FOR LANDS.

Brindley Park, Merriwa,
25 November, 1868.

SIR,

It has come to my knowledge that a few of the inhabitants of the town of Merriwa have applied to the Government for the addition to their Permanent Common of certain lands upon which are valuable improvements effected by me.

I do not wish in any way to prevent the applicants obtaining any land that may be necessary to render their Common of greater use to them; but I confidently expect that the land upon which my improvements are, to the value of over £500, may not be granted or promised to the people, seeing that my application to purchase this land has now been a length of time unattended to.

There is the less necessity for alienating this land, as the portion which I have applied to purchase (about 1,000 acres), will still leave to the applicants any land you may choose to grant them for access to water, which I understand is the plea put forward for an extension of the Permanent Common here.

I have, &c.,
JAS. B. BETTINGTON.

No. 19.

No. 19.

MINUTE OF THE SECRETARY FOR LANDS.

MR. A. BELL, M.P. for the Upper Hunter, placed in my hands the annexed papers. Mr. Bell's opinion is that it would be a great hardship to Mr. Bettington to deprive him of the opportunity of securing the improvements on the land in question, and that the inhabitants of Merriwa have already sufficient land for Commonage purposes.

W.F., 9 Dec., 1868.

A portion of 1,000 acres has been dedicated for a Permanent Common, and two portions, containing respectively 2,700 acres and 980 acres, have been set apart for Temporary Commonage, and the proposition of certain of the residents at Merriwa, including the Trustees elected for the Permanent Common, is to surrender the Permanent Common and the portion of 980 acres in exchange for a grant of the 2,700 acres as a Permanent Common.

The Trustees of a Common have now power under the Act to make such an arrangement as that to which Mr. Bettington alludes. The land in question is wholly within the Merriwa population reserve, and Mr. Bettington can consequently have no claim to purchase without competition. Whether the land containing his improvements should be brought to auction will depend on the decision which may be come to on the Petition for an exchange of Commonage, which is about to be referred for the opinion of the Member for the Upper Hunter.

11 December.

No. 20.

THE UNDER SECRETARY FOR LANDS to A. BELL, Esq., M.L.A.

Department of Lands,
Sydney, 14 December, 1868.

SIR,

I am directed to enclose the copy of a Petition which has been received from certain of the residents of Merriwa, praying that in lieu of the 1,000 acres near that township dedicated for a Permanent Common, and the two portions, containing respectively 2,700 acres and 980 acres, set apart for Temporary Commonage, the portion of 2,700 acres (which, with the other land referred to, is shown on the enclosed tracing) may be dedicated as a Permanent Common; and I am to request that I may be favoured with your opinion as to whether the prayer of the Petition should be complied with.

I have, &c.,
M. FITZPATRICK.

No. 21.

A. BELL, Esq., M.L.A., to THE UNDER SECRETARY FOR LANDS.

Civil Service Club,
Sydney, 16 December, 1868.

SIR,

I have the honor to acknowledge the receipt of your letter dated 14th instant, enclosing a Petition from certain residents at Merriwa, praying that the 2,700 acres, portion of the Temporary Common, be dedicated as a Permanent Common in lieu of the present Temporary and Permanent Common; and in reply I beg to state that I consider the question of these reserves was fairly settled by the decision of the Government upon Mr. Bettington's application, supported by the late Member for the Upper Hunter, Mr. White, which decision, I am of opinion, ought not to be disturbed.

I have, &c.,
A. BELL.

I concur with Mr. Bell, and decline to recommend any interference with the arrangement made.—
W.F., 24 December, 1868.

No. 22.

THE UNDER SECRETARY FOR LANDS to THE TRUSTEES AND OTHER PETITIONERS.

Department of Lands,
Sydney, 12 January, 1869.

GENTLEMEN,

In reference to your Petition, praying that the portion of 2,700 acres at Merriwa, set apart as a Temporary Common, may be permanently dedicated in lieu of the present Permanent and Temporary Commons, I am directed to inform you that the Minister for Lands is of opinion that the question of the commonage has been settled, and declines to recommend any interference with the arrangements already made.

I have, &c.,
MICHAEL FITZPATRICK.

No. 23.

No. 23.

THE TRUSTEES OF MERRIWA COMMON to THE COLONIAL SECRETARY.

Merriwa, 14 January, 1869.

SIR,

In reference to the 2,700 acres set apart as a Temporary Common, we beg to state that there is a gentleman occupies it at present with sheep, which of course drives our stock away, and they have no other place for water; so therefore they must encroach, and the moment they do so they are immediately impounded by the same gentleman who is occupying the Common with his sheep. We wish you to take notice that this gentleman has washed and shore upwards of 35,000 sheep on the Common, and in doing so he had to make use of the Permanent and Temporary Common, which has left it like a desert, and of no avail to the township, this season, whatsoever. Every one is—of our Petitioners—complaining to us, for not pushing it forward; so therefore we humbly pray that you will take it in hands, and get it for us as soon as possible, as we are badly in need of it. You would greatly oblige if you would get the appointed Trustees' names gazetted, as we are quite powerless in exercising our rights for the use of the inhabitants of Merriwa.

We remain, &c.,

JOHN WALKER,
WM. GALLAGHER,
CHAS. SPRATT,
JOHN ISAACS,
HENRY WHITNEY,

} Trustees appointed.

No. 24.

THE TRUSTEES OF MERRIWA COMMON to THE COLONIAL SECRETARY.

Merriwa, 14 January, 1869.

SIR,

We, the undersigned elected Trustees of the Common for Merriwa, and inhabitants, forwarded a Petition, through Mr. Wisdom, M.L.A., to His Excellency the Governor, praying that the 2,700 acres, set apart as a Temporary Common, be proclaimed a Permanent Common, in lieu of the 1,000 acres already dedicated as a Permanent Common, which is no benefit whatever to the township, it being 2 miles from any water. The 2,700 acres is bounded on the west by the river, in which part there is a never-failing supply of water. We enclose copy of Petition, also letter received from the Minister for Lands. Will you kindly take the matter in hand and get our prayer granted, as it is the only boon we have, is the water, especially in such seasons as this.

We have, &c.,

JOHN WALKER,
WM. GALLAGHER,
CHARLES SPRATT,
JOHN ISAACS,
HENRY WHITNEY,

} Trustees appointed.

The Secretary for Lands, B.C., 8 March, 1869.—JOHN R.

Surveyor General, B.C., 8 March, 1869.—M.F.

The exchange cannot be recommended. (*Vide* Mr. Secretary Forster's Memorandum on Mr. Bell's letter of 16 December, 1868.)

No. 25.

THE UNDER SECRETARY FOR LANDS to A. BELL, Esq., M.L.A.

Department of Lands,

Sydney, 18 January, 1869.

SIR,

In reference to your letter of the 16th ultimo, I am directed to inform you that the Petitioners for the exchange of the Permanent and Temporary Commons at Merriwa have been apprised that the Minister for Lands declines to recommend any interference with the arrangement already made.

I have, &c.,

M. FITZPATRICK.

No. 26.

MR. J. B. BETTINGTON to THE SECRETARY FOR LANDS.

Brindley Park,

Merriwa, 30 January, 1869.

SIR,

I have the honor to call your attention to an application, made by me in November last, to purchase a portion of the Merriwa Temporary Commonage upon which stand some improvements effected by me to the extent of £500.

I have again to request that you will see fit to have surveyed and permit me to purchase all that portion of land upon which these improvements stand.

I have, &c.,

JAS. B. BETTINGTON.

I have received instructions to measure the land herein applied for, for auction sale, and the measurement will be proceeded with at first opportunity.

JAMES LOUDON,

Licensed Surveyor.

No. 27.

THE TRUSTEES OF MERRIWA COMMON to THE SECRETARY FOR LANDS.

Merriwa, 2 March, 1869.

SIR,

On the 10th October, 1868, Mr. Smith, Police Magistrate for our district, held a meeting in the Court House of Merriwa, for the purpose of electing Trustees over Commonages granted to that place. Whereas we wish to know if ever he forwarded our names down to be gazetted or approved, as we have never heard anything about it since; moreover, we beg to state that there is a gentleman now running sheep all over the Commonage granted to the town, which certainly drives the town stock off the Common, and this same gentleman has men employed to do nothing else but impound; so you see the chance we have of living in this little town. You have heard further particulars which we trust you will please look into.

We remain, &c.,

JOHN ISAACS.
HENRY WHITNEY.

MINUTE OF THE SECRETARY FOR LANDS.

THE Temporary and Permanent Commons for Merriwa were selected with due deliberation by the late Government with the consent of all parties concerned, and the sanction of both late and present Members; I cannot therefore, without more cogent reasons than any assigned, recommend interference.

W.F., 23 March, 1869.

No. 29.

THE UNDER SECRETARY FOR LANDS to THE TRUSTEES OF MERRIWA COMMON.

Department of Lands,

Sydney, 3 April, 1869.

GENTLEMEN,

In reference to your letter of the 10th January last, addressed to the Honorable the Colonial Secretary, respecting the Commonage at Merriwa, I am directed to inform you that as both the Permanent and Temporary Commons were selected with due deliberation by the late Government, with the consent of all parties concerned, and with the sanction of both the late and present Member for the District, the Minister for Lands cannot, without more cogent reasons than any assigned, recommend interference therewith.

I have, &c.,

M. FITZPATRICK.

Department of Lands,

Sydney, 5 April, 1869.

SIR,

In reference to your letter of the 30th January, calling attention to your application for the measurement for sale of a portion of the Temporary Commonage at Merriwa, I am directed to inform you that instructions for the measurement of the land in suitable areas for auction sale have issued to Mr. Licensed Surveyor Loudon, who will proceed with the survey at the first opportunity.

I have, &c.,

M. FITZPATRICK.

No. 31.

THE TRUSTEES OF MERRIWA COMMON to THE SECRETARY FOR LANDS.

Merriwa, 7 April, 1869.

SIR,

Yours of the 5th instant to hand, and in reply we the undersigned Trustees of the Merriwa Common respectfully beg to request (on behalf of the inhabitants of Merriwa) that you would forward at once an exact copy of the first Petition that was sent in to your office (about one or two years ago) with reference to the Commons, as the whole of the persons signing the Petition sent in by us on the 10th October, 1868, deny ever signing any other Petition, therefore showing that it was done by two or three interested parties which we wish to prove.

We are also informed that the Surveyor has instructions to measure out 1,000 acres out of the 2,700 acres Temporary Common, for Mr. Bettington, which if done will deprive the township of access to the only permanent water available; we therefore request you would be kind enough to delay the survey until this matter is settled. The 1,000 acres Permanent Common has no water at all on it and no access except through other parties' land; therefore, all stock going to it are liable to be impounded. The prosperity of Merriwa depends entirely on this 2,700 acres. Your reply will oblige

Yours, &c.,

JOHN WALKER.

THE UNDER SECRETARY FOR LANDS to THE TRUSTEES OF MERRIWA COMMON.

Department of Lands,
Sydney, 29 April, 1869.

GENTLEMEN,

I am directed to forward, in compliance with the request contained in your letter of the 7th instant, a copy of the first Petition received in this office relative to the Commons at Merriwa.

I have, &c.,
M. FITZPATRICK.

No. 33.

THE TRUSTEES OF MERRIWA COMMON to THE SECRETARY FOR LANDS.

Merriwa, 3 May, 1869.

SIR,

In reply to yours of the 29th April last, No. 69-1788, we beg to enclose the copy of the Petition* sent by you—also certificate of the majority of the inhabitants alleged to have signed the same, certifying that they have no knowledge whatever, or ever signed it or any other Petition concerning the Merriwa Common, except the one sent in of October 10th, 1868, thereby showing that it has been done in an underhand manner to benefit certain parties. We sincerely hope that the enclosed will have some weight on behalf of our Petition of 10th October, 1868, and that you will grant us the 2,700 acres as a Permanent Common, in lieu of the 1,000 acres already proclaimed as a Permanent Common which is useless to us. *For Petition, see No. 4.

Would you kindly inform us if our names are gazetted as Trustees of the Merriwa Common, if not when is it likely to be done.

We have, &c.,

JOHN WALKER, WILLIAM GALLAGHER, JUNR., HENRY WHITNEY, CHAS. SPRATT, JOHN HENRY ISAACS,	}	Trustees.
--	---	-----------

[Enclosure in No. 33.]

To the Secretary for Lands.

Sir,

We, the undersigned, hereby certify that we have no knowledge of the attached Petition, neither did we sign or consent to have our signatures attached thereto; the only Petition we ever signed (with reference to the Merriwa Commonage) was the one sent in on the 10th October, 1868.

No. 34.

MR. LICENSED SURVEYOR DRUMMOND to THE SURVEYOR GENERAL.

Merriwa, 15 June, 1869.

SIR,

I have the honor to transmit herewith the plan* of a portion of land contained within the Merriwa Temporary Common, measured for auction sale on the application of James Brindley Bettington and others, in accordance with your letter of instruction [69, 10, and 11 to Loudon] of the 2nd February, 1869. The total area of land subdivided amounts to 721½ acres, marked to suit a general design, a road of access being left to a most permanent pool on the Merriwa Rivulet, which has been proposed as a water reserve. *Appendix B.

Portion No. 8 contains Mr. Bettington's dam and washpool, and portion No. 9 embraces the rest of his improvements consisting of a woolshed and hut. The road shown through portions Nos. 11 and 9 is the proclaimed road from Muswellbrook to Merriwa, but has never yet been used at this point,—the crossing at Wyndham's Springs being impracticable in its present state, and where it traverses portions 11 and 9 the soil is deep sand. As adherence to this road for a boundary would have forced these measurements to extend on the whole of the remaining frontage of the creek, and thereby render the Common useless, it has been made a reserved road. The present road from the Wappinguy lies about 30 chains to the east of the east boundary of portion 9, and thence bears away to the north-east corner of portion 11.

I have, &c.,

WILLIAM DRUMMOND,
Licensed Surveyor.

No. 35.

THE UNDER SECRETARY FOR LANDS to THE TRUSTEES OF MERRIWA COMMON.

Department of Lands,
Sydney, 21 June, 1869.

GENTLEMEN,

In reference to your letter of the 3rd ultimo, on the subject of the Commons at Merriwa, and in which you forward a memorandum signed by certain persons, stating that their names were without their knowledge attached to the Petition, a copy of which was forwarded to you with my letter of the 29th April last, I am directed to call your attention to the fact that this Petition has no reference to the appropriation of the land, but merely nominates Trustees who were not elected in accordance with the regulations, and I am to add that Mr. Secretary Forster sees no reason for further interference in the matter.

M. FITZPATRICK.

No. 36.

MEMORANDA ON NO. 26.

MEMORANDA indorsed on Mr. Bettington's letter, dated 30th January last, addressed to the Honorable the Secretary for Lands:—

The survey referred to, viz., portions 8, 9, 10, and 11, parish of Merriwa, has been received, and is now with Mr. Johnson for auction sale, in pursuance of decision of the Honorable the Minister for Lands. See No. 25.

As Mr. Bettington, by this application, appears to think he can purchase the land under the 8th clause, if he has not already been informed to the contrary he should now be so possibly.

G.L., 31/7/69.

Inform Mr. Bettington, if he has not already been given to understand, that the land, not being under lease to him, can be sold only at auction.—10 August.

Mr. Bettington was informed on the 5th April that instructions for the measurement of the land, in suitable areas for auction sale, had issued to Mr. Licensed Surveyor Loudon.—23rd August.

Mr. Bettington should be informed of the day of sale, when this has been fixed.—23rd August.

NEW SOUTH WALES.

GOLD FIELDS ACT OF 1866.

(REGULATIONS UNDER.)

Presented to Parliament, pursuant to Act 30 Vict., No. 8, sec. 13.

Department of Lands,
Sydney, 24th September, 1869.

REGULATIONS—GOLD FIELDS.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following new Regulations made in pursuance of the Gold Fields Act of 1866.

WILLIAM FORSTER.

GOLD FIELDS REGULATIONS.

Former Regulations repealed.

1. All Regulations hitherto in force for the management of the Gold Fields of New South Wales are hereby repealed: Provided that any existing interest or privilege shall not be affected by these Regulations.

Explanation of terms.

2. The following terms in inverted commas, except where the context may otherwise indicate, shall bear the meanings set against them respectively:—

“Commissioner”—The Commissioner residing nearest to any claim, share, or other matter or thing which shall be the subject of any question or dispute, or of anything required to be done under these Regulations.

“Commissioner in charge”—Any Commissioner intrusted with the general superintendence of a Gold Field, whether Northern, Southern, or Western.

“Registrar”—The Mining Registrar residing nearest to any claim, share, or other matter or thing which shall be the subject of any question or dispute, or of anything required to be done under these Regulations.

“Claim”—Any authorized holding whatsoever, unless otherwise specified.

“Amalgamated Claim”—One or more claims of which the labour, otherwise necessary for each, is concentrated upon one or more of such claims, subject to these Regulations.

“Prospecting”—Searching for gold in any new or untried locality.

“Protection Area”—Additional ground authorized to be temporarily occupied for purposes of prospecting.

“Prospecting Claim”—A claim allotted by way of reward for the discovery of gold in a protection area.

“Frontage System”—A mode of working and occupation in regard to deep sinking, declared by the Commissioner in charge to be in operation within a certain area.

“Frontage Area”—Ground allotted by the Commissioner in charge for the frontage system.

“Frontage Claim”—A claim within a frontage area, and subject to the frontage system.

“Block Claim”—An ordinary claim in a frontage area, not subject to the frontage system.

“New Ground”—Any unoccupied ground in a frontage area, in which it is intended to sink in search of a lead.

“Working party”—Any person or persons actually working and occupying a claim, whether on their own account or as representatives of any other authorized person or persons.

“Old Workings”—Ground on which a number of shafts have been sunk, and the greater part of which has been undermined or worked out.

“Water Right”—The right to convey by means of a race a specified quantity of water to any locality, or the right to a specified quantity of water in its natural place or channel.

“Storm Water”—Water collected by temporary drainage, and not permanent in a creek, river, lagoon, lake, or artificial reservoir.

GENERAL REGULATIONS.

Police Magistrates also Commissioners.

3. Every Police Magistrate shall be *ex officio* a Commissioner under these Regulations.

Clerks of Petty Sessions also Mining Registrars.

4. Every Clerk of Petty Sessions shall be *ex officio* a Mining Registrar under these Regulations.

Registrar to keep books.

5. Each Registrar shall enter in books to be provided for the purpose, all applications, particulars, and other matters by these Regulations required to be registered by such Registrar.

Fees to be paid to Registrar.

6. There shall be paid to the Registrar, in respect of the several registrations and other duties mentioned in these Regulations, the fees set forth in the Schedule hereunto marked A, which fees the Registrar may demand and receive previous to making any registration.

Mode of marking claims.

7. The mode of taking possession of a claim, unless otherwise provided under these Regulations, shall be by defining the boundaries thereof by sinking substantial pegs at each corner of such claim, leaving at least 2 feet of each peg, at all times, exposed to view above the ground.

Spare ground.

8. Where ground is occupied or marked off in excess of the extent authorized by these Regulations, any miner may mark off such excess of ground, and shall be entitled to choose from which end of the claim it shall be taken, and may take possession of the same as a claim in the mode hereinbefore defined: Provided always that the original occupant shall be entitled to retain such part of such ground as contains the shaft.

Number of claims and shares not limited.

9. Any holder of a miner's right may hold one or more shares in any number of claims, provided such shares be represented in accordance with these Regulations.

Principal to appoint agent.

10. Any person holding an interest or share in a claim shall, in case of his absence from the locality, appoint a miner as his agent, whose acts shall be held to be those of his principal, provided the name and address of such agent be first registered with the Registrar.

Claim not forfeited through absence of hired representative.

11. If any agent appointed to represent any interest or share in any claim shall absent himself from the locality, or otherwise neglect to represent such interest or share, the same shall be forfeited, unless, within three days after notice, in writing, of such absence or neglect shall have been served on the owner or his agent, the owner's interest or share be fully represented in conformity with these Regulations.

Claims and shares may be transferred.

12. Claims, and shares in claims and leases, may be transferred to any authorized person by registration.

Claims to be continuously worked.

13. All claims must be continuously worked after the expiration of forty-eight hours from the time of occupation; and any claim, or share in a claim (except

as otherwise provided for under these Regulations), remaining unworked and unregistered for three clear working days, shall be liable to forfeiture.

Amalgamation of claims allowed.

14. The holders of any number of adjacent claims may register such claims as one amalgamated claim, and from and after such registration the said claims may be held and worked as one claim; but unless a number of men, equal to the full number necessary to hold the said claims severally, shall be employed upon or in connection with the said amalgamated claim, such amalgamated claim shall be null and void. And any number of claims, whether adjacent or not, where difficulties of working are occasioned by water or otherwise, may, with consent of the Commissioner, be amalgamated in like manner and subject to the like conditions.

Claims may be held in reserve.

15. Any miner whose claim may be unworkable from any cause whatsoever, or who may himself be unable to work from any reasonable cause, shall be entitled to register his claim as held in reserve, but he must first obtain a certificate of such registry, and keep a copy of the same constantly posted on the ground; and the working of the claim must be recommenced as soon as the Commissioner shall require, or the same shall be considered and treated as abandoned.

Shareholder wilfully absent to be responsible for wages to hired representative.

16. When any shareholder in a claim shall absent himself from his work, the partner or partners of such shareholder may supply his place by a competent miner, and such shareholder shall be responsible for any reasonable wages due to the person so employed.

Work in connection with claims to be deemed working such claims.

17. Any miner or miners performing any work appertaining to or necessary for carrying on mining operations on his or their claim, or attending any Court of law in any suit connected therewith, shall be deemed to be working within the meaning of these Regulations.

Wash-dirt, quartz, stone, &c., may be registered.

18. Any miner or miners may, by registration, retain possession, for any time not exceeding six months, of wash-dirt, cement, tailings, quartz, stone, or other auriferous substances, for the purpose of extracting gold therefrom.

Holidays.

19. Miners may be absent from their claims on all the following days:—From Good Friday to Easter Tuesday, both inclusive; from the 24th December to the 2nd January, both inclusive; on any day on which the Election of a Member of the Legislature may take place, and on any day which shall be proclaimed a Holiday by the Government.

Orders regulating washing at streams and water-holes.

20. The Commissioner may make such temporary orders, not inconsistent with the existing Gold Fields' Act or Regulations, as he may consider necessary to prevent public injury, regulating the mode of washing at any stream or waterhole, or the disposal of sludge, tailings, or refusals.

Orders for facilitating working of river claims.

21. The Commissioner may make such temporary orders for facilitating the working of river or other claims, by combination of labour or otherwise, as the difficulties and circumstances of each case may appear to him to require.

Proportionate cost of works.

22. When any race or tunnel shall have been cut, or other work performed, by which the working of any claim may be facilitated, every person benefited thereby shall pay such proportionate share of the cost of such operation as may be duly assessed by the Commissioner.

Digging-upon authorized holdings prohibited.

23. No person, without first obtaining the consent of the Commissioner, shall dig upon or undermine any land enclosed by any authorized occupant, or occupied by any building or machinery in connection with mining operations, or used as a garden, or a Government camp or police station, or for any public purpose.

Claims not to be taken up in certain cases.—Injury to dams, &c., prohibited

24. No claim will be allowed to be taken up in any position where, by its interference with the supply of water requisite for public use, by undermining or digging up of roads, or by obstructing public thoroughfares, or otherwise, it will tend to public injury or inconvenience; and no person shall sink or drive so near to any race, dam, or reservoir, as to impair its efficiency.

Flood-race to be constructed.

25. Every holder of a claim or a lease in a river or creek shall form and maintain a sufficient flood race through or past such claim, and shall be entitled to maintain the natural level of the water at the head of his claim.

Retention of sludge from machinery to be provided for.

26. Where machinery, either horse or steam, is employed, the owner or owners thereof shall construct an embankment for the purpose of retaining the sludge, not more than 100 yards from the site of such machinery; unless in the opinion of the Commissioner it can be more conveniently carried off by drainage, without causing injury to any private or public interest.

Right to tail-water to cease.

27. No person shall have further right to any tail-water after it shall have passed his works.

Obstructions causing public inconvenience to be removed.

28. The Commissioner may order the removal to a reasonable distance of any tent, dwelling-house, stable, or other obstruction placed so as to cause public inconvenience.

Water-holes, &c., may be reserved for police, &c.

29. The Commissioner may reserve any water-hole or spring for any public purpose.

Springs, water-holes, &c., may be occupied.

30. Any person may occupy springs, water-holes, or wells, for domestic purposes, subject to the same conditions as regards application and registration as prescribed for dams and reservoirs.

Residence area.

31. Any person holding a miner's right may occupy, for the purpose of residence, land not exceeding 1,210 square yards, or 22 yards by 55, where such measurement may be practicable.

Commissioner to make orders.

32. The Commissioner may determine any dispute which may arise upon any matter connected with the working of any claim, or the occupation of any holding, not otherwise in these Regulations provided for; and make such order in respect thereof, not being inconsistent with the Gold Fields' Act or these Regulations, as he may think requisite in the matter; and any claim or share in a claim, or any holding, occupied contrary to such decision or order or to these Regulations, shall be forfeited.

Appeal regulated.

33. Any person may appeal against any decision of a Commissioner within seven days after such decision, by lodging a written notice of appeal, with the prescribed fee of £3, in the hands of the Registrar, who shall forthwith inform the Members of the Court having power to entertain such appeal of such notice having been lodged, in order that the appeal may be heard with as little delay as possible.

Protection area.

34. Any miner or party of miners desirous of prospecting shall be entitled to a protection area, and, on the discovery of payable gold, to a prospecting claim as hereinafter provided.

Protection areas regulated.

35. Every protection area, as well as the name or names of the holders, shall be registered as soon as practicable, and a certificate of such registry issued by the Registrar accordingly.

Other Rules for protection areas.

36. No protection area of any description will be allowed within half a mile of any other of a similar character; and every such protection area must be effectively and continuously worked from the time of registry, or the same will be held to be forfeited; and no protection area shall be held for a longer period than three months.

Prospecting claim.

37. On the discovery of payable gold in a protection area, the holder or holders shall without delay report the same to the Commissioner, by whose authority a prospecting claim will then be marked off, according to the nature of the ground and the distance from other claims or areas, as hereinafter provided.

ALLUVIAL GROUND.

The extent of a protection area in alluvial ground

38. In alluvial ground the extent of a protection area shall not exceed as follows, namely:—

	yds.	yds.
At a distance from any claim then producing gold, not less than half a mile	100	by 100
Exceeding half a mile and not less than 1 mile	200	by 200
Exceeding 1 and not less than 3 miles	300	by 300
Exceeding 3 and not less than 7 miles	400	by 400

Prospecting claim in alluvial ground.

39. In alluvial ground the extent of a prospecting claim shall not exceed as follows:—

	feet.	feet.
At a distance from any claim then producing gold, not less than half a mile	80	by 120
Exceeding half a mile and not less than 1 mile	120	by 120
Exceeding 1 mile and not less than 3 miles	150	by 150
Exceeding 3 miles and not less than 7 miles	200	by 200

After the claim shall have been so marked off, no fewer than four men must be kept continuously employed.

Protection area in rivers and creeks.

40. On any untried river or creek, or portion of a river or creek, distant upwards of half a mile from a locality where payable gold is obtained, a protection area having a frontage not exceeding 300 yards may be taken up in like manner, and on the same conditions as prescribed in other cases; provided that when payable gold shall have been discovered, the claim shall be allotted, allowing an additional claim for each man in the working party, so long as the total measurement shall not exceed that of twelve claims. When the claim shall have been finally allotted, it must be worked by the whole working party for whom it shall have been laid off, or it will be liable to a proportionate reduction.

Protection area on quartz reefs.

41. On any unoccupied quartz reef, or vein, the extent of a protection area shall not exceed as follows:—

	yds.	yds.
At a distance not less than half a mile from any then existing quartz workings	200	200
Exceeding half a mile, and not less than 1 mile	300	200
Exceeding 1, and not less than 3 miles	400	200
Exceeding 3, and not less than 7 miles	500	200

Prospecting claim on quartz reef.

42. In a quartz reef or vein a prospecting claim shall be subject to the same conditions as in the case of river claims.

ALLUVIAL OTHER THAN RIVER CLAIMS.

Size of alluvial claims.

43. The extent of a claim in new alluvial ground shall not exceed as follows:—

	feet.	feet.
One miner	40	40
Two miners	40	80
Three miners	60	80
Four miners	80	80

Such claim, when practicable, shall be marked off in a rectangular form, and no claim shall exceed in extent the area allowed for four men. When from any cause it shall be impracticable to take the claims in the form above mentioned, a departure from that form may be sanctioned, and such area of ground may be allotted by the Commissioner as will give to each miner or working party the prescribed or any less area: Provided that in no instance shall a claim exceed in length twice its breadth. The claims for any one working party shall be contiguous.

RIVER CLAIMS.

Size of claims in rivers and creeks.

44. Thirty feet frontage in beds of rivers and creeks, extending across the whole bed, will be allotted as a claim to each miner. No working party shall take up more than six of such claims, which must be contiguous.

QUARTZ CLAIMS.

Size of quartz claims, how marked.

45. The claim allotted to each miner on any quartz reef or vein shall not exceed thirty feet along the line or course of the reef or vein, and 100 yards in width; and the total number of claims to be allowed to any one working party shall not exceed six. Provided that until such party shall have commenced crushing, only one-half of their number need be employed. No less extent than two claims shall be allotted, unless in the case of spare ground, or ground held in excess by any working party, which may be taken up according to the extent available. The boundaries of each claim shall be marked at each end of the line or reef, and at each corner by substantial pegs securely sunk into the ground, and leaving at least 2 feet of each of them at all times exposed to view.

Base-line.

46. All quartz claims shall be marked upon a base-line, the direction of which in case of dispute shall be determined by the Commissioner; such base-line shall be altered only by the consent of a majority of the shareholders and the order of the Commissioner, and the width of the claims shall be measured at right angles to the base-line. The holders of such claims shall be entitled to work all reefs or veins within their defined boundaries. In the case of convergence of reefs the preference, at and onwards from the junction, shall be given to the claim holders on the line first laid off by the Commissioner.

Quartz claims to be numbered and registered.

47. Claims on quartz reefs or veins shall be numbered consecutively, and registered within four days after occupation. All transfers and subdivisions of shares shall be registered in like manner.

OLD WORKINGS.

Size of claims in old workings.

48. The size of claims in old workings shall not exceed as follows:—

	feet.	feet.
One miner	70	70
Two miners	100	100
Three miners	120	120
Four miners	150	150

but a Commissioner may, in any case, under special circumstances, permit a different form of measurement, and allot a less area.

WATER-RIGHTS.

Mode of application for water-rights. Objections to be determined on the ground.

49. Every application for permission to cut a race for the conveyance of water must be made in writing to the Registrar, describing the proposed course, width, and extremities of such race, together with the width of land proposed to be held on each side thereof; notice of such application having been made must also be posted at the described extremities. If within fourteen clear days from the time when such application was lodged and notice posted as aforesaid, no valid objection shall have been made and upheld, the Registrar shall issue the necessary certificate of registry, specifying the nature and extent of the right or privilege granted. In the event of objection having been made, the Commissioner shall in due course inquire into and determine the matter on the ground.

Water-rights—how gauged.

50. Each water-right shall entitle the holder or holders thereof to a volume of water 3 inches by 12 inches, and shall be gauged in the following manner:— A box 6 feet in length and 12 inches in width, with a scale of inches marked on the inner side at the lower end, shall be placed as nearly as practicable to the head of the race, having a fall or inclination of 6 inches in the entire length of it, and the gauge of water as above specified (3 inches by 12 inches) shall be taken at the mouth of the box where the water is discharged. When the race shall exceed a mile in length, the width of the box may be increased half an inch for each mile.

Water-rights—when forfeited.

51. All water-rights not used and upheld for a period of one month shall be considered forfeited, except when the supply of water is insufficient.

Priority of water-rights determined.

52. The priority of water-rights shall be determined by the date of registration; and in case of failure of water supply the person lastly registered shall forego his rights during such failure of water as against the person previously registered, and so on in rotation as the supply diminishes. One sluice-head of water shall at all times be allowed to flow in the natural course of any river or creek, if required for mining purposes.

No race to be cut near an existing race.

53. Any person cutting a race so close to an existing race, or to the properly defined line of an intended race in actual and *bona fide* course of formation, as to cause drainage or other damage, shall be responsible for such damage as for a trespass.

Extending or altering the heads of races.

54. The extension of any race, or alteration of the head or course thereof, shall be subject to the same conditions as the formation of a new race.

Races to be kept in repair.

55. Proprietors of races shall keep them in good repair, and make efficient bridges, at least (12) twelve feet in width, in places where the race crosses roads in ordinary use.

DAMS AND RESERVOIRS.

Mode of applying for dams and reservoirs.

56. Any person wishing to construct a dam or reservoir, shall lodge with the Registrar a written application for permission to do so, and post a notice of such application on a conspicuous part of the ground intended to be so occupied. The application shall set forth the area of ground required for such dam or reservoir, and the source of watershed from which it is proposed to obtain the water supply. If at the expiration of seven clear days from the date of application no objection shall have been lodged and upheld, the Registrar shall issue a certificate of registry.

Objections to construction of dams and reservoirs.

57. All objections to the erection and construction of dams and reservoirs shall be, at the option of such Commissioner, heard by the Commissioner, with or without assessors, on the ground; and, should it be found that any other dam, or reservoir, or holding whatever, could or might be injuriously affected by the dam or reservoir applied for, such application shall be refused.

58. Any person having obtained authority to construct a dam or reservoir, who shall fail to commence its construction in a *bonâ fide* manner within seven days after such authority shall have been granted, shall forfeit the same; and any person who, having so commenced to construct any dam or reservoir, shall suspend the completion thereof for seven consecutive working days, or having completed the same shall cease to use or uphold it for a period of three months, shall forfeit such dam or reservoir unless he can show such cause for the delay, as the Commissioner shall think sufficient.

Races in connection with dams and reservoirs.

59. The owner of a dam or reservoir may cut and construct races for the purpose of intercepting storm water to supply such dam or reservoir; and such races and their sources of water supply shall be subject to the same conditions as to application and registration as in the case of water-rights.

BUSINESS ALLOTMENTS.

Business allotments to be applied for.

60. Any holder of a business license, who may desire to occupy lands thereunder, must make application for such authority to the Commissioner; and the holding must, when allotted, be registered in the Office of the Registrar. Any allotment not obtained and occupied in strict accordance with these Regulations will not be recognized.

Extent of business allotments.

61. The extent of land to be occupied under each business license shall be $\frac{1}{4}$ th of an acre, and the form of measurement 22 yards frontage to any street or roadway by 55 yards in depth. When the land may be situated in a position detached from any tents or buildings and from the line of any street or roadway, the area to be allotted shall be 1 acre. A Commissioner may, in any case, under special circumstances, permit a different form of measurement, and allot a less area.

Number of business allotments to be held by one person limited.

62. No more than two allotments shall be allotted to the same person; and no occupant of a business allotment shall be permitted to alienate or sublet any portion thereof, except with the consent of the Commissioner.

Business allotments—when forfeited.

63. If, at the expiration of seven working days from the date of registry of a business allotment, the same shall not have been improved to a value not less than £16 per acre for town lands, £5 for suburban, and £2 for other lands, it shall become liable to forfeiture and may be re-allotted to any other person.

Persons not holding business licenses prohibited from taking up business allotments.

64. Any part of an area marked out for business purposes shall only be occupied by persons holding business licenses, except in the case of ground held prior to the time of such marking.

Permission to search for gold on business allotments.

65. Whenever any business allotment, or miner's residence allotment, may be supposed to contain deposits of gold, any miner may enter upon such allotment, for purposes of searching, upon payment to the holder of the allotment of such amount, by way of compensation for injury to the holding, as may be duly determined by the Commissioner.

Land may be reserved for public purposes.

66. The Commissioner may, for public purposes, temporarily withhold any land from occupation.

MACHINERY.

Sites for machinery to be applied for.

67. Every application for permission to erect machinery must be in writing, and lodged with the Registrar; and a notice of such application must also be posted on the proposed site. If at the expiration of seven clear days from the date of such application no objection shall have been lodged and upheld, the Registrar shall issue a certificate of registry. The extent of land which may be occupied for such purpose shall be $\frac{1}{4}$ th of an acre, and the form of measurement 22 yards frontage to any street or roadway by 55 yards in depth. Provided that the Commissioner may in any case, under special circumstances, permit a different form of measurement and allot a less area.

WATER RACES.

Races through private lands.

68. In all cases where application is made to the Government, to authorize the passage of water for gold mining purposes, or the passage of any water or liquid discharge from gold mining operations, through freehold land, the party making such application shall pay into the hands of the Commissioner in charge the amount of compensation to be paid to the possessor of such lands, before the authority applied for shall be granted.

Mode of arbitration.

69. The amount of compensation in any case of application for authority to cut a water-race through freehold land shall be determined as follows:—The party applying for such authority shall cause a notice, in writing, to be served upon the possessor of the land, setting forth with reasonable certainty the direction of the proposed race, cutting, or other means of effecting the passage of water—the quantity of land proposed to be taken or used—the time for which the same will be required—and the amount of compensation which such applicant is willing to pay; and shall require the possessor of such land, if dissatisfied with the amount offered, to appoint, within seven days from the service thereof, by writing, an arbitrator on his behalf to assist in determining the amount which shall be paid as such compensation, and within the same period to forward the said appointment to the Commissioner in charge; and the party giving such notice shall, within the same period, by writing under his hand, appoint an arbitrator on his behalf, and forward such appointment to the Commissioner in charge; and

every such appointment shall be deemed to be a submission to arbitration on the part of the person signing the same, and the award of the arbitrators so appointed shall be final.

After consent, arbitration to proceed.

70. After the appointment of arbitrators in any case, neither party shall have power to revoke the same without the consent of the other, nor shall the death of either party operate as a revocation; and if either party shall neglect, within the said period of seven days after the service of the said notice, to appoint an arbitrator, the other party, having himself appointed an arbitrator, may appoint such arbitrator to act on behalf of both parties, and such arbitrator may proceed to hear and determine the matters so referred, and his award shall be final.

Provision in certain cases.

71. When each party shall have appointed an arbitrator, and either of such arbitrators shall, before the determination of the matters so referred to them, die, or refuse or become incapable to act, the party by whom such arbitrator was appointed may, by writing under his hand, appoint another person in his stead; and if he fail so to do for the space of seven days after notice from the other party requiring him so to do, the surviving arbitrator may proceed *ex parte*.

Umpire to be appointed.

72. When each of the parties shall appoint an arbitrator, such arbitrators shall, before entering upon the consideration of the matters referred to them, by writing under their hand, appoint an umpire; and in case the said arbitrators shall fail to make their award, in writing, within fourteen days after the day on which the last of them was appointed, the matters referred shall be determined by such umpire, whose award shall be final.

Costs of arbitration.

73. The costs of arbitration and award shall be in the discretion of the arbitrator, arbitrators, or umpire, as the case may be.

Arbitration to commence *de novo* in certain cases.

74. If a single arbitrator, or an umpire, die, or refuse or become incapable to act, before he shall have made his award, or shall fail to make such award within ten days after his appointment, then the matters referred to him shall be again referred to arbitration as if no former reference had been made.

Award to be in writing.

75. The award shall in all cases be in writing, and shall be delivered to the Commissioner in charge within fourteen days from time of making the same, and may be made a Rule of Court on the application of either party.

Permission to carry water through Crown Lands, to be used on private lands.

76. Application for permission to carry through Crown Lands, on any gold field, water for gold mining purposes, to be used upon alienated lands, may be made to the Commissioner, by any holder of a miner's right, in like manner as prescribed in respect to the conveyance of water for use upon Crown Lands; and if the Secretary for Lands sanction such application, the Commissioner in charge shall issue the necessary "permit," which shall have in all respects the like effect as if granted in connection with the working of Crown Lands; and any holding thereunder shall be deemed to be a "claim" within the meaning of the Act.

LEASED TRACTS.

Leases—extent and duration thereof.

77. Leases of auriferous tracts will be granted of from 1 to 50 acres of alluvial ground and quartz reefs, and from 200 to 1,000 yards of a river bed, for a period not exceeding 15 years, at an annual rent of £2 per acre, or £2 per 100 yards of a river bed.

Alluvial and quartz reef tracts shall be measured in a rectangular form; and such measurement in the case of the former shall in no instance exceed in length twice its breadth, and in the case of the latter the width shall be as prescribed in the Schedule hereto annexed marked B.

Mode of obtaining leases.

78. Any holder of a miner's right desirous of obtaining a lease of auriferous land shall, previously to making application for the same, as hereinafter directed, and on the same day on which such application shall be made, erect at each angle of the land proposed to be leased a post not less than 3 inches square, and standing, at least, 3 feet in height above the surface of the ground, and shall affix upon each post a board with the words "Applied for Lease," together with the date of such application, the name and address of the applicant, or names and addresses of the applicants, and the extent of the area applied for, legibly painted or otherwise marked thereon; and such posts shall be maintained at the expense of such applicant or applicants until the application shall have been granted or refused. The applicant or applicants, as the case may be, will also be required on the same day to post copies of such notices on the nearest Post, Police, and Mining Registrar's Offices, and apply in writing to the Commissioner in charge for such lease, setting forth the boundaries and area of the ground proposed to be taken up, the machinery intended to be used, and describing the proposed method of working, the extent and nature of preparatory work to be performed, and, if the application is made in behalf of a company, the constitution of the company, the number of shares, and the names of the shareholders, must also be specified.

Rent for leased tracts.

79. The rent for each year must be paid in advance, and the application for lease must be accompanied by a deposit of £5 when the extent of ground does not exceed 10 acres, and £5 for every additional 10 acres or portion of 10 acres; or £2 for every 100 yards of a river bed, together with the fee for survey, as per Schedule annexed marked C—such deposit to be forfeited by the applicant should the lease not be taken out within one month after the granting of the same shall have been duly notified.

Chief Commissioner to forward applications to Government.

80. The Commissioner in charge shall forward to the Government every such application, with his report thereon, and may issue the lease whenever duly authorized; and if the notices required in such case shall have been duly posted, and after the expiration of fourteen days from the day when the same were so posted, no objection shall have been preferred to the Commissioner in charge and upheld respecting the lease of such land, he may permit its immediate occupation, subject to the decision of the Government as to the granting of such lease.

Conditions of leases.

81. Leases under these Regulations will be granted subject to the following conditions:—

1. That the ground applied for is not required for any public purpose, or is not in the authorized occupation of any person.
2. That labour shall be employed upon the ground as follows:—

Upon the Commissioner in charge granting permission to the applicant or applicants to occupy such ground—one man for each acre, and in a river bed two men for every 100 yards, shall be immediately employed thereon; and within one month from the issue of the lease, an additional man for each acre; and in a river bed, two additional men for each 100 yards: Provided

always that while steam or water power is employed, each horse-power of the machinery shall be computed as equal to four men; and when other works of an expensive nature, such as dams, reservoirs, or races, have been constructed, a diminution in the number of men required to be employed will be allowed at the rate of two men for every £100 so expended, to be determined, in case of dispute, by the Commissioner, in due course.

Leases, when forfeited.

82. The infraction of any condition of a lease will involve the forfeiture thereof.

FRONTAGE SYSTEM.

Commissioner in charge to proclaim frontage system.

83. The Commissioner in charge may declare any gold field, or division of a gold field, as regards alluvial workings, to be under the operation of the "Frontage System."

Extent of frontage claim.

84. A frontage claim shall have a width of one mile, until gold shall have been struck therein; but the Commissioner in charge may, in any particular locality, declare a reduction of such width.

Claims to be marked on frontage system.

85. On new ground, within a frontage area, all claims must, in the first instance, be marked on the frontage system.

Ground under 100 feet in depth to be taken up in block claims.

86. When the sinking in new ground shall be found not to reach a depth of 100 feet, of which the bottoming of one or more shafts on the supposed line of lead shall be a sufficient test, unless the Commissioner shall specially sanction a further testing, all markings on the supposed line of lead shall be null, and the ground shall then be open for taking up block-claims; provided that each miner shall have the right to include in his block-claim any shaft which had actually been commenced by him, taking such shaft for the centre.

Mode of marking claims.

87. The mode of marking a claim on an undeclared lead shall be by the erection of a post not less than 3 feet in height at either end of the claim.

Frontage system when to be deemed to be in operation.

88. When any person shall strike payable gold at a depth not less than 100 feet, the frontage system shall be deemed to be in operation and the lead declared. And all claims previously held on such lead shall be cancelled, and the holders thereof shall be entitled to occupy claims according to their priority of occupation on the lead, excepting where any claim-holder may have sunk a shaft at least 20 feet in depth, in which case he shall be entitled to the claim in which his shaft is situated.

Base-line to be marked.

89. A base-line shall be laid down by the Commissioner, and registered within four days, from either boundary of the prospecting claim, along the supposed course of such lead, on which line the length of the claims shall be marked; and such claims shall be taken up according to priority of occupation on the lead. Cross-lines shall also be laid down, as nearly as possible at right angles with the base-line, at each boundary.

Base-line may be altered.

90. If the actual course of the lead be found to differ materially from the course of the base-line, and the majority of claim-holders affected thereby desire it, a new base-line may be laid down by the Commissioner, and claims on the new line may be taken up according to their order on the former line.

Fresh claims, how marked.

91. The occupation of a fresh claim on a declared lead shall be taken by marking the same in like manner as on an undeclared lead, but in continuation of the base-line; and so soon as the cross-line shall have been laid, the claim shall be marked by similar posts at either end of such cross-lines. When the claim shall be reduced in width, the further posts must be withdrawn and placed at each corner of the block-claim selected.

Frontage system, when to cease.

92. When on any declared lead the sinking shall have been found to have diminished in depth, so as not to reach 100 feet, the frontage system shall cease, and block-claims thereafter shall thereupon be taken according to priority of occupation on the frontage.

Claim to be marked in continuance of line.

93. All claims taken up in advance of any line of declared lead, and which would by extension of the line come within the wings of such lead, must be marked in continuance of the line, and will be held to be claims on such declared lead.

Prospecting claim on declared lead.

94. Any person desiring to take up a prospecting claim on a declared lead, may do so at a distance not less than half a mile in advance of the last paying shaft, by registering the same; and he may mark out and hold on such prospecting claim an additional claim for each man employed therein, so long as the entire extent of claim shall not exceed eight claims, or 160 feet. On any undeclared supposed lead, double claims may in like manner be marked out and registered, so long as the entire extent shall not exceed twelve claims, or 240 feet. All prospecting claims must be effectively and continuously worked. Any number of claims taken up for the purpose of prospecting may be amalgamated; but the additional claims, by way of reward, will only be allowed (on the discovery therein of payable gold) to the registered prospecting claim. No prospecting claim on any declared or undeclared lead shall be taken up within half a mile of any other prospecting claim.

Length of frontage claims.

95. The length of frontage claims shall not exceed as follows:—

	feet.
Two men	40
Four men	80

No claim shall be taken up for other numbers than as above stated.

Width of frontage claims.

96. The width finally to be allotted for a frontage claim, after the gold shall have been struck, shall not exceed 80 feet, unless when the depth of sinking shall be found to exceed 200 feet, after which an additional width not exceeding 20 feet shall be allotted for every 100 feet in depth. And the depth of sinking for any lead, or portion of a lead, shall be determined without reference to the depth of any particular shaft.

Convergence of leads.

97. In the case of a convergence of leads, the preference at and onwards from the junction shall be given to the claim-holders on the lead first declared.

Amalgamation of claims permitted.

98. Whenever machinery is employed, or other sufficient reason exists, any number of claims may be amalgamated. And while steam machinery is employed, each horse-power of the machinery shall be computed as equal to four men, in representing the labour required to hold such amalgamated or any other claim.

Effective working of claim required.

99. The working of all claims shall be effectively commenced and carried forward continuously after the expiration of three clear days from the time of taking possession. But in the case of a duly declared lead, the registered claims shall not be required to be so worked, except the twenty-five claims, whether amalgamated or not, on either line of lead next onwards from the prospect claim, and afterwards in advance of the last payable shaft.

Shareholders to be present from 9 till 11 a.m.

100. On the other claims upon a declared lead the position of which does not require them to be so worked, every shareholder, or his representative, to the full number required by the dimensions of the claim, must be present from 9 till 11 o'clock a.m. daily.

Period allowed for proving claim.

101. The holder of any claim bottoming on the lead shall be allowed fourteen days to prove the breadth of his claim. The claim shall then be reduced to the prescribed width and marked off. In case the shaft and the drive of the holders shall be without the block claim chosen, they may retain such shaft and drive for the working of the claim, and such shaft or drive shall not be taken possession of except by consent of the original holder or holders.

Flag to be hoisted when gold is struck.

102. Upon gold being struck in any claim, the claim-holders shall cause a red flag to be hoisted on the last claim on the lead, to indicate the course of the gutter. The holder of such claim must give every information as to the course of the gutter, and the holder of a shaft must allow it to be entered in like manner by any person having the written authority of a Commissioner.

Declaration of lead to be rescinded when abandoned.

103. When any declared lead shall have been abandoned for fourteen clear days, the declaration of lead shall be deemed to be rescinded. The declaration of a lead on which the number of shafts actually at work during the twenty-one preceding days shall not exceed ten, shall also be deemed to be rescinded; but the holders of any claims then working on such lead shall be entitled to retain their frontage.

Frontage claims to be regulated as ordinary claims.

104. The holding of frontage claims will, with reference to any question not herein provided for, come within the terms of the general regulations for ordinary claims.

SCHEDULE A.

	s.	d.
Transfers of shares and subdivisions of shares—per transfer	1	0
Registration of protection areas, for any number of persons not exceeding four, and certificate	2	6
For every additional four or portion of four.....	2	6
Registration of quartz claims, for any number of persons not exceeding six.....	2	6
Registration of water-right and certificate	2	6
Registration of dams and reservoirs	2	6
" spring, well, or waterhole	2	6
" business allotment	2	6
" machinery site.....	2	6
" claim as held in reserve.....	2	6
" amalgamation of any number of persons not exceeding eight.....	2	6

1869.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOLD FIELDS LAWS AND REGULATIONS.

(PETITION—MINERS, ETC., ADELONG.)

Ordered by the Legislative Assembly to be Printed, 7 October, 1869.

To the Honorable House of Assembly.

The Petition of the undersigned Miners, Merchants, Traders, and others, of Adelong,—

RESPECTFULLY SHOWETH:—

That your Petitioners are suffering seriously from the injurious effects the present Mining Laws are inflicting upon the mining community and public generally.

That the present code of Laws and Regulations for the management of the Gold Fields, more especially relating to the leasing of auriferous tracts, are at present causing great depression and distress on the Gold Fields of this Colony.

That the regulations relating to the granting of leases of auriferous tracts are unjust to the practical miner and open to much monopoly—thereby destroying labour.

That, in the opinion of your Petitioners, the present system of granting leases of auriferous tracts is opposed to the general benefit of the miners, inasmuch as it diminishes the employment of labour and gives rise to a system of monopoly; and that such a system should at once be repealed.

That, in consideration of the injurious effects the present leasing system has occasioned, we are of opinion that leases should only be granted for previously worked and abandoned ground.

That when leases may be required, all applications for the same should be made to some local authority, whose duty it should be to inquire into the matter and make a report thereon to the Minister for Lands.

Your Petitioners humbly pray you will take these presents into your serious and early consideration.

And your Petitioners will, as in duty bound, ever pray.

[*Here follow 110 Signatures.*]

1869.

NEW SOUTH WALES.

REAL PROPERTY ACT.

(RETURNS FOR 1868.)

Presented to both Houses of Parliament, by Command.

RETURN of the Number of Applications, with amount of Fees, &c., under the Real Property Act, from 1st January to 31st December, 1868.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

REAL PROPERTY ACT.

(CORRESPONDENCE RESPECTING PROPOSED AMENDMENT OF.)

Ordered by the Legislative Assembly to be Printed, 21 October, 1869.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 1st October, 1869, That there be laid upon the Table of this House,—

“Copies of Letters addressed to the Colonial Secretary by the Senior
“Examiner of Titles in August, 1863, and April, 1866, suggesting amend-
“ment of the Real Property Act; together with Drafts therein referred
“to.”

(*Mr. J. Stewart.*)

N.B.—No official letter appears to have been received with these Amendments; but the reasons for their submission will be found in the "Preliminary Remarks" and "Explanatory Remarks" which accompany the Bill.

THE REAL PROPERTY ACT.

(26th VICTORIA, No. 9.)

Showing the Amendments submitted by the EXAMINER OF TITLES, with their Explanatory Minutes.
AUGUST, 1863.

An Act for the Declaration of Titles to Land and to facilitate its Transfer.

Preamble.

WHEREAS it is expedient to provide for the declaration of Titles to land and to facilitate the transfer of land Be it therefore enacted by the Queen's Most Excellent Majesty by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled and by the authority of the same as follows:—

Preliminary.

Repeal of previous Acts.

1. All laws statutes Acts ordinances rules regulations and practice whatsoever relating to freehold and other interests in land so far as inconsistent with the provisions of this Act are hereby repealed so far as regards their application to land under the provisions of this Act or the bringing of land under the operation of this Act.

Short title.

2. This Act may be cited for all purposes as the "Real Property Act."

Interpretation.

3. In the construction and for the purposes of this Act and in all instruments purporting to be made or executed thereunder (if not inconsistent with the context and subject matter) the following terms in inverted commas shall bear the respective meanings set against them:—

"Land"—Land messuages tenements and hereditaments corporeal and incorporeal of every kind and description or any estate or interest therein together with all paths passages ways water-courses liberties privileges easements plantations gardens mines minerals and quarries and all trees and timber thereon or thereunder lying or being unless any such are specially excepted.

"Grant"—Any Crown grant of land.

"Proprietor"—Any person ~~seized or possessed of~~ [entitled to] any freehold or other estate or interest in land at law or in equity in possession in futurity or expectancy.

"Transfer"—The passing of any estate or interest in land under this Act whether for valuable consideration or otherwise.

"Transmission"—The acquirement of title to or interest in land consequent on the death will intestacy bankruptcy insolvency or marriage of a proprietor.

"Mortgage"—Any charge on land created merely for securing a debt.

"Mortgagor"—The proprietor of land or of any estate or interest in land pledged as security for a debt.

"Mortgagee"—The proprietor of a mortgage.

"Encumbrance"—Any charge on land created for the [any] purpose ~~of securing the payment of an annuity or sum of money other than a debt~~ [whatever inclusive of mortgage unless expressly distinguished.]

"Encumbrancer"—The proprietor of any land or of any estate or interest in land ~~charged with any annuity or sum of money other than a debt~~ [subject to any encumbrance.]

"Encumbrancee"—The proprietor of an encumbrance.

"Lunatic"—Any person who shall have been found to be a lunatic upon inquiry by the Supreme Court or by any Judge thereof or upon a commission of inquiry issuing out of the Supreme Court in the nature of a writ *de lunatico inquirendo*.

"Person of unsound mind"—Any person not an infant who not having been found to be a lunatic shall be found upon like inquiry to be incapable from infirmity of mind to manage his own affairs.

"Consular Officer"—Consul General Consul and Vice Consul and any person for the time discharging the duties of Consul General Consul or Vice Consul.

"Instrument"—Any grant certificate of title conveyance assurance deed map plan will probate or exemplification of will or any other document in writing relating to the transfer or other dealing with land or evidencing title thereto.

"Sworn valuator"—Any person appointed by the Governor with the advice of the Executive Council to value land under this Act.

The describing any person as a proprietor transferrer transferee mortgagor mortgagee encumbrancer encumbrancee lessor or lessee or as trustee or as seised of having or taking any estate or interest in any land shall be deemed to include the heirs executors administrators and assigns of such person [according to the nature of any transferrable or transmissible interest or obligation to which such description shall relate.]

And

The matter proposed to be omitted is ruled through; that to be inserted is printed in brackets and underlined.

And generally unless the contrary shall appear from the context whenever a form in any schedule hereto is directed to be used such direction shall apply equally to any form to the like effect signed by the Registrar General or stamped with his seal or which for the same purpose may be authorized in conformity with the provisions of this Act and any variations from any such form not being in matter of substance shall not affect its validity or regularity but it may be used with such alterations as the character of the parties or the circumstances of the case may render necessary.

PART I.—*Appointment Powers and Functions of Employés.*

4. The department of the Registrar General shall be the department authorized to carry into execution the provisions of this Act and the Registrar General and other officers and clerks of the said department at the time of this Act coming into operation shall perform all the duties of their respective offices under this Act. Existing officers to perform duties under this Act.

5. The Governor with the advice of the Executive Council may appoint to the said department such Deputy Registrars General and other officers and clerks as may be necessary for carrying out the provisions of this Act and may likewise appoint two or more persons being barristers or solicitors to be "Examiners of Titles" hereinafter styled "Examiners" to advise and assist in carrying out the said provisions. Appointment of Examiners of Titles officers and clerks.

6. The Governor with the advice aforesaid may appoint three or more persons of whom the Registrar General shall be one *ex officio* to be Commissioners for investigating and dealing with applications for bringing land under the provisions of this Act and for other purposes hereinafter appointed. The style of such Commissioners shall be "The Land Titles Commissioners" hereinafter styled "Commissioners". The unofficial members shall be remunerated by fees specified in the Schedule hereunto marked P and at all meetings two shall form a quorum. Appointment of Commissioners.

7. The Registrar General shall have and use a seal of office bearing the impression of the Royal Arms of England and having inscribed in the margin thereof the words "Registrar General of New South Wales" and every instrument bearing the imprint of such seal and purporting to be signed or issued by the Registrar General or by any Deputy Registrar General shall be received in evidence and shall be deemed to be signed or issued by or under the direction of the Registrar General without further proof unless the contrary be shown. Registrar's seal of office.

8. Whenever by any law for the time being in force in the Colony anything is appointed to be done by the Registrar General the same may be lawfully done by any Deputy Registrar General. Functions of Deputy Registrar General.

9. It shall not be lawful for any person whilst holding the [any] office of ~~Examiner of Titles or of Land Titles Commissioner~~ under this Act to engage in private practice as a barrister or as an attorney or solicitor or be in partnership with or employed by any attorney or solicitor. Examiners and Commissioners not to practice.

10. The oath following shall be taken before one of the Judges of the Supreme Court by the persons at present holding the offices of Registrar General or Deputy Registrar General respectively and by every Registrar General and Deputy Registrar General hereafter appointed before entering upon the execution of his office under this Act— Oaths of office.

I A. B. do solemnly swear that I will faithfully and to the best of my ability execute and perform the office and duties of Registrar General or Deputy Registrar General for the Colony of New South Wales So help me God.

11. The Registrar General may exercise the following powers that is to say—

- (1.) He may require [and summon] the proprietor or other person making [or interested in any] application to have any land brought under the provisions of this Act or the proprietor or mortgagee or other person interested in any land under the provisions of this Act in respect of which any transfer lease mortgage encumbrance or other dealing or any release from any mortgage or encumbrance is about to be transacted or in respect of which any transmission is about to be registered or registration abstract granted under this Act to produce [before the Registrar General or any Examiner of Titles at the Registrar General's Office] any grant certificate of title conveyance deed mortgage lease will or other instrument in his possession or within his control affecting such land or the title thereto [and he may in like manner require such production from any person who has entered into or is under any liability derivative or otherwise to perform any covenant or agreement in writing to produce any such instrument as aforesaid in support or manifestation of the title of any person interested in any such application dealing or transaction as aforesaid. Provided that any person so summoned not being the applicant proprietor or a party to the dealing or transaction under enquiry shall be entitled to his reasonable charges and expenses the amount whereof shall if disputed be determined by the Registrar General and shall if so demanded be paid by the person at whose instance the summons shall be issued before the giving or producing the evidence required and in case such summons shall be disobeyed it shall be lawful for any Judge of the Supreme Court upon such application as hereinafter provided to enforce by attachment either of the summons already issued by the Registrar General or any renewed summons to be issued by such Judge and also to require and by the like means to compel the payment by the person guilty of such disobedience of any costs thereby occasioned. But no such application or proceeding shall prejudice any right of action upon breach of covenant which would otherwise subsist for damages in excess of such costs.] Powers of Registrar. To inspect documents. And require production of deeds under covenant.
- (2.) [He may mark or stamp any instrument produced to him with a memorandum indicating such production and the number distinguishing the application in reference whereto the same was produced.]
- (2. 3.) He may summon any such proprietor mortgagee or other person [making application or interested in the subject of any application or dealing] as aforesaid to appear [before the Registrar General or any Examiner of Titles at the Registrar General's Office] and give any explanation. To summon and examine witness.

explanation respecting such land or the instruments affecting the title thereto and if upon requisition in writing made by the Registrar General such proprietor mortgagee or other person refuses or neglects to produce any such instrument or to allow the same to be inspected or refuses or neglects to give any explanation which he is hereinbefore required to give or knowingly misleads or deceives any person hereinbefore authorized to demand any such explanation he shall for each such offence incur a penalty not exceeding one hundred pounds and the Registrar General if the instrument or information so withheld appears to him material shall not be bound to proceed with the bringing of such land under the provisions of this Act or with the registration of such transfer or other dealing or with the issuing of such registration abstract as the case may be.

To administer oaths.
To correct errors.

- (3. 4.) He may administer oaths or may take a statutory declaration in lieu of administering an oath.
(4. 5.) He may upon such evidence as shall appear to him and the Land Titles Commissioners sufficient in that behalf [so far as practicable without prejudicing the rights conferred by this Act upon transferees for value] correct errors in certificates of title or in the Register Book or in entries made therein respectively and may supply entries omitted to be made under the provisions of this Act Provided always that in the correction of any such error he shall not erase or render illegible the original words and shall affix the date on which such correction was made or entry supplied with his initials and every certificate of title so corrected and every entry so corrected or supplied shall have the like validity and effect as if such error had not been made or such entry omitted ~~except as regards any entry made in the Register Book prior to the actual time of correcting the error or supplying the omitted entry.~~

To enter caveats.

- (5. 6.) He may enter caveat on behalf of any person who shall be under the disability of infancy coverture lunacy unsoundness of mind or absence from the Colony or on behalf of Her Majesty Her Heirs or Successors to prohibit the transfer or dealing with any land belonging or supposed to belong to any such persons as hereinbefore mentioned and also to prohibit the dealing with any land in any case in which it shall appear to him that an error has been made by misdescription of such land or otherwise in any certificate of title or other instrument or for the prevention of any fraud or improper dealing.

PART II.—*Procedure in bringing Land under the provisions of this Act.*

Land alienated in fee from the Crown after this Act to be subject to its provisions.

12. All waste lands and all lands set apart for public purposes remaining unalienated from the Crown on the day on which this Act shall come into operation shall when alienated in fee be subject to the provisions of this Act The grants of such land shall be in duplicate [and the registration of one part thereof although the same may not be bound up in the Register Book until afterwards shall be deemed an enrolment of record of such grant and such enrolment shall relate back to the day of the date of the grant and the other part of the grant when marked in the manner required by the thirty-fourth section of this Act shall be sufficient evidence of a duly enrolled grant of the land therein described to the person therein named on the day of the date of such other part] and every such grant in addition to proper words of description shall contain a diagram of the land thereby granted on such scale as the Governor with the advice aforesaid may from time to time direct and shall be delivered to the Registrar General who shall register the same in manner hereinafter directed.

Lands granted prior to this Act may be brought under its operation.

13. Land alienated from the Crown in fee prior to the day on which this Act shall come into operation (whether such land shall constitute the whole or only part of the land included in any grant) may be brought under the provisions of this Act in the following manner that is to say—The Registrar General shall receive applications in form A of the Schedule hereto if made by any of the following persons:—

By any person claiming to be the person in whom the fee simple is vested in possession either at law or in equity [or claiming a power of disposition over the fee simple] Provided that wherever trustees seised in fee simple have no express power to sell the land which they may seek to bring under the operation of this Act the person claiming to be beneficially entitled for the first life estate or other greater estate than a life estate in the said land shall join in such application.

By any person claiming a life estate in possession or a leasehold for a life or lives or having a term of not less than twenty-five years then current. Provided that except in the case of an application by a lessee as regards the concurrence of his lessor all persons claiming to be beneficially entitled in reversion or remainder shall join in such application.

Undivided share and mortgaged lands may not be brought under Act except conditions.

Provided always that no such application shall be received from any person claiming to be entitled to an undivided share of any land unless the [each] person who shall appear to be entitled to the [any] other undivided share of the said land shall join in such application with a view to bringing the entirety under the provisions of this Act nor from the mortgagor of any land unless the mortgagee shall join in such application nor from the mortgagee of any land except in the exercise of a power of sale contained in the mortgage deed nor for any land subject to the lien of any judgment or execution creditor unless such creditor shall consent to such application [affected by caveat issued in pursuance of any writ of execution as hereinafter provided unless in furtherance thereof] nor from a married woman [otherwise than in the exercise of a power of sole appointment] unless her husband shall join in such application [and she be also separately examined as hereinafter provided] Provided also that the father or if the father be dead the mother or other guardian of any infant or the committee or guardian of any lunatic or person of unsound mind may make such application in the name of such infant lunatic or person of unsound mind.

Applicant to surrender instruments of title and to furnish abstract if required.

14. Every such applicant shall when making his application deposit with the Registrar General all instruments in his possession or under his control constituting or in any way affecting his title and in the case of a leasehold a duplicate or certified copy of the lease and of any other instrument under which the applicant claims title and shall furnish a schedule of such instruments and also if required an abstract of his title and shall in his application state the nature of his estate or interest and of every estate or interest held therein by any other person whether at law or in equity in possession or in futurity or expectancy and whether

whether the land be occupied or unoccupied and if occupied the name and description of the occupant and the nature of his occupancy and whether such occupancy be adverse or otherwise and shall state the names and addresses of the occupants and proprietors of all lands contiguous to the land in respect to which application is made so far as known to him and that the schedule so furnished includes all instruments of title to such land in his possession or under his control and shall make and subscribe a declaration to the truth of such statement and such applicant may if he think fit in his application require the Registrar General at the expense of such applicant to cause personal notice of his application to be served upon any person whose name and address shall for that purpose be therein stated.

15. Upon the receipt of such application the Registrar General shall cause the title of the applicant to be examined and reported upon by the Examiners and shall thereafter refer the case to the Lands Titles Commissioners for their consideration and if it shall appear to such Commissioners that the applicant proprietor is the original grantee from the Crown of the land in respect to which application is made and that no sale mortgage or other encumbrance or transaction affecting the title of such land has at any time been registered in the Colony and that such applicant has not required notice of his application to be served personally upon any person then in such case it shall be lawful for the Commissioners to direct the Registrar General to bring such land under the provisions of this Act forthwith by issuing to the applicant proprietor or to such person as he or [if thereunto duly authorized] the person applying in his behalf may by writing under his hand direct a certificate of the title for the same as hereinafter described [And in every case in which the applicant shall be entitled to dispose of the land by appointment such direction in writing shall operate as a valid appointment for the purpose of giving effect to such direction notwithstanding the omission of any sealing or special mode of attestation or other formality prescribed by the power.]

Application how to be dealt with. When applicant is original grantee and no transactions registered.

*[15A. After an application shall have been made to have any land brought under the provisions of this Act a Judge of the Supreme Court may require all persons having any deeds or instruments of title relating to or affecting the subject of such application (whether liable to be summoned by the Registrar General under the powers conferred on him by this Act or not) to produce the same at the Registry Office to the Registrar General or an Examiner of Titles for inspection and perusal on such terms and subject to such conditions and for such charge or fee as the Judge making such order shall think just and shall fix. And all applications to be made to a Judge under this provision may be made by summons in Chambers by the applicant proprietor or by the person to whom he shall have directed a certificate of title to be issued. And disobedience of any such order shall be punishable by attachment as for a contempt of Court and any damage sustained in consequence thereof shall be recoverable in an action at law by the person sustaining the same.]

Judge may order production of deeds to Registrar General or Examiners.

[15B. It shall be lawful for the Judge making any such order as aforesaid to revoke or amend the same at any time in case the person upon whom such order is made shall satisfy the Judge of the existence of any objection to a compliance therewith which would be valid on the trial of an issue in any Court of law or equity touching the same matter. And it shall be lawful for any such Judge on the like grounds or on the ground of exceeding the limit of the authority hereinbefore conferred to set aside any summons issued by the Registrar General for the appearance of any witness or production of any deed or writing. And in every such case the costs of all the proceedings connected therewith shall be in the discretion of the Judge and payable as he shall direct by any or either of the parties thereto.]

Judge may revoke order or set aside summons of Registrar General on cause shown.

16. If it shall appear to the satisfaction of the Commissioners that the land in respect to which application has been made is held by the applicant for the estate or interest described in such application free from mortgage encumbrance or other beneficial interest affecting the title thereto or if any such mortgage encumbrance or interest remain unsatisfied that the parties interested therein are also parties to such application and that the applicant has not required notice of his application to be served personally on any person then and in any such case the Commissioners shall direct the Registrar General to cause notice of such application to be advertised once in the *Gazette* and ~~three times~~ [once at least] in at least one daily newspaper published in Sydney and shall further limit and appoint a time not less than ~~one month~~ [fourteen days] nor more than twelve months from the date of the advertisement in the *Gazette* upon or after the expiration of which the Registrar General shall unless he shall in the interval have received a caveat forbidding him so to do proceed to bring such land under the provisions of this Act.

When applicant is not original grantee or any transactions registered.

17. If it shall appear to the satisfaction of the Commissioners that any parties interested in any unsatisfied mortgage or encumbrance affecting the title to such land or beneficially interested therein are not parties to such application or that the evidence of title set forth by the applicant is imperfect or that the applicant has required notice of his application to be served personally upon any person then and in such case it shall be lawful for the Commissioners to [may] reject such application altogether or at their discretion to [may] direct the Registrar General to cause notice of such application to be served in accordance with such requirement upon all persons who shall appear to them to have any interest in the land which is the subject of such application and to be advertised three times in at least one daily newspaper published in Sydney and in such newspapers published elsewhere as to such Commissioners may seem fit and to be published in the *Government Gazette* and in the *London Gazette* and in the official *Gazettes* of each of the Colonies of Victoria South Australia Queensland Tasmania and New Zealand or in any one or more of such *Gazettes* and the Commissioners shall specify the number of times and at what intervals such advertisements shall be published in each or any of such *Gazettes* and shall also limit and appoint a time not less than two months nor more than two years from the date of the first of such advertisements in the *Gazette* upon or after the expiration of which it shall be lawful for the Registrar General to bring such land under the provisions of this Act unless he shall in the interval have received a caveat forbidding him to do so.

When evidence of title is imperfect.

18.

* It is thought more convenient thus to number additional sections at present. When the Bill is finally prepared for submission to the Legislature all the sections will of course be placed in consecutive numbers.

Notice of application to be published.

18. The Registrar General shall under such direction as aforesaid or under any order of the Supreme Court cause notice to be published in such manner as by such direction or order may be prescribed that application has been made for bringing the land therein referred to under the provisions of this Act and shall also cause copy of such notice to be posted in a conspicuous place in his office and in such other places as he may deem necessary and shall forward by registered letter marked outside "Lands Titles Office" through the post office copy of such notice addressed to the persons if any whom the Commissioners shall have directed to be served with such notice and to the persons if any stated in the declaration by the applicant proprietor to be in occupation of such land [otherwise than as weekly tenants] or to be occupiers or proprietors of land contiguous thereto so far as his knowledge of the addresses of such persons may enable him and in case such applicant shall have required any such notice to be personally served upon any person named in his application then and in such case the Registrar General shall cause copy of such notice to be so served upon such person.

Land brought under Act.

19. If within the time limited in such direction or under any order of the Supreme Court any notice forwarded by registered letter as aforesaid shall not be returned to him by the Postmaster General and if within the time so limited he shall not have received a caveat as hereinafter described forbidding him so to do and in any case in which personal notice may be required as aforesaid if he shall have received proof to his satisfaction that such notice has been served the Registrar General shall pursuant to such direction of the Commissioners bring the land described in such application under the provisions of this Act by issuing to the applicant proprietor or to such person as he or [if thereunto authorized as aforesaid] the person applying in his behalf may by any writing under his hand direct a certificate of title for the same as hereinafter described.

Postmaster General to return notices on failure of service without delay.

20. ~~The Registrar General whenever any letter containing any notice shall be returned to him by the Postmaster~~ [The Postmaster General shall cause any such registered letter which shall not be delivered in due course to be returned to the Registrar General as soon as practicable after failure in such delivery without any such intervening delays and notifications as are or may be required by any law or regulation applicable in other cases And whenever any such letter shall be so returned the Registrar] General shall refer the case to the Commissioners for their further direction and whenever he shall be made aware that any notice required by any applicant to be served personally has failed to be or cannot be so served he shall notify the same to such applicant who if he think fit may by writing under his hand withdraw such requirement and the Registrar General shall thereupon report the case to the Commissioners who in either such case may reject the application altogether or direct the Registrar General to bring the land therein described under the provisions of this Act forthwith or after such further interval of notification or advertisement as they may deem fit.

On a return of notices or failure of personal service Registrar General to apply to Commissioners.

Parties interested may enter caveat.

21. Any person having or claiming an interest in any land so advertised as aforesaid or the attorney of any such person may within the time by any direction of the Commissioners for that purpose limited lodge a caveat with the Registrar General in form B of the Schedule hereto forbidding the bringing of such land under the provisions of this Act and every such caveat shall particularise the estate interest lien or charge claimed by the person lodging the same and the person lodging such caveat shall if required deliver a full and complete abstract of his title.

If caveat be received within time limited proceedings stayed.

22. The Registrar General upon receipt of any such caveat within the time limited as aforesaid shall notify the same to such applicant proprietor and shall suspend further action in the matter and the lands in respect of which such caveat may have been lodged shall not be brought under the provisions of this Act until such caveat shall have been withdrawn or shall have lapsed from any of the causes hereinafter provided or until a decision shall have been obtained from the Court having jurisdiction in the matter.

Caveats lapse unless proceedings taken within three months.

23. After the expiration of three months from the receipt thereof every such caveat shall be deemed to have lapsed unless the person by whom or on whose behalf the same was lodged shall within that time have taken proceedings in any [some] Court of competent jurisdiction to establish his title to the estate interest lien or charge therein specified and shall have given written notice thereof to the Registrar General or shall have obtained from the Supreme Court an order or injunction restraining the Registrar General from bringing the land therein referred to under the provisions of this Act [And during the said period of three months it shall be lawful either for the caveator or for any person interested in maintaining the application against which the caveat shall have been lodged respectively to apply to the Supreme Court or to a Judge thereof for a summons to the other party to show cause why the caveat shall not be further continued or be wholly removed as the same may be And it shall be lawful for such Court or Judge to make such order in the premises as with reference to the claim of the caveator and the time required for obtaining with due diligence an adjudication thereon by a competent Court shall seem just And if by such Order the caveat shall be continued in force beyond the said period of three months it shall at any time and from time to time thereafter be lawful for either party to apply to the said Court or Judge either for an additional continuance or a removal thereof respectively And for the said Court or Judge to make such further order in the premises as shall appear to be just And the costs of all such applications shall be in the discretion of such Court or Judge and paid by such of the parties as by any such order as aforesaid shall be determined And in the event of any caveat being wholly removed by such order such removal shall have the like effect in extinguishing any claim of the caveator as if such caveat had been withdrawn or had lapsed.]

Caveat may be removed or extended by order of a Judge.

Qualified certificates issuable in certain cases.

[23A. If it appear to the Commissioners that the evidence of title set forth by the applicant is satisfactory in all respects other than certain particulars admitting of exception or reservation and the applicant shall be willing to accept a certificate qualified in regard to such particulars it shall be lawful for the Commissioners to direct the Registrar General to grant such certificate accordingly and thereupon to specify or define any exception qualification or condition affecting the whole of the interests registered or any of them and also to reserve expressly the right of any person or class of persons and to describe any outstanding right or possibility of claim or interest subject to which such registration is made and if there be any disputed question of boundary between the applicant and any proprietor of adjoining land which shall not have been determined by any competent authority it shall be competent either for the applicant or any such proprietor of adjoining land to object to the determination of such question by the

the Commissioners and if any such objection shall be made the Registrar General shall specify upon the certificate of title the existence of such disputed question of title and that the registration is subject thereto.]

[23B. It shall be lawful for the holder of any qualified certificate which shall be issued under the next preceding section to make application at any future time for the removal of the qualification and if such application be grounded on the happening of any subsequent event or producing of sufficient evidence of any fact which if the same had happened or been established before the issuing of the certificate would have rendered the qualification inapplicable then such application may be made upon payment of an office fee of *ten shillings* to the Registrar General who may if satisfied as to the grounds of the application either cancel the qualification by a memorandum on the existing certificate or issue upon a surrender thereof a new and unqualified certificate. But if the application be grounded on any question of law or fact which any adverse claimant may be interested in disputing the same shall be made to a Judge of the Supreme Court who may if he see fit grant a rule to shew cause before the said Court why such qualification shall not be cancelled and such rule shall be served upon the Registrar General and such other parties as the Judge shall direct and after such hearing and upon such evidence as shall be satisfactory to the said Court it shall be lawful for the said Court to make such order in the premises as shall appear to be just and such order shall be sufficient authority to the Registrar General to make such alterations in the certificate or issue such new certificate as may thereby be directed and the said Court may if it see fit direct any issue of fact to be tried in relation to the application and all costs attendant on the application and upon any proceedings arising thereunder shall be paid by the applicant unless or so far as the said Court shall direct that the same or any part thereof be paid by any other person.]

Qualification may be removed afterwards on cause shewn.

24. Any applicant proprietor may withdraw his application at any time prior to the issuing of the certificate of title and the Registrar General shall in such case upon request in writing signed by such applicant proprietor return to him or to the person if any notified in such application as having a lien upon such instruments the abstract and all instruments of title deposited by such proprietor for the purpose of supporting his application.

Applicant proprietor may withdraw his application.

25. Upon issuing a certificate of title bringing land under the provisions of this Act the Registrar General shall stamp as cancelled every instrument of title deposited by the proprietor when making his application and in case of a leasehold shall indorse upon the lease so deposited a memorandum stating that such lease has been brought under the provisions of this Act and shall certify such memorandum under his hand and seal and shall return such lease to the applicant annexing thereto the certificate of title as aforesaid and shall file in his office the duplicate or certificate [certified] copy of such lease hereinbefore directed to be furnished by such applicant. Provided that if any such instrument [or any instrument produced in support of any application] shall relate to or include any property whether personal or real other than the land included in such certificate of title then the Registrar General shall indorse thereon [or on the last in order of such instruments as he shall see fit] a memorandum cancelling the same in so far only as relates to the land included in such certificate of title and shall return such instrument to such proprietor otherwise he shall retain the same in his office and no person shall be entitled to the production of such instrument so stamped except upon the written order of the applicant proprietor or of some person claiming through or under him or upon the order of a Judge of the Supreme Court.

Instruments of title how to be dealt with.

[25A. Instruments which have been or shall be retained under the preceding section shall be deemed deeds or documents deposited within the meaning of the twenty-fifth section of the Titles to Land Act of 1858.]

Instruments retained under this Act to satisfy 22 Vic. No. 1 s. 25.

[25B. No such cancellation of any instrument whether wholly or partially shall operate as an extinguishment of any covenant for title therein contained nor shall the protection against loss derived under this Act by the covenantee or any person claiming under him be any valid defence to an action for such damages as but for such protection he would have sustained. And such action may be maintained either in the name of the covenantee or the person claiming under him or in the name of the Registrar General. And in either case for the purpose of relieving the assurance fund to the extent of the damages recoverable thereunder from any loss consequent on the defect of title to which the covenant is applicable notwithstanding that such loss shall result from compensation to the person whose right of action is barred by this Act and not directly to the covenantee or any person claiming under him. And the bringing of land under this Act shall not in any case operate to release any bond of indemnity or guarantee affecting the title thereto but the same may if deposited with the Registrar General be enforced in like manner in aid of the assurance fund as hereinbefore is provided in respect to covenants.]

Covenants for title to remain in force for protection of the assurance fund.

26. In case an applicant proprietor or the person to whom an applicant proprietor may have directed certificate of title to be issued shall die in the interval between the date of his application and the date appointed for the certificate of title to issue in accordance with the provisions hereinbefore contained the certificate of title shall be issued in the name of such applicant proprietor or in the name of the person to whom he may have directed it to be issued as the case may require and such land shall devolve in like manner as if the certificate of title had been issued prior to the death of such applicant proprietor or person so named by him.

How certificate of title to issue in case of previous death of applicant.

27. Upon the first bringing of land under the provisions of this Act whether by the alienation thereof in fee from the Crown or consequent upon the application of the proprietor as hereinbefore provided and also upon the registration of the title to an estate of freehold in possession in land under the provisions of this Act derived through the will or intestacy of a previous proprietor or under any settlement there shall be paid to the Registrar General the sum specified in the Schedule hereto marked P and in the case of land brought under the provisions of this Act by alienation in fee from the Crown the price paid for such land shall be deemed and taken to be the value thereof for the purpose of levying such sum and in all other cases as aforesaid such value shall be ascertained by the oath or solemn affirmation [declaration] of the applicant proprietor or person deriving such land by transmission. Provided always that

Per centage in the pound to be levied for assurance of title.

that if the Registrar General shall not be satisfied as to the correctness of the value so declared or sworn to it shall be lawful for him to require such applicant proprietor or person deriving such land to produce a certificate of such value under the hand of a sworn valuator ~~which~~ [whose fee shall be paid by the applicant and whose] certificate shall be received as conclusive evidence of such value for the purpose aforesaid.

[27A. Whenever the title of any applicant shall be imperfect only in particulars involving no greater risk than may be reasonably met by an addition to the ordinary amount of assurance fee it shall be lawful for the Commissioners instead of rejecting the application or noting any contingent or doubtful claim on the certificate to require as a condition or compliance with such application the payment of such amount in addition to the assurance fee specified in Schedule P as they shall consider just and it shall in that case be at the option of the applicant either to pay the amount so required or to withdraw his application.]

28. All sums of money so received shall be paid to the Colonial Treasurer who shall from time to time invest such sums together with all interest and profits which may have accrued thereon in New South Wales Government securities to constitute an Assurance Fund for the purposes hereinafter provided.

29. The bringing of land under the provisions of this Act shall not be held to extinguish the reversion expectant on any lease [in the reversion expectant thereon] and the person named in any certificate of title as entitled to the land therein described shall be held in every Court of Law and Equity to be seised of the reversion expectant upon any lease that may be noted by memorial thereon and to have all powers rights and remedies to which a reversioner is by law entitled and shall be subject to all covenants and conditions therein expressed to be performed on the part of the lessor.

PART III.—Register Book—Mode of Registering and effect of Registration.

30. The Registrar General shall keep a book to be called the "Register Book" and shall bind up therein the duplicates of all grants and of all certificates of title and each grant and certificate of title shall constitute a separate folium of such book and the Registrar General shall record thereon the particulars of all instruments dealings and other matters by this Act required to be registered or entered on the Register Book affecting the land included under each such grant or certificate of title distinct and apart.

31. Every certificate of title shall be in duplicate in the form C of the Schedule hereto and shall set forth the nature of the estate of freehold in respect to which it is issued and the Registrar General shall note thereon in such manner as to preserve their priority the particulars of all unsatisfied mortgages or other encumbrances and of any dower lease or rent charge to which the land may be subject and if such certificate of title be issued to a minor or to a person otherwise under disabilities he shall state the age of such minor or the nature of the disability so far as known to him and shall cause one original of each certificate of title to be bound up in the Register Book and deliver the other to the proprietor entitled to the land described therein.

32. Before bringing under the provisions of this Act an estate in fee simple or in fee tail in any land in respect to which a certificate of title has been issued for any leasehold estate or interest the Registrar General shall ~~else~~ [enter upon] the folium of the Register Book constituted by the certificate of title of such leasehold and shall ~~carry forward upon~~ [a reference to the folium of] the certificate of title issued in respect to such estate in fee [and shall enter upon such last-mentioned certificate and folium a] memorials of such leasehold estate or interest and of all mortgages or other interests affecting the same then registered and still current and the memorials of all future dealings with such leasehold estate or interest hereinafter directed to be registered shall be entered upon the folium of the Register Book constituted by the certificate of title representing the fee [a like reference shall be entered on the duplicate certificate of such leasehold whenever produced for the purpose and shall be continued in all future certificates or memorials affecting the same hereby directed to be registered.]

33. Every certificate of title duly authenticated under the hand and seal of the Registrar General shall be received in all Courts of Law and Equity as evidence of the particulars therein set forth and of their being entered in the Register Book and shall [except in the cases hereinafter expressly excepted] be conclusive evidence that the person named in such certificate of title or in any entry thereon as seised of or as taking estate or interest in the land therein described is seised or possessed of or entitled to such land for the estate or interest therein specified and that the property comprised in such certificate of title has been duly brought under the provisions of this Act and no certificate of title shall be impeached or defeasible on the ground of want of notice or of insufficient notice of the application to bring the land therein described under the provisions of this Act or on account of any error omission or informality in such application or in the proceedings pursuant thereto by the Commissioners or by the Registrar General [nor shall the same be so impeached or defeasible to the prejudice of any *bonâ fide* transferee for value on account of any fraud error or omission in such application.]

34. Every land grant and certificate of title shall be deemed and taken to be registered under the provisions and for the purposes of this Act so soon as the same shall have been marked by the Registrar General with the folium and volume as embodied in the Register Book and every memorandum of transfer or other instrument purporting to transfer or in any way to affect land under the provisions of this Act shall be deemed to be so registered so soon as a memorial thereof as hereinafter described shall have been entered in the Register Book upon the folium constituted by the existing grant or certificate of title of such land and the person named in any grant certificate of title or other instrument so registered as seised of or taking any estate or interest shall be deemed to be the registered proprietor thereof.

35. Except as in hereafter otherwise provided every grant or other instrument presented for registration shall be in duplicate and shall unless a Crown grant be attested by a witness and shall be registered in the order of time in which the same is produced for that purpose and instruments registered in respect to or affecting the same estate or interest shall notwithstanding any express implied or constructive notice be entitled in priority the one over the other according to the date of registration and not according to the date of each instrument itself and the Registrar General upon registration thereof shall file one original in his office and shall deliver the other to the person entitled thereto and so soon as registered every instrument drawn in any of the several forms provided in the Schedule hereto or in any form which for the same purpose may be authorized in conformity with the provisions of this Act shall for the purposes of this Act be deemed and taken to be embodied in the Register Book as part and parcel thereof and such instrument

when

Special assurance fees chargeable in certain cases.

Moneys levied to form assurance fund.

Reversion expectant on lease not to be extinguished.

Registrar General to keep register book.

Certificate of title to be in duplicate and bound up in register.

If issued to person under disability such disability to be stated.

Registration where certificate of leasehold issued.

Certificate to be conclusive evidence of title and that the land has been duly brought under the Act.

Grants and certificates of title registered when embodied in Register Book.

Instruments registered when memorial entered in Register Book.

Definition of registered proprietor.

Instruments to be in duplicate.

Instruments entitled to priority according to date of registration.

And when registered to be deemed embodied in Register Book and to have the effect of a deed.

when so constructively embodied and stamped with the seal of the Registrar General shall have the effect of a deed duly executed by the parties signing the same.

36. In every instrument creating or transferring any estate or interest in land under the provisions of this Act there shall be implied the following covenant by the party creating or transferring such estate or interest that is to say That he will do such acts and execute such instruments as in accordance with the provisions of this Act may be necessary to give effect to all covenants conditions and purposes expressly set forth in such instrument or by this Act declared to be implied against such party in instruments of a like nature.

General covenants to be implied in instruments.

37. Every memorial entered in the Register Book shall state the nature of the instrument to which it relates the day and hour of the production of such instrument for registration the names of the parties thereto and shall refer by number or symbol to such instrument and shall be signed by the Registrar General.

Memorial defined.

38. Whenever a memorial of any instrument has been entered in the Register Book the Registrar General shall except in the case of transfer or other dealing indorsed upon any grant certificate or other instrument as hereinafter provided record the like memorial on the duplicate grant certificate or other instrument evidencing title to the estate or interest intended to be dealt with or in any way affected unless the Registrar General shall as hereinafter provided dispense with the production of the same and the Registrar General shall indorse on every instrument so registered a certificate of the date and hour on which the said memorial was entered in the Register Book and shall authenticate each such certificate by signing his name and affixing his seal thereto and such certificate shall be received in all Courts of Law and Equity as conclusive evidence that such instrument has been duly registered.

Memorial to be recorded on duplicate grant or other instrument.

39. No instrument until registered in manner hereinbefore prescribed shall be effectual to pass any estate or interest in any land under the provisions of this Act or to render such land liable as security for the payment of money but upon the registration of any instrument in manner hereinbefore prescribed the estate or interest specified in such instrument shall pass or as the case may be the land shall become liable as security in manner and subject to the covenants conditions and contingencies set forth and specified in such instrument or by this Act declared to be implied in instruments of a like nature and should two or more instruments executed by the same proprietor and purporting to transfer or encumber the same estate or interest in any land be at the same time presented to the Registrar General for registration and indorsement he shall register and indorse that instrument under which the person claims property who shall present to him the grant or certificate of title of such land for that purpose.

Certificate of registration to be evidence.
Instruments not effectual until entry in Register Book.

[39A. The land included in any certificate of title registered instrument or entry on the register shall by implication and without any special mention be deemed to be subject to any subsisting reservations exceptions conditions and powers contained in the original grant thereof from the Crown also to any right of way or other easement howsoever created also to any unpaid municipal road water or other rates or taxes affecting such land and to any conditions now or hereafter to be imposed by law for the alignment of streets.]

Certain incidents of to be applied in certificates.

