That your Petitioners suffer much loss and inconvenience from delay in the delivery of loading, in consequence of the impassability of the M'Intyre River at Inverell during rainy weather, and from the impossibility also of many of the farming and mining population reaching the town for days together on foot, or with the aid of horse or vehicle, attempts to do so having but recently been attended with alarming consequences; many persons were lately swept from their horses and carried considerable distances down the swollen stream.

That your Petitioners in many instances reside on the left, while the Public School is situated on the right side of the river, and that in consequence of want of means of crossing the stream children are frequently deprived of the power of attendance, the same difficulty being experienced also in the matter of attendance to divine worship, whilst business at the public offices is frequently retarded from a similar cause.

That your Petitioners consider that the erection of a substantial Bridge across the M'Intyre River, at Inverell, would be a very great boon to the whole of this district, and a work justified by the consideration of the great impetus it would give to trade between Inverell and the metropolis.

That your Petitioners have in two marked respects displayed an earnest desire to help themselves; in the first place by constructing a foot-bridge the cost of which was defrayed by private subscription and in the second instance by seeking and securing the erection of Inverell into a Municipal District. That the said Bridge lately succumbed to the strain which was brought to bear upon it, and is now unfit for use, while the Corporation being but lately established, and having its hands full, is at present unable to undertake a work of the magnitude contemplated.

That your Petitioners feel that their district contributes a very large proportion of the revenue which enters the public coffers, and also that their wants as residents of a thriving and rapidly advancing town and district have been hitherto seriously overlooked.

That your Petitioners trust that the fact of their having accepted the task of municipal government will not militate against their prayer for the carrying out of what they consider a purely national work.

That your Petitioners therefore pray that your Honorable House will take the premises into your favourable consideration.

And your Petitioners, as in duty bound, will ever pray.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FIELD OF MARS COMMON.

(PETITION AGAINST PROPOSED SALE—CERTAIN LANDHOLDERS AND RESIDENTS.)

Ordered by the Legislative Assembly to be printed, 19 December, 1872.

To the Honorable the Legislative Assembly, in Parliament assembled.

The respectful Petition of the undersigned Landholders and others, residing in the District of Field of Mars and neighbourhood,—

SHOWETH :—

That your Petitioners hold under grants from the Crown, dated in the months of August, one thousand eight hundred and four, and November, one thousand eight hundred and forty-nine respectively, for ever, certain lands as a Common, situated in the District of the Field of Mars and eastern farms.

That your Petitioners having observed by the Parliamentary Reports that the Government contemplate bringing in a Bill enabling them to resume the abovementioned Common and to sell it, the proceeds to go as a set-off towards the erection of a bridge over the Parramatta River and Iron Cove Bay.

That your Petitioners, having a right to the said Common under the said grants, and being largely interested in retaining the same—it being the only outlet for stock, the place from whence they derive their supply of timber for building, firewood, and other purposes,—trust that your Honorable House will not assent to a measure that in any way would tend to deprive your Petitioners of their lawful rights.

Your Petitioners would hail with pleasure the erection of bridges, should your Honorable House in its wisdom consider the population of the districts and the requirements of the place such as to justify so large an expenditure of public money ; but they respectfully object to being deprived of their lawful rights under the vague and false impression that the Common would, if sold, realize sufficient funds to cover the expense of bridges ; and they are not willing to forego the advantages of the one for the visionary anticipation of any benefit that might result from the erection of the other.

Your Petitioners therefore humbly pray that your Honorable House will not assent to any measure depriving them of their right in the Common.

And your Petitioners will ever pray.

Dated this fourteenth day of December, 1872.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FIELD OF MARS COMMON.

(PETITION AGAINST SALE OF—MR. ISAAC SHEPHERD.)

Ordered by the Legislative Assembly to be printed, 12 February, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Isaac Shepherd, of Ryde, landowner,—

RESPECTFULLY SHOWETH:—

That your Petitioner resides, and is a landholder in the parish of Hunter's Hill, and that he is entitled to the use of the Field of Mars and Eastern Farms Common.

That your Petitioner having heard with alarm that it is proposed to bring in a Bill into your Honorable House to enable the Government to resume the Field of Mars and Eastern Farms Common, and sell it, your Petitioner would respectfully submit to your Honorable House that the Common is held by grant from the Crown for ever, under trust for the benefit of the settlers, cultivators, and other inhabitants, holding land within the said districts.

That the said Common is a great convenience, and to resume the land would not only deprive your Petitioner of his rights as a Commoner, but be a material injury to a great many persons, for whose use the land was granted.

That your Petitioner has an additional claim on the Common, and would beg to state to your Honorable House that in the month of June, one thousand eight hundred and fifty-two, a law suit was instituted by your Petitioner and others, in the Supreme Court in its Equity Sittings, against the Trustees for their neglect to carry out their trusts as Trustees, and obtained a verdict against the Trustees—the costs of the suit were ordered by the presiding Judge to be paid out of funds, if any, derivable from the Common. Your Petitioner having paid the whole of the plaintiffs' costs, a large sum is now due to your Petitioner, to be paid out of any funds derivable from the Common land, and on that ground raises a further objection to the alienation of the Common. Your Petitioner would further state that he is informed and believes that representations have been made, setting forth that the Common, if sold, would realize a large sum, sufficient to cover the cost of erecting two Bridges—one over the Parramatta River, and one over Iron Cove Bay. Your Petitioner believes that the value set on the Common is a delusion, and has a tendency to mislead your Honorable House; this belief is confirmed by opinions given before a Select Committee of your Honorable House in the year one thousand eight hundred and sixty-one, when the land was valued at not more than two pounds per acre, and also from land in the most favourable sites in the district, and highly improved, sold at twelve pounds per acre.

Your Petitioner therefore humbly prays that your Honorable House will not pass any measure depriving your Petitioner of his rights of Common, and also preventing him from receiving money ordered by the Supreme Court to be paid to him.

And your Petitioner will ever pray, &c.

ISAAC SHEPHERD.

Dated at Ryde, this third day of February, one thousand eight hundred and seventy-three.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

FIELD OF MARS COMMON.
(PETITION AGAINST PROPOSED SALE—CERTAIN INHABITANTS.)

Ordered by the Legislative Assembly to be printed, 14 February, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Inhabitants residing in the District of the Field of Mars,—

HUMBLY SHOWETH :—

That your Petitioners are mostly small farm-holders, and are dependent upon the Field of Mars Common for firewood and grazing purposes. That your Petitioners have already good and sufficient roads to Sydney, either by rail, river, or main road.

That the majority of your Petitioners had not sufficient notice of the meeting which was held at the Pennant Hills School-house, therefore had no opportunity of opposing the resolutions adopted thereat.

That the inhabitants of Pennant Hills, Castle Hill, or Dural, would in no way be benefited by a bridge over the river, and the loss of the Common would be a great detriment to them, nor would they be in any way benefited by the sale thereof.

Your Petitioners therefore humbly pray that you will be pleased to take this matter into your favourable consideration, and that you will not allow the sale of the said Common to take place as proposed.

And your Petitioners, as in duty bound, will ever pray.

Field of Mars, February 3rd, 1873.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

FIELD OF MARS COMMON.

(PETITION FOR RESUMPTION—RESIDENTS OF RYDE AND HUNTER'S HILL.)

Ordered by the Legislative Assembly to be printed, 21 January, 1873.

To the Honorable the Legislative Assembly, in Parliament assembled.

The Petition of the undersigned,—

HUMBLY SHOWETH:—

That the greater portion of the Field of Mars Common and surrounding districts, comprising a large tract of country, is now lying waste and unproductive for the want of a more direct and easy communication with the metropolis.

That your Petitioners, many of whom are fruit-growers residing on the north side of the Parramatta River, suffer great inconvenience, loss of time, and expense in consequence of the uncertainty of reaching the Sydney Markets at any specified time, and also from the impracticable working of the punts. Your Petitioners therefore consider that the erection of bridges across the said river and Iron Cove would be of immense benefit both to Sydney and these districts.

That your Petitioners are desirous that the Field of Mars Common should be resumed by the Government, provided that the said bridges are erected across the Parramatta River and Iron Cove.

Your Petitioners therefore pray that your Honorable House will be pleased to sanction the expenditure of the amount placed on the Estimates for the purposes named in this Petition.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 105 Signatures.*]

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

FIELD OF MARS COMMON.

(PETITION IN FAVOUR OF RESUMPTION—CERTAIN COMMONERS.)

Ordered by the Legislative Assembly to be printed, 7 February, 1873.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Commoners of the Field of Mars Common,—

RESPECTFULLY SHOWETH (as follows) :—

That as the Government have placed upon the Estimates the sum of fifty thousand pounds for building bridges over the Parramatta River, on condition of the surrender of the Field of Mars Common, your Petitioners beg leave to state that they consider that the bridging of the river will be of far greater gain to them than any advantages which they can derive from the Common.

That some few of your Petitioners have already signed the petition against the surrender of the Common, which was presented to the Assembly by the Honorable Member for Central Cumberland, at the instance of Mr. Shepherd.

That such of your Petitioners as have so signed the said petition state that they did so under misrepresentations.

That your Petitioners believe that the building of the bridges will bestow the greatest possible boon upon the inhabitants on the north side of the Parramatta River.

That your Petitioners consider that they are entitled to some consideration from the fact that in their isolated position the large sums of public money which have been and are still being expended in Railways and Public Works all over the Colony are of no advantage to them.

Your Petitioners therefore humbly pray that your Honorable House will pass the necessary measures for the resumption of the said Field of Mars Common, and for authorizing and providing means for the erection of the said bridges, &c.

And your Petitioners will ever pray, &c.

Dated this fifth day of February, A.D. 1873.

[Here follow 480 Signatures.]

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(REMOVAL AND REINSTATEMENT OF MR. DEIGAN, LATE STATION-MASTER AT BOWRAL.)

Ordered by the Legislative Assembly to be printed, 7 November, 1872.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated the 23rd July, 1872, to His Excellency the Governor, praying that His Excellency will be pleased to cause to be laid upon the Table of this House,—

“Copies of all Correspondence, and Minutes of the Executive Council, relating to the removal of Mr. Deigan from the position of Station-master at Bowral Railway Station, together with the Salary and Allowance paid to that person when filling that position; likewise any Minutes of the Executive Council or Correspondence relating to the subsequent appointment of Mr. Deigan to the position of Porter and Assistant Guard at the Redfern Station, and the amount of Salary and Allowance now paid to that person for discharging the duties appertaining to that position.”

(Mr. Hoskins.)

SCHEDULE.

NO.	PAGE.
1. Traffic Auditor, enclosing Travelling Audit Clerk's report of Mr. Deigan's cash being deficient. 3 Nov., 1871	2
2. Commissioner's Minute expressing approval of the manner in which Mr. Row (Trav. Audit Clerk) prosecuted the inquiry. 23 Nov., 1871	5
3. Commissioner's Minute, suspending Mr. Deigan. 24 Nov., 1871	5
4. Letter to Mr. Deigan, suspending him. 28 Nov., 1871	5
5. Letter from Mr. Deigan, tendering his resignation. 30 Nov., 1871	5
6. Minute for Executive Council—Mr. Deigan to show cause why he should not be dismissed. 19 Dec., 1871. Minute withdrawn, 27 Dec., 1871	6
7. Letter to Mr. Deigan, accepting his resignation. 10 January, 1872	6

RAILWAYS.

No. 1.

GOVERNMENT RAILWAYS.—MINUTE PAPER.

To Commissioner for Railways.

I enclose a special report, received from the Travelling Audit Clerk, Mr. Row, upon the state of the Bowral Station-master's Accounts, for the information of the Commissioner.—D.V., 23/11/71.

Traffic Audit Office,

Redfern, 22 November, 1871.

Special Report to the Traffic Auditor.

1. I have to bring under the notice of the Traffic Auditor the following facts in connection with Bowral Station.

2. On Tuesday, November 21st (yesterday), I arrived at Bowral (by the up-goods from Marulan) at about 3 o'clock, and proceeded to audit the accounts in the usual way.

On comparing the commencing numbers of the tickets in rack with the closing numbers booked up in Train and Traffic Books, I found that the following tickets were not entered up at all or accounted for in any way :—

Station to	Commencing No.	Closing No.	No. gone.	Description.	Fare.	Amount.
Sydney	293	298	5	1st single.	20/6	£ s. d. 5 2 6
"	546	549	3	2nd single.	15/	2 5 0
"	281	283	2	2nd return.	22/6	2 5 0
Goulburn	11	13	2	1st single.	15/9	1 11 6
						£11 4 0

I then worked out the debit for passengers, and found it, up to the night of the 20th, according to closing numbers in Traffic and Train Book, to be £16 1s. 4d.

This added to the above list of tickets not booked up gives a gross debit on Passenger Account of £27 5s. 4d.

Mr. Deigan had only taken £16 1s. 4d. to debit in his Revenue Book, and paid in only that amount. I questioned him closely as to the unaccounted tickets, but he could give no account of them. He stated positively, however, that they were not issued on the 21st, or since the previous day's work was closed.

3. The balance of his day's cash, independent of the before-named deficiencies, I then found to be as under :—

Dr.	£ s. d.	Cr.	£ s. d.
To change	3 0 0	By cash in till	2 13 5
„ Day's passengers	0 0 9	Pcl. debits paid out of till	0 4 0
		Balance	0 3 4
	£3 0 9		£3 0 9

To balance 3s. 4d.

Thus showing a deficiency of 3s. 4d.

4. After balancing up, I went through the whole of the tickets in the case, counting every ticket, and this inspection revealed the following tickets to be missing.

Station to	Description.	Com. No. in case.	Consecutive Nos. of missing Tickets.	Number missing.	Fare.	Amount.
1. Ashfield	1st single.	04	05 and 06.	2	19/6	£ s. d. 1 19 0
2. Homebush	"	09	Half of No. 10.	$\frac{1}{2}$	19/	0 9 6
3. Parramatta Junction	2nd return.	33	33 half.	1	20/	1 0 0
4. Sutton Forest	2nd single.	183	183 half.	$\frac{1}{2}$	1/6	0 0 9
5. Goulburn	"	119	120.	1	13/6	0 13 6
						£4 2 9

It will be observed that in the first, second and last cases, the missing tickets follow immediately after the commencing number of the tickets in rack, and that all would appear to the Audit Clerk to be correct, if he took the closing number before his eyes to be correct.

It was only possible to detect such proceedings as this by taking the whole of the tickets from rack and counting them one by one, which was in fact the way in which the matter was revealed.

In the 3rd case it will be seen that although I have marked a half only, I have carried out the deficit as a whole ticket. This is because the half which is in the case has evidently been used, it having been dated and the date rubbed out by some process. It is the first half of the ticket for "Bowral to Parramatta." I have therefore dealt with No. 33 as being deficient altogether.

In

In the 2nd and 4th cases it is the *non*-numbered halves of the tickets which are missing, so that their collection could reveal nothing.

5. The total deficiency in coaching department, therefore, may be thus summarized:—

	£	s.	d.
1. Tickets not booked up or accounted for	11	4	0
2. Deficient in current day's cash	0	3	4
3. Other tickets gone from case	4	2	9
	<u>£15</u>	<u>10</u>	<u>1</u>

6. It may be thought, perhaps, that with respect to the non-booked up tickets there could have been no possible means of hiding the deficiency from the Audit Clerk, but I would beg to mention the following facts bearing on this point:—

It is very often my practice to request a Station-master to call over the closing numbers to me from the rack, but in such cases I invariably (although unknown to the Station-master) take care to follow the tickets after him with my eye, and see that he calls them correctly.

In this instance I stationed myself close to Mr. Deigan's elbow, and asked him to call the numbers to me, commencing at Sydney. He called the number as 293, but I at once noticed that the number on the ticket was 298, although on the *slate* it was 293. I then said, "Call from the tickets, please, Mr. Deigan, and not from the slate."

I am almost of opinion he *again* called 293, but cannot state positively. I then requested him to stand aside, and completed the comparison by myself.

I leave these facts to speak for themselves.

Goods Accounts.

7. I then proceeded to balance up Goods Accounts, and by the books found them to stand thus:—

Dr.	£	s.	d.	Cr.	£	s.	d.
To October Balance	13	14	2	By remittance	8	9	9
„ November debts	14	6	9	„ Cash on hand	2	5	4
				„ Goods on hand	0	4	1
				„ Outstandings	*17	1	9
	<u>£28</u>	<u>0</u>	<u>11</u>		<u>£28</u>	<u>0</u>	<u>11</u>

These figures are, I believe, correct, and require no further explanation, with *one* exception, that exception being the amount of £17 1s. 9d. (marked *), represented as being outstanding and unpaid by the public for goods delivered.

8. The particulars of this amount as shown in S. P. A. Book, are as follows:—

	£	s.	d.
Mr. A. Alcorn, Kangaloon... ..	5	8	1
„ Smith	5	5	9
„ Harrison, Bowral	4	8	1
„ Pain,	0	19	4
„ Denny, Bunadoo	0	11	7
„ Livingstone	0	8	11
	<u>£17</u>	<u>1</u>	<u>9</u>

(For the items composing Alcorn's, Smith's, and Harrison's accounts, see attached paper marked A.)

9. I at once resolved in my mind to test some of these accounts, and therefore I questioned Mr. Deigan very closely, and particularly as to the reasons why they were not paid. He said that some of the parties were very difficult of access, living from ten to fifteen miles off, and that they were continually coming in without money, and he had great difficulty in collecting.

I wish it therefore to be thoroughly understood that these amounts were *positively* represented to me *again* and *again*, as being still due to the Commissioner by the respective parties named above.

10. I called on Mr. Harrison the same evening, and inquired if he owed the £4 8s. 1d. for freight, when he at once told me he had paid for everything up to date. I requested to be allowed to examine the railway receipts, which he at once showed me.

I found Mr. Deigan's own receipt for the 9s. 5d. (see attached paper A), and his porter's receipt for the 12s. 10d. and 17s. 2d.

The £2 8s. 8d. I was unable to trace, owing, I imagine, to its being entered differently on ticket. Mr. Harrison positively stated, however, that *everything* had been paid for, and, indeed, Mr. Deigan on the following day admitted the same to me.

11. On the following day I procured a horse and guide, and started for Mr. Alcorn's place at Kangaloon, a distance of fifteen miles, and after a little trouble prevailed on that gentleman to show me his railway receipts. I found that on each of the tickets for the first three items of the account (see attached paper A) was written the word "paid," evidently in Mr. Deigan's handwriting.

On the tickets for the fourth, seventh, and eighth items, the words "*paid, J. Deigan,*" were written. and the other two items I could not trace. Mr. Alcorn stated, however, that everything was paid for to Mr. Deigan up to date. This also Mr. Deigan admitted to be true on the following day.

12. I next called on Mr. Smith, and found that instead of £5 5s. 9d., as represented by Mr. Deigan as being owing, he really owed Mr. D. £6 2s. 5d., which leaves a credit of 16s. 8d. in favour of Mr. Deigan. This was for some old amounts which Mr. D. has paid in for him out of his own pocket, and which Mr. Smith states Mr. Deigan told him some time since he had done.

13. I also called on Mr. Pain, and found that the 19s. 4d. had been duly paid by him to Mr. Deigan, but he (Mr. P.) could not find the receipt.

14. When at Mr. Harrison's, and also at Mr. Alcorn's, however, I noticed that there were other items of a later date to any that I had particulars of, and which must have been *paid* to Mr. Deigan before I balanced. This led me to suspect there were other moneys not taken to account at time of balancing on account of which money had been received. On returning, therefore, to station at 12.30 p.m. from Mr. Alcorn's, I at once turned to the S. P. A. and found other invoices entered since I balanced, and which contained the very items I had noticed on Messrs. Alcorn's and Harrison's receipts. These amounts, as below, with two others, Mr. Deigan at once admitted he had received the day before at the time of my balancing.

Nov. 20.—Harrison	£2	8	2
" Do.	0	3	7
" Do.	0	11	2
" Alcorn	1	3	8
" Savill	0	18	4
" Edwards	0	17	9
						<hr/>		
						£6	2	8

This will of course swell the deficiency, as no such money was shown me yesterday, for some reason or other. It further appeared also, from Mr. D.'s statement, that *during my absence* at Kangaloon, Mr. Pain had paid in the 19s. 4d., and also Livingstone the 8s. 11d.; and accepting this statement as correct, I will leave these items out of the list of deficiencies, dealing only with the actual and authenticated ones.

15. The deficiencies in goods traffic may be thus summarized :—

Mr. Alcorn's account	£5	8	1
Mr. Harrison's account	4	8	1
21st.—Goods, cash received and not taken to debit by me	6	2	8
						<hr/>		
						15	18	10
Less balance in Mr. Deigan's favour (Smith's account)	0	16	8
						<hr/>		
						£15	2	2

16. The other probable and possible deficits in goods are—

Nov. 14, Pain...	£0	19	4
" 18, Livingstone...	0	8	11
Denny	0	11	7
						<hr/>		
						£1	19	10

17. With reference to Harrison's receipts signed by Henry Stone the porter, Mr. Deigan says that whatever money Stone may have received, he has received from Stone, and he relieves him of all responsibility.

Grand Summary of Deficits.

18. Deficiency in Coaching	£15	10	1
Do. Goods	15	2	2
						<hr/>		
						£30	12	3

and possibly £1 19s. 10d. more. (See par. 16 of this report.)

19. As regards the deficiency in the tickets missing from the case, I think any further comment from me is unnecessary, and I will leave the facts to speak for themselves; but with reference to the good embezzlements, I cannot refrain from drawing the Traffic Auditor's attention to their most flagrant nature.

Amounts are represented to me positively again and again as being due by the Public to the Commissioner, and after riding 30 miles over most wretched roads (and which, of course, it was never thought I should do) to ascertain the fact, I find receipts for such moneys in Station-master's own handwriting, signed by him as having been received already on account of Commissioner.

WILLIAM R. ROW, 21/11/71.

No. 2.

COMMISSIONER'S MINUTE.

I feel great pleasure in recording upon this paper the high opinion I entertain of the manner in which Mr. Row prosecuted the inquiry which has resulted in the report now submitted by the head officer of the Railway Audit Branch of the Public Service. The fact of Mr. Vernon having such assistance is a great relief to my mind.—J.B., 23/11/71.

No. 3.

COMMISSIONER'S MINUTE.

Bowral Station-master to be immediately suspended, and Minute prepared for Executive Council, calling upon him to show cause why he should not be dismissed from the Public Service. Eagar, now at Liverpool Station as Assistant, to take charge at Bowral.—J.B., 24/11/71.

Received, 23/11/71.

Traffic Manager to see, and return early; Postal Department to be informed, as Mr. Deigan is Postmaster at Bowral.—28/11/71, C.A.G.

Wrote Secretary General Post Office.

Mr. Deigan informed; letter forwarded through Traffic Manager.—28/11/71. Seen.—R.M., 1/12/71. Chief Clerk.

Department of Public Works,
Railway Branch,
Sydney, 10 January, 1872.

SIR,

In reference to your letter of the 30th November last, tendering your resignation as Station-master at Bowral, I have the honor to inform you that the same has been accepted.

I have, &c.,
JOHN RAE,
For the Commissioner for Railways.

Amount of salary and allowance paid to Mr. Deigan as Station-master:—Salary £117,—house allowed,—and about £20 a year for Postmaster.

There is no correspondence relating to the subsequent appointment of Mr. Deigan to the position of porter, &c., at the Redfern Station.

Amount of salary and allowances paid to Mr. Deigan:—Wages, 8s. per diem, and 1s. 6d. per week allowed for uniform.

1872.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(DISMISSAL AND RE-APPOINTMENT OF CERTAIN EMPLOYEES.)

Ordered by the Legislative Assembly to be printed, 7 November, 1872.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 23rd July, 1872, to His Excellency the Governor, praying that His Excellency will be pleased to cause to be laid upon the Table of this House,—

“Copies of all Correspondence relating to the dismissal and re-appointment of Thomas Parkes, William Elyard, George Davis, and Goold, of the Railway Department.”

(Mr. Buchanan, on behalf of Captain Onslow.)

[NOTE.—The correspondence in reference to complaints against the abovenamed Officers is herewith; but none of them were dismissed—Messrs. Parkes and Elyard resigned their appointments; Messrs. Davis and Goold have never vacated their situations.]

RAILWAYS.

Complaint against Thomas Parkes, Mittagong Station.

SCHEDULE.

No.	PAGE.
1. Traffic Auditor, reporting Mr. Parkes's cash deficient. 13 March, 1869	2
2. Commissioner's Minute, suspending him. 19 March, 1869	2
3. Letter to Mr. Parkes, suspending him. 19 March, 1869	2
4. Traffic Manager, stating that accounts are correct and no money deficient. 22 March, 1869	3
5. Traffic Auditor, asserting that there is cash deficient. 25 March, 1869.....	3
6. Letter to Mr. Parkes, calling upon him to show cause why he should not be dismissed. 31 March, 1869	3
7. Mr. Parkes's explanation, and asking permission to resign. 6 April, 1869	3
8. Letter to Mr. Parkes, accepting his resignation. 15 May, 1869	4

[There are no papers respecting Mr. Parkes's re-employment as Porter.]

No. 1.

THE TRAFFIC AUDITOR TO THE COMMISSIONER FOR RAILWAYS.

I BEG to draw the Commissioner's notice to the amount taken credit for by Mittagong in account current for February as "outstanding parcels," viz.,—£12. Audit Clerk, Mr. Richardson, reports the parcels to be all delivered, with exception of one.

This reveals a very loose state of things, which has arisen since present Station-master took charge; previous to this no such credit appeared in the monthly accounts current from Mittagong.

D. VERNON, 13/3/69.

I have this day inspected the coaching-books at the above station. Upon examination I find that the greater portion of the above amount (£12) has been paid to the Station-master, but not accounted for by him. I also find that some tickets have been issued within the last few days, apparently without being accounted for; altogether, cash to the extent of about £15 appears missing.

D. VERNON,
Traffic Auditor, 15/3/69.

No. 2.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

SUSPEND Mr. Parkes, and call upon him to make up his accounts, and pay up all moneys due, and hand over all books, papers, &c., in his custody, to the Traffic Manager.

J.S., 19/3/69.

Mr. Owen; letter herewith.—R.M., 19/3/69. Seen.—ED. OWEN, 22/3/69.

No. 3.

THE COMMISSIONER FOR RAILWAYS TO MR. THOMAS PARKES.

Department of Public Works,
Railway Branch,
19 March, 1869.

SIR,

I have the honor to inform you that in consequence of certain charges having been brought against you, which, although not quite matured, are of a grave nature, I feel it my duty to suspend you from further duty in the Public Service, until further ordered.

I have therefore to request that you will forthwith deliver up to Mr. Ed. Owen, Traffic Manager, all moneys, papers and writings, property, effects, matters and things, in your possession or power, relating to the Commissioner for Railways.

I have, &c.,
JOHN SUTHERLAND,
Commissioner for Railways.

No. 4.

3

No. 4.

THE TRAFFIC MANAGER to THE COMMISSIONER FOR RAILWAYS.

I HAVE the honor to enclose herewith a report from Mr. Watsford, who is Acting Station-master at Mittagong, in place of Mr. Parkes, who is under suspension in accordance with the Commissioner's instructions, and it seems to me that the accounts are perfectly correct, and no moneys deficient.

ED. OWEN, 22/3/69.

TELEGRAM from Acting Station-master, Mittagong, to The Traffic Manager.

20 March, 1869.

MR. PARKES has handed over to me all books and cash belonging to the station.

Acting Station-master, Mittagong, to Traffic Manager.

22 March, 1869.

Sir,

Mr. Parkes has handed to me all books, cash, and keys belonging to the station. I have also examined the ticket-rack with Mr. Parkes and find it correct.

J. WATSFORD.

Send to Mr. Vernon to see.—J.S., 23/3/69.

No. 5.

THE TRAFFIC AUDITOR to THE COMMISSIONER FOR RAILWAYS.

I AM quite at a loss to conceive the meaning or intention of the above. "It seems" to the Traffic Manager that the accounts are "perfectly" correct, and that "no moneys are deficient." Was the Traffic Manager unable to satisfy himself upon so important a matter?—and, if so, why does he take it upon himself to give an opinion so totally at variance with my report? If otherwise (and any even subsequent examination worthy the name, must have revealed that the accounts were not correct, and that moneys were deficient), it appears to me that it is a piece of most unaccountable trifling with a very serious matter. For the information of the Commissioner I now beg to state again, that the Mittagong Station-master took credit in his February account current for £12, as unpaid parcels, and furnished at the same time a list of particulars; this list is fictitious—nearly the whole of the parcels had been delivered, and the charges on them received by the parcels' porter. The consignees as well as the parcels' porter himself can testify to this, and the porter's book has been initialled by the Station-master in acknowledgment of the moneys having been handed over to himself.

The Station-master did not dispute but admitted to me that the moneys had been paid to himself but not accounted for.

Passengers' tickets have also been issued without being entered or accounted for at the time.

D. VERNON,

Traffic Auditor, 25/3/69.

Chief Clerk to write fully to Station-master and ask for full explanation, and to show cause why he should not be recommended for dismissal.—J.S., 31/3/69.

Wrote, 1/4/69.—R.M.

No. 6.

THE CHIEF CLERK, RAILWAY DEPARTMENT, to MR. THOMAS PARKES.

31 March, 1869.

SIR,

In reference to a letter dated the 19th instant, forwarded to you, suspending you from duty as Station-master at Mittagong, pending inquiry into certain irregularities in your accounts, &c., I am directed by the Commissioner to inform you the matters in question having been investigated by the Traffic Auditor, that officer reports as follows:—"On examination of your accounts on the 15th instant, he finds the February parcels' account furnished by you is fictitious; that a sum of money (about £15) is unaccounted for in the regular course." I am therefore to request an explanation of the matters reported by the Traffic Auditor, for the information of the Commissioner, and that you will be so good as to show cause why you should not be recommended for dismissal from the Railway Service.

I have, &c.,

Chief Clerk.

No. 7.

MR. THOMAS PARKES to THE COMMISSIONER FOR RAILWAYS.

Sydney, 6 April, 1869.

SIR,

In reply to your letter, dated March 31st, requesting me to show cause why I should not be recommended for dismissal from the Railway Service, I beg to state that the sum of money, mentioned as unaccounted for on the 15th, was paid in on that date, and that the tickets mentioned as not being entered in the regular course were correctly entered on that day; and that Mr. Richardson, from the Audit Office, visited Mittagong Station a few days previous to the 15th, and examined the ticket-rack, and found it correct.

I

I acknowledge there were irregularities in the entries of the parcels, which occurred through a pressure of business, and my own ill-health (having been at the time stated under medical treatment upwards of a week), from which cause alone the books were not properly made up; the money spoken of was in my possession the whole of the time, and when Mr. Watsford took charge of the station he examined all the books and moneys and found everything correct.

If this explanation is not considered satisfactory, to account for any books not being so well kept as they ought to have been, I trust, Sir, you will permit me to resign my appointment.

I am, &c.,
THOMAS PARKES.

No. 8.

THE CHIEF CLERK, RAILWAY DEPARTMENT, to MR. THOMAS PARKES.

Department of Public Works,
Railway Branch,
Sydney, 15 May, 1869.

SIR,

I am directed by the Commissioner to inform you that your resignation is accepted, and to request that you will report yourself at the head office, where further instructions await you.

I have, &c.,
R. MOODY,
Chief Clerk.

Complaint against W. G. Elyard, Bowenfells Station.

SCHEDULE.

NO.	PAGE.
1. Traffic Manager, reporting laxity of discipline—Porters fighting, &c. 11 January, 1870.....	4
2. Evidence of do. do. 6 January, 1870	5
3. Commissioner's Minute, suspending Mr. Elyard. 11 January, 1870	5
4. Mr. Elyard, tendering his resignation. 19 January, 1870	6
5. Statement of Balance of Accounts at Bowenfells Station. 21 January, 1870	6
6. Traffic Auditor, reporting £6 4s. 8½d. being due by Mr. Elyard. 3 February, 1870	7
7. Mr. Elyard's resignation accepted. 8 February, 1872	7

[There are no papers respecting Mr. Elyard's re-employment.]

No. 1.

THE TRAFFIC MANAGER to THE COMMISSIONER FOR RAILWAYS.

Bowenfells Station—Laxity of Discipline.

I REGRET to bring under the notice of the Commissioner the misconduct of the Station-master, William Elyard, by falsely misleading the Traffic Manager, when conducting an inquiry into the conduct of the porters at Bowenfells Station, charged with quarrelling and fighting, and generally as to the mismanagement of the men.

I have on two previous occasions been to visit this station in consequence of the absence of proper discipline, and have on each occasion reprimanded, cautioned, and instructed the Station-master. On the second occasion I removed all the men, and I now find the last lot in a far worse state than those I removed.

The Station-master, although well up in the routine duties of his office, is utterly without those necessary qualities to fit him to manage his men. He is at once one with them, and is consequently without power over them. The dirty condition of the men and the station, the absence of moral tone amongst the men, and a want of system and discipline, are all so apparent, as to show the unfitness of Mr. Elyard to hold the position of Station-master where porters are required.

The case I have now to lay before the Commissioner has arisen through the carelessness of the Station-master leaving his station without having first attended to the duties of his office, whereby a quarrel arose between the head-porter and another, which resulted in blows. The scene and the language used have left such an impression on the neighbourhood as to necessitate some steps being taken to remove the Station-master. The men will be all dismissed, and will be replaced to-morrow.

The

The Station-master stated to me that he had sent a porter away to look after lost timber—that he had himself gone home—whereas he (on inquiry it is proved) took the porter a walk, and on hearing of the fight told the porter to say he had been looking for timber lost; and also told another porter to otherwise mislead, by telling other false statements, to hide his carelessness and own absence.

R. MOODY, 11/1/70.

No. 2.

EVIDENCE taken of quarrelling and fighting at Bowenfells Station, 6 January, 1870.

William Elyard, Station-master, states:—I went home from the station about half-past 6 p.m. of the 6th instant; porter Roberts came to me and reported that as he was uncoupling a truck, head-porter Dunn struck him; I returned to the station at once, and there I met Dunn, who told me that Roberts had hit at him, and that he had retaliated; I had sent porter James away to inquire respecting two pieces of timber which had gone astray, so that there was only Dunn and Roberts on the station; M'Intosh was the party I thought had the timber; he lives at Rydal, but I sent James to Bowenfells village; James had come to me at Bowenfells about ten minutes before Roberts arrived.

W. J. ELYARD.

Edwin James, porter, states:—I was sent away about some missing timber; I was to follow up a dray, which had gone on the Western Road; Mr. Faviell's man brought an order for the missing timber about half-past 10 a.m.; the timber was then missing; the carrier I was sent after left here some time after dinner—about 2 o'clock; I was sent after him by the Station-master about 5 o'clock; I went as far as Bowenfells with Mr. Elyard; porter Roberts then came up and called Mr. Elyard on one side, and they had a conversation together; I don't know what it was about; I joined them shortly, and Roberts said he and Dunn were shunting a horse-box and Dunn had struck him; Mr. Elyard said, "Is it not a strange thing that I cannot leave the station for ten minutes without something happening"; we returned a considerable long way, and he then told me it would be better for me to go away after that timber, and come in an hour after him (as Crew, the constable, was sure to be there), and make it appear that I did not know anything about it; I did as I was directed, and did not go to look for the timber as I stated; it was merely done to keep all quiet; I followed Mr. Elyard and Roberts home in about half-an-hour; I did not go to look after the timber, but went for a walk with Mr. Elyard, at his request.

EDWIN JAMES.

James Roberts, temporary porter, states:—On Thursday evening last, about half-past 6 o'clock, the Station-master left the station and gave me charge of it; there was no other person on the station, and there was a great quantity of luggage on the platform; Mr. Elyard and porter James went away together; Station-master told me to put the horse-box and carriage-truck out of the dock on to the luggage-train, and not to let the train go without them; about 7 o'clock the train was to be made up, and hearing the whistle, I went to do as I had been told; I saw Dunn putting another horse-box and D truck on to the train; he afterwards came down to the dock, and using very violent language, asked me why I did not go to the points; I said, "Dunn, you haven't much to do, and I am here in charge of the station, and to help to put out the horse-box and carriage-truck from the dock"; he said, "A thing like you to tell me that"; I said, "Thing or no thing I am doing too much and shall do less, for I will report the first opportunity to the Manager how I am getting on here"; Dunn then struck me several times; I went to constable Crew and requested him to take Dunn in charge for an assault; he said he would see the Station-master, and asked me where he was; I told him I thought he had gone into Bowenfells with his wife and a porter; I had already told Dunn I would do no more, and the constable told me to get the train made up and said, "Don't wash yourself until you have seen the Station-master"; I then assisted in making up the train, and went out to Bowenfells, where I saw the Station-master and porter James at Mr. Elyard's house; I reported the circumstances to Mr. Elyard, and he and James proceeded to return with me; when we had come some distance on the road the Station-master said, "It won't do James for us all to be together; you had better go into the bush for an hour, and then come back to the station, and say you have been after some timber a man took away, as Crew, the constable, will be on the station"; James then went away; the Station-master when nearing the station said to me, "Roberts, I will go on to the other side, so that we shall not be seen passing Woolley's store together"; I was to go on to the line to the distance signal, and then walk down the line to the station; I was not to say I had seen him to anyone.

JAMES ROBERTS.

Thomas Dunn, head-porter at Bowenfells Station, states:—On Thursday last I was down the yard shunting, and seeing Roberts I called him to assist me; he refused to come; after doing all I could down the yard I came to the dock to take out a horse-box and carriage-truck; I found Roberts waiting there; I asked him why he did not come when I called him; he said, "I intended you to do it yourself; you do nothing"; I then said, "You crawler; push away"; he then rushed at and struck me, and I returned his blow; I have got a book of regulations.

T. L. DUNN.

No. 3.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

Mr. Elyard to be suspended, and the Traffic Manager to make necessary arrangements for carrying on the business of the station till the case is disposed of. J.S., B.C., 11/1/70.

Commissioner,—Seen and attended to. Mr. Elyard suspended this day.—R. MOODY, 11/1/70.
Mr. Elyard must be dismissed.—J.S., 20/1/70.

No. 4.

MR. W. G. ELYARD to THE TRAFFIC MANAGER.

Bowenfells, 19 January, 1870.

SIR,

I have the honor to resign my appointment as Station-master at Bowenfells, and shall be glad if you can recommend its acceptance.

I am, &c.,
W. G. ELYARD.

Recommended for the consideration of the Commissioner.—R. MOODY, 19/1/70.

No. 5.

BOWENFELLS STATION—STATEMENT OF BALANCE.

I AM informed by Mr. Norman, the present Station-master, that he took the books from Mr. Ed. Higgs, Managing Inspector, on the 13th instant, but refused to take upon himself any responsibility as to the state of the accounts and accuracy of cash prior to that date. Mr. Norman states that he applied immediately on his arrival to the Traffic Manager, stating the necessity of the books being handed over by the Traffic Auditor before he took charge. An attempt at a balance was made by Messrs. Elyard and Norman, but without any result. I first ascertained the accuracy of last month's balance, Dr. £38 ls. 6½d., and then made the following balance up to date, 21 January, 1870:—

DEBITS.		£	s.	d.	CREDITS.		£	s.	d.				
To Balance from last account		38	1	6½	By Accountant's receipts		490	11	6				
„ Passenger traffic	441	18	11½		„ Cash on hand—Notes.....	£15	0	0					
„ Excess fares	4	0	5		„ Gold	4	10	0					
„ H., C., and dogs	24	2	1		„ Silver	2	1	9					
„ Parcels	41	13	2		„ Copper	0	6	4					
„ Cloak-room*	0	9	0						21	18	1		
„ Cash on hand for purpose of change	5	0	0		„ Parcels on hand		2	13	5				
					„ Three carts on hand from Sydney, at								
					„ £1 4s. 3d.		3	12	9				
					„ One cart on hand from Penrith		0	15	9				
					„ Cobb & Co's tickets—								
					„ 10½, at 23s. 3d., and £12 4 1½								
					„ 17, at 15s. 4d.		13	0	8				
										25	4	9½	
					„ Paid on, not deducted from Parcels Traffic..		0	7	5				
					„ ½ Homebush ticket, left by Mr. Elyard		0	7	2				
										£	545	10	10½
					„ Deficiency		9	14	3½				
										£	555	5	2

Mr. Norman was not satisfied with result, as a considerable amount of cash in the drawer he stated was his own, which he had been obliged to lend for change. I cautioned him against this in future, and then struck the following balance, which may be taken, I think, as showing the correct amount due by Elyard:—

DEBITS (1st to 12th, both inclusive),—		£	s.	d.	CREDITS.		£	s.	d.				
To Balance from last account		38	1	6½	By Accountant's receipts, 1st to 12th inclusive		277	18	4				
„ Passenger traffic	223	12	3		„ Parcels on hand, as taken from Mr. Elyard								
„ Excess fares	4	0	5		„ by Mr. Norman		2	13	5				
„ H., C., and dogs	14	0	8		„ Two carts on hand from Sydney, at £1 4s. 3d.		2	8	6				
„ Parcels	24	11	1		„ Cobb & Co's tickets, from 9th (last pay-								
„ Cloak-room*	0	5	0		„ ment) to 13th, as per copy account furnished								
„ Cash on hand for purpose of change	5	0	0		„ to Messrs. Cobb & Co., by Mr. Norman ...		10	7	3				
					„ Cash handed over by Mr. Higgs		4	12	10				
					„ Together with ½ Homebush ticket (exclusive								
					„ of month's halves)		0	7	2				
					„ Paid on, not deducted from Parcels Traffic		0	7	5				
										£	298	14	11
					„ Deficiency due by Mr. Elyard		10	16	0½				
										£	309	10	11½

* I could not make these tickets exactly balance, so was compelled to take Revenue book.

A. RICHARDSON,
Travelling Audit Clerk.

No. 6.

THE TRAFFIC AUDITOR TO THE COMMISSIONER FOR RAILWAYS.

UNDER the circumstances it would be advisable to defer paying Mr. Elyard any moneys that may be due to him, until after the close of the month, and I shall have had this matter further looked into.

D.V., 24/1/70.

Traffic Manager to see this; no steps can be taken until the Traffic Auditor states definitely how the matter stands; there should be no delay in settling what amount is due by Mr. Elyard.—CH. A. G., B.C., 24/1/70.

Seen.—R.M., 25/1/70.

The Traffic Auditor must look into this matter at once. Let no time be lost in reporting how matters actually stand.—J.R., B.C., 27/1/70.

I have investigated this matter myself and ascertained that a balance of £6 4s. 8½d. was due by the Station-master, Mr. Elyard. This amount he has handed in to Mr. Norman, at present in charge. The deficiency I am quite satisfied was the result of carelessness, and not in any way of intentional dishonesty.—D.V., 3/2/70.

No. 7.

THE COMMISSIONER FOR RAILWAYS TO MR. W. G. ELYARD.

Resignation may now be accepted.—J.S., 5/2/70.

Mr. Elyard informed.—8/2/70.

8 February, 1870.

SIR,

I have the honor to accept your resignation of the appointment of Station-master at Bowen-fells, tendered in your letter to the Traffic Manager of the 19th ultimo.

I have, &c.,

No. 1.

TRAVELLING Audit Clerk's report on the state of the accounts at South Creek Station—George Davies, Station-master.

Government Railways,
9 May, 1870.

Coaching Department.

Question 1.—What was the amount of cash on hand, and did it correspond with the receipts entered in the daily traffic books?

Answer.—£5 3s. 10½d. This was not exactly right; when credit was given for parcels owing, cash was short, but with two tickets owing cash was over.

Merchandise

Merchandise Department.

When I arrived at this station on the 3rd instant, I found that the books in this department were not in as advanced a state as they should have been, the list of outstanding credit not having been brought forward. On proceeding to do this, and endeavouring to balance the April accounts, I was unable to bring about a satisfactory result, as a large balance of cash showed itself on the face of the books. On turning upon this to test the March balances (since early in which months I had been unable to visit this station), I discovered that the totals shown in the books proved a correct balance. However, on checking the additions of the list of outstandings, brought forward from March, I discovered that they were false, and gave a deficiency from total set down of some £8. On going thoroughly into the figures, I then discovered that a dreadful amount of "fudging" had been going on, the outstanding credit being made up in some instances of amounts which never existed, and in other instances amounts were lost sight of which should have appeared; the latter amounts proved, however, sadly in the minority, as on the books being thoroughly gone into, a deficiency of some £15 appeared, to supply which the Station-master had invented the sums above referred to. The sum of £8 3s. 4d. the Station-master (Mr. Davies) has already made good, and the balance he has promised to pay in this evening. This shows (to say the least of it) a fearfully loose system of book-keeping, and the Station-master (who expresses himself as deeply grieved at the occurrence, and pleads confusion and misunderstanding of his accounts as the cause) should, I think, be given to understand that a repetition of such book-keeping might lead to the most fatal results.

To the Traffic Auditor.

A. RICHARDSON.

I submit this for Commissioner's consideration. I have looked into this Station-master's accounts myself, and it is clear that his cash was short, and for the purpose of deceiving the Audit Branch he made fictitious entries of outstanding credits. The whole of the deficiency has since been remitted.—D.V., 10/5/70.

No. 2.

MR. GEORGE DAVIES TO THE TRAFFIC AUDITOR.

South Creek Station,
9 May, 1870.

SIR,

I write to ask you, for the sake of my wife and child, who is now ill, not to be hard on me this time. I know I deserve whatever would be the result of my conduct, but in God's name, Mr. Vernon, give me one more opportunity, and I will behave strict to my books, and endeavour to gain your good opinion again by my conduct. I ask you to be as light as you can this time to me for my wife and child's sake, also, my own family. Mr. Vernon, do this time be light with, and do not let me be the means of disgracing my parents and breaking the heart of my wife. If you will do what you can for me this time I will, by God's help, be strict with my work, and try and do my utmost again to gain your good wishes.

I am, Sir, your humble servant,

GEO. DAVIES.

My dear Mr. Sutherland,

I forward this to you. If you see fit to retain the writer, I do not think you need fear a second transgression.

Yours very respectfully,

D. VERNON.

No. 3.

DECISION OF THE COMMISSIONER FOR RAILWAYS.

After consulting with Traffic Auditor, I have decided to give Mr. Davies another chance; but such a thing must not again occur, under pain of instant dismissal.—J.S., 15/5/70.

Mr. Vernon duly informed.

No. 3A.

70/3020.—Traffic Auditor's complaint against Station-master Geo. Davies.

Excess-tickets don't correspond with butts.—Sent Traffic Manager, 20/8/70.

These papers have been mislaid.—30/10/72.

No. 4.

MR. J. R. NEALE TO THE ACCOUNTANT, RAILWAY DEPARTMENT.

2 September, 1871.

SIR,

I beg to report, for your information, that when passing through South Creek yesterday I was informed by the Station-master that the men employed in the Traffic Department at that station have not yet received their wages for period ending 15th August, 1871.

I have, &c.,

J. R. NEALE.

Mr. Bryant,—When was the money forwarded?—H.A.H. The Accountant,—On 23rd August, by 5 p.m. train. Guard, Atkins, whose receipt I hold.—J.T.B., 2/9/71.

To the Commissioner,—I have seen the guard's receipt-book, and find the bag was signed for by Mr. Davies, the Station-master. If Mr. Watsford's report be correct some steps should, I think, be taken to ascertain why the men have not been paid.—H.A.H., 2/9/71.

Traffic Manager, for report.—J.R., B.C., 2/9/71.

No. 5.

REPORT OF THE TRAFFIC MANAGER.

ON receipt of paper on 2nd instant I lost no time in communicating by telegram with Mr. Davies, and received from him reply marked A. Three days after, on my return from Goulburn, I received paper marked B, asking leave to come to Sydney, which was granted, as I expected Mr. Davies would see me, and he was so informed by Mr. Higgs on arrival, and again on his departure, but he returned to Liverpool without seeing me. I telegraphed to Junction for explanation, and requested Mr. Davies to return to Sydney, and received reply marked C. When Mr. Davies arrived at Liverpool he sent memo. marked D, and the next evening I received paper marked E.

Mr. Davies was removed from South Creek to Liverpool, as he states, and it is easily understood that such a mistake as he describes might have occurred. The only difficulty to be reconciled is the correspondence and subsequent action of Mr. Davies.

To Commissioner.

R. MOODY, 9/9/71.

See Commissioner's decision on 71/3343.

No. 6.

(71/3343.)

THE TRAFFIC AUDITOR TO THE TRAFFIC MANAGER.

SOUTH CREEK was visited, in compliance with your request, on Saturday last, by the travelling audit clerk, whose report to me I now enclose for your information.

Mr. Davies has evidently again been guilty of temporary appropriations of railway moneys.

It appears to me also that Mr. Watsford's conduct in consenting to such an evidently irregular settlement of accounts, without immediately reporting the facts of the case, requires explanation.

D.V., 12/9/71.

To the Commissioner,—

After full inquiry into this matter, in conjunction with the Traffic Auditor, I do not see that the case can be put in a more practicable form than to forward the enclosed report of Mr. Row for Commissioner's perusal.

The facts disclosed show a state of things on Mr. Davies's part which calls for the strongest condemnation.

R. MOODY, 12/9/71.

[Enclosure.]

Report of Audit Clerk to the Traffic Auditor.

I HAVE to report some serious matters in connection with Mr. Davies and the accounts at South Creek. The facts, so far as ascertained by me, are as follows:—

On the 25th August I visited South Creek, and handed over the books and accounts to Mr. Watsford, who succeeded Mr. Davies on his removal to Liverpool.

The original balance statement of the goods account, which I left with Mr. Watsford, is attached, and is in fact a summary of the balance handed to the Traffic Auditor with my report on South Creek for 25th August.

From that statement it will be seen that the total debits against the station on goods account amounted to £168 4s. 5d., which, according to invoices and outwards book is correct. As a "contra" to this account I found cashier's receipts for £33 5s. 8d., and an amount of £69 5s. 5d.,* which the books showed as having been remitted on the day of my visit and day previous, the receipts for which had not then been returned from cashier. This was afterwards found to be correct. Saddington's account for a part of July, amounting to £37 6s. 3d., and also for August, £18 17s. 4d., were represented as being unpaid. £2 15s. 1d. was also owing for goods on hand (or delivered that day), and also £6 14s. 8d. for goods already delivered.

These four amounts I left with Mr. Watsford to collect, furnishing him with particulars of the items in the last two cases (see balance statement attached).

On going to South Creek on Saturday last, September 9th, and questioning Mr. Watsford as to the getting in of these items, which I left with him to collect, I found that I had been grossly deceived as to the outstandings said to have been owing by the public at the time of my visit. Saddington's amount of £37 6s. 3d. it seems was received by Mr. Watsford as a value letter booked from Sydney on September 6th, and endorsed "Saddington's Account", with no memo. or letter whatever to show from whom it came. I also ascertained that it was forwarded in Bank notes.

Mr. Saddington happening to be in the train on my return, I questioned him as to the time of paying his last account. He did not recollect the date, but from what he said I surmised that it was paid some time ago (long before the date it reached Mr. Watsford), and I also found it was paid by cheque.* This tended to confirm my suspicions, and on arriving in Sydney I inquired at the parcel office, and found that the "value" letter had been handed to parcel clerk by Mr. Carlisle. I could not see Mr. Carlisle that night, he being absent from duty, but on Sunday morning I saw Mr. Hawkin (Mr. Carlisle's assistant); and he recollects that Mr. Davies was in the booking-office one day of the week, about the 6th instant, or the date on which the "value" parcel was booked from Sydney.

Of the other account of Saddington's for August (£18 17s. 4d.), I now find that a consignment of bark for Paskin, £5 4s. to pay, was entered in sundry person's book as Saddington at time of my visit, and was entered in ledger to Saddington's account. Mr. Paskin has since paid the £5 4s. to Mr. Watsford, so that at first sight it would seem to be a clerical error merely in entering to Saddington's account instead of to Paskin's, as, from the fact of Mr. Paskin having since paid the amount, it would appear to have been a *bond fide* outstanding. The fact however appears to be that Mr. Paskin had already paid the

Enclosures A to E have been mislaid.

23rd, £3 18s. 10d.

24th, £65 6s. 7d.

Mr. Saddington of course owed no such account,

but Mr. Davies made use of his name, under

which he posted a fictitious account sufficient to cover a deficiency which he (Davies) must have known to exist, the amount of which he transmitted himself to Mr. Watsford from Sydney.—D.V.

*£57 4d. cheque was sent in to cashier on Aug. 24th.—D.V.

the amount to Mr. Davies, and has paid it again to Mr. Watsford, at the solicitation of Mr. Davies, who wrote to him from Liverpool on the subject, presumably I imagine to prevent an exposure. This statement I give as furnished to me by Mr. Watsford. The third amount, £2 15s. 1d., goods on hand is all right, and has been duly collected by Mr. Watsford.

Of the fourth amount, £6 14s. 8d., represented as being owing by [customers for goods delivered, 19s. 4d. only was found to be really due by Mr. Guild, and which has been collected by Mr. Watsford.

The balance, £5 15s. 4d., stated to be owing by M'Laughlin, was found (on trying to collect) to have been already paid to Mr. Davies.

On being informed of this Mr. Davies it appears remitted the amount to Mr. Watsford from Liverpool.

There are two other matters which I noticed, which are evidently a part of Mr. Davies's system of temporary appropriation:—

*Beechman.

The first is the total suppression of an invoice from Liverpool on August 11th (the only one apparently for the month), £1 17s. 7d., to pay.* The invoice is entered in goods delivery-book, and the porter states the amount has been duly paid in to Mr. Davies. No invoice is to be found nor any entry in any of the station books other than the goods delivery-book.

The goods delivery-book also shows goods for Ferley, received from Springwood Platform, and is entered 6s. 11d. to pay, which amount, according to porter, Mr. Davies has received. No invoice can be found from Mount Victoria, and no entry is made in the books of the amount other than the goods delivery-book.

These are the facts I have at present ascertained, and they undoubtedly point to a systematic temporary appropriation of money which has been represented to audit as outstanding.

The amounts are—

Saddington's account	£37	6	3
Paskin's	"	5	4	0
M'Laughlin	"	5	15	4
Beechman	"	1	17	7
Ferley	"	0	6	11
							<u>£50 10 1</u>		

From the foregoing it will be seen that Mr. Watsford has since been paid £48 5s. 7d. of this, leaving £2 4s. 6d. still unpaid.

I beg to submit this report to the Traffic Auditor at this earliest possible opportunity.

No. 7.

THE TRAFFIC AUDITOR TO THE COMMISSIONER FOR RAILWAYS.

HAVING occasion to visit the Liverpool Station on the night of the 11th September, a second-class quarterly season-ticket (to Sydney), No. 001, value £5 16s. 5d., was found to be missing, and not entered in the books as having been issued.

Station-master was requested by memo., dated 12th (see attached), to produce this ticket. His reply will be seen. It is utterly at variance with truth,—the ticket having been issued, and doubtless paid for, according to date stamped thereon, viz., on the 4th September, as per information obtained from ticket collector.

D.V., 20/9/71.

Memorandum

Audit Office, 12 September, 1871.

Memorandum to Liverpool—[Urgent.]

Send me No. 001—2nd quarterly-ticket to Sydney—for inspection, by first train to-morrow morning.
Traffic Auditor, Per W.R.R.

No 2nd quarterly-tickets on hand—the last one issued yesterday, which by the book is 001.

GEORGE DAVIES.

No. 8.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

THIS Station-master's conduct has been carefully considered by me, and cannot be excused in any way. Irregularity of this nature is deserving of the highest censure, and although the department has lost nothing in this instance, should anything of the kind occur again I shall feel it to be my duty to suspend Mr. Davies immediately and recommend his dismissal from the Public Service, and for any deficiency Mr. Davies must take his chance.

J.B., 31/10/71.

The Traffic Manager will please communicate this decision to Mr. Davies, and return these papers early.—CHAS. A. G., B.C., 1/11/71.

Chief Clerk,—Mr. Davies has been duly informed and minute read to him.—R.M., 13/11/71.

Traffic Auditor to see.—C.A.G., B.C., 16/11/71.

To Chief Clerk,—Seen.—D.V., 18/11/71.

No. 1.—Complaints against Mr. Goold, Station-master.

MR. GOOLD, insinuating that Mr. Trotter, Superintendent, Permanent Way and Works, had removed articles from stock.

Do. not passing Jolly & Co.'s account for sleepers.

Do. refusing to purchase posts for Liverpool Cattle-pen.

SCHEDULE.

NO.	PAGE.
1. Mr. Goold, reporting a rail and some chairs and timber being taken from stock without orders. 10 August, 1863.....	12
2. Mr. Trotter's explanation. 5 October, 1863	12
3. Mr. Goold, in reply thereon. 21 December, 1863	14
4. Minute papers respecting the closing of the gate at Redfern Tunnel, referred to in Mr. Goold's reply of 21st December. 28 January, 1863	15
5. Do. finding two rails at Campbell's Wharf, do. 10 December, 1863.....	16
6. W. Jolly & Co., asking for payment of their account for sleepers. 6 November, 1863.....	17
7. Do., again do. do. 18 November, 1863.....	18
8. Letter to W. Jolly & Co., informing them that they had made no application for payment. 25 November, 1863	18
9. Letter from W. Jolly & Co., in reply. 27 November, 1863	18
10. Secretary for Public Works, insisting on Mr. Goold giving a definite answer, &c. 15 December, 1863	18
11. Mr. Goold, in reply to Secretary's minute. 16 December, 1863	19
12. Superintendent Permanent Way and Works, stating that Mr. Goold refuses to order square timber for cattle-pen, Liverpool Station. 27 November, 1863	19
13. Mr. Goold, in reply thereto, and insinuating that Mr. Trotter can get the Commissioner to make and unmake minutes. 3 December, 1863.....	19
14. Commissioner's minute, calling on Mr. Goold for an explanation of his minute of 3rd December, and threatening suspension. 10 December, 1863	19
15. Mr. Goold, in reply. 14 December, 1863	19
16. Secretary for Public Works' minute—Mr. Goold will be dismissed for his offensive minute unless he can show cause to the contrary. 24 December, 1863	20
17. Mr. Goold's apology. 31 December, 1863	20
18. Commissioner, accepting Mr. Goold's apologies. 8 January, 1864	20

No. 1.

MR. J. B. GOOLD TO THE COMMISSIONER FOR RAILWAYS.

Rail-tramway—Missing chairs by Permanent Way Inspector.

Railway Stores,
10 August, 1863.

I HAVE the honor to enclose a memorandum, dated the 23rd ultimo, relative to some chairs which were missing having been taken out of stock, and up to the present time no return has been furnished to the Storekeeper for what purpose they were used, though such information ought to have been given before they were taken.

I missed two others within the three following days, and yet no return forthcoming.

On the 29th subsequent I also missed a tram-rail, likewise in stock, which it appears, if I am correctly informed, has been used in repairing the Pitt-street tramway, and no return of this is even furnished.

The Superintendent, as appears by the enclosed, having ordered the chairs to be taken, it is to be presumed the rail was taken and used by his directions likewise; its value is £2 12s. 6d.

If I am correct in assuming that the lessee of the tramway is to find all materials for its repairs at his own expense during his lease, then it will be for the Commissioner to determine whether using the rail in question for other than the Commissioner's purposes is a misappropriation of the public property or not, there being no return furnished to debit the lessee, and if not discovered so soon would have evidently been lost to the Commissioner.

Property to any amount might thus be very easily disposed of if not missed immediately after being taken away.

I would also submit, for the Commissioner's consideration, that the night watchman be examined as to the gate at the tunnel, ordered to be closed up, as per M.P. 63/108, not only as against the public but even the Commissioner's service, and likewise in reference to the removal, as is currently reported, of some timber off these premises some time since.

J. B. GOOLD.

Mr. Goold will be good enough to be more explicit in his charges.—J.R., 18/8/63.

I beg leave to refer the Commissioner to the undermentioned parties, relative to the matters set opposite their names, as being best qualified from personal knowledge, as I am informed, to afford all particulars in reference to same.—J. B. GOOLD, 27/8/63.

Mr. J. Huthnance.—As to the number of tram-rails found in stock near the store, and his seeing one of them being taken therefrom.

Mr. Lewton.—As to the taking of this rail, and where it was used.

Mr. Trotter.—As to the bringing of an old tram-rail on the 15th instant, and having it laid with those in stock near the store, as if in exchange for the one taken (as reported) on the 29th ultimo.

Mr. Higgs.—As to his seeing this old rail being laid with those in stock.

Mr. Trotter.—As to the gate at the tunnel, the road through which having been used by Mr. Woods's drays; and also, as to who supplied a key to Mr. Woods or his men to make use of such gate.

This is not what I asked. Mr. Goold has made certain statements and insinuations of misconduct by some persons at the Sydney terminus, which require explanation. I wish him, as Storekeeper, and having charge of some of the articles referred to by him, to report fully to me all he knows of the subject, to enable me to take proper steps in the matter.—J.R., B.C., 31/8/63.

My own knowledge consists—1st. In seeing Woods's drays coming to the store by the gate at the tunnel when bringing materials to the store. 2nd. In missing the chairs and tram-rails, as already stated. 3rd. In seeing Mr. Trotter superintending his men when bringing an old tram-rail, and laying it with those in stock, on the 15th ultimo—seventeen days after the one herein reported had been removed.—J. B. GOOLD, 5/9/63.

Mr. Whitton will probably ask Mr. Trotter to report.—J.R., 29/9/63.

Forward to Mr. Trotter.—J.W., 1/10/63.

Returned to Engineer-in-Chief with my report.—D.T., 6/10/63.

Forwarded for information of the Commissioner. It appears to me monstrous that the time of Government officers should be wasted by such absurd, and I think, improper, insinuations as those contained in the Storekeeper's very extraordinary memorandum.—J.W., 6/10/63.

No. 2.

MR. D. TROTTER'S EXPLANATION.

Great Southern Railway,
Sydney, 5 October, 1863.

To the Engineer-in-Chief for Railways,—

SIR,

1. I have the honor to report upon a document that has been transmitted to me for this purpose, and which I return herewith.

2. I find it to be a report from the Storekeeper to the Commissioner bearing date the 10th August, 1863, with some additional remarks and explanations, dated respectively the 27th and 31st of the same month—these remarks and explanations having been desired by the Commissioner. In this report the Storekeeper makes statements and insinuations affecting me, and which are manifestly intended to do so.

3. I shall, therefore, now take these statements in their order (the insinuations I shall refer to presently), and trust that the explanations I shall make will be found entirely satisfactory.

4. The first complaint of the Storekeeper is then, that I have taken some chairs without giving him an order for the same. Now this I beg respectfully to deny; I am quite sure that I have never taken any articles from the charge of the Storekeeper without giving him an order for them. With respect to these chairs I must speak from memory, as I have not the papers to which the Storekeeper refers, but as they are in the Commissioner's office and can be referred to, my explanation can be verified.

5. Some time since (probably the 22nd July) I received a memo. from the Storekeeper, asking me for an account of four heel chairs; I returned word upon the back of the memo. that I knew nothing about the heel chairs, but that if he meant junction chairs I believed that he had the order for them. On referring to my order-book I find, under date 24th July, an order for three junction chairs; now the order for four of these chairs was given in two or three days previous to this upon a slip of paper, and upon their being taken, or within a day or two after, they were entered in the order-book, three only being used. I inquired at the time of the Inspector whether he had taken any heel chairs, or caused, or knew of any being taken; he said certainly not; and I am quite sure that they could not have been taken without an order, as they are imported permanent way material, and are not given up by the Storekeeper even without the Engineer-in-Chief's order. I submit that it was the Storekeeper's duty to ask me for some further particulars or explanations with respect to this complaint, when there is but little doubt he would have understood the matter.

I take it, that if the Storekeeper happens to miss chairs or any other article from under his charge, he has no right to make such a complaint as this, without in the first instance satisfying himself that he is justified in so doing.

6. The second complaint is that on the 29th August I took a tramway-rail to repair the Pitt-street Tramway. This is perfectly correct. I did take a rail, and I shall explain why I did so, and why no return was made.

The Pitt-street Tramway was undergoing repairs at this time, men and materials being found by the Commissioner, and the Lessee being charged with the whole expense. In many places, in consequence of the warping, &c., of the longitudinals, the rails had "buckled," and it was necessary to cut them; at one spot in particular, viz., near the Hay-market, there was a rail rather worse than most of the others; it was necessary to cut this. To save time and labour a rail was taken from stock; cut in the blacksmith's shop, and laid down in this place, the rail taken up being returned to stock (but not for some days) in place of the one taken. My instructions to the Inspector were to go to the store, see the Storekeeper, ask him for the rail, and explain that it would be replaced by one equally good. The Storekeeper was not at hand so the rail was taken and the work done; till I heard that the Storekeeper had complained of the rail being taken I knew nothing further of this matter, and I presumed that all was correct. Upon instituting an inquiry, however, as to the reason why the rail, to replace the one taken, had not been returned, I ascertained that it had been forgotten; I immediately procured it and laid it in the yard with the stock, but the Storekeeper afterwards threw it out again. The rail is quite as good as the one taken away, the running for so short a time of the cars over it not having injured it in the least.

7. On account of the rail being quite uninjured and being of the same size as the one taken out of stock, I considered that it was a fair exchange, and that nothing was lost to the Commissioner, and therefore I did not include it in my return of the materials employed in the tramway repairs. Had I thought that the Storekeeper had not been spoken to about this I should certainly have made it my business to mention the circumstance to him. My instructions were given just as the train was leaving the platform, and as I never heard a word about the matter afterwards I naturally enough concluded that the Storekeeper was cognizant of the exchange.

8. The Storekeeper's third complaint, if it can be so called, is to the effect that Mr. Woods used the gate at the tunnel-mouth, which was ordered to be closed. To a certain extent the Storekeeper is right in this matter. Mr. Woods certainly did use the gate, and it was by my sanction he did so.

9. It may be remembered that some months since I reported to you upon the desirability of having this gate closed, it being the Storekeeper's custom to keep it open from 6 a.m. to 6 p.m., thereby inviting a thoroughfare through the station-yard, which was very largely taken advantage of. When the boundary-fences of the yard were repaired and renewed I found that unless this gate was kept shut the public could not be kept out, and it was ordered to be closed with this view, and a new road was at the same time provided for the carriage of stores.

Mr. Woods, who I believe has the contract for carting stores for the Commissioner from ships, &c., to the station-yard, asked me to permit him to come through the tunnel-gate for a few days, as he had some heavy loads to bring into the yard, and it would be a great convenience to him. I consented, upon the understanding that he should lock the gate both upon coming into and going out of the yard, which he undertook to do. I believe, however, that on one or two occasions the gate was left open. I remonstrated with Mr. Woods, and it has been locked ever since. Indeed, as far as I know, it has not been used for probably two months. I conceive that I did no more than I was justified in doing in giving this permission to Mr. Woods, and I submit that the Storekeeper had nothing whatever to do with the matter.

10. The fourth and last complaint of the Storekeeper's is, that some timber, "as is currently reported," has been taken off the premises. I can only say with respect to this matter that I have never heard of this current report, and I imagine that if it had been so talked of I should have heard something of it. I have never missed any of my timber; perhaps it is some under the Storekeeper's charge. It might perhaps be as well to interrogate the night-watchman about this. If any timber has been taken from my stacks with his knowledge, he has been very remiss in his duty in not reporting such an abstraction to me; if it was from the Storekeeper's stacks, he certainly, I should think, would have informed him.

11. If by "timber" the Storekeeper means about half a dozen old fence posts and rails that were taken up when the new Botany-street fence was made, he is correct in stating that some have been taken from the yard, for I gave permission to a workman,—indeed to two, I think,—to take a few rails to mend and support their fences, these said fences abutting upon the Railway fence, and being in one case a portion of the same. This is all the "timber" that I have authorized anyone to take; if more has been taken I know nothing of it. I submit that the night-watchman, if he sees anything taken out of the yard, would only be performing his duty by communicating with all the officials who have charge of material, in order that proper steps towards conviction may be taken at once.