40. Notwithstanding the existence in any other person of any estate or interest whether derived by grant from the Crown or otherwise which but for this Act might be held to be paramount or have priority the registered proprietor of land or of any estate or interest in land under the provisions of this Act shall except in case of fraud [wherein he shall have participated or colluded] hold the same subject [in addition to the incidents implied by virtue of the next preceding section] to such encumbrances liens estates or interests as may be notified on the folium of the Register Book constituted by the grant or certificate of title of such land but absolutely free from all other encumbrances liens estates or interests whatsoever except the estate or interest of a proprietor claiming the same land under a prior certificate of title or under a prior grant registered under the provisions of this Act and except as regards the omission or misdescription of any right of way or other easement created in or existing upon any land and except so far as regards any portion of land that may by wrong description of parcels or of boundaries be included in the grant certificate of title lease or other instrument evidencing the title of such registered proprietor not being a purchaser or mortgagee thereof for value or deriving from or through a purchaser or mortgagee thereof for value [and except the estate or interest of a proprietor claiming the same land under a prior certificate of title or under a prior grant registered under the provisions of this Act and which priority shall in favor of any person in possession of land be computed with reference to the grant or earliest certificate of title under which he or any person through whom he derives title shall have held such possession notwithstanding the surrender of such grant or certificate in exchange for a new certificate upon any transfer or dealing.]

Estate of registered proprietor [how far] paramount.

41. The Registrar General shall not register any instrument purporting to transfer or otherwise to deal with or affect any estate or interest in land under the provisions of this Act except in the manner herein provided nor unless such instrument be in accordance with the provisions hereof.

Instruments not to be registered unless in accordance with prescribed forms.

[41A. Before the delivery of any duplicate grant or of any certificate of title a receipt for it in the handwriting of the proprietor or person entitled to the land therein mentioned shall be required to be signed by him when practicable (so as to prevent as far as may be personation) and this enactment shall also extend to requiring when practicable the signature of any transferee lessee mortgagee or encumbrancee of any transfer lease memorandum of mortgage or of encumbrance.]

Receipts may be required for duplicate grants and certificates.

[41B. No instrument affecting land of which any person shall be registered as proprietor under this Act or any memorial of any such instrument shall be registered under any Act passed by the Legislature of New South Wales concerning the registration of instruments relating to or in any manner affecting land and if such registration be made the same shall have no effect and every such Act so far as it relates to any land which shall be under the provisions of the *Real Property Act* shall be and is hereby repealed and if registered shall have no effect.]

Previous registration Acts repealed so far as relates to land under the *Real Property Act*.

PART IV.

PART IV.—Dealings.

- Transfer.** 42. When land under the provisions of this Act or any estate or interest in such land is intended to be transferred or any right of way or other easement is intended to be created or transferred the registered proprietor may execute a memorandum of transfer in form D or E of the Schedule hereto which memorandum shall for description of the land intended to be dealt with refer to the grant or certificate of title of such land or shall give such description as may be sufficient to identify the same and shall contain an accurate statement of the estate interest or easement intended to be transferred or created and a memorandum of all leases mortgages and other encumbrances to which the same may be subject and such memorandum of transfer if it purports to deal with an estate in respect to which a certificate of title is by this Act authorized to be issued or if it be indorsed on the instrument evidencing the title of the transferee need not be in duplicate.
- Easements and incorporeal rights to be registered.** 43. Whenever any easement or any incorporeal right ~~other than an annuity or rent charge~~ in or over any land under the provisions of this Act is created for the purpose of being annexed to or used and enjoyed together with other land under the provisions of this Act the Registrar General shall enter a memorial of the instrument creating such easement or incorporeal right upon the folium of the Register Book constituted by the existing grant or certificate of title of such other land.
- If estate of freehold be transferred certificate of title to be delivered up and cancelled so far as regards the land transferred.** 44. If the memorandum of transfer purports to transfer an estate of freehold in possession in the whole or in part of the land mentioned in any grant or certificate of title the transferee shall deliver up the grant or certificate of title of the said land and the Registrar General shall after registering the transfer enter on such grant or certificate of title a memorandum cancelling the same either wholly or partially according as the memorandum of transfer purports to transfer the whole or part only of the land mentioned in such grant or certificate of title and setting forth the particulars of the transfer.
- Fresh certificate to be issued to purchaser.** 45. The Registrar General upon cancelling any grant or certificate of title either wholly or partially pursuant to any such transfer shall make out to the transferee a certificate of title to the land mentioned in such memorandum of transfer and every such certificate of title shall refer [if practicable] to the original grant of such land and to the memorandum or other instrument of transfer and the Registrar General shall retain every such memorandum of transfer and cancelled or partially cancelled grant or certificate of title and whenever required thereto by the proprietor of an unsold portion or balance of land included in any such partially cancelled grant or certificate of title or by a registered transferee of such portion or of any part thereof shall make out to such proprietor or transferee a certificate of title for such portion or for any part thereof of which he is the proprietor or transferee.
- A certificate for any untransferred portion to be issued to proprietor or to registered transferee.** 46. In every instrument transferring an estate or interest in land under the provisions of this Act subject to mortgage or encumbrance there shall be implied the following covenant by the transferee that is to say that such transferee will pay the interest or annuity or rent charge secured by such mortgage or encumbrance after the rate and at the times specified in the instrument creating the same and will indemnify and keep harmless the transferee from and against the principal sum [or other moneys] secured by such instrument and from and against all liability in respect of any of the covenants therein contained or by this Act implied on the part of the transferee.
- Transfer of mortgage and of encumbrance and of lease.** 47. Upon the registration of any transfer [of mortgage lease or encumbrance] the estate or interest of the transferee as set forth in such instrument with all rights powers and privileges thereto belonging or appertaining shall pass to the transferee and such transferee shall thereupon become subject to and liable for all and every the same requirements and liabilities to which he would have been subject and liable if named in such instrument originally as mortgagee encumbrancee or lessee of such land estate or interest.
- Transfer of mortgage or lease transfers right to sue.** 48. By virtue of every such transfer the right to sue upon any memorandum of mortgage or other instrument and to recover any debt sum of money annuity or damages thereunder (notwithstanding the same may be deemed or held to constitute a chose in action) and all interests [subsisting at the time of transfer] in any such debt sum of money annuity or damages shall be transferred so as to vest the same at law as well as in equity in the transferee thereof Provided always that nothing herein contained shall prevent a Court of Equity from giving effect to any trusts affecting the said debt sum of money annuity or damages in case the transferee shall hold the same as a trustee for any other person.
- Saving to Courts of Equity as to trusts.** 49. When any land under the provision of this Act is intended to be leased or demised for a life or lives or for any term of years exceeding three years the proprietor shall execute a memorandum of lease in form F of the Schedule hereto and every such instrument shall for description of the land intended to be dealt with refer to the grant or certificate of title of the land or shall give such other description as may be necessary to identify such land and a right for or covenant by the lessee to purchase the land therein described may be stipulated in such instrument and in case the lessee shall pay the purchase money stipulated and otherwise observe his covenants expressed and implied in such instrument the lessor shall be bound to execute a memorandum of transfer to such lessee of the said land and the fee simple thereof and to perform all necessary acts by this Act prescribed for the purpose of transferring to a purchaser the said land and the fee simple thereof Provided always that no lease of mortgaged or encumbered land shall be valid and binding against the mortgagee or encumbrancee unless such mortgagee or encumbrancee shall have consented to such lease prior to the same being registered.
- Lands under the provisions of this Act—how leased.** 50. Whenever any lease or demise which is required to be registered by the provisions of this Act is intended to be surrendered and the surrender thereof is effected otherwise than through the operation of a surrender in law or than under the provisions of any law at the time being in force in the Colony relating to insolvent estates there shall be indorsed upon such lease or on the counterpart thereof the word "surrendered" with the date of such surrender and such endorsement shall be signed by the lessee and by the lessor as evidence of the acceptance thereof and shall be attested by a witness and the Registrar General thereupon shall enter in the register book a memorandum recording the date of such surrender and shall likewise indorse upon the lease a memorandum recording the fact of such entry having been made in the register book and upon such entry having been so made in the register book the estate or interest of the lessee in such land shall revert in the lessor or in the person in whom having regard to intervening circumstances (if any) the said land would have vested if no such lease had ever been executed and production of such lease or counterpart bearing such indorsement and memorandum shall be sufficient evidence that such lease had been so surrendered Provided that no lease subject to mortgage or encumbrance shall be so surrendered without the consent of the mortgagee or encumbrancee.
- Lease may be surrendered by indorsement by lessee with concurrence of lessor.**

51. In every memorandum of lease there shall be implied the following covenants against the lessee that is to say—

Covenants to be implied in every lease against the lessee.

- (1.) That he will pay the rent thereby reserved at the times therein mentioned and all rates and taxes which may be payable in respect of the demised property during the continuance of the lease.
- (2.) That he will at all times during the continuance of the said lease keep and at the determination thereof yield up the demised property in good and tenantable repair accidents and damage from fire storm and tempest and reasonable wear and tear excepted.

52. In every memorandum of lease there shall also be implied the following powers in the lessor that is to say—

Powers to be implied in lessor.

- (1.) That he may by himself or his agents twice in every year during the term at a reasonable time of the day upon giving to the lessee two days previous notice enter upon the demised property and view the state of repair thereof and may serve upon the lessee or leave at his last or usual place of abode in this Colony or upon the demised property a notice in writing of any defect requiring him within a reasonable time to be therein prescribed to repair the same.
- (2.) That in case the rent or any part thereof shall be in arrear for the space of ~~six~~ [one] calendar months or in case default shall be made in the fulfilment of any covenant whether expressed or implied in such lease on the part of the lessee and shall be continued for the space of ~~six~~ [one] calendar months or in case the repairs required by such notice as aforesaid shall not have been completed within the time therein specified it shall be lawful for such lessor to re-enter upon and take possession of such demised premises.

53. In any such case [in which a memorandum of lease shall be executed under this Act] the Registrar General upon proof to his satisfaction of lawful re-entry and recovery of possession by a lessor shall note the same by entry in the register book and the estate of the lessee in such land shall thereupon determine but without releasing him from his liability in respect of the breach of any covenant in such lease expressed or implied and the Registrar General shall cancel such lease if delivered up to him for that purpose.

Registrar General to note particulars of re-entry in register book.

54. Whenever any land or estate or interest in land under the provisions of this Act is intended to be charged or made security in favor of any mortgagee the mortgagor shall execute a memorandum of mortgage in form G of the Schedule hereto [or as near thereto as circumstances will admit] and whenever any such land estate or interest is intended to be charged with or made security for the payment of an annuity rent charge or sum of money in favor of any [other] encumbrancee the encumbrancer shall execute a memorandum of encumbrance in form H [1 or H 2] of the Schedule hereto [or one of them or as near thereto as circumstances will admit] and every such instrument shall contain an accurate statement of the estate or interest intended to be mortgaged or encumbered and shall for description of the land intended to be dealt with refer to the grant or certificate of title of the land in which such estate or interest is held or shall give such other description as may be necessary to identify such land together with a statement of all [prior] mortgages and other encumbrances affecting the same if any.

Lands under this Act how mortgaged or encumbered.

55. Mortgage and encumbrance under this Act shall have effect as security but shall not operate as a transfer of the land thereby charged and in case default be made in the payment of the principal sum interest annuity or rent charge or any part thereof thereby secured or in the observance of any covenant expressed in any memorandum of mortgage or of encumbrance registered under this Act or that is hereinafter declared to be implied in such instrument and such default be continued for the space of one calendar month or for such other period of time as may therein for that purpose be expressly limited the mortgagee or encumbrancee may give to the mortgagor or encumbrancer notice in writing to pay the money then due or owing on such memorandum of mortgage or of encumbrance or to observe the covenants therein expressed or implied as the case may be and that sale will be effected unless such default be remedied or may leave [and it shall be sufficient if] such notice [be left] on the mortgaged or encumbered land or [be left or addressed through the Post Office] at the usual or last known place of abode in the Colony of the mortgagor or encumbrancer or other person claiming to be then entitled to the said land or with his known agent.

Mortgage or encumbrance not to operate as transfer.

Procedure in case of default.

56. After such default in payment or in observance of covenants continuing for the further space of one calendar month from the service of such notice or for such other period as may in such instrument be for that purpose limited such mortgagee or encumbrancee [unless and except so far as restrained by the express terms of the registered memorandum of mortgage or encumbrance] is hereby authorized and empowered to sell the land so mortgaged or encumbered or any part thereof and all the estate and interest therein of the mortgagor or encumbrancer and either altogether or in lots by public auction or by private contract or both such modes of sale and subject to such conditions as he may think fit and to buy in and resell the same without being liable for any loss occasioned thereby and to make and execute all such instruments as shall be necessary for effecting the sale thereof all which sales contracts matters and things hereby authorized shall be as valid and effectual as if the mortgagor or encumbrancer had made done or executed the same and the receipt or receipts in writing of the mortgagee or encumbrancee shall be a sufficient discharge to the purchaser of such land estate or interest or of any portion thereof for so much of his purchase money as may be thereby expressed to be received and no such purchaser shall be answerable for the loss misapplication or non-application or be obliged to see to the application of the purchase money by him paid nor shall he be concerned to inquire as to the fact of any default or notice having been made or given as aforesaid [nor be affected by express notice to the contrary] and the purchase money to arise from the sale of any such land estate or interest shall be applied first in payment of the expenses occasioned by such sale secondly in payment of the moneys which may then be due or owing to the mortgagee or encumbrancee thirdly in payment of subsequent mortgages or encumbrances if any in the order of their priority and the surplus if any shall be paid to the mortgagor or encumbrancer as the case may be.

Power to sell.

Appropriation of proceeds.

57. Upon proof to his satisfaction by statutory declaration that such default has been made and continued as aforesaid [Unless prevented by sufficient caveat or judicial proceeding] the Registrar General shall register any memorandum or instrument of transfer executed by a mortgagee or encumbrancee for the purpose

Registrar General to give effect to sale by mortgagee or encumbrancee.

purpose of such sale as aforesaid [if the same shall contain in addition to the usual form of transfer an allegation to the effect that the sale had been made in conformity to the conditions of the memorandum of mortgage or encumbrance taken in connection with this Act in regard to default and notice] and upon such registration the estate or interest or the mortgagor or encumbrancer as therein described to be conveyed shall pass to and vest in the purchaser freed and discharged from all liability on account of such mortgage or encumbrance registered subsequent thereto and if such memorandum of transfer purports to pass an estate of freehold in possession not being a life leasehold the purchaser shall be entitled to receive a certificate of title for the same.

In case of default entry and possession or distress ejection or foreclosure.

58. The mortgagee or encumbrancee upon default in payment of the principal sum or any part thereof or of any interest annuity or rent charge [or other moneys] secured by any mortgage or encumbrance may enter into possession of the mortgaged or encumbered land by receiving [and make any lease or accept the surrender of any lease or tendency thereof and may receive] the rents and profits thereof or may distress upon the occupier or tenant of the said land under the power to distress hereinafter contained [in exercise of any power which the mortgagor or encumbrancer might otherwise have exercised] for the rent then due or may bring an action of ejection to recover the said land either before or after entering into the receipt of the rents and profits thereof or making any distress as aforesaid and either before or [the purchaser may exercise the like powers] after any sale of such land shall be effected under the power of sale given or implied in his memorandum of mortgage or of encumbrance in the same manner in which he might have made such entry or distress [might have been made] or [action] brought such action if the principal sum or annuity were secured to him by a conveyance of the legal estate in the land so mortgaged or encumbered [were vested in the mortgagee or encumbrancee] and any such registered mortgagee shall be entitled to foreclose the right of the mortgagor to redeem the said mortgaged or encumbered lands in manner hereinafter provided.

Notice by mortgagee to tenant to pay rent to him to suspend mortgagor's right as landlord. Mortgagee's receipts to be absolute discharges.

59. Whenever a mortgagee or encumbrancee shall give notice of his demanding to enter into receipt of the rents and profits of the mortgaged or encumbered land to the tenant or occupier or other person liable to pay or account for the rents and profits thereof all the powers and remedies of the mortgagor or encumbrancer in regard to receipt and recovery of and giving discharges for such rents and profits shall be suspended and transferred to the said mortgagee or encumbrancee until such notice be withdrawn or the mortgage or encumbrance shall be satisfied and a discharge thereof duly registered and in every such case the receipt in writing of the mortgagee or encumbrancee shall be a sufficient discharge for any rents and profits therein expressed to be received and no person paying the same shall be bound to inquire concerning any default or other circumstance affecting the right of the person giving such notice beyond the fact of his being duly registered as mortgagee or encumbrancee of the land. Provided that nothing herein contained shall interfere with the effect of any rule order or judgment of the Supreme Court in regard to the payment of rent under the special circumstances of any case nor shall prejudice any remedy of the mortgagor or encumbrancer against the mortgagee or encumbrancee for wrongful entry [or sale] or for an account.

Mortgagee of leasehold entering into possession liable to lessor.

60. Any mortgagee or encumbrancee of leasehold land under the provisions of this Act or any person claiming the said land as a purchaser or otherwise from or under such mortgagee or encumbrancee after entering into possession of the said land or the rents and profits thereof shall during such possession and to the extent of any rents and profits which may be received by him become and be subject and liable to the lessor of the said land or the person for the time being entitled to the said lessor's estate or interest in the said land to the same extent as the lessee or tenant was subject to and liable for prior to such mortgagee encumbrancee or other person entering into possession of the said land or the rents and profits thereof.

Discharge of mortgages and encumbrances.

61. Upon the production of any memorandum of mortgage or of encumbrance having thereon an indorsement signed by the mortgagee or encumbrancee and attested by a witness discharging the land estate or interest from the whole or part of the principal sum or annuity [moneys or liability] secured or discharging any part of the land comprised in such instrument from the whole of such principal sum or annuity [moneys or liability] the Registrar General shall make an entry in the register book noting that such mortgage or encumbrance is discharged wholly or partially or that part of the land is discharged as aforesaid as the case may require and upon such entry being so made the estate or interest or the portion of land mentioned or referred to in such indorsement as aforesaid shall cease to be subject to or liable for [be released from] such principal sum or annuity [moneys or liability] or as the case may be for [from] the part thereof noted in such entry as discharged.

Entry of satisfaction of annuity.

62. Upon proof of the death of the annuitant or of the occurrence of the event or circumstance upon which in accordance with the provisions of any memorandum of encumbrance the annuity or sum of money thereby secured shall cease to be payable and upon proof that all arrears of the said annuity and interest or money have been paid satisfied or discharged the Registrar General shall make an entry in the register book noting that such annuity or sum of money is satisfied and discharged and shall cancel such instrument and upon such entry being made the land estate or interest shall cease to be subject to or liable for such annuity or sum of money and the Registrar General shall in any or either such case as aforesaid indorse on the grant certificate of title or other instrument evidencing the title of the mortgagor or encumbrancer to the land estate or interest mortgaged or encumbered a memorandum of the date on which such entry as aforesaid was made by him in the register book whenever such grant certificate of title or other instrument shall be presented to him for that purpose.

Mortgage money may be paid to Colonial Treasurer if mortgagee be absent from the Colony and mortgage discharged.

63. In case the registered mortgagee shall be absent from the Colony and there be no person authorized to give a receipt to the mortgagor for the mortgage money at or after the date appointed for the redemption of any mortgage it shall be lawful for the Colonial Treasurer to receive such mortgage money with all arrears of interest then due thereon in trust for the mortgagee or other person entitled thereto and thereupon the interest upon such mortgage shall cease to run or accrue and the Registrar General shall upon the receipt of the said Treasurer for the amount of the said mortgage money and interest make an entry in the Register Book discharging such mortgagee stating the day and hour on which such entry is made and such entry shall be a valid discharge for such mortgage and shall have the same force and effect as hereinbefore given to a like entry when made upon production of the memorandum

of

of mortgage with the receipt of the mortgagee and the Registrar General shall indorse on the grant certificate of title or other instrument as aforesaid and also on the memorandum of mortgage whenever those instruments shall be brought to him for that purpose the several particulars hereinbefore directed to be indorsed upon each of such instruments respectively.

64. In every memorandum of such mortgage there shall be implied against the mortgagor a covenant that he will repair and keep in repair all buildings or other improvements erected and made upon the land and that the mortgagee may at all convenient times until such mortgage be redeemed be at liberty with or without surveyors or others to enter into and upon such land to view and inspect the state of repair of such buildings or improvements.

65. Such of the covenants hereinafter set forth as shall be expressed in any memorandum of lease or mortgage as to be implied shall if expressed [or encumbrance] in the form of words hereafter appointed and prescribed for the case of each such covenant respectively be so implied as fully and effectually [shall be construed and take effect by implication] as if such covenants were set forth fully and in words

at length in such instrument that is to say the words "will insure" shall imply as follows—that the lessee or mortgagor [or encumbrancer] will insure and so long as the principal money and interest secured by mortgage [or encumbrance] shall remain unpaid or the term expressed in the said mortgage or lease shall not have expired will keep insured in the name of such mortgagee or lessor in some public insurance office to be approved by such mortgagee or lessor [or encumbrancee] against loss or damage by fire to the full amounts specified in such instrument or if no amount be specified then to their full value all buildings tenements or premises erected on such land which shall be of a nature or kind capable of being insured against loss or damage by fire and that the mortgagor or lessee [or encumbrancer] will at the request of the mortgagee or lessor [or encumbrancee] hand over to and deposit with him the policy of every such insurance and produce to him the receipt or receipts for the annual or other premiums payable on account thereof and also that all moneys to be received under or by virtue of any such insurance shall in the event of loss or damage by fire be laid out and expended in making good such loss or damage [or in payment of the moneys secured at the option of the mortgagee or encumbrancee] provided also

that if default shall be made in the observance or performance of the covenant last above-mentioned it shall be lawful for the mortgagee or lessor [or encumbrancee] without prejudice nevertheless to and concurrently with the powers granted him by his memorandum of mortgage or lease [or encumbrance] or by this Act provided to insure such building and the costs and charges of such insurance shall until such mortgage [or encumbrance] be redeemed [released or satisfied] or such lease shall have expired be a charge upon the said land recoverable in like manner as rent or interest in arrear The words "paint outside every alternate

year" shall imply as follows viz.—and also will in every alternate year during the currency of such lease paint all the outside woodwork and ironwork belonging to the hereditaments and premises mentioned in such lease with two coats of proper oil-colors in a workmanlike manner The words "paint and paper

inside every third year" shall imply as follows viz.—and will in every third year during the currency of such lease paint the inside wood iron and other works now or usually painted with two coats of proper oil-colors in a workmanlike manner and also re-paper with paper of a quality as at present such parts of the said premises as are now papered and also wash or top-whiten or color such parts of the said premises as are now whitened or colored respectively The words "will fence" shall imply as follows viz.—and

also will during the continuance of the said lease erect and put up on the boundaries of the land therein mentioned or upon such boundaries upon which no substantial fence now exists a good and substantial fence The word "cultivate" shall imply as follows viz.—and will at all times during the said lease cultivate use and manage all such parts of the land therein mentioned as are or shall be broken up or converted into tillage in a proper and husbandlike manner and will not impoverish or waste the same The words "that the lessee will not use the said premises as a shop" shall imply as follows viz.—and also that

the said lessee will not convert use or occupy the said hereditaments and premises mentioned in such lease or any part thereof into or as a shop warehouse or other place for carrying on any trade or business whatsoever or permit or suffer the said hereditaments and premises or any part thereof to be used for any such purpose or otherwise than as a private dwelling-house without the consent in writing of the said lessor The words "will not carry on offensive trades" shall imply as follows—and also that no noxious noisome or offensive art trade business occupation or calling shall at any time during the said term be used exercised carried on permitted or suffered in or upon the said hereditaments and premises above-mentioned and that no act matter or thing whatsoever shall at any time during the said term be done in or upon the said hereditaments and premises or any part thereof which shall or may be or grow to the annoyance nuisance grievance damage or disturbance of the occupiers or owners of the adjoining lands and hereditaments The words "will not without leave assign or sublet" shall imply as follows viz.—and also that

the said lessee shall not nor will during the term of such lease assign transfer demise sublet or set over or otherwise by any act or deed procure the lands or premises therein mentioned or any of them or any part thereof to be assigned transferred demised sublet or set over unto any person whomsoever without the consent in writing of the said lessor first had and obtained The words "will not cut timber" shall imply as follows—and also that the said lessee shall not nor will cut down fell injure or destroy any growing or living timber or timber-like trees standing and being upon said hereditaments and premises above-mentioned without the consent in writing of the said lessor The words "will carry on the business of a publican and conduct the same in orderly manner" shall imply as follows viz.—that the said lessee will at all times during the currency of such lease use exercise and carry on in and upon the premises therein mentioned the trade or business of a licensed victualler or publican and retailer of spirits wines ale beer and porter and keep open and use the messuage tenement or inn and buildings standing and being upon the said land as for an inn or public-house for the reception accommodation and entertainment of travellers guests and other persons resorting thereto or frequenting the same and manage and conduct such trade or business in a quiet and orderly manner and will not do commit or permit or suffer to be done or committed any act matter or thing whatsoever whereby or by means whereof any license shall or may be forfeited or become void or liable to be taken away suppressed or suspended in any manner howsoever The words "will apply for renewal of license" shall imply as follows viz.—and also shall and will from time to time during the continuance of the said term at the proper times for that purpose apply for and endeavour to obtain at his own expense all such licenses as are or may be necessary for carrying on the said trade or business of a licensed victualler or publican in and upon the said hereditaments and premises and keeping the said messuage tenement or inn open and as for an inn or public-house as aforesaid The words "will facilitate

Covenants to be implied in every memorandum of mortgage.

Abbreviated forms of words for covenants.

Insure.

Paint outside.

Paint and paper inside.

Fence.

Cultivate.

Not use as a shop.

Offensive trades.

Assign or sublet.

Cut timber.

Business of publican in orderly manner.

Apply for renewal of license.

Facilitate the transfer of license.

facilitate the transfer of license" shall imply as follows viz.—and also shall and will at the expiration or other sooner determination of the said lease sign and give such notice or notices and allow such notice or notices of a renewal or transfer of any license as may be required by law to be affixed to the said messuage tenement or inn to be thereto affixed and remain so affixed during such time or times as shall be necessary or expedient in that behalf and generally to do and perform all such further acts matters and things as shall be necessary to enable the said lessor or any other person authorized by him to obtain the renewal of any license or any new license or the transfer of any license then existing and in force.

No notice of trusts to be entered in Register Book.

Instrument declaring trusts may be deposited but not entered.

66. The Registrar General shall not make any entry in the Register Book of any neties [particulars] of trusts whether expressed implied or constructive but trusts may be declared by any instrument or deed which instrument or deed may include as well lands under the provisions of this Act as land which is not under the provisions thereof. Provided that the description of the several parcels of land contained in such instrument or deed shall sufficiently distinguish the land which is under the provisions of this Act from the land which is not under the provisions thereof and a duplicate or an attested copy of such instrument may be deposited with the Registrar General for safe custody and reference but shall not be registered [nor shall any reference which shall be made thereto in any registered instrument operate as notice of the particulars thereof nor shall express notice of such particulars in the absence of caveat interfere with the registration and full effect of any act or dealing of the registered owner which would otherwise be valid.]

How survivorship among trustees may be barred except on Judge's order.

67. Upon the transfer of any land estate or interest under the provisions of this Act to two or more persons as joint proprietors to be held by them as trustees it shall be lawful for the transferrer [or transferres] to insert in the memorandum of transfer or other instrument the words "no survivorship" [which words shall be construed to mean that the survivors or survivor shall have no power to transfer or deal with the land without the sanction of the Supreme Court or a Judge thereof unless for the purpose of transfer to a new trustee as hereafter provided] and the Registrar General shall in such case include such words in the memorial of such instrument to be entered by him in the Register Book as hereinbefore directed and shall also enter the said words upon any certificate of title issued to such joint proprietors pursuant to such memorandum of transfer. And any two or more persons registered as joint proprietors of any land estate or interest under the provisions of this Act held by them as trustees may by writing under their hand authorize the Registrar General to enter the words "no survivorship" upon the grant certificate of title or other instrument evidencing their title to such estate or interest and also upon the duplicate of such instrument in the Register Book or filed in his office and after such entry has been made and signed by the Registrar General in either such case as aforesaid it shall not be lawful for any less number of joint proprietors than the number then registered to transfer or otherwise deal with the said land estate or interest without obtaining the sanction of the Supreme Court or a Judge thereof [Provided further that if it be intended not to apply the said restriction until the trustees be reduced below a certain specified number words indicative of such intention may be entered in like manner and in that case the power of disposition by survivors shall continue until the number be so reduced.]

Survivors may nevertheless perform ordinary duties or transfer to new trustee.

[67A. Nothing contained in the last preceding section shall prevent the survivors or survivor from exercising all the powers and duties of the trust other than in regard to transfers and dealings under this Act nor from so transferring the land as to give effect to any valid appointment of a new trustee and so far as shall be necessary to ascertain the sufficiency of any such appointment it shall be lawful for the Registrar General or any Examiner of Titles to refer to the provisions of any instrument relating to the trust notwithstanding the same be not registered And the Registrar General may if fully satisfied of such sufficiency give effect thereto by registering any transfer made in accordance therewith without requiring any such judicial order as aforesaid.]

Notice to be published before order.

68. ~~Before making any such order as aforesaid the Court or Judge shall if it seem requisite cause notice of intention so to do to be advertised once in the Gazette and three times in at least one newspaper published in Sydney and shall~~ [It shall be lawful for the Registrar General before registering any such transfer or for the Court or Judge before making any order as aforesaid to cause such notice as may be deemed requisite either by public advertisement or otherwise and to] appoint a period of time within which it shall be lawful for any person interested to shew cause why such [transfer shall not be made or such] order ~~should not be issued and thereupon~~ it shall be lawful for the said Court or Judge in such order to give directions for the transfer of such land estate or interest to any new proprietor or proprietors solely or jointly with or in the place of any existing proprietor or to make such order in the premises as the Court [shall] thinks just for the protection of the persons beneficially interested in such land estate or interest or in the proceeds thereof and upon such order being deposited with the Registrar General he shall make such entries and perform [such] acts as in accordance with the provisions of this Act may be necessary for the purpose of giving effect ~~to such order~~ [thereto.]

Powers of Attorney.

69. The [Any application to bring land under the provisions of this Act may be made and signed on behalf of any person entitled to make the same by his attorney or agent authorized by any instrument or writing and any such instrument conferring authority to sell the land shall be held to imply a power to bring the same under this Act and direct to whom the certificate shall issue And any] registered proprietor of any land estate or interest under the provisions of this Act may authorize and appoint any person to act for him or on his behalf in respect to the transfer or other dealing with such land estate or interest in accordance with the provisions of this Act by executing a power in any form heretofore in use for the like purpose or in form I [1 or I 2] of the Schedule hereto and such power of attorney or a duplicate or certified copy thereof shall be filed in the Office of the Registrar General who shall enter in the Register Book a memorandum of the particulars therein contained and the date and hour when it was so filed.

Power of Attorney.

[69A. Every such power of attorney shall if filed within four months after the date thereof be deemed to be in force at the time of filing thereof unless a revocation thereof shall have been previously notified to the Registrar General in which case he shall refuse to file the same And after such filing the same shall remain in force for the purposes of this Act until revocation thereof shall have been notified to the Registrar General and entered in the Registry Book But nothing herein contained shall diminish the force and effect of any such power if filed afterwards.]

70. The Registrar General upon the application of any registered proprietor of land under the provisions of this Act shall grant to such proprietor a registration abstract in the form K of the Schedule hereto enabling him to transfer or otherwise deal with his estate or interest in such land at any place without the limits of the Colony and shall at the same time enter in the Register Book a memorandum recording the issue of such registration abstract and shall indorse on the grant certificate of title or other instrument evidencing the title of such applicant proprietor a like memorandum and from and after the issuing of any such registration abstract no transfer or other dealing in any way affecting the estate or interest in respect of which such registration abstract is issued shall be entered in the Register Book until such abstract shall have been surrendered to the Registrar General to be cancelled or the loss or destruction of such abstract proved to his satisfaction.

Registration abstract for registering dealings without the limits of the Province.

71. Whenever any transfer or other dealing is intended to be transacted under any such registration abstract a memorandum of transfer or such other instrument as the case may require shall be prepared in duplicate in form hereinbefore appointed and shall be produced to some one of the persons hereinafter appointed as persons before whom the execution of instruments without the limits of the Colony may be proved and upon memorial of such instrument being entered upon the registration abstract and authenticated by the signature of such authorized person as aforesaid in manner hereinbefore directed for the entry of memorials in the Register Book such instrument shall be held to be registered and such transfer or other dealing shall be as valid and binding to all intents as if the same had been entered in the Register Book by the Registrar General and whenever a memorial of any instrument which has not been endorsed upon the instrument evidencing title to the estate or interest intended to be dealt with has been entered upon the registration abstract such authorized person as aforesaid shall record the like memorial on the duplicate grant certificate of title lease or other instrument evidencing title as aforesaid and the certificate of registration indorsed on the instrument of which the memorial has been so entered and signed by such authorized person and sealed with his seal shall be received in all Courts of Law or Equity as conclusive evidence that such instrument has been duly registered.

Mode of procedure under registration abstract.

72. Upon the delivery of any registration abstract to the Registrar General he shall record in the Register Book in such manner as to preserve their priority the particulars of every transfer or other dealing recorded thereon and shall file in his office the duplicates of every memorandum of transfer or other instrument executed thereunder which may for that purpose be delivered to him and shall cancel such abstract and note the fact of such cancellation in the Register Book and if a freehold [the] estate in such land or in any part thereof be transferred [of such nature as to entitle the holder to a certificate of title] the grant or certificate of title shall be delivered up to the Registrar General who shall thereupon proceed as is hereinbefore directed for the case of the transfer of an estate of freehold [such nature.]

Proceeding upon delivery of registration abstract to the Registrar General.

73. Upon proof at any time to the satisfaction of the Registrar General that any registration abstract is lost or so obliterated as to be useless and that the powers thereby given have never been exercised or if they have been exercised then upon proof of the several matters and things that have been done thereunder it shall be lawful for the Registrar General as circumstances may require either to issue a new registration abstract as the case may be or to make such entries in the Register Book or do such acts as might have been made or done if no such loss or obliteration had taken place.

Procedure when registration abstract is lost.

74. The registered proprietor of any land in respect of which a power of attorney has been executed may for the purpose of revoking such power execute an instrument in the form L of the Schedule hereto or in any form heretofore in use for the like purpose and the Registrar General shall except in any case where a registration abstract is outstanding enter the particulars thereof in the Register Book and record thereon the date and hour in which such entry was made and shall file the same in his office and after the date of such entry the Registrar General shall not give effect to any memorandum of transfer or other instrument executed pursuant to such power of attorney.

Revocation of power of attorney.

PART V.—*Transmissions.*

75. Upon the bankruptcy or insolvency of the registered proprietor of any land estate or interest under the provisions of this Act the assignees of such bankrupt or insolvent shall be entitled to be registered as proprietors in respect of the same and the Registrar General upon the receipt of an office copy of the appointment of such assignees accompanied by an application in writing under their hand to be so registered in respect to any land estate or interest of such bankrupt or insolvent therein specified and described shall enter in the Register Book upon the folium constituted by the grant or certificate of title of such land a memorandum notifying the appointment of such assignees and upon such entry being made such assignees shall be deemed and taken to be registered proprietors of the estate or interest of such bankrupt or insolvent in such land and shall hold the same subject to the equities upon and subject to which the bankrupt or insolvent held the same but for the purpose of any dealings with such land estate or interest under the provisions of this Act such assignees shall be deemed to be absolute proprietors thereof.

Transmission by bankruptcy or insolvency.

Upon entry of appointment assignees to be deemed proprietors.

But subject to equities.

[75A. Upon the bankruptcy or insolvency of the registered proprietor of any lease the Registrar General unless the same be subject to a mortgage or encumbrance under the provisions of this Act shall upon the application in writing of the lessor or lessee accompanied by a statement in writing signed by the assignees of such bankrupt or insolvent certifying their refusal to accept such lease enter in the Registry Book the particulars of such refusal and such entry shall operate as a surrender of the said lease.]

Refusal of lease by insolvent's assignee to be registered as a surrender.

76. Upon the bankruptcy or insolvency of the registered proprietor of any lease subject to mortgage [or encumbrance] under the provisions of this Act the Registrar General upon the application in writing of the mortgagee [or encumbrancee] accompanied by a statement in writing signed by the assignees of such bankrupt or insolvent certifying their refusal to accept such lease shall enter in the Register Book the particulars of such refusal and such entry shall operate as a foreclosure and the interest of the insolvent in such lease shall thereupon vest in such mortgagee [or encumbrancee] and if such mortgagee [or encumbrancee] shall neglect or decline to make such application as aforesaid the Registrar General upon application by the lessor and proof of such neglect or refusal and of the matters aforesaid shall enter in the Register Book notice of such neglect or refusal of such assignee to accept such lease and such entry shall operate as a surrender of such lease.

Mortgagee [or encumbrancee] of the leasehold interest of an insolvent may be entered as transferee of lease.

Marriage of female proprietor to be certified to the Registrar General.

Particulars to be entered in Register Book and on the instrument evidencing title.

Transmission of mortgage or lease on death of proprietor.

Will or probate or letters of administration or order of Court to be produced.

Heir-at-law or devisee may apply to Registrar General to be registered as proprietor of the land.

Application to be referred to Examiners and the Commissioners. Notice thereof published after.

Applicant may be registered.

But to hold subject to any trusts.

Caveat may be lodged.

Caveat entered by settlor—or with consent of registered proprietor.

77. The Registrar General upon the production of the register or other sufficient proof of the marriage of a female registered proprietor of any land estate or interest under the provisions of this Act accompanied by an application in writing signed by such female proprietor to that effect shall enter on the Register Book and also upon the certificate of title or other instrument evidencing the title of such female proprietor when produced to him for that purpose the name and description of her husband the date of the marriage and where solemnized the day and hour of the production to him of the register or other sufficient evidence of such marriage and the husband of such female proprietor shall unless such land be held [settled] for her separate use [or otherwise] be entitled to be registered as co-proprietor of such land in right of his wife and the Registrar General upon [their joint] application to that effect [and declaration in writing that no settlement has been made of the land] and surrender of the existing certificate of title shall comply with such application.

78. Whenever any mortgage encumbrance or lease affecting land under the provisions of this Act shall be transmitted in consequence of the will or intestacy of the registered proprietor thereof [or any estate in land be transmitted to executors or administrators in consequence of any intestacy in regard thereto of such registered proprietor] probate or an office copy of the will of the deceased proprietor or letters of administration or the order of the Supreme Court authorizing the Curator of Intestate Estates to administer the personal estate of the deceased proprietor of such estate or interest as the case may be accompanied by an application in writing from the executor administrator or curator claiming to be registered as proprietor in respect of such estate or interest shall be produced to the Registrar General who shall thereupon enter in the Register Book and on the ~~lease or other~~ instrument evidencing title to the estate or interest transmitted the date of the will and of the probate or of the letters of administration or order of the Supreme Court as aforesaid the date and hour of the production of the same to him the date of the death of such proprietor when the same can be ascertained with such other particulars as he may deem necessary and upon such entry being made the executors or administrators or the Curator of Intestate Estates as the case may be shall be deemed to be registered proprietors or proprietor of such mortgage encumbrance or lease and the Registrar General shall note the fact of such registration by memorandum under his hand on the letters of administration probate or other instrument as aforesaid.

79. The heir at law [in tail] devisee tenant by the courtesy or other person claiming any estate of freehold [or interest of a nature requiring or admitting of registration under this Act] in the land of a deceased proprietor [or in land whereto the applicant claims to be entitled in remainder or reversion expectant on his decease] may make application in writing to the Registrar General to be registered as proprietor of such estate [or interest] and shall deposit with him the certificate of the death of the will or an office copy or probate of the will of the deceased proprietor or any settlement [or other evidence] under which such applicant claims ~~or in the case of intestacy such evidence of heirship as he may be enabled to produce~~ [to represent the deceased proprietor or to be entitled in remainder or reversion] and such application shall state the nature of every estate or interest held by other persons at law or in equity in such land within the applicant's knowledge and that he verily believes himself to be entitled to the estate [or interest] in such land in respect to which he applies to be registered and the statements made in such application shall be verified by the oath or statutory declaration of such applicant Provided always that the heir at law devisee or other person making such application shall [if the nature of the estate be such as to require the issue to him of a new certificate] surrender the existing grant or certificate of title of the land in respect to which he claims to be registered as proprietor prior to his being entered in the Register Book [and receiving a new certificate] as hereinafter mentioned.

80. The Registrar General shall refer such application to the Examiners for examination and report and thereafter shall submit the same for the consideration of the Commissioners who may either reject such application altogether or direct the Registrar General to cause notice thereof to be published once in the *Gazette* and three times in at least one daily newspaper published in Sydney and to give such further publicity to such application as they may direct whether by advertisement or the serving or posting of notices and shall limit and appoint a time not less than one month from the date of the advertisement in such *Gazette* upon or after which the Registrar General may unless he shall in the interval have received a caveat forbidding him so to do register such applicant as proprietor of such land [or interest] by entering in the Register Book the particulars of the transmission through which such applicant claims and by issuing to such applicant [if he be proprietor of an existing estate of freehold in possession or of a leasehold estate in possession admitting of registration under this Act] a certificate of title for the land so transmitted and the Commissioners may direct any caveat to be entered by the Registrar General for the protection of the interests of such other persons (if any) as may be interested in such land Provided always that the person registered consequent on such direction of the Commissioners or any executor or administrator or the Curator of Intestate Estates when registered in respect of any mortgage encumbrance or lease shall hold such land estate or interest in trust for the persons and purposes to which it is applicable by law but for the purposes of any dealing with such land estate or interest under the provisions of this Act he shall be deemed to be absolute proprietor thereof.

PART VI.—General Provisions.

81. ~~Any settlor of land under the provisions of this Act transferring such land to be held by the transferee as trustee or any beneficiary or other persons claiming estate or interest in such land under any unregistered instrument or by devolution in law or otherwise may by caveat in the form M of Schedule hereto forbid the registration of any instrument affecting such land estate or interest either absolutely or until after notice of the intended dealing given to the caveator as may be required and enjoined in such caveat and~~

[81A. Any proprietor of land registered under this Act transferring the same to be held under the conditions of any trust or unregistered instrument or with his consent any person with whom he shall have agreed to hold the land under any such conditions may for the protection of the equities incident thereto forbid by caveat in form M 1 of Schedule hereto the registration of any instrument affecting such land

land unless in pursuance of an order of the Supreme Court or a Judge thereof without the consent in writing of the caveator or instead of or in addition to such consent that of any other person or persons who shall be therein named for that purpose or such caveat may forbid such registration until such period as thereby fixed shall have elapsed after notice of the intended dealing shall be given to the person whose consent is so required in which case the caveat shall be considered withdrawn unless within that period a further caveat be lodged in continuation thereof by some or one of such persons Provided further that it shall be lawful in any such caveat to substitute contingently the name of any other person in anticipation of death or absence from the Colony of any person originally named also to declare whether in the event of such death or absence of any one or more of several persons the consent of such one or more of them as shall survive or continue resident shall be sufficient and such declaration shall in the absence of any contrary provision be implied also to confer on any person whose consent is thereby required a power of substitution in favour of any other person upon any withdrawal of his own name therefrom.]

[81b. Any person whoever claiming any estate or interest in any land under the provisions of this Act by virtue of any unregistered instrument or by devolution of law or otherwise (whether entitled to enter a caveat pursuant to the preceding section or not) may enter a caveat forbidding the registration of any instrument to the prejudice of such claim in the form M 2 of Schedule hereto.] Caveat entered by other persons.

81c. Every such caveat shall state the name and address of the person by whom or on whose behalf the same is lodged and shall contain a sufficient description to identify the land and the estate or interest therein claimed by the caveator or by the person on whose behalf the caveat is lodged and [except in the case of a caveat lodged by or with consent of a registered proprietor shall name an address in Sydney and in all cases] except in case of caveats lodged by order of the Supreme Court or by the Registrar General as hereinbefore provided shall [name an address within the Colony for each caveator or other person whose consent shall be thereby required and every caveat shall] be signed by the caveator or by his solicitor known agent or attorney and every notice relating to such caveat or to any proceedings in respect thereof if served at the address mentioned in such caveat or at the office of the solicitor known agent or attorney who may have signed the same [or transmitted to such address through the post office] shall be deemed to be duly served And every such caveat may be withdrawn by the caveator [unless in the case of caveats requiring the consent of other persons and in that case may be withdrawn by each such person so far as regards himself respectively.] Caveats to identify land and supply address for service of notices.

82. Upon the receipt of such [any] caveat the Registrar General shall notify the same to the person against whose application to bring land under the provisions of this Act or to be registered as proprietor or as the case may be to the [unless the same be lodged by or with the consent of the] registered proprietor against whose title to deal with land under the provisions of this Act such caveat has been lodged [the Registrar General shall notify the same to him] and such applicant proprietor or registered proprietor may if he think fit summon the caveator or the person on whose behalf such caveat has been lodged to attend before the Supreme Court or a Judge thereof to show cause why such caveat should not be removed and it shall be lawful for such Court or Judge upon proof that such person has been summoned to make such order in the premises either ex parte or otherwise as to such Court or Judge may seem fit And except in the case of a caveat lodged by a settlor or by or on behalf of a beneficiary claiming under any will or settlement [or with the consent of the registered proprietor] or by the Registrar General for the protection of incapable persons or for the prevention of fraud as hereinbefore prescribed every such caveat lodged against a registered proprietor shall unless an order to the contrary be made by the Supreme Court or a Judge thereof be deemed to have lapsed upon the expiration of fourteen days after notice given to the caveator that such registered proprietor has applied for the registration of any transfer or other dealing with such land estate or interest [And during the said period of fourteen days and subsequently in the event of the continuance of the caveat beyond that period it shall be lawful for either party to apply to the Supreme Court or a Judge thereof for continuance or removal respectively of the caveat and for the said Court or Judge to exercise the like jurisdiction in regard thereto as hereinbefore provided in respect to caveats lodged against bringing land under the provisions of this Act.] And may be withdrawn.

[82a. After the lapse of any caveat it shall not be lawful for the same person to lodge a further caveat in relation to the same matter But nothing herein contained shall prejudice the right of the Registrar General to enter or continue any caveat under the powers vested in him for prevention of fraud or improper dealing.] Notice of caveat.

83. So long as any caveat shall remain in force prohibiting the transfer or other dealing with land the Registrar General shall not enter in the Register Book any memorandum of transfer or other instrument purporting to transfer or otherwise deal with or affect the land estate or interest in respect to which such caveat may be lodged. Caveator to show cause.

84. Any person lodging any caveat with the Registrar General without reasonable cause shall be liable to make to any person who may have sustained damage thereby such compensation as may be just and such compensation shall be recoverable in an action at law by the person who has sustained damage from the person who lodged the caveat. When caveat to lapse.

85. The registered proprietor of any land or of any estate or interest in land under the provisions of this Act whether of the nature of real or personal property may by any of the forms of instruments of transfer provided by this Act modified as may be necessary transfer such land estate or interest or any part thereof to his wife or if such registered proprietor be a married woman it shall be lawful for her to make such transfer to her husband or it shall be lawful for such registered proprietor to make such transfer to himself jointly with any other person or persons or to create or execute any powers of appointment or to limit any estates whether by remainder or otherwise without limiting [the limitation of] any use or executing [the intervention of] any re-assignment but [and] upon the registration of such transfer the said land estate or interest shall vest in such registered proprietor jointly with any other person or persons or in the person taking under such limitation or in whose favor any power may have been executed or otherwise Caveat not to be renewed after lapse.

otherwise according to the intent and meaning appearing in such instrument and thereby expressed [And provided that every power created by any registered instrument shall in favor of appointees or transferees claiming thereunder be construed to be absolute and unconditional to the full extent of the estate or value of pecuniary charge or other interest to which the same shall apply notwithstanding the same shall be otherwise qualified or fiduciary and any appointment or dealing thereunder shall be registered and take full effect without any enquiry being necessary into any fact or circumstances on which the right of exercising such power may be made to depend either by the same or by any unregistered instrument.

Qualified or fiduciary powers to be absolute for purposes of registered title.
Provision as to separate estate of married woman.
 [85A. If land be transferred to a married woman under this Act as her separate estate such estate may be designated as such in the certificate of title And in that case she shall be entitled to deal with such estate as a *feme sole* in all respects except as regards separate examination and acknowledgment when required by this Act—also to sue and be sued in all proceedings at law or in equity relating to such estate without regard to any marital rights or liabilities of any present or future husband Provided that the defendant in any such proceedings wherein she shall be plaintiff shall be entitled to demand security for costs in like manner as if the plaintiff were out of the jurisdiction And in all such proceedings whether she be plaintiff or defendant her separate estate (whether that in question in the suit or any other) shall be liable for all damages and costs that shall result or be awarded against her And it shall be in the discretion of any Court in which such proceedings shall be pending to direct in any stage thereof security for the same to be entered on the register of title.]

The like as to restraint upon anticipation.
 [85B. If any land be transferred to a married woman for her own life as her separate estate such estate may likewise be declared to be without power of anticipation and so designated on the certificate of title And in that case no instrument dealing with such estate shall be registered except leases purporting to be for the full annual value at rack rent nor shall such registration render any such lease valid if the same be in fact made in fraud or contravention of the said restriction.]

Registered joint proprietors to be joint tenants. Tenants in common to receive distinct certificates.
 86. Two or more persons who may be registered as joint proprietors of an estate or interest in land under the provisions of this Act shall be deemed to be entitled to the same as joint tenants and shall each receive a separate and distinct certificate of such joint estate marked respectively with the name of the owner to whom the same shall be delivered and in all cases where two or more persons are entitled as tenants in common to undivided shares of or in any land such persons shall also receive separate and distinct certificates of title or other instrument evidencing title to such undivided shares [And that except in cases where the words "no survivorship" shall be entered any joint tenant may with the consent of his co-proprietor or proprietors receive a separate distinct certificate of such joint estate in which case every certificate so issued shall be marked with the name or names of the proprietor or proprietors in respect of whose interest the same shall be issued and held respectively.]

Registration of survivor of joint proprietors.
 87. When any person is registered as joint proprietor with his wife [and in her right] of an estate in fee simple in right of his wife if such person die in the lifetime of his wife and before any transfer of such estate or if such wife die in the lifetime of her husband and the said husband is entitled as tenant by the courtesy or upon the death of any person registered together with any other person as joint proprietor of the same estate or interest in any land or when the life estate in respect to which any certificate of title has been issued has determined and the estate next registered in remainder or reversion has become vested in possession or the person to whom such certificate of title has been issued has become entitled to the said land for an estate in fee simple in possession the Registrar General may upon the application of the person entitled and proof to his satisfaction of any such occurrence as aforesaid register such person as proprietor of such estate or interest in manner hereinbefore prescribed for the registration of a like estate or interest upon a transfer or transmission.

Remainderman or reversioner may be registered as such.
 88. Whenever a certificate of title has been issued in respect of a life estate in any land any person entitled in reversion or remainder to such land may apply to be registered as so entitled and the Registrar General shall cause the title of such applicant to be investigated by the Examiners and thereafter submit the same for consideration by the Commissioners who may either reject such application altogether or direct that the applicant be registered forthwith or be so registered unless caveat be lodged after such notice or advertisement and within such period as they may appoint and the Registrar General shall obey such direction or any order of the Supreme Court in the premises.

Certificate may confer an estate tail to take effect upon intestacy without any restraint on disposition either by will or otherwise.
 [88A. Any person entitled to receive a certificate for an absolute estate may cause the same to pass in case of intestacy to his heir in tail by electing to receive a certificate for an estate tail with the reversion to his legal representatives And to confer such estate and reversion it shall be sufficient in any certificate to describe the estate of the holder thereof as an "estate in fee tail" and such estate may be barred by him not only by any instrument which is by this Act declared to be sufficient to bar an estate tail in other cases but also by any disposition inconsistent therewith which he shall make by will.]

Implied covenants may be modified or negated.
 89. Every covenant and power to be implied in any instrument by virtue of this Act may be negated or modified by express declaration in the instrument or indorsed thereon and in any declaration in an action for a supposed breach of any such covenant the covenant alleged to be broken may be set forth and it shall be lawful to allege that the party against whom such action is brought did so covenant precisely in the same manner as if such covenant had been expressed in words in such memorandum of transfer or other instrument any law or practice to the contrary notwithstanding and every such implied covenant shall have the same force and effect and be enforced in the same manner as if it had been set out at length in such instrument and where any memorandum of transfer or other instrument in accordance with the provisions of this Act is executed by more parties than one such covenants as are by this Act declared to be implied in instruments of the like nature shall be construed to be several and not to bind the parties [severally as well as] jointly.

Forms of instruments may be altered.
 90. The Registrar General may subject to the approval of the Governor with the advice aforesaid from time to time make such alterations in the several form of instruments prescribed in the Schedule hereto as he may deem requisite and shall cause every such form to be stamped with his seal and to be supplied at the General Registry Office free of charge or at such moderate prices as he may from time to time fix or may license any person to print and sell the same.

91. The Registrar General with the consent of the Commissioners in case they shall see reasonable cause for so doing may dispense with the production of any grant certificate of title lease or other instrument for the purpose of entering the memorial by this Act required to be entered upon the transfer or other dealing with land under the provisions of this Act and upon the registration of such transfer or other dealing the Registrar General shall notify in the memorial in the Register Book that no entry of such memorial has been made on the duplicate grant or other instrument and such transfer or other dealing shall thereupon be as valid and effectual as if such memorial had been so entered and the Registrar General may with the like consent dispense with the production of the grant or certificate of title hereinbefore required to be surrendered prior to the registration of devisee or heir at law upon the [estate of any person entitled by] transmission of an estate of freehold Provided always that before registering such transfer transmission or other dealing the Registrar General shall in such case require the transferrer or other party dealing or deriving to make an affidavit that such grant or instrument has not been deposited as security for any loan and shall give at least fourteen days' notice of his intention to register such dealing in the *Gazette* and in at least one daily newspaper published in Sydney.

Duplicates of certificates &c. may be dispensed with after notice in certain cases.

92. No writ of *feri facias* or other writ of execution issued prior to the date on which this Act shall come into operation or thereafter shall bind charge or affect any land estate or interest under the provisions of this Act [or prevent any land from being brought thereunder except as herein provided] but whenever any land or any estate or interest in land under the provisions of this Act shall be seized or sold by the Sheriff or the Registrar or Bailiff of any District Court under any writ or shall be sold under any direction decree or order of the Supreme Court or District Court or whenever any order of such Court shall be made authorizing the Curator of Intestate Estates to take the charge of the real estate of a deceased proprietor the Registrar General on being served with an office copy of the writ direction decree or order as the case may be shall [if the land affected thereby shall not be under the provisions of this Act pay regard thereto as to a caveat entered against any application interfering with the operation thereof but if the land be under the provisions of this Act shall] enter in the Register Book and also upon the instrument evidencing title to the said estate or interest if produced for that purpose the date of the said writ direction decree or order and the date and hour of the production thereof and after such entry as aforesaid the Sheriff or person authorized by the Supreme Court or the Registrar or Bailiff of any District Court shall [subject and without prejudice to the rights of any person by or on whose behalf any caveat may be lodged] do such acts and execute such instruments as under the provisions of this Act may be necessary to transfer or otherwise to deal with the said estate or interest. Provided always that unless and until such entry has been made as aforesaid no such writ shall bind or affect any land under the provisions of this Act or any estate or interest therein nor shall any sale or transfer by the Sheriff Registrar or Bailiff be valid as against a purchaser or mortgagee notwithstanding such writ may have been actually in the hands of the Sheriff Registrar or Bailiff at the time of any purchase or mortgage or notwithstanding such purchaser or mortgagee may have had actual or constructive notice of the issue of such writ and upon production to the Registrar General of sufficient evidence of the satisfaction of any writ so entered as aforesaid he shall enter in the Register Book a memorandum to that effect and such writ shall be deemed to be satisfied accordingly and every such writ shall be deemed to have lapsed unless the same shall be executed and put in force within three months from the day on which it was entered in the Register Book as aforesaid.

Sales by Sheriff or under order of Supreme Court.

93. A Corporation for the purpose of [making application to bring land under the provisions of this Act or of] transferring or otherwise dealing with land under the provisions of this Act [when brought there- under or for the empowering of an Attorney to act for such Corporation for any of such purposes under the 69th section of this Act may] in lieu of signing the proper instrument for such purpose prescribed may affix thereto the common seal of such Corporation with a certificate that such seal was affixed by the proper officer verified by his signature [and any seal purporting to be the common seal of such Corporation may if duly verified as aforesaid be accepted as such common seal.]

Seal of Corporation substituted for signature.

94. Instruments executed pursuant to the provisions of this Act if attested by one witness shall be held to be duly attested [but the Registrar General may require such execution to be proved and the same shall be held to be duly proved by the oath or statutory declaration of the witness attesting the same made or taken if] and the execution thereof may be proved if the parties executing the same be resident within the Colony then before the Registrar General or before a Notary Public Justice of the Peace or a Commissioner for taking Affidavits if the said parties be resident in the United Kingdom then before the Mayor or other chief officer of any Corporation or before a Notary Public if the said parties be resident in any British Possession then before the Registrar General or Recorder of Titles of such Possession or before any Judge or Notary Public or before the Governor Government Resident or Chief Secretary thereof and if the said parties be resident at any foreign place then before the British Consular Officer resident at such place.

Instruments how attested and before whom proved.

95. The execution of any such instrument may be proved before any such person as aforesaid by the [such] oath or statutory declaration of the parties executing the same or of a witness attesting the signing thereof and [shall be sufficient] if such witness shall answer in the affirmative [or embody in his affidavit or declaration the affirmative in regard to] each of the questions following that is to say—

Mode of proving instruments.

Are you the witness who attested the signing of this instrument and is the name or mark purporting to be your name or mark as such attesting witness your own hand-writing ?

Do [or did] you personally know the person signing this instrument and whose signature you attested ?

Is the name purporting to be his signature his own hand-writing—is he [or was he when he so executed] of sound mind—and did he freely and voluntarily sign the same ?

Then [in which case] the Registrar General Justice or other person before whom such witness shall prove such signature as aforesaid shall endorse upon such instrument a certificate in form N of the Schedule hereto and [Provided that] if the person executing such instrument be personally known to the Registrar General Justice or other person as aforesaid and alive and in the Colony he may attend and appear before [and shall sign the same in his presence] such Registrar General Justice or other person and acknowledge that

he

he did freely and voluntarily sign such instrument and upon such acknowledgment the Registrar General Justice or other person shall endorse on such instrument a certificate in form O of the Schedule hereto [such instrument shall be held to be duly proved and no other attesting witness shall in that case be necessary] provided that such questions as aforesaid may be varied as circumstances may require in case any person shall sign such instrument by his mark.

How acknowledgment of married women to be taken.

96. The Registrar General shall not register any instrument signed by any married woman purporting to transfer or otherwise to deal with any land under the provisions of this Act in respect to which she may be registered as proprietor either solely or jointly with her husband in her right until such married woman shall have been examined apart from her husband by the Registrar General or other person legally authorized to take the acknowledgments of married women and shall have assented to such proposed dealing after full explanation of her rights in the land and of the effect of the proposed dealing and the Registrar General or other persons taking such acknowledgment shall endorse on the instrument of transfer or other dealing a certificate of such acknowledgment and examination and the date and hour thereof.

Entail to be barred by ordinary transfer &c.

[96. Any transfer will or other dealing under this Act by which a proprietor in fee simple could transfer devise charge or otherwise affect his estate therein shall have the same effect if executed by a tenant in tail as against the issue in tail and any ulterior remainders or reversion.]

Separate examination of married women.

[96A. Whenever a married woman shall make or join in any application or dealing under this Act by means of which her estate or interest in any land may be alienated or diminished it shall be necessary and sufficient in order to give effect thereto that she be separately examined apart from her husband and acknowledge that such application or dealing is made or entered into freely voluntarily and without menace or coercion of her husband and such acknowledgment shall be certified under the hand of some person authorized to receive the same and may be so made and certified either before and by any one of the persons authorized by the Acts of the Colonial Legislature 3 Victoria No. 8 and 20 Victoria No. 27 to take acknowledgments of the Deeds therein mentioned or before and by the Registrar General or before and by any one of the persons designated by section 94 of this Act as those before whom instruments executed pursuant thereto may be proved.]

Dower or courtesy may be released by consent on application or dealing without deed.

[96B. Any woman entitled to dower contingently or otherwise out of any land which shall be the subject of any application or dealing under this Act may release the same for the purpose of such application by any writing under her hand expressing her consent to such application or dealing and duly acknowledged under the last preceding section and any husband may in like manner release his courtesy out of his wife's land by any writing under his hand duly attested expressing his consent to any application or dealing in relation thereto and no other deed or instrument of release shall in any such case be necessary.]

As to dower of out land alienated from the Crown after the *Real Property Act* and before.

[96C. The dower of the widow of any Crown grantee or registered proprietor of land alienated from the Crown on or after the first day of January one thousand eight hundred and sixty-three and the dower of the widow of any registered proprietor of land alienated from the Crown before that day (notwithstanding any such widow shall have been married before the first day of January one thousand eight hundred and thirty-seven but subject as to the last-mentioned land to the provisoes hereinafter contained) shall be barred by the absolute disposition of the land by her husband in his lifetime or by his will and all partial estates and interests and all charges created by any disposition under the said Act or by will of her husband and all encumbrances liens and interests to which any such land shall under the provisions of the said Act be subject or liable shall be valid and effectual as against the right of his widow to dower in or out of the same and her right shall also be subject to such other of the provisions of the Act for the amendment of the law relating to dower as shall be consistent with the *Real Property Act* Provided always that any right or contingent right to dower which may subsist in or out of any land alienated from the Crown before the said first day of January one thousand eight hundred and sixty-three and which shall be mentioned as an encumbrance or interest in the certificate of title or other instrument shall not be prejudiced by this section but no right or contingent right to dower in or out of such land which shall not have arisen before the land is brought under the said Act or which shall be capable of being defeated by the exercise of any power of appointment conferred on the applicant shall be deemed or mentioned as such an encumbrance or interest Provided also that no land alienated from the Crown before the said first day of January one thousand eight hundred and sixty-three and the right or contingent right to dower in or out of which shall have been actually barred before the land is brought under the said Act shall be liable to a new right to dower in favour of the widow of the applicant arising under or by virtue of the certificate of title or entry on the register.]

Subsisting dower if mentioned in the certificate not to be prejudiced.

Barred dower rights not to be revived by the land being brought under this Act.

Upon surrender of existing grants or certificates proprietor may obtain a single certificate or vice versa.

97. Upon the application of any registered proprietor of land held under separate grants or certificates of title or under one grant or certificate and the delivering up of such grant or grants certificate or certificates of title it shall be lawful for the Registrar General to issue to such proprietor a single certificate of title for the whole of such land or several certificates each containing portion of such land in accordance with such application and as far as the same may be done consistently with any regulations at the time in force respecting the parcels of land that may be included in one certificate of title and upon issuing any such certificate of title the Registrar General shall cancel the grant or previous certificate of title of such land so delivered up and shall endorse thereupon a memorandum setting forth the occasion of such cancellation and referring to the certificate of title so issued.

Provision in case of lost grant.

98. In the event of the grant or certificate of title of land under the provisions of this Act being lost mislaid or destroyed the proprietor of such land together with other persons if any having knowledge of the circumstances may make a declaration before the Registrar General or before any of the persons hereinbefore appointed as persons before whom the execution of instruments may be proved stating the facts of the case the names and descriptions of the registered owners and the particulars of all mortgages encumbrances or other matters affecting such land and the title thereto to the best of declarant's knowledge and belief and the Registrar General if satisfied as to the truth of such declaration and the *bona fides* of the

the

the transaction may with the consent of the Commissioners issue to such applicant a provisional certificate of title of such land which provisional certificate shall contain an exact copy of the original grant or certificate of title bound up in the Register Book and of every memorandum and indorsement thereon and shall also contain a statement of the circumstances under which such provisional certificate is issued and the Registrar General shall at the same time enter in the Register Book notice of the issuing of such provisional certificate and the date thereof and the circumstances under which it was issued and such provisional certificate shall be available for all purposes and uses for which the grant or certificate of title so lost or mislaid would have been available and as valid to all intents as such lost grant or certificate. Provided always that the Registrar General before issuing such provisional certificate shall give at least fourteen days' notice of his intention so to do in the *Gazette* and in at least one daily newspaper published in Sydney.

99. Upon the production of the receipt of the Colonial Treasurer [or his Deputy or any duly authorized Receiver of Revenue] in full for the purchase money of any lands alienated in fee from the Crown together with a memorandum of transfer mortgage or lease duly executed by the purchaser from the Crown of such land the Registrar General shall indorse upon such receipt such memorial as he is hereinbefore required to enter in the Register Book upon the registration of any dealing of a like nature with land in respect to which a grant or certificate of title has been registered and shall sign such indorsement and stamp the same with his seal and such instrument shall thereupon be held to be duly registered in accordance with the provisions of this Act and the Registrar General shall file such receipt and such instrument in his office and upon the registration of the grant of such land the Registrar General shall enter thereon a memorial of such dealing and shall indorse such instrument with the certificate of registration as hereinbefore prescribed for the registration of instruments generally.

Deals may be registered prior to the issue of grant from the Crown.

100. Any proprietor subdividing any land under the provisions of this Act for the purpose of selling the same in allotments as a township shall deposit with the Registrar General a map of such township provided that such map shall exhibit distinctly delineated all roads streets passages thoroughfares squares or reserves appropriated or set apart for public use and also all allotments into which the said land may be divided marked with distinct numbers or symbols and every such map shall be certified as accurate by declaration of a licensed surveyor before the Registrar General or a Justice of the Peace. Provided that no person shall be permitted to practice as a surveyor under the provisions of this Act unless specially licensed for that purpose by the Surveyor General.

Map of subdivided land.

Surveyors to be licensed.

101. The Registrar General may require the proprietor applying to have any land brought under the provisions of this Act or desiring to transfer or otherwise to deal with the same or any portion thereof to deposit at the Registry Office a map or plan of such land certified by a licensed surveyor in manner aforesaid and if the said land or the portion thereof proposed to be transferred or dealt with shall be of less [an] area [not exceeding] than one statute acre then such map or plan shall be on a scale not less than one inch to two chains and if such land or the portion thereof about to be transferred or dealt with shall be of greater area than one statute acre but not exceeding five statute acres then such map shall be upon a scale not less than one inch to five chains and if such land or the portion thereof as aforesaid shall be of greater area than five statute acres but not exceeding eighty statute acres then such map or plan shall be upon a scale of not less than one inch to ten chains and if such land or the portion thereof as aforesaid shall be of greater area than eighty statute acres then such map or plan shall be upon a scale of one inch to twenty chains and if such proprietor shall neglect or refuse to comply with such requirement it shall not be incumbent on the Registrar General to proceed with the bringing of such land under the provisions of this Act or with the registration of such transfer or lease [other dealing]. Provided always that subsequent subdivisions of the same land may be delineated on the map or plan of the same so deposited if such map be upon a sufficient scale in accordance with the provisions herein contained and the correctness of the delineation of each such subdivision shall be acknowledged in manner prescribed for the case of the deposit of an original map.

Registrar General may require map to be deposited.

102. The Registrar General upon payment of the fee specified in the Schedule P hereto shall furnish to any person applying for the same a certified copy of any registered instrument affecting land under the provisions of this Act and every such certified copy signed by him and sealed with his seal shall be received in evidence in any Court of Justice or before any person having by law or by consent of parties authority to receive evidence as *prima facie* proof of all the matters contained or recited in or indorsed on the original instrument.

Certified copies to be furnished by Registrar General and to be evidence.

103. Any person may upon payment of a fee specified in Schedule P hereto have access to the Register Book for the purpose of inspection during the hours and upon the days appointed for search.

Searches.

104. The Registrar General shall not receive any application for bringing land under the provisions of this Act or any instrument purporting to deal with or affect any land under the provisions of this Act unless there shall be endorsed thereon a certificate that the same is correct for the purposes of this Act signed by the applicant or party claiming under or in respect of such instrument or by his solicitor and any person who shall falsely and negligently certify to the correctness of any such application or other instrument shall incur therefor a penalty not exceeding fifty pounds. Provided always that such penalty shall not prevent the person who may have sustained any damage or loss in consequence of error or mistake in any such certified instrument or any duplicate thereof from recovering damages against the person who shall have certified the same.

Authority to register.

Penalty for certifying incorrect instruments.

105. It shall be lawful for the Registrar General to recover such fees as shall be appointed by the Governor with the advice aforesaid not in any case exceeding the several fees specified in the Schedule hereto marked P [or such other fees not being in excess thereof as the Governor shall with the advice aforesaid at any time and from time to time appoint and notify in the *Gazette* and until payment thereof shall not be bound to receive any document or perform any act in respect whereof they are respectively payable.]

Fees.

106. The Registrar General shall keep a correct account of all such sums of money as shall be received by him in accordance with the provisions of this Act and shall pay the same to the Colonial Treasurer at such times and shall render accounts of the same to such persons and in such manner as may be directed in any regulations that may for that purpose be prescribed by the Governor with the advice aforesaid and the Registrar General shall address to the said Treasurer requisitions to pay moneys received by him or by the said Treasurer in trust or otherwise on account of absent mortgagees or other persons entitled in accordance with the provisions of this Act which requisitions when proved and audited in manner

Registrar General to pay moneys into Treasury and to render accounts.

Parties entitled to be paid by Treasurer upon proper warrant.

manner directed by any such regulations framed as aforesaid at the time being in force in the said Colony and accompanied by warrant for payment of the same under the hand of the Governor countersigned by the Chief Secretary thereof the said Treasurer shall be bound to obey and all fines and fees received under the provisions of this Act except fees payable to the Commissioners for the bringing of land under the operation of this Act shall be carried by the said Treasurer to account of the Consolidated Revenue Fund.

PART VII.—*Rights Remedies and Procedure.*

Proprietor may summon Registrar General to show cause if dissatisfied.

107. If upon the application of any proprietor to have land brought under the provisions of this Act or to have any dealing or transmission registered or recorded or to have any certificate of title registration abstract foreclosure order or other instrument issued or to have any act or duty done or performed which by this Act is prescribed to be done or performed by the Registrar General the Registrar General shall refuse so to do or if such proprietor shall be dissatisfied with the direction upon his application given by the Commissioners as hereinbefore provided [or shall be dissatisfied with any correction or alteration made or directed by the Registrar General in any certificate or entry on the Register under the powers conferred by this Act in that behalf] it shall be lawful for such proprietor to require the Registrar General to set forth in writing under his hand the grounds of his refusal or the grounds upon which such direction was given and such proprietor may if he think fit at his own costs summon the Registrar General to appear before the Supreme Court to substantiate and uphold the grounds of his refusal or of such direction as aforesaid such summons to be issued under the hand of a Judge of the said Court and served upon the Registrar General six clear days at least before the day appointed for hearing the complaint of such proprietor and upon such hearing the Registrar General or his counsel shall have the right of reply and the said Court shall if any question of fact be involved direct an issue to be tried to decide such fact and the said Court shall thereupon make such order in the premises as in their judgment the circumstances of the case may require and the Registrar General shall obey such order and all expenses attendant upon any such proceedings shall be borne and paid by the applicant or other person preferring such complaint unless the Judge or Court shall certify that there were no probable grounds for such refusal or direction as aforesaid.

Registrar General may state a case for Supreme Court.

108. It shall be lawful for the Registrar General by direction of the Commissioners Whenever any question shall arise with regard to the performance of any duties or the exercise of any of the functions by this Act conferred or imposed upon him or them to state a case for the opinion of the Supreme Court and thereupon it shall be lawful for the said Court to give its judgment thereon and such judgment shall be binding upon the Registrar General and Commissioners respectively [or if in the examination of the title of any applicant or in the exercise of any of the duties of the Registrar General Examiners or Commissioners under this Act any question shall arise as to the true construction or legal validity or effect of any deed instrument or will or as to the persons entitled or the extent or nature of the estate right or interest power or authority of any person or class of persons or the mode in which any entry ought to be made on the register or certificate of title or any doubtful or uncertain right or interest stated or dealt with by the Registrar General it shall be competent for him by direction of the Commissioners to refer the same to a Judge of the Supreme Court who may if he see fit allow any of the parties interested desirous of appearing before him and summon any others of such parties to appear and show cause either personally or by counsel or attorney in relation thereto And if upon such reference the Judge having regard to the parties appearing before him shall think proper to decide the question he shall have power so to do or to direct any proceeding at law or in equity to be instituted for that purpose or at the discretion of the Judge and without deciding such question to direct such particular form of entry to be made on the Register or Certificate of Title as under the circumstances shall appear to be right.]

Registrar General to carry out order of Supreme Court, vesting trust estate.

109. Whenever any person interested in land under the provisions of this Act shall appear to the Supreme Court to be a trustee of such land within the intent and meaning of any Trustee Act then in force in the Colony and any order shall be made in the premises by the Court or a Judge thereof [The Supreme Court or any Judge thereof shall (by virtue of the Trustee Act) or otherwise in the exercise of any lawful jurisdiction make a vesting order affecting any land registered under this Act] the Registrar General on being served with an office copy of such order shall enter in the Register Book and on the grant or other instrument evidencing title to the said land the date of the said order the date and hour of its production to him and the name residence and description of the person in whom the said order shall purport to vest the said land and such person shall thereupon be deemed to be the registered proprietor of such land [and entitled if the estate therein be in possession to receive a certificate of title thereto] and unless and until such entry shall be made the said order shall have no effect or operation in transferring or otherwise vesting the said land.

Action may be brought by person claiming beneficiary interest in name of trustee.

Trustee to be indemnified.

110. Whenever a person entitled to or interested in land as a trustee would be entitled under the last preceding clause to bring or defend any action of ejectment in his own name for recovering the possession of land under the provisions of this Act such person shall be bound to allow his name to be used as a plaintiff or defendant in such action of ejectment by any beneficiary or person claiming an estate or interest in the said land Provided nevertheless that the person entitled or interested as such trustee shall in every such case be entitled to be indemnified in like manner as a trustee would before the passing of this Act have been entitled to be indemnified in a similar case of his name being used in any such action or proceeding by his cestuique trust.

Purchaser from registered proprietor not to be affected by notice.

111. Except in the case of fraud No person contracting or dealing with or taking or proposing to take a transfer from the registered proprietor of any registered estate or interest shall [except in the case of fraud wherein he shall participate or collude] be required or in any manner concerned to inquire or ascertain the circumstances in or the consideration for which such registered owner or any previous registered owner of the estate or interest in question is or was registered or to see to the application of the purchase money or of any part thereof or shall be affected by notice direct or constructive of any trust or unregistered interest any rule of Law or Equity to the contrary notwithstanding and the knowledge that any such trust or unregistered interest is in existence shall not of itself be imputed as fraud.

112. In any suit for specific performance brought by a registered proprietor of any land under the provisions of this Act against a person who may have contracted to purchase such land ~~not having notice~~ [the certificate of title of such registered proprietor shall in the absence of proof] of any fraud or other circumstances which according to the provisions of this Act would affect the right of the vendor the certificate of title of such registered proprietor shall be held in every Court of Law or Equity to be conclusive evidence that such registered proprietor has a good and valid title to the land and for the estate or interest therein mentioned or described and shall entitle such registered proprietor to a decree for the specific performance of such contract.

Registered proprietor suing for specific performance.

113. When default has been made in the payment of the interest or principal sum secured by memorandum of mortgage for six months a registered mortgagee or his solicitor attorney or agent may make application in writing to the Registrar General for an order for foreclosure and such application shall state that such default has been made as aforesaid and that the land estate or interest mortgaged has been offered for sale at public auction by a licensed auctioneer after notice given to the mortgagor as in this Act provided and that the amount of the highest bid at such sale was not sufficient to satisfy the money secured by such mortgage together with the expenses occasioned by such [attempted] sale and that notice in writing of the intention of such mortgagee to make such application has been given to the mortgagor by leaving the same at his usual or last known place of abode if such place be within three miles of the residence of such mortgagee or by forwarding the same by registered letter through the Post Office if such place be beyond that distance and such application shall be accompanied by a certificate of the auctioneer by whom such land was put up for sale and such other proof of the matters stated by the applicant as the Registrar General may require and the statements made in such application shall be verified by the oath or statutory declaration of the applicant or other person applying on his behalf.

Mortgagee may apply to Registrar General for an order for foreclosure.

114. The Registrar General shall refer such application to the Commissioners who may direct the Registrar General to cause notice to be published once in the *Gazette* and once in each of three successive weeks in at least one daily newspaper published in Sydney offering such land for sale and shall further limit and appoint a time not less than one month from the date of the publication in the *Gazette* upon or after which the Registrar General may issue to such applicant an order for foreclosure unless in the interval a sufficient amount has been realized by the sale of such land to satisfy the principal and interest moneys due and all expenses occasioned by such sale [and the previously attempted sale] and proceedings and every such order for foreclosure under the hand of the Registrar General and entered in the Register Book shall have the effect of vesting in the mortgagee all the estate and interest of the mortgagor in the land mentioned in such order free from all right and equity of redemption on the part of the mortgagor or of any person claiming through or under him.

Application how made effective.

115. No action of ejectment or other action for the recovery of any land shall lie or be sustained against the person registered as proprietor thereof under the provisions of this Act except in any of the following cases that is to say—

Registered proprietor protected against ejectment except in certain cases.

- (1.) The case of a mortgagee as against a mortgagor in default.
- (2.) The case of an encumbrancee as against an encumbrancer in default.
- (3.) The case of a lessor as against a lessee in default.
- (4.) The case of a person deprived of any land by fraud as against the person registered as proprietor of such land through fraud or as against a person deriving otherwise than as a transferee *bonâ fide* for value from or through a person so registered through fraud.
- (5.) The case of a person deprived of or claiming any land included in any grant or certificate of title of other land by misdescription of such other land or of its boundaries as against the registered proprietor of such other land nor being a transferee thereof *bonâ fide* for value.
- (6.) The case of a registered proprietor claiming under the instrument of title prior in date of registration under the provisions of this Act in any case in which two or more grants or two or more certificates of title or a grant and a certificate of title may be registered under provisions of this Act in respect to the same land [and which priority shall be computed as hereinbefore directed in section 40.]

And in any case other than as aforesaid the production of the registered grant certificate of title or lease shall be held in every Court of Law or Equity to be an absolute bar and estoppel to any such action against the person named in such instrument as seised of or as registered proprietor or lessee of the land therein described any rule of law or equity to the contrary notwithstanding.

116. Whenever an [such] action shall be brought against a registered proprietor or person holding a grant or certificate of title in either of the last two cases excepted in the next preceding section if the defendant or any person through whom he claims shall have made improvements on the land since obtaining a certificate of title thereto then whether he admit or deny the plaintiff's title he may plead the fact of such improvements being made and may set a value thereon and also on the land as distinct therefrom and give evidence thereof at the trial and if a verdict be found for the plaintiff or his title be admitted the jury shall assess the value of the alleged improvements and shall also separately assess the value which the land would have possessed if the said improvements had not been made And no writ of possession shall issue in such case unless the plaintiff shall first pay into Court for the use of the defendant the value of the improvements so assessed deducting only the costs (if any) to which he shall be entitled in the action And if the plaintiff shall fail to make such payment within three months after verdict the judgment to which he is entitled shall thereafter be limited to the sum separately assessed as the value of the land together with costs of suit And the defendant shall upon satisfaction thereof be entitled to retain the land and improvements and in either case the Registrar General shall be entitled under the power hereinafter conferred of cancelling erroneous certificates to require to be delivered up any certificate of title which shall be held by the party whose right to the land shall have determined Provided that in every case in which the defendant shall be entitled to indemnity from the assurance fund the Registrar General shall be made a co-defendant as trustee of such fund and may defend the action either severally or jointly or may leave the defence wholly to his co-defendant as he shall see fit And in no case shall the assurance fund be liable to the principal defendant for any greater damages than he shall actually sustain as the result of such action after using all reasonable diligence in the defence thereof.

In case of ejectment of defendant who has made improvements their value may be assessed.

And plaintiff shall either pay for improvements or be restricted to damages for the loss of the unimproved land.

Registrar General to be made co-defendant.

Assurance fund to be liable only for actual loss sustained by defendant.

Compensation of party deprived of land.

117. Any person deprived of land or of any estate or interest in land in consequence of fraud or through the bringing of such land under the provisions of this Act or by the registration of any other person as proprietor of such land estate or interest or in consequence of any error omission or misdescription

cription in any certificate of title or in any entry or memorial in the Register Book may in any case in which such land has been included in two or more grants from the Crown bring and prosecute an action at law for the recovery of damages against such person as the Governor with the advice aforesaid may appoint as nominal defendant and in any other case against the person upon whose application such land was brought under the provisions of this Act or such erroneous registration was made or who acquired title to the estate or interest in question through such fraud error or misdescription. Provided always that in every case in which the fraud error or misdescription shall occur upon a transfer made for value the person making the transfer and receiving the value shall be regarded as the person upon whose application the certificate of title was issued to the transferee. And provided further that except in the case of fraud or of error occasioned by any omission misrepresentation or misdescription in the application of such person to bring such land under the provisions of this Act or to be registered as proprietor of such land estate or interest or in any instrument executed by him such person shall upon a transfer of such land *bonâ fide* for value cease to be liable for the payment of any damages which but for such transfer might have been recovered from him under the provisions hereinbefore contained and in such last-mentioned case and also in case the person against whom such action for damages is directed to be brought as aforesaid shall be dead or shall have been adjudged insolvent or cannot be found within the jurisdiction then and in any such case such damages with costs of action may be recovered out of the assurance fund by action against the Registrar General as nominal defendant.

Purchasers and mortgagees protected.

118. Nothing in this Act contained shall be so interpreted as to leave subject to action for recovery of damages as aforesaid or to action of ejectment or to deprivation of the estate or interest in respect to which he is registered as proprietor any purchaser or mortgagee [or encumbrancee] *bonâ fide* for valuable consideration of land under the provisions of this Act on the plea that his vendor or mortgagor may have been registered as proprietor or procured the registration of the transfer to such purchaser or mortgagee [or encumbrancee] through fraud or error or may have derived from or through a person registered as proprietor through fraud or error and this whether such fraud or error shall consist in wrong description of the boundaries or of the parcels of any land or otherwise howsoever.

When actions may lie against the Registrar General as nominal defendant.

119. Any person sustaining loss or damages through any omission mistake or misfeasance of the Registrar General or any of his officers or clerks in the execution of their respective duties under the provisions of this Act or by the registration of any other person as proprietor of such land or by any error omission or misdescription in any certificate of title or any entry or memorial in the Register Book and who by the provisions of this Act is barred from bringing action of ejectment or other action for the recovery of such land estate or interest may in any case in which the remedy by action for recovery of damages as hereinbefore provided is inapplicable bring an action against the Registrar General as nominal defendant for recovery of damages.

Notice of action.

120. In any case in which action for recovery of damages is permitted to be brought against the Registrar General as nominal defendant as hereinbefore provided notice in writing of such action and of the cause thereof shall be served upon such nominal defendant one month at least before the commencement of such action and if in any such action judgment be given in favor of the nominal defendant or the plaintiff discontinue or become nonsuit the plaintiff shall be liable to pay the full costs of defending such action and the same when taxed shall be levied in the name of the nominal defendant by the like process of execution as in other actions ~~on the case~~.

Deficiency of assurance fund supplied temporarily out of public fund.

121. If in any such action the plaintiff recover final judgment against such nominal defendant then the Court or Judge before whom such action may be tried shall certify the fact of such judgment and the amount of damages and costs recovered and the amount of such damages and costs shall be paid to the person recovering the same and shall be charged to the account of the assurance fund and in case the balance to the credit of the assurance fund shall be inadequate to defray the amount specified such sum as may be necessary for that purpose shall be paid out of the Consolidated Revenue Fund and the amount so advanced shall be repaid from the assurance fund as the same may thereafter accrue.

Limitation of actions.

122. No action for recovery of damages sustained through deprivation of land or of any estate or interest in land as hereinbefore described shall lie or be sustained against the Registrar General or against the assurance fund or against the person upon whose application such land was brought under the provisions of this Act or against the person who applied to be registered as proprietor in respect to such land or against the person certifying any instrument as aforesaid unless such action shall be commenced within the period of six years from the date of such deprivation [nor shall any such damages be recoverable in respect of the value of any improvements made in the land since such deprivation]. Provided nevertheless that any person being under the disability of coverture infancy unsoundness of mind or absence from the Colony may bring such action within six [any period not exceeding in any event twelve years if the same be commenced within three] years from the date on which such disability shall have ceased and the plaintiff in any such action at whatever time it may be brought or the plaintiff in action for the recovery of land shall be nonsuited in any case in which the deprivation complained of may have been occasioned through the bringing of land under the provisions of this Act if it shall be made to appear to the satisfaction of the Court before which such action shall be tried that such plaintiff or the persons through or under whom he claims title had notice by personal service or otherwise or was aware that application had been made to bring such land under the provisions of this Act and had wilfully or collusively [or negligently] omitted to lodge caveat forbidding the same or had allowed such caveat to lapse.

Moneys paid out of assurance fund may be recovered.

123. Whenever any amount has been paid out of the assurance fund on account of any person who may be dead such amount may be recovered from the estate of such person by action against his personal representatives in the name of the Registrar General and whenever such amount has been paid on account of a person who shall have been adjudged insolvent the amount so paid shall be considered to be a debt due from the estate of such insolvent and a certificate signed by the Colonial Treasurer certifying the fact of such payment out of the assurance fund and delivered to the Official Assignee shall be sufficient proof of such debt and whenever any amount has been paid out of the assurance fund on account of any person who may have absconded or who cannot be found within the jurisdiction of the Supreme Court and may have left any real or personal estate within the said Colony it shall be lawful for the said Court or a Judge thereof upon the application of the Registrar General and upon the production of a certificate signed by the said Treasurer certifying that the amount has been paid in satisfaction of a judgment against the Registrar General as nominal defendant to allow the Registrar General to sign judgment against such person.

person forthwith for the amount so paid out of the assurance fund together with the costs of the application and such judgment shall be final and signed in like manner as a final judgment by confession or default in an adverse suit and execution may issue immediately and if such person shall not have left real or personal estate within the said Colony sufficient to satisfy the amount for which execution may have been issued as aforesaid it shall be lawful for the Registrar General to recover such amount or the unrecovered balance thereof by action against such person at any time thereafter when he may be found within the jurisdiction of the Supreme Court.

124. The assurance fund shall not under any circumstances be liable for compensation for any loss damage or deprivation occasioned by the breach by a registered proprietor of any trust whether express implied or constructive nor in any case in which the same land may have been included in two or more grants from the Crown nor shall the assurance fund be liable in any case in which such loss or deprivation has been occasioned by any land being included in the same certificate of title with other land through misdescription of boundaries or parcels of any land unless in the case last aforesaid it shall be proved that the person liable for compensation and damages is dead or has absconded or has been adjudged insolvent or the Sheriff shall certify that such person is unable to pay the full amount awarded in any action for recovery of such compensation and damages.

Assurance fund only liable in certain cases.

125. The Registrar General shall not individually nor shall any person acting under his authority be liable to any action suit or proceeding for or in respect of any act or matter *bona fide* done or omitted to be done under this Act.

Registrar General not to be liable for acts done *bona fide*.

126. In case it shall appear to the satisfaction of the Registrar General that any certificate of title or other instrument has been issued in error or contains any misdescription of land or of boundaries or that any entry or endorsement has been made in error or any grant certificate of title or other instrument or that any such grant certificate instrument entry or endorsement has been fraudulently or wrongfully obtained or that any such grant certificate or instrument is fraudulently or wrongfully retained he may summon the person to whom such grant certificate or instrument has been so issued or by whom it has been so obtained or is retained to deliver up the same for the purpose of being cancelled or corrected as the case may require and in case such person shall refuse or neglect to comply with such summons or cannot be found the Registrar General may apply to a Judge of the Supreme Court to issue a summons for such person to appear before such Court or Judge and show cause why such grant or certificate or other instrument should not be delivered up to be cancelled or corrected as aforesaid and if such person when served with such summons shall neglect or refuse to attend before such Judge or Court at the time therein appointed it shall be lawful for such Judge to issue a warrant authorizing and directing the person so summoned to be apprehended and brought before a Judge of the Supreme Court for examination.

Holder of certificate or other instrument of title issued in error or wrongfully retained to show cause to Court against cancellation or correction.

127. Upon the appearance before the Court or Judge of any person summoned or brought up by virtue of a warrant as aforesaid it shall be lawful for the Court or Judge to examine such person upon oath and in case the same shall seem proper to order such person to deliver up such grant certificate of title or other instrument as aforesaid and upon refusal or neglect by such person to deliver up the same pursuant to such order to commit such person to the [any] common gaol of [within] the Colony and in such case or in case such person shall have absconded so that summons cannot be served upon him as hereinbefore directed the Registrar General shall if the circumstances of the case require it issue to the proprietor of the said land such certificate of title or other instrument as is herein provided to be issued in the case of any grant or certificate of title being lost mislaid or destroyed and shall enter in the Register Book notice of the issuing of the said certificate of title or other instrument and the circumstances under which the same was issued and such other particulars as he may deem necessary.

Court may order the delivery of the instrument to the Registrar General.

In case of neglect or refusal Registrar General may issue a fresh certificate or other instrument

128. Upon the recovery of any land estate or interest by any proceeding at Law or in Equity from the person registered as proprietor thereof it shall be lawful for the Court or Judge in any case in which such proceeding is not hereinbefore expressly barred to direct the Registrar General to cancel any certificate of title or other instrument or any entry or memorial in the Register Book relating to such land and to substitute such certificate of title or entry as the circumstances of the case may require and the Registrar General shall give effect to such order.

Court may direct cancellation of certificate or entry.

[128a. No transferee mortgagee or encumbrancee of any land erroneously described shall be entitled to object to the correction of any error or to claim compensation from the assurance fund in respect thereof where the correction shall be required to render the description consistent with itself or otherwise accurate as a description of the land actually understood by him to be the subject of transfer mortgage or encumbrance notwithstanding that the contents thereof or the lengths or bearings of the boundaries thereof may be erroneously stated in excess of the true measurement and no right of encroachment upon land of any adjacent proprietor shall in such case be maintainable by reason of such error.]

Error may be corrected without compensation in certain cases.

[128b. If any misdescription of land or boundaries shall be such as cannot be corrected without prejudice to some person entitled to indemnification under this Act it shall be lawful for the Registrar General or for the Supreme Court as the case may be to inquire and determine which of the conflicting claimants will sustain the less injury through deprivation of the land and thereupon either to authorize or refuse such correction as will have the effect of such less injury and in that case the person thereby deprived shall be entitled to compensation under the provisions herein contained to the extent only of such actual and less injury.]

Correction of error may be allowed or refused so as to occasion the least injury requiring compensation.

129. Every sworn valuator shall within fourteen days of the date of his appointment and before performing any duties under this Act take the following oath before the Registrar General who is hereby authorized to administer the same—

Oath of sworn valuator.

I do solemnly swear that I will faithfully and honestly and to the best of my skill and ability make any valuation required of me under the provisions of the "Real Property Act."

130. If any person fraudulently procures assists in fraudulently procuring or is privy to the fraudulent procurement of any certificate of title or other instrument or of any entry in the Register Book or of any erasure or alteration in any entry in the Register Book or in any instrument or form issued by the Registrar General or fraudulently uses assists in fraudulently using or is privy to the fraudulent using of any form purporting to be issued or sanctioned by the Registrar General or knowingly misleads or deceives any person hereinbefore authorized to demand explanation or information in respect to any land

Certain fraudulent acts to be deemed misdemeanors.

or the title to any land which is the subject of any application to bring the same under the provisions of this Act or in respect to which any dealing or transmission is proposed to be registered or recorded such person shall be guilty of a misdemeanor and shall incur a penalty not exceeding five hundred pounds or may at the discretion of the Court before whom the case may be tried be imprisoned for any period not exceeding three years and any certificate of title entry erasure or alteration so procured or made by fraud shall be void as between all parties or privies to such fraud.

Conviction not to affect civil remedy.

131. No proceeding or conviction of any act hereby declared to be a misdemeanor or a felony shall affect any remedy which any person aggrieved or injured by such act may be entitled to at law or in equity against the person who has committed such act or against his estate.

Forgery to be a felony.

132. If any person is guilty of the following offences or any of them (that is to say)—

- (1) Forges or procures to be forged or assists in forging the seal of the Registrar General or the name signature or handwriting of any officer of the Registry Office in cases where such officer is by this Act expressly or impliedly authorized to affix his signature—
- (2) Stamps or procures to be stamped or assists in stamping any document with any forged seal purporting to be of the Registry Office—
- (3) Forges or procures to be forged or assists in forging the name signature or handwriting of any person whomsoever to any instrument which is by this Act or in pursuance of any power contained in this Act expressly or impliedly authorized to be signed by such person—
- (4) Uses with an intention to defraud any person whomsoever any document upon which any impression or part of the impression of any seal of the Registry Office has been forged knowing the same to have been forged or any document the signature to which has been forged knowing the same to have been forged—

[(5) Fraudulently uses or procures to be used for any purpose the actual seal of the Registrar General in which case such fraudulent use shall be a like offence in all respects as a forgery thereof]—

Such person shall be guilty of felony and if any person is guilty of making a false oath or declaration concerning any matter or procedure made or done in pursuance of this Act such person shall be deemed guilty of perjury.

Punishment of felony.

133. Any person convicted of felony or perjury under this Act shall be liable to imprisonment for any term not exceeding four years and to be kept to hard labor or solitary confinement for any part of the period aforesaid.

Rules of Supreme Court to apply and same right of appeal as in ordinary actions. Supreme Court may make rules &c.

134. In the conduct of actions under this Act the same rules of procedure and practice shall apply and there shall be the same rights of appeal as are in force or exist for the time-being in respect of ordinary actions in the Court in which such action may be tried. Provided that the Judges of the Supreme Court shall have power from time to time to make rules and orders for regulating proceedings in the Supreme Court under this Act and from time to time to rescind alter or add to such rules and orders in like manner as at present.

Jurisdiction

135. Unless in any case herein otherwise expressly provided all offences against the provisions of this Act may be prosecuted and all penalties or sums of money imposed or declared to be due or owing by or under the provisions of the same may be sued for and recovered in the name of the Attorney or Solicitor General before any Court in the Colony having jurisdiction for punishment of offences of the like nature or for the recovery of penalties or sums of money of the like amount.

Commencement of Act.

136. This Act shall commence and take effect from and after the first day of January one thousand eight hundred and sixty-three.

EXPLANATORY MINUTES to accompany proposed Amendments of "THE REAL PROPERTY ACT,"
submitted by the EXAMINERS OF TITLES.—August, 1863.

PRELIMINARY REMARKS.

BEFORE proceeding to point out certain amendments in the Real Property Act, suggested by the experience of its working to the present time, and by a careful consideration of all its enactments with a view to further provision against future probable difficulties, it is only fair to observe that no blame can be justly cast upon any of those concerned in its preparation or enactment on account of existing deficiencies. Under all the circumstances it is rather a matter for surprise and congratulation that these are not more numerous. So entire a reconstruction as this measure involves, of a whole department of law and administration, could not possibly be perfected at once, inasmuch as nothing short of a close observation of its actual working by those engaged in its administration could supply the data for a satisfactory completion of all its details. It was chiefly because the Bill of Mr. Torrens had passed in South Australia into the domain of actual experience, that it was preferred to the otherwise more authoritative but untried measures of an English Attorney General and a Lord Chancellor. At the same time it was not to be expected that even by this means the South Australian Bill could have become a sufficient model for New South Wales, regarded as a final measure, and so as to dispense with the necessity, in addition, of local experience. The much greater antiquity and complexity of the New South Wales titles might alone be expected to bring to light new difficulties requiring special legislation. Nor is it enough to boast, however truly, that the Act as it is amounts to a vast improvement in the law, and confers an inestimable boon on the community. The acknowledged value of the measure is only an additional reason why those engaged in conducting it should make unreservedly every suggestion that occurs to them for its improvement, and this without being deterred by any fear of trouble or expense. If anything could justify the incurring of either, it must needs be the perfecting of a system which promises to carry out in all future time, at a minimum of cost, and with a maximum of security, all the myriads of transactions affecting property in land. But here the advantage of the individual is not the only thing to be considered. The protection of the assurance fund (or the public Treasury in the event of its insufficiency) against any liability in excess of the requirements of justice and a fair apportionment of the contribution to that fund in accordance with the risk against which it affords a security, are matters of equal importance, and require clear foresight and careful regulation. Particular attention is invited to those amendments which bear on this part of the subject, and to the further observations which will be made thereon in the sequel.

REMARKS EXPLANATORY OF THE PROPOSED AMENDMENTS TAKEN SEBRIATIM.

Section 3.—In the definition of "proprietor," the words "seised or possessed" are inconsistent with the following "in futurity or expectancy." The substitution of "entitled to" renders the language of the whole sentence correct.

Same section.—The distinction made between "mortgage" and "encumbrance," as it originally stands, is very arbitrary, and as regards the latter imperfect, not including charges by way of indemnity. Although it may be convenient to adhere to the limitation of the term "mortgage" to security for a mere debt, the word "encumbrance" properly includes both mortgage and every other charge. It is in fact so used in the Schedules, and this sufficiently shews the inconvenience of the artificially exclusive definition. To provide for charges on land by way of indemnity, a new form of encumbrance will be added to the Schedule.

Section 9.—If this restriction be proper there seems no reason why it should not apply to other officers of the department. The new Bill in preparation for introduction of the Torrens' system in Ireland, contains a general restriction, both against professional practice and sitting in the House of Commons.

Section 10.—Although no alteration has been made herein it is suggested whether a remark similar to that of section 9 does not fairly apply. With or without the oath the duties of examiners, draftsmen, searchers, and surveyors, all demand an equally solemn sense of responsibility for their right performance, and for the public security.

Section 11 (addition to paragraph 1).—The Victoria Amending Bill provides for a summons through a Judge without limitation to witnesses bound to produce deeds under covenant. It may not be expedient to vest in any functionary, below the rank of a Judge, a power to compel production of deeds in any other cases. But where the obligation rests on express covenant there can be no reason why the Registrar General, for convenience sake, should not have a co-ordinate power. This it is here proposed to give, inserting also afterwards, in its proper place, the Victoria clause, so as to comprehend other cases.

Section 11 (new paragraph 2).—There is every reason why the Registrar General should possess the same power of marking exhibits as a Judge receiving documentary evidence, and although the right may be seldom disputed it is better to place it beyond controversy.

Section 11 (paragraph 4, now 5).—As this section originally stands it is self-contradictory, for after authorizing correction in the Register Book, which can only apply to *existing* entries, it excepts *previous* entries, which amounts to the same thing. The only saving required is that of the rights secured to *bonâ fide* transferees for value; these are defined by other clauses, and need only be here referred to in general terms. This is the effect of the amendment.

Section 12, line 4.—This corresponds with an amendment inserted in the Victoria Amending Bill—only differing therefrom by containing a slight additional amendment, making it clearer that the duplicate need not be originally entered in a bound volume. This provision will remove some difficulty which has arisen in the construction of the original Act, both here and in Victoria.

Section 13.—The first amendment herein made is necessary to make the Act complete, and corresponds with the English Statute introduced by the Lord Chancellor.

Section 13.—The omission of the words "contained in the mortgage deed" is desirable to admit of application by mortgagees, whose powers of sale (equally valid and stringent with express powers) are implied under the new statutory provisions for shortening deeds.

Section 13 (as to notice of writs).—It is of great importance to relieve the Registrar General of all searches or inquiries beyond his own department. This is already provided as regards lands actually upon the new register, by section 92 in its present form. There is no reason why the same rule should not extend to lands under application to be brought on the register, and it is proposed to amend section 92 with this view. In that case the qualification proposed to be here omitted will not be applicable.

Section 13 (as to separate powers).—Without this provision a married woman's separate estate is deprived of its proper character.

Section 13 (as to separate examination).—This is a condition equally essential to the validity of the application with the joining of the husband; and it is not proposed to maintain the distinction which now prevails as to the cases in which it is legally required, *e.g.*, between those in which the wife conveys an estate, and those in which she directs or appoints. The distinction does not (it is submitted) rest on any valid principle, but on mere arbitrary technicality. The risk of sinister marital influence is the same in both cases, neither more nor less. In both the protection of a separate examination is either necessary or unnecessary, and should therefore either be required in both, or in both abolished altogether. The provision in this matter is made in section 96; an amendment of which is hereafter proposed.

Section 15 (addition at the end).—This is required to save the expense of a formal deed of appointment. There is a precedent in the Statute of Wills for overruling formalities specially prescribed by settlors and substituting those imposed by the Legislature as sufficient protection against fraud or precipitancy. The Trustees Property Act of 1862, section 13, extends a similar provision to deeds, but this would not dispense with sealing or delivery. It contains, however, a precautionary proviso, which it may perhaps be deemed proper to add to the present section before it finally passes.

New section, 15A.—This is taken (with the exception of the concluding paragraph, and of the reference to the Registrar General's concurrent powers) from the Victoria Amending Bill. (See previous remark on the amendment of section 11, paragraph 1.)

New section, 15B.—This addition to the Victorian provision is submitted to be desirable, particularly as the effect of the summons, if obeyed, will not be to bring the witness into the presence of the Judge—to whom he could submit his objections for a preliminary decision—but before the Registrar General or Examiner, who will not be entitled to adjudicate upon it. As the summons will of course issue on a *primâ facie* case, some means of relief on adverse cause shown, is essential to justice.

Section 16, lines 11 and 13.—(*Reduction of minimum period for notice.*)—There are many simple cases in which even the minimum delay imposed by the Act is a needless hardship, and an obstruction to parties wishing to avail themselves of the Act

Act for a speedy transfer of property of which the title may be perfectly simple (*e.g.* a grant from the Crown to the vendor,—with only one dealing, such as a mortgage satisfied and effectually released). If in such a case it is found to require a much longer time to procure a certificate of title to the purchaser, than to have a conveyance prepared in the ordinary way, the parties naturally feel aggrieved, and refuse to avail themselves of the Act. The amendment now proposed is contained in the new Victoria Bill, and its desirableness became obvious to the New South Wales Commissioners at their very first Board Meeting. To give it practical effect, however, it will be essential, by the further amendment next proposed in section 20, to bring the Post Office arrangements into harmony with the policy of the Act.

Section 18.—When small houses, let to fluctuating weekly tenants, have been brought under the Act, compliance with this provision has been found impracticable.

Section 20.—(*As to Post Office arrangements*)—Until this amendment be made the regulations of the Post Office Department must often have the effect of delaying for nearly three months certificates which the Board would feel justified in directing the earliest issue permitted by the Act, being now one month, and proposed to be reduced to fourteen days. This section (20) prescribes a second reference to the Board by the Registrar General, if the notices fail to be served, although it by no means follows that in all cases the Board would deem such service actually essential as a condition of their ultimate favourable decision. But as the Post Office Act requires that all letters not delivered shall remain one month at the post-town or address, and when afterwards returned to the Sydney office, shall be advertised another month before being opened and returned to the writer, nearly three months elapses before their fate is made known, and during this interval it remains uncertain whether or not there will be occasion to re-submit the case under section 20. The Postmaster General and the Government were, on the first discovery of this difficulty, applied to on the subject, but it has not been found possible to devise any remedy consistent with the provisions of the Post Office Act. Hence the necessity of this amendment.

Sections 21, 22, 23, 81, 82, 83, 84 (Caveats).—The provisions regarding caveats are at present confused, in consequence of a want of mutual connection and reference between the clauses relating to caveat against bringing land under the Act—sections 21, 22, and 23—and those relating in the main to subsequent dealings—sections 81, 82, 83, and 84. Section 81 relates solely to the latter class of caveats; and yet section 82, which begins by reference to “*such*” caveats (grammatically applicable only to those mentioned in section 81), goes on to employ language inclusive of the caveats provided for in section 21. The policy of the provision which it makes is however very questionable, if considered alike, and unqualifiedly applicable to both. Section 23 gives a caveator three months to institute proceedings in the ordinary way, and gives no power to interfere with the caveat if proceedings be commenced and notified within that time. If however section 82 is to apply to this class of caveats, so as to give a Judge summary and unqualified power to remove a caveat at any time, the effect of this may be to supersede altogether the functions of Court and Jury. The reasonable course would seem to be to vest in a Judge such a control over caveats as will enable him to protect both parties—the one against being entrapped by precipitation, the other against being harassed by a claim merely vexatious and devoid of any colour of foundation, or by unnecessary delay. The ordinary time fixed for lapse through inaction in the one class of cases, is three months—in the other, fourteen days; but as either may be too little or too much under special circumstances, it may be reasonable to give a Judge power to interfere at the instance of either party, to prolong or curtail the period, as the justice of the case may require. This is all that the Act need provide for. With respect to an ultimate decision between the parties on the merits, the policy of Mr. Torrens has been always avowed to be that of leaving disputes to the ordinary tribunals. In the clauses, as now drawn, there is a confusion between judicial interference with the caveat, and judicial determination of the question at issue between the parties. The former would only be called for adversely to the caveator in two cases:—First—the total want of any *prima facie* case for litigation; or, second—gross *laches* in prosecuting a claim, even though apparently well founded. In either of these cases a Judge might feel called upon to remove the caveat, and bar the claim. Anything beyond this would rest on the ordinary course of law, and does not require any special enactment. This distinction is borne in mind in the amendments now proposed, which should be considered in connection with those proposed in section 82. (*See subsequent remarks to that section.*)

New section, 23A.—There is a provision similar to this in the English Act, and it will often allow of parties obtaining great advantage from the new law, by narrowing the grounds of possible objection to a minimum, and within ascertained limits. In many cases the reserved objections, although fatal to an application for a clean certificate, may be of a nature offering no obstacle to sale or mortgage, and such a lapse of time or other circumstances may be likely soon to remove a provision for removing them from the certificate in that case is desirable, and will be proposed in addition to the above clause, which is nearly identical with that contained in the English statute. It differs from it in one respect, by giving the applicant an option of refusing such a qualified certificate, if he prefer to have the application wholly rejected. This removes an objection which has been made to the English provision, *viz.*, that in some particular cases the applicant for an improvement of title may find himself unexpectedly put off with one which he may himself consider inferior to his former position, as affording direct notice of defects which a purchaser might chance to overlook.

Section 25.—The object of these amendments is to extend the power conferred by the section to deeds produced as well as deposited. The noting of the required memorandum would often tend to avert error and defeat fraud. But as this may be equally secured by an endorsement on the last deed in a chain of titles, another amendment declares this to be a sufficient compliance with the Act.

New section, 25A.—This amendment is adopted from the 4th section of the Victoria Amending Bill. Its object is thus explained by its proposer, after referring to a Victorian enactment, which corresponds with the 25th section of the New South Wales, 22 Vict., No. 1, which releases from liability to action on covenants to produce deeds, any covenantor who may deposit them with the Registrar General in the way thereby authorized. He says:—“A surrender of title deeds to the Registrar General under the Real Property Act, would leave the applicant without the means of performing any previous covenant to produce, and defenceless against proceedings upon such covenant, and would therefore deter persons from becoming applicants, although it may not be quite clear that the deposit under this Act would not satisfy the former, without express enactment, it is highly desirable to preclude all doubt on this point.”

New section, 25B.—There seems no valid reason why the Crown should gratuitously take over the legal liability which now attaches under the ordinary covenants for title, or why, in bringing a title before the Commissioners, the covenant, a bond of indemnity, of a previous owner should not be offered to the Crown for whatever it is worth, as one feature of the title to be decided on. In some cases bonds and covenants perfect a title by fixing with liability the same person who, but for that liability, might be induced to enforce some claim on the land. The liability and the claim then neutralize each other, and at all events the position of such persons ought not to be altered by a cancellation under the Act.

Section 27.—This amendment rectifies what is probably a clerical error. The Victoria Bill thus amends it.

New section 27A.—The principle of this amendment is identical with that governing the action of Life and Fire Assurance Companies, who require augmented premiums proportioned to various gradations of risk. There are many titles fairly marketable, and which a Court might probably even compel a purchaser to accept, which are yet very far removed in the degree of immunity from risk from that of a title held under a recent Crown grant. No title derived through a long series of years and transactions can rest as presented, *ex parte*, by a vendor, or applicant for a certificate of title, upon more than *prima facie* evidence, and the risk of dormant undiscovered objections, is of necessity augmented in proportion to the number and complexity of the various links, and also by time, so long as it falls short of the period of statutory limitation. To fix a half-penny in the pound as a common standard for all titles can therefore scarcely be reasonable. One title, for example, may consist of a grant from the Crown to A in 1860, who sold to the applicant B in 1862; a search of the register for one year against B, and for two years against A is, in this case, all that is required. Another title may originate in a grant from the Crown to X in 1795, followed by obscure half obliterated transfers to successive purchasers up to 1830; afterwards an insolvency of the owner may intervene, and a sale by his trustees—or a Sheriff may sell under an execution—or litigation may have then arisen, and the legal proceedings may be imported into the title; or a pedigree, traced through relations whose births, marriages, and deaths, in remote countries, may be evidenced by various declarations, affidavits, and certificates, all apparently authentic, but possibly fraudulent or mistaken; and the applicant may, in addition, have cut up his property into 100 allotments, and after selling fifty in detached and scattered positions, may apply for a title to the remainder, thus necessitating a search of the registry for all the alienations, and a collation of the various parcels and boundaries. The above details are not imaginary, having already come before the Examiners. Even a title involving these complexities may after much troublesome investigation be sufficiently sustained to disentitle the Examiners from rejecting it; at the same time can it, upon any possible grounds, be considered on a par with the title first referred to? This question of itself sufficiently explains and justifies the proposed amendment. The considerations here brought forward are quite peculiar to New South Wales, as the elder Colony; very few, if any, of the complicated titles referred to, can have existence in South Australia, Victoria, or Queensland; and it by no means follows,

follows, that the same or even double the assurance fee, that is appropriate to the average titles in those Colonies, is sufficient for all those titles in New South Wales, of which the Examiners would be unable to vindicate the rejection. This they can hardly do when the title is such as in the ordinary course of business, is fairly marketable; at the same time the admission that a title is fairly marketable, and that it is prudent to insure it at so low a premium as a halfpenny in the pound (1 in 480), are by no means equivalent propositions.

N.B.—Since the above remarks were written an amendment to the effect proposed has been inserted in the new Act passed in Victoria.

Section 29.—This amendment corresponds with one contained in the Victoria Amending Bill, and is no doubt required to convey the proper meaning of the provision.

Section 32.—This cannot be carried out as originally framed without introducing more complexity than it seems intended to avert. To enter upon the same folium with the certificate of the fee, all the ramifications of the title of possibly numerous leasehold interests would be often difficult, and sometimes impossible, and would secure no adequate compensatory advantage. It is enough if the instrument first creating the leasehold interest be entered on the certificate of the reversory estate, with a reference to the book and folium assigned to the former. Subsidiary dealings with the leasehold would then be entered on its own appropriate folium.

Section 33.—The words at the end of this section declaring the immateriality of errors, &c., although proper with regard to the acts of the Registrar General, are too wide with regard to errors in the application, unless limited to transferees for value. A distinction is therefore required, which the amendment introduces.

New section, 39A.—This amendment is, for the most part, taken from the Victoria Amending Bill, and will prevent the necessity of encumbering the form of certificate with the present exception, which refers to the original grant from the Crown. It may indeed be questioned whether quit-rent should be included in the implication, and whether it should not be, when unredeemed (if the certificate be not actually refused on this account), entered as a specific encumbrance. Its non-mention would then indicate its non-existence; otherwise the certificate will not preclude the necessity of a reference by a purchaser or his solicitor to the original grant, which no longer accompanies the title. This has been already done in some cases, and complained of as an imperfection in the title conferred by certificate. The objection might perhaps be remedied by leaving the implication as it stands, but providing some convenient method for indorsing a memorandum of discharge or freedom from quit-rent on the certificate. Where the original grant was by purchase, a statement of this would alone negative quit-rent. In cases of redemption the Registrar General might be authorized to endorse the fact, when ascertained, on payment of some moderate fee.

Section 40, line 5.—If this be, as is presumed, the intention of the Act, it should be unambiguously expressed.

Section 115.—The exception as to easements is omitted, being covered by an allusion to the preceding section in which this is comprised. The exception which has reference to the right of priority in the case of conflicting certificates is not omitted, but removed to the end of the section, in order to render it more convenient to add an explanatory memorandum as to the manner in which the priority is to be computed. In order to understand fully the effect of this amendment it will be desirable to review the grounds of other limitations upon the absolute indefeasibility of a title under the Act, which are already recognized in the same section. The popular idea of the new system, as first projected, was that this indefeasibility was to amount to absolute infallibility of title in all cases, and this undue pretension naturally led many, who could perceive at a glance its impracticability, to ridicule the whole system as utopian. It is by no means acting the part of a true friend to this great reform in the law, to slur over any of its inevitable difficulties. These might, indeed, be far greater without approaching in magnitude those which have been painfully endured for generations under the old law. By their candid admission and legislative anticipation provision may be at once made to render them as few and innocuous as the nature of the case will admit; whereas, if blindly left to take their own chance, they might hereafter come upon the public by surprise, and throw discredit on the whole system. Apart from and before the introduction of the exceptions and limitations declared in section 115, an indefeasible title imparted the entire extinguishment of all prior dormant claims, so far at least as to afford to a purchaser a perfect immunity therefrom, whatever right of compensation from a distinct source might be reserved to any person whose right-of-action might be thus barred. The phrase was applied to the title conferred by the Irish Incumbered Estates Act, and was thence transferred to the title of corresponding character, to be conferred by the first certificate issued after investigation, upon bringing land under the new Real Property Acts in England and Australia. Were it possible to stop the machinery of the new system at this point, every desirable end might be admitted to be attained, and no further difficulty would remain for solution. But with regard to certificates to be afterwards issued upon transfers and other dealings, it was forgotten that each certificate would, in its own turn, become successively a title prior to those subsequently issued, and therefore liable (if the principle of superseding a prior title in order to confer infallibility upon one newly granted, were to be fully carried out) to be overthrown by any fraud or blunder which might bring a subsequent certificate into conflict with itself. It would thus, in truth, be the exchange of a title defeasible, at the worst, by the discovery of anterior claims, against which (at whatever expense) protection was possible by careful investigation,—for a title defeasible under the new law by *ex post facto* fraud or error, wholly out of reach and control. A promise of compensation from an insurance fund could not be fairly regarded as an equivalent for the land itself in such a case as this. It was widely distinguishable from that of a dormant claimant out of possession, whose rights had been inadvertently overlooked in the investigation preliminary to the issue of the first certificate. That was a compensation merely of the right of a person out of possession to bring ejection. In the other case the owner and improver of property in actual possession would be liable to be suddenly ejected from his home by a stranger claiming through error, or even through fraud, if being a purchaser from its proprietor he was himself innocent of the fraud. When the new system was first discussed in New South Wales it was open to this fatal objection. The writer of these observations procured an amendment removing it, to be made in the Bill which passed through the Legislative Council in the year 1861 and first Session of 1862, on the model of Sir Hugh Cairn's English measure. When the Torrens Bill was presented for adoption in this colony it had already received a corresponding amendment, namely, that appearing in paragraph 6 of section 115 of the Act as passed. By that section the indefeasibility of a title, under certificate, is surrendered to paramount reasons of justice or policy, in the following cases (independently of those arising from the relations created by lease and mortgage, as to which there can be no controversy)—

1. Cases of fraud, unless as against a *bonâ fide* transferee.
2. Cases of misdescribed boundaries, with the like exception.
3. Cases of conflicting certificate, in which the *former* is to prevail.

It will however become evident, on consideration, that without some further provision the protection given by this last exception to a prior certificate will be found practically to fall short of what ostensibly, and on just principle, is intended. For although the holder of the first certificate will—so long as he individually retains it—secure a title unaffected by subsequent error *inter alios acta*, yet if he sell the land, and the purchaser obtain a new certificate, this new certificate will not, as the law now stands, retain the immunity of that for which it was substituted, but any intervening error committed to its prejudice would prevail against it. The same result would follow as against even the holder of the first certificate, if, on the sale of part of his land he surrenders under the ordinary routine of the law his old certificate, and obtains a new one for the retained residue. Unless in such case he be further protected by the operation of the amendment he would lose his priority despite of the policy of the law intended in the 6th paragraph of section 15 as it now stands.

New section, 41A.—This amendment is proposed in the Victoria Amending Bill to check personation. The practice which it prescribes is in fact already adopted by the Registrar General in New South Wales, but it may be as well to give it the sanction of positive law.

New section, 41B.—This amendment is also adopted from the Victoria Bill; and a corresponding enactment is understood to have been passed in South Australia.

Section 43.—Why this exception? However unusual or unlikely the annexure of a charge on one parcel of land—to be held for the benefit of the owner for the time-being of another—there is no reason why, if it do exist, it should not be noted as this clause directs with regard to other rights.

Section 45.—This qualification “if practicable” is required, inasmuch as in some cases the traces of boundaries of the original grants have been obscured and superseded by new divisions of property, affording readier means of reference and definition.

Section 48.—There cannot, it is presumed, be an intention to sanction the transfer of any charge to the prejudice of a person by whom it has been reduced or extinguished by payment, even though such partial or full satisfaction has not been entered on the register. The risk of fraud and error would be greater if this were promised than if the onus of inquiry were thrown on the purchaser. Either way the clause should be explicit, and it requires amendment to make it so.

Section 53, line 1.—This amendment is adopted from the Victoria Bill, and is evidently an improvement in the clause.

Section 54.—The Act makes no clear provision for instruments securing payment of money under contingencies, or by way of indemnity. It would be difficult to accommodate either of the forms of the original Schedule to this purpose—or indeed any form that could be conveniently registered with all its details. It is therefore desirable to provide a form which will admit of reference to an unregistered instrument, and merely provide for the purpose of registration the means of ascertaining in whom the powers of sale, &c., are vested in case of default, and whose declaration of the fact of default shall be conclusive evidence in support of their exercise for purposes of title.

Section 56.—The Victoria Amending Act of 1863 (section 11) amends the latter part of this clause with respect to application of moneys. It may be desirable to adopt this amendment here, but it is now too late conveniently to alter the present printed Bill by its insertion.

Section 57.—The requiring of proof of default, &c., “to the satisfaction of the Registrar General,” is in conflict with the absolute power of sale conferred (as regards purchaser’s title) by the preceding section, and by the existing system of conveying, on which that clause is founded. It would, moreover, often embarrass the Registrar General with the investigation of disputes quite out of his province. The amendment gives due effect to the power, while it affords as much protection against fraud or harshness as the present system admits. If more be stipulated for in special cases, it can be secured by means of an appropriate caveat, as to which see remarks on section 81 to 84.

Section 58, line 4.—There is at present no distinct power of leasing, and as every authority will now depend on statutory power, and not on tenure of estate, it is desirable to be explicit.

Section 58, line 6.—The reference to the power *hereinafter contained* only creates obscurity, as there is no such power given expressly, although it may be covered by the word “remedies” in the next section.

Section 58, line 8.—The conferring of the right to sue in ejectment after sale is erroneous, as this right should then pass to the purchaser. The amendments at the end effect this.

Section 66.—This section at present goes further than is necessary or desirable in prohibiting notice of trust on the register. The only object of such prohibition is to prevent the register being clogged with the details, or the title of transferees prejudiced by the notice. This end being fully attained, mere notice of the fact of a trust existing, or the affording of a *clue* to the particulars, by reference to the unregistered instrument containing them, may not only be allowed but encouraged. Agents, assignees, and executors, might thus often be saved much trouble and liability to error in dealing with the property of constituents, insolvents, or testators. And it is desirable also to retain by this degree of note some *moral* safeguard against fraud, even though the *legal* safeguard be entirely handed over to the caveat system. There will no doubt be many cases in which a temptation that would be sufficient to induce a trustee to use for his own purposes property totally unmarked by notice of a trust, would fail to do so, and in which he would shrink from the risk of detection and punishment, if the documents of title presented a clue to the trust. The section, as now altered, retains the advantage of such notice without any of its disadvantages.

New section 67.—Without some provision of this sort the other clauses may give an impression that the Supreme Court must be applied to in all cases. Where the appointment of the new trustee is duly made by the person entitled under will or settlement to fill a vacancy, there is no reason why the Registrar General should not complete the transfer of the property in accordance therewith as a mere matter of routine.

Section 69.—The present provisions regarding attorneys have reference only to dealings with land after it has been placed under the Act. The object of the amendment is to embrace applications under section 13. A second form of power of attorney has been placed in the Schedule to meet a difficulty felt in applying the original form to general powers of attorney. It appears to have been equally felt in Victoria, as section 16 of the new Act there passed is addressed to the same point.

New section, 69A.—This is taken, with slight modification, from a clause in the new Victoria Bill.

Section 75A.—Section 76 provides for the complex case of surrender of an insolvent’s lease through a mortgagee, but the Act makes none for the primary case of surrender by assignees direct to the lessor. This seems equally required, and is supplied by the new section.

Section 77.—A statutory declaration negating a settlement would, in many cases, be required by a purchaser of the wife’s real estate, and it may be proper that it should be supplied to the Registrar General before issuing a certificate to the husband.

Section 79.—The amendments proposed in this section are required to make the clause consistent with the new Real Estate Intestacy Act. Also to comprise leasehold estates when capable of registration,—and interests of such a nature as to be registered by entry without entitling to a distinct certificate.

Section 80.—These amendments are required to bring the clause into harmony with the preceding amended clause.

Sections 81 to 84.—(See remarks on sections 21 to 23, *ante*.)—There is a discrepancy between the term of notice given in Schedule M (twenty-one days) and that prescribed in section 82, for the lapse of a caveat if no action be taken thereon, viz., fourteen days. Mr. Torrens, in his evidence before the Select Committee, states that a settlor or beneficiary may protect his interest by forbidding trustees to deal with land without notice for a *month or more*. But if the twenty-one days be intended as a discretionary period, it is improperly inserted in a form which extends also caveats that are controlled by the fourteen days restriction of section 82. The special reference to notice in section 81 is indeed out of place, for in regard to that class of cases to which the restriction of section 82 does not apply, a required notice is only one of numerous other modifications which may be attached to the caveat by those entitled, if they please to enter an absolute caveat. It is, however, desirable to limit these modifications to some simple and easily verified condition, in order to avoid casting on the Registrar General the burthen of investigating the minutiae of trusts. If it should be found convenient hereafter to confide to the law officers of the Land Titles Department some of the judicial functions connected with the administration of the Act, additional facilities may perhaps be afforded for carrying out the details of most arrangements under the new system. In the meantime there can be no objection to a caveat prescribing the written consent of one or more persons (either including the caveator or not) as a condition of any dealing, or it may be intended that such consent shall be taken to be implied, if no objection be made after a prescribed notice. Under protection of a caveat of this nature every species of trust may be effectually created and guarded without infringing on the simplicity of legal transfer. The protection against fraud will be at least as complete as under the existing system, according to which every well drawn deed has contained (and the law itself under a recent statute implies) a provision exonerating purchasers as fully as does the Real Property Act. The only safeguard of the old system consisted in prescribing, in certain cases, the written consent of certain of the adult beneficiaries, and it is easy to retain this under the new system.

Caveats lodged by other persons, strangers to the legal title, come under quite a different rule, and it is necessary to guard carefully against their interfering vexatiously with the transfer of property. These are, therefore, made to lapse in fourteen days after notice of any intended dealing, unless in the mean-time a Judge’s order be obtained to the contrary. To render this provision consistent it will be proper to require that every caveat of this class shall fix some address in Sydney for service of notice.

In the original Act beneficiaries under will or settlement are allowed to enter at any time a caveat of the same absolute nature as the settlor himself. This would give undue power to persons having slight or indirect claims to embarrass and delay the matured arrangements of parties more deeply interested. If settlors originating a trust, or transferrors or transferees acting on the express terms of any agreement incident to a security or other qualified alienation, be allowed to guard their fulfilment by special caveat, it will be sufficient to give the remedy of the ordinary fourteen days caveat to other persons.

As the Act now stands it is by no means clear that an ordinary caveat may not be vexatiously kept alive after the lapse of the fourteen days by entry of a new one. A clause is now inserted to prevent this, but without prejudice to the power of the Registrar General or a Judge, either of whom may, if justice appear to require it, keep a caveat on foot.

Caveats will thus be of four classes,—

1. Against bringing land under the Act—

Lapses in three months, unless suit commenced and notified—or prolonged by Judge’s order.

Removable by Judge’s order at any time for want of *prima facie* case—or gross *laches* in proceeding.

2. Settlor’s caveat or caveat entered by consent of registered proprietor—

Prevents dealing unless removed—(a.) By Judge’s order. (b.) By direct consent of parties named. (c.) By implied consent through non-intervention after prescribed notice.

3. Ordinary caveat—

Lapses in fourteen days after notice, unless prolonged by Judge’s order.

Removable by Judge’s order at any time.

4. Registrar General’s caveat continues to preclude any dealing which he may deem fraudulent or improper, unless overruled by Judge’s order. Section

Section 85.—This section authorizes the creation of powers of appointment by registered instruments, without regard to the technicalities of the Statute of Uses. This may be very convenient, and get rid of much of the objection which has been made to the new system as inapplicable to the details of family settlements. But it has apparently been overlooked that powers are often made dependent on facts and circumstances which the Registrar General would find as difficult to investigate for purposes of title as those involved in details of ordinary trusts. The permission to create powers can therefore be conceded only by excluding from the legal title all such qualifications, and leaving the exercise of powers in disregard of them, to be dealt with in the same manner as ordinary breaches of trust. The amendment effects this object.

New Sections, 85A and 85B.—Complaint has been made in some quarters that certain facilities for making settlements on married women will be impaired by the new system. Under the previous law it has been easy to give a married woman absolute control over property for purposes of sale or mortgage by limiting it to such uses as she shall appoint. Section 85 provides that what might have been previously done by limitation of use may be done by direct transfer; but it does not fully meet this case of a wife's separate estate. The proposed new sections are intended to do this, inclusive of a provision against anticipation, and for suing and being sued by tenants on leases and contracts relating to the property. The same ends may be answered through a trustee, or by appropriate caveat. But these clauses may afford additional facilities to those who choose to take advantage of them.

Section 86.—It will be remembered that some controversy arose about this section when passing. The words now proposed to be omitted were inserted in the Legislative Council. Mr. Torrens communicated an objection, by telegram, before the last reading in the Assembly, but the clause was passed as it left the Council. The proviso effects the purpose intended by the Council, without being open to the objection of Mr. Torrens.

Section 88A.—Now that the real estate of intestates is divisible as personalty under the Act of last Session, it may be convenient to provide a form by which those who would prefer that their property should pass to an eldest son may effect this without the trouble of a will or settlement. A certificate under this section would effect this purpose. It is to be observed, however, that a child, or lineal heir only, would take under this clause. On failure of lineal issue the new law would still vest it in the personal representatives, unless controlled by some will or settlement. If the amendment proposed in section 96 be adopted with regard to the barring of entails by will generally, the last paragraph of this new section will not be necessary.

Section 92.—(See remarks on the proposed alteration of section 13.)—The clause is now made to apply not only to dealings under the Act, but also to applications to place land under it. There does not appear any reason why in either case the Registrar General's action should be fettered until proper notice be served upon him.

Sections 94 and 95.—The amendments here proposed are required to remove some confusion and ambiguity as to the method of proving documents.

Section 96.—The 96th section, as now drawn, is imperfect, as not including applications to bring land under the Act. The persons legally authorized require also to be more clearly designated, and there is no reason why additional facilities should not be afforded by including with them all the persons entrusted with the authentication of instruments in other respects, by section 94. The amendment proposed in the Victoria Bill contemplates the appointment of Special Commissioners by the Registrar of Titles, but if the numerous functionaries mentioned in the present and former Acts are all rendered competent, no serious difficulty can arise requiring special appointments either in the Colony or abroad. As to the cases in which separate acknowledgment should be required see previous remarks in section 13.

New section 96.—There seems no valid reason why a person who can bar an estate tail for his own purposes, by a mere acknowledgment of intention (added to the forms of an ordinary deed) before one set of public functionaries, should not be equally entitled to do so by any instrument duly authenticated as required for ordinary transfers under this Act. Successive relaxations in the law of entail have practically reduced it to a mere designation of the course of succession in default of other disposition, and there is no objection in keeping up the farce of a restriction which merely imposes trouble and risk of error.

New sections 96A and 96B.—The effect of section 96A will be materially to simplify the bringing land under the Act, or its transfer, particularly the cases where dower attaches. The provisions regarding dower in section 96B are a transcript of section 20 of the Victoria Amending Bill. Some of its provisions originated with the Examiners of Titles in Victoria, and appeared in early draft of their Bill, which was courteously sent to one of the New South Wales Examiners for perusal. Several additional amendments were thereupon suggested by him, and their substance was incorporated in the Victoria Bill, before it was brought into the Assembly of that Colony. The following explanation and analysis of its object and contents as there given, may be conveniently cited:—“The object of this clause is to avoid the difficulties which arise in dealing with land ‘owing to dower rights, and also to induce those landed proprietors who have already, at considerable expense, barred their ‘wives’ rights to dower, to bring the discharged properties under the Act without subjecting the land to a newly arising dower ‘right in consequence * * * * * Legislation should provide for the following cases:—

“(a.) An owner married before 1837, whose wife's right to dower has not been barred.

“(b.) The like where the right has been actually barred.

“(c.) The like where the right has not arisen or attached (such as a vendee who has not had a conveyance) or may be ‘defeated (such as under a conveyance to such uses as the husband may appoint, and in default of appointment to ‘him in fee.)

“(d.) An owner, whether married before or since 1st January, 1837, acquiring land under the Real Property Act, whether ‘by grant or transfer. It is proposed in the first case (a) the certificate of title, &c., should be made subject to the ‘wife's right, that is, unless she consents to relinquish it, to facilitate which is the object of the preceding new section, ‘and that in all the other cases the dower should be subject to the dealings of the husband, whether married before or ‘since 1837. Just like the present ownership of husbands married since 1st January, 1837, over their other lands. ‘Where, however, the second case (b) occurs, the widow of the applicant is not to have her barred right renewed by ‘the land being brought under the Act.”

Section 99, line 2.—This amendment will remove a difficulty which has been felt both in Sydney and Melbourne. The Victoria Bill contains the same amendment.

Section 101.—The propriety of this amendment is self-evident. It is contained in the Victoria Bill.

Section 107.—Without this addition there may be some question whether an appeal be given in the matters referred to although none can exist as to such appeal being desirable.

Section 108.—These amendments are for the most part an adaption of section 17 of the English statute 25 and 26 Victoria, c. 53.

Section 109.—The Victoria Amending Bill proposes to vest the judicial power of the Trustee Act in the newly constituted officer of “Registrar of Titles.” Should this course be followed in New South Wales the reference to the Trustee Act in this section may be omitted, but it may stand in other respects as applicable to any other vesting orders of the Supreme Court or a Judge; or, if the jurisdiction of the Court and Registrar of Titles be left concurrent or co-ordinate, the clause may remain as it is. The amendment is made to embrace all vesting orders, as the same principle would apply in any other case in which the Court might possess a power of this nature, whether already existing or to be created by any future statute.

Section 110.—This clause seems quite out of place in this Act. There can be no reason why the relative obligations of trustee and cestique trust in the matters to which this enactment refers, should be altered by the fact of the title consisting of a single certificate, instead of a box full of deeds. Any Court of Law or Equity will surely recognize in the cestique trust the same right to sue in the trustee's name, and the trustee the same right to indemnity without the special provision here made. But if necessary at all, why is it limited to the particular class of trusts created under section 109? If it be retained it should be more comprehensive; but as it is evidently useless and beyond the scope of the Act it will be better to omit it altogether.

Section 112.—If the exceptional circumstances recognized in section 115 are to prevail against a title, their proof on a trial or hearing of action, or for suit damages or specific performance, should be a sufficient defence on the part of a purchaser, notwithstanding his contract was made before he had notice. Otherwise, one or other of these two evils would result: He would defraud the rightful owner by conferring a title valid against him, pocketing the money; or he would defraud the purchaser by compelling payment for land he would be unable to retain. It is hardly necessary to inquire which result would follow. It might depend on the special circumstances. The risk of either equally demands the amendment.

Section 115, paragraph 6.—The amendment at the close is explained in remarks on section 40.

Section 122 (as to improvements).—This may perhaps be implied, but the Act cannot be too clear in protecting the assurance fund in every respect consistent with reason and equity.

Section 122 (as to privilege of disability).—The law, as section 122 now stands, gives six years from the time that disability ceases—the same period that is originally given to a person *sui juris*. The general statute of limitations, affecting titles which have not passed under this Act, limits twenty years as the ordinary term. Ten years (or half that term additional, if necessary, in case of disability) from the time of the disability ceasing, but with an ulterior provision, rendering forty years, or double the ordinary term, a final bar against all claims (continued disability notwithstanding). Now as section 122, in its present form, gives six years from the time of disability ceasing (whenever that may be), without naming any period as a conclusive estoppel, it would, if not controlled by the previous law, actually carry the privilege of disability beyond that conferred by the general statute indefinitely, that is even beyond the forty years under certain possible contingencies. This surely cannot have been intended. It could hardly indeed have been intended to abstain from contracting the period of limitation in this class of cases in some proportion to the contraction effected in others. When the principle of a statute of limitation is once recognized, and it is admitted to be consistent with justice to sacrifice occasionally remote and obscure claims to the policy of establishing the general security of property, and encouraging its improvement and free exchange, it seems hard to understand why there should be so long a period allowed for the raking up of dormant claims of absentees and others to the prejudice of persons who inhabit, improve, and sell property in ignorance of their rights or even existence. The inconsistency is greater in a remote colony, where the difficulty of tracing the relatives of a deceased owner of land born and educated in England, or elsewhere, so frequently augments the chance of concealed claims beyond the reach of a purchaser's investigation. This was strongly urged by the writer before a Select Committee of the old Legislative Council, in the year 1849,* and he has not seen any reason to change his opinion. The present amendment merely proposes to render the clause consistent with itself, as a reduction of the ordinary term of twenty years to six, and then following in other respects the analogy of the old statute. As already explained, twenty, ten, and forty are, according to that statute, the several terms of ordinary limitation of allowance for disability, and of final estoppel. The corresponding terms under the present Act will therefore be six, three, and twelve. By this means the contingent liability of the assurance fund will absolutely cease at the end of twelve years, while it will otherwise remain liable for forty years, if not longer, to claims of the very nature which are least likely to be detected, on account of their obscurity. To remedy this is the effect of the amendment here proposed. It may be further observed, that even if six years were fixed absolutely, without any allowance for disability, it would not go so far as the ancient law of England, which in the case of a fine with proclamations, rendered five years non-claim an absolute bar; and in the present case it is submitted that the investigation, advertisements, and notices which precede the certificate of title, are more than an equivalent for the obsolete formality above referred to.

Section 128A.—The object of this section is to prevent a construction being placed on the rule of indefeasible title, which might work great injustice and cast unreasonable burdens on the assurance fund. If, as a general rule, all excessive measurements of lines or areas in descriptions are to be made good by encroachment on adjacent properties, it will frequently result in a purchaser obtaining, not only what he was induced to buy, in good faith, through a vendor's erroneous assumption of title, but what he had no intention of buying, and finds unexpectedly thrust upon him by a mere blunder. If an encroachment has actually been made by a seller who embodies such encroachment in the description under which he sells, it may in certain cases be just that the purchaser shall either retain the whole land, or, if deprived of it by the true owner, obtain compensation. But if no actual encroachment has been made before the purchase, and it is only attempted to be carried out in order to give effect to a clerical or arithmetical blunder the case is wholly different, and the object of this amendment is to maintain this just distinction.

Section 128B.—The object of this section is the same with that of section 116, which was introduced in the original Act, on the motion of the writer, as a then member of the Legislature. In selecting which of two innocent parties shall suffer it cannot be wrong, *ceteris paribus*, to select the one who will suffer the least, and if the sufferer is to be indemnified by the public, the public interest requires the same thing.

CONCLUDING REMARKS.

It would render these suggestions incomplete if they closed without some reference to the proposals embodied in the Victoria Amending Bill, for placing the salaries of the Examiners on the Consolidated Revenue, independent of annual vote, and for conferring additional powers upon the Senior Examiner under the new designation of "Commissioner of Titles."

The Victoria Bill provides as to this officer and his successors, as follows:—

- (s. 24.) That he shall be called the Commissioner of Titles—and shall hold his office during good behaviour but may be removed on an address presented to the Governor by both Houses of Parliament—that upon any vacancy occurring in such office the Governor in Council may appoint a person to fill such vacancy—that there be paid to the Commissioner of Titles a salary of _____ a year and that such salary shall be charged on and payable out of the Consolidated Revenue of _____ —that all Courts Judges and persons acting judicially shall take notice of the signature of the Commissioner of Titles and of any assistant Registrar General—that the Commissioner of Titles shall have and exercise the like jurisdiction and powers and perform the like duties as is and are given to and imposed upon the Land Titles Commissioner by the said Act and may with the consent of the Governor in Council from time to time make such alterations in the several forms of instruments prescribed in the Schedule to the said Act as he may deem requisite and have and exercise all the judicial functions and powers conferred on and given to the Registrar General by the said Act as to the materiality of instruments and the construction of instruments as affecting land or the title thereto and the sufficiency of evidence and proofs and all other judicial functions and powers whether they be of the same nature or character as those particularly referred to or not.
- (s. 25.) That after the passing of this Act the jurisdiction powers and duties thereby conferred upon the Commissioner of Titles should cease to be exercised and performed by the Land Titles Commissioner.
- (s. 30.) That the twenty-fifth section of the Real Property Act should be read and construed as if the words "or of the Commissioner of Titles" had been added to such section at the end thereof and the power given to the Supreme Court or a Judge thereof by the sixty-sixth and sixty-seventh sections of the Act (67 and 68 in N. S. Wales Act) may be exercised by the Commissioner of Titles.
- (s. 31.) That as to any land under the provisions of the Act the Commissioner of Titles may exercise all such powers as are vested in the Supreme Court by the Trustee Act of one thousand eight hundred and fifty-six (in N. S. Wales 1852) and it shall be lawful for him to make the like orders under the one hundred and ninth section of the Real Property Act as are thereby authorized to be made by the Supreme Court or a Judge thereof.

The grounds on which these alterations are recommended appear from a letter addressed by Mr. Carter, the Senior Examiner, to the Attorney General of Victoria, laid before the Parliament of that Colony in December last. Of this the following is an extract:—

"I think an improvement would be made if one of the legal advisers had conferred on him the powers, &c., of the Lands Titles Commissioners, either by way of substitution or concurrently, as the Legislature may deem expedient.

"The functions of the Commissioners have reference chiefly to the number and channels of the advertisements, and the intervals between them and to other notices. The change suggested will save time and expense, and some of the powers now exercisable

* The following answer was then given by Mr. Holden to a question of Mr. Wentworth:—"I think at all events, the Imperial Statute of Limitations should be so far altered as to abolish the additional protection it affords to claimants under the disability of absence from the Colony. There can be no just reason why an antipodean heir, whose existence is likely to be unknown, and even undiscoverable here, should have a double time allotted him for raking up the ashes of his genealogy, to the prejudice of parties who have bought and improved the land. It is a totally different case from that of the absence contemplated by the law of England, where the roots of titles and families, in nearly all cases, originate on the spot, and the inquiries of a purchaser may in general establish with certainty either the negative or affirmative as to the existence of a claimant to land. As the law now stands in this Colony the purchase of land from the apparent eldest son of a settler married in the Colony, runs the risk of ejection by an unknown heir, born, it may be, of some former undisclosed English marriage, and the very distance that baffles all inquiry is made a ground of extending for forty years a claim which would otherwise die out in twenty. The facilities afforded by a recent Act of Council for proving grants by the official record, without producing the deed issued, have, I think, augmented this evil, and rendered more necessary a measure for protecting titles against claims of the nature referred to. If the heir of any grantee of land can prove the grant without producing the deed issued, and then, by proving his own relationship to the grantee, put the present occupier to strict proof of his title derived from the grantee, infinite mischief may ensue. In the course of the forty years, during which the right of action is retained by an absent heir, the evidence required to support the most honest titles may become lost or inaccessible, and property improved to a hundredfold its original value may excite the cupidity of an heir whose connection with the forgotten owner would never have been otherwise thought of, and who gains his first intelligence of the prize from an advertising attorney speculating on his share of the spoil."

exercisable by the Supreme Court, or one of its Judges, may also conveniently be given to such adviser; such as the powers mentioned in the 25th, 66th, 67th, and 109th sections. Under the 25th section the adviser could speedily judge, the deeds being at hand, of the *bonâ fide* character of the applicant, but a Judge would probably require more lengthy and costly proof in support of the application than the adviser, who would have had the title under his knowledge, and would continue to have the materials conveniently within his reach. With respect to the 66th and 67th sections it is probable that before the Judge would make the order, he would require proof of the nature of the trust and of its devolution, and of the due appointment of the incoming trustees,—matters of frequent occurrence in titles and not (save on rare occasions) giving rise to difficulty. As regards the 109th section it is observable that under a previous section (the 13th) the Registrar General may, as concerns land sought to be brought under the Act, be directed by the Commissioners to do in effect what, after the land has been brought under the Act, and the title has become presumably less complicated, the 109th section requires to be done upon the basis of an order of the Supreme Court, or one of its Judges.

“The legal adviser may also be clothed, not exclusively but co-extensively with the Registrar General, with the judicial functions cast upon the latter officer, such as the duty of dealing with the materiality of instruments, the construction of instruments as affecting land or the title to it, the sufficiency of evidence and proofs, &c. By still leaving to the Registrar General the exercise of these functions sufficient effect will, I think, be given to the desired lay element.”

The discussion of the policy of this change is a somewhat invidious task for a party personally concerned, and a sense of this has evidently restrained the pen of Mr. Carter, as it does that of the writer of these remarks, from entering more fully into the question.

That the relative position of the lay and professional administrators of the Act is, quite *an anomale* under the present arrangements, adopted from the South Australian Act, is too obvious to need argument. Mr. Torrens is himself understood to have fully admitted this. It could indeed hardly have arisen, even in Adelaide, unless as the result of two concurring facts,—the refusal of the leaders of the profession to countenance the new system on the one hand, and on the other the peculiar position of Mr. Torrens, who, although not educated as a lawyer, was quite identified with that portion of the law which the Act concerned, and could almost say regarding it,—“*L'acte c'est moi.*”

Beyond the above observation this discussion will not be here pursued any further than Mr. Carter has carried it, but it will be left to those who are not individually concerned impartially to consider, and to the Legislature to adopt or reject, with a sole view to the public advantage, all or any of the amendments which he proposes in this matter.

To the same judgment must also be referred the other proposal contained in the Victoria Bill, for rendering the salary of the responsible and quasi-judicial office of Examiner independent of annual vote.

THE EXAMINERS OF TITLES to THE COLONIAL SECRETARY.

Land Titles Office,
Sydney, 10 April, 1866.

SIR,

In submitting for approval the accompanying Bill “*for recording Titles to Land and simplifying dealings therewith,*” with a view to its superseding, as a more complete and matured measure, the Real Property Act passed in 1862, we would first recall an observation with which we prefaced the submission of a previous draft Bill, in August, 1863. We then remarked that “no blame could fairly attach to anyone on account of such defects as we proposed to remedy, inasmuch as so entire a reconstruction of a whole department of law as our new system contemplates cannot possibly be otherwise perfected than through the close observation of its working, by those personally engaged in its administration gradually collecting thereby the data required for the satisfactory completion of its details.”

In further illustration of this we might have referred to the analogy of English legislation upon such subjects as modern Joint Stock Companies, Bankruptcy, &c., which has only arrived at its existing stage of comparative perfection—even with the assiduous co-operation of eminent statesmen and jurists with leading men of commercial experience—by slow degrees, involving frequent amendments, many of them repealing and superseding all previous legislation on the same matter, and continued over a long series of years.

As our draft submitted in 1863 did not (for some reason which we are not now concerned to inquire) receive any consideration from the then Government, we have had the advantage of nearly three years' additional experience. This, as might naturally be expected, enables us now to submit what we regard as a much more complete measure. During this period three amending Bills, supplementary to the nearly identical original Act in Victoria have been passed in that Colony, and a Bill consolidating the whole and repealing the original Act, is there in progress as a Government measure. An Act introducing into Ireland the main features of the Torrens' system has been also passed by the Imperial Parliament, placing the new Record of Titles thus created under the direct supervision of the Irish Landed Estates Court. Pending the introduction of these Acts, both in Victoria and Ireland, we have been in occasional correspondence with some of the gentlemen engaged in their preparation; and we have the gratification to find that many amendments we ourselves contemplated are embodied in these foreign measures. Whether through adopting our suggestions, or in consequence of independent concurrence of opinion is immaterial, as in either case the confirmation of our views is equally satisfactory.

We will not undertake here to enter into *all* the particulars of our proposed amendments; to do this would render this letter unreasonably voluminous, and might perhaps be also deemed a needless parade of the labour we have bestowed upon innumerable details.

It may, notwithstanding, be proper that we should indicate and explain some of the most material features of the Bill; and even this will, we fear, sufficiently tax the patience of any non-professional reader.

The first question that presents itself to us is very embarrassing, in consequence of the impossibility of divesting it of personal considerations. We feel it a very invidious task to have to propose the abolition of the existing Board of Commissioners, in connection with the simultaneous conferring upon ourselves of ostensible judicial authority, with augmented powers. When, however, the reasons for these changes are considered it will, we think, be admitted that we could not honestly refrain from including them in any Bill submitted as a permanent measure. The present Board was an invention of Mr. Torrens, avowedly to meet peculiar exceptional exigencies in his own position, at the time when his Act first passed in South Australia. This will clearly appear to any person perusing his evidence before the Select Committee of the New South Wales Legislative Assembly in 1862. For the present purpose it may be sufficient to state the duties which the Board actually perform:—Once a week it assembles to receive our reports upon cases which we have investigated, and which we have decided, for reasons only known to ourselves, to recommend to pass. This recommendation usually takes exactly the same form, whether the case be one that has occupied months of laborious inquiry and correspondence, or has required only ten minutes' inspection of

short and conclusive documentary evidence. Acting implicitly upon these reports (for no revision of our labours is either provided for or possible under the present system) the Board simply instruct the Deputy Registrar General for what period and in what newspaper the case shall be advertised; while even this solitary act of discretion, whenever it deviates from mere routine, must be equally governed by some expression of our opinion, as we alone can be acquainted with those special circumstances which require such deviation. Whether it be necessary for the Registrar General and two Commissioners to assemble weekly to go through this formal ceremony, it is for others to consider.

On the other hand it may be asked whether it is desirable to allow us as Examiners to continue to exercise, without the prestige of the name of Judges—powers virtually judicial, and this under the screen of a Board which is hardly anything but a passive instrument for carrying out our decisions?—whether it would not be far better to recognize by name the powers which we possess in fact?—and to render these more efficient by authority to summon and examine witnesses, and to carry on our proceedings in that healthy atmosphere of publicity which belongs to an open Court?

The existence of these complete judicial powers in the Land Titles Court of Ireland was regarded, by all parties concerned in introducing the Colonial system into Ireland by the Act of last session, as highly conducive, if not actually necessary, to its prospective success. Mr. Hutton, the Secretary of the influential Association formed in Ireland to promote that measure, calls the Landed Estates Court “the chief element of the special preparation of Ireland for the system proposed by Mr. Torrens”; and the Committee of the Association, in their Report of January, 1865, strongly urge the necessity of so framing the Act as to place the record and all legal questions thereon arising, under direct supervision of the Landed Estates Court.—The one is indeed the proper complement of the other. The mechanical portion of the new system has hitherto been more complete in Australia, and the judicial in Ireland; and the reasons which have led to the incorporation of the former with the latter by the Imperial Parliament, are just as stringent conversely for incorporating the latter with our existing law, so far as circumstances and a reasonable regard to economy will permit. Although the English Transfer of Land Act was introduced without creating a separate Court, and was distinguished from the proposed measure of Sir Hugh Cairnes, in this particular its author (Lord Westbury) took a prominent part in preparing and urging through Parliament the last Irish measure, linking Mr. Torrens’ plan with the Landed Estates Court. The slow progress of the new system in England may perhaps be attributed in great measure to its being unconnected with a similar supervising and easily accessible tribunal. At all events the intelligent editors of the Manual of Practice under this Act (Messrs. Umlin and Key) have seen reason for conveying, in the introductory chapter of that work, their impression that even in England it will be found necessary either to entrust the management of land transfer and registration to a separate tribunal, or *in some other manner to confer certain powers which will be found useful, if not essential, to the investigation of title.*

The amended Bill now submitted for New South Wales is so framed as to confer these powers in the first instance upon the Examiners, in conjunction with the exercise of their present duties, and without necessitating any addition to the present staff beyond an efficient clerk to each Judge; leaving it open to the Government hereafter to appoint such additional officers as it may deem necessary to meet the expanding business of the Court, whenever Parliament may concur in opinion as to such necessity, and provide the requisite funds. The Court thus established would also tend to relieve the Equity Branch of the Supreme Court of many duties connected with the administration of real estate. The nomination of new trustees would naturally fall within its province, and the investigations consequent upon applications for recording new ownerships, on transmissions under wills and settlements, or for amending occasional errors, would intercept (subject only to appeal) much of the Equity business of the Supreme Court, by inquiries conducted before a tribunal possessing the utmost possible facilities for speedy and satisfactory decision.

The conferring of judicial powers to aid in the examination of titles would remedy a defect in the present system which greatly interferes with its usefulness. Our examination is at present wholly limited, so far as it is governed by any express directions in the Act, to the reception and perusal of the evidence submitted to us *ex parte*. No advertisement takes place in reference to any application until our approval of the *prima facie* title thus submitted has been notified to the Board. After this notification we are *functi officio*, and there is no provision for the amendment of our report or the revision of the order of the Board made thereon, even though the advertisement should elicit facts which, if made known to us pending our investigation, would have completely altered our opinion. The Act only makes provision for caveat by an objector, to be sustained by proceedings in the Supreme Court.

The absurdity of this is so manifest that we have occasionally exceeded, although we cannot suppose we have thereby violated, the strict duty prescribed by the Act, by inviting information by a notice in the nature of a rule to show cause, from persons in regard to whom our pending examination has disclosed any particulars which suggest the possibility of their having any claim or possessing any information adverse to the application. This has in some cases led to our receiving information leading us to withhold approval of the title, while in others it has confirmed our approval, by showing the groundlessness of some suspected defect. In either case it has tended to a more satisfactory result, and to diminish the probability of future litigation and expense.

The efficiency of the investigation is however necessarily much restricted, whether it be *ex parte* or otherwise, in the absence of judicial powers to summon and examine witnesses and compel production of documents.

Nor are these powers required only for the original investigation of applications to place titles under the Act. The entries on the record of future changes of ownership will frequently involve questions of fact as well as law, such as claims by succession at law, or under settlements, insolvencies, sheriffs’ sales, evidence of births and marriages connected with claims by succession in remainder or under entails, &c., and questions of boundary, or correctness of descriptions in other respects.

DOWER.

Other proposed amendments relate to the matter of dower. These are, in the main, identical with those passed in a first amending Bill in Victoria, in 1863. The difficulties which suggested them occurred simultaneously to the Examiners in both Colonies, on first beginning to work the Act; and suggestions made by one of us, regarding some details of the requisite amendments, were adopted in the Bill then passed in Victoria, by an alteration made pending its submission to the Legislature.

To understand this question it is necessary to revert to the law at the time of the adoption by the Colonial Legislature, in 1837, of the Dower Act, then recently passed in England. That Act rendered the rights of all purchasers from a husband married on or after 1st January, 1837, paramount over a wife's claim to dower; but it still left that claim to operate in favour of all wives married before the Act came into force, even in regard to land acquired by the husband afterwards. Considering that even as the law then stood the husband could always at his own choice acquire the same absolute right of disposal, free of dower, which the Act conferred, and this by a mere technicality which had become an established form in conveyancing, we question whether justice required such a manifest sacrifice of the policy of the new law as this reservation of right of dower of women married before 1837, in any cases of land acquired since. The effect has been to keep alive for the ensuing twenty-nine years the necessity of inquiring the date of marriage of vendors; and although every year reduces the proportion of cases to which the actual claim applies, the trouble of the inquiry still remains the same, aggravated by the additional lapse of time in obscuring evidence of facts. The bare *possibility* of marriage before 1837, even though, when estimated as a probability, it might not exceed one per cent., leaves it equally necessary, in order to establish a negative, to obtain evidence of the facts in the whole of the cases.

The Torrens Act has even introduced some additional difficulty, since it has not provided any substitute for that technical method by which conveyancers had before evaded the attaching of dower.

With a view to remedy this we proposed ourselves, in 1863, and the Victoria Amending Act of that year has already carried out in that Colony, the following amendments, viz. :—

- (1.) Dower to be wholly barred in favour of purchasers from recorded owners of land acquired from the Crown by grant dated after 1st January, 1863, and thus placed under the Act.
- (2.) To be equally barred in cases where land is brought under the Act by the application of the owner, unless the claim be noted on the certificate as attaching to the title.
- (3.) No such claim to be retained in force or noted on accepting the title of any applicant whose title is of such a nature as to have admitted of his alienating the land under the old law free from dower.

Yet even all these amendments would not finally dispense with the duty of the Examiners to inquire whether there be a claim to dower of such a nature as neither of the above rules abolishes, and which they ought therefore to note on the certificate. To put an end to this we now further propose that after the 1st January, 1870, no claim to dower shall prevail against a purchaser, in any case whatever, even though the claimant were married before 1837, unless she shall have filed a special claim with the Recorder, accompanied by proof of the marriage on which she relies.

CAVEATS AND OTHER PROVISIONS PROTECTING TRUSTS AND EQUITIES.

The object of the amendments under this head has been to perfect the machinery for protecting beneficiaries, without infringing on the simplicity and security of the legal title for purposes of transfer or security.

The compatibility of the new system with the complications of settlements and trusts has been pertinaciously denied by its opponents. We nevertheless confidently affirm that with the aid of such provisions as are incorporated in the present Bill, the attainment of all that is to be desired, not only in the title of purchasers, but also in the protection of beneficiaries, is both far easier and far more effectual under the new system than the old.

Some remarks on this subject by one of ourselves have been adopted by the Committee of the powerful Association which was formed in Ireland to watch and promote the passing of the recent Irish Record Act, and is printed in an Appendix to one of their Reports. This recognition of their applicability to a measure now actually embodied in imperial legislation, and with which our present Bill is in perfect harmony, may perhaps justify their submission for perusal in connection with the particular amendments now under notice. (*See Appendix.*)

The present Act excludes even a mere reference to a trust on the record, apparently on the assumption that the security of the legal title is thereby necessarily endangered. This is too rigid a view of the case, it being quite as easy to avert this danger by legislation in the case of the record as by inserting the usual clause exonerating purchasers in the case of deeds containing powers of sale. It is to be at the same time observed that, if the encumbering of the record by prolix detail be avoided, the disclosure of the fact and general nature of a trust is often highly desirable, not only to diminish the risk of fraud, but that of the inadvertent misapplication of trust property, through ignorance of its character, by executors, official assignees, or others.

The Bill as now drawn carefully distinguishes between that portion of the record which affects the legal title, and those equities which (whether disclosed on the record or by separate instrument) are only cognizable as matters of contract between the parties thereto. It thus renders perfectly consistent with the security of the former, an equally effective protection against fraud in regard to the latter. Every settlor continues at liberty to make precisely the dispositions which he could have made under the old system, while he is at the same time presented with a choice of methods for guarding against breaches of trust—some identical in effect with those before existing, and others new and superior. Either of the following courses are open to him :—

- (1.) He may commit the property to the trustees with unqualified powers of alienation, relying solely on their personal honor and responsibility.
- (2.) He may, by a mere note entered on the record, restrict these powers to the full number, and disqualify survivors from acting until the full number, or a given number, of new trustees be supplied to fill vacancies.
- (3.) He may impose, as a condition of alienation, the consent of one or more persons nominated on the record for this purpose, and he may further provide for the succession or change of such nominations, in the event of deaths or other emergencies.
- (4.) He may impose the condition of mere notice on persons similarly nominated, so as to afford opportunity for caveat within a given period of suspense.
- (5.) He may limit legal estates without intervention of trustees, leaving each of the parties who may become entitled thereunder to apply from time to time to the Court to be placed on the record as owner, to the extent of his respective right and interest.

The action of the Court in the case last supposed is after all not distinguishable in its principle from that

that which, upon the narrowest possible administration of the Torrens system, would necessitate the inspection and interpretation of a will in order to admit a devisee upon the record. If it were for no other reason required, judicial power would be necessary for the safe administration of the law in this sole particular. But if once conferred, and an efficient tribunal thereby established, it then becomes equally available for the extension and perfecting of the system in all other desirable respects.

STATUTORY DEFINITIONS OF SPECIAL ESTATES.

Very nearly related to the foregoing remarks on trusts and settlements are some provisions which have been introduced to facilitate the placing on the record of special estates, so as to give them, in analogy with the existing enactments regarding mortgages and leases, a definite statutory operation, dispensing with the insertion of mere formal provisions in each particular instrument creating them. There is a section of the present Act which aims at the simplification of legal instruments in a general way; but the amended Bill contains the following definite provisions:—

- (1.) Authority to the Court to place on record legal estates contracted to be created by articles of settlement, under their equitable construction, without requiring them to be previously limited in verbose technical language by a more formal instrument.
- (2.) A provision giving to a power of appointment preceding and superseding ulterior limitations, the same effect with regard to a recorded estate as it has hitherto had upon ordinary estates under the previous law. It has been a frequent objection to the present Act that it does not admit of bestowing in this way upon a married woman the same convenient power of over-riding ulterior trusts by her sole appointment, which is given by the common limitation inserted in settlements for this purpose.
- (3.) A provision is made for recording, in a simple and effectual form, the separate estate of a married woman, with or without power of anticipation.
- (4.) A provision is made by which any person who desires to retain the operation of the old rule of primogeniture with regard to his property, in case of intestacy, may elect to have it so recorded as to effect this purpose.

SECURITIES.

Under this head a defect in the present law has been supplied, by making better provision for securities given in fulfilment of agreements of a special nature, such as cash credits, indemnities, &c. The forms in the present Act and the statutory powers incident to them, are limited to mortgage debts and annuities, or other fixed money payments. For this limitation there can be no adequate reason. Even in the case of mortgages and annuities the power of sale cannot, *as a matter of title*, be properly made dependent on any preliminary proof of a default, to be exacted (in the absence of caveat or *lis pendens*) either by a purchaser or the recording officer, before accepting the signature of mortgagee or annuitant as equivalent to that of owner for purposes of sale.

The Bill as now amended provides for three kinds of security, embracing,—

- (1.) Ordinary mortgage debts.
- (2.) Other fixed payments, such as annuities, &c.
- (3.) Indemnities or contingent liabilities.

The whole are classed under a general head of “security incumbrances,” to distinguish them from leases or other qualified interests, to which the technical term of incumbrance is sometimes applied, but which are not within the scope of these provisions.

DEFINITION OF THE TITLE CONFERRED BY THE CERTIFICATE.

The provisions on this head have been carefully revised. The language of the leading section of the English Act has been adopted in preference to that of the present Colonial Act; less, however, in consideration of any material difference in its effect, than its superior clearness and brevity. The exceptions and qualifications, some of which are at present confusedly scattered in different parts of the Act, are now all placed together in immediate sequence, so as to render them more easily understood and referred to. Some amendments are made, the general policy of which is to give a more unambiguous protection to a recorded owner *in actual possession* of the land described in his certificate, against the possible effect of any adverse claim resulting from error in a conflicting certificate that may happen to be granted to another person by inadvertence or fraud. In judging of the practical operation of these provisions it is to be borne in mind that means are afforded for correction of errors by application of either party to the Court; and it is proposed that any person who neglects, within a reasonable time after becoming aware of any error, to apply for its rectification, shall not only thereby lose his right in favour of the conflicting claimant, but also his title to any compensation for consequent injury from the assurance fund. The tendency of this rule will be to purify the record from any errors arising thereon before the lapse of time has either obscured the evidence of facts required to arrive at a just decision, and also before the more simple question between the original parties has been complicated, by claims of purchasers and others having acquired a derivative title on the faith of the erroneous description.

ASSURANCE FUND—COMPENSATION.

Various other provisions besides that last referred to have been introduced, with a view to reduce within narrower and juster limits the liability of the assurance fund to compensate individuals for alleged injury sustained under the operation of the Act. Happily no claim has hitherto been made thereon, and opinions may greatly differ as to the risk in store for the future; but in no point of view can it be proper to saddle the public with this liability to any degree beyond the limits of strict justice. We believe that in order duly to establish these limits the new provisions now introduced in sections 153 to 156 inclusive are required, in addition to the qualifications embodied in several of the preceding sections. These enactments will speak for themselves, without the necessity of here setting forth the particulars.

In close connection with this subject is a provision admitting of the charge of a higher premium than $\frac{1}{2}$ d. in the £ in special cases. This provision would not only afford a legitimate means of augmenting the assurance fund, but relieve the Examiners from a serious difficulty which they often feel either in accepting or rejecting a title. The rejecting of a title is naturally regarded as casting a slur upon it, although the defect or obscurity which leads to its rejection may be exceedingly slight, and such as any purchaser might be fairly advised to disregard for some abatement in price. In a transaction, for example, affecting

affecting property valued at £10,000, an abatement ranging from £100 to £500 might often be cheerfully submitted to, although the imperfections were not such as to create any apprehension of positive danger, and where even the legal marketability of the title might be fairly open to argument.

The acceptance of such a title by the Examiners for any sum short of the supposed abatement would be a boon to the owner, and might at the same time be an excellent bargain on behalf of the fund. But as the Act now stands a title involving a possible (however remote) liability of £10,000 must either be guaranteed for a paltry premium of £20 16s. 8d., or be totally rejected.

This proposed latitude in the adjustment of the assurance fee has been, since our first suggestion of its expediency, introduced in Victoria by one of the amending Acts there passed, and it is nothing more than the adoption of the rule acted on by all Boards of Direction in Mercantile Assurance Companies.

The length to which this letter has now extended compels us to close it without entering upon any further particulars.

We will only point out, in conclusion, that the voluminous contents of the existing Act have been re-arranged and classified analytically, besides being incorporated with the new matter.

If we had now to originate a first draft of such a measure we should have given it a much more compendious form, as we should have omitted numerous directory details in which we have followed the present Act, but which would be more appropriately provided for by Rules of Court promulgated under the judicial powers which it confers.

As however these are now a part of the existing law we have hesitated to omit them merely for the sake of abbreviation, lest we should create an impression that we seek to abrogate these as rules of practice, in cases in which we do not at present see any reason to question their propriety *as such*.

We have, &c.,

APPENDIX.

Memorandum on the applicability of Torrens' Act to Settlements and Trusts.

By G. K. HOLDEN.

THE most complicated settlement ever made by deed or will cannot present, for the purpose of registration, any difficulties distinguishable in their own nature (or even in point of degree, when taken singly) from those of ordinary titles. Every title is indeed virtually held under settlement, inasmuch as by a law of nature no owner can retain the property personally beyond his own life. Its subsequent destination is, in default of any other, governed by the law of inheritance, which is virtually a provisional settlement in the following form, viz. :—To A and his assigns for life, remainder as he shall appoint, and in default of appointment, then as the law of inheritance prescribes. If any private settlement be in force this operates as a special law for the individual case, but it may be quite as easy—indeed in the average of cases much easier—to determine the party entitled under the special provision, than under the general law. As regards the power of overriding the settlement by transfer this may exist alike in both cases. It exists always *primâ facie* in the owner; but in making provision even for ordinary mortgages and other encumbrances this power is as effectually shifted or modified as in the most complicated settlements, and gives rise to exactly the same difficulty, neither more nor less; requiring and obtaining precisely the same solution and precautionary arrangements. Whenever a power separated from ownership is dependent on any preliminary condition for its proper exercise, whether default in payment of a mortgage debt, a wife's jointure, or a child's portion, or a mere individual discretion, it raises, in regard to title, the question—who is to be responsible for seeing to the existence or fulfilment of the condition?

This question arises alike in all cases. It arises in every case of mortgage and encumbrance, and as the general rule of conveyancing before the Act was to provide for the total exoneration of purchasers from such responsibility the effect was to render the power of sale, in point of title, really absolute; being conditional only as regarded the liability of the mortgagee, for breach of trust, in the event of his exercising it improperly.

To exonerate the Land Titles Department from the same responsibility does not alter the case in any way or degree as regards the mortgagor or owner. But if this be admitted then it follows that the business of the department is (subject only to the restraint of caveats) reduced in all cases of transfer to this single question: Is the signature of the owner, or of the donee of the power, as the case may be, duly authenticated?

Now there is, I will venture to say, no settlement, however complicated, that can give rise to any difficulty that is not capable of being met in the same way. Wherever the legal estate is vested in trustees having full powers of sale there is absolutely no distinction between the old and new law, unless it be in favour of the latter, as respects the greater facility of checking fraud in trustees, by obtaining time to apply to a Court of Equity, through a caveat, or by the entry of the "no survivorship" memorandum. The legal title will be in that case for all purposes of registration, precisely of the same simplicity as that of property unaffected by any trust, the ownership and the right of disposition being united in the same person, and both resting on the mere fact of registered ownership. But even if trustees be not interposed for all the purposes of the settlement, and if there should be successive tenancies for life, powers of appointment among children, or charges of annuities or portions, still there is no special difficulty in ascertaining the person entitled to receive a certificate of title as tenant for life, merely because it is derived under a settlement which also creates by the same instrument other contingent or expectant interests in the property. And all those other interests must resolve themselves into estates in remainder, or into powers of sale, either direct or incidental to, and in aid of, charges or encumbrances. With regard to estates in remainder these are quite as easily dealt with as an estate inherited or passing to a devisee. A tenancy in tail adds nothing to the difficulty in tracing the proper heir, and a strict settlement only prescribes a mode of inheritance or succession as easily traced as that of an ordinary fee. The settlement or will only stands in place of the law; nor does it necessarily render the inquiry any more complicated, but generally, on the contrary, simplifies it. So with regard to powers and charges embodied in settlements there is nothing which distinguishes them from the every-day transactions for which provision is made by the Act, and for which its adequacy is not in general questioned.

All powers must be delegated to or vested in some named or ascertainable person. The only questions that can arise besides the ascertaining of the person and the authenticity of his signature are the conditions (if any) under which the powers are delegated; but this is only the same difficulty, and is open to exactly the same solution as is the case of an ordinary mortgage or encumbrance. If the precaution of caveat be not resorted to the condition on which any power is conferred must, for purposes of title, be *assumed* to have arisen or been fulfilled whenever the donee of the power chooses to exercise it.

Powers are indeed in certain cases limited to special objects, such as a power of appointment among children or issue of a particular person. Here a somewhat different question presents itself, and it may not be possible to avoid the responsibility of ascertaining whether the appointee is within the limit of qualification before issuing to him a certificate of title. Even this, however, is nothing peculiar to settlements. If a testator devise his land to all his children the issue of a certificate will involve the inquiry who such children are; and when all the applicants have proved their descent it will further be requisite to ascertain that there are no other children. If a prior settlement had bestowed the land on such of the children of the same person as the same testator should appoint it would only involve the easier inquiry whether the individual appointees were such children.

From the above considerations I conclude that the Torrens system is not, as objected, in any special way inapplicable to settlements, trusts, or entails. If it only be once admitted that the system can adequately provide for the exigencies resulting from the ordinary legal succession of property, or the ordinary exercise of the powers involved in every-day mortgages or encumbrances, this must involve a virtual admission of its equal adequacy for all the purposes of settlements and trusts. These only differ from the others as words of many syllables differ from words of few syllables. They are resolvable into the same elements, and only require to be separated to present the same degree of simplicity.

Draft of a Bill for recording Titles to Land and simplifying dealings therewith.

Preamble.

WHEREAS it is expedient to place the Register of Titles established by the Real Property Act (1862) under direction of a Court empowered to adjudicate (subject to appeal in certain cases) on matters of law and fact arising in reference thereto and it is also expedient to alter the provisions of the said Act in other respects by substituting an amended Act Be it therefore enacted by the Queen's Most Excellent Majesty by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled and by the authority of the same as follows:—

Short title—commencement of Act.

1. This Act may be cited for all purposes as "Land Titles Record Act" and shall come into operation on the day of

Real Property Act (1862) repealed saving matters done or pending thereunder.

2. The Real Property Act (1862) is hereby repealed except as to matters done or pending thereunder or retained in operation by express provision in this Act All such pending matters may be continued under this Act and all titles and instruments registered under the said repealed Act shall be construed to be in virtue of such registration effectually recorded under this Act in the order of registration and as if this Act had been in force at and from the times of such registration respectively.

Register continued under this Act.

3. Land under the operation of this Act shall be exempted from the operation of all other Laws Statutes Acts and Rules whatsoever so far as inconsistent with the provisions of this Act.

Laws inconsistent not to apply to land under this Act.

4. In the construction of this Act (except where the context or other provisions of this Act require a different construction)—

Interpretation clause.

The word "Judge" shall mean one of the Judges of the Land Titles Court.

The word "Court" shall mean the Land Titles Court and where the expression "the Court" is used in connection with any proceeding for which a single Judge is competent it shall mean the Judge by whom the authority of the Court in the matter under reference is exercised.

The word "Recorder" shall include any officer acting as Assistant or Deputy Recorder under the direction of the said Court.

The word "record" shall mean the book or books to be provided and kept for the recording of titles pursuant to this Act in the Land Titles Court and the entries therein made but shall not include or be held to convey notice of any instrument recorded in regard to any portion of the contents thereof not set forth in the memorial thereof entered of record.

The word "land" shall extend to messuages tenements and hereditaments and to rents or annuities charged upon hereditaments whether subject to any fee-farm or other perpetual rent with or without condition of re-entry for securing the same or otherwise and whether corporeal or incorporeal and to any undivided share thereof.

The word "lease" shall include an agreement for a lease and the estate or interest created or agreed to be created by a lease or agreement in the whole or any part of the land therein comprised and shall include any term of years.

The word "owner" as applied to land shall include any person entitled in possession in fee simple or in tail or quasi in tail and any person who has a power of appointing or disposing of the fee and whether with or without the consent of another person and any person entitled as a trustee for sale or having a power of sale and whether with or without consent as aforesaid and as applied to a lease shall include any person entitled in possession to the interest thereunder or having power to appoint or dispose thereof and to any person entitled thereto as a trustee for sale or having a power of sale.

The words "person" and "owner" respectively shall extend to a body politic or corporate.

The word "encumbrance" shall include any lease if for an unexpired term exceeding three years also any legacy portion lien or other charge whereby money is secured to be paid inclusive of any periodical charge also every other charge upon land which is deemed an incumbrance in a Court of Equity also any power whether for the purpose of security or not to defeat alter or charge the recorded estate by appointment or limitation of any use or otherwise.

The expression "security-encumbrance" or "security" shall include mortgage charge of annuity or any other encumbrance authorized by this Act or to be recorded by direction of the Court or a Judge for securing money whether ascertained or payable on any contingency or for securing fulfilment of any agreement.

The word "certificate" or "certificate of title" shall include both the recorded original of any such certificate and the duplicate thereof issued to the person therein recorded as owner and shall also apply to the original and duplicate of any Crown grant issued on or after the first day of January one thousand eight hundred and sixty-three and registered or recorded pursuant to the Real Property Act or to this Act.

The word "settlement" shall include any instrument under which any land shall be at law or in equity so limited as to create partial or limited estates or interests.

The expression "recorded estate" shall mean any land the title to which shall be recorded under the provisions of this Act.

The expression "recorded interest" shall include any encumbrance appearing on the record whether held or exercisable for the individual benefit of the recorded owner or otherwise.

The word "instrument" shall include every writing by which (subject only to the recording of the memorial required by this Act) any estate or interest in land is created transferred or transmitted released or surrendered.

The word "grant" shall mean any grant of Crown Land whether in fee or for years and whether direct from Her Majesty or pursuant to the provisions of any statute regulating the disposal of Crown Lands.

The word "transfer" when applied to any recorded estate shall signify the change of ownership consequent on the voluntary act of the transferor.

The word "transmission" shall apply to a change of ownership consequent upon any insolvency lunacy levy under execution order of Court or other act of law or in virtue of any settlement or will (or legal succession in case of intestacy).

- The word "transferree" shall nevertheless include alienee by transmission when not otherwise distinguished.
- The expression "transferree for value" shall include persons acquiring title by way of lease mortgage or otherwise for valuable consideration.
- The words "lessor" "lessee" "mortgagor" "mortgagee" or other designations of the grantor or grantee of any partial estate shall include the persons from time to time claiming under them respectively through transfer or transmission.
- The word "addition" as applied to any person shall mean his description in regard to residence rank profession trade or occupation.
- The word "indorsed" shall include anything written upon or in the margin or at the foot of any instrument or other document.
- The word "possession" when applied to persons claiming title to land shall signify also alternatively reception of the rents and profits thereof.
- The word "lunatic" shall mean a person who shall have been found to be a lunatic upon a commission of inquiry in the nature of a writ *de lunatico inquirendo*.
- The expression "person of unsound mind" shall mean any person not an infant who not having been found a lunatic shall be incapable from infirmity of mind to manage his own affairs.
- The word "covenant" shall include every promise or agreement contained or implied in any instrument recorded under this Act or of which fulfilment is secured by any encumbrance so recorded notwithstanding the same shall not be under seal.
- The word "dealing" shall include every act by which the owner of a recorded estate or interest shall alienate the same either wholly or by creation of any lease encumbrance or other partial interest.
- The expression "Consular Officer" shall mean Consul-General Vice-Consul or any person for the time discharging the duties of Consul-General or Vice-Consul.
- The expression "official witness" shall mean any person whose attestation is by this Act declared to be of itself sufficient proof of due execution thereof and who is authorized to receive the declaration of verification required from ordinary witnesses.
- The expression "Commissioner for Affidavits" shall include any Commissioner for taking Affidavits in the Supreme Court in addition to such Commissioners as (if any) may be appointed specially to that office in the Land Titles Court.
- The word "affidavit" shall include affirmation or declaration in lieu of oath in every case in which such affirmation or declaration may be lawfully made or received.
- The word "Sheriff" shall include the Sheriff of the Colony so far as regards land within his bailiwick and any Deputy Sheriff or other person lawfully authorized to execute any writ of *feri facias*.
- The expression "sworn valuator" shall mean any person appointed by the Court with approval of the Governor in Council to value land under this Act and who has taken an oath before the said Court that he will faithfully and honestly and to the best of his skill and ability make any valuation required of him under the provisions of this Act.

I.—*Constitution of Land Titles Court.*

- 5. A Court is hereby established which shall be of record and be called the Land Titles Court with power to exercise such jurisdiction and authority as hereinafter provided including the direction and control of the Register of Titles instituted by the Real Property Act (1862) which register is adopted and continued under this Act under the designation of the Record of Land Titles. Court established.
- 6. There shall be two Judges of the said Court and the present Examiners of Titles George Kenyon Holden and Alexander Dick Esquires shall be and are hereby constituted the first Judges of the said Court but without prejudice to their continued performance of such duties of Examiners as shall until or in default of appointment of separate officers so designated be required for the purposes of this Act. Appointment of Judges.
- 7. It shall be lawful for the Governor with the advice of the Executive Council from time to time when and as often as any vacancy shall occur in the office of either of the Judges hereinbefore named or of any of their successors for the time-being by death resignation or removal from office to appoint a person being a barrister-at-law of five years standing or an attorney-at-law of seven years standing to supply such vacancy also to appoint any person of like qualification to fulfil the duty of either Judge during any interval of sickness or leave of absence. Vacancies how to be supplied.
- 8. Each of the said Judges hereinbefore named and every other Judge hereafter to be appointed under the provisions of this Act shall hold his office during good behaviour Provided always that it shall be lawful for the Governor to remove any such Judge from his office upon an Address of both Houses of Parliament. Judges to hold office during good behaviour.
- 9. Every such Judge as aforesaid shall before executing any of the duties of his office take the following oath which any Judge of the Supreme Court for the time-being is hereby respectfully authorized and required to administer:—
 "I A. B. do solemnly and sincerely promise and swear that I will duly and faithfully and to the best of my skill and power execute the office of Judge of the 'Land Titles Court' So help me God." Oath of Judges.
- 10. The said "Land Titles Court" shall cause to be made a seal for the said Court for authenticating its judicial acts and also a seal of the Record of Titles Office of the said Court for authenticating instruments proceeding therefrom and shall cause to be sealed with the one or other of such seals all orders and other instruments made by or proceeding from the said Court or Office in pursuance of this Act and all such orders and other instruments or copies thereof purporting to be sealed with the seal of the said Court or Office respectively shall be received in evidence in every Court without any further proof thereof. Court and Record Office to have seals.
- 11. There shall be one clerk to each Judge who shall be appointed in like manner as clerks to the Judges of the Supreme Court. Judges' clerks.
- 12. The present Deputy Registrar General Edward Grant Ward Esquire shall under the designation of "Recorder of Titles" have subject to the direction and control of the said Court custody of the record of titles and of all instruments recorded or deposited produced or exhibited in the said Court in reference to any proceedings therein. Appointment of Recorder.

Officers of Land Titles Branch of Registrar General's Department transferred to Land Titles Court.

13. All other officers and clerks now employed in the Land Titles Branch of the Department of the Registrar General shall from the date of this Act coming into operation be transferred from that department and become officers and clerks of the Land Titles Court and all documents maps plans books and papers in their custody as officers of the Registrar General's Department shall be subject to the direction and control of the Court.

Court to have full access to former registers &c.

14. Notwithstanding such separation from the said department the Judges and under their direction the officers of the said Court shall have free access without fee for the purpose of any investigation under this Act to all registers and documents remaining in the said department and under the charge of the Registrar General relating to titles to land and shall also have like free access without fee to wills deposited in the Supreme Court or elsewhere and to the evidence filed therein in support of applications for probate or for letters of administration in cases of intestacy also to such records in the respective offices of the Master of the Supreme Court in Equity the Curator of Intestate Estates the Chief Commissioner of Insolvency and the Sheriff as have any reference to titles to land.

Duties of officers of the Court to be provisionally performed by Judges' clerks and the transferred officers.

15. So long as no distinct officers shall be appointed to fulfil the duties of Registrar Taxing Officer and Accountant respectively of the said Court such duties together with any other ministerial duties appertaining to the judicial business of the Court shall be performed by the Judges' clerks in conjunction with the Recorder and other officers and clerks transferred as aforesaid under such arrangements as the Judges shall with approval of the Governor determine.

The Governor to appoint additional officers when necessary. Their qualification and tenure of office defined.

16. The Governor may from time to time upon the joint recommendation of the Judges appoint any additional officers (for payment of whose salaries provision shall be made by Parliament) to aid in carrying out the provisions of this Act But no person shall be permanently appointed to fill the office of Examiner Registrar or Taxing Officer unless he be a barrister of three or solicitor of five years standing at the least And all such officers and also the Recorder and (if appointed) the Accountant shall hold office during good behaviour and be removable only on the joint order of the Judges of the said Court with the sanction of the Governor for some reasonable cause therein expressed And all other officers of the Court shall be removable on the joint order of the Judges with the sanction of the Governor.

No Judge or officer to practice as barrister or solicitor.

17. No Judge or officer of the said Court shall during the term of his holding office directly or indirectly practise in any Court as a barrister or attorney or participate in the fees of any other person so practising.

Certain officers to act in person.

18. Every officer of the class holding or to hold office under this Act during good behaviour and subject only to removal on cause assigned shall execute their respective offices in person and not by deputy unless where a deputy for the execution of any of such offices shall be appointed for that purpose by the Governor in the case of temporary illness leave of absence or other unavoidable accident But nothing herein contained shall preclude the performance of any duties incident to the office of Recorder by any other officer or clerk who may be authorized by the Court to act as his assistant or deputy when and as occasion shall require.

Privilege of barristers and solicitors.