In this case as in the former ones it appears to me that it would have been much more correct for the Storekeeper to ask in the yard whether we were aware that some timber had been taken, and then, provided always that such proved to be the case, we should doubtless have been enabled to discover the thief.

12. I have now gone through, *seriatim*, the Storekeeper's complaints, and it only remains for me to say a few words about his insinuations. On referring to his report I find he says,—

13. "Property to any amount might thus be very easily disposed of (referring to the tram-rail and chairs), if not missed immediately after being taken away."

14. If the Storekeeper in this sentence means to insinuate that I have been cognizant of the taking away of any property of the Commissioner's, I beg permission respectfully to reply thereto that such insinuation is most false and malicious. If he would merely wish to imply that property to any amount could be taken away, I can only state that he is altogether wrong, for I do not think it possible that any material could be taken from the exposed stores in the yard without being immediately missed, as admitted by the Storekeeper; therefore, if property cannot be taken away without being immediately missed, it appears very strange that property to any amount could or would be taken away.

15. This report of the Storekeeper's brings to my mind some notes of his on a report I made to the Commissioner some time since respecting some pipes I was obliged to purchase. The remarks of the Storekeeper upon that paper were most indecorous and insulting; and I beg most respectfully to submit that officials holding responsible situations ought not to be subjected to such.

16. I trust I have been enabled to show that the complaints of the Storekeeper are from first to last frivolous and vexatious, and that in all the matters he complains of I acted only as I had a right to do for the furtherance directly or indirectly of the interests of the Commissioner, and as a responsible officer of the Railway Department.

I have, &c.,
DURANT TROTTER.

Submitted, J.R.—12/10/63.

Mr. Goold, for any remarks he may have to make.—J.R., 10/12/63.

Herewith.—J. B. GOOLD, 21/12/63.

No. 3.

MR. J. B. GOOLD, IN REPLY.

Railway Store,
21 December, 1863.

I REGRET exceedingly that anything in my report should so far irritate the Superintendent as to cause him to adopt the style of language contained in his explanations, which the facts of the case could scarcely justify even if his conclusions were correct.

My report is merely a summary of facts gleaned from others, and from my own personal observation. Every statement therein, with one exception, is admitted to be substantially correct by the Superintendent, and so far justifies me in the course pursued. At the same time there is no charge or complaint alleged against him personally, and if such could be inferred I must, once for all, disclaim the slightest intention of imputing to him any impropriety of conduct whatever.

Such being the case, I considered it my duty, as the officer in charge of the matters referred to, to bring them under the notice of the Commissioner for inquiry, which I was bound to do, and for the sole purpose of pointing out the absolute necessity of implicitly obeying the Commissioner's orders, and in furnishing the necessary supply orders to the Storekeeper before anything was removed from under his charge, so as to prevent any misconception whatever. I have repeatedly advised the Superintendent to caution his men from so doing, as it would ultimately lead to unpleasantness by rendering it impossible for me to keep proper and correct accounts.

The following will clearly show that the Superintendent has obtained his information from sources which cannot be relied on; and hence, having taken up wrong premises, his conclusions, as a consequence, must be erroneous.

Paragraph 5—Missing chairs.—There were eight chairs taken altogether—one being imported, the other seven being Colonial castings, made to pattern. A supply order for three only has been furnished, and there is no doubt on my part but they were used for the Commissioner's purposes.

Paragraphs 6 and 7—Missing tram-rail.—First part of paragraph 6 states the one taken up was bent and buckled and much worse than the others; when it came to stock, as per last part of same paragraph, it turns out to be quite as good as the one taken in exchange (a new one).

In paragraph 7 it was quite uninjured, so that the old bent and buckled rail on being brought into stock was magically converted into a new one; surely this can not be possible, but, as already stated, the Superintendent has been misinformed on this matter.

The rail taken up, I have reason to believe, is still in the Sydney station-yard, near Devonshire-street, and only adapted for scrap-iron. Eighteen months wear and tear must have injured it to make it so bent and buckled. The one brought to stock I should think already belonged to the Commissioner, being one of those taken up in Mr. Thomas's time to make way for a pair of points to be laid down with double-headed rails leading into the carriage-dock, and is neither bent or buckled. Had he been informed of these little facts, to show that there might be a mistake in the exchange, no doubt he would have viewed it in a different spirit, and taken a different line of argument.

Paragraphs 8 and 9—*The gate at the tunnel (63/108).—This, as there stated, might have been built up altogether (with stone or brick work) and as then directed. It is still being used for Mr. Wood's purposes. The Railway Service does not require it. The matters of the approach road in this minute speak for themselves, and sufficiently prove how easily the true facts of a case can be misrepresented for special purposes.

Paragraphs

* See paper marked No. 4 in this Schedule.

Paragraphs 13 and 14—Property missing, &c.—In February last some ridge-capping, under the Superintendent's immediate control, and intended to be put on the new carpenter's shop, then erecting, was stolen, and not since recovered; probably the Commissioner never heard of this before. The Superintendent was perfectly aware of this, for he ordered 24 feet to be procured at Commissioner's expense to replace what was stolen. His memory has failed him in this instance.

* Only a few days ago, on the 10th (63/1976), I found two rails at Campbell's Wharf, which were taken from the rear of the goods-shed. If used in any other part of the City where my duty did not take me, I should never have missed them perhaps until stock-taking—thus proving beyond doubt how easily property might be disposed of without detection and in broad day-light.

With reference to the two last paragraphs, courtesy at least to the late Secretary for Works, who decided in my favour the matter referred to † (63/415), should have suggested to the Superintendent the propriety of adopting a more gentlemanly style of language, better suited to the occasion; at the same time recollecting that the Storekeeper holds his commission as an officer in the Railway Service from the same source as he does himself, and probably of an older date.

In concluding this matter, which I trust will be found satisfactory, I have again to disclaim any intention of imputing improper motives. I have shown how much the Superintendent has been led astray for want of correct information, and I have merely pointed out to the Commissioner what I considered it to be my duty to do,—the necessity that existed and does exist, and which the good of the Service requires, viz., "implicit obedience to the Commissioner's instructions, which should at all times be carried out in their integrity."

J. B. GOOLD.

No. 4.

MR. D. TROTTER TO THE COMMISSIONER FOR RAILWAYS.

Gate at Store, Sydney Station.—Referred to in Mr. Goold's minute of 21st December, 1863.
Great Southern Railway,
Sydney, 28 January, 1863.

SIR,

Will you please forward the Storekeeper and myself written instructions upon the following matter:—

In accordance with your instructions the boundary-fences of this yard are being renewed and repaired, with a view to the exclusion of all trespassers. They are now approaching completion, and as an initiatory step towards preventing the public using the station-yard as a thoroughfare I caused the Cleveland-street gate of the tunnel-mouth to be closed and locked this morning. This gate is used by carts coming into the yard with stores, and on this account has been kept open by the Storekeeper from 6 A.M. to 6 P.M. Through this gate also daily pass hundreds of people; at certain hours the yard is thronged with them, and unless it is kept locked it will be utterly impossible to prevent trespass.

The Storekeeper refuses to allow the gate to be closed, and has removed the padlock and opened it again, thereby very much exceeding his duty, and reducing me to the unpleasant necessity of thus communicating with you.

On my telling him that it was your wish the yard should be closed, he said that he must have written instructions before he would have this gate locked, and I must ask therefore for definite written orders as to what shall be done.

I may add that there are other means of getting into the yard quite as convenient (and nearer the store), in nearly every instance, for carts, as this gate, and that one cart a day is the full extent of the traffic, though it oftentimes is only one in a week.

The only trouble to the Storekeeper, in the event of its being kept shut, would be sending his man, who is always in the store, with the key.

I have, &c.,
DURANT TROTTER.

Mr. Owen, for report.—J.R.

It is very desirable that the public should be prevented, and effectively, from trespassing on the line, and submit that all the gates of approaches to the station-yard be closed. I may, however, remark, that at present there is only one approach road to the store.—ED. OWEN, 31/1/63.

The Storekeeper, for report.—J.R., B.C, 31/1/63.

With reference to the cart road to the store, alluded to in this minute, there are already two allegations—the one stating there is only one road; the other stating there are more.

The Commissioner will, I trust, inspect the premises in question, and he will be then in a position to judge from ocular demonstration which statement is worthy of belief.

I have been Storekeeper now going on for four years, and during that period, and at the present moment, I have seen only one—the one now using by the gate at the tunnel. This is well known to every person connected with the Service.

It has been always the duty of the Storekeeper to cause this gate to be opened daily, to admit the supplies required for the Service, and to be locked in the evening; and it is still his duty to do the same until another approach road is made for the same purpose, which, if in existence, as the Superintendent alleges, the least he might have done would be to point it out, for I can see none.

He might have informed the Commissioner of the facts in reference to the removal of the padlock without leaving it to be inferred that such removal was effected by other than the usual means. He might have pointed out that when ordering a new padlock to be put on he directed the key to be left at the store for the purpose of opening it (though a padlock is already in use for the same object), and, as a matter of course, when drays came with goods, this padlock was unlocked with its own key like all other padlocks, to open the gate and admit the supplies.

He states that "one cart a day is the full extent of the traffic through it, oftentimes only one in a week." To show what credit can be attached to such reckless assertions, I enclose consignors' delivery-notes for the goods received on the day in question, numbering eleven dray-loads, which entered and returned by this gate.

* See papers marked No. 5 in the Schedule.

† These papers cannot be traced.

I may state that oftentimes as many as thirty drays have entered in one day (if not, what would have become of the thousands of pounds worth of the English importations, as well as the purchases in the Colony?) and the idea of the storeman being employed in trotting up and down a distance of nearly 220 yards each way to admit and let out drays is truly original, thereby leaving the store in the meantime to take care of itself, and the men who would come in for stores should have to wait, idling the greater portion of their time until the storeman's return.

I do not think the Commissioner would sanction the payment of 8s. per day for such a purpose, even were the facts as stated by the Superintendent.

It will be recollected that by minute, ratified by Executive Council, the store department at the Sydney Station is placed directly under the immediate control of the Commissioner, as a separate and distinct branch of the Service, with the Storekeeper as its head. Any matters, therefore, affecting this department, it is to be presumed, should come from the Commissioner direct, to whom the Storekeeper is alone amenable, by whom his duties are defined, and to whom he is responsible for their due performance. Hence the Superintendent is not the proper party to determine whether the Storekeeper has executed his duty or not; and, even were he such, his laying the complaint would at once render him incompetent to sit in judgment.

The Commissioner will therefore, I trust, receive this extra-judicial opinion of the Superintendent's for what it is worth.

In carrying out the instructions of the Commissioner, I presume it was the duty of the Superintendent to see that the efficiency of this department (to be affected thereby) was not impaired, which would evidently have happened if this gate were to be locked, by keeping out the supplies; and as the department was under a distinct head, common courtesy would have suggested the propriety of consulting the officer in charge thereof. Had this been done, I would at once have advised, "A passage to be made over the creek, intersecting the paddock, with approaches across the temporary sidings running parallel thereto, and thus afford communication with Devonshire-street, by the gate leading to the goods'-shed, and then the gateway at the tunnel might be built up altogether."

This could be easily done in two days at most, and whilst being effected a man might have been placed in charge of the gate.

This proposition I now submit for the Commissioner's approval.

The charge made by the Superintendent, of the "Storekeeper having exceeded his duty," appearing to me to be groundless, and it having been supported by allegations which, to say the least, I have proved to be erroneous, the Commissioner will, I most respectfully submit, bring the matter under the notice of the Honorable the Minister for Works for his consideration, as I am under the impression the rules of the Service do not permit charges of this nature to be made with impunity.

I am now nearly five years in the Railway Service, and during that period my character or competency has never been called in question.

The Commissioner.

J. B. GOOLD, 5/2/63.

Mr. Whitton may be requested to report. The fewer open gates to the station I should think the better.—J.R., 9/2/63.

Whitton, 9/2/63.

Trespassing in the station-yard should be stopped as soon as possible, and I believe the closing of the gate near the tunnel would considerably assist in effecting this object. One entrance would be sufficient in Devonshire-street, and a passable road might readily be made to the stores.—J.W., 12/2/63.

This should be done by all means. Mr. Whitton will perhaps instruct Mr. Trotter. Inform Storekeeper and Acting Traffic Manager.—J.R., 12/2/63.

Mr. Whitton, 12/2/63.

Mr. Owen.—Seen.—ED. OWEN, 24/2/63.

Mr. Trotter.—W.H.Q., 23/2/63.

Received.—D.T., 24/2/63.

Necessary preparations for bringing all stores through Devonshire-street entrance put in hand at once. Will be completed to-day.—D.T., 27/2/63.

No. 5.

MR. J. B. GOOLD TO THE ENGINEER-IN-CHIEF FOR RAILWAYS.

Rails being used by Mr. Woods for cartage purposes.

Railway Stores,

10 December, 1863.

I HAVE the honor to report that on visiting the shipping this forenoon at Campbell's Wharf, I observed two small rails using by Mr. Wood's servants as skids in loading up the double-headed rails, now in course of delivery.

I have since ascertained they are two of the contractor's (40lbs.) rails, and were taken off the pile received *ex* "Persia," and now stacked at the rear of the goods-shed.

These rails are entirely at the disposal of the Engineer-in-Chief as per M.P. 63/375, and I must presume the necessary authority has been given for their removal, though omitted to be notified as usual to the officer in charge.

J. B. GOOLD.

I should feel obliged if the Storekeeper, in writing his minutes, would confine himself to a statement of facts, and not "presume" that he is the only officer in the department who can conduct his duties satisfactorily. Mr. Woods has not applied to me to use any rails, nor has any permission been given to any assistant of his to do so. Mr. Woods should be called upon to return these rails at once.—J.W., 11/12/63.

Mr. Goold.—To be returned.—W.H.Q., 11/12/63.

Will the Commissioner please cause the necessary application to be made in this matter, as suggested by the Engineer-in-Chief?—J. B. GOOLD, 11/12/63.

Inform Mr. Woods accordingly.—J.R., 12/12/63.

Wrote.—R.M., 14/12/63.

The Chief Clerk, Railway Department, to Mr. J. Woods.

Department of Public Works,
Railway Branch,
Sydney, 14 December, 1863.

Sir,

I am directed by the Commissioner to inform you that the Storekeeper has reported that you have removed, without authority, from the Redfern Station, two small iron rails, which are now being used by you at Campbell's Wharf as skids in loading up the large rails; and I am to request you will at once return the rails in question to the place from whence they have been so removed.

I have, &c.,
R. MOODY,
Chief Clerk.

To Storekeeper.—R.M., B.C., 14/12/63.

Seen.—J. B. GOOLD, 15/12/63.

Rails returned.—J.B.G., 16/12/63.

No. 6.

W. JOLLY & Co. to THE COMMISSIONER FOR RAILWAYS.

Sleepers supplied by Jolly & Co.

Bathurst-street,
6 November, 1863.

Sir,

Sometime back Mr. Trotter purchased from us a quantity of old sleepers; we are informed that he has sent his certificate of receipt to Mr. Goold, who has not as yet forwarded it to your office; will you please inform us when we may expect payment.

We are, &c.,
W. JOLLY & Co.

Storekeeper, for report.—J.R., B.C., 7/11/63.

No certificate has been given to me for transmission to the office.—J. B. GOOLD, 7/11/63.

Mr. Trotter.—B.C., 10/11/63.

The sleepers in question were purchased by me with the authority and consent of the Engineer-in-Chief. They consisted of a number that had been rejected as not being good enough to take at the full contract price, viz., 3/- per sleeper; but as they would come in very handy for sidings, &c., and the contractor offered them at a low price, it was arranged that they should be purchased, and I accordingly took them from Mr. Jolly at 1/9 each, and returned their number and price to the Storekeeper on usual order signed by me. I also gave the Storekeeper a written memo. to the effect that the sleepers were purchased at such a price for a particular purpose, and with the consent of the Engineer-in-Chief. This was all that the Storekeeper could require; but if he wanted more information he could easily have asked me for it, when he could have had any signed paper he wanted, and the Commissioner have been saved the trouble of these most unnecessary explanations.—D.T., 11/11/63. The Storekeeper says that no certificate has been given to him for transmission to the office—What is to prevent him asking for one if really necessary? He sees me every day, and my office adjoins his store.

Mr. Goold, for report.—J.R., B.C., 12/11/63. This want of co-operation among officers is very prejudicial to the Public Service, and I shall submit the matter for the consideration of the Minister.

What Mr. Jolly means by a certificate of receipt I believe to be a certified contingent bill, which, as already stated, was not given me; if it had it would be forwarded at once without the slightest hesitation. Certifying the account is therefore the question at issue.

It will be seen, on referring to minute paper 63/415 (enclosed), that the Storekeeper has no authority to certify for purchases made by Mr. Trotter, unless, as is therein stated, viz., "in cases of emergency." "From his own statement" no such emergency had arisen; the Storekeeper was therefore precluded from having anything to do with such certificate, but merely to post the particulars in the ledger, which has already been done. I cannot therefore see how want of co-operation can be attributed to me, when I have obeyed the orders of the Commissioner to the letter and carried them out in their integrity.

As no such emergency as is contemplated by the minute quoted has been shown to have arisen, it is plain to be seen that the Commissioner's directions, sanctioned by the Honorable the Minister for Works, relative to purchase made by Mr. Trotter, have been completely set aside and treated as so much waste paper, the course pursued appearing to be, another attempt to get rid of the Commissioner's authority altogether, and thereby be independent of any check or control.

I see no authority from the Engineer-in-Chief to purchase these sleepers, and may be permitted to doubt whether such has been given; for it is not to be supposed that he would have advised to be done what was at direct variance with the Minister's decision, of which he is fully cognizant;—his initials are attached thereto.

I shall feel rather pleased than otherwise at the Commissioner's decision, being quite unconscious of having committed any act prejudicial to the Service which should cause me to shrink from inquiry into my conduct since my entering same in July, 1858. Its interest I have ever made it my study to promote.

The Commissioner will also please to submit for consideration the following minutes, viz.:—62/512, 514, 1,223, 62/1,398, 63/130, 174, 63/142, 63/396, 63/353, 1,317, and 63/108, 1,179. The Honorable the Minister for Works will thus be enabled to obtain an insight into the working of the Railway Department from documents which might otherwise have never come under his notice; and I sincerely wish the public interest will be benefited thereby.

J. B. GOOLD, 14/11/63.

Submitted.—J.R., 27/11/63.

In the meantime let the contingent bill be duly certified by Storekeeper, and forwarded to this office at once for payment.—J.R., 2/12/63.

Storekeeper.—B.C., 3/12/63.

Contingent bill herewith.—J.B.G., 3/12/63.

18

No. 7.

MR. W. JOLLY to THE SECRETARY FOR PUBLIC WORKS.

Sydney, 18 November, 1863.

SIR,

Would you kindly favour me with the reason why (after calling repeatedly at your office) I cannot get payment for a large number of sleepers, which I believe have been certified for some time back? By doing so at your earliest convenience you will much oblige

Yours, &c.,
WILLIAM JOLLY.

Storekeeper, for immediate report and explanation.—A.T.H., 18/11/63.

Mr. Moody.—G.H., 18/11/63.

Mr. Goold.—B.C., 19/11/63.

These sleepers are included in the annual contracts; the accounts for all such contracts being furnished at the end of every month for the month's supplies, according to clause 8 of the conditions, which states that "payments will be made at least once in every month;" all the contractors are paid in conformity with this. The return of these sleepers was only furnished on the 10th instant, and the month has not yet expired. I have always sent in Mr. Jolly's accounts for liquidation at any time during the month when so requested; in this instance he did not apply to me to do so, and I could not divine his wishes. Had he intimated to me his desire in reference to this account it would be forwarded as heretofore, without the slightest hesitation. It is forwarded herewith.—J. B. GOOLD, 19/11/63.

There is nothing in the conditions to prevent contingent bills being forwarded as soon as the Storekeeper receives notice of the receipt of goods, particularly when the amounts are large; and delays in furnishing the bills, which are very inconvenient and unfair to contractors, must be avoided. Has Mr. Jolly ever asked for payment of this account?—J.R., 20/11/63.

Mr. Goold.—B.C., 20/11/63.

Mr. Jolly made no application to me in this case. He is the only contractor who has ever applied to send in his account until the end of the month, at which time all accounts are furnished. His accounts will in future be sent in at least once a week, to save further trouble.—J. B. GOOLD, 24/11/63.

Inform Mr. Jolly.—J.R., 25/11/63.

Wrote.—R.M., 25/11/63.

No. 8.

THE CHIEF CLERK, RAILWAY DEPARTMENT, to MR. W. JOLLY.

Department of Public Works,
Railway Branch,
Sydney, 25 November, 1863.

SIR,

In reply to your letter of the 18th instant, requesting to know the reason why you cannot get payment for a large number of sleepers delivered, I am directed by the Commissioner to inform you that the Storekeeper states that you made no application to him in this case, otherwise the account would have been furnished as heretofore for liquidation.

I have, &c.,
R. MOODY,
Chief Clerk.

No. 9.

MR. W. JOLLY to THE COMMISSIONER FOR RAILWAYS.

Timber Wharf, Bathurst-street,
Sydney, 27 November, 1863.

SIR,

In reply to your letter of the 25th instant, stating that no application had been made by me to the Storekeeper for payment for sleepers, I have the honor to inform you that a short time prior to my letter of the 18th instant, I asked Mr. Goold if he had any returns for me; his reply was, that he had, and that I should get them in the usual course.

I have, &c.,
WILLIAM JOLLY.

M.P., 63/1819.

Submitted.—J.R., 3/12/63.

Mr. Goold, in the first instance, for report.—J.R., 10/12/63.

This matter has been already fully reported on in the enclosed minute-papers, 63/1735 and 1819, and Mr. Jolly has been paid all these accounts, and before the date of Commissioner's minute 10/12/63.—J. B. GOOLD, 12/12/63.

No. 10.

MINUTE OF THE SECRETARY FOR PUBLIC WORKS.

The object of the Commissioner was to ascertain whether Mr. Jolly's statement that he had applied to the Storekeeper for payment of his account was correct. The Storekeeper has evaded the question. I insist at once upon having from the Storekeeper a distinct, definite, and unequivocal answer to this question.

A.T.H., 15/12/63.

Mr. Goold.—J.R., B.C., 16/12/63.

No. 11.

19

No. 11.

MR. J. B. GOOLD, IN REPLY.

MR. JOLLY'S statement of the conversation is perfectly correct. The question in its present shape did not, nor does it still appear to me, to be an application for payment of his account. I took it merely as a simple question asking me whether I had received "a return of the number from Mr. Trotter, who received these sleepers at South Creek,"—and my reply was to that effect. If Mr. Jolly meant it to be an application for payment, he might have intimated it in more explicit terms. As it reads at present I submit with very great respect that it cannot be construed into such, it appearing to me to be neither the usual or mercantile mode of asking for payment of an account. The usual course meant "furnishing the accounts for all contractors to the Accountant for liquidation once a month, at the end thereof."

J. B. GOOLD, 16/12/63.

Submitted.—J.R., 17/12/63.

No. 12.

MR. D. TROTTER to THE COMMISSIONER FOR RAILWAYS.

Posts—"Squared Timber."—Great Southern Railway.—Cattle-pen for Liverpool.

[Urgent.]

THE accompanying paper, with sketches of posts, is a portion of the order given to the Storekeeper this morning for the cattle-pen about to be put up at Liverpool.

As there is a contract for squared timber only the Storekeeper refuses to order these posts as they have butt or unsquared ends.

The contractor for timber will, however, supply them as squared posts, and consequently if you will, at your early convenience, give the Storekeeper authority to order them as per sketch, there will be no difficulty at all in the matter.

The advantage of butt-ends to posts for the purpose for which these are ordered is manifest.

DURANT TROTTER, 27/11/63.

The Storekeeper to give the necessary order.—J.R., B.C., 28/11/63.

No. 13.

MR. J. B. GOOLD, IN REPLY.

I HAVE ordered these posts as directed, but am at a loss to understand why the Commissioner should be troubled with this matter, Mr. Trotter having ample authority to procure everything he requires, whether contract or not (which he is doing almost every day), and more especially when this is marked by him as urgent.

The course now pursued by him has so far delayed the progress of the work.

Perhaps he wishes it to be seen how easily he gets the Commissioner to make and unmake minutes as suits his (Mr. T's.) convenience.

J. B. GOOLD, 3/12/63.

In what state are the cattle-yards and approaches at Liverpool, ordered by me to be put up some time ago?—J.R.

Mr. Whitton.—B.C., 4/12/63.

Mr. Trotter.—J.W., 4/12/63.

The material for the Liverpool cattle-pen was ordered immediately upon receipt of instructions to put up same. All of it, except the posts, is supplied, and these have been delayed because the Storekeeper refused to purchase posts with "round" ends, there being no contract for them. The order had therefore to receive Commissioner's sanction. I believe they are now ordered from contractor, and as soon as they are supplied the pen will be put up with all speed.—D.T., 5/12/63.

No. 14.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

MR. Goold for explanation of the concluding paragraph of his minute of 3/12/63. Unless that explanation be satisfactory I shall feel it my duty to recommend his suspension for insubordination.

J.R., B.C., 10/12/63.

No. 15.

MR. J. B. GOOLD, IN REPLY.

THE paragraph alluded to by the Commissioner is merely a surmise on my part, and nothing more.

If however any particular meaning can be attached to it, Mr. Trotter, I am inclined to think, is the proper party to explain; and therefore I most respectfully submit that he be requested to state why—

"He asked the Commissioner to direct the Storekeeper to order these posts, thus causing seven days delay, when he had at the same time full power and authority of himself to order them at once." Surely

Surely the good of the Service in this case required prompt action, and not unnecessary delay. So far as the threat of suspension is concerned, I am in duty bound to submit to whatever course the Commissioner may think fit to pursue, leaving its ultimate issue to be determined by another tribunal—the Executive Council. I must however add, that I neither have or had the slightest idea of intending to convey any impression that could be considered in the most remote degree personal or disrespectful to the Commissioner.

J. B. GOOLD, 14/12/63.

Submitted.—J.R., 15/12/63. Cabinet.—A.T.H., 23/12/63.

No. 16.

MINUTE OF THE SECRETARY FOR PUBLIC WORKS.

(63/2028.)

24 December, 1863.

MR. GOOLD'S minutes, and his style of communication are most offensive. I have several of them before me, and they are all penned in the same improper manner. His minute, 3/12/63, is particularly obnoxious, and shows a determined spirit of insubordination, and a desire on his part to subvert order and good conduct in the department. I am determined not to tolerate such scandalous conduct, and I shall recommend that Mr. Goold be dismissed from the Service, unless he can show good reason to the contrary.

A.T.H.

Mr. Goold.—J.R., B.C., 24/12/63.

No. 17.

MR. J. B. GOOLD'S APOLOGY.

I REGRET exceedingly having written the paragraph alluded to by the Honorable the Secretary for Works, and any other minutes that could in any wise be considered offensive, disrespectful, or derogatory to the Commissioner, or in any way subversive of the good order and discipline of the Service. I therefore most respectfully beg leave to apologize for and withdraw any and every minute of my correspondence that can be viewed in any manner than as decorous, respectful, and obedient to the Commissioner, and beneficial to the public interests. I am now five years and five months in the Railway Service; its interests I have always and at all times endeavoured to promote by every means in my power, and to the best of my ability, and I trust the Commissioner will deal leniently for any transgressions I have committed in my zeal for its welfare.

I have again to express my sincere regret, and hope that this my apology will be accepted by the Commissioner, and deemed satisfactory.

J. B. GOOLD, 31/12/63.

The Storekeeper to The Commissioner for Railways.

Railway Stores,
31 December, 1863.

MAY I request the Commissioner will be pleased to do me the favour of permitting me to supplement my minute of this evening in M. P. 63/2028, with the following, which has been inadvertently omitted, viz.: "To express also my regret for having used any language, either verbally or written, considered to be offensive or disrespectful to any officer in the Railway Service, or in the slightest degree tending to subvert the order and discipline of the department. I therefore beg most respectfully to apologize for, and withdraw any and every such expression as could be construed in any manner than as conducive to the good harmony and cordial co-operation among all officers in the Service, and tending to promote its best interests."

J. B. GOOLD.

Submitted.—J.R., 4/1/64.

No. 18.

THE COMMISSIONER FOR RAILWAYS, ACCEPTING MR. GOOLD'S APOLOGY.

As far as I am personally concerned, I am satisfied with the apology of the Storekeeper; but he ought to be warned of the consequences that must result from want of co-operation with other officers of the department, and throwing unnecessary difficulties in the way of contractors and others. I have received many complaints of his tyrannical method of dealing with them, and have repeatedly spoken to him on the subject, but he appears to have an infirmity of temper which must be checked or cured before he can carry out his duties without giving unnecessary offence to those who come in contact with him in his official capacity.

J.R., 8/1/64.

Let Mr. Goold be warned accordingly.—A.T.H., 8/1/64.

No. 1.

THE ACCOUNTANT TO THE STORES CLERK.

Mem. [Urgent.]

Great S. & W. Railway,
8 March, 1864.

Mr. Ewen will please report why the "Issue of Stores" for February, has not yet been furnished? The delay necessitates the books of this office being kept open.

R.C.W., 8/3/64.

To the Accountant,—The time at my disposal has not been sufficient to allow of the return in question being furnished to your office. I am now devoting the whole of my time, to the neglect of my ordinary work, in its preparation. The return will be furnished in a few days.

R. RUPERT EWEN, 8/3/64.

The Commissioner,—Unless these returns are furnished regularly at the end of the month it throws all the books behind hand, and delays the returns that have to be furnished to the Auditor General, and prevents my being able to state the balance of each vote at the end of the month.—R.C.W., 8/3/64.

The Storekeeper, for report.—J.R., B.C., 8/3/64.

The time originally allowed to compile these returns is up to the middle of the month. Mr. Ewen states he will send it in a few days, so that he will be able to furnish it within the time specified.—J. B. GOULD, 8/3/64.

Accountant.—J.R., 10/3/64.

The Commissioner,—The object in allowing a clerk to the Storekeeper was, I understood, to facilitate the returns being supplied to this office by the 2nd or 3rd of the month, in order that the books in this office might be completed more speedily, as it is quite out of my power to prepare the monthly summary sheets, which have to be furnished to the Auditor General, until the books of this office are closed at the end of each month; and, as he is constantly pressing for these returns to be furnished earlier than they have hitherto been sent to him, I considered it necessary to call the Commissioner's attention to the cause of the delay. As regards Mr. Goold's remark about the time "originally allowed to compile these returns," no time was allowed; but the returns could never be obtained before the middle of the month, which was my reason for recommending assistance being given to the Storekeeper on the Minister's minute to me respecting the appointment of a clerk.—R.C.W., 12/3/64.

The Storekeeper.—J.R., 18/3/64.

No. 2.

MR. J. B. GOOLD, IN REPLY.

THE enclosed tabulated abstract of the dates when the store returns were furnished to the Accountant for the past four years will show that little credit can be attached to his statement of "the returns could never be obtained before the middle of the month." It will be seen by the analysis that for forty-one months out of forty-eight they were sent in by the 8th of the month, and that not even one was so late as the middle of the month. Mr. Ewen is entirely under the control of the Accountant, and the Accountant, in the first instance, might have fixed, for his guidance, the precise time when the returns should be furnished. This I now submit to be done. I have no desire to exercise the slightest authority over Mr. Ewen, which might be the means of compelling him to work night as well as day—as I have been obliged to do—in making out these returns for the last four years and a half.

J. B. GOOLD, 23/3/64.

No. 3.

TABULATED STATEMENT.

TABULATED Statement, showing the dates when the monthly returns of store issues were furnished to the Accountant for the four years ending the 31st December, 1863.

Return for—	1860. When furnished.	1861. When furnished.	1862. When furnished.	1863. When furnished.
January	6 February	11 February	6 February	7 February.
February	5 March	9 March	6 March	7 March.

No. 4.

MEMO. ON MR. J. B. GOOLD'S REPLY.—23/3/64.

THERE was no occasion for Mr. Goold's insulting remarks, or his elaborate analysis of dates, for no blame was imputed to him. I merely asked for information when it was urgently required, and used the words "Middle of the month" approximately. The earliest of Mr. Goold's dates in 1863 is the 6th, going on to the 7th, 8th, 9th, and 13th; and in January and February of this year on the 10th and 14th of the month; and my minute did not in any way refer to 1860 and following years; but the returns are seldom received in this office on the same day the Storekeeper dates them, as there is generally some delay in transmission.

I understand that the Storekeeper and Mr. Ewen are both under the direction of the Accountant as far as the accounts are concerned; but it is, I presume, Mr. Goold's duty to see that Mr. Ewen performs his work properly, and also to instruct and direct him how to act, as I could not do my work if I had to visit the store daily to see that the work was being carried on correctly; and Mr. Goold knows as well as I do the necessity for these returns being furnished as early as possible. No time was fixed for transmission, and he was not pressed for the returns when he had no assistance, as I knew he had to work at night in order to get them out, and I was satisfied that he always gave them to me as soon as he could do so.

Mr. Goold states, "he has no desire to exercise the slightest authority over Mr. Ewen." I think the Commissioner will see the necessity for the clerk in the store acting under the direction and guidance of the Storekeeper; and also that the Storekeeper should certify to the correctness of the returns to this effect,—

"I

23

"I certify that the foregoing statement is a true and correct return of the issues from the Southern Store during the month of 186 .

(Signed) Storekeeper."

This certificate should also be attached to the Northern Store Issues by the Storekeeper; they now are merely signed at the foot of the document.

I therefore leave it for his decision.

R.C.W., 31/3/64.

Submitted.—5/4/64.

In the meantime instruct the Storekeeper to certify to the returns, as I presumed they were in the habit of doing. The form suggested by the Accountant will be sufficient.—J.R., 12/5/64.

The Storekeeper.—B.C., 13/5/64.

No. 5.

MR. J. B. GOOLD, IN REPLY.

Seen. The Commissioner's instructions will be carried out.—J. B. GOOLD, 14/5/64.

THE enclosed memo. marked A, received during Saturday afternoon, shows the result of a divided control over Mr. Ewen, who comes here and goes as he wishes; and it appears that a third party, Mr. Vernon, is authorized to prevent his coming. It was only on the 3rd instant he finished closing the ledger accounts for March; they are still to be closed, and the balances brought forward for last month; and up to the present time (1 p.m.), he has not entered up any of the issues for the present month; he has not been here since Thursday last.

J. B. GOOLD, 16/5/64.

Mr. Walker, with reference to Mr. Ewen's alleged absence—Has not some arrangement been made with reference to the division of his duties—giving so much of his time to the audit branch and so much to the store?—J.R., B.C., 17/5/64.

Messrs. Vernon and Ewen,—I instructed Mr. Ewen that he was to work up the store books in addition to his ordinary work, in accordance with the Minister's direction, and left it for Mr. Vernon and himself to arrange as to the most convenient way of dividing his time between the two duties. Mr. Vernon and Mr. Ewen will explain how the work has been carried on, and whether Mr. Ewen has neglected his duty as implied by Mr. Goold's minute of 16/5/64.—R.C.W., 18/5/64.

The Commissioner,—See explanations herewith. I do not see how Mr. Ewen could without neglecting the audit work altogether devote more of his time to the store than he has done; but if Mr. Goold had assisted him as Mr. Ewen points out, the store books would be kept much closer up, and the furnishing of the returns to this office greatly facilitated.—R.C.W., 18/5/64.

No. 6.

MESSRS. EWEN AND VERNON'S EXPLANATIONS.

Great S. & W. Railway.

Memo.—Audit to Accountant.—18/5/64.

Mr. Goold by stating in his memo., dated the 16th instant, that I go to and from the store as I wish, implies that but a very small portion of my time has been devoted to the store accounts; so far from this being the case, it has been my practice to attend at the store during the first ten or eleven days of each month from 9 a.m. till 5.30 p.m., and during the remainder of the month, with the exception of two or three days which I devote to work in the Audit Office. I have constantly gone to the store about 2 p.m. and left 4 p.m., and often later, and this will account for my reported absence from Thursday last till Monday, 1 p.m.

On the latter day and yesterday I went there at 2 p.m. and stayed till 4.30, entering up the issues for the previous twelve or fourteen days, which might more appropriately and readily have been entered by the Storekeeper himself. This would have enabled me to commence at once the balancing of the ledger for April, which Mr. Goold says has not yet been done, but which has been begun now; it really could not have been done before. As to the non-entry of the daily issues, I may say that I was not furnished with the order for stores before the 10th or 11th, though the Storekeeper represents it as a neglect from the 1st instant. But even had they been furnished earlier, their non-entry is caused by the exclusive attention which is given up to the 10th or 11th to furnish the monthly return to Accountant.

R. RUPERT EWEN, 18/5/64.

The Accountant will see that my remarks upon the Storekeeper's order for Mr. Ewen's daily morning attendance, afford no foundation for the offensive reference to a third party as being invested with authority to prevent his attendance. I have done all in my power to facilitate Mr. Ewen's absence from this office in order for his attendance at the store. The remainder of Mr. Goold's minute is calculated to mislead and give a wrong view of Mr. Ewen's performance of his duties, as may be seen from Mr. Ewen's report herewith, from which also the Accountant will learn the information he requires.

I would respectfully observe that under present arrangements I am somewhat hampered in the performance of certain duties to which I cannot devote that attention I could wish, but the best shall be done to carry out instructions received.

D. VERNON, 18/5/64.

Memorandum to Mr. Ewen, referred to in Mr. Goold's minute of the 16th of May.

Government Railways,
Store Branch, 14 May, 1864.

Sir,
You will please in future to attend this office every morning at the usual hour for commencing office duties, to do up the store books.

Yours, &c.,
J. B. GOOLD.

Mr. Vernon, for instructions.—R.R.E., 14/5/64.

The Storekeeper,—As Mr. Ewen receives orders from the Accountant only, and has been directed to act under the guidance of Mr. Vernon, and to undertake the store books in addition to the duties entrusted to him in this office, Mr. Vernon would be glad to know by what authority the Storekeeper issues his orders to this office? The store books hitherto have been and will be properly attended to in accordance with instructions referred to above.—D. VERNON, 14/5/64.

No. 7.

THE SECRETARY FOR PUBLIC WORKS, SUSPENDING MR. J. B. GOOLD.

SUBMITTED.—It appears hopeless to have the Storekeeper's department carried out properly while the present Storekeeper retains the office, and I recommend a change of appointments for the benefit of the Service.

J.R., 19/5/64.

Suspend Mr. Goold, and provide for the present a substitute for his duties.—A.T.H., 20/5/64.

Inform and ask Mr. Bulford to perform the duties temporarily till the Minister's decision is known.—J.R., 21/5/64.

27 May, 1864.

SIR,

I do myself the honor of enclosing a copy of a letter, addressed to the Under Secretary for Works, relative to my suspension from the office of Storekeeper to the Railway Department, and to which as yet I have not been favoured with a reply.

Presuming that the matter will be at once brought before the Cabinet, may I hope your kind and favourable consideration thereof, with the view of my request being granted, feeling confident that on due inquiry I shall be honourably acquitted of any charges which may be preferred against me.

I may be permitted to add, I entered the Railway Service in July, 1858, having now been Storekeeper since July, 1859, a position of very great trust and responsibility, and in the discharge of my duties I have ever made it my earnest and constant study to protect and promote the public interests to the best of my ability.

THE COMMISSIONER FOR RAILWAYS to MR. J. B. GOOLD.

(No. 297.)

Department of Public Works,
Sydney, 30 May, 1864.

SIR,

In reply to your letter of the 21st instant, I am directed by the Minister for Public Works to call upon you to show cause why you should not be dismissed from the Public Service for generally offensive and insubordinate conduct, and for disrespectful and insulting conduct to your superior and other officers in this department, in particular,—

1st.—For a statement contained in a minute of 23/3/64, to the effect that "little credit can be attached to his (the Accountant's) statement."

2nd.—For a statement contained in a minute of 16/5/64, to the effect that "the enclosed memo. A, received during Saturday afternoon, shows the result of a divided control over Mr. Ewen, who comes here and goes as he wishes; and it appears that a third party, Mr. Vernon, is authorized to prevent his coming."

3rd.—For a reply given to Mr. Trotter, contained in a minute of his (16/6/64), in reference to the carriage-grease in stock, in which Mr. Trotter states—"I have applied to Storekeeper for information of carriage-grease on hand, but he refuses to give me the information. The Minister's wish is that if there is a good stock on hand these contractors should be allowed to have the quantity required, viz., 6 casks."

No. 13.

MINUTE FOR THE EXECUTIVE COUNCIL.

Department of Public Works,
Sydney, 27 May, 1864.

THE Secretary for Public Works informs His Excellency the Governor and the Executive Council that he has suspended Mr. J. B. Goold from his duties as Railway Storekeeper at Redfern.

This course has been adopted for the reasons disclosed in the accompanying memorandum; and as Mr. Goold has paid an utter disregard to repeated warnings, and as the Secretary for Public Works is desirous of promoting better efficiency in the Government Service, he recommends to His Excellency and the Executive Council that Mr. Goold be dismissed.

[This did not go to the Executive Council, Mr. Secretary Holroyd having subsequently made the minute of date 13 June, 1864. (See paper No. 16 herewith, Schedule 2.)]

No. 14.

STATEMENT, SHOWING THE CASES OF MISCONDUCT OF MR. J. B. GOOLD.

Department of Public Works,
Sydney, 27 May, 1864.

March, 1863.

THE first instance apparently on record in this office, in which Mr. Goold shows a disposition to delay the public business by a want of co-operation with the other officers of the Railway Department, will be found in papers marked No. 1.* It appears that Mr. Trotter, Superintendent of Ways and Works, purchased some earthenware pipes that were urgently required, and the Storekeeper having refused to recognize the purchase, with the remark that he would have nothing to do with Mr. Trotter's bargains, that gentleman applied for instructions to the Commissioner. Mr. Goold, in his report on this matter, takes occasion to say that a certain opinion, expressed by Mr. Trotter in his letter "is most probably a mere ruse, admirably adapted to conceal the intention of getting rid of the Commissioner's orders, and thereby be independent of any check whatever";—thus, it is apparent, imputing improper motive to Mr. Trotter.

The second instance on record will be found in papers marked No. 2. This case is opened by a letter, dated the 10th August, 1863, from the Storekeeper, reflecting, it would appear, on the integrity of some one in the department in connection with the removal of some railway material without authority. Being pressed by the Commissioner to be more explicit in his charges, Mr. Goold insinuates that Mr. Trotter is the officer to be blamed. Mr. Trotter on being called upon fully reports on all the charges made; and the Engineer-in-Chief for Railways remarks thereon, that it appears to him monstrous that the time of Government officers should be wasted by such absurd and improper insinuations as those contained in the Storekeeper's very extraordinary memorandum.

Mr. Goold in his reply regrets that anything he has said should irritate Mr. Trotter, disclaims all intention of imputing improper motives; but at the same time adds that had Mr. Trotter been aware of certain little facts which go far to upset the statements he had made, he would no doubt have viewed the matter differently, and taken a different line of argument.

28 Nov., 1863.

The third case also arises out of a want of co-operation by the Storekeeper with Mr. Trotter, and has reference to the refusal of the Storekeeper to order certain materials on Mr. Trotter's requisition. Mr. Trotter having reported the circumstance to the department, Mr. Goold was duly instructed to give the necessary order. In his reply, stating that he had done so, Mr. Goold remarks that he is at a loss to understand why the Commissioner should be troubled in the matter, as Mr. Trotter has ample authority to procure everything he requires. "Perhaps," Mr. Goold adds, "he wishes it to be seen how easily he gets the Commissioner to make and unmake minutes as suits his (Mr. Trotter's) convenience."

The Commissioner having called upon Mr. Goold for a satisfactory explanation of the above paragraph, with an intimation that otherwise his suspension for insubordination would be recommended, Mr. Goold replies, that if any particular meaning can be attached to it, Mr. Trotter, he is inclined to think, is the proper party to explain, and adds—"so far as the threat of suspension is concerned, I am in duty bound to submit to whatever course the Commissioner may think fit to pursue, leaving its ultimate issue to be determined by another tribunal—the Executive Council."

The Secretary for Public Works, having had before him this and several other of Mr. Goold's minutes, expressed his opinion that they were most offensive, and that he showed therein a determined spirit of insubordination, and a desire to subvert order and good conduct in the department.

Mr. Goold having thereupon written a full apology, and expressed, in withdrawing his remarks, his sincere regret for having made them, Mr. Secretary Holroyd was pleased, on the Commissioner's recommendation, to condone his conduct, abandoning his previously expressed intention of recommending

8 January, 1864.

Mr. Goold's dismissal.

Mr. Goold having been thus warned of the consequences that must result from such a course of conduct, it was confidently trusted that no further offence would be given by him; but the papers marked No. 4 will show that leniency to Mr. Goold is no inducement to him to behave with propriety. It will be seen that Mr. Walker, the Railway Accountant, had occasion to make a minute relative to the furnishing by the Storekeeper of certain monthly returns, and he reminds Mr. Goold that the services of a clerk were given to him for the purpose of enabling him to send these returns in by the 2nd or 3rd of the month, adding at the same time that previous to this arrangement the returns could never be obtained before the middle of the month. Upon this, Mr. Goold, without being asked to do so, sends in a tabulated abstract of the dates when the store returns were furnished for the past four years, and accompanies it with the remark that that abstract "will show what little credit can be attached to Mr. Walker's statement."

12 March, 1864.

While this is under consideration, further instructions are given to Mr. Goold with reference to these returns, and he then brings a charge against his assistant, Mr. Ewen, of neglecting his duty. Mr. Ewen's reply, together with Mr. Vernon's, is attached, and a perusal of them, taken in connection with Mr. Goold's general conduct, will, it is submitted, show that it is hopeless to expect that the Storekeeper's department can be properly carried on while the present Storekeeper retains his office.

18 May, 1864.

No. 15.

MR. J. B. GOOLD TO THE UNDER SECRETARY FOR PUBLIC WORKS.

Regent-street, Newtown,
3 June, 1864.

SIR,

I have the honor to acknowledge the receipt of your letter (No. 297) of the 30th ultimo, calling on me to show cause why I should not be dismissed from the Public Service for generally offensive and insubordinate conduct and for disrespectful and insulting behaviour to your superior and other officers in this department, in particular:—

1st.—For a statement contained in a minute of 23/3/64, to the effect that little credit can be attached to his (the Accountant's) statement.

2nd.—For a statement contained in a minute of 16/5/64, to the effect that the enclosed memo. (A), received during Saturday afternoon, shows the result of a divided control over Mr. Ewen, who comes here and goes as he wishes; and it appears that a third party (Mr. Vernon) is authorized to prevent his coming.

3rd.—

* This paper has since been mislaid.

3rd.—In a reply given to Mr. Trotter, contained in a minute of his (16/5/64), in reference to the carriage-grease in stock, in which Mr. Trotter states:—"I have applied to the Storekeeper for information of carriage-grease on hand, but he refuses to give me the information. The Minister's wish is that if there is a good stock on hand these contractors should be allowed to have the quantity required, viz., six casks."

1. In reference to the first charge, viz., "that little credit can be attached to his (the Accountant's) statement," I beg leave to reply that the paragraph quoted is only a portion of a sentence from a letter of mine, the whole of which, taken together, qualifies the offensive nature of the supposed allegation, and to which I would beg to draw your attention. The paragraph reads thus:—"The enclosed tabulated statement of the dates, when the store returns were furnished to the Accountant for the past four years, will show what little credit can be attached to his (the Accountant's) statement, that the returns could never be obtained before the middle of the month."

2. In making this statement, which I did in justification of an unqualified charge made by Mr. Walker, I admit that it might have been open to me to use more qualified language in official correspondence, but the truth of the matter still remains that I was not open to Mr. Walker's animadversions, as will be seen from the statement in my letter of the 23rd of March, enclosing the tabulated return. I then remarked—"it will be seen by the analysis that for forty-one months out of forty-eight they were sent in by the 8th of the month, and that not one even was so late as the middle of the month." Mr. Walker does not attempt to deny the correctness of this tabulated statement, but, on the contrary, admits it in its entirety, and, in his letter of the 31st of March, says—"there was no occasion for Mr. Goold's insulting remarks (the insulting remarks, or rather remark, being the paragraph in question) as no blame was imputed to him."

It will therefore be seen that my object in writing the paragraph complained of was to vindicate my character for correctness, against a statement which I trust the Accountant unwittingly made, and not with a view of being either offensive, insubordinate, or disrespectful.

3. With reference to the second charge, I would respectfully submit that I am not open to any animadversion. Mr. Ewen's services were placed partly at my disposal to facilitate the making out of the store returns, which were being daily called for by the Accountant; and in order to furnish them with as little delay as possible, knowing how necessary it was to the efficient working of the Accountant's branch to have them compiled without delay, I considered it not only my duty, but that I was fully empowered to insist on Mr. Ewen's attendance as my assistant; this necessitated the writing of the memo., which he refused to comply with. I consider that I was fully justified in giving Mr. Ewen directions from a minute of Mr. Walker's of date 5th of February, 1864, addressed to me, in which he says—"The Minister has directed that Mr. Ewen is to keep the store books in addition to his present duties; you will therefore be so good as to hand them over to him, and render him any assistance you can, by directing him how he should make his entries under the proper heads, and also show the form in which he should make out the usual monthly return for this office."

4. It will appear by the correspondence on the subject, that Mr. Ewen came at irregular times, and not when directed by me, so as to afford the aid required; and when I gave instructions that he should attend punctually at stated times, Mr. Vernon objected to the course adopted by me, and, in his minute of the 14th May, 1864, wrote as follows:—"As Mr. Ewen receives orders from the Accountant only, and has been directed to act under the guidance of Mr. Vernon, and to undertake the store books in addition to the duties entrusted to him in this office, Mr. Vernon will be glad to know by what authority the Storekeeper issues his orders to this office. The store books hitherto have been and will be properly attended to in accordance with the instructions referred to above." It therefore did appear to me that there was a divided control between Mr. Vernon and myself over this officer. The matter was referred to the Commissioner, and it appeared that, although Mr. Ewen was instructed to work up the store books, in addition to his other duties, no arrangement had been made as to the division of his time.

5. In reply to the third charge, I beg respectfully to state that I am not aware of having had any conversation whatever with Mr. Trotter on the subject of grease in store. The charge in your letter that I am now replying to is the first intimation I have had upon the subject, and I may remark that my general instructions were not to afford information to any person whatever respecting the goods under my charge, except by direction of the Commissioner.

6. It will be seen from the records of the Railway Department that I have been instrumental to the saving of several thousands of pounds to the Public Service, which otherwise would have been lost, and in my zeal for the benefit of the Service I may have been led into what appears to have been construed into acts of insubordination, but which were never intended by me to be such.

7. On the general charge of offensive and insubordinate conduct, and for disrespectful and insulting behaviour to my superior and other officers in this department, I beg leave to state that it is impossible for me to reply to, being vague, indefinite, and may have no real existence, and I humbly submit that I am entitled to a specified detail of such charges to enable me to rebut them.

8. A paragraph occurs in Mr. Walker's minute of 31/3/64, to which I would respectfully invite attention, it being calculated to mislead, and is as follows—"I understood the Storekeeper and Mr. Ewen are both under the Accountant." Such however is not the case; my minute of appointment (21/6/59) thus states, "As the Commissioner intends the store department for the future to act independently of the Accountant." Hence the Accountant never has been my superior officer.

9. I humbly trust that the explanations I have offered are entirely satisfactory; but should the Executive decide on my dismissal, notwithstanding my having rebutted the charges herein preferred against me, I claim the privilege usually accorded to officers in the Public Service of an inquiry into the causes which led to the alleged insubordination.

I have, &c.,
JOHN B. GOOLD.

No. 15 A.

MR. D. TROTTER to THE SECRETARY FOR PUBLIC WORKS.

G. S. & W. Railways,
Sydney, 6 June, 1864.

In accordance with your request I have the honor to state in writing the substance of a conversation between the Storekeeper and myself, respecting the stock of railway-grease on hand. The questions were asked by me under verbal instructions from you, in order that if a sufficient quantity was found to be in stock, the contractors on the Windsor and Richmond Railway might be supplied with a few casks.

On the morning of the day on which I handed the contractor's letter, containing the request, to the Commissioner, I went into the Storekeeper's office, and asked him what stock of railway-grease he had on hand, explaining to him at the same time my reasons for the question. He most distinctly refused to give me the information.

I then told him that I sought the information by the Minister's wish. He replied that he would give me no answer unless the papers came before him in due course.

I told him there were no papers; he said something in reply which I do not distinctly recollect, and the interview ended by his remarking that doubtless I was very much offended by his refusal to answer my questions, but that he would not or could not do it. I told him that I was not at all offended, that I wanted to get the information for the Minister's use, and that I must procure it elsewhere, from the Commissioner, or words to that effect.

I saw the Commissioner in the course of the day, produced the letter, and asked for the information. The Commissioner told me to apply to the Storekeeper. I told him I had done so, and that he refused to answer my question. The Commissioner directed me to write this on the contractor's letter of application, which I accordingly did, then and there, leaving the letter in the Commissioner's office.

DURANT TROTTER, 6/6/64.

Messrs. Thurston's application for wagons and grease.

Windsor, 12 May, 1864.

Sir,

We are advised by Mr. Holroyd to apply to you for five (5) ballast wagons, and 6 casks wagon-grease. If you could possibly have the above ready for delivery by next Tuesday week (say 24th of present month) it would confer a special favour on the undersigned. In any event we would be pleased to receive an answer by return of mail, or at your earliest convenience.

D. Trotter, Esq.

We have, &c.,
J. & R. THURSTON,
Contractors, B. & Windsor R. Line.

I have applied to Storekeeper for information of stock of carriage-grease on hand, but he declines to give me the information. The Minister's wish is that if there is a good stock on hand, these contractors should be allowed to have the quantity required, viz., 6 casks.—D.T., 16/5/64.

Submitted.—J.R., 17/5/64.

This matter was settled on Mr. Goold's exchange to Picton.—R.M., 9/6/65.

No. 16.

MINUTE OF THE SECRETARY FOR PUBLIC WORKS.

INFORM Mr. Goold that I have determined to withdraw his suspension and to stop any further proceedings against him. I am at the same time strongly of opinion that unless his conduct undergoes a material change I shall be unable to continue him in office. It is quite possible for a person in Mr. Goold's position, without refusing to obey any order given to him, to yield his obedience in such a manner, and so to manage his intercourse with his superiors, as to render it impossible for him and them to work harmoniously together. It frequently happens in this department that things require to be attended to with great promptitude, and that it is the duty of the officers to assist in expediting arrangements in reference to which formal orders cannot be given, but the necessity of prompt attention to which is obvious to everyone. Imitating language from an officer to his superior, whether in the way of criticism or otherwise, cannot have any result which will not be injurious to the Public Service.

Let Mr. Goold be informed that in future, courtesy to the other officers in the department, and a strict, prompt, and substantial obedience to his orders will hereafter be expected from him, and the first breach of duty in these respects will result in a recommendation to dismiss him from the Public Service, and in that case all past transgressions will be taken into account.

Entertaining these views I think also that it would be to the advantage of the Public Service that Mr. Goold should be removed to another branch; and I therefore beg to offer him the situation of Station-master at Picton, an office of equal value with the one which he now holds.

A.T.H., 13/6/64.

Mr. Goold has, I understand, been informed through Railway Branch.—G.H., 15/6/64.

Mr. Moody.—15/6/64.

Yes, on 14/6/64.—R.M.

29

No. 17.

THE CHIEF CLERK, RAILWAY DEPARTMENT, to MR. J. B. GOOLD.

Department of Public Works,
Railway Branch,
Sydney, 14 June, 1864.

SIR,

I am directed by the Commissioner to inform you, that the Honorable the Secretary for Public Works has been pleased to withdraw your suspension, and has determined to stop any further proceedings against you; at the same time Mr. Secretary Holroyd is of opinion that unless your conduct undergoes a material change he will be unable to continue you in office.

I am to add, the Honorable the Secretary for Public Works is of opinion that it is quite possible for a person in your position, without refusing to obey any order given to you, to yield your obedience in such a manner and so to manage your intercourse with your superiors as to render it impossible for you and them to work harmoniously together.

I am to add, it frequently happens in this department that things require to be attended to with great promptitude, and that it is the duty of the officers to assist in expediting arrangements, in reference to which formal orders cannot be given, but the necessity of prompt attention to which is obvious to everyone.

I am further to add, that imitating language from an officer to his superior, whether in the way of criticism or otherwise, cannot have any result which will not be injurious to the Public Service.

I am also to state that in future, courtesy to the other officers in the department, and a strict, prompt, and substantial obedience to your orders will hereafter be expected from you, and the first breach of duty in these respects will result in a recommendation to dismiss you from the Public Service, and in that case all past transgressions will be taken into account.

I am also further to state that, entertaining these views, Mr. Secretary Holroyd considers that it would be to the advantage of the Public Service that you should be removed to another branch, and offers you the situation of Station-master at Picton, an office of equal value with the one which you now hold.

I have, &c.,
R. MOODY,
Chief Clerk.

No. 18.

MR. J. B. GOOLD to THE CHIEF CLERK, RAILWAY DEPARTMENT.

Regent-street, Newtown,
15 June, 1864.

SIR,

I have the honor to acknowledge the receipt of your letter of date the 14th instant, notifying the withdrawal of my suspension from the office of Storekeeper to the Railway Department, by the Honorable the Secretary for Public Works, and offering me instead the situation of Station-master at Picton, and in reply beg leave to accept same, and to hold myself prepared to enter on the duties.

I have, &c.,
JOHN B. GOOLD.

No. 19.

MINUTES OF THE CHIEF CLERK, RAILWAY DEPARTMENT, AND COMMISSIONER FOR RAILWAYS.

PERHAPS under these circumstances Mr. Goold should be at once placed under the Traffic Manager, for the purpose of a few days training, preparatory to taking charge at Picton; arrangements can be made without any difficulty to relieve Mr. Fielding at once for Sydney, if necessary.

R.M., 16/6/64.

SUBMITTED.—I think Mr. Goold should remain at the store for a few days to assist Mr. Fielding in undertaking his new duties. Mr. Goold might then be placed under Mr. Owen and the Accountant, until he understands the traffic forms and station books, before proceeding to Picton. Mr. Owen can in the meantime provide for the station at Picton temporarily.

J.R., 16/6/64.

Approved.—A.T.H., 16/6/64.

No. 3.—

No. 3.—Mr. Goold, Station-master, Mittagong, refusing to obey an order from the Accountant.

SCHEDULE.

NO.	PAGE.
1. Accountant, asking Mr. Goold to explain why he did not include a payment by Russell & Co., in his remittance-note. 12 August, 1867	30
2. Mr. Goold, stating there was no error. 12 August, 1867	30
3. Accountant, asking Mr. Goold if he refuses to obey instructions. 13 August, 1867.....	30
4. Commissioner's Minute—Mr. Goold to explain. 15 August, 1867	30
5. Mr. Goold's explanation. 17 August, 1867	31
6. Accountant, stating that Mr. Goold's explanation is not reconcilable with his former remarks. 22 August, 1867.....	31

No. 1.

THE ACCOUNTANT to MR. J. B. GOOLD.

THE Station-master at Mittagong Station will please explain why he neglected to include in his remittance-note of 10th August, the amount of £90 18s., received from Messrs. P. N. Russell & Co., in payment of account against Mr. Faviell for July, and which he was requested by the Accountant to do, by a memorandum forwarded to the Station-master in the remittance-bag, on Saturday last?

He will also explain why Mr. Mackenzie's voucher for salary has not been returned duly completed.

A. ASHDOWN,
Accountant,
12/8/67.

No. 2.

MR. J. B. GOOLD to THE ACCOUNTANT.

THERE is no neglect whatever. The proper course, as per Audit Clerk, is to pay in any moneys received at Sydney to the credit of the station, the remittance-note setting forth the actual amount remitted by the Station-master.

J. B. GOOLD, 12/8/67.

Mr. Mackenzie's voucher has been returned to the Manager.—J. B. GOOLD, 12/8/67.

No. 3.

THE ACCOUNTANT to MR. J. B. GOOLD.

THE Accountant to inquire whether Mr. Goold wishes him to infer, from the reply given in this memo., that Mr. Goold refuses to obey the instructions of the Accountant?

J.B., 13/8/67.

MEMO.

Station-master, Mittagong,—From the tenor of Mr. Goold's replies to inquiries of yesterday, the Accountant understands that the Station-master at Mittagong refuses to carry out his instructions, and he will be reported accordingly.—A. ASHDOWN, Accountant, 13/8/67.

No. 4.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

THE Station-master at Nattai must state how it is that he has not complied with the requirements of the Accountant, to whom he must at all times consider himself responsible in matters connected with the accounts?

J.B., 15/8/67.

Mr. Owen.—R.M., 15/8/67.

No. 5.

31

No. 5.

MR. J. B. GOOLD'S EXPLANATION.

I ENCLOSE Audit Clerk's memo. of 18th ultimo, in reference to a similar entry as the present; and having no intimation that the system thereby laid down had been or was about to be altered, I was under the impression the effect of the Accountant's memo. was to enter up the amount in the usual manner.

It will thus be seen that it was solely a misconception of the Accountant's views in making an entire alteration of the former system, and not anything in the slightest degree approaching to an intentional refusal on my part to comply with his instructions.

I should exceedingly regret that any act of mine would even lead to such a supposition, as it has been my most earnest desire at all times to carry out, to the best of my ability, whatever instructions may have been issued to me by my superiors.

The Manager.

J. B. GOOLD, 17/8/67.

To the Commissioner.—E. OWEN, 19/8/67.

Accountant.—J.B., 21/8/67.

[Enclosure.]

Government Railways,
18 July, 1867.

Memorandum to Mittagong.

M. Faviell's account for May, 1867, £21 14s. 8d., has been paid, as per advice-note from Accountant. Enter same in books accordingly, and take credit in next account ct. credit.

D.V.

No. 6.

THE ACCOUNTANT ON MR. J. B. GOOLD'S EXPLANATION.

THE Accountant's instructions to Mr. Goold on 10th instant, were, he conceives, sufficiently explicit to prevent any misconception to persons of ordinary intelligence; and the neglect to carry them out, without making any explanation, and the replies given when such explanation was asked for, is hardly reconcilable with the remarks above expressed by Mr. Goold.

A. ASHDOWN, Accountant,
22/8/67.

Seen.—J.B., 24/8/67.

No. 4.—Mr. Ogilvie's complaint against Mr. Goold, Station-master, Penrith, for incivility,—Mr. Ogilvie having been carried by Train beyond his intended destination.

SCHEDULE.

NO.	PAGE.

2. Mr. Goold's explanation. 24 January, 1870	32
3. Commissioner's minute, reprimanding Mr. Goold, and warning him that dismissal will follow a repetition of such conduct. 25 January, 1870	33
4. Letter to Mr. Ogilvie, informing him that Mr. Goold had been reprimanded. 29 January, 1870	33

No. 1.

EDWARD OGILVIE, Esq., M.L.C., to THE SECRETARY FOR PUBLIC WORKS.

Edgecliff House, 15 December, 1869.

SIR,

Referring to the subject of my yesterday's interview with you, and complaint of the offensive conduct of the Station-master at the Penrith Railway Station, I now commit to writing, in as concise a form as I am able, the principal facts and circumstances of the misconduct of which I complain:

On Monday, the 6th instant, I took, at the Redfern Station, a return ticket to Parramatta by the 9 a.m. train. Not having travelled on this line previously, except once about five years ago, I do not know the stations by sight, and depended upon having the names called by the Railway servants; and I did not become aware that the train had reached and passed Parramatta till I found myself at Rooty Hill.

I

I then called the guard, and made a formal complaint that "Parramatta" had not been audibly called, and asked him for information as to the means for getting back to Parramatta, or over to Greystanes, which was my destination for the day. The guard advised me to go on to Penrith Station, and apply to the Station-master there. Arrived at Penrith, I sought the Station-master, stated my case, and asked if he could tell me of any means by which I might get over to Greystanes, or back to Parramatta, where my friend, who was to meet me with his buggy, would be waiting for me.

To my surprise the Station-master, instead of evincing sorrow for the unpleasant position in which I was placed, and making at least a show of some desire to assist me, very coolly told me that he had heard about it from the guard, and that the Parramatta Station had been properly called.

I told him that it had not been called in such a way that a stranger to the line like myself could hear it, when the Station-master, in the most offensive tone, replied it was not likely that I was such a stranger that I did not know Parramatta Station. I asked him if he meant to assume that I was saying that which was not the fact, when he merely repeated his offensive words in an equally offensive tone and manner, and insisted upon my paying the "through fare." I declined to do this, and told him that I should bring his conduct under the notice of the Secretary for Works as impertinent and offensive; and I resumed my seat in the train, saying that as I had been brought where I was, through the fault of the Railway servants, I should remain in the train till I could be taken back.

In the most peremptory and offensive manner I was ordered by the Station-master to pay a "through fare," or quit the train, on pain of forcible expulsion; and this threat was repeated several times, though I told him that I was entitled to travel free, if I chose to do so; and when, after I had given him my name and address, and informed him that I was a Member of the Legislative Council, he in no degree abated the offensive nature of his language and manner, and still insisted upon my quitting the carriage, only giving up the point when he found that I was not to be intimidated into submission, saying to the men who he had brought to the carriage-door, apparently for the purpose of removing me, "He's a Member of Council, and entitled to travel free"; he then walked away, but without a single word or gesture of apology for the rudeness with which I had been treated.

On my return through the station later in the day, thinking that the man's temper might have carried him away, and that after having time to cool he might desire to apologize, I took care to show myself in the train, but though the Station-master saw, he did not approach me, and I have thought it my duty to bring the matter under your notice, as I conceive that such conduct in a servant of the public should not be allowed to pass unnoticed or unproved.

With reference to the minor matter of the insufficiently audible calling of the name at the Parramatta Station, I may mention that, of six persons who were in the same carriage with myself at the time of my complaining to the guard, one only had heard the name called, and he was a constant traveller upon the line.

I have, &c.,
EDWD. D. OGILVIE.

Traffic Manager—(Mr. Moody)—for Mr. Goold's report.—C.A.G., 18/1/70.
Station-master, Penrith, for report (Reg. 36, 39)—R.M., 20/1/70.

No. 2.

MR. J. B. GOOLD'S EXPLANATION.

ON arrival of the 9 a.m. train from Sydney on the date mentioned, the guard Kingston reported to me that a first-class passenger was over-carried from Parramatta, Kingston stating, at the same time, that at Parramatta the station was called out at each carriage in the usual manner.

I immediately waited on the gentleman. He complained that Parramatta Station was not called, when I told him of the guard's statement to me, but as there appeared to be some mistake I would see him passed back free to Parramatta by the return train at 4.35 p.m.

He did not seem inclined to remain at Penrith during the interval, and stated he would proceed further on the line. I inquired of him how far he intended to go, as he would have to pay his fare for the extra distance beyond Penrith; he not only refused to say how far he intended to go but also said he would not pay.

I pointed out to him our instructions were very particular as to passengers travelling—that none could be allowed to do so without paying their fare at first, or producing a free pass. He still refused, and I then informed him that by paying now, if he represented on arrival in Sydney to the Manager his being so charged it was in the power of the Manager to have his money refunded. He still even refused, when as a last resource I told him the course adopted by him would compel us, though reluctantly, to cause his removal from the carriage. He then ejaculated, "Oh, I need not pay at all; I am a Member of the Legislative Council." I requested him to be good enough to let me see his Member's card; he did not produce it. I requested his address, and provided a sheet of note-paper to take it on; he then gave it. I had no personal knowledge of Mr. Ogilvie, nor the guard, or anyone at the station, so that I had, in the absence of his Member's card, to consult the almanac. Finding his name on the list of Members of the Legislative Council I returned from the office into the carriage, informed him he was of course entitled to travel free—that he need not have taken a ticket even at Sydney for Parramatta;—and I regretted he did not state as much in the first instance, as it would have prevented any discussion whatever, and I instructed the guard to pass him free accordingly.