19. Barristers and solicitors shall respectively have and enjoy the like privilege of practising before and be subject to the like authority of the said Court as they have and enjoy and are subject to in the Supreme Court Provided that nothing shall preclude the Court from hearing any party interested in any case who shall appear in person.

Salaries of Judges and officers.

20. The salaries payable to the Judges of the said Court under this Act shall be issued and payable out of and charged upon the Consolidated Revenue of the Colony and the salaries payable to the other officers of the said Court under this Act shall be payable out of such funds as shall be provided by Parliament Retiring allowances in like relative proportion as regards salary and term of service and other conditions shall be payable to the Judges of the said Court as are now payable to Judges of the Supreme Court.

Judges to frame and promulgate forms of application &c.

21. The said Judges shall frame and cause to be printed and circulated or promulgated as they shall see occasion and may from time to time alter and vary forms of applications and directions indicating the particulars of the information to be furnished to the Court on applications to them under this Act with reference to title encumbrances and the circumstances of the land and such other information as in the judgment of the said Judges may assist them in forming an opinion on such application and also such other forms and directions in addition to those herein prescribed or contained as they may deem requisite or expedient for facilitating proceedings under this Act.

Judges to frame general rules to be approved by Chief Justice &c.

22. The said Judges shall when and as occasion shall require frame such general rules such as they may think best adapted for regulating the course of procedure under this Act in regard to any matter not herein fully provided for and generally for securing the due execution of the powers vested in the said Court and giving effect to the provisions and objects of this Act but no fees or sums shall under any such general rule or otherwise be payable to any officer or person appointed under this Act upon or in respect of any proceedings under this Act for his own use or in excess of (for public use) the scale of fees for the same or similar acts or proceedings set forth in the Schedule to this Act Provided always that all such general rules shall be laid before the Chief Justice of the Supreme Court who thereupon shall consider the expediency of such rules and every of them and it shall be lawful for the Chief Justice by order signed by him to confirm or disallow all or any of such rules or to remit any of such rules to the said Judges for further consideration and every such general rule or rules (when the same shall have been so confirmed by order of the Chief Justice) shall be enrolled in the Supreme Court and also in the Land Titles Court and when so enrolled shall be binding on the said Court in the exercise of its powers and shall be of the same force and effect as if the same had been enacted by authority of Parliament Provided also that any rules so confirmed and enrolled as aforesaid may from time to time be added to rescinded amended or altered as occasion may require by other rules made by the Judges for the time-being and confirmed and enrolled in like manner.

General rules to be laid before Parliament.

23. Such general rules as shall be made and confirmed as aforesaid shall be laid before both Houses of Parliament within one calendar month from the enrolment thereof if Parliament be then sitting or if Parliament be not then sitting within one calendar month from the commencement of the next session of Parliament.

Power of Court to summon and examine witnesses.

24. It shall be lawful for the Court by summons under its seal to require the attendance before the Court or one of the Judges or any officer thereof at a time and place to be mentioned in such summons of all such persons as it shall think fit to examine in relation to any matter depending before the Court and require all such persons to produce before the said Court or Judge or officer all deeds books

books papers documents and writings relating to such matter and to examine upon oath or in case of persons allowed to make affirmations or declarations in lieu of an oath upon affirmation or declaration (as the case may require) all persons who shall attend under such summons and all persons who shall voluntarily attend as witnesses and it shall be lawful for either of the said Judges or any officer appointed for that purpose generally or in the particular matter to administer such oath affirmation or declaration and every person required by such summons so to attend who without reasonable cause to be allowed by the Court shall fail to appear according to the tenor of such summons or shall refuse to be sworn or to make affirmation or declaration (as the case may be) or shall not make answer to all such questions as shall be lawfully put to him on such examination or shall refuse or fail to produce before the Court Judge or officer any such deed book paper document or writing being in or under his custody possession or power as shall be lawfully required to be produced by him before the Court Judge or officer shall for such default of appearance refusal to be sworn or to make affirmation or declaration or for not answering any such question as aforesaid or not producing such deed book paper document or writing incur and be liable to all such penalties prosecutions actions and suits as a person might incur or be liable to for failing to appear or refusing to be sworn or to give evidence in any suit or matter depending in the Supreme Court and the Court and each of the Judges thereof shall have the like powers jurisdiction and authority for enforcing the attendance of persons summoned as aforesaid for punishing persons failing to appear or refusing to be sworn or to make affirmation or declaration or to give evidence or guilty of contempt and generally for enforcing all orders made by the Court under any of the powers or authorities vested in it under this Act and otherwise in relation to the matters to be inquired into and done by them under this Act as are by law vested in the Supreme Court for such purposes in relation to any suit or matter depending in such Court.

25. The Court may in its discretion receive in evidence affidavits affirmations or declarations which may be made before any person empowered to take affidavits receivable in evidence in the Supreme Court or where they think fit the Court may by order under the seal thereof appoint and authorize any person either generally or in a particular matter to examine any witnesses who shall attend before such person to be examined in New South Wales or elsewhere in relation to any application to or matter pending before the Court and to administer oaths affirmations or declarations for the purposes of such examination but the deponent or declarant in every such case shall on the application of any other party interested in the facts deposed to be subject to be cross-examined by or on behalf of such other party orally in open Court or before any person appointed to take such examination and after such cross-examination may be re-examined orally in open Court or before such person appointed as aforesaid Provided however that nothing herein contained shall render necessary the proof by oath or affidavit of the execution of any document which but for this provision would be receivable as *prima facie* evidence upon investigation of any title or other proceeding.

Court may receive affidavits in evidence.

26. It shall be lawful for the Court to enforce the attendance of witnesses and to have such witnesses examined and evidence taken in any matter pending before it whether by commission or otherwise before such person or persons or such tribunal as under the several statutes now in force and hereafter to be enacted the Supreme Court may have evidence taken and received.

Examination by Commissioners.

27. Every person who upon examination upon oath affirmation or declaration before the Court or any of the Judges thereof or any person appointed and authorized under this Act by the Court or by any general or special order thereof to administer such oath affirmation or declaration shall wilfully give false evidence and every person who shall wilfully swear affirm or declare falsely in any affidavit authorized under this Act to be received in evidence by the Court shall be liable to the pains and penalties of perjury.

Persons swearing falsely to be punished for perjury.

28. It shall be lawful for the Court to cause any matter or question of fact arising in any proceeding before them to be tried by a special or common jury before the Court itself and the Court may make all such rules and orders upon the Sheriff or on any other person for procuring the attendance of a special or common jury for the trial of such question or matter of fact as may be made by the Supreme Court and may also make any other orders which to the Court may seem requisite and every such jury shall consist of persons possessing the qualification and shall be struck summoned balloted for and called in like manner as if such jury were a jury for the trial of any cause of the said Supreme Court and every jurymen so summoned shall be entitled in the same rights and subject to the same duties and liabilities as if he had been duly summoned for the trial of any such cause in the said Supreme Court and every party to any such proceeding shall be entitled to the same rights as to challenge and otherwise as if he were a party to any such cause and generally for all purposes of or auxiliary to the trial of question of fact by a jury before the Court itself and in respect of new trial the Court shall have the same jurisdiction powers and authority in all respects as belong to the Supreme Court or to any Judge thereof for the like purposes Provided that from any order made by the Court on an application made for a new trial there shall be the same right of appeal as from any other order of the Court Any question of fact which shall be so ordered to be tried by a jury before the Court itself shall be reduced into writing in such form as the Court shall direct and at the trial the jury shall be sworn to try the said question and a true verdict give thereon according to the evidence and upon every such trial the Court shall have the same powers jurisdiction and authority as belong to any Judge of the Supreme Court sitting at *Nisi Prius*.

Power to Court in certain cases to summon a jury.

29. It shall be lawful for the Court to review and rescind or vary any order which shall have been previously made by it or by the Commissioners under the Real Property Act (1862) but save as aforesaid and as hereinafter provided every order of the Court shall be final.

Court may rescind or vary its own orders.

30. Every order or decision of the Court shall be subject to appeal to the Supreme Court provided that notice of such appeal if against an order for entering any title on the record shall be lodged with the Recorder within seven days from the date of the order or from service of notice thereof in any case wherein such notice is hereinafter specially required and the Recorder shall enter upon the record a memorandum of any such notice of appeal and he shall not in the mean time or after such notice issue any duplicate certificate of title consequent on such order without noting thereon that the same is subject to appeal Every appeal shall in other respects and in all other cases be entered within such time and subject to such regulation for deposit of costs and be duly prosecuted in such manner as the Court of Appeal shall by general or special rule direct otherwise the decision or order of the Court below shall be final and on hearing of such appeal the only evidence to be relied on or admissible shall be such as was given before the Court below but the said Appeal Court if it shall think fit may receive such evidence or direct or make any such inquiry thereon as it shall seem fit or may direct the Court below to rehear the case on such further evidence as it may be in the power of either party to produce and the costs of such

Appeal to Supreme Court.

appeal shall be in the discretion of the said Court of Appeal. Provided always that it may be lawful for the said Court of Appeal if it see fit on special application for that purpose to rehear any appeal upon which it may already have made an order and on such rehearing to rescind vary or add to such order as to said Court of Appeal may seem just.

Appeal from Supreme Court to the Privy Council.

31. Any decision of the Supreme Court upon such appeal from the "Land Titles Court" shall be subject to an appeal to the Privy Council in like manner as and subject to the like conditions and restrictions as to the value of the subject matter and otherwise which apply to or govern or hereafter shall from time to time apply to or govern appeals from the Supreme Court in other cases.

Concurrence of both Judges required in certain cases specified.

32. Both Judges shall concur in any of the following matters namely in any order directing the first recording of a title not before under this Act in any order consequent on the transmission of an estate or interest in any order determining a disputed question arising upon notice of objection or caveat and in any order directing an amendment of the record without consent in writing of all parties whose interests can thereby be in any manner prejudiced. In other cases all powers of the Court conferred by this Act may be exercised by one Judge but if in any case requiring concurrent decision or wherein they shall voluntarily concur in deliberating thereon they shall differ as to the propriety of making an order or doing any act such order shall be deemed to have been refused.

For others one Judge to be competent. Difference in opinion to involve a negative.

If the Judges differ a Judge of the Supreme Court may be appealed to as umpire.

Subject to appeal to full Court.

33. In any case in which the Judges shall differ a special appeal shall lie to a Judge of the Supreme Court in chambers and if he shall agree with either of the Judges in difference his order concurrently with such Judge shall have the like effect as if both Judges of the Land Titles Court had originally concurred therein subject nevertheless to a like appeal therefrom to the full Court. The like power may be exercised by one Judge of the Supreme Court concurrently with one Judge of the Land Titles Court in any case in which the other of such Judges is disqualified or declines to act on the ground of personal interest.

One Judge's notes of evidence on any hearing may be acted on by others on reference or appeal.

34. In any case wherein any matter wholly or in part investigated by hearing of parties or witnesses before a single Judge shall be submitted to the other Judge for concurrence or in which any case investigated before either one or both Judges shall be submitted to a Judge of the Supreme Court or the full Court on Appeal it shall be in the discretion of the Judge or Court before whom such case is so submitted to decide thereon wholly or in part on perusal of the notes and report of any Judge before whom the hearing took place without requiring a rehearing.

II.—As to bringing Land under this Act.

All future alienation of Crown lands to be recorded under this Act.

35. Grants of all Crown lands remaining unalienated at the time of the passing of this Act shall be in duplicate and in addition to proper words of description shall refer to a map of the land on the scale at present used or on such other scale as may from time to time be directed by rule of Court and shall be delivered to the Recorder who shall record the same in manner hereinafter directed. Such recording shall be deemed an enrolment of the grant and such enrolment shall relate back to the day of the date of the grant and either part of the grant when recorded under this Act shall be sufficient evidence of a duly enrolled grant of land therein described to the person therein named on the day of the date thereof. All grants registered under the Real Property Act shall be deemed to be duly recorded under this Act.

Lands alienated in fee before the Real Property Act may be brought under this Act.

36. Land alienated in fee by Her Majesty before the first day of January one thousand eight hundred and sixty-three may be brought under the operation of this Act by an application in such form as the Court shall direct and if no other form be so directed then in a form containing the like declaration and particulars as now required in applications under the Real Property Act which application may be made by any of the following persons (that is to say)—

- (1.) The person claiming to be the owner of the fee simple either at law or in equity.
- (2.) Persons who collectively claim to be the owners of the fee simple either at law or in equity.
- (3.) Persons who have the power of appointing the fee simple.
- (4.) The person claiming to be the owner of the first estate of freehold if the owner of the first vested estate of inheritance shall consent to the application.
- (5.) The father or if the father be dead the mother or other guardian of any infant or the committee of the estate or guardian of any lunatic or person of unsound mind so however that the application be made on behalf of such infant lunatic or person of unsound mind and the certificate of title be directed to issue in his name:

Provided always that if the applicants be trustees not having absolute power of sale in their own discretion all persons whose consent is or would be requisite to sale or if there be no express power of sale then such of the parties beneficially interested as the Court shall see fit to require shall join or consent to the application. Provided also that a mortgagor or other security-encumbrancer shall not be entitled to make such application unless the encumbrancee shall consent thereto nor a mortgagee or other security-encumbrancee unless in or with a view to the exercise of his power of sale and unless the certificate of title shall be directed to issue in the purchaser's name or suspended until such purchaser be ascertained and nominated to receive the same nor a married woman unless her husband shall consent thereto and the application be acknowledged by her in the manner hereinafter mentioned as to the acknowledgment of instruments (except she shall be entitled to the land for her separate use or to be considered as a *feme sole* or to exercise a power of sole appointment in respect thereof). Provided also that the attorney of any corporation howsoever and wheresoever incorporated whether already constituted or hereafter to be constituted by a power of attorney under a seal purporting to be the common seal of the corporation giving the power may make such application for or on behalf of the corporation of which he is the attorney and may make the requisite declaration to the best of his knowledge information and belief and may subscribe the application in his own name. Provided also that by leave of a Judge in any other case in which the applicant shall reside out of the Colony or be for other sufficient reason prevented from personally making the said declaration and subscription the same may be made by his attorney duly constituted either by deed or by instrument attested as this Act requires for dealings thereunder. But no certificate pursuant thereto shall issue to any other person than the principal unless the deed or instrument so direct or confer absolute power to sell. Provided further that by leave of a Judge on the ground of absence or for other reasonable cause the joining of any joint tenant (whether as a trustee or in his own right) in an application by his co-owners may be dispensed with in any case in which the parties beneficially interested

interested shall concur or consent or in any case in which the application shall be limited to the placing of the joint property under the Act in the names of the existing joint owners and shall not require the issue of a certificate to any other person.

37. Whenever any person is entitled to receive a certificate of title in his own name he may either by the original application or at any time before the recording of the certificate appoint by writing duly signed and attested as required for instruments effectuating dealings under this Act any other person in whose name such certificate shall issue and in that case it shall be lawful for the Court to direct the certificate to be recorded and issued in the name of the person so appointed accordingly.

Any person entitled to a certificate may appoint a substitute.

38. Whenever the application shall disclose such grounds as are or may be when fully established sufficient an investigation of the title shall be proceeded with by or under direction of the Court and when necessary requisitions shall be made for further evidence which evidence may be received either by documents to be produced or affidavit or statutory declaration or by oral examination of the applicant or his witnesses either voluntarily attending or summoned in exercise of the powers hereby conferred on the said Court.

As to investigation of title.

39. If it appear to the Court that the applicant is himself the original grantee from the Crown of the land which is the subject of application and that no transaction affecting the same has been registered under any law for the registration of instruments affecting land and that there does not exist any special reason for further enquiry or delay the Court may in such case direct the Recorder to bring the land under the operation of the Act forthwith by recording and issuing a certificate of title.

Cases where the applicant is original grantee and no dealing registered dis-posable summarily.

40. In every case not within the operation of the last preceding section the Court shall cause notice of the application to be advertised inviting all persons having any grounds of objection thereto to appear and establish such grounds at or within such time and in such manner as the Court shall notify for that purpose. Such notice may be given either before entering upon the *ex parte* investigation of the title or in any stage thereof but shall in all cases be advertised once at least in one newspaper published in the City of Sydney or circulating in the neighbourhood of the land to which the application relates not less than fourteen days before the time to be thereby appointed for receiving objections and shall also be posted in some conspicuous place in the Land Titles Court or Record of Titles Office and also sent through the Post Office to the addresses of the persons stated in the application or otherwise ascertained to be occupiers of the land and (unless the land be an entire Crown allotment) to the occupiers and so far as ascertainable and practicable to the owners of the land contiguous thereto. But the directions aforesaid shall be without prejudice to any further general or special order of Court in reference to such notices.

In other cases notice to be advertised.

41. Within the time limited by such advertisement as aforesaid any person desirous of opposing the application may lodge with the Recorder a notice of objection and of the grounds of such objection in such form as the Court shall by general rule or otherwise prescribe.

As to notice of objection.

42. If within the time so appointed no such notice of objection be lodged the Court shall proceed to adjudicate upon the application *ex parte* and if satisfied with the evidence submitted in support thereof may direct the issue of a certificate of title.

If no objection Court may adjudicate *ex parte*.

43. Whenever any such notice of objection as aforesaid shall have been lodged the Recorder shall notify the same to the applicant and at any time thereafter either the objector or applicant may apply to the Court to appoint a time for hearing the parties or their witnesses respectively and the Court shall under such rules of procedure as shall be established for that purpose under the powers of this Act continue the investigation of title of the applicant in connection with any evidence of objections submitted by the objector or additional evidence for the applicant in reply and shall after terminating such investigation finally decide for or against the application.

Objection to be notified to applicant.

Either party may apply for hearing.

44. In any contested case in which the decision shall be in favour of the application and shall not be delivered in open Court in presence of all objecting parties or their counsel or solicitors notice thereof shall be given by the Recorder to any such absent parties or their solicitors or agents before making any entry on the record pursuant thereto and until such notice shall be given the time hereinbefore limited for the lodging of notice of appeal against an order for the recording of title to land shall not begin to run against such parties respectively.

Notice of decision to be given to objectors when not given in open Court.

45. The applicant shall not be bound to take the initiative in any continued investigation consequent upon the filing of any notice of objection and if in violation of any rule of procedure or otherwise in the opinion of the Court the objector shall fail in reasonable diligence the Court may disregard the objection on that ground and in that case no objection which might have been raised in the proceeding before the Court shall be available in any future proceeding or as the ground for any claim for damages or indemnity against the assurance fund or otherwise at law or in equity or in support of any appeal unless the Court of Appeal shall disaffirm the charge of *laches*.

If objector neglect to proceed with due diligence his claim may be disregarded.

46. If it appear to the Court that the evidence of title set forth by the applicant is satisfactory in all respects other than certain particulars admitting of exception or reservation and the applicant shall be willing to accept a certificate qualified in regard to such particulars it shall be lawful for the Court to direct the Recorder to grant such certificate accordingly and thereupon to specify or define any exception qualification or condition affecting the estate or interest recorded and also to reserve expressly the right of any person or class of persons and to describe any outstanding right or possibility of claim or interest subject to which such record is made and if there be any disputed question of boundary between the applicant and any owner of adjoining land which shall not have been determined by any competent authority and it appear that the delay and expense of its present investigation would be an unreasonable obstacle to the perfecting of the title in other respects the Court may direct the Recorder to specify upon the certificate of title the existence of such disputed question of title and that the certificate is issued subject thereto.

Qualified certificates issuable in certain cases.

47. It shall be lawful for the holder of any qualified certificate which shall be issued under the next preceding section to make application at any future time for the removal of the qualification and if such application be grounded on the happening of any subsequent event or the producing of sufficient evidence of any fact which if the same had happened or been established before the issuing of the certificate would have rendered the qualification inapplicable then such application may be investigated and dealt with in like manner as the original application and if satisfied as to the grounds of the further application the Court may either order the qualification to be cancelled by a memorandum on the existing certificate or the issue of a new and unqualified certificate in lieu thereof.

Qualification may be removed afterwards on cause shown.

Claim of term of five hundred years or upwards may be regarded as a fee.

48. Whenever any applicant to bring land under the provisions of this Act shall establish his title thereto for the unexpired residue of any term originally created for five hundred years or upwards and absolutely free from all right or equity incident to the reversion by means whereof such term may be redeemed or extinguished it shall be lawful to grant a certificate of title to such applicant for an estate in fee simple.

Applicant may withdraw his application.

49. An applicant may withdraw his application at any time prior to the issuing of the certificate of title and the Recorder shall in such case upon request in writing signed by the applicant return to him or to the person appearing by the application to be entitled thereto all evidences of title deposited in support of the application and it shall be in the discretion of the Court to order repayment of all or any part of the fees paid by the applicant. Provided that if the applicant shall have nominated any other person to receive the certificate such withdrawal shall not take place without his consent unless the Court shall so direct upon his failing to show sufficient cause of objection after such notice and investigation as to the Court shall appear just. The like notice and investigation shall take place in any case in which the applicant shall without consent of the nominee apply to revoke the nomination on the ground of failure in payment of consideration or otherwise and in such case the certificate may either be wholly withheld or issued to such party and on such terms and conditions as the Court shall determine.

Documents of title which include other property to be returned.

50. Upon issuing a certificate of title the Recorder shall indorse upon the last material registered document deposited in support of the application a memorandum that the land included in the certificate has been brought under this Act and shall sign such memorandum and any other documents so deposited or produced in evidence may be marked or stamped as the Court may by general or special order require and if the documents deposited shall relate to any property other than the land included in such certificate the Recorder shall return them to the applicant or to the person aforesaid otherwise the Recorder shall upon application in writing retain the same in the office and no person shall be entitled to an inspection of such documents or to have any copy thereof or extract therefrom except upon the written order of the applicant or of some person claiming through or under him or pursuant to some covenant or agreement under which he would be compellable to produce the same if retained by him or upon the order of a Judge. No action or suit at law or in equity shall be brought or maintained upon any covenant or agreement for the production of the documents which shall be so retained or upon any agreement to give or enter into a covenant for the production thereof and if any such action or suit shall be commenced it shall be a sufficient answer thereto that such documents have been deposited under this enactment.

Certificate of title to issue in name of deceased applicant or his nominee.

51. In case the applicant or the person to whom he may have directed the certificate of title to be issued shall die between the application and the issue of the certificate it shall be issued in the name of such applicant or of such person as the case may be and such land shall devolve or pass in like manner as if the certificate of title had been issued prior to the death of such applicant or person.

The like as to grants to deceased purchasers of Crown Lands.

52. The like rule of construction which by the preceding section is applied to a certificate of title shall also apply to any grant of Crown Land which has been or shall be issued in the name of any purchaser at any sale of Crown Lands who has died or shall die in the interval between the purchase and date of the grant.

Percentage in the pound to be paid for assurance of title.

53. Upon first bringing land under the operation of this Act whether by the alienation thereof in fee from Her Majesty or consequent upon an application as hereinbefore provided and also upon the recording of the title to an estate of freehold in land under the operation of this Act on a transmission under will or settlement or administration or succession upon the death of an intestate owner there shall be paid to the Recorder towards an assurance fund a sum not exceeding the sum specified in the last Schedule hereto and in the case of land brought under this Act by alienation in fee from Her Majesty the price paid for such land shall be deemed to be the value thereof for the purpose of ascertaining such sum and in the other cases such value shall be ascertained by the declaration of the applicant or by the statutory declaration of the person deriving such land by such transmission. If the Court shall not be satisfied of the correctness of the value so declared he may require such applicant or person to produce a certificate of such value under the hand of a sworn valuator which certificate shall be received as conclusive evidence thereof.

Last Schedule.

Additional indemnity fee for imperfect title.

54. Notwithstanding anything hereinbefore contained the Court may after the publication of such advertisements as it may deem fit direct the Recorder to bring any land under the operation of this Act upon the applicant contributing to the assurance fund in augmentation thereof such an additional sum of money as the Court shall adjudge to be a sufficient indemnity by reason of the non-production of any document affecting the title or of the imperfect nature of the evidence of title or against any uncertain or doubtful claim or demand arising upon the title.

Additional payment for registered memorials or copies received in evidence in lieu of original deed.

55. Whenever in the investigation of the title of any applicant the registered memorial or registered copy of any deed or instrument shall be received in evidence in lieu of production of the original deed or instrument an additional sum of ten shillings shall be paid to the assurance fund in respect of each memorial or copy.

III.—Provisions ascertaining rights conferred by Certificate.

Certificate of title to confer indefeasible title—

56. Subject to such encumbrances or other qualification as shall appear by the record and certificate of title the recorded owner for the time-being of any estate or interest under this Act shall be and be deemed to be absolutely and indefeasibly entitled to such recorded estate or interest against all persons and free from all rights and interests claims and demands whatsoever including any estate claim or interest of Her Majesty her heirs and successors except only as follows:—

Except in case of fraud and no transfer for value.

(1.) Except in the case of a certificate obtained by fraud but which exception shall not prejudice the rights of any *bonâ fide* transferee for value.

Except against adverse rightful and continuous possession—

(2.) Except as against the rights of any person adversely in actual possession of and rightfully entitled to the land at the time of its being originally brought under this Act and continuing in such possession at the time of any subsequent certificate of title being issued in respect thereof.

Or such possession under a prior certificate—

(3.) Except as against the rights of any person adversely in like possession by virtue of a conflicting certificate of title in any case in which more than one certificate may be issued in error under this Act in respect of the same land.

Or error by misdescription (the recorded owner not being transferee for value.)

(4.) Except (in any case wherein the holder of the certificate shall not be a transferee for value) any land which shall by wrong description of boundaries be erroneously therein included and in this case whether such land be in the actual possession of the true owner within the effect of the preceding exceptions or not.

- (5.) Except the following incidents which shall be construed to be reserved by implication in every certificate of title notwithstanding the same be not mentioned as encumbrances namely:—Any rights of the Crown reserved under the original grant or otherwise also any rights of tenants or occupiers for any term not exceeding an unexpired period of three years also any rights-of-way or other easements for the time-being binding on the land also any restrictions imposed by legislative or municipal regulations in respect of the alignment of streets or thoroughfares and any unpaid rates or taxes affecting the land.

And except reservations in Crown grant and other implied incidents.

57. No action of ejectment or other action for the recovery of any land shall lie or be sustained against the person recorded as owner thereof under the provisions of this Act except in any of the following cases that is to say:—

Recorded owner protected against ejectment except in certain cases.

- (1.) The case of the owner of a mortgage or other security-encumbrance as against the encumbrancer in default.
- (2.) The case of a lessor as against a lessee in default.
- (3.) The case of a person deprived of any land by fraud as against the person recorded if or so far as the action shall not prejudice any *bonâ fide* transferee for value although claiming from or through a person so recorded through fraud.
- (4.) The case of a person deprived of or claiming any land included in any certificate of title of other land by misdescription of such other land or of its boundaries as against the recorded owner of such other land not being a transferee thereof *bonâ fide* for value.

In any case other than as aforesaid the production of the certificate shall be held in every Court of Law or Equity to be an absolute bar and estoppel to any such action against the person named in such certificate as the owner or lessee of the land therein described any rule of law or equity to the contrary notwithstanding.

58. Whenever an action shall be brought against a recorded owner in either of the last two cases excepted in the next preceding section if the defendant or any person through whom he claims shall have made improvements on the land since obtaining a certificate of title thereto then unless the defendant shall be proved to have been himself guilty of fraud or to be a mere trustee in the defence of the action for some other person so guilty he shall be entitled whether he admit or deny the plaintiff's title to plead the fact of such improvements being made and to set a value thereon and also on the land as distinct therefrom and give evidence thereof at the trial and if a verdict be found for the plaintiff or his title be admitted the jury shall assess the value of the alleged improvements and shall also separately assess the value which the land would have possessed if the said improvements had not been made. And no writ of possession shall issue in such case unless the plaintiff shall first pay into Court for the use of the defendant the value of the improvements so assessed deducting only the costs (if any) to which he shall be entitled in the action. And if the plaintiff shall fail to make such payment within three months after verdict the judgment to which he is entitled shall thereafter be limited to the sum separately assessed as the value of the land together with costs of suit. And the defendant shall upon satisfaction thereof be entitled to retain the land and improvements and in either case the Court shall be entitled to require to be delivered up any certificate of title which shall be held by the party whose right shall have determined.

In case of ejectment of defendant who has made improvements their value may be assessed.

And plaintiff shall either pay for improvements or be restricted to damages for the loss of the unimproved land.

59. Except on the ground of fraud wherein he shall have participated no person contracting or dealing with or talking or proposing to take a transfer from the recorded owner of any estate or interest shall be required or in any manner concerned to enquire or ascertain the circumstances under or the consideration for which such owner or any previous owner thereof was recorded or to see to the application of any purchase money or shall be affected by notice express implied or constructive of any trust or unrecorded interest any rule of law or equity to the contrary notwithstanding and the knowledge that any such trust or unrecorded interest is in existence shall not of itself be imputed as fraud.

Purchaser from recorded owner not to be affected by notice.

60. The person named in any certificate of title as the owner of an estate of freehold in possession in the land therein described shall be held in every Court of Law and Equity to be seized of the reversion and inheritance in the land immediately expectant upon the term of any lease that may be mentioned as an encumbrance in such certificate and to have all powers right and remedies to which such a reversioner is by law entitled and shall be subject to all the covenants and conditions in such lease to be observed by or on the part of the lessor.

As to reversions expectant on leases.

61. No certificate of title issued upon an application to bring land under this Act shall be impeached or defeasible by reason or on account of any informality or irregularity in such application or in the proceedings previous to the recording of the certificate and every certificate of title issued under any of the provisions herein contained when signed by the Recorder and authenticated by the seal of the Record of Titles Office shall be received in all Courts of Law and Equity as evidence of the particulars therein set forth and of their being entered in the record and shall be conclusive evidence that the person named in such certificate as the owner of or having any estate or interest in or power to appoint or dispose of the land therein described is seized or possessed of such estate or interest or has such power and that such land has been duly brought under the operation of this Act.

Certificate to be conclusive evidence that the land has been duly brought under the Act.

62. In any suit for specific performance or action at law for damages brought by an owner of any land under the operation of this Act against a person who may have contracted to purchase such land not having notice of any fraud or other circumstances which according to the provisions of this Act would affect the right of the vendor the certificate of title of such owner shall be held to be conclusive evidence that such owner has a good and valid title to the land for the estate or interest therein mentioned or described.

Certificate to be conclusive evidence in suit for specific performance or action for damages.

63. Notwithstanding anything contained in this Act the Land Titles Court shall have (collaterally with the Supreme Court in its equitable jurisdiction and subject to appeal thereto) the same jurisdiction that Courts of Equity now have on the ground of actual fraud and the record shall be subject to alteration and amendment pursuant to any order of either Court made in exercise of such jurisdiction or in conformity to the provisions of any Insolvent Act relating to fraudulent preference.

Jurisdiction of Court not to be prejudiced in cases of actual fraud.

64. The Recorder shall when directed by the Court but not further or otherwise make any amendment or correct any error in the record or in any map thereto annexed as the Court shall consider just—such amendment or correction shall be made subject to any notices and terms as to costs or otherwise which the Court may think fit. Every such amendment or correction in the record shall be marked by the Recorder with the date of making the same and with the initials of his name and any certificate which

Power to amend the record.

may

may have been issued as hereinafter mentioned or other instrument of title shall be amended in like manner And the Court may direct and compel under the powers hereinbefore conferred for summoning parties and witnesses any such certificate or instrument of title to be brought to the office by any person for the purpose of amendment or for the purpose of having a new certificate granted in lieu thereof but such amendment of the old or substitution of a new certificate shall be without prejudice to any claim of lien or other claim thereon and shall be on such terms as to costs as the Court may deem just.

Power to order a certificate to be brought in to be amended or a new one substituted.

Record not to be inspected without leave of Court.

Index to be made.

Acts relating to registry of deeds not to apply to recorded land.

Regulations hereby enacted not to be in prejudice authority of Court over the record.

First Schedule. Certificates of title in fee simple to be in duplicate. Original certificates and grants to be bound up in record book and each constitute a separate folium—upon which entries affecting the land shall be made. There may nevertheless be a separate certificate & folium for any derived estate deed. Distinct entries made of dealings therewith. But which shall contain a reference to the folium of the principal estate

Receipts may be required for duplicate certificates.

Certificates of title recorded when entered.

Instruments recorded when memorial thereof has been entered.

Instruments to be in duplicate.

Instruments entitled to priority according to date of record.

Particulars of trusts not to be recorded—With special exceptions—But the instruments tendered for record may declare or refer to any trust and operate by way of agreement only—

And not to prejudice recorded estate—Or imply notice—

Declaration negating breach of trust may nevertheless be required before receiving any instrument for record.

To enter caveats.

IV.—General Provisions regulating entries on the Record.

65. The record shall be kept under the control of the Court in an office to be called "The Record of Titles Office" and shall not be removed therefrom for any purpose unless the Court shall direct The record may be inspected by the recorded owners of the estates and interests recorded therein respectively or by their solicitors or agents No other person shall be permitted to inspect or to take copies of or extracts from the record unless under authority of such owner or of some general or special order of the Court or a Judge An index to recorded estates shall be made and regularly entered up and such index may be inspected by any person on payment of the authorized fee.

66. The provisions of all prior Acts of the Legislature relating to the registry of deeds shall cease or be held to have ceased to be applicable to any land so soon as it shall be placed on the record under the provisions of this Act or was so placed under the Real Property Act (1862) and no such Acts shall be applicable to any lease charge or encumbrance on the record so far as the same affects any recorded estate.

67. Every direction in this Act for making entries on the record shall be construed to be permissive only and without prejudice to any order of the Court or a Judge imposing further precaution or condition either general or in reference to any particular case.

68. Certificates of title to land in fee simple shall be in duplicate in the form of the first Schedule hereto and the Recorder shall bind up in the record book one part (to be called the original) thereof and one part (to be also called the original) of the grants hereby directed to be prepared in duplicate and to be deemed certificates of title and he shall deliver the other part (to be called the duplicate) to the owner Each original certificate or grant shall constitute a separate folium of record and the Recorder shall indorse thereon in such manner as to preserve their successive priorities the particulars of all dealings with the land therein comprised and hereby required to be recorded so as to disclose from time to time the existence of every derived estate or interest whether in possession or reversion inclusive of every encumbrance or power affecting the same Separate certificates may nevertheless be issued of the title to any such derived estate or interest in such form as the Court shall by general or special order direct and each original thereof may constitute a distinct folium of the record upon which separate entries may be made of dealings with such derived estate or interest But every such last-mentioned certificate and folium shall contain a reference to the folium of the principal estate.

69. Before the delivery of any duplicate certificate of title a receipt for it in the handwriting of the owner may be required to be signed by him when practicable so as to prevent as far as may be personation.

70. Every certificate of title shall be deemed to be recorded under this Act so soon as the Recorder shall have recorded thereon the volume and folium of the record in which the same is entered And every instrument purporting to affect land under the operation of this Act shall be deemed to be recorded so soon as a memorial thereof as hereinafter described shall have been entered in the record upon the folium constituted by the existing certificate of title and the person named in any certificate of title or instrument so recorded as the grantee or as the owner of or having any estate or interest or power shall be deemed to be the duly recorded owner thereof.

71. Every instrument presented to be recorded shall be in duplicate unless in cases to be excepted by general rule or special order of Court and shall be recorded in the order of time in which the same is produced for that purpose and instruments recorded purporting to affect the same estate or interest shall notwithstanding any express implied or constructive notice be entitled to priority the one over the other according to the date of recording and not according to the date of the instrument and the Recorder upon the recording thereof shall in cases where the instruments are in duplicate file one original in the office and shall deliver the other (hereinafter called the duplicate) to the person entitled.

72. No entry shall be made on the record of the particulars of any trust unless the trust be contained or originate in a grant from the Crown for public purposes or upon order of the Court permitting such entry on special application in which case the effect of such entry shall be to preclude any dealing with the land without an order of Court But any instrument from which the recorded entry is made may declare any trusts or contain special conditions in restraint of dealing with the estate or interest thereby transferred or created and either such instrument or the record may refer to any separate document disclosing such trusts or conditions Every such trust or condition shall be binding by way of contract between the parties thereto and may be brought in evidence upon any lawful proceeding between them and their respective representatives or to restrain any dealing in favor of any other person under caveat or otherwise before the same be absolutely recorded But shall not in the absence of such proceeding or caveat interfere with the recording of any instrument exercising the ordinary powers of a recorded owner nor prejudice (by implication of notice or otherwise) any person claiming title thereunder Provided nevertheless that if the Court by general rule or a Judge in any special case shall see fit to require that before recording any such instrument as aforesaid proof by statutory declaration or otherwise be afforded negating the breach thereby of any trust or condition or agreement the Recorder shall require such evidence and file the same for production whenever required in any civil or criminal proceeding.

73. The Court may also whenever occasion shall require direct the Recorder to lodge a caveat on behalf of Her Majesty or on behalf of any person who shall be under the disability of infancy coverture lunacy unsoundness of mind or absence from the Colony to prohibit the transfer or dealing with any land belonging or supposed to belong to any such person and also to prohibit the dealing with any land in any case in which it shall appear that an error has been made by misdescription of such land or otherwise in any certificate of title or in any instrument or for the prevention of any fraud or improper dealing.

- 74. Every memorial entered in the record shall state the time of the production of such instrument to be recorded the names of the parties thereto and all such particulars of the instrument as are intended to form part of the record and to affect the title to the land and shall refer by number or symbol to such instrument and shall be signed by the Recorder. Memorial defined.
- 75. Notwithstanding that such instrument be described as recorded by reason of the entry of such memorial the instrument shall not itself be thereby rendered any portion of the record nor shall any person other than the parties thereto be thereby held to have any notice of the contents thereof beyond the particulars recorded by the memorial or necessarily to be inferred therefrom. The memorial to be the sole record.
- 76. Whenever a memorial of any instrument has been entered in the record the Recorder shall (except in cases wherein the entire land contained in any certificate is transferred and a certificate of title is forthwith required) enter the like memorial on the duplicate certificate and instrument unless the production of the same shall be dispensed with as hereinafter provided and he shall endorse on every instrument whereof a memorial is so recorded a certificate of the time at which the memorial was entered in the record and shall authenticate such certificate by signing his name thereto and such certificate shall be received in all Courts of Law and Equity as conclusive evidence that such instrument has been duly recorded. Memorial to be entered on duplicate instrument.
Certificate of record to be evidence.
- 77. No instrument until recorded in manner herein provided shall be effectual to pass any estate or interest in any land under the operation of this Act but upon the recording of any instrument in manner herein provided the estate or interest comprised in such instrument shall pass or as the case may be the land shall become liable in manner and subject to the covenants and conditions set forth and specified in such instrument or by this Act declared to be implied in instruments of a like nature and should two or more instruments signed by the same owner and purporting to affect the same estate or interest be at the same time presented to the Recorder to be recorded he shall record and indorse that instrument which shall be presented by the person producing the duplicate certificate of title And he shall not in any case without authority of some rule or special order of Court record any instrument dealing with any estate or interest without production by the person presenting the same of the duplicate certificate. Instruments not effectual until entry in record.
- 78. The owner of any estate or interest in land under the operation of this Act shall be entitled to receive a certificate of title to the same And if any certificate be issued to a minor or to a person under any other disability the Recorder shall note thereon the age of such minor or the nature of the disability so far as known to him. Proprietor of land entitled to certificate of title. If issued to person under disability such disability to be stated.
- 79. Two or more persons who may be recorded as joint owners of an estate or interest in land under the provisions of this Act shall be deemed to be entitled to the same as joint tenants and in all cases where two or more persons are entitled as tenants in common to undivided shares of or in any land such persons may receive separate and distinct certificates of title to such undivided shares And except in cases where a memorandum in restraint of alienation by survivors shall be entered any joint tenant may with the consent of his co-owner or co-owners receive a separate distinct certificate of such joint estate in which case every certificate so used shall be marked with the name or names of the owner or owners in respect of whose interest the same shall be issued and held respectively. Recorded joint owners to be joint tenants. Tenants in common to receive distinct certificates.
- 80. On the application of any recorded owner of land held in various parcels under separate certificates of title and on his delivering up the duplicates thereof the Recorder may issue to such owner a single certificate for the whole of such land in accordance with such application so far as the same may be done consistently with any regulations for the time-being in force respecting the parcels of land that may be included in one certificate and upon issuing any certificate under this section the Recorder shall cancel the previous certificate and shall indorse thereupon a memorandum setting forth the occasion of such cancellation and referring to the certificate so issued A converse proceeding may be adopted upon the application of the owner of land held under one certificate to receive separate certificates for sub-divided portions thereof. Owner of separate certificates may obtain a single certificate for all the land and vice versa.
- 81. Such references shall be noted in the record book and on instruments filed hereunder as will allow the title to be traced either downwards from or upwards to the original certificate but it shall not be necessary in any duplicate or certified copy of any certificate or instrument to insert such references and every such duplicate or copy shall be deemed complete notwithstanding the omission of such references. A history of the various dealings affecting land to be preserved.
- 82. Trustees with a power of sale may be recorded as joint owners and any tenant for life or other person beneficially interested or nominated for protection of other persons so interested may in conformity to the terms of any transfer or settlement or at any time by direction of a Judge be entered as a consenting party in which case no further dealing with the land shall be recorded without the consent of the person so indicated The name of any person may be entered in like manner as consenting party in conformity to the terms of any mortgage or encumbrance or of any subsequent agreement between the parties respectively bound and entitled thereunder for the time-being in which case the power of sale incident to the encumbrance shall not be exercised without consent of the person so indicated. A consenting party may be named to protect the interest of beneficiaries.
The like in regard to power of sale under mortgages &c.
- 83. In the event of the death of such consenting party or of any change in the interest for protection of which he was appointed or upon any other contingency requiring the appointment of another person in the stead of the person originally named it shall be lawful for the Court on proof of the change of interest or in conformity to any sufficient agreement between the parties interested providing for the contingency or upon any grounds which shall be deemed sufficient in the exercise of a like jurisdiction as that of Courts of Equity in appointing new trustees to direct the name of any person to be removed and that of any other person to be substituted as such consenting party. Name of consenting party may be changed as occasion may require.
- 84. Any person interested in any estate or interest recorded in the name of any other person may lodge a caveat with the Recorder which caveat shall be in such form and shall be verified and noted on the record in such manner as the Court shall by general rule or special order direct A caveat shall remain in force for a period of twenty-one days from the date thereof if the Court shall be then sitting or if the Court shall not be sitting then for twenty-one days from the next sitting of the Court Any transfer or other disposition recorded during such period shall unless the Court shall otherwise direct be made expressly subject to the title and claim (if any) of the cautioner. Power to any person interested to lodge a caveat prohibiting dealing.
- 85. After the expiration of such period the caveat shall cease and the officer shall cancel any note thereof on the record unless a fiat continuing it be made by a Judge and upon the caveat so ceasing the estate or interest shall be dealt with in the same manner as if no caveat had been lodged. Caveat to cease unless extended.

Court may extend time of caveat.

86. At any time during the said period application may be made to the Court for an extension thereof and if satisfied that the cautioner has sufficient grounds of *prima facie* objection to justify further delay for the investigation thereof the Court may thereupon and from time to time thereafter if occasion shall require extend the period for the caveat continuing in force and may in connection therewith require such undertaking or security or the lodging of such sum of money in Court as may be deemed sufficient to indemnify any person prejudiced by delay in the disposition of the property or may make such other order as shall appear just. If any caveat be lodged without reasonable cause the Court may order payment by the cautioner of such sum by way of compensation or costs as it may deem just.

Court to decide questions arising on caveat. Subject to appeal

87. All questions arising upon any such caveat shall be subject to investigation and adjudication by the Court under the powers hereby conferred in like manner as hereinbefore provided in the case of objections to applications for original certificate of title subject to the same right of appeal and the like conditions in regard to notice in relation thereto.

Disposition by surviving joint owners may be restricted by note on record.

88. Where two or more persons are recorded as joint owners of any estate or interest a note may with their consent or in compliance with a condition imposed by the party transferring or creating the estate or interest or by direction of the Court be made on the record to the effect if that such owners be reduced by death or otherwise below a specified number no disposition shall be made by the surviving or remaining owners unless under direction of the Court and such note shall appear on every certificate issued by the Recorder and if it be intended that no such disposition shall be made until the full original number be restored the entry of the words "no survivorship" shall suffice to express such intention.

Successors (or new trustees) may be appointed.

89. Whenever by the death or refusal to act or absence or other disqualification of either one or more of the recorded owners the surviving or remaining owner or owners shall be rendered incompetent to deal with the recorded estate the Court may on their application or that of any person beneficially interested proceed to inquire whether there be any valid provision subsisting under any settlement or agreement relating to the recorded estate for appointment of new trustees and if so the Court shall in conformity therewith and if not then in the exercise of its own discretion in the selection of fit persons to supply the vacancies make such order for that purpose as it shall deem fit and shall be entitled to exercise therein the same powers which belong to the Supreme Court in Equity and shall cause the recorded ownership to be made conformable with the appointment so made.

Continuing caveat entitling cautioner to notice of any dealing from time to time.

90. In any case in which the entry of the name of a consenting party is permissible under the provisions of section eighty-two of this Act there may be entered either in addition or instead thereof the name of any person as a continuing cautioner to whom notice shall be given of any dealing whenever presented for record and such person shall be from time to time dealt with as a cautioner regarded as having entered an ordinary caveat on the day on which he shall have received such notice. And if the dealing to which such notice refers shall be recorded before expiration of the time allowed for the remaining in force of such caveat it shall be subject to the title and claim or the objection on behalf of any other person of such cautioner so long as such caveat shall not have lapsed or have been overruled.

Right of objection to lapse in same time after notice as other caveats after entry.

91. The Court shall have the like power of removing the name of a continuing cautioner and substituting the name of another in case of death resignation or otherwise as hereinbefore provided in the case of a consenting party.

Other names may be entered in case of death resignation &c.

Every caveat &c. to be accompanied by an address in Sydney. And notice served at such address to be sufficient.

92. No caveat or caution or notice of objection to application for an original certificate of title under this Act shall be sufficient unless accompanied by some address within the City of Sydney at which the service of notices in reference thereto may be made and shall be deemed conclusive. An additional address may be given to which a duplicate notice may be sent through the Post Office but no proof of the latter notice shall be requisite nor shall any proceeding be invalidated by its omission.

The Court may direct estates and interests under settlements to be separately recorded.

93. Upon the application of any person claiming any derivative estate or interest under any settlement or lease or encumbrance of a recorded estate the Court may make an order directing the Recorder to record separately any such derivative estate or interest either in possession or in remainder which can be alienated by the owner thereof without the consent of any other person and which is not liable to be defeated or affected at law or in equity by the act of any other person or by any other contingency or as to which such condition of consent or liability if existing admits of being sufficiently stated on the record. Upon any such application the Court shall ascertain whether any power of sale or exchange or power of creating any lease or encumbrance exists with respect to such estate and if so the record shall be qualified by stating the existence of such power. The Court may also direct the officer to record separately any vested and ascertained charge or encumbrance under the settlement.

Interests &c. may be recorded by reference. No appeal to lie if the Court declines to record separately.

94. On any application to record separately any derivative estate or interest the Court may decline to have the same separately recorded or may (at its option) direct that the same be recorded by means of a note of reference to the whole or any portion of the instrument creating it or counterpart or a copy deposited in Court for reference and no appeal shall lie from any decision of the Court given under this section.

Articles may be construed as a perfected settlement.

95. In the construction of any articles or agreement for a settlement the Court may for the purpose of this Act regard any legal estate charge or power which would be created by a settlement made pursuant thereto and framed in due form of law as if the same were already subsisting in virtue of such articles and may give effect thereto on the record without requiring the previous completion of any such settlement.

Power to appoint may be recorded as an encumbrance belonging to the donee.

96. If by any instrument of transfer duly executed any recorded estate or interest shall be transferred to a transferee to such uses as some other person therein named shall appoint and until and in default of appointment to the transferee it shall be construed to have the full effect of a limitation of the use in fee simple to the transferee and to confer authority on the donee of the power to defeat such estate by its exercise and such power may be recorded as an encumbrance to which the estate of the transferee shall be subject and if the donee of the power shall be a married woman she shall be entitled to exercise such power without consent of her husband unless such consent be required by some express provision.

Provision as to separate estate of a married woman.

97. If land be transferred to a married woman under this Act as her separate estate such estate may be designated as such in the certificate of title and in that case she shall be entitled to deal with such estate as a *feme sole* in all respects also to sue and be sued in all proceedings at law or in equity relating to such estate without regard to any marital rights or liabilities of any present or future husband. Provided that the defendant in any such proceedings wherein she shall be plaintiff shall be entitled to demand security for costs in like manner as if the plaintiff were out of the jurisdiction. And in all such proceedings whether she be plaintiff or defendant her separate estate (whether that in question in the suit or any other) shall be liable for all damages and costs that shall result or be awarded against her. And it shall be

be in the discretion of any Court in which such proceedings shall be pending to direct in any stage thereof security for the same to be entered on the record of title If any land be transferred to a married woman for her own life as her separate estate such estate may likewise be declared to be without power of anticipation and so designated on the certificate of title And in that case no instrument dealing with such estate shall be recorded except leases for a term not exceeding seven years from the granting thereof (unless determinable by death of the lessor) purporting to be for the full annual value at rack rent nor shall such recording render any such lease valid if the same be in fact made in fraud or contravention of the said restriction.

The like as to restraint upon anticipation.

98. Any person entitled to receive a certificate for an absolute estate and desirous that such estate shall be descendable to his heirs under the law of descent according to primogeniture may require such estate to be entered accordingly on the record and certificate and in that case if he make no other disposition thereof by will or otherwise such entry shall be construed as a valid devise to his heirs general and the Act twenty-sixth Victoria number twenty shall not be applicable thereto as an intestate estate.

An estate may be so recorded as to pass to heirs under the former rule of inheritance.

99. The recorded owner of any estate or interest in land under the operation of this Act whether of the nature of real or personal property may transfer such estate or interest to his wife or if such owner be a married woman it shall be lawful for her to make such transfer to her husband or it shall be lawful for such proprietor to make such transfer directly to himself and another person or jointly with any other person to himself alone or to create or execute any power of appointment or disposition or to create or limit estates in remainder or otherwise as legal estates of or concerning land the subject thereof without the intervention of any precedent or particular estate and also like estates as legal estates without the employment or intervention of any form of use and upon the recording of such transfer the land estate or interest or power shall vest in or belong to the transferee solely or jointly as the case may be or in the person in whose favour any such power may have been executed or taking under any such limitation or otherwise according to the intent and meaning of such instrument.

Owner may vest estate jointly in himself and others without limiting any use &c.

100. Every covenant and power to be implied in any instrument by virtue of this Act may be negatived or modified by express declaration in the instrument or indorsed thereon and in the declaration in any action for a breach of any such covenant it shall be lawful to allege that the party against whom or against whose real or personal representatives such action is brought did so covenant precisely in the same manner as if such covenant had been expressed in words at length in such instrument any law or practice to the contrary notwithstanding and every such implied covenant and every express covenant agreement or declaration contained in any instrument duly signed and attested for the purposes of this Act shall have the same force and effect as if it had been set out at length in such instrument and had been under seal and where in any instrument there shall be more than one covenantor such covenants as are by this Act declared to be implied in instruments of the like nature shall be construed to bind the parties jointly and severally unless otherwise determined by express agreement in qualification thereof.

Implied covenants and powers may be modified or negatived.

Implied covenants by more than one person to be joint and several.

101. If in making up or continuing the record of any title any question shall arise as to the true construction or legal validity or effect of any deed will or instrument or as to the persons entitled or the extent or nature of the estate right or interest power or authority of any person or class of persons or the priority of any charge or encumbrance claim or interest or as to the mode in which any entry ought to be made in the record of title such questions shall be disposed of by the Court which may either decide the same or direct any proceeding at law or in equity for that purpose or at its discretion and without deciding such question may direct such entry to be made on the record as shall appear to be right and the Court may direct the estate or interest of any person to be recorded by reference to the deed will or instrument creating the same or to a verified copy thereof to be deposited as the Court shall direct.

Questions arising on the record to be disposed of by the Court.

102. If any certificate of title be lost or destroyed the Recorder may upon the order of a Judge (who shall be satisfied of the fact of such loss or destruction and may direct such public advertisement for the recovery of the same as he may consider expedient) give a new certificate and shall state thereon that it is given in substitution for the former certificate and the same fees shall be chargeable for the new as for the former certificate but no such new certificate shall be of any avail against any person who may have already derived title under the former certificate.

On proof of loss &c. of certificate a new one may be given.

V.—Attestation of Instruments.

103. Instruments (including powers of attorney) under this Act signed by any person and attested by one witness to whom the party signing is personally known shall be held to be duly executed and such witness may be—

Attestation of instruments and powers of attorney.

Within the limits of the Colony—

The Recorder or an Assistant or Deputy Recorder or a Justice of the Peace Notary Public or Commissioner for taking affidavits or any other person who shall be from time to time appointed as an official witness for the purposes of this Act by commission under the seal of the Land Titles Court.

And without the limits of the Colony—

Either a Notary Public or the Mayor or other chief officer of any city or municipal corporation within the United Kingdom of Great Britain and Ireland or the officer administering the Government of or the Judge of any Court of Record or Registrar General or Recorder of Titles in any British possession or the British Consular Officer at any foreign place or any other official witness appointed as aforesaid.

Such witness whether within or without the limits of the Colony may also be any other person but in such case he shall appear before one of the officers or persons aforesaid to whom he is personally known who after making due inquiries of such witness shall indorse upon the instrument or power a certificate in the form in the second Schedule hereto or to the effect thereof and such certificate shall be deemed sufficient proof of the due execution of such instrument or power No instrument or power of attorney which shall not be signed and attested as aforesaid shall be received as sufficient to authorize any entry on the record without the express order of a Judge If the Judge see fit he may order the required entry to be made either absolutely or on condition that the instrument or a duplicate thereof be perfected within a time fixed and at the expiration of which the entry shall be cancelled if such condition then remain unfulfilled.

Proof of signature.

Second Schedule.

Attested signatures of transferees and encumbrances not imperative in all cases.

104. The duly attested signatures of transferees and encumbrancees shall be affixed pursuant to the forms in the Schedule hereto whenever conveniently practicable in order to facilitate prevention or detection of forgery or personation but may be dispensed with in any case in the discretion of the Recorder (subject to the control of the Court or a Judge if any general or special order be made in reference thereto) and no instrument otherwise perfected shall when recorded be deemed insufficient for want of the signatures aforesaid.

Seal of corporation substituted for signature.

Seal of attorney of corporation to be deemed seal of corporation.

105. A corporation for the purpose of any application to bring land under this Act or of transferring or otherwise dealing with any recorded estate or interest under this Act may in lieu of signing the instrument for such purpose required affix thereto its common seal. The seal of the attorney of any corporation whose chief or head office of business shall be out of the Colony whether such attorney shall have been already constituted or shall hereafter be constituted by a power of attorney under a seal purporting to be the common seal of the corporation giving the power shall be deemed to be the common seal of such corporation within the meaning and for the purposes of this section.

VI.—Powers of Attorney.

Powers of attorney.

Third Schedule.

Existing and prospective powers to be available.

To be recorded.

Revocation to be also recorded.

Recorded power to remain in force until revocation recorded.

But without prejudice to discretionary objection after any other notice of revocation—Or to remedy for fraud.

Power of attorney deemed *prima facie* in force if filed within four months. If afterwards evidence of non-revocation required.

106. It shall be lawful for the recorded owner of any estate or interest to appoint any person to act for him in transferring or otherwise dealing therewith by signing a power of attorney in the form of the third Schedule hereto or in any other form that the Court shall deem sufficient and if it shall expressly or constructively authorize such transfer or dealing with any estate or interest in land of the principal generally or prospectively it shall be no objection to such power that the principal was not a recorded owner under this Act at the time of the execution thereof or that this Act was not then passed. No such power shall be effectual under this Act until filed in the Record of Titles Office unless such filing be on special grounds dispensed with on substitution of a verified copy or other condition by order of Court. The revocation of such power either express or constructively by the death bankruptcy insolvency or (if a female) marriage of the principal may be recorded in the said office as follows namely by a notice under the hand of the principal or of some person authorized by him or her in that behalf that he or she has revoked such power—or by the statutory declaration of any person that the principal is married or dead or has become bankrupt or insolvent as the case may be which notice or declaration respectively shall be filed in like manner as the power to which it relates and be annexed thereto. And until such filing the power shall continue effectual as an authority for recording any instrument executed by the attorney within the scope of the power notwithstanding any such express or constructive revocation. Provided that nothing herein contained shall interfere with the authority of the Court or Recorder to refuse the recording of any instrument after notice howsoever received that any such revocation has preceded the execution thereof nor shall prejudice any remedy at law or in equity against any attorney or other person who shall have received such notice for any fraud or injury committed by or in connection with the wrongful acting upon the said power.

107. Any power of attorney filed within four months after the date thereof shall be deemed to continue in force at the time of such filing without express evidence to that effect unless a revocation thereof shall have been previously recorded in manner aforesaid. But if filed afterwards it shall be accompanied by such statutory declaration or other evidence negating revocation as the Court shall by rule or special order require.

VII.—Transfers.

Transfers.

Fourth Schedule

108. The recorded owner of any estate or interest in land may transfer the same by one of the forms in the fourth Schedule hereto and a woman entitled to any right or contingent right to dower in any freehold land shall be deemed a sole owner of such right within the meaning hereof. Upon the recording of the transfer the estate and interest of the owner as set forth in such instrument or which he shall be entitled or able to transfer or dispose of under any power with all rights powers and privileges thereto appertaining shall pass to the transferee and who shall thereupon become the owner thereof and if any liabilities appertain thereto shall whilst continuing such owner be subject to and liable for the same requirements and liabilities to which he would have been subject and liable if he had been the former owner of the estate or person originally acquiring the transferred derivative interest as lessee or otherwise as the case may be.

Transfer to include right to sue thereunder.

109. By virtue of every such transfer as is herein mentioned the right to sue upon any mortgage or other instrument and to recover any debt sum of money annuity or damages thereunder (notwithstanding the same may be deemed or held to constitute a chose in action) and all interest in any such debt sum of money annuity or damages shall in the absence of any condition or agreement to the contrary be transferred so as to vest the same at law as well as in equity in the transferee thereof. Provided always that nothing herein contained shall invalidate a plea of payment or satisfaction to the transferor on the part of the defendant to any action by the transferee unless it shall appear that the defendant had notice of the transfer before such payment or satisfaction. Nor shall anything herein contained prevent a Court of Equity from giving effect to any trusts affecting such debt sum of money annuity or damages in case the transferee shall hold the same as a trustee for any other person.

Saving powers to Courts of Equity to give effect to trusts.

Instruments when signed and recorded to have the same efficacy as a deed acknowledged but married woman to acknowledge instruments signed by them.

Fifth Schedule.

110. Every transfer or other instrument when signed by the owner (unless an instrument ordinarily requiring acknowledgment and signed by a woman appearing on the record to be married) shall when recorded if attested in manner required by this Act be as valid and effectual to all intents and purposes for conveying passing or conferring the estates interests or rights expressed to be thereby transferred leased or created respectively as a deed duly executed and acknowledged by the same person would have been under any law heretofore or now in force in this colony or as any other form of document would have been either at law or in equity and every instrument acknowledged by any woman appearing on the record to be married (whether a sole owner or not) and certified under the hand of an official witness in the form of the fifth Schedule hereto shall when such instrument has been recorded be as valid and effectual to all intents and purposes as a deed duly executed and acknowledged or an instrument duly signed and acknowledged by her would have been under any law heretofore or now in force in this colony or as any other form of document would have been either at law or in equity and such certificate shall be deemed and received as sufficient evidence of the due acknowledgment by her of the instrument therein referred to.

111. Before the recording of the transfer of any estate or interest for which a duplicate certificate of title shall be held the transferrer shall deliver up such certificate and the Recorder shall after recording the transfer indorse on the certificate a memorandum cancelling the same either wholly or partially according as the transfer purports to transfer the whole or part of the land and setting forth the particulars of the transfer and the duplicate of any wholly cancelled certificate shall be retained by him and the duplicate of any partially cancelled certificate may be returned indorsed as aforesaid to the transferrer and the Recorder may make out to the transferee a certificate of title to the land mentioned in such transfer Provided that if the entries on the certificate be inconveniently numerous or if for any other reason the transferrer prefer to receive a new certificate for the untransferred residue of land such certificate may be issued on surrender of the existing certificate and payment of the regulated fee for the new certificate.

Certificate of title to be delivered up and cancelled so far as regards the portion of land transferred and fresh certificate to be issued to purchaser and a certificate for the part untransferred to be issued to owner when demanded.

112. In every transfer of land subject to mortgage or other encumbrance and every transfer of lease there shall be implied the covenants set forth in the sixth Schedule hereto in reference to such transfers respectively.

Covenants implied in transfers of encumbered land or of leases. Sixth Schedule.

113. Whenever any transfer or lease of freehold shall contain the words "Together with a right of carriage-way over" [specifying or describing the road or roads over which the easement is created and referring to a map indorsed whereon such road or roads is or are indicated] such words shall have the same effect and be construed as if there had been inserted in such transfer or lease the words contained in the seventh Schedule hereto A memorial of any transfer or lease creating any easement over or upon or affecting any land under the operation of this Act shall so far as relates thereto be entered upon the folium of the record constituted by the existing certificate of title of such land in addition to any other entry concerning such instruments required by this Act.

Creation of easements.

Seventh Schedule. Memorial of easements to be recorded.

114. Upon production of a receipt of the Treasurer of the Colony or his deputy for the full purchase money of any land sold by Her Majesty in fee together with an instrument dealing with such land signed by the purchaser the Recorder shall indorse upon such receipt such memorial as he is herein required to enter in the record upon the recording of any dealing of a like nature with land recorded and shall sign such indorsement and shall indorse such instrument with the certificate herein required on the recording of a like instrument after a grant has been recorded and so on from time to time with respect to any other dealings before the recording of the grant and every such instrument shall thereupon be held to be duly recorded under this Act The Recorder shall file such receipt and instrument in the office and upon the recording of the grant of the land he shall enter thereon a memorial of every dealing indorsed on such receipt and issue a certificate of title to the then transferee of the land (if any).

Dealings may be recorded prior to issue of Crown grant.

115. Any recorded owner subdividing any land under the provisions of this Act for the purpose of selling the same in allotments may be required to deposit with the Recorder a map which shall exhibit distinctly delineated all roads streets passages thoroughfares squares or reserves appropriated or set apart for public use and also all allotments into which the said land may be divided marked with distinct numbers or symbols and every such map shall be certified as accurate by statutory declaration of a surveyor specially licensed to practise as a surveyor under the provisions of this Act by the Court on the recommendation of the Surveyor General Such map may by the express permission of the Court be altered or varied from time to time and any roads or ways thereon shut up or diverted upon the application of parties interested or after such inquiry and notice as the Court shall see fit and upon the Court being satisfied that the alteration will not operate to the injury of any person entitled to object thereto.

Map of subdivided land.

Surveyors—how to be licensed.

116. The dower of the widow of any Crown grantee or owner of freehold land alienated from the Crown on or after the first day of January one thousand eight hundred and sixty-three and the dower of the widow of any proprietor of freehold land alienated from the Crown before that day (notwithstanding any such widow shall have been married before the year one thousand eight hundred and thirty-seven but subject as to the last-mentioned land to the provisos hereinafter contained) shall be barred by the absolute disposition of the land by her husband in his lifetime or by his will and all partial estates and interests and all mortgages and charges created under this Act or by will of her husband and all encumbrances to which any such land shall under the provisions of this Act be subject or liable shall be valid and effectual as against the right of his widow to dower in or out of the same Provided always that any right or contingent right to dower which may subsist in or out of any land alienated from the Crown before the said first day of January one thousand eight hundred and sixty-three and which shall be noted as an encumbrance in the certificate of title or in any transfer shall not be prejudiced by this section but no right or contingent right to dower in or out of such land which shall not have arisen before the land is brought under this Act or which shall be capable of being defeated by the exercise of any power of appointment conferred on the applicant owner shall be deemed or noted as such an encumbrance nor shall any such right or contingent right be deemed to exist or continue or be noted on the record of any title to land which shall be brought on the record or on any new certificate of title issued on transfer or otherwise at any time after the first day of January one thousand eight hundred and seventy unless in the meantime the wife or widow claiming such right or contingent right shall have lodged with the Recorder of Titles a claim in the form of the eighth Schedule hereto with a statutory declaration or certificate verifying the marriage in respect of which such claim is made Provided also that no land alienated from the Crown before the said first day of January one thousand eight hundred and sixty-three and the right or contingent right to dower in or out of which shall have been actually barred before the land is brought under this Act shall be subject to a new right to dower in favour of the widow of the applicant owner arising under or by virtue of the certificate of title or any entry on the record.

As to dower rights.

Subsisting dower rights if mentioned in the certificate not to be prejudiced.

No certificate issued after 1 January 1870 to reserve any dower right unless the doweress has previously lodged claim.

Eighth Schedule. Barred dower right not to be revived by the land being brought under the Act.

IX.—Leases.

117. The recorded owner of any freehold land may lease the same by signing a lease thereof in the form in the ninth Schedule hereto but no lease subject to a mortgage or other security-encumbrance shall be valid or binding against the security-encumbrancee unless he shall have consented in writing to such lease prior to the same being recorded.

Leases of land. Ninth Schedule.

118. In every lease made under the provisions of this Act there shall be implied the covenants and powers set forth in the tenth Schedule hereto.

Covenants and powers to be implied in every lease. Tenth Schedule.

119. Whenever in any lease made under this Act the lessee shall employ any of the forms of words contained in column one of the eleventh Schedule hereto and distinguished by any number therein such

Short forms of covenants by lessees. Eleventh Schedule.

lease

lease shall be taken to have the same effect and be construed as if he had inserted therein the form of words contained in column two of the same Schedule and distinguished by the corresponding number and every such form shall be deemed a covenant with the lessor by the lessee. There may be introduced into or annexed to any of the forms in the first column any express exceptions from or express qualifications thereof respectively and the like exceptions or qualifications shall be taken to be made from or in the corresponding forms in the second column.

Lease may be surrendered by indorsement by lessee with concurrence of lessor.

120. Whenever any lease made under this Act is intended to be surrendered and the surrender thereof is to be effected otherwise than through the operation of a surrender in law or than under the provisions of any law or statute now or hereafter to be in force relating to insolvent estates there may be indorsed upon such lease or on the duplicate thereof the word "surrendered" with the date and such indorsement shall be signed by the recorded owners of the lease and of the estate subject thereto respectively and shall be attested by a witness and the Recorder thereupon shall enter on the record a memorandum recording the date of such surrender and shall likewise indorse upon the lease or duplicate a memorandum recording the fact of such entry having been made on the record and upon such entry being made the estate and interest of the lessee shall vest in the lessor or in the owner for the time-being of the inheritance in the land immediately expectant on the term and production of such lease or duplicate bearing such indorsements shall be sufficient evidence that such lease has been legally surrendered. Provided that no lease subject to a mortgage or other security-encumbrance shall be so surrendered without the consent in writing of the encumbrancee.

Recovery of possession by lessor to be entered on record.

121. The Court upon proof of recovery of possession by a lessor by any legal proceeding may direct the Recorder to make an entry of the same on the record and the term for which the land was leased shall upon such entry being made determine but without prejudice to any action or cause of action which shall previously have been commenced or have accrued in respect of any breach or non-observance of any covenant expressed in the lease or by this Act declared to be implied therein.

X.—Security-encumbrances.

Security-encumbrance may be created in three forms, viz:—
1. Mortgage.
2. Charge of annuity, &c.
3. Contingent security.

122. The recorded owner of an estate or interest in land may create an encumbrance as security by way of mortgage in the first form of the twelfth Schedule hereto and by way of charge of annuity or fixed periodical payments in the second form of the same Schedule and for securing any contingent payment by way of cash credit indemnity or otherwise or the fulfilment of any covenant or agreement in the third form of the same Schedule. Any encumbrance which shall be entered on the record by order of a Judge to secure fulfilment of the provisions in any settlement shall have the effect of any or either of these forms according to the nature of the portions annuities or other subject of security.

Covenants implied.

Thirteenth Schedule.

123. The covenants powers and conditions set forth in sections one and two in the thirteenth Schedule hereto in reference to the said forms shall be therein respectively implied subject nevertheless to such variations or additions if any as shall be made by express agreement between the parties and whenever a covenant to insure shall be thereto added in the short form of column one of section three of the same Schedule it shall have the full effect of the words in column two thereof.

No security encumbrance to operate as a transfer but to confer contingent power of sale &c.

No conditions in qualification of the power to affect the recorded title of purchasers &c. But declaration negating breach of condition may be required.

124. A security-encumbrance under this Act shall not operate as a transfer of the land but when recorded the power of sale and all other powers expressed or implied therein may be exercised when occasion shall require in like manner as if the person signing any instrument giving effect thereto were the owner save only that every such instrument shall refer to the security and shall contain an allegation that the same is in exercise of the power conferred by such security and in conformity to the terms and conditions thereof. And in that case no conditions either implied or express affecting the proper exercise of the power shall have any operation otherwise than by way of agreement between the parties nor shall in the absence of sufficient caveat or Judge's order prevent the lawful and effectual recording of any instrument containing the allegation aforesaid. Provided nevertheless that a statutory declaration verifying the said allegation may be required under rule or order of Court in like manner as hereinbefore provided in regard to dealings by trustees with power of sale.

Encumbrance entering into possession to have the same rights as if the legal estate had passed.

And the rights of legal ownership in the encumbrancer to cease.

Discharge.

125. Whenever the owner of any security-encumbrance shall determine to enter into possession of any land under the conditions of the security he shall for that purpose be entitled except only as against the rights of a prior encumbrancee to all remedies for recovery of possession or of the rents and profits by action of ejectment or trespass dstraint or otherwise which he might have exercised if the legal estate in the land were actually vested in him and no tenant or other person from whom such possession or payment of any such rent or profits shall be demanded by him shall be bound or entitled to inquire respecting any default or notice or other condition precedent to his right of entry or be affected by any notice of objection on the part of the encumbrancer in relation thereto unless supported by injunction or order of a competent Court or Judge. Provided further that after such entry into or demand of possession or rents and profits by the owner of the security the rights of legal ownership and of giving discharges for accruing rents and profits shall cease to be exercisable by the encumbrancer.

126. Upon the production of any mortgage or other security having thereon an indorsement signed by the recorded owner of the security and attested by a witness discharging the land from the whole or part of the moneys or other liability secured or discharging any part of the land from the whole of such moneys or liability the Recorder shall make an entry in the record noting that such mortgage or other encumbrance is discharged wholly or partially or that part of the land is discharged as aforesaid (as the case may be) and upon such entry being made the land or the portion of land described in such indorsement shall cease to be subject to such moneys or liability or for the part thereof mentioned in such entry as discharged and the Recorder shall indorse on the duplicate certificate of title when produced to him for that purpose a memorandum of the time at which such entry was made.

Entry of satisfaction of annuity &c.

127. Upon proof to the satisfaction of the Court of the death of the annuitant or of the occurrence of any other event or circumstance upon which in accordance with the provisions of any security any terminable annuity or other payment thereby secured shall cease and upon proof to the like satisfaction that all arrears of the annuity or other secured payment and all costs occasioned by non-payment thereof have been fully satisfied the Court shall direct the Recorder to make an entry in the record that such security is satisfied and upon such entry being made the land shall cease to be subject thereto and the Recorder shall make the like indorsements as are mentioned in the last preceding section.

128. In case the recorded owner of a mortgage or other security shall be absent from the Colony and there be no person authorized to give a receipt for the money secured at or after the date appointed for payment thereof it shall be lawful for the Treasurer of the Colony to receive such money with arrears of interest if any due thereon in trust for the recorded owner or other person entitled or to become entitled thereto and thereupon the interest upon such money shall cease to run or accrue and the Recorder shall upon production of the receipt of the Treasurer for the amount paid make an entry in the record discharging the land from such money stating the time at which such entry was made and such entry shall be a valid discharge from such money and the Recorder shall make a corresponding entry on the duplicate certificate of title and security whenever those documents shall be produced to him for that purpose and if the same be a full satisfaction of the security shall state accordingly. The Treasurer shall from time to time invest all moneys which shall be received by him under this section together with all dividends and interest which shall accrue thereon in New South Wales Government securities for the benefit of the persons who shall for the time-being be entitled thereto but nothing herein contained shall render any Treasurer in any manner liable for not investing the same respectively. The Recorder shall from time to time when and as directed by order of the Court in that behalf address to the Treasurer requisitions to pay to such persons the moneys to which they may be entitled hereunder and every such requisition when signed by the Treasurer shall be sent to the Auditor General and when countersigned by him shall be the warrant for the payment by the Treasurer of the moneys therein specified.

Secured money may be paid to Treasurer if owner of security be absent from the Colony and security discharged.

Moneys received under this section to be invested.

129. The owner of any security-encumbrance of leasehold land under this Act after entering into possession of the land or the receipt of the rents and profits thereof shall during such possession or receipt and to the extent of any benefit rents and profits which may be received become and be subject and liable to the lessor of the said land or the person for the time-being entitled to the reversion expectant on the term of the lease for the payment of the rent reserved by the lease and for the observance of the covenants therein contained or by this Act declared to be implied therein on the part of the lessee or his transferees.

Encumbrance of leasehold entering into possession to become liable to lessor.

130. Whenever such default has been made and continued in payment of the moneys secured by a mortgage or other security as shall have rendered a power of sale lawfully exercisable under the express or implied conditions of the security the recorded owner thereof may apply to the Court by petition or otherwise as may be required by its rules of procedure and thereupon adduce such evidence as the Court shall require of the following facts namely—that such default has been made and then continues and that the estate of the encumbrancer in the land encumbered has been *bonâ fide* offered for sale at public auction by a licensed auctioneer and that the amount of the highest bidding at such sale was not sufficient to satisfy the moneys secured together with the expenses occasioned by such sale. And the Court upon being satisfied of the facts aforesaid may either after or concurrently with any special notice or rule to show cause to be given to or served on the parties entitled to redeem the security until sale direct the Recorder to cause notice to be published once in each of three successive weeks in at least one newspaper published in the City of Sydney offering such land for private sale and shall appoint a time not less than one month from the date of the first of such advertisements upon or after which the Court shall make in favor of such applicant an order for foreclosure unless in the interval some sufficient cause of objection shall be shown or a sufficient amount has been obtained by the sale of such land to satisfy the principal and interest moneys secured and all expenses occasioned by such sale and proceedings and every such order for foreclosure when entered in the record shall have the effect of vesting in the recorded owner of the security the estate mentioned in such order free from all right and equity of redemption on the part of the encumbrancer or of any person claiming through or under him subsequently to the encumbrance and the owner of the security shall upon such entry being made be deemed a transferee of the encumbered estate and become the recorded owner thereof and entitled to a certificate as such. The preceding provisions for foreclosure shall also apply to the case of a mortgagee or other owner of security upon whose application the encumbered property has been placed under this Act with a view to the exercise of his power of sale under the thirty-sixth section of this Act.

Mortgagee may apply for an order for foreclosure.

131. Whenever upon the insolvency of any encumbrancer of a recorded estate the assignee of the insolvent shall after the lawfully authorized valuation by the encumbrancee of his security elect to relinquish to him the benefit thereof or shall whether so electing or not neglect after reasonable notice to satisfy the amount of such valuation it shall be lawful for the Court upon application by the encumbrancee and satisfactory proof of the facts to make and cause to be entered on the record an order for foreclosure of the security. And whenever upon the insolvency of any recorded owner of a lease not subject to encumbrance the assignee of the insolvent estate shall elect to relinquish such lease or whether so electing or not neglect after reasonable notice to satisfy the rent and liabilities incident thereto or to transfer the lease to some solvent person who shall satisfy the same it shall be lawful for the Court upon application by the lessor and proof of the facts to make and cause to be entered on the record an order which shall have the effect of a surrender of the lease but without prejudice to any action or cause of action which shall previously have been commenced or have accrued in respect of any breach or non-observance of any covenant expressed in the lease or by this Act declared to be implied therein. If in the case of the insolvency of any recorded owner of a lease which shall be subject to encumbrance the encumbrancee shall obtain such order of foreclosure as aforesaid it shall operate as a transfer of the lease subject to the rent and liabilities incident thereto. But if the encumbrancee shall neglect to obtain such order or to otherwise procure a transfer of the lease within a reasonable time after the insolvency or shall neglect to satisfy the said rent and liabilities it shall be lawful for the lessor to apply to the Court for a surrender in like manner and on proof in addition to the neglect aforesaid of the same facts which are herein required in the case of a lease which is not encumbered and after such notice to the encumbrancee as the Court shall deem sufficient an order of surrender may be made accordingly. Provided further that if in any such case as aforesaid the same estate or interest shall be subject to more than one encumbrance the Court shall not make any order of foreclosure in favor of any subsequent encumbrancee to the prejudice of a prior security nor for surrender of a lease without requiring such notice as aforesaid to be given to all the encumbrancees and before making any order of foreclosure to the prejudice of a subsequent security it may require such previous notice and opportunity for redemption of the prior encumbrance to be given to any owner of a subsequent security as shall appear to be reasonable.

If assignee of insolvent encumbrancer relinquish the estate to the creditor Court may order foreclosure—

Or a surrender of lease if he relinquish the lease.

If lease be encumbered encumbrancee if he obtain foreclosure to stand in place of insolvent lessee—

If he neglect lessor may after notice obtain surrender notwithstanding the encumbrance.

If there be more than one encumbrancee their relative rights to be protected by the Court.

XI.—Transmission.

Transmission by insolvency. 132. Upon the insolvency of the recorded owner of any estate or interest whether such insolvency shall have happened before or after the recording of the ownership thereof the Recorder upon the receipt of an office copy of the appointment of such assignee shall enter in the record upon the folium constituted by the certificate of title of such land a memorandum notifying such appointment and such entry shall take effect as a caveat against any dealing with such estate or interest otherwise than by such assignee unless by express order of Court—and as to any duplicate certificate or other instrument evidencing the title to such estate or interest which shall be in possession or power of the assignee he shall produce the same in order that a like entry may be made thereon and as to any other such duplicate or instrument the Court may on his application summon the insolvent or any other person in whose possession or power the same may be to show cause why the same should not be produced for the like purpose and thereafter delivered up to the assignee. And in every case it shall be lawful for the Court to institute such inquiry as it shall see fit as to whether the estate or interest was held by the insolvent in his own right or subject to any trust or equity and if so subject to direct such entries on the record as shall appear just for protection thereof but if or so far as not so subject the assignee shall be entitled to exercise over every such recorded estate or interest a power of sale. And the like effect shall be given to any transfer surrender or other instrument signed by him as if signed by the recorded owner.

Notice of appointment of assignee to operate as caveat. Certificates of title to be delivered up. The Court to inquire as to trusts or equities. If none or if any subject thereto assignee to be entitled to exercise power of sale. Devisee of deceased recorded owner may apply to be recorded as owner. Notice to be given. 133. On the death of the recorded owner of any real estate any person claiming as devisee may apply to the Court for a fiat directing the officer to record the applicant as owner in the place of the deceased person but the Court shall unless the claim as devisee result from the special entry on the record authorized by section 99 of this Act withhold such fiat until the applicant shall have lodged in the office the probate or a true copy of the will or codicil under which he claims and if the will has not been proved in any other competent Court proof thereof and of the death of the testator shall be required by the Land Titles Court before acting thereon and no transfer or disposition by any such devisee shall be recorded except after the service of such notice on such persons (if any) who would be entitled adversely to the applicant if the devise were found to be not sustainable as the Court may deem necessary and the Court may also if it see fit suspend such fiat until a decision of some other competent Court in favour of the title claimed by such devisee shall have been obtained.

Claims upon intestacy under 26 Vict. No. 20. 134. Upon the death of any recorded owner intestate as to the recorded estate or interest the Administrator Curator of Intestate Estates or other person who under the operation of the Act twenty-six Victoria number twenty shall be entitled wholly or in part to the estate or interest of the deceased owner may make application to be recorded as such owner and after due investigation under such rules as may be established in that behalf such entries shall be made on the record as the case shall require.

Sale under writ of *fi. fa.* or decree or order of Supreme Court. Fourteenth Schedule. Purchaser under *fi. fa.* to be subject to equities affecting the execution debtor's estate unless former certificate given up or estate declared absolute after inquiry by the Court. 135. No execution issued prior to or after the passing of this Act shall bind charge or affect any land or any estate or interest therein recorded under this Act but the Recorder on being served with a copy of any writ of *fi. facias* issued out of a competent Court or of any decree or order of such Court accompanied by a statement signed by any party interested or his attorney solicitor or agent specifying the land and recorded estate or interest sought to be affected thereby shall after marking upon such copy the time of such service enter the same on the record book which shall operate as a caveat against any alienation other than in pursuance of the said writ while the same remains in force. And after the right of the execution debtor in the recorded estate or interest in any land so specified shall have been sold under any such writ decree or order the Recorder shall on receiving a transfer thereof in the form in the fourteenth Schedule hereto (which transfer shall unless qualified in manner hereinafter provided have the same effect as if made by the recorded owner) enter such transfer on the record and on such entry being made the purchaser shall become the transferee and recorded owner of such estate or interest. Provided always that until such service as aforesaid no sale or transfer under any such writ shall be valid as against a transferee for value notwithstanding such writ was actually lodged for execution at the time of the purchase and notwithstanding the purchaser had actual or constructive notice of the lodgment of such writ. Upon production to the Court of sufficient evidence of the satisfaction of any writ a copy whereof shall have been served as aforesaid it shall direct an entry to be made on the record or a memorandum to that effect and on such entry such writ shall be deemed to be satisfied. Every such writ shall cease to bind charge or affect any land or estate or interest therein specified as aforesaid unless a transfer upon a sale under such writ shall be left for entry upon the record within three months from the day on which the copy was served. Provided also that if upon the making of any such transfer pursuant to a writ of *fi. facias* the certificate of title of the execution debtor shall not be delivered up or if it shall in any manner be made to appear to the Court that there is reason to believe or suspect that the estate held by him thereunder is subject to any trust or equity the transfer shall in that case be subject to the equities (if any) to which the execution debtor held the same and shall be declared so to be by an entry to that effect upon every certificate of title issued pursuant to the same or any subsequent transfer unless and until the Court shall upon being satisfied of the non-existence or extinction of such trust or equity authorize the omission or cancellation of such entry. Provided further that upon the application of any person interested either before or after any such transfer the Court may summon the execution debtor or any other person having or claiming possession of or any interest in respect of any such certificate to shew cause why the same shall not be delivered up and to answer all inquiries relative thereto and thereupon or after such further inquiries as may be deemed necessary the Court shall either cancel such certificate or otherwise act in reference thereto in like manner as hereinbefore is provided in respect to the transfer of the recorded estate of an insolvent as the justice of the case shall require.

Marriage of female owner. 136. The Court upon production of sufficient proof of the marriage of a female proprietor of any estate or interest not appearing by the record to be held for her separate use accompanied by an application in writing signed by such female owner to record her husband as joint owner thereof in her right shall direct the Recorder to enter on the record and also upon the duplicate certificate of title or instrument evidencing the title of such female owner when produced to him for that purpose the name and addition of her husband the date and place of the marriage and the time of making such entry and the husband of such female owner shall on such entry being made be deemed to be joint owner thereof in right of his wife. Until such entry shall be made she shall be deemed to be the sole and absolute owner of such estate or interest and may transfer or otherwise deal with the same at law and in equity. A like entry may be made on application of the husband alone if it appear to the Court after such notice and inquiry as it shall deem sufficient that the wife refuses to join in the application without being entitled to hold the land for her separate use.

137. Upon the death in the lifetime of his wife of any husband recorded as joint owner with her of an estate in fee simple or of a lease mortgage or charge in her right or upon the death of any female owner whose husband shall be entitled as tenant by the curtesy to any freehold land which shall not have become vested in the personal representative under the Act twenty-six Victoria number twenty in consequence of intestacy or upon the death of any person recorded with any other person as joint owner of any land (except in cases within the meaning of the eighty-eighth section of this Act) or of any lease or charge or as joint owner of any mortgage owned on a joint account in equity the Court on the application of the widow husband or person entitled and proof to its satisfaction of such events as aforesaid may direct the Recorder to record such applicant as the owner thereof and she or he shall upon being recorded in the manner herein prescribed for the recording of a like estate or interest become the transferee of such land lease mortgage or charge and be deemed the owner thereof but as regards any tenancy by the curtesy for the lifetime only of such husband.

Recording of survivor of joint proprietors.

138. Whenever any person interested in land under the operation of this Act or any estate or interest therein shall appear to the Court to be a trustee of such land estate or interest within the meaning of any statute now or hereafter to be in force relating to trusts and trustees the Court shall have a jurisdiction in such matter concurrent with that of the Supreme Court and any entry made on the record in the premises in the exercise of such concurrent jurisdiction shall from the time of entry thereof operate as a vesting order under such statute. But if in any like case a vesting order be made by the Supreme Court the same shall not have any operation in transferring or otherwise vesting the estate or interest to which the same relates until service thereof or of an office copy thereof has been made upon the record whereupon the Court may direct an entry in the record and on the duplicate grant certificate of title or instrument of the date of the said order the time of its production to him and the name and addition of the person in whom the said order shall purport to vest the said land estate or interest and such person shall thereupon become the transferee and be deemed to be the owner thereof.

As to vesting orders under Trustee Acts.

XII.—*Special Certificate.*

139. The Recorder upon the application of any recorded owner of land under the operation of this Act shall issue to such owner a special certificate of title in the form in the fifteenth Schedule hereto enabling him to transfer or otherwise deal with his estate or interest in such land at any place without the limits of the Colony and shall at the same time enter in the record a memorandum recording the issue of such special certificate and shall indorse on the duplicate ordinary certificate of title a like memorandum and after the issuing of such special certificate no transfer or other dealing in any way affecting the estate or interest in respect of which such special certificate is issued (excepting under the sections hereinbefore contained relating to a sale under a writ of *fiery facias* or a decree or order of the Supreme Court and to the insolvency of an owner) shall be entered in the record until such special certificate shall have been surrendered to the Recorder to be cancelled or the loss destruction or obliteration of such certificate shall have been proved to the satisfaction of the Court or the time during which it is to continue in force shall have expired.

Special certificate for recording dealings without the limits of the Colony. Fifteenth Schedule.

140. Whenever any transfer or other dealing is intended to be transacted under any special certificate a transfer or such other instrument as the case may require shall be attested by some one of the persons herein authorized to act as an official witness without the limits of the Colony and upon a memorial of such instrument being entered upon the special certificate and also upon the duplicate of the ordinary certificate and authenticated by the signature of such authorized person as aforesaid the instrument to which such memorial refers shall be held to be recorded and such transfer or other dealing shall (except only as to any disposition under execution decree or insolvency as aforesaid) be as valid and binding to all intents as if the same had been entered in the record by the Recorder and signed by him and the certificate of record indorsed on the instrument of which the memorial has been so entered and signed by such authorized person shall be received in all Courts of Law or Equity as conclusive evidence that such instrument has been duly recorded.

Mode of procedure under special certificate.

141. Upon the delivery of any special certificate to the Recorder he shall enter in the record in such manner as to preserve their priorities the particulars of every transfer or other dealing recorded thereon and shall file in the office the duplicate of every transfer or other instrument signed thereunder which may for that purpose be delivered to him and shall cancel such special certificate and note the fact of such cancellation in the record and if the land be transferred the duplicate grant or certificate of title shall be delivered up to the Recorder who shall thereupon proceed as is hereinbefore directed in the case of a transfer of land.

Proceeding upon delivery of.

142. Upon proof at any time to the satisfaction of the Court that any special certificate has been lost or destroyed or is so obliterated as to be useless and that the powers thereby given have never been exercised or if they have been exercised then upon proof of the several matters and things that have been done thereunder it shall be lawful for the Court to direct the Recorder as circumstances may require either to issue a new special certificate or to make such entries in the record or do such acts as might have been made or done if no such loss destruction or obliteration had taken place.

Procedure when special certificate lost.

XIII.—*Assurance Fund.*

143. An account shall be kept under direction of the Court of all sums of money which shall be received under the provisions of this Act and shall be paid to the Colonial Treasurer at such times and shall render accounts of the same to such persons and in such manner as may be directed by any statute or regulations for the time-being in force relating to the collection and payment of the public moneys and the audit of the public accounts. All penalties and fees received under the provisions of this Act (except sums received as contributions to the assurance fund or in augmentation thereof) shall be carried to and form part of the Consolidated Revenue.

Recorder to pay moneys to receiver of revenue and to render accounts.

144. All sums of money which shall be received by the Recorder as contributions to the assurance fund or in augmentation thereof shall when paid to the Treasurer of the Colony be placed to the credit of an account to be kept in the Treasury to be called "The Assurance Fund" and shall from time to time invest the same together with all dividends and profits accruing thereon in New South Wales Government securities to constitute an assurance fund for the purposes hereinafter mentioned.

Assurance fund to be invested in Government securities.

Compensation of party deprived of land.

145. Any person deprived of land or of any estate or interest in land in consequence of fraud or through the bringing of such land under the operation of this Act or by the recording of any other person as owner of such land estate or interest or in consequence of any error or misdescription in any certificate of title or in any entry or memorial in the record may bring and prosecute an action at law for the recovery of damages against the person upon whose application such land was brought under the operation of this Act or such erroneous recording was made or who acquired title to the estate or interest through such fraud error or misdescription. Provided always that except in the case of fraud or of error occasioned by any omission misrepresentation or misdescription in the application of such person to bring such land under the operation of this Act or to be recorded as owner of such land estate or interest or in any instrument signed by him such person shall upon a transfer of such land *bonâ fide* for value cease to be liable for the payment of any damage which but for such transfer might have been recovered from him under the provisions herein contained and in such last-mentioned case and also in case the person against whom such action for damages is directed to be brought as aforesaid shall be dead or shall have been adjudged insolvent or cannot be found within the jurisdiction of the Supreme Court then and in any such case such damages with costs of action may be recovered out of the assurance fund by action against the Recorder as nominal defendant. Provided that in estimating such damages the value of all buildings and other improvements erected or made subsequently to the deprivation shall be excluded.

Purchasers and mortgagees protected.

146. Nothing in this Act contained shall be so interpreted as to leave subject to an action of ejectment or to an action for recovery of damages as aforesaid or for deprivation of the estate or interest in respect to which he is recorded as owner any *bonâ fide* transferee for value on the ground that the owner through or under whom he claims may have been recorded as owner through fraud or error or may have derived from or through a person recorded as owner through fraud or error and this whether such fraud or error shall consist in wrong description of the boundaries or of the parcels of any land or otherwise howsoever.

Actions for recovery of damages may in certain cases be brought against the Recorder as nominal defendant.

147. Any person sustaining loss through any omission mistake or misfeasance of the Recorder or any other officer or clerk in the execution of their respective duties under the provisions of this Act or by any error omission or misdescription in any certificate of title or any entry or memorial in the record or by the recording of any other person as owner and who by the provisions of this Act is barred from bringing an action of ejectment or other action for the recovery of the land estate or interest may in any case in which the remedy by action for recovery of damages as herein provided is inapplicable bring an action against the Recorder as nominal defendant for recovery of damages in estimating which damages however the value of all buildings and other improvements erected or made subsequently to the loss or deprivation shall be excluded. Provided also that no act or omission shall be held to be within the remedy for compensation hereby provided unless the same shall be proved to have arisen from fraud or from want of due precaution having regard to all the circumstances of the case and to the evidence or facts at the time apparent or accessible upon reasonable inquiry.

Notice of action to be served.

148. In any case in which an action for recovery of damages is permitted to be brought against the Recorder as nominal defendant notice in writing of such action and of the cause thereof shall be served upon such nominal defendant one month at least before the commencement of such action and if in any such action judgment be given in favour of the nominal defendant or the plaintiff discontinue or become nonsuit the plaintiff shall be liable to pay the full costs of defending such action and the same when taxed shall be recovered in the name of the nominal defendant by the like process of execution as in other actions.

Payment of amount recovered.

149. If in any such action the plaintiff recover final judgment against such nominal defendant then the Judge before whom such action may be tried or the Supreme Court shall certify the fact of such judgment and the amount of damages and costs recovered and the amount of such damages and costs shall be paid to the person recovering the same and shall be charged to the account of the assurance fund and in case the balance to the credit of the assurance fund shall be inadequate to defray the amount specified such sum as may be necessary for that purpose shall be paid out of the Consolidated Revenue and the amount so advanced shall be repaid from the assurance fund as the same may thereafter accrue.

Limitation of actions.

150. No action for recovery of damages sustained through deprivation of land or of any estate or interest in land shall lie or be sustained against the Recorder or against the assurance fund or (in any case in which no actual fraud shall be proved against the defendant in such action) against the person upon whose application such land was brought under the operation of this Act or against the person who applied to be recorded as owner in respect to such land unless such action shall be commenced within the period of six years from the date of such deprivation. Provided nevertheless that any person being under the disability of coverture infancy unsoundness of mind or absence from the Colony may bring such action within six years from the date on which such disability shall have ceased so however that such action be brought in any case not excepted on the ground of fraud in the defendant as aforesaid within twelve years next after the date of such deprivation. The plaintiff in any such action at whatever time it may be brought and the plaintiff in any action for the recovery of land shall be nonsuited in any case in which the deprivation complained of may have been occasioned through the bringing of land under the operation of this Act if it shall be made to appear to the satisfaction of the Judge before whom such action shall be tried that such plaintiff or the persons through or under whom he claims title had notice by personal service or otherwise or was aware that application had been made to bring such land under the operation of this Act and had wilfully or collusively or negligently omitted to enter a notice of objection thereto or failed to prosecute the same with effect.

Persons having notice or cognizant neglecting to caveat barred.

Moneys paid out of assurance fund may be recovered.

151. Whenever any amount has been paid out of the assurance fund on account of any person who may be dead such amount may be recovered from the estate of such person by action against his personal representatives in the name of the Recorder and whenever such amount has been paid on account of a person who shall have been adjudged insolvent the amount so paid shall be considered to be a debt due from the estate of such insolvent and a certificate signed by the Treasurer of the Colony certifying the fact of such payment out of the assurance fund and delivered to the Official Assignee shall be sufficient proof of such debt and whenever any amount has been paid out of the assurance fund on account of any person who may have absconded or who cannot be found within the jurisdiction of the Supreme Court and may have left any real or personal estate within the said Colony it shall be lawful for the said Court or a Judge thereof upon the application of the Recorder and upon the production of a certificate signed by the Treasurer of the Colony certifying that the amount has been paid in satisfaction of a judgment against the Recorder as nominal defendant to allow the Recorder to sign judgment against such person forthwith for the

the amount so paid out of the assurance fund together with the costs of the application and such judgment shall be final and signed in like manner as a final judgment by confession or default in an adverse suit and execution may issue immediately and if such person shall not have left real or personal estate within the said colony sufficient to satisfy the amount for which execution may have been issued as aforesaid it shall be lawful for the Recorder to recover such amount or the unrecovered balance thereof by action against such person at any time thereafter if he shall be found within the jurisdiction of the Supreme Court.

152. The assurance fund shall not under any circumstances be liable for compensation for any loss or deprivation occasioned by the breach by a recorded owner of any trust whether express implied or constructive nor in any case in which the same land may have been included in two or more grants from the Crown nor shall the assurance fund be liable in any case in which such loss or deprivation has been occasioned by any land being included in the same certificate of title with other land through misdescription of boundaries or parcels of any land unless in the case last aforesaid it shall be proved that the person liable for compensation and damages is dead or has absconded or has been adjudged insolvent or the sheriff shall certify that such person is unable to pay the full amount awarded in any action for recovery of such compensation and damages. Provided always that any amount paid out of the assurance fund on account of any person who may have absconded may be recovered from such person by action in the name of the Recorder at any time thereafter if such person shall be found within the jurisdiction of the Supreme Court. Provided also that the said fund shall be liable for such amount only as the sheriff shall fail to recover from the person liable as aforesaid.

Assurance fund not liable in cases of breach of trust or conflicting Crown grants or misdescription unless the legal remedies against the parties first liable to make compensation have been exhausted.

153. No claim for compensation from the assurance fund shall be sustainable by any person for the consequence of any error or omission in the record or in any certificate of title admitting of amendment under the powers conferred on the Court by this Act in any case in which it shall appear that the claimant has neglected for the space of two years after he became aware of such error or omission (or if he became aware of such error pending disability of infancy coverture or lunacy then for the like space of two years after the ceasing of such disability) to make application to the Court for such rectification. Nor shall any claim for compensation be sustainable on the ground of any amendment or refusal of amendment adverse to the claimant if the person whose title is sustained by the decision directing or refusing the amendment shall have been in adverse rightful possession of the land in question at the time when the person claiming compensation acquired title or apparent title by reason of the error or omission.

Claim forfeited by neglect to apply for amendment of bond when error discovered.

Or in case of adverse possession of the rightful owner when apparent title acquired by claimant in error.

154. No claim for compensation from the assurance fund shall be sustainable in respect of the consequences resulting from any entry made on the record by order of the Court or a Judge after investigation of any claim under any will or settlement or consequent upon any other transmission of a recorded estate in exercise of the judicial authority conferred by this Act.

No claim for damages consequent on judicial decision.

155. No transferee mortgagee or other encumbrancee of any land erroneously described shall be entitled to object to the correction of any error or to claim compensation from the assurance fund in respect thereof where the correction shall be required to render the description consistent with itself or otherwise accurate as a description of the land which under all the attendant circumstances he was reasonably bound to regard as the intended actual subject of transfer mortgage or encumbrance notwithstanding that the contents thereof or the lengths or bearings of the boundaries thereof may be erroneously stated in excess of the true measurement and no right of encroachment upon land of any adjacent proprietor shall in such case be maintainable by reason of such error.

Error may be corrected without compensation in certain cases.

156. If any misdescription of land or boundaries shall be such as cannot be corrected without prejudice to some person entitled to indemnification under this Act it shall be lawful for the Court to inquire and determine which of the conflicting claimants will sustain the less injury through deprivation of the land and thereupon either to authorize or refuse such correction as will have the effect of such less injury and in that case the person thereby deprived shall be entitled to compensation under the provisions herein contained to the extent only of such actual and less injury. Provided that under no circumstances shall such correction be made or refused to the prejudice of any person who in addition to priority of right has also had continuous possession consistent with such right or has been deprived of such possession by fraud or force.

Correction of error may be allowed or refused so as to occasion the least injury requiring compensation.

157. The Judges and Recorder shall not individually nor shall any person acting under the authority of either of them be liable to any action suit or proceeding for or in respect of any act or matter *bonâ fide* done or omitted to be done in the exercise or supposed exercise of the powers of this Act.

Officers not to be liable for acts done *bonâ fide*.

XIV.—Fees.

158. It shall be lawful for the Recorder to demand and recover such fees as are specified in the last Schedule hereto or such other fees not being in excess thereof (nor upon a higher scale in respect of any matters incident to proceedings not provided for in the said Schedule than is applied in the said Schedule to the matters most nearly corresponding therewith) as shall be hereafter prescribed by any rules of Court to be framed and promulgated under the powers conferred by this Act.

XV.—Penalties.

159. If any person wilfully makes any false statement or declaration in any application to bring land under the operation of this Act or in any application to be recorded as owner on a transmission or as an owner in remainder or reversion or in any other application to be recorded under this Act as owner of any land lease mortgage or charge or wilfully makes any false statutory declaration required under the authority or made in pursuance of this Act or if any person in the course of his examination before the Court or any Commissioner wilfully and corruptly gives false evidence or if any person fraudulently procures assists in fraudulently procuring or is privy to the fraudulent procurement of any certificate of title or instrument or of any entry on the record or of any erasure or alteration in any such entry or in any duplicate document or knowingly misleads or deceives any person hereinbefore authorized to require explanation or information in respect to any land or the title to any land under the operation of this Act or in respect to which any dealing or transmission is proposed to be recorded such person shall be guilty of a misdemeanor and shall incur a penalty not exceeding *five hundred pounds* or may at the discretion of the Court by which he is convicted be imprisoned for any period not exceeding three years and any certificate of title entry erasure or alteration so procured or made by fraud shall be void as against all parties or privies to such fraud.

Certain fraudulent acts to be deemed misdemeanors.

Forgery to be a felony.

160. If any person is guilty of the following offences or any of them (that is to say)—
- (1.) Forges or procures to be forged or assists in forging the seal of the Land Titles Court or of the Record of Titles Office respectively or the name signature or handwriting of any Judge or officer in cases where such Judge or officer is by this Act expressly or impliedly authorized to affix his signature—
 - (2.) Stamps or procures to be stamped or assists in stamping any document with any forged seal purporting to be of the said Court or Office respectively—
 - (3.) Forges or procures to be forged or assists in forging the name signature or handwriting of any person whomsoever to any instrument which is by this Act or in pursuance of any power contained in this Act expressly or impliedly authorized to be signed by such person—
 - (4.) Uses with an intention to defraud any person whomsoever any document upon which any impression or part of the impression of the seal of the said Court or Office respectively has been forged knowing the same to have been forged or any document the signature to which has been forged knowing the same to have been forged—
 - (5.) Fraudulently uses or procures to be used for any purpose the actual seal of the said Court or Office in which case such fraudulent use shall be a like offence in all respects as a forgery thereof—

such person shall be guilty of felony.

Punishment of felony.

161. Any person convicted of felony under this Act shall be liable to imprisonment for any term not exceeding four years and to be kept to hard labor or solitary confinement for any part of the period aforesaid.

Conviction not to affect civil remedy.

162. No proceeding or conviction for any act hereby declared to be a misdemeanor or a felony shall affect any remedy which any person aggrieved or injured by such act may be entitled to at law or in equity against the person who has committed such act or against his estate.

Obligation to make discovery not excluded.

163. Nothing in this Act contained shall entitle any person to refuse to make a complete discovery by answer to any bill in equity or to answer any question or interrogatory in any civil proceeding in any Court of Law or Equity or Insolvency but no answer to any such bill question or interrogatory shall be admissible in evidence against such person in any criminal proceeding.

Jurisdiction.

164. Unless in any case herein otherwise expressly provided all offences against the provisions of this Act may be prosecuted and all penalties or sums of money imposed or declared to be due or owing by or under the provisions of the same may be sued for and recovered in the name of the Attorney General before any Court in the said Colony having jurisdiction for punishment of offences of the like nature or for the recovery of penalties or sums of money of the like amount.

TENTH SCHEDULE.

Section 118.

1.—Covenants on the part of the lessee binding on himself and representatives and transferees with the lessor and his representatives and transferees to be implied in every statutory lease if or so far as not thereby expressly excluded or qualified as follows :—

(1.) That he or they will pay the rent reserved by the lease at the times therein mentioned and all rates and taxes which may be payable in respect of the leased property during the continuance of the lease.

(2.) That he or they will keep and yield up the leased property in good and tenable repair accidents and damages from storm and tempest and reasonable wear and tear excepted.

2.—Powers of lessor and his representatives and transferees to be implied in every such lease (subject to like exclusion or qualification) as follows :—

(1.) That he or they may with or without surveyors workmen or others once in every year during the term at a reasonable time of the day enter upon the leased property and view the state of repair thereof.

(2.) That in case the rent or any part thereof shall be in arrear for the space of one month although no legal or formal demand shall have been made for payment thereof or in case of any breach or non-observance of any of the covenants expressed in the lease or by this Act declared to be implied therein on the part of the lessee or his transferees and such breach or non-observance continuing for the space of one month it shall be lawful for the lessor or his transferees to re-enter upon and take possession of the leased property.

ELEVENTH SCHEDULE.

Section 119.

Interpretation (column two) of short forms (column one) of covenants in Leases.

<i>Column one.</i>	<i>Column two.</i>
1. The lessee will not transfer or sublet.	1. The lessee his executors administrators or transferees will not during the said term transfer assign or sublet the premises hereby leased or any part thereof or otherwise by any act or deed procure the said premises or any part thereof to be transferred or sublet without the consent in writing of the lessor or his transferees first had and obtained.
2. The lessee will fence.	2. The lessee his executors administrators or transferees will during the continuance of the said term erect and put up on the boundaries of the said land or on those boundaries upon which no substantial fence now exists a good and substantial fence.
3. The lessee will cultivate.	3. The lessee his executors administrators or transferees will at all times during the said term cultivate use and manage in a proper and husbandlike manner all such parts of the land as are or shall with the consent in writing of the said lessor or his transferees be broken up or converted into tillage and will not impoverish or waste the same.
4. The lessee will not cut timber.	4. The lessee his executors and administrators or transferees will not cut down fell injure or destroy any growing or living timber or timber-like tree standing and being upon the said land without the consent in writing of the said lessor or his transferees.
5. The lessee will insure against fire in the name of the lessor [Add to the amount of £ if a specific sum to be fixed.]	5. The lessee his executors administrators or transferees will insure and during the said lease keep insured against loss or damage by fire in the name of the lessor or his transferees in some public insurance office approved of by him or them to the fixed amount if any and if not to the amount of their full value all buildings which shall for the time-being be erected on the said land and which shall be of a nature or kind capable of being insured against damage by fire and will when required deposit with the lessor or his transferees the policy of such insurance and within seven days after each premium shall become payable the receipt for such premium And on any breach or non-observance of this covenant the lessor or his transferees may without prejudice to and concurrently with the powers granted to him and them by this lease and by the "Land Titles Record Act" insure such buildings and the costs of effecting such insurance shall be a charge upon the said land recoverable as rent in arrear. All moneys which shall be received under or by virtue of any such insurance shall be laid out and expended in making good the loss or damage.
6. The lessee will paint outside every third year.	6. The lessee his executors administrators or transferees will in every third year during the continuance of the said term paint all the outside woodwork and ironwork belonging to the leased property with two coats of proper oil-colors in a workmanlike manner.
7. The lessee will paint and paper inside every fourth year.	7. The lessee his executors administrators or transferees will in every fourth year during the continuance of the said term paint the inside wood iron and other work now or usually painted with two coats of proper oil-colors in a workmanlike manner and also re-paper with paper of the same quality as at present such parts of the said premises as are now papered and also whiten or color such parts of the said premises as are now whitened or colored respectively.
8. The lessee will not use the premises as a shop.	8. The lessee his executors administrators or transferees will not convert use or occupy the said premises or any part thereof into or as a shop warehouse or other place for carrying on any trade or business whatsoever or permit or suffer the said premises or any part thereof to be used for any such purpose or otherwise than as a private dwelling-house without the consent in writing of the said lessor or his transferees.

9. The lessee will not carry on any offensive trade.

10. The lessee will carry on the business of publican and conduct the same in an orderly manner.

11. The lessee will apply for renewal of license.

12. The lessee will facilitate the transfer of license.

9. The lessee his executors administrators or transferees will not at any time during the said term use exercise or carry on permit or suffer to be used exercised or carried on in or upon the said premises or any part thereof any noxious noisome or offensive art trade business occupation or calling and no act matter or thing whatsoever shall at any time during the said term be done in or upon the said premises or any part thereof which shall or may be or grow to the annoyance nuisance grievance damage or disturbance of the occupiers or owners of the adjoining lands and properties.

10. The lessee his executors administrators or transferees will at all times during the continuance of the said term use exercise and carry on in and upon the premises the trade or business of a licensed victualler or publican and seller of fermented and spirituous liquors and keep open and use the house inn and buildings standing and being upon the land as and for an inn or public-house for the reception accommodation and entertainment of travellers guests and other persons resorting thereto or frequenting the same and manage or conduct such trade or business in a quiet or orderly manner and will not do or commit or suffer to be done or committed any act matter or thing whatsoever whereby or by means whereof any license shall be allowed to expire or to become void or shall or may be liable to be forfeited suspended taken away or refused.

11. The lessee his executors administrators or transferees will from time to time during the continuance of the said term at the proper times for that purpose apply for and endeavour to obtain such license or licenses as is or are or may be necessary for carrying on the said trade or business of a licensed victualler or publican in and upon the said premises and keeping the said house or inn open as and for an inn or public-house as aforesaid.

12. The lessee his executors administrators or transferees will at the expiration or other sooner determination of the said term sign and give such notice or notices and allow such notice or notices of a transfer or renewal of any license as may be required by law to be affixed to the said house or inn to be thereto affixed and remain so affixed during such time or times as shall be necessary or expedient in that behalf and generally will do and perform all such acts matters and things as shall be necessary to enable the said lessor or his transferees or any person authorized by him or them to obtain the transfer of any license then existing and in force or the renewal of any license or any new license.

TWELFTH SCHEDULE.

SECURITY-ENCUMBRANCES.

1.—Security-encumbrance (A) Mortgage.

I A.B. [insert addition] being the recorded owner of an estate [in fee simple or as the case may be] in the land hereinafter described subject however to the now existing encumbrances notified hereon in consideration of pounds (£) lent to [me] by C.D. of [insert addition] the receipt whereof [I] hereby acknowledge do for the purpose of securing to [him] the payment in manner hereinafter mentioned of the said principal sum and interest thereon hereby mortgage to the said C.D. all my estate and interest as such recorded owner as aforesaid in all that piece of land containing [area in acres roods and perches] situated in [parish or town and county] being [the whole or part as the case may be] of the land comprised in [a Crown grant or certificate of title as the case may be] dated and recorded volume folio [If the mortgage be of the whole land comprised in the grant or certificate the above references will suffice—if of a part a surveyor's description and plan must be added] and for the consideration aforesaid [I] do hereby covenant with the said C.D.

Firstly—That [I] will pay to [him] the above sum of pounds (£) on the day of Secondly—That [I] will pay interest on the said sum at the rate of pounds (£) by the £100 in the year as follows:—[Specify when and how payable] [Add covenant to insure if intended with any other special covenants or modifications of the covenants or powers implied by virtue of the Act.]

Prior Encumbrances referred to.
 (Note if any.)

2.—Security-encumbrance (B) for securing annuity or other ascertained payment of money other than an ordinary mortgage debt

I A.B. of [insert addition] being &c. [as in mortgage form] in all that &c. [description and plan as in mortgage form] and desiring to render the said land available for securing to and for the benefit of C.D. of [insert addition] the [annuity or other designation of intended encumbrance] hereinafter mentioned do hereby encumber the said land therewith and declare the same to be payable to the said C.D. at the times and in manner following that is to say [set forth amount of annuity rent charge or other moneys secured with the times and mode of payment] and that in default of such payment in any particular the said C.D. shall be entitled to all the powers and remedies implied or given in favour of a security-encumbrance by the "Land Titles Record Act" [nevertheless with the qualification and addition following viz.—here insert any such if intended.]

Dated &c. }
 Signed &c. } [As in last preceding form.]

Prior Encumbrances referred to.
 (Note if any.)

3.—Security-encumbrance (C) to secure fulfilment of covenants by way of indemnity or for any other purpose to which the preceding form may not be applicable and the details of which may be declared by a separate instrument.

[Commencement and description as in last preceding form] and desiring to render the said land available for securing C.D. of [insert addition] against any default in observance of the terms and conditions of a [deed of indemnity cash credit bond or as the case may be] dated the day of 18 and made between [set forth parties] hereby declare that upon any such default being made as aforesaid the said C.D. shall have and exercise in virtue hereof all the powers and remedies of a security-encumbrance under the Land Titles Record Act And I further declare that for the purpose of ascertaining the respective rights of the parties thereto as between themselves and of determining the application of any moneys to be raised under the powers hereby conferred the said [deed bond or as the case may be] heretofore referred to is to be considered as a part of this instrument whether hereto annexed or not But as regards the rights of all persons claiming title under any Act or instrument purporting to be in exercise of the said powers and to be consequent on any alleged default in observance of the said terms and conditions every such act or instrument shall without the necessity of any statement of particular circumstances

of

of itself be conclusive evidence of the fact of such default and of the fulfilment of all other preliminary conditions by notice or otherwise (if any) required (either by implication of law or express agreement) for giving full effect to every such act or instrument and for excluding all objection to the recording thereof in every case in which such recording shall not be otherwise suspended by reason of a sufficient caveat or judicial order.

Dated &c. }
Signed &c. } [As in last two preceding forms.]

Prior Encumbrances referred to.

(Note if any.)

THIRTEENTH SCHEDULE.

Covenants on the part of the grantor of every security-encumbrance (binding on his representatives and transferees) with the encumbrancee his representatives and transferees to be implied in every such encumbrance as follows :—

Section 123.

1. That the grantor of such encumbrance or his representatives or transferees will pay to the encumbrancee or his representatives or transferees the principal and interest or other moneys expressed to be secured by the mortgage or other encumbrance at the times and in the manner thereby appointed for payment thereof or upon the occurrence of the event or circumstance whereupon the same shall respectively become payable under the terms and conditions therein expressed. Also that he or they will repair and keep in repair all buildings or other improvements erected and made upon the encumbered land and that the encumbrancee and his transferees may at all reasonable times until such encumbrance be redeemed enter into and upon such land with or without surveyors or others to view and inspect the state of repair of such buildings or improvements.

2. *Powers and conditions to be implied in every such security-encumbrance (unless varied by express agreement) as follows :—*

That if default shall be made in payment of the principal sum interest or annuity or other moneys secured or any part thereof respectively or in the observance of any covenant expressed in any such encumbrance or that is hereby declared to be implied therein and such default be continued for one month or for such other period of time as may therein for that purpose be expressly fixed the encumbrancee or his transferees may serve on the encumbrancer or his transferees notice in writing to pay the money owing on such encumbrance or to observe the aforesaid covenants (as the case may be) by giving such notice to him or them or by leaving the same on the encumbered land or by sending the same through the Post Office by a registered letter directed to the then owner of the land at his address appearing in the record.

That if such default in payment or in observance of covenants shall continue for one month after the service of such notice or for such other period as may in such encumbrance be for that purpose fixed the encumbrancee or his transferees may enter into possession of the land and receive the rents and profits thereof and exercise all the rights of owner thereof and whether in such possession or not may sell the land encumbered or any part thereof either altogether or in lots by public auction or by private contract and subject to such terms and conditions as may be deemed fit and may buy in or rescind any contract for sale and resell in manner aforesaid without being liable for any loss occasioned thereby and may make and sign such transfers and do such acts and things as shall be necessary for effectuating any such sale and the admission by the encumbrancee or his transferees in the transfer of the payment of the purchase or consideration money shall effectually discharge the purchaser therefrom and from being concerned to see to the application or being answerable for any loss or misapplication thereof and no purchaser shall be bound to see or inquire whether such default or non-observance as aforesaid shall have been made or have happened or have continued or whether such notice as aforesaid shall have been served or otherwise into the propriety or regularity of any such sale.

That the purchase money arising from the sale of the encumbered land shall be applied as follows—

If the sale be by a mortgagee or his transferees—

First in payment of the expenses occasioned by such default and sale—secondly in payment of the moneys which may be due or owing on the mortgage—thirdly in payment of subsequent mortgages and of any money which may be due or owing in respect of any subsequent charge in the order of their respective priorities and the surplus if any shall be paid to the mortgagor. Provided always that if the sale be made by a mortgagee or his transferees and there is a subsequent charge the purchase moneys after there shall have been made thereout all proper prior payments shall be deposited by him or them in the manner and names and for purposes corresponding with those after mentioned.

If the sale be by an annuitant or his transferees—

First in payment of the expenses occasioned by such default and sale then in payment of the moneys which may be due or owing to the annuitant or his transferees and the residue shall be deposited by him or them at interest in the Savings' Bank or in some other bank in Sydney in the joint names of the annuitant or his transferees and of the Recorder to satisfy the accruing payments of the charge and subject thereto for the benefit of the parties who may be or become entitled to the residue of the deposited money.

If the sale be under a power contained in any encumbrance other than a security for a mortgage debt or annuity—

First in payment of the expenses occasioned by the breach of covenant or condition giving occasion to the exercise of the power of sale next in satisfaction of the security according to the terms of the instrument and subject thereto for the benefit of the encumbrancer or his representatives or transferees and in case of any doubt or dispute in relation thereto subject to the order of Court to be made on the application of any party interested.

3.—*Interpretation (column two) of short form (column one) of covenant to insure in a security-encumbrance.*

Column one.

The encumbrancer will insure against fire in the name of the encumbrancee [Add to the amount of £ if a specific sum to be fixed.]

Column two.

The encumbrancer his executors and administrators or transferees will insure and during the said term keep insured against loss or damage by fire in the name of the encumbrancee or his transferees in some public insurance office approved of by him or them to the fixed amount if any and if not to the amount of their full value all buildings which shall for the time-being be erected on the said land and which shall be of a nature or kind capable of being insured against damage by fire and will when required deposit with the encumbrancee or his transferees the policy of such insurance and within seven days after each premium shall become payable the receipt for such premium. And on any breach or non-observance of this covenant the encumbrancee or his transferees may without prejudice to and concurrently with the powers granted to him and them by this instrument and by the "Land Titles Record Act" insure such buildings and the costs of effecting such insurance shall be a charge upon the said land and recoverable as interest or other money hereby secured and in arrear. All moneys which shall be received under or by virtue of any such insurance shall be laid out and expended in making good the loss or damage or in or towards satisfaction of the moneys hereby secured at the option of the encumbrancee.

FOURTEENTH

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF ALBURY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 15:

Colonial Secretary's Office,
Sydney, 26th April, 1869.

BOROUGH OF ALBURY.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Albury—for regulating their own proceedings—for the collection of rates—for preventing and extinguishing fires, &c., &c.—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BY-LAWS of the Municipal Council of the Borough of Albury, made at their Meeting, held on the eighteenth day of March, one thousand eight hundred and sixty-nine.

1. If at any meeting of the Council duly held, the Mayor shall be absent at the expiration of fifteen minutes after the time appointed for holding the meeting, or if, after being present, he shall retire, such Alderman as the members present shall choose from among themselves, shall preside for that meeting.

2. The Mayor or presiding Alderman may take part in all the proceedings of the Council.

3. All questions duly proposed shall be put by the Mayor, and the sense of the Council thereon shall be declared by him.

4. The Mayor shall, on every motion made and seconded, put the question first in the affirmative and then in the negative, and he may do so as often as may be necessary to enable him to declare his opinion, from the show of hands, as to which party has the majority.

5. If two or more members rise to speak at the same time, the Mayor shall decide which member is entitled to pre-audience.

6. The Mayor shall preserve order, and his decision on disputed points of order shall be final.

Order of Business.

7. The business of each ordinary meeting of the Council shall be transacted in the following order:—

- (1.) The reading and confirmation of the minutes of previous meeting.
- (2.) The reading of official correspondence.
- (3.) The presentation of petitions.
- (4.) Reports brought from Committees.
- (5.) Miscellaneous business.
- (6.) Motions of which notice has been given.
- (7.) Notices of motion.
- (8.) Orders of the day.

8. The first business of each meeting of the Council shall be to confirm the minutes of the preceding meeting; and no discussion shall take place thereupon, except as to the accuracy thereof.

9. Orders of the day shall comprise all business set down for the day by order of any previous meeting, or necessarily arising out of the proceedings of a former meeting.

Rules of Debate.

10. Every member shall stand when speaking, and shall address the chair.

11. Except in Committee, no member shall speak twice on the same question, unless in explanation where he has been misrepresented or misunderstood: Provided, however, that the mover shall be allowed to reply, and that every member shall have the liberty of speaking once on every amendment, as well as on the original motion.

12. No member shall speak upon any motion or amendment for a longer period than fifteen minutes, without the consent of the Council.

13. No member shall digress from the matter under discussion, or impute motives; and all personal reflections upon any member shall be deemed highly disorderly.

14. When any member shall use any expression capable of being applied offensively to any other member, the member so offending shall be deemed guilty of wilfully hindering the proceedings of the Council, and shall be required by the Mayor to withdraw the expression, and to make a satisfactory apology to the Council; and should such member so offending refuse or neglect to do so before the rising of the Council, his name shall be entered on the minutes, with a record of the occurrence, and he shall be liable to a penalty not exceeding twenty shillings.

15. Whenever any matter of order arises it shall be taken into consideration immediately; and upon a member rising to order he shall be heard, and the member who

was speaking shall sit down until the question of order has been decided.

16. Any member may require the question or matter under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member while speaking.

17. A debate may be adjourned to a later hour of the same day, or to another day which may be specified; and the member upon whose motion the debate is adjourned shall be entitled to pre-audience on resumption of the debate.

Divisions.

18. It shall be competent for any member to divide the Council upon any question put from the chair, either in full Council or Committee of the Whole Council; and upon such division, those who are on the affirmative side shall place themselves on the right hand of the Mayor, and those who are on the negative side shall place themselves on his left hand; and no member shall leave his place until the names of all the members present have been taken down by the Council Clerk, or the person officiating for him.

19. All divisions of the Council shall be entered on the minutes of the proceedings.

20. In divisions, every member, excepting the Mayor or presiding Alderman, shall be compelled to vote.

21. All meetings of the Council shall be held with open doors, unless it shall become necessary to exclude strangers on account of their disorderly conduct. The Council, however, shall have the power of excluding strangers in the certain cases mentioned in the 101st section of the Municipalities Act of 1867.

Motions.

22. No member shall make any motion initiating a subject for discussion, but in pursuance of notice openly given at a previous sitting of the Council, and duly entered on the notice paper, with his signature thereto, but it shall always be in order on the presentation of any document, except a petition, for the member presenting it to move without previous notice, that a day be appointed for its consideration.

23. Motions shall take precedence of orders of the day, and be moved or postponed in the order in which they stand on the notice paper, or lapse.

24. No motion shall be put unless it be seconded.

25. When a motion has been proposed and seconded it shall be the property of the Council, and shall not be withdrawn without the consent of the Council.

26. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on the next to the last, and so on in the inverse order in which they are moved, except when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, then the next lowest, and so on to the highest.

27. Any motion for adjournment, if seconded, shall be immediately put without discussion; and if such motion be negatived, it shall not be competent for any member to make a similar motion until half an hour at least shall have elapsed from the period of moving the one that has been negatived; but if the motion be carried, the business then undisposed of shall have precedence at the next meeting of the Council.

28. No motion, the effect of which, if carried, would be to rescind or be repugnant to any resolution which has been passed by the Council, shall be entertained during the same municipal year, unless a call of the whole Council has been duly made for that purpose; and no such motion, if negatived by the Council, shall be again entertained during the same municipal year.

29. The mover of any motion which may be referred to any Committee, shall *pro hac vice* be a member of such Committee.

Petitions.

30. It shall be incumbent on any member presenting a petition to acquaint himself with the contents thereof, and to report to the Council that it does not contain disrespectful language.

31. On the presentation of a petition or memorial, no debate shall take place thereon until notice has been given in the usual way; and the only question that shall be entertained on the occasion of its presentation shall be that the petition or memorial be received, and, if necessary, that it be referred to a Committee.

32. Every petition received by the Council shall be received only as the petition of the party or parties whose signature or signatures it bears; and no petition shall be received unless at least one signature be upon the sheet containing the petition.

33. The rules of the Council shall be observed in a Committee of the Whole Council, except the rule limiting the number of times of speaking.

34. There shall be two permanent Committees of the Council, to be called the Public Works and Finance Committees, which shall be chosen annually at the meeting of Council next after the annual election of Mayor. The Public Works Committee shall consist of five members; the Finance Committee shall consist of three members; three to be a quorum at the Public Works Committee, and two to form a quorum at the Finance Committee: Provided, nevertheless, that the Council shall be at liberty to fill up occasional vacancies.

35. The Council Clerk shall convene every Committee within seven days of its first appointment, and at any time by order of the Chairman, or any two members of such Committee.

36. The appointment of Special Committees shall continue until the specific duty for which they are appointed shall have been discharged, provided that such Committee may at any time be dissolved by a vote of the Council.

37. The Finance Committee shall be at liberty, without the express authority of the Council, to authorize disbursements for current expenses to an amount not exceeding five pounds, in one week, and report the same to the Council at their next meeting.

38. The Chairman of Committees shall have all reports fairly written out on paper of uniform size, provided by the Council, so as to admit of their being bound up at convenient intervals.

39. At all meetings of Committees, the Mayor, if a member, shall preside, or if he be not a member, then such Alderman shall preside as a majority of the members of the Committee shall have appointed permanent chairman thereof; and in the absence of the Mayor or permanent Chairman respectively, such chairman as the members present shall appoint.

Miscellaneous Regulations.

40. The engagement of any officer of the Council may be terminated, by vote of a majority of the whole Council, three months' notice being given to such officer: Provided that any officer may resign upon giving one month's notice of his intention to do so. And provided also that nothing herein contained shall in any way affect the provisions of the 152nd section, with reference to the suspension of officers for misconduct and their dismissal with the approval of the Council.

41. For the consideration of any by-law, or for the raising or appropriating of money, it shall be competent for any member, without previous notice, to move for a call of the whole Council for the consideration of any such subject, at the next or subsequent meeting; and upon such motion being carried, due notice thereof shall be given in the notice paper for the day, when the subject for which such call is made is set down for consideration; and any member not in attendance when such subject comes under consideration, or not in attendance at the voting upon such question or any amendment thereof, whether of adjournment or otherwise, shall be liable to a penalty of not more than one pound, unless reasonable cause for such absence be shewn to the satisfaction of the Council.

42. The Council Clerk shall have the charge of the common seal of the Corporation, and shall be responsible for the safe custody and proper use of the same, each impression thereof being verified with the signature of the Mayor, duly attested by the Council Clerk.

43. The Council Clerk shall not affix the common seal to any corporate document without the express order of the Council, but shall, upon the authority of the Council, or the Mayor, affix the seal to any power of attorney or other document requiring verification, upon the payment of half a guinea for each impression.

44. Any one or more of the Standing Orders may be suspended, *pro tempore*, in a case of emergency, if a majority of the Council then present shall deem such suspension necessary.

Collection of Rates.

45. The rates shall be levied and collected half-yearly or annually, as the Council may appoint.

46. The taxes thus levied shall be held due and payable on such days as the Council shall by resolution from time

to time appoint. Notice of the amount of taxes imposed shall be served upon the person or premises taxed, in the usual mode. Every person not paying his or her taxes at the office of the Council, or to the Council Clerk, or other proper officer, within thirty days after such notice as aforesaid, shall be decreed a defaulter.

Defaulters.

47. It shall be the duty of the Council Clerk to furnish the Council from time to time with lists of all persons who are in default within the meaning of this by-law—or of section 176 of the Municipalities Act of 1867.

48. It shall be the duty of the Mayor to issue distress warrants against all defaulters within one month after such default shall, in manner aforesaid, have been reported to him, and to cause such warrants to be enforced. With the consent of the Council, or a majority thereof, a further time—not exceeding three months—may in special cases be allowed for payment. No further extension of time shall however in any case or upon any pretence be guaranteed without the sanction of a majority of the Council.

The Bailiff and his duties.

49. The Bailiff of the Municipality shall be appointed by resolution of the Council, and may at any time be removed from office by a similar resolution, moved upon notice in the ordinary way.

50. It shall be the duty of the Bailiff to make all levies by distress, for the recovery of rates, in the manner hereinafter provided. He shall give security (to the satisfaction of the Mayor) to the extent of £100, for the faithful performance of his duty.

51. All levies and distresses shall be made under warrant, in the form or to the effect of the schedule hereto annexed, and marked with the letter A, under the hand of the Mayor, or of any person who may for the time being be duly authorized to perform the duties of that officer.

52. At the time of making a distress, the Bailiff shall hand a copy of the warrant to the occupant of the land or premises, or the owner of the goods distrained, or to some person resident at the place where such distress is made; and in case there shall be no person at such a place he shall give a copy to the ratepayer on demand at any time within one month after the making of such distress.

53. On making a distress the Bailiff shall forthwith make out a written inventory, in the form or to the effect of the schedule annexed hereto and marked with the letter B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained upon, or to some person on his or her behalf, resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made, or the Bailiff shall give a copy of the inventory to the ratepayer on demand at any time within one month after the making of such distress.

54. Where a distress has been made, and the rates levied for shall not be paid within five days thereafter, the Bailiff may sell the goods distrained upon at public auction, or may cause the same to be thus sold by any duly licensed auctioneer, either on or off the premises, for the best price that can be got for the same, towards the satisfaction of the said rates; and the overplus, if any, shall be handed over to the owner of the goods or the occupant of the land or premises where the distraint has been made, and a full and true account in writing shall in every case be given by the Bailiff to the said owner or occupant on demand: Provided always that nothing herein contained as to the time of sale shall apply to any corn, grass, hops, roots, fruits, pulse, or other product whatever which shall be growing at the time of the same being seized in distress.

55. The Bailiff, in making a distress for rates as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or such part of the land or premises chargeable with the rate as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days as before-mentioned, to come and go to and from such place or part of the said land or premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

56. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale according to such directions.

57. No distress shall be made upon the goods of any casual visitor in any house, or on the goods or the furniture of any lodger in any house or apartment ordinarily let or used as a lodging-house or apartment.

58. The Bailiff shall hand over to the Council Clerk all proceeds of such distresses within forty-eight hours after having received the same.

59. The Bailiff may, with the sanction of the Council, authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise for the time being all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

A.

WARRANT OF DISTRESS.

I, A. B., Mayor of the Borough of Albury, do hereby authorize you, C. D., the Bailiff of the said Borough, or your deputy, to distrain the goods and chattels in the [dwelling-house or in and upon the land and premises] of E. F., situate at _____, being the amount of rates due to this Borough to the _____ day of _____ for the said [dwelling-house, land, or premises, as the case may be] and to proceed thereon for the recovery of the same rates according to law.

Dated this _____ day of _____ A.D. 18 ____
To _____ Mayor.

B.

INVENTORY.

I HAVE this day, in virtue of the warrant, of which a copy is attached hereto, distrained the following goods and chattels in the [dwelling-house, or in and upon the land or premises] of E. F., situate at _____ within the Borough of Albury, for _____, being the amount of rates due to the said Borough to the _____ day of _____

Dated this _____ day of _____ A.D. 18 ____
Bailiff.

PART II.

MISCELLANEOUS.

Preventing and extinguishing fires.

1. For the better prevention of fires no person shall erect stacks of hay, wheat, or other inflammable materials, within three hundred feet of any building, in any populous portion of the town.

2. That from the time of passing this by-law no building, constructed of or roofed with bark or calico, shall be erected within the populous portion of the Municipality, except by permission of the Council.

3. In cases where a fire shall take place, it shall be lawful for the Mayor to allow one pound for the first load of water, and fifteen shillings for the second load, to be used for extinguishing the said fire.

Suppressing nuisances.

4. No householder or resident shall be permitted to allow his or her premises, yards, closets, or drains, to be offensive, or a nuisance to the adjoining householders or residents.

5. No noisome or offensive trade shall be permitted to be carried on in any premises, to the inconvenience of the residents of adjoining houses.

6. Upon representation by any two respectable householders that the house, yard, closets, hog-sties, or drains of the adjoining premises are a nuisance or offensive, the Mayor and any two Aldermen shall cause an inspection to be made of the premises complained of, and if any such premises shall be found to be a nuisance, or otherwise offensive, notice shall be given in writing, to the proprietor or resident of such premises, that if within three days after such notice the nuisance shall not be removed, the proprietor or tenant of the aforesaid premises shall be liable to a penalty not exceeding ten pounds, nor less than forty shillings.

Extirpation of noisome weeds.

7. The Council shall have power, in respect to districts where the lands are under cultivation, or have been cleared and fenced, to order and compel the extirpation of Bathurst burs or Scotch thistles, or other noisome weeds detri-

mental to good husbandry; and one publication of notice in the *Government Gazette*, and two insertions of such notice in the local newspapers, shall be deemed sufficient notice to owners of property. And if, after the expiration of fourteen days from the first publication of such notice, the owner of the land shall neglect or refuse to extirpate such weeds, the Council shall have the power to recover by legal process, a fine not exceeding five pounds. In the case of noisome weeds found growing on lands unoccupied, the owners of which are unknown, the Council shall be empowered to clear the weeds from such lands, the cost of which operation shall remain a charge upon the property, and may be recovered at any future time from the owner or occupier of such property: Provided that such cost does not exceed five pounds.

Management of the roads and streets, pathways, &c.

8. Any person trespassing by erecting a fence on any public street, thoroughfare, or lane in any part of the Municipality, shall for every such offence forfeit and pay a sum not less than forty shillings nor exceeding ten pounds; and also, any person having any fence or other obstruction erected or placed on any street, or road, or by-way in any part of the said Municipality, shall be compelled to remove the same within three months after notice to that effect has been duly served on the parties, subject to a fine or penalty of five pounds, and every week the same may remain after the expiration of the time stated in such notice to be treated as a subsequent offence against this by-law; and for every such offence shall be liable to a fine of five pounds.

9. No person shall form, dig, or open any drain or sewer in any public road, street, or thoroughfare, or shall cut up the surface of any such road, street, or thoroughfare upon any pretence whatever, without leave in writing first had and obtained from the Council.

10. No person shall be allowed to throw rubbish, sweepings, or deposits of any kind whatever on the streets, pathways, or gutters; and any person committing a breach of this by-law shall be liable to a fine not exceeding one pound.

11. No driver, carter, or other person shall wilfully or negligently do or suffer or cause to be done any damage or injury to the kerbstones, gutters, or pathways of any street or roadway; and no persons shall be at liberty to drive a wheeled vehicle of any kind, or ride or drive or lead any horse or horses or other cattle on the pathways. In cases where persons desire access to any private right-of-way, yard, lane, or other premises, such person shall, at his own proper cost and expense, form and maintain a crossing over the footpath, to be constructed of stone pitchers or pavement or planking (as the Council, their Surveyor, or other duly authorized officer, may in each case deem best), for the full width of the footpath, with kerbing at each side of such crossing, constructed of such material and of such a height as the Town Surveyor may direct.

12. No person shall be allowed to alter, cut, or destroy the pathways or roads, or to remove loam, sand, or gravel from any of the roads, streets, or reserves of the Municipality, without the authority of the Council, in writing.

13. No person shall be allowed to obstruct any road, street, or public thoroughfare within the Municipality, by building materials, drays, carts, or anything calculated to obstruct and hinder free passage, without the sanction of the Council, in writing; and no person shall be allowed to leave waterholes, or excavations for cellars or other purposes, unfenced, or in such a manner as to be dangerous to passers-by; and at all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

14. Any person who shall cast any filth, rubbish, or dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, or river, or creek, or canal, or shall obstruct or divert from its channel any such sewer, canal, or watercourse, shall forfeit a sum not exceeding five pounds, and shall pay the cost of removing such filth or obstruction, or of restoring such watercourse or canal to its proper channel, such penalty and costs not exceeding fifty pounds on the whole.

15. No person shall be permitted to place any house, shop, building, or other erection to the front of any street in the Municipality, or to erect any verandah extending over the footway, without first serving notice, in writing, on the Mayor, on any lawful day, between the hours of 10 o'clock and 4 o'clock, stating such intention, and de-

scribing the proposed situation of the building or erection, and without having received an authority signed by the Mayor.

16. No person shall be at liberty to encroach beyond the building-line in any street or lane, by the erection of houses, door-steps, fences, or any other obstruction whatever.

17. No person shall place or expose on the pathways or streets, carts, parcels, packages, or produce of any kind whatever, to the obstruction of the public.

18. That if any person riding or driving any horse, or driving any horse, mule, or other animal harnessed to any dray, cart, waggon, gig, truck, or other carriage or vehicle, shall, within the said Municipality, ride or drive the same furiously, or so as to create alarm or danger to the public, or to endanger the safety of any person on any public thoroughfare in the said Municipality, every person so offending shall for such offence forfeit and pay a fine not less than forty shillings nor exceeding ten pounds.

19. No horses, cattle, goats, or pigs shall be permitted on the streets, unless when driven through or being brought from one locality to another.

20. Nothing in these by-laws contained shall be deemed to prevent any person from placing an awning or verandah in front of his or her shop or house: Provided, however, that such awning be not less than seven feet above the height of the footway in front of such house or shop, and that the posts be placed into the kerb at the outer edge of such footway.

21. If any person shall haul or draw, or cause to be hauled or drawn, upon any part of the streets, roads, or public place, any timber, stone, or other thing, otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such streets or public places, to the injury thereof, every such person so offending shall, upon conviction, forfeit and pay for every such offence a sum not exceeding forty shillings, over and damages occasioned thereby, provided such penalty and damage do not exceed fifty pounds on the whole.

22. Every person who shall have a well situated between his dwelling-house, or the appurtenances thereof, and any road, street, or footway within the limits of the said Borough, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours notice, in writing, shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall, on conviction before any Justice of the Peace, forfeit and pay the sum of ten shillings; and every day such well may remain open and uncovered after such notice as aforesaid, shall be treated as a subsequent offence against the provisions hereof, and for every such offence shall be liable to a fine of five shillings.

23. If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver, or guided with reins only, excepted), or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare; or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care, upon such street, or by negligence or misbehaviour prevent, or hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so offending shall, upon conviction before any Justice of the Peace, forfeit and pay any sum not less than ten shillings, nor exceeding forty shillings.

24. Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place, the carcass, or any part of the carcass, of any newly-slaughtered animal, without a sufficient and proper cloth covering the same for the concealment from public view, shall be liable, on conviction, to a penalty not exceeding two pounds for every such offence.

Regulating Free Library.

25. The Free Public Library shall be established in a suitable room to be obtained by the Council for the purpose. It shall be open to the public every day, except Sunday, Christmas Day, and Good Friday, between the hours of 2 and 5 p.m. and 7 till 10 p.m. The Council to have the power of appointing a librarian to take charge of the property, to maintain good order, and generally to ensure the comfort of visitors.

Preserving trees, shrubs, and other property.

26. No person shall cut or fall, or remove or destroy, any standing timber, trees, shrubs, or brush in or upon any street, thoroughfare, court, market, highway, or reserve within the said Borough, without the permission of the Mayor.

27. Any person wantonly or maliciously breaking or injuring any lamp-post or street name plate, or extinguishing any light set up for public convenience, or damaging any Corporation property, shall be liable to a penalty upon conviction for every such offence, not less than one pound nor exceeding five pounds.

28. No person shall bathe in the Murray River, or the adjacent creeks or waterholes, within sight of any public road or reserve, except before 6 a.m. or after 8 p.m.

PART III.

By-laws for the regulation of Slaughter-houses.

1. Every Inspector of Slaughter-houses, and of any animals intended to be slaughtered within the Borough of Albury, shall, upon receiving due notice thereof, inspect all animals intended to be slaughtered, and shall particularly describe the color, mark or marks, brand or brands, and sexes, together with the name of the owner or owners thereof, which particulars he shall carefully enter, or cause to be entered, in a book to be kept for that purpose, and which book such inspector shall produce when required for examination by the Council or any Justice of the Peace, inspector, sub-inspector, sergeant of police, or any other police officer.

2. The owners or occupiers of slaughter-houses shall give the Inspector *twelve hours notice* in writing, of the number of cattle intended to be slaughtered at any particular time; and any person neglecting or refusing to give such notice as aforesaid, shall be liable to a penalty of five pounds for every head of cattle slaughtered prior to inspection.

3. The Inspector shall only inspect cattle for slaughter in the yards adjoining licensed slaughter-houses.

4. Any person found slaughtering animals without being duly licensed shall be liable to a prosecution for a breach of the first section of the Act 5 William IV, No. 1; and no person shall be permitted to slaughter cattle, sheep, or pigs, intended for sale within the Borough, except at a duly licensed slaughter-house.

5. Nothing herein contained shall extend to or affect any person or persons slaughtering at his or her or their own residences within the Municipality, animals for his or her or their family, servants, or laborers.

6. The owner or occupier of any slaughter-house within the Borough of Albury, used for the slaughter of animals intended for human food, shall keep the milts or spleens and lungs of all animals slaughtered in the said slaughter-house for a period of six hours after the animals have been slaughtered, unless the Inspector of Slaughter-houses shall have previously examined the milts or spleens and lungs of such slaughtered animals. And any such owner or occupier as aforesaid, who shall neglect or refuse so to do, shall forfeit and pay a penalty of not less than forty shillings nor more than twenty pounds.

7. Every person who may from time to time be in that behalf appointed by the Albury Borough Council, shall be the Inspector of Slaughter-houses within the Borough of Albury; and such Inspector shall from time to time enter

into and examine all such slaughter-houses, and the milts or spleens and lungs and carcasses of all animals slaughtered, unless the same shall have been previously examined by him.

8. It shall be lawful for any such Inspector, appointed or to be appointed as aforesaid, to ask, demand, and receive the sum of threepence for each and every head of cattle or skin, and one penny for each and every head of sheep, pig, calf, or lamb inspected by him under the authority of these by-laws, to be paid by the keeper of such licensed house or place, and to be recovered before any one or more Justice or Justices of the Peace.

9. Any person who shall assault, resist, or obstruct any such Inspector of Slaughter-houses when in the execution of his duty, or shall aid, abet, or incite any person so to do, shall for every such offence forfeit and pay a penalty of not less than twenty shillings nor more than ten pounds.

10. The blood, offal, and filth of all such animals as may be slaughtered in any such slaughter-house and premises used therewith, shall be removed at least once in every twenty-four hours; and any owner or occupier of any such slaughter-house who shall fail, neglect, or refuse to comply with this by-law, shall, upon conviction for every such offence, forfeit and pay a penalty not exceeding ten pounds.

11. If the owner or occupier of any such slaughter-house shall knowingly cause, permit, or suffer any animal infected with any disease affecting the milt or spleen or lungs to be slaughtered in any such slaughter-house, or if, after the slaughter of any animal, it shall be found to be diseased, and such owner or occupier, as soon as the animal is inspected and condemned, shall not immediately thereupon cause the entire carcass to be destroyed by fire, in the presence of the Inspector, such owner or occupier shall for every such offence forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds: Provided, however, that should the owner of any animal, which may be condemned by the Inspector, object to the decision of that officer, the owner thereof shall be at liberty to appoint some veterinary surgeon or other competent person as arbitrator in his behalf; and in the event of the Inspector and such veterinary surgeon or other competent person not agreeing, it shall be lawful and incumbent upon them, under a penalty of ten pounds, to appoint an umpire, whose decision shall be final.

12. The word "animal" shall, for the purpose of these by-laws, be held to include cattle, sheep, pigs, calves, and lambs; and the words "die of any disease" shall be held to apply to all cases of death other than death caused by killing or slaughtering.

Penalties.

13. All penalties imposed under these by-laws may be sued for and recovered in a summary way, by distress and sale of the offender's goods, before any two Justices of the Peace, according to the provisions of the Act 14 Victoria, No. 43, and the Acts therein adopted; and all such penalties when recovered as aforesaid, shall be paid into the corporate fund of the Municipality; and no person shall be liable to any penalty, fine, or forfeiture under these by-laws, unless proceedings, in respect thereof, be commenced within six months after the same shall have been incurred.

14. Every person committing a breach of any provision of any by-law hereinbefore mentioned shall, when no specific penalty shall have been provided for such offence, be liable to a penalty not exceeding twenty pounds.

Made and passed by the Borough Council of Albury, this eighteenth day of March, in the year of our Lord one thousand eight hundred and sixty-nine.

SAMUEL MUDGE,
Council Clerk.

GEORGE DAY,
Mayor.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF MORPETH—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 16th July, 1869.

BOROUGH OF MORPETH.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Morpeth, for regulating their own proceedings—the prevention and extinguishing of fires—the care and management of the public roads and streets—the suppression of nuisances and houses of ill-fame, &c.—and for the general good rule and government of the Borough,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BOROUGH OF MORPETH.

BY-LAWS to regulate the proceedings of the Borough Council of Morpeth—the prevention and extinguishing of fires—the care and management of the public roads and streets—the suppression of nuisances and houses of ill-fame, &c.—and for the general good rule and government of the Borough.

Standing Orders.

The meetings of the Council shall be held on every alternate Tuesday, at the hour of 7 o'clock p.m., except as provided under clause 103 of the Municipalities Act of 1867.

2. If the Mayor be not present within fifteen minutes after the time appointed for the meetings of the Council (a quorum being then present), any Alderman may be elected Chairman for that particular meeting.

3. The Mayor or Chairman shall preserve order; and when required or called upon to decide a point of order or practice, he is to state the rule, custom, or precedent, applicable to the case, without argument or comment.

4. The Mayor or Chairman may take part in all the proceedings of the Council.

5. All questions duly proposed shall be put by the Mayor or Chairman, and the sense of the Council thereon shall be declared by him.

6. Every question shall be put in the affirmative, and then in the negative; and this may be done as often as the Mayor or Chairman shall deem necessary for enabling him to determine which side has the majority.

7. No member, having taken his seat, shall be allowed to withdraw, without asking the permission of the Chairman.

8. If two or more members rise to speak at the same time, the Mayor or Chairman shall decide which of them is entitled to pre-audience.

9. The Mayor or Chairman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question, except in explanation.

Order of business.

10. The business of each ordinary meeting of the Council shall be transacted in the following order, viz. :—

- a. The reading and confirmation of the minutes of the previous meeting.
- b. The reading of official correspondence.
- c. The presentation of petitions.
- d. Reports brought up from Committees.
- e. Miscellaneous business.
- f. Motions of which notice has been given.
- g. Notice of motions.
- h. Orders of the day.

11. The question for confirming the minutes of the previous meeting shall be proposed by the Mayor or Chairman immediately upon their being read, and shall be to the effect that the minutes now read are a correct record of the proceedings; and no discussion shall be allowed thereon, except on the point of accuracy.

Rules of Debate.

12. Every member shall stand when speaking, and shall address the Chair.

13. Except in Committee, no member shall speak more than once on the same question, unless in explanation when misrepresented or misunderstood: Provided, however, that the mover of any question shall be allowed the liberty of reply; and provided further, that every member shall be at liberty to speak once on any amendment, as well as on the original motion; but the right of reply shall not extend to the mover of an amendment.

14. No member shall speak upon any motion or amendment for a longer time than fifteen minutes, unless by permission of the Council.

15. No member shall digress from the matter under discussion, nor make personal reflections on members, nor impute motives.

16. When any member shall use any expression which the Mayor, or Chairman, or any Alderman, shall think capable of being offensively applied to any other member, the member so offending shall be required by the Mayor, or Chairman, to withdraw the expression, and to make a satisfactory apology to the Council.

17. No Alderman, when discussing any matter, shall be interrupted, unless by a call to order, when he shall sit down. The Alderman calling to order shall then be heard, and the question of order decided before the debate or any other business is resumed.

18. Any member may require the question under discussion to be read for his information at any time during a debate, but not so as to interrupt any other member when speaking.

19. A debate may be adjourned to a later hour of the day, or to another day specified; and the member on whose motion a debate is adjourned, shall be entitled to pre-audience on resumption of the debate.

Divisions.

20. It shall be competent for any member to divide the Council upon any question put from the Chair, either in full Council or Committee of the Council; and upon such division, those who are on the affirmative shall place themselves on the Mayor's or Chairman's right hand, and those who are on the negative shall place themselves on his left hand; and no member shall leave his place until the names of all the members present have been taken down by the Council Clerk, or person officiating for him.

21. All divisions of the Council shall be entered on the Minutes of the Proceedings.

Motions.

22. No member shall make any motion initiating a subject for discussion, but in pursuance of notice, openly given at a previous sitting of the Council, and duly entered on the Notice Paper, with his signature thereto, and dated; but it shall always be in order, on the presentation of any document, except a petition, for the member presenting it to move, without previous notice, that a day be appointed for its consideration.

23. Motions shall take precedence of orders of the day, and be moved or postponed in the order in which they stand on the Notice Paper, or lapse.

24. No motion shall be put unless it be seconded.

25. When a motion has been proposed and seconded, it shall be the property of the Council, and shall not be withdrawn without the consent of the Council.

26. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on the one next to the last, and so on, in the inverse order to that in which they have been moved: Provided, however, that when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

27. Any motion for adjournment, if seconded, shall be put immediately, without discussion; but if such motion be negatived, it shall not be competent for any member to make a similar motion until at least half an hour shall have elapsed from the period of moving the one that has been negatived.

28. No motion, the effect of which, if carried, would be to rescind, or be repugnant to, any resolution which has been passed by the Council, shall be entertained during the same municipal year, unless a "Call of the whole Council" has been duly made for that purpose; and no such motion, if negatived by the Council, shall be again entertained during the same municipal year.

29. Matters of extreme urgency may, with the consent of the Council, be brought under consideration, without notice being previously given.

30. A book, to be called a "Motion Book," shall be provided by the Council (for the purpose of immediate reference), in which the Council Clerk shall enter all motions duly made, and amendments thereon (if any), specifying the manner in which such motions or amendments have been dealt with.

Petitions.

31. It shall be incumbent on any member presenting a petition to acquaint himself with the contents thereof, and to report to the Council that it does not contain any disrespectful language.

32. On the presentation of a petition no debate shall take place, and the only question that can then be entertained by the Council shall be, that the petition be received, or that it be referred to a Committee: Provided, however, that any petition that has been received by the Council may be taken into consideration, upon notice of motion being given in the usual way.

33. Every petition received by the Council shall be received only as the petition of the party or parties whose signature or signatures it bears; and no petition shall be received, unless at least one signature be upon the sheet containing the petition.

Committees.

34. In a Committee of the whole Council the general rules of the Council shall be observed, except the rule limiting the number of times of speaking.

35. Every Report of a Committee shall be signed by the Chairman thereof.

36. When the Report of a Committee is brought up and presented to the Council, the question as to its reception may be moved and put at once; but it shall not be adopted, or taken into consideration, without notice in the usual way.

37. There shall be three Standing Committees, to be called respectively, the Committee of Finance (of which the Mayor shall be Chairman), the Improvement Committee, and the General and Punt Committee; and the members of all such described Committees shall be chosen by ballot.

38. The Standing Committees shall be appointed for the municipal year, at the first meeting of the Council after the election of the Mayor of the Municipality; and any vacancies occurring therein during the year shall be filled up by the Council.

39. All Reports of Committees shall be fairly written on foolscap paper, for the convenience of filing or binding.

Finance Committee.

40. No matters of account shall be disposed of by the Council until they have been examined and reported upon by the Committee of Finance.

41. The Chairman may, however, with the assent of two members of Committee, under signature, authorize the expenditure of any sum not exceeding ten pounds, during any recess; and such expenditure shall be reported to the Council, at its next meeting, and the usual draft obtained for payment thereof.

42. All drafts upon the funds shall be signed by the Mayor of the Municipality and one member of the Finance Committee, and be countersigned by the Council Clerk.

43. The Mayor of the Municipality shall in all cases give the necessary information to the bankers, whose signatures are necessary to constitute a genuine draft.

44. No accounts of any kind whatsoever, except those otherwise specially provided for, shall be paid, except at the usual meetings of the Council, or until such accounts shall have been first passed by the Finance Committee, and be then allowed by the Council.

45. No contract shall be paid for until such contract shall have been fully completed to the satisfaction of the Committee under whose authority the contract was entered into, nor by it unless in the form prescribed for other payments.

Improvement Committee.

46. No public work of any character shall be undertaken (except as in rule No. 44 of Finance Committee By-laws), until the nature thereof, and estimate of probable cost, be first brought before the Council, for consideration and approval.

47. All accounts against the Corporation, relating to works, shall be examined by the Improvement Committee, and, if found correct, shall be passed to the Finance Committee for payment in the usual manner.

General Committee.

48. All matters which the Council shall think fit to refer to a Committee, and which do not fall within the province of any other Standing Committee, shall be referred to the General Committee: Provided, however, that the Council may, at any time, refer such matters to a Committee to be appointed for that special business.

Making By-laws.

49. Before any proposed By-law is discussed in Council, a copy thereof shall be open for public inspection, in the office of the Corporation, not less than seven days.

50. No By-law shall be passed until it has been reported upon by a Committee of the whole Council, nor until it has been twice read in Council on different days.

51. All By-laws, when confirmed and published as the Municipalities Act of 1867 directs, shall be fairly transcribed into a book to be kept for that purpose, signed by the Mayor, and countersigned by the Council Clerk; and the said book shall, at all reasonable times, be open to public inspection.

Miscellaneous.

52. Any member may record his protest against any decision of the Council, provided that the protest be handed to the Council Clerk not later than the next Council meeting: And provided, also, that notice of his intention to protest be given immediately on the passing of the resolution to which the protest refers.

53. The common seal shall not be affixed to any document without the express authority of the Council; and every impression thereof, so authorized, shall be verified by the signatures of the Mayor and the Council Clerk.

54. No officer of the Corporation shall be at liberty to show, lay open, or expose, any of the books, papers, or records of the Corporation, to any person, other than an Alderman, without leave from the Council, except as otherwise provided for by section 108 of the Municipalities Act of 1867.

55. In cases where security is required by clause 151 of the Municipalities Act of 1867, no sureties shall be accepted, otherwise than by a vote of the Council; and it shall not be competent for the Council to accept as sureties any of its own members, nor any person holding office in the Corporation.

56. Any one or more of the standing orders may be suspended *pro tempore* in a case of emergency, if a majority of the Council then present shall deem such suspension necessary.

57. The bankers and trustees shall be appointed annually at the first meeting held after the election of the Mayor; and the Council Clerk shall, immediately upon such appointments having been made, notify the same to every officer and servant of the Corporation who may be entrusted with the custody or control of moneys.

The Bailiff and his duties.

58. The bailiff shall be appointed by a resolution of the Council, and may be at any time removed in a similar way.

59. The bailiff shall make all levies and distresses for the recovery of rates under warrant, in the form of the Schedule hereto annexed and marked with the letter A, under the hand of the Mayor, or any person who may for the time being be duly authorized to perform the duties of that office.

60. At the time of making a distress, the bailiff shall forthwith make out a written inventory, in the form or to the effect of the Schedule annexed hereto and marked with the letter B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made; and the bailiff shall give a copy of the inventory to the ratepayer, on demand, at any time within one month after the making of such distress.

61. The bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places, or in such part of the land or premises chargeable with the rate, as shall be most fit and convenient for this purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

62. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the goods and chattels shall, in such case, be put up for sale according to such direction.

63. The bailiff shall hand over to the Council Clerk all proceeds of such distresses, within forty-eight hours after having received the same.

64. The bailiff, with the sanction of the Mayor of the Borough, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the bailiff himself; but the bailiff and his sureties shall, in every case, be held responsible for the acts of such deputy.

65. The bailiff shall be paid for every levy made under these By-laws, according to the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

I, the Mayor of the Municipality of Morpeth, do hereby authorize you, bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of situate at for the sum of being the amount of municipal rates due to the Borough, to the day of for the said dwelling-house, land, or premises (as the case may be), and to proceed thereon for the recovery of the said rates according to law.—Dated this day of 18

Mayor.

SCHEDULE B.

Inventory.

I HAVE this day, in virtue of a warrant, under the name of the Mayor of the Municipality of Morpeth, dated distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of situate at within the Borough of Morpeth, for the

sum of being the amount of rates due to the said Municipality to the day of 18 —
Dated this day of 18
Bailiff.

SCHEDULE C.

Fees to Bailiff.

FOR making entry and inventory, five shillings; if in possession more than five hours, five shillings additional; and for every subsequent day whilst in possession, five shillings; and five per cent. on the net amount of sale.

Prevention and extinguishing of fires.

66. It shall not be lawful for any persons to burn any shavings, or other matters or things, in any street, road, or public place, within the Municipality.

67. No householder shall place, or knowingly permit to be placed, in any house, yard, workshop, out-houses, or other premises, fire, powder, or combustible materials of any kind, in such a manner as to endanger contiguous buildings.

68. The Mayor, upon the representation of any two householders, that fire is being used to the danger of contiguous buildings, shall cause three days' notice, in writing (unless the urgency of the case requires that it should be removed at once), to be given to such householder, to show cause why the same should not be removed or remedied, and an opportunity thereupon given to show such cause.

69. For every offence against the provisions of these By-laws the offender shall be liable to a penalty not exceeding ten pounds, to be recovered in a summary manner before any Justice, as provided by the Municipalities Act of 1867, sec. 193.

70. In every case in which it shall be made to appear, to the satisfaction of any Justice of the Peace, that the chimney of any house or building, within the limits of the Municipality, has taken fire, from the occupier of any such house or building having omitted to cause such chimney to be regularly and sufficiently swept and cleaned, or from any other neglect of such occupier, or of his or her servant or servants, such occupier shall, on conviction before any such Justice of the Peace, forfeit and pay for every such offence any sum not exceeding forty shillings; and in every such case the proof that any such chimney did not take fire through the neglect of such occupier, in not having the same regularly and sufficiently swept or cleaned, shall be upon such occupier.

Care and management of the public roads and streets and public thoroughfares of the Borough.

71. The Surveyor of the Municipality, duly appointed by the Council thereof, or any person acting for him, shall be the proper person for marking out, when necessary, any roads, streets, or thoroughfares, in actual public use as such, within the Borough. In marking out such roads, streets, or thoroughfares, recourse shall be had, when practicable, to the plans under which lands, with frontage to the road, street, or thoroughfare in question, shall have been sold; and it shall be the duty of the Surveyor, or any person acting for him, to place posts at the corners or intersections of any roads, streets, lanes, or thoroughfares, wherever the same may be considered necessary or desirable by the Municipal Council, so as to give a width of forty-two feet at least for the carriage-way, and twelve feet at least for the footway on each side, when the street shall be sixty-six feet wide; and in proportion, and in the discretion of the said Surveyor, or person acting for him, in any public roads, streets, lanes, or thoroughfares, of other width than sixty-six feet.

72. Whenever any road, street, or lane, has been marked out in the manner herein provided, no house, shop, fence, or other structure shall be erected or allowed to project or encroach on any part thereof.

73. Whenever any footways shall have been marked out, the Surveyor, or person acting for him, may, with the sanction of the Council, cause the same to be levelled and made, as nearly as practicable, of equal height and breadth, and with an equal slope and inclination; and for this purpose, may remove any flagging, steps, or other matter or thing that may injure or obstruct the said footway, or render unequal or inconvenient, and which now is, or may hereafter be, erected or placed on the space marked out for any of the said footways.

Obstructions and encroachments.

74. The Surveyor may at any time, or the person acting as such, on the order of the Council, and upon due notice of ten days, direct the removal of any fence, building, or other obstruction or encroachment which shall be made in and upon any road, street, lane, or thoroughfare, under the charge of the Council. Notice shall in this case be served, either personally, or at the usual or last known place of abode of the person to whom such obstructive or encroaching structure belongs, or who has erected the same, or caused it to be erected, or who may be in charge of the same.

75. In any case where, after the service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing the same shall not remove it within a reasonable time, it shall be lawful for the Council to direct the removal of the same, under the superintendence of its own proper officer, and at the cost of the owner or of the person thus offending, or of the person who may be in charge thereof: Provided that the expenses thereby incurred shall in no case exceed the sum of ten pounds, to be recovered summarily in manner provided for the recovery of penalties under these By-laws.

76. In case where the obstruction or encroachment cannot be removed, unless at a greater cost than ten pounds, it shall be open to the Council to direct such removal, and to pay all costs thereof, above ten pounds, from the municipal funds, or to proceed by action of trespass against the person causing such obstruction or encroachment, or who may be in charge thereof.

77. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation.

78. The Surveyor, or person acting for him, may at any time, by order of the Council, cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped, for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on, or by removing or destroying any obstruction that may be placed thereon, for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

79. No person shall be allowed to obstruct any pathway, road, street, or public thoroughfare within the Municipality, by building materials, drays, carts, goods, merchandise, or anything whatsoever calculated to obstruct or hinder free passage, without the sanction of the Mayor in writing; and no person shall be allowed to leave waterholes, or excavations for cellars or other purposes, unfenced, or in such a manner as to be dangerous to passers-by; and at all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

Trespasses, and removal of nuisances.

80. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, river, creek, or canal, or who shall suffer slops, suds, or filth of any kind, to flow from his or her premises into any such watercourse, sewer, waterhole, river, creek, or canal, or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises over any of the footways or streets of the Municipality, or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever to flow into any public watercourse, sewer, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any such sewer or watercourse, shall forfeit any sum not exceeding fifty pounds, nor less than forty shillings, such penalty to be recovered summarily in the manner provided for the recovery of penalties under these By-laws.

81. No person shall form, dig, or open any drain or sewer, in any public road or street, lane or thoroughfare, or shall cut up the surface of any such road, street, lane, or thoroughfare, upon any pretence whatever, without leave in writing from the Mayor.

82. No person shall be allowed to throw rubbish, sweepings, or deposits of any kind whatsoever, on the streets, pathways, or gutters of the Borough.

83. Any driver, carter, or other person who shall wilfully or negligently do, or suffer or cause to be done, any damage or injury to the curbstones, gutters, or pathways of any street or roadway, or who shall drive a wheeled vehicle of any kind, or ride or drive, lead or stand, or permit to stand, any animal (other than dogs) on the pathways within the Borough, shall, upon conviction before any Justice of the Peace, forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

84. Any person who shall damage any public building, wall, parapet, bridge, road, street, sewer, watercourse, sluice-pump, fountain cock, waterpipe, shoot, embankment, or other public property in possession of the Council, shall be dealt with as provided by section 12, 2 Victoria, No. 2.

Throwing filth on carriage or foot ways, driving barrows and carriages on foot-ways.

85. If any person shall, in any street or road, throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way or foot-way of any such street or road, or shall kill, slaughter, dress, scald, or cut up, any beast, swine, calf, sheep, lamb, or other cattle, in or so near to any of the said streets or roads, as that any blood or filth shall run or flow upon or over, or to be on any such carriage-way or foot-way, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed, upon any of the foot-ways of any street or road, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, or any truck or cask, or shall wilfully lead, or stand, or drive, or ride any horse or other

beast, upon any of the footways aforesaid, every person so offending, upon conviction before any Justice of the Peace, or upon the view of any such Justice, shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings, for every such offence.

86. Nothing in these By-laws contained shall be deemed to prevent any person from placing an awning in front of his or her house or shop: Provided, however, that such awning be not less than seven feet above the height of the footway in front of such house or shop, and that the posts be placed close up to the curbstone or outer edge of such footway.

Suppression of nuisances and houses of ill-fame.

87. No householder or resident shall be permitted, under a penalty of any sum not exceeding ten pounds, to allow his or her premises, yards, closets, or drains, to be offensive or a nuisance to the neighbouring householders or residents.

88. No noisome or offensive trade shall be permitted, under a penalty of any sum not exceeding ten pounds, to be carried on in any premises, to the inconvenience or annoyance of the residents of neighbouring or adjoining houses or premises.

89. Upon representation by any respectable householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance, or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose; and if any such premises be found to be a nuisance, or otherwise offensive, notice in writing shall be given to the proprietor or resident of such premises, that if, within seven days after the service of such notice, the nuisance shall not be removed, the proprietor, tenant, or occupant of the aforesaid premises, shall, upon conviction before any two Justices of the Peace, be liable to any penalty not exceeding twenty pounds.

90. Upon representation, by any respectable ratepayer, that the house or neighbouring or adjoining premises is of ill-fame, it shall be lawful for the Mayor and any Alderman to cause the residents of such house or premises to furnish to the Council a list of the names, ages, sex, birth-place, and occupation of all the inmates of the said house or premises; and upon non-compliance with such request, or if, upon consideration, the Mayor and any Alderman consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance; and the Mayor shall cause a notice in writing to be served upon such householders or residents to discontinue or abate the said nuisance, within forty-eight hours after the receipt of such notice, otherwise they shall, upon first conviction before any two Justices of the Peace, be liable to a penalty of not less than forty shillings, nor more than fifty pounds, and on second conviction shall be liable to a penalty of not less than five pounds nor more than fifty pounds.

91. For preserving the cleanliness of the said Borough, and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, from time to time, and when and as often as he or the Council shall see occasion, to visit and inspect the butchers' shambles and slaughter-houses, and to give such directions concerning the cleansing of such shambles and slaughter-houses, both within and without, as to him or the said Council shall seem needful; and any butcher, and the owner or occupier of any such shambles or slaughter-houses, who shall obstruct or molest any such officer in the inspection thereof, or who shall refuse or neglect to comply with such directions within a reasonable time, shall, upon the view of any Justice of the Peace, or on conviction on the complaint of any such officer, forfeit and pay any sum not exceeding ten shillings.

Swine, horses, goats, &c., not suffered to wander about the streets.

92. It shall not be lawful for any person whatsoever to suffer any kind of swine, or any horse, ass, mule, sheep, or goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any road, street, or public place; and any person who shall so offend shall forfeit and pay, in respect of every such animal, a sum not exceeding forty shillings.

Hog-sties and nuisances not removed on complaint.

93. In case any privy, hog-sty, boiling-down, or any other matter or thing (which shall, at any time or times hereafter be in any place within the said Municipality), shall be or become a nuisance, it shall be lawful for the said Council, upon any complaint thereof to them made by any of the inhabitants, and after due investigation of such complaint, by notice in writing, to order that such privy, hog-sty, boiling-down, or other matter or thing, being a nuisance, shall be remedied and removed within seven days after such notice shall have been given to the owner or occupant of the said premises wherein such nuisance shall exist, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises; and every such owner or occupier neglecting to remedy or remove such nuisance, pursuant to such notice and to the satisfaction of the Council, shall, on conviction, forfeit and pay the sum of ten

pounds for every such neglect or disobedience. And also, it may be lawful for the said Council to cause to be indicted for such nuisance, such person so neglecting or disobeying any such notice, at the then next Court of General or Quarter Sessions to be held in or nearest to the said Municipality; and such person or persons being found guilty thereof, such nuisance or nuisances shall be removed, taken down, and abated, according to the law with regard to public or common nuisances.

Swine not to be kept.

94. It shall not be lawful for any person whomsoever, to breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditaments, situate and being in or within forty yards of any street or public place in the Borough; and any person who shall so offend, shall, on conviction, forfeit and pay for every such offence any sum not exceeding forty shillings nor less than five shillings.

Drawing or trailing timber.

95. If any person shall haul or draw, or cause to be hauled or drawn, upon any part of the streets, roads, or public places, any timber, stone, or other thing, otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such streets or public places, to the injury thereof, every such person so offending shall, upon conviction, forfeit and pay for every such offence a sum not exceeding five pounds; and it shall be lawful for any constable to apprehend any person whom he shall find in the act of committing such offence, and to convey such person before any Justice of the Peace, to be dealt with according to law.

No rock to be blasted without notice to Mayor, &c.

96. Any person who shall be desirous of blasting any rock within the Municipality, shall give notice in writing, twenty-four hours previously, to the Mayor or Council, who shall appoint, in writing, a time when the same may take place, and give such other directions as he or they may deem necessary for the public safety; and if any person shall blast, or cause to be blasted, any rock within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the Mayor or Council, he or she shall forfeit and pay for every such offence any sum not more than twenty pounds, and the proof of such authority as aforesaid shall be on the party proceeded against for a breach of this enactment.

Wells to be covered over, &c.

97. Every person who shall have a well situated between his dwelling-house or the appurtenances thereof, and any road, street, or footway within the limits of the said Borough, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person, having such well as aforesaid, shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall, on conviction before any Justice of the Peace, forfeit and pay the sum of two shillings and sixpence for every such offence.

Enclosures around scaffolding.

98. If any person shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left, any hole in or adjoining to any street, road, or public place, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good and sufficient manner, or shall keep up or cause to be kept up and continued, any such enclosure for any time which shall be longer than shall be reasonably required, or shall not, when thereunto required by the said Council or its officer, well and sufficiently fence or enclose any such hole within twenty-four hours after he shall be required to do so by the said Council or officer, and in the manner, and with such materials as they or he shall direct, and to their and his satisfaction, and shall not place a light upon the said inclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, or shall fail to place or erect a fence, rail, or boarding around any scaffolding or ladder that may be required during the repairs or erection of any building (such fence, rail, or boarding, not to extend beyond the footway of any street), or fail to keep, during the existence of such fence, rail, or boarding, a light burning from sunset to sunrise at each corner of the same, then and in every such case the person so offending shall, on conviction before any Justice of the Peace, forfeit and pay for every such offence, and for every such refusal or neglect, any sum not exceeding five pounds nor less than forty shillings.

Erections, &c., in front of public streets, roads, &c.

99. No person shall build, erect, put up, or remove, or cause to be built, erected, put up, or removed, any building, house, shop, warehouse, wall, or fence, fronting any public street, road,

or thoroughfare, unless he shall have previously given seven days' notice of his intention to commence such works, to the Mayor or the Council Clerk of the Municipality; and any person so offending shall, upon conviction before a Justice of the Peace, pay for every such offence any sum not less than ten shillings nor more than forty shillings.

Slops, night-soil, &c., to be conveyed away only at certain hours, &c.

100. If any person or persons shall drive, or cause to be driven, any cart or other carriage, with any night-soil or ammoniacal liquor therein, through or in any of the streets or roads, or public places within the said Borough, between the hours of five o'clock in the morning and ten o'clock at night, or shall fill any cart or other carriage so as to turn over or cast any night-soil, ammoniacal liquor, slop, mire, or channel dirt, or filth, in or upon or near to any of the said streets or other public places, it shall and may be lawful for any constable whomsoever to seize and apprehend the offender, and to convey him before any Justice of the Peace; and in order to prevent nuisances, it shall not be lawful for any person to deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house, than shall be directed by the said Council or their officer; and all night-soil or other offensive matter shall be removed within the hours prescribed, in properly covered and water-tight carts or other vehicles; and no vehicle used for this purpose shall be allowed to stand on any premises nearer to any road, street, or dwelling-house, than shall be directed by the said Council or their officer; and every person so offending shall, for every such offence, forfeit and pay the sum of five pounds; and in case the person so offending cannot be apprehended, then the owner of such cart or carriage in which such night-soil, ammoniacal liquor, slop, filth, mire, or channel dirt, shall be put or placed, and also the employer of the person so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Interrupting free passage, &c., driving on wrong side of road, &c.

101. If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver, or guiding with reins only, excepted),—or if the driver of any carriage whatsoever shall wilfully be at such distance from such carriage, or in such a situation whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses, or cattle drawing the same,—or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare,—or if any person shall, in any manner, wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same,—every such driver or person so offending shall, upon conviction before any Justice of the Peace, forfeit and pay any sum not exceeding forty shillings nor less than ten shillings; and it shall be lawful for any constable to seize and convey any person so offending before any Justice of the Peace, to be dealt with according to law.

Furious or careless driving, &c.

102. Any person who shall ride or drive through or upon any road, street, or public place, negligently, carelessly, or furiously, so as to endanger the life or limb of any person, or to the common danger of the passengers, shall, on conviction before any Justice of the Peace, forfeit and pay any sum not exceeding ten pounds nor less than two pounds.

Affixing placards on walls, and chalking thereon.

103. It shall not be lawful for any person to paste, or otherwise affix, any placard or other paper upon any wall, house, or building, by chalk or paint, or in any other manner, unless with the consent of the owner thereof; and any person who shall be guilty of any such offence shall, on conviction before any Justice of the Peace, forfeit and pay the sum of ten shillings.

Carrying carcasses of newly-slaughtered meat.

104. Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place, the carcass, or any part of the carcass, of any newly-slaughtered animal, without a sufficient and proper cloth covering the same, for the concealment from public view, shall be liable, on conviction, to a penalty of any sum not exceeding forty shillings for every such offence.

Rain not to be carried to footways.

105. It shall not be lawful for any person whomsoever to carry, by means of pipes, gutters, or other contrivances, any rain-water from the roof of his or her premises or house, nor permit nor suffer any rain-water to drop from the roof of his or her premises or house, upon any part of the footways of any

street or public place within the Borough; and any owner or occupier of any such house or premises, who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances, when required to do so by any municipal officer, shall, on conviction, forfeit and pay any sum not exceeding ten shillings, and a like sum for every day or part of a day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises, may convey any such rain-water, by means of pipes laid under the surface of any such footways, into the gutters adjoining the same: And provided also, that all such pipes shall be laid down to the satisfaction of and under the superintendence of the Town Surveyor, or any other person appointed by the Council.

Breaking horses, &c.

106. It shall not be lawful for any person or persons in any street or public place within the Municipality, to drive any carriage or carriages for the purpose of breaking, exercising, or trying horses, or to ride, drive, or lead any horse, mare, or gelding, for the purpose of airing, exercising, trying, breaking, showing, or exposing for sale, any such horse, mare, or gelding, otherwise than by passing quietly through such streets or public places: Provided further, that no person or persons shall be

allowed within the said Borough to furiously or carelessly drive any horse, mare, or gelding to or from any public watering-place, creek, or river; and the person or persons in charge thereof, and who shall be *prima facie* presumed to be the owner of the said animal or animals, and shall be liable accordingly, and every person so offending, upon conviction before any Justice of the Peace, shall forfeit and pay, for every such offence, any sum not exceeding forty shillings nor less than five shillings.

Jurisdiction of offences.

107. Unless where hereinbefore otherwise directed, all complaints of offences against these By-laws shall be heard and determined within three months from the committal of the offence complained of; and no such complaint shall be made unless within one month from the time when such offence shall have been committed.

Made and passed by the Borough Council of Morpeth, this thirteenth day of October, one thousand eight hundred and sixty-eight.

CHAS. E. JAKUES,
Mayor.

JOHN J. HAYNES, Council Clerk.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF NUMBA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 31st July, 1869.

MUNICIPAL DISTRICT OF NUMBA.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Numba, for regulating their own proceedings, and the duties of the officers and servants of such Council,—for preserving order at meetings of the Council,—for determining the times and modes of collecting and enforcing payments of rates,—for preventing and extinguishing fires,—for suppressing nuisances, &c., &c.—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

WILLIAM FORSTER.

BY-LAWS for regulating the proceedings of the Council of the Municipal District of Numba, and the duties of the officers and servants of such Council,—for preserving order at meetings of the said Council,—for determining the times and modes of collecting and enforcing payments of rates,—for preventing and extinguishing fires,—for suppressing nuisances,—for compelling residents to keep their premises free from unwholesome matters,—regulating and licensing vehicles plying for hire, and sale of butchers' meat; opening new public roads, ways, and parks,—aligning and cleansing roads and streets,—regulating the supply and distribution of water,—sewerage and drainage,—preserving trees and shrubs,—preventing or regulating the bathing or washing the person in any public water near a public thoroughfare,—preserving public decency,—providing for the health of the Municipality, and against the spreading of contagious or infectious diseases,—and generally maintaining the good rule and government of the said Municipality.

PART I.

Council days and hours.

1. The Council shall meet for the dispatch of business at the hour of 5 o'clock p.m. on every alternate Thursday, unless such day be a public holiday. In the latter case, the meeting shall be held on such other day as the Mayor may appoint.

No meeting of Council unless a quorum or a moiety th reof.

2. The business of the Council shall commence with a quorum or a moiety of the Council. If at the expiration of thirty minutes from time of meeting there is no quorum or moiety thereof, no business shall be transacted, but the names of the Aldermen present shall be recorded in the minute-book.

Absence of Mayor, an Alderman to be chosen as Chairman.

3. If the Mayor be not present thirty minutes after the time appointed for the meeting of the Council, an Alderman shall be elected to preside as Chairman for the time being.

Mayor or Chairman may give a casting vote.

4. The Mayor or Chairman of the Council for the time being may take part in all the proceedings of the Council; and, in case of any equality of votes upon any division, may give a casting vote in addition to his vote as Alderman.

ORDER OF BUSINESS.

5. The following shall be the order of business at all meetings of the Council, other than special meetings.

Minutes to be read and verified.

1. The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of Mayor or other Chairman. No discussion to be permitted upon such minutes, except as to whether they are correct or not.
2. Reading of copies of letters sent by authority of the Council.
3. Reading of letters received, and considering and ordering thereon.
4. Reception and reading of petitions and memorials.
5. Reading and ordering on report of Permanent Committee.
6. Reading and ordering on report of Select Committee.
7. Reading and ordering on reports of deputation.
8. Financial statement and accounts.
9. Special business not classified; order of the day, including subject arising from proceedings of former meetings.
10. Motions of which previous notice has been given.
11. Notices of motion.

All communications addressed to the Council Clerk.

6. All communications by letter, intended for the Council, shall be made and addressed to the Clerk, and all applications and memorials shall be addressed to the Mayor, under cover to the Council Clerk.

Notice of motion limits.

7. No notice shall be decided on at any meeting of the Council, unless such notice (in writing), signed by the Alderman proposing, shall have been given seven clear days before the next meeting of the Council.

Order of the day.

8. The order of the day shall include all business of which due notice has been given; and also all matters arising out of former meeting of the Council.

Notice of motion struck out.

9. Any motion entered on the notice paper, and the Alderman having given notice of the same being absent, and no other Alderman deputed to bring forward such motion, when the business is called in order such motion shall be struck out.

All notices of motion to be numbered by the Council Clerk. Liberty to withdraw notice of motion.

10. All notices of motion, and all requisitions from Aldermen and directions from the Mayor, as to the entry of any particular matter of business for the consideration of the Council at its then, next, or any future meeting, shall be numbered by the Council Clerk as they are received; and each such notice, requisition, and direction, shall be preserved by such clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been so disposed of, shall have been duly verified as required by section 5 of this part of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction, to the Council Clerk, shall be at liberty to withdraw the same at any time before the making up of the business paper.

By-laws open for inspection seven days at Council Chamber.

11. No By-law shall be decided on without due notice (as in cases of motion); and a copy of the proposed By-law shall be open in the Council Chamber seven days, for the inspection of all ratepayers, free of charge, or of any person duly qualified to vote at elections under the Municipalities Act.

Order of debate.

12. Every Alderman who shall move or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall, while so doing, stand up in the customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in case of a question, such question may, by permission of the Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner; but in every such case, the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy; and all members of the Council shall, on all occasions, when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

GENERAL GOOD RULE AND GOVERNMENT OF THIS MUNICIPALITY.

Fire or combustible materials, &c.

13. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall, on conviction, for every such offence, forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid, for seven days after any such conviction, shall be deemed guilty of a further offence against this By-law.

Setting fire to matter without notice.

14. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air without having given notice in writing to the occupiers of the land adjoining to the land upon which such matter shall be, and also to the Council Clerk, of his intention so to do, or within twenty-four hours after giving the last given of such notices, or between the hours of four in the afternoon of any day and eight in the morning of the following day, shall forfeit a sum not exceeding five pounds.

Fireworks, &c.

15. Every person who shall light any bonfire, tar-barrel, or firework upon or within sixty yards of any public or private

street, or any public place, or shall sell gunpowder, squibs, rockets, or other combustible matter, by gas, candle, or other artificial light, shall forfeit a sum not exceeding five pounds.

Officers and Servants—Notice to candidates.

16. No appointment to any permanent office at the disposal of the Council shall take place until public notice shall have been given as hereinafter provided, inviting applications from qualified candidates for the same. The salary or allowance attached to such office shall in every case be fixed before such advertisement is published; and all applications, as advertised, shall be called for by tender.

Mode of appointment.

17. Every such appointment shall be made by ballot, in such mode as may at the time be determined on, whenever there is more than one candidate for such permanent office.

Exceptional cases forwarded.

18. Nothing herein contained shall be held to prevent the appointment by the Council, without advertisement, of any salaried officer or servant of the Corporation, to any other permanent office or employment at the disposal of such Council to which no further salary is attached; or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid for by allowances proportionate to the extent of such duties; or to prevent any similar appointment or employment by the Mayor, or by any Committee or officer of the Council, of any such officer or servant under the authority of any By-law, or to prevent the employment, as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of this Municipality.

Bonds for good conduct.

19. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited with the attorney or the banker of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Council Clerk forwarded.

20. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in this Municipality, under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

How books of account are to be kept and inspected.

21. The Treasurer shall keep such books of account, and such records, statements, and memoranda of receipts and expenditure, in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda, from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same; also, to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

Duties of Treasurer, &c.

22. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 21 of this part of these By-laws, and shall be responsible for the safe keeping of the same. Any other officer of the Council may have any other records thereof committed in his charge, by an order of the Council, and in such case, shall be responsible for the safe keeping of such records.

Special powers of Mayor.

23. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation or information is on record, as hereinbefore provided; or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the

giving of such explanation or information. All returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanations or information may, except as hereinafter provided, be either rendered *viva voce*, or put into writing, as the Mayor may direct.

How complaints against officers, &c., are to be dealt with.

24. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the Mayor, who, immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same. And if any such complaint be made to the Council, or to any member or officer thereof, it shall be referred to and investigated by the Mayor, before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by the Council; provided that every report, explanation, and information which may be made or rendered in reference to every such complaint shall be in writing, and such Mayor shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith. And such complaints, with all reports, explanations, and informations as aforesaid, in connection therewith, and the Mayor's statement as aforesaid, thereon, shall be laid before the Council at the next meeting thereof, which shall be holden after the Mayor shall have made such statement, and shall be duly recorded. Provided further, that nothing herein contained shall be held to affect in any way the special powers conferred on the Mayor by section 152 of the Municipalities Act of 1867, or any other special power which now is or hereafter may be conferred by statute on such Mayor.

Common Seal of the Council.

25. The Common Seal shall not be attached to any document without an express order of the Council. In every case where such Common Seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or in case of his absence or illness, by two Aldermen, and countersigned by the Council Clerk.

Impressions of Seal not to be taken, &c., without leave of Council. Penalties.

26. No member or officer of the Council shall be at liberty to take any impression of the Corporate Seal, or to show, lay open, or expose any of the books or records of the Council, to any person other than a member of the same, without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section, shall be liable on conviction, for the first offence, to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty of not less than one pound nor more than ten pounds; and for a third offence, and every subsequent one, to a penalty of not less than five pounds nor more than twenty-five pounds.

Records not to be removed, &c. Penalties. Exceptional circumstances. Receipt to be given in every case before document received. Records not to be removed. Proviso as to use of records as matters of evidence.

27. Any person removing any such book or record of the Council as aforesaid, from the Council Chamber, or the place where by direction of the Council, such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal, as hereinafter provided, shall for every such offence, be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid, and shall have not returned the same, to prosecution for stealing such book or record, or to an action at law for detention of the same, as the circumstances of the case may warrant. Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer, by the Mayor, in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform. Also, that the Mayor, or the Chairman of any Committee, or any Alderman acting for any such Chairman of any Committee, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit at law by, against, or at the instance of the Council. But in all such cases, such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed; and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed. And provided also, that the Mayor, Council Clerk, or other officer of the Council, who may be subpoenaed to

produce any book or other record of the Council in a Court of law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall before removing the same, leave at the Council Chamber a receipt for such book or other record as aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid, shall be legally responsible for the safe keeping and return of the same.

Penalty for defacing or destroying record.

28. Any person destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than five pounds nor more than fifty pounds.

SUPPRESSING OF NUISANCES, &c.

Dead animals, &c., not to be thrown into any water-course, &c.

29. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public water-course, drain, sewer, water-hole, river, creek, or canal, or shall permit or suffer any slops, or suds, or filth, to flow from his or her premises, over any of the footways, streets or roads, of this Municipality, or shall obstruct or divert from its channel any drain, sewer, or water-course, river, creek, or canal, shall, on conviction thereof, forfeit and pay a sum not exceeding one pound, and shall pay the cost of removing such filth or obstruction, or of restoring such drain, sewer, water-course, river, creek, or canal to its proper channel.

Swine not to be kept; or swine, horse, goat, &c., suffered to wander about the roads or streets, &c.

30. Any person who shall breed, feed, or keep, any kind of swine in any house, building, yard, garden, or other hereditament, situate and being in or within forty yards of any road, street, or public place in this Municipality, or shall suffer any kind of swine belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any such road, street, or public place, shall, on conviction thereof, forfeit and pay for such offence a sum not exceeding forty shillings.

Putrid carcass of any animal lying exposed in the Municipality without being removed or destroyed.

31. Any person who being the owner of the putrid carcass of any dead horse, bullock, cow, sheep, pig, goat, dog, or other animal, and shall allow the same to lie exposed within any part of this Municipality, and who shall not destroy by burning, or burying such putrid carcass under the surface of the ground, three feet at least, within twelve hours after due notice has been given him, shall, for the first offence, forfeit and pay a sum not exceeding twenty shillings,—for the second offence, a sum not exceeding forty shillings,—and for every subsequent offence, a sum not exceeding five pounds.

Throwing filth, &c., on public roads, streets, &c.

32. That if any person shall throw, deposit, place, or leave, or permit, or suffer to run or flow, any night-soil, offal, putrid meat or fish, or entrails of fish, carrion, dead animals, blood, dung, manure, oyster-shells, bones, broken glass, earthenware, or china, cut pieces of tin, zinc, hoop-iron, or sheet iron, dust, ashes, refuse of fruit or vegetables, or other offensive or dangerous matter or thing, or earth thrown out from excavations, into or upon any public thoroughfare, court, market, wharf, highway, or reserve within the said Municipality, or into any channel, drain, sink, creek, or water-course, or shall allow any such or any deleterious matter or thing whereby the health and safety of the inhabitants might be endangered, to accumulate or remain on any private premises, land, or property within this Municipality, every person so offending shall, for such offence, forfeit and pay a sum not exceeding forty shillings.

Hog-sties, privies, or other matters, becoming a nuisance.

33. In case any privy, hog-sty, or any other matter or thing whatsoever, shall at any time be or become a nuisance, by causing unwholesome smells to arise within any part of this Municipality, it shall be lawful for any two Justices, upon complaint thereof by any person, to investigate such complaint, and to order that such privy, hog-sty, boiling-down establishment, or other matter or thing, being a nuisance as aforesaid, to be cleansed, removed, or discontinued, as the case may be, within seven days after such order has been made, and notice given to the owner or occupier of the premises whereon such nuisance shall exist; and every such owner or occupier neglecting to remedy or remove such nuisance pursuant to such notice or order; and to the satisfaction of such Justices, shall forfeit and pay a sum not exceeding ten pounds for every such neglect or disobedience; and also, it shall be lawful for such Justices to indict, or cause to be indicted, for such nuisance, such person or persons so neglecting or disobeying any such notice or order, at the then next Court of General Quarter Sessions to be held nearest to this Municipality; and the person or persons found guilty shall be subject to said punishment, and to such further order as the Justices assembled at such Sessions shall lawfully decide.

Ferocious dogs or bitches on public road or street, &c.

34. That if any person shall permit or suffer to be at large, in any public thoroughfare, road, or street, market, wharf, highway, or reserve within this Municipality, any ferocious dog or bitch not being muzzled, or if any person shall, after public notice given by the Mayor or his deputy, directing dogs to be confined on suspicion of canine madness, permit or suffer any dog or bitch to go at large, or if any dog or bitch otherwise quiet shall at any time run after and annoy any person on foot or on horseback, or in any vehicle, so as to cause alarm and danger, then the owner of such dog or bitch shall, for such offence, forfeit and pay a sum not exceeding five shillings,—and for the second offence pay a sum not exceeding ten shillings,—and for every subsequent offence, pay a sum not exceeding forty shillings.

Furiously riding or driving horses, &c.

35. That if any person riding or driving any horse, mule, or other animal harnessed to any dray, cart, waggon, buggy, gig, truck, or other carriage or vehicle, or shall within this Municipality, ride or drive the same furiously so as to create alarm and danger to the public, or to endanger the safety of any person on any public thoroughfare in this Municipality, every person so offending shall for such offence forfeit and pay a sum not exceeding ten pounds nor less than two pounds.

Cattle, &c., not allowed to go about roads, streets, &c.

36. It shall not be lawful for any person whomsoever to suffer any kind of cattle, horse, ass, mule, sheep, swine, or goat, belonging to him or her, or under his or her charge, to depasture, stray, or go about, or to be tethered or depastured in any street, road, or public place within this Municipality; and any person who shall so offend, shall forfeit and pay, in respect of every such offence, any sum not exceeding two pounds nor less than five shillings.

Indecent exposure.

37. It shall not be lawful for any person to bathe in any waters exposed to public view from any road, street, or public place within this Municipality, between the hours of six a.m. and eight p.m.; and every person who shall indecently expose himself or herself, by bathing as aforesaid within the prohibited time herein mentioned, shall on conviction forfeit and pay any sum not exceeding one pound.

Carrying meat for sale uncovered.

38. Every person who shall carry or convey, or cause to be carried or conveyed in any road, street, or public place in this Municipality, the carcass, or any part of the carcass of any newly-slaughtered animal, without a sufficient and proper cloth covering the same for the concealment from public view, or shall hawk or carry about butchers' meat for sale, without covering the same as aforesaid, shall on conviction for every such offence, pay a penalty not exceeding two pounds.

Blacksmith's furnace.

39. Every blacksmith, whitesmith, nail-maker, metal-founder, lime-burner, brick-maker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any road, street, lane, or passage, and not closing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture or placing a screen before the same every evening, within one hour after sunset, so as to effectually prevent the light from showing through the doorway, window, or aperture, next or upon such road, street, lane, or passage, shall, upon conviction for every such offence, pay a penalty not exceeding two pounds.

Coach, cart, waggon, dray, &c., lying on road, streets, in this Municipality.

40. Any person who shall set or place, or shall set out, lay or place, or shall cause or procure, permit or suffer to be set out, laid or placed, any coach, cart, wain, waggon, dray, wheelbarrow, hand-barrow, sledge, truck, or other carriage, upon any road, street, or carriage-way within this Municipality, or shall set out, lay and place, or shall cause or procure, permit or suffer to be set out, laid or placed, any coach, cart, wain, waggon, dray, sledge, truck, wheelbarrow, hand-barrow, or other carriage, upon any such road or carriage-way, except for the necessary time of loading or unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage, or if any person shall set or place, or cause to be set or placed in or upon any road, street, or carriage-way within this Municipality, any timber, stones, bricks, lime, or other materials or things for building whatsoever, unless the same shall be enclosed, or shall set or place or cause to be set or placed, any plough, harrow, or other farming implements, upon any road, street, or carriage-way of this Municipality, and shall not immediately remove all or any such matters or things, after notice being served upon him or her, shall upon conviction for

every such offence, forfeit and pay for the first offence a sum not exceeding two pounds nor less than five shillings.

Obnoxious weeds.

41. Any person allowing the weeds known as the Bathurst burr, or Scotch thistle, or other noxious weed, to grow upon his or her land, and failing to destroy the same within three days after due notice from the Council has been served upon the owner or occupier of such land, shall forfeit and pay a sum for such offence, not less than ten shillings nor more than five pounds.

INJURIES TO ROADS OR STREETS.

Drawing timber, stones, on roads, streets, &c., not suspended or placed from wheel carriage. Overloading drays, &c. Penalties.

42. If any person shall draw any timber, stone, or water-cask, or other weighty matter, on or along any road, street, or highway maintained at the cost or being under the control and management of this Municipality, without the said articles being placed upon or suspended from a wheeled carriage proper for the purpose, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street, road, or public place, to the injury of the same, or shall lock or cause to be locked the wheel or wheels of any timber-carriage or other vehicle, or shall so overload his dray, cart, or other vehicles, so that an injury be caused to the said road, shall, for such offence, forfeit and pay the fine or sum of forty shillings.

Obstructing roads by falling timber, &c., or opening drains. Removing turf, gravel, stone, or other material, without leave from the Council.

43. Any person who shall dig or open any drain, or who shall cause any obstruction by falling trees or other materials in any road, street, or thoroughfare, or who shall remove from the banks of any creeks or river, or other lands over which the Council may have control, any turf, gravel, stone, or other material, without leave in writing first obtained from the Council, shall, on conviction before any Justice of the Peace, forfeit and pay, for every such offence, any sum not exceeding five pounds, nor less than one pound.

Destroying any shrub or tree, fence, gate, buildings, &c., on roads, streets, &c. Penalties.

44. Any person who shall wilfully destroy or damage any shrub or tree growing on any street, thoroughfare, or other place within this Municipality, or shall injure any hedge or fence, gate, building, in such street, thoroughfare, or other public place, or shall cut or remove any timber from any such street, thoroughfare, or other public place as aforesaid, shall, on conviction thereof, forfeit and pay for every such offence any sum not exceeding five pounds.

MISCELLANEOUS REGULATIONS.

Proprietor or driver of omnibus, coach—pay license.

45. Each proprietor or driver of every omnibus, coach, or other vehicle plying within this Municipality, shall pay to the Council thereof the charge or sum mentioned in the schedule hereunto annexed marked A.

Bakers, butchers, carriers, &c., pay license.

46. Each proprietor or driver of every butcher's, baker's, fruit and vegetable, fish, or other cart, plying within this Municipality, shall pay to the Council thereof the charge or sum mentioned in the schedule hereunto marked A.

License for power of plying within the Municipality.

47. Any person holding an authority or license from the Council as such proprietor, according to the form marked B, shall be permitted to ply within this Municipality, for the term therein mentioned, but it shall not be lawful for any person to ply as aforesaid until having obtained the said authority or license so to do. The said sum or charge for any vehicle shall be paid in advance for the year commencing on the first Tuesday of February, and ending on the last day of the municipal year, or rateably according to the date of such authority or license; and the production of such authority, license, or receipt, shall free the vehicle mentioned therein from all other charges by the Council, except fines and tolls, during the current year or the period therein specified.

Penalties for plying without license first obtained.

48. The driver of every such omnibus, coach, cart, or other public vehicle plying within this Municipality, shall, previous to doing so, pay into the said Council the said charge or sum therein provided in schedule marked A. And any person found plying in any vehicle within this Municipality without first having paid the said sum or charges, shall forfeit and pay, for every such offence, any sum not exceeding one pound nor less than ten shillings,—and in case of a second conviction within six months, not less than one pound.

SCHEDULE OF CHARGES.

A.

	s.	d.
For every vehicle plying within the Municipality, having four wheels, per annum	10	0
For every vehicle plying within the Municipality, having two wheels, per annum	5	0

SCHEDULE B.

License and certificate of payment for public vehicles. Municipality of Numba.

The undersigned do certify, that _____ of public vehicle No. _____, has paid unto the Council of this Municipality the sum of £ _____ for permission to ply within this Municipality for the period of _____ from the date hereof, and that the said _____ is hereby authorized and entitled to ply with the said vehicle within the limits of the said Municipality, for the period above stated.

Registered,

Council Clerk.

Mayor.

Approve of sites for slaughter-houses, &c.

49. The Council of this Municipality may appoint houses and places for the slaughtering of cattle and other animals, in such place or places as the said Council shall approve.

Cleanliness as to slaughter-houses, &c. Penalties.

50. Any officer of the Council shall be at liberty, at all times during the day, to enter such house or premises for the purpose of inspecting the same with reference to its cleanliness, and also all cattle slaughtered or intended to be slaughtered in such house or premises. And the owner or occupier of such house or premises who shall neglect to keep such house or premises in a clean and wholesome state, or shall refuse to admit the said officer for the purpose aforesaid, shall, for every such offence, on conviction thereof, forfeit and pay the sum of not more than two pounds.

Slaughtering infectious cattle.

51. Any person who shall knowingly slaughter, for human food, any animal infected with any disease affecting the milt or spleen, or shall offer or expose for sale any such animal or part thereof, or any animal which shall, after being slaughtered, be found to be so diseased, shall, on conviction thereof, forfeit and pay, for every such offence, any sum not exceeding fifty pounds nor less than ten pounds.

Estimates.

52. No work affecting the expenditure of the funds of the Municipality shall be undertaken until an estimate of the expense shall have been laid before the Finance Committee, reported thereon at the next meeting, and approved of by the Council.

Inspection of Works.

53. A Committee or Surveyor shall in all cases be appointed to inspect the work performed as soon as completed, and on the written approval of such Committee or Surveyor, the same shall be paid for.

Special Powers as to repairs on roads, &c.

54. The Mayor and any two Aldermen, or in the absence of the Mayor from the Municipality, any three Aldermen may, in writing, order any sum not exceeding £20 to be expended in repairing any public work under the control of the Council, which may be suddenly damaged: Provided that it shall appear to them that such repairs cannot be delayed until the next sitting of the Council, and they may appoint a proper person to execute such repair: Provided, always, that the making of such order shall be reported at the next meeting of the Council: And provided also, that no more than one such order shall be made between the termination of one meeting and the commencement of another.

COLLECTING AND ENFORCING PAYMENT OF RATES.

Limits as to payment of Rates, yearly or half-yearly.

55. The rates of this Municipality shall be levied and collected yearly or half-yearly as the Council shall deem fit; and, in the case of yearly collections, such rate shall be payable on or before the first Tuesday of August, and in the case of half-yearly payments, shall be payable on or before the first Tuesday of August and the first Tuesday of February, in each municipal year.

Office hours and days for attendance of Council Clerk.

56. All persons liable to pay any rates or assessments shall pay the same within the time prescribed by law, to the Council

Clerk, at the Municipal Chamber, Numba, during office hours, that is to say, between the hours of 10 o'clock a.m. and 4 o'clock p.m., on Mondays and Fridays in each week.

Council Clerk to report defaulters.

57. It shall be the duty of the Council Clerk to furnish the Council with a list of the names of all persons whose rates are unpaid at the expiration of thirty days from the time of notice prescribed by the Act; and the Mayor of the Municipality shall take immediate proceedings authorized by law, against all defaulters reported to the Council, in the manner aforesaid.

BAILIFF AND HIS DUTIES.

Appointment—find sureties.

58. The Bailiff shall be appointed by the Mayor and Council, and shall find two sureties to the extent of ten pounds each for the faithful performance of his duty, such sureties to be approved of by the Mayor.

Levies and distress. Bailiff's fees.

59. The Bailiff shall make all levies and distress for the recovery of rates under warrant in the form of the Schedule A in Municipalities Act of 1867, under the hand of the Mayor, or any Alderman who may for the time being be duly authorized to perform the duties of said office. The Bailiff shall be paid for every entry and levy made under these By-laws, according to the schedule B hereunto annexed.

Bailiff's powers. Sale by auction.

60. The Bailiff, and such assistants as he may take with him, shall enter into any part of the building or tenement in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of two days, it shall be lawful for the Bailiff to sell the goods so distrained, or a sufficient portion thereof, and if the party distrained upon shall so require, by public auction, either on the premises or at such other place within the Municipality as the Bailiff may think proper to remove thereto, such party consenting in writing to pay the charges of the auctioneer, if so sold; and the surplus, if any remain, after deducting the amount distrained for, together with the expenses attendant upon such distress and sale, shall be paid over to the owner of the goods so sold: Provided that nothing herein contained shall apply to the sale of any produce whatever, which may be growing upon the land at the time of making the distress: Provided always, that no distress shall be made on the goods of any casual visitor, or on the goods of any lodger in any house or apartment ordinarily let or used as a lodging house or apartment.

Inventory taken. In case of no person present. Posting same on some conspicuous place.

61. At the time of making a distress, the Bailiff shall make out a written inventory, in the form of the schedule hereto annexed and marked with the letter C, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person for his or her behalf, resident at the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then said inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made.

Impounded on premises where rates are chargeable.

62. The Bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such place or part of the land or premises chargeable with the rate as shall be most fit or convenient for this purpose; and it shall be lawful for any person whatsoever, after the expiration of the two days hereinbefore mentioned, to come and go to and from such place or part of the land or premises where any distress shall be impounded, in order to view and buy, and in order to carry off and remove the same on account of the purchase thereof.

Owner may direct the order for sale.

63. The owner of any goods so distrained upon, may at his or her option, direct and specify the order in which they shall be offered for sale; and the goods and chattels shall, in such case, be sold according to such directions.

Bailiff hand proceeds of sale to Council Clerk or Treasurer.

64. The Bailiff shall hand over to the Council Clerk or the Treasurer all proceeds of such distress, immediately after having received the same, with the particulars of the goods so distrained, and of the sale thereof.

Bailiff to appoint a deputy. Sanction of Mayor.

65. The Bailiff, with the sanction of the Mayor of this Municipality, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the Bailiff himself; but the Bailiff and his sureties shall in every case be held responsible for the acts of his deputy.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Municipality of Numba, do hereby authorize you, _____, the Bailiff of the said Municipality, or your deputy, to distrain the goods and chattels in _____, of _____, situate at _____, for _____, being the amount of rates due to this Municipality, to the day of _____, for the said _____, and to proceed thereon for the recovery of the said rate according to law.

Rate, £ _____
 Warrant _____
 Levy _____
 Dated this _____ day of _____ A.D. 18 _____
 To _____ Mayor.

SCHEDULE B.

Municipality of Numba.

Fees of Bailiff—	s.	d.
For making every entry or inventory in the execution of distress warrants.....	5	0
If in possession more than five hours, additional	5	0
And for every subsequent day whilst in possession	5	0
And 5 $\frac{1}{2}$ cent on the net amount of sale.		

SCHEDULE C.

Municipality of Numba.

I have this day, in virtue of a distress warrant under the name of the Mayor of this Municipality, dated _____, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of _____, situate at _____, within the said Municipality of Numba, for the sum of _____, being the amount of rates due to the said Municipality, to the _____ day of _____, A.D. 18 _____.

Bailiff.

Penalties.

66. All penalties imposed under these By-laws may be sued for and recovered in a summary way, by distress and sale of the offender's goods, before any two Justices of the Peace, according to the provisions of the Act 14 Victoria, No. 43, and the Acts therein adopted; and all such penalties, when recovered as aforesaid, shall be paid into the corporate fund of the Municipality; and no person shall be liable to any penalty, fine, or forfeiture under these By-laws, unless proceedings in respect thereof be commenced within six months after the same shall have been incurred.

67. Every person committing a breach of any provision of any By-law hereinbefore mentioned, shall, when no specific penalty shall have been provided for such offence, be liable to a penalty not exceeding twenty pounds.

Made and passed by the Council of the Municipal District of Numba, this twenty-fourth day of June, in the year of our Lord one thousand eight hundred and sixty-nine.

HENRY GORDON MORTON,

Mayor.

JOHN BINDON,
 Council Clerk.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF REDFERN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 26th May, 1869.

BOROUGH OF REDFERN.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Redfern, to regulate their own proceedings—for the collection and enforcement of rates—for preventing and extinguishing fires—for the suppression of nuisances—for the care and management of the public roads and streets—for licensing vehicles plying for hire—and for the general good government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BOROUGH OF REDFERN.

BY-LAWS.

BY-LAWS for regulating the proceedings of the Council of the Borough of Redfern—for the collection and enforcement of rates—for preventing and extinguishing fires—for the suppression of nuisances—for the care and management of the public roads and streets—for the licensing vehicles plying for hire, and general good government of the Municipality; and that the By-laws made and passed by the Municipal Council, under the Municipalities Act of 1858, sections 72 and 73, so far as the same may now be in force, shall be and the same are hereby repealed, and in lieu thereof the following shall be the By-laws of the Borough of Redfern.

No. 1.

General duties of the Mayor or Presiding Alderman.

1. The Mayor or Presiding Alderman shall preserve order, and his decision on all disputed points shall be final; but he is to state his decision without argument or comment.
2. The Mayor or Presiding Alderman may take part in all the proceedings of the Council.
3. The Mayor or Presiding Alderman shall put all questions, and declare the sense of the Council thereon.
4. If two or more members rise to speak at the same time, the Mayor or Presiding Alderman shall decide which member is entitled to pre-audience.
5. The Mayor or Presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question (except in explanation and without introducing any new matter). The member introducing a motion to have the right of reply; and every member shall have the liberty of speaking once on every amendment, as well as on the original motion.
6. The Mayor or Presiding Alderman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

Meetings.

7. The Council shall meet for the dispatch of business at the hour of seven p.m. on every alternate Friday, unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.
8. If the Mayor be not present within thirty minutes after the time appointed for the meeting of the Council, an Alderman shall be elected Chairman for the time being.
9. In the event of a quorum not being present at such meeting within half an hour after the time appointed, the names of the Aldermen present shall be entered in the minute-book by the Council Clerk, and each Alderman absent shall pay a fine of five shillings, such fine to be remitted only in the case of illness or other cause deemed sufficient by a majority of the Council at the next meeting.
10. In the months of March and September in each year, the Mayor shall lay before the Council, for its adoption, the Treasurer's account for the previous half-year, duly audited, but should any Auditor not attend for the purpose of auditing the accounts, when required by authority of the Mayor to do so, or refuse to certify to the correctness of the account, unless he can prove to the satisfaction of the Council that the account is incorrect, he shall pay a fine of ten pounds, to be recovered in a summary way before any two Justices of the Peace, the said fine to be carried to the credit of the Municipal funds.
11. The first business at every regular meeting of Council shall be the reading, confirmation, and signing the minutes of the proceedings of the last preceding meeting.
12. After the minutes of the last preceding meeting are signed, reports from Committees shall take precedence of any other business, but shall not be considered or adopted without due notice thereof.
13. The presentation of petitions and reading of correspondence shall be next in order of business after the consideration of reports.
14. Every member shall stand when speaking, and shall address the Chair.
15. Whenever any matter of order arises it shall be taken into immediate consideration.

16. No member shall deviate from the subject under debate, or make personal reflections upon any other member.

17. No member shall speak on any motion or amendment longer than ten minutes, without the consent of the Council.

18. When any member shall make use of any expression capable of being applied offensively to any other member, the offending member shall be required by the Mayor or Presiding Alderman to withdraw the expression, and make a satisfactory apology to the offended member and Council.

19. A debate may be adjourned to a later hour of the same day or to another day specified.

20. The member upon whose motion any debate shall be adjourned, shall be entitled to pre-audience on the resumption of the debate.

21. The Council shall vote by show of hands, but any Alderman may divide the Council on any question, both in full Council or in Committee of the Whole, in which case every Alderman there present shall be compelled to vote; and all divisions shall be entered in the minute book.

22. Any member may require the question under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member whilst speaking.

23. After the presentation of reports and petitions, the reading of correspondence and the reception of notices of motions shall take precedence of all other business of the day.

24. Any number of amendments may be proposed on a motion before the Council, and, if seconded, the question shall first be put on the last amendment, and then on the next preceding amendment, and so on in the inverse order in which they are moved, except when such motions or amendments shall relate to financial matters, in which case the lowest sum shall be put first, and so on to the highest.

25. Any motion for adjournment, if seconded, shall be immediately put without discussion, but if such motion be negatived it shall not be competent for any member to make a like motion until the lapse of half an hour.

26. No notice shall be taken by the Mayor or Presiding Alderman of any motion unless it be seconded.

27. All notices of motion shall be in writing, dated and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall not be withdrawn from the business paper without the leave of the majority of the Council.

28. No motion, the effect of which, if carried, would be to rescind any motion which has already passed the Council, shall be entered on the business paper, unless a "Call of the Whole Council" has been duly made and granted for that purpose.

29. A call of the Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Petitions.

30. On the presentation of a Petition, no debate shall take place until notice has been given in the usual manner; and the only question that can be entertained by the Council, on the day of its presentation, shall be that the Petition be received, or that it be referred to a Committee.

31. It shall be required of any Alderman presenting a Petition, to acquaint himself with the language thereof, and report to the Council that he considers it unobjectionable.

32. All Petitions to be received only as the Petition of the parties signing the same.

Committees.

33. Besides such Special Committees as may from time to time be found necessary, there shall be two Standing Committees, namely,—a Finance and an Improvement Committee. The Standing Committees shall be appointed by resolution of the Council, within thirty days after the election of the Mayor for the municipal year.

34. The By-laws, as to the proceedings of meetings of the Council, shall be observed in a Committee of the Whole Council, except the rule limiting the times of speaking.

35. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, and such Chairman may direct the Council Clerk to call meetings whenever he shall think it expedient.

36. Every Report of a Committee shall be signed by the Chairman thereof.

37. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee and reported on by them before any warrant shall be issued for the payment thereof: Provided that, in cases of emergency, the Mayor, with the assent of any three Aldermen of different Wards, may authorize the expenditure of any sum not exceeding thirty pounds, and such expenditure shall be reported to the Council at its next sitting.

38. No officer or servant appointed by the Council shall be at liberty to shew, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without leave from the said Council, except as provided by law.

No. 2.

Collection and enforcement of Rates.

1. All rates made and authorized by the Council shall be paid half-yearly, within the time prescribed by law, at the Municipal Council Chambers, George-street, Redfern, during office-hours, on Mondays, Wednesdays, and Fridays, between the hours of 10 o'clock a.m. and 4 o'clock p.m.

2. The Council Clerk shall prepare, every half-year, a list of the names of all persons whose rates are unpaid on the thirtieth day of June and thirty-first day of December, and the Mayor of the Borough shall take immediate proceedings, either by summons or by the issue of distress warrants, against all defaulters.

3. The Bailiff shall be appointed by the Council, and shall give such security as they shall approve for the faithful performance of the duties of such office.

4. The Bailiff shall make all levies and distresses for the recovery of rates under the warrant of the Mayor, such warrant to be made in accordance with the form in the Schedule hereto annexed marked A.

5. The Bailiff shall be paid for entry and levy made under these By-laws, according to the annexed Schedule marked B.

6. At the time of making a distress, the Bailiff shall forthwith make out a written inventory, in the form or to the effect of the Schedule annexed hereto marked C, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident in the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress has been made, and the Bailiff shall deliver a copy of such inventory to the Council Clerk of the Borough for the information of all parties concerned.

7. It shall be lawful for the Bailiff, and such assistants as he may require, to enter into any part of the land, building, tenement, or other property, in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof; and if the sum for which distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Borough as the said Bailiff may think proper to remove them to for such purpose, and the surplus (if any) that may remain after deducting the sum distrained for, together with the expenses attendant upon such distress, shall be paid over, on demand, to the owner of the goods so sold: Provided always, that nothing herein contained as to the time of sale shall apply to any crop of cereals, fruit, or vegetables which may be growing at the time when such distress shall be made.

8. The Bailiff, when making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate, as shall be most fit and convenient for such purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

9. The owner of any goods so distrained upon may, by writing, direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale according to such direction.

10. The Bailiff shall hand over to the Council Clerk all proceeds of such distresses as soon as possible after such sale; also, the copy of every inventory and account of every such sale or sales.

11. The Bailiff, with the sanction of the Mayor, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the Bailiff himself; but the Bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

SCHEDULE A.

Warrant of Distress.

I, _____ Mayor of the Borough of Redfern, do hereby authorize you _____ Bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of _____ situate at _____ for the sum of _____ being the amount of Municipal rates due to the said Borough to the _____ day of _____ for the said dwelling-house, land, or premises, as the case may be, and to proceed thereon for the recovery of the said rates according to law.—Dated this _____ day of _____ 18 _____

Mayor.

SCHEDULE B.

Fees of Bailiff.

	s.	d.
1. For making every entry and inventory in the execution of the warrant	3	0
2. If in possession more than five hours	5	0
3. For every other day or part of a day	5	0

And five per cent. on net amount of sale.

SCHEDULE C.

Inventory.

I HAVE this day, in virtue of a warrant under the hand of the Mayor of the Borough of Redfern, dated _____, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of _____ situate at _____ within the said Borough, for the sum of _____ being the amount of rates due to the said Borough to the _____ day of _____ 186 _____.

Bailiff.

No. 3.

Preventing and extinguishing Fires.

1. No householder shall place, or knowingly permit to be placed, in any house, yard, workshop, out-office, or other premises, fire, powder, or combustible materials of any kind, in such a manner as to endanger contiguous buildings.
2. The Inspector of Nuisances, upon the representation of any person that fire is being used to the danger of contiguous buildings, shall cause the same to be removed immediately.
3. In cases where fire shall take place, it shall be lawful for the Mayor to allow one pound for the first load of water, and fifteen shillings for the second load, to be used for extinguishing the said fire.

No. 4.

Suppression of Nuisances.

1. No householder or resident in the Borough shall be allowed to permit his or her premises, yards, closets, or drains, to be offensive or a nuisance to the adjoining householders or residents.
2. No noisome or offensive trade shall be permitted to be carried on in any premises to the inconvenience of the residents of adjoining or other houses.
3. Upon complaint being lodged at the Council Chambers that the yard, closets, or drains of any premises is or are a nuisance or offensive, and after inspection such shall be found to be the case, notice shall be given in writing to the proprietor or tenant of such premises to remove or abate such nuisance within twenty-four hours after such notice; and, if after such notice the nuisance shall not be removed or abated, the proprietor or tenant of the said premises shall be liable to a penalty not exceeding forty shillings nor less than five shillings.
4. Upon complaint being lodged at the Council Chambers the Inspector of Nuisances may, at all reasonable hours, with or without assistants, enter into and inspect any building, stall, or place kept or used for the sale of butchers' meat, and examine any carcase, meat, flesh, or fish which may be therein; and in case any of such articles shall appear to him to be intended for human food but unfit, the same may be seized by him; and if it shall appear to a Justice of the Peace, upon competent evidence, to be unwholesome, he shall order it to be destroyed; and the owner thereof, or person in whose custody it was found, shall be liable to a penalty not exceeding forty shillings nor less than ten shillings.
5. Any person who shall breed, keep, or feed any kind of swine in any house, building, yard, garden, or other hereditament, situate and being in, or within forty yards of, any street or public place in the said Borough, or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any such street or public place, shall, on conviction, forfeit and pay for such offence a sum not exceeding forty shillings, nor less than ten shillings, for every such offence.

No. 5.

Care and management of the Public Roads and Streets.

1. In any street or road where it may be deemed necessary to alter the level more than one foot, the Council shall cause a plan, and section, shewing the proposed cuttings and fillings, to be exhibited at the Council Chambers for fourteen days, for the information and inspection of ratepayers, and notify the same in one or more of the daily papers.
2. At a subsequent meeting of the Council the said plan and section shall be adopted by the Council and signed by the

Mayor and the proposer and seconder, and be counter-signed by the Council Clerk: Provided no valid objection has been lodged within the time specified.

3. No person shall be permitted to erect any house, shop, or other building, in any street, lane, or place in the Municipality, without first serving notice, in writing, on the Mayor or Council Clerk, on any lawful day, between the hours of 10 a.m. and 4 p.m., stating such intention, and describing the proposed situation of the building or erection, and without having received an authority from the Mayor or Council Clerk, who will give the required level and alignment, if in a proclaimed street, on payment of a fee of five shillings.

4. No person shall be at liberty to encroach beyond the building-line in any street or lane, by the erection of houses, verandahs, door-steps, fences, or any other obstruction whatever.

5. All proprietors of houses within the Municipality, having a frontage to any main thoroughfare, shall be bound to have the same sufficiently spouted with down pipe, to be carried under the surface of the foot-path into the gutter.

6. No person shall be allowed to throw rubbish, sweepings, dead fowls or other animals, or deposit of any kind whatever, on the streets, pathways, or channels.

7. No driver, carter, or other person shall wilfully or negligently do or suffer or cause to be done any damage or injury to the kerb-stones, gutters, or pathways of any street or roadway; and no person shall be at liberty to drive a wheeled vehicle of any kind, or horses or carts, on the footways.

8. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove loam, sand, or gravel from any of the streets or roads of the Municipality, without the authority of the Mayor, in writing, and counter-signed by the Council Clerk; and for such authority a fee of one shilling and sixpence must be paid.

9. No person shall be allowed to place on the streets or pathways building materials otherwise than is absolutely necessary, and by the sanction in writing of the Mayor or Council Clerk; and no person shall be allowed to leave water-holes or excavations for cellars, or other purposes, unfenced, or in such a manner as to be dangerous to passers-by; and all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise; and for such sanction being given a fee of one shilling and sixpence must be paid.

10. No person shall place or expose for sale on the pathways or streets, carts, goods, parcels, or produce of any kind whatever to the obstruction of the public.

11. No goats or dogs shall be permitted to be used as animals of draught in the streets or thoroughfares of this Municipality.

12. Any person wantonly or maliciously breaking or injuring any lamp-post, or street name-plate, or extinguishing any light set up for public convenience, shall be liable to the penalty hereinafter mentioned.

No. 6.

Regulating and licensing Public Vehicles plying for hire within the Borough of Redfern.

1. The proprietor or driver of every omnibus, car, or other public conveyance plying for passengers within the Borough of Redfern, shall pay to the Treasurer or Council Clerk thereof, for the uses of said Borough, annually or rateably, the charge or sum mentioned in the Schedule hereunto annexed marked A.

2. Every person holding an authority or license from this Council as such proprietor or driver, according to the form annexed marked B, shall be permitted to ply for hire and carry passengers within the said Borough for the term therein mentioned; but it shall not be lawful for any person to ply for hire, or carry passengers as aforesaid, until having obtained the said authority or license so to do.

3. The said charge or sum for every such vehicle shall be paid in advance, commencing on the first Tuesday in February in every year, or rateably, according to the date of the said authority or license; and the production of such authority, license, or receipt shall free the vehicle numbered therein from all other charges by this Council, except fines and tolls, during the current Municipal year, or the period therein specified.

4. The driver of every such omnibus, coach, or other vehicle, plying for hire or carrying passengers within or through any part of this Borough, shall, previous to doing so, pay unto the said Council the said charge or sum therein provided; and any person found plying for hire, or carrying passengers in any vehicle, within this Borough (except in hackney carriages and other conveyances hired by an individual or party for an especial occasion, and who shall not take up or set down passengers during their route), shall forfeit and pay for every such offence any sum not more than one pound nor less than ten shillings; and, in case of a second conviction within six months, not less than one pound.

5. Every public vehicle, driven to or from any public stand for vehicles, now appointed by the Council of the City of Sydney, or which may be appointed by the Council of this

MUNICIPALITIES.—BOROUGH OF REDFERN—BY-LAWS.

Borough, or shall be employed in carrying passengers in or through this Borough, shall be deemed and taken to be a public vehicle plying for hire.

6. The Council of this Borough may appoint stands for public vehicles within their own boundaries, at such times and places as may be considered necessary by any resolution of Council, and may also, under any such resolution, regulate the time of starting of every such vehicle from any such public stand, on giving public notice thereof to the licensed drivers; and any person who shall offend against this or any other such regulation shall forfeit and pay for every such offence not more than forty shillings nor less than ten shillings.

SCHEDULE OF CHARGES.

A.	£	s.	d.
1st. For every vehicle plying for passengers, having four wheels,—rate per annum	3	0	0
2nd. For every vehicle plying for passengers, having two wheels,—rate per annum	1	10	0

SCHEDULE B.

License and Certificate of payment for Public Vehicles.

Borough of Redfern, 186 .

I, THE undersigned, do hereby certify, that _____ of the public vehicle number _____ has paid unto the Council of this

Borough the sum of £ _____ for permission to ply for hire and carry passengers within this Borough, for the period of _____ from the date hereof; and that the said _____ is hereby authorized and entitled to ply for hire, and to carry passengers in the said vehicle, within the limits of the said Borough, for the period above stated.

PENALTY.

For every offence against the provisions of these By-laws, except as otherwise provided, the offender shall be liable to and shall pay a penalty not exceeding five pounds nor less than five shillings, to be recovered in a summary way before any Justice of the Peace; and all other penalties and fines imposed by these By-laws, except as otherwise provided, shall also be recoverable in a summary way before any Justice of the Peace.

Made and passed by the Municipal Council of the Borough of Redfern, this 25th day of March, 1869,—

GEO. RENWICK,
Mayor.

W. S. WARDROP,
Council Clerk.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF SHELLHARBOR—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 30th July, 1869.

BOROUGH OF SHELLHARBOR.

BY-LAWS.

The following By-laws, made by the Council of the Borough of Shellharbor, for regulating their own proceedings,—the collection of rates,—for preventing cattle, &c., straying on roads and streets,—for preventing injury and obstruction to roads and streets,—for the suppression of nuisances,—for preventing the growth of weeds detrimental to good husbandry,—and for the management of the Shellharbor Jetty and Goods Store,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

WILLIAM FORSTER.

BY-LAWS of the Municipal Council of the Borough of Shellharbor, made at their meeting held on the 12th day of June, one thousand eight hundred and sixty-nine.

General duties of the Mayor.

1. The Mayor shall preserve order, and his decision on disputed points of order shall be final.
2. The Mayor may give notice of and move any resolution he may think proper, and shall, on all questions on which he shall vote as Alderman, have an opportunity of stating the reasons which influenced him in so doing.
3. When the Mayor is called upon to decide upon any point of order or practice, he shall state the rule applicable to the case, without argument or comment.
4. The Mayor shall put all questions, and declare the sense of the Council thereon.
5. If two or more members rise to speak at the same time, the Mayor shall decide which member shall be entitled to pre-audience.
6. The Mayor may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time upon the same subject, except in explanation and without introducing any new matter.
7. The Mayor shall, upon every motion made and seconded, put the question first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion, from the show of hands, which party has the majority.

General rules for the conduct of business.

8. The minutes of the proceedings of the Council shall be openly read at the commencement of each succeeding meeting, and after being confirmed by the meeting, shall be signed by the Mayor.
9. Reports from Committees shall be received before any other business, but shall not be considered or adopted without due notice thereof.

10. After the presentation of reports and petitions, the reading of correspondence shall take precedence of all other business of the day.

11. Every member shall stand when speaking, and shall address the Chair.

12. Whenever any matter of order arises, it shall immediately be taken into consideration.

13. Except in Committee, no member shall speak twice on the same question, unless in explanation where he has been misrepresented or misunderstood: Provided, however, that the mover shall be allowed to reply, and that every member shall have the liberty of speaking once on every amendment, as well as on the original motion.

14. No member shall digress from the matter under discussion, to make personal reflections on members, or to impute motives.

15. No member shall speak upon any motion or amendment for a longer period than fifteen minutes, without the consent of the Council.

16. When any member shall use an expression capable of being applied offensively to any other member, the member so offending shall be required by the Mayor to withdraw the expression, and to make a satisfactory apology to the Council; and in case he shall refuse so to do, he shall pay to the Council the sum of five pounds sterling, and a minute expressive of the Council's disapprobation shall be recorded against him. All fines to be paid to the Treasurer of the Council, for Municipal purposes only.

17. A debate may be adjourned to a later hour of the same day, or to another day which may be specified.

18. The member upon whose motion any debate shall be adjourned by the Council, shall be entitled to pre-audience on the resumption of the debate.

19. It shall be competent for any member to divide the Council on any question, both in full Council and in Committee of the whole Council; and, upon such divisions, those who are

on the affirmative side shall seat themselves on the benches on the right of the Mayor, and those on the negative shall seat themselves on the left hand; and no member shall leave his seat till the names of the members be taken down by the Council Clerk, or person officiating for him:

20. In all divisions of the Council, every member shall be compelled to vote; and all divisions of the Council shall be entered in the minute-book.

21. Any member may require the question or matter under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member while speaking.

Motions.

22. It shall be incompetent to give notice of motion for the rescinding of any resolution on the same day on which such resolution shall have been passed by the Council.

23. Any number of amendments may be proposed on a motion before the Council; and, when more than one amendment is moved and seconded, the question shall be first put on the last amendment, and then on the next to the last, and so on in the inverse order in which they are moved, except when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, and then the next lowest, and so on to the highest.

24. Any motion for adjournment, if seconded, shall be immediately put, without discussion; and, if such motion be negatived, it shall not be competent for any member to make a similar motion till half an hour at least shall have elapsed from the period of moving the one that has been negatived.

25. No notice shall be taken by the Mayor of any motion unless seconded.

26. The Council Clerk shall put every motion in writing, which shall be signed by the proposer and seconder; and every motion after being so seconded and read by the Council Clerk, shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

Petitions.

27. On the presentation of a petition, no debate shall take place until notice has been given in the usual manner, and the only question which can be entertained by the Council on the day of its presentation shall be, that the petition be received or that it be referred to a Committee.

28. It shall be incumbent upon any member presenting a petition, to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

29. All petitions shall be received as the petitions only of the parties signing the same.

Committees.

30. No Committee of the Council shall consist of less than five members, three of whom shall form a quorum.

31. The appointment of Special Committees shall continue until the specific duties for which they are appointed shall have been discharged, provided that such Committee may at any time be dissolved by a vote of the Council.

32. The rules of Council shall be observed in a Committee of the whole Council, except the rule binding the number of times of speaking.

33. Every report of the Committee shall be signed by the Chairman thereof.

Miscellaneous Regulations.

34. In case where security is required by the Municipalities Act of 1867, the sureties shall be approved of by the Council; and it shall not be competent to accept as surety any of its members, or any person holding office under the Council.

35. No work affecting the funds of the Council shall be undertaken until the probable expense be first entertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee, and reported on by them, before any warrant shall be issued for the payment thereof.

36. The Treasurer's accounts shall be laid before the Council by the Mayor at the first meeting of each quarter, or oftener, if required by the Council.

37. No officer appointed by the Council shall be at liberty to show, lay open, or expose, any books, papers, or records of the Council, to any person not a member of the Council, without leave of the Council, excepting as otherwise provided by law.

Collection of rates.

Every person who shall have been assessed, or who shall be liable to pay any rate or assessment, shall pay the amount of such rate or assessment to the Treasurer, or other person appointed, in accordance with notice, at such time and place as the Council may by any resolution appoint.

The Council Clerk shall prepare a list of the names of all persons whose rates are unpaid, when required by the Mayor, who shall, as soon as the necessary arrangements are made, proceed against such persons for the recovery of the rates and assessments then due and unpaid, either by summons or distress-warrant, as he may determine.

Bailiff and his duties.

The Bailiff shall be appointed by the Mayor, and shall give such security as he shall approve, for the faithful performance of the duties of his office.

The Bailiff shall make all levies and distresses for the recovery of rates under the warrant of the Mayor; such warrant to be made in accordance with the form in the schedule hereto annexed marked A.

The Bailiff shall be paid, for every entry and levy made under these By-laws, according to the annexed schedule marked B.

At the time of making a distress, the Bailiff shall forthwith make out a written inventory in the form or to the effect of the schedule annexed hereto marked C, which inventory shall be delivered to the occupant of the land or premises, or to the owner of the goods so distrained, or to some person on his or her behalf, resident in the place where the distress has been made. And in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made; and the Bailiff shall deliver a copy of such inventory to the Council Clerk of the Borough, for the information of all parties concerned.

It shall be lawful for the Bailiff and such assistants as he may require, to enter into or upon any part of the land, building, tenement, or other property, in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof; and if the sum for which the distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful for such bailiff to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Borough as the Mayor may direct them to be removed to for such purpose; and the surplus (if any) that may remain after deducting the amount of the sum distrained for, together with the expenses attending such distress, shall be paid over on demand to the owner of the goods so sold; provided always, that nothing herein contained as to the time of sale shall apply to any growing crop or vegetables which may be growing at the time when such distress shall be made.

The Bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such place, or in such part of the land or premises chargeable with the rate, as shall be most fit and convenient for such purpose. And it shall be lawful for any person whomsoever, after the expiration of five days hereinbefore mentioned, to come and go to and from such place, or any part of the said land or premises where the distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same, on account of the purchaser thereof.

The owner of any goods so distrained upon, may by writing direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale according to such direction.

The Bailiff shall hand over to the Council Clerk all proceeds of such distress within three days, or at such earlier period as may be directed by the Mayor, after such sale; also, the copy of every inventory and account of every such sale or sales.

The Bailiff, with the sanction of the Mayor, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the Bailiff himself; but the Bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Borough of Shellharbor, do hereby authorize you _____, the Bailiff of the said Borough, or your deputy, to enter in and upon the land or premises, or into the dwelling-house of _____, situate at _____, and to distrain the goods and chattels you may there find, for the sum of _____, being the amount of rate or rates due to this Municipality, according to the schedule hereto annexed, for the said land or premises or dwelling-house; and to proceed thereon for the recovery of the said rate or rates, together with costs of the warrant and your authorized charges for taking, keeping, and selling the said distress according to law.

Given under my hand and the common seal of the Mayor and Aldermen of the Borough of Shellharbor aforesaid, at the Council Chamber, Shellharbor, this _____ day of _____, 18 _____

Mayor. [Seal.]

B. SCHEDULE OF FEES.

	£	s.	d.
For making every entry and inventory in execution of the warrant	0	5	0
If in possession more than five hours	0	5	0
For every other day or part of a day	0	5	0
And 5 per cent. on net amount of sale.			

SCHEDULE C.

Inventory.

I have this day, in virtue of a warrant under the name of the Mayor of the Borough of Shellharbor, dated _____, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of _____, situate at _____, within the Borough of Shellharbor, for the sum of _____, being the amount of rates due to the said Borough, to the day of _____, 18 _____.

Dated this _____ day of _____, 18 _____.

Bailiff.

By-laws for preventing cattle, &c., straying on roads and streets, for preventing injury and obstruction to roads and streets, for the suppression of nuisances, and for preventing the growth of weeds detrimental to good husbandry.

It shall not be lawful for any person whomsoever to suffer any kind of cattle, horse, mule, swine, sheep, or goats, belonging to him or her, or under his or her charge, to depasture, stray, or go about, or to be tethered in or on any street, road, or public place within the said Borough; and any person who shall so offend, shall forfeit and pay in respect of every such offence, any sum not exceeding two pounds nor less than five shillings.

It shall not be lawful for any person to remove any stone, sand, turf, clay, gravel, or other material, from any road, street, or public place within this Borough, without the authority of the Council; neither shall it be lawful for any person to place any timber or other material on any such road, or street, or public place, or to cause any obstruction whatever to any such road, street, or public place, or to ride or drive upon any foot-path, or to furiously ride, race, or drive any horse or other animal through, in, or upon any such road, street, or public place aforesaid, or to draw any timber, logs, or saplings, or any other materials or things, on any such road, street, or public place, unless such timber, logs, saplings, or other materials or other things are raised from the ground upon wheels.

Neither shall it be lawful for any person to lock the wheels of any kind of vehicle, upon any road, street, or public place within the boundary of the aforesaid Borough; and any person who shall offend against any of these provisions, shall forfeit and pay any sum not exceeding five pounds and not less than ten shillings.

In case any privy, hog-sty, boiling-down establishment, slaughter-yard, or any other place, matter, or thing whatsoever, which shall at any time be or become a nuisance, by causing unwholesome smells to arise within any part of this Borough, it shall be lawful for any two Justices, upon complaint thereof by any person authorized by the Shellharbor Council, to investigate such complaint, and to order that such privy, hog-sty, boiling-down establishment, slaughter-yard, or any other matter or thing being a nuisance as aforesaid, to be cleared or removed or discontinued, as the case may be, within fourteen days after such order has been made, and notice given to the owner or occupier of the premises whereon such nuisance shall exist; and every such owner or occupier neglecting to remove any such nuisance pursuant to such notice and order, and to the satisfaction of such Justices, shall forfeit and pay any sum not exceeding ten pounds nor less than twenty shillings for every such neglect and disobedience; and also, it shall be lawful for such Justices to indict or cause to be indicted for such nuisance, any such person or persons so neglecting or disobeying any such notice or order, at the next Court of General Quarter Sessions to be held nearest to the said Borough; and such person or persons being found guilty, shall be subject to such punishment and such further order as the Justices assembled at such sessions shall lawfully decide.

Any person who shall cast any filth or rubbish into any public water-course, or drain supplying water, or used for drainage, within this Borough, or shall obstruct or divert from its proper channel or course, any such water-course or drain, except under the authority of the said Council, shall, on conviction of any such offence, forfeit and pay any sum not exceeding five pounds nor less than twenty shillings; and any person or persons being convicted of any such offence, who shall fail to remove such filth or obstruction, or to restore such water-course or drain to its proper channel or connection, within seven

days from the date of such conviction, shall forfeit and pay any sum not exceeding fifty pounds nor less than twenty shillings.

It shall not be lawful for any person, being the owner, lessee, or occupier of any land within the aforesaid Borough, to permit to grow on any such land the weeds known as the Bathurst burr, Scotch thistle, wild cotton plant, or any other noisome weeds and every owner, lessee, or occupier of lands as aforesaid, who shall fail to extirpate or remove from any such land all or any of the aforesaid weeds or plants which may be growing thereon, within thirty days from the date of being ordered so to do by the aforesaid Council, shall, upon conviction of any such offence, forfeit and pay any sum not exceeding two pounds nor less than ten shillings.

By-laws and regulations for the management of the Shellharbor Jetty and Goods Store.

Any owners or masters, or person acting as such master, of steamers, or steamers' boats, that shall use the jetty or goods store for the purpose of loading or unloading, shall pay to the Shellharbor Municipal Council the sum of twenty shillings for each trip.

The master or owner of any sailing vessel that shall use the jetty or store for the purpose of loading or unloading, shall pay jetty dues according to the tonnage of such vessel, viz. :—

	s.	d.
For each trip, vessels under 20 tons burden	2	6
Do. over 20 and under 50 tons ...	5	0
Do. over 50 and under 100 tons	10	0

All jetty dues shall be paid to the Treasurer of the Municipal Council of Shellharbor, before vessels shall load or unload or break bulk; and, in default of owners or masters of vessels so making payment, they shall forfeit and pay a penalty of two pounds for each and every such offence.

The receipt of the Treasurer of the Shellharbor Municipal Council, shall be a sufficient discharge for claims for jetty and store dues.

The payment of the above-named dues shall be sufficient for the loading and unloading for one voyage.

The Treasurer shall keep a separate account of receipts and disbursements made on account of the jetty and store.

All jetty and store dues shall in no way be expended but for the purpose of keeping in repair such jetty and store, or for making such improvements thereto as may be deemed necessary.

No vessel shall be allowed to be made fast to the jetty by any lines, warps, or chains, but for the purpose of loading or unloading; and any person or persons in any way making fast vessels to the jetty, otherwise than for the purposes herein provided, shall, for each and every such offence, forfeit and pay a sum not exceeding twenty pounds.

The vessel first arriving in the harbor shall be entitled to precedence in the use of the jetty and store, and shall be loaded and discharged with all due despatch; and if any other vessel than that first arriving shall be requiring the use of the jetty, then the owner or master of the vessel first arriving shall haul off after having had the use of the jetty for a period of four hours; and the second or any vessel subsequently arriving shall, in like manner, be allowed a period not exceeding four hours, for the purpose of loading or unloading; and every master or owner of a vessel so refusing to haul off and not giving to the next vessel the free use of the jetty, after the expiration of four hours as herein provided, shall forfeit and pay a sum not exceeding ten pounds for each and every such offence.

Gunpowder or other explosive materials, vitriol or other such mineral acid, shall not be landed or stored, unless a plain brand or superscription showing what material the case or package contains, and the quantity therein, be appended thereto; and any person or persons offending by landing or storing any of the material or materials above named, otherwise than as herein provided, shall forfeit and pay, for each and every such offence, a sum not exceeding ten pounds.

Goods remaining in the store over a period of fourteen days shall be subject to a charge for storage, at the rate of five shillings per ton per week.

Made and passed by the Borough Council of Shellharbor, this 12th day of June, in the year of our Lord one thousand eight hundred and sixty-nine.

WILLIAM FRYER,
Mayor.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF St. LEONARDS—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 153.

Colonial Secretary's Office,
Sydney, 18th September, 1869.

BOROUGH OF St. LEONARDS.

BY-LAWS.

THE following By-laws made by the Council of the Borough of St. Leonards, to better enable them to collect their rates, and to delegate to their Council Clerk the powers conferred upon them by the 123th section of the Municipalities Act of 1867, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

JOHN ROBERTSON.

BOROUGH OF St. LEONARDS.

By-laws the better to enable the Municipal Council of the Borough of St. Leonards to collect their rates.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be payable by annual or half-yearly instalments, as the Council from time to time shall direct, and shall be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

2. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner and shall be held to be due and payable on and after such day or days as the Council may, by resolution, at the time of making or imposing such rates, or any of them, have appointed.

3. All persons liable to pay any rates as aforesaid shall pay the amount thereof within the time prescribed by the Act, into the office of the Council Clerk, during the office hours appointed by the Council by resolution from time to time for that purpose.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Enforcement by distress.

The Bailiff shall be appointed by resolution of the said Council, and shall be at any time removable by a like resolution.

The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of fifty pounds each, for the faithful performance of his duty.

It shall be the duty of the Bailiff to make all levies by distress, for the recovery of rates, in the manner hereinafter provided.

All levies and distresses shall be made under warrant, in the form of schedule A hereto, under the hand of the Mayor, or any Alderman who may for the time being be duly authorized to perform the duties of that office.

If the sum for which any such distress shall have been made shall not be paid, with costs as hereinafter provided, on or before the expiration of three days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises, or at such other place within the said Borough as the said Bailiff may think proper to remove them to, for such purpose; and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

At the time of making a distress the Bailiff shall make out a written inventory, in the form of schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress shall be made; and in case there shall be no person at such place, with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the rate-payer, on demand, at any time within one month after the making such distress.

The Bailiff, on making such distress as aforesaid, may impound, or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates, as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the three days hereinbefore mentioned, to come and go to and from such place, or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same, for the period of three days, on account of the purchaser thereof.

The owner of any goods or chattels so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods or chattels shall in such case, be put up for sale according to such direction.

The Bailiff shall hand over to the Council Clerk all proceeds of every such distress, within forty-eight hours after having received the same.

There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this by-law, the costs and charges in the Schedule hereunto annexed, marked C.

SCHEDULE A.

WARRANT OF DISTRESS.

I, _____, Mayor of the Borough of Saint Leonards, do hereby authorize you _____, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house of _____ situate at _____ for _____, being the amount of rates due to the said Borough, to the _____ day of _____ for the said dwelling-house, and to proceed thereon for the recovery of the said rates, according to law.

Dated this _____ day of _____ 18 .

Mayor.

SCHEDULE B.

INVENTORY.

I have this day, in virtue of the warrant under the hand of the Mayor of the Borough of Saint Leonards, dated _____, distrained the following goods and chattels in the dwelling-house of _____ situate at _____ within _____ of the said Borough for _____ being the amount of rates due to the said Borough to the _____ day of _____ 18 .

Dated this _____ day of _____ 18 .

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For making every entry and inventory in execution of warrant	3	0
If in possession more than five hours	5	0
For every other day, or part of a day	5	0
And five per cent. on the net amount of sale.		

Passed by the Municipal Council of St. Leonards, this thirteenth day of August, in the year one thousand eight hundred and sixty-nine.

WILLIAM TUNKS.

13th August, 1869.

GEORGE PILE, Junr., Council Clerk.

BY-LAW to delegate to the Council Clerk the powers conferred upon the Council by the 128th section of the Municipalities Act of 1867.

WHEREAS it is enacted by the 128th section of the Municipalities Act of 1867, that the Council of every Municipality shall alone, in and for such Municipality, have, exercise, and incur certain powers and obligations therein specified (provided that the said Council may by any by-law delegate all or any of the said powers to any officer of such Council) and as it is expedient that the Council Clerk of this Municipality should, in and for this Municipality, have, exercise, and incur such powers and obligations: Be it therefore enacted, that the Council Clerk of this Municipality shall, in and for this Municipality, have, exercise, and incur the powers and obligations conferred by the 128th section of the Municipalities Act of 1867, upon the Council.

Passed by the Municipal Council of St. Leonards, this thirteenth day of August, one thousand eight hundred and sixty-nine.

WILLIAM TUNKS.

13th August, 1869.

GEORGE PILE, Junr., Council Clerk.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF WOOLLAHRA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 2nd April, 1869.

BOROUGH OF WOOLLAHRA.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Woollahra, for regulating their own proceedings—for the protection of the funds and records of the Borough—for levying rates, &c.,—for regulating the roads and streets, and encroachments thereon, &c., &c.—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BOROUGH OF WOOLLAHRA.—BY-LAWS.

REGULATION OF PROCEEDINGS.

Days of ordinary meeting.

1. The Council shall meet on the second Tuesday in every month, at the hour of half-past seven in the evening, or at such other day and at such hour as may by resolution of the Council be from time to time appointed.

Course of procedure.

2. The following shall be the course of procedure at such meetings, viz. :—

1. The reading and confirmation of the minutes of the proceedings of the previous meetings.
2. Statement of accounts, showing the moneys received and paid since last meeting, with the balance in the Bank to the credit of the Municipality.
3. The presentation of reports and petitions.
4. The reading of correspondence.
5. Motions.
6. Such other business as may lawfully be brought before the Council.

Petitions.

3. All petitions shall be received as the petitions of the persons signing the same only; and it shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

Petitions and correspondence may be dealt with without previous notice.

4. The Council may at any meeting resolve, without previous notice, that any petition be received, and that the same, or any correspondence read, be referred to a Committee.

Mayor to preserve order.

5. The Mayor shall preserve order, and may at any time call to order any Alderman who may appear to him to be out of order.

Calls to order.

6. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

Mayor's decision on points of order final.

7. Every point of order shall be taken into consideration immediately upon its arising, and the decision of the Mayor thereon shall be conclusive.

Mayor may take part in proceedings.

8. The Mayor may take part in all the proceedings of the Council.

Questions put by Mayor.

9. The Mayor shall put all questions, first in the affirmative and then in the negative, and may do so as often as may be necessary to enable him to determine the sense of the Council thereon, and thereupon he shall declare his decision, which shall be final.

Mayor to decide as to pre-audience of Aldermen.

10. If two or more Aldermen rise to speak at the same time, the Mayor shall decide which of them shall be entitled to pre-audience.

No Alderman to speak twice on same question or amendment, except in Committee.

11. No Alderman shall speak twice on the same question, unless in Committee, or in explanation, where he shall have been misrepresented or misunderstood: Provided that any Alderman, although having previously spoken, may speak once on every amendment, and that the mover of every question shall always have the right of final reply.

No Alderman to make personal reflections.

12. No Alderman shall digress from the matter under discussion, or make personal reflections on, or impute motives to, any other Alderman.

No Alderman to speak for more than fifteen minutes.

13. No Alderman shall speak upon any motion or amendment for a longer period than fifteen minutes, without the consent of the Council.

Alderman using offensive expressions to apologize.

14. When any Alderman shall make use of any language or expression offensive, or capable of being applied offensively, to any other Alderman, the Alderman offending shall be required by the Mayor, or if in Committee, by the Chairman of such Committee, to withdraw such language or expression, and to make an apology satisfactory to the Council.

Debate may be adjourned.

15. A debate may be adjourned to a later hour of the same day or to another day.

Alderman adjourning debate entitled to precedence on resumption.

16. The Alderman upon whose motion any debate shall be adjourned shall be entitled to precedence on the resumption of the debate.

Any Alderman may divide Council.

17. It shall be competent for any Alderman to divide the Council on any question, both in full Council and in Committee of the whole Council; and upon such division those who are upon the affirmative side shall seat or range themselves on the right hand of the Mayor, and those who are on the negative side shall seat or range themselves on his left hand, and no Alderman shall leave his seat or place till the names of the Aldermen and how voting shall have been taken down by the Council Clerk, or person officiating for him.

Divisions to be entered on minutes.

18. All divisions of the Council shall be entered on the minutes of the proceedings.

Question to be read when required.

19. Any Alderman may require the question or matter under discussion to be read for his information, and upon such request the question or matter under discussion shall be read.

How amendments to be put.

20. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment shall have been moved and seconded the question shall first be put on the last amendment, then on the next preceding the last, and so on, in inverse order to that in which they shall have been moved, unless when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, then the next lowest, and so on to the highest.

Adjournments.

21. Any motion for adjournment, if seconded, shall be immediately put without discussion; but if such motion be negatived, it shall not be competent for any member to make a similar motion until thirty minutes shall have elapsed from the period of moving the motion which shall have been so negatived.

Motions must be seconded.

22. No notice shall be taken by the Mayor of any motion unless it be seconded.

Motions to be in writing, and not withdrawn without leave.

23. The Council Clerk shall put every motion into writing, which shall be signed by the mover; and every motion, when seconded and read by the Clerk, shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

Council Clerk to give notice of Committee meetings.

24. The Council Clerk shall give notice of the intended meetings of any Committee to the members thereof, whenever requested so to do by the Chairman of such Committee.

Duration of special Committee.

25. The appointment of special Committees shall continue until the specific duty for which they shall have been appointed shall have been discharged: Provided that such Committees may at any time be dissolved by vote of the Council.

Rules observed in Committee of the Whole, except &c.

26. The rules of the Council shall be observed in a Committee of the whole Council, except the rule limiting the number of times of speaking.

Report of Committee to be signed by Chairman.

27. Every report of a Committee shall be signed by the Chairman thereof.

Proceedings.—By-laws may be suspended on emergency.

28. Any of these by-laws, relating to or affecting proceedings at meetings of the Council, may be suspended *pro tempore* in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

PROTECTION OF FUNDS AND RECORDS.

Officer of Council may not be surety.

29. In cases where security is required by the Municipalities Act, it shall not be competent for the Council to accept as surety any of their members, nor any person holding office under the Council.

Expense of proposed works to be first ascertained—Accounts to be examined by Finance Committee.

30. No work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been previously ascertained by the Council; and all accounts to be paid by the Council shall be examined by a Finance Committee and reported on by them before any warrant shall be issued for the payment thereof.

Records, &c., to be kept private.

31. Excepting as otherwise provided by law, if any person shall, without the permission of the Council first had and obtained, shew, lay open, or expose any of the books, papers, or records of the Council to any person, not being a member of the Council, the person so shewing, laying open, or exposing the said books, papers, or records shall, on conviction thereof, forfeit and pay a penalty of not less than ten shillings nor more than five pounds, and on every subsequent conviction a penalty of not less than two pounds.

Custody of records, seal, &c.

32. The common seal and all charters, deeds, muniments, papers, and records of the Council shall be kept in the Council Chambers or office of the Council, in the custody of the Council Clerk, unless the Council shall otherwise order for any purpose; and the common seal shall not be used, except at a meeting of the Council and with the signature of the Mayor.

Records, &c., not to be defaced or altered.

33. Any person who shall deface, alter, or destroy, or attempt to deface, alter, or destroy any such common seal, charter, deed, muniment, paper, or record shall, on conviction thereof, forfeit and pay for the first offence a penalty not exceeding fifty pounds nor less than five pounds, and upon every subsequent conviction a penalty of not less than twenty pounds.

Nor removed.

34. Any person who shall remove or attempt to remove any such seal, charter, deeds, muniment, paper, or record from the Council Chamber, without leave from the Council first had and obtained, shall, on conviction thereof, forfeit and pay a penalty of not more than twenty pounds nor less than two pounds, and for every subsequent offence a penalty of not less than five pounds.

LEVYING RATES, &C.

Due dates for rates—Defaulters.

35. The rates and taxes levied by the Council shall be held to be due and payable on such day or days as the Council shall, by resolution, from time to time appoint. Every person not paying his or her rates or taxes at the office of the Council, or to the Council Clerk or other proper officer of the Council, within thirty days after any of the days so appointed for payment thereof, shall be deemed a defaulter: Provided that due notice of such rate shall have been given in manner as required by the Municipalities Act of 1867.

Council Clerk to furnish list of defaulters.

36. It shall be the duty of the Council Clerk to furnish the Mayor and Council, or any Committee as directed, with lists of all persons so in default.

Mayor to issue distress warrants.

37. It shall be the duty of the Mayor to issue and direct the enforcement of distress warrants against the goods, chattels, and effects of all such defaulters, as by resolution of the Council from time to time directed.

How distresses to be made.

38. All levies and distresses shall be made under warrant, signed by the Mayor, and all proceedings under or in respect of such distresses and warrants, and the sale of goods levied upon by virtue thereof, shall be the same as in distresses for rent under a lease or demise.

ROADS AND STREETS, AND ENCROACHMENTS THEREON, &C.

Who to mark out roads, &c.

39. The Surveyor of the Municipality, or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for marking out when and where necessary the roads, streets, lanes, and thoroughfares, which now are or shall hereafter be under or subject to the care, construction, or management of the Council. In marking out such roads, streets, lanes, or thoroughfares, recourse shall be had, when practicable, to the plans under which land with frontage to the road, street, lane, or thoroughfare in question shall have been sold. The Surveyor shall also be the proper officer for marking out, when deemed necessary by the Council, the carriage and footways in such roads, streets, lanes, or thoroughfares, or other public places; but it shall be sufficient for him, for this purpose, to place posts at the corners or intersections of the streets, roads, lanes, or thoroughfares, or wherever the same may be necessary or desirable, so as to give a width of forty-two feet for the carriageway and twelve feet for the footway on each side when the road, street, lane, or thoroughfare shall be sixty feet wide, and in proportion, and in the discretion of the said officer, in any public roads, streets, lanes, or thoroughfares, or other public places of other width than sixty-six feet.

No encroachment allowed on streets, &c.

40. Whenever any road, street, lane, or thoroughfare has been marked out in manner herein provided, no house, shop, fence, or other structure, shall be allowed, except as hereinafter mentioned, to project or encroach on any part thereof; and in order that the due alignment of the roads, streets, lanes, or thoroughfares within the said Borough shall be observed, and that no encroachment shall be made thereon, it shall not be lawful for any person, unless for any temporary or other purpose permitted by the Council, to erect or put up any building, erection, obstruction, fence, or enclosure; or make any excavation or hole on, under, or near such road, street, lane, or thoroughfare, unless due notice of the same shall have been given to the Council of the Borough at least three weeks before any such building, erection, obstruction, fence or enclosure, excavation or hole, as aforesaid, shall be commenced to be erected or put up, or made, and the assent of the Council first obtained. And in default of the same, the person so offending shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than forty shillings; and on every successive conviction for a similar offence, shall forfeit and pay a penalty of not less than three pounds.

No balcony, &c., to project more than 18 inches.

41. With regard to buildings hereafter to be built or rebuilt, it shall not be lawful for any portico, balcony, coping, parapet, overhanging eaves, cornice, windows, string-cornice, string-course dressing, or other architectural decoration forming part of, or attached to, any external wall, to project more than eighteen inches beyond the general line of front in any street or road; nor shall any balcony, or any other external projection as aforesaid, which may hereafter be added to any existing building, be allowed to project more than eighteen inches, as aforesaid, under a penalty not exceeding five pounds, nor less than one pound.

Footways may be levelled, &c.

42. When any footway shall have been marked out in manner hereinbefore directed, the Surveyor may cause the same to be levelled, and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination; and for this purpose may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway, or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for any of the said footways.

Encroachments must be removed on notice.

43. The Surveyor or other such officer or person may at any time, on the order of the Council, and upon due notice of thirty days, direct the removal of any building, fence, or other obstruction or encroachment in and upon any road, street, lane, or thoroughfare under the charge of the Council. Notice shall, in this case, be served either personally or at the usual or last known place of abode of the person to whom such obstruction or encroaching structure belongs, or who has erected the same, or caused it to be erected.

44. In any case where, after service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing the same shall not remove it within a reasonable time, it shall be lawful for the Council to direct the removal of the same under the superintendence of its own proper officer, and at the cost of the person so offending, provided that the expenses thereby incurred shall in no case exceed the sum of ten pounds, or, at the Council's option, to proceed against the offender for breach of by-law, the penalty not to exceed twenty-five pounds, nor be less than one pound; and, in case of every successive offence, the penalty, on conviction, not to be less than five pounds.

Or may proceed by action.

45. In every case where the obstruction or encroachment cannot be removed, unless at a greater cost than ten pounds, it shall be open to the Council either to direct such removal and to pay all the costs thereof above ten pounds from the funds of the Council, or to proceed by action of trespass against the person causing such obstruction or encroachment, or to proceed as for breach of such by-laws as aforesaid.

To apply also to obstructions by digging, &c.

46. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation; and any person who shall wilfully obstruct or interfere with the Surveyor or other officer as aforesaid, or any person acting for or under him, or either of them, in the exercise of any of the duties or powers by these by-laws imposed or cast on the said Surveyor or officer, shall, on conviction, forfeit and pay a penalty of not less than two pounds nor more than twenty pounds.

OFFENCES, NUISANCES—GENERAL GOOD ORDER OF THE MUNICIPALITY.

As to damaging public buildings, &c.

47. Any person who shall damage any public building, wall, parapet, sluice, bridge, road, street, sewer, watercourse, or other property of the Municipality, shall pay the cost of repairing the same; and if the same be wilfully done shall also forfeit and

pay a sum not exceeding twenty pounds, nor less than five pounds: Provided that such cost and penalty shall not exceed in the whole the sum of fifty pounds.

48. Any person who shall cast any filth or rubbish into any public watercourse, sewer, or canal, or shall obstruct or divert from its channel any such sewer, canal, or watercourse, shall forfeit a sum not exceeding five pounds, nor less than one pound, and shall, in addition to any such forfeiture, pay the cost of removing such filth or obstruction, or of restoring such watercourse or canal to its proper channel: Provided that such cost and penalty shall not together exceed the sum of fifty pounds.

As to injuring public fountains, &c.

49. Any person who shall injure any public fountain, pump, cock, or water pipe, or any part thereof, shall pay the cost of repairing the same; and if the injury be wilfully done, shall also forfeit a sum not exceeding twenty pounds, nor less than one pound; and any person who shall have in his possession any private key for the purpose of opening any cock, or who shall in any manner clandestinely or unlawfully appropriate to his own use any water from any public fountain or pipe, shall forfeit a sum not exceeding twenty pounds, nor less than five pounds; and any person who shall open or leave open any cock of any public fountain or pump, so that the water shall or may run to waste, shall forfeit a sum not exceeding two pounds, nor less than five shillings; and any person who shall wash any clothes, omnibus, carriage, cart, or other vehicle, or any horse, at any public fountain or pump, shall forfeit and pay a sum not exceeding one pound, nor less than five shillings.

Throwing filth on carriageways, &c.

50. If any person shall, in any street, road, or lane, throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing in or upon the carriageway or footway of any such street or road, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other cattle in or so near to any of the said streets or roads as that any blood or filth shall run or flow upon or over, or be on any such carriage or footway, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the footways of any street or road, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, or truck, or any cask, or shall wilfully lead, drive, or ride any horse or other beast upon any of the footways aforesaid, in, upon, or abutting, or within twenty feet of any such road, street, or lane, shall forfeit and pay a sum not exceeding forty shillings, nor less than five shillings.

Placing carriages, goods, &c., on footway, &c.

51. If any person shall set or place, or cause or permit to be set or placed, any stall, board, chopping-block, show-board, basket, wares, merchandise, casks, or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed any pipe, barrel, cask, or vessel in or upon or over any of the carriage or footways in any street, road, or public place within the said Borough, or shall set out, lay, or place, or shall cause or procure permit or suffer to be set out, laid, or placed, any coach, cart, wain, waggon, dray, barrow, sledge, truck, or other carriage, upon any of the said carriage or footways, except for the necessary time of loading or unloading the same, or taking up or setting down any fare, or waiting for passengers when actually engaged, or harnessing or unharnessing the horses or other animals from any coach, cart, wain, waggon, dray, sledge, truck, or other carriage; or if any person shall set or place, or caused to be set or placed, in, upon, or over any of the said carriage or footways, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as hereinafter is directed), or any other matters or things whatsoever; or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat, or offal, or other thing or matter whatsoever, from any house or houses, or other buildings or premises, over any part of either or any of such footways or carriageways, or over any area or areas of any house, or other buildings or premises, or any other matter or thing from and on the outside of the front or any other part of any house or houses, or other buildings or premises, over or next unto any such street or road, and shall not immediately remove all or any such matters or things, being thereto required by the Council or an officer thereof, and shall not continue and keep the same so removed; or if any person having, in pursuance of any such requisition as aforesaid, removed, or caused to be removed, any such stall-board, show-board, chopping-block, basket-wares, merchandise, cask-goods, coach, cart, wain, waggon, dray, barrow, sledge, truck, carriage, timber, stone, brick, lime, meat, offal, or other matters or things, shall at any time thereafter again set lay or place, expose, or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket-wares,

merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid) in, upon, or over any of the carriage or footways of or next unto any streets or roads as aforesaid,—then and in every such case, every person so offending shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings; and it shall then be lawful for any constable, without any warrant or other authority than this by-law, to seize any such stall-board, show-board, chopping-block, basket-wares, merchandise, casks, goods, coach, cart, wain, waggon, dray, barrow, sledge, truck, or other carriage, together with the horses or other animals, if any shall be thereunto belonging, with the harness, gear, and accoutrements thereof, or any such timber or other materials or other matters or things aforesaid, or any of them; and in case any of the goods, wares, or merchandise so seized shall be perishable, or shall be articles of food, then the same shall be immediately forfeited, and the person or persons who shall seize the same shall deliver the same or cause the same to be delivered to the Superintendent for the time being of the Benevolent Asylum, and the same shall and may be distributed for the benefit of the inmates of the said asylum; but otherwise, such constable shall cause the stall-board, basket, cask, goods, coach, cart, waggon, wain, dray, barrow, sledge, truck, or other carriage, horses, or other animals, materials, or other things so seized, and not being of a perishable nature, to be removed to any place appointed for the reception thereof (if any such there be), or otherwise to such place or places as he or they shall judge convenient, giving verbal notice of such place unto the owner, driver, or person having interest in the things so seized and removed, if he shall be then there present; and the same shall be there kept and detained until such owner, driver, or other person interested therein as aforesaid, shall cause to be paid the penalty in which he shall be convicted, together with the charges for taking and removing the same, and of keeping such horses or other animals (if any); and in case the animals or other things so removed shall not be claimed and the said penalty and charges be paid within five days next after such removal, it shall be lawful for any Justice to order the same to be appraised and sold, and the overplus of the money arising from such sale (if any) shall be paid to the owner thereof: Provided that the penalty and charges hereinbefore mentioned shall not together exceed fifty pounds.

Not to prevent awnings being erected in front of shops.

52. Nothing in these by-laws contained shall be deemed to prevent any person from placing a movable awning in front of his or her shop or house: Provided, however, that such awning be at least seven feet above the height of the footway in front of such house or shop, and that the posts be placed close up to the kerbstone or outer edge of such footway.

Discharging firearms, &c.

53. Any person who shall discharge any firearms without lawful cause, or let off any fireworks or other explosive matter in or near to any road or street, shall forfeit and pay a sum not exceeding five pounds nor less than ten shillings.

Burning shavings, &c., in streets.

54. Any person burning any shavings, or other matters or things, in any street, road, or public place, shall forfeit and pay a sum not exceeding forty shillings, nor less than five shillings.

Bathing prohibited within certain limits.

55. It shall not be lawful for any person to bathe within the said Municipality in any waters exposed to view from any road, street, or dwelling-house, in or near to the said Municipality, between the hours of six in the morning and eight in the evening; and any person who shall offend against this by-law shall forfeit and pay a sum not exceeding twenty shillings, and it shall be lawful for any constable to arrest any person who shall be found bathing contrary to the provisions hereof, and such person to convey before any Justice of the Peace, to be dealt with according to law.

Indecent exposure of person.

56. Any person who shall offend against decency by the exposure of his or her person in any street or public place within the said Municipality, or in the view thereof, shall forfeit and pay a sum not exceeding ten pounds nor less than five pounds; and it shall be lawful for any constable to apprehend any person whom he may find in the act of committing such offence, and him or her to convey before any Justice of the Peace, to be dealt with according to law.

Swine, &c., not to wander about streets, &c.

57. It shall not be lawful for any person to suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him, or under his charge, to stray or go about, or to be tethered or depastured in any road, street, or public place; and any person who shall so offend, shall forfeit and pay, in respect of every such offence, a sum not exceeding forty shillings nor less than five shillings.

Entrance to cellars, &c., to be covered, &c.

58. If the owner or occupier of any premises, having any rails or bars over the areas or openings to any kitchen or cellars or other part of the said premises beneath the surface of the footway of any streets or public places, or having any doorway or entrance into the basement or cellar story thereof, shall not either keep the same, or the rails of such kitchens, cellars, or other parts, in sufficient and good repair, or constantly keep the same securely guarded by rails, or cover the same over with a strong flap or trap-door according to the nature of the case, and so as to prevent danger to persons passing and repassing,—or if any such owner or occupier shall leave open, or not sufficiently and substantially keep covered and secured, any coal or other hole, funnel, trap-door, or cellar-flap, belonging to or connected with his premises (save and except only during reasonable time for use, alteration, or repair),—or if such owner or occupier shall not repair, and from time to time keep in good and substantial repair, all and every or any such rails, guard-rails, flaps, trap-doors, and other covering,—then and in every such case the person neglecting so to do shall, for every or any such offence, forfeit and pay a sum not exceeding five pounds nor less than forty shillings.

Cellars or openings beneath footways prohibited, &c.

59. It shall not be lawful for any person to make any cellar, or any opening, door, or window in or beneath the surface of the footway of any road, street, or public place, within the said Municipality; and if any person shall offend in the premises, he shall forfeit and pay any sum not exceeding five pounds over and above the expense of remedying or removing any such cellar, opening, door, or window, such expense to be assessed and allowed by the convicting Justice or Justices: provided that such expense and penalty shall not together exceed fifty pounds.

Wells to be covered over within three months, &c.

60. Every person who shall have a well situated between his dwelling-house or the appurtenances thereof, and any road, street, or footway, within the limits of the said Borough, or at the side of such road, street, or footway, or in any yard or place open and exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within the time and in the manner hereby required and directed, such person shall forfeit and pay the sum of two shillings and sixpence for every day that such well shall remain open or uncovered contrary to the provisions hereof: provided that, with respect to wells open at the time when this by-law shall come into operation, such penalty shall not be recoverable if the same be properly covered within three months thereafter.

Holes made for vaults, &c., to be enclosed, &c.

61. If any person shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole in or adjoining to any street, road, or public place, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good and sufficient manner, or shall keep up or cause to be kept up and continued, any such enclosure, for any time which shall be longer than shall be reasonably required, or shall not, when thereunto required by the said Council, well and sufficiently fence or enclose any such hole, within twenty-four hours after he shall be required to do so by the said Council, and in the manner and with such materials as they shall direct, and to their satisfaction, and shall not place a light upon the said enclosure and keep the same constantly burning, from sunset to sunrise, during the continuance of such enclosure, then and in every such case the person so offending shall forfeit and pay for every such offence and for every such refusal or neglect, any sum not exceeding five pounds nor less than ten shillings, and on conviction for every subsequent offence a sum not less than one pound.

Excavation, &c., to be protected by fence or wall.

62. It shall not be lawful for any person to make any quarry, excavation, or opening in the ground, on any premises within six feet of any public road or footpath within the limits of this Borough, until the owner or occupier of the said property shall have erected a good substantial fence or wall at the least four feet high around such parts of the said property as adjoin such public road or footpath; and any person neglecting or refusing to enclose any premises upon which any such quarry or excavation shall be made, shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than ten shillings; and all existing quarries or excavations situated within the limits of this Borough shall be enclosed and protected in the manner aforesaid, within one month after due notice to that effect shall have been given by the Municipal Council; and in the event of the failure or neglect of the owner or occupier of any such last-mentioned premises to enclose the same, after notice as aforesaid, such person so offending shall be subject to the penalty aforesaid.

Swine, &c., not to be kept within 20 yards of a dwelling-house.

63. It shall not be lawful for any person whomsoever to breed, feed, or keep any kind of swine in any house, building, out-house, yard, garden, or other tenement or hereditament situate and being in or within twenty yards of any street, way, or public place or dwelling-house now erected, or hereafter to be erected, within the limits of this Borough; and every person who shall so offend shall, on conviction, forfeit and pay for every such offence a sum not exceeding two pounds nor less than five shillings.

Hog-sties and nuisances not removed on complaint, &c.

64. In case any privy, hog-sty, or any other yard, enclosure, matter, or thing which shall at any time or times hereafter be in any place within the said Borough, shall be or become a nuisance, it shall be lawful for two Justices, upon complaint thereof to them made by any of the inhabitants, and after due investigation of such complaint, by notice in writing, to order that such privy, hog-sty, or other matter or thing, being a nuisance, shall be remedied and removed within seven days after such notice shall have been given to the owner or occupier of the premises wherein such nuisance shall exist, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises; and every such owner or occupier neglecting to remedy or remove such nuisance, pursuant to such notice and to the satisfaction of such Council, shall forfeit and pay a sum not exceeding ten pounds. And also it may be lawful for such Council to indict or cause to be indicted for such nuisance, such person so neglecting or disobeying any such notice, at the then next Court of General or Quarter Sessions, to be held nearest to the said Borough; and such person or persons being found guilty thereof, such nuisance or nuisances shall be removed, taken down, and abated, according to the law with regard to public or common nuisances; and the person so offending shall be subject to such punishment for the misdemeanour as the Justices assembled at such Sessions shall direct.

As to cleaning private avenues, &c.

65. Any owner or occupier of any house or place who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall forfeit and pay a sum not exceeding forty shillings for any such offence, nor less than ten shillings.

Cleansing butchers' shambles, slaughterhouses, &c.

66. For preserving the cleanliness of the said Borough and the health of the inhabitants thereof it shall be lawful for any police officer, authorized and deputed by any writing, under the hand of a Justice of the Peace, from time to time, and when and as often as he shall see occasion, to visit and inspect the butchers' shambles and slaughterhouses within the said Borough, and to give such directions concerning the cleansing the said shambles and slaughterhouses, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble or slaughterhouse, who shall obstruct or molest any such officer in the inspection thereof, or who shall refuse or neglect to comply with such directions, within a reasonable time, shall forfeit and pay a sum not exceeding forty shillings, nor less than ten shillings.

Drawing or trailing timber, &c.

67. If any person shall haul or draw, or cause to be hauled or drawn, upon any part of the streets, roads, or public places, any timber, stone, or other thing, otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such street or public place to the injury thereof, or to hang over any part of such carriage so as to occupy or obstruct the street or road beyond the breadth of the said carriage, every such person so offending shall forfeit and pay for every such offence the sum of forty shillings over and above the damages occasioned thereby: Provided that such penalty and damages shall not together exceed the sum of fifty pounds.

Restrictions on certain trades, &c.

68. It shall not be lawful for the business of a soap-boiler, tallow-melter, tripe-boiler, tanner, currier, or cow-keeper, or any other trade or manufacture of an obnoxious or unwholesome nature, prejudicial to the health of or otherwise offensive to the inhabitants, to be newly established or carried on in any building or place within the limits of this Borough, except in such place or places as shall be previously approved by the said Municipal Council, so that the same shall not be a nuisance to the inhabitants or prejudicial to public health; and that from and after the first day of January, in the year of our Lord one thousand eight hundred and sixty-nine, the business of a soap-boiler, tallow-melter, tripe-boiler, tanner, currier, or cow-keeper, or any other obnoxious, offensive, or unwholesome trade or manufacture, as aforesaid, which has been already established, shall not be continued or carried on in any building or place

within the limits of this Borough, except with such approval as aforesaid; and whosoever shall offend against this by-law shall forfeit and pay, on conviction for every such offence before any two or more Justices of the Peace, a penalty not exceeding fifty pounds.

Slop, night-soil, &c., to be conveyed away only at certain hours, &c.

69. It shall not be lawful for any person or persons to drive, or cause to be driven, any cart or carriage of any kind with any night-soil or ammoniacal liquor therein, through or in any of the streets, roads, or public places within the said Municipality, between the hours of 5 o'clock in the morning and 10 o'clock at night, or to fill any cart or other carriage so as to turn over or cast any night-soil, ammoniacal liquor, slop, urine, or channel dirt or filth, in or upon or near to any of the said streets, roads, or other public places; and in order to prevent nuisances it shall not be lawful for any person to deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house, than shall be directed by the said Council; and all night-soil and other offensive matter shall be removed within the hours before prescribed, in properly-covered and water-tight carts or other vehicles; and no vehicles used for this purpose shall be allowed to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council; and every person offending against this by-law shall for every such offence forfeit and pay a sum not exceeding five pounds, nor less than ten shillings.

Hours for removing night-soil, &c.

70. If any person shall take away night-soil from any house or premises within the streets, roads, or thoroughfares of the said Borough, or shall come with carts or carriages for that purpose, except between the hours of 10 at night and 5 in the morning, or if any person or persons shall put in or cast out of any cart or tub, or otherwise, any night-soil in or near any of the streets or public places, he shall forfeit and pay a penalty of five pounds for every such offence; and in case the person or persons so offending cannot be found, then the owner or owners of such cart, carriage, or other vehicle employed in and about emptying and removing such night-soil, and also the employer or employers of the person or persons so offending shall be liable to and forfeit and pay such penalty as aforesaid.

Injuring or extinguishing lamps, &c.

71. Any person who shall be convicted of wantonly or maliciously breaking or injuring any lamp or lamp-post, or extinguishing any lamp set up for public or private convenience, shall over and above the necessary expense of repairing the injury committed, to be estimated by the Council, forfeit and pay a sum not exceeding five pounds, nor less than one pound, provided that such penalty and expense shall not together exceed the sum of fifty pounds.

No rock to be blasted without notice to the Surveyor, &c.

72. Any person who shall be desirous of blasting any rock within the distance of 100 feet of any street, road, or other public place, shall give notice in writing twenty-four hours previously, to the said Council or Surveyor thereof, who shall appoint in writing a time when the same may take place, and give such other directions as they or he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the said Council or Surveyor, he or she shall forfeit and pay for every such offence a sum not more than twenty pounds nor less than one pound, and for every subsequent offence shall pay a penalty of not less than five pounds.

No turf, gravel, &c., to be removed from streets without leave, &c.

73. Any person who shall form, dig, or open any drain or sewer, or who from any part of the roads, streets, or thoroughfares, shall remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, without leave first had and obtained from the officers or persons having lawful charge of such roads, streets, or thoroughfares respectively, or who shall wantonly break up or otherwise damage any part of the said roads, streets, or thoroughfares, shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds, nor less than five shillings, and for every subsequent offence shall forfeit and pay a sum of not less than one pound.

If any driver ride on vehicle without a person to guide his beast, cart, with reins excepted, or go to a distance from his vehicle, or drive on wrong side, &c.

74. If the driver of any waggon, wain, cart, dray, or vehicle of any kind shall ride upon the same in any street, road, or thoroughfare as aforesaid, not having some person on foot to guide the animals drawing the same (such carts as are drawn by one horse and driven or guided with reins only excepted),—or if the driver of any carriage or vehicle whatsoever shall wilfully be at such a distance from such carriage or vehicle, or in such a situation whilst it shall be passing upon each street, road, or thoroughfare that he cannot have the direction or government of the horse or horses, or cattle drawing the same,—or if the

driver of any waggon, cart, dray, coach, carriage, or other vehicle, shall not drive on the left or near side of any such road, street, or thoroughfare,—or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any vehicle under his or her care, upon such street, road, or thoroughfare, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any person or vehicle, or carriage, in or upon the same,—every such driver or person so offending shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than ten shillings.