I should exceedingly regret that in either tone or expression anything would have occurred to cause him the slightest pain, for I had not the most remote idea or intention of saying or doing anything insulting or offensive; and though it may not be agreeable to passengers to be questioned, yet it often becomes imperative on us to do so, for there have been several instances here where even first-class passengers, on being over-carried from other stations, have tried to take advantage of the mountain trip free of expense, by their being so carried in the first instance beyond their destination through some mistake

mistake or negligence by some person or other. They may consider we are misdoubting them, and they feel indignant; at the same time it ought to be considered that the officers of the Railway Department are in duty bound to protect the revenue.

In this matter I have only endeavoured to perform my duty; and if in so doing anything occurred which appeared to Mr. Ogilvie in the slightest displeasing, I have to express my regret for any such occurrence.

J. B. GOOLD, 24/1/70.

To Commissioner,—I enclose Station-master's report on Mr. Ogilvie's complaint. If Mr. Goold had confined himself to a simple apology, I should have recommended the Commissioner to take such apology into his favourable consideration; but as the report is a general denial of the statement made by Mr. Ogilvie, I must leave the matter entirely in the Commissioner's hands.—R.M., 25/1/70.

No. 3.

MINUTE OF THE SECRETARY FOR PUBLIC WORKS.

Mr. Ogilvie's complaint against Mr. Goold, Station-master at Penrith.

ON comparing Mr. Ogilvie's letter with Mr. Goold's report there does not appear to me to be a very material difference in their respective statements of what took place. Mr. Goold's remark to Mr. Ogilvie that it was not likely that he, Mr. Ogilvie, was such a stranger that he did not know Parramatta Station, was most uncalled for and offensive, and Mr. Goold deserves to be and is severely reprimanded for making use of such an improper observation.

In other respects Mr. Goold's actions appear to have been in strict accordance with his instructions; but it is easy to understand that instructions, however comprehensive, may be rendered imperfect if observed in the *letter*, only to be broken in the *spirit*. Station-masters in carrying out their instructions are to do so with firmness, but at the same time with a respectful manner, giving offence necessarily to no one. On this occasion Mr. Goold succeeded in imparting to all he said and did an air of incivility and intolerance most unwarrantable; and I warn him that a repetition of such conduct will compel me to take very severe measures, to put an end to behaviour which is alike annoying to the public and discreditable to the department.

JOHN SUTHERLAND, 25/1/70.

Traffic Manager will please forward this to Mr. Goold.—C.A.G., B.C., 29/1/70.

To be returned. Station-master, Penrith, to see.—R.M., 29/1/70.

Seen.—J. B. GOOLD, 31/1/70.

Chief Clerk.—R.M., 2/2/70.

Copy to be sent to Mr. Ogilvie.—Wrote Mr. Ogilvie, 29/1/70.

No. 4.

THE COMMISSIONER FOR RAILWAYS TO THE HON. E. D. OGILVIE, M.L.C.

Department of Public Works,
Railway Branch,
29 January, 1870.

SIR,

In reference to your letter of the 15th December last, preferring a complaint against Mr. Goold, Station-master at Penrith, for impertinence towards yourself, on the occasion of your being carried by accident to his station, instead of Parramatta, I have the honor to inform you that I have caused inquiry to be made into this matter, and the result is that I have reprimanded Mr. Goold in terms which, I trust, will satisfy you, and prevent a repetition of his misconduct.

Enclósed is a copy of my minute.

I have, &c.,
JOHN RAE,
For the Commissioner for Railways.

No. 5.—Traffic Manager, complaining of Mr. Goold, Station-master, Wallerawang, being insubordinate, by his persistent evasive answers, when asked to give a reason for not supplying his men with rule-books.

SCHEDULE.

NO.	PAGE.
1. Watchman Warren, reporting Porter McCabe drunk and abusive. 23 May, 1870.....	34
2. Evidence taken as to whether McCabe was drunk or not. 27 May, 1870	35
3. Porter McCabe denying the charge. 26 May, 1870	35
4. Mr. Goold, complaining of Watchman Warren neglecting to close the Mudgee Road Gate. 9 June, 1870	36
5. Porter McCabe, reporting Watchman Warren using disrespectful language in reference to Mr. Goold. 27 June, 1870	36
6. Minute of Traffic Manager, reprimanding Warren for making a false charge. Mr. Goold to report why Warren was not supplied with book of rules. 20 June, 1870	38

No. 1.

MR. W. WARREN TO THE TRAFFIC MANAGER.

Wallerawang, 23 May, 1870.

SIR,

On Thursday night, between 11:30 and 12, during the time train was waiting for transit, Porter M'Cabe came to station under the influence of intoxicating drink, and in the hearing of gentlemen passengers made statements defamatory to my character; he was very noisy. I requested M'Cabe to go home and go to bed; he turned upon me and said, "You; you are a ruffian, and I do not consider you fit to clean my boots"; he provoked me very much; I was compelled to put him out of waiting-room, and requested him to leave the platform.

Porter M'Cabe has indulged in these offensive speculations previously, but I have overlooked it. I demanded Porter M'Cabe's authority for speaking of me in such a way as he had done; he stated that Mr. Stiles had told him. I have communicated with Mr. Stiles; he denies the truth of M'Cabe's statements. I herewith enclose the correspondence. I do not send this with a view to injure any person, but for my own protection, and beg to ask your kindness in order to prevent any further occurrence of the kind.

I have, &c.,

W. T. WARREN.

Mr. W. Warren to Mr. Stiles.

Wallerawang, 19 May, 1872.

Sir,

I am informed by Porter M'Cabe that you, in the presence of other person or persons, made statements defamatory to my character, and calculated to injure me during the time I was absent from duty—on leave of absence in Sydney,—to the effect that I was a low common fellow, that I was a low cabman, and had been nothing but a common 'bus-driver in Sydney, and that you had ridden on my 'bus; also, that I was charged with stealing a pair of fowls; also, that I was charged for stealing pumpkins and melons while on duty at Mount Victoria; that Station-master said he would dismiss me only that he had not a clear proof, and that we (meaning you and him) must give me the benefit of the doubt; that I was a vindictive and dangerous man, and was always reporting to Mr. Moody anything that occurred on the station or the line; and that you would take care to do for me when you arrived in Sydney.

I merely wish to know if such statements came from you, and if such be the case what cause had you to act in such an unkind and unmanly way towards me? Awaiting your reply,

I remain, &c.,

W. T. WARREN.

P.S.—Please reply by return train or post if you wish to save further trouble.

Memorandum to Mr. Warren.

Sydney Station, 21 May, 1870.

Your letter to hand. The accusations contained therein are lies from beginning to end, and have been made for the express purpose of creating a disturbance.

Yours, &c.,

HY. T. C. STILES.

The

The Station-master, Wallerawang,—Is there sufficient proof of the statement made that M'Cabe was under the influence of drink as alleged? If so, was report made to the officer in charge of the station; and if so why was the matter not reported to the Manager in due course? Mr. Goold should have obtained this information to attach to these papers.—R.M., 25/5/70.

To Traffic Manager.—J. B. GOOLD, 27/5/70.

No. 2.

EVIDENCE TAKEN IN COMPLAINT OF WARREN *v.* M'CABE.—27/5/70.

ABOUT 10.50 p.m. on Thursday, the 19th instant, I saw Porter M'Cabe in the hall; he stated he was waiting for a letter by the mail; he did not appear to me to be drunk, or even tipsy; I was not present at any argument between Warren and M'Cabe, nor was any such reported to me.

HENRY MORRIS.

ON the evening of Thursday, the 19th instant, I observed Porter M'Cabe in the gentlemen's waiting-room; he appeared rather talkative, but I did not consider him tipsy, much less being drunk; I was not present at any argument between Warren and M'Cabe.

THOS. MITCHELL.

ON Thursday evening, whilst waiting the arrival of the mail-train, I was present a part of the time when some argument was going on between Warren and M'Cabe; I heard Warren ask M'Cabe to put some statement, which I did not hear, in writing, and M'Cabe refused to do so, but told Warren to write it out, and he (M'Cabe) would sign it; Warren then got paper, when some remark was made by M'Cabe about fowls, at which Warren got angry, and put M'Cabe outside the door of the waiting-room.

Warren accused M'Cabe of being drunk, but M'Cabe did not appear to be so.

J. G. CAVANOUGH.

I WAS present on Thursday night when Warren asked M'Cabe to put some statement in writing, which M'Cabe refused to do; but M'Cabe told Warren if he (Warren) would write it he (M'Cabe) would dictate it and then sign it; Warren then went and got paper ready to write, and M'Cabe then desired Warren to write, "That when he (Warren) was at Mount Victoria he bought a pair of fowls for 7s. 6d."—when Warren said he did not want that in the statement; M'Cabe replied he would begin at the beginning, on which Warren made answer: "I am in charge here; you, (addressing M'Cabe) are not fit to be in the place; you are drunk," and then ordered him outside, and closed the door on him.

I did not consider M'Cabe drunk or tipsy at the time.

WILLIAM ATWILL.

Seen.—W. T. WARREN, 30/6/70.

No. 3.

MR. R. M'CABE to MR. J. B. GOOLD.

Wallerawang Station,
26 May, 1870.

SIR,

In reference to some charges brought against me by Warren, the night-watchman, I beg to state that the first charge is quite false, which can be proved on oath, if required, by Mitchell, the parcel-porter, and several others, who were there at the time mentioned when I called for some letters, as the mail arrived. I beg also to state that the then acting Station-master, Mr. H. Morris, can confirm this statement.

As regards his second charge, I beg to state that the words used by me to Warren were given as an advice to him, inasmuch as the words used were as follows:—

When he (Warren) first came here he brought with him a dog, who killed some fowls and brought them to the porter's quarters; he (Warren) then and there wanted one of the guards, named Conroy, and I, to assist him to cook the fowls; I made answer and said, "Warren, mind, or you may get into trouble by your dog, as you did in Mount Victoria." He (Warren) then got in a passion, and said, "Ah, ah; my friend Stiles has been telling you something of me; will you be so kind, Mr. M'Cabe, as to put it in writing for me, and I will get him dismissed at once?" I told him I would do nothing of the sort. These words occurred in presence of two porters named Cavanaugh and Atwill, and I believe Mitchell, the porter. Now, Sir, as regards me making use of Mr. Moody's name, I give it my most emphatic denial; the only porter I ever heard make use of that gentleman's name was Warren himself, who says whenever he goes to Sydney that he dines with that gentleman; now, Sir, these words can be proved by every porter at this station I believe.

I am exceedingly sorry to have to trouble you with such a long statement, but in hopes that the truth may come out if properly investigated I have done so.

P.S.—This would not have occurred only through spleen, which also can be proved if necessary.

I have, &c.,

R. M'CABE,

Porter.

EVIDENCE

EVIDENCE ON STATEMENT OF M'CABE *v.* WARREN.—27/5/70.

IN reference to M'Cabe's statement, that my dog killed some fowls when I first came here, and my asking him to assist in cooking it, I heard that my dog did kill one fowl, but that I never thought of cooking it, much less to ask M'Cabe's assistance in doing so.

On the contrary, when M'Cabe saw the dead fowl he asked me why I did not take and cook it. It might lay where it was for twenty years before I would touch it.

W. T. WARREN.

No. 4.

MR. J. B. GOOLD to THE TRAFFIC MANAGER.

Wallerawang Station,
9 June, 1870.

SIR,

At 10 o'clock this evening I found the gate on the Mudgee Road, at the end of the cutting, leading into the station-yard, wide open, thus affording free ingress to cattle or horses to stray on to the line.

Night-watchman Warren has been duly instructed to lock this gate after 6 p.m., when he comes on duty, and by his own admission he has repeatedly neglected to do so.

I am, &c.,
J. B. GOOLD.

Station-master, Wallerawang.—Watchman Warren has shown culpable carelessness in this case and is fined one day's pay. If further neglect of duty is shown his services will have to be dispensed with. Inform.—R.M., 10/6/70.

Warren so informed. On last night he did not attend to open this gate to admit the mail-coach to meet the down mail, and I had to send Mitchell instead. On looking him up I found him in the porter's house, at the far end of the station-yard.—J. B. GOOLD, 11/6/70.

I must have Watchman Warren's explanation of this matter. I presume it is a portion of his every night duty?—R.M., 11/6/70.

Warren is at present in Sydney, as per letter attached. If he is not able to resume his duties immediately the Manager will please send one to take his place.—J. B. GOOLD, 14/6/70.

As I understand the Station-master is very urgently desirous of reducing the expenses of his station, he will thus have the opportunity of supplying Watchman Warren's place by putting M'Cabe to that duty.—R.M., 15/6/70.

I would not entrust so responsible a position as permanent watchman to Porter M'Cabe, being totally unfitted for it; he is far from being up to my estimate of what a porter ought to be.—J. B. GOOLD, 15/6/70.

Station-master, Wallerawang.—He is not likely to be permanent, but if Mr. Goold can spare any one more competent he can do so.—R.M., 16/6/70.

I cannot spare any other to perform this duty and am therefore compelled to place M'Cabe temporarily as watchman.—J. B. GOOLD, 17/6/70.

Memo. to Station-master, Wallerawang.

Traffic Manager's Office,
Sydney, 13 June, 1870.

Mrs. Warren reports that her husband has sprained his ankle and cannot return to his duty.

E.H., *pro* R. MOODY.

Watchman Warren is to return to duty within this week.—R.M., 20/6/70.

Seen. Perhaps the Traffic Manager will be pleased to reconsider his decision as to Warren resuming duty here. The facts contained in this report, coupled with his charge against M'Cabe in minute 70/1,636, which the Traffic Manager has designated malicious, have I regret to say considerably weakened my confidence as to his faithfully discharging his duties here for the future.—J. B. GOOLD, 21/6/70.

Station-master, Wallerawang.—The Station-master, I presume, will have done his duty in obeying directions given, and I do not see what he can have to do with the Manager's duty.—R.M., 22/6/70.

Seen.—J. B. GOOLD, 23/6/70.

No. 5.

MR. J. B. GOOLD to THE TRAFFIC MANAGER.

Wallerawang Station,
27 June, 1870.

SIR,

I enclose report by Porter M'Cabe *versus* Watchman Warren, relative to certain language as set forth therein; also, Watchman Warren's explanation, and the statements of Porters Cavanaugh, Attwill, and the lad Ensor, who were present at the time.

I am, &c.,
J. B. GOOLD.

The

The Station-master, &c., &c.,—

Sir,

I beg to inform you that, at 4 p.m. to-day, when Warren, the watchman, came from Sydney, he made use of the following expressions, viz.:—"I am back again, in spite of the old fellow; he may kiss my ****," meaning the Station-master. Cavanaugh and the sand-boy were present.

25 June, 1870.

Porter M'CABE.

Wallerawang,

26 June, 1870.

Station-master, Wallerawang,—

Sir,

I regret very much to think that you should be again troubled with any reports as far as I am concerned, but as I have been informed that M'Cabe has reported me to you, and your name being referred to in that report, I beg simply to state, in order to prevent any further trouble to you, that the report is false and full of malice. I neither made use of your name in any way, or even did I think of any officer in the department.

Four of us were around the fire, and they, as I considered, were having a joke with me, and in the same spirit I replied, without any meaning, but to our astonishment M'Cabe jumped out of bed, and came out in a most violent state, and tucked up his sleeves, and with violent threats wanted to fight me, and at the same time threatened any b——y b——r who would take my part, but no person even replied to him. Although he called me dreadful names, and tried all he could to excite me to passion, I made him no reply, or took any notice of him, as I had fully made up my mind, previous to leaving Sydney, that nothing that he should do or say should move me to any retaliation; he has continued this course even to-day, and used very bad language to me; but as far as I am concerned I do not wish to trouble the Manager or yourself further in this matter.

I am, &c.,

W. T. WARREN.

Having now read M'Cabe's report, I beg to state that the contents are untrue; I never made use of such language.

The Station-master,—

Sir,

I write to say that from what I heard both Cavanaugh and the sand-boy did not tell you the truth as regards the report I made against Warren. For instance, if you ask Mr. Wearing, the guard, what the sand-boy told him just as the boy was going into your office this afternoon. Mr. Dowling and I were together when Wearing told us that the boy would tell you of the expressions made use of towards you. If you also ask Attwill whether Warren ever said, in his presence, that the next time he would find you looking after him he would give you the waddy; he (Attwill) was also by at what occurred yesterday.

26 June, 1870.

Porter M'CABE.

I most humbly beg to be excused for being so much trouble to you; but I like fair play.

I was in the porter's house yesterday evening, about 5 o'clock p.m., when Cavanaugh said to Warren, by way of a joke, that Warren would not want to go to Sydney for six months—till Christmas; Warren replied, "Wont I"; I then remarked, jokingly, you must not go; whereupon Warren said, "Who will stop me"; I said a second time, continuing the joke, "You must not go—I will stop you"; Warren then said, "Any man who will offer to stop me I will tell him to kiss my ****."

M'Cabe was in the sleeping-room, and having come out suddenly, he threatened to throw Warren out of the house for speaking disrespectfully of the Station-master, to which Warren made no reply. M'Cabe then began to abuse Warren, calling him an old cab-driver. I went outside immediately, and heard no more.

WILLIAM ATTWILL, 26/6/70.

This evening, in the porter's house, some conversation was taking place between Cavanaugh and Warren, in the presence of Attwill and myself; Cavanaugh remarked to Warren he would not go Sydney for six months, when Attwill stated, in a playful way, that he (Attwill) would not let Warren go; Warren then made answer, "They may kiss my ****; I will go when I like."

M'Cabe was in the sleeping-room at this time, and having heard the conversation came out of the room; thinking perhaps the offensive expression was intended for himself, put himself in a fighting attitude, challenged Warren to fight, and called Warren an old bankrupt, and used other abusive terms, and stated he would report him to the Station-master.

JOHN ENSOR, 25/6/70.

Attwill, Ensor, Warren, and I had a conversation this evening, about 5 o'clock; I remarked to Warren it was a fortnight since he went to Sydney, and he would not want to go there again for six months; he made answer, "Who will stop me?" when Attwill replied, in a jocosse manner, "I will"; whereupon Warren used the expression, "They may kiss my ****"; I cannot say to whom Warren intended these words should apply. This occurred in the porter's house, and could be heard by Porter M'Cabe, who was in the sleeping apartment at the time.

J. GEO. CAVANOUGH, 25/6/70.

No. 6.

MINUTE OF THE TRAFFIC MANAGER, REPRIMANDING WARREN.

WATCHMAN WARREN has been severely reprimanded for making a malicious charge against M'Cabe, and must be informed that a similar occurrence will result in his dismissal. Warren would for this have been dismissed, but he states he has not had a book of rules; on this I wish Mr. Goold's report.

R. MOODY.

The Station-master, Wallerawang.

Warren never mentioned to me that he had not one, neither did he apply to me to procure him one; for all I know he might have been furnished with one at some other station before he came here.—J. B. GOOLD, 21/6/70.

See reg. 12-102; also general reg.—first page of book; also copy of general order attached hereto.—R.M., 22/6/70.

Station-master, Wallerawang,—Seen.—J. B. GOOLD, 23/6/70.

Station-master, Wallerawang,—I want to know why regulations have not been complied with?—R.M., 24/6/70.

This question appears to me to be tantamount to a charge; and its being general, in order to enable me to reply thereto, I submit, with very great respect, the Traffic Manager will be pleased to specify the particular regulation or regulations, and also the particular portions thereof which have not been complied with.—J. B. GOOLD, 25/6/70.

No. 7.

THE TRAFFIC MANAGER to MR. J. B. GOOLD.

Warren's complaint against M'Cabe.

I HAVE already pointed out the regulations which, with general order No. 10, should have been sufficient for Mr. Goold to reply to my inquiry as to why he did not, as Station-master, see that his staff were properly instructed, by seeing them supplied with a book of regulations, without anticipating a "charge" which has not been made. I must have a reply to my question, as Mr. Goold's question is no reply.

R.M., 29/6/70.

General order 111 was only received at this station on the 23rd instant, and has been duly complied with.—J. B. GOOLD, 30/6/70.

Station-master, Wallerawang.—The general order No. 10, copy enclosed and forwarded to Mr. Goold, as well as all the other Station-masters at the date, and was seen by me at Penrith; but that has nothing to do with my question. Why were books not furnished to porters on Wallerawang Station? If I do not get proper reply to my question, I must bring the matter at once before the Commissioner.—R.M., 2/7/70.

Rule-books were furnished to such porters as required them immediately on being supplied with same by the Traffic Manager.—J. B. GOOLD, 6/7/70.

This is no answer, but an evasion. These books were only asked for since the question has arisen.—R.M., 7/7/70.

General Order, No. 10.—24th September, 1869.

STATION-MASTERS are informed that it is the intention of the Traffic Manager to inspect stations and to examine the Station-masters and men as to their knowledge of the rules, regulations, &c., provided for their guidance. Station-masters are therefore requested to see that all their men are supplied with the book of rules, &c., so that no excuse may be offered by any one for being ignorant of his duties.

R. MOODY.

No. 8.

THE TRAFFIC MANAGER to THE COMMISSIONER FOR RAILWAYS.

Insubordination of Station-master and men at Wallerawang.

I ENCLOSE papers in reference to the above, some of which I decline to record, but I am compelled to invite the Commissioner's attention to the persistent evasion of the Station-master when called upon to show a reason for not supplying his men with rule-books:

R. MOODY, 7/7/70.

The services of Porter M'Cabe have since been dispensed with, and Watchman Warren has resigned.

No. 9.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

If Mr. Goold does not at once answer in a proper official manner the Traffic Manager's question, which is too plain to be misunderstood, I shall suspend him from duty for insubordination.

J.S., 8/7/70.

Traffic Manager.—C.A.G., 9/7/70.

Station-master, Wallerawang.—R.M., 11/7/70.

Reply enclosed, and forwarded per 1.15 A.M. up-train, 18/7/70.—J. B. GOOLD, 18/7/70.

No. 10.

MR. J. B. GOOLD TO THE TRAFFIC MANAGER.

Wallerawang Station,
16 July, 1870.

SIR,

The correspondence speaks for itself.—R.M.

See regulation 102. Has Station-master complied with this? And does this not clearly point out that Station-master, having the control of his men, must do what is done by every other Station-master—ask for what he needs?

Commissioner must form his own opinion on this.

If so, why need of a threat of suspension, and why so many indirect replies?

This general order cannot supersede the regulations, nor was it intended as more than a reminder to Station-masters that the Manager would have no excuse if he found them wanting. Mr. Goold has been a Station-master some years, and he knows that Station-masters make requisition for everything necessary to open stations, as well as to keep themselves supplied. Mr. Goold made requisition for Wallerawang Station necessaries, but he has certainly never asked for books until this correspondence compelled him to do so.

Station-master has the entire control of his men (regulation 102), and for all the Traffic Manager knew Warren may not have spoken the truth; that was why Mr. Goold was asked to explain.

Regulation 102.

As it is not denied that Warren only got his book subsequently, his receipt proves nothing. The Commissioner must be the judge of this as to whether it is evasive.

And this must be read with 102 and 105, as part of the Station-masters' duties.

I have the honor to acknowledge the Commissioner's minute of 8th instant (70/2426), received on the 12th, with enclosures, in which I am charged by the Traffic Manager with evasion, and to which charge I most respectfully submit I am not amenable.

To the Traffic Manager's minute of 7/7, inviting the Commissioner's attention to the "persistent evasion of the Station-master when called upon to show a cause for not supplying his men with rule-books"—I beg leave to reply,—“No rule-books were supplied to me by the Traffic Manager for such purpose previous to this correspondence, and as soon as he supplied them I gave them at once to such men as required them.”

This I beg leave to submit is a correct and valid reply, and in no way evasive, as “I could not deliver what I had not previously received;” and had the Traffic Manager intimated in the first instance that his question was intended to apply to these rule-books being supplied before this correspondence had arisen, and which I now, for the first time, glean from his minute also of 7/7, viz., “These books were only asked for since the question has arisen,” I would have answered his question as above without the slightest hesitation, for I could give none other.

The Commissioner's attention is now most respectfully invited to the dates of the Traffic Manager's several questions, as I find his first as to rule-books is on the 29th June, to which my reply of the 30th is as follows:—“General Order No. 111 (10) was only received on the 23rd instant, and has been duly complied with.” This I respectfully submit is true to the letter, and not in anywise evasive, in proof of which the Traffic Manager holds my receipt, dated the 24th June, for rule-books delivered to porters Mitchell and M' Cabe, that is to say, five days prior to the date of his question. This receipt is not among enclosures.

As to Warren particularly, he left this station for Sydney on the 11th June, and did not return to duty until the 25th, and, although he informed the Traffic Manager on the 17th instant that he had not a rule-book, yet the Traffic Manager did not give him one, nor even transmit me one to give him, and finding on his return that he was not supplied with one I at once applied for one, which did not come to hand until the 30th, when it was delivered.

It was therefore no fault of mine that Warren had not been supplied before the date of the Traffic Manager's question of the 29th. The receipt for Warren's rule-book is also not among enclosures.

My reply of the 6th instant, that “Rule-books were furnished to such porters as required them immediately on being furnished with same by the Traffic Manager,” is, I submit with very great respect, literally true and in no wise evasive, as the missing receipts just alluded to will prove beyond the shadow of a doubt.

Having now gone through the several portions of these papers *seriatim*, relative to the Traffic Manager's charge of evasion, I most respectfully submit that it is hereby completely disproved that there were no just grounds for making such a charge against me; that I never had the slightest intention at any time, or in any way whatever, of giving evasive replies; and that under these circumstances I trust and hope the Commissioner will be pleased to exonerate me from any such imputation.

I would now most respectfully invite the Commissioner's attention to “General Regulations,” first page of rule-book, in which is the following sentence, viz.:—“Every person in the service of the Commissioner shall be provided with a copy of these regulations.” The question naturally arises—“By whom, and at what time, is such person to be provided?”

Certainly; Station-master, as per rules 102 and 105.

Before a man can have his duties allotted to him, station-master should surely see that he is provided with proper instructions—102 and 105.

Warren said so, and the matter was referred for Station-master's explanation.

No other Station-master will deny that it is his duty to keep his men supplied with rule-books, and the neglect of other Station-masters can be no justification in this case. If the Traffic Manager is to be met at all other stations with the obstacles that he meets with at this station, it will be next to impossible to bring about that complete discipline which the rules provide for.

If Station-masters are to keep up this unseemly fire of evasion, the Traffic Manager will need an extra staff of clerks to record nonsense. A positive reply is what should be given, without evasion; and I hope the Commissioner will so signify this as to leave this matter no longer under misapprehension.

General order has nothing to do with this question, but is a mere reminder of regulations, and of necessity of keeping men supplied with rule-books. The copy was merely sent as a reminder, and was taken off the papers by Station-master instead of returning it as part of the papers.

Certainly not.

The new rate-sheet cancels all previous rates, but if anything is required at a station, Station-master applies on requisition for it; this applies to everything, including everything necessary for opening. This is why officers of supposed experience are appointed to open new stations. Mr. Goold was sent to Wallerawang on this account, and, as I said before, did make his requisition, and all he applied for was supplied; indeed, he has always prided himself on being the only officer who knew how to requisition for opening a new station.

I submit, with very great respect (the word *shall* being imperative), it must be by the Traffic Manager, as head of the department, either directly or through one of his officers, and when such person first enters the Commissioner's service; for it cannot be supposed that men would be in the Service for months without being provided with the necessary rules for their guidance.

Now, Warren had an interview with the Traffic Manager on the 17th June, when the Traffic Manager became cognizant of the fact that he (Warren) had no rule-book (see minute to that effect), yet he was permitted to resume his duty by the Traffic Manager without being supplied with one by the Traffic Manager himself, or through Warren's immediate superior.

Warren first entered the Commissioner's service in January last, so that on the 17th June the Traffic Manager was aware that Warren was in the Commissioner's service for months previous without being supplied with a rule-book, and with this personal knowledge he did not then supply one, until my application of the 25th, on which day I learned from Warren that he never had one, so that I have promptly complied in every instance with general order No. 10, which I only received at this station, as shown in these papers, on the 23rd of June last.

I now beg leave to furnish the following information, which I am inclined to think is among the papers not included in these enclosures, and is in the possession of the Traffic Manager, viz. :—

“Porter Mitchell first entered the Commissioner's service in November or December last, at the Sydney Station, and was not supplied with a rule-book then.”

“Porter M'Cabe first at Mount Victoria, then at Bowenfells, and was not supplied with a rule-book at either station.”

“Watchman Warren first entered the Commissioner's service in January last, at Mount Victoria, and was not supplied with a rule-book at that station.”

“Gatekeeper Beatty was also employed at Bowenfells for some four months before coming here on the 1st instant, and was not supplied with a rule-book at that station.”

“Porter Skinner, here only for a few days, was also employed at Bowenfells for some months, and was not supplied with a rule-book at that station.”

Such being the case, it is quite evident the officers in charge of the stations just mentioned (Messrs. Carlisle, Higgs, Middleton, and Norman) have omitted to comply with general order No. 10, whilst I, on the contrary, promptly obeyed it as soon as I had received it at this station, viz., on the 23rd June, as already proved by the missing receipts in the Traffic Manager's custody.

It is quite true a copy of this general order No. 10 was furnished to me when Station-master at Penrith, and there it still remains as a record for that station; but it cannot be supposed that it could apply to this (Wallerawang) station, which was not open for traffic for six months subsequent; and it is to be presumed that on this ground the Traffic Manager concedes this point in his minute of 2/7, wherein he states, “The general order, No. 10, enclosed, was forwarded to Mr. Goold, as well as all other Station-masters, at the date, and was seen by me at Penrith, but that has nothing to do with my question,”—because all orders should be issued *de novo* to a newly-opened station,—in the same way as the usual proclamation for the collection of tolls and the general conduct of the traffic at such newly-opened station.

Assuming therefore that this view is correct, I submit, with very great respect, the logical conclusion necessarily follows of the Traffic Manager having omitted to perform the functions imposed on him by his position as Traffic Manager, in not furnishing to this station copies of such orders on its being opened for traffic in March last, and particularly as to general order No. 10, which was not furnished until the 23rd June subsequent.

I will now, with the Commissioner's permission, enter on the subject of “Insubordination among the men at the Wallerawang Station” as stated by the Traffic Manager, and, in the first place, I regret to observe that the most important document connected with this matter is not among enclosures; how it has been left out is not for me to say. I append a copy on pages 24 and 27, from which I shall have to quote largely, in order that this question of insubordination should be clearly defined and thoroughly explained.

On

Station-master was informed of this the day after my minute was written. I could not deal with the matter unless by a journey to Wallerawang for the purpose; it was therefore left over for a proper opportunity, but as Warren in the meantime came to Sydney, and was absent through an accident, I could not therefore decide upon this without Warren's presence.

Mr. Goold certainly kept his benevolent intention out of sight.

Is this the kind of language to use if it was sought to convey to the Traffic Manager the benevolent intention now put forward?

If Mr. Goold is to be permitted to treat the Traffic Manager's office with that flippancy which is so apparent throughout this correspondence, and which is characteristic of his whole career in the Service, as disclosed by the papers of the department, then the Traffic department will never obtain that degree of efficiency and respect which it is fast gaining at every other station, but which would inevitably vanish.—R.M., 19/7/70.

On the 23rd May, Warren makes a charge against M'Cabe of being under the influence of drink on the night of the 19th. Evidence was taken, the charge disproved, which charge was pronounced by the Traffic Manager "malicious," and this decision was only communicated to me as Station-master on the 20th June, a month after the occurrence had taken place; and during all this time there is nothing in these papers to show that the Traffic Manager had brought this matter officially under the notice of the Commissioner.

An ill-feeling having thus been created between Warren and M'Cabe by Warren's complaint, and Warren having been fined in the meantime by the Traffic Manager for neglect of duty, as shown in appended copy, pages 23 to 27, which also contains a second charge for neglect against him, I was compelled, as a matter of duty, on the Traffic Manager's minute of 20th June, that "Watchman Warren is to return to duty within this week," to write as follows on the 21st, viz.:—"Seen. Perhaps the Traffic Manager will be pleased to reconsider his decision as to Warren resuming duty here. The facts contained in this report, coupled with his charge against M'Cabe in minute 70/1636, which the Traffic Manager designates 'malicious,' have, I regret to say, considerably weakened my confidence as to his faithfully discharging his duties here for the future."

On this the Traffic Manager writes on the 24th,—“The Station-master will, I presume, have done his duty in obeying directions given. I do not see what he can have to do with the Manager's duty.”

Warren was therefore continued at this station, as also M'Cabe, both residing under the same roof (the porter's house), though it is quite evident, I submit with very great respect, the intention of my minute of 21/6, just quoted, was to have them separated by removing Warren to some other station, and thus crush *in limine* the incipient germs of insubordination.

Still, anticipating an explosion would take place, and which I was most solicitous should be prevented, I submitted to the Traffic Manager, as shown in appended copy, pages 28, 29, "That M'Cabe's services could be dispensed with on the ground of retrenchment," so as to have Warren and M'Cabe separated.

The Traffic Manager, notwithstanding, continued his services here up to the 30th June, and in the meantime, on the very evening of Warren's resuming duty, on the 25th, the anticipated explosion took place in the porter's house, the particulars of which are given, and to which I need not further refer.

I now submit, with very great respect, that during the course of these proceedings I took the most effectual steps, had they been adopted, to prevent anything approaching in the slightest degree to insubordination, by having Warren and M'Cabe separated; but whether the action of the Traffic Manager in retaining both at this station might be deemed to have any tendency, directly or indirectly, to promote the insubordination of which he now complains, is a matter solely for the Commissioner's consideration.

I now conclude with the hope and trust that this my explanation of the various matters referred to herein will be deemed satisfactory; but should the Commissioner be pleased to cause my suspension from duty, I most respectfully request that I may be accorded the privilege usually granted to all officers of the Civil Service when placed under suspension, viz.:—The right of appeal to His Excellency the Governor and the Executive Council.

I have, &c.,
J. B. GOOLD.

No order-book has been supplied yet to this station for this purpose. As soon as one is furnished by the Traffic Manager the rule will be complied with.—J. B. GOOLD, 6/7/70.

Station-master, Wallerawang,—Has one ever been applied for?—R.M., 7/7/70.

No. I never had instructions to that effect, neither do I see anything in the regulations making it imperative on Station-masters to apply for such; on the contrary, it appears to me, that on the first opening of a station they should have been supplied by the head of the department, without being asked for; such appears to me to be the general scope and tenor of the regulations. As, however, the Traffic Manager would seem to imply it is necessary for the proper conduct of business that an order-book be kept, he will please supply one for that purpose.—J. B. GOOLD, 9/7/70.

No. 6.—Mr. Goold, writing an offensive Minute with reference to his application to have a cask of Ale, for his own use, carried free by Rail.

SCHEDULE.

NO.		PAGE.
1.	Mr. Goold, inquiring if cask of ale will be carried free. 28 July, 1870	42
2.	Commissioner's minute. Mr. Goold will be dismissed if he persists in such offensive conduct. 8 August, 1870.....	43

J. B. GOOLD.

Will the Traffic Manager please say if this O.C. will be allowed, being Station-master's supplies, and as a precedent for the future?—J.B.G., 28/7/70.

I cannot construe this as mere food and submit for Commissioner's instructions.—R.M., 29/7/70.

Chief Clerk,—Cannot be carried free.—J.S., 1/8/70.

Traffic Manager.—C.A.G., B.C., 2/8/70.

Mr. Goold.—R.M., 2/8/70.

Seen. To the Commissioner's ruling I am in duty bound to submit with all due deference, though the Traffic Manager, not being a medical man, much less my medical adviser, can scarcely be considered a competent authority as to what may be deemed food for my constitution.—J. B. GOOLD, 3/8/70.

To Commissioner.—R.M., 4/8/70.

On what date did the Commissioner's minute, respecting Mr. Goold's conduct, leave this office?—C.A.G., 6/8/70.

M.P., 70/2787, left office 3/8/70.—G.B.

No. 2.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

THE above minute of Mr. Goold's supplies another instance of his offensive and insubordinate conduct; but as it appears it was written before my minute of the 28/7/70, commenting upon his general character for insubordination, reached his hands, I will not take further action in the matter, except to warn Mr. Goold that if after he has read my minute referred to he persists in the course of conduct which necessitated it, he will certainly be removed from the Public Service.

See paper No.
in Schedule 8.

J.S., 8/8/70.

Traffic Manager.—C.A.G., B.C., 10/8/70.
Station-master, Wallerawang, to see.—R.M., 11/8/70.
Seen.—J.B.G., 12/8/70.

No. 7.—Mr. Goold, requesting passes by Rail to procure supplies, and to have an investigation into conduct of certain parties furnishing information published in the *Empire* paper of 26th August, 1861.

SCHEDULE.

NO.	PAGE.
1. Mr. Goold, applying for a pass by Rail to procure supplies. 27 June, 1870	43
2. Do. do. on service to institute inquiry as to the party who furnished the secrets of the Railway Department to the <i>Empire</i> paper in 1861. 4 July, 1870	45
3. Commissioner's minute—Mr. Goold to state his charge without evasion, &c. 16 July, 1870	45
4. Mr. Goold's explanation. 23 July, 1870	45
5. Commissioner's minute—severely reprimanding Mr. Goold for his offensive and insubordinate conduct, and threatening him with dismissal. 28 July, 1870	46

No. 1.

MR. J. B. GOOLD'S APPLICATION FOR A PASS BY RAIL.

Wallerawang Station, 27 June, 1870.

Memo. to Traffic Manager,—

Will you please grant me a pass to go to Sydney on to-morrow to procure supplies, returning on Wednesday?

J. B. GOOLD.

Manager is up the line and will not return till late;—what other day will suit?—E. HERALD, 27/6/70.
From the 6th to the 7th July instant.—J. B. GOOLD, 1/7/70.
See general order; no pass can be issued.—E.H., *pro* R. MOODY, 4/7/70.

Mr. J. B. Goold to The Traffic Manager.

Wallerawang Station, 5 July, 1870.

Sir,

I have the honor to enclose my application of the 27th ultimo for a pass to Sydney for the purpose of "procuring supplies," and to which the Traffic Manager has been graciously pleased to reply "no pass can be granted." I most respectfully request the Traffic Manager will be good enough to submit this, with the enclosure, as early as possible, to the Commissioner for Railways, for his consideration, as I feel confident the Commissioner would never sanction such a decision as this of the Traffic Manager, which would virtually have the effect of subjecting me to the slow, lingering, and torturing process of perishing in the bush with cold and starvation.

I am, &c.,
J. B. GOOLD.

(70/2424.)

Government Railways.—Minute-paper.

The Traffic Manager to The Commissioner for Railways.

MR. GOOLD'S application for a pass was refused in consequence of recent instructions to discontinue the practice of giving passes to Station-masters, &c. I am sure the Commissioner never did intend to carry out the "torturing process" by leaving any one to "perish in the bush of cold and hunger," nor do I think that such a catastrophe is likely to arise in consequence of the withdrawal of passes (except on service or for medical advice). I am unable to justify the issue of passes, as although I found it the practice I can find

find no authority for it, and if it is to be done in one case I submit that it be made general by proper authority. Mr. Goold has not mentioned that he was up at Sydney very recently on a month's leave, and subsequently to his application to come up "to get supplies" he has applied for a pass "on service," but as the nature of the "service" was not stated I have returned it for such information.

R. MOODY, 6/7/70.

Is it absolutely necessary for Mr. Goold to come to Sydney for supplies, and what is the regulation in such cases?—J.S., 13/7/70.

Mr. Goold says it is. There is no regulation; but it has been the practice to give passes until I received recent instructions not to issue. The only regulation for free travelling that I can learn has reference to removals.—R.M., 14/7/70.

Wallerawang Station,
11 July, 1870.

Memo. to Traffic Manager,—

Will the Traffic Manager be so good as to inform me by this evening train whether in accordance with the principle contained in rule 26 he has yet submitted to the Commissioner my letter of the 5th instant, which was forwarded by the mail train on the morning of the 6th, relative to a pass to proceed to Sydney to "procure supplies"; and, if so, the decision of the Commissioner in reference thereto.

J. B. GOOLD.

Yes; both applications have been submitted; no decision yet received.—R.M., 11/7/70.
Seen.—J. B. GOOLD, 11/7/70.

Mr. J. B. Goold to the Traffic Manager.

Wallerawang Station,
12 July, 1870.

Sir,

Permit me to request the Traffic Manager will again be so good as to invite the Commissioner's attention to my letter of the 5th instant, relative to my application of the 27th ult., for a pass (permission) to proceed to Sydney to procure supplies, as it is utterly impossible that I can exist, unless allowed the opportunity of providing clothing,—my boots at the present moment being nearly worn off my feet.

I am, &c.,
J. B. GOOLD.

Chief Clerk.—R.M., 13/7/70.

Will Mr. Moody please return papers on which Mr. Goold applied for a free pass on service?—C.A.G., B.C., 13/7/70.

Mr. Goold; be good enough to return.—R.M., 14/7/70.

Permit me to correct a slight inaccuracy in the heading of this minute (70/2509), as to a free pass. I have not asked for a free pass, but a pass, which means permission. If granted free, so much the better; if not granted free, of course I am prepared to pay my fare as any ordinary passenger. The other papers referred to are enclosed.—J. B. GOOLD, 14/7/70.

Chief Clerk.—R.M., 15/7/70.

If Mr. Goold wishes leave of absence to come to Sydney, he should make application to that effect to the Traffic Manager; but his present application is for a "pass"; and "passes," unless in exceptional cases, are not now allowed.—J.S., 19/7/70.

Traffic Manager.—C.A.G., 22/7/70.

To note and return.—E.H., *pro* R. MOODY, 23/7/70.

To Wallerawang Station,—Seen. Reply herewith.—J. B. GOOLD, 25/7/70.

Mr. J. B. Goold to The Traffic Manager.

Wallerawang Station,
25 July, 1870.

Sir,

In reference to the pass mentioned in the enclosed minutes of Commissioner—2424 of 7/7/70, and 2509 of 13/7/70—which only came to hand at 11:30 p.m. on the 23rd instant, I beg leave to state, my application for this pass was made on the 27th June, and might have been granted in accordance with the practice then existing, as having been made prior to the new regulations, which were not to come into operation until the 1st July instant.

It is quite true I had a month's leave of absence, but it was under "Medical certificate" for "ill health." This fact the Traffic Manager has omitted to note in his minute of 6/7.

This leave of absence expired on the 19th of May last, on which evening I arrived in Sydney on my return to duty, which I resumed on the day after, viz., the 20th. This also the Traffic Manager is perfectly aware of; and from that day, the 20th of May, up to the present (now over two months) I have not been in Sydney, or in any place else, away from this station.

I am, &c.,
J. B. GOOLD.

This appears to be a renewal of Mr. Goold's application for a pass. A pass, as Mr. Goold has already been informed, cannot be allowed. Mr. Goold can have leave of absence to come to Sydney if he makes application to Traffic Manager as informed.—J.S., 27/7/70.

Traffic Manager.—C.A.G., B.C., 28/7/70.

Station-master, Wallerawang.—E.H., *pro* R. MOODY, 28/7/70.

Seen.—J. B. GOOLD, 29/17/70.

Returned to Chief Clerk.—R.M., 1/8/70.

45

No. 2.

(70/2425.)

MR. J. B. GOOLD to THE TRAFFIC MANAGER.

Memo.

Wallerawang Station,
4 July, 1870.

WILL you please grant me a pass to proceed to Sydney on Thursday next, returning on Friday, on service?

J. B. GOOLD.

Station-master, Wallerawang.—What service?—R.M., 5/7/70.

On Commissioner's service. With the view of waiting on the Commissioner and Engineer-in-Chief in reference to a leading article in the *Empire* newspaper of 25 August, 1861, and to institute inquiry as to the party supplying the information contained therein, thereby communicating to the public press the secrets of the Railway Department, contrary to the rules of the Civil Service.—J. B. GOOLD, 6/7/70.

To the Commissioner.—R.M., 7/7/70.

I must say that I fail to see in what way an incident of the kind referred to by Mr. Goold can be effectively dealt with, after a lapse of nine years. At all events, some precise information would be required before I could consent to Mr. Goold leaving duty to aid in investigating what would probably turn out to be, judging from the extremely indefinite nature of Mr. Goold's statement, a mere coinage of the brain.—J.S., 8/7/70.

Traffic Manager.—C.A.G., B.C., 11/7/70.

Station-master, Wallerawang.—R.M., 11/7/70.

If an inquiry is instituted, the result of such inquiry will show whether it is a coinage of the brain or not. It may possibly turn out to have been the primary cause of subsequent various proceedings in the Legislative Assembly, which may be said to continue up to the present time, relative to the importation of railway materials, &c., in which the names of Mr. Whitton and Mr. Fowler are prominently mentioned, and also to it may be possibly traceable the causes which led to the retirement from the Ministry of the day the Honorable W. M. Arnold, Esq., then Secretary for Public Works. A personal examination of Mr. R. Moody, late Chief Clerk to the Railway Department, Mr. W. Hanson, late proprietor of the *Empire*, Mr. Bennett, present proprietor of same, and Mr. J. B. Goold, late Storekeeper, Railway Department, may throw some light on the subject.—J. B. GOOLD, 14/7/70.

Chief Clerk.—R.M., 15/7/70.

No. 3.

(70/2585.)

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

HAVING gone so far as this, Mr. Goold must state in writing explicitly what the charge is he prefers, and against whom that charge is directed.

I cannot permit the character of any officer to be whispered away, as it were, by insinuations and half revelations.

Mr. Goold evidently has a charge to make against some officer of this department, and he must now make the charge distinctly, without evasion or equivocation of any kind.

J.S., 16/7/70.

Traffic Manager, to forward to Mr. Goold.—C.A.G., B.C., 19/7/70.

Mr. Goold, Wallerawang.—E.H., *pro* R. MOODY, 19/7/70.

Reply herewith.—J. B. GOOLD, 23/7/70.

No. 4.

MR. J. B. GOOLD to THE TRAFFIC MANAGER.

Wallerawang Station,
23 July, 1870.

SIR,

I do myself the honor to acknowledge the Commissioner's minute of the 16th instant (70/2585) covering a previous minute of Commissioner (70/2425) received by me on the 19th instant, and in reply beg leave to state I have made no charge; I merely court inquiry into a matter in which I am personally interested.

Such being the case, I may now be permitted to state, for the information of the Commissioner, that "I was personally accused as the party supplying the information referred to in minute 70/2425; that I was subjected to an examination concerning same, by the present Under Secretary for Public Works, then Commissioner for Railways, and the Engineer-in-Chief; that I had no intimation given to me prior to the examination taking place that I was to be so examined; that I had never seen or heard of the article in question until at this examination it was pointed out to me by the Commissioner, and I was in consequence deprived of all opportunity to produce the necessary proofs to rebut it."

These proofs I shall be prepared to produce at the proper time and place.

I was, in consequence of this, looked on with distrust and suspicion; my character, in the words of the Commissioner, was "whispered away," the epithets "spy and detective" were of frequent, I might say daily, occurrence, in connection with my name for years after; and the odium of this transaction is not even yet obliterated, but attaches to me up to the present day.

I therefore submit, with very great respect, that my character, being thus impeached, can only be cleared from this imputation by instituting inquiry into the causes which led to my being so suspended as the party furnishing the information already alluded to.

Recent

Recent circumstances have left the impression on my mind that my services in the Railway Department may be of very short duration, and it is consequently imperatively necessary that before my retirement takes place, I should leave with a character unblemished and unsullied, without even the faintest breath of suspicion attaching to it.

Two of the circumstances I would most respectfully invite the Commissioner's attention to,—

- " 1st. The charge of insubordination brought against me by my immediate superior, the Traffic Manager, in Commissioner's minute 70/2426, on the charges of Warren and McCabe, which I trust I have already rebutted, and proved to be groundless.
- " 2nd. The refusal of the Traffic Manager to grant my application for a pass on the 27th ultimo—that is, permission to absent myself from duty to enable me to proceed to Sydney to procure supplies—the supplies required being clothing, &c., to protect my health against the extreme inclemency of the weather in this almost inhospitable region,—a privilege never yet denied to the lowest paid servant in the Commissioner's service."

See papers marked No. 1 in this Return.

Copies of the correspondence relative to this pass are appended in pages 7 to 10, from which it will be seen I requested my application to be submitted to the Commissioner on the 5th instant; and up to this moment I have not had the honor of being informed whether the Traffic Manager's refusal had been ratified by the Commissioner or not.

These two instances are evident signs that my retirement from the Railway Service is looming in the distance, and I am therefore bound before leaving that no stigma attaches to my character, on which I shall have to depend to earn my daily bread.

I am gratified to learn the Commissioner has decided, in this his minute (70/2585) that "he cannot permit the character of any officer to be whispered away;" and as I am an officer in the Railway Department of twelve years standing, I now claim most respectfully to be entitled to the full benefit of this decision, viz.,—"by instituting the inquiry sought for, to enable me to clear my character from the suspicion which has for a long period impended over it."

I have, &c.,
J. B. GOOLD.

P.S.—The Commissioner's decision, relative to the pass referred to herein, has been received by me this evening at 11:30 p.m., hours after the foregoing reply had been written.—J. B. GOOLD, 23/7/70.

No. 5.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

(70/2787.)

Government Railways.

MR. GOOLD having in his minutes of 6th July and 14th July insinuated that he had some charge to make against an officer of this department, he was called upon to be more explicit, and to state without evasion or equivocation what the charge consisted of, and against whom it was to be brought.

In reply he states, with characteristic evasion, that he makes no charge, but courts inquiry into a matter in which he is, he states, personally concerned, and which took place nearly 10 years ago.

The reason afforded by Mr. Goold for raising the question after this lapse of years is, that circumstances have left the impression on his mind that his services in the Railway Department may be of very short duration, and "it is consequently necessary that he should leave with a character unblemished and unsullied, without even the faintest breath of suspicion attaching to it."

One of the recent circumstances alluded to is that the Traffic Manager has brought under my attention the insubordinate conduct of Mr. Goold—conduct which Mr. Goold has endeavoured to explain away, but entirely without success; and I may assure him that if he continues to act in the offensive and insubordinate manner which has characterized his conduct (not the less insubordinate and offensive because it is cloaked in some instances under a semblance of submissiveness), I shall have no other course to pursue than to recommend his dismissal.

No inquiry is needed as regards Mr. Goold's character, and whether he leave the Service now or at any future time a perusal of the records in his case will show that he has been a very troublesome officer of the department. It would be more creditable to Mr. Goold, and of greater advantage to the department, if he would endeavour to devote himself to his duties, instead of wasting the time of others, by obliging them to deal with such useless matter about which he has written.

J. S., 28/7/70.

Traffic Manager.—C.A.G., B.C., 3/8/70.
Station-master, Wallerawang.—R.M., 3/8/70.

2. Mr. Goold's explanation. 19 November, 1870	47
3. Traffic Manager to Commissioner—Cannot obtain obedience from Mr. Goold to his instructions. 24 November, 1870	47
4. Commissioner, warning him that persistence in such conduct will cause his dismissal. 2 December, 1870	47

No. 1.

REPORT FROM INSPECTOR NORMAN.

Government Railways,
Bowenfels Station,
15 November, 1870.

Memorandum to Traffic Manager.

At Wallerawang Station to-day, during the time the goods-train was shunting, the distance-signal at Sydney end of the yard was lowered to "All right," and as this is in direct opposition to rule 71, I feel bound to make a special report on the subject.

J. NORMAN.

Station-master, Wallerawang, for explanation. When last at Wallerawang I had occasion to call the Station-master's attention to the working of his signals.—R.M., 16/11/70.

No. 2.

MR. GOOLD'S EXPLANATION.

THIS was the only train during the day to arrive, as also on Thursdays and Saturdays; there was therefore no absolute necessity to place the distance-signal at danger, as no train was following up; independent of this, the Sydney end of the yard was protected by the semaphore.

I may add, the supposed time of arrival of the goods-train on these days is at 1:30 p.m., and it is scarcely or ever in then, and very often between 3 and 4 p.m. Being short-handed I have instructed the pointsman to lock the siding-points and lower the distance-signal to admit the goods-train on the through road, so as to employ his time in the goods-shed, instead of waiting the arrival of this train for two or three hours doing nothing.*

With reference to what the Traffic Manager personally observed, I may add that a train standing by the station platform is thoroughly protected without signals at all, being on a loop line, not the main road, so that a train following could not come into collision with it, unless the points were held open to admit it.

J. B. GOOLD, 19/11/70.

Station-master, Wallerawang,—Instead of such useless illogical correspondence I must request Mr. Goold to carry out his duty in accordance with the book of regulations and such orders as he may receive from the Traffic Manager. Mr. Goold cannot possibly know what trains may go into his station, and even if he did know that is no excuse or argument to relax discipline or neglect rules 71, 73, and 74. These rules were made to be observed, and I must have a better excuse before they can be disobeyed.—R.M., 22/11/70.

Seen.—J. B. GOOLD, 23/11/70.

* What is rule 73 for?—R.M.

No. 3.

THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

As I find it next to impossible to obtain that ready obedience to my instructions which the public safety demands, I forward this correspondence to the Commissioner that he may see the difficulties we have to contend with in dealing with officers, whose most prominent characteristic is to endeavour to demonstrate the futility of giving orders without having the necessary power to compel obedience. Inattention or carelessness of signals is in 99 cases out of every 100 the main cause of accidents at stations.

R.M., 24/11/70.

No. 4.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

THE Traffic Manager must again warn Mr. Goold of the inevitable end of these repeated complaints.

They are accumulating very fast; and Mr. Goold if he persists in this line of conduct will leave the Government no alternative but to remove him from the Service.

J.S., 2/12/70.

Traffic Manager.—C.A.G., B.C., 8/12/70.

Station-master, Wallerawang.—R.M., 9/12/70.

Seen.—J. B. GOOLD, 12/12/70.

Returned to Chief Clerk.—R.M., 13/12/70.

No. 9.—Dawson & Co., complaining that Mr. Goold, Station-master at Wallerawang, had not trucks to convey their sheep.

SCHEDULE.

4. Letter from Dawson & Co., to the Traffic Manager—previous complaint. 11 October, 1870	49
5. Commissioner's minute, cautioning Mr. Goold to conduct business more satisfactorily. 9 January, 1871	50
6. Letter to Dawson & Co., informing them of Mr. Goold being cautioned. 18 January, 1871.....	50
7. Mr. Goold, asking to see the papers in this case. 14 January, 1871	50

No. 1.

DAWSON & CO. TO THE SECRETARY FOR PUBLIC WORKS.

246, Pitt-street, Sydney,
30 December, 1870.

SIR,

We have to request that you will cause inquiry to be made respecting the conduct of the Station-master at Wallerawang. We had, about the middle of this month, upwards of 4,000 sheep, belonging to the Peel River Company; it was our intention to bring them down by train to Homebush; the trucks were ordered for that purpose, and our drover instructed to forward them from there. We received the first draft of nearly 1,000 sheep in due order, but we were astonished on receiving a letter a few days afterwards from the drover stating that he had started overland with remaining 3,000 odd, making as his excuse that the Station-master at Wallerawang had informed him that he was not likely to get trucks for the remainder until after Christmas. Mentioning this circumstance to the Station-master of the Redfern Station, he expressed his surprise, as a large number of trucks had been despatched for the purpose of bringing down these sheep. We may also mention that we made a similar-complaint a short time back, and we then addressed a communication to your predecessor, and to which we beg to refer you, as it will show you that this is not the first serious complaint we have to make against the same station. We beg to show you that we have some cause for complaint, that owing to this misdirection on the part of the Station-master the owner of the sheep will suffer a loss of £200, and your department the freight, say £75.

We may also instance that Messrs. Oakes, of Bathurst, have experienced so much annoyance in this way that they now make a point of avoiding the railway as a means of transit. Trusting that our representation will have the effect of producing some change, and induce those employed in the Railway to facilitate transit instead of obstructing it,

We are,
Pro DAWSON & CO.,
J. DAWSON.

Traffic Manager to inquire and report immediately.—J.B., 31/12/70.
Report herewith.—R.M., 4/1/70.

No. 2.

THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

Government Railways.—Minute-paper.

Subject:—Messrs. Dawson and Co.'s complaint against Station-master, Wallerawang.

I ENCLOSE copy of Mr. Goold's explanation of this complaint, which, as to the supply of trucks, is certainly correct; and knowing that Mr. Dawson was inclined to look with suspicion on the assistance he was likely to get from the Station-master, I kept myself daily informed of the supply of trucks available, and also kept Mr. Inspector Higgs advised so as to keep up a supply. From the truck returns I am aware that Inspector Higgs used every exertion in this matter, and that the supply was sufficient, as stated by Mr. Goold; but which is to blame for not loading the sheep, whether the station-master or the drover, it will be impossible to decide, unless the drover and Station-master can be brought face to face on the spot.

With reference to a previous complaint (11th October last) the same difficulty arose. The complaint was met with a flat denial by the Station-master (70/3,356), of which Messrs. Dawson & Co. were informed, Mr. Dawson afterwards promising to let me have some further information which, however, he did not do.

I may perhaps be permitted to remark that the sheep traffic is most precarious and uncertain, and when we do get notice to provide trucks it is generally from two or three firms simultaneously, and as each one is of course interested most in their own flock a scramble takes place, upsetting entirely any devised plans for the conveyance of the sheep in proper drafts; at the same time I am bound to admit that I do not get any such complaints of the working of any other station where we take in sheep.

R. MOODY, 4/1/70.

70/3,356 attached
to Mr. Goold's
report.

No. 3.

No. 3.

Mr. Goold, for full report.—R.M., 2/1/71.

MR. J. B. GOOLD'S REPORT.

THE enclosed complaint of Messrs. Dawson & Co., bearing date the 1st April and 1st August, 1870, respectively, having reference to matters which may have occurred on the Southern Line, in no way affect this station, and therefore need no reply from me.

The complaint of the 30th ultimo, in 70/4950, is the only one I have to deal with, the gravamen of which appears to be contained in the drover's letter to Messrs. Dawson & Co., to the effect that "the Station-master at Wallerawang informed him that he was not likely to get trucks for the remainder until after Christmas."

This I most emphatically deny, and it must have been nothing less than a pure invention on the part of the drover, and his motive for saying so will easily be seen by-and-by.

The facts are simply these:—Traffic Manager's M.P. 70/4006 advised this station that 4,500 sheep for Messrs. Dawson & Co. were to be trained here, in lots of 900 at a time, the first to be loaded on the 15th ultimo.

My reply thereto was as follows:—"We have not now sufficient trucks for wool, and I presume trucks for these sheep will have to be sent from Sydney."—12/12/70.

On the 15th we had 46 trucks available for these sheep (having been collecting them since the 12th), but no sheep had arrived. On the following morning, however, at 6 a.m., 896 were yarded, loaded, and despatched by the 9 a.m. up-goods, in 22 trucks. I then told the drover to bring in at once a second lot, so as to have them loaded for the 4 p.m. up-goods same day; his reply was, they were some 10 miles off, and he could not have them in. Here, then, were 24 trucks waiting on them, and these sheep did not reach here until noon on Saturday, the 17th.

Late on the evening of the 16th (Friday), a flock of sheep for Messrs. Pitt arrived, and were yarded, the sheep-yard being unoccupied. I had advice of these sheep from Traffic Manager, in letter 561, of the 13th, directing to deal fairly between both parties, as the two flocks were to be here simultaneously; in point of fact, to act on the principle of "first come, first served"; hence Messrs. Pitt's sheep were loaded up on the morning of the 17th, in 16 trucks, and despatched by the 9 a.m. up-goods; and thus Messrs. Dawson's drover lost the opportunity of forwarding his second lot.

At noon on the Saturday I pointed out to him 12 trucks ready for him to load, and also informed him that I expected more to arrive about 3 p.m. by the down-goods; he refused to load any then (in fact it is not usual to load up on Saturdays after the 9 a.m. up-goods train leaves, as they would have to stand in the trucks, either here or at Penrith, to tide over Sunday, a period of nearly three days), and I arranged he should call after the goods arrived, so as he would know exactly how many would be ready for Monday morning.

Trucks did arrive, as I expected, to the number of 16, by the down-goods, and the drover never came to inquire after them; on the contrary, he travelled in the sheep, of which fact I did not become cognizant until the Sunday morning, on my sending to the camping-ground to inquire after him.

It will thus be seen the drover is the party to blame, not having the sheep at hand on the Friday, to load up the 24 trucks then ready for him, and in leaving on Saturday, though 12 trucks were in the siding, and not remaining until the Monday morning, when 28 trucks could be loaded before the 9 a.m. up-goods would leave; 3,000 would then have been forwarded.

I am unable to reply to the other complaints referred to by Messrs. Dawson & Co., such not being enclosed; if however there are any such not already explained away, I hope it will be found there will be as little grounds for them as in the present one. See M.P. 71/3356, attached.

Waggon returns in Traffic Manager's office will prove the number of trucks.

J. B. GOOLD, 3/1/71.

No. 4.

DAWSON & Co. to THE TRAFFIC MANAGER.

246, Pitt-street, Sydney,
11 October, 1870.

DEAR SIR,

We shall feel obliged by your sending trucks for 600 large sheep to Wallerawang, on Monday, the 17th instant; the sheep to be loaded on the following day for Homebush. We make this request thus early so that there may be no mistake with reference to the trucks.

Referring to the last lot of 897 sheep, received from Wallerawang, we beg to bring under your notice the following remarks, taken from a letter from Messrs. R. & W. Oakes, of Bathurst:—

"The drover assures us he delivered 897 sheep on Thursday morning; but he says the Railway officials at the station told him not to bring any more as they did not pay, and it was too much trouble. A pretty state of things—is it not?"

We commend the foregoing to your attention, and perhaps you will inquire into the matter. You will remember the sheep did not arrive on the same day, to our great disappointment.

Yours, &c.,
DAWSON & Co.

Station-master, Wallerawang, for report. Make necessary provision of trucks and nets.—R.M., 12/10/70.

Seen. The drover's statement referred to is simply untrue. All were duly despatched from here on the 6th. We have nothing to do with their arrival.—J. B. GOOLD, 13/10/70.

Mr. Inspector Higgs to explain alleged detention.—R.M., 14/10/70.

The whole of the sheep could not be brought down at once, as the reversing station, Lapstone, Zig Zag, will not hold more than nineteen trucks.—E. HIGGS, 15/10/70.

Inform: Station-master, Wallerawang, states that there is no truth in the message alleged to have been sent by the drover, and that no time was lost in forwarding the sheep in question, which necessarily had to be brought down the mountains in two trains.—R.M., 17/10/70.

L.B.E., 226.—18/10/70.

No. 5.

MINUTE OF THE MINISTER FOR PUBLIC WORKS.

MR. GOOLD must endeavour to conduct the business of this station in a more satisfactory manner.

To Commissioner.—R.M., 11/1/71.

Inform Dawson & Co.—J.R., 17/1/71.

Messrs. Dawson informed.—18/1/71.

No. 6.

THE COMMISSIONER FOR RAILWAYS to DAWSON & Co.

(70/4950.)

Department of Public Works,
Railway Branch,
18 January, 1871.

GENTLEMEN,

I have the honor to acknowledge the receipt of your letter of 30th December last, complaining of the conduct of the Station-master at Wallerawang, and to inform you that Mr. Goold has been cautioned and informed that he must conduct the business of this station in a more satisfactory manner for the future.

I have, &c.,
JOHN RAE,
For the Commissioner for Railways.

No. 7.

MR. J. B. GOOLD to THE TRAFFIC MANAGER.

Wallerawang Station,
14 January, 1871.

SIR,

I have the honor to acknowledge the Traffic Manager's letter of the 10th instant, relative to Messrs. Dawson & Co.'s complaint in M.P. 70/4950, informing me merely of the Commissioner's decision, viz. :—

“Mr. Goold must endeavour to conduct the business of this station in a more satisfactory manner.”

May I request the Traffic Manager will be pleased to procure me the papers for perusal, so that I may be enabled to judge in what the unsatisfactory management, if any, of this station consists, and take the necessary steps to remedy them for the future.

I have, &c.,
J. B. GOOLD.

Forwarded to Commissioner. Copy of memo. sent to Mr. Goold enclosed.—R.M., 17/1/71.

Copy of Traffic Manager's memo., sent to Mr. Goold.—M.P. 70/22.

Traffic Manager's Office,
Redfern Station,
Sydney, 10 January, 1871.

Station-master, Wallerawang,—

Mr. Dawson's complaint.

I have to invite your attention to the Commissioner's minute on the above, a copy of which I enclose for your information :—

“Mr. Goold must endeavour to conduct the business of this station in a more satisfactory manner.—J.B., 9/1/71.”

R.M.

Seen.—J.B., 21/1/71.

The Traffic Manager should inform Mr. Goold that the Commissioner has marked his application “Seen.” Please return papers.—C.A.G., B.C., 23/1/71.

To Commissioner,—Returned.—R.M., 24/1/71.

No. 10.—Porter Thomas Mitchell's complaint of Mr. Goold's unkindness to him.
Mr. Goold visiting Mr. Shaw's public-house until early in the morning, &c.

SCHEDULE.

No. 1.

MR. J. B. GOOLD to THE TRAFFIC MANAGER.
Government Railways—Memorandum to Traffic Manager.

Wallerawang Station,
14 February, 1871.

PARCELS-porter Mitchell has not yet returned to duty, which he should have done on Saturday, the 11th, unless an extension of leave was granted by the Traffic Manager.

There are some ugly rumours here concerning him, as to his being engaged in some affair of gallantry with some young lady who accompanied him to Sydney on the morning of the 11th.

I therefore submit whether it may not be advisable to send another to take his place?

J. B. GOOLD.

To Commissioner.—I think this man's services should be dispensed with.—R.M., 15/2/71.
Copeland Bennett succeeded.—R.M., 25/2/71.

No. 2.

MR. T. MITCHELL to THE TRAFFIC MANAGER.

90, Devonshire-street,
Sydney, 14 February, 1871.

SIR,

Not being granted a pass to Sydney from Wallerawang, I obtained one day's leave of absence from the Station-master, leaving there by the 1.5 a.m. train on Saturday last, purposing to return the same evening, but being taken very unwell after arriving I was unable to do so, and yesterday (Monday) I called at your office to ask for further leave, but still feeling too unwell to return, feel it my duty to ask you to place another porter in my situation at Wallerawang, for the hours there are so long that, did I do so, I should soon be compelled to apply for change of stations, as it is to this I attribute my present ill health. I should feel greatly obliged if you would allow me to remain from business until my health is renewed, and trust you will be pleased to retain me as a Government servant.

Submitting this to your kind consideration,

I have, &c.,
THOS. MITCHELL.

No. 3.

MR. T. MITCHELL to THE COMMISSIONER FOR RAILWAYS.

90, Devonshire-street, Strawberry Hills.

SIR,

Having been dismissed from the Wallerawang Station, without, I consider, a sufficient cause, viz., sickness preventing my returning from Sydney to that station on the day I should have, I sincerely trust you may be pleased to take the matter into consideration, as I can prove to you that great injustice has been done me, for all the other porters at Wallerawang got a free pass to Sydney, or their respective homes, with three days leave of absence, and one of them four days, their wages going on as usual, but I applied for a pass through the Station-master in the usual way, and was not granted it, but got permission from the Station-master to visit Sydney for one day only, and had to pay for my ticket 16s. 8d., besides losing the day's pay. Now, this is the injustice to which I allude, and I pray for an investigation in the matter, for I feel convinced when you hear the rights of this that you will be pleased to place me again on the line. As I am not the party deserving to be discharged, I cannot refrain from bringing this before you, and hoping you will pardon me for so doing,

In reference to your letter of the (not dated), requesting that the circumstances connected with your dismissal from the employment you had at the Wallerawang Station may be reconsidered, and that you may be re-instated—urging in support of your request that if the facts be ascertained, you are not the party deserving to be discharged,—I have the honor to inform you, that as it appears that you have some statement to make, which, while showing your case in a more favourable light, will implicate some one else, you should at once reduce to writing any communication which you may desire to make, in order that an investigation may take place. I may add, that to accomplish this it is necessary that you should be explicit.

I have, &c.,
JOHN RAE,
For the Commissioner for Railways.

No. 5.

MR. T. MITCHELL'S STATEMENT.

Mount Victoria Station.

THOS. MITCHELL states that he was parcels-porter at Wallerawang until the 10th February last, from 1st March, 1870—the whole of which time I led a miserable life with the Station-master, he being in the habit the last few months of visiting the public-house, kept by Mr. Shaw, and remaining there until 3 and 4 in the morning, and remaining in bed until 11 a.m. the same day.

I attribute his unkindness to me, he knowing I was cognizant of the above.

THOS. MITCHELL.

Received.—J.B.G., 4/3/71.

No. 6.

MR. J. B. GOOLD'S EXPLANATION THEREON.

WITH reference to the foregoing complaint of Porter Mitchell's, I have the honor to state that I am unaware having in any way acted unkindly towards him, but, on the contrary, with the greatest leniency, as can be proved by independent evidence of the persons in the neighbourhood, and even by Mr. Shaw, to whom he particularly refers.

It is quite true, however, I had to look him up very sharply in the matter of his parcels cash, in which he was repeatedly deficient, but which he used subsequently pay over, after having borrowed it from others, as I am credibly informed, for that purpose.

What he is pleased to state,—my lying in bed until 11 a.m., as if to sleep off the effects of my visiting Mr. Shaw's public-house, is simply this: That my hours on duty are from 10 a.m. to 2 a.m. the following morning (16 hours out of the 24), and when extra goods-trains have to be run, which are of frequent occurrence, I cannot retire to rest until between 3 and 4 a.m.

Porter Mitchell's duties terminate at 1:15 a.m., and what kept him prowling about the station after that hour instead of retiring to rest can only be conjectured from what led to his dismissal.

I may now add, that I never enter Mr. Shaw's house except on business, when I have to see gentlemen or carriers on matters connected with the traffic, who may be stopping there.

Visiting Mr. Shaw's public-house would seem to imply other than habits of temperance; to this I may safely say that no one in these Colonies has seen me under the influence of intoxicating drink since I entered the Railway Service in 1858.

J. B. GOOLD, 4/3/71.

The Honorable J. Byrnes, Esq., M.L.A., Secretary of Works.

See attached memo., sent by Traffic Manager, a verbal explanation of which he has given the Commissioner.—7/3/71.

[Memo. attached.]

Sydney, 17 Feb., 1871.

To the Traffic Manager,—Please pay Mr. Tidswell the sum of two guineas (£2 2s.) out of my salary.
—THOS. MITCHELL.

To Cashier.—R.M., 21/2/71.

£2 2s. herewith.—J.T.B., 22/2/71.

Settled.—F. TIDSWELL.

No. 7.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

It will be much better in future, if, when Mr. Goold has business to transact with persons who may be at Mr. Shaw's, he would see the parties in his office only.

J.B., 17/3/71.

Traffic Manager.—J.R., B.C., 17/3/71.

Station-master, Wallerawang, to note.—R.M., 18/3/71.

Seen.—J. B. GOOLD, 21/3/71.

1. Letter from Mr. Goold, asking for an interview. 7 August, 1871	53
2. Commissioner, declining an interview and cautioning Mr. Goold to conduct himself with greater propriety, or his dismissal will follow. 11 August, 1871	53

No. 1.

MR. J. B. GOOLD to THE SECRETARY FOR PUBLIC WORKS.

Wallerawang Station,
7 August, 1871.

SIR,

Certain papers having within the last few days passed between the Traffic Manager and myself with your minutes thereon, are of such grave importance to me as to compel me, though very reluctantly, to appeal to you direct in the matter, even at the risk of incurring your displeasure or censure in overstepping a rule of the Service, by which subordinate officers are bound to communicate with the head of their department, through their immediate superiors.

In extenuation of this course, I most respectfully submit I may be permitted to plead "precedent," sanctioned by the Traffic Manager in his minute of 71/1442, now before me, wherein parcels porter Driver at this station communicates with the Traffic Manager direct, without such correspondence passing through his immediate superior in the first instance; and such being the case, I sincerely hope I may not be considered censurable for taking a similar course.

The papers to which I particularly allude in the first part of this letter are contained in Commissioner's minute, 71/2734, wherein the Traffic Manager has been pleased to charge me with "a chronic insubordinate spirit," a grave and most serious charge, prejudicial to my character, jeopardizing my position in the Public Service, and tending sooner or later to deprive me of my daily bread.

Under these circumstances, I appeal to your sense of justice and humanity to afford me the opportunity, by *viva voce* explanation, in the presence of the Traffic Manager, of rebutting this charge, and clear my character from such a stigma,—a privilege which I feel confident would be accorded by you to the lowest paid servant in the Service.

I have, &c.,
J. B. GOOLD.

No. 2.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

Declined.—J.B., 11/8/71.

Inform.—I have looked through the papers of my predecessor and find a very strong minute on the subject of Mr. Goold's gross insubordination to his superior officer, and I now consider his conduct is not one iota behind that which called for Mr. Sutherland's strong condemnation. I therefore decide that Mr. Goold must conduct himself with greater propriety in his place under the Traffic Manager, or I shall feel it to be my duty to suspend him and recommend his dismissal from the Public Service.—J.B., 11/8/71.

No. 1.

Government Railways,
Wallerawang Station,
19 June, 1871.

MR. J. B. GOOLD to THE TRAFFIC MANAGER.

Memorandum to Traffic Manager.

THE Traffic Manager will please give me a pass to Sydney on Thursday next, returning on Friday, for the purpose of completing bonds and other arrangements relative to the post-office at this station.

As Mr. Kensett is but slightly up in the passenger traffic and station duties, it will be advisable to send some one to take charge during the interim.

J. B. GOOLD.

Pass—Mr. Stiles to relieve Mr. Goold on usual terms, viz., board and lodging.—R.M., 21/6/71.
Station-master, Wallerawang. Seen.—J. B. GOOLD, 21/6/71.

No. 2.

MR. H. STILES to THE TRAFFIC MANAGER.

Rydal, 26 June, 1871.

SIR,

Would you kindly grant me expenses for the time I was relieving the Station-master at Wallerawang, viz., 3 nights and 2½ days?

My hotel expenses for board and lodging for that time was £1.

It is more than I can afford, on a salary of 6s. 6d. per diem, to pay board at Rydal, and then relieve some one and pay for my board, &c., by the meal. It is doing the Government work and deriving no benefit for it, but spending most of the week's pay in expenses which I have no right to bear.

I beg to bring under your notice that a fine of £5 is being deducted from my pay for M'Kay's claim.

I am, &c.,

HENRY T. C. STILES.

Station-master, Wallerawang.—This should go to Mr. Goold for settlement.—R.M., 27/6/71.

I have nothing to do with Mr. Stiles's fines or expenses.—J. B. GOOLD, 28/6/71.

To Commissioner,—As from papers attached, it will be seen that Mr. Stiles was sent to Wallerawang to relieve Mr. Goold for a business not connected with this department, and as Mr. Goold did acquiesce in the arrangement to provide Mr. Stiles with board, I do think he should not now saddle Mr. Stiles with expenses for relieving in a matter when Mr. Goold only was to profit.—R.M., 4/7/71.

No. 3.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

MR. Goold must pay this amount, or Mr. Moody must see it paid out of Mr. Goold's salary.

J.B., 10/7/71.

Station-master, Wallerawang, will no doubt settle this with Mr. Stiles.—R.M., 10/7/71.

The Traffic Manager,—Mr. Stiles, I respectfully submit, ought to be called on for a bill of particulars omitted from these papers, as Mr. Shaw, with whom he lodged, informs me a considerable amount of these expenses was for grog alone, and I am unable to see why I should be compelled to pay Mr. Stiles's grog score.—J. B. GOOLD, 15/7/71.

Station-master, Rydal,—Ask Mr. Stiles to explain Mr. Goold's statement as to grog score, &c.—R.M., 17/7/71.

Mr. Stiles,—For explanation.—T. M. GIBLIN, 19/7/71.

No. 4.

MR. H. STILES to MR. S. T. GIBLIN.

WHEN I sent in my application for expenses it was for money actually expended by me in relieving Mr. Goold, an amount which I would not have incurred had I been at my own station.

Herewith I append Mr. Shaw's account for 15s. for my board and bed.

The Traffic Manager will notice a difference of 5s.

When at Wallerawang I was suffering from a very severe cold, and not being at home was unable to obtain the usual domestic remedies for promoting a perspiration, resorted to the only means to be obtained at a public-house, but the expense was not equal to the balance.

The only reason I can give for this amount being so large is owing to Mr. Shaw making a mental calculation (when I asked him what was my account) and saying £1.

Why I did not answer before now was owing to my being unable to get the account from Mr. Shaw before. I had previously ridden and written once to Wallerawang, but owing to Mr. Shaw being busy loading sheep he forgot all about it.

I have no doubt upon my mind should the Traffic Manager allow me a *viva voce* explanation, that I can satisfy him upon all points.

I am, &c.,

HENRY T. C. STILES.

The Traffic Manager, Redfern,—Mr. Stiles's explanation herewith.—THOS. M. GIBLIN, 22/7/71.

Station-master, Wallerawang,—Amended account to Mr. Goold.—R.M., 25/7/71.

Mr. Stiles to John Shaw.

To 8 meals, @ 1/6	12/-
„ 3 beds, @ 1/-	3/-

Paid—JOHN SHAW,

15/-

The

55

The bill of particulars herein is not such as is required, nor is it furnished according to the Traffic Manager's special instructions, the "grog score" being omitted.

I would again most respectfully submit the particulars of Mr. Stiles's first claim of £1 be furnished and laid before the Commissioner.

Mr. Stiles's explanations may be very plausible, but he admits the fact of "obtaining grog for his own special purposes, and of his having tried it on to make me pay for it."

The 15s. will be at once paid as the Commissioner may direct, as soon as his decision is communicated to me.

J. B. GOOLD, 27/7/71.

Mr. Goold, Station-master, Wallerawang,—Mr. Stiles's explanation is accepted by the Traffic Manager. An amended account is furnished, which is reasonable. Mr. Goold will now act as directed by minute 10/7/71, or the Traffic Manager will act as directed in that minute.—R.M., 27/7/71.

The Traffic Manager will please re-submit these papers to the Commissioner.—J. B. GOOLD, 31/7/71.

No. 5.

THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

Government Railways—Minute-paper.

Station-master, Wallerawang—Insubordinate.

AT Mr. Goold's own request I have to lay these papers again before the Minister, and in doing so I have to express my regret that I should be thus compelled to do so, as I am but too well aware of the volume of papers now in the office of the Commissioner for Railways, showing the utter hopelessness of trying to induce this gentleman to obey the order of his superior officer.

Mr. Goold's chronic insubordinate spirit has now attained such a stage as to render it impossible for me to perform my duties with any degree of certainty, and unless something be done in this case I cannot be answerable for the public safety, as an officer in such a state of chronic insubordination is in Railway matters a very dangerous thing. Wallerawang is a station of great importance.

R. MOODY, 1/8/71.

No. 6.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

I AM somewhat astonished that the Station-master at Wallerawang should risk his position by a continuation of conduct so opposed to good order in the department, and should this course be adopted in future the Commissioner will take such steps as appear to him necessary under the circumstances.

J.B., 2/8/71.

Traffic Manager.—C.A.G.; B.C., 2/8/71.

Sheets No. O 715 and O 496 damaged beyond repair; they covered the bottom of C 12 and 24, invoiced from Wallerawang, 24th July. They are at present in the sheet-loft for the Traffic Manager's inspection.

J. NELSON.

Traffic Manager,—These trucks contained paunches of tallow; the sheets were spread on the flooring to prevent as I suppose the tallow from staining the trucks; the sheets are very much damaged by being so used.—E. HERALD, 25/7/71.

To Station-master, Wallerawang,—These sheets are utterly destroyed; they have had the shed barrows running over them until they are cut all over. Who is to blame for this?—R.M., 27/7/71.

These sheets arrived from Sydney on the 21st July, and were despatched to Sydney by the 8 a.m. train on the 22nd; no injury therefore was done them here.—J. B. GOOLD, 27/7/71.

Station-master, Wallerawang,—The reason given by the Station-master is no reply to my minute. The sheets were used in loading up the tallow. I require to know whether the sheets were cut to pieces as stated when they arrived at Wallerawang?—If not, who is to blame?—R.M., 28/7/71.

The loading porter informs me these sheets were bad—the worst he could pick out at the time; as for being cut to pieces I cannot say; but this I know, that the canvas of which some of these sheets are made is almost rotten.—J. B. GOOLD, 29/7/71.

Foreman, Sheet-shed,—What is the value of damage done to these sheets?—R.M., 30/7/71.

The two sheets in question O 715—O 496 are entirely destroyed; they were repaired on the 19th instant and left in good order as a third-class sheet, and with ordinary care would last a considerable time longer; taking the value of a new sheet at £5, the value of the above two sheets will be £3 6s. 8d., or one-third the original cost.—J. JACOBS.

Station-master, Wallerawang,—Station-master, Wallerawang, will be charged with £3 6s. 8d., value, of tarpaulins destroyed, unless he can point out the guilty party liable for this mischief.—R.M., 1/8/71.

No. 2.

MR. J. B. GOOLD'S EXPLANATION.

THESE sheets were placed under this tallow to protect the paunches from being abraded *in transitu* by the oscillation of the train, and thus to prevent the tallow from being injured, and to avoid any claim being made on the Commissioner should such damage accrue, and not, as Mr. Herald assumes, to "save the trucks from being stained," which is simply puerile.

Porters Atwell and Baragy were in the vans stowing it, whilst Porters Kinchela and Gray were trucking it from the platform to the vans; so far as I can ascertain, Kinchela and Gray did run the barrows into the vans by which injury might have been done to the sheets, but it could only be to the extent of the width of the van-doors. It is quite possible, however, that barrows were also used in the vans at Sydney when unloading, which may be ascertained from the drayman receiving; for in this way the sheets would have received additional injury, as from the foregoing facts it does not appear to me all the damage could have been done at this station.

J. B. GOOLD, 3/18/71.

To Commissioner, for information.—R.M., 4/8/71.

57

No. 3.

FROM the manner in which the Station-master has attempted to dispose of this matter, he ought to be saddled with the value of the sheets destroyed; however, as he has at last condescended to furnish the necessary information, the porters who injured the sheets must pay for their careless conduct; and in future I desire Mr. Goold to understand, that if I have to hear of his continuous obstruction to the proper conduct of the Traffic Department, I shall feel it to be my duty to relieve him from his labors.

J.B., 4/8/71.

Station-master, Wallerawang, to note and inform.—R.M., 4/8/71.
Porters duly informed.—J. B. GOOLD, 7/8/71.
Returned to Chief Clerk.—R.M., 8/8/71.

No. 4.

GOVERNMENT RAILWAYS.

Wallerawang Station,
7 November, 1871.

Memorandum to Traffic Manager.

RECEIVED sheets 0318, 496, 563, and 812 from Sydney, torn.

J. B. GOOLD.

Wallerawang Station,
25 November, 1871.

Memorandum to Traffic Manager.

THE Traffic Manager's attention is respectfully invited to M.P. 71-1603, whereby the sum of £3 6s. 8d. was deducted from the pay of Porters Gray and Kinchela, being the value of two tarpaulins destroyed as stated therein. On the 4th instant one of these tarpaulins, 0496, was received here from Sydney covering goods, and was then reported to the Traffic Manager as torn, thus showing it is still used by the department; and the other, 0715, may be in use likewise.

Will the Traffic Manager be so good as to take this matter again into favorable consideration, with the view of a refund under the circumstances just stated?

J. B. GOOLD.

To Commissioner.—I resubmit this, but fail to perceive on what ground Mr. Goold seeks a refund. The sheets were not first-class sheets, but were so far damaged as to render them only fit for third-class sheets, after expensive repairs.—R.M., 11/12/71.

This suggestion of Mr. Goold's is very much out of place.—J.B., 20/12/71.

Traffic Manager.—B.C., 21/12/71.

Chief Clerk.—Mr. Goold informed.—22/12/71.

No. 14.—Mr. Lord, complaining of conduct of Mr. Goold, Station-master at Wallerawang, pulling him out of Railway-carriage.

No. 1.

THE HON. G. W. LORD to THE SECRETARY FOR PUBLIC WORKS.

Sydney, 15 March, 1872.

SIR,

I have the honor to inform you that I was a passenger by the night train of the 9th March, from Rydal to Sydney. I was in a saloon carriage, and there being few passengers and being tired from a long journey from Orange to Rydal, I went to sleep; on arriving at "Wallerawang Station" I was very rudely and unceremoniously taken by the shoulders by Mr. Goold, the Station-master, at the same time using the words, "Come, my man, get up." I asked why? He said there were ladies wanting to come in;

my

my reply, can you not put them in the ladies' carriage, was answered by his rudely pulling me off the seat. I then followed him into the station-room, and demanded his right to place his hands on me; and I spoke very plainly to him, and informed him that I would complain of his insolent behaviour.

I then went to the ladies' carriage, it being empty, and came on to Sydney in that carriage without any other passenger, thus showing there was ample room for the ladies in their own compartment.

Trusting that you will cause due inquiry to be made into Mr. Goold's conduct,

I have, &c.,

G. W. LORD.

Railways.—G.H., B.C., 28/3/72.

Station-master must be called upon to explain his conduct in this matter immediately.—J.B., 28/3/72.

Mr. Moody.—C.A.G., B.C., 28/3/72.

Mr. Goold, for explanation.—R.M., 29/3/72.

No. 2.

MR. J. B. GOOLD'S EXPLANATION, &c.

THERE were seven passengers, including the Honorable Mr. Lord, in the saloon on its arrival here from Rydal, and eight booked at this station, including four ladies, thus making fifteen in all.

In the first instance I requested the ladies to occupy the ladies' compartment, which they refused as they would not be separated from their husbands, and I am totally unaware of any power placed in our hands to compel ladies, whether married or single, to take their seats in the ladies' compartment should they prefer to ride in the saloon when there is room for them.

When these passengers entered the saloon the seats were completely occupied by the Rydal passengers, who were lying at full length on the seats, leaving no space for anyone to sit. I was called on at once to procure seats for those who had paid for them at this station, and the first four gentlemen whom I addressed immediately sat up on my requesting them to do so. The Honorable Mr. Lord was the fifth, and I addressed him in the same terms as the others, thus—"Be so good as to sit up and make way for the ladies." This I repeated four times, and received no reply; he was evidently sound asleep, as admitted by himself, and I presume did not hear me. I then tapped him on the shoulder, again repeating the same words; still no response. I had to give him a gentle shake to rouse him. His face during all this time being turned to the side of the carriage was then veered half round, when he ejaculated the words, "Who are you?" to which I replied, "Station-master," and he immediately turned back again to compose himself to sleep. Having again repeated the room he occupied was required for the ladies, and finding all entreaties useless, he left me no alternative but to take hold of his legs and wheel them gently off the seat, so as to bring him into a sitting position, when the vacant space thus made was at once occupied by the ladies.

These are the simple facts, partly admitted by the honorable gentleman himself, and which can be corroborated by parties standing by on the platform at the time, as well as by the saloon passengers, one of whom I may mention as convenient for reference in Sydney, viz., Jas. Rodd, Esq., 309, George-street.

It will be recollected this carriage was available for the public, and not reserved for any particular party. Each passenger was merely entitled to occupy so much space as he required in a "sitting position only," and the seats therefore are not supposed to be converted into sleeping-berths when the room so taken up is required to seat other passengers, as in the present instance; and had the other six Rydal passengers persisted in lying down, instead of sitting up, the whole saloon would thus be taken up by seven, to the entire exclusion of the other eight, though it has ample sitting accommodation for twenty passengers at the least.

I have to express my unfeigned regret that, in performing this duty, which, under the circumstances related, was imperative on me, I should have spoken or acted in any way that might be considered either rude or discourteous to the Honorable Mr. Lord, as it was quite unintentional on my part. It is far more painful than pleasing to me to be thus compelled to rouse up passengers sleeping on the seats; it is a process which I have to go through every alternate morning, and whilst thus endeavouring to provide sitting room for those who require it, I incur the unmerited censure and odium of those who happen to be disturbed from their balmy slumbers. Saloon passage traffic has so greatly increased at this station I am unable to see how this can be avoided, unless the seats are divided by partitions to prevent their being converted into sleeping-berths.

J. B. GOOLD, 2/4/72.

Traffic Manager.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PROPOSED RAILWAY FROM MOAMA TO DENILIQVIN.

(PETITION FOR—INHABITANTS OF DENILIQVIN AND DISTRICT.)

Ordered by the Legislative Assembly to be printed, 22 November, 1872.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Crown Tenants, Freeholders, Conditional Purchasers, and others,—

SHOWETH :—

That your Petitioners inhabit, or are connected with, the country lying between The Murray and Murrumbidgee.

That Moama and Deniliquin, in the district, are distant from each other forty-seven or forty-eight miles, and that for several years a movement has been carried on, soliciting the Government of New South Wales to construct a railway from Moama to Deniliquin aforesaid, the latter town containing about one thousand inhabitants, having been called into existence chiefly through the requirements of the inter-colonial live stock trade.

That in the year one thousand eight hundred and sixty-six, a Select Committee of your Honorable House sat upon the question of a railway between the said towns, and reported favourably of the proposed line, stating that the prayer of the Petition had been proved; but your Honorable House afterwards rejected the application for the said line, partly from a misconception of the ultimate results likely to accrue from its construction.

That some of the Members of your Honorable House objected, as it is believed, to the said line being made, because it would create a feeling in favour of annexing this part of the Colony of New South Wales to Victoria.

Your Petitioners would earnestly and truthfully assure your Honorable House, that the construction of the said line would tend to knit more closely the people of these districts, interested in the said proposed railway, to the Government of New South Wales; that the refusal to construct the said line—a macadamized road being impossible, owing to the absence of stone in these parts—would ultimately tend to create general discontent here even among those whose proclivities are now in favor of indefinitely retaining the existing connection between this district and our lawful Government.

That the highway between Deniliquin and Moama, which by law should be a mile in breadth, is nearly rendered useless for travelling stock, the lands along the said highway being sold so as to leave in different places along the road only the width of an ordinary turnpike-road for the use of some hundreds of thousands of sheep, tens of thousands of cattle, and a large number of horses, such as have hitherto yearly been sent by this route into Victoria.

That property in Deniliquin will necessarily decrease, as it has decreased in value yearly, and the natural prosperity of the town be retarded, if not altogether sacrificed, should the said railway not soon be constructed.

Your Petitioners humbly call the attention of your Honorable House to the circumstance that the said highway having been rendered comparatively useless for travelling stock purposes, a breach of faith on the part of the Government of New South Wales will, if this railway be refused to your Petitioners, have been committed with the townspeople of Deniliquin, who have invested large sums of money in purchasing public lands here, and have built thereon valuable premises.

That the distance from Moama to Deniliquin is, as stated, forty-seven or forty-eight miles; and should the Edward River be made navigable, the distance from Moama to Deniliquin by water would be several hundreds of miles, making the cost of water-carriage, with insurance, &c., &c., on goods so transmitted, far higher than is now charged for land carriage, and probably three times as much as such carriage would cost by means of a railway.

That the cost of carriage at present between Moama and Deniliquin is about sixty or sixty-five shillings per ton by horse-teams, a charge about six times as high as on some of the railways leading to Sydney from the inland districts.

That desirous of relieving the central Government of any monetary pressure consequent upon Government making this proposed line, the said line having been surveyed and marked out by Government, your Petitioners would make it from capital raised from a Public Company, if Parliament would only grant the land, say three hundred feet broad, and of the necessary length, for merely constructing the said line.

Your Petitioners therefore humbly pray that your Honorable House will take this Petition into your consideration, and adopt such steps as your Honorable House in its wisdom deems best.

And your Petitioners will ever pray.

[Here follow 297 Signatures.]

DENILIQVIN AND MOAMA RAILWAY BILL.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, to whom was referred, on the 12th March, 1873, *for consideration and report, the "Deniliquin and Moama Railway Bill,"*—beg to report to your Honorable House,—

That they have examined the Solicitor* for the Bill, and the Witness named in the List (whose evidence will be found appended hereto); and that, the Preamble, as amended,† having been proved to your Committee, they proceeded to consider the several Clauses and Schedules of the Bill, in which it was deemed necessary to make certain Amendments.†

James Robertson,
Esq.† *Vide* Schedule of
Amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them, with an Amendment in the Preamble.

WILLIAM HAY,
Chairman.

No. 3 Committee Room,

Sydney, 28th March, 1873.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 14 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Burns,		Mr. Hay,
Mr. Fitzpatrick,		Mr. Abbott,
Mr. Macleay,		Mr. Cunneen.

Mr. Hay called to the Chair.
Entry in Votes and Proceedings, appointing the Committee, *read* by the Clerk.
Printed copies of the Bill *referred*, and original Petition to introduce the same, before the Committee.

Thomas Robertson, Esq., (*Solicitor for the Bill*), called in and examined. Witness *handed in* Plan of the Surveyed Line of Railway from Moama to Deniliquin. (*See Appendix.*)

Witness withdrew.

Committee deliberated.

Ordered,—That the Honorable J. S. Farnell, Esq., be requested to attend and give evidence next meeting.

[Adjourned until Tuesday next, at *half-past Two* o'clock.]

TUESDAY, 18 MARCH, 1873.

MEMBER PRESENT :—

Mr. Hay.

In the absence of a Quorum, the meeting called for this day lapsed.

FRIDAY, 21 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Hay in the Chair.		
Mr. Abbott,		Mr. Fitzpatrick.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY, 28 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Hay in the Chair.

Mr. Cunneen,		Mr. Burns,
Mr. Abbott,		Mr. Farnell.

The Honorable J. S. Farnell, Esq., a Member of the Committee, examined in his place.
Bill considered.

Preamble read, and *amended** on motion of Mr. Cunneen.

Question,—"That this Preamble, as amended, stand part of the Bill,"—*put* and *passed*.

Bill read, *amended** on motion of Mr. Cunneen, and *agreed to*.

Schedules read and *agreed to*.

Chairman to report the Bill as amended to the House, with an Amendment in the Preamble.

* *Vide* Schedule of Amendments.

SCHEDULE OF AMENDMENTS.

Page 1, Preamble, line 8. *After* the word "granting" *insert* "to."

" " " 8. *After* the word "them" *omit* "an Act of Incorporation"; *insert* "(upon the completion of such Railway) portion of the Waste Lands of the Crown and by passing an Act incorporating them under the title of the Deniliquin and Moama Railway Company."

Page 30, Clause 162. *Insert* at the end of Clause 162 the following words :—" Provided that if the Company shall not have completed the Railway (with a single line of rails) and opened the same for public traffic within three years after the passing of this Act then the privileges powers and authorities given or authorized to be given to the Company by this Act shall wholly cease and determine Provided always that it shall be lawful for the Governor with the advice of the Executive Council to extend the said time for any period not exceeding twelve months."

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

DENILIQVIN AND MOAMA RAILWAY BILL.

FRIDAY, 14 MARCH, 1873.

Present:—

MR. ABBOTT,
MR. BURNS,
MR. CUNNEEN,MR. FITZPATRICK,
MR. HAY,
MR. MACLEAY.

WILLIAM HAY, Esq., IN THE CHAIR.

Thomas Robertson, Esq., called in and examined:—

1. *Chairman.*] You are Solicitor for the Company known or intended to be formed, under the name of the T. Robertson, Deniliquin and Moama Railway Company? Yes.
2. You have been a resident in Deniliquin for many years? About twelve years.
3. You have an intimate knowledge of the requirements of the place, and the desirability of constructing this railway? Yes. 14 Mar., 1873.
4. Will you state your opinion with regard to the public and local advantage that it would be? There is no made road of any kind at present between Deniliquin and Moama, except in patches of a few yards in extent, and these are merely in one or two places. The Engineer for Roads has not recommended the Government to vote any money for making this road, on the ground that, in the absence of proper material to make a macadamized road, it would be cheaper to make a railroad than any other road. It is estimated that the cost of this railroad would not exceed £2,500 per mile. As Mayor of Deniliquin, I have had two years' experience of the cost of road-making. We have tried making roads of burnt brick, as in Holland, and we have found the cost to amount to £3,700 a mile. We have also tried a road made of wooden blocks, and we found that that cost £4,600 per mile—nearly double the estimated cost of this railway. The traffic of nearly the whole of the lower part of the south-western district converges towards Deniliquin, and the road between Deniliquin and Moama is like the neck of a funnel. About half a million of sheep travel across it during the year, and about twelve thousand head of cattle, and other stock in proportion. The passenger traffic is considerable; there is a daily coach from Echuca. In fact, this is the most used public road in the south-western district; there is no other road of similar extent so generally used. The Moulamein road leaves Deniliquin to the west, the Hay road to the north-west, the Wagga Wagga road to the north, and the Albury road to the east; so that this piece of road between Deniliquin and Moama might be compared to the handle of a fan. In consequence of the enormous stock traffic, and the road having been fenced in in many places on both sides—the land having been alienated—at many periods of the year there is literally no grass whatever for travelling stock, and the public sustain great loss in consequence of the starvation of their stock during droughts. During the wet season the road becomes a perfect quagmire, and the injury done to the wool of sheep travelling along it is so great that many people submit to pay a toll to go through private land, to escape travelling their sheep through the mud of the main road. It is on these grounds that it is considered that the construction of a railroad between Deniliquin and Moama would be of great public advantage. As to the local advantage,—Deniliquin was built partly in anticipation of a railway terminus being made there. The telegraph line between Echuca and Deniliquin, after the Government had declined to make it, was made by a private Company. Now that the Victorian Railway is running towards Wodonga, the traffic will be diverted more from Deniliquin than it has ever been, to the inconvenience of the people through whose runs roads will have to be opened up to reach this new point; and the large capital which has been sunk in Deniliquin, unless a railway is permitted to be made there, will be thrown away. These are the considerations affecting the local advantage.

T. Robertson, Esq. 5. Could you give any idea of the quantity of goods that passes both ways over these 45 miles of road between Deniliquin and Moama in the course of the year, and the cost of carriage in winter, and the general cost in summer? The cost of carriage last winter varied from £4 a ton, which I paid myself, to £2. The rate it is proposed to charge by the railway is 15s.

14 Mar., 1873.

6. *Mr. Macleay.*] At what rate is that per ton per mile? The road is 48 miles, and the rail will be about 45. I have sent to the Colonial Secretary's Office for statistics left there by the deputation, but I have not yet received them from Mr. Halloran; when I get them, I will hand them in to the Committee. They were taken by the toll collector on the bridge. I know the charge proposed for carriage is comparatively higher than the usual rate by railway, but it will be very much lower than people are paying at present. There is a scale of charges in the Bill, framed from Colonial tables and English tables, allowing what was thought a fair rate of increase, in consideration of the present rates of carriage. The Company could not afford to carry at English rates. The quantity of merchandise conveyed to Deniliquin in each year is about 8,000 tons. We calculate that the receipts from the traffic of goods and passengers would be about £23,000 per annum. The working expenses are estimated at £6,939; which shows a profit of about 11 per cent., or £16,000 on the proposed capital of the Company. It is about seven years since I gave evidence before a Committee of your Honorable House on this very subject.

7. *Chairman.*] Are you aware of the amount of money that has been spent in trying to get Parliament to authorize this railway? Certainly it must be over £1,000. It is more; but it is within my own knowledge that that amount has been spent. The Committee of the Assembly which considered this matter before, reported unanimously in favour of the Government giving a guarantee for the construction of this line, on the ground that it would pay, and there would be no risk in the Government giving the guarantee. We are not asking that now.

8. Are you aware what was the reason that you abridged the request to the mere granting of the land? Because your Honorable House threw out the Bill; they disapproved of the principle of the guarantee.

9. Will you be kind enough to explain to the Committee the peculiarities of this Bill; where it differs from those Bills which have ordinarily been introduced into the Assembly here, with regard to the construction of railways by private Companies? The Bill was drawn by Mr. Oliver, the Parliamentary Draftsman, and it is mainly shaped upon the model of the Hunter River Railway Company's, and other Colonial Bills. There are no powers asked for in this Act which have not been granted to other Companies before.

10. Were these other Companies formed before the Bill was applied for? In all these other Bills it states that so-and-so are desirous of forming a Company, and then the Bill provides that, when a certain proportion of the capital—and in this Bill the proportion is kept exactly the same—25 per cent. of the shares taken, and 10 per cent. of the capital paid up—then the Company is to be considered formed, and not till then. This Bill provides for the Company conforming to the New South Wales gauge whenever required to do so by the Government, in case it should be thought desirable to connect any of the New South Wales lines with this line at Deniliquin. It proposes to grant to the Company a tract of land 3 chains wide, extending from Deniliquin to the Murray, so far as that land has not been alienated from the Crown. The line will pass over a small portion of land now held in fee simple, and the Bill provides for the Company buying that by giving compensation in the usual way.

11. Is there any clause limiting the time within which the Company may be formed to carry out this undertaking? Two years is the time that I instructed Mr. Oliver to provide for, to leave it open to us to form the Company, and then the matter to lapse if the Company be not formed. If the requisite amount of capital be not paid up in two years, then the Bill will lapse. I do not see the clause just now, but I was speaking to Mr. Oliver about it, and he read it to me.

12. *Mr. Macleay.*] What clause provides for the gauge? Clause 187.

13. That provides for the adoption of the New South Wales gauge if required. Is there anything about the gauge to be laid in the first instance? No, but it is intended that it shall be the Victorian gauge.

14. It would be of no use to stock without? No; the great traffic is to Echuca, to meet the Victorian Railway.

15. *Mr. Fitzpatrick.*] I understood you to say that the charge for goods was to be 15s. a ton, but I find in the 177th clause there appear to be four classifications, ranging from 32s. 6d. to 38s.? These rates have been fixed at Deniliquin since our interview with the Colonial Secretary. 15s. was the estimate we then gave in; but I suppose, on reconsideration of the matter, the Committee have come to the conclusion that nothing less than this would pay. The goods are not classified in the clause, but will have to be classified in the By-laws. The charges are provided, but the classification will have to be made in the By-laws. I beg to hand in a tracing of the Map of the proposed line of railway, showing the adjacent country. (*See Separate Appendix.*)

FRIDAY, 28 MARCH, 1873.

Present:—

MR. BURNS,
MR. CUNNEEN,

MR. ABBOTT,
MR. FARNELL,

MR. HAY.

WILLIAM HAY, ESQ., IN THE CHAIR.

The Honorable James Squire Farnell, Esq., M.P., Minister for Lands, a Member of the Committee, examined in his place:—

The Hon. J. S. Farnell, Esq., M.P. 16. *Chairman.*] Can you inform the Committee how much land has been applied for along the line of the proposed railway between Deniliquin and Moama, and at the Deniliquin terminus of it, from the beginning of the year 1873 up to the present time? Since the beginning of January there have been seven applications for large areas—30,000 acres, 10,000 acres, 6,400 acres, 20,000 acres, 9,000 acres, 6,000 acres, and 9,000 acres; together with some smaller applications; the whole amounting in round numbers to about 100,000 acres, all of which has been, I believe, applied for in consequence of the movement made by the people in that part of the country in reference to the construction of this railway.

28 Mar., 1873.

17: You have not been accustomed to receive applications for such large quantities of land in that quarter, during a similar period? No. I may state that, in general, persons appear to be rather anxious to take up land in different parts of the Colony, but not this particular class of land.

The Hon.
J. S. Farnell,
Esq., M.P.

18. Not purely pastoral land? No.

28 Mar., 1873.

19. The public will reap a benefit from the sale of this land at £1 an acre, which would not have been the case if this railway had not been applied for? I do not think so much land would have been applied for if the railway had not been proposed. Smaller areas might have been applied for. This land is all within a radius of 50 miles of the proposed line of railway.

20. Is it within your knowledge that a line has been surveyed and reserved by the Government for a railway? Not for a railway; for a road. A line has been reserved from Moama to Deniliquin, I think about 50 miles 3 chains wide, for the purposes of a road.

21. Is there not, in addition to this, a surveyed line for a railway reserved? A contemplated railway.

22. It has been so far surveyed that the sections have been made, which are very simple, because it is almost a dead level. Suppose these parties who propose to construct this railway were not to get a grant of the land, do you think there might be great difficulties interposed between them and the purchase of the land—do you not think the extent of land to be purchased would be a great cost to them? I think so, at the rate at which land is now being taken up.

23. If the Government were not to give them this land, and so the undertaking were to prove abortive, do you think the circumstances of the case are so urgent for a road or railway between Moama and Deniliquin, that an obligation would be entailed upon the Government to make either one or the other? I think it would. I think the time is not far distant when it will be forced upon the Government to make some line of communication between the two places, either by road or rail, whichever might be determined upon by the Government for the time being. In my own opinion, it would be much cheaper in that country to make a railway than a common macadamized road. I believe a macadamized road would cost about £4,000 a mile, perhaps more, on account of there being no road-metal in the neighbourhood.

24. Did the gentlemen connected with the promotion of this railway, who came to Sydney as a deputation, wait upon you at your office? Yes, they waited on me, and made the usual application in reference to the land; and I, as Land Minister, informed them that I had no power to grant them this land, but that it would be necessary for either the Government or themselves to bring in an Act of Parliament to enable them to get this land. At the same time they informed me of this projected railway, and I suggested that they might put a clause in the Bill authorizing its construction to enable the Government to convey the land to them. I may state that, after the application had been made to me as Land Minister, I put the matter to my colleagues in the Government; and they all agreed, or offered no objection, on the part of the Government, to the alienation of this land to the projectors of the railway.

25. On the conditions specified? On the conditions to be provided under an Act of Parliament for the construction of the railway.

26. Has there been submitted to you a description of the line? An application was made to me to supply a description, and I gave instructions to the description writer in the Lands' Department, and he prepared a description, which is embodied in the 151st section of the Bill before the Committee.

27. Have you read the 151st section? Yes.

28. Do you think it is correct, so far as your knowledge extends? Yes, it is correct so far as we have information in the Survey Department. It is sufficiently correct for all the purposes of this railway.

29. *Mr. Abbott.*] Do you think it necessary to incorporate this Company to make this railway? I think it highly necessary to incorporate the Company. I do not think the Government would be justified in handing over the land without the Company was incorporated.

30. It is just as much a necessity that the Government should grant to the Company the land on which the line should be constructed? I think so. I think the Government will eventually be gainers by the granting of this land, which at its present value is not worth more than £1,200.

31. *Chairman.*] Estimated at £1 per acre? Yes. I think the construction of this railway will so enhance the value of land in that part of the country, more particularly at Deniliquin and Moama, that the Government will be gainers by granting this land.

32. *Mr. Cunneen.*] Do you think the 151st section gives ample powers to the Government for granting this land to the Company? I think so.

[Plan.]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAY FROM THE CLARENCE TO NEW ENGLAND.

(PETITION IN FAVOUR—RESIDENTS OF THE CLARENCE RIVER.)

Ordered by the Legislative Assembly to be printed, 21 January, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned residents of the Clarence River,—

HUMBLY SHOWETH:—

1. That your Petitioners have heard with satisfaction that the Ministry have a second time proposed for your consideration the expediency of constructing a railway from the port of the Clarence to New England.

2. That your Petitioners look upon this work as one of great national importance, as the most efficient means of securing the trade of the northern districts of the Colony of New South Wales, and preventing the growth of such complications as now exist on the southern Border. This trade is now being rapidly attracted to Queensland—about 100 tons of tin alone being weekly sent to Brisbane, besides a considerable amount of general produce, a large proportion of which properly belongs to this Colony.

3. The proposed railway is also to us of very great local importance as a means of developing the resources of these districts, now much retarded by the want of cheaper and more rapid communication with each other and ocean navigation. The coast country being eminently successful in raising maize, sugar, arrowroot, tobacco, wines, &c., and the table-land wheat and other productions of temperate climates, an interchange of these products would be mutually beneficial.

4. Considering the condition and prospects of these districts, the very large amount of money paid to the general revenue for the purchase of land, pastoral leases, mining leases, and other land revenue for many years past, and the share we bear of interest paid upon the cost of railways in more favoured districts, from which we can derive no benefit, we respectfully submit that in common justice these districts have a good claim for favourable consideration.

5. For the information of your Honorable House we would call attention to the following brief statistics of the territory affected by this proposed railway. They are drawn from the most authentic sources available to us at the present time:—

- (1.) Population:—The estimated population is in round numbers 40,000, distributed as follows:—Clarence River, 13,000 (exclusive of the Richmond River); New England, 11,000; Tenterfield, 8,000; Gwydir, 7,500 (including gold fields and tin mines), being one-thirteenth of the population of the whole Colony.
- (2.) Live Stock:—Clarence River—7,977 horses, 72,242 cattle, 26,126 sheep, 4,535 pigs. New England—16,932 horses, 180,068 cattle, 1,326,591 sheep, 4,790 pigs. Gwydir—6,417 horses, 177,669 cattle, 818,898 sheep, 594 pigs; showing a total of 31,326 horses, 429,999 cattle, 2,171,615 sheep, and 9,919 pigs. During the past year 5,346 bales wool, 173 bales skins, 27,281 cases preserved meat, 1,364 casks tallow, 16,808 hides, &c., have left the port of the Clarence.
- (3.) Land:—The quantity of land sold, exclusive of conditional purchases, appears to be about 210,120 acres. The unalienated land, about 13,000,000 acres, a large portion of which is available for immediate settlement if means of transit were provided.
- (4.) Agricultural:—About 35,000 acres are under cultivation, the produce of which, according to the latest returns, are:—Wheat, 150,000 bushels; maize, 967,495 bushels; barley, rye, oats, &c., 16,600 bushels; potatoes, 2,580 tons; wine, 19,000 gallons; tobacco, 2,650 lbs.; arrowroot, 3,000 lbs.; sugar, 1,417 tons; molasses, 1,520 hogsheads. The two latter items were grown on, and exported from, the Clarence in 1871. At the present time over 2,000 acres are planted with sugar-cane, and eight mills are in active operation, capable of making thirty tons per day when in full work.
- (5.) In addition to the above there are in these districts forty-three manufactories working up raw material produced therein, eighty-three connected with or dependent on agriculture, and fifteen of which the raw material is not connected with agriculture.

- (6.) The mining operations for gold, tin, copper, antimony, &c., are very extensive throughout these districts, and coal is known to exist in many places, two seams of which are now being tested.
- (7.) The port of the Clarence is always available for ships drawing eleven feet, or at high-water twelve feet, and it is believed that sixteen feet will ultimately be obtained. During the first nine months of the present year 104 voyages were made by large steamships to and from the Clarence and Sydney, forty-two sailing-ships left for Brisbane, Melbourne, &c., with cargoes of maize, &c.; the arrivals of passengers by sea numbered 3,241, the departures 1,940, in the same period; twelve steam droghers and passenger-steamers ply regularly on the Clarence River.
- (8.) The distances between Grafton and the principal townships are as follows:—Glen Innes, 102 miles; Inverell, 140 miles; Armidale, by present road, 133; and Tenterfield, 115 miles. The rates of carriage at the present time are from Clarence to Armidale, Glen Innes, and Tenterfield, from £9 to £12 per ton; Inverell, £11 to £13; return loading—wool, £8 to £10; tin, £9 to £10 per ton.

6. In conclusion, we would respectfully call your attention to the fact that these districts contain 11,074 electors, and return only four Members to your Honorable House, while about the same number of voters in districts immediately interested in existing railways return no less than fourteen Members. This, coupled with our great distance from the seat of Government, causes us to be virtually unrepresented in Parliament. We therefore confidently appeal to your sense of justice to take the facts cited into your favourable consideration.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to take the premises into your most favourable consideration, and adopt such measures as may be deemed necessary for complying with the wishes of your Petitioners.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 1,898 Signatures.]

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY FROM THE CLARENCE TO NEW ENGLAND.

(PETITION IN FAVOUR OF—RESIDENTS OF TENTERFIELD.)

Ordered by the Legislative Assembly to be printed, 12 February, 1873.

To the Honorable the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the District of Tenterfield,—

SHOWETH:—

That your Petitioners learned with gladness that the Government have placed on the Estimates for 1873, a sum of money for the commencement of a railway between Grafton and the table-land of New England, and pray that such railway may be constructed.

That your Petitioners believe such a railway would attract to the port of Grafton a large portion of the trade of South Queensland, and secure the trade of the northern parts of this Colony, now directed to Brisbane because of the difficulties of roads, it being not an uncommon thing to have goods on the way between Sydney and Tenterfield for six months from time of starting; sending produce to Sydney, or even to the Clarence or Richmond districts, being quite impossible.

That there are no engineering difficulties in ascending the table-land at Tenterfield, there being several routes by which the ascent could be made by one continued easy gradient from the Clarence to Tenterfield,—one half of the road being through country almost level; and from a point near Casino, a branch of about fifteen miles might be constructed to connect the whole of the Richmond district, thus enabling the inhabitants of that district to find a market for their produce, and enabling the inhabitants of New England to supply them with grain, &c., not produced by them, which they now obtain from foreign markets.

That from the table-land, near Tenterfield, a branch line might be made, connecting Glen Innes and Inverell, thus affording to them advantages equal with ourselves, and bringing the whole of the richest part of New England within easy access of their natural port, and securing for the Colony the revenue of its own territory, increasing to an unlimited extent the present products of many of the districts to be fed by it, being in fact the whole of the northern and north-western portions of the Colony, and would open up the way for the introduction of new industries, now impossible for want of means of access to the coast. Your Petitioners therefore humbly pray that such railway may be constructed.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

[*Here follow 311 Signatures.*]

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(IRREGULARITIES AT WINDSOR STATION; DISMISSAL OF, AND INQUEST HELD ON BODY OF PORTER DUGDALE.)

Ordered by the Legislative Assembly to be printed, 30 January, 1873.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 26th November, 1872, That there be laid upon the Table of this House,—

“ Copy of complaint with reference to certain alleged irregularities at the Windsor Railway Station, with the Traffic Manager’s report thereon; also, Minute of that officer on the dismissal of Porter Dugdale, depositions taken at Windsor before the Coroner, at an inquest held on the remains of Porter Dugdale; together with all letters, documents, or correspondence, and all Minutes from any Minister of the Crown, in connection with the above case.”

(Mr. Driver.)

SCHEDULE.

NO.	PAGE.
1. Letter from Mr. Moses and others to the Traffic Manager, complaining that undue preference, &c., is given by Mr. G. Bonamy, the Station-master, to a firm styled Wilkins & Co., of which the Station-master’s son is a partner. 19 August, 1872	2
2. Memo. from Mr. Bonamy asking Traffic Manager for an opportunity to explain the charges. 23 August, 1872	2
3. Telegram from Mr. Moses that the evidence is ready for an inquiry, with Traffic Manager’s reply. 27 August, 1872	2
4. Traffic Manager’s report on the case, and enclosing evidence taken at inquiry held by him at Windsor, and recommending Mr. G. Bonamy to be removed to another station. 2 September, 1872	2
5. Evidence taken at inquiry held at Windsor. 23 August, 1872	3
6. Mr. Bonamy, reporting Porter Healy abusive, &c., to him. 29 August, 1872	4
6A. Statement of Porter Healy. 30 August, 1872	4
7. Commissioner’s Minute—that grave irregularities have occurred at Windsor Station—disrating Mr. Bonamy; Porter Dugdale’s evidence not satisfactory. 4 September, 1872	5
8. Telegrams with reference to complaint of Mr. Moses that he cannot get trucks. 7 September, 1872	5
9. Petition signed by 301 inhabitants of Windsor, &c., for Mr. Bonamy to remain as Station-master. 29 August, 1872	6
10. Commissioner’s minute deciding to hold a personal inquiry. 6 September, 1872	6
11. Evidence taken at inquiry held before the Commissioner. 10 September, 1872	6
12. Commissioner’s minute—that inquiry before him fully proves the charges against Mr. Bonamy. 11 September, 1872	8
13. Letter from Commissioner in reply to Petition from Inhabitants of Windsor, &c. 9 October, 1872	9
14. Under Secretary, Crown Law Department, forwarding copy of verdict of Jury on inquest held at Windsor on E. Dugdale. 21 September, 1872	9
14A. Depositions taken at inquest, and minutes of the Attorney General thereon	10
15. Traffic Manager, expressing how grieved he feels at the rider of the Jury’s verdict. 4 October, 1872	12
16. Commissioner’s minute—that Traffic Manager acted with the best intentions. 7 October, 1872	12
17. Head Porter Healy’s declaration. 8 October, 1872	12
18. Extract from <i>Sydney Morning Herald</i> with reference to late suicide of Railway Porter Dugdale. 10 October, 1872	12
19. Letter in <i>Herald</i> from J. T. Neilson, Foreman of Jury, that verdict of the Jury was unanimous. 12 October, 1872	13
20. Letter to Traffic Manager from Mr. G. R. Cadell, a juror, stating that Mr. Neilson’s statement is incorrect. 15 October, 1872	13
21. Statement made by Chas. Paull, of an interview he had with late Porter Dugdale before he committed suicide. 25 November, 1872	14

No. 1.

MR. MOSES AND OTHERS TO THE TRAFFIC MANAGER.

Windsor, 19 August, 1872.

SIR,

We, the undersigned corn-dealers of Windsor and its vicinity, desire to direct your attention to the fact that, owing to the embarking of Mr. Bonamy, the Railway Station-master of Windsor, or his son, in the corn trade (under the style or firm of Wilkins & Co.), very great inconvenience has resulted to us by the constant occupation of the Railway sheds at Windsor by the produce of the firm in question; and we further beg to submit that, besides the actual losses and inconvenience thus occasioned, it will readily be seen that other disadvantages of a serious character affecting our interests are incidental to the position in which we are placed by such occupation of the sheds by the person having charge of the same, or his connections.

We have therefore most urgently to request that you will, in common justice, take the steps necessary, on our behalf, to remedy the grievance we complain of, by its removal, and enable us to have a fair share of the accommodation to which we are entitled, and which is provided at the public expense by the Government.

We are, &c.,

WILLIAM MOSES.
GEORGE DICKSON.
E. HOPKINS,
JAMES LIDDLE.

No. 2.

MR. BONAMY TO THE TRAFFIC MANAGER.

Government Railways.

Windsor Station,

August 23rd, 1872.

SIR,

I have been informed that a letter has been written by some person in Windsor, in the shape of a complaint or report against me, and several others have been solicited by the author to sign it.

It is to be forwarded or presented to you. I have therefore only respectfully to ask that you will give me an opportunity, either personally or by writing, to explain any charges that may be brought under your notice against

Your obedient servant,

GEORGE BONAMY.

Redfern Station.

Received the following Message from Windsor Station, at 1:12, 27th August, 1872.

From W. Moses to R. Moody, Esq., Redfern.

I have the evidence required to proceed with the case to-morrow, if convenient for you.
Reply by telegraph.

New South Wales Electric Telegraph.

Received the following Message, 27 Aug., 1872.

From Traffic Manager to W. Moses, Windsor.

Say 11 to-morrow, meet me.

No. 4.

THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

Government Railways.—Minute Paper.

Complaint against Station-master, Windsor, Mr. George Bonamy.

I HAVE the honor to enclose, herewith, a letter of complaint against Mr. George Bonamy, Station-master, Windsor, signed by Messrs. W. Moses, George Dickson, Mr. E. Hopkins, and Mr. James Liddle, that Mr. Bonamy or his son were trading under the firm of Wilkins & Co., and that undue preference was given to the firm, in the Railway sheds, supply of trucks, and preference of despatch, which placed the complainants, respectively, at great disadvantages in the conduct of their business as corn merchants.

In

In consequence of the statements contained in that letter, I proceeded to Windsor, and, in the presence of the Station-master and all others concerned, inquired into the matter with such evidence as was placed before me.

I examined the Railway porters, Station-master, and complainants.

Station-master admitted the partnership of his son James Bonamy with Wilkins & Co., and that they do a very large trade, using the Railway sheds for the purpose of packing and bagging the corn, but stating the sheds are also used by complainants and others when they require them. He also admitted making out cheques for the payment of purchases, the cheques being signed by his son.

The only particular facts elicited in the inquiry affecting Mr. Bonamy were :—

“Porter Dugdale has at odd times given a hand to bag and tie up corn for the firm, doing so in the Commissioner’s time, and assisting Bonamy’s son who was also at the same time paid by the Commissioner.

“The shed has been used by the firm perhaps more freely than by others ; and there is some colouring of evidence that trucks have been given for their corn, which has had preference in despatch, Bonamy’s son working after hours to load trucks or loading them up very early in the mornings.

“The Station-master has always given them cheques for the purchases, he filling up the cheques and his son signing them ; and, in fact, there is every reason to believe that the Station-master is as much mixed up in the business as his son.

“The business is chiefly done with a party at Wallerawang, Mr. Lonergan ; and Station-master Bonamy having some time ago obtained permission to visit his son at Wallerawang, the business appears to have been at that time arranged, as it commenced immediately upon his return to his Station at Windsor.

“The Station-master has been too accommodating generally before his son entered into the corn business, allowing the shed to be used as a store without charges, and giving unauthorized credits to customers. This accommodation has been tightened since the son entered into the business, as it appears he has nearly monopolized the shed, and this forms the chief cause of complaint.

“Station-master has a son employed at Windsor Station as a temporary porter, and another at Wallerawang Station as Goods’ Clerk, between which places the corn trade is carried on ; and he has been fully cognizant of the son at Windsor working, and taking porter Dugdale to work, bagging and loading corn for the firm in Commissioner’s time, when both parties should have been otherwise employed.”

From the facts elicited, and from the feeling displayed between all parties concerned, I am inclined to think that justice requires (and will be fully met by) the removal of Station-master to another Station, and that the Station-master should be severely dealt with as an example to others ; as, situated as he is,—with a son in the Parcels’ Office at Sydney, and another son in the Goods’ Office at Wallerawang, now acting as Station-master,—he has facilities to carry on business under fraudulent circumstances, should he be so disposed, which it would be difficult to frustrate.

I dispensed with the services of young Bonamy as market hand for Mondays and Thursdays. I think the Station-master should be at once removed to a Station where he would have no opportunity of getting mixed up with commercial business.

R. MOODY. 2/9/72.

No. 5.

EVIDENCE TAKEN AT INQUIRY HELD AT WINDSOR.

Present :—Mr. Bonamy, Jas. Bonamy, John Healy.

Letter of 19 August, 1872, read.

James Farlow, farmer, Wilberforce :—I have sold corn to James Bonamy, 300 and 400 bushels, for which I was paid by his son, by cheque on Bank of New South Wales, Windsor ; I delivered the corn at Railway Station at the Railway Shed.

Examined by Mr. Moses : Corn was received by James Bonamy, weighed by him and by his father.

Cross-examined by Mr. Bonamy : It was your place to receive the corn whenever I took it for anybody.

Re-examined : I only delivered it to James Bonamy ; not for the purpose of going by rail.

Robert Dunstan, farmer, Wilberforce :—I have sold corn, about 200 bushels, to James Bonamy, who paid me by cheque ; I delivered the corn at Railway Station to James Bonamy, and put it into a Railway truck.

John Healy, first-class porter, Windsor Station :—I have seen corn brought into the Railway shed by several farmers, for James Bonamy, which I understood was purchased by him ; the corn was brought there in bags, re-bagged, and the bags made up and sewn by James Bonamy.

Examined by Mr. Moses : The other porter, Edward Dugdale, was engaged assisting James Bonamy with this corn—filling up the bags and sewing it ; I have always given over the trucks to our customers, except to Mr. Moses and to James Bonamy, but the Station-master would supply to them himself ; we always had plenty of trucks ; Mr. Bonamy’s corn has not been sent on before other people’s, unless other people wished their corn to be detained, or when his corn being in front we could not get at the others ; I have never known trucks to be kept for James Bonamy.

Cross-examined by Mr. Moses : I have known your corn to be detained in the shed on many occasions for three or four days or more ; Mr. Bonamy’s corn has also been kept there for similar periods ; if your corn was kept after being ordered to be sent away, that would not be in accordance with custom ; but I do not know that it was received with orders, as I never received any of the orders for your corn.

Cross-examined by Mr. Bonamy : I have never seen a preference given to any one ; I cannot say that trucks have been given to James Bonamy in preference ; I have seen Dugdale busy sewing up for others at train time, but I never saw him bagging for others ; I have seen Dugdale assisting Bonamy to load.

By Mr. Moses : I never touch James Bonamy’s corn, because of a misunderstanding with James Bonamy ; Mr. Bonamy has given two or three trucks to his son in a morning, but there has been no shortness of trucks ; I have told you that Mr. Bonamy has given his son three trucks when your corn was in the store ; you would be at a disadvantage if Mr. Bonamy’s corn was weighed up first ; your corn has been got away quickly after you have visited the Station, but I do not know whether you gave instructions ; I remember one particular occasion when the corn was loaded up at once, and I was under the impression that you had given orders.

Re-examined

Re-examined by Mr. Bonamy : When I said three trucks were given, I do not know that any other corn was left at that time belonging to Mr. Moses.

By Traffic Manager : I know all about other people's corn, but I do not know anything of James Bonamy's or Mr. Moses' corn; I always got my orders for their corn from Mr. Bonamy.

Michael Rafter, carter to Mr. Moses : I ordered a truck for corn from Mr. Moses about three weeks, to send corn to Rydal that evening; it was on a Saturday morning at 12 o'clock; Mr. Bonamy said he would send the corn that evening to Rydal.

Cross-examined by Mr. Bonamy : It was on a Saturday morning; it was the time I repeated to you "it is Rydal"; you drew my attention to a lot of goods of Mr. Moses, not in the shed, but in the trucks.

Wm. Moses, corn and flour merchant : I have been in the habit, at the suggestion of Mr. Bonamy, of employing his son James to load my corn, and during that time I never had cause of complaint, but after his son became a corn buyer I have not had my business fairly attended to; I always gave my orders through Mr. Bonamy, who I looked upon as the person to carry out the management for loading and weighing; it has been my custom to have my corn weighed there, the corn being taken there by the farmers and then weighed at the station, and the weights sent to me; I paid the son James for this work, but as all the tickets are made out by Mr. Bonamy and signed by his son, I believe the business and the work done is performed by Mr. Bonamy; I ordered a truck of corn to go away, as stated by Michael Rafter, but on my visiting the station on Tuesday following I found the truck still at the Railway station; I requested an explanation from Mr. Bonamy; he said he did not understand the man; I have always instructed Mr. Bonamy to get my corn away as quickly as possible, but I have had it delayed for nearly a week at a time; my corn was always consigned by James Bonamy to —; I generally to Mr. B.; about three weeks ago my man was kept two hours, as the corn could not be taken into the shed.

Cross-examined by Mr. Bonamy : I had every satisfaction before James Bonamy became a corn buyer, but I have not since he became a corn buyer; the late crop has been a large one, but I cannot say that it has been larger at the Railway station except that James Bonamy has been a corn buyer; I am not annoyed at James Bonamy buying corn, but at what I consider an injustice at the Railway station.

Geo. Bevitt, carter to Mr. Moses : I was once detained about two hours about three weeks ago with a load of corn; James Bonamy said he could not take it in until he got orders from his father; I then asked the Station-master, he said it could not be done as there was some flour in the trucks, and he could not load the corn; the trucks were all partly loaded, but a load of corn could have been taken into the shed, but James Bonamy was filling corn for Wilkins & Co.; the goods in the trucks belonged to Mr. Moses, but could not be unloaded as the shed was full of corn, or nearly so; I had previously heard that flour was in the trucks—in all about 3½ tons; I returned from the station with flour as I was instructed; I have repeatedly urged Mr. Bonamy to send corn away as Mr. Moses instructed me.

Edward Dugdale, porter, Windsor : Mr. Wm. Wilkins and James Bonamy deal in corn, which they bring into the shed and load into the trucks; I cannot say how long corn has been kept in the shed; perhaps 150 bushels might have been there; I have frequently given a hand to bag corn for a few minutes at a time; I was never asked by Mr. Bonamy; I did it because I might not have anything else to do; nobody else has any corn to bag, so I never helped any one else; I never bagged any for Mr. Moses, nor have I ever been engaged for more than ten minutes at a time; I never got anything for it.

James Bonamy : Admits corn-buying, as a partner with Mr. Wm. Wilkins.

No. 6.

MR. BONAMY TO THE TRAFFIC MANAGER.

Government Railways.
Windsor Station,
29 August, 1872.

SIR,

I have to report that I asked Healy to lend the other men a hand to unload a truck which was partly loaded with bark. He commenced abusing me in such a way that I did not expect, referring to my breaking the rules, and went away threatening that he was able to do me more injury than I expected, and that I should see. It is most painful for me to write you such a memo. as this. Whatever Healy may tell you, I know that I have endeavoured to treat him somewhat differently than an ordinary porter, and now I have my reward.

Yours respectfully,
G. BONAMY.

P.S.—I could say more, but I know no attention is paid to "one-sided" statements by you.

No. 6A.

STATEMENT OF PORTER HEALY.

Windsor, 30 August, 1872.

1. Has Jas. Bonamy bagged and loaded his own corn in time when paid by Government? Yes.
2. Did Station-master know that he did so? Yes.
3. Has preference been given to Bonamy's corn with trucks? Inasmuch as they have been loaded late at night or early in the morning.
4. Has the shed been used by young Bonamy after hours for bagging, loading, and weighing corn? Yes.
5. Has Dugdale been employed by Jas. Bonamy in Government time or in after hours? Yes.

JOHN HEALY,
Head Porter, Windsor Station.
30/8/72.

No. 7.

COMMISSIONER'S MINUTE.

Government Railways.—Minute Paper.

I HAVE gone through the evidence taken by Mr. Moody, at Windsor, which shows very conclusively to my mind that grave irregularities, even under the most lenient interpretation, have been allowed by Mr. Bonamy, the Station-master, to prevail at his Station; and I must say that the letter to Mr. Moody, from Mr. Moses and others, which led to the inquiry being instituted, is not only true as regards the direct charges made therein, but is also justified as regards its allusion to other apparent malpractices. If these suspicions are groundless, as from Mr. Bonamy's general character it is believed they are, that officer can have no reason to complain of their existence, as the peculiar circumstances attending the transactions he has been engaged in naturally engendered them.

It would not be to the advantage of the department that Mr. Bonamy should be continued in his position as Station-master at Windsor; he must, as recommended by the Traffic Manager, be disrated to another Station.

The evidence given by Porter Dugdale is very unsatisfactory, and displays a desire to conceal the facts of the case, which however have been sufficiently made manifest by other and independent testimony.

JOHN SUTHERLAND,
4 September, 1872.

Traffic Manager.—B.C., 5/9/72, C.A.G.

As soon as the books can be handed over, I shall carry out the verbal directions of the Minister, and transfer Mr. Bonamy to Ashfield, with salary £150, less deductions, and Mr. Scotland to Windsor, with salary £200 per annum less deductions, the change to date from 1st October next.

R. MOODY,
13/9/72.

TELEGRAMS WITH REFERENCE TO COMPLAINT OF MR. MOSES.

New South Wales Electric Telegraph.

Redfern Station.

Received the following message from Windsor Station, at 12:30.

7 September, 1872.

From W. Moses to Manager, Redfern.

Asked Bonamy yesterday to secure me five trucks for maize, but has not done so; five teams are now waiting and will not be allowed to unload. What is to be done—the order very urgent?

Replied to, 7/9/72.—R.M.
Mr. B., Mr. Moses.

New South Wales Electric Telegraph.

Received the following message.

7 September, 1872.

From Traffic Manager to W. Moses, Windsor.

Orders given to Station-master to take corn, but if no trucks there nothing can be done, yet Station-master will explain.

New South Wales Electric Telegraph.

Received the following message.

7 September, 1872.

From Traffic Manager to Station-master, Windsor.

Take corn from Moses. Why refuse before 1 o'clock, and trucks not provided?

New South Wales Electric Telegraph.

Redfern Station.

Received the following message from Windsor Station at 5:20.

7 September, 1872.

From Station-master to Manager, Redfern.

No corn refused before or since 1 o'clock; three trucks loaded by Moses, besides shed half full of his corn.

PETITION.

To the Honorable John Sutherland, Esquire, Minister of Works, &c.

SIR,

We, the undersigned inhabitants of Windsor, and residents of the Hawkesbury District, having heard that Mr. George Bonamy, who for eight years has filled the office of Railway Station-master at Windsor, is likely to be removed for the simple reason that his son is in the habit of purchasing maize, whereby he has given offence to some corn-dealers,—we hereby testify that we believe him not only to be a good public officer, but from past experience we know that a more obliging, civil, and well-conducted servant of the Government is rarely to be met with.

We, therefore, respectfully request you will allow him to remain as the Station-master at Windsor, at least till such time as he may be removed in the usual way by promotion, to which we consider him justly entitled.

And your Petitioners will ever pray.

Windsor, 29th August, 1872.

COMMISSIONER'S MINUTE.

It has been stated that Mr. Moody conducted the inquiry at Windsor in an unsatisfactory manner, and that evidence was suppressed which would have told in Mr. Bonamy's favour. I will make a personal investigation into this matter. The Traffic Manager will have the goodness to attend at this office with Mr. Bonamy and Porter Healy for the purpose.

JOHN SUTHERLAND, 6/9/72.

Mr. Moody informed, 6/9/72.

No. 11.

EVIDENCE TAKEN AT INQUIRY HELD BEFORE THE COMMISSIONER.

In the presence of the Secretary for Public Works.

Mr. Moody, Traffic Manager, asked Mr. Bonamy, Station-master, Windsor, the following questions:—

You remember a recent inquiry in reference to some charges made against you? I do, sir.

That inquiry was held at Windsor: who was present? There was Mr. Wm. Moses, the party who complained, and three others who signed the letter with him, myself, and two farmers as witnesses; also my son, and the two porters from the Windsor Station.

Have you any complaint to make as to the manner in which the inquiry was held? No, I have no complaint to make; the inquiry was straightforward in the manner you conducted it.

Then if anybody has stated that I permitted any undue advantage to be taken of you, is that statement true? No, it is not true.

Was any evidence to be given by you, or on your behalf, suppressed or interfered with? No, sir.

Did you have full latitude to examine the witnesses? I did.

And took advantage of it? I did.

In your judgment, did I do that which, as Traffic Manager, you would have expected me to do? Most decidedly.

Have you any complaint to make as to the way any of the evidence was obtained? No.

Did I express any opinion of the matter after the inquiry? You did.

What was that opinion? You stated that it would be necessary to recommend my removal from Windsor, both for the sake of the department and for my own comfort, or words to that effect.

Do

Do you remember a question being put by Mr. Moses to the head porter as to a private matter between the head porter and your son, which, as being alleged to be a private matter, I declined to receive in evidence? That is the case.

At whose request was this done? At my request. I said—"That is a private matter, and nothing to do with the case."

Mr. Bonamy then made a statement that for a long time his son and the head porter were on most intimate terms and mutually assisted each other in their work; that a disagreement between them afterwards took place, the nature of which he was unacquainted with.

By Mr. Moody.] You have a son at Wallerawang, as Goods Clerk? I have.

You also have a son who is shipping corn from Windsor to a firm at Wallerawang? I have.

Was this corn consigned in the usual way? It was—the receipt being given sometimes by myself and sometimes by the head porter.

As a matter of fact, you are aware that you are in a position, if you choose, to act improperly in the department? I cannot say; I do not believe that a consignment could be sent clandestinely without detection.

Have you ever treated your son's corn differently to any one else's? I never have.

Do you know a man of the name of Hull, living in Windsor? I do.

Did he bring a load of corn to you which you refused to take in the shed? I don't remember it.

Do you remember that he threatened to complain that your sons occupied the shed, and that his was excluded? I don't remember it.

Do you remember ever telling him, or requesting him not to make the complaint? No.

Do you remember his bringing a pig to the station for consignment to Sydney? I do not specially—but if he did it was in the regular way.

Do you remember offering to send the pig in an irregular way, provided no complaint was made about the corn? No.