As to riding or driving improperly through streets, &c.

75. Any person who shall ride or drive through any road, street, or public place negligently, carelessly, or furiously, or so as to endanger the life or limb of any person, or to the common danger of the passengers, shall forfeit and pay a sum not exceeding ten pounds nor less than two pounds.

Affixing placards on walls, and chalking thereon.

76. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, fence, house, or building, nor to deface any such wall, house, or building by chalk or paint, or in any other manner, unless

with the consent of the owner thereof. And any person who shall be guilty of any such offence shall forfeit and pay a sum not exceeding ten shillings.

Mayor to signify any Alderman acting as Mayor.

77. Wherever, under these by-laws, the word "Mayor" is made use of, it shall, unless the context shall indicate a contrary intention, be construed to signify and include any Alderman lawfully acting for the time being in the place or stead of the Mayor.

As to interference with Council in enforcing by-laws.

78. Any person obstructing or interfering with any officer of the Council or other person doing or performing any duty or act under these by-laws, shall forfeit and pay a penalty not exceeding ten pounds nor less than forty shillings.

Passed by the Municipal Council of the Borough of Woollahra, this eighth day of December, in the year of our Lord one thousand eight hundred and sixty-eight.

(L.S.) M. CONSETT STEPHEN,
Mayor of Woollahra.

1869.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF ARMIDALE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 13th September, 1869.

BOROUGH OF ARMIDALE.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Armidale, for better enabling them to control and better manage the Public Reserve known as the Armidale Race-Course Reserve, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BY-LAWS made in accordance with the provisions of the Municipalities Act of 1867, for the better enabling the Council of the Borough of Armidale to control and better manage the Public Reserve known as the Armidale Race-Course Reserve.

1. The Council shall have power to let the reserve known as the Armidale Race-Course, to any race committee, or club, or body of persons, for the purpose of holding horse races, cricket matches, shows, or other public sports, meetings, or exhibitions, for any period not exceeding four days at any one time, subject to such terms, and on such conditions as the Council, or a majority thereof, shall agree upon: Provided that, during the period or periods of such letting, the By-laws hereinafter contained shall, notwithstanding such letting, have full force and effect. No race committee, club, or body of persons, or member thereof, shall enter upon, or use and occupy the said reserve, or any part thereof, for the purpose of holding any horse races, cricket matches, shows, or other public sports, meetings, or exhibitions, without the consent of the Council, or a majority thereof.

2. That, during the period or periods for which the said race-course or reserve shall be so let, no person or persons, vehicle, horses or other animals, shall have admission thereto, except with the consent of such race committee, club, or body of persons, and on such terms as to payment, but not exceeding the scale of fees or charges specified in the Schedule hereto marked with the letter A. Any person entering upon the said race-course or reserve, during such period or periods as aforesaid, or any of them, without such permission as aforesaid, shall forfeit and pay a penalty of not less than five shillings nor more than ten shillings; and any person entering the said reserve at any time other than such period or periods as aforesaid, in any other way than through the gates leading thereto, shall forfeit and pay a penalty of not less than two shillings nor more than five shillings.

3. The Council may erect on the said race-course or reserve such buildings, stands, booths, posts, fences, gates, gateways, and other structures, or allow the same to be erected, on such terms and conditions as may be deemed advisable; and may lay out, or allow to be laid out, so much of the said race-course

or reserve as may be deemed sufficient for a running-ground; and may otherwise improve the said race-course or reserve, and may plant on the same such trees, shrubs, and plants as they may think proper: Provided that the said Council shall allow such race committee, or club, or body of persons, who shall erect any buildings, stands, booths, posts, or other structures, on the said race-course or reserve, to remove the same.

4. Any person driving or riding, or causing to be driven or ridden, any horse or other animal, or any cart, dray, or other vehicle, over or along any ground laid out on the said race-course or reserve as a running-ground or otherwise, without the consent of the Council, or some person duly authorized in their behalf, shall forfeit and pay a penalty of not less than ten shillings nor more than two pounds.

5. Any person who shall at any time injure or destroy any fence, gate, gateway, stile, building, stand, booth, post, or any other structure, or any tree, shrub, plant, or other thing growing or to grow on the said race-course or reserve, or any part thereof, shall forfeit and pay a penalty of not less than ten shillings nor more than fifty pounds.

6. The Council may allow such horses, cattle, or sheep, to be depastured on the said race-course or reserve for such periods as they may think proper, and may charge for the agistment thereof the rates mentioned in the Schedule B hereto: Provided that the Council, or any person authorized thereby, shall not be responsible or liable to the owner or owners of any such horses, cattle, or sheep, for any injury that they may have sustained whilst depasturing thereon, or for any losses sustained by such owners by reason of the same having strayed or been stolen therefrom, or otherwise howsoever: Provided that no person shall be allowed to depasture on the said race-course or reserve at the same time more than fifty head of sheep, the property of such person.

7. Any person who shall furiously ride or drive any horse or other animal, or other vehicle, without the permission of the Council, or the lessee or lessees for the time being thereof, upon such race-course or reserve, or any part thereof, shall forfeit and pay a penalty of not less than ten shillings nor more than five pounds.

8. The Council may appoint a ranger or other person to take care and charge of the said race-course or reserve, and all fences, gates, gateways, stiles, buildings, stands, booths, or other structures, and all trees, shrubs, plants, or other things growing and to grow thereon; and also all horses, cattle, and sheep, depasturing thereon, under the By-laws hereinbefore contained. And such ranger or other person shall discharge and perform such other duties as the said Council shall direct.

9. Any ranger or other person appointed by the said Council as aforesaid, who shall wilfully neglect to fulfil and perform any of the duties hereby required of him, or directed by the said Council to be fulfilled and performed by him, shall for each such neglect forfeit and pay a penalty of not less than ten shillings nor more than two pounds.

10. The ranger or other person authorized by the said Council may impound, in the public pound in Armidale, any horses, cattle, sheep, or other animal, which are not authorized in manner hereinbefore mentioned to be depastured upon such race-course or reserve, or in respect of which the fees mentioned in the Schedule hereto have not been paid.

11. Any person or persons who shall erect, or cause to be erected, upon the said race-course or reserve, any buildings, stands, booths, posts, fences, gates, gateways, or any other structures, without the permission of the Council, or a majority thereof, or whom such Council, or a majority thereof, shall authorize, by writing, under the hand of the Mayor, to grant such permission, shall for every such offence forfeit and pay a penalty of not less than one pound nor more than twenty pounds.

12. That any race committee, club, or body of persons may, during any such periods as aforesaid, enclose or set apart any portions of the said reserve for any purpose they may think proper; and any person who shall, without the consent of such race committee, club, or body of persons, enter upon any such portions of the said reserve so enclosed or set apart, shall forfeit and pay a penalty of not less than two shillings nor more than five shillings.

13. Any race committee, club, or body of persons, or any such person who shall erect upon the said reserve, or any part thereof, any posts, booths, tents, or other structures, shall, at their own expense, remove the same, after notice so to do by the Council, and shall, on removing the same or any of them, level the ground from which the same or any of them shall have been removed, to the satisfaction of the Council, or whom they may appoint.

—
SCHEDULE A.

	£	s.	d.
For each person,—not exceeding	0	0	6
For each horse, ass, or mule,—not exceeding	0	1	0
For each head of cattle, sheep, or other animals,— not exceeding	0	1	0
For each wheel of each vehicle.....	0	0	6

—
SCHEDULE B.

For every head of horse stock,—per week, not exceeding.....	0	2	0
For every head of cattle,—per week, not exceeding	0	1	6
For fifty, or part of fifty head of sheep	0	15	0

—

I hereby certify that the foregoing By-laws, consisting of thirteen clauses, were duly passed by the Municipal Council of the Borough of Armidale, on the 22nd day of June, in the year of our Lord one thousand eight hundred and sixty-nine.

JAMES McLEAN,
Mayor.

THOMAS LAMB,
Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF KIAMA—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 24th September, 1869.

BOROUGH OF KIAMA.

BY-LAW.

THE following By-law, made by the Council of the Borough of Kiama, for the extirpation of noxious weeds in the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

Extirpation of noxious weeds.

THE Council shall have power, in respect to all lands within the boundaries of the Municipal Borough of Kiama, where the lands are under cultivation, or have been cleared and fenced, to order and compel the extirpation of the weeds known as the Bathurst burr, the Scotch thistle, and the cotton plant, or other noxious weeds detrimental to good husbandry; and thirty days notice by advertisement in a local newspaper, or by a written or printed notice under the hand of the Council Clerk, or other officer appointed for that purpose, left at or sent through the post to the last known residence or place of business of the person upon whose land such weeds may exist, shall be deemed sufficient notice to owners or occupiers of property. And if, after the expiration of thirty days from the first publication of such notice by advertisement, or the delivering or posting of such written or printed notice, the owner or occupier of the land shall neglect or refuse to extirpate such weeds, by cutting, pulling, or grubbing and burning them, the Council shall have power, in a summary manner, before any two Justices, to recover a fine, not exceeding ten pounds, together with costs of Court, by levy and distress upon the goods and chattels of the person or persons so offending. Where noxious weeds are found growing upon land unoccupied, the owner or owners of which are unknown, the Council shall have power, at any time, to enter upon and clear the weeds from such lands.

Made and passed by the Borough Council of Kiama, this twentieth day of July, in the year of our Lord one thousand eight hundred and sixty-nine.

JOHN BLACK,
Mayor.

MUNICIPALITIES.

(BOROUGH OF MARRICKVILLE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 3rd November, 1869.

BOROUGH OF MARRICKVILLE.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Marrickville, for regulating the proceedings of the said Council and the duties of the officers and servants thereof—for preserving order at meetings of the said Council—for determining the times and modes of collecting and enforcing payment of rates—for preventing and extinguishing fires—for suppressing nuisances and houses of ill-fame—for preventing or regulating and licensing exhibitions held or kept for hire or profit, bowling-alleys, and other places of amusement—compelling residents to keep their premises free from offensive or unwholesome matters—opening new public roads, ways, and parks—aligning and cleansing roads and streets—regulating the supply and distribution of water, sewerage, and drainage—preserving trees and shrubs—regulating free libraries—preventing or regulating the bathing or washing the person in any public water near a public thoroughfare—preserving public decency—providing for the health of the Municipality, and against the spreading of contagious or infectious diseases—restraining noisome and offensive trades—and generally maintaining the good rule and government of the said Borough,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BY-LAWS for regulating the proceedings of the Council of the Borough of Marrickville and the duties of the officers and servants of such Council—for preserving order at meetings of the said Council—for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires—for suppressing nuisances and houses of ill-fame—for preventing or regulating and licensing exhibitions held or kept for hire or profit—bowling-alleys, and other places of amusement—compelling residents to keep their premises free from offensive or unwholesome matters—opening new public roads, ways, and parks—aligning and cleansing roads and streets—regulating the supply and distribution of water, sewerage, and drainage—preserving trees and shrubs—regulating free libraries—preventing or regulating the bathing or washing the person in any public water near a public thoroughfare—preserving public decency—providing for the health of the Municipality, and against the spreading of contagious or infectious diseases—restraining noisome and offensive trades—and generally maintaining the good rule and government of the said Borough.

PART I.

PROCEEDINGS of the Council and Committees—preservation of order at Council meetings—duties of officers and servants, &c.

Meetings of the Council.

Ordinary Meetings.

1. The Council shall meet for the dispatch of business at the hour of half-past seven p.m. on every alternate Monday, unless such day shall happen to be a public holiday. In the latter

case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor. Adjournment for want of quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect, from among themselves, a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the Minute Book.

Order of Business.

Business of Ordinary Meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Petitions (if any) to be presented and dealt with.
3. Correspondence to be read, and, if necessary, ordered upon.
4. Reports from Committees, and minutes from the Mayor (if any) to be presented and ordered upon.
5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances, requiring attention by the Council or any of its Committees or officers, to be made.

6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
7. Orders of the day to be disposed of as they stand on the business paper.

Business may be dealt with out of regular order.

Provided that it shall be competent to the Council at any time, by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business paper, without any formal suspension of this section; also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

4. At special meetings of the Council the business, after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting—how prepared.

5. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Council Clerk, not less than two nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received, or shall have been required or directed so to enter, in due course of law, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 3 of this "Part" of these by-laws, in the same order as such notice, requisition, or direction shall have been received.

Business paper for special meeting.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to members.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

How business paper is to be disposed of.

8. The business paper for each meeting of the Council shall, at such meeting, be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with; and such business paper so noted shall be a record of the Council.

Notices of motion, &c., to be numbered as received, and preserved until matter disposed of; unless withdrawn before business paper made up.

9. All notices of motion, and all requisitions from Aldermen, and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting, shall be numbered by the Council Clerk as they are received; and each such notice, requisition, and direction shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of, and the record in the minute book of the manner in which such matter has been so disposed of shall have been duly verified as required by section 3 of this "Part" of these by-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk shall be at liberty to withdraw the same at any time before the making up of the business paper.

After business paper made up, all notices, &c., to be the property of the Council.

10. After the business paper shall have been made up as aforesaid all the said notices of motions, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and Amendments.

Motions—how to be moved.

11. Except by leave of the Council motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

Absence of proposed mover.

12. No motion of which notice shall have been entered on the business paper, shall, except as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given; unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

13. No motion in Council shall be discussed unless and until it be seconded.

Amendments may be moved.

14. When a motion in Council shall have been made and seconded any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

15. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question—further amendment may be moved thereon.

17. If an amendment be carried the question as amended thereby shall become itself the question before the Council whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

18. If any amendment, either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions for adjournment.

19. No discussion shall be permitted on any motion for adjournment of the Council; and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Requisitions from Aldermen how to be dealt with.

20. Every requisition by an Alderman, that any particular matter of business be brought before the Council, shall be regarded and treated as a notice of motion by such Alderman that such business be taken into consideration by the Council. And he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit in reference thereto, which shall be consistent with the notice of such business, and with good order. And if such Alderman be absent, or, if being present and so called upon, he shall make no such motion, then it shall be open to any other Alderman to make such motion. And when any such motion shall have been made it shall be dealt with in precisely the same manner as if notice thereof had been given, subject, however, to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order. And if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business paper.

Orders of the Day.

Of what orders of the day shall consist.

21. The orders of the day shall consist of any matters other than motions on notice, which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any committee of the Council shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

22. Section 20 of this "Part" of these by-laws shall be considered applicable to orders of the day. And the Alderman who has the usual charge of, or who has previously moved in reference to, the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid, by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

Petitions.

Petitions to be respectfully worded.

23. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—how received.

24. All petitions shall be received only as the petitions of the parties signing the same.

How petitions are to be dealt with.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received, or that it be received and referred to one of the permanent Committees hereinafter mentioned; or that it be received, and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

Correspondence.

Duties of Mayor as to correspondence.

26. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read as by section 23 of this "Part" of these by-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Sec. 25 to apply to letters.

27. Section 25 of this part of these by-laws shall be considered as fully applicable to letters addressed to the Council as to petitions.

Letters sent not to be discussed, but every letter may be subject of motion.

28. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council: Provided, however, that any notice of motion, consistent with good order, may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council, which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports from Committees and Minutes from the Mayor.

Form of Report.

29. All reports from Committees shall be written on foolscap paper, with a margin of at least one-fourth of the width of such paper; and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's minute.

30. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing. Every such minute shall be written upon paper of the same kind, and with the same margin as a report from a Committee, and shall be signed by such Mayor.

How reports, &c., are to be dealt with. Duties of Chairman, &c., in certain cases.

31. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without any due notice, and it is, nevertheless, desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman, or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable such Council Clerk to make the necessary entry on the business paper, and to give such due notice.

Questions and statements.

Limitations as to questions and statements.

32. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this part of these by-laws.

Notice to be given.

33. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

34. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

Question to be put without argument, &c.

35. Every such question must be put categorically, without any argument or statement of fact.

Similar provision as to statements.

36. Every such statement must be made without argument.

No discussion on question, &c. Rights of objection, and of subsequent motion reserved.

37. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

Order of Debate.

Mode of addressing the Council, &c.

38. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity) and shall address himself to the Mayor, or other Chairman then presiding: Provided that in the case of a question such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner; but in every such case the question so put and the answer thereto shall be subject to every legal objection, on the ground of disorder or irrelevancy. And all members of the Council shall, on all occasions, when in such Council address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted, if in order.

39. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitations as to number of speeches, &c.

40. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and seconder.

41. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

42. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, nor impute improper motives to, any other Alderman.

Adjournment of debate.

43. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

44. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Alderman may require questions to be stated, &c., under certain restrictions.

45. Any Alderman may request the question or matter under discussion to be read or stated, for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially

to interrupt the discussion. Also, that if any such request or requisition shall appear to the Mayor or Chairman not to have been made *bonâ fide* it shall not be complied with.

Mayor or Chairman not to move or second motion, &c.; but may address Council thereon.

46. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question, as provided for by section 3 of this "Part" of these by-laws, except as is further provided for by section 38 of the same. But such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing) but shall be considered as still presiding.

Questions of Order.

Mayor or Chairman to decide points of order.

47. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned, as in the manner hereinafter provided.

Acts of disorder.

48. Every member of the Council who shall commit a breach of any section of this "Part" of these by-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which according to the common usage of gentlemen would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

Mayor, &c., may call Member to order.

49. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

Any Member may raise question of order.

50. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which such first-named member may consider out of order.

Mode of proceeding thereon.

51. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission such member may explain, retract, or apologize for the matter or remark alleged to have been out of order. And if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member, on being called to order, shall ask such permission to explain, retract, or apologize as aforesaid, the Mayor or Chairman may, of his own authority, grant or refuse such permission, as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of the Mayor or Chairman to take the sense of the Council, at once, and without discussion, as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or, if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with: Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened. And provided further, that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order, after the same shall have been discussed.

Decision of points of order.

52. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

Motions out of order to be rejected. Members to explain, retract, or apologize, &c.

53. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected; and whenever any-

thing said or done in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction, or apology, as the case may require.

Penalties for persisting in disorderly conduct.

54. Any member of the Council who shall have been called to order, and who, after having been twice directed to withdraw as aforesaid, shall refuse to do so, or who shall persist in any line of conduct or argument, or of observations, which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction; or apology as aforesaid, when required so to do, or who shall be guilty of any other act of disorder, as defined in section 48 of this "Part" of these by-laws, and shall refuse to make such explanation, retraction, or apology, as a majority of the Aldermen then present shall consider satisfactory, shall be liable, on conviction for the first offence, to a penalty of not less than ten shillings, nor more than five pounds; and on a second conviction for the like offence he shall be liable to a penalty of not less than one pound, nor more than ten pounds; and on the third conviction and for every further conviction for the like offence, he shall be liable to a penalty of not less than two pounds, nor more than twenty pounds.

Power of Council as to laying down general rules, &c.

55. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice, may, by motion on notice, respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar questions of order or of practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties, unless and until it be rescinded, but shall have no retroactive operation: Provided, however, that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which, in his opinion, is contrary to law.

Mode of Voting.

How questions are to be put.

56. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Divisions.—Penalty for refusing to vote.

57. Any Alderman shall be at liberty to call for a division; in such case the question shall be put first in the affirmative and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than ten shillings, nor more than five pounds.

Protests.

Mode of protesting.—Protest to be recorded, but may, under certain circumstances be expunged.

58. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council; notice of the intention so to protest must, however, be given at the meeting when such resolution is passed, or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute-book, but if, in the opinion of the Council, it be inconsistent with the truth, or disrespectfully worded, it may (by resolution on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin to the resolution ordering such expunction.

Committees of the whole Council.

Rules applicable to business in Committee.

59. The following sections of this "Part" of these by-laws shall (except as is herein excepted) be taken to apply to the conduct of business in Committee of the whole Council, namely—sections 14 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded), 15, 16, 17, 18, 38, 39, 42, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, and 57.

Disorderly conduct in Committee.—Refusal to vote.

60. Whenever any member of the Council shall, while the Council is in Committee of the whole, be considered guilty of an offence against good order within the meaning of section 54 of this "Part" of these by-laws, it shall be competent to any Alderman to move that the Council resume its sitting, and that such matter be reported; and if such motion be carried such matter shall be reported accordingly, and an entry of such report shall be made in the minute-book; and whenever any Alderman

shall have failed to vote on any occasion in Committee of the whole Council, as required by section 57 of this "Part" of these by-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the minute-book: Provided that in the case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary, but it shall be the duty of the Chairman of such Committee of the whole, in making his report of the proceedings in such Committee, whenever such report may be made, to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

Decisions in Committee on points of order may be reported.

61. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council, under the provision of section 47 of this part of these by-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried such decision shall be so embodied in such report, whenever the same shall be made.

How progress may be reported, &c.

62. Any Alderman may at any time during the sitting of a Committee of the whole Council move that the Chairman report progress (or no progress, as the case may be) and that leave be asked to sit again at a later period of the same day, or on any further day; or that no leave be asked to sit again; and if any such motion be carried, the Council shall resume its sittings, and a report shall be made accordingly; but no discussion shall be permitted on any such motion, and if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

Reports of proceedings in Committee.—Want of quorum in Committee.

63. All reports of proceedings in Committee of the whole Council shall be made to the Council, *viva voce* by the Chairman of such Committee; and a report of such proceedings shall be made in every case, except when it shall be found, on counting the number of members during the sitting of any such Committee, that there is not a quorum present. In the latter case the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed: Provided, that in the making of any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

How reports are to be dealt with.

64. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute book; but, except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application as aforesaid for leave to sit again be considered to have been granted by such Council, until a motion shall have been made and passed for such adoption, or for the granting of such leave. And every such motion for the adoption of a report or for the granting of leave as aforesaid, and the order of debate on such motion shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions: Provided however, that where a report shall have been made under section 60 of this part of these by-laws, of disorderly conduct in Committee, or under section 57 of this part of these by-laws, of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof; and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.

How call may be ordered.

65. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

Such call compulsory in certain cases.

66. There shall, without any special order to that effect be a call of the Council for the consideration of every motion which may be made under section 55 of this part of these by-laws and of every motion for the rescission of any resolution, order, or decision of such Council.

Mode of proceeding.

67. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted, or if such an excuse in

writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence without legal excuse. Further call when question adjourned.

68. Any member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent, shall not be legally excused as aforesaid, or who, if absent and not so excused shall fail to show that by reason of extreme illness or any other sufficient cause, he has been unable to send an excuse in writing as aforesaid, or who, having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings, nor more than five pounds. Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration; and the provisions herein as to penalties for absence, shall have reference to such further call. And if there shall be more than one adjournment this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

Standing and Special Committees.

Standing Committees.

69. There shall be four Standing Committees, namely, a By-law Committee, a Committee for Works, a Finance Committee, and a Committee for General Purposes. These Committees shall be re-appointed every year at the first meeting of the Council which shall be holden after the election of the Mayor.

Constitution of Standing Committees.

70. Each of the three Committees first named in the last preceding section shall consist of three members, of whom one shall be taken from among the Aldermen of each ward. The Committee for General Purposes shall consist of the Chairmen of the three said first named Committees.

Mode of re-appointing Standing Committees.

71. The re-appointment of the three said first-named Committees may, on resolution of the Council, be made by ballot. In such case a list or lists of the members for each ward shall be handed to each member then present, who shall mark against the name of each such member the title of the Committee to which, in his opinion, such member ought to belong. And the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result. And if there shall be an equal number of votes for the appointment of any two or more members to any one of such first-named Committees, such Mayor or Chairman shall decide which of such members shall be appointed to such Committee.

By-law Committee.

72. The By-law Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Borough. They shall also watch over the administration of the by-laws, and of any statute of which the operation has been or may be extended to the Borough; and shall take such steps as may be necessary for the prevention or punishment of offences against such by-laws or statutes, and for the preservation of public health, order and decency.

Committee for Works.

73. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council; and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

74. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect, or to be likely to affect, the finances of the Borough; and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Committee for General Purposes.

75. The Committee for General Purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council not coming within the province of one or other of the before-mentioned Standing Committees, and shall from time to time inquire into and report upon any such subject,

matter, or question as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

Special Committees.

76. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a Special Committee ought to be appointed. And no Standing committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as, in his opinion, ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot; and in the latter case, or if an amendment to the effect that such Special Committee be appointed by ballot be carried, each member then present shall receive a list of all the members of the Council, from which list he shall strike out all names but those of the persons of whom, in his opinion, such Special Committee ought to be composed; and the Mayor or Chairman shall examine such lists, and shall declare the result. And in the event of its becoming necessary, through an equality of votes to decide as to which of two or more Aldermen shall serve on such Committee, such Mayor or Chairman shall so decide.

Chairman of Committee.

77. Every Committee, of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee, within seven days after their appointment.

Term of service in Committee.

78. Appointments to the By-law Committee, the Committee of Works, and the Finance Committee, shall be for the whole municipal year. The Chairmen of these three Committees as appointed or removed from the Chairmanship of the same, shall be thereby and without any further order regarded as having been appointed to or removed from the Committee for General Purposes. The appointment of every Special Committee shall be considered to endure until the duties for which such Committee have been appointed shall have been fully performed: Provided however, that nothing herein contained shall be held to affect in any way the right of such Committee to remove any Chairman of such Committee, or to appoint another such Chairman in his stead, or to militate against the general provisions as to Committees in sections 109 and 110 of the Municipalities Act of 1867; and that so much of this by-law as relates to the appointment, powers, and duties of Committees, shall be read and interpreted in connection with such last-mentioned general provisions.

Committee Meeting, how called.

79. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman, or any two members of such Committee.

Records of transactions in Committee.

80. The Chairman of each Standing Committee shall make, or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

Expenditure.

Except in emergent matters cost of all work to be estimated before undertaken.

81. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Borough shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Emergent matters and necessary current expenses.—Expenses authorized to be reported.—Outlay to be in accordance with orders of the Council.

82. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

1. By order of the Committee for Works, or of the Mayor and one member of such Committee, for repairs or emergent works, to the extent of five pounds.
2. By order of the Mayor for necessary current expenses, to the extent of two pounds.
3. By order of the Mayor and any two Aldermen, or without the Mayor, of any four Aldermen, for any emergent purpose, to the extent of five pounds.

Provided, that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting; such report to be signed by the Chairman of the Committee of Works, or the Mayor, or the Mayor and Aldermen, or the Aldermen without the Mayor, as the case may be, by whom such outlay shall have been authorized. Also, that such outlay shall

only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council; and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

All claims to be examined and reported upon by Finance Committee.

83. All accounts and demands of money against or from the Council, shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificate required with each claim.—Salaries and wages to be payable on Mayor's order.—Certificates to be attached to report.

84. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, shewing that the demand is a legitimate one, and has been duly authorized or enquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment, before recommending payment: Provided however, that such special report as last herein mentioned may be embodied with the report by which payment of the amount in question is recommended: Provided also that in cases of special expenditure under section 82 of this "Part" of these by-laws, the report directed by that section to be laid before the Council shall, if the outlay shall have been lawfully incurred, be deemed a sufficient certificate: And provided further, that in regard to salaries and wages of labour for officers, servants, and labourers employed at fixed rates of payment, by order of the Council, the certificate of the Mayor of the amount due to any such officer, servant, or labourer, and the order of such Mayor for payment of such amount, shall be a sufficient authorization for such payment; and such certificates, memoranda, and authorizations shall be attached respectively to the reports from the Finance Committee on the payments or outlays to which such certificates, memoranda, or authorizations have reference.

Common seal and records of the Council.

Common seal and press how secured.—Care of same.

85. The common seal and the press to which the same is attached shall be secured by a cover or box, which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk. Such common seal and press shall be in the custody and the care of the Council Clerk.

When and how common seal to be used.

86. The common seal shall not be attached to any document without an express order of the Council. In every case when such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or, in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account are to be kept and inspected.

87. The Treasurer shall keep such books of account and such records, statements, and memoranda of receipts and expenditure, in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda, from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect, or appearance of inefficiency which they may have discovered in the keeping of the same; also, to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

Records of the Council defined.—Provisions for proper keeping of same.

88. The minute book, letter book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls, and other records relating to elections, business papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business, addressed to the Council or to the Mayor, or to any officer or servant of the Council, orders, reports, returns, and memoranda, relating to Municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. All such records other than the minute book and other books, and other than electoral rolls and other records relating to elections, shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. Upon the face of every document thus registered, to which there is any reference in the minute book, there shall be a note of the page wherein it is so referred to. And when any order has been made by the Council, or a report has been brought up by any Committee thereof in reference to any document so registered as aforesaid, a note of such order or report shall be made upon such docu-

ment. It shall be the duty of the By-law Committee to inspect the records from time to time to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

Impression of seal not to be taken, &c., without leave of Council.—Penalties.

89. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same, without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable on conviction for the first offence to a penalty of not less than five shillings, nor more than two pounds; for a second offence to a penalty of not less than one pound, nor more than ten pounds; and for a third and every subsequent offence to a penalty of not less than five pounds, nor more than twenty-five pounds.

Records not to be removed, &c.—Penalties.—Exceptional circumstances.—Receipt to be given in every case before document received.—Proviso as to use of records as matter of evidence.

90. Any person removing any such book or other record of the Council as aforesaid, from the Council Chamber, or the place where by direction of the Council such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal, as hereinafter provided, shall, for every such offence be liable to a penalty of not less than ten shillings, nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid and shall not have returned the same, to prosecution for stealing such book or record, or to an action-at-law for detention of the same, as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor, in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform; also, that the Mayor, or the Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit at law, by, against, or at the instance of the Council; but in all such cases such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed: And provided also, that the Mayor, Council Clerk, or other officer of the Council, who may be subpoenaed to produce any book or other record of the Council in a Court of Law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall before removing the same leave at the Council Chamber a receipt for such book or other record as aforesaid; and every such person so temporarily removing any book or other record of the Council as aforesaid, shall be legally responsible for the safe keeping and return of the same.

Penalty for defacing or destroying record.

91. Any person destroying, defacing, or altering any record of the Council, shall for every such offence be liable to a penalty of not less than five pounds, nor more than fifty pounds.

Officers and Servants.

Notice to candidates in certain cases.

92. No appointment to any permanent office at the disposal of the Council, to which a salary or allowance of fifty pounds per annum, or a salary or allowance exceeding that amount, is attached, shall be made until public notice shall have been given, as hereinafter provided, inviting applications from qualified candidates for the same; the salary or allowance attached to such office shall in every case be fixed before such notice is given, and shall be stated in such notice.

Mode of appointment.

93. Every such appointment shall be made by ballot in such mode as may at the time be determined on, whenever there is more than one candidate for such permanent office.

Exceptional cases.

94. Nothing herein contained shall be held to prevent the employment as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of the Borough.

Bonds for good conduct.

95. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited with the Attorney or the Bankers of the Corporation, as the Council

may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Council Clerk.

96. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any other by-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Borough under the provisions of the said Municipalities Act. He shall also under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be entrusted to any other office, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Duties of Treasurer, &c.

97. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 87 of these by-laws, and shall be responsible for the safe keeping of the same; any other officer of the Council may have any other records thereof committed to his charge by an order of the Council, and in such case shall be responsible for the safe keeping of such records.

Duties of other officers and servants.

98. The duties of all officers and servants of the Corporation shall be defined by such regulations as may from time to time and in accordance with law, be made as follows, viz.:—As to the duties of the Council Clerk and his assistants (if any)—by the Mayor. As to the Treasurer, and all collectors of rates, bailiffs, bailiffs' assistants, and other officers and servants employed in and about the collection of revenue, whose superintendence is not hereinafter specially intrusted to any other Committee—by the Finance Committee. As to all surveyors, architects, clerks of works, overseers, inspectors of water supply, sewerage, or drainage, or other officers and servants employed in and about the public works of the Borough, and in the supply of water therefor, or the sewerage or drainage thereof, whose superintendence is not herein specially entrusted to any other Committee—by the Committee of Works. As to the Attorney for the Corporation, Inspector of Nuisances, and other officers and servants employed in and about the carrying out and enforcement of the general provisions of the Municipalities Act of 1867, and of any other statute of which the operation has been extended to the Borough, and of the by-laws for the general good government of such Borough, whose superintendence is not herein specially entrusted to any other Committee—by the By-law Committee. And as to librarians, managers of public institutions or reserves under the charge of the Council, and all other officers and servants employed in or about any matter over which the Council has control, and whose superintendence is not herein specially entrusted to any other Committee, or to the Mayor—by the Committee for General Purposes: Provided that all such regulations shall be in writing and shall be in all cases laid before the Council at the first meeting thereof, which shall be held after the making of any such regulations; and shall be in strict accordance with any such orders or directions as may have been at any time given by such Council touching the matters to which any such regulations may have reference.

Special powers of Mayor.

99. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation, or information is on record as hereinbefore provided; or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *viva voce*, or put into writing as the Mayor may direct.

How complaints against officers, &c., are to be dealt with.

100. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining. And no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the Mayor who, immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same. And if any such complaint be made to the Council, or to any member or officer thereof, it shall be referred to and investigated by the Mayor before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by such Council: Provided that every report, explanation, and information which may be made or rendered

in reference to every such complaint shall be in writing. And such Mayor shall state in writing the result of every such investigation and his opinion as to what order (if any) ought to be made in connection therewith; and such complaint, with all reports, explanations, and information as aforesaid, in connection therewith, and the Mayor's statement as aforesaid thereon, shall be laid before the Council at the next meeting thereof, which shall be holden after the Mayor shall have made such statement, and shall be duly recorded: Provided further that nothing herein contained shall be held to affect in any way the special power conferred on the Mayor by section 152 of the Municipalities Act of 1867, or any other special power which now is or hereafter may be conferred by statute upon such Mayor.

Miscellaneous.

Leave of absence.

101. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

Mode of calling for Tenders.

102. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work, or the supply of such material shall be called for by public notice, as hereinafter provided.

Drafts of intended by-laws.

103. A draft of every intended by-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any rate-payer who may desire to inspect the same; and public notice shall be given as hereinafter provided that such draft is so lying for inspection.

Motions for rescission of previous orders, &c.

104. Whenever a motion for the rescission of any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed by-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage, after due notice as hereinbefore provided, and in due course of law of any by-law for the repeal or amendment of any other by-law.

Lapsed business.

105. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council, after due notice; and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

Suits and prosecutions for penalties, &c.

106. Such suits or informations for the enforcement of penalties for or in respect of breach of the Municipalities Act of 1867, or of any by-law made thereunder, or of any statute, the operation of which may have been extended to the Borough, as may have been directed by the Council or by the By-law Committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows, namely:—When against a member of the Council, or an Auditor, or any officer of the Corporation—by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or by-law, imposing the penalty sought to be enforced, has been entrusted; and if there shall be no such officer then by any such officer or person as shall be appointed for that purpose by the Council or the By-law Committee, or the Mayor, as the case may be, on directing such suit or information as aforesaid; and no such suit shall be brought on information laid as aforesaid against any member of the Council, or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of such Council, or of the Mayor, nor against any other person, except upon the order of the Council, or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid as aforesaid, except on an express resolution of the Council; in any case where the bringing of such suit, or the laying of such information will be adverse to any previous direction by such Council; or where, on the trial or hearing of any such suit or information, the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may, on the order of the Council, be entrusted to an attorney.

How notices are to be published.

107. In all cases where public notice is or shall be required to be given by any by-law, of any appointment, resolution, act, order, or regulation done, made, or passed, or proposed to be made, done, or passed, by the Council, or by any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same twice in some newspaper circulating in the Borough.

Mode of proceeding in cases not provided for.

108. In all cases not herein provided for resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

Power to suspend, temporarily, certain portions of this by-law.

109. Any such section or sections of this "Part" of these by-laws, or any portion or portions of such sections or section as are not hereinafter excepted, may be suspended by resolution on notice at any meeting of the Council: Provided that there shall be a distinct statement in every such resolution, and in the notice of the motion whereon the same shall have been adopted, of the purpose for which such suspension is required, and that for every separate matter or business as to which such suspension is so required there shall be a separate resolution as aforesaid: And provided also that the following sections hereof shall never be suspended, nor shall any one of them, nor any portion of any of such sections, be suspended on any pretence whatever, namely:—Sections 5, 6, 7, 8, 9, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 34, 38, 39, 42, 44, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 95, 98, 99, 100, 101, 104, 106, 107, and 108.

PART II.

COLLECTION AND ENFORCEMENT OF RATES.

Times and modes of collection.

Rates under sec. 164 of the 31st Vict., No. 12, to be collected half-yearly.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be collected by half-yearly instalments. Each such instalment shall, as to every such rate and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appointed at the time of making or imposing such rate.

Special rates.

2. All rates levied or imposed by the Council under section 165, 166, and 167 of the said Municipalities Act of 1867 and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may by resolution, at the time of making or imposing such rates, or any of them, have appointed.

Rates to be paid at office of Council Clerk.

3. All persons liable to pay any rates as aforesaid shall pay the amount thereof, within the time prescribed by the said Act, into the office of the Council Clerk, during office-hours, that is to say, from five to six of the clock in the afternoon of every Monday, Wednesday, and Friday, except during such times as the Council may be actually sitting.

Defaulters.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

Mayor to enforce payment.

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Enforcement by distress.

Bailiff.

6. A bailiff shall, when found necessary, be appointed by the Mayor.

Bailiff's sureties.

7. The bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of twenty-five pounds each, for the faithful performance of his duty.

Duty of Bailiff.

8. It shall be the duty of the bailiff to make all levies by distress for the recovery of rates, in the manner hereinafter provided.

Warrant of distress.

9. All levies and distresses shall be made under warrant in the form of schedule A hereto, under the hand of the Mayor, or any Alderman who may for the time being be duly authorized to perform the duties of that office.

Distress and Sale, &c.

10. If the sum for which any such distress shall have been made shall not be paid, with costs as hereinafter provided, on or before the expiration of five days, the bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Borough as the bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

Inventory.

11. At the time of making a distress the bailiff shall make out a written inventory in the form of schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the bailiff shall give a copy of the inventory to the rate-payer on demand, at any time within one month after making such distress.

Goods may be impounded.

12. The bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days, as hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same, on account of the purchaser thereof.

Owner to direct order of sale.

13. The owner of any goods or chattels so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

14. The bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

15. There shall be payable to the bailiff for the use of the Council, for every levy and distress made under this by-law, the costs and charges in the schedule hereunto annexed, marked C (a).

SCHEDULE A.

Warrant of Distress.

I, Mayor of the Borough of do hereby authorize you the bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of situate at for being the amount of rates due to the said Borough to the day of for the said dwelling-house (or land or premises, as the case may be) and to proceed thereon for the recovery of the said rates according to law.

Dated this day of 186 .

Mayor.

SCHEDULE B.

Inventory.

I HAVE this day, in virtue of the warrant under the hand of the Mayor of the Borough of dated distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of situate at within the said Borough, for being the amount of rates due to the said Borough to the day of

Dated this day of 186 .

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy where the sum is not more than £20	2	0
Above that sum, in addition for every £1	0	1
For making and furnishing copy of inventory...	2	0
For man in possession, each day, or part of a day	5	0
For sale, commission, and delivery of goods, per pound on proceeds of the sale	1	0

PART III.

PREVENTING AND EXTINGUISHING FIRES.

Fire or combustible materials, &c.

1. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials, to remain as aforesaid for forty-eight hours after any such conviction shall be deemed guilty of a further offence against this by-law.

Inflammable fences, &c.

2. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack, any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit, on conviction for every such offence a penalty of not more than five pounds, and also shall remove such fence, stack, or covering, within a reasonable time after such conviction. And any person failing to remove such fence, stack, or covering, within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this by-law.

Fireworks.

3. Every person who shall light any bon-fire, tar barrel, or firework upon or within sixty yards of any public or private street, or any public place, or shall sell gunpowder, squibs, rockets, or other combustible matter by gas, candle, or other artificial light, shall forfeit a sum not exceeding five pounds.

Wilfully setting fire to chimneys.'

4. Every person who wilfully sets, or causes to be set on fire, any chimney-flue, smoke-vent, or stove-pipe herein called in common a "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney, from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

Water carters to attend at fires.

5. Every owner and driver of a licensed water-cart shall keep such cart loaded with water during all times after sunset and before sunrise; and shall, if any building, premises, or property shall be on fire within the Borough, attend at the place of such fire with such cart loaded with water, and shall continue to cart water by full loads to such place, and shall deliver such water in such manner as may be required by the Mayor, or by any Alderman or Officer, or person duly authorized by the Council in that behalf, and then present, for extinguishing such fire; and every such owner or driver who shall, without reasonable excuse, fail to comply with the provisions of this section, shall forfeit a sum not exceeding ten pounds.

Compensation for attendance at fires.—Rewards.

6. There shall be paid out of the Borough funds, to the owner of every licensed water-cart who shall have attended with any water at the place of any fire as herein provided, and delivered the same as required for extinguishing such fire, such reasonable compensation as the Council shall, by resolution, have appointed in that behalf, and also to such owners of such carts as shall have first and second in order attended with loads of water, such further sums, by way of reward, as the Council may, by similar resolutions, have fixed.

PART IV.

STREETS AND PUBLIC PLACES.—PUBLIC HEALTH AND DECENCY,
&c.*Streets, &c.*

New roads to be reported upon.

1. No new public road, street, way, park, or other place proposed to be dedicated to the public shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by the Committee for Works and reported upon to the Council by such Committee.

Plans of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the said Borough shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, park, or other place as aforesaid.

Dedication of new roads, &c.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans, so signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or other place to public use or recreation as aforesaid, as may be considered necessary by the Committee for General Purposes; and such further instrument of dedication shall also be preserved as a record of the Council.

Committee for Works to fix street levels, &c.

4. The Committee for Works, or any officer or person acting under the supervision of such Committee shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Borough and the carriage and foot ways thereof; and it shall be the duty of such Committee, officer, or person to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council, as hereinafter directed.

Change of street levels.

5. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section showing the proposed cuttings to be exhibited at the Council Chamber for fourteen days, for the information and inspection of ratepayers, and shall notify, by advertisement in some newspaper circulating in the Borough, that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk. And such plan and section so signed and countersigned shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

6. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed, any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any street or other public place within the said Borough, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds, nor less than one pound.

Holes to be enclosed.

7. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole, adjoining or near to any street or public place within the said Borough, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Borough, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings, nor exceeding five pounds.

Open spaces and steps adjoining the footways to be enclosed under penalty.

8. Every owner or occupier of any house, building, premises, or land, within the said Borough, having any entrance area, garden, or other open space, or any vacant building lot, water-hole, or excavated space, adjoining the footway of any street or public place in such Borough, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and every such owner or occupier of any such house, building, premises, or land, having any steps adjoining the footway of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent the like danger to persons passing and repassing; and on failure thereof every such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid, within seven days after any such conviction as aforesaid, shall be deemed guilty of a further offence against this by-law.

Wells to be covered over.—Penalty.

9. Every person who shall have a well situated between his or her dwelling-house or the appurtenances thereof, and any road, street, or footway, within the limits of the said Borough, or at the side of, or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover over and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall, on conviction, forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered, contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this by-law.

Temporary stoppage of traffic for repairs, &c.

10. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this by-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber, &c.

11. Any person who shall haul or draw, or cause to be hauled or drawn, upon any part of any street or public place within the said Borough, any timber, stone, or other thing, otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street or public place, to the injury thereof; or to hang over any part of any such vehicle or barrow, so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall, upon conviction, forfeit and pay for every such offence a sum of not more than forty shillings, nor less than five shillings over and above the damages occasioned thereby.

Driving carriages, &c., on footways, and throwing filth, &c.

12. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way or foot way of any street or other public place in the said Borough, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over, or be on any or either of any such carriage or foot way; or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said foot ways of any such street or public place any waggon, cart, dray, sledge, or other carriage, or any wheel, wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride, any horse, ass, mule, or other beast upon any such footway, shall, upon conviction, forfeit and pay for the first offence a sum not exceeding forty shillings, nor less than five shillings; for the second offence a sum not exceeding five pounds, nor less than ten shillings; and for a third and every subsequent offence a sum not exceeding ten pounds, nor less than one pound, for each such offence.

Placing carriages, goods, &c., on footways, &c.—Not removing when required.—Replacing the same after removal.—Not to prevent awnings being erected in front of shops.

13. Any person who shall set or place, or cause or permit to be set or placed, any stall-board, chopping-block, show-board (on hinges or otherwise), basket, wares, merchandise, casks, or goods of any kind whatsoever; or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any

pipe, barrel, cask, or vessel, in or upon or over any carriage or foot way in any street or public place within the said Borough, or shall set out, lay, or place, or shall cause or procure, permit or suffer, to be set out, laid, or placed, any coach, cart, wain, waggon, dray, wheelbarrow, handbarrow, sledge, truck, or other carriage upon any such carriageway, except for the necessary time of loading or unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage; or if any person shall set or place, or cause to be set or placed, in or upon or over any such carriage or foot way any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed, as herein directed) or any other matters or things whatsoever; or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever, from any house or other building or premises, over any part of any such footway or carriageway, or over any area of any house or other building or premises, or any other matter or thing from and on the outside of the front or any other part of any house or other building or premises over or next unto any such street or public place, and shall not immediately remove all or any such matters or things, being thereto required by the Inspector of Nuisances, or other proper officer of the Council; or if any person who having, in pursuance of any such requisition as aforesaid, removed or caused to be removed, any such stall-board, show-board, chopping-block, basket, wares, merchandise, casks, goods, coach, cart, wain, waggon, dray, wheelbarrow, handbarrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matters or things, shall at any time thereafter again set, lay, or place, expose or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, wheelbarrow, handbarrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid) in, upon, or over any such carriage or foot way of or next unto any such street or public place as aforesaid, shall upon conviction for every such offence forfeit and pay for the first offence a sum not exceeding forty shillings, nor less than five shillings; for the second offence a sum not exceeding five pounds, nor less than ten shillings; and for a third and every subsequent offence a sum not exceeding ten pounds, nor less than one pound: Provided that nothing herein contained shall be deemed to prevent any person from placing an awning in front of his or her shop or house in such manner as that such awning shall be at least seven feet above the height of the footway, and that the posts be placed close to the curb-stone or outer edge of such footway.

Slop, night-soil, &c., to be conveyed away only at certain hours.

14. Any person or persons who shall drive or cause to be driven any cart or other carriage with any night-soil or ammoniacal liquor therein, through or in any street or public place within the said Borough, between the hours of five o'clock in the morning and ten o'clock at night, or shall fill any cart or other carriage so as to turn over or cast any night-soil, ammoniacal liquor, slop, mire, or channel dirt, or filth, in or upon any such street or public place, or shall deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house than shall be directed by the said Council, or by the Inspector of Nuisances; or shall remove night-soil or other offensive matter otherwise than in properly covered and watertight carts or other vehicles; or shall cause any vehicle used for this purpose to stand on any premises nearer to any road, street, or dwelling-house, than shall be directed by the said Council or the said Inspector of Nuisances, shall for every such offence forfeit and pay any sum not exceeding five pounds; and in case the person so offending shall not be known to the said Council or Inspector then the owner of such cart or carriage in which such night-soil or other offensive matter shall be put or placed, and also the employer of the person so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Riding on drays, careless driving, &c.

15. If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver, or guided with reins only, excepted); or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses, or cattle drawing the same; or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare; or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care upon such street;

or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so offending shall, upon conviction forfeit and pay any sum not exceeding forty shillings.

Riding or driving furiously, &c.

16. Any person who shall ride or drive through or upon any street or public place within the said Borough, so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered, shall on conviction forfeit and pay a sum not exceeding ten pounds, nor less than two pounds.

Blasting Rock.

No rock to be blasted without notice to the Council Clerk.

17. Any person who shall be desirous of blasting any rock within one hundred yards of any street or public place, or dwelling-house in the said Borough, shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast, or cause to be blasted, any rock within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall on conviction forfeit and pay for every such offence any sum not less than five pounds, nor more than twenty pounds.

Public Property.

Injuring or extinguishing lamps.

18. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Borough, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound, nor more than five pounds.

As to damaging buildings.

19. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice-bridge, culvert, sewer, water-course, or other public property within the said Borough, shall pay the costs of repairing the same; and if such damage be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds, nor less than five pounds.

Damaging trees.

20. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds, nor less than one pound.

Nuisances.

Dead animals, &c., not to be thrown into any public watercourse, &c.

21. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public water-course, sewer, water-hole, river, creek, or canal; or who shall suffer slops, suds, or filth of any kind to flow from his or her premises into any such water-course, water-hole, river, creek, or canal, or who shall permit or suffer any such slops, suds, or filth, to flow from his or her premises over any of the footways or streets of the Borough, or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever to flow into any public water-course, water-hole, river, creek, or canal; or shall obstruct or divert from its channel any sewer or water-course, river, creek, or canal, shall forfeit any sum not exceeding five pounds.

Swine not to be kept.

22. Any person who shall breed, feed, or keep any kind of swine, in any house, building, yard, garden, or other hereditament situate and being in or within forty feet of any street or public place or any dwelling-house in the said Borough, or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any such street or public place shall, on conviction forfeit and pay for every such offence a sum not exceeding forty shillings, nor less than five shillings.

As to private avenues, &c.

23. Any owner or occupier of any house or place within the said Borough, who shall neglect to keep clean all private avenues, passages, yards, and ways, within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings, nor less than ten shillings, for every such offence.

Cleansing butchers' shambles, slaughter-houses, &c.

24. For preserving the cleanliness of the said Borough and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as

often as he or either of them shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellmongering establishments in the said Borough, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding ten pounds, nor less than ten shillings.

Inspection of premises, &c.

25. Upon the reasonable complaint of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this by-law, to go upon such premises for the aforesaid purpose.

Various obstructions and annoyances.

26. Every person who, in any street or other public place or passage within the said Borough, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds:—

Every person who shall hoist, or cause to be hoisted, or lower, or cause to be lowered, goods of any description from any opening in any house, fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place the carcase, or any part of the carcase, of any newly-slaughtered animal, without a sufficient and proper cloth covering the same, for the concealment from public view, or shall hawk or carry about butcher's meat for sale without covering the same as aforesaid.

Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window, near to any street or public place, without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof, or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure when any house or building is being erected, pulled down, or repaired).

Every blacksmith, whitesmith, anchor-smith, nailmaker, metal-founder, lime-burner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window and closing such aperture, or placing a screw before the same every evening, within one hour after sunset, so as effectually to prevent the light from showing through the doorway, window, or aperture next or upon such street, lane, or passage.

Every person who shall, within the distance of one hundred yards from any dwelling-house, burn any rags, bones, cork, or other offensive substance, to the annoyance of any inhabitant.

Every person who shall carry goods or any frame to the annoyance of any person upon the footway of any street or other public footway.

Every person who shall be the keeper of, or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right-of-way or use of any private yard, alley, street, or any other place within the said Borough.

Premises in state to endanger public health.

Houses to be purified on certificate of two medical practitioners.

27. If, upon the certificate of any two duly qualified medical practitioners, it appear to the Council that any house, or part thereof, or the premises occupied in connection therewith, within the limits of the said Borough, is in such a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house, or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same, as the case may require; and if the person to whom notice is so given shall fail to comply therewith, within such time as shall be specified in the said notice, he shall be liable to a penalty not exceeding ten shillings

for every day during which he continues to make default: Provided that no such penalties shall collectively amount to any greater sum than twenty pounds.

Offences against public decency.

Bathing prohibited within certain limits.

28. Any person who shall bathe near to or within view of any inhabited house, or of any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Borough, between the hours of six o'clock in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

Penalty on indecent exposure of the person.

29. Any individual who shall offend against decency by exposure of his or her person in any street or public place within the said Borough, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds, nor less than five pounds.

Houses of ill-fame.

30. Upon representation of any respectable ratepayer, that any house or premises within the Borough, and near to the residence of such ratepayer, is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupations of all the inmates of the said house or premises; and upon non-compliance with such request, or if, upon consideration, the said Committee consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance; and shall cause a notice, in writing, to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice. And if such nuisance be not so abated the holder of such house or premises, or other person residing or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall, on conviction thereof, forfeit and pay any sum not less than two pounds, nor more than twenty pounds. And if such nuisance shall not be abated within forty-eight hours after such conviction such holder of such house or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum of not less than five pounds, nor more than fifty pounds. And if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house, or other person residing or being therein as aforesaid, shall for such third offence forfeit and pay any sum not less than ten pounds, nor more than fifty pounds.

PART V.

Noisome and Offensive Trades.

No noisome or offensive trades to be carried on to injury of any inhabitants.

1. No person shall carry on any noisome or offensive trade within the said Borough, so as to injure or be a nuisance, as hereinafter stated, to the inhabitants thereof.

Definition of "noisome and offensive trades."

2. Any manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in consequence of or in connection wherewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, or smoke shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Borough, shall be considered a "noisome and offensive trade" within the meaning of these by-laws.

Complaint.—Inquire and report.—Order of Council thereon.—Notice to discontinue, &c.—Penalty.

3. Upon complaint in writing by any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property as to injure his or her health, or the health of any member of his or her family, or to be a nuisance to such householder, and to his or her family, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint, and shall report thereon to the said Council. And if the said Council shall, on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, and that any manufacture, trade, calling, or operation, so complained of, and so being conducted, followed, or carried on as aforesaid, is a "noisome or offensive trade" within the meaning of these by-laws, notice shall be given to the person or persons conducting, following, or carrying on such trade to cease and discontinue the same within such reasonable time, not being less than thirty days nor more than sixty days, as the

said Council may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling, or operation, as that within such reasonable time as aforesaid the same shall wholly and permanently cease to be noisome and offensive, within the meaning of these by-laws, either to the said complainant or to any other resident within the said Borough. And if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be noisome and offensive as aforesaid, within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid shall for the first offence forfeit and pay a sum of not less than forty shillings, nor more than five pounds; for a second offence a sum of not less than five pounds, nor more than twenty-five pounds; and for the third and every subsequent offence a sum of not less than ten pounds nor more than fifty pounds.

Mode of proceeding when "noisome and offensive trade" is about to be commenced.—Penalty.

4. The like proceedings shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation, is about to be commenced or entered upon which is likely to prove "noisome and offensive" within the meaning of these by-laws, save and except the notice to be given as aforesaid shall be given to the person or persons about to commence or enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them, not to commence or enter upon the same, or to take such measures as shall effectually and permanently prevent the same from becoming "noisome or offensive" within the meaning of these by-laws, to any resident within the Borough. And any person who shall in any such case commence, enter upon, or continue any such manufacture, trade, calling, or operation, so that the same shall be in any way "noisome and offensive" within the meaning of these by-laws, shall for every such offence forfeit and pay a sum of not less than ten pounds, nor more than fifty pounds.

Service of Notice.—Liabilities.

5. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these by-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation, within the meaning and for all the purposes of these by-laws.

PART VI.

PUBLIC EXHIBITIONS, &c.

Exhibitions, &c., to be licensed.

1. No exhibition, other than exhibitions licensed by the Colonial Secretary under the provisions of the Act 14th Victoria, No. 23, or exhibitions of a temporary character hereinafter specially provided for, shall be held or kept for hire or profit within the said Borough, nor shall any bowling-alley or other place of public amusement other than a place licensed as aforesaid, or a place for temporary amusement hereinafter specially provided for, be used as such, for hire or profit, within the said Borough, unless and until the same shall be duly registered as hereinafter prescribed.

Temporary license by Mayor.—Penalty for exhibiting, &c., without license.

2. It shall be lawful for the Mayor, by writing under his hand, and without charge, to permit any such exhibition as aforesaid (other than an exhibition requiring to be licensed by the Colonial Secretary under the said Act) and which shall not be held or kept for more than one week, and in like manner to allow any place within the said Borough to be used for purposes of public amusement other than entertainments requiring to be licensed as aforesaid, for not more than one week: Provided that it shall be incumbent upon such Mayor to inquire strictly as to the nature of such proposed exhibition or amusement, before granting such permission, and to refuse such permission if it shall appear that such proposed exhibition or amusement is of such a nature as to require to be licensed by the Colonial Secretary, as aforesaid, or if there shall be reasonable cause for believing that such exhibition or amusement will be likely to entail any violation of public decency, to endanger the public peace, or to be a nuisance to any inhabitant of the Borough. Every person holding or keeping any such exhibition, or using any place within the said Borough for public amusement as aforesaid, or causing or permitting such place to be so used, without such permission of such Mayor, shall forfeit and pay a sum of not less than five shillings, nor more than forty shillings for every day that such exhibition shall be so held or kept, or such place shall be so used for public amusement as aforesaid.

Public buildings, &c., to be registered.

3. Every occupier of any building or ground in which any exhibition is held or kept, or any public amusement conducted as aforesaid, shall in each year register at the office of the Council such building or ground, together with the situation and description thereof, and of the exhibition proposed to be held or kept, or the public amusement proposed to be conducted as aforesaid, in or upon such building or ground, and the name of such occupier. And every person who causes, and every occupier of any such building or land who permits, any such exhibition to be held or kept, or any public amusement to be conducted for a longer period than one week, in or on any such building or land not being registered for the purpose, or without such certificate of registration as hereinafter mentioned having been obtained for the same, shall forfeit for every such offence any sum not less than one pound, nor more than twenty pounds.

Certificates of registration, &c.

4. The Council, upon the written application of any such occupier as aforesaid, stating the particulars aforesaid, and if, upon inspection by the proper officer, the building or land shall have been found to be secure and proper for the purpose stated, and if the proposed exhibition or amusement shall not be such as to require a license from the Colonial Secretary as aforesaid, and shall not be thought likely to entail any violation of public decency, or to endanger the public peace, or to be a nuisance to any inhabitants of the said Borough, the said Council shall cause the aforesaid premises to be registered in a registry book to be kept for that purpose, and shall thereupon grant to the applicant a certificate of such registration of such premises. And the said Council may at any time and for any of the causes hereafter mentioned, suspend for a stated period the effect of or cause any such registration, and shall forthwith give notice of such suspension or cancellation to the occupier of the registered building or land; and during such suspension, or after such cancellation, such premises shall be deemed to be unregistered in respect of the purpose mentioned in the certificate of registration, and such certificate shall be of no force or virtue.

Inspection.

5. The proper officer of the Council may at all reasonable times enter into or upon and inspect any such registered building or land.

No exhibitions, &c., on Sundays, &c.

6. No such exhibition or place of public amusement as aforesaid shall be held or kept open or used for the purposes of such public amusements on Sunday, Christmas Day, or Good Friday; and every person offending against this by-law in this behalf, shall on conviction forfeit and pay a sum not exceeding five pounds, nor less than two pounds, for every such offence.

Registration fee.—Time for which registration shall be in force.

7. For every such registration as aforesaid the occupier of the building or land so registered shall pay to the Council Clerk, for the benefit of the said Borough, a fee of one pound; and every such registration, whenever the same may be made, shall be in force until the thirty-first day of December then next ensuing and no longer.

Certificate of registration to operate as license for exhibition, &c., named therein, and no other.

8. The certificate of registration aforesaid shall be regarded as a license from the Council for the holding or keeping of the exhibition or for carrying on of the public amusements therein mentioned, but for none other. Any occupier of such building or land who shall hold or keep therein or thereon any exhibition, or shall use such building or land for any public amusements other than such exhibition or amusements mentioned in such certificate or license shall, for every such offence, forfeit and pay any sum not less than ten shillings, nor more than ten pounds.

Unlawful games and exhibitions.

9. No license shall be granted as aforesaid to or for any building or land wherein or whereon any games with dice, or other games of chance for money, or any bull-baiting, dog-fighting, cockfighting, or other exhibitions or amusements opposed to public morality or involving cruelty to animals, or likely to cause any breach of the peace, are proposed to be had or carried on; and the occupier of any building or land so registered as aforesaid, who shall permit any such game of chance or exhibition or amusement as are in the section before-mentioned, to be had, held, or carried on in or upon such building shall for every such offence forfeit and pay a sum of not less than ten shillings, nor more than ten pounds.

Suspension or revocation of license.—Notice to be given and license to be allowed to shew cause.

10. The effect of any such registration as aforesaid may be suspended, or such registration may be cancelled, as the Council shall think fit, for any of the following causes, namely:—Whenever the occupier of the registered building or land, or the manager of any such exhibition or amusement as aforesaid, held, kept, conducted, or carried on in or upon such building or

ground, shall have been twice convicted of offences against these by-laws within a period of twelve months, or whenever it shall be shewn to the satisfaction of the said Council that the superintendent, director, or manager, or other person in charge of any such exhibition or amusement is a confirmed drunkard, or that such exhibition or amusement is being conducted in such a manner as to violate public decency, to endanger the public peace, or to become a nuisance to any inhabitants of the said Borough: Provided that before any such suspension or cancellation as aforesaid the occupier of such registered building or land shall have notice of the fact that the said Council is about to consider whether there shall be any such suspension or cancellation and of the causes for this proceeding, and shall be allowed to shew cause against such suspension or cancellation before the same shall be ordered.

Construction of term "occupier."—Change in occupancy.—False statement.

11. Any person who shall superintend, direct, or manage, or shall be otherwise in charge of any such exhibition or public amusement as aforesaid, in or upon any such buildings or land as aforesaid; or who shall reside in or upon any such building or land wherein or whereon any such exhibition or public amusement shall be held, kept, or carried on; or who, being the owner, lessee, or tenant of any such building or land, shall permit the same to be used for the purposes of any such exhibition or public amusement, shall be deemed the occupier of such building or land for all the purposes of these by-laws. And the said by-laws shall be held to be as applicable in every case to any number of such occupiers as to any single occupier. And every such occupier whose name shall have been so registered as aforesaid shall be deemed and taken to be, and continue to be, such occupier for all the purposes of these by-laws: Provided that in the event of any change in the occupancy of any such building or ground as aforesaid, it shall be competent for the parties concerned to notify the same, by writing under their hands, to the said Council Clerk, who shall lay such notification before the Council at its next meeting; and if after such inquiry as such Council may deem necessary, there shall seem to be no valid objection to such change of occupancy, a corresponding entry shall be made in the registry aforesaid, and a new certificate shall be issued, which shall be in force until the then next ensuing 31st day of December, and no longer. And for every such new certificate a fee of five shillings shall be paid to the said Council Clerk for the benefit of the said Borough. And any person who shall make any false statement in any such application or notice as aforesaid as to any of the facts or particulars required by these by-laws to be stated in such application or notice, shall for every such offence forfeit and pay any sum not less than one pound, nor more than twenty pounds.

PART VII.

WATER SUPPLY.

Polluting water, reservoirs, &c.

1. Whosoever shall bathe in any stream, reservoir, conduit, aqueduct, or other waterworks belonging to or under the management or control of the Council, or shall wash, cleanse, throw, or cause to enter therein, any animal, whether alive or dead, or any rubbish, filth, stuff, or thing of any kind whatsoever, or shall cause or permit to suffer to run, or to be brought therein, the water of any sink, sewer, drain, engine, or boiler, or other filthy, unwholesome, or improper water, or shall wash any clothes at any public fountain or pump, or in or at any such stream, reservoir, conduit, aqueduct, or other waterworks as aforesaid, or shall do anything whatsoever whereby any water or waterworks belonging to the said Council, or under their management or control, shall be fouled, obstructed, or damaged, shall for the first offence forfeit and pay any sum not exceeding five pounds; for a second offence any sum not less than ten shillings, nor more than five pounds; and for the third and every subsequent offence any sum not less than one pound, nor more than twenty pounds.

Willful waste of water.

2. Whosoever being supplied with water by the Council from any waterworks, fountain, or reservoir, or of or belonging to, or under the control or management of the said Council, or having access to any such waterworks, fountain, or reservoir, for the taking of water therefrom, shall wilfully or negligently suffer any water to run to waste from any pipe, pump, or conduit, from or by which he shall be so supplied, or to which he shall have such access, shall forfeit and pay for the first offence any sum not exceeding five pounds; for a second offence any sum not less than one pound, nor more than twenty pounds; and for a third and every subsequent offence any sum not less than five pounds, nor more than forty pounds.

Damming up water without consent.

3. Whosoever shall, without the consent in writing of the Council, construct or place any dam or embankment in or across any river, creek, or natural watercourse, shall forfeit and pay any sum not less than one pound, nor more than twenty pounds, and shall remove such dam or embankment within a reasonable

time after such conviction, or shall forfeit and pay any sum not less than five pounds, nor more than fifty pounds. And if after such second conviction such person shall fail to remove such dam or embankment within a further reasonable time he shall forfeit and pay a sum of not less than twenty pounds, nor more than fifty pounds; and if, within a reasonable time after a third or any further conviction, he shall still fail to remove such dam or embankment, he shall for every such offence forfeit and pay a sum of fifty pounds.

Diverting water from reservoirs of Council in certain cases.

4. In any case in which the Council shall have the exclusive right of collecting for the supply of any reservoir or waterworks belonging to the said Council, or under their management or control, the storm-water having fallen on any gathering ground, whosoever shall, by any means whatsoever, divert any such water from the course of its natural flow, so that the same shall tend to flow elsewhere than to such reservoir or waterworks, or some watercourse leading thereto, or shall flow to the same respectively in a foul state, shall forfeit and pay for the first offence any sum not less than one pound, nor more than twenty pounds; for a second offence any sum not less than two pounds, nor more than forty pounds; and for a third and every subsequent offence any sum not less than five pounds, nor more than fifty pounds.

PART VIII.

Sewerage and Drainage.

No private sewers to be made to communicate with the public sewers without notice.

1. It shall not be lawful for any person, without notice to the Council, or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer into any of the said public drains or sewers, or into any drain or sewer communicating or to communicate therewith, without such notice, or otherwise than as aforesaid, every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds.

Proprietors of private sewers, &c., to repair and cleanse same.

2. All drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council, at the costs and charges of the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired and cleansed, according to the direction of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

Drains for discharge of surface-water from land.

3. Every owner or occupier of land in, adjoining to, or near any street, if such land shall be so situated that surface or storm water from or upon the same shall overflow or shall tend naturally, if not otherwise discharged, to overflow any footway of such street, shall within seven days next after the service of notice by the Council for that purpose, construct and lay from such point upon such land being near to the footway, as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel at the outer edge of the footway to the said channel, and through, under, and transversely to the footway, and keep in good condition such covered drain, or trunk as and subject to the inspection of the Council or its proper officers; and in default of compliance with any such notice within the period aforesaid, or with the provisions of this section, such owner or occupier shall forfeit any payment not exceeding five pounds. And if within seven days after such conviction such owner or occupier shall still have failed to comply with such notice, or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound, nor more than ten pounds; and for every further such offence he shall forfeit and pay any sum not less than two pounds, nor more than twenty pounds. And every such owner or occupier who shall still have made default as aforesaid for more than seven days after such second or any future conviction, shall be held guilty of a further offence within the meaning of this section.

PART IX.

Public Libraries and Museums, &c.

Hours.

1. Every public library or museum belonging to or under the control or management of the Council shall be open to the public on every lawful day from six of the clock, p.m., to nine of the clock, p.m.

Visitors' book to be signed.

2. Every person who shall enter any such public library or museum shall immediately on entering the same write his or her name and address in a book to be kept for such purpose at each such library and museum, and to be called the "Visitors' Book;" and if such person shall be unable to write, then such name and address may be so written by any other person, or shall be so written by the proper officer of the Council at such library or museum, at the request of such person; and no person who shall refuse to comply with this regulation shall be permitted to enter or remain in such museum; and it shall be the duty of the officer of the Council in charge of such library or museum to enforce this by-law.

Misconduct, &c., in Library or Museum.

3. Every person who shall, being intoxicated, enter or remain in any such public library or museum, or who shall use therein any abusive, improper, or unbecoming language, or who shall by unnecessary loud talking, or any unnecessary noise or otherwise, disturb or annoy the persons using or resorting to such library or museum, or who shall without lawful excuse, but without felonious or larcenous intent, remove any property from such library or museum, shall forfeit and pay any sum not less than ten shillings, nor more than ten pounds; and every such person may be forthwith removed by any officer of the Council in charge of such library or museum.

Applicants for books, &c., to be served in due order.—Special permission for removal of books, &c.

4. Every person who at any such library shall desire to read or to refer to any book or other publication placed or deposited in such library for public use, shall have the same handed to him in his turn by the officer in charge of such library, or his assistant, and shall have the exclusive use in such library of such book or other publication for such time as by regulation made by the said Council in that behalf, as hereinafter stated, may have been prescribed. But no person shall remove any such book or other publication from such library without the permission, in writing, of the Mayor, or of two Aldermen of the said Borough; and every such permission shall specify the book or other publication to which it has reference, and the time for which the same is to be permitted to be removed from the said library. And no such permission shall be of any force, or shall be attended to, which shall in any way conflict with or be opposed to any regulation made by the said Council as aforesaid. And every such permission shall be recorded by the officer in charge of such library, and the Mayor or Aldermen granting the same shall be responsible for the return, in proper time and in good order, of the said book or other publication; and it shall be the duty of the officer of the Council in charge of such library or museum to carry out and enforce this by-law in every respect.

Rules as to use of apparatus, &c.

5. The like rule shall in every respect apply to the use of any apparatus, model, or specimen belonging to any such library or museum as aforesaid, except that in such case such apparatus, model, or specimen shall only be removed on the written permission of the Mayor and two Aldermen, or of four Aldermen without the Mayor, and then only for the purpose of preparing any lecture to be given in the said Borough, and for so long a time only as may be necessary for the preparation of such lecture.

Applications for use of books, &c., to be made to officer in charge.

6. Any person who may, at any such library or museum, desire to read or to refer to, or to use or examine any such book, publication, apparatus, model, or specimen as aforesaid, shall apply for the same to the officer of the Council in charge of such library or museum, and shall return the same to such officer after having read, referred to, used, or examined the same; and it shall be the duty of such officer to carry out and enforce this by-law in every respect.

Loan or deposit of books or apparatus, &c., on special conditions.

7. It shall be lawful for any person, with the consent of the Council, to lend to or deposit at any such library or museum any book or other publication, or any apparatus, model, or specimen for public use or inspection, subject to such special restrictions as to such use or inspection as such person may prescribe; and the officer of the Council in charge of such library or museum shall in such case hold every such book, publication, apparatus, model, or specimen in trust for the person so

lending or depositing the same, and shall carry out and enforce such restrictions as such person may have so prescribed as aforesaid.

Use of library, &c., by Society for mutual improvement, &c.

8. Any society or class for mutual improvement or instruction, or for study or experiments, may, with the consent of the Council, be formed in connection with, or may hold its meetings or carry on its studies or experiments at any such library or museum: Provided that the general free access to and use of the said library or museum by persons who are not members of such society or class be not thereby interfered with: Provided, however, that no rule made by the members of any such society or class for the management of the same shall be of any force until the same shall have been submitted to and sanctioned by the said Council, nor in any case if the same shall conflict in any way with this "Part" of these by-laws, or with any regulation made by the said Council hereunder.

Record of donations.

9. A record shall be made of every donation to each such library or museum, which book shall be opened to the inspection of all persons visiting such library or museum.

Further regulations.

10. The Council shall from time to time make such regulations as may be required for any of the following purposes:— For determining the order in which any book or other publication, or any apparatus, model, or specimen shall be handed to persons desiring to read or refer to, or to use or examine any such apparatus, model, or specimen; and the time during which each such person shall be allowed to retain the exclusive use as aforesaid of any such book or other publication, apparatus, model, or specimen; for defining the conditions on which any special permission may be given as aforesaid for the removal of any book or other publication, or of any apparatus, model, or specimen from any such public library or museum, and for prohibiting the removal of any such book, publication, apparatus, model, or specimen; for defining the conditions on which the Council will consent to the loan on deposit as aforesaid of any book or other publication, apparatus, model, or specimen, with special restrictions relative to the use or inspection of the same as aforesaid, and the carrying out or enforcement of such restrictions; for defining the conditions on which any such public library or museum may be used as aforesaid by any society or class for mutual improvement or instruction, or for study or experiments; for regulating the marking of books or other publications; for defining the mode in which the books and records of any such library or museum shall be kept, and in which the duties of any officer in charge thereof, or any assistant employed thereat, shall be carried out; for prescribing any additional precautions which may be considered necessary for the safe keeping and care of any such books, publications, apparatus, models, or specimens as aforesaid. It shall be the duty of the officer of the Council in charge of every such public library or museum to carry out and enforce this by-law and the regulations so made thereunder.

Copy of by-laws to be kept at Library, &c., for reference.

11. A copy of this "Part" of these by-laws, and copies of all regulations made thereunder as aforesaid shall be kept at every such public library or museum, and it shall be the duty of the officer of the Council in charge of such library or museum to allow visitors to the same, who may desire so to do, to refer to any such copy.

Penalty for damaging visitors' book, &c.

12. Any person who shall wilfully damage any visitors' book, catalogue, copy of by-laws, or other book or record kept at any such library or museum, for the general uses thereof, shall for every such offence forfeit and pay any sum not less than ten shillings, nor more than ten pounds.

Passed by the Municipal Council of Marrickville, this fourth day of January, in the year of our Lord one thousand eight hundred and sixty-nine.

CHARLES ST. JULIAN,
Mayor.

By order of the Council,
G. C. TOMPSON, Council Clerk.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY BOUNDARIES AMENDMENT BILL.

(PETITION—MUNICIPALITY OF PADDINGTON.)

Ordered by the Legislative Assembly to be Printed, 12 October, 1869.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the Municipal Council of the Borough of Paddington,—

RESPECTFULLY SHOWETH:—

That your Petitioners having heard with deep concern that a Bill is now before your Honorable House to amend the City Boundary, which if carried in its present form will seriously affect the interests of this Borough,—the portion which your Petitioners complain of is contained in Schedule A, and reads as follows:—"Thence again on the east by the centre of Dowling-street to a point where it intersects the southern boundary of Paddington thence on the north by that boundary to its intersection with the centre of Regent-street thence by the centre of Leinster-street to the centre of Gordon-street thence by the centre of Regent-street to the north side of Park Road thence by the north side of that road to the south-eastern angle of St. Matthias' Church land thence by the south-eastern and eastern boundaries of that land to the southern alignment of the South Head Old Road." Your Petitioners beg to state that the above boundary if granted will divide properties, leaving half in Paddington and half in Sydney, and will doubtless cause serious inconvenience and prove a source of litigation to both parties in collecting their respective revenues. Although the whole of the land between the boundary above described and the Park Road does not at present actually belong to the Borough of Paddington, yet arrangements have already been made with the Borough of Randwick for its annexation, with a view to obviate the difficulties above stated, which it is evident must ultimately arise.

The prayer of your humble Petitioners is that your Honorable House will not pass the Bill as it now stands, but will consent to alter it as follows, viz. :—(At the eighth line of Schedule A.) Thence again on the east by the centre of Dowling-street to the north-east side of Old Botany Road thence by that road to its intersection with the Park Road thence by the northern side of Park Road to its intersection with the South Head Old Road. This will give a permanent and well-defined boundary both to Paddington and Sydney.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Council, 8/10/69.

W. TAYLOR, Mayor.

(L.S.) JESSE COWLEY, Council Clerk.

1869.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TOWN HALL.

(PETITION—CERTAIN INHABITANTS OF THE CITY OF SYDNEY AND SUBURBS.)

Ordered by the Legislative Assembly to be Printed, 29 October, 1869.

To the Honorable the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the City of Sydney and Suburbs,—

SHOWETH:—

That your Honorable House passed an Act in the late Session of Parliament entitled “The Cathedral Close Act,” granting half an acre of land to the Municipal Council of Sydney for the purpose of erecting a Town Hall.

That the Municipal Council called for designs for a Town Hall; a large number were sent in, and the premiums amounting to £350 awarded. None of those designs occupied nearly half an acre—the extent of land granted.

That the Municipal Council have since commenced building a Town Hall, occupying much more land than granted, subjecting the citizens to a penalty of one thousand pounds, and forfeiture of the land with building erected thereon.

That the plans of the new Town Hall have not been exhibited to the citizens, but from the descriptions published in the newspapers it is seen that rooms have been added that are not required, thus increasing very materially the extent of the building.

That a new Street is required from the intended Goods Station at the head of Darling Harbour to George-street; but the placing of the Town Hall in the centre of the Cathedral Close will prevent that street being carried out, and for ever stop any improvement in the adjacent thoroughfares.

That unless this Street be carried out, the means of ingress and egress from the Goods Station, Darling Harbour, would be very limited and unsatisfactory.

That the buildings required to be taken down in the formation of the proposed new street are generally of a very inferior class, with the exception of the Baptist Chapel and Scots’ Church, but which your Petitioners are led to believe would be readily given up at a fair valuation.

That the property to be purchased would be comparatively small in amount, whilst the price obtained for frontages in the new Street would be largely in excess.

That the new Street being formed from George-street to Darling Harbour could be continued across, at a small expense, to the Ultimo Estate—thus immediately connecting a very important portion of Sydney with the Public Offices, Banks, Markets, &c.

That the new Street being carried out as planned will furnish the means of bringing the Railway into the centre of the city, by a tunnel underneath, and forming a Passenger Station on the site of the present Central Police Station.

That to carry out our Railway system profitably it is highly necessary that the Passenger Station should be more centralized; and by this plan the Railway is not only brought into the heart of the city, but the whole can be completed at a moderate cost, without prejudicing private interests, or interfering with our Harbour, Streets, Parks, or Public Reserves.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to take steps to restrain the Municipal Council from building on more than the half-acre of land granted, or in a position interfering with the direction of the proposed new Street; also for the promotion and prosecution of the works hereinbefore mentioned, namely, the formation of a new Street and Approach to the Darling Harbour Goods Station; also the continuation of the Railway to the site of the Central Police Office, George-street.

And your Petitioners will ever pray, &c.

Dated at Sydney, this 28th day of October, A.D. 1869.

PRINCE ALFRED PARK ENCLOSURE BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on the 21st October, 1869, the "*Prince Alfred Park Enclosure Bill*"—"with power to send for persons and papers"—beg leave to report to your Honorable House,—

That they have examined the witness named in the margin (whose evidence is appended hereto); and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the several Clauses of the Bill, in which it was not deemed necessary to make any Amendment.

And your Committee now beg leave to lay before your Honorable House the Bill, without Amendment.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PRINCE ALFRED PARK ENCLOSURE BILL.

FRIDAY, 22 OCTOBER, 1869.

Present:—

MR. DRIVER,
MR. FARNELL,

MR. NEALE,
MR. OATLEY.

RICHARD DRIVER, JUN., ESQ., IN THE CHAIR.

Jules Joubert, Esq., called in and examined:—

1. *Chairman.*] You are Secretary to the Agricultural Society? Yes.
2. You know the land known as Prince Alfred Park, in this city? Yes.
3. Do you believe that the erection on that land of suitable buildings "for the purpose of holding annual and other exhibitions and for like purposes of public recreation or instruction would be highly beneficial to the inhabitants of Sydney, and to all persons concerned in promoting the agricultural, pastoral, and other interests of the Colony"? I do.
4. Do you believe it possible to procure a piece of land so suitable in every respect? I think not; I do not think there is a piece of ground in the city more suitable for the purpose.
5. Nor within a convenient distance? No. It is central, near the Railway, and the city must necessarily extend in that direction.
6. As Secretary to the Agricultural Society, this subject has been under your consideration before? Yes.
7. Do you know that the land now known as Prince Alfred Park is the same piece of land as that formerly known as the Cleveland Paddock? It is part of the old Cleveland Paddock.
8. Is it the same land as that mentioned in a proclamation in the *Government Gazette* of 22nd December, 1865? It is.
9. And the same as mentioned in a proclamation of 12th October, 1869, appointing the Municipal Council of the City Trustees of the said land? Yes.
10. Both these proclamations are published in the *New South Wales Government Gazette*? Yes.
11. *Mr. Farnell.*] The erection of buildings on this Park would not interfere with it as a place of recreation for the people of Sydney? That would depend upon the extent of the buildings; but the building it is now proposed to erect upon it was, for that express purpose, limited to a certain area. Such a building would not, I believe, in any way interfere with the appropriation of the Park for public recreation. If I am right, it will only take one acre out of eighteen or twenty.
12. It would rather be an advantage to the citizens to have a building such as that erected? I think it would be an immense advantage to the city of Sydney to have a large hall of that description, beyond devoting it to the purposes of our Society. Melbourne and other cities have large halls of that kind, which are found very beneficial for the purpose of bringing amusing and instructive entertainments within reach of the million.
13. The holding of agricultural exhibitions would of itself be advantageous to the city of Sydney, would it not? Yes; and particularly as proposed now, that is, to blend industrial and fine arts exhibitions with pastoral and agricultural. I think that would tend materially to develop the ideas of the youth of the Colony.

J. Joubert,
Esq.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland
Queen, Defender of the Faith, and so forth,—

To our trusty and well-beloved—

(L.S.) JOHN SMITH, Esquire, M.D., Professor of Physics, &c., Sydney University ;
EDWARD ORPEN MORIARTY, Esquire, Civil Engineer, and Engineer-in-Chief for
Harbours and River Navigation ;
PHILIP FRANCIS ADAMS, Esquire, Deputy Surveyor General ;
FRANCIS HENRY GRUNDY, Esquire, Civil Engineer ; and
THOMAS WOORE, Esquire ;

Greeting :

KNOW ye that, in compliance with an Address from the Legislative Assembly of our Colony of New South Wales, we, reposing great trust and confidence in your zeal, industry, discretion, and integrity, do by these presents authorize and appoint you, or any three or more of you, as hereinafter mentioned, to make a diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs, and whether any grounds exist for fears that the supply is inadequate and uncertain, and not to be relied upon in all seasons, and to institute (should it appear to you that the supply of pure water may at any time prove unequal to the wants of the inhabitants) all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained : We do, by these presents, give and grant to you, or any three or more of you, at any meeting or meetings to which all of you shall have been duly summoned, full power and authority to call before you all such persons as you shall judge necessary, by whom you may be better informed of the truth in the premises, and to require the production of all such charts, maps, plans, drawings, tracings, books, papers, writings, and all other documents as you may deem expedient, and to visit and inspect the same at the offices or places where the same, or any of them, may be deposited, and to inquire of the premises by all other lawful ways or means : And our further will and pleasure is, that you, or any three or more of you, after due examination of the premises, do and shall, within the space of three months after the date of this our Commission, or sooner, if the same can reasonably be, certify to us, in the Office of our Colonial Secretary, under your, or any three or more of your hands and seals, what you shall find touching the premises : And this Commission shall continue in full force, although the proceedings thereunder shall not be continued by adjournment from time to time ; and you, or any three or more of you as aforesaid, may, from time to time, if you shall see fit, without waiting for your full and complete Report, certify your several proceedings into our said Office, as the same shall be respectively perfected : And we hereby command all Government Officers, and other persons whomsoever, within the said Colony, that they be assistant to you, and each of you, in the execution of these presents : And we appoint you, the said John Smith, to be President of this Commission, and do give you power, at your discretion, to procure such clerical or other assistance as may be absolutely necessary for enabling you duly to execute this Commission.

In testimony whereof, we have caused these our Letters to be made Patent and the Great Seal of our said Colony to be hereunto affixed.

Witness our right, trusty, and well-beloved Councillor, SIR JOHN YOUNG, Baronet, Knight Commander of our Most Honorable Order of the Bath, Knight Grand Cross of our Most Distinguished Order of St. Michael and St. George, Captain-General and Governor-in-Chief of our said Colony of New South Wales, at Government House, Sydney, aforesaid, this twenty-fourth day of September, in the year of our Lord one thousand eight hundred and sixty-seven, and in the thirty-first year of our Reign.

JOHN YOUNG.

By His Excellency's Command,

HENRY PARKES.

Entered on record by me, in Register of Patents, No. 9, pages 317 to 320 inclusive, this twenty-fourth day of September, one thousand eight hundred and sixty-seven.

HENRY HALLORAN,
Under Secretary.

By

By His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

WHEREAS, by a Commission bearing date the twenty-fourth day of September, one thousand eight hundred and sixty-seven, Her Majesty was pleased to appoint John Smith, Esquire, M.D., Professor of Physics, &c., Sydney University,—Edward Orpen Moriarty, Esquire, Civil Engineer, and Engineer-in-Chief for Harbour and River Navigation,—Philip Francis Adams, Esquire, Deputy Surveyor General,—Francis Henry Grundy, Esquire, Civil Engineer,—and Thomas Woore, Esquire,—to make a diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs, and whether any grounds exist for fears that the supply is inadequate and uncertain, and not to be relied upon in all seasons, and to institute (should it appear to them that the supply of pure water may, at any time, prove unequal to the wants of the inhabitants), all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained: And whereas it was by the said Commission provided that the persons thereby appointed, or any three or more of them, after due examination of the premises, should, within the space of three months from the date of the said Commission, certify to Her Majesty, in the Office of the Colonial Secretary, under their or any three of their hands and seals, what they find touching the premises: And whereas, in order to render such inquiry as full and perfect as possible, it is deemed expedient to extend such period as aforesaid: Now, therefore, I, SOMERSET RICHARD, Earl of Belmore, Governor of the Colony of New South Wales, do, with the advice of the Executive Council thereof, hereby direct and appoint, that the period within which the persons appointed by Her Majesty's said Commission shall certify to Her Majesty, touching the premises, shall be extended, and it is hereby extended to the twenty-third day of June now next ensuing.

Given under my hand, at Government House, Sydney, aforesaid, this twenty-fourth day of January, in the year of our Lord one thousand eight hundred and sixty-eight, and in the thirty-first year of Her Majesty's Reign.

BELMORE.

By His Excellency's Command,

HENRY PARKES.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth,—

To our trusty and well-beloved—

WILLIAM CHRISTOPHER BENNETT, Esquire, a Member of the Institute of Civil Engineers, Commissioner and Engineer of Roads;

Greeting:

WHEREAS, by our Commission, dated the twenty-fourth day of September, one thousand eight hundred and sixty-seven, we did appoint certain gentlemen therein named to make a diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs, and whether any grounds exist for fears that the supply is inadequate and uncertain, and not to be relied upon in all seasons; and to institute (should it appear to them that the supply of pure water may at any time prove unequal to the wants of the inhabitants) all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained; and whereas it has been represented to us that it is expedient to appoint an additional Member of such Commission: Now know ye, that we do hereby appoint you, the said William Christopher Bennett, to be such additional Member accordingly.

In testimony whereof, we have caused these our Letters to be made Patent, and the Seal of our Colony to be hereunto affixed.

Witness our right, trusty, and well-beloved Cousin and Councillor, SOMERSET RICHARD, Earl of Belmore, our Governor and Commander-in-Chief of our said Colony, at Government House, Sydney, this sixth day of June, one thousand eight hundred and sixty-eight, and in the thirty-first year of our Reign.

(L.S.)

BELMORE.

By His Excellency's Command,

HENRY PARKES.

Entered on record, in Register of Patents, No. 9, pages 362 and 363, this eighth day of June, one thousand eight hundred and sixty-eight.

HENRY HALLORAN,
Under Secretary.

By

By His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

WHEREAS, by a Commission bearing date the twenty-fourth day of September, one thousand eight hundred and sixty-seven, Her Majesty was pleased to appoint John Smith, Esquire, M.D., Professor of Physics, &c., Sydney University,—Edward Orpen Moriarty, Esquire, Engineer-in-Chief for Harbour and River Navigation,—Philip Francis Adams, Esquire, Deputy Surveyor General,—Francis Henry Grundy, Esquire, Civil Engineer,—and Thomas Woore, Esquire,—to make a diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs, and whether any grounds exist for fears that the supply is inadequate and uncertain, and not to be relied upon in all seasons, and to institute (should it appear to them that the supply of pure water may at any time prove unequal to the wants of the inhabitants) all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained: And whereas it was by the said Commission provided that the persons thereby appointed, or any three or more of them, after due examination of the premises, should, within the space of three months from the date of the said Commission, certify to Her Majesty, in the Office of the Colonial Secretary, under their or any three of their hands and seals, what they find touching the premises: And whereas, in order to render such inquiry as full and perfect as possible, the period within which the persons so appointed should certify to Her Majesty was, by an instrument dated the twenty-fourth day of January, one thousand eight hundred and sixty-eight, extended to the twenty-third day of June then next ensuing: And whereas, by a Commission bearing date the sixth day of June now instant, Her Majesty did appoint William Christopher Bennett, Esquire, a Member of the Institute of Civil Engineers, Commissioner and Engineer of Roads, an additional Member of the aforesaid Commission: And whereas it has been represented that a further extension of such period is necessary to enable the said Commission to complete their labours, and submit their Final Report: Now, therefore, I, SOMERSET RICHARD, Earl of Belmore, Governor of the Colony of New South Wales, with the advice of the Executive Council thereof, do hereby direct and appoint that the period within which the persons appointed by Her Majesty's said Commissions shall certify to Her Majesty, touching the premises, shall be extended, and it is hereby extended to the twenty-third day of December now next ensuing.

Given under my hand, at Government House, Sydney, aforesaid, this twenty-fourth day of June, in the year of our Lord one thousand eight hundred and sixty-eight, and in the thirty-second year of Her Majesty's Reign.

BELMORE.

By His Excellency's Command,

HENRY PARKES.

HENRY HALLORAN,
Under Secretary.