By the Minister.] What is the custom at your Station with reference to consignments? Every person consigning goods has to fill up a form, which is signed by either myself or the porter who receives the goods. Is a receipt given by the porter a full acquittance to the customer? Yes.

I see by some of the consigning notes that the weights are not inserted—What is the practice? We do not fill in the weights as a rule, as we invariably know what corn will weigh at per bushel, but we always invoice the weights from calculations.

I have read over the above evidence, and I declare the same to be truly and correctly taken.

G. BONAMY.

Mr. John Healy, first porter at Windsor, called in and examined by Mr. Moody:—

Were you examined at Windsor on a recent inquiry into charges made against the Station-master for being concerned in trading with corn in conjunction with his son, and of taking advantage of his position of Station-master to the injury of others? Yes.

Do you remember a question being put to you by Mr. Moses which was alleged to be a private matter? I do.

Were you allowed to reply? I was not allowed by you to reply.

Will you tell the Commissioner what that matter was? A man of the name of Dickson had a truck of corn which I wanted to send away by the train that afternoon; it required to be shunted, and I asked young Mr. Bonamy to give me a hand. I thought he was doing so, but presently saw him walking up to the Station. By great exertion I managed to get the truck to the train, which was also taking some corn for Mr. Bonamy. I afterwards saw young Mr. Bonamy, and said—"Thank you for the assistance you gave me with the truck of corn; I will be one with you for that." Mr. Bonamy told his father, the Station-master, that I had threatened to be revenged upon him. Mr. Bonamy, senior, remonstrated with me, and the affair passed over.

Would Mr. Bonamy's corn have gone whether Dickson's corn went or not? It would.

Did it require more than usual exertion to get Dickson's corn to the train? It did.

When corn or other goods are brought to the Station, who gives receipts for them? I did for all except Bonamy's and Moses' corn; since the inquiry I have done so for Moses' corn as for other parties.

Who gives receipts for Bonamy's corn? I do not; but I suppose either the Station-master or the other porter.

Do you know why you did not give receipts for Moses' corn? Because there was some arrangement between Mr. Moses and Mr. Bonamy, junior, with reference to the loading of the corn.

What was the arrangement? He acted as agent for Mr. Moses, and was paid for his services by him.

How do you know this? I heard Mr. Moses say so at the late inquiry.

Have you ever given any receipts for corn sent by Bonamy's son? Now, that I see the notes, I find that my impression that I did not give receipts for Bonamy's corn is incorrect; I have given some receipts—the Station-master having made them out. I have counted the bags on one or two occasions; but, as a rule, have taken the Station-master's word as to their correctness.

As first porter, is it not your especial duty to give receipts for goods coming to the shed? Yes, I have always considered it so, and have always done so, except in the cases pointed out, or when I was busy elsewhere and the Station-master has given them.

But as a rule has the Station-master shared this duty with you of giving receipts to others, excepting Bonamy and Moses? No.

Did you, as a rule, see the consignment notes made out for Bonamy and Moses? No.

Why? They were not made out in the goods shed as usual. The Station-master told me he made them out in his office; the whole of the corn was weighed by the Station-master, the weights being entered in his pocket-book.

Did you weigh other people's corn on the scales? No, I can scarcely recollect an instance.

You know young Bonamy was employed two days a week? Yes.

Do you know whether he attended to his own work in the Commissioner's time? He has done so.

In what way? In filling up his bags and loading them. Special class have to be loaded by the owner.

Have

Have you assisted him in this? Prior to the quarrel I did, but not much. I have assisted him to load, and for that reason I asked him to aid me in shunting Dickson's truck of corn.

Can you say whether the other porter was employed by young Bonamy? Yes.

In what way? Filling up his bags, sewing and loading them.

Can you say how long at a time he was so employed? Sometimes $\frac{1}{2}$ of an hour, twenty minutes or half an hour, till I called him away.

Was that often? Yes, three or four times a day sometimes.

Has anybody in an underhand way endeavoured to obtain information from you in this matter? No one. I have heard it said that it would appear Mr. Moses did.

Did the Traffic Manager ever seek to get any information from you in reference to this matter? No; only at the inquiry.

At which Mr. Bonamy was present? Yes.

Subsequent to the inquiry have you endeavoured to explain some omissions in your evidence? Yes, I have.

Did you make a journey to Sydney to see the Traffic Manager for that purpose? Yes.

What did the Traffic Manager say to you? He treated me, as I consider, very badly.

Did I rebuke you for having left your Station without leave, and for offering to give evidence which had not been volunteered at the inquiry? Yes, that is correct.

Did I tell you I would punish you for so doing? You did.

Have I done so, and in what way? You have sent me a notice that I will be reduced to a second class porter and removed to another station, which I consider to be very harsh treatment, as I do not think I deserve it; as the day after the inquiry the Station-master insulted me. I was in the habit of taking notes of goods that arrived at the Station, in case they might be left without a consigning note; I was thus engaged, and Mr. Bonamy and the other porter were engaged in unloading special class goods. The Station-master called to me in a loud offensive tone—"Come down you out of that, and assist in unloading." There were many people about who must have heard his domineering tone. I went to him, and asked—"Are you speaking to me?" he replied—"Yes, I am; go and unload that bark." I said—"Is it because I spoke honestly and truthfully at the inquiry yesterday that you address me in this way?" "Yes," he replied, "you spoke too honestly." It was on account of this I came to Sydney; it occurred at 3 o'clock p.m., and I came to Sydney by the 4 o'clock train to seek the protection of the Traffic Manager against the insults of the Station-master.

By the Minister.] What do you mean by special class goods? Corn, bark, and such like, which should be unloaded by the owner according to the sheet.

Will you look at the rate sheet? I see by the rate sheet that special class goods are to be loaded by owners, not unloaded—nothing is said about it.

By Mr. Bonamy.] Till within the last month or two James Bonamy and you have been on very good terms? We have.

Were you not always ready to assist each other in your work? We were.

When the shed has been full, or nearly full, with Moses', Bonamy's, and other people's goods, have you not with the other porter and James Bonamy turned to and got it loaded to make room for the incoming goods? Sometimes, but not often. I have generally been employed at something else.

You were aware that James Bonamy was employed two days in the week? Yes.

Don't you think he has often worked more than that time in assisting to do the work? Some time ago he did, but very little since he became a corn-dealer.

Have you seen James Bonamy at work on his own account on Mondays and Thursdays, being the days he was paid by the Government? I have seen him, as before stated, in bagging, sewing, and loading.

Do you admit that he worked for the department on other days? He did formerly, and very largely so before he was employed by the Government at all.

Do you remember seeing a man of the name of Peter working for James Bonamy? Yes.

You accuse me that the day after the investigation I spoke insultingly to you: am I in the habit of so doing? No, and that made me feel it the more.

Do you know my object in wanting the bark to be unloaded that afternoon? No; but my impression was that on account of young Bonamy just having loaded a truck, William Moses or his men wanted another, and I suppose the Station-master thought it unwise not to let him have it after first letting young Bonamy have one.

You consider that I wanted this truck unloaded for the purpose of giving Mr. Moses a truck? Yes, especially as your son had just had one.

Respecting the way in which I spoke to you: you were taking in oranges from Nicholls at the time, were you not? Yes, I was.

Did I not say—"John, lend these chaps a hand; that man," alluding to Nicholls, "does not require help"? No, that is not what you said.

Did you not say you would go to Sydney? Yes.

Did I not reply—"You wont frighten me"? No; you said something about it was a strange thing to leave you on a Thursday."

I declare that the above evidence is truly and correctly taken, and is a true statement of the facts of the case.

JOHN HEALY.
10/9/72.

No. 12.

COMMISSIONER'S MINUTE.

Government Railways.—Minute Paper.

THE evidence taken before me speaks for itself. Mr. Bonamy admits, and he frankly and earnestly admitted it, that the manner in which Mr. Moody conducted the inquiry at Windsor was perfectly fair to all parties concerned, and free from any objection whatever. He admits that when Porter Healy was volunteering certain evidence as to the cause of his quarrel with young Bonamy, he himself asked Mr. Moody not to go into that matter, as it was of a private nature and did not bear upon the case. Mr. Moody, believing Mr. Bonamy's statement, declined to take the evidence. The inquiry before me, however,

however, clearly shows that the cause of quarrel between Porter Healy and young Bonamy did bear upon the case, and would have, if given at the inquiry at Windsor, very strongly supported the charges made by Mr. Moses and others.

The manner in which Mr. Moody received Porter Healy, who improperly left his Station without permission, to come to Sydney in order to bear evidence privately against Mr. Bonamy which he had not volunteered publicly at the inquiry, must dissipate any impression that exists that he is in any way prejudiced in the matter, or actuated by any other feeling than a desire to see justice done to all concerned.

The more this matter is inquired into, the more apparent does it become that Mr. Bonamy has acted most indiscreetly, and by his conduct and manner towards his porters has disorganized his Station.

Petitioners informed, 9/10/72.

JOHN SUTHERLAND, 11/9/72.

No. 13.

THE COMMISSIONER FOR RAILWAYS to J. M'QUADE, Esq., AND OTHERS.

Department of Public Works,
Railway Branch,
9 October, 1872.

GENTLEMEN,

In acknowledging the receipt of your memorial, requesting that Mr. Bonamy, Station-master at Windsor, may be continued in that position and not be removed to another Station, as is understood to be the intention, in consequence of complaints made by some corn-dealers in connection with the circumstance of Mr. Bonamy's son having entered into their line of business,—I have the honor to inform you that Mr. Secretary Sutherland has elicited all the facts connected with this case, and of those which have occurred in connection therewith since the receipt of your petition, and regrets to say that he is unable to grant a compliance with your request that Mr. Bonamy should not be removed from the Windsor Station.

2. Mr. Sutherland has read the evidence taken by the Traffic Manager, Mr. Moody, at Windsor, which shows very conclusively to his mind that grave irregularities, even under the most lenient interpretation, have been allowed by Mr. Bonamy, the Station-master, to prevail at his Station; and Mr. Sutherland, so far back as the 4th ultimo, previous to the receipt of your petition, decided that it would not be to the advantage of the department that Mr. Bonamy should be continued in his position as Station-master at Windsor, and that he must be disgraced and removed to some other Station.

3. At the time your petition was received it was stated to the Secretary for Public Works that Mr. Moody was prejudiced in the case—had conducted the inquiry at Windsor in an unsatisfactory manner—and that evidence had been suppressed which would have told in Mr. Bonamy's favour. Mr. Sutherland thereupon decided to make a personal investigation into the matter, and directed the attendance of the Traffic Manager, Mr. Bonamy, and Porter Healy at his office for the purpose.

The following is Mr. Sutherland's minute on the evidence adduced before him:—

"The evidence taken before me speaks for itself. Mr. Bonamy admits, and he frankly and earnestly admitted it, that the manner in which Mr. Moody conducted the inquiry at Windsor was perfectly fair to all parties concerned, and free from any objection whatever.

"He admits that when Porter Healy was volunteering certain evidence as to the cause of his quarrel with young Bonamy, he himself asked Mr. Moody not to go into that matter, as it was of a private nature, and did not bear upon the case.

"Mr. Moody, believing Mr. Bonamy's statement, declined to take the evidence. The inquiry before me, however, clearly shows that the cause of quarrel between Porter Healy and young Bonamy did bear upon the case, and would have, if given at the inquiry at Windsor, very strongly supported the charges made by Mr. Moses and others.

"The manner in which Mr. Moody received Porter Healy, who improperly left his Station without permission, to come to Sydney in order to bear evidence privately against Mr. Bonamy, which he had not volunteered publicly at the inquiry, must dissipate any impression that exists that he is in any way prejudiced in the matter, or actuated by any other feeling than a desire to see justice done to all concerned.

"The more this matter is inquired into, the more apparent does it become that Mr. Bonamy has acted most indiscreetly, and, by his conduct and manner towards his porters, has disorganized his Station.—
JOHN SUTHERLAND.—11/9/72."

I have, &c.,
JOHN RAE,
Commissioner for Railways.

THE UNDER SECRETARY TO THE CROWN LAW DEPARTMENT TO THE UNDER SECRETARY FOR PUBLIC WORKS.

Attorney General's Department,
Sydney, 21 October, 1872.

SIR,

I am directed to forward, for the information of the Honorable the Secretary for Works, the enclosed copy verdict of the Jury on inquest on Edward Dugdale, held before the Coroner at Windsor, on 16th instant.

Inquest No. 724.
Cor. J. B. Johnston, Esq.

I have, &c.,
W. E. PLUNKETT,
Under Secretary.

[Enclosure.]

[Enclosure.]

New South Wales, }
to wit.

INQUISITION held at the dwelling-house of George Thomas Bushell, known as the sign of the "Sir John Young Hotel" at Windsor, in the Colony of New South Wales, this 17th day of September, 1872, before me, Jas. B. Johnston, one of the Coroners of our Sovereign Lady the Queen for the Colony aforesaid, on view of the body of Edward Dugdale, then and there lying dead.

Upon the oaths of John Thomas Neilson, Patrick Butter, Thomas Boston, William Bell, Frederick Bowman, James T. Raultham, George Davis, George B. Caddle, William Beard, Peter Whaling, John Stewart, John A. Dawson, good and lawful men of Cumberland aforesaid, who, having been sworn and charged to inquire (on the part of our said Lady the Queen) when, where, how, and by what means the said Edward Dugdale came to his death, do upon their oaths say that the deceased, Edward Dugdale, committed suicide by drowning himself whilst labouring under depression of mind, caused by dismissal from the Government Railway Service; and the Jury consider that he has been harshly dealt with in his dismissal by the Traffic Manager, Mr. Moody.

In witness whereof, as well the said Coroner as the Jurors aforesaid have to this Inquisition set their hands and seals this day and year aforesaid.

JAS. B. JOHNSTON, Coroner.
JOHN THOMAS NEILSON, Foreman.

[Here follow signatures of Jurors before named.]

Jurors.

No. 14A.

DEPOSITIONS TAKEN AT INQUEST, AND MINUTES OF THE ATTORNEY GENERAL THEREON.

INFORMATION and depositions of witnesses taken on oath before me, James Blish Johnston, one of the Coroners of our Sovereign Lady the Queen for the Colony of New South Wales, this sixteenth day of September, one thousand eight hundred and seventy-two, at the dwelling-house of Mr. George Thomas Bushell, known as the sign of the "Sir John Young Hotel," at Windsor, in the said Colony, on view of the body of Edward Dugdale, then and there lying dead:—

George Bonamy, having been sworn, states: I am a Railway Station-master at Windsor; I knew the deceased, Edward Dugdale; he was a porter at the Windsor Railway Station; I have viewed the dead body this morning of a person I recognize as Edward Dugdale; I last saw deceased alive about half-past 7 on Saturday morning; he has been about eleven months under me at Windsor; he was a remarkably sober man; he had not the slightest appearance of being under the influence of drink on Saturday morning; during the whole time he was under me his conduct was good; on the 3rd instant he received information from the Traffic Manager that his services would be dispensed with after the 14th instant, and he was to give up possession of the gate-house he held on that day; the notice of his dismissal appeared to prey on his mind very much; I missed him from duty about 9 o'clock; he did not make use of any expressions on Saturday morning denoting anything strange; on Thursday morning he spoke to me in a strange manner; he said, in reference to his dismissal, that he had been sold; he appeared to think he had been harshly dealt with; on several occasions he said he had been sold,—ill used; it was like putting a dagger to his heart, and asked, what had he done to deserve this; he was a married man, and leaves a wife and child; I believe most decidedly that it was in consequence of his dismissal that he made away with himself; I had no idea that he would commit suicide until after 11 o'clock; he did not say or do anything to lead me to believe that he would commit suicide; he was quite rational; he always did his duty well, and was a faithful and good servant.

GEORGE BONAMY.

Taken and sworn before me, this 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

Alice Dugdale, having been sworn, states: I am the wife of the late Edward Dugdale; he was a porter at the Railway Station, Windsor; the last time I saw him alive was at half-past 8 on Saturday morning; he left home and said he was going to the Rev. Mr. Brentnall's, the Wesleyan Minister; I was shown a dead body yesterday morning, which I recognize as my husband's; on Saturday morning he stood looking out of one of the back windows, when he turned round suddenly to me and said, "I can't stand it; I shall do something wrong"; when Mr. Moody was up on Saturday week, he said, in reference to her husband, "I shall punish that man"; he afterwards got a paper, stating that his services would be dispensed with; deceased has been about two years and a half in the Railway Department, as porter; he has been a temperate man the whole time; he never took any spirits; on Saturday morning I did not notice anything unusual in his manner; he was perfectly sober; he fretted very much after he received the notice of dismissal; deceased was about 45 years of age; he was a native of Cottenham, Cambridgeshire, England; we came to the Colony in the year 1857; deceased did nothing to lead me to fear he would commit suicide; I have only one child—a daughter; there was nothing to cause his distress of mind but his dismissal; my husband's putative father's name was Edward Laurence.

ALICE DUGDALE.

Taken and sworn before me, this 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

Thomas Hall having been sworn, states: I reside on the Richmond Road; I am a fettle on the Railway-line; I knew the deceased Edward Dugdale, very well; he was a porter, stationed at Windsor; from something I heard on Saturday I went in search of him; about 4 o'clock in the afternoon I went along by the Church green and down to the river; the reason I went in that direction was that I had heard deceased had gone in the same direction; when I got into Gosper's paddock I saw tracks of deceased's boots; I knew they were his tracks; the tracks led along the edge of the water of the Hawkesbury River; I followed it along until I came to a very steep bank, almost perpendicular; I couldn't track him any further; I then came back to Harry Mills and spoke to him about the deceased; I then left Mills and informed

informed the sergeant that I had seen the tracks of deceased leading to the river; I saw deceased about half-past 6 o'clock that morning at the Railway Station; I was talking to him; he told me he had been down to Sydney on Friday; he said he went down to see the Traffic Manager, but he was at the north, and the Minister for Works was not at home; he seemed very dull and depressed; he told me a few days before that he had been dismissed, and that Saturday would be his last day at the Railway; I never noticed anything strange about him until Saturday; he did not then appear to be in his right mind; there was nothing said or done by him to lead me to believe he would commit suicide; he told me the day after the investigation that he had been sold like a bullock; he also once said to me that he had been badly used.

his
THOMAS + HALL.
mark.

Taken and sworn before me, at Windsor, the 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

Thomas Hall, re-examined: I said that deceased was not in his right mind; I did not mean by that that he was out of his mind; I only meant that he was very much depressed and disturbed in his mind.

his
THOMAS + HALL.
mark.

Taken and sworn before me, at Windsor, the 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

Henry Mills, having been sworn, states: I am a labourer, and reside on the bank of the river in Windsor; I was shown to-day, in the presence of the Coroner and Jury, a dead body; I recognize the body as the remains of a person I knew as Ned the porter; I saw the deceased on Saturday morning, near my place; he was walking along slowly, with his head down; I was standing at the time under the verandah of my house; deceased was near the gutter that runs into the lagoon; he crossed the gutter, and recrossed it, and then went into Gosper's paddock; he then went towards the willow-trees on the bank of the river; when he got to the willows he stood under a tree; I then went and had my breakfast; I never saw deceased alive again; it was between 8 and 9 o'clock in the morning; a man named Hall came to me in the afternoon, and asked me if I had seen little Ned, meaning the deceased; I told him yes; Hall and I then went to the barracks to tell the police; I have known the deceased nearly two years; I have had no conversation with him lately.

his
HENRY + MILLS.
mark.

Taken and sworn before me, at Windsor, the 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

John James Fitzpatrick, having been sworn, states: I am Senior-sergeant of Police stationed at Windsor; about a quarter past 5 on Saturday afternoon last Thomas Hall and Mills came to me at the barracks; Hall said he feared that Little Ned, meaning the deceased, had done something wrong, as he had observed footprints leading to the river, which he believed to be the deceased's; I accompanied Hall and Mills to the river; Hall there pointed out the footmarks; the footmarks commenced in Gosper's paddock and led to the edge of the river; the tracks went along the edge of the water for some few yards, to a point where the bank had been washed away; the bank was very steep, and was about 7 feet above the water; along the base was a very narrow ledge; the footprints went along the ledge to a point where the bank projected into the river; I there noticed that a person could go no further, and there were no tracks returning; I then got the punt-boat, and, accompanied by Constable Goodwin, with the dragging tackle, we went to where I had seen the footprints at the furthest point, and commenced dragging in front of that place; after a few turns of the boat we discovered the body which the Coroner and Jury have viewed to day; there were 17 or 18 feet of water where the body was; the water is deep to the edge; I recognized the body as that of Edward Dugdale; I took the body to the Windsor wharf, and from there to where it now lies; I searched the pockets of deceased, and found in them a Railway-key and a nail.

JOHN J. FITZPATRICK.

Taken and sworn before me, at Windsor, the 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

George Bonamy re-examined: Last Saturday fortnight the Traffic Manager, Mr. Moody, was up; he told me he should dismiss Dugdale, and disrate the other porter named Healy; I replied by saying that you will dismiss the best man in the Commissioner's service; deceased, as porter, acted under my instructions; there were charges made against him, but not by me; Mr. Moody did dismiss him on the following Tuesday; I believe Mr. Moody said something to Dugdale about being at the wharf loading corn; I don't remember that Mr. Moody said he was informed that he did so frequently; I believe the man did give some one a lift with some corn at the wharf once; he did not do it for any gain; he was never absent from the Station at any time, except on official business; he never neglected his duty to my knowledge.

G. BONAMY.

Taken and sworn before me, at Windsor, the 16th day of September, 1872,—

JAS. B. JOHNSTON, Coroner.

I hereby certify that Edward Dugdale, on whose body an inquest has been held this day, was a pauper, and that he had no friends or relatives by whom the expense of his burial could be paid.

J. B. JOHNSTON,
Coroner.

LETTER,

LETTER, with copy verdict of Jury herein, to Under Secretary for Works, for information of the Secretary for Works.—Sept. 21/72.

To be again brought forward.—21/9/72.

Add substance of report in the *Sydney Morning Herald* of to-day.—10/10/72.

It appears that the Minister for Works has held an inquiry into this case, and examined several witnesses, and in reference to rider to verdict, after careful consideration and with a full acquaintance of the facts of the case, he was of opinion that Mr. Moody had acted with the best intentions and for the benefit of the Service; and he considered that any private firm would have pursued the same course under the circumstances.

To be filed.—E.B., 12/10/72.

No. 15.

THE TRAFFIC MANAGER to THE COMMISSIONER FOR RAILWAYS.

Traffic Manager, for report.—J.S., 26/9/72.

Railways.—B.C., 27/9/72, G.H.

No one can regret more than myself the end of this unfortunate man. I have been deeply pained and aggrieved at the unjustifiable rider of the jury's verdict, apparently based upon the unsupported testimony of the Station-master, who was concerned in the causes which led to Dugdale's dismissal, and whose evidence is in distinct contradiction of the facts of the case. Mr. Secretary Sutherland is aware of all the facts relating to this matter, and I can with confidence leave my justification in his hands.

R. MOODY, 4/10/72.

No. 16.

COMMISSIONER'S MINUTE.

No. 17.

HEAD PORTER HEALY'S DECLARATION.

I, JOHN HEALY, do hereby solemnly and sincerely declare that I have come voluntarily to make a statement having reference to an inquest lately held at Windsor, upon the body of Edward Dugdale, found drowned:

I state, that although I expected to be called to the inquest, and was ready to give material evidence to the Jury, I was not so called, and in consequence of my having been sent to Macquarie Plains, and my subsequent sickness, I have been unable to meet with the Traffic Manager, Mr. Moody, until this day.

I remember the day that Dugdale's body was found in the river. I was engaged as head porter on the Railway at Windsor. Dugdale left the Station about 8 o'clock that morning. About an hour previous I was in conversation with him; he was perfectly rational in doing our business. I further say, about three or four days before the day of his death he stated to me that he had been "sold," and that "they might as well have driven a dagger to the heart, and if that he had taken his wife's advice he would not have been sold as he was." This is all that passed between him and I.

I further say, on the morning of the day of Dugdale's death, about 11 o'clock, Mr. Bonamy came down to me at the goods shed and said, "I would not be surprised if Dugdale had plunged into the river." I replied, "I thought he had gone drinking." Mr. Bonamy then said, "Had it been Morgan he would not be surprised; he would expect to find him in public-houses, but not Dugdale, as Dugdale was weak-minded, and was the sort of man that would do as he said." He, Mr. Bonamy, further said that "Dugdale was not a fit man to be on the Railway, being very deaf, he was always afraid that the train would run over him or that he would meet with some accident."

I further say that about 12 o'clock the same day Mr. Bonamy asked me if Dugdale had said anything to me in reference to being "sold." I replied "I had heard him say so." Mr. Bonamy then said "a few nights ago that Dugdale appeared very excited and said something about being sold." Mr. Bonamy then said he made no reply, but asked him the next day what did he mean by being "sold" and "the dagger being driven to his heart."

Mr. Bonamy said, "I asked Dugdale who he meant had sold him" and he said, "Oh! Wilkins and them." This ended the conversation between Mr. Bonamy and I, and then he left.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the Act of Council substituting declarations in lieu of voluntary oaths in certain cases.

JOHN HEALY.

Taken and declared before me, at Sydney, this 8th day of October, 1872,—

W. D. MEARES, J.P.

No. 18.

EXTRACT from the *Sydney Morning Herald*, 10th October, 1872.

THE LATE SUICIDE OF RAILWAY PORTER DUGDALE.—A short time ago a man named Dugdale, who had been employed at the Windsor Railway Station as a porter, committed suicide under circumstances which have since been made the subject of inquiry. It appears that in the first instance corn-dealers in Windsor wrote a letter complaining that Mr. Bonamy, son of the Station-master at that place, had gone into business in the same line as themselves, under the name of Wilkins & Co.; that the goods of this alleged firm were allowed to occupy the Station to the exclusion of their own; and that other advantages accrued

13

accrued to the firm by reason of the position of Bonamy. The younger Bonamy was employed as a porter at the Station two days in the week—the market days. It was alleged that Mr. Bonamy the Station-master, was himself aware of the circumstances. As the result of this complaint, an inquiry was made by Mr. Moody, the Traffic Manager, and it was considered that the irregularities particularly defined were made out. The younger Bonamy was dismissed, it being proved to the satisfaction of Mr. Moody that he had loaded his own bags and stitched them on the days on which he was paid for his services as a porter. It also appeared that he had got the porter Dugdale to assist him in this work; and, as Dugdale was considered to have prevaricated when under examination, and otherwise given his evidence in an unsatisfactory manner, he too was dismissed from his position. It appears that Dugdale was junior porter, and could not be disgraced; therefore he was removed, though it is said that he would probably have again been taken on in the course of a month or two. It was determined that Mr. Bonamy, the Station-master, should be disgraced; and he received notice that he would be removed to another Station. Certain inhabitants of Windsor hearing of their Station-master's position, drew up a petition and forwarded it to the authorities, complaining of his proposed removal, and alleging that he had not been fairly treated in the examination. The Minister for Works (Mr. Sutherland) then held an inquiry into the case, and examined several witnesses, when Mr. Bonamy, the Station-master, acknowledged that the first inquiry had been conducted fairly. It also came out that on the day after the first inquiry, another porter named Healy, thinking himself hardly treated by the Station-master, left without leave, and made his complaint to Mr. Moody, further stating that he had other information in the case which he had not given at the inquiry; but so far from receiving any sympathy from the Traffic Manager, he was at once disgraced for leaving his place without leave, and for withholding information. The Minister for Works, after his inquiry, arrived at the conclusion that Bonamy had acted most indiscreetly, and by his conduct with his porters had disorganized his Station. With respect to the porter Dugdale, who committed suicide, and at whose inquest the Jury added a rider to their verdict that they considered that the deceased had been harshly treated by being dismissed from the Railway service by the Traffic Manager,—Mr. Moody stated (the papers having been forwarded by the Crown Law Officers to the Works Department) that no one regretted the death more than himself, but that he had been deeply pained at the unjustifiable rider attached to the verdict of the Jury, which was apparently based upon the unsupported testimony of the Station-master. Therefore, he confidently left his justification in the hands of Mr. Sutherland, who was acquainted with all the facts. Mr. Sutherland's minute is to the effect that, after careful consideration, the Minister was of opinion that Mr. Moody had acted with the best intentions, and for the benefit of the service, and considered that any private firm would have pursued the same course under the circumstances. We understand that an answer has been written to the inhabitants of Windsor, expressing Mr. Sutherland's regret that, after making himself fully acquainted with the case, he is unable to grant their request—that Mr. Bonamy should be allowed to remain there as the Railway Station-master.

No. 19.

EXTRACT from the *Sydney Morning Herald*, Saturday, 12th October, 1872.

We, the undersigned, the Jury duly sworn to make inquiry into the cause of the death of the late Edward Dugdale, late porter at the Windsor Railway Station, having noticed in the *Herald* of the 10th instant, a certain attempted exculpatory statement (apparently communicated), headed "The late suicide of Railway porter Dugdale," and conveying strictures upon the verdict given by us to effect that the suicidal act was brought about by the harsh and unjust dismissal of the deceased by the Traffic Manager, Mr. Moody, who, in the exercise of the powers and duties of his office had, in our opinion (and to which we adhere), displayed a total disregard of the principles of justice, much to be deplored.

The Jury, before coming to their verdict, carefully weighed all the testimony, and adopted the verdict given as one out of three, being the mildest in form and language, and to give Mr. Moody every opportunity to rebut the same should the matter hereafter be made the subject of an inquiry.

The Jury further consider the verdict was fully supported by the evidence of the witnesses, Alice Dugdale and Thomas Hall, corroborated as it was by the evidence of Station-master Bonamy, who evinced an apparent unwillingness to give evidence in any way reflecting upon Mr. Moody, and it was only on appeal to the Coroner to compel him to give evidence, that the facts of the case were elicited, and upon which our verdict is supported.

JOHN THOMAS NEILSON,
Foreman, at the request of the Jury.

Windsor, October 10, 1872.

No. 20.

MR. G. R. CADELL TO THE TRAFFIC MANAGER.

Windsor, 15 October, 1872.

SIR,

With respect to Mr. Neilson's letter in the *Herald* of the 12th instant, and signed by him as Foreman of the Jury, I beg to state that, as one of the Jury, I was never asked, nor did it receive my consent; neither is Mr. Neilson's statement correct.

Should you think a correct statement necessary, it can be sent to you.

I am, &c.,
GEORGE R. CADELL.

No. 21.

MR. C. PAULL to THE TRAFFIC MANAGER.

8, Myrtle-street, Darlington,
25 November, 1872.

SIR,

On seeing by the daily paper that there is to be an inquiry into the case of the late porter Dugdale, who committed suicide at Windsor, I have the following information to give which may be of use. On the Friday evening previous to his committing suicide, I saw Dugdale at the Redfern Station (this was at about 4.30 p.m., before the departure of the train for Windsor, by which he was going). I bid him good-day, and expressed my sorrow at his misfortune; to which he stated he felt very miserable, and that he could not help thinking what a fool he had been to be led into it the way he was. He also stated that he could not see how he was to blame *until* Mr. Moody had been up and explained it to him. He also stated he had not a friend in the world, and that he did not know what he should do. I am positive as to the correctness of this statement, and you are at liberty to use it in any way you think proper.

I am, &c.,

CHARLES PAULL.

Place with other papers on this subject.—J.S., 25/11/72.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAYS.

(CASE OF MR. PASS, RAILWAY STATION MASTER.)

Ordered by the Legislative Assembly to be printed, 2^d April, 1873.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 4 March, 1873, That there be laid upon the Table of this House,—

“Copies of all correspondence and other documents relative to the case of
“Mr. Pass, Railway Station Master, particularly any complaints or reports
“from the Traffic Manager.”

No. 4.

COMPLAINT OF THE CHIEF CLERK.

Great Southern Railway.—Requisition for Passengers' Tickets, March, 1st, 1870.—Required for the use of Haslem's Creek Station.

Quarterly to Sydney.	Second Class.	Last Progressive No.	Tickets on hand.	Quantity required.
		003		
		002	Nil.	3
		wrong number. Returned for correction.		

Will Mr. Pass be so good as to pay attention to this matter. His number is wrong again; this must arise from carelessness.—C.A.G., Chief Clerk, 2/3/70. This requisition is to be returned with a new requisition.—L.P.I., 2/3/70.

Great Southern Railway.—Requisition for Passengers' Tickets, March 8, 1870.

Quarterly to Sydney.	Second Class.	Last Progressive No.	Tickets on hand.	Quantity required.
		2*	Nil.	3

Wrong number again. I must ask the Traffic Manager to reprimand Mr. Pass for this carelessness.—C.A.G., 11/3/70.

No. 5.

THE TRAFFIC MANAGER TO STATION-MASTER PASS.

Mr. Moody.—B.C., 11/3/70.

Mr. Pass has been promoted to another station; but if he does not attend more carefully to the particular duty referred to herein, I fear his promotion will be of short duration. An efficient station-master looks to his tickets as of primary importance, and if often neglected, opens the door to fraud, and, consequently, removal of the Station-master I hope it may not happen again.—R.M., 11/3/70.

Mr. Pass; to be returned.

Government Railways.—Memorandum to Mr. Vernon, Traffic Auditor.

Haslem Creek Station,
12 March, 1870.

Sir,

I beg to ask if you will supply the correct *pro* No. of 2nd Quarterly to Sydney. I beg to attach two requisitions that have been returned in consequence of some error in the No. I have entered thereon. Having paid the value of all season second class tickets to Cashier, and forwarded all such tickets to audit after their expiration, I am at a loss to account for the mistake.

Yours, &c.,
S. PASS.

Mr. Vernon, Sir,—On requisitions I have applied* for *Book* Tickets.—S.P.

According to information received from Chief Clerk's office, Haslem's Creek Station-master was supplied on 11th January, 1869, with the following:—Q.C., Q.S. tickets; cards, 00 to 001; and books, 1 to 2*. In applying therefore, as above stated, for a further supply, he was correct in giving the No. for which the Chief Clerk has thought proper to ask the Manager's reprimand. If books were to be superseded Haslem's Creek should have been so informed. In his case book tickets would appear as the newest description.

Under the circumstances, if the Station-master furnishes the requisition in this case to Chief Clerk, through Manager, I am sure he will be glad to find there was no ground for the reprimand called for by the Chief Clerk.

D.V., 14/3/70.

Station-master Pass to The Traffic Manager.

Sir,

With every respect I beg to refer this matter to you again, and would mention that in applying for these tickets I was under the impression that the Nos. of book tickets and card tickets were taken separately, because at different times I was supplied with both C and B tickets.

I regret that at this particular time there should be any trouble in the matter.

Yours, &c.,
S. PASS.

To

To Chief Clerk,—If the Traffic Auditor is right the Chief Clerk must be wrong, and I must expunge this reprimand from orderly-book. Chief Clerk will perhaps explain, that justice may be done.—R.M., 16/3/70.

The Traffic Auditor is quite wrong, and I must request that this reprimand may stand. The facts are these :—On the 30th December, 1868, two books were supplied to Station-master, Nos. 1 and 2; on the 6th January, 1869, two cards were supplied, viz. :—000 and 001. It is therefore quite clear that the Station-master's closing No. should be 001 if his books be properly kept. Mr. Pass first gives 003; this mistake is pointed out and he gives 002; again, the error is pointed out and he gives 2. I say this is gross carelessness and he must be reprimanded for it. I must have a proper requisition if the tickets are to be supplied.—C.A.G.

Traffic Manager.—C.A.G., B.C., 20/3/70.

Government Railways.—M. No. 70-848.

Traffic Manager's Office,
Redfern Station.

Mr. S. Pass reprimanded for carelessness in requisitioning for tickets. The Chief Clerk is no doubt correct and the reprimand must remain.—R.M., 21/3/70. Station-master, Rooty Hill, to see.—S.P., Rooty Hill, 22/3/70. Chief Clerk, 23/3/70.

No. 6.

APPOINTMENT OF MR. PASS AS STATION-MASTER, ROOTY HILL.

Government Railways.—Minute-paper.

The Traffic Manager to The Commissioner for Railways.

IN consequence of Mr. Williams's resignation as Station-master at Rooty Hill, I have the honor to recommend, for the Commissioner's consideration and approval, that Mr. Samuel Pass, Station-master, Haslem's Creek, at £120, be removed to Rooty Hill as Station-master, at £132 10s. per annum and house, from 1st March.

* * * * *
* * * * *

R. MOODY, 29/3/70.

Approved.—J.S., 2/4/70. Traffic Manager to note.—C.A.G., 4/4/70. Noted.—R.M., 4/4/70.

No. 7.

APPOINTMENT OF MR. PASS AS STATION-MASTER, BOWRAL.

Minute-paper.

The Traffic Manager to The Traffic Auditor.

Railway Branch, Sydney,
20 June, 1870.

THE staff changes are now to be submitted to the Commissioner, for the opening to Rydal; and as this will leave a vacancy at Mount Victoria, I shall be glad of the audit character of the following officers relatively :—

Mr. Pass—Mr. M'Coy; eligible for promotion to Mount Victoria.

* * * * *
* * * * *

R. MOODY, 22/6/70.

With regard to Pass and M'Coy, in the actual performance of their work they may be considered equal. M'Coy proves himself however the more willing and tractable officer of the two.—D.V., 22/6/70.

R. MOODY, 23/6/70.

Approved.—J.S., 24/6/70. Traffic Manager, to be returned.—C.A.G., 24/6/70. Seen and informed.—R.M., 25/6/70.

No. 8.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

Bowral Station,
9 July, 1870.

SIR,

I beg most respectfully to ask you if an assistant may be sent to this station. I would also respectfully remind you the duties are of such a nature as to keep me constantly employed during the day and on the alert during the night, leaving little time for peaceful sleep so necessary to health, viz.:—During the day I am fully employed receiving and delivering goods, weighing and entering same, cleaning four pairs of points, lamps, besides attending to my daily book duties and post office. At night I attend to 9.2 p.m. down train, 2.16 p.m. up train, and very frequently the down goods, which arrives here between 4 and 5 a.m. I would suggest that a boy between 15 and 16 years of age may be sent, who would be of great service in attending to the lighter duties of station.

I trust the Traffic Manager will not see anything in this communication either of presumption or offensive. Also trusting for your kind consideration,

Yours, &c.,
SAMUEL PASS.

No. 9.

MINUTE OF THE TRAFFIC MANAGER.

FROM a document shown me, bearing the signature of Mr. Pass, it occurs to me he is under a misapprehension in this case, as instead of an assistant I should say it is a Station-master that is required. If Mr. Pass were competent to do his office business and really did it, I do not think it would be more than anyone could do without fatigue, but as it is quite clear to me that Mr. Pass does not even do what is expected of him, I fail to see how he can be over-worked.

R.M., 11/7/70.

To Station-master, Bowral,—Seen.—S.P., 13/7/70.

No. 10.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

Government Railways.

Bowral, 12 July, 1870.

SIR,

In reference to your memo., I beg to state I did give a little brandy to guard of train, being in the habit of taking a little for medicinal purposes myself, but I beg to state I gave it in compassion, considering the bitter cold, and the long distances they travel, without in any way knowing that I was acting in any way imprudently.

I have, &c.,
SAMUEL PASS.

To Mr. Pass,—The guard's name is not stated; am I to understand that Mr. Pass has only given drinks to but one person in connection with the running of trains.—R.M., 13/7/70.

To R. Moody, Esq.,—

Sir,—The guard is not the only one I have given a drop of brandy to, but I beg emphatically to state (with every respect) that I am not in the habit of doing this, and it was purely an act of kindness on my part, without for a moment losing sight of my duties in connection with the interests of the Public Service. It is a very rare thing for me to have spirits in my possession. I am almost a teetotaler myself. On one occasion the late Traffic Manager, Mr. Owen, asked me if I could give him a drop of spirits, and it was partly owing to this request that I ever offered spirits to any officer on duty. I trust the Traffic Manager will not think me disrespectful bringing Mr. Owen's name. I do so in order that you may not be under the impression that I want to evade your questions.

Yours, &c.,
S. PASS.

Seen.—R.M., 15/7/70.

To Commissioner, for information. I have to add that Mr. Pass is not so careful in the general duties of his station as he ought to be, and unless he quickly mends I fear it will not be safe to entrust him at Bowral Station.—R.M., 15/7/70.

No. 11.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

THE Traffic Manager must report to me, should Mr. Pass fail to make early improvement.—J.S., 18/7/70.

Traffic Manager,—C.A.G., B.C., 26/7/70.

No. 12.

No. 12.

STATION-MASTER PASS to THE TRAFFIC MANAGER.
Government Railways.

Bowral Station,
4 October, 1870.

SIR,

I beg to ask if an assistant may be supplied to this station, as it is impossible for one to attend to post office and railway duties properly. I have had several things taken from station without my knowledge during the last few days, and my time is so completely taken up with booking duties and post office matters that I cannot exercise a proper supervision over all. The business of station has very much increased, and is still further improving every month.

Yours, &c.,
SAMUEL PASS.

No. 13.

COMPLAINT BY MR. KEYES AGAINST STATION-MASTER, BOWRAL.

ON Tuesday, 4th October, I forwarded two bags of grass seed to Bowral Station by Andrew Alcorn, to be left at station until I called and gave instructions. On my arrival at the station on Monday morning, 10th October, between 1 and 2 o'clock a.m., I requested the Station-master to forward the seed by first train; he would not give me any reply. It has not yet arrived at Sydney Station.

W. KEYES.

Mr. Pass, for immediate report.—R.M., 11/10/70.

No. 14.

MR. PASS'S EXPLANATION THEREOF.

A PASSENGER by the 2.46 up train on Monday morning informed he had two bags of seed in goods-shed, and wanted me to go and unlock the goods-shed at that time, and forward them with him. Of course this is contrary to Regulations, and this I told him. This seed was not received by me, and could not be forwarded without a receipt or order. I have since received an order from Sydney goods, and having inquired as to this party being the rightful owner, I have forwarded it to Sydney.

I was not aware of this seed being in goods-shed, and according to above complaint was brought to station by a stranger, who should have taken a receipt for it.

Yours, &c.,
S.P., 11/10/70.

Station-master, Bowral,—Surely Mr. Pass does not mean that the public are allowed free access to the goods to take away or leave whatever they think proper? How long has this seed been lying in goods-shed without Mr. Pass's knowledge?—R.M., 12/10/70.

This seed must have been put in the goods-shed when I have been occupied in Station office at other duties. I beg further to inform the Traffic Manager (with every respect) that the goods-shed is a very large one, and nearly always well-stocked with goods, either inwards or outwards, chiefly owing to my inability to obtain trucks just at the time they are required; also persons have been in the habit of loading and unloading trucks in my absence, which has been frequent, but in all cases unavoidable. I beg to take this opportunity of thanking the Traffic Manager for supplying the station with a porter, who is indispensable in order to the efficient working of station, owing to the post office, which cannot be properly attended to without an assistant in the railway duties. I would respectfully mention to the Traffic Manager that owing to the exertions I have put forth in order to keep everything in proper order, without the assistance of a porter, I have had my health impaired, but I trust now soon to be restored to proper health again.—SAML. PASS, 12/10/70.

Station-master, Bowral,—Mr. Pass must not delude himself with the idea that a porter can be constantly stationed at Bowral, as I am quite satisfied that only a very moderate amount of exertion is necessary for the efficient working of the station. As to the post office, that is not a railway matter, and it is supposed that Station-masters' wives attend to the duties as far as possible; at any rate it will not operate as an excuse for inattention to railway duties.—R.M., 13/10/70.

I would respectfully mention to Traffic Manager that in reference to Station-masters' wives conducting the post office arrangements, in my case Mrs. Pass is physically unable to attend to the onerous duties of this post office, and that previous to my having a porter I was never done from 9 in the morning till 11 p.m. at night.—S. PASS, 13/10/70.

Seen.—R.M.

MR.

No. 15.

MR. CHAS. LOSEBY TO THE SECRETARY FOR PUBLIC WORKS.

Bong Bong,
14 October, 1870.

SIR,

I write to inform you of the negligent attendance of the Railway officer at Bowral Station. I was coming from Goulburn to Bowral a few weeks back, and there was no one to be seen in attendance, and I had to call loudly for the door to be opened, the train starting at the same time; and yesterday I had a daughter with four children coming from Goulburn to Bowral, and when there the carriage-door was shut and she could not open it, and no one there to attend to it. She rapped hard at the windows and some parties on the platform said there was a passenger wanted to get out, but the train started again and took her and her family to Mittagong, where she had to remain upon expenses with strangers through the night and to hire a conveyance to take them back to Bong Bong this morning. I hope you will see by this that there requires some different attendance to what is now practised.

Yours, &c.,
CHARLES LOSEBY.

The Traffic Manager, for report.—J.S., 17/10/70.

No. 16.

STATION-MASTER PASS DENYING MR. LOSEBY'S STATEMENT.

THE name of station was loudly called at each carriage-door, and no answer being given the train was started in the usual way.

Yours, &c.,
S. PASS, 22/10/70.

To Commissioner,—I forward the Station-master's distinct denial of this case, although I do not place much reliance upon the statement he makes, although the porter says name of station was called out in the usual way and he heard no reply given. I have cautioned Mr. Pass to be more careful.—R.M., 26/10/70.

May be informed that inquiry has been made, and that it is asserted that the name of station was called at each carriage; and that the Station-master has been instructed to be most careful in giving information of the name of station, &c.—J.S., 27/10/70.

Mr. Loseby informed.—1/11/70.

No. 17.

THE COMMISSIONER FOR RAILWAYS TO MR. CHAS. LOSEBY.

Department of Public Works,
Railway Branch,
Sydney, 1 November, 1870.

SIR,

In reply to your letter of 14th instant, complaining of the negligent attendance of the Railway servants at Bowral Station, and stating that your daughter with four children were conveyed on to Mittagong, some distance beyond their destination, I have the honor to inform you that inquiry has been made into this matter, and that it is asserted that on the arrival of the train at Bowral the name of the station was called at each carriage as usual, and as no passenger requested to alight, the train proceeded. The Station-master has been instructed to be most careful in informing passengers of the name of the station on arrival of the train.

I have, &c.,
JOHN RAE,
For the Commissioner for Railways.

No. 18.

THE TRAFFIC MANAGER COMPLAINING THAT MR. PASS NEGLECTED TO PLACE THE "SIGNAL" AT "DANGER" AFTER PASSING OF TRAIN.

Government Railways.—Memorandum to Bowral.

Sydney Station,
16 November, 1870.

EXPLAIN why your station signal was not placed at "danger" after passing of the "up" passengers' special on Monday last?

R. MOODY.

I was not up myself on Monday morning when special train passed, being up all the previous night till 2:46 a.m. I left instructions with Stone (porter) to be in attendance. In reply to my question why he neglected to work the signals, he said he did not think it necessary, because train did not stop. He has been in the habit of working the signals for goods train. Being his first offence I cautioned him, and gave him to understand the serious consequences that might result from such gross carelessness.—S. PASS, 16/11/70.

Station-

Station-master, Bowral,—Mr. Pass is alone responsible for this, which, if any accident should happen, he will find to his cost. He had notice of the special, and it was his duty to see to its safety; and if any similar occurrence takes place, I shall certainly recommend his removal for gross neglect and incompetency. The train with the Governor might have been overrun with any following train.—R.M., 17/11/70.
Seen.—S.P., 17/11/70.

Government Railways.—Station-master, Bowral; neglect of signal on Governor's Train passing.
The Traffic Manager to The Commissioner for Railways.

Traffic Manager's Office, Redfern Station,
Sydney, 18 November, 1870.

I CONSIDER it my duty to lay before the Commissioner, for his information, the great carelessness of Mr. Pass on the passing of a Special Train with His Excellency the Governor. The signals were not worked, nor was anyone in sight at the station. It is not necessary for Mr. Pass to be up all night to attend the 2:46 a.m. train.

R. MOODY.

No. 19.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

THE Traffic Manager to reprimand Mr. Pass for this neglect, and to warn him, that if it be repeated, it will not be so lightly passed over.

J.S., 2/12/70.

Traffic Manager,—C.A.G., B.C., 6/12/70.

Station-master, Bowral,—Mr. Pass, to note Commissioner's minute, and to understand that a reprimand in reference to neglect of signals will not be repeated, but that severe steps will follow any further neglect.—R.M., 7/12/70.

Seen.—S.P., 9/12/70. Noted.—S.P., 9/12/70.

No. 20.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

Government Railways.—Memorandum to Traffic Manager.

Bowral Station,
15 December, 1870.

SIR,

I beg to inform you that owing to the slackness in business, there is not much for the porter to do, and if the Traffic Manager desires I will carry on the business myself as before.

Yours, &c.,
S. PASS.

Mr. Pass.—Dispense with his services.—R.M., 15/12/70.

I beg to ask the Traffic Manager if he will allow me to retain the porter till after the Christmas holidays? I intended asking this in memo., but inadvertently omitted it.—S. PASS.

To Station-master, Bowral,—As there is no business at this station, Stone's services to be dispensed with on 24th.—R.M., 16/12/70. Seen.—S.P., 19/12/70.

No. 21.

PORTER STONE TO MR. NEALE.

My dear Mr. Neale,

Bowral, 15 December, 1870.

I have just been informed by the Station-master that the Manager has sent him word that I shall not be required at the station any longer. I would be greatly obliged if you would see Mr. Moody and inquire from him the reason for my being dismissed at a moment's notice, as I have reason to believe that it is on account of something which has been told to him by the Station-master here, although he told me to-night that he was going to write to the Manager, recommending strongly that if I was not kept on here I should get a place somewhere else. The Station-master is a very jealous person, and he and his wife are always quarrelling; and to day she came into the office and said that he had accused her of being too intimate with me, although I have never spoken to the woman in my life, except on three occasions, when she has come in his presence to mention the accusations that he brought against her. To-day as she was leaving the office she said that he (the Station-master) had written to Mr. Moody to have me removed. I have been very careful to do my duty, and Mr. Pass has always said that he was quite satisfied with me. It seems a hard case that I should be dismissed now without any fault of my own, and solely through the absurd jealousy of the Station-master.

Hoping you will excuse me for asking you to take this trouble, and with kind regards to Mrs. Neale,—

I am, &c.,
HENRY STONE.

Will you please write, if possible, to-morrow?

No. 22.

THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

Railway Branch, Sydney.

Minute-paper.—Station-master, Bowral.

MR. PASS'S singular manner for some time past has given me some uneasiness for the safe working of his station.

His ill-health and irritable temper combine to render him a very undesirable person to have charge of a railway station.

I enclose an application for an exchange; but my opinion is that he would be better if he could be placed in an office with other gentlemen to keep him employed.

R. MOODY, 21/12/70.

Submitted,—J.R., 26/12/70. See decision on 71/90. Mr. Pass to go to Rooty Hill.—J.R.

No. 23.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

Sydney, 19 December, 1870.

SIR,

I am desirous of changing my station for one nearer Sydney, viz., Riverstone, in order that I may have the opportunity of consulting a doctor at any time; also, because I have not enjoyed good health owing to so much night work. I am aware I shall lose the salary of post office, but this is of no consideration in comparison with my health.

S. PASS.

No. 24.

REMOVAL OF MR. PASS TO ROOTY HILL STATION.

(71/90.)

Samuel Pass, Parcels Clerk, Sydney.

Promoted to Station-master at Haslem's Creek, at £120 per annum. (Exc. minute, 18 Dec., 1867.)
On 2 April, 1870, removed to Rooty Hill as Station-master, at £132 10s., and house, from 1 March.
On 1 July, 1870, removed to Bowral as Station-master, at £120, with allowance for post office.

Why was Mr. Pass removed from Rooty Hill to Bowral, at a lower salary?—J.R., 4/1/71.

It was considered to be promotion (see papers with Deigan's case), as at Bowral an allowance is made to Station-master for acting as Postmaster.—5/1/71.

Pass to be removed to Rooty Hill, and Deigan to Bowral, and Stone to be reinstated.—J.B., 7/1/71.
Traffic Manager to arrange from 1st of this month.—J.R., B.C., 9/1/71.

Seen.—R.M., 10/1/71. To Commissioner.

No. 25.

ENGINE-DRIVER HERON TO MR. TIPPING.

Penrith, 14 September, 1871.

I BEG leave to state that on approaching Rooty Hill Station, with 4:20 p.m. train, the distance-signal was at danger. I whistled for it to be lowered; there was no notice taken of it. I pulled the train inside of it. I then saw the station semaphore at caution. When I arrived at the station, I inquired of the Station-master why the distance-signal was not lowered. He said it was, and would report me for saying so. Guard Darby also told him that it was not down.

JOHN HERON, Engine-driver.

For the information of the Locomotive Foreman, Mr. Scott.—J. TIPPING, 15/9/71. Engineer-in-Chief,—W. S. SCOTT, 16/9/71. Traffic Manager,—To be returned.—J.W., pro W.H.Q., 16/9/71. Rooty Hill, for report.—R.M., 19/9/71.

No. 26.

MR. PASS'S EXPLANATION OF ENGINE-DRIVER HERON'S CHARGE.

I HAVE already written to the Traffic Manager, asking for an alteration to be made in the wire, because the wire becomes elongated when the days are warm, and it is beyond my power to effect the necessary alteration without assistance. I have previously spoken to Inspector Waring, who has promised to shorten the wire; also I beg respectfully to state that I have acted in accordance with section 3, rule 97. In reference to Heron's complaint of my threat to report him, I beg to say he came from the engine and used abusive language to me, which is a violation of rule 19, sec. 1, and for this I intended to complain, but through some inadvertance on my part the report was mislaid.

Yours, &c.,

S. PASS, 19/9/71.

Engineer-in-Chief,—I requested Mr. Mason to look at Rooty Hill signal, and he informs me that there is no peculiarity in the working of that signal, more than any other. I believe the secret is that Mr. Pass has so little to do that in order to find amusement he quarrels with every one he meets with, especially guards and drivers.—R.M., 20/9/71. J.W., 23/9/71.

No. 27.

11

No. 27.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

Rooty Hill Station,
28 December, 1871.

I beg respectfully to apply to you for a removal to a station where I will receive an increase of salary that will assist me in keeping myself and family respectably; also, further respectfully to state that I have occupied the position of Station-master over a period of five years, and during that time I have efficiently carried out every rule and instruction for my guidance; also, I have made the interests of the Public Service my chief study, and I am not aware of any one instance wherein I have forfeited my claim to an advance of salary, but, on the contrary, I make this application, having the knowledge that I have performed my respective duties honestly, efficiently, and faithfully, and being confident of my ability to take under my charge the duties of a Station-master, where the responsibilities are much greater.

I would also state that I received £120 per annum at Haslem's Creek, and for the post office £12 per annum, and at the present time my salary is £128 per annum, which is in reality a decrease of £4 in the year, notwithstanding your letter informing me of my promotion to this station. I would also say I make this application with all due deference to you as my superior officer, and respectfully requesting you will bring this letter under the notice of the Honorable the Commissioner for Railways.

I have, &c.,
SAMUEL PASS.

To Commissioner.—R.M., 30/12/71.

No. 28.

MINUTE OF THE COMMISSIONER FOR RAILWAYS.

Mr. Pass has not conducted himself during a large portion of his time in a way to entitle him to a favourable consideration of his application. Let Mr. Pass lead a different life in his domestic associations, and any claim he may have for promotion will not be overlooked.

J.B., 11/1/72.

Traffic Manager.—C.A.G., B.C., 12/1/72.

I beg respectfully to acknowledge having read the above minute, but in justice to myself, I beg respectfully to ask that I may be allowed an opportunity of disproving the Traffic Manager's complaints, which I positively but respectfully assert are unmerited by me. I beg respectfully to refer the Commissioner to reply on next page.—S. PASS, 19/1/72.

I have made no complaints against Mr. Pass, excepting the one of 21/12/70, and what the papers show.—R.M. Chief Clerk, 20/1/72.

No. 29.

REPLIES OF MR. PASS.

1. (70/848).—Pass severely reprimanded with Chief Clerk.—24/2/70.
2. (70/3,477).—Lusby's complaint of Station-master Pass with Chief Clerk.—26/10/70.
3. (71/182).—With Commissioner, 17/1/71.—Postal and various other complaints—Brandy supplied to guard, &c.
4. (71/2,017).—Signals exhibited at "Danger" with Engineer-in-Chief.—21/9/71.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

SIR,

I beg respectfully to ask if my replies may be brought under the notice of the Commissioner; also, if the Honorable the Commissioner will permit me to disprove (in your presence) the several complaints made against me. In reference to complaint 70/848, the Traffic Auditor defended me and proved the course I had taken to be correct, which the correspondence must show. 70/3,477, I have no knowledge of this; also in reference to the two remaining complaints, I beg respectfully to state I can give a satisfactory explanation, and can prove. I have not merited either of the complaints which have been entered against me without my knowledge of your so doing.

Yours, &c.,
SAMUEL PASS, 13/1/72.

R.M., 12/1/72. Station-master, Rooty Hill,—Why is this returned without being noted?—M.A.H. (pro R. MOODY).—15/1/72. I beg respectfully to say that I thought the above reply would do, and the oversight was not for want of respect.—S.P. Station-master, Rooty Hill,—Mr. Pass is travelling out of his depth in referring to matters he does not understand. If he will read the Minister's minute, he will perceive that a very special matter only is referred to, and I believe the less said on that matter the better it will be for Mr. Pass.—R.M., 18/1/72.

No. 30.

THE TRAFFIC MANAGER TO THE CHIEF CLERK.
Government Railways.

Sydney Station, 17/8/72.

WILL you please forward me, as early as possible, all minute-papers you have in your office in connection with Mr. Pass, Station-master at Haslem's Creek and Rooty Hill Stations?

R. MOODY.

Herewith,—C.A.G., B.C., 19/8/72.

No. 31.

No. 31.

THE SECRETARY FOR PUBLIC WORKS TO THE TRAFFIC MANAGER.

I desire to ask the Traffic Manager the following questions:—

1. What complaints have you made to the Commissioner for Railways against Mr. Pass, Station-master?
2. Who are the persons that have been promoted out of the Traffic Manager's Office to Railway Station-masters?
3. Are either of the persons so promoted related to you, or to any member of your family?

JOHN SUTHERLAND, 7/8/72.

No. 32.

THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

Re Pass, Station-master, Rooty Hill.

IN reply to your queries enclosed I have the honor to reply,—

1. The complaints referred to are in writing and are enclosed herewith. I have obtained them from the Commissioner's Office.
2. Mr. Herald, Station-master, Tarana, £150 a year, is well known to Joseph Wearne, Esq., M.P. Mr. Hornidge, to Sutton Forest, £150 a year, is well known to Sir William Macarthur. Mr. Thompson to Rydal, £150 a year, is well known to Henry Moses, Esq., M.P., and William Tunks, Esq., M.P. Mr. Joseph Watsford is well known to James Byrnes, Esq. These gentlemen were each severally placed in my office by successive Ministers, with the promise of promotion to stations, and I do hope that the plan will be continued. I have now another gentleman training for similar occupation, who is engaged relieving any stations requiring his services; and I am quite convinced that it is the best training that can be had, and more likely to result in efficient officers than has resulted from the haphazard appointment of untrained men. Each person referred to has had a training through the entire details of each branch, and then sent to out-stations to relieve—giving ample opportunity to see the business in all its different aspects, as the business of one station is not the same as all.
3. Neither of the persons named have any relationship to myself, nor to any of my family.

I have no desire to drag into this matter Mr. Pass's domestic troubles, only that I am fully impressed that it is from that cause that all his other troubles spring, and that he is suffering some hallucination that I am his enemy.

I am also loth to bring forward a letter from Mr. Pass to the late Commissioner, and copy of reply thereto, which, however, I enclose, simply to show that Mr. Pass is suffering some mental infirmity which leads me to believe that he is not a safe person to leave in charge of a station, and this I am sure is but too well known to all who know him—to none more so, personally, than the late Commissioner (Mr. Byrnes); and of this the present Minister for Works is also well aware by the too numerous complaints made to himself—not by me, nor with my knowledge.

Mr. Pass has quarrelled with every official he has to come in contact with, and it was the public voice at Bowral that compelled the late Commissioner to place him in comparative retirement at Rooty Hill, where he now is.

Mr. Byrnes's reply to letter will best explain the whole matter, and had Mr. Pass then been called upon to explain his malicious charges against me he would not now be in the Service to renew them.

Since Mr. Byrnes's reply to Mr. Pass's letter was sent to him, I have made no complaint against him to any one, nor have I said or done any more in regard to Rooty Hill station than is absolutely necessary, and which is necessary at every station, more or less. I have not, at any rate, interrupted Mr. Pass, nor have I meddled with him in his duties in any way, except by strict watchfulness for safety.

R. MOODY, 19/8/72.

No. 33.

[Enclosure referred to in No. 32.]

STATION-MASTER PASS TO THE SECRETARY FOR PUBLIC WORKS.

Rooty Hill,
19 January, 1872.

SIR,

I beg to apologize for intruding this letter upon you, but having been falsely represented to you by the Traffic Manager, I feel it to be only due to myself to ask your influence to give me an opportunity of confronting the Traffic Manager and disproving the complaints he has made against me, which I positively swear to you are no less than lies. It is very hard to quietly submit to the calumnies of Mr. Moody, because it is his duty to use the power he possesses as much to protect my character as in the management of the railway lines; but, on the contrary, he watches every opportunity to vent his spleen on me for reasons having reference to his nephew, who took my place at Bowral station, and who, I learn, has since resigned, owing to a deficiency in the Government money, and has again been reinstated as a porter in the lamp-room; and I am informed the defaulter (Deigan) expects to be restored to the position of station-master as soon as opportunity offers, and I would not be at all surprised if there was no entry against this person in the Traffic Manager's record book. But I must not forget to inform Mr. Byrnes that

that the first complaint the Traffic Manager has made against me was proved by Mr. Vernon in my favour, and forwarded to Mr. Moody in writing; and the second complaint was in consequence of an irritable old person at Bowral complaining of his daughter being carried on, owing to the name of the station not being called out, which complaint was contradicted by myself in writing, also by the guard and porter, and yet the Traffic Manager has decided against three contradictions and in favour of one person who was not present. I would appeal to you, sir, in whom I have been taught to respect above the common, if it is reasonable for me to quietly submit to what I know is intended as a bar to my future advancement on the line, and which, if not checked, the most paltry matters will be added to?

In reference to my domestic affairs, I certainly regret your having reason to mention those matters, and perhaps as far as my being promoted is concerned, I would exercise greater prudence in remaining here for the present; but as you have decided that I must remain, I think and submit with respect to your view of the case being the wisest.

I beg to apologize for having troubled you with this letter, but I trust you will grant me the opportunity of respectfully but successfully exposing the Traffic Manager's misrepresentations.

I have, &c.,

SAMUEL PASS.

No. 34.

[Enclosure referred to in No. 32.]

STATION-MASTER, Rooty Hill, is informed that he has committed a most flagrant violation of the regulations in addressing his letter of the 19th inst., direct to me; moreover, I may here inform the Station-master that if any proof were wanting of his unfitness for holding office in the Public Service, he has most undoubtedly furnished it in this outburst of his ungovernable temper and impudent insinuations and unfounded charges against his superior officer.

The Station-master is further informed, that were it not for the profound respect for his excellent father and mother, his wife, and her relatives, the services of this headstrong Station-master would long since have been dispensed with.

JAMES BYRNES, 20/1/72.

For Traffic Manager's perusal only, and forward reply, keeping copy, without remark.—J.B., 20/1/72.

No. 35.

STATION-MASTER PASS TO THE TRAFFIC MANAGER.

Rooty Hill Station,
12 August, 1872.

SIR,

I beg respectfully to apply for promotion to another station, where I may find more employment; also an advance upon my present salary. I would also respectfully mention that matters in connection with my household affairs are becoming a great responsibility and expense to me, and I find it exceedingly difficult to keep up a respectability becoming my position as an officer of the Government, and having had upwards of six years experience in the capacity of Station-master, in the Railway Department, during which time I have devoted myself exclusively to the service, irrespective of any particular duties; also, I have always endeavoured to discharge every specified duty in a faithful manner, and I feel satisfied, Mr. Moody, that I am favored with the honor of your approval in all matters relating to my efficiency in the capacity of Station-master, and I make this application, respectfully trusting that you will recommend my case.

I have, &c.,

SAMUEL PASS.

To Commissioner, with previous papers.—R.M., 21/8/72.

No. 36.

MINUTE OF THE SECRETARY FOR PUBLIC WORKS.

THE Traffic Manager makes no recommendation in this case, but refers to the previous papers, which disclose to me the sad state the Service has been brought to, and the reasons given for retaining such men in the Service; but as there have been no-complaints made against Mr. Pass to me, I am not called upon to interfere with what is past; but it is clear to me that Mr. Pass is not the class of officer that I can promote, while scores of deserving men have not yet attained to his position or pay.

JOHN SUTHERLAND, 24/8/72.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAYS.

(DISMISSAL OF PORTER HANLY.)

Ordered by the Legislative Assembly to be printed, 24 April, 1873.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 8 April, 1873, That there be laid upon the Table of this House,—

“Copies of all Papers in reference to the dismissal of Hanly from the
“office of Porter or Pointsman on the Railway.”

(*Mr. Buchanan.*)

SCHEDULE.

NO.	PAGE.
1. Traffic Manager reporting Hanly sent to Picton, and that Station-master Goold objects to him as not being qualified for Porter. 25 September, 1866	2
2. Commissioner's minute.—That Hanly is appointed to Great Northern Railway, and rebuking Mr. Goold. 27 September, 1866	2
3. Resignation of Hanly as Timekeeper, Great Northern Railway. 10 January, 1867	2
4. Complaint against Watchman Hanly, at Penrith, for insubordination. 14 August, 1867	3
5. Commissioner's minute.—A repetition of Hanly's conduct will cause his removal. 16 August, 1867	3
6. Hanly complaining of being insulted by officials at Penrith. 3 September, 1867	3
7. Complaint against Hanly sending empty trucks away contrary to orders. 3 December, 1867	3
8. Complaint against Hanly leaving points open and throwing engine off line. 3 December, 1867	4
9. Commissioner's minute.—If Hanly is not more attentive, he will be dismissed. 17 December, 1867	5
10. Two complaints against Hanly—one for being absent without leave, the other for being asleep on duty. Dismissed by Traffic Manager. 19 March, 1868	5
11. Commissioner's minute confirming Hanly's dismissal. 28 March, 1868	6
12. M. Hanly, asking for increase of wages. 10 August, 1868	6
13. Complaint against Hanly.—Absent without leave. 24 August, 1868	6
14. Cattle on line, through Hanly leaving gates open. Suspended by Traffic Manager. 17 November, 1868	6
15. Letter from Hanly in reference to his suspension. 19 November, 1868	7
16. Commissioner's minute reinstating Hanly. 25 November, 1868	7
17. Hanly, asking for wages during suspension. 1 December, 1868	7
18. Complaint against Hanly.—Neglecting signals. 25 November, 1870	8
19. Do. Not keeping points clean. 20 June, 1871	8
20. Hanly disobedient to Inspector Higgs, and accusing Guard, &c., of stealing fruit. 7 February, 1872	9
21. Hanly reporting lock taken off points, and points left open. 23 April, 1872	9
22. Traffic Manager's minute.—Hanly is unfit for position. 25 April, 1872	10
23. Commissioner's minute dismissing Hanly from Emu Plains—to be placed in less responsible position. 25 April, 1872	10
24. Hanly having refused to leave the gate-house, is ejected therefrom. 6 May, 1872	10
25. Traffic Manager, asking for Hanly's papers. 3 June, 1872	11
26. Letter from Mr. Lenehan, forwarding petition from inhabitants of Emu Plains for the restoration of Hanly—Forwarded by Commissioner for the Traffic Manager's report. 17 July, 1872	11
27. Traffic Manager unable to see upon what to report, and enclosing a letter he sent to Mr. Single, M.P., on Hanly's case. 1 August, 1872	11
28. Letter from Traffic Manager to Mr. Single, M.P. 29 April, 1872	11
29. Minute of Minister for Works—that he cannot reinstate Hanly. 5 August, 1872	12
30. Letter from Hanly, for inquiry into his case. 25 July, 1872	12
31. Traffic Manager, forwarding a schedule of cases against Hanly, and complaining of his time being occupied on such cases. 19 August, 1872	12
32. Exhibits A, C to I, named in Traffic Manager's schedule	13
33. Minute of Minister for Works on the Traffic Manager's complaint of 19th August. 21 August, 1872	15

RAILWAYS.

No. 1.

(66-1632.) THE TRAFFIC MANAGER TO THE COMMISSIONER FOR RAILWAYS.

PORTER BYRNE, of Picton, is desirous of removing to the Sydney Station, for reasons assigned in his application, which is enclosed. A person named Hanly was sent to Picton to relieve him, to whom the Station-master objects, as will be seen from the memo. enclosed.

E. OWEN, 25/9/66.

Submitted.—J.R., 25/9/66.

[Enclosures.]

Porter Byrne to The Traffic Manager.

Picton, 7 September.

Sir,

In asking for a removal from Picton to Sydney, it will no doubt be necessary for me to state my reason for so doing. Since I was sent to Picton my mother has died, leaving a young sister, who is in a great measure dependent on me for support; and should you be favourable to my being shifted to Sydney, it would be of great service to me, as one home would then suffice for both of us, and I would thereby be enabled to afford more towards her support than I am at present enabled to do. On these grounds I hope you will be pleased to remove me to Sydney.

I remain, &c.,
JOHN BYRNE.

The Station-master to The Traffic Manager.

(No. 93.)

Picton Station,
18 September, 1866.

Sir,

The person named Hanly, sent here this morning to replace Porter Byrne, knows nothing whatever of a porter's duties, being totally inexperienced in such matters. I therefore most respectfully beg to protest against such an exchange. At this Station in particular, it is essentially necessary that none should be appointed porters but men of practical experience and well up in the business. Under these circumstances, and in view of the public interests, I feel bound to keep Porter Byrne here until further instructions.

I am, &c.,
J. B. GOOLD.

No. 2.

(66-1632.)

COMMISSIONER'S MINUTE.

HANLY has been appointed to a vacancy on the Northern line, but I wish the Traffic Manager to remind Mr. Goold that whilst he may fairly suggest any arrangement which he considers would be desirable to carry out, I will not allow him to *protest* against an appointment being made by me in connection with the Picton or any other station where he may happen to be in charge.—J.B., 27/9/66.

Mr. Owen.—B.C., 27/9/66. Seen.—E. OWEN, 21/10/66.

No. 3.

(67-58.)

THE ENGINEER TO THE COMMISSIONER.

Resignation of Mr. Hanly, Locomotive Timekeeper, G.N.R.

I FORWARD herewith a letter from Mr. M. Hanly, tendering his resignation as Timekeeper to the Locomotive Branch, G. N. Railway, and recommend its acceptance. The time-sheets from the commencement of his taking the situation have been kept in the most careless manner, errors appearing invariably every fortnight, causing great confusion in the accounts and loss of time..

J. H. THOMAS, 10/1/67.

Submitted.—J.R., 16/1/67.

Approved,—and I shall be glad to appoint Foley, of Wollongong, to the office.—J.B., 19/1/67.

Mr. Thomas,—B.C., 21/1/67. J.H.T., 22/1/67. Memo.—Nos. 318 and 319.

[Enclosure.]

Mr. M. Hanly to The Engineer.

Great Northern Railway,
8 January, 1867.

Sir,

I have the honor to inform you that after due consideration I have decided to offer you my resignation of the berth I at present hold as timekeeper. My reason for so doing is, that the pay I get of 7s. per day will not keep myself and family; they are now at Kiama, and without hopes of getting them up to Newcastle, as on my present means it would be useless to attempt it; my time is being wasted; and hope by taking this step that I shall sooner obtain, *per* the Colonial Secretary, a situation with more salary.

Your humble servant,
MICHAEL HANLY.

No. 4.

(67-1583)

THE TRAFFIC MANAGER to THE COMMISSIONER.

I ENCLOSE herewith a complaint against Night Watchman Hanly at Penrith, for insubordination. .

E. OWEN, 14/8/67.

[Enclosure.]

The Station-master, Penrith, to The Traffic Manager.

13 August, 1867.

Sir,

I have to report Watchman Hanly for being absent from duty this evening. It appears that he has been in Sydney to-day; on his return, he asked one of the men (Burling) to attend to his duties for him, and went away without speaking to me.

Yours obediently,
W. V. READ.

No. 5.

(67-1583.)

COMMISSIONER'S MINUTE.

HANLY must be informed that a repetition of this conduct will necessitate his removal. He must also make an apology to his superior officer for treating him with contempt.

J.B., 16/8/67.

Mr. Owen.—R.M., 16/8/67. Seen.—E. OWEN, 19/8/67.

No. 6.

MICHAEL HANLY to THE MINISTER FOR WORKS.

Penrith, 3 September, 1867.

HONORABLE AND DEAR SIR,

I am sorry to trouble you, as I know the immense business you have to attend to, but I could not suffer the insults I have received from the guard of the mail train. I would do anything I could, but I would expect to be spoken to in a proper manner, not the same as if I was nothing better than a dog, and what I was ordered to do I knew it to be his business—that was to uncouple the brake; I thought it was sufficient for me to look at the boxes and see that there was no fat wanted to them. I had to do that by Mr. Read's orders, and he told me that anything that was to be done on the station I should do it, or he would suspend me on the spot. I do not wish to complain of any person, but they have gone too far, and I did not know what they might say of me. I cannot see what Mr. Read has against me, but he tries to offend me as often as he can. I would feel very comfortable if I was not interfered with, as I do my duty. I never had the slightest trouble with the goods train, and Mr. Bell told me to write to you, and that they would have to mind their own business and let me mind mine. I feel very sorry to trouble you after your kindness to me in giving me this situation, as I feel happy in seeing my family so comfortable. I will always feel grateful to your kindness.

I remain, &c.,
MICHAEL HANLY.

Mr. Owen to see that the writer is not insulted. He must of course do his work, but he is to be treated properly.—J.B., 5/9/67.

(67-1776.)

The Traffic Manager to The Commissioner.

REFERRING to the complaint of Watchman Hanly, of Penrith (enclosed), I have the honor to state that this man is not insulted by any of the men, and has no authority to make this complaint. He has been required to perform certain duties which are necessary, he is expected to carry out Mr. Read's instructions, and I believe the Station-master (who is now absent on leave) has been courteous to him on all occasions.

E. OWEN,
9/9/67.

Mr. Hanly to see.—J.B., 12/9/67.

Mr. Owen, 12/9/67.—R.M.

The Acting Station-master, Penrith, to show this minute to the watchman.—E. OWEN, 13/9/67.

Edwd. Owen, Esq., Traffic Manager, G. S. & W. Railway. Sir,—I have read the above.—MICHAEL HANLY. Seen.—E. OWEN, 16/9/67..

No. 7.

THE TRAFFIC MANAGER to THE COMMISSIONER.

(67-2397.)

I HAVE the honor to enclose herewith a complaint from the Station-master, Penrith, that six waggons (empty) specially retained for sleepers, were taken to Sydney by the guard of the 3 a.m. train, in contradiction to his orders left with Watchman Hanly, and causing great disappointment to the contractors. The guard received orders to take the empty waggons to Sydney from Hanly, and immediately on his arrival

arrival in Sydney reported the circumstance to me; stating how remarkable it was that special trains were running daily to Penrith with empty trucks, and that these should be sent back. Hanly must be to blame for this expense and disappointment.

E. OWEN,
3/12/67.

Mr. Owen ought to decide this matter before submitting it.—J.B., 4/12/67.
I submit that Hanly is to blame.—E. OWEN, 14/12/67.

The Station-master, Penrith, to The Traffic Manager.

30 November, 1867.

I BEG to report that the only six empty trucks we had on the station last night were taken away by goods train, although Hanly, the watchman, states that he told the goods guard they were required at Penrith; consequently to-day we had no trucks to give Larkin's men to go on loading sleepers with, and we shall be in the same predicament on Monday, unless we can get some more empties.

Yours obediently,
W. V. READ.

Watchman Hanly to The Traffic Manager.

Dear Sir,

I gave the order to the guard as I received it. It was as follows: I told him he was to take the empties that were in front of the loaded ones, and that he had nothing to do with the others. I also told him that Mr. Dowling told me he had no shunt to make. He asked me where the empties were to be left; I told him I knew nothing about them; all I knew was the order I got, and I would give no more.

MICHAEL HANLY.

(67-2398.)

No. 8.

THE TRAFFIC MANAGER TO THE COMMISSIONER.

ON the 22nd instant the engine conveying the mail train leaving Weatherboard at 4:30 a.m. got off at the facing points leading to Penrith Station. It will be seen from the Station-master's report herewith that the points were in proper working order, but the fact of their being half open to cause this accident shows clearly that they were in a filthy state from dust and grease. The guard Watson is not to blame, as it was no part of his duty to attend to them, it being the duty of Watchman Hanly, having given directions myself that he should attend to them, which Mr. Read states he has continually neglected.

E. OWEN, 3/12/67.

Mr. Owen.—What account does Hanly give of this matter?—J.B., 4/12/67.
Hanly's account is herewith, also a further statement from Mr. Read.—E. OWEN, 14/12/67.
See note on paper 67/2,397.—J.B., 17/12/67.
Mr. Owen, 17/12/67. Seen.—E.O., 19/12/67.

[Enclosures.]

The Station-master, Penrith, to The Traffic Manager.

22 November, 1867.

Sir,

I beg to report that the engine and tender of mail train got off the road at the second points coming into station from Weatherboard this morning. Goods guard Watson, who was making up his train at the time, had only let his engine through them less than five minutes before, and he states that he is quite sure they laid over properly before he left them. It was only yesterday that I examined them myself, when they appeared to be all right. The porter who is answerable for the cleaning of them states that he has not noticed anything amiss with them; they were quite clean at the time engine got off.

In order that mails should not be delayed, I sent Heron's engine on with them to the Junction to catch the 7:2 a.m. southern train.

Yours obediently,
W. V. READ.

See also Guard Lewis's report of 22nd.

Watchman Hanly to The Traffic Manager.

Dear Sir,

I received orders to go to the furthest off points and let the train through, but when the points got changed I was told by Mr. Read that I need not go there again. I heard nothing until the evening after the engine ran off. He wanted to tell me he never countermanded the order. There was no person at the points from the time they were changed, unless when they were shunting. I never got orders to look at the points that the engine ran off at.

MICHAEL HANLY.

Mr. Read to explain.—E. OWEN, 12/12/67.

The Station-master, Penrith, to The Traffic Manager.

Weatherboard, 13 December, 1867.

Sir,

Hanly's statement regarding points is quite untrue, and until the accident I was not aware that he had not attended to them. When I questioned him after the accident, he prevaricated and said that he understood from Dowling that he was not required to attend to them after the lay of them had been shifted to lead to the station. It would be rather strange for me to tell him not to attend to points so far from the station as these are, and at the same time not to say anything about the points so close to the station as the facing points from Sydney are. Hanly has, I believe, always attended to these. Only a short time since I had arranged for Hanly to call me one morning, but remembering that he had to attend to these points, I told him not to leave, as the train might arrive while he was away. Hanly was not told to stand at the points (the 2nd) where the engine ran off at; he was told to be at the first facing points, which are close to the points where the accident occurred.

Yours obediently,
W. V. READ.

No. 9.

5

No. 9.

COMMISSIONER'S MINUTE.

Inform Hanly if not more attentive to his duties he will be dismissed.

J.B., 17/12/67.

Mr. Owen.—17/12/67. Seen.—E. OWEN, 19/12/67

No. 10.

(68-773.) No. 301. THE TRAFFIC MANAGER to THE COMMISSIONER.

I HAVE the honor to enclose two complaints against Watchman Hanly, at Penrith; the first for absenting himself without leave and travelling to Sydney and not having previously paid his fare, the second for being found asleep on duty. On these matters coming to my knowledge, I considered it my duty to inform him that his services were no longer required; he has continually neglected his duties since he has been connected with the department, and I have no confidence whatever in him.

ED. OWEN,
19/3/68.

I beg to quote the following previous papers relative to Hanly, viz., 67-2398, 67-2397, 67-1776, 67-1753. I also enclose the statements of the two Weatherboard guards as to Hanly's continued neglect of the most important duties devolving upon him, viz., the protection of life and property. The watchman left his station on this occasion without leaving a person in charge. In addition to the previous papers, I have spoken to this man myself and cautioned him on many occasions.—ED. OWEN, 25/3/68.

Penrith to Manager.

14 March, 1868.

Sir,

On my arrival this morning at the station to meet the mail train, I found the semaphore lamp broken. I called out for Watchman Hanly, but he was not to be found on the station. I have since been informed that he left the station by the 3 o'clock goods without leave.

I am, &c.,
GEO. DAVIES.

Please to have the lamp repaired at once. Read to Hanly. Inform this man that his services will no longer be required.—E. OWEN, 16/3/68.—Mr. Davies, Penrith.

Penrith to Manager.

15 March, 1868.

Sir,

I beg to inform you that on two occasions Watchman Hanly has been found sleeping in waiting-rooms at night instead of attending to his duties. The last occasion was on Saturday, when I had to wake him up myself. I could not consider the station safe while in this man's charge, for I have repeatedly cautioned him about not attending to his duties, but to no effect.

I am, &c.,
GEO. DAVIES.

Penrith Station,

24 March, 1868.

Guard Jacques states that on many occasions when returning from Weatherboard that there was no one at points, or to signal that the line was clear to the station; he has frequently seen Watchman Hanly lying on the couches in waiting-rooms when arriving at station.

EDWARD JACQUES.

Penrith Station,

24 March, 1868.

Guard Watson states that on all occasions when running from Weatherboard, late at night, there has been no one on station to give him signal as to whether the station was clear or not, and on arriving at station have found Watchman Hanly sometimes in ladies' waiting-room, and sometimes in the gentlemen's, lying down on the couches. I beg to state that Hanly has not attended to his duties.

ROBERT WATSON.

Railway Station,

Penrith, 29 March, 1868.

By Station-master's request, I can state that I have spoken to Hanly about the necessity of being more particular in the performance of his duty generally, and I pointed out to him the probable consequence to himself if again reported for any neglect. I done so at a time that he was reported by Mr. Read, and from my own observation of his habits while on duty.

WILLIAM DOWLING,
Head Porter.

(68-1157.) No. 351.

The Traffic Manager to Mr. Davies, Penrith.

Traffic Manager's Office, Redfern Station,
Sydney, 27 March, 1868.

Sir,

Inform Hanly that if he has any evidence to rebut that of yours and the guards, he must bring them down to Sydney in the morning certain, or any other evidence that he may require.

Yours respectfully,
E. OWEN.

Urgent.

I

I read this letter of Manager's for Hanly, and he also read it himself, and he acknowledged he fully understood its meaning.

Witness,—
GEO. DAVIES, 28/3/68.

M. HANLY TO THE COMMISSIONER.

Emu Plains Station,
Penrith, 10 August, 1868.

SIR,

I beg to bring under your notice my position on this Station. I have charge of a gate on a busy thoroughfare; must be ready for the first train, which passes 4½ morning, and, of course, all the trains passing till 7 evening. I pay rent for a cottage at some distance, and my pay is very small—(30s.) thirty shillings a week. If you inquire of any of the gentlemen on the line, they will inform you that I am entitled to a house and increase of pay.

I have, &c.,
MICHAEL HANLY.

Traffic Manager.—J.B., 11/8/68. I consider this man well paid.—E. OWEN, 22/8/68.
Inform.—J.B., 27/8/68. Seen.—E. OWEN, 27/8/68.

No. 13.

MR. E. HIGGS TO THE TRAFFIC MANAGER.

(68-2370.)

Penrith Station,
24 August, 1868.

SIR,

I beg leave to report gate-keeper Hanly, Emu Plains, for neglect of duty; he was not at the gate when the goods train passed this morning; and as I was passing with the passenger train, I saw two cows on the line; I told him to turn them off and not allow them to stray there; but on my return this afternoon with the goods he was absent, the gates were open, and the same cows were on the line.

I am, &c.,
ED. HIGGS.

Let Hanly be suspended, and put Webster in his place.—ED. OWEN, 27/8/68. Read.—
G. DAVIES. Mr. Davies to give an explanation on Mr. Higgs' report.—ED. OWEN, 9/9/68.

[Enclosure.]

Mr. Davies to The Traffic Manager.

Penrith, 11 September, 1868.

SIR,

In reference to Mr. Higgs' report, I beg to state that on the 24th August I applied for leave of absence for gate-keeper Hanly on the 25th, but he absented himself on the 24th and Mr. Higgs reported him, and, on your instructions, I suspended him.

I am, &c.,
GEO. DAVIES.

SIR,

Would you allow gate-keeper Hanly leave of absence to-morrow; his wife will perform his duties in his absence.

I am, &c.,
GEO. DAVIES.

To the Commissioner.

This man has offended so often that I beg to recommend his dismissal.—ED. OWEN, 12/9/61.
Inform Mr. Owen's report.—J.B., 15/9/68.

(68-2909.)

THE TRAFFIC MANAGER TO THE COMMISSIONER.

I HAVE the honor to enclose herewith a complaint made to the Engineer for Existing Lines against gate-man Hanly, at Emu Plains, for neglect of duty. This is not the first offence, by any means, as will be seen from previous papers. I have suspended him, and also informed Hanly that I should recommend his removal from the Service. I may also state that he is utterly unfit to hold any position in this department.

ED. OWEN, 17/11/68.

[Enclosure.]

[Enclosure.]

Mr. John White to Inspector, Permanent Way.

(No. 137.)

Government Railways,
Permanent Way,
14 November, 1868.

Sir,

I beg to report that yesterday I found (13) thirteen head of cattle on the line near the platform, Emu Plains, the gates wide open, and no one there to attend to them. I have cautioned the gatekeeper on two occasions lately to be more careful in looking after the gates, but he pays no attention to it. It is time that something was done to make him more careful, or some serious accident might be the result.

Yours obediently,
JOHN WHITE.

I call the Traffic Manager's serious attention to this matter, as continued neglect, such as here reported, can only lead to one end,—that of a most serious accident.—J.H.T., 16/11/68.

No. 15.

(68-2975.)

M. HANLY TO THE SECRETARY FOR PUBLIC WORKS.

Penrith, 19 November, 1868.

SIR,

During the whole of the past winter I have had sole charge of the platform at the Emu Plains Station, and feel assured that I have fulfilled the duties of that Station with satisfaction to the public, and justice to the Government who employed me.

My duties have been to issue tickets (excess); and to render accounts of the same once or twice a week. This neither Fruen or Davis are entrusted with.

Two weeks before my suspension, a second individual, by name Fruen, was appointed to night duty, but it was my duty to attend every morning at 5 a.m., as also to be in attendance every evening, on the arrival of the train at 7 p.m.

This appointment of Fruen's was quite unnecessary, and the result shows that he was only there with a view to breed disputes.

There are at the present time two individuals engaged in performing the same duties without any addition to that which during the past winter I have had to perform alone. In point of fact, Davis, one of the new appointments, is not able either to read or write, and, in the pursuit of his duties, has had to call upon casual passers-by to have the addresses on the various parcels read for him before he is enabled to deliver them.

This man Davis arrives at his post of duty by the 9 a.m. train from Penrith, and leaves again at 7 p.m.

And in conclusion, complaints have been frequent enough of cattle trespassing at Emu Plains, the station that I was in charge of; yet no complaints of similar trespass have been made of Penrith station, and it is well known that causes of complaint are frequently arising there.

Trusting that this matter of my suspension will be met by a full investigation,—

I have, &c.,

MICHAEL HANLY.

No. 16.

COMMISSIONER'S MINUTE.

I THINK, under all the circumstances, Hanly has been sufficiently punished by his suspension; let him return to his duty.

Mr. Owen must not act in these cases during his absence on leave.—J.S., 25/11/68.

No. 17.

M. HANLY TO THE TRAFFIC MANAGER.

(68-3275.)

Penrith, 1 December, 1868.

DEAR SIR,

I think you know that when I was first suspended I got no pay during fourteen weeks, as the books at the Railway Office will show. I was four weeks of that at the Cross Roads, and two nights on duty at the Station-house. I am legally entitled to pay for all this time, but as the present Minister for Works is disposed to do me justice, I shall be content with whatever he is pleased to allow me. I suppose old Davies received a week's pay which fairly belonged to me. Make the Station-master Davies hand over this to me. These people should not gain by their lies and injustice.

I trust to you to do me justice—that is all I seek. Oblige by letting me know whether I am to charge for second class 5d. and 8d. return to the Plains, or according to the sheet of fares you sent me, 3d. and 5d., and 7d. and 11d. first class. Give me instructions, as the people are murmuring, and much oblige,—

Your obedient servant,

MICHAEL HANLY.

Forwarded for consideration of the Commissioner. I presume this relates to matters reported to the Commissioner on M.P. 2,333.

ED. OWEN,
18/12/68.

Seen. This appears to have been decided by my predecessor.—J.S., 21/12/68.
Mr. Owen, 22/12/68.—R.M. Seen—ED. OWEN, 22/12/68.

No. 18.

No. 18.

MR. HIGGS TO THE TRAFFIC MANAGER.

(70-3838.)

Government Railways,
Penrith Station,
25 November, 1870.

SIR,

I beg to say that on Tuesday last I again cautioned Porter Hanly, Emu Plains, on his neglecting the signals, but it does not appear to make any impression on him, as yesterday there was no more attention given to them than if I had not spoken to him.

I am, &c.,
ED. HIGGS.

Let me have your *immediate* explanation. Trains must be signalled strictly in accordance with the Regulation Book.

Porter in charge, Emu Platform.

Pro R. MOODY,
E.H., 26/11/70.

Emu Plains, 28 November, 1870.

Dear Sir,

I had a great deal of illness lately. I was very ill the day Mr. Higgs spoke to me. I am now a great deal better. I promise there will be no more cause of complaint.

Your humble servant,
MICHAEL HANLY.

Mr. Hanly was not ill on Saturday last—why did he not work the signals on that day when special train passed?—R.M., 29/11/70.
Porter in charge, Emu.

Emu, 30/11/70.

Dear Sir,

I only got the order from Mr. Higgs a few days before that, and I was so ill at the time I forgot all about it until I received your communication on Saturday evening. I will attend to them in future.

Your humble servant,
MICHAEL HANLY.

P.S.—I received this this morning; as it was taken to Mount Victoria, so I could not send it by this morning's train.—M.H.

Inspector Higgs to see. Point out to this man the rules applicable to this part of his duty.—R.M., 1/12/70. Seen.—E. HIGGS, 2/12/70.

No. 19.

MR. HIGGS TO TRAFFIC MANAGER.

(71-1368.)

Penrith Station,
20 June, 1871.

SIR,

I beg to bring under your notice the conduct of Porter Hanly, at Emu platform. I have written and repeatedly spoken to him about keeping the points clean, but it appears to be of no avail.

I am, &c.,
ED. HIGGS.

If Porter Hanly does not at once attend to the points at Emu and put them in a condition to the satisfaction of the Inspector, he will have to be removed to make way for some one who will attend to it, as the danger is too great to allow this to stand over. Porter Hanly to explain why he has not obeyed Mr. Inspector Higgs' orders.—R. MOODY, 23/6/71.

Porter Hanly in charge, Emu.

Emu Plains,
26 June, 1871.

R. Moody, Esq.

Sir,

I deny the charge; the points are in good order, and have been while in my care. If Mr. Higgs will press his complaints, let me have a fair trial. I have no wish to dispute with any one. Every one in the department and all my neighbours know that I am doing my duty.

I have, &c.,
MICHAEL HANLY.

Mr.

Mr. Inspector Higgs to see. I fear Hanly is incorrigible. He always has been, and I suppose always will be his own master. I will try and run down and see what I can do with him.—R.M., 27/6/71. I shall be glad if you will call upon Porter Hanly to produce the memo. I sent him on the 21st December, 1870; you will then see what I have stated is correct. I may also add that I quite agree with your opinion.—E. HIGGS, 27/6/71.—R.M.

No. 20.

(72-254.)

INSPECTOR HIGGS to THE TRAFFIC MANAGER.

Penrith, 7 February, 1872.

SIR,

I beg leave to say I have again to call your attention to the conduct of Porter Hanly, Emu platform. On Friday last he stated to the Station-master here that some grapes and melons had been stolen from his platform on the night previous, accusing the men in charge of the night goods train of taking them. On hearing this, the same evening, I at once wrote to Hanly, requesting him to send me a written report on the subject; but this, as well as a verbal message I sent in reference to it, is treated with contempt, as he has not thought proper to reply. On Monday he told the Station-master he did not wish to cause any stir, but merely named it to him to keep himself clear in case there should be any inquiry about it.

I am, &c.,
ED. HIGGS.

Complaint against Porter Hanly.—Emu platform.

A copy of Inspector Higgs' report is hereunder for immediate and full explanation. The many complaints reported, and the gross carelessness exhibited, of which I have had personally to complain, show that a more fit person is required for the duty at the Emu platform.—R. MOODY, 10/2/72.

Inspector Higgs to call upon Hanly to explain.

Porter Hanly to let me have his explanation as soon as possible.—ED. HIGGS, 12/2/72.

Porter Hanly to The Traffic Manager.

Emu, 12/2/72.

Sir,

A small quantity of grapes and melons was consumed on this platform on the night of the 1st instant, and Mr. Ellison, the owner of the property, spoke of it next morning. I mentioned the matter to Mr. James Higgs, and gave him the name of a man in the department, John Hayton, who loitered on the platform, and was the only one who could have taken the grapes and melons. Mr. Ellison, the owner of the property, refused to make any complaint, and I had nothing more to say in the matter. It were foolish for me to put a complaint upon paper when the owner of the property made no report. Mr. Ellison will tell the truth if called upon, and I will repeat my complaint. If you are not satisfied with this, let me have a fair trial; all my neighbours, as well as the men in the department, will bear testimony to my honesty, respect to superiors, and attention to duty.

I have, &c.,
MICHAEL HANLY.

As this is a direct charge against Guard Heaton, I called upon him for his report, which I forward herewith.

I would beg leave to say I do not consider Hanly suitable for the situation he now fills.—ED. HIGGS, 14/2/72.

The Traffic Manager, Sydney.

To Mr. Ed. Higgs, Traffic Inspector, Penrith.

Penrith, 13 February, 1872.

Sir,

In reply to Porter Hanly's charge, I beg most respectfully to state that I did stop at Emu Platform on the night in question, for the purpose of returning a bottle of ink that he lent me in the afternoon, as I had to pay the men in the Traffic Department their wages, and according to promise I left it on the platform, and as usual I lifted the truck brakes.

With reference to loitering on the platform, this is not true, neither is it true that I in any way interfered with either grapes or melons. I hope, sir, you will be pleased to make a searching inquiry into this matter, as this is the first time in my life that ever I was accused of dishonesty.

I am, &c.,
JOHN HEATON.

No. 21.

PORTER HANLY to INSPECTOR HIGGS.

Emu Plains, 23/4/72.

DEAR SIR,

I will feel obliged if you would give my wife a pass, as we want to get something at the Co-operative Store, Sydney.

Your humble servant,
M. HANLY.

P.S.—I received 2 gallons oil, 1 box matches, waste.—M.H.

On Thursday night the lock was taken off the points, and they were open when I went down on Friday morning. I intended to let you know at the time, but I thought that it was James Horsman that opened them. I asked him on Saturday, and I felt surprised when he told me that they were opened when he went by on Friday morning.—M.H.

For Traffic Manager's information.—E. HIGGS, 23/4/72.

No. 22.

THE TRAFFIC MANAGER TO THE COMMISSIONER.

HANLY, the porter in charge at Emu, is so totally unfitted to the trust he holds, that I have no alternative but to bring the matter under the notice of the Commissioner. On Friday last, after the stone trucks had been removed from Ryan's Siding, the points appear to have been left unlocked, as Hanly says he found them next morning "open." I need scarcely point out that these points facing up the incline make it so much the more dangerous, and it seems almost miraculous how the up mail escaped. Hanly is, and has been ever since his being put in charge, a great trouble, and his carelessness with his signals especially causes constant complaint from Inspector Higgs, who has for the last two years begged for his removal, on the score of danger to be apprehended from carelessness. I have done everything in my power to sustain Hanly in his place, hoping that time would enable him to get into habits of forethought and carefulness; but the last act, for which he wishes to blame some other person, is of such a character as to compel me to ask his removal, believing it to be highly dangerous to keep him at a post where great vigilance and forethought are essentially necessary for safety.

R. MOODY, 25/4/72.

No. 23.

COMMISSIONER'S MINUTE.

THIS is not the first instance in which Gatekeeper Hanly's inefficiency has been brought under my notice. He is not, nor was he ever fit for an office of responsibility, and such neglect of duty cannot be tolerated any longer; his services in this place must be dispensed with, and he must be placed in a position of less responsibility.

J.B., 25/4/72.

No. 24.

THE TRAFFIC MANAGER TO THE COMMISSIONER.

Hanly at Emu Gatehouse.

HANLY's notice expires to-day, but he positively refuses to leave the gatehouse; and as the doors and windows are kept shut, I shall be glad of instructions how to act, as the gatehouse is much required for the porter succeeding Hanly.

R. MOODY, 6/5/72.

Hanly must be ejected at once, as the house is required for his successor. If the house is kept shut it must be opened, and the new gatekeeper put into possession.—J.B., 6/5/72.

New South Wales Electric Telegraph. Redfern Station.

Received the following message from Penrith Station, 4 p.m., 7 May, 1872 :—

From E. Higgs to Traffic Manager, Redfern.

Your orders are carried out. Hanly is out, and Bissett is in possession.

(72-1351.)

Inspector Higgs to The Traffic Manager.

Penrith, 7 May, 1872.

Sir,

I beg to say that, in compliance with your orders, Hanly is ejected from the gatehouse, Emu Platform. I informed him this morning of your instructions, but he refused to hear them read, or to give up possession of the house. I then told the men to take the furniture out and place it on the platform. After this was done I again requested Hanly to leave, but he said he would not unless I placed my hand on his shoulder and ordered him out, which I did. He then left the place, and Bissett took possession.

I am, &c.,
E. HIGGS.

To Commissioner.—R.M., 8/5/72.

Seen and approved.—J.B., 13/5/72.

Mr. Moody, B.C., 4/6/72.—C.A.G.

Returned, but there are three letters addressed to me by the Rev. Dean Hanly, and which I handed to the late Commissioner at his request, which are not here.—R. MOODY, 10/6/72.

No. 26.

A. LENEHAN, ESQ., TO THE SECRETARY FOR PUBLIC WORKS.

Bank Auction Rooms,
17 July, 1872.

MY DEAR SIR,

May I ask the favour of your perusal of the accompanying documents relative to the removal of Mr. M. Hanly, Station-master, Emu Plains. Mr. Parkes, some two months ago, promised, in your absence, to investigate the cause of his removal, with a view of restoring him or otherwise providing other employment.

You will see by the Petition herewith that *every* inhabitant of the district, without exception, pronounce him obliging and attentive to his duties, and have the highest confidence in his abilities to discharge them.

May I crave your early attention to this matter, and oblige,

Your obedient servant,
AND. LENEHAN.

[Enclosure.]

Emu Plains, 29 April, 1872.

Michael Hanly has been in charge of the Emu Railway Station above four years, and we, the undersigned inhabitants of Emu Plains, do hereby certify that we have always found him honest and obliging, and attentive to his duties. All the respectable people in this quarter have entire confidence in him.

James T. Ryan, Emu Ferry,
Jas. Somerville, Emu Plains,
E. L. Frederick, "
Jas. Coghlan, "
Chas. Paul, "
George Walker, "
Wm. Ellison, junr. "

R. MOODY, 1/8/72.

No. 28.

THE TRAFFIC MANAGER TO J. D. SINGLE, ESQ., M.P.

(72-776.)

Traffic Manager's Office, Redfern Station,
Sydney, 29 April, 1872.

DEAR SIR,

In reply to your verbal inquiry to-day, as to the cause of Hanly's removal, I have to state for your information, that the sole cause is that he is not sufficiently efficient for such a post of trust. It is Hanly's duty to take charge of the signals at his station and the points at Ryan's siding, and the many complaints made by Mr. Inspector Higgs leave no alternative but removal. Hanly will get some other place as soon as I can find a suitable one for him; but in the mean-time I cannot, nor can I expect Mr. Higgs to take responsibilities of so grave a character as those involved in Hanly's case. I have done all in my power to keep Hanly in his place for the last 2½ years, and now that I can no longer accept his responsibilities, I have the Minister's directions to re-employ him whenever I can find a suitable place for him.

I have, &c.,
R. MOODY.

No. 29.

No. 29.

MINUTE OF MINISTER FOR WORKS.

As the Traffic Manager sees nothing to report on in this case, I have carefully considered the petition, as representing all the respectable inhabitants of the district, presented to me by Mr. Lenehan; and if they were ten times the number they could have no effect on my decision in this case, unless they were examined personally before me as to their knowledge of the case; but a perusal of the mass of papers in Mr. Hanly's case has satisfied me, without going to the trouble to examine gentlemen that know nothing of Mr. Hanly's neglect of important duties, or the danger to life and property by such neglect.

It seems most remarkable to me that Mr. Hanly was not dismissed for this neglect of duty, but for disobedience of orders in not accepting a position in the Service where the work was given out, and where he could do no harm by neglecting it.

Mr. Hanly's is perhaps the most remarkable case on record in the management of Railways. This is only the third time he has appealed to me. First, on the 19th of November, 1868, I was appealed to by Mr. Hanly, who was then under suspension for letting a cow stray on to the line; on inquiry, I found no evidence to sustain the charge, but I found that he had been suspended by an officer on leave of absence, who had no right to interfere; I therefore reinstated him.

On the 18th of December, 1868, I was again appealed to by Mr. Hanly on a matter that had been previously dealt with. I declined to interfere with the decision of my predecessor. I am now called upon to restore Mr. Hanly to his former position, or otherwise provide for him in the Public Service. I have carefully considered the points raised by Mr. Lenehan, and the able appeal made by that gentleman in Mr. Hanly's favour, and also Mr. Hanly's own personal representations and explanation on his case; but I can see nothing in the petition or explanation that would justify me in restoring Mr. Hanly to his former position, or otherwise providing for him in any branch of the Public Service under my control.

JOHN SUTHERLAND, 5/8/72.

No. 30.

MR. HANLY TO THE SECRETARY FOR PUBLIC WORKS.

(72-2501.)

Sydney, 25 July, 1872.

DEAR SIR,

After a faithful discharge of my duties in the Railway Department during six years, I was dismissed last May without cause.

The Traffic Manager's charge against me is "Hanly was not sufficiently efficient." Not efficient is vague enough, "sufficiently" makes it the excuse of a special pleader.

Moreover, all the residents of Emu Plains testify to my honesty, civility, and attention to duty. Mr. Moody has complaints against me and my explanations; let these papers be produced, and you can see at a glance who is in the right.

About the middle of April I gave a passenger a ticket, and having no change, I gave £1 to Haydon the guard, requesting him to let the passenger have his change and bring me price of ticket. Haydon gave the man another excess ticket, and laughed at me when I pressed him for my 5s. 2d.; it was only yesterday that Mr. Higgs told my brother there is 5s. for me. Perhaps the gentlemen learned that you had spoken to me.

You will find that I always asked for investigation.

I now beg of you a fair trial, and have the honor to be your most obedient servant,—

MICHAEL HANLY.

I require the whole of the papers in this case, and the Traffic Manager to report on the whole, and state the reasons for this man's dismissal.—J.S., 25/7/72.

Papers herewith. Mr. Moody.—B.C., 8/8/72.—C.A.G.

No. 31.

(72-1878.) No. 13.

THE TRAFFIC MANAGER TO THE COMMISSIONER.

Below is a Schedule of cases *in re* Hanly, for information.

67/58, 10 January, 1867.—Reported by Mr. Thomas for carelessness in his accounts, upon which he resigned. He was afterwards re-employed as watchman.

67/1583, 14 August, 1867.—Reported by late Traffic Manager for insubordination and leaving his points. For this he was severely reprimanded by the Commissioner, Mr. Byrnes, and he apologized for same.

67/2398, 22 November, 1867.—Carelessness at points, mail engine off the line at Penrith. Commissioner's minute—"If not more attentive to his duties he will be dismissed."

67/2397, 3 December, 1867.—Carelessness in sending empty trucks away that had been specially ordered for contractor. Threatened with dismissal if not more attentive.

68/773, 19th March, 1868.—Absenting himself without leave, asleep on duty, leaving his points without protection, and travelling to Sydney without a pass. Dismissed.

68/2370, 24 August, 1868.—Absenting himself without leave, leaving his gates open, cows straying on the line. "This man has offended so often that I beg to recommend his dismissal.—E. OWEN."

Overlooked.

68/2909,

68/2909, 17 November, 1868.—Neglecting gates. Late Traffic Manager reports—"He is utterly unfit to hold any post in this department."

70/3838, 25 November, 1870.—Neglect of signals, verbal complaints innumerable made by Inspector Higgs, which had been overlooked by present Traffic Manager.

71/1368, 20 June, 1871. Neglecting to keep his points clean. Threatened with dismissal.

72/254, 7th February, 1872.—Making malicious charge against Guard Heaton. Inspector Higgs reports—"I do not consider Hanly suitable for the situation he now fills." Overlooked.

72/776, 23 April, 1872.—Neglecting to lock his points. Commissioner's minute—"This is not the first instance in which Gatekeeper Hanly's inefficiency has been brought under my notice. He is not, nor was he ever, fit for an office of responsibility, and such neglect of duty cannot be tolerated any longer: his services in this place must be dispensed with, and he must be placed in a position of less responsibility." J.B., 25/4/72.

26 April, 1872.—Notice was given to Hanly to leave the gate-house and report himself at Penrith Station for employment. See copy marked A.

A man was sent to relieve Hanly, and on expiry of notice he was requested to move out of the house for his successor; this he refused to do, and I received telegram marked C.

The Minister for Works then directed that Hanly should be put out of the gate-house, which was carried into effect; and as Hanly refused to do duty at Penrith he was *dismissed for disobedience of orders*.

Hanly's letter of 25 July, above mentioned, says he "faithfully discharged his duties for six years, and he was dismissed without a cause." As he has been asking for a "fair" trial a good many times, he should now, I respectfully submit, be judged upon the evidence, with a view to finality.

I need scarcely remark that the evidence will not only disprove Hanly's charges, but will expose the state into which the department has drifted, when it has been deemed necessary to retain a negligent and incompetent man in a place of trust for so long a period, to the imminent risk of life and property.

As a proof of what I have been subjected to personally at the hands of the Rev. Dean Hanly in this matter, I must invite the Minister's attention to exhibits marked respectively D, E, F, G, H, and I, and will content myself with a few remarks on Hanly's letter of 25th July last. That letter is in the handwriting of the *Rev. Dean Hanly*, who has been informed by letter on more than one occasion of his brother's negligence, and *was also well aware that Hanly was dismissed for disobedience of orders*, in acting upon the advice offered to him by the Rev. Dean, instead of going to his work, as directed in the Traffic Manager's memo. (exhibit marked A); and yet it is alleged, in the first paragraph of the letter referred to, that Hanly "*has discharged his duty faithfully during six years, and was dismissed without cause.*"

I would further respectfully remark that too much of my time is unfortunately taken up with matters of this character, and the public safety and general management of the lines are necessarily neglected, and dangers must arise in consequence, as I have no one at liberty that I can depute to attend to my general duties; and I need scarcely remind the Minister that it is a duty requiring the undivided attention of the Traffic Manager, who ought to be held free from these vexatious matters, that his attention might fairly be directed to the safety of life and property entrusted to his care.

The excessive labour which has devolved upon me for a long time past has, I am advised, seriously injured my health; and, as I am fully sensible of the serious penal responsibilities attaching to a careless and negligent attention to the duties of the office which I have the honor to hold, I must pray protection against this careless vexatious interruption to the proper duties of my office as Traffic Manager, in attending to matters done either by the Commissioner or under his direction.

R. MOODY,
19/8/72.

No. 32.

EXHIBITS A, C to I; IN TRAFFIC MANAGER'S SCHEDULE.

A.

The Traffic Manager to Inspector Higgs, Penrith.

GIVE Gatekeeper Hanly notice that his services will not be required at Emu after to-morrow (Saturday) week, and that he must quit the house for his successor to take possession on Monday following.

The Minister has decided that he is unfit to be trusted with the points and signals at such an important place as Emu. He will be provided with another place as soon as a suitable one can be found him; in the mean-time he may be taken on at Penrith as extra porter for such odd jobs as he may be able to do, that is as soon as his time expires at Emu.

So long as Hanly remains, let Penny visit the points every night after the mail train has passed, to see that they are safely locked against the up mail, and that he visit again each morning.

R. MOODY,
26/4/72.

C.

New South Wales Electric Telegraph. Redfern Station.

Received the following message from Penrith Station at 10.30, 6 May, 1872:—

From E. Higgs, Penrith, to Traffic Manager, Redfern.

HANLY refuses to leave until he has written instructions: will you please send them. Bissett states that Dean Hanly informed him on Friday last that he had received a letter from you, saying his brother was only suspended, and would be reinstated in a few days.

I had not sent any communication whatever to Rev. Dean Hanly.—R.M.

D.

The Rev. Dean Hanly to The Traffic Manager.

Penrith, 7 May, 1872.

Dear Mr. Moody,

My brother was rudely thrust out of his house to-day by Mr. Higgs. Did you sanction this proceeding?

I go to Sydney in the morning to consult lawyers and appeal to Members of Parliament. We shall have a full investigation. Take your side; join the rogues or the honest men.

Yours, &c.,
J. HANLY.

Mr. Higgs called you a *liar* on the occasion.

E.

The Rev. Dean Hanly to The Traffic Manager.

Penrith, 2 May, 1872.

Dear Mr. Moody,

I have received your papers. I write again to Mr. Macleay requesting that he press for an investigation. Join the rogues or the honest men. We must have a trial.

Yours, &c.,
J. HANLY.

F.

The Rev. Dean Hanly to The Traffic Manager.

Penrith, 2 May, 1872.

Dear Mr. Moody,

I have placed in the hands of Mr. Macleay your vague charges "*incompetence*" against Michael Hanly, of Emu, and the certificate of all the inhabitants of Emu Plains of Hanly's honesty, civility, attention to duties.

Take your choice now—join the rogues or the honest men. Write Mr. Macleay what you honestly think of Hanly. We shall have a full investigation. If you tell a *story*, you may go out with the old bigot Byrnes.

Honesty is the best policy.

J. HANLY,
Dean.

G.

Redfern Station, 2 May, 1872.

THE Rev. Dean Hanly called at the Traffic Manager's office on Wednesday afternoon, before 5 o'clock p.m. Called Mr. Moody and Byrnes "scoundrels and schemers," and characterized their conduct as "detestable roguery and trickery."

T. W. CULLEN.

H.

Mr. Thos. Mayo to The Traffic Manager.

Redfern Station, 2 May, 1872.

Sir,

I have to inform you that Dean Hanly called at your office, on Wednesday, the 1st May, and inquired for the Traffic Manager. After the reply had been given, by one of your clerks, in the negative, the Dean made use of the following expression, viz., "that Mr. Byrnes and Moody were scoundrels, schemers, and treacherous dodgers," and characterized their conduct (meaning Mr. Byrnes and Mr. Moody) as being detestable in the extreme, and that he would soon have them out of this place.

I have, &c.,
THOS. MAYO.

I.

Messrs. Thomson, Marks, and Sotheren to The Traffic Manager.

Redfern Station, 2 May, 1872.

Sir,

We have to inform you that Dean Hanly called at your office on Wednesday, the 1st instant, during your absence, and made use of the following expressions:—

Dean Hanly inquired if the Manager was in, and on our replying in the negative, he began to abuse you and the Minister for Works, stating that you were both "scoundrels, schemers, and treacherous dodgers," and further characterized your conduct as being detestable in the extreme. He then left the room in a very excited state, and met Mr. Davis, Station-master, Liverpool, at the bottom of the steps, and spoke to him in a loud voice.

We have, &c.,
JOHN R. THOMSON.
LYON J. MARKS.
GEO. R. SOTHEREN.

No. 33.

No. 33.

MINUTE OF MINISTER FOR WORKS.

Minister's memo. on Traffic Manager's minute, No. 13, 72/1878.

I HAVE decided Mr. Hanly's case, on the Traffic Manager's report of 1/8/72 (No. 72/2237), without this long list of charges and alphabet of curiosities, which have for the first time been presented to me, or been on the records of this department. All documents of a public nature should become the property of the department so soon as received, and be registered amongst its records; and I cannot understand how any documents not so recorded could be brought forward as evidence for or against any man.

The Traffic Manager, in the last paragraph of his report, asks for my protection from being called upon to attend to matters done either by the Commissioner or under his direction. I see nothing done in this case by the present Commissioner, or by his direction. I therefore disapprove, as I have often done before personally to the Traffic Manager, of making such rash assertions as these. I have always protected the Traffic Manager, not only when I thought he was right, but more than once when I thought, to say the least, he had erred in judgment; and my action in this case not only protects the Traffic Manager but the Public Service from the evils he complains of, at least for my time in office.

I agree with, and have twenty times before now, told the Traffic Manager that too much of his time is taken up with work that could be well performed by a third class clerk. Again, the Traffic Manager says he has no man at liberty that he can depute to attend to his general duties. The Traffic Manager may have no man at liberty, or as I would say, idle, but he has one gentleman who has more than once, and for many months at a time, occupied the position of Acting Traffic Manager with considerable satisfaction to all concerned. I find that gentleman now filling a position the duties of which were most satisfactorily performed by a clerk at about one hundred per annum; he has many others quite able to take the general duties of his office; I would have no hesitation not only in giving them the duties but the responsibilities also. From what I know of the officers and men under the Traffic Manager's charge, I believe there is no officer under the Government that has better materials to work upon, if he would only permit it to be utilized. Let him remove the bushel; and in place of the one light, as at present, he would find twenty bright and shining lights around him to lighten his path and relieve him of the harassing duties he complains of.

The Traffic Manager, in this minute, also says the public safety and general management of the lines are necessarily neglected, and dangers must arise in consequence. If so, it is time I looked for some one to relieve the Traffic Manager of these most important duties of his office. The Traffic Manager knows well that up to the present time he has had full power and control over every officer and man in his department, with every assistance from me he has asked for; he has made changes and additions in his department, without mine or the Commissioner's knowledge or consent, but in no case have I or the Commissioner made any changes or additions to his department without his request and advice. These large powers were left in the hands of the Traffic Manager to enable me the better to judge of his abilities to perform the duties of the more important office of Commissioner for Railways, which he is so anxious to have conferred upon himself.

I therefore at the present time cannot relieve him from any of the responsibilities properly attached to the office of Traffic Manager.

JOHN SUTHERLAND,
21/8/72.

This paper has been perused by the Traffic Manager, who requested permission to withdraw his minute; but after due consideration, I think it should remain a record of the office, as it is not the first time that similar requests have been complied with.—J.S., 26/8/72.

The whole of the papers in Mr. Hanly's case may now be sent to the Colonial Secretary, who has been appealed to by Mr. Hanly for a reversal by the Government of the decision come to by me in his case.

I therefore would be glad if the Colonial Secretary would peruse some of these papers, and he would find ample evidence to disprove the statements made in Mr. Hanly's letter to the Colonial Secretary, and ample, without the second batch, to justify me in the course I adopted in this most remarkable case.—J.S.

RAILWAYS.

(REPORT FROM 1866 TO 1871 INCLUSIVE, BY JOHN RAE, M.A., COMMISSIONER FOR RAILWAYS.)

THE COMMISSIONER FOR RAILWAYS TO THE SECRETARY FOR PUBLIC WORKS.

Department of Public Works,
Railway Branch,
Sydney, 9 January 1873.

SIR,

In my Reports, dated respectively 30 September 1865, and 1 October 1866, I gave a summary of the origin and progress of the Railways of New South Wales, from 1846 to 1865 inclusive. In accordance with your instructions, I have now the honor to submit, for the consideration of the Government, a continuation of this summary, which will bridge over the intervening period to the close of the year 1871.

The tables in the Appendix, which have been carefully compiled from authentic sources, will serve to collect into a focus a large series of scattered facts and figures connected with the construction and working of our Railways, and will be useful for official reference. A few explanatory remarks on these tables will form the subject of this Report.

LENGTH OF LINES.

At the date of my last Report, the total length of lines open for traffic Length of lines open for traffic.
amounted to 143 miles.

The following extensions have since been opened:—

Picton to Goulburn	81 miles
Penrith to Rydal	77 "
Singleton to Wingen... ..	57 "

Making an addition of 215 miles

And a total of 358 miles

open on 31st December 1871.

The dates of opening the different sections on all the lines, and their lengths, are Dates of opening. Appendix 9.
given in the Appendix.

PROGRESS OF WORKS, AND COST OF CONSTRUCTION.

The appended Report of the Engineer-in-Chief, of date 8 January 1872, (an Appendix 1. Progress of works on extensions.
extension of his Report of 30th October 1871, to the close of that year), gives a detailed account of the different contracts, and the nature, quantity, and progress of the works on the extensions from Picton, Penrith, and Singleton.

Southern line. On the Southern line, from Picton to Goulburn, a distance of $81\frac{1}{4}$ miles; the contracts for construction were divided into seven sections, all of which have been satisfactorily completed. The line to Goulburn was opened on 27th May 1869. The total cost of the works on this extension, including trial surveys, engineering expenses, purchase of land, construction of works, permanent way, station buildings, and heavy flood repairs, amounted on 31st December 1871, to £1,024,455 18s. 9d., or at the rate of £12,609 per mile.

Western line. The Western extension, from Penrith to Bathurst, a distance of 109 miles, was divided into nine sections, the last of which carries the line to Kelso. Six of these were completed, and the seventh nearly so, at the close of 1871. It is expected that No. 8 will be finished on 1st May next. The time for completing No. 9 is still an open question.

The total amount expended on this extension, to 31st December 1871, including engineering expenses and trial surveys, was £1,649,113 4s. 10d.

The estimated cost per mile, including the Bridge over the Nepean at Penrith, was £15,691; but the actual cost cannot be stated till the completion of the works.

Northern line. The contracts on the Northern line, from Singleton to Murrurundi, a distance of nearly 70 miles, were divided into five sections. Four of these were completed by the end of 1871, and the fifth on the 4th of April following, when the line was opened to Murrurundi.

The total expenditure on this extension, to 31st December 1871, was £693,222 0s. 11d.

The estimated average cost per mile, including the Bridges over the Hunter, at Singleton and Aberdeen, was £10,084; the actual cost, to 31st December 1871, cannot be stated, as the contracts were not completed.

Heavy nature of works on extensions.

The average cost per mile on these extensions will appear moderate, when the heavy nature of many of the works is taken into consideration. Thus, on the Southern line, there are the costly viaducts at Picton, Wingecarribbee, Wollondilly, Mulwarree, Barber's, and Boxer's Creeks; and the expensive tunnels at Redbank Range and Gibraltar Gap: on the Western, the much-admired viaducts at Knapsack Gully and Lithgow Valley; the Clarence Tunnel, and the tunnels at Lithgow Valley Zig-zag, Morangaroo, and under the Mudgee Road; and the bridges over Solitary Creek and at Tarana Mountain: and on the Northern, the handsome bridge over the Hunter at Aberdeen. But in addition to these, there are 102 smaller bridges of timber, masonry, and ironwork; 776 culverts, varying from 18 inches to 30 feet in span; and the enormous mass of 9,124,933 cubic yards of excavation, of which a large portion was in rock, and which, if heaped together, would be nearly thrice the bulk of the largest Pyramid of Egypt.*

Relative amount of work on different lines.

The quantity and nature of the excavation may, to some extent, be taken as an index to the geological features of the country which has been pierced by the different lines of our Railways. The proportion of rock cannot be exactly stated; as four contracts on the Western, and one on the Northern, were accepted on the new principle, adopted to save disputes with contractors, of paying for the excavation at a fixed price by the cubic yard, without distinguishing between rock and soil. But the relative

* The pyramid of Cheops is the largest of the group. According to Herodotus, 100,000 men were employed ten years in forming the road over which the materials were to be drawn, and twenty years in the construction of the pyramid itself; it stands on a rectangular base, covering an area of about 11 acres, and rising to an elevation 127 feet higher than the cross of St. Paul's Cathedral. The dimensions of this pyramid are stated to be 480 feet in height, with a base of 750 feet in length, which by an easy calculation ($750^2 \times \frac{4}{3}$) makes the total mass 90,000,000 cubic feet or 3,333,333 $\frac{1}{3}$ cubic yards.

REPORT OF THE COMMISSIONER FOR RAILWAYS, 1866-1871.

7

quantities of excavation on the different lines, at 31st December 1871 (omitting the rock in five contracts), were as under:—

	Miles open.	Excavation.	Proportion of Rock.
		cubic yards	cubic yards
Southern	81	2,094,368	546,501
Western	77	5,021,518	1,782,833
Northern	57	2,009,047	189,563
Total.....	215	9,124,933	2,518,897

Thus, according to the mileage, there was more excavation but much less rock on the Northern than on the Southern; while on the Western there were more excavation and much more rock than on the Southern and Northern lines combined.

The steepest gradients are 1 in 30 on the Southern and Western, and 1 in 33 on the Northern; and the smallest radius of a curve is 16 chains on the Southern, 8 on the Western, and 20 on the Northern extensions. Gradients and radii of curves on extensions.

At Picton, 53 miles from Sydney, where the Southern extension commences, the line is 549 feet above high-water mark; and at 91 miles from Sydney, near Mr. Badgery's residence, it reaches the highest elevation of 2,357 feet, thus rising 1,808 feet in a distance of 38 miles. Highest elevation on Southern line.

The Western line at Penrith, 34 miles from Sydney, is 88 feet above high-water mark, and attains its highest level of 3,658 feet, at the entrance to the Clarence Tunnel, 88 miles from Sydney, thus ascending 3,570 feet in 54 miles. Highest elevation on Western line.

The Northern extension, starting from Singleton, 49 miles distant from Newcastle, at an elevation of 135 feet above high-water mark at that port, ascends to 1,546 feet at Murrurundi, 120 miles from Newcastle, rising 1,411 feet in 71 miles. Highest elevation on Northern line.

The principal objects of interest on these extensions are the Zig-zags at Emu Plains and Lithgow Valley, on the Western. Since the opening of the line to Bowenfels, thousands of tourists from all lands have visited these works, and expressed unbounded admiration at the rugged grandeur of the scenery, and the engineering skill and pluck displayed in designing and constructing these stupendous works, which are probably not surpassed on any Railway in the World. The Zig-zags on Western line—objects of interest.

But a description or even an inspection of the Lithgow Valley Zig-zag, gives but an imperfect idea of the difficulties that had to be encountered, and the vast amount of work that had to be performed, before it was hewed into its present shape. From the Clarence tunnel to the bottom of the valley there is a descent of 470 feet, through a deep and rugged ravine, where formerly there was scarcely footing for the mountain goat, and where the surveyor's assistants had occasionally to be suspended by ropes in the performance of their perilous duties. But human skill and enterprise have opened a pathway through these broken mountain ranges for the railway train, that now traverses the sides of the mountains, on a gradient of 1 in 42. Magnitude of works on Zig-zag, Lithgow Valley.

In the execution of these works, two gigantic masses of rock—the one estimated to contain 40,000, and the other 45,000 tons—had to be blasted; and the contractor, after estimating the cost, determined to call in the aid of electricity for the purpose. The first mass to be operated upon was a spur of the mountain, a few hundred feet from the first reversing station, which blocked up a portion of what is now the middle line of railway. Preparations were accordingly commenced, by excavating a trench on the top of the rock, in the line where the division was required to take place, and drilling in this trench twenty-five triangular holes, 30 feet deep, and of sufficient capacity to be charged with $3\frac{1}{2}$ tons of blasting powder, in all. The galvanic arrangements were made under Blasting of gigantic masses of rock by electricity.

the directions of Mr. Cracknell, Superintendent of Telegraphs, who, on the 5th January 1867, succeeded in firing the blast, which tore the mountain asunder, heaving huge masses of rock into the valley, and leaving the face of the parent mountain almost as plain as if it had been cut with chisels.

Blowing up of
tunnel by
electricity.

On 16th September 1868, another electric shock was employed in blowing up a tunnel, which perforated the mountain about 200 yards from the second reversing station. After the boring of this tunnel had been completed, the Engineer-in-Chief, from careful inspection, entertained doubts of its stability, and gave orders for its removal. This was successfully accomplished in the same manner as the last, by means of the galvanic current acting on $3\frac{1}{2}$ tons of powder, in chambers cut in the rock for its reception. The battery operations were again conducted by Mr. Cracknell, and the electric spark was communicated to the powder by the hand of the Countess of Belmore, in the presence of His Excellency the Governor and a large concourse of spectators, who had assembled to witness the effects of the explosion.

Blasting of
80,000 tons of
rock in two
shots.

Appendix 2.

A feat so startling, by which in two blasts upwards of 80,000 tons of rock were torn from the solid mass and shattered to pieces, is worthy of record in a description of our railway works; and I have appended a full account of the whole proceedings, from the pages of the *Sydney Morning Herald* of 7th January 1867, and 18th September 1868.

Cost of
construction.
Appendix 17.

Cost of lines
open for traffic.

In Table No. 17 of the Appendix will be found a detailed statement of the cost of construction of our Railways, and the total expenditure, including rolling stock, machinery, workshops, station and other buildings, and trial surveys, from the commencement to the 31st December 1871. The cost of lines open for traffic at any period cannot be exactly stated, but may be ascertained sufficiently near the truth by deducting the amounts paid to contractors during the year from the total cost. This will give the following results:—

Year.	Lines open for Traffic.			Lines in Progress.			Total Expenditure.		
	£	s.	d.	£	s.	d.	£	s.	d.
1865	2,746,373	5	5	869,622	11	4	3,615,995	16	9
1866	2,786,094	10	7	1,321,885	9	8	4,107,980	0	3
1867	3,282,319	18	4	1,377,196	6	1	4,659,516	4	5
1868	4,060,950	2	5	1,159,217	5	0	5,220,167	7	5
1869	4,681,329	7	6	985,634	17	7	5,666,964	5	1
1870	5,566,092	9	5	607,566	10	3	6,173,658	19	8
1871	5,887,257	14	3	632,025	17	10	6,519,283	12	1

Cost per mile.

From this statement, it will be found that the cost per mile, on the average length of the lines open for traffic, was as under:—

Year.	Lines open for Traffic.	Average length of Line open.	Cost per Mile.
	£	miles	£
1865	2,746,373	143	19,205
1866	2,786,094	143	19,483
1867	3,282,320	175	18,756
1868	4,060,950	225	18,048
1869	4,681,329	269	17,402
1870	5,566,092	329	16,918
1871	5,887,258	350	16,820

Reduction in
cost per mile
occasioned by
cheaper
extensions.

The reduction in the cost per mile, from 1866 to 1871, is attributable to the reduced cost of the works on the extensions. The cost of the double line from Sydney to Parramatta, which was at the rate of £44,321 per mile in 1864, is gradually reduced as it

becomes distributed among the cheaper single lines to Picton, Penrith, and Singleton, and is still further reduced by the increasing length and lower cost of the extensions beyond these termini, till in 1871 the cost of the whole, including the trunk line, is only £16,820 per mile; while it will be seen by a foot-note on page 16 of my first Report, that the average cost of the Victorian, and seven of the principal Railway lines in England, is £40,851 per mile.

Cost per mile on other Railways.

In Tables 19 and 20 will be found a statement of the Public Debt for Railways, and an abstract of the total expenditure on their construction, showing the Loan and Appropriation Acts which sanctioned the expenditure, and the balance unexpended on 31st December 1871.

Public Debt for Railways. Appendix 19, 20.

PERMANENT WAY.

The Permanent Way and Works have been maintained throughout from Working Expenses. The amount expended annually for this purpose was as follows:—

Permanent Way and Works.

	£	s.	d.
1866	27,082	7	10
1867	27,181	5	10
1868	30,009	19	3
1869	40,489	2	10
1870	58,009	12	10
1871	61,158	17	4

The appended Report from the Engineer-in-Chief will show the details of this expenditure during 1871, and the condition of the Way and Works at the close of that year.

Appendix 3.

LANDS TAKEN FOR RAILWAY PURPOSES.

Instead of encumbering the Schedule, as formerly, with the details of each separate lot, I have appended a condensed statement of the whole lands taken for Railway purposes to 31st December 1871, showing the quantity taken on each line, the amount claimed, and the total sum paid and still due, with the rate per mile on each line, and the average rate per mile on the whole.

Lands taken for Railway purposes. Appendix 10.

From this statement the following figures are taken:—

Railway Lines.	Quantity taken, in Acres.	Amount claimed.	Total Cost.
		£	£
Darling Harbour Branch.....	15	30,540	30,724
Trunk Line to Parramatta	179½	28,130	16,921
Southern Line	1,986½	74,837	43,523
Western Line	2,869½	68,535	39,502
Richmond Branch	140	7,303	5,303
Northern Line	1,846	160,856	64,851
Morpeth Branch	35½	32,368	20,789
Total	7,072	402,569	221,613

It thus appears that, with the exception of the Darling Harbour Branch—where the total cost appears in excess of the amount claimed, arising from incidental expenses—the labours and skill of the Railway Valuator have effected a considerable reduction in the sums claimed on each line, amounting in all to a saving of £180,956 to the Government.

Reduction in amount claimed.

The cost per mile has been calculated in two ways: in the one case, taking the distance through private property alone; and in the other, including Crown Lands, which were equally taken for Railway purposes, although no money was paid for them. By including these Crown Lands, the mileage is of course increased, and the cost per mile proportionately reduced.

Cost per mile for lands taken for Railway purposes.

Exceptional cases of cost per mile.

It will be seen by the Schedule, that the cost per mile, including Crown Lands, varies considerably on the different lines, and on the different sections of each. Thus, on the Darling Harbour Branch, the cost is at the enormous rate of £26,862 per mile; from Sydney to Newtown, £5,685 per mile; from Parramatta Junction to Toongabbee Creek, £3,995 per mile; from Parker-street to Proctor's Lane, Penrith, £2,452 per mile; from Newcastle to Honeysuckle Point, £21,738 per mile; thence to West Maitland, £1,245 per mile; and on the Morpeth Branch, £6,036 per mile. But these are exceptional rates, occasioned by exceptional circumstances, such as proximity to towns, and the necessity of taking valuable buildings, &c.; yet, in spite of these heavy amounts, the average rate per mile for the whole lands taken is £834 14s. 8d., when confined to private property, or £551 when Crown Lands are included; either of which amounts will, I think, contrast favourably with the cost per mile for land taken on other Railways, either in the Mother Country or in the neighbouring Colonies.

Average cost per mile.

ROLLING STOCK AND MACHINERY.

Machinery. Appendix 16.

In the Appendix will be found returns of all the machinery and rolling stock, in use from the opening of our Railways; their number in 1865, and the annual additions from that date.

Rolling Stock.—
No. of vehicles.
Appendix 11, 12,
13, 14.

The total number of locomotives and vehicles for passengers and goods traffic at the close of 1871 was as under:—

Description.	South and West.	North.	Total.
LOCOMOTIVES.			
Tank	5	3	8
Tender	42	16	58
Total	47	19	66
PASSENGER STOCK.			
First class carriages... ..	16	6	22
Composite	17	17
Second class	62	32	94
Carriage trucks	26	12	38
Horse-boxes	35	16	51
Brake-vans	18	6	24
Mail-vans	4	3	7
Prison-van	1	1
Hearses	2	2
Total	181	75	256
GOODS STOCK.			
Low-sided waggons, A	66	40	106
High-sided, B	105	15	120
Covered, C	49	16	65
Medium, D	477	157	634
Timber-trucks, E	16	16
Brake-vans	14	9	23
Ballast-waggons	14	25	39
Meat-vans	10	10
Cattle-vans	55	23	78
Sheep-vans	24	7	31
Total	830	292	1,122
Or, combining the three Classes—			
Locomotives	47	19	66
Passenger Stock... ..	181	75	256
Goods Stock	830	292	1,122
Total No. of vehicles	1,058	386	1,444

The following alterations have been made in the classification of the old stock :—

Alteration and
now classifica-
tion of old stock.

The coupé and pic-nic carriages are now numbered and ranked as first class carriages.

After the Pitt-street Tramway was taken up, and the cars were no longer required, one of them was converted into a first class carriage, another into a second class carriage, and two were broken up as useless.

The old third class carriages have been altered to rank as second class carriages.

Of the low-sided A trucks, ten are now used as ballast waggons.

Three of the brake-vans are worn out, and are to be replaced by new ones.

The whole of the locomotives and rolling stock have been maintained throughout, and are now in good order and condition; and the cost of repairs and renewals (as in the case of the new brake-vans) has in all cases been charged against the Vote for Working Expenses.

Condition of
rolling stock.

The total amount expended on rolling stock from the commencement to the close of 1871 has been—

Cost of rolling
stock.
Appendix 15.

	£	s.	d.	£	s.	d.
For Locomotives—						
Imported from England ...	151,997	9	7			
Manufactured in the Colony ...	49,026	13	2			
				201,024	2	9
For Passenger and Goods Stock—

Manufactured in the Colony ...	72,459	18	3			
				288,040	13	8
Total expenditure ...				£489,064	16	5

For several years after commencing the construction of our railways, the only means we had of procuring permanent way, rolling stock, and other materials, was by calling for tenders from English manufacturers through the Agent-General. This mode of proceeding was generally felt to be injurious to the interests of the Colony; and on 10th January 1862, a motion was carried in the Assembly—"That, in the opinion of the House, tenders should in future be called for within the Colony for all railway plant, rolling stock, supplies, and goods required for the Public Service." From that date, accordingly, tenders have been invited in the Colony for all railway materials; but few were received from colonial manufacturers till the year 1869, when the Government considered that the best mode of inducing manufacturers and capitalists to incur the necessary outlay for buildings and plant, was to make the contract extend over a series of years. On this principle, tenders were called for in this and the neighbouring Colonies; and, in June 1869, the tender of Messrs. Mort, Vale, & Lacy was accepted for the construction of locomotive engines, and that of Messrs. P. N. Russell & Co. for the construction of the rest of the rolling stock—the contracts being for one year certain, and to be extended to five years, on Parliament giving its sanction to the arrangement. The passing of the vote for the second year's supply was considered sufficient sanction; and in December 1871, it was intimated to the contractors that their contracts were extended to five years respectively.

Rolling stock
originally
procured from
England.

Resolution of
the Assembly
that tenders be
called for in the
Colony for
railway plant.

Tenders accepted
for manufacture
of rolling stock
in the Colony.

We have still to depend on the Mother Country for the supply of Permanent-way materials; but with the exception of wheels and axles, and some other parts of the stock, which, from want of the necessary appliances in the Colony, must also be procured from England, the whole of our rolling stock is now manufactured in Sydney; and, after an experience of three years, the Government has every reason to be satisfied with the success of the experiment. The quality and cost of the stock will bear a favourable comparison with that imported from England; and its manufacture in the Colony gives encouragement to some of our largest industrial establishments, affords employment to hundreds of workmen, and puts in circulation a large amount of capital which would otherwise have found its way to England.

Except wheels
and axles, &c.,
rolling stock
now manufac-
tured in Sydney.

Advantages of
this course.

No. of vehicles used on different Railways per train mile run.

The following Table will show the quantity of Rolling Stock used on our Railways, compared with that used on English and Victorian Railways, *per train mile run*.

	UNITED KINGDOM.	VICTORIA.	N. S. WALES.
	Train miles run.	Train miles run.	Train miles run.
LOCOMOTIVES.			
1 for every	18,026	14,496	20,184
PASSENGER STOCK.			
1 for every	8,402	7,805	8,919
GOODS STOCK.			
1 for every	660	877	1,288
ALL VEHICLES.			
1 for every	565	698	960

Deficiency of stock on our Railways.