By His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

WHEREAS, by a Commission bearing date the twenty-fourth day of September, one thousand eight hundred and sixty-seven, Her Majesty was pleased to appoint John Smith, Esquire, M.D., Professor of Physics, &c., Sydney University,—Edward Orpen Moriarty, Esquire, Civil Engineer, and Engineer-in-Chief for Harbours and River Navigation,—Philip Francis Adams, Esquire, Deputy Surveyor General,—Francis Henry Grundy, Esquire, Civil Engineer,—and Thomas Woore, Esquire,—to make a diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs, and whether any grounds exist for fears that the supply is inadequate and uncertain, and not to be relied upon in all seasons,—and to institute (should it appear to them that the supply of pure water may at any time prove unequal to the wants of the inhabitants) all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained: And whereas it was by the said Commission provided that the persons thereby appointed, or any three or more of them, after due examination of the premises, should, within the space of three months from the date of the said Commission, certify to Her Majesty, in the Office of the Colonial Secretary, under their or any three of their hands and seals, what they shall find touching the premises: And whereas, in order to render such inquiry as full and perfect as possible, the period within which the persons so appointed should certify to Her Majesty was, by an instrument dated the twenty-fourth day of January, one thousand eight hundred and sixty-eight, extended to the

the twenty-third day of June then next ensuing: And whereas, by a Commission bearing date the sixth day of June, one thousand eight hundred and sixty-eight, Her Majesty did appoint William Christopher Bennett, Esquire, Member of the Institute of Civil Engineers, Commissioner and Engineer of Roads, an additional Member of the said Commission: And whereas, upon representation, the period within which the persons so appointed should certify to Her Majesty was, by an instrument bearing date the twenty-fourth day of June, one thousand eight hundred and sixty-eight, further extended to the twenty-third day of December then next ensuing: And whereas it has been represented that a still further extension of the said period is necessary: Now, therefore, I, SOMERSET RICHARD, Earl of Belmore, Governor of the Colony of New South Wales, do, with the advice of the Executive Council thereof, hereby direct and appoint that the period within which the persons appointed by Her Majesty's said Commissions shall certify to Her Majesty touching the premises shall be extended; and it is hereby extended to the twenty-third day of March now next ensuing.

Given under my hand, at Government House, Sydney, in the said Colony, this twenty-fourth day of December, in the year of our Lord one thousand eight hundred and sixty-eight, and in the thirty-second year of Her Majesty's Reign.

BELMORE.

By His Excellency's Command,
JOHN ROBERTSON.

By His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

WHEREAS, by a Commission bearing date the twenty-fourth day of September, one thousand eight hundred and sixty-seven, Her Majesty was pleased to appoint John Smith, Esquire, M.D., Professor of Physics, &c., Sydney University,—Edward Orpen Moriarty, Esquire, Civil Engineer, and Engineer-in-Chief for Harbours and River Navigation,—Philip Francis Adams, Esquire, Deputy Surveyor General,—Francis Henry Grundy, Esquire, Civil Engineer,—and Thomas Woore, Esquire,—to make a diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs, and whether any grounds exist for fears that the supply is inadequate and uncertain, and not to be relied upon in all seasons, and to institute (should it appear to them that the supply of pure water may at any time prove unequal to the wants of the inhabitants) all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained: And whereas it was by the said Commission provided that the persons thereby appointed, or any three or more of them, after due examination of the premises, should, within the space of three months from the date of the said Commission, certify to Her Majesty, in the Office of the Colonial Secretary, under their or any three of their hands and seals, what they find touching the premises: And whereas, in order to render such inquiry as full and perfect as possible, the period within which the persons so appointed should certify to Her Majesty was, by an instrument dated the twenty-fourth day of January, one thousand eight hundred and sixty-eight, extended to the twenty-third day of June then next ensuing: And whereas, by a Commission bearing date the sixth day of June, one thousand eight hundred and sixty-eight, Her Majesty did appoint William Christopher Bennett, Esquire, Commissioner and Engineer of Roads, an additional Member of the said Commission: And whereas, upon representation, the period within which the persons so appointed should certify to Her Majesty was, by instruments bearing date respectively the twenty-fourth day of June, one thousand eight hundred and sixty-eight, and the twenty-fourth day of December in the same year, further extended to the twenty-third day of December, and to the twenty-third day of March, then next ensuing: And whereas it has been represented that a still further extension of the said period is necessary: Now, therefore, I, SOMERSET RICHARD, Earl of Belmore, Governor of the Colony of New South Wales, do, with the advice of the Executive Council thereof, hereby direct and appoint that the period within which the persons appointed by Her Majesty's said Commissions shall certify to Her Majesty touching the premises, shall be extended, and it is hereby extended to the twenty-third day of May now next ensuing.

Given under my hand, at Government House, Sydney, aforesaid, this twenty-fourth day of March, in the year of our Lord one thousand eight hundred and sixty-nine, and in the thirty-second year of Her Majesty's Reign.

BELMORE.

By His Excellency's Command,
JOHN ROBERTSON.

PROGRESS REPORTS OF THE SYDNEY WATER COMMISSION.

THE SYDNEY WATER COMMISSION to THE COLONIAL SECRETARY.

Sydney, 23 December, 1867.

SIR,

In accordance with the terms of the Commission by which we were appointed to inquire into the supply of water to Sydney and Suburbs, and which Commission expires to-morrow, the 24th instant, we have the honor to submit the following Report of Progress :—

We have prosecuted this inquiry with all the care and diligence we could bestow, and which its great importance demands. We have held fifteen meetings in our office, for the taking of evidence and for other business, and have besides spent thirteen days in field work, personally examining the present source of water supply, and various other districts where a future supply might possibly be derived. We have thus inspected the junction of the Nepean and Warragamba, and latterly we have made an extended examination of the country drained by the eastern tributaries of George's River and the Nepean, and by the Port Hacking River. Much work of this kind, however, remains to be done. We think that other portions of the Nepean ought to be examined, and also the Grose, the Couridjah Lagoons, and other places; and it may likewise be necessary to obtain various surveys and sections before a decision can be arrived at.

We have taken the evidence of fourteen witnesses, and have procured a variety of maps, plans, reports, returns of population, of rainfall, and of drainage areas of rivers, and have put in hand analyses of waters of more or less promise; all which information will be important when we come to form a judgment on the whole question.

At this stage of the inquiry, we can only recommend that the Commission be renewed for a further period; and as so much remains to be done, both in the office and in the field, before a Final Report can be drawn up, we would respectfully suggest that the extension of time may be for six months.

We enclose a statement of the expenditure of the Commission up to the present time.

We have, &c.,

J. SMITH, M.D.,

President of the Commission.

E. O. MORIARTY, M.I.C.E.

P. F. ADAMS.

FRANCIS H. GRUNDY.

THOMAS WOORE.

THE SYDNEY WATER COMMISSION to THE COLONIAL SECRETARY.

Sydney, 20 June, 1868.

SIR,

As the extended Commission of Inquiry into the supply of Water to Sydney and Suburbs expires on the 23rd instant, we have now the honor to make the following Report of Progress :—

Since the renewal of the Commission on January 24th, we have held seventeen meetings in our office, for the purpose of taking the evidence, and for other business; and we have besides spent seven days in examining the present and suggested future sources of supply.

Deputations of the Commissioners have spent ten days more in visiting points to which it was not thought necessary to take the whole Commission. We have thus examined the Cataract and Cordeaux Rivers, and the upper parts of the Nepean, also the Grose, the Wollondilly in Burragorang, George's River, the Colo, Wheeny Creek, and the Couridjah Lagoons.

We have caused a section to be made (under Mr. Woore's superintendence) of the country between the Warragamba and Rope's Creek, connecting with Mr. Woore's section from the latter point to Ashfield; and we have at present a section in progress from the Cataract River at Broughton's Pass, along the dividing ridge between the waters of George's River and the Nepean. We have also obtained a survey of the drainage area of the Couridjah Lagoons, and a cursory examination of the whole course of the Cataract River.

Analyses of all the waters examined by the Commission are now nearly completed at the University. From the amount of work remaining to be done a considerable time must elapse before we can be prepared with the Final Report, and we therefore respectfully crave a further extension of the Commission, say for six months.

We enclose a statement of the expenditure of the Commission, by which it will be seen that it exceeds by 16s. 5d. the amount of £400 placed to our credit in the Bank of New South Wales.

We have, &c.,

J. SMITH, M.D.,

President of the Commission.

E. O. MORIARTY, M.I.C.E.

FRANCIS H. GRUNDY.

THOMAS WOORE.

THE SYDNEY WATER COMMISSION to THE COLONIAL SECRETARY.

Sydney, 19 December, 1868.

SIR,

On behalf of the Commissioners appointed to inquire into the supply of water to Sydney and Suburbs, we have the honor to submit this our Third Report of Progress.

Since our last Report (under date June 20th, 1868), we have carried on the survey and section of the country from the Cordeaux and Cataract Rivers down to Sydney. The scheme of bringing water by gravitation from these rivers appeared, on examination, to be so promising, that we decided on having the survey and section executed with all attainable minuteness and accuracy. The plan that has been kept in view in this work is to intercept the waters of the Cordeaux and Upper Nepean at their junction at "Pheasant's Nest," and bring them by a tunnel into the Cataract River, at "Broughton's Pass." The combined waters would then be brought down, partly by tunnel and partly by open conduit, along the dividing ridge between the Nepean and George's River, into a large storage reservoir, to be constructed near "Bull's Hill." From thence the water would be brought to Sydney by conduit or pipes, as might be found most expedient. A great part of the line is through a rugged and difficult country, which has rendered the survey tedious; and we regret that it has not been possible to get this work done in time to allow of a Final Report being prepared before the expiry of our present Commission, on the 23rd instant. Besides this main work, we have caused a minute examination to be made of the Botany Swamps, in order to ascertain how the present supply could be increased, and at what expense. In both cases the field work is nearly completed; but the reduction and consideration of the results will still occupy much time.

In addition to the work now in progress, we are desirous of examining the Winge-carribee Swamps, and the ridge separating them from the highest tributaries of the Nepean, in order to ascertain if the waters of the former could be thrown into the latter, and at what expense.

We have, therefore, the honor to recommend that the Commission be again renewed, say for a period of three months.

We have, &c.,

J. SMITH,

President of the Commission.

E. O. MORIARTY.

P. F. ADAMS.

WILLIAM C. BENNETT.

THE SYDNEY WATER COMMISSION *to* THE COLONIAL SECRETARY.

20 March, 1869.

SIR,

We, the undersigned, on behalf of the Commissioners appointed to inquire into the Supply of Water to Sydney and Suburbs, have the honor to make this, our Fourth Report of Progress.

Since the date of our last Report (19 December, 1868), we have carried on with diligence the works therein specified, but have not been able to complete them so as to report finally before the expiry of our present Commission on the 23rd instant.

We, therefore, respectfully request that a further extension of the Commission may be granted for two months.

We have, &c.,

J. SMITH,

President of the Commission.

P. F. ADAMS.

FRANCIS H. GRUNDY.

WILLIAM C. BENNETT.

WATER SUPPLY OF SYDNEY AND ITS SUBURBS.

REPORT.

To His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, Governor and Commander-in-Chief of the Colony of New South Wales.

May it please your Excellency,—

We, the undersigned Commissioners appointed to inquire into the condition and prospects of the Water Supply of Sydney and Suburbs, have the honor to submit to your Excellency this our Final Report.

To qualify ourselves for forming a just judgment on this highly important question, we have used every available means (consistently with a due regard to economy) for obtaining accurate information regarding the present source of water supply, and the possible future sources. To this end we have examined a number of gentlemen who have given attention to the subject, and whose opinions seemed worthy of record. We have also visited the various districts that presented claims to consideration, in order that, by personal inspection, we might be better fitted for weighing their relative merits. We have further perused a mass of documentary matter, partly giving the results of former inquiries into the Water Supply of Sydney, and partly descriptive of works undertaken in other countries for the supply of large cities. In addition, we have sent out parties to make surveys and sections, and to institute examinations of certain districts with more detail and exactitude than could be accomplished during our own visits. Finally, we have held numerous meetings for collecting and deliberating on evidence, for directing operations in the field, and for the discussion of the many features of the general question as they successively arose. We now proceed to summarize the information we have collected, and the conclusions we have arrived at, under the following heads :—

1. The population to be supplied with water.
2. The condition and prospects of the present supply.
3. New sources of supply.

I.—POPULATION TO BE SUPPLIED.

No Census having been taken since 1861, any statement of the population of Sydney and Suburbs can be no more than a rough approximation. The following table (made up in round numbers) may be accepted as representing with sufficient accuracy the number and distribution of the inhabitants at the present time :—

The City	64,000
Suburbs :—	
Balmain	6,000
Glebe	5,500
Newtown	6,300
Redfern and Botany ...	11,000
Paddington	10,000
Concord	3,600
St. George	8,400
St. Leonards	5,200
	— 56,000
Total	— 120,000

It is not essential that the whole of this population should immediately share in one general supply; indeed, for many years to come, the houses in several of the outlying districts will probably continue to be so dispersed that they can be more readily supplied by means of wells, tanks, or public fountains; and when, in course of time, the population becomes denser, these districts might then be brought within the ramifications of the central supply. While, however, we do not consider it essential that the outlying districts should now be supplied from one source with Sydney, we shall be able to show, in the sequel, that an abundance of water can be procured for all.

Supposing then that the present population demanding a general supply is 120,000, it becomes of importance to consider the probable increase in future years. Here we are at once met with the impossibility of assuming a rate of increase on which any reliance can be placed. In 1826 the population of Sydney was put down at 10,000, in 1836 at 20,000, so that it had doubled in the short term of ten years. In twelve or thirteen years more it had doubled again; but in consequence of the attractive force of gold the next doubling was effected in six or seven years. After that the rate fell; and although thirteen years have elapsed since the population reached about 80,000, we have as yet made it only half as much more. For the last few years the rate has been again increasing, and at present it is over four per cent. per annum. An illustration of the difficulty of establishing correct data is found in the Report on Water Supply of 1852, where a calculation is given which would make the present population of the Colony about 1,000,000, and the population of Sydney 173,000; while the actual number is about 470,000 in the former case, and 120,000 in the latter. But to show that such calculations are not trustworthy, the same Report quotes the erroneous results of Sir William Petty, who, in 1682, estimated that by 1840 London would contain over 10,000,000 of inhabitants!

It

It is not to be expected that in a new country like this the increase of population will follow any regular law. Vicissitudes that cannot be foreseen may at any time increase or diminish the rate. At Sydney, for example, a general revival of trade, or the successful establishment of new industries, or the discovery of rich gold fields to which Sydney would be the nearest port, might bring an influx of population much beyond the present rate; while, on the other hand, similar attractions arising at neighbouring ports, coupled with a succession of bad seasons and depression of trade here, might disperse the population, and greatly reduce the rate of increase for many years to come. Instead, therefore, of attempting to lay down a rule which would enable us to say that in a given number of years there will be a given population to be supplied with water, it will be safer to assume a maximum number which any new scheme to be undertaken at present ought to be capable of supplying; and when the time comes, be it soon or late, that that maximum shall be exceeded, then the question must be taken up afresh, and the new wants met by new undertakings. And it should not be to the discredit of any scheme that may now be advanced that it is not capable of supplying a distant and unlimited posterity, if such a result could be obtained only by such an outlay as would press unduly on the present generation. Besides, there are obvious reasons why it might be more expedient to supply a great city from several sources, than entirely from a single source, even should that be practicable.

To close then this part of the subject, we consider that our duty will be sufficiently discharged if we can show how a population of (say) a quarter of a million can be liberally supplied. The quantity of water requisite for this purpose we put down at twelve million gallons per day, being at the rate of 48 gallons for each person. It may be objected that in a comparatively hot and dry climate like this, such a supply would not be sufficient for all purposes—domestic manufacturing, street-watering, &c.,—and we admit that a larger supply for the above estimated population would be desirable; but until that limit is reached the supply per head would be very liberal, and when that limit is exceeded an extension of the scheme would have to be entered on. And we have further to observe that while we put down twelve million gallons per day as the minimum to be demanded of any scheme now to be propounded, we trust to show that a considerably larger quantity will be available when needed. We consider, indeed, that any scheme involving a large outlay of money should not merely be adequate to furnish at once the above-named minimum, but should be capable of expansion to at least double that amount, to keep pace with a possible rapid increase of population.

If the rate of consumption in Sydney should go on increasing as of late, our adopted minimum would be reached in seven or eight years, but the rapid increase must be due more to the extension of the area supplied than to increase of population. From Mr. Bell's evidence it appears that only about 80,000 people shared in the supply

in

in 1867, but the network of piping has since then been extended, and a larger area brought within its influence. It is not to be expected that consumption will go on increasing so fast after the present population is fairly supplied, and after due provision shall have been made for manufactures. According to our estimate, that would require about 2,000 million gallons per annum, which the existing supply falls considerably short of; but after that amount is reached the consumption will then advance more nearly in the ratio of the population. This ratio, however, cannot be predicted.

The following table shows the amount pumped from Botany in each year since 1859. To these numbers may be added 100,000,000 gallons, as representing the supply through the tunnel in each year.

				Gallons.
1860	326,008,080
1861	384,000,000
1862	618,344,882
1863	614,510,568
1864	657,267,552
1865	875,060,504
1866	958,649,221
1867	955,436,976
1868	1,222,540,272
1869, to 30th June	667,841,424

Much difference of opinion exists as to what constitutes a sufficient water supply for a large city; but, from a comparison of a number of authorities, coupled with the experience of Sydney itself, we feel warranted in stating that anything above forty gallons per head daily would be accounted a fair proportion. London and Paris are each supplied with about thirty gallons per head daily. Newcastle, Aberdeen, and several other towns in Great Britain, have about the same proportion. The manufacturing towns of Lancashire and Yorkshire range from sixteen to twenty-one gallons—about one-third of this being for manufactures; Glasgow has about fifty gallons; Edinburgh, forty. It has been ascertained in London that less than six gallons per head is the average daily domestic consumption of the best conditioned districts where the supply is unlimited, and that in many cases three times as much runs to waste. At Preston, careful observations for many years proved that ten or eleven gallons were sufficient for domestic use, and a like result has followed some limited observations made by us in Sydney. In Rankine's "Manual of Civil Engineering," the following estimate is made for water supply of towns:—

Domestic purposes	galls.	10
Street watering, fires, &c.		3
Manufactures and waste		7
Non-manufacturing towns, per head		20
Additional in manufacturing towns...		10
Total		30

It

It must be observed that what is put down as *waste* generally serves a useful purpose in flushing drains, and this is so important to public health that it may well be recognized as a distinct function of Water Supply.

Although our commission limits us to an inquiry into the supply of Sydney and Suburbs, we have not been unmindful of the great desirability of obtaining such a plentiful command of water as would permit of its free use in irrigation, not only in the immediate neighbourhood of Sydney, but also over some considerable portion of the County of Cumberland. We feel convinced that this question of irrigation ought no longer to be neglected. Our comparatively dry climate, coupled with the very unequal and uncertain distribution of rainfall, point imperatively to the necessity of making provision for storing up the superabundance of rain that occasionally falls, that it may afterwards be dispensed to the thirsty soil as required, and thus secure fertility and plenty in all seasons. No one can read of the magnificent results obtained in India by means of irrigation without being impressed with the belief that here also a mine of prosperity and wealth remains to be opened. We are told that the Jumna Canals saved, during the great famine year 1837-8, crops to the value of nearly two millions sterling, of which about one-tenth was paid to Government as rent, while the remainder supported in comfort, during a period of devastating famine, the inhabitants of nearly 500 villages. It is estimated that the Grand Ganges Canal will save from injury by droughts crops to the value of more than $7\frac{1}{2}$ millions sterling. It will protect from risk of famine a tract of eleven million acres, inhabited by $6\frac{1}{2}$ millions of people; and when all the projected works for irrigation between the Ganges and the Sutlej are completed, crops to the value of not less than ten millions will be placed beyond the contingencies of season, supporting about twelve million souls, and yielding about £3,000,000 annually to the public revenue.

It is true that the configuration of the surface is far more favourable for irrigation in India than here, and the rivers being fed by lofty snow-covered mountains are more to be depended on; but still much might be done with even our inferior capabilities; and, in working out a scheme for supplying Sydney with water, we have endeavoured to secure a sufficient abundance for the initiation at least of this great experiment.

II.—THE CONDITION AND PROSPECTS OF THE SUPPLY FROM BOTANY.

The matters engaging the attention of the Commission were so numerous that it became necessary to make a division of labour among the members. One of our number (Mr. Bennett) was accordingly detailed to make a full examination of the present Water Supply of Sydney, in order to ascertain definitely its utmost capabilities, and how far it might be extended and improved. Mr. Bennett having executed

the task assigned to him presented a report to his fellow Commissioners, together with plans and sections, all of which will be found in the Appendix; and referring to these for detailed facts and reasoning, and to the appended evidence of various witnesses conversant with the locality, we here present a summary of results.

The area which supplies Sydney at present is barely seven square miles in extent. A small portion of the drainage—(that, namely, from the upper part of Lachlan Swamp)—flows by gravitation through the tunnel to Hyde Park, whence it is distributed to the lower parts of Woolloomooloo, and to a portion of the City along Darling Harbour. The remainder of the drainage collects into a stream—called the Lachlan or Botany Stream—which is intercepted before falling into Botany Bay, and pumped to Sydney. The pumping engines supply from three to four million gallons per day, and this is supplemented by about 300,000 gallons from the tunnel.

There is evidence that the Lachlan and Botany Swamps are becoming drier and less retentive. For this several reasons may be assigned, such as the trampling of cattle, and the partial destruction of the thick scrub that once covered the ground; but chiefly the cutting of drains through the swamps to increase the supply of water in droughts. There can be little doubt that this operation has rendered portions of the swamps permanently dry. In consequence of the increasing consolidation of the surface, heavy rains run off at once to the sea, instead of being, as formerly, absorbed by the spongy ground, and keeping up a full stream for weeks after. But though the retentive character of these swamps has greatly diminished, it must be allowed that they still have such an amount of this power as may well excite surprise. The equable flow of the stream, even in continued dry weather, has often raised a doubt as to whether all the water could come from the visible drainage area, or whether it might not be derived from a distance and appear in the form of springs. The levels, however, of the surrounding country, and its geological structure, render this supposition exceedingly improbable, and we have no reason to look for more water in the Lachlan stream than the rain falling on its visible catchment area can supply. The fact seems to be that the valley of this stream has once been a deep gorge, like many existing at the present time around Port Jackson and Middle Harbour, and that it has got filled up with drift sand, proved in some places to a depth of 60 or 70 feet. Mr. Pearce says in his evidence that in 1852 he witnessed borings in the Lachlan Swamp, and, at upwards of 60 feet, they came upon logs of timber in the sand; and the inference he drew was that “an old creek had been filled up by the drifting of the sands and the washing of soil from the hills.” As the Lachlan Swamp is about 110 feet above the sea, and the stream has a gradual slope of about 5 miles to Botany, we have here an immense body of sand to get saturated with water in time of rain, and to give out this water slowly by percolation at lower levels. In our investigations we have found no similar locality with an equal power of conserving

conserving water. When we visited the extensive swamps at the head of the Cataract River, in December 1867, we found them delivering less than half the water delivered at the same time at Botany, although the drainage area was more than double the extent; and in December, 1868, the Warragamba, with its drainage area of more than 3,000 square miles, was delivering no more water than is usually supplied to Sydney from the Botany stream.

In regard to quality, this water is unexceptionable. It is soft and pure, its action on lead is not excessive, and it is not greatly liable to discolouration or contamination with floating impurity even after heavy rain. Complaints are no doubt often heard in Sydney that the water is coloured and deposits a sediment, but this can generally be traced to the state of the pipes, and will be less liable to occur as the old piping gets replaced by new having a protective varnish inside. The City Engineer has stated in his evidence that "all the piping laid during the last four or five years has been coated with Dr. Angus Smith's patent process, and keeps perfectly clean." Specimens of the water drawn at different times and places have been subjected to analysis, the details of which will be found in the Appendix. From the mean of ten trials we may state the total solid matter dissolved per gallon at $5\frac{1}{4}$ grains, of which the saline and earthy matter makes 4 grains, leaving $1\frac{1}{4}$ for organic or vegetable matter. Of the inorganic matter, common salt makes up about 3 grains, while the remaining grain consists of compounds of lime and magnesia, with a little silica, and traces of iron and phosphate of lime. The mean hardness is only three-fourths of a degree.

It is clear then that the Lachlan and Botany Swamps are still valuable as sources of supply, although their retentiveness is not so great as in former times, and the purity of the water is liable to deterioration from increasing buildings on the drainage area.

But we have yet to consider the important element of *quantity*. No accurate observations have been made for a sufficient length of time on the actual delivery of the Botany stream, and we have therefore no means of determining its capabilities in this respect except by ascertaining the total rainfall on the area, and assuming, from data furnished by other countries, and from the limited observations here, (as detailed in Mr. Bennett's report) what proportion is likely to run off by the stream, and so be capable of being utilized.

Now, in regard to rainfall, we are compelled to take it as recorded at the Sydney Observatory, a gauge having been established at Botany only last year; but during sixteen months of simultaneous observation the agreement is so close between the two places ($59\frac{1}{2}$ at the Observatory against 57 at Botany) that we cannot be far wrong in assuming that the Sydney rainfall is, on the whole, identical with the Botany; and besides, as the distance from the Observatory to Lachlan Swamp is only 3 miles, and to the pumping works at Botany (where the gauge is kept) a little over 5 miles, and the difference in levels not being great, there cannot be much difference in the rainfall over such a limited area.

In

In the Appendix will be found a summary of the rainfall at Sydney for $29\frac{1}{4}$ years, furnished to us by the Government Astronomer, together with a return of daily rainfall at the Observatory for $11\frac{1}{2}$ years, and a similar return from Botany for 16 months. The average for $29\frac{1}{4}$ years is 49·591 inches, the extremes being 82·81 in 1860, and 21·49 in 1849. But, in estimating the capabilities of the swamps, it would clearly be unsafe to take this average, or indeed anything higher than the *minimum* that has been known to fall in any one year. This, in the table, is $21\frac{1}{2}$ inches. Mr. Bennett has taken as the basis of his calculations the sixteen months from November, 1848, to February, 1850, inclusive—during which only 28 inches of rain fell—as his standard dry period. But although this is the minimum found in authentic records, there is reason to believe that Sydney has gone through periods still drier. It is unfortunate that no record of the rainfall of 1839 has been discovered; for, judging by newspaper and other reports, there must have been considerably less than in 1849. In the *Sydney Gazette* of 10th March, 1825, it is stated that only about 19 inches fell in 1824, and yet it is probable that even less fell in 1839. We might be justified, then, in assuming 18 inches as about the least quantity of rain that has fallen in Sydney in any one year. Now what proportion of this could be made available? Here we are left very much to guess-work. In the appended reports of Mr. Bennett and Mr. Moriarty this question is discussed; and, from the data there collected, it is evident that we could not safely assume more than one-third of the rainfall of average years as capable of interception and use, and in dry years this would almost certainly prove an over-estimate. The proportion available must depend greatly on the manner in which the rain falls. It is quite conceivable that if 18 inches were equally distributed over a year, so that the weekly average should be constant, it would be entirely consumed by vegetation and evaporation, leaving not a drop to run off by the stream.

But supposing 6 inches of rain could be utilized, that amount over the present drainage area would be only 600 million gallons, being a supply of no more than $11\frac{1}{2}$ million gallons per week; and even if the present area were enlarged by nearly two square miles (as Mr. Bennett shows to be practicable), the supply would be under 15 million gallons per week, or only about half the present supply; so that to maintain the present rate in such a dry year as 1839, from the enlarged area, there ought to be storage reservoirs provided for about 800 million gallons, and these reservoirs ought to be full at the beginning of the year. Mr. Bennett shows, in his report, how storage can be provided for 665 million gallons at a cost of about £122,000, or, including compensation for land, £170,000; but as these reservoirs would expose 300 acres of surface, he calculates that nearly half their contents would be lost by evaporation.

If one-third the *average* rainfall over the present area could be preserved (say 16 inches), it would suffice to keep up the present rate of supply of about 30 million gallons per week, and no more. The same proportion over the extended area would raise the supply to near

40 million gallons per week, which may be taken as the utmost average capacity of the catchment area, and which could not be maintained in dry years. The extended area could, therefore, do no more than supply the present population in average years; it could not keep up the same rate in dry periods, and could not overtake the wants of a larger population.

It must now be clear that, to maintain the above-named average, it would be necessary to provide a much greater storage for the interception of storm waters than at present exists. The sand of the district acts as a storage reservoir, and goes a great way to produce an equable flow of the stream; but we have shown that this power is diminishing, and experience has proved that it is altogether insufficient. But the sand of the catchment area, which is so valuable in absorbing and keeping back storm waters, renders it extremely difficult to form artificial reservoirs of large capacity, while the overwhelming rains that occasionally fall would be a continual source of danger and expense in maintaining these reservoirs. And after all, with the most ample storage that can be suggested, it is only a question of time (a brief time probably), when the utmost capabilities of the swamps will be exhausted, and Sydney compelled to draw from other sources.

Mr. Bennett shows in detail how the Botany supply could be improved, supposing it should be determined to maintain it for some years to come. For example—the drainage area should be enlarged by the construction of a dam at Long Swamp, connecting this with the engine-pond by means of a pipe. Then a dam should be constructed at Lachlan Swamp, and a pumping-engine established there to raise the water to Paddington and Waverley. These two dams would give storage for 523 million gallons. The Paddington reservoir (extended) and the Waverley would store 13 million gallons; and Mr. Bennett recommends, in addition, a reservoir on Strawberry Hills to contain 29 million gallons. All these works might be executed for the sum already stated, viz., £170,000, including compensation for land; but in comparing this with the cost of any new scheme Mr. Bennett points out that it is necessary to add the capitalized expense of pumping, and the value of the land that would be available for sale if the Botany scheme were given up. After going fully into details he arrives at the conclusion that, “in contrasting a hypothetical supply of 6 million gallons, daily, from Botany, with an equal supply from any other source, the cost must be reckoned at £413,359, independent of any credit to be given for the 30-inch main, the engines, and engine-house”; and that “the safe supply to be depended on in the standard dry period would be but an average of $3\frac{1}{4}$ million gallons, and the cost of securing this would amount to £299,401,” made up as follows:—

First cost of works	£136,442	
Land to be resumed... ..	47,209	
Land available for sale if another supply be adopted	25,750	
Capitalized cost of pumping	90,000	
	<hr/>	
Total	£299,401	The

The City Engineer proposes to increase the dams on the Lachlan stream to the number of thirteen, which he estimates would give storage for nearly 500 million gallons,—to construct a reservoir on the site of the old cemetery reserve capable of holding 850 million gallons,—to enlarge the present reservoirs at Crown-street and Paddington so as to make them contain 16 million gallons,—to construct an open reservoir at Waverley (5 million), a covered reservoir at Newtown (6 million), and at Hyde Park (20 million); giving a total storage of nearly 1,400 million gallons, at a cost of about £195,000.

With regard to the dams on the course of the stream, it is doubtful if they would ever be sufficiently retentive for the exigencies of a prolonged drought, and they would expose so large a surface in proportion to depth that evaporation would doubtless cause great loss. Besides, it seems impossible to secure the dams (except, perhaps, the highest on the stream) against the risk of destruction by floods, at anything like a reasonable expense. It is not enough that they withstand ordinary heavy rains,—that they might be made to do,—but they must be capable of resisting the heaviest rain-storms that have been known in Sydney. When the lower dams were carried away in February last year, 6 inches of rain fell in one day, and 9 inches in two days, but rains of much greater violence are recorded. On April 29th, 1841, the gauge at South Head showed 20·12 inches within twenty-four hours; and on October 15th, 1844, 20·41 inches in the same time, and of this, 5·4 fell in two hours. On each of these occasions, as much rain fell on the catchment of the Botany stream as would have more than sufficed to fill all the proposed dams four times over, and as would have supplied Sydney, at the present rate, for a year and a half. It is scarcely conceivable that dams similar to those at present on the stream could withstand such rains. We cannot, therefore, recommend that any more of these dams should be constructed; or even that those carried away last year should be restored. The dam proposed by Mr. Bennett at the Lachlan Swamp would be of quite a different character, and would provide for the escape of the heaviest recorded rainfall.

In connection with these extreme examples of rainfall, it may be interesting to note here a few other cases of heavy rain recorded since 1840, as these will show further what must be provided for in attempting to save storm waters.

A fall of $2\frac{1}{2}$ inches in one day is not very infrequent, and this would give, on the present catchment, about 250 million gallons, or two months' supply to Sydney at the present rate. It was shown indeed by Mr. Jevons, in his essay on the climate of Australia, that 20 per cent. of the rain at Sydney falls in quantities of more than 2 inches per day. In three days of May, 1840, 10 inches fell; in four days of February, 1843, 11·6; on August 13th of same year,

year, 5·54; on June 21st, 1846, 4 inches; on January 5th, 1848, 5 inches; on March 9th of same year, 8·7 inches. In the very dry year of 1849, as much as 2·64 fell in one day (May 30th). In nine days ending April 6th, 1855, 17 inches fell, and on one of these days (April 2nd); 5·6, with no less than 2 inches in one hour. In three days of May in same year, 6·7 inches; in two days of November, 1856, 8 inches; on May 26th, 1858, 6 inches; in four days of April, 1860, 16·8; August 2nd of same year, 5·3. In April, 1861, 24½ inches fell, of which 12½ fell in two days; in June, 1864, 16 inches, of which 6½ fell in two days. In March, 1867, 12 inches, of which 6½ fell in two days. In April of same year, 17½ inches. In February, 1868, 15·3 inches, of which, as already stated, 9 inches fell in two days, and 6 inches in one day. In the present year, 4½ inches fell on March 19th, and 8·7 in three days of May.

With regard to Mr. Bell's proposal of a large storage reservoir on the site of the old cemetery reserve, Mr. Bennett has pointed out serious engineering difficulties and other objections to its construction; and we have to add that it would be of no avail for the preservation of storm waters, which after all is the chief point to be aimed at. Also, the present engines would be incapable of filling this reservoir in addition to their daily duty of supplying Sydney, even if enough water could be intercepted at Botany for this purpose.

Mr. Bell's proposed reservoir at Hyde Park would be very useful for preserving the surplus overflow of the tunnel, but would be rather too expensive in relation to its capacity; and as the bottom would be only about 85 feet above the sea, its power of supplying Sydney at an efficient pressure would be very limited.

Instead of enlarging the Crown-street Reservoir and constructing one at Newtown, according to Mr. Bell's scheme, it might be preferable to adopt the Strawberry Hills Reservoir proposed by Mr. Bennett, which would give greater storage at a higher level than Crown-street, and at probably no greater expense. The enlargement of Paddington Reservoir, and the construction of one at Waverley, are common to both schemes.

The question of evaporation is an important one in calculations for open reservoirs, but it is in a very unsettled state. Experiments on a small scale, and under artificial conditions, throw little light on the rate of evaporation on the large scale in nature. The mean result at the Observatory for 9½ years makes the annual evaporation about equal to the average annual rainfall; the extremes running from 77 inches in 1862, with a rainfall of 24 inches, to 29 inches in 1867, with a rainfall of 60 inches. On natural surfaces of water the rate of evaporation will depend greatly on the amount of shelter; for if wind be not permitted to blow freely over the surface, the stratum of air immediately over the water will become saturated or nearly so, and hinder further evaporation. It is also thought that the rate of evaporation

ration is affected by depth, and that shallow water dries up faster than deep. It is doubtful if this be a clearly established fact, but it is likely enough to be true, in consequence of the greater heating effect which it is reasonable to suppose the sun may exert in shallow water. There can be little doubt, however, that the chief cause of rapid evaporation is the free circulation of dry air. At the Yan Yean Reservoir in Victoria the evaporation is believed not to exceed two feet per annum. In India and other tropical countries the rate generally allowed is from six to eight feet per annum. The rate assumed by Mr. Bennett for Sydney is four feet, and is probably as near an approximation as our present knowledge will justify.

To sum up this discussion of the Botany scheme,—we have come, after mature consideration, to the conclusion that it can barely be made adequate to the existing wants of Sydney, and cannot keep pace with the demands of an increasing population; that it should therefore be abandoned for another scheme which we will describe in the sequel; and that no more money should be spent in its improvement. If, however, in opposition to this view, it should be determined to adhere to the present scheme for some years to come (say ten or twelve), we are of opinion that the following works should be carried out as described and recommended by Mr. Bennett, namely,—Reservoir at Long Swamp, with pipe to Botany; Reservoir at Lachlan Swamp, with engine to pump to Paddington and Waverley; Reservoir at Waverley, and enlargement of Paddington Reservoir. The question as between a reservoir at Strawberry Hills and one at Newtown (with the enlargement of Crown-street) might be deferred, as we do not think that the Botany supply will be capable of overtaking Newtown. The question of a pipe through the tunnel might also be deferred. The total first cost of these improvements (including compensation for land) would be about £130,000.

In the event of the Botany scheme being adhered to, it might be worth trying the experiment of a dam on Cook's River, a little way above the present road, to intercept the drainage (including Woollen Creek) of about 24 square miles. If this dam were successful in forming a basin of fresh water, a supplemental supply could thus be obtained for Newtown and the suburbs in that direction. The water would not stand high in quality, as may be seen by the analysis of Cook's River at Canterbury, and of Woollen Creek; but if the sea-water were completely swept out by floods and permanently excluded, the impounded water would be fit for use, although not equal to that from Botany. It is probable also that the cost of this supplementary supply would not be beyond the means of the neighbouring suburbs; but as we do not recommend the retention of the Botany scheme we have not thought it necessary to work out the details of this subsidiary project.

III.—NEW SOURCES OF SUPPLY.

We shall here pass briefly in review the various new sources that have been suggested as possible to be had recourse to in supplying Sydney, dwelling finally with somewhat greater detail on the particular scheme that seems to us most worthy of adoption. In one of the appended maps the principal river basins to be referred to will be found clearly defined.

1.—*The Grose.*

We got much valuable information about this river from Edwin Barton, Esq., who made a survey of the valley a few years ago for railway purposes; and we followed up his evidence by an inspection of the upper part of the river, and of the place suggested by him (Q. 1,128) as a favourable site for an impounding reservoir.

The Grose drains 268 square miles of the Blue Mountain Range—a sterile, broken country that can never be to any extent inhabited. The highest source is at Darling's Causeway, about 3,500 feet above the sea; but it rapidly falls into a deep gorge, having cut through the sandstone and upper beds of the coal measures, until in 10 or 12 miles it is no more than 1,100 feet above the sea, and at its junction with the Nepean it is probably not 20 feet above high-water mark. The water is of excellent quality, being, in fact, one of the purest examined by the Commission. In the specimen collected, May 9, 1868, the dissolved solid matter was only 3·8 grains per gallon, and this contained no more than three-fourths of a grain of organic matter, with less than seven-tenths of a degree of hardness. Left in contact with lead for 24 hours, the amount of that metal dissolved was scarcely appreciable.

In some respects this river is unexceptionable as a source of supply. Its basin is of ample extent, and so difficult of access that the unsurpassed purity of its water is never likely to be polluted by the accompaniments of human industry. But there are serious drawbacks. The river falls so low occasionally in times of drought that it would be necessary to throw a dam across it at some convenient point, so as to preserve a store of water for equalizing the supply. The point recommended by Mr. Barton for such a dam is about 12 miles from the source, and a little below the junction of a large tributary coming from the south-west, at the head of which is the fall known as "Govett's Leap." At this junction the valley widens considerably, and forms an extensive alluvial flat covered with large blue-gum timber. A dam at the point indicated, of about 60 feet in greatest height, and about 700 feet long, would probably cover 400 acres with water at an average depth of 25 feet. This would contain 2,700 million gallons. We found however that the place was not well fitted for the construction of a masonry dam such as would be required, as its base would rest and its ends abut on the coal measures, made up of strata of different qualities and degrees of coherence, which might not prove to be impervious under a great pressure

pressure of water. But another very serious objection to the Grose scheme lies in the expense that would attend the conveyance of the water to Sydney. The intervening country is not suited for an open conduit, and if iron pipes were used it would be advisable to allow a fall of at least 5 feet to the mile, in order to secure a sufficient velocity; for with a less fall the pipes would require to be of greater diameter in order to deliver an equal amount of water with less velocity, and being of greater diameter they would have to be at the same time thicker in substance, so that the expense would be much increased. To obtain the necessary head of water, we should have to go back to a point about 15 miles from the mouth of the Grose, or about 50 miles from Sydney. Here the river is 425 feet above the sea, but its drainage area is reduced one-half. If instead of crossing the Nepean directly at the junction of the Grose, the pipes were made to trend a few miles to the southward, advantage might then be taken of the railway bridge for crossing, but the whole length of the line would be increased to about 55 miles. Mr. Bennett has supplied us with a rough estimate of the expense of this scheme, which will be found in the Appendix; and from that it appears that one line of piping, to convey 12 million gallons per day, would cost £895,000; and if laid in two lines, each capable of conveying 6 million gallons, the cost for each would be £652,500. To this would have to be added £150,000 for dams on the Grose and works at the Sydney end, making the cost of supplying 12 million gallons per day in one pipe, £1,045,000, and in two pipes, £1,455,000. This great expense, added to other objections, is fatal to the scheme.

2.—*Burralow and Wheeny.*

In connection with the Grose we have given some attention to Burralow Creek, which falls into it from the north about 6 miles above its junction with the Nepean. Burralow drains 16 square miles of sandstone country at the back of the Tabarag Ridge. A number of small tributaries converge into a swampy valley in which the stream for about 2 miles has very little fall. If the narrow outlet of this valley (which is about 960 feet above the sea) were closed by an embankment of 50 or 60 feet in height, it is probable that about a square mile could be covered with water, and if this had an average depth of 18 feet it would contain upwards of 3,000 million gallons, which quantity would be supplied by 15 inches of rainfall over the drainage area. The water is of admirable quality, being nearly as pure as the Grose; but the expense of conveying it to Sydney would be as great as in the case of the Grose; and this, coupled with the limited catchment, rendered it unnecessary to make a more minute examination of Burralow.

Wheeny.—Passing northwards from Burralow, we come upon the basin of Wheeny Creek, which drains 29 square miles of country before cutting its way through the Tabarag Ridge to join the Colo. Here again we have excellent water—a shade purer even than that of the Grose—and at an effective altitude, being 720 feet above the sea
at

at the Tabarag Gap ; but there is no such extensive valley for storage as in the case of Burrellow, and the difficulty and consequent expense of conveying the water to Sydney would be much the same. The country drained by these two streams is thickly wooded, and contains numerous patches of swampy ground—conditions highly favourable to the preservation of water ; and we have reason to believe that Burrellow and Wheeny, though draining comparatively small areas, never stop running even in the driest seasons.

A few miles below the Tabarag Gap, Wheeny is joined by Little Wheeny, which drains a portion of the Kurrajong, and increases the catchment basin to 46 square miles ; but the altitude is then so low (probably not more than 60 feet above the sea) that no use could be made of the combined water for our present purpose.

3.—*The Colo.*

This river requires only a passing notice. Its catchment area (exclusive of Wheeny, which falls into it near its termination) is 1,575 square miles. As the surface drained by it is mostly sandstone the water is of great purity, being very similar to the Grose, but here again the want of altitude compels us to set it aside. At the junction of Wheeny it is very little if anything above high-water mark, and at the crossing of the Comleroy Road it is only a few feet higher. Like all the rivers in the sandstone formation it runs at the bottom of a deep gorge, and we should have to go back a long way into an impracticable country before reaching such an elevation as would render it possible to supply Sydney by gravitation.

4.—*Couridjah Lagoons.*

These lagoons lie near to the southern line of railway, a few miles south of Picton, and at an altitude of 1,000 feet above the sea. The water is remarkably free from mineral matter, there being barely 2 grains per gallon, with no appreciable hardness, but the organic matter is 1·8 per gallon, and communicates a perceptible taste. The drainage area is of very limited extent, not more probably than 2 or 3 square miles, and when the Commissioners visited the lagoons in March, 1868, the actual water surface was about 140 acres. The usual outlet is towards the west, and is said to discharge into the Nattai ; but when the level rises in rainy weather the water is said to discharge also towards the north into Cedar Creek, and thence by Stonequarry Creek to the Nepean. The catchment area is too small for this locality to be thought of as a source of supply for Sydney ; but it might be turned to good account as a compensatory reservoir for the Nepean. If the water surface were raised 30 feet by embankments at each outlet the storage capacity would be upwards of 1,000 million gallons, and this might be of utility in maintaining the flow of the Nepean in times of drought. The water could also be used for irrigation in the neighbourhood of Picton.

5.—*George's River.*

It has been proposed by the Hon. Thomas Holt, M.L.C., to throw a dam across the estuary of this river, near its confluence with Botany Bay; and it is argued that if this were done the salt water would soon be swept out by floods, and the estuary as far up as Liverpool could thus be converted into a lake of fresh water. The entire area drained by the river is 375 square miles—an amount of surface capable of affording more than 15 million gallons per day if only one inch of rain per annum were impounded from the whole area. The supply would be abundant in quantity, but doubtful as to quality. For in the first place, it might take a very long time before the salt were entirely washed away; and secondly, supposing this were accomplished, it would probably still be found that the water stored up would be of indifferent purity. The tributaries that come from the seaward side of the river drain a purely sandstone country, and no doubt furnish excellent water; but those from the landward side drain a country covered in great part by the deposits of clays and shales termed by the Rev. W. B. Clarke the Wianamatta beds, and these we find to have the effect of contaminating water with common salt, and with compounds of lime, magnesia, and iron. The water of the Woronora (the largest seaward branch) is pure and soft, containing only 6.1 grains of solid matter per gallon, and with a hardness of only 1.3. The water from George's River below the junction of Toggerai is also pure, there being the same proportion of solid matter, with slightly less hardness; but a specimen taken about 3 miles above Liverpool showed the influence of Bunbury Curran Creek, which drains the Wianamatta deposits of the Campbelltown valley. This specimen contained 26.2 grains of solid matter per gallon, with a large proportion of organic matter and 8° of hardness. A sample drawn from the dam at Liverpool gave 15 grains of solid matter, of which about $2\frac{1}{2}$ was organic.

The effect of the Wianamatta beds on the quality of water collected upon them is well seen in the case of South Creek, which drains a district entirely covered by these beds. The water of South Creek contained 38.7 grains of dissolved solid matter; of which about 25 grains was common salt, and the hardness 9°. "Now that you are looking for water," says the Rev. W. B. Clarke (Q. 1089), "I should like you to avoid shales."

Besides the objection drawn from the fact that the landward tributaries of George's River come from Wianamatta deposits, it must also be noticed that these same tributaries, and partly the river itself, drain a country which is to a large extent settled and cultivated; and such drainage ought always to be avoided as a source of water supply.

Another objection that we have to the George's River scheme is that the water would have to be pumped to Sydney as at present, and we think that every effort should be made to procure a supply by gravitation.

gravitation. In this we follow the example set us by numerous towns in Europe and America, where of late years pumping schemes have been abandoned, and much expense incurred in order to obtain a continuous influx of water by its own gravity.

But the weakest feature in this scheme is the dam across the estuary. If this were made thoroughly sound and efficient by masonry its cost would be too great, and if of loose material, as proposed by Mr. Holt, we doubt if it could be made to answer the purpose intended; at all events we cannot recommend such a work.

A fuller discussion of this scheme will be found in papers given in the Appendix, consisting of letters and evidence by Mr. Holt, evidence by Mr. A. K. Smith, and observations by Mr. Moriarty, together with illustrative plans and sections.

6.—*Tributaries of George's River.*

If George's River as a whole must be set aside, it remains a question whether the pure water of the seaward tributaries might not be made use of. At first we were favourably impressed by the claims of the Woronora, and we therefore made a careful examination of it. This river rises in swampy flats of no great extent behind the Illawarra range, at a height of about 1,200 feet above the sea; but like all other rivers flowing over sandstone, it speedily cuts its way down and runs in the bottom of a deep rocky gorge, several hundred feet below the level of the neighbouring country. At the time of our visit (in a moderately dry period) the river was delivering not more than half a million gallons per day, so that the district cannot be very retentive of water. The drainage area of the Woronora is 48 square miles, which might be sufficient if a storage reservoir could be formed of great capacity, but we found no good site for such a reservoir, and this, coupled with the fact that to get a sufficient height for gravitation we should have to go a long way back, and thus diminish the catchment, made us set this river aside.

We examined also the higher part of George's River. The chief source rises in Madden's Plains, behind the Bulli Mountain, a portion of an extensive tract of swampy country, over 1,200 feet above the sea. It soon drops like the Woronora into deep gorges, and below the junction of Toggerai (about two miles from Campbelltown), it is only 200 feet above the sea. Although the drainage of 69 square miles passes this point we found the delivery to be under 2,000,000 gallons per day, the period however being rather dry. The water is of excellent quality, but the altitude is not sufficient, and the locality is not well adapted for a storage reservoir of adequate capacity. Further, the water would have to be brought all the way to Sydney in pipes, a distance of about 35 miles, and the expense of piping to carry 12,000,000 gallons per day would be considerably over half a million sterling.

7.—*The Warragamba.*

This river is formed by the junction of the Cox and Wollondilly in Burraborang, and after a short course of 12 or 15 miles, through a deep and narrow gorge of sandstone, it joins the Nepean about 12 miles above Penrith. It drains an immense tract of country, estimated at no less than 3,247 square miles. A considerable portion of this area is populated and under cultivation. The geological formation of the upper part of the Wollondilly comprises trap, granite, and schistose rocks, with occasional patches of limestone. The upper part of the Cox lies partly in the coal measures. Both rivers (as well as the Warragamba) run for a large portion of their course through sandstone. In regard to quality of water the Cox was found to be remarkably pure, the dissolved solid matter being no more than 3·7 grains per gallon, with 1°·4 of hardness. The Wollondilly near Goulburn was found to contain 12·4 grains of dissolved matter, with 8° of hardness, the hardening matter in this case being mostly carbonates of lime and magnesia. In the appended table of water analyses will be found particulars of three affluents of the Wollondilly, namely,—Mulwarree, Paddy's River, and Wingecarribee. These waters are of fair quality, but the Mulwarree and Wingecarribee contain rather too much iron and organic matter. The samples, however, were not in very good condition, being apparently affected by recent freshes; and the same remark applies to the sample of the Wollondilly near Goulburn. The combined effect of all the tributaries is seen in the composition of the Warragamba, which gave 6·8 grains of solid matter, containing a little over 1 grain of common salt, and 1½ of organic matter, with 4° of hardness. Although the hardness is greater than in many of the rivers examined it is still very moderate, and the water would rank as sufficiently pure and soft for a town supply. With regard to action on lead, the Warragamba water is satisfactory, as it dissolves less than Botany water under similar conditions.

A project for supplying Sydney with water from the Warragamba was laid before the Government by Thomas Woore, Esq., in 1866, and before the Water Commission as soon as it was constituted. His scheme consists in damming the river near its junction with the Nepean, and thus raising the water high enough to supply Sydney by gravitation, after being conveyed thither in an open canal. In the Appendix will be found various papers by Mr. Woore on this scheme, together with remarks thereon by the other Commissioners. The main objections to this scheme lie in the nature of the dam that would have to be constructed. To supply merely the low service reservoir at Crown-street, the dam could scarcely be less than 200 feet high, and might have to be more, unless a sufficiently capacious weir were provided

provided for the free escape of flood waters. Mr. Grundy calculates that the dam would require to be 235 feet in height, made up as follows :—

	Feet.
Height of Crown-street Reservoir	136
Loss of level by gradient	80
Outlet below surface	20
Increase for floods	40
	276
Less height of river-bed above sea-level ...	41
	235

His estimate of the cost of such a dam, constructed on the plan described by Mr. Woore, is £1,301,000, which, with contingencies, would be raised to nearly two millions. If an efficient weir could be formed the dam might be reduced a little in height, but the weir would be a very expensive work. It may be objected that in this estimate there is an unnecessary height of dam above the outlet; but it must be kept in view that owing to the great pressure of water there would certainly be considerable leakage, and also that in seasons of drought the Warragamba delivers very little water. In December, 1868 (a moderately dry period), we had the river gauged, and it was found to be delivering no more than $3\frac{1}{2}$ million gallons per day. To provide against leakage and droughts it is clear that a large storage capacity ought to be provided.

The highest successful dam of which we find any record is one recently constructed on the Furens, an affluent of the Loire in France. It is about 165 feet in height. It is built of a compact stone (mica-slate)—rubble masonry without regular bedding; and the stream was turned aside while the work was in progress. The water is found to ooze through the dam in consequence of the great pressure. The whole drainage area above the dam is less than 10 square miles, and the average annual rainfall less than 40 inches.

In the case of the Warragamba, the height of the dam would require to be greater than on the Furens; the stone is less compact, the river cannot be turned aside while the work progresses, and destructive floods are liable to pour down at any time with little warning. Should the dam be carried away by one of these floods (and it may be safely presumed that it could not be made absolutely secure without such an outlay as the Colony could not face), an immense body of water, 200 feet high, and dammed back more than 20 miles, would be suddenly let loose to carry destruction down the valley of the Hawkesbury.

One of the highest dams ever attempted was on the Guadarrama, in Spain. It was to have been 305 feet in height, but on reaching 188 feet the works began to give way, and were stopped. A dam on the Lorca, in Spain, was built 164 feet high; it stood for 17 years, and then gave way, causing great devastation.

Mr.

Mr. Bennett has supplied us with drawings and calculations of a masonry dam of similar proportions to those recently constructed in France, and of the height suggested by Mr. Woore (170 feet), stating at the same time that he could not advise the building of such a dam. Its cost, with valves and tunnels, he estimates at £428,000 ; approximate cost of waste channel and weir, £150,000 ; suspension aqueduct for crossing the Nepean, £50,000 ; making in all, with contingencies, £650,000.

Supposing that a dam were successfully constructed, and the water raised to a sufficient height, it would then be found that the expense of conveying it to Sydney would be very great. The line, if carried direct, would cut at right angles South Creek, Rope's Creek, and other tributaries of the Hawkesbury—a course very unfavourable for an open aqueduct—while if carried round southwards, so as to head these streams, its length would be greatly increased, thereby necessitating an increase of height in the dam. The expense of iron piping to convey the requisite amount of water from the Warragamba to Sydney would be considerably over half a million sterling.

8.—*The Nepean.*

The Warragamba being given up as a gravitation scheme, we have now to consider whether it would be advisable to raise water from it to a sufficient height to supply Sydney by pumping. If a pumping scheme were to be established, it would be expedient to erect the engines as near to the Railway at Penrith as possible, in order that coal might be supplied economically. We should here have the combined waters of the Nepean and Warragamba to draw from, and the long reach of deep water from the Warragamba to Penrith would afford sufficient storage in droughts without damming the river. The water is of fair quality, the sample examined giving 10 grains of solid matter per gallon, in which common salt amounted to about 4 grains, and the hardness 3·4. Its action on lead was about the same as that of the Warragamba. The sample was dirty-looking, and almost opaque from diffused clay ; and, as the river seems to keep clay in suspension for some time after freshes, the water might require to be filtered.

Mr. Moriarty has supplied calculations of the cost of such a pumping scheme (given in Appendix), by which it will be seen that to pour eight million gallons per day into the Crown-street Reservoir, and four millions into the Paddington, would involve a total cost for plant of £920,364, and an annual expenditure of £26,328. Instead, however, of deriving the whole supply from the Nepean, Mr. Moriarty shows the cost of an alternative scheme in which the Crown-street Reservoir might be supplied with six million gallons daily from that river, while the Paddington high service might be kept up by the engines at Botany. The first cost of plant for this modification would be £452,080, and the annual working expenses £14,764. As the whole water from Botany would be pumped to a higher level than at present, the annual expenses there would be increased, and are put down by Mr.

Moriarty

Moriarty at £7,039, making the total annual expense of pumping £21,803. This sum represents a capital of about £440,000, which added to the first cost gives about £900,000 as the total cost of supplying Sydney with about 10 million gallons per day,—6 million from Nepean, and 4 from Botany. But to keep up an average of 4 millions from Botany would require additional works for storage, as explained in the previous section. Our conclusion therefore is, that neither by gravitation nor by pumping can Sydney be economically supplied from the Warragamba or the Lower Nepean.

9.—*The Upper Nepean.*

We have now, in the last place, to give the outlines of a scheme which seems to us on the whole to be superior to all others examined, and which therefore we have agreed to recommend,—the scheme, namely, of supplying Sydney by gravitation from the higher affluents of the Nepean. This scheme obviously possesses the leading qualities that are at the present day so eagerly sought for in all great projects for water supply throughout the civilized world. The catchment area selected is ample, being 354 square miles in extent, or fifty times greater than the surface relied upon at present. It is entirely a sandstone country, of a barren intractable nature, and if not turned to account as a gathering ground for water, it is never likely to be of much use for anything else. It is true that a few adventurous “free-selectors” have made their way to the swampy grounds at the sources of the Cordeaux and Cataract Rivers, but they can find little reward for their labour in these localities, and would probably be glad to be bought out. But even if they remain, their operations could make no sensible difference on the purity of the waters. The unoccupied land, however, should be immediately reserved.

The drainage of this selected area has the purity of all sandstone waters, and in that respect leaves nothing to be desired. In the appended table of analyses will be found the particulars of seven samples taken at different times from the three rivers that drain the district; and from these it will be seen that the mean amount of dissolved solid matter is only five grains per gallon. The volatile matter shows a mean of 1.4, but in these waters there is a small proportion of earthy chlorides, and the loss on ignition will therefore be slightly greater than the organic matter. It will probably be very near the truth if we state the mean amount of fixed salts to be $3\frac{3}{4}$ grains, leaving $1\frac{1}{4}$ for organic matter. The mean hardness is 0.84. Common salt makes up about $2\frac{1}{2}$ grains of the fixed salts. The composition of these waters is therefore much the same as that of Botany water, there being a shade more hardness in the former, but slightly less common salt; and the action on lead is also less.

The rivers that drain the selected district take their rise mostly in swampy flats between 1,200 and 1,600 feet above the sea, but they drop their altitude rapidly, and at the confluence of the Cordeaux with the Nepean, at the point known as “Pheasant’s Nest,” where we

propose to make the first interception of the waters, the height is 430 feet. At the confluence of the Cataract with the Nepean the height is not more than 220 feet above the sea, but a little higher up the Cataract (at Broughton's Pass) we gain an altitude of 420 feet. In Mr. Moriarty's report, hereto appended, the character of the district and its advantages as a gathering ground are so fully described that it is unnecessary to dwell more upon them in this place; suffice it to say that in regard to extent of surface, purity of water, freedom from sources of contamination, want of value in the land for other purposes, and altitude above the sea, we have all that can be desired—the one drawback being distance from Sydney (63 miles measured along the proposed conduit), which, though not important in an engineering point of view, will necessarily be a source of great expense; but we cannot find equally advantageous ground at any nearer distance.

When we visited the higher portions of the district in December, 1867, and the lower portions in February, 1868, we obtained numerous barometric altitudes, which, coupled with those previously obtained from the Rev. W. B. Clarke, and with Mr. Shone's railway sections, satisfied us that water could be obtained at a sufficient height for gravitating to Sydney, and that the best points to intercept the water were at Pheasant's Nest and Broughton's Pass. Within a very few miles of these points the rivers drop 200 feet, and are then too low for our purpose. It is this that prevents the Bargo being included in our selected area.

The possibility of drawing off the head waters of the Nepean at a sufficient level, and bringing them out by tunnels on the ridge near Appin, being demonstrated, it was speedily apparent that the key to the scheme lay in the nature of the country between Appin and Prospect,—whether it would permit of the water being brought down at a proper slope without piping or heavy engineering works, and whether a reservoir could be formed of large capacity for storage; for it was evident from the general nature of rivers in this country (proved afterwards by direct gauging), that however plentiful the total drainage of the district might be, the discharge would frequently, in dry periods, fall below the measure of our requirements. At first we considered the propriety of forming dams on the rivers themselves, and we examined a portion of their channels with that view; but although we found several points tolerably well fitted for dams of considerable capacity, we ultimately decided not to recommend the construction of any of these for the present. The heavy floods to which all our rivers are subject would render such dams unduly expensive; and we considered that it would be more economical as well as in other respects preferable to construct one large reservoir apart from the rivers, and subject to no floods, instead of several dams of smaller capacity in the river beds.

To determine therefore the practicability of the scheme, we detailed Mr. Grundy (by a resolution of 25th March, 1868) to superintend a survey of the ridge dividing the waters of the Nepean from those of
George's

George's River, from Sugarloaf Hill to Prospect, and thence to the head of Duck Creek. This survey was commenced early in April, and from time to time Mr. Grundy brought up reports of its progress. By a resolution of the Commission on 11th July, Mr. Moriarty and Mr. Grundy were requested "to undertake the responsibility of working out the details of the scheme for bringing water from the Cataract and Cordeaux Rivers," at the same time that Mr. Bennett was requested to undertake a similar responsibility in regard to the improvement of the Botany scheme. Thereupon Mr. Moriarty sent out surveying parties to the upper end of the line, from Pheasant's Nest to Sugarloaf, and to the lower end from Prospect to Sydney. At the next meeting of the Commission (July 21st), after hearing a favourable progress report from Mr. Grundy, it was resolved that Mr. Moriarty, Mr. Bennett, and Mr. Grundy should be deputed to examine the proposed line of aqueduct from the Cordeaux and Cataract Rivers to Sydney.

The broken and intricate nature of the dividing range from Sugarloaf to Prospect, the close bush which in many places greatly impeded observation, and the work involved in the discovery of suitable reservoirs, made the progress of the survey more difficult and tedious than was at first anticipated; and it was not till August 22nd that Mr. Grundy was able to report that, having completed a practicable line to Prospect, he had found good sites for reservoirs in that neighbourhood. Of these reservoirs (described in Mr. Grundy's general report hereto appended) the Commission adopted the one near Bull's Hill, as presenting on the whole the greatest advantages.

On October 15 (see Abstract of Proceedings) Mr. Moriarty and Mr. Bennett brought up their report on the line of aqueduct proposed by Mr. Grundy, from Sugarloaf to Bull's Hill, speaking very favourably of it, approving of certain proposed deviations, and suggesting others, which were afterwards carried out. They also reported that they had made provision for gauging the rivers at Pheasant's Nest and Broughton's Pass.

On February 19th of the present year, Mr. Moriarty reported to the Commission that on examining the section from Prospect to Sydney, it appeared to him that the larger or more northerly reservoir ought to be adopted, and accordingly he proceeded to design the works between Prospect and Sydney, adapting them to that view of the case. The total capacity of the larger reservoir he estimated at 10,635 million gallons, but as he proposed to draw off only the upper 25 feet of water its available capacity would be reduced to 7,110 million gallons.

After the gauging of the rivers had been continued for about five months Mr. Grundy made an examination of the results, with the view of ascertaining if sufficient water would pass down the proposed aqueduct to give the required supply, and if the storage capacity of the proposed reservoir would be adequate to the demands upon it in dry seasons. Taking the ratio between rainfall at Sydney and flow of rivers as established during the period of gauging to hold good at other
other

other periods, rejecting all rainfall under $1\frac{1}{2}$ -inch, and drawing nothing from the rivers while their delivery was under 10 million gallons per day, he yet found that the means provided would have been ample for the ends proposed throughout the last twenty-eight years, and that the store of 7,000 million gallons would never have been reduced below 5,000 million in the driest recorded period. These calculations (which are given in the Appendix) seemed to put the sufficiency of the supply beyond doubt. Mr. Moriarty, at a later period, examined this question afresh after the gauges had been recorded for a year, and his results are fully detailed in his report and appended tables. He shows that over one-third of the total rainfall (assuming that to be the same as at Sydney) passed down the rivers in the course of the year, and that about one-sixth of the discharge, or one-sixteenth of the rainfall, could have been received into the reservoir,—the numbers being,—rain at Sydney, 44.32 inches; water due to rainfall on catchment of 354 square miles, 227,280 million gallons; measured discharge of rivers, 87,688 million; received into reservoir, 14,438 million. The reservoir could thus have been filled twice over in the course of the year, equivalent to a supply to Sydney of 40 million gallons per day. The tables show a remarkable difference between the proportion of rain to discharge in summer and winter. If we take the six hot and dry months from October to March (inclusive), we find the Sydney rainfall to be 18.22 inches, equivalent to 93,435 million gallons on 354 square miles: but the measured discharge was only 5,490 millions, or 1-17th; and the quantity that could have been taken into the reservoir 3,679, or barely 1-25th of the rainfall.* But even this small proportion is equivalent to a supply of 20 million gallons a day. Pass to the remaining $5\frac{1}{2}$ months of the gauging period and the tables show a very different result. The rainfall is $24\frac{1}{4}$ inches, equivalent to 124,307 million gallons on the catchment; the estimated discharge of the rivers 80,826, being nearly two-thirds of the rainfall; and the quantity that could have been stored 10,387, or 1-12th of the rainfall, equivalent to a supply of 60 million gallons a day for the period in question, and enough to give 28 million gallons a day throughout the whole year, even if nothing whatever had been drawn from the rivers during the rest of the year. But these calculations assume that all the water is intercepted up to 80 million gallons per day, so that for several months none would be allowed to pass down the rivers. This, no doubt, would be strongly objected to by residents lower down; for although the Bargo and other tributaries are left to feed the Nepean, it is understood that in dry seasons the affluents we propose to intercept are those most to be depended on. We would therefore recommend that the intercepting weirs be so constructed as to allow any quantity up to 10 million gallons to pass down, and that none be drawn away by the tunnels until the discharge exceeds this quantity. Of course all above 80 million gallons (the extreme capacity of the tunnels) must pass down.

Applying

* Mr. Moriarty's results will be found to differ from these, by reason of his taking the five and a half months ending with February to represent the dry season, instead of six months ending with March, as above.

Applying this correction to the tables—that is to say, assuming that we only intercept quantities above 10 and under 80 million gallons—we still find that the quantity impounded would have been far beyond our requirements. And to test the capabilities of the scheme to the utmost, let us suppose further that we withdraw daily not 12 million gallons which we have adopted as the minimum, but 30 million. Starting with a full reservoir of 7,000 million gallons on 1st October, 1868, we should find its condition, monthly, to be as follows:—

				Mil. galls.

	* Overflow at reservoir.			Supposing

Supposing not a drop more water entered the reservoir for seven months it would go on supplying 30 million gallons daily for that time, with an allowance over and above of 1,000 million for evaporation—certainly a superabundant allowance. In ordinary seasons the rain falling on the reservoir basin would probably balance the evaporation, but in very dry seasons there would no doubt be loss through this cause.

By taking only quantities above 10 and under 80 million gallons, we find that in the above-noted period of $11\frac{1}{2}$ months we could have impounded in the reservoir a total of 12,000 million gallons, or 1-18th of the rainfall; but in the first six months (the dry period) we should have had only 2,496, or 1-37th of the rainfall. In a former part of this report we have stated it as probable that in 1839 not more than 18 inches fell. If 1-18th of that quantity were impounded, it would be equivalent to a supply of 14 million gallons per day; and even if we take the low summer proportion of 1-37th (which would probably be nearer the truth in a time of great drought), we should still have over 6 million gallons per day in aid of the store in the reservoir. But indeed the reservoir would supply 12 million gallons a day for a year and a half, without any addition whatever, and with a good margin for loss by evaporation. In fine, we have given this question of quantity the most anxious consideration; and although there are elements of uncertainty in the calculations which cannot at this stage be eliminated, we see no room to entertain any doubt whatever that the scheme we recommend will provide a most ample and unfailing supply of water.

For a description of the line of aqueduct and proposed works we refer to the reports of Mr. Moriarty and Mr. Grundy, and to the accompanying book of plans prepared under their superintendence. It will be seen that the combined waters of the Cordeaux and Nepean, at Pheasant's Nest, are to be obstructed by a weir 10 feet high, and diverted into the Cataract River by a tunnel $4\frac{1}{2}$ miles long. A similar weir on the Cataract will raise the water 10 feet, and turn it into another tunnel about $1\frac{3}{4}$ mile in length. The water now emerges near Appin on the west side of the range dividing the Nepean from George's River, and is carried along this ridge by a succession of canals, tunnels, and raised aqueducts. At Sugarloaf Hill it crosses to the east side of the range, and from some point near this Campbelltown could readily be supplied with water at no great expense. The conduit passes under the Main South Road and over the railway, and about a mile further on it crosses again to the west side of the range, along which it continues to Cecil Park, when it once more passes to the east side by a long tunnel. Before reaching this point it has dropped a good deal of its altitude through the falling away of the range near Mount Cordeaux. It will be seen by the section that between the 25th and 28th mile from the beginning of the conduit it is lowered about 70 feet by a series of weirs. About the 38th mile we come to the site of the first reservoir recommended by Mr. Grundy. It is near Bull's Hill, on one of the heads of Prospect Creek. An embankment, 96 feet in greatest height, and containing $2\frac{1}{4}$ million cubic yards of earthwork, would

would here form a reservoir with a water surface of 535 acres, 260 feet above the sea.' Mr. Grundy proposes to make the outlet 200 feet above the sea, and thus obtain available storage for 4,636 million gallons, but he calculates that in such seasons as have been experienced within the last 28 years the water surface would never have been lowered below 245 feet. He would bring the water to Sydney in two pipes, each 36 inches in diameter, one to supply the Crown-street low service, and the other the Paddington high service; and he thinks it would be possible to form a smaller reservoir, partly within the large one, which would give a maximum head of 280 feet, and enable him to supply, under favourable circumstances, the highest parts of Paddington and Woollahra.

Two miles further on we come to the site of the reservoir at Prospect adopted by Mr. Moriarty. At this place (on another head of Prospect Creek) an embankment, 80 feet in greatest height, a mile and a quarter long, and containing two million cubic yards of earthwork, would form a lake covering two square miles, at a maximum level of 195 feet above the sea. Mr. Moriarty proposes to draw off the water at 170 feet, which would make the available storage about 7,000 million gallons. This large storage is not considered absolutely necessary, but it is desirable to bring the water as near to Sydney as possible in an open channel, and the country is not favourable to the construction of a canal at a higher level. Leaving the reservoir then at a height of 170 feet, Mr. Moriarty proposes to bring the water in a canal for $4\frac{1}{2}$ miles, then as the country begins to drop to substitute for one mile and a quarter an iron aqueduct raised on iron piers, and to cross the deep depression of Duck Creek by two syphon-pipes each 2 miles and 55 chains in length. Where the aqueduct changes to the syphon, near the crossing of the road from Parramatta to Liverpool, there would be a small balance reservoir, from which Parramatta (distant 3 or 4 miles) might be very efficiently supplied by gravitation—the reservoir being 170 feet above the sea. This service could be effected for about £4,000. Another mile of canal brings the water to a point within 10 miles of the Crown-street reservoir, and from thence it must be carried entirely in pipes. The pipes would first discharge into a distributing reservoir placed on the high ground above Petersham, whence the neighbouring suburbs would be supplied from a head of water varying from 150 to 164 feet. The present Crown-street Reservoir would be filled from the Petersham, or a new reservoir might be constructed at a higher level on Strawberry Hills, as proposed by Mr. Bennett. This could also be filled from Petersham, and would have the advantage of bringing more of Sydney within the reach of the gravitation supply.

Mr. Moriarty indicates a method of supplying the higher parts of Sydney by means of a small reservoir on the top of Prospect Hill, filled partly from the conduit before reaching the large reservoir, and partly by pumps worked by a turbine in the outlet tower of the reservoir; but as it would be much cheaper to supply the higher levels by pumping from Crown-street, he recommends that this latter plan be adopted. One, or if necessary two, of the engines might be removed from Botany for this purpose.

Having

Having brought the water down to the neighbourhood of Prospect, we have thus two methods of dealing with it to consider, and the choice between them has been attended with much difficulty. First, we have Mr. Grundy's high-level scheme, by which the water would be impounded at a maximum height of 260 feet in his large reservoir, with a possible additional height of twenty feet by means of a small reservoir higher up—the water to be brought all the way to Sydney (twenty-one miles) in pipes. The Paddington Reservoir could thus be filled by gravitation, with the possibility of attaining a still greater height (though at greater expense) if the 280 feet reservoir were found practicable. Then we have Mr. Moriarty's low-level scheme, where a larger body of water is impounded at a maximum height of 195 feet, and brought to Sydney by eight miles of open conduit and thirteen miles of pipes, distributing from Petersham with a minimum head of 150 feet. Crown-street Reservoir, or one at Strawberry Hills, could be filled by gravitation, while the higher levels would be supplied by pumping from Crown-street. To supply the highest parts of Paddington and Woollahra would require a reservoir about 270 feet above the sea; and the highest parts of Waverley could not be supplied with less than 350 feet of head; but it is doubtful if the population to be served at that height would warrant the expense. The estimates of both schemes have been carefully made up by Mr. Moriarty and Mr. Grundy, and afterwards revised by these gentlemen in conjunction with Mr. Bennett, and the expense of each comes out as follows:—

High-level Scheme.

Works from Pheasant's Nest to Bull's Hill,	
37½ miles	241,890
Bull's Hill Reservoir	224,708
Two lines of 36-in. pipe to Sydney	550,248*
Distributing Reservoirs	10,000
Supervision and Contingencies... ..	20,000
	£1,046,846

Low-level Scheme.

Pheasant's Nest to Bull's Hill	241,890
To Prospect, including Reservoir	192,286
Prospect to Sydney, 21 miles	280,853
Provision for High Service	10,000
Supervision and Contingencies... ..	20,000
	745,029
Capitalized cost of pumping from Crown-street	45,000
	£790,029

After

*In the estimates for piping, the cost is taken at £12 a ton laid, while Mr. Grundy and Mr. Bennett think that £11 should be sufficient, and that is the rate adopted by Mr. Grundy in his report. It is considered safer to adopt here the higher price.

After prolonged deliberation we have agreed to recommend the low service scheme for adoption, and it is therefore unnecessary to recapitulate the arguments advanced by Mr. Grundy in favour of the high service, but they were such as to require our anxious consideration, and we have given up the gravitation high service with great reluctance. Among the reasons that have led to our decision are the following:—1. Either scheme is very costly, but the low service is the less costly of the two by about £250,000. 2. The latter can supply the highest levels that may be thought desirable, while we have no assurance that the former can supply with certainty anything higher than the Paddington Reservoir. 3. The Prospect Reservoir has much greater capacity than the Bull's Hill, with less height and cubic contents of bank. 4. Iron piping buried in the ground is not free from doubt on the score of durability, and therefore has not that character of permanency that great works of this kind ought to possess. It is known that cast-iron laid in ground containing common salt corrodes with some rapidity. Mr. Russel Aitken, in his Report on the Bombay Waterworks last year, says—"In a country which has a soil impregnated to such an extent with salt as is the case here, cast-iron is not by any means indestructible. I have seen cast-iron pipes laid down in Bombay which have been corroded away (from the outside) in about five or six years"; and he proposes a steel main supported on masonry pillars, which, he believes, would not only be cheaper but "would outlive a main of cast-iron buried in the ground in the usual manner." Now we know that much of the shale and clay in which the pipes from Bull's Hill would have to be laid is impregnated with salt, and we therefore count it very desirable to use as little iron piping as possible. We could not recommend a steel main in air unless it had first stood the test of experience on a sufficient scale somewhere else. 5. By the low-level scheme a much larger body of water than is at present needed would be brought within ten miles of Sydney; so that the future extension of the supply could be effected at much less cost than if a fresh line of pipes had to be laid all the way from the reservoir. 6. Not only can a larger body of water be brought down at much less expense by a canal than by pipes, but we consider that the continued exposure of the water in an open channel is highly desirable. We expect that for some years after the formation of the reservoir, the water will be somewhat unpleasant to the eye by reason of fine clay derived from the reservoir on first being filled. This can scarcely be remedied by filtration, the particles being so fine, but the evil tends to a natural cure, as has been experienced at the Yan Yean and other places. We believe, however, that if instead of draining off the water in pipes we allow it to flow gently along a canal with turfed sides we shall bring into play much of the self-purifying power so notably possessed by natural running streams; and after settling to some extent in the three reservoirs on the line, the water will be delivered in Sydney unexceptionable to the eye as well as to taste and smell. 7. The adoption of the low-level scheme at present will not preclude the future addition of the high-level

also, if that should come to be thought preferable to pumping from Crown-street. A comparatively small reservoir might be constructed somewhere on the line to give a head of 280 feet, as suggested by Mr. Grundy, and a pipe brought direct from thence to Sydney. It would be an expensive work, but the future development of Sydney might render it desirable and pecuniarily attainable.

We have now discharged the duty laid upon us by the Commission under which we have acted. We have made "diligent and full inquiry into the present provision for a supply of pure water to the City of Sydney and Suburbs"; we have found that "the supply is inadequate and uncertain, and not to be relied upon in all seasons"; we have instituted "all necessary inquiries to ascertain by what measures a reliable and plentiful supply may be best obtained"; and the result of our inquiries is that we recommend the "Upper Nepean Scheme" as best fulfilling the desired conditions. We do not profess that this scheme as now presented is fully worked out in every point, and incapable of further improvement. On the contrary, we are sensible that if we could devote longer time to it we could in all probability suggest modifications that would amend and cheapen it; but so much time has already been spent over this investigation that we deem it inexpedient to hold back our Report longer. If it should be imagined that the inquiry has been unnecessarily protracted, it ought in justice to be considered that each member of the Commission has had other urgent duties to attend to, and that this work has entailed much labour and thought. We may be permitted to say that we have been actuated by a single and earnest desire to arrive at the best possible solution of the question, and that we have diligently and conscientiously pursued this end. We now invite the closest scrutiny of our results, sensible that if our scheme be in the main the best attainable, it will be improved by passing through the ordeal of enlightened criticism; while if any better scheme still lies undiscovered, this same criticism will, we trust, bring it to light.

It scarcely falls within our province to discuss the question of ways and means, but we may simply point out that costly as the work recommended will be, there is every reason to expect that it may be made productive, and entail no permanent burden on the Country. To the estimate already given of the low-level scheme let us add £10,000 for further contingencies, and take its cost in round numbers as £800,000. To this add £100,000 for the improvement and extension of the service in the City and Suburbs, and for the construction of public baths and fountains. The interest on £900,000 at 5 per cent is £45,000; add £10,000 a year for maintenance, and we get £55,000 as the annual charge. Now it will be seen by returns from the Municipalities, given in the Appendix, that the estimated annual rental of property in the City and Suburbs in 1867 was £977,501, and by this time, considering how rapidly houses have multiplied of late, it is doubtless over a million sterling; and a rate of one shilling in the pound on a rental of £1,100,000 will furnish the amount required. Such a water
rate

rate could not be considered extravagant; it is about the average rate in England, and in some towns it is higher. It is unfortunate that there is already a debt of £280,000 on account of water supply. But even this can be borne; for considering that new manufactures requiring water will likely spring up, and that other places besides those enumerated in the list of municipalities may purchase a share in the new supply,—and further, that some revenue may be looked for on account of irrigation,—it is not unreasonable to suppose that the annual proceeds of the water rate will be sufficient to meet the total annual charge.

Such is the scheme that we have the honor to lay before your Excellency, and to commend to the favourable consideration of the Government,—a scheme imperfect it may be in its details, but in its general features the best we believe that the nature of the country admits of, and which, if carried out, will make Sydney the best watered of Australian cities, as it is at present the worst; and will minister to the health, comfort, and prosperity of its inhabitants to distant times.

We have the honor to subscribe ourselves,

Your Excellency's faithful Servants,

J. SMITH, M.D.,

President of the Commission.

E. O. MORIARTY, M.A., M. Inst. C.E.,

Engineer-in-Chief for Harbours and Rivers.

P. F. ADAMS,

Surveyor General.

FRANCIS H. GRUNDY, C.E.

WILLIAM C. BENNETT, M. Inst. C.E.,

Commissioner and Engineer for Roads.

WATER SUPPLY OF SYDNEY AND ITS SUBURBS.

ABSTRACT OF PROCEEDINGS.

MONDAY, 30 SEPTEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.

P. F. Adams, Esq.

F. H. Grundy, Esq.

T. Woore, Esq.

Commission read.

Mr. George E. Faithfull appointed Secretary.

Resolved,—

1. That the Government be requested to place a sum of money (say £100) to the credit of the Commission, in the Bank of New South Wales, towards defraying preliminary expenses.

2. That the Secretary be instructed to procure copies of any former Reports and Surveys affecting the present Water Supply of Sydney, and any Reports that can be procured relative to Water Supply in other Countries.

3. That an official communication be addressed to His Worship the Mayor of Sydney, acquainting him with the appointment of this Commission, and expressing a hope that the Commissioners will receive his co-operation and assistance in this investigation, in which the citizens are so deeply interested.

8 OCTOBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.

F. H. Grundy, Esq.

P. F. Adams, Esq.

Letter read from the Right Worshipful the Mayor of Sydney, signifying his willingness to give any assistance that might be required.

The Secretary was directed to communicate with the Mayor, with the view of ascertaining if it would be convenient for him to accompany the Commission on a visit to the Waterworks, Botany, on the 15th instant, and to ascertain if he would grant permission to the City Engineer to accompany the Commissioners.

The Commissioners directed that an analysis of the water at present supplied to the inhabitants of Sydney be procured.

The following plans were laid before the Commission :—

Sydney Common. Sketch of Sydney Common.

Diagram of Government Quarries.

Two Trigonometrical Surveys of Water Reserves.

Plan of Works on the Water Reserves.

Section shewing Mouth of the Tunnel.

Two Longitudinal Sections shewing difference of level between the Sill of the Tunnel in the Water Reserve at Lachlan Swamp and Botany Bay.

A Longitudinal Section of the Tunnel.

Sketch illustrative of Commissioners' Report on Alienation of Lands in and near the Basin of Water Supply for Sydney and Suburbs.

Survey of the South-eastern Suburbs of the City of Sydney.

Plan shewing the various Localities and Works referred to in the Report of the Special Water Committee of the Municipal Council.

The Secretary was directed to procure from the Government Astronomer a statement of the amount of rain that has fallen at Sydney and South Head for each year, since 1852 (inclusive), and the amount of evaporation as far back as it has been observed; also, to procure information as to the population of Sydney and Suburbs, in the form of a table, shewing the numbers at quinquennial periods, as far back as accurate records go.

15 OCTOBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
		F. H. Grundy, Esq.

The Commissioners proceeded to the Lachlan Swamp, being joined on the way by the Mayor of Sydney and the City Engineer. The party examined the arrangements for supplying the Tunnel with water, and Professor Smith collected samples of the water for analysis. They then proceeded down the course of the stream towards Botany, inspecting on their way the dams that are being constructed by the City Engineer, and the sites of projected additional dams. They finally inspected the pumping machinery, and Professor Smith collected samples of water at the engine-house, for analysis.

22 OCTOBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		F. H. Grundy, Esq.
P. F. Adams, Esq.		T. Woore, Esq.

His Worship the Mayor was examined regarding the present supply of water to Sydney.

The following table of the estimated Population of the City and Suburbs was produced :—

Estimated Population at middle of Year.			
Year.	Sydney.	Suburbs.	Total.
1857	54,100	30,180	84,280
1858	54,695	31,790	86,485
1859	55,298	33,510	88,808
1860	55,910	35,345	91,255
1861	56,532	37,300	93,832
1862	57,151	39,575	96,726
1863	57,997	40,106	98,103
1864	60,299	41,698	101,997
1865	62,841	43,456	106,297
1866	65,580	45,350	110,930

A report from Mr. Smalley was read, giving the rainfall and evaporation registered at South Head and Sydney, during the period 1852 to 1867, October [14th, inclusive. (*See Appendix.*)

The Secretary was directed to write to the Government to procure for the Commission, through the Colonial Agent, in London, copies of any recent reports, plans, &c., on the supply of water to the metropolis or other large towns, on the gravitation system, and to transmit the same, or as much information as can be obtained, by the return mail; also, to write to the Chairmen of the Municipalities of the Suburbs, inviting their attention to the inquiry, and to request that they will be good enough to inform the Commissioners how their Municipalities are supplied with water, and whether they consider the supply sufficient, and if not, what suggestions they can offer towards improving it; also, to write to the Registrar General, requesting that he would further favour them with a statement of the population of each separate Suburb for the year 1866; also, to write to the Government Astronomer, to procure further information as regards the rainfall of each month in 1854 and 1862, and inquire if he possesses any record of the rainfall of 1838, 1839, 1840; also, if he can, without much trouble, give the Commissioners information as to the greatest number of days without rain, or with only a very trifling amount, in any of the recent comparatively dry years.

26 OCTOBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

The President and Mr. Grundy intimated that they had written to procure information respecting the gravitation supply at Glasgow, Manchester, and Aberdeen.

A letter from the Registrar General was read, giving an estimate of the population of each separate Suburb, on the 31st of December last.

A report from Mr. Smalley was laid on the table, shewing the rainfall for each month in 1840, 1854, and 1862, and stating that he had no record of the rainfall of 1838 or 39.

The

The Secretary was directed to write to the Colonial Secretary, requesting that he would supply the Commission with the documents transmitted to the Board appointed to inquire into the Water Supply of Sydney in 1852.

The Secretary was directed to procure the details of the borings of the Botany Swamps.

The City Engineer was then examined respecting the supply of water from Botany.

30 OCTOBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.
F. H. Grundy, Esq.

P. F. Adams, Esq.
T. Woore, Esq.

A pamphlet on the Water Supply of Sydney, from Mr. G. A. Mansfield, was laid on the table.

The Commission directed that an analysis of the waters of the Warragamba and Nepean, near the junction, should be obtained.

The Secretary was directed to write to the Mayor for a return shewing the occasions when delivery of water to the city has been restricted, in any way, by reason of existing or anticipated deficiency.

Mr. E. Lord was examined respecting the Botany Swamps.

The Commission examined maps and plans, and deliberated on their future proceedings.

2 NOVEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.
F. H. Grundy, Esq.

P. F. Adams, Esq.
T. Woore, Esq.

Various letters read.

The Secretary was directed to write to the Mayor requesting him to supply the Commission with copies of any Reports and Evidence on the Water Supply of Sydney, consequent on inquiries instituted by the City Council.

Mr. Alderman Woods and Mr. Pearce were examined.

5 NOVEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.
F. H. Grundy, Esq.

P. F. Adams, Esq.
T. Woore, Esq.

A letter was read from Mr. Woore on the state of the Botany Swamps in 1829 and 1834, as compared with the present time. (*See Appendix.*)

Mr. Grundy reported having collected specimens of water from George's River. The specimens were ordered to be analysed.

The President laid the following plans upon the table :—

Sketch shewing the Water Reserve and the country between Sydney and Botany.

Plan shewing the various localities and works referred to in the Report of the Special Water Committee, on the subject of procuring a permanent supply of water to the City of Sydney in 1852.

Map of the City of Sydney, shewing the water-pipes, &c.

The Commission deliberated on the minimum quantity of water that ought to be supplied per head of the population, and on the general question of the best available source of supply.

Mr. G. A. Mansfield was examined.

13 *NOVEMBER*, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

Mr. Woore reported that he had collected specimens of water from the Warragamba and Nepean, and had handed them over to Professor Smith, for analysis.

The Commissioners then proceeded to the Botany Swamps, meeting Mr. Pearce at St. Jude's Well. The party proceeded down the stream that runs through Bird's Gully, as far as the new Bunnerong Road.

Returning by Waverley, they inspected several drains running towards the Lachlan Reserve.

A specimen of water was collected at the tunnel mouth, for further analysis.

16 *NOVEMBER*, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

Letters read from the Municipalities of St. Leonards, Redfern, and Cook.

Mr. Alderman Murphy was examined respecting the Botany Swamps.

Mr. J. H. Atkinson was examined respecting George's River and the Botany Swamps.

Mr. J. B. Carroll was examined respecting George's River.

20 *NOVEMBER*, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

Documents from the Colonial Secretary, applied for by the Commission, laid on the table.

Letters read from the Waterloo and Paddington Municipalities.

Mr. G. Hill was examined regarding the Botany Swamps.

23 *NOVEMBER*, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

A report from Mr. Smalley was laid on the table, giving the rainfall of each month, and the number of rainy days, from the year 1840 to 1867 inclusive.

The Secretary intimated that he had received a specimen of water from the Woronora Creek, from Mr. J. B. Carroll, and had handed it over to Professor Smith, for analysis.

Extracts of a letter were read from Sir W. Macarthur to Mr. Woore, stating his recollections of severe droughts in this Colony; and Mr. Woore was requested to obtain from Sir W. Macarthur permission to append this information to the Report of the Commission.

The Secretary was directed to visit the dam at North Rocks, Parramatta, with a view of determining the rate of evaporation.

The Commission deliberated on their future line of inquiry, and determined to visit the junction of the Warragamba and Nepean, on Wednesday, 4th of December.

Mr. W. Speer was examined.

27 NOVEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

Letter read from the Glebe Municipality.

The Secretary reported having visited the dam at North Rocks, Parramatta. He found that a considerable quantity of water was leaking from the reservoir, and none running in. The Commission therefore considered that it was not practicable to ascertain the amount of evaporation.

Mr. Woore submitted a plan and trial section, together with a description of an aqueduct to supply Sydney, Windsor, and Parramatta, with water, and to irrigate the northern part of the County of Cumberland.

Mr. Buckland was examined respecting the Botany Swamps.

3 DECEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

Letter read from the Randwick Municipality.

Letter read from Mr. R. B. Dawson to Mr. Adams, respecting the borings of the Lachlan Swamps in 1852, and stating that they reached 36, 41, and 60 feet respectively, and that the bottom of the swamps was not reached in any case; the borers being prevented from going deeper, by grounding on timber buried in the swamp, and by the pressure of the sand.

J. Lucas, Esq., M.L.A., and the Rev. W. B. Clarke, were examined.

5 DECEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.

The Commissioners met according to appointment on Tuesday, the 3rd instant, at 5 p.m., and proceeded by rail to Penrith. Next day they went by water to the junction of the Nepean and Warragamba, and examined the site of the dam proposed by Mr. Woore, and the line of the proposed aqueduct, as far as to a point near Winbourne, in the Valley of Mulgoa. They also took the necessary observations to determine the cross section of the gorge at the site of Mr. Woore's proposed dam.

Barometric readings were obtained during the day, with the view of determining altitudes.

This day the Commissioners proceeded along the railway line as far as the Weatherboard, in order to test the indications of the barometers by means of the higher levels of the line, so that the same instruments might be used with confidence in determining levels about the sources of the Cataract and Woronora Rivers.

The Commission resolved that a section of the country should be made to connect Mr. Woore's last levelled point, on the right bank of South Creek, with the water level of the Nepean, along a line to be pointed out by Mr. Woore; and also, that the commencement of Mr. Woore's levelled line at Ashfield should be connected with the railway levels.

6 DECEMBER, 1867.

PRESENT :—

Professor Smith, M.D., President.

E. O. Moriarty, Esq.		P. F. Adams, Esq.
F. H. Grundy, Esq.		T. Woore, Esq.