Thus, in each of the classes, we employ the smallest number of vehicles for the work performed; but instead of taking any credit for this result, I regard it as a proof that we are over-working our stock. We have constant applications from the Traffic Department for additions to the quantity on hand; and, with respect to the deficiency of engine power, the Locomotive Superintendent thus writes:—"Of the Goods and Passenger Engines suitable for working the steep gradients, twenty are running every day, and in some cases double shifts of men are put on them, and the same engines are worked day and night, which is a most destructive practice. It will be seen that this leaves only five available at one time for repairs and emergencies. As these engines require to be taken in for ordinary repairs every four months, it is utterly impossible to do what is necessary to them, as before one can be got ready for running, there are always two ready to come in for repairs; and it will be impossible much longer to provide sufficient locomotive power for the traffic with our present number of engines.

Locomotives overworked.

"There are moreover twelve out of the engines suitable for steep gradients, which require new boilers, fire-boxes, tubes, &c. These engines would have lasted much longer without these extensive renewals being required, if they had received fair usage; but there not having been sufficient engines to work the traffic, it has often been necessary to work them night and day.

Average mileage for locomotive.

"2,000 miles is considered a fair monthly average for a locomotive; but it will be seen from our mileage returns that many of our engines are constantly running over 3,000, and in some cases over 4,500 miles per month."

Necessity for increasing rolling stock.

All this explains the large demands on the Vote for Working Expenses, for repairs, which could have been avoided if the quantity of the rolling stock on hand had been sufficient for the traffic; and clearly points to the necessity of increasing it as rapidly as possible.

TRAFFIC.

Appendix 21, 22, 23, 24.

Traffic returns.

Appendix 26.

The Tables in the Appendix furnish a detailed statement of the number and class of passengers, the quantity of goods and live stock carried, the total earnings and working expenses, the amount of capital invested, and the net earnings on all the lines. From these tables I have prepared a comparative statement, which will give a bird's-eye view of the progress and working of our Railways during the seven years ending on 31st December, 1871.

Comparison of traffic in different years.

In reviewing the movement of Railway traffic for a series of years, we do not expect the same amount of detail, as in recording the transactions of a single year. To commence with a brief comparison of the traffic in passengers and goods each year of the series, with that of the preceding year:—

COACHING.

During 1866, no addition was made to the length of line opened for traffic, which remained at 143 miles. There was a decrease of 83,257 in the number of 1st and 2nd class passengers, but an increase of 155 in the number of season ticket holders. The receipts from coaching traffic show a similar decrease of £7,348. On the other hand, the receipts from goods, on all the lines, are in excess of those of 1865; and, with the exception of the Richmond Branch—which has never paid working expenses—there is an increase in the receipts, from all sources, of £2,503. Traffic in passengers and goods, 1866.

In 1867, the Southern line was extended to Sutton Forest, 33 miles, and the Western to the Weatherboard, 28 miles—making a total of 204 miles open. There was a decrease of 51,955 in the number of 1st and 2nd class passengers, with an increase of 299 season tickets. In the receipts, there was an increase of £1,928 on coaching, and £18,609 on goods. Do. 1867.

During 1868, the Western line was extended to Mount Victoria, 15 miles, and the Southern to Marulan, 28 miles—the total length of line now open being 247 miles. As compared with 1867, there was an increase of 98,188 passengers, with a slight decrease of 25 season ticket holders. The receipts from coaching were increased by £11,844, and from goods by £23,443. Do. 1868.

In 1869, the Northern line was extended 31 miles to Musselbrook, the Southern 20 to Goulburn, and the Western 20 to Bowenfels—making a total of 318 miles open for traffic. The number of passengers is still on the increase, the total number carried in 1869 being 45,072 in excess of the previous year. The amount received from coaching advanced from £99,408 in 1868 to £109,427 in 1869, being an increase of £10,019. An increase of 117,599 took place in the tonnage of goods, and of £30,597 in the amount received from that source. Do. 1869.

During 1870, the Western line was extended 14 miles to Rydal, and the Northern 7 miles to Aberdeen—making a total of 339 miles open for traffic. There was an increase of 17,072 in the number of passengers, and of £2,438 in the amount received from that source. The quantity of goods carried was increased by 52,410 tons, and the amount received for the same by £33,740. Do. 1870.

The length of line in 1871 was extended 19 miles, by the opening to Wingen, on the Northern—the total length of line at that period being 358 miles. Although there was a falling off in the number of passengers carried that year, to the extent of 17,645, there was an increase of £14,765 in the amount received for 1st and 2nd class passengers. The same may be said of the Goods Traffic, which decreased in the quantity carried by 24,537 tons, but showed an increase of £36,539 in the amount received therefrom. Do. 1871.

Turning now to other items of coaching traffic; although our statistical records are not so full during 1866, 1867, and 1868, as they were in 1865, and have been since 1869, I have endeavoured to supply the deficiency, from a careful examination of the books at the different stations, and the result will be seen in the comparative statement. Other items of coaching traffic Appendix 26.

There was a considerable decrease in the number of horses carried during 1866 and 1867, a slight increase in 1868 and 1869 over 1867; and a falling off during the two following years. For the whole period, from 1865 to 1871, there was a decrease from 6,198 to 3,860. Horses.

During the same period there is a decrease in the number of carriages from 2,068 to 1,904. Carriages.

There was a falling off in the number of dogs carried during 1866 and 1867, a gradual increase during the next three years, and a decrease in 1871, which, however, is slightly in excess of the number carried in 1865. Dogs.

WORKING EXPENSES.

With the extension of the lines open for traffic, there was a gradual increase in the expense of working. During the six years embraced in this Report, 215 miles were added to the length of our Railways. In some of these years, from damage by floods and other causes, the expense of maintenance has been unusually heavy; but, on the whole, the working expenses were kept as low as was consistent with the comfort and safety of the public, the thorough maintenance of the way and works, and the efficiency of the rolling stock. Thus, comparing the first with the last year of the series, there was an increase in 1871 over 1866—in maintenance from £27,082 to £61,159; in locomotive expenses from £33,420 to £53,957; in carriage and waggon repairs from £7,227 to £10,890; in traffic charges from £35,763 to £57,520; in miscellaneous expenses, from £2,736 to £13,539; or a total increase during the whole period of £90,836. A reference to the abstract will show that there was an annual increase in the total amount for working expenses, from £106,229 in 1866, to £206,003 in 1870, while in 1871 the amount is reduced to £197,065. This may be attributed partly to the reductions that were made in the salaries of 1,141 officers in the Railway Branch, amounting to £16,657 18s. 11d.; and partly to the stricter economy exercised in working our Railways.

The proportion of each £100 of the working expenses, to the different heads of expenditure, as per Schedules, was as under:—

Heads under Schedules.	1866.	1867.	1868.	1869.	1870.	1871.
	£	£	£	£	£	£
Permanent Way	25·52	23·18	20·83	22·95	28·19	31·09
Locomotive	31·51	33·40	30·80	31·92	28·54	27·40
Carriage Repairs	6·80	4·81	5·62	7·90	6·65	5·50
Traffic Charges	33·62	36·09	40·10	33·04	30·18	29·25
Compensation (Injuries) ...	·05	·15	·07	·03	·01	·67
Do. (Loss of Goods) ...	·09	·15	·16	·07	·13	·01
Miscellaneous	2·41	2·22	2·42	4·09	6·30	6·08
Total	100·00	100·00	100·00	100·00	100·00	100·00

It will thus be seen that while the number of passengers varied considerably, the gross receipts from coaching traffic from the first to the last year of the period increased £36,511. The advance in every species of goods traffic is still more satisfactory, showing an increase of 325,279 in tonnage, and £152,779 in receipts. The gross earnings from all sources have more than doubled since 1865; and, as a proof of the economical working of our Railways, and an inducement to extend them further into the interior, it will be seen that the net earnings have increased with each extension of the lines, from £57,106 in 1865, to £158,257 in 1871.

CAUSES OF VARIATION IN TRAFFIC.

In searching for the cause of the variation in the movement of the traffic on our Railways, and the marked decrease in the number of passengers during 1866, 1867, and 1868, it may be remembered that 1866 was a year of gigantic failures in the Mother Country. The stoppage of Overend, Gurney, & Co., of Peto, Brassey, & Betts, the Imperial Mercantile Credit Association, the Agra Bank, and other large establishments, created a panic in the money market, which soon extended to this Colony, resulting in mercantile depression, the fall in the price of wool, and all Government securities. Our debentures were almost unsaleable, except at a ruinous discount; and the public works of the Colony had partially to be stopped, from the difficulty which the Government experienced in meeting the claims of contractors.

But, in addition to financial difficulties, the Colony had to pass through a succession of droughts and floods, unprecedented in their duration and disastrous results; as will appear from the appended meteorological observations during the six years ending in 1871, for which I am indebted to Mr. Russell, Government Astronomer.

1866 a year of drought.

The year 1866 was a period of drought in most parts of the Colony, especially during the months of August, September, and October, when rain is most wanted by the farmer. The total rainfall during these three months was only 1·764 inches at Windsor, and 1·820 inches at Dalwood.

1867 destructive floods.

During 1867, the drought continued till March, when it broke up and rain began to fall, and continued with little intermission till June, when disastrous floods occurred in the Hunter, Hawkesbury, Murrumbidgee, and other rivers. The flood in the Hunter that year was as high as the memorable one of 1857; and in the Hawkesbury it was 17 feet above the great flood of 1864, or 64 feet above the ordinary river level. Much damage was done, and many farmers and settlers were entirely ruined. In the Murrumbidgee the flood of 1867 had not been equalled since that of 1844. These destructive floods were followed by a severe drought, which, with the exception of some showers in September, lasted from the beginning of August to the close of the year. The total rainfall for August, October, November, and December, was only 2·240 inches at Sydney (or less than often falls in one day), 1·357 inches at Windsor, and 3·850 inches at Dalwood.

1868 and 1869, average rainfall.

During 1868, if we except March and April, which were dry months, the rainfall was about the average.

The same may be said of the year 1869. With the exception of three days of heavy rain in February, the rainfall was pretty evenly distributed.

1870 disastrous floods.

The year 1870 was one of excessive rain and general floods. The Hawkesbury was flooded several times, and the Hunter seven times during the year. In March, the rainfall was greater than it had been in the same month for eleven years; floods were general over the Colony during this month, and again in November. At Moulamein the river was higher than at any previous flood. At Windsor the river rose 26 feet, and caused great destruction of property. At Kempsey, on the Clarence, Bellinger, Nambuckra, and Little Rivers, disastrous floods occurred; and in December, the Hunter and Hawkesbury Rivers were once more in flood.

1871 favourable for agriculture.

During 1871, with the exception of some moderate floods in April and May, the rain was about the average, light and remarkably favourable for agriculture.

Appendix 36.

A table of the monthly rainfall at Sydney, Windsor, Newcastle, and Dalwood, from 1866 to 1871, will be found in the Appendix.

COAL TRAFFIC.

Coal traffic on Northern Railway.

The coal trade at Newcastle, which contributes so largely to the revenue of the Great Northern Railway, is worthy of special notice. The importance of this item of traffic will appear from the following statement of the tonnage and receipts from 1866 to 1871, inclusively:—

Year.	Tonnage.	Receipts.
		£ s. d.
1866	384,019	18,112 1 10
1867	396,069	19,830 15 10
1868	454,439	21,264 1 4
1869	541,132	24,848 9 2
1870	565,855	26,073 8 6
1871	547,331	24,951 16 3
Total	2,888,845	135,080 12 11

Full particulars of the quantity supplied by the different Collieries will be found in the Appendix. Appendix 27 and 28.

From these statements it will be seen, that there was a considerable increase in the quantity of coal carried and the amount received each year to the end of 1870. During the following year there was a falling off to the extent of 18,524 tons, and £1,121 12s. 3d. in revenue. This falling off cannot be traced to local causes. There were no strikes during 1871; and we must look for the cause to the general depression and low freights that prevailed. The decrease may also be partially due to the trade having been overdone during 1869, when there was an unusual rush of large vessels to the port. The effect of this was to glut the foreign markets with coal, and reduce the freights, and ultimately to diminish the number and size of the shipping in the harbour of Newcastle.

The quantity carried by Railway forms only a portion of the coal trade of Newcastle. A large quantity is shipped at the private shoots of the A. A. Company, and the Waratah Company; and a considerable portion is used for household and locomotive purposes. An approximate idea of the tonnage shipped from private shoots may be obtained by deducting the quantity carried by rail from that in the Custom House Returns. Thus—

Year.	Custom House Returns.	Railway Return.	Sent from Private Shoots.
	Tons.	Tons.	Tons.
1866	645,615	384,019	261,596
1867	592,033	396,069	195,964
1868	687,120	454,439	232,681
1869	705,488	541,132	164,356
1870	692,099	565,855	126,244
1871	670,892	547,331	123,561
Total	3,993,247	2,888,845	1,104,402

A comparison of these figures will show that the yearly increase to 1870, indicated by the Railway Returns, is not sustained by the Customs Returns, which show a decrease from 1866 to 1867, and from 1869 to 1871. The falling off in the shipment from private shoots between 1868 and 1870, and the proportionate increase in the Railway Returns, are due to the Hexham and Burwood shoots having ceased operations in 1868.

During the six years embraced in this Report, twelve collieries have been at work in the District of Newcastle.

The *Australian Agricultural Company*, the *Lambton*, and the *Wallsend* have been in full operation during the whole period.

The *Minmi* mines were at work till 1868, when they ceased shipping from their drop-ship at Newcastle, and their shoots at Hexham. They continued sending small quantities by rail till 1869, when the pit was flooded and all operations stopped.

Anvil Creek colliery has been doing a small business in cannel coal, used principally for household purposes.

Waratah has been steadily at work during the six years, with the exception of eleven weeks in 1870, when their miners were out on strike.

- Woodford.** The *Woodford* colliery was closed in 1865, and again opened in 1870, when it continued a small trade till the close of 1871, when it was abandoned.
- Hartley Vale.** *Hartley Vale* was opened by Messrs. Brown, but abandoned in 1867.
- New Lambton.** *New Lambton*, 5 miles from Newcastle, and connected with the Northern line at Waratah junction, 3 miles from the port, was opened in January 1868, and has done a steady business since.
- Co-operative.** The *Co-operative* in 1868 passed into the hands of W. Laidley & Co., who started it afresh in June 1869, since which time it has done a large and increasing business.
- Stony Creek.** *Stony Creek*, 22 miles from Newcastle, and not connected with the Northern Railway, has sent no coal by rail since 1866, its coal being used for local and household purposes in Maitland and the vicinity.
- Burwood.** *Burwood*, $4\frac{3}{4}$ miles from Newcastle, and connected with the Northern line $\frac{3}{4}$ of a mile from the port, was formerly known as the Coal and Copper Company. They continued to ship from their own shoots at Newcastle, till the ground was resumed by the Government, for the purpose of erecting the new coal staiths. They then made a junction with the Great Northern Railway, and commenced shipping at the cranes about December 1869, and continued sending small quantities by rail till the end of 1871.
- Minimum price of coal.** Up to June 1868, by mutual agreement, the minimum price of coal at all the Collieries was 10s. per ton. In July of that year the agreement was broken, and the price fell to 8s., and remained so till December 1871, when it was reduced to 7s. 6d. and 6s. 9d. per ton, at some of the Collieries.

FACILITIES FOR SHIPPING.

- Steam cranes.** The bulk of the coal is shipped from the Queen's Wharf, which extends 2,330 feet along the southern side of the harbour. On this wharf, at the end of 1865, seven steam cranes had been erected. In July 1869, the eighth crane was added to the list. This crane was erected principally for the use of steam colliers, which have a preference over sailing-vessels. Many complaints have been made of the injustice of this preference; but as the money was voted on the Supplementary Estimates for 1867 "for the erection of a Steam Crane for specific accommodation of Steam Colliers at Newcastle," nothing, I fear, short of an Act of Parliament can alter the conditions on which this crane was erected. These cranes are capable of shipping 4,000 tons per day.
- Coal staiths.** In addition to the cranes, new coal staiths have been erected on the site of the old Burwood shoots, at a cost of £30,000. They commenced work in December 1870, and in December following were let to a contractor, who agreed to ship at $\frac{3}{4}$ d. per ton less than is charged at the steam cranes. These staiths are capable of shipping from 2,000 to 3,000 tons per day; and though the facilities for shipment are now equal to the demand, preparations are in progress for increasing the extent of siding accommodation for the growing requirements of the traffic.
- Charge for haulage and shipping.** The coal is shipped for the various Companies by the Government, one charge being made for haulage and shipping. The rates are regulated by the distance from Newcastle, but the minimum rate charged is 10d. per ton.

- Appendix 4.** In the Appendix will be found a copy of the Regulations for the Steam Cranes, dated 29 October 1869, which came into operation on 1st January 1870.

TRIAL SURVEYS.

During the progress of the works on the extensions to Goulburn, Bathurst, and Murrurundi, different survey parties have been in the field, exploring the country and making trial surveys and sections, for the further extension of these lines. In August 1867, the Engineer-in-Chief reports the progress that had been made in these surveys for the extension of the Great Southern Line from Goulburn towards the Murrumbidgee. The report is accompanied with plans and sections, and a general description of the route from Goulburn to Murrumburrah. The elevation of the line at different points is given, and the cost is estimated at £10,000 per mile.

Trial surveys of extensions.

Appendix 6.
(A.)
Progress of surveys to the Murrumbidgee.

As an inducement to continue the survey, and to push on the construction of the Southern line to the Murray, Mr. Whitton, in July 1869, draws attention to the proposal of the Victorian Government to make a Railway from Melbourne to Albury. The distance from Goulburn is 230 miles, and the country presents no engineering difficulties. The cost is estimated at 2½ millions; and if sufficient labour could be found the work might be finished, he thinks, in five years, and would open up one of the finest districts in the Colony for the settlement of a large agricultural population.

Appendix 6.
(B.)
Extension of Southern line to Albury recommended.

In May 1870, a staff of surveyors was appointed to prepare improved trial sections of the proposed extensions. Since the plans and sections of the line from Goulburn to Yass were submitted to Parliament, in the Session of 1867-8, deviations have been made which will shorten the distance from three to four miles.

Deviations in line to Yass.

As far as the survey was then completed, the general route of the Southern line proceeded from Goulburn, *via* Bredalbané Plains, Gunning, and the Old Gap Range, to Yass. No engineering difficulties are met with on this length, and the whole distance is reckoned at fifty-four miles.

Appendix 6.
(C.)
Proposed route from Goulburn to Yass.

On the Northern line, the country was explored in two directions: the one from Murrurundi, *via* Wallabadah and Goonoo Goonoo; the other *via* Quirindi, Curra-bubula, &c., to Tamworth, the latter being considered the preferable route. The country is not difficult, and the distance is estimated at about fifty-six miles.

From Murrurundi to Tamworth.

The Western line was surveyed from Bathurst to Orange, *via* Grantham, Galbraith, Blaney, Guyong, and Shadforth. No engineering difficulties occur, and the length of the line will be about forty-six miles.

From Bathurst to Orange.

It is anticipated that the average cost of all these extensions will not exceed the former estimate of £10,000 per mile.

Estimated cost per mile, £10,000.

But from the appended reports of the Engineer-in-Chief it will be seen that, in order to meet the general desire for cheap Railways, the cost per mile may be considerably lessened, without altering the present gauge, by reductions in the width of formation, the weight of the rails, the quality of the sleepers, and by using timber instead of masonry in the construction of bridges and culverts. With such alterations, he believes that a good Railway for locomotive purposes, with 4 ft. 8½ in. gauge, might be constructed for £7,000 per mile.

Appendix 6.
(D. F. G.)
Reduction of cost per mile to £7,000.

On 4th August 1870, Mr. Whitton, by the instructions of Mr. Secretary Sutherland, directed the Assistant Engineer in the Railway Branch to make arrangements for taking charge of the trial surveys between Wagga Wagga and Albury. Full instructions were issued to him to explore the country, and determine the best line to be surveyed and levelled. Having examined this portion of the line, he was to connect it, at the most convenient point, with the former trial surveys from Goulburn to the Murrumbidgee, and examine the country as far north as Yass, with a view to improving the section.

Appendix 6.
(E.)
Survey from Wagga Wagga to Albury.

Trial surveys
stopped.
Appendix 6.
(E.)

But a change of Government took place on 16th December of that year; and on the 23rd, Mr. Secretary Byrnes decided that it was unnecessary to continue this survey; and the Engineer-in-Chief was instructed to withdraw the whole staff from this work at once. Accordingly, the whole of the surveyors received notice that their services would not be required after 31st January 1871. This put a stop to the trial surveys for a time, and dispersed a valuable staff of trained officers.

Appendix 6.
(H.)
Detailed
estimates of
cost of lines to
Yass, Orange,
and Tamworth.

But while the surveyors were out in the cold, the Engineer-in-Chief was enabled, from the progress that had been made in the surveys, to submit, on 8 February 1871, a detailed estimate of the cost of the lines to Yass and to Orange, and an approximate estimate of the cost of the extension to Tamworth. A careful description of the route to be followed from Goulburn to Yass, and from Bathurst to Orange, is given, and a table of mileage, gradients, and elevations is appended.

Cost per mile
further reduced.

After taking out the quantities of all the works, the average cost per mile is estimated at £6,786 5s. 4d. on the extension to Yass, and £6,915 19s. 4d. on that to Orange; and though the surveyors on the line to Tamworth were removed before the revised surveys were completed, sufficient was done to justify the belief that the cost per mile on the Northern would not be higher than on the Southern and Western extensions.

Survey party
re-appointed.

In November 1871, the survey party which had been disbanded in December 1870, was re-appointed by Mr. Byrnes, on the understanding that they were to be employed exclusively on the Southern line till the completion of the survey to Yass.

Appendix 6.
(I.)
(K.)
Cost per mile
further reduced.

In January last, the Engineer-in-Chief revised and reduced his estimate of the proposed extensions; and on 19th June considers that, by a still further reduction in the quality of the works, inferior lines might be constructed from Goulburn to Yass at £5,397 per mile, from Bathurst to Orange at £5,743 6s. 8d. per mile, and from Murrurundi to Tamworth at £5,500 per mile. But though these would be perfectly safe at a speed of twenty miles an hour, he strongly recommends that the Southern line—which will ultimately be the through line to Melbourne, when speed will be an element of importance—should be extended to Albury as a first class line, at £7,000 per mile.

Southern extension to Albury should be a first class line.

Appendix 6.
(M.)
State of the trial
surveys at the
close of 1871.

On the 1st July last, by the direction of Mr. Sutherland, who had resumed the office of Secretary for Works, I requested the Engineer-in-Chief to state what progress had been made in the trial surveys, and his report of 8 July shows their position at the close of 1871.

From Goulburn
to Yass.

From Goulburn to Yass working surveys had been made, and the line staked out.

Beyond Yass.

Beyond Yass, rough trial surveys had been taken to Narrandera on the Murrumbidgee; but surveys should be made to Albury *via* Wagga Wagga. It might be sufficient at present to construct a line to Wagga, and connect it with the Murrumbidgee; but as the Railway will ultimately be extended to Albury, it would be advisable so to construct this portion of the line that no difficulty might hereafter be experienced in crossing the river, and that valuable property in Wagga might as much as possible be avoided.

From Bathurst
to Orange.

From Bathurst to Orange trial surveys had been made, and the line pretty nearly determined.

From Murrurundi to Tamworth.

From Murrurundi to Tamworth trial surveys had also been taken; but as the portion of this line which crosses the Liverpool Range would, if constructed over the line now levelled, be very expensive, additional trial sections are considered necessary before any line can be adopted.

Best route of
Southern line
to Albury.

Mr. Whitton is of opinion that the Southern line, after leaving Yass, should proceed towards Albury, in the direction of Bowning, Binalong, Murrumburrah, Cootamundry, Junee, and Wagga Wagga.

On 15th July last, Mr. Sutherland approved of Surveyors being sent to the South and the North, for the purpose of finally determining the best line for extensions in these districts. From that date, accordingly, appointments have been made as fast as experienced surveyors could be found for the purpose.

Appointment of Surveyors for South and North Districts.

Throughout these reports, the Engineer-in-Chief gives what I consider satisfactory reasons for preferring the present gauge of 4 ft. 8½ in. to the proposed one of 3 ft. 6 in.; as the slight saving in the original cost of the latter is not sufficient to justify a break of gauge, with all its attendant inconveniences. In corroboration of these views, I have appended a copy of the able report of Mr. Guilford L. Molesworth, Director General of the Ceylon Railway, upon the Festiniog Railway System, which is dated 24 March, 1871, and is well worthy of perusal by the advocates of cheap Railways and narrow gauges.

Inconvenience of break of gauge.

Appendix 6. (L.)

Festiniog Railway.

SUPPLY OF RAILWAY MATERIALS.

In Table 18 will be found a Return in detail of all permanent-way and other Railway materials imported from England from 1866 to 1871 inclusive. But, as doubts have been entertained as to the quality of the materials supplied, and insinuations made as to the excessive price paid for them, I consider it my duty, for the satisfaction of the public, who contribute the cash, to dissipate these doubts if possible, and show the *bonâ fides* of the transactions in the supply of stock and stores from the Mother Country.

Appendix 18.

Doubts as to quality and price of materials from England.

In my first Report, I referred to certain rumours that were in circulation to the effect that the Government had been defrauded in the price paid for Railway iron imported from Home. In consequence of these rumours, Mr. Holroyd, Secretary for Works, on 21 November 1864, instructed Captain Mayne, who had recently been appointed Agent for the Colony, to proceed, on his arrival in England, to investigate into and report upon all the circumstances connected with these purchases, and the actual value of the rails and chairs so purchased. I appended a copy of the correspondence on the subject, and of the report of Captain Mayne, in which he considers it to be beyond doubt that, in the purchase of permanent-way materials, the Colony had been zealously, faithfully, and efficiently served, and had not been charged for the materials supplied prices in excess of the fair current rates of the period.

Colonial Agent instructed to investigate and report.

Agent reports that Government had not been charged more than current rates.

This appeared a satisfactory explanation at the time; but in 1870, the subject was revived by certain allegations made before the Select Committee of the Legislative Assembly on "Railway Extension," which led the Committee to "believe that the Colony had been for years largely and constantly defrauded to an enormous extent in the article of rails." The matter was again referred for the investigation and report of the Agent-General; and I feel persuaded that a perusal of the appended correspondence between the Colonial Agent-General, the Consulting Engineer, and the English contractors who supplied the rails and engines, will leave the same impression on every unprejudiced mind, as the investigation left on the mind of Captain Mayne,—that the supervision at the works during the execution of the contracts was closely and constantly directed to the faithful carrying out of the specifications, that the application of proper tests was full and repeated, and that no undue leaning whatever was shown towards the contractors.

Fresh allegations of *mala fides* in supply of rails.

Referred to Colonial Agent for report.

Appendix 7. (A, B, C, D, E.)

Agent reports that specifications had been faithfully carried out and proper tests applied.

Captain Mayne thus concludes his report:—"I should be wanting in mere justice to Mr. Fowler, did I not, in forwarding his explanation, emphatically state my absolute conviction that in no case coming within the range of his duties as Consulting Engineer, have the interests of the Colony been otherwise than jealously and faithfully guarded by him. That this should be so, the Colony had full right to expect; that it has been so, Mr. Fowler's unblemished reputation, his high character, and his professional position, all guarantee."

Captain Mayne's opinion of the Consulting Engineer.

To show the care bestowed by the Inspecting Engineer in the proper rolling of the rails, I have appended a copy of the Instructions issued to the Rail Inspector, and of his report on the nature of the tests applied.

Appendix 7.

Report of Rail Inspector.

IMPROVED METHOD OF CHECK.

The importance of an efficient check on Railway revenue.

As the importance of establishing an efficient check on our Railway receipts, which now form a considerable item in the general Revenue of the Colony, and are annually on the increase, cannot be over-estimated, it may be proper to allude briefly to the steps that have been taken for this purpose during the period embraced in this Report.

Appointment of Accountant from outside the Civil Service.

After the discovery of Eastwood's defalcations in 1867, and the retirement of Mr. Walker—a zealous and trustworthy officer—from the situation of Accountant, the experiment was tried of appointing to that office a stranger, who had not formerly been connected with the Public Service, to teach the Civil Servants how to keep their accounts, and to establish such a system of check as would effectually prevent defalcation. The experiment was unfortunate in both respects. The remedy proved worse than the disease. Instead of improving the system of book-keeping then in existence, he introduced one so complicated, that it was soon condemned and abandoned; and in place of instituting an efficient check on the mal-practices of others, he himself set the example of tampering with the public funds; but he was checkmated by the officers over whose heads he had been appointed, and was ultimately dismissed from the Service, and prosecuted as a defaulter.

The new Accountant becomes a defaulter.

Methods adopted for establishing an efficient check.

When the present Secretary for Works assumed the duties of Commissioner for Railways, he found that there was no effective check on the Accountant's proceedings, and took immediate steps to remedy the defect. On 9 December 1868, the Audit Clerk was appointed Traffic Auditor, and a code of instructions was issued for his guidance, empowering him, *inter alia*, to audit and examine the traffic returns, and communicate directly with the Commissioner.

Audit Clerk appointed Traffic Auditor.

Store Branch re-organized.

The Store Branch, which was also found in a very unsatisfactory state, from the carelessness or incapacity of the Storekeeper, was re-organized; the officer in charge was removed and disrated; an active and intelligent officer was appointed in his place; and the stores were placed under the surveillance of the Traffic Auditor.

Impracticable subdivision and complication of accounts abandoned.

The Engineer-in-Chief having reported that the subdivision of the Working Expenses introduced by Ashdown was unnecessary and impracticable, and that he was unable, after repeated applications, to obtain a statement of the balances at the credit of the various Votes, instructions were issued, on 5 March 1870, for the abandonment of this impracticable subdivision, and a return to the simpler system.

Board appointed to inquire into mode of keeping accounts, &c.

C. Rolleston (Auditor-General); J. Thomson (Inspector of Public Accounts); W. H. Mackenzie, Accountant.

On the discovery of Ashdown's defalcations, a Board, consisting of the gentlemen named in the margin, was appointed, on 31 March 1870, to inquire into the previous and present mode of keeping the Railway Accounts, &c. In their report of 13th May of the same year, the Board made sundry valuable suggestions as to the books to be kept by the Accountant, the administration of the Store and the Traffic Auditor's branches, and the appropriation and misappropriation of Votes of Parliament. Many of these suggestions were adopted, with great advantage to the department.

They disapprove of the system introduced by Ashdown.

With reference to the complicated system adopted by Ashdown, the Board remark that they have been "unable to discover that the objects contemplated by his appointment had been attained; on the contrary, the system originally inaugurated by Mr. Rae, and carried on by Mr. Walker, appears not only not to have been improved upon, but rather to have been encumbered with unnecessary and impracticable subdivisions of the Working Expenses; whilst the most important object connected with book-keeping, namely, the being able to show at any moment the exact state of the accounts, both on the revenue and expenditure side, would seem to have been almost disregarded."

And approve of present system of distributing the Working Expenses.

Again, referring with satisfaction to the abandonment of this subdivision, the Board express their opinion that "no ingenuity and no amount of labour could have secured accuracy in accounts kept upon this plan, and they approve of the system upon which the Working Expenses are now distributed."

With respect to the Store Branch, "the Board have reason to think that the supervision of the Traffic Auditor which has lately been established will effect a very beneficial change in the management of this apparently much neglected department." And subsequent experience has proved that the anticipations of the Board have been fully realised.

Beneficial changes introduced into the Store Branch.

With reference to the organization of the Traffic Audit Branch, the Board "are glad to be able to notice with commendation the efforts of the Traffic Auditor to introduce an effective check upon the Revenue. As regards the traffic receipts, the system which has been established by him seems to be of the most thorough kind; but hitherto he has exercised no check upon the miscellaneous receipts of the department. This defect has recently been cured by the amended Instructions to the Traffic Auditor issued on the 8th ultimo."

The check now in force, they consider of the most thorough kind.

A copy of these amended Instructions will be found in the Appendix.

Appendix 5.

It thus appears that the steps taken by the Commissioner for establishing a thorough check on the Revenue, and for improving the working of the Store Department, were all approved by the Board, the members of which are so eminently qualified to form an opinion on the subject; and although, judging from our experience of mercantile, banking, and other similar establishments, it may be doubted whether any check that ever has been, or ever will be instituted, can effectually prevent defalcation, I feel satisfied that the method now established in the Railway Branch, as detailed in the amended Instructions to the Traffic Auditor, is as perfect as can be devised.

All the steps taken by the Commissioner approved by the Board.

TARIFF.

One of the most difficult problems to be solved in Railway economy is the proper charge to be made for the transport of goods and passengers.

Difficulty of fixing Railway rates.

If our Railways are expected to be self-supporting, such a scale of charges should be adopted, as would make the net earnings equal to the interest paid by the Government on the capital invested on lines open for traffic; but if regarded from another point of view, as an extension of the Main Roads of the Colony, the value of our Railways will be measured, not by the actual cash receipts, but by the indirect benefits which they confer on the community, by opening up new lines of communication with the interior, and thus developing the resources of the Country. To the latter view of the case it may reasonably be objected that, as our Railways are constructed from funds which form a part of the Public Debt of the Colony, and only a small proportion of the people are directly benefited by them, those who use them should alone be called upon to pay the interest, without expecting the Coast Districts and others that derive no direct benefit to contribute any portion of the expense.

Railways regarded as self-supporting, or as extensions of the Main Roads.

Those who use the Railways should pay for them.

These views appear to have received due consideration from the Government, in their endeavours to establish a proper classification of goods, and a fair scale of charges. The object has been to make the rates sufficiently low to induce traffic to leave the road for the Railway, where the lines run parallel; and yet sufficiently high to pay working expenses, and give a fair return on the capital. It would, no doubt, be extremely desirable, that the rates once fixed should remain immovably so; but such a Utopian result can hardly be realized on any Railways; and least of all on those of young Countries like Australia, where the changes in the value of goods and produce are so rapid and spasmodic. A proper scale of rates cannot be fixed by empirical rules, nor even by comparison with those of older and more settled communities, where the circumstances are so dissimilar: it can be arrived at only by the slow process of practical experience, derived from watching the changes in the value and movement of the traffic from time to time in our own, and the neighbouring Colonies. Many attempts have been made since the opening of our Railways to fix a fair and equitable scale. From December 1858, to December 1871—a period of thirteen years—no fewer than seventeen rate sheets have been issued; and, for the information of the public, and for reference as a useful official record, I have had an elaborate abstract of these sheets prepared and appended, showing at a glance the charges that have been made for every species of traffic during the period.

Endeavours of Government to establish a fair scale of rates.

Rates not fixed by empirical rules, but by experience.

In thirteen years seventeen rate sheets issued.

Appendix 29, 30.

Comparison of rates in New South Wales and neighbouring Colonies. Appendix 31.

For the sake of comparison, I have also appended a statement of the classification, and the rates charged for goods and passengers in New South Wales, and in the neighbouring Colonies of Queensland, South Australia, and Victoria, during the year 1871. From the difference of classification in the different Colonies, and even in the same Colony at different periods, it was found impossible to condense this statement, so as to show at one view the comparative rates charged for each species of goods. The shortest and simplest method that could be devised, was to give an alphabetical list of the articles of transport, and show in adjoining columns, as correctly as possible, from an examination of their rate sheets, the classification and the charges made for each article, for a fixed distance, in each of the Colonies.

Rates in New South Wales less than in neighbouring Colonies. Appendix 31.

It will be found on the whole, that the rates on our Railways are considerably lower than those of the sister Colonies; but to ascertain the comparative amount charged for individual objects of traffic, reference must be had to the alphabetical statement in the Appendix.

Passenger rates similar in all the Colonies.

There is not the same difficulty in comparing the passenger fares during 1871. In each Colony the rates may be stated generally, as 3d. per mile for first-class, and 2d. per mile for second-class passengers; but on our Railways there is a species of sliding scale, the rate of 3d. and 2d. for level lines being slightly reduced on the suburban, and slightly increased on the mountain lines.

Reductions in rates not beneficial to revenue.

We often hear it asserted, that our Railway rates are too high, and that a reduction in the charges would prove beneficial to the Revenue; but the test of experiment shows a different result. It has been found that reductions in charges have generally been followed by an increase of business, but a falling off in returns. Frequent applications are made to lower the rates for certain classes of goods, as an encouragement and protection to native industries; but to show how unreasonable such applications are, we have only to contrast the time occupied in transit, and the charges made for the carriage of goods and passengers on the road and on the Railway, at different periods. As time in commercial transactions is equivalent to money, it follows that a diminution in the time of transit must form an element in the comparison, as it is equivalent to a reduction in the cost of carriage. Assuming the Western line to be open to Bathurst, the average rate per ton for the carriage of goods on our Railways, during 1871, would be as under:—

Comparison of rates by road and by Railway

Average rate per ton for goods on New South Wales Railways.

Class.	Sydney to Goulburn—134 miles.	Sydney to Bathurst—145 miles.	Newcastle to Murrurundi—120 miles.
	£ s. d.	£ s. d.	£ s. d.
A	0 17 11	0 19 3	0 16 2
B	1 6 4	1 8 4	1 3 8
C	1 9 7	1 11 10	1 6 8
D	1 12 9	1 15 5	1 9 7
1	2 5 8	2 9 4	2 1 0
2	2 16 7	3 1 2	2 10 9
3	3 18 5	4 4 10	3 10 3
4	5 1 3	5 9 6	4 10 9
	19 8 6	20 19 8	17 8 10
Average ...	2 8 7	2 12 5	2 3 7

Now what was the average rate per ton for the carriage of goods for the same distance when bullock-drays were the only means of conveyance? To borrow from an authentic source, I find in the Report of the Commissioner for Roads, dated 31 March 1865, a schedule of the rates charged per ton for the carriage of goods by the road, and the time occupied in transit, for the years 1857 and 1864, from which I have been enabled to construct the following comparative statement:—

	1857. By Road.		1864. By Road.		1871. By Railway.		Average rate per ton for carriage of goods by road and by Railway.
	Days average.	£ ton average.	Days average.	£ ton average.	Hours average.	£ ton average.	
		£ s. d.		£ s. d.		£ s. d.	
From Sydney to—							
Goulburn	17½	12 5 0	7½	3 15 0	14	2 8 7	
Bathurst	23½	15 10 0	11	6 10 0	16	2 12 5	
From Newcastle to—							
Murrurundi	21	9 0 0	8	6 10 0	10	2 3 7	

Can anything demonstrate more clearly than this the advantage of good roads, and the superiority of the Railway to any other means of transport? It will be seen that the great improvements that had been effected in our main thoroughfares from 1857 to 1864 shortened the time of transit from 17½ to 7½ days in the journey of 134 miles from Sydney to Goulburn, and reduced the rate per ton from £12 5s. to £3 15s. But when the road is superseded by the Railway, in 1871, the time of transit is reduced from 7½ days to 14 hours, including stoppages, and the rate per ton from £3 15s. to £2 8s. 7d. on the Southern, and from £6 10s. to £2 12s. 5d. and £2 3s. 7d. on the Western and Northern lines respectively.

In his "Reminiscences of a Thirty Years' Residence in New South Wales and Victoria," Mr. Justice Therry, in the 7th chapter, gives a graphic and amusing, but somewhat wordy, account of the difficulties and dangers that had to be encountered by travellers on our roads before the era of Railways. After describing an exciting ordeal he had to undergo on his way to the Bathurst Circuit, when, at a lonely spot on the mountains, he was "bailed up" by armed bushrangers, and robbed of everything worth taking; he adds another Circuit incident, belonging to a later period, which happened to himself and the Sheriff—not from an encounter with bushrangers, but from the execrable state of the roads. "We were obliged," he states, "to descend from our carriage, and walk for two miles, or rather crawl, along a four-railed fence, in a bent posture, placing our feet on the second rail from the ground, and holding on as best we could by the top-rail, shifting our feet and hands, with far greater pain in the operation than if we had been for the same time stuck in the stocks, while we ran the risk of being involved in a charge of manslaughter, by directing our coachman, at the imminent peril of his life, to follow with the carriage, as he and the horses were plunging in the water, sometimes almost out of view altogether, in wading through the deep waterholes that intersected the roads.

"On another occasion, in returning from the Bathurst Circuit, we arrived at the foot of the steep ascent of Mount Victoria, on the Bathurst Road. The horses could not ascend it, and as night came on, and we were arranging to spend it as best we might in the open bush, and bide the pelting of a pitiless storm of hail, fortunately a dray drawn by twelve bullocks passing by came to our rescue, and, *for a consideration*, the bullock-drivers took the bullocks from the dray and yoked them to the carriage, so that with the aid of twelve bullocks and four horses we succeeded in extricating ourselves from our perilous position. With difficulty the team took the carriage—a light one—to the top of the hill, within sight of a human habitation. Such were the luxuries of travel in bygone days; but the Railway now speeds the traveller along these roads, and adventures such as these belong only to history."

In passenger fares, the comparison is equally in favour of Railways as the cheaper mode of conveyance, even at first class rates; though second class rates might fairly be assumed, as second class carriages are superior in accommodation to stage coaches. In 1866, the lines being open to Picton, Penrith, and Singleton, I have calculated the distances from those termini; and comparing the time of transit and the rates by both modes of conveyance, the result may be thus tabulated:—

Passenger rate per mile by road and by Railway.	Stage coach.				Railway.		
	Distance in miles.	Time of transit.	Fare.	Per mile.	Time of transit.	1st Class per mile.	2nd Class per mile.
Picton to Goulburn ...	75	Hours. 13½	s. 50	d. 8	Hours. 3:49	d. 3½	d. 2½
Penrith to Bathurst ...	88	19¼	50	6¾	6:37	3½	2½
Singleton to Murrurundi ...	67	12¼	25	4½	3:5	3½	2½

Reduction in rate not the only saving by travellers by Railway.

It will thus be seen that on the Southern line the rate per mile for passengers by stage coach is more than thrice the amount of second class Railway fares, and twice the amount of first class. On the Western and Northern lines the difference is not so great; but it is quite sufficient to show that the Railway is incomparably the better and the cheaper mode of conveyance. Here again, however, the actual reduction in the charge by Railway is only a portion of the saving; for, not to mention the reduction in the time of transit, and the privilege which stage coach passengers enjoyed of walking a considerable portion of the distance, over the worst portions of the road, in the worst possible weather, and the cost of refreshments on the way; it must be remembered that Railway travellers have the option of returning within a week, and paying only a fare and a half for the double journey. And yet, with these facts before us, we occasionally hear it stated that the Railway rates are excessive, and ought to be reduced.

NUMBER OF TRAINS.

No. of trains for suburban traffic.

For the profitable working of our Railways, the proper number of trains to be run is a matter of considerable importance. The number employed for suburban traffic may appear disproportionately large; but it must be remembered that this is a peculiar traffic, and that the short trains are required to be numerous, not only to suit the rapid movement of the population which is induced to settle in the suburbs, from the facilities afforded of easy and frequent intercourse with the capital; but also to meet the opposition from steamboats and omnibuses, which land their passengers in the city,—an opposition which will continue as long as the Railway Terminus is at Redfern, and will never, I fear, be successfully resisted, till the Metropolitan Station is erected in Sydney, on the site of the Supreme Court, as recommended by the Engineer-in-Chief, or on some equally suitable site in the heart of the city.

Metropolitan Station should be erected in Sydney.

Suburban Trains might run each hour.

Instead of the number of suburban trains being reduced, I believe it would give great satisfaction and accommodation to the public, and not be attended with much additional expense to the Department, to run one Up and one Down Suburban Train, each hour during the day. This might be done with the same number of engines as are now employed; but a smaller description of engine on the Tank principle, with six coupled wheels, would be better suited for this service; and I would recommend that six engines of this character be procured without delay.

One up and one down train daily sufficient for through traffic.

With reference to the through traffic, I stated in my Report for 1865, that I considered one up and one down passenger train daily would be amply sufficient for all our requirements. I am of the same opinion still; but in consequence of the objections raised by the postal authorities to any interference with the existing arrangements for the receipt and despatch of the mails, we are still running one train more than we require for Railway purposes, at a loss to our Revenue of many thousands per annum, and putting the public to the inconvenience of having a day train only thrice a week, instead of daily.

Objection of postal authorities to dispense with night train.

Correspondence on subject of mail train.

The subject was submitted for the consideration of the Cabinet on 24th of January 1870; and on the 16th of the following month was brought under the notice of the Postmaster-General, by a letter from the Commissioner for Railways, urging the discontinuance of the 5 o'clock p.m. train, and the substitution of a mail train to leave Sydney daily from 7 to 9 a.m., and to arrive in Sydney from 6 to 8 or 9 in the evening.

I append copies of this minute and letter, and of the reply of the Postmaster-General, of date 23rd February 1870, giving his reasons why the present postal arrangements cannot be interfered with.

Appendix 8.
(A, B, C.)

It is for the Government to determine whether these reasons are sufficient; but I feel confident that the discontinuance of the night mail trains to Goulburn and Bathurst, and the substitution of a daily train for passengers and mails, to start at such hours as would enable the journey both ways to be performed by daylight, instead of being objected to, would be hailed as a boon by the public who have experienced the discomfort and misery of night travelling; that it would effect a large saving in the working expenses of the Railway; and that, with the facilities we possess of rapid communication by cheap telegrams, no inconvenience could be felt from the trifling alterations proposed in the receipt and delivery of mails.

Discontinuance of night train would be hailed as a boon.

Another inducement for adopting the day train is, that it would contribute not only to the comfort, but to the safety of the passengers. The last of the rules given by Dr. Lardner, in his work on Railway Economy, for avoiding accidents, is as follows:—
“When you can choose your time, travel by day rather than by night; and if not urgently pressed, do not travel in foggy weather; as accidents from collision and from encountering impediments accidentally placed on the road, happen more frequently at night and in foggy weather than by day and in clear weather.” If such precaution is necessary on the comparatively level lines on English Railways, how much more so is it required on the sharp curves and steep gradients of our Western line!

Danger of Railway travelling by night.

Thus, in every point of view, whether for the comfort and safety of the passengers, or the economical working of our Railways, the journey by day is to be preferred; and I feel confident that the hours of the night trains are numbered, and that their discontinuance is only a question of time.

The journey by day to be preferred.

But should the Government, in opposition to these views, decide that the exigencies of the public will not admit of the discontinuance of these trains, I submit that the expense of running them should be borne by the Postal Department, for whose benefit it is incurred, if our Railways are expected to show a fair return on the capital invested in their construction. I append a statement, which needs no comment, of the cost per mile for carrying the mails on our Railways, and on those of the United Kingdom and Victoria.

Expense of mail train should be borne by Postal Department.

Appendix 32.

REFRESHMENT ROOMS.

There is no part of our Railway economy so defective, as the arrangements for the supply of refreshments to passengers. We are much behind the neighbouring Colonies in this respect; and when we turn to the Railways in the Mother Country and on the Continent, we find magnificent saloons, luxuriantly furnished, with all the appliances necessary for supplying every variety of refreshment. They are placed under the control of the Railway authorities; a tariff of prices guarantees the traveller from extortion; and the attendants being paid by salaries, no gratuities are expected or allowed.

Refreshment rooms on other Railways.

In strong contrast with this, the keepers of what are facetiously termed refreshment rooms on our Railways are little more than apple-stall holders, and vendors of lollypops and stale pastry, serving out junks of sandwiches, and messes of tea and coffee to their customers, without any regard to their accommodation or comfort; but arrangements are in progress for improving this state of things. It is now proposed to fit up refreshment rooms worthy of the name, of suitable dimensions, and with all necessary appliances, at Sydney and Mittagong, on the Southern line; at Penrith and Mount Victoria, on the Western; and at Singleton, on the Northern line; and to lease them by tender for a term of years. The rooms are to be furnished by the lessee in a suitable manner, to be kept clean and in good repair, and open to all passengers arriving by day or night.

Defective arrangements on ours.

Approved arrangements in progress.

Sort of refreshments to be provided.

Besides tea and coffee, fermented and spirituous liquors, sandwiches, chops, steaks, soups and cold meat, and other refreshments, are to be kept on the premises, and sold at reasonable prices, approved by the Commissioner. Small luncheon-baskets are also to be supplied to passengers who prefer taking their refreshments in the carriages.

Arrangements for comfort and convenience of passengers.

The lessee will be required to use his best endeavours for the convenience and comfort of the passengers; all gratuities to waiters or assistants will be strictly prohibited; and the Commissioner may insist on the dismissal of any servant who may be guilty of rudeness or incivility to Railway travellers.

Hot dinners.

If instead of luncheon, a hot dinner is required at any of these refreshment rooms, for a party of friends, it will only be necessary for the guard at any terminus to flash the order by telegram, and everything will be in readiness on the arrival of the train at the appointed stopping-place. The convenience of this arrangement will be more appreciated, when our Railways extend further into the interior.

MILEAGE AND TRAFFIC PER MILE RUN.

Annual Mileage of Engines. Appendix 33, 34.

Average daily Mileage of each Engine.

I have appended a Return of the total mileage of each Engine, and a detailed statement of the miles run by Goods and Passenger Engines each year from 1866 to 1871 inclusive, from which the following Table of the average daily mileage of the whole and of each individual Engine, during the same period, has been constructed.

Different Lines.	1866.	1867.	1868.	1869.	1870.	1871.
Southern.....	658·4	886·3	1,136·2	1,330·5	1,317·4	1,310·2

No. of Engines running.....	38	44	46	47	57	66
Average daily Mileage per Engine.....	44·2	44·6	54·0	63·6	55·3	48·9

This appears an insignificant amount of useful service to be obtained from a locomotive engine; but it is higher than the ratio obtained by similar calculations of the mileage on some of the principal English and Continental Railways, where the average daily work of an engine is estimated at only 42 miles.

Cost per mile run. Schedules A and B over-stated in former Reports.

In Appendix No. XVII of my Report for 1865, it is explained that the expenditure for locomotive power and carriage repairs, Schedules A and B for the Southern and Western lines, is all charged to the Southern. But in estimating the cost per train mile, and per mile run of the Working Expenses, under Schedules A and B, from 1860 to 1865 inclusive, the mileage of the Western line was omitted, which makes the cost per mile appear disproportionately large on the Southern line. I have rectified this in Table No. 35 of the Appendix.

Appendix 35.

REPORT OF THE COMMISSIONER FOR RAILWAYS, 1866-1871.

29

The following Table will show the proportion of the total Receipts contributed by different objects of traffic; the Working Expenses distributed under the different heads of the Schedules; and the Net Earnings, from 1866 to 1871 inclusive, Receipts and Working Expenses per mile run.

PER MILE RUN.

	1866.	1867.	1868.	1869.	1870.	1871.
<i>1. Receipts—</i>	d.	d.	d.	d.	d.	d.
1st & 2nd class Passengers...	26.14	23.20	20.82	19.08	18.59	21.12
Holder of Season Tickets...	1.03	0.93	0.76	0.67	0.65	0.67
Horses, Carriages, Dogs, &c.	5.73	4.50	4.04	3.57	4.57	3.77

Minerals	7.45	6.79	5.63	5.74	6.27	6.54
Wool	1.93	2.42	2.43	2.54	2.69	5.20
General Merchandise.....	22.69	24.26	24.17	25.09	29.24	32.69
Total.....	65.96	63.25	59.34	58.28	64.07	72.42
<i>2. Working Expenses—</i>						
Permanent Way and Works	10.60	9.09	7.94	8.91	12.10	12.47
Locomotive charges	13.08	13.13	11.78	12.37	12.28	11.00
Carriage and Waggon repairs	2.83	1.92	2.15	3.08	2.86	2.22
Traffic charges.....	13.99	14.17	15.27	12.81	12.94	11.72
Compensation pers. injury	0.03	0.06	0.03	0.01	0.01	0.27
Do. for damage to Goods...	0.04	0.06	0.06	0.03	0.05	0.05
Miscellaneous.....	1.01	0.82	0.91	1.58	2.73	2.44
Total.....	41.58	39.25	38.14	38.79	42.97	40.17
<i>3. Net Earnings</i>	24.38	24.00	21.20	19.49	21.10	32.25

A more detailed statement of this Table, and of the Receipts and Expenditure per mile open, are appended Appendix 38, 39.

The proportion per cent. of the Working Expenses to the total Earnings during the same period will be found in the Return of Working Expenses in the Appendix Appendix 23.

RETURN ON CAPITAL INVESTED.

I have added a tabular statement showing the amount of traffic, the gross and net earnings, the working expenses, and the interest on the capital invested, during each year, from the opening of our Railway to the 31st December 1871. Appendix 25.
Interest on capital.

If this shows but a small return on the capital, it is at least satisfactory to observe that the last is the most prosperous year of the series, the interest almost touching 3 per cent., which it will probably reach in the following year. But small as the interest appears, the figures in the statement will show at a glance the progressive advancement of our Railways, and the large and steady increase in traffic and returns—from 1856 to 1871—in the number of passengers from 350,724 to 759,062; in the tonnage of goods, from 2,469 to 741,986; in total earnings, from £32,283 to £355,322; and in net earnings, from £10,495 to £158,257. Progressive advancement of Railway.

Value of free passes not estimated.

But these figures do not express the whole earnings of the Railway; for they do not include the value of free passes, which amount to a considerable number per annum. Thus, His Excellency the Governor and suite, Members of Parliament, the Judges of the Supreme and District Courts, distinguished visitors, Members of Parliament from the neighbouring Colonies, Officers of the Army and Navy, Officers and Members of the Volunteer Force, convalescent patients discharged from the Infirmary, the Benevolent Asylum, and other kindred Institutions, and numbers of the unemployed seeking for work in the interior,—all travel free by Railway, and no estimate is taken of the value of these passes.

It is not my province to express any opinion as to the policy of this course. I refer to it merely to show that the Railway does more work than it gets credit for. If the value of these passes, and the large amount lost by running the night mail train, were taken into account in calculating the net receipts, it is obvious that they would show a higher rate of interest on the capital

Summary embraces a period of twenty-five years. Work performed during that time.

Progress of works since 1855.

The summary which I have now concluded of the rise and progress of our Railways, from the first movement on the subject in 1846 to the close of 1871, embraces a period of a quarter of a century, during which 358 miles of Railway have been opened for traffic. This may appear a small result for the time occupied on the work; but it must be remembered that a considerable portion of that time was necessarily consumed in preliminary inquiries, and in contending with difficulties and delays, which impede the inauguration of all great undertakings of the kind, more particularly in a Colony so far removed from the European workshops, where all the *matériel* of the Railway had to be procured. The progress of the work was accordingly slow, till the trunk-line was opened to Parramatta in 1855; but during the sixteen years that have since elapsed, 344 miles were opened to the public. This is at the average rate of $21\frac{1}{2}$ miles per annum, which can hardly be regarded as a slow rate of progress, when we consider the engineering difficulties that had to be encountered, and the magnitude of the works that had to be constructed in carrying a Railway through a mountainous country, rising to great elevations on all the lines, and on the Western to 3,658 feet above high-water mark at Sydney. But whatever may be thought of the rate of progress, there can be no doubt of the solidity and first-class character of the works, and their moderate cost compared with works of a similar class on other Railways. And, as we have now crossed the barrier of the Blue Mountains, and surmounted the most difficult and expensive portion of the way; we shall be enabled to proceed with greater speed, and smaller cost, in carrying out the further extensions of our Railways.

CASUALTIES.

Appendix 37. Casualties trifling compared with number of travellers.

Appendix 23, 24.

In conclusion, I am happy to add that the casualties on the different lines, during the period embraced in this Report, have been few and trifling, compared with the number of travellers, which amounted in six years to 4,294,672 first and second class passengers, besides 13,272 season ticket holders, who, if reckoned by the number of times they travelled, would swell the number by some millions more. This will be apparent from a glance at the Return of Working Expenses, where it will be seen that the total amount paid as compensation for personal injuries was only £1,710 19s. 5d., or at the rate of £285 3s. 3d. per annum; and for damage to property £1,165 15s. 8d., or at the rate of £194 5s. 11d. per annum;—a small percentage on the gross earnings, which, for the same period, amounted to £1,509,404 11s. 1d., or at the rate of £251,567, 8s. 6d. per annum. This is creditable to the care and attention of the Railway officials; and shows that of all modes of transport the Railway is the safest and the best.

I have the honor to be,

Sir,

Your most obedient servant,

JOHN RAE.

THE HONORABLE THE
SECRETARY FOR PUBLIC WORKS,
&c., &c., &c.

APPENDIX TO REPORT ON RAILWAYS OF NEW SOUTH WALES,
1866-1871.

No. 1.

REPORT from the Engineer-in-Chief on the progress of the Railway Extensions from Picton, Penrith, and Singleton.

The Engineer-in-Chief to The Commissioner for Railways.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 8th January, 1872.

Sir,

In attention to your verbal instructions, I have the honor to submit the following detailed Report on the progress of the Railway Works on the Southern, Western, and Northern Extensions, to the 31st December, 1871.

I have considered it advisable, in order to avoid the inconvenience of a reference to my Report on this subject, dated the 12th September, 1865, to recapitulate a considerable portion of the information therein given, so that the present Report may embrace all the information in my possession on the cost of the Railways from Picton to Goulburn, Penrith to Bathurst, and Singleton towards Armidale.

GREAT SOUTHERN RAILWAY.

That portion of the Southern Railway between Picton and Goulburn, being a length of 81½ miles, is completed, and was opened for public traffic throughout on the 27th May, 1869.

Land has been taken for a double line, but the works are for a single line throughout.

The contracts for the construction of this length were divided into the following sections:—

No. 1 Contract.....	Miles.	Chains.
2	5	34
3	6	76
4	11	40½
5	5	21
6	8	75½
7	16	70
.....	26	27
Total	81	24

Section No. 1.—Length, 5 miles 34 chains.

In August, 1862, a contract was entered into on a schedule of prices with Mr. Croshaw for this section; but, in December, 1863, Mr. Croshaw finding it impossible to proceed with the works, the contract was undertaken on the same terms and conditions by Messrs. Murnin and Brown, and by them has been satisfactorily completed.

The viaduct at Picton and the tunnel through the Redbank Range are the most important works on this section.

The viaduct is built in masonry, set in cement, and consists of five openings of 40 feet each; the arches are semi-circular, and on an incline of 1 in 40. In consequence of its proximity to the Picton Station it has been built for a double line of Railway; its entire length is 276 feet, and its extreme height from foundations to rail level, 78 feet. The total cost has been £10,437 12s. 3d., or at the rate of £37 16s. 4d. per lineal foot.

The tunnel is 198 yards in length, lined with brickwork set in cement throughout, and constructed for a single line of way. In form it is elliptical; 15 feet wide in its widest part, and 17 feet high from rail level to soffit of arch. The cost, including excavation, which was to a great extent through hard shale, has been £10,653 15s. 6d., or at the rate of £53 16s. per yard lineal.

The total quantity of excavation on this contract has been 196,994 cubic yards, 38,626 cubic yards being in rock.

Sixteen culverts have been constructed, of either brickwork or masonry, of an aggregate length of 1,082 feet, and consist of—

One	1 ft. 6 in.
Three	2 0
Five	3 0
One	4 0
Three	5 0
Two	8 0
One	10 0

The total cost of this section, including fencing and clearing, but exclusive of permanent-way and ballasting, has been £49,549 4s. 2d., or at the rate of £9,133 9s. 10½d. per mile.

The steepest gradient is 1 in 40 for a length of 2 miles 33 chains, and the smallest radius of a curve is 16 chains.

Section No. 2.—Length, 6 miles 76 chains.

This contract was let to Messrs. Shuttleworth and Wallis in September, 1862, but the works having been suspended by them in February, 1863, were undertaken by Messrs. Larkin and Wakeford, and have been satisfactorily completed. The works are very light, the total excavation being only 89,879 cubic yards, 18,643 cubic yards being in rock.

Eleven culverts have been constructed, of an aggregate length of 556 feet, and consist of—

Three	2-feet
Five	3 "
One	4 "
Two	5 "

The total cost, including fencing and clearing, but exclusive of permanent-way and ballasting, has been £11,544 16s. 8d., or at the rate of £1,661 2s. 6d. per mile.

The steepest gradient is 1 in 40 for 66 chains, and the smallest radius of a curve 50 chains.

Section No. 3.—Length, 11 miles 40½ chains.

This section was originally contracted for by Messrs. Randle and Gibbons. The bond was signed on the 10th February, 1863, the time of completion being 7th July, 1864. In September, 1863, this firm became insolvent, and on the 24th November, 1863, the works were let to Messrs. Larkin and Wakeford, Murnin and Brown, and have been by them satisfactorily completed.

The excavations are very heavy, amounting to 446,566 cubic yards, 223,962 cubic yards being through hard sandstone. The greatest depth of cutting is 76 feet, and the highest embankment is 82 feet.

There are three timber bridges under the Railway, of a total length of 546 feet, which consist of forty-four openings of 12 feet each.

No. 1—*continued.*

One timber bridge over the Railway has been constructed, of a span of 37 feet, the width of roadway being 14 feet, and the height from level of rails to floor of bridge 76 feet.

The whole of the culverts, twenty-eight in number, of an aggregate length of 2,450 feet, have been completed, and consist of the following :—

Two	1 foot 6 inch
Six	2 feet
Eleven	3 "
One	4 "
Six	5 "
Two	10 "

The total cost of the works, exclusive of permanent-way and ballasting, has been £71,105 3s. 5d.

The steepest gradient is 1 in 30 for 2 miles and 2 chains, and the smallest radius of a curve is 30 chains.

Section No. 4.—Length, 5 miles 21 chains.

This section was let to Messrs. Larkin, Wakeford, Murnin, and Brown, in November, 1863, and the whole of the works have been satisfactorily completed.

The most important work on this contract is the Gibraltar Tunnel, 572 yards in length, the excavation for which was through hard shale and sandstone. The tunnel has been lined throughout with brickwork and masonry in cement (both being used to facilitate its completion), and is of the same form and dimensions as the tunnel through the Redbank Range at Picton.

There are also ten timber bridges, of an aggregate length of 760 feet, having the following openings :—

Four	6-foot spans
Fifteen	12 "
Fifteen	26 "
Three	30 "

Seventeen culverts have been constructed, of an aggregate length of 738 feet, and consist of—

Three	2 feet
Six	3 "
Four	4 "
Four	5 "

The total quantity of excavation is 175,527 cubic yards—43,549 cubic yards being rock—including 23,623 cubic yards from the tunnel.

The total cost of all the works, exclusive of permanent-way and ballasting, has been £64,243 13s. 3d.

The steepest gradient is 1 in 55 for 1 mile and 4 chains, and the smallest radius of a curve is 40 chains.

Section No. 5.—Length, 8 miles 7½ chains.

This section was let to Messrs. D. Williams and Co. on the 30th July, 1863, and the whole of the works have been satisfactorily completed.

The largest work on this contract was the construction of a timber viaduct over the Wingecarribee River, near to Bong Bong, 1,048 feet in length, and consisting of 38 spans of 26 feet each. The greatest height from surface of ground to rail level is 25 feet.

There are also ten other timber bridges on this section, of an aggregate length of 685 feet, consisting of 397 feet of 26-foot spans, 1 span of 30 feet, 216 feet of 12-foot spans, and 42 feet of smaller openings of various spans.

Twenty-two culverts have been constructed, of an aggregate length of 838 feet, and consist of—

Five	2-foot
Seven	2 " 6 inches
Six	3 "
Two	4 "
Two	8 "

The total quantity of excavation is 171,770 cubic yards, 7,783 cubic yards being rock. The total cost of the works, exclusive of permanent-way and ballasting, has been £33,729 4s. 3d.

The steepest gradient is 1 in 40 for a length of 68 chains, and the smallest radius of a curve is 30 chains.

At the end of this contract, near to Vine Lodge, the residence of Henry Badgery, Esq., and 91 miles from Sydney, the Railway attains its highest level between Sydney and Goulburn,—the rails being 2,357 feet above high-water of spring-tides at Sydney.

Section No. 6.—Length, 16 miles 70 chains.

This contract was let to Messrs. Foster & Roberts on the 13th January, 1864, and the whole of the works have been satisfactorily completed.

There are fourteen timber bridges, of an aggregate length of 1,376 feet, and consist of—

Thirty-three spans of	26 feet
Four	20 "
Two	18 "
Twenty	12 "
Three	11 "

Forty-five culverts have been constructed, of an aggregate length of 1,833 feet, and consist of—

Seventeen	3-foot
Seven	4 "
Thirteen	5 "
Two	8 "
One	2 "
Five open culverts.	

The total quantity of excavation is 405,600 cubic yards, 87,298 cubic yards being rock.

The total cost of the work, exclusive of permanent-way and ballasting, was £64,537 3s. 5d.

The steepest gradient is 1 in 50·77 for a length of half a mile, and the smallest radius of a curve is 30 chains.

Section No. 7.—Length, 26 miles 27 chains.

This contract, commencing near to Marulan and terminating in the town of Goulburn, was let to Mr. Faviell on the 28th December, 1864, and has been satisfactorily completed. It includes, in addition to the works, the laying of the permanent-way, ballasting, and sleepers.

There are five bridges on this length, having stone or brick piers and abutments, with superstructures of wrought-iron, of an aggregate length of 2,637 feet, which have been erected at the following places :—

- Viaduct over Barber's Creek, five spans of 60 feet.
- Viaduct over the Wollondilly River (first crossing), one span of 130 feet and seven spans of 60 feet.
- Viaduct over the Wollondilly River (second crossing), one span of 130 feet and six spans of 60 feet.
- Viaduct over Boxer's Creek, two spans of 60 feet.
- Viaduct over the Mulwarree Creek, twelve spans of 60 feet each.

There are also eleven timber bridges, of an aggregate length of 2,209 feet, consisting of—

Seventy-one spans of	25 feet
Three	24 "
Ten	12 "
Eight	10 "

No. 1—*continued.*

Sixty-seven culverts have been constructed, of an aggregate length of 2,854 feet, and consist of—

One	18-inch
Fifteen	2 feet
Twenty-nine	3 "
Ten	5 "
Seven	8 "
Five	10 "

The total quantity of excavation on this section is 608,032 cubic yards, 126,640 cubic yards being rock.

The total cost of the works, exclusive of the ironwork for permanent-way, has been £305,699, or £11,574 per mile.

The steepest gradient is 1 in 50 for a length of 50 chains, and the smallest radius of a curve is 30 chains.

The level of the rails in the station-yard at Goulburn is 2,071 feet above high-water of spring-tides at Sydney.

Laying permanent-way and ballasting.

A contract was entered into on the 31st May, 1865, with Messrs Larkin & Wakeford, for laying the permanent-way, including sleepers and ballasting, from Picton to the end of No. 3 contract (at Mittagong), being a length of 23 miles 70½ chains.

The total cost of this contract, exclusive of rails, but including the laying of sidings at Picton, Mittagong, and other miscellaneous works, was £43,209 5s. 4d.

On the 23rd May, 1866, a contract was entered into with Messrs Larkin & Wakeford for laying the permanent-way, including sleepers and ballasting, from Mittagong to the end of No. 6 section, terminating about 6 miles from Marulan, being a length of 31 miles 6 chains and 50 links.

The total cost, including sidings at Bowral Station, Sutton Forest, Cabel's Siding, and various Miscellaneous works, but exclusive of rails, was £70,045 9s. 2d.

The dates on which the several sections of the extension Picton to Goulburn were opened for traffic, and their lengths in round numbers, are as follows:—

1st March, 1867—Picton to Mittagong	24 miles
2nd December, 1867—Mittagong to Sutton Forest.....	9 "
6th August, 1868—Sutton Forest to Marulan.....	28½ "
27th May, 1869—Marulan to Goulburn	20 "
Total	81½ miles

The total cost from Picton to Goulburn, including trial surveys, engineering expenses, purchase and compensation for land, construction of works, permanent-way, fencing, water supply, station buildings, gate houses, office and station furniture, and heavy flood repairs during construction, has been £1,024,455 18s. 9d., or at the rate of £12,609 per mile.

GREAT WESTERN RAILWAY.

EXTENSION PENRITH TO BATHURST.

Plans and sections of the entire distance to Bathurst have been approved by Parliament.

This extension has been divided into the following sections:—

No. 1 Contract, commencing on the west side of the river Nepean, length 11 miles 3 chains

2 "	"	11 "	51 "	
3 "	"	15 "	34 "	
4 "	"	15 "	76 "	35 links
5 "	"	15 "	10 "	65 "
6 "	"	6 "	6 "	
7 "	"	16 "	66 "	
8 "	"	14 "	10 "	
9 "	"	2 "	12 "	

Section No. 1.—Length, 11 miles 3 chains.

The tender of Mr. Watkins for the works on this section was accepted in March, 1863, and they were completed in December, 1865.

The most important work was the erection of the Knapsack Gully Viaduct, consisting of 5 spans of 50 feet each and 2 spans of 20 feet each. It is built in masonry, set in Portland cement, for a single line of Railway, on an incline of 1 in 30.

The length is 388 feet, and the greatest height from the foundations to the level of rails is 126 feet. The quantity of masonry is 6,713 cubic yards, and the total cost has been £22,724 14s., or at the rate of £58 11s. 4½d. per yard lineal.

Four timber bridges have been constructed, of an aggregate length of 1,132 feet, which consist of—

Eighty-three spans of	12 feet each
Four	21 "
One	26 "

Fifty-two culverts have been constructed, of an aggregate length of 2,605 feet, and consist of—

Fourteen	1 foot 6 inches
Thirty-three.....	2 feet
Four.....	3 "
One	5 "

The total quantity of excavation is 475,015 cubic yards, 128,220 cubic yards being rock.

The total cost of the works, exclusive of permanent-way and ballasting, has been £88,666 14s. 5d.

The steepest gradient is 1 in 30 for 1 mile and 63 chains, and the smallest radius of a curve is 8 chains.

Section No. 2.—Length, 11 miles 51 chains.

This section was let to Messrs. Duxbury & Kerr in February, 1863, and completed in May, 1866.

Sixty-one culverts have been constructed, of an aggregate length of 2,144 feet, and consist of—

Twelve	1 foot 6 inches
Forty-eight	2 feet
One	3 "

Two bridges have been erected to carry the Western Road over the Railway; they are built in masonry, set in cement.

The total quantity of excavation on this section is 403,960 cubic yards, 255,519 cubic yards being rock.

The total cost of the works, exclusive of permanent-way and ballasting, has been £63,527 14s.

The steepest gradient is 1 in 33, for a length of 76 chains, and the smallest radius of a curve is 8 chains.

No. 1—*continued.**Section No. 3.—Length, 15 miles 34 chains.*

This contract was let to Mr. W. Watkins on the 14th August, 1863, and completed in August, 1866. Eighty-one culverts have been constructed, of an aggregate length of 2,887 feet, and consist of—

Nineteen.....	1 foot 6 inches
Sixty-eight.....	2 feet
Two.....	3 "
Two.....	8 "

The total quantity of excavation is 421,891 cubic yards, 229,687 cubic yards being rock.

The total cost of the works, exclusive of rails, sleepers, ballast and road laying, has been £64,390 15s. 1d.

The steepest gradient is 1 in 33 for a length of 1 mile and 66 chains, and the smallest radius of a curve is 8 chains.

The level of rails at the commencement of this contract, near to the Blue Mountain Inn, is 2,403 feet, and the level of rails at the termination of the contract is 3,494 feet above high-water of spring-tides at Sydney.

Laying and ballasting permanent-way.

On the 17th October, 1865, a contract was entered into with Messrs. Larkin and Wakeford for laying the permanent-way, including the providing of sleepers and ballast for that portion of this extension between Penrith and Blackheath, being a length of 33 miles 8 chains.

This work has been satisfactorily completed. The total cost, exclusive of rails and other ironwork for permanent-way, but including sidings, and a temporary station at the Weatherboard, and the sidings at the Blue Mountain, has been £78,725 13s. 10d.

Section No. 4.—Length, 15 miles 76 chains 35 links.

This contract included the ballasting and laying of the permanent-way, in addition to the usual works, and was let to Mr. W. Watkins on the 19th January, 1865. The whole of the works have been satisfactorily completed.

The tunnel through Mount Clarence is 539 yards in length, and lined with masonry, set in cement throughout.

Seventy-four culverts have been constructed, of an aggregate length of 3,149 feet, and consist of—

Two.....	1 foot.
Sixty-five.....	2 feet.
Five.....	3 "
One.....	5 "
One.....	10 "

The total quantity of excavation is 594,553 cubic yards, 421,697 cubic yards being rock.

The total cost of this section, including all works, laying the permanent-way, providing sleepers and ballasting, but exclusive of rails, chairs, &c., and stations, was £187,734 15s. 10d.

The steepest gradient is 1 in 33 for a length of 1 mile and 31 chains, and the smallest radius of a curve is 10 chains.

On this contract, at the entrance to the Clarence Tunnel, a distance of 88½ miles from Sydney, the Railway attains its highest level between Sydney and Bathurst, the rails being 3,658 feet above high-water of spring-tides at Sydney.

Section No. 5.—Length, 15 miles 10 chains 65 links.

This contract included the ballasting and laying of the permanent-way, in addition to the usual works, and was let to Mr. P. Higgins in May, 1866.

The whole of the works have been satisfactorily completed.

On this section there are seven viaducts and two bridges over the Railway, of an aggregate length of 2,225 feet, varying in height from 10 feet to 70 feet, and consist of the following spans:—

Four openings, each 10 feet span	
Two " " 15 "	
Three " " 20 "	
Fourteen " " 25 "	
Two " " 27 "	
Thirty-seven " " 30 "	
One " " 54 "	

One timber approach bridge, eight openings, each of 25 feet.

There are also three tunnels: one on the Lithgow Valley Zig Zag, 77 yards in length; one at Morangaroo, 267 yards in length; and one under the Mudgee Road, 47 yards in length.

The total quantity of excavation is 1,144,284 cubic yards, 747,710 cubic yards being rock.

The total amount paid for all works on this contract, including fencing, ballasting, sleepers, and laying permanent-way sidings at Bowenfells, Wallerawang, and water supply at Lithgow Zig Zag, but exclusive of station buildings, rails and other ironwork for permanent-way, has been £328,284 10s. 9d.

The steepest gradient is 1 in 40 for a length of 2 miles, and the smallest radius of a curve is 8 chains.

Section No. 6.—Length, 6 miles 6 chains.

This contract was let to Mr. Mackenzie on the 29th June, 1867; but he having abandoned the works in the beginning of 1868, the contract was relet to Mr. McCauley on the 27th April, 1868, and the works have been satisfactorily completed by himself and Mr. Forrester (one of his sureties).

The total quantity of excavation is 233,239 cubic yards.

Twenty-two culverts have been constructed, of an aggregate length of 1,661 feet, and consist of—

One double open culvert,	1 foot 10 inches
Four.....	2 feet
Ten.....	3 "
Three.....	5 "
Four.....	6 "

The total cost, including the sidings at Rydal, fencing, clearing, ballasting, sleepers, and road-laying, but exclusive of rails, chairs, &c., has been £48,910 1s. 9d.

The steepest gradient is 1 in 50 for a length of 1 mile 14 chains, and the smallest radius of a curve is 20 chains.

Section No. 7.—Length, 16 miles and 66 chains.

This section, which commences at Rydal, was let to Mr. D. Williams on 14th August, 1868, the time for completion being 31st December, 1870, which has since been extended to 31st January, 1872. With the exception of the laying of 7 miles of the permanent-way, this contract is very nearly completed.

The total quantity of excavation removed up to 31st December, 1871, including excavation to foundations of bridges and culverts, was 945,669 cubic yards.

There are the following bridges over Solitary Creek, varying in water-way from 30 feet to 120 feet, viz. :—

No.	Miles.	Chains.	
1,	at 111	49	... One 30-feet span, built in brickwork.
"	2,	" 111	58 ... " 30 " " "
"	3,	" 111	73 ... " 30 " " "

No. 1—continued.

No.	Miles.	Chains.		
No. 4,	112	15	Two	30 feet span, built in brickwork
" 5,	112	33	"	30 " " "
" 6,	112	67	Four	30 " " "
" 7,	113	11	One	60 " (skew), iron girder, with brick abutments.
" 8,	113	26	"	60 " " "
" 9,	113	55	"	50 " built in brickwork.
" 10,	114	00	"	60 " (Skew), iron girder, with brickwork abutments.
" 11,	114	23	"	50 " built in brickwork.
" 12,	114	42	"	50 " " "
" 13,	115	29	"	60 " (skew), iron girder, with brickwork abutments.
" 14,	115	44	Two	50 " built in brickwork.
" 15,	115	75	One	66 " (skew), iron girders, with brickwork abutments.
" 16,	116	09	"	50 " built in brickwork.
" 17,	120	06	Two	60 " (skew), iron girders, with brickwork pier and abutments.

From the above list it will be seen that there are no less than 17 large bridges over Solitary Creek, in a distance of 9 miles, containing 20,292 cubic yards of brickwork or masonry, in addition to wrought iron girders to the superstructure of six of these crossings.

At 123 miles 8 chains (Tarana Mountain) there is a brick bridge, with an arch of 30 feet span, and retaining walls 283 feet 6 inches in length.

There are also four bridges over the Railway, viz. :—

No.	Miles.	Chains.	
No. 1,	at 113	51	} These are occupation bridges, having brick piers and timber superstructures, each 18 feet span.
" 2,	" 118	06	
" 3,	" 120	25	} These bridges are each of 18 feet span, and built entirely in brickwork.
" 4,	" 121	34	

The quantity of brickwork and masonry in these bridges, including the bridge and retaining walls at Tarana Mountain, is 2,057 cubic yards, making a total of 22,349 cubic yards for the whole of the bridges on this contract.

Sixty-nine culverts have been constructed, of an aggregate length of 3,798 feet, and consist of—

Forty-seven	3-feet
Two	4 "
Ten	5 "
Six	8 "
Two	10 "
One	30 "
One	15 " double

The quantity of brickwork in these culverts is 8,075 cubic yards, which, added to the quantity of brickwork in the bridges under and over the Railway, amounting to 22,349 cubic yards, makes a total quantity of brickwork and masonry of 30,424 cubic yards on this length.

The total cost of the works up to 31st December, 1871, exclusive of rails and other ironwork for permanent-way, but including fencing, ballasting, sleepers, and road-laying, has been £243,550 0s. 2d.

The steepest gradient is 1 in 55 for a length of 1 mile 77 chains, and the smallest radius of a curve 10 chains.

I anticipate that the whole of the works and permanent-way in this section will be completed in March next.

Section No. 8.—Length, 14 miles 10 chains.

The tender of Mr. Mark Faviell was accepted for the construction of the works on this section, on 14th August, 1863.

The time for completion was the 31st December, 1870, which has since been extended to the 30th April, 1872.

The total estimated quantity of excavation is 794,100 cubic yards. Up to the date of last certificate (16th December) 780,972 cubic yards had been removed.

Thirty-eight culverts have been constructed, of an aggregate length of 2,778 feet, and consist of—

Twenty-four	3 feet
Ten	5 "
Two	8 "
One	20 "
One	30 "

The quantity of brickwork in these culverts is 6,496 cubic yards.

Two bridges have been constructed over the Railway, containing 873 cubic yards of brickwork.

The total amount expended up to the 31st December, 1871, has been £112,787 19s. 1d.

The steepest gradient is 1 in 33 for a length of 1 mile 26 chains, and the smallest radius of a curve is 16 chains.

Section No. 9.—Length, 2 miles 12 chains.

This section, terminating near to the river Macquarie at Bathurst, was let to Mr. J. S. Cummings on the 20th April, 1871;—the time for completion being the 31st March, 1872.

The estimated quantity of excavation on this section is 109,137 cubic yards. Up to the 31st December, 1871, the date of the last certificate, 21,935 cubic yards had been removed.

There are only two small timber bridges to be erected on this section, of an aggregate length of 203 feet.

The total amount expended up to the 31st December is £2,693 17s. 8d.

The steepest gradient is 1 in 46 for a length of 31 chains, and the smallest radius of a curve is 30 chains.

The estimated average cost per mile from Penrith to Bathurst, including the bridge over the river Nepean at Penrith, was £15,691, but the actual cost cannot be given until the completion of the contracts Nos. 7, 8, and 9.

The total amount expended up to the 31st December, 1871, including trial surveys and all engineering expenses, is £1,649,113 4s. 10d.

The dates on which the several sections of this extension were opened for public traffic, and their lengths in round numbers, are as follows :—

11th July, 1867.—Penrith to Weatherboard	28 miles
1st May, 1868.—Weatherboard to Mount Victoria	15 "
18th October, 1869.—Mount Victoria to Bowenfells	20 "
1st March, 1870.—Bowenfells to Wallerawang	8 "
1st July, 1870.—Wallerawang to Rydal	6 "
Total	77 "

No. 1—*continued.*

GREAT NORTHERN RAILWAY.

EXTENSION FROM SINGLETON TOWARDS ARMIDALE.

Plans and sections of that portion of this extension from Singleton to Murrurundi, being a distance of nearly 70 miles, have been submitted to Parliament and approved.

Land has been taken for a double line of Railway, but the works are for a single line only throughout.

Contracts were entered into, at the dates hereafter named, for the whole of this length, and divided into the following sections.

	miles.	chains.	links.
Contract No. 1, commencing on the north side of the river Hunter	7	61	40
" 2,	7	56	00
" 3,	15	4	00
" 4,	20	26	00
" 5,	18	79	35

Section No. 1.—Length, 7 miles 61 chains 40 links.

The tender of Messrs. Randle and Gibbons for the works only on this section was accepted on the 29th May, 1863, the time for completion being August, 1864.

This firm not being able to carry on the works, from pecuniary embarrassments, the contract was transferred to their sureties, Messrs. Macnamara and Edwards, and was by them satisfactorily completed.

The total quantity of excavation was 177,008 cubic yards, 23,014 cubic yards being rock.

Twenty-four culverts have been constructed, of an aggregate length of 1,498 feet, and consist of—

No. 13	2-feet
1	2 "
5	3 " double
3	5 "
2	8 "

Four timber bridges have been constructed, of an aggregate length of 648 feet, and consist of four spans of 26 feet, and forty-three spans of 12 feet.

The total cost of this section, including fencing and clearing, but exclusive of permanent-way and ballasting, has been £26,306 12s. 9d., or at the rate of £3,388 per mile.

The steepest gradient is 1 in 33 for a length of 33 chains, and the smallest radius of a curve is 30 chains.

Section No. 2.—Length, 7 miles 56 chains.

This contract for the construction of works only was let to Mr. George Blunt on the 14th May, 1863, and has been satisfactorily completed.

The total quantity of excavation has been 119,342 cubic yards, of which 13,245 cubic yards were rock.

Sixteen timber bridges have been erected on this section, of an aggregate length of 2,152 feet, and consist of—

Four spans of	33 feet each
Forty-eight do.....	26 "
One do.....	18 "
Two do.....	15 "
Forty-eight do.....	12 "

Nine culverts have been constructed, of an aggregate length of 279 feet, and consist of—

	ft.	in.
Three	2	0
Two	2	0 double
One	2	6
Three	5	0

The total cost has been £25,457 4s. 1d., exclusive of permanent-way and ballasting.

The steepest gradient is 1 in 33 for a length of 20 chains, and the smallest radius of a curve is 72 chains.

Section No. 3.—Length, 15 miles 4 chains.

The contract for the construction of works only on this section (Liddell to Muscleebrook) was let to Mr. Blunt on the 2nd September, 1864, the time for completion being the 31st July, 1866.

The total quantity of excavation on this contract was 518,602 cubic yards, of which 140,906 cubic yards were rock.

There are six timber bridges, of an aggregate length of 919 feet, and consist of thirty spans of 26 feet each, and three spans of 12 feet.

Thirty-four culverts have been constructed, of an aggregate length of 1,837 feet, and consist of—

Two	1 foot
Two	2 feet
Six	3 "
Five	4 "
Nine	5 "
Ten.....	8 "

The quantity of masonry in these culverts is 3,194 cubic yards.

The cost of this contract, exclusive of permanent-way and ballasting, has been £93,039 2s. 10d.

The steepest gradient is 1 in 46 for a length of 57 chains, and the smallest radius of a curve is 20 chains.

Laying permanent-way and ballasting.—Length, 30 miles 78 chains.

The contract for laying the permanent-way, and providing sleepers and ballast, on Contracts Nos. 1, 2, and 3, Singleton to Muscleebrook, was let to Messrs. Larkin and Wakeford on the 27th September, 1867, the time for completion being 1st December, 1868, afterwards extended to the 28th February, 1869.

The cost of this contract, exclusive of rails and other ironwork for permanent-way, but including sidings at Camberwell and Muscleebrook, has been £46,452 18s. 2d.

Section No. 4.—Length, 20 miles 26 chains.

The tender of Messrs. Amos & Co. for the construction of the works (exclusive of the bridge over the river Hunter at Aberdeen), laying the permanent-way, and providing sleepers and ballast, was accepted on the 18th February, 1868, the time for completion being the 31st December, 1869. Some difficulty having been experienced by Messrs. Amos & Co. in carrying out the works, they obtained the assistance of Messrs. Larkin and Wakeford, who signed a bond as joint contractors, on the 21st June, 1869, the time for completion being extended to 31st August, 1870. In consequence of the unprecedented wet weather, causing heavy floods, which seriously damaged the works, the contract time was further extended to the 31st December, 1870.

The total quantity of excavation has been 392,605 cubic yards, 12,398 cubic yards being rock.

There are seven timber bridges on this section, of an aggregate length of 1,792 feet, which consist of—

Six spans of	10 feet
Eighty-five do.....	18 "
Six do.....	26 "

No. 1—*continued.*

Thirty-seven culverts have been constructed, of an aggregate length of 1,392 feet, containing 2,143 cubic yards of brick-work in cement, and consist of—

One	1-foot
Two	2 feet
Three	3 "
Twelve	4 "
Seven	5 "
Eight	6 " 6 inches
Four	8 "

The total cost of this contract, exclusive of rails and other ironwork for permanent-way (but including sidings at Aberdeen and Scone), has been £101,295 3s. 7d.,

The steepest gradient is 1 in 50 for 40 chains, and the smallest radius of a curve is 30 chains.

Bridge over the river Hunter at Aberdeen.

This bridge is constructed for a single line, with two continuous wrought-iron lattice-girders, of 486 feet each in total length, 14 feet 6 inches in depth, and placed 14 feet apart. It is divided into three spans of 150 feet, each span being supported on two cast-iron cylinders, 9 feet in diameter, sunk into the rock at an average depth of 20 feet below the ordinary level of the water in the river. These cylinders are filled up for their whole height with concrete, composed of gravel and cement, in the proportion of six of gravel to one of cement.

The cross girders carrying the roadway are 14 inches in depth, 3 feet apart, and rest upon the bottom boom of the main girders.

The roadway is carried on the cross girders by four longitudinal bearers; those under each rail are 15 x 7, and the side-bearers 7 inches by 6 inches. Upon these bearers is laid planking 3 inches in thickness, to which the chairs carrying the rails are spiked.

The whole of the ironwork was imported from England direct, without the intervention of a contractor, and was manufactured by the Park Gate Iron Company, Rotherham, at a cost of £13,314 16s. 6d., including freight to Newcastle and Railway charges to Aberdeen.

The fixing of the wrought-iron cylinders was let to Messrs. Bell & Franklin on the 12th November, 1869, the time for completion being the 31st March, 1870. In consequence of the heavy floods which occurred in the beginning of this year, the time was extended to the 1st July, 1870.

The total cost of Messrs. Bell & Franklin's contract was £4,895 19s.

The contract for the erection of the wrought-iron lattice-girders forming the superstructure of the bridge was let to Mr. Thomas Smythman on the 31st May, 1870, the time for completion being the 31st October, 1870.

The cost of this contract, including the fixing of all necessary staging, and the painting of girders and cylinders, was £6,318 7s. 2d.

The total cost of this bridge, including all materials and labour, has been £24,840 18s. 5d.

Section No. 5.—Length, 18 miles 79 chains 35 links.

This contract was let to Mr. Macquarie on the 9th October, 1868, the date named for completion being the 30th June, 1870.

On the 11th August, 1870, the time for completion was extended to 13th August, 1871. The works not being carried out satisfactorily by Mr. Macquarie, the contract was assigned to Mr. John Alger on the 30th May, 1871, and the time further extended to 31st March, 1872, at which date the whole of the works and permanent-way will no doubt be completed.

The total quantity of excavation removed, up to the 31st December, 1871, was 801,490 cubic yards.

Six timber bridges have been erected, of an aggregate length of 593 feet, and consist of—

Twenty-three.....	18-foot spans
Three	20 "
Three	26 "

Sixty-nine culverts have been constructed (being the whole number required), of an aggregate length of 4,182 feet, and consist of—

Eight.....	1-foot
Seventeen	3-feet
Fourteen	4 "
Nine	5 "
Seven.....	6 " 6 inches
Ten.....	8 "
Four	10 "

A portion of this contract, being a length of about 6 miles to the Wingen platform, has been opened for public traffic. The permanent-way is laid and partially ballasted for a further distance of 10 miles, leaving only 3 miles to be laid to complete the whole distance to the Murrurundi Station.

The total expenditure up to the 31st December, 1871, has been £131,447 3s. 1d.

The steepest gradient is 1 in 50 for a length of 1 mile and 61 chains, and the smallest radius of a curve is 30 chains.

The estimated average cost per mile from Singleton to Murrurundi (including the bridges over the Hunter at Singleton and Aberdeen) is £10,084, but the actual cost cannot be given until the completion of the works.

The dates on which the several sections of this extension were opened for traffic, and their lengths in round numbers, are as follows:—

19th May, 1869.—Singleton to Muscleebrook	31 miles
20th October, 1870.—Muscleebrook to Aberdeen.....	7 "
17th April, 1871.—Aberdeen to Scone	9 "
1st August, 1871.—Scone to Wingen	10 "

The total cost from Singleton to Murrurundi, to 31 December, 1871, including Trial Surveys and all Engineering expenses, was £693,222 0s. 11d.

I have, &c.,
JOHN WHITTON.

No. 2.

EXTRACT from *Sydney Morning Herald*, 7 January, 1867.

GREAT BLASTING EXPLOSION ON THE WESTERN RAILWAY.

"THOSE who are accustomed to travel over that portion of this Colony lying between Penrith and Bathurst need not be informed of the great engineering difficulties to be encountered in the construction of a line of railway through that mountainous part of the country, as these difficulties are apparent to every one—not only to those who frequently travel to the west, but to the casual visitor. There is scarcely a level piece of ground from the rise of Lapstone Hill to the end of the line so far as it has been surveyed. From the point just mentioned to the end of No. 5 Contract (embracing the whole of the line beyond Penrith, either constructed or in course of construction) it is one series of cuttings, embankments, viaducts, bridges, tunnels, and steep ascents and descents; but great as are the difficulties along the line, an example of each is to be found in the deep ravine known as the descent into Lithgow's Valley, and in order to convey a better idea of the explosion which took place on Saturday last, it will be necessary to give a brief outline of the plan, and of the country, by which the line descends to that point where the explosion took place. From the western opening of the Clarence tunnel to Bolton's public-house, situated in the valley, and less in distance than a mile and a half as the crow flies, there is a descent of no less than 470 feet. This fall in the line is effected by a gradual descent of 1 in 42, the line being carried around a mountain from the Clarence tunnel down to the head of the ravine before mentioned. This deep ravine or valley, lying between two high and rugged mountains, the sides of which in some places are perpendicular, is irregular in direction, and hence there will be some very sharp curves in that portion of the line, some of them only eight chains radius. The irregular nature of the side of the ravine on which that portion of the line known as the Zigzag is being constructed, also renders necessary the construction of a number of cuttings, several large embankments, five viaducts, and two tunnels. On reaching the head of the ravine the line is carried across to what we shall term the south side of the valley or ravine, by means of an enormous embankment, from which it will descend in a curve, round the side, through several cuttings and two large viaducts, the construction of which has just been commenced. These viaducts will be on the edge of the cliff overlooking the valley, but no adequate idea of the difficulty of erecting, staging, and constructing the masonry works could be given short of a personal inspection of the ground. From the second viaduct the line continues to descend in the same proportion—1 in 42—through several cuttings in the solid rock, to the first reversing station, which will be situate on the very brink of the precipice,—and it would not surprise us if travellers were a little nervous at travelling over this portion of the line for the first time. Every possible precaution is being taken in the construction of the line to ensure safety; but the traveller would not be able at first to divest his mind from the idea that any accident could precipitate the train and its living freight in thundering violence to the valley several hundred feet below. On reaching the first reversing station, the line is brought, as it were, to a stop, and, forming an acute angle, it descends along the edge of the precipice, by means of heavy cuttings through the rock, and several viaducts, to a spur in the mountain, through which a tunnel seventy-five yards in length has already been constructed. Emerging from this tunnel, the line is carried over another viaduct to a second spur in the mountain, through which a tunnel of 49½ yards in length is being excavated. Thence the line will pass over a large embankment, to be supported by an enormous retaining wall, and thus it will be carried back to the head of the gully, where the second reversing station will be placed. From this point the line will be carried down the side of the ravine, almost immediately underneath the middle line, will pass round the base of the spurs, tunnelled for the middle line, and be carried by means of immense cuttings and embankments down the valley in the direction of the Mudgee Road, where, for the present, we must leave it.

"We next come to the scene of last Saturday's operations. Between two and three hundred feet from the first reversing station (which it must be remembered is on the brink of the precipice) on the middle line there stood an enormous block of stone, or spur of the mountain, which was found to contain 45,000 tons of stone, and before the middle line could be constructed this mass must be removed. Upon calculation it was found that the removal of this block by the ordinary methods of day labour and blasting would cost not less than £5,000, and this being so, it was determined to remove it by some other method. After a good deal of deliberation and many consultations it was resolved to endeavour to remove it by sinking a number of holes to a great depth on the line required for the railway, placing a large quantity of blasting powder therein, and firing it by means of an electric shock. The Government gave Mr. Cracknell permission to do all that was necessary to ensure the success of the experiment, and preparations were at once commenced. In the first instance, a ditch some six feet deep was dug across the block where the division of the projecting mass from the mountain was required, and then twenty-five holes, six inches in width, and of a uniform depth of thirty feet, were cut in this ditch. The labour of cutting these holes was very heavy, and extended over two or three weeks. Each hole was triangular in shape, one side of the triangle of each hole being parallel with the line where the division of the mass of rock from the mountain was required. The other two sides of each hole pointed towards the rock to be removed. The object of cutting these triangular holes in the way described, was to ensure the division of the rock from the mountain in the required line, and also to split up the mass to be removed into a large number of pieces, it having been found by experiment that powder in exploding generally produces fissures in a line with the corners of the hole from which the explosion takes place. In view of the economy of labour, and the necessity of keeping the side of the mountain solid for the railway, it was of the first importance that the mass of rock should be cut off as cleanly as possible, and hence the cutting of these triangular holes. The boring of circular holes would not have entailed half the labour; but had this course been taken the fracture of the rock would doubtless have been irregular, and the side of the mountain, for the construction of the line, might have been very much shattered. These holes were cut under the superintendence of Mr. Corneille, Mr. Higgins's overseer.

The preparations having been so far completed, Mr. Cracknell arrived from Sydney with the necessary electrical apparatus for firing the blast, on Friday last, and spent nearly the whole of the day in giving instructions and making arrangements for the morrow. On Saturday morning, Mr. Cracknell and Mr. Higgins, accompanied by Mr. Hulle (the Government resident engineer), Mr. Kerr, manager for Mr. Higgins, Mr. Glover, engineer for the contractor, Mr. Corneille and a numerous body of workmen, were at the scene of operations by 6 o'clock, and while Mr. Cracknell superintended the charging of the holes, Mr. Hulle (who is an amateur electrician as well as engineer) unpacked the apparatus and constructed the battery. Each hole was charged as follows:—Half the allotted quantity was first poured loosely into the hole, then the cartridge, attached to two wires, was put in to rest on the powder, after which the remaining powder was poured in, and the tamping was then put in and firmly rammed down, care being taken to avoid injuring the wires. Mr. Cracknell tested the wires after each hole was filled, to insure the connection. The cartridge consisted of a small pill-box into which the two ends of the wire were placed, and these wires were connected by means of a piece of very thin platinum wire. Around this wire was placed some gun-cotton, and the box was then filled with fine powder. The quantity of blasting powder used in this explosion was three tons and a quarter. The battery was placed between one and two hundred feet from the east end of the block to be blown down, and there was of course a perfect connection between the wire stretched from the battery and those placed in the twenty-five holes. It was intended to make an earth connection with the wire at the far end, and for this purpose a hole was drilled into the rock, and some water, to insure the connection, was poured into the hole on Friday night. Everything being ready, and a large number of ladies from different parts of the district being in the immediate vicinity, by invitation, to witness the explosion, the signal was given, and at five minutes to 1 o'clock Mr. Cracknell made his first attempt to fire the blast. Every one waited in breathless anxiety, and with some misgivings in regard to their safety—for it was impossible to foresee the consequences. The first attempt failed; and Mr. Cracknell at once judged the cause of the failure to be in the imperfect earth connection. To remedy this he determined to make a wire connection; and a new wire was consequently stretched down to the far end of the block, and connected with that end of the wire. After about half an hour's delay the second attempt was made; and this failed also. This was most annoying;—every one present was exceedingly anxious that the first attempt to blast by means of electricity should succeed, and it is no wonder that some, after the failure of the second attempt, should predict a failure. Mr. Cracknell, though perhaps more anxious than any one else, was not the man to give in without a most determined effort; and knowing that the connection between the battery and the wire in the far hole was perfect, he thought that the imperfect connection must be in the return wire. A test satisfied him of the correctness of his opinion—the wire had by some means been accidentally damaged. Another wire was now stretched from the battery to the far end, and the connection completed, a test having been applied before the third attempt was made to fire the blast. In addition to the delay thus caused, Mr. Cracknell's personal safety was somewhat endangered by having (in consequence of using up so much spare wire) to fire the charge from the battery, which, we need hardly say, was far too near the rock to be comfortable for the operator. At five minutes to 2 o'clock the third

No. 2—*continued.*

signal of "all ready" was given; the necessary touch was applied, and in an instant a dense mass of rock and earth flew into the air with a rumbling sound, like that of distant thunder, proving, beyond all doubt, the success of the undertaking. For a few seconds the scene of the explosion was obscured from view, but the immense pieces of rock leaping from point to point, and dashing with a thundering noise into the ravine below, told clearly enough that an immense mass of rock must have been dislodged. A close inspection afterwards showed that about one-third of the enormous projecting mass,—some at both ends and a large quantity from underneath—had come down, and the remaining or centre portion, which still stood, had been forced bodily away from the mountain, leaving a fissure of from six to ten feet wide along the line where the holes had been cut. It was observed that, in the forcing out of this immense block, a portion of the foundation on which it stood had crumbled away, and it now stood upon a narrow base indeed. It was evident that but little, however, comparatively, was necessary to topple over the remainder of the mighty mass, and Mr. Cracknell at once determined to remain until two or three other charges of powder could be put in, so that he might complete the work which he had so successfully commenced. Were it not that the non-removal of this mass of rock would retard the progress of the works it might be permitted to remain, as the operation of the atmosphere—especially of rain—would ere long undoubtedly send it over.

Shortly after the explosion had taken place, the party, numbering upwards of fifty persons, sat down to an excellent luncheon, served in No. 1 Tunnel. A better or cooler place for a luncheon, considering the intense heat of the weather, could not be conceived. Among those present were Mr. P. Higgins, the contractor for the section, in the chair, Mr. Andrew Brown, Police Magistrate of Hartley, Mr. Thomas Brown, Mr. Lucas, M.L.A., Dr. Flatau, Mr. Cracknell, Mr. Morgan (associated with Mr. Watkins in No. 4 Contract), Mr. and Mrs. Barton, Mrs. Walker, Mr. Forster, Mr. Roberts, Mr. and Mrs. Hulle, Mr. and Mrs. Kerr, Mr. and Mrs. Glover, Mr. Quodling, Government Resident Engineer of No. 4 Contract, also the Manager, and Contractor's Engineer, Mr. W. Cooper, Sub-contractor for No. 1 Tunnel, Mr. Corneille, and a number of others. The operations of the morning had fully prepared the company for the luncheon; and poultry, cold joints, together with champagne, sherry, and delicious cawarra, disappeared in the most surprising manner. After discussing the excellent fare provided, the Chairman gave the usual loyal toast of 'The Queen,' which was received with all the honors. Mr. Lucas, in a few well-chosen remarks, proposed the health of Mr. Higgins, a gentleman who, he hoped, would be as successful in the whole of his contract as he had been in the explosion that day. Mr. Higgins acknowledged the compliment, and expressed his determination to carry out the work of the contract to the best of his ability. In conclusion, he proposed the health of Mr. Burton, a gentleman who deserved all the credit which attached to the undertaking of laying out this line. Mr. Burton, in responding, admitted that the laying out of this line had not been done without some labour, both physically and mentally. It was a matter of great satisfaction to him to see what he might term the work of his life being so successfully carried out. In conclusion, he congratulated Mr. Higgins and Mr. Cracknell on the success of their operations that morning.

The Chairman proposed the health of Mr. Cracknell, and in doing so spoke in complimentary terms of the scientific abilities and energies displayed by that gentleman in carrying to a successful issue the event which they had all assembled to witness. Mr. Cracknell, in acknowledging the toast, expressed the pleasure which he felt in having carried the blasting operation out successfully, and his gratification that he had been of some little service to Mr. Higgins. Mr. Lucas proposed the health of Mr. Hulle, and that gentleman returned thanks. Mr. Cracknell added his testimony to that of Mr. Lucas, of the assistance rendered to him by Mr. Hulle in conducting the operations of the morning; but for the zealous co-operation and assistance of Mr. Hulle the explosion would have been much longer delayed. The health of Mr. Lucas, as the Member for the district, was proposed, and in responding Mr. Lucas took occasion to remark the great progress made in the contract during the last three or four months; he expressed his belief that in the absence of railway communication the country would never be in a really prosperous state. The Chairman proposed 'The Landowners on No. 5 Contract,' coupling with it the name of Mr. Andrew Brown. Mr. Brown suitably acknowledged the compliment. The health of Mr. Kerr, and other toasts, followed, and the party broke up early in the afternoon.

Reserving for a future occasion any details of the works now in progress on No. 5 Contract, we may state that the line throughout the whole length of the contract is in hand. Mr. Higgins, with commendable perseverance, has put men on to work wherever their services can be made available, and the result is that the construction of the line is going on simultaneously in thirty or forty different places; he has not less than 700 men now employed, and he anticipates being able to put on a large number of additional hands so soon as the remainder of this large block of 45,000 tons of stone has been disposed of."

EXTRACT from *Sydney Morning Herald*, 18th September, 1868.

GREAT BLASTING EXPLOSION ON THE WESTERN RAILWAY.

THE difficulties presented to the engineer in constructing a line of railway across the rocky mountain range lying between Emu Plains and the low country in the neighbourhood of Bathurst were, with two or three exceptions, without parallel in the world; and certainly there are no railway works in either of the other Colonies where the difficulties presented could for a moment be compared with them. In the earlier days of the Colony, the construction of a railway across the Blue Mountains was thought to be an impossibility, and it was in view of the immense difficulties presented on every hand that the author of our Constitution said that bullock-drays were the proper mode of locomotion for this country. Mr. Wentworth has, however, lived to see the iron horse snorting across the gorges of the Blue Mountains, and he may yet live to see the lines opened to the metropolis of the South, and the metropolis of the West. Years were spent in surveying the country to the west of Penrith; a practical route was at length discovered, a line was eventually laid out, and a railway to Bathurst became a possibility. Those who are accustomed to travel by the Western line so far as it is open to the public, need not be told of the immense amount of skill, labour, time, and money that were required to complete the line to Mount Vittoria, although many of the difficulties have disappeared in the actual construction of the line. There is scarcely a length of 10 chains either of straight or level line from the rise of Lapstone Hill to the crossing of the Mudgee Road, at the foot of Lithgow Valley; and for present purposes we need not go further, although there is a good deal of broken country lying between this point and Bathurst. Deep cuttings, enormous embankments, steep gradients, and sharp curves—some of them having a radius of 8 chains only—are everywhere met with; and nowhere were the difficulties to be encountered in laying out the line so great as in descending from the tunnel through Mount Clarence to the foot of Lithgow Valley. The head of this valley consists of a deep rocky gorge, and is the wildest place imaginable for the construction of a railway. In some places the line will be cut from the sides of the solid rock,—in other places it will be carried over immense viaducts of masonry, and in one place it will pass through a tunnel cut through an immense mass of jutting rock. The descent of the line from the top of the cliffs down to this deep glen will be obtained by means of a zigzag similar to that just above the viaduct over Knapsack Gully, only very much longer, the gradient in the Lithgow Valley zigzag being 1 in 42. In order to construct this portion of the line, an enormous quantity of blasting has been done, and much more requires to be done. Some twenty months ago a very large mass of projecting rock that required to be removed before the middle line of the zigzag could be constructed, was displaced by means of blasting-powder, fired by electricity, and a report of the operation appeared in this journal at the time. Some weeks ago it was found that another enormous mass of projecting rock, measuring 40,000 cubic yards, would require removal, and it was again determined to invoke the aid of powder and electricity. In the first instance, a tunnel (known as No. 2 tunnel) was cut through this rock, and shortly afterwards the engineers began to entertain doubts whether the rock would stand, as it was found to contain a large number of deep fissures, through which sand, &c., were continually running. It was also found that a large portion of this rock rested upon a bed of pipeclay and shale, which only required the inlet of water to cause the overhanging mass to slip away. Under these circumstances, to avoid the possibility of an accident to a train, Mr. Whitton, the Engineer-in-Chief for Railways, determined to have the rock removed, and he gave instructions to the contractor, Mr. Higgins, to take it down. With the permission of the Government, Mr. Cracknell, Superintendent of Telegraphs, undertook to have a powerful battery on the ground, and to fire the charges of blasting-powder which would be deposited in the rock. The removal of the whole of the block at one explosion would, of course, effect an immense saving of time, labour, and consequent expense; and Mr. Higgins and his employes commenced to make preparations for the great blast. In the first instance, they cut three chambers in the face of the rock, inside the tunnel—one 32 feet, one 27 feet, and one 22 feet—and then others at right angles, giving them the form of the capital letter T, and in these chambers, which were on a level with the

No. 2—*continued.*

floor of the tunnel, were deposited two tons of powder. On the top of the rock, fifteen drives, varying from 20 to 30 feet in depth, were bored, and in these holes were deposited one ton and a half of powder. The battery by which the whole of the powder was instantaneously fired was composed of fifty-eight cells, and is known as Callan's Maynooth Battery. All the wires terminated in a fuse, composed of copper and zinc, which was enclosed in a small circular deal box, and deposited in the centre of each charge of powder. The wires were then attached to the two other wires that were connected with a switch, or circuit closer, placed about a hundred yards from the rock to be removed, where everything was prepared for the explosion when the proper moment should arrive.

"Having written thus much of the necessity for the removal of the rock, and the mode of effecting it, we must say something of the distinguished personages who were present on the occasion of the explosion on Wednesday last. A special train, with the Governor and Countess of Belmore, Mrs. Rowley Lambert, Miss Gladstone, the Hon. J. and Mrs. Martin, the Hon. J. Byrnes, Minister for Works, the Hon. J. B. Wilson, Minister for Lands, and the Hon. J. Docker, Postmaster General, left Sydney at 8 o'clock in the morning, and arrived at the Mount Vittoria station at about noon, where vehicles were in waiting convey them to the scene of the explosion, a distance of 17 miles. The party arrived at the head of the valley at about 4 o'clock, and were escorted by Mr. Higgins up to a large cleared space on a level with the tunnel to be operated upon, and some 200 yards from it, where a tent had been erected, and an excellent luncheon provided. Having their appetites sharpened by the long journey, the party from Sydney sat down and discussed with keen relish the viands and wines before them. In the immediate vicinity of this tent was a long table amply furnished with all the requisities of a cold collation, liberally provided by Mr. Higgins for his friends and visitors, some of whom had come from Bathurst to witness the blast. There were also present a large number of persons from Hartley, Bowenfels, and surrounding districts, besides a number of gentlemen from Sydney, including the Rev. Dr. Forrest, the Rev. Thomas Smith, Mr. Piddington, M.L.A., Mr. G. Russell, of the firm of P. N. Russell & Co., Mr. Rae, and others.

"Mr. Mackel, of Hartley, was present assisting Mr. Cracknell and Mr. P. B. Walker, in charging the battery and making other preparations for the blast. We must not omit to state that Mr. Cracknell during the forenoon tested the wires and satisfied himself that the circuit was complete, by sending a slight shock, with a galvanic battery, through the whole length of wire.

"Justice having been done to the excellent luncheon provided by Mr. Higgins, preparations were made for the explosion, and the parties present began to disperse to various projecting points where a good view of the effect of the blast might be obtained. The Countess of Belmore, who had consented to fire the blast, with Earl Belmore, Mr. Martin, Mr. Byrnes, Mr. Wilson, Mr. Higgins, and a few others, stood close to the table from which the electric spark was to be flashed, but the remainder of the people, who at this time numbered several hundreds, probably not far short of a thousand, stood in various places further removed from the scene of operation. Lady Belmore, having been instructed as to what she should do, at a given signal turned the circuit closer to the right, and instantaneously the effect was seen and heard in a dense cloud of dust and stones being hurled into the air, and by a deep rumbling, rather than a loud sharp sound. For a moment the effect upon the rock could not be seen, nor, indeed, was it looked for by those who stood near the table, as their eyes were turned into the air to look out for falling stones; but as soon as the dust cleared away a little it was observed that the explosion had caused a wide deep rent in the top of the mass of rock which had thus become in a great measure detached from the cliff; and inasmuch as a portion of the rock lower down and outside was seen to be crumbling away at the enormous weight of rock above, the entire mass appeared to require but a push and the whole would tumble over into the valley below. The same reason which necessitated the removal of the mass in the first instance had now prevented the powder from exercising the full force which it would have exhibited upon a solid rock; that is to say, a portion of the force of the powder had escaped through the fissures in the rock. The entire block was now completely shattered, and a few seconds after the blast was fired the roof of the tunnel fell in. It was the opinion of most people who saw the effect of the explosion that the whole body of rock, thus loosened and shattered, would speedily come down, especially after a fall of rain; and Mr. Higgins, who was well satisfied with the result, stated that if it did not come down of its own gravitation it would only require a small shot in the top of the rock to topple it over.

"Having made as close a survey of the block operated upon as was consistent with safety, the party began to disperse. The Governor and suite walked down to their carriages, and entering them, drove back to the railway station at One Tree Hill. Before reaching the top of Mount Vittoria the horses were knocked up, and the ladies as well as the gentlemen were compelled to walk. The party arrived at the station shortly after 8 o'clock, but in consequence of the 5 o'clock train from Sydney being on the line, the special did not leave till a few minutes to 10 o'clock. The train, without further incident, arrived in Sydney at a few minutes to 2 o'clock a.m., and the party, somewhat wearied with so long a journey, were glad to get back."

No. 3.

New South Wales Railways.

The Engineer-in-Chief to The Commissioner for Railways.

Department of Public Works,
Railway Branch,
Engineer's Office, Sydney,
30 January, 1872.

Sir,

I have the honor to report that the whole of the Government Railways in this Colony have been maintained, during the year ended 31st December, 1871, in good order and condition; and that the whole cost has been charged to the Vote for Working Expenses.

On the Southern Line, between Parramatta Junction and Liverpool, six miles and a quarter ($6\frac{1}{4}$) of the Permanent Way have been entirely relaid with new sleepers and ballast.

On the Western Line, between Parramatta Junction and Blacktown, five miles and a quarter ($5\frac{1}{4}$) of the Permanent Way have been relaid with new sleepers and additional ballast.

During the year, nine miles of the Northern Line, originally laid with half-round sleepers, have been entirely relaid with new sleepers and additional ballast.

The relaying of the Southern, Western, and Northern Lines, where half-round sleepers were originally laid down, will be proceeded with as rapidly as first-class sleepers can be obtained.

Under the head of Schedule G (Improvements and Additions to Works and Buildings), the sum of £5,779 12s. 7d. has been expended and charged to Working Expenses. This sum includes the enlargement of the Bridge at Newtown, upon which £1,764 5s. 10d. was expended; and also, £1,023 7s. for additional Signals at Stations.

I have, &c.,
JOHN WHITTON.

No. 4.

REGULATIONS FOR THE STEAM CRANES AND WHARF AT THE PORT OF NEWCASTLE, NEW SOUTH WALES.

Department of Public Works,
Sydney, 29 October, 1869.

His Excellency the Governor, with the advice of the Executive Council, directs the publication of the following Regulations for the Steam Cranes and Wharf at the Port of Newcastle, New South Wales, in lieu of those published in the *Government Gazette*, and dated 5th August and 7th November, 1864, and in addition to those that were existing previous to those dates.

JOHN SUTHERLAND.

REGULATIONS.

(To come into operation on and after the 1st January, 1870.)

EVERY person or company using the steam cranes, staiths, drops, or wharfs, will do so subject to the following regulations and conditions:—

1. The berths at Newcastle under the cranes, staiths, or drops, shall be reserved for vessels requiring the use of these appliances either to load or unload cargoes,—vessels loading coal to have the priority.

2. Vessels occupying the crane berths to load with coal, will be required to receive and trim the coals at the following average rates, namely:—Loading at cranes Nos. 1, 2, 3, and 4, 400 tons per day—at the other cranes, 600 tons per day, if required, and a proportional quantity in each and every case for half or quarter days. Coal to be shipped at night, if required by the Wharfinger, at the rate of 40 tons per hour, at cranes 1, 2, 3, and 4, and 60 tons per hour at other cranes.

3. Any vessels occupying berths under Government staiths or drops for the purpose of loading with coals, shall each be required to receive and trim the same at the rate of not less than 500 tons per day, if required, or a proportionate quantity for half or quarter days. Coal to be shipped at night, if required by the Wharfinger, at the rate of 50 tons per hour.

4. Vessels occupying berths to load with coals, and which shall not have received the quantities of coal above mentioned within the time specified, shall be liable to immediate removal from the wharf by the Harbour Master, to make room for the next vessel in turn, in accordance with the 3rd and 7th clauses of the Regulations to be observed in the Harbour of Newcastle, in the case of vessels loading at the coal shoots, as published in the *Government Gazette* of the 7th January, 1862: or, if not so removed, the master or owner of any such vessel shall forfeit and pay to the Commissioner for Railways the sum of 30s. per hour for every hour that his vessel continues to use such berth to the exclusion of other vessels, without receiving the quantities of coals before mentioned,—such penalty, when incurred, to be deposited in the hands of the Wharfinger before proceedings are taken to complete loading.

5. Should vessels occupying such berths be prevented from receiving the quantities of coals before mentioned, within the times specified, by the delay, neglect, or inability of the Coal Company loading or supplying coals to such vessel to furnish the same, then and in such case the Commissioner for Railways may charge such Company at the rate of 30s. per hour for every hour that any such crane, staith, or drop may be kept idle through such delay, neglect, or inability of the said Company to supply the quantity of coals per day or night, or part of a day or night, as aforesaid.

6. Any Coal Company, or master, or owner, or agent of any vessel, or other person or persons requiring the use of any of the steam cranes, staiths, or drops, for the purpose of shipping coals, or loading or unloading cargo at the wharfs at Newcastle, shall register his or their application in a book to be kept by the Wharfinger or other officer appointed or to be appointed for the purpose of receiving the same, specifying the length of time the crane, staith, or drop will be required after the vessel shall have been berthed at the wharf, the quantity of coals to be shipped, and the name of the vessel and of her master or owners intended to receive it, with draught of water when loaded, and the name of the Company supplying the coal.

7. Vessels shall occupy the crane, staith, or drop berths in the order of their arrival in port; such order of arrival shall be entered in a book to be kept for that purpose at the Harbour Master's Office, and should any vessel not be in readiness to move to the berth when her turn arrives, then the vessel next on the list shall take the turn, and the vessel so losing her turn shall take the next succeeding turn on the list if ready. Any dispute as to the order of arrival shall be settled by the Harbour Master. This regulation not to apply to vessels loading with coals for the use of Her Majesty's ships, which shall have the privilege of loading at any time without waiting their turn, nor to steamers (hereafter provided for).

8. All goods placed upon the wharfs at Newcastle shall be removed therefrom, within twenty-four hours, by the owner, agent or consignee; and should such goods not be removed by that time, then the Wharfinger shall have power to cause the same to be removed at the cost of such owner, agent, or consignee, or charge wharfage rates thereon of 2d. per packet, or 1s. per ton per day, at the option of the Wharfinger.

9. Any vessel requiring the use of the cranes for the purpose of loading or unloading general cargoes, will be charged at the rate of £8 per day, if occupying the berths opposite cranes Nos. 1, 2, 3, and 4, and £12 per day if occupying berths opposite any of the other cranes. Vessels occupying berths at the wharf for discharging cargo or ballast, shall do so at the rate of not less than 60 tons per day: in default may be removed by the Harbour Master.

10. Should any vessel require a night turn at the cranes, application may be made to the Wharfinger, who shall grant same after satisfying himself that there are sufficient trimmers to complete her loading in proper time. Vessels failing to complete loading through the night will be removed before 6 a.m. on the following day.

PROVISORS.

Regulations for Steam-vessels.

1. Steam-vessels shall take precedence over sailing-vessels at any crane which the Wharfinger may, for the time-being, set apart for them, always providing that not more than one crane berth shall be occupied by steam-vessels at any one time, except there be not sufficient sailing-vessels ready to occupy the remaining crane berths.

2. In the event of the berth set apart for steam-vessels not being required for immediate use, any sailing-vessel may be placed in such berth, but such sailing-vessel shall not occupy such berth for a longer period than twelve working hours, if the same shall be required for a steam-vessel.

3. Any sailing-vessel which may have been placed at the berth set apart as aforesaid, and which, in the opinion of the Wharfinger, can complete her loading within twelve hours, will be allowed to do so: Provided the Wharfinger is satisfied with the steps taken for loading and removal from such berth, within twelve working hours from the time such sailing-vessel shall have been placed in such berth.

No. 5.

Department of Public Works,
Railway Branch,
Sydney, 8 April, 1870.

AMENDED INSTRUCTIONS TO TRAFFIC AUDITOR.

ISSUED for his guidance, and for the information and guidance of the Officers of the Branches affected thereby.

JOHN SUTHERLAND,
Commissioner for Railways.

THE Traffic Audit Branch will for the future be a separate and distinct branch of the Railway Department, and the Traffic Auditor will communicate on all official business connected with the discharge of the several duties entrusted, or that may be entrusted to him from time to time, directly with the Commissioner, to whom he will be solely responsible.

2. All books, accounts, tickets, and forms, kept by Station-masters are placed under the direct supervision of the Traffic Auditor, who will be held responsible for the proper keeping of all such station books and accounts, and for the due preparation of all returns, &c., required for the Audit Office.

3. Station-masters are therefore hereby enjoined to pay the strictest attention to the Traffic Auditor's instructions and suggestions for the more efficient keeping of their books, accounts, and returns. All queries on accounts must be replied to by Station-masters without reserve or evasion, and authorities supplied whenever required without demur or delay.

4. The Traffic Audit Office shall be furnished with the following returns, &c., *daily*—
From every Station-master—

(1.) A return showing the total amounts of each day's receipts under the several headings of Coaching traffic, and the total amount of money remitted to the Accountant for Railways.

(2.) A similar return for Goods traffic.

(3.) A "Ticket Collector's Return, &c.," accompanied by each day's collection of passengers' tickets or passes.

From the Accountant for Railways—

(1.) A statement of all moneys received by him from Station-masters.

(2.) A statement showing particulars of all moneys received by him from other sources, distinguishing those on account of Revenue from those on account of Loan Services.

From the Bank of New South Wales, statements of the amounts deposited by the Accountant for Railways on account of Revenue and Loan Services to the credit of the Colonial Treasurer.

The Chief Clerk of the Railway Department will also furnish the Traffic Auditor, as circumstances require, with copies of all minutes and authorities of the Commissioner for Railways relative to the sale by auction, or otherwise, of Railway Materials, Stores, &c., together with full particulars of the conditions of all such sales, and also, at the termination of each quarter, with a list of all fines that have been inflicted on Officers or Servants.

5. At the end of each calendar month, the Traffic Auditor will see that all station books and accounts are closed and balanced, and that abstracts of the month's traffic (under the several divisions of coaching and of goods traffic) *inwards* and *outwards*, are forwarded by the several Station-masters to the Audit Office, together with accounts current for coaching and for goods traffic.

6. The various Returns and Accounts, &c., before mentioned must, without delay, be carefully checked, compared, and adjusted in the Traffic Audit Office; after which the Traffic Ledgers and other records of the Audit Office must be written up therefrom.

7. The monthly Earnings for Traffic will be divided among the several Lines of Railways, in the Traffic Audit Office; the divisions to be calculated and apportioned according to a mileage rate. The Monthly Statement of such divisions of Earnings to be forwarded to the Accountant for Railways.

8. A General Monthly Balance Statement for the Traffic on the whole of the Government Railways, and also for the Revenue derived from other sources on account of Railways, is to be furnished by the Traffic Auditor to the Commissioner for Railways, as soon after the close of each month as may be possible, accompanied with such remarks as he may think necessary.

9. The Traffic Auditor will be required to certify the Monthly Attested Statement of Receipts prepared by the Accountant for the signature of the Commissioner for Railways, and transmission to the Auditor General.

10. The Traffic Auditor must see that all stations are visited either by himself or his officers, at least once a month, that the books and accounts of each are duly inspected, and that the balances of cash in hand are examined and compared with such books and accounts at such times.

11. Requisitions for tickets must be forwarded in the first instance to the Traffic Auditor, who will, after comparison with the books of his office, and on being satisfied that such supplies are actually required, transmit the same to the Chief Clerk of the Railway Department, or to such other officer as may be duly charged for the time being with the custody and issue of Railway tickets. Immediately after such requisitions have been fulfilled, the Chief Clerk or other proper officer will furnish the Traffic Auditor with a detailed statement of the tickets so furnished.

The Traffic Auditor must report at once to the Commissioner all irregularities, whether of remissness, inefficiency, or otherwise, in which the proper collection of and accounting for the Revenue may not appear to him to be properly provided for.

RAILWAY STORE ACCOUNTS.

1. The books and accounts of the Railway Storekeepers are also placed under the supervision of the Traffic Auditor, who will make the necessary arrangements for taking a complete inventory of all goods (not including rolling-stock) on hand at the Redfern and Newcastle Stores at the 30th June and 31st December respectively in each year.

2. The Storekeepers at Redfern and Newcastle will furnish to the Traffic Auditor, by the 20th of each month, abstracts of the previous month's Imports and Colonial Purchases, and of all goods otherwise received into Store. As early in the months of January, April, July, and October as practicable, they will also furnish to that officer, Balance sheets for the previous quarter, showing therein, under the several heads of account in their respective "Stock Ledgers," the value of Stores on hand at the beginning of the quarter, the value of goods received into and the value of goods issued out of Store during the quarter, and the value of the goods in hands at the end of the quarter. The Traffic Auditor will furnish the Storekeepers with the form of Balance sheets to be used in supplying such information.

3. Monthly abstracts of the quantities and values of Stores issued for consumption must be furnished by the Storekeepers on or before the 15th of every month to the Engineer-in-Chief, the Traffic Manager, and all other officers to whom Stores have been supplied. These officers will at once check, or cause to be checked, such monthly abstracts, and after the same have been duly verified, forward them, before the close of the month, to the Traffic Auditor. On receipt of such statements, the Traffic Auditor will examine the same, and apply such tests to the values of the issues therein shown as will, in his opinion, prevent any misappropriation of Stores, and secure the correct keeping of the Store Accounts at Redfern and Newcastle.

4. Monthly abstracts of all Imports and Payments for Colonial Purchases debited to the "Store Advance Account" in the books of the Head Office, will be furnished by the Accountant for Railways to the Traffic Auditor, on or before the 20th of the month following that for which such Abstracts are furnished. The Accountant will also furnish with the Abstracts for January, April, July, and October, quarterly Balance sheets of such "Store Advance Account," which must in every case agree with the books of his office.

5. Heads of Departments requiring Stores will, whenever practicable, order one month's supply at a time, so as to reduce the clerical duties of the Storekeepers as much as possible.

6. The Abstracts and Balance sheets above referred to are to be examined and adjusted in the Railway Audit Office, and a report on the state of the Store Accounts generally must be furnished by the Traffic Auditor to the Commissioner for Railways, as soon after the termination of every quarter as practicable.

No. 6.

TRIAL SURVEYS AND CHEAP RAILWAYS—NARROW GAUGE.

(A.)

The Engineer-in Chief for Railways to The Commissioner for Railways.

Department of Public Works,
 Railway Branch, Engineer's Office,
 Sydney, 28 August, 1867.

Sir,

I have the honor to lay before you the following Report on the Trial Surveys for the extension of the Southern Railway from Goulburn towards the Murrumbidgee River.

The Plans named below accompany this Report, viz. :—

PLANS.

- No. 1.—From Goulburn to the Cullarin Range, showing the direction of the proposed Railway by a *red full line*. Scale, 2 miles to an inch.
 No. 2.—From Cullarin Range to Bowning, the proposed Railway is shown by a *red full line*. Scale, 1 mile to an inch.
 No. 3.—From Bowning to Murrumburrah, the proposed Railway, *via* Binalong, Murrumburrah, &c., is shown by a *red full line*, and the Main Range deviation by a *blue line*. Scale, 2 miles to an inch.
 On this map is also shown a *green line*, joining the red and blue lines between Bowning and Bendemine, which can be adopted to form a junction with the Main Range deviation, should it be found advisable to abandon the red line beyond Bowning.
 No. 4.—A general map of the Colony, showing the line *via* Yass, Murrumburrah, &c., *in red*, and the Main Range deviation *in blue*. Scale, 16 miles to an inch.

SECTIONS.

- No. 5.—Section of proposed Railway from Goulburn to the Gap Inn, at Jerrawa, taken over the line shown on plans Nos. 1 and 2 *in red*.
 No. 6.—Section from the Gap Inn to a point about 7 miles beyond Binalong, and taken over the line shown on plans Nos. 2 and 3, *in red*.
 No. 7.—Section of the Main Range deviation, from a point near to Yass to (4) four miles beyond Moppitty Gap, being about 4 miles to the south-east of Young, taken over the line shown on plan No. 3, *in blue*.

The full lines show the traverses completed, and the dotted lines those now in progress.

The mileage of this extension commences at the Dog Trap Road, at Parramatta, near to the junction with the Western line, being 13½ miles from Sydney; if, therefore, the mileage be required from Sydney to any point on these extensions, 13½ miles must be added to the distances figured upon the plans or sections.

The trial surveys commence in the town of Goulburn, at the termination of Contract No. 7, at an elevation of 2,070 feet above the sea, and, crossing the Sloane-street on the level, proceed in a south-westerly direction, crossing the Run of Water Creek at 3 miles from Goulburn, and the Main Southern Road at 7½ miles from Goulburn; then crosses the first Breadalbane Plain, and the Main Southern Road at the entrance of the second Breadalbane Plain; thence running in a westerly direction, crosses the third Breadalbane Plain, and near the head of Mutbilly Creek, or Boorangullen Chain of Ponds, reaching the summit of the Cullarin Range, at an elevation of 2,338 feet above sea level, at a point 141 miles on the section.

The works on this length are of a light character, with no gradient steeper than 1 in 80; and, to avoid repetition, I may here say that it is not proposed to adopt, throughout the whole of these extensions, any curve of a less radius than 30 chains.

Winding round the Cullarin Range, the line crosses the Main Southern Road twice, and proceeding in a westerly direction, crosses Frankfield Creek, Lerida Creek or Fish River, the Main Southern Road at the east end of Gunning; thence in a south-westerly direction, crosses the Main Southern Road three times before reaching Oolong Creek; thence crossing Oolong Creek, the head of Sandy Creek, Jerrawa Creek, and the Main Southern Road at the Gap Range, follows generally the direction of the Old Yass Road over the Muntoonen Range, which is passed at an elevation of 2,185 feet above the level of the sea, and at a distance on the section of 168½ miles, and 48 miles from Goulburn.

From the Cullarin Range to this point the works are much heavier, and necessitate the adoption in several instances of inclines of 1 in 50.

The Cullarin Range is crossed by a tunnel of 440 yards in length, but this can be avoided by introducing a curve of 20 chains radius instead of 30 chains—the one now used—should it be considered advisable.

From the crossing of the Muntoonen Range the line follows the direction of the Old Yass Road, and at 175 miles forms a junction with the proposed Main Range deviation.

From this point, the line crosses Yellow Creek Road, the Main Southern Road at North Yass, Bango Creek, again crosses the Main Southern Road near to Yass, Derringullen Creek, Bowning Creek near to Bowning; thence following the direction of the road from Bowning to Binalong, crosses Dunderalligo and Illalong Creeks, and follows generally the direction of the road to Binalong, passing on the north side of Binalong and Mount Bobbara, reaches a point about midway between Mount Bobbara and Spring Creek, being a distance of 8 miles beyond Binalong, and 209 miles on the section, or 88½ miles from Goulburn.

From Muntoonen Range to the end of the section of the red line, the works are of a lighter character than those between the Cullarin Range and the Muntoonen Range.

Through the Muntoonen Range a deep cutting will be necessary, the extreme depth being 67 feet. This is the heaviest cutting on the line. The gradients throughout are good, the steepest being 1 in 50.

It is not proposed to carry the line so near to Yass as shown on plan No. 2; a deviation will be made at this place, to improve the direction of the line.

MAIN RANGE DEVIATION.

Blue line on Plan.

This deviation leaves the red line at 175 miles, near to Yass, and is shown on the plan by a *blue line*.

After crossing the Yellow Creek Road, Bango or Jones' Creek, Fairy Hole Creek, Derringullen Creek, Limestone Creek, Hassall's Creek, touching on the south side of the Boorowa River, the line follows the range dividing the tributaries to the Boorowa River and Jugiong Creek, in the direction of Nurong, crossing Berriwa Flat and Douglas Creeks, passes through Nurong; thence in a direct line, skirting the south side of the Main Range, crosses the head of Riley's Creek; thence along the range to Moppitty Gap.

The length of this deviation is 50 miles, and the distance from Goulburn is 104½ miles.

The whole of the works on this line are comparatively light, with the exception of a tunnel 792 yards in length through one of the spurs of the Main Range; the steepest gradient on this deviation being 1 in 50.

The traverses over the red and blue lines shown on the plans not having reached a common point, I cannot yet give an opinion as to which of the lines it would be desirable to adopt.

The works on both the lines (with the exception of the tunnel on the blue line) are much of the same character, and the cost of each line will be about the same per mile; but the blue line will be about 4 miles longer than the red line.

The sections from Goulburn to the Gap Range (42 miles) have been in my possession for some weeks, and the quantities of the earthworks on this length have been ascertained.

The sections of the remaining portions of this extension only reached me on the 20th instant, and I have therefore not had time to prepare an estimate of the cost; but judging from the works required on the first 42 miles, I have no doubt that either of the lines could be constructed in the most substantial manner for £10,000 a mile.

No. 6—*continued.*

SUMMARY OF DISTANCES.

<i>Red line.</i>		Miles.
From Goulburn to the junction with Main Range deviation		54½
From the Junction to the end of the section beyond Binalong		34
Total length of red line		88½
<i>Blue line.</i>		Miles.
From Goulburn to the Junction with Main Range deviation, as before stated		54½
From the Junction with the red line to Moppity Gap.....		50
Total length from Goulburn		104½

The following table shows the height of the proposed line of Railway above sea level at the various places named therein, viz. :—

Goulburn	2,070	feet above sea level.
Cullarin Range	2,388	do.
Fish River	1,908	do.
Gunning	1,862	do.
Mundoonen Range	2,185	do.
Yass	1,598	do.
Bowning	1,778	do.
Binalong	1,569	do.

I have, &c.,
JOHN WHITTON.

(B.)

PROPOSED EXTENSION OF THE GREAT SOUTHERN RAILWAY FROM GOULBURN TO ALBURY.

Engineer-in-Chief to Commissioner.

10 July, 1869.

I DESIRE to draw the Commissioner's attention to a proposition made by the Government of Victoria, for the construction of a Railway direct from Melbourne to Albury, to be called the North-eastern Railway.

The distance from Melbourne to Albury by the proposed route is 186 miles, leaving a gap of 230 miles only between Albury and Goulburn.

My object in calling the Commissioner's attention to this matter is to suggest the immense advantages which would accrue to this Colony if the Southern Railway were carried on to Albury to meet the Railway from Victoria.

The total distance (Sydney to Melbourne) would be about 520 miles, which, by express trains, could be easily run in 20 hours, and the mails between the two cities could be delivered in 24 hours.

The country between Goulburn and the Murrumbidgee is not a difficult one, but I have no surveys between the latter place and Albury, but I understand there are no engineering difficulties.

I have no doubt the whole distance between Goulburn and Albury (230 miles) could be constructed in the same substantial manner as the present lines, including all rolling-stock and stations, for two millions and a half; and if the contracts were taken for the entire distance simultaneously, the line might be open for traffic in five years from the present time.

There is only one matter which would be at all likely to delay the opening of the line beyond the time I have named,—the difficulty in procuring labour, but this I think might be overcome by a judicious system of immigration.

By the construction of this line one of the finest districts in the Colony would be opened for the settlement of a large agricultural population.

JOHN WHITTON.

(C.)

MEMORANDA for the Honorable the Minister for Public Works, of the progress, &c., made with the trial surveys of the proposed Extensions of the Southern, Western, and Northern Railways.

GREAT SOUTHERN RAILWAY.

Proposed Extension—Goulburn to Yass.

The whole of the trial surveys and sections on the proposed extension of the Great Southern Railway from Goulburn to Yass are completed.

Deviations have been made in this line since it was submitted to Parliament in the Session of 1867-8, which will shorten the length between 3 and 4 miles. Estimates of the probable cost are now being prepared.

The general course of the line, with the exception of the slight deviations already named, will be the same as that originally laid out, viz., from Goulburn *via* Bredalbane Plains, Gunning, and the Old Gap Range to Yass.

No engineering difficulties occur, and the tunnel, as originally proposed, through the Cullarin range will be avoided.

The total length of the line, from Goulburn to Yass, will be 54 miles.

GREAT NORTHERN RAILWAY.

Proposed Extension—Murrurundi to Tamworth.

GOOD progress has been made with the trial surveys on this proposed extension from Murrurundi to Tamworth. The country has been explored between these two places in two directions,—one from Murrurundi, *via* Wallabadah, Goonoo Goonoo, &c., to Tamworth, and the other from Murrurundi to Tamworth, *via* Quirindi, Currabubula, &c.

The latter being apparently the most favourable, it is being surveyed with all possible dispatch, and will probably be finished in September next.

From the trial sections already taken I apprehend no engineering difficulties.

The surveys not being sufficiently advanced, I cannot obtain the exact length of the proposed extension, but it will probably be about 56 miles.

GREAT WESTERN RAILWAY.

Proposed Extension—Bathurst to Orange.

CONSIDERABLE progress has been made with the trial surveys on this extension from Bathurst to Orange, and will probably be completed early next month.

The route of the proposed line now being surveyed will be from the terminus at Bathurst, *via* the townships of Grantham, Galbraith, Blaney, Guyong, and Shadforth, to Orange.

No engineering difficulties occur, and the total length of the line will be 44 miles.

From the information now in my possession, I anticipate the average cost of the whole of these extensions will not exceed £10,000 per mile.

JOHN WHITTON.

No. 6—continued.

(D.)

The Engineer-in-Chief to The Commissioner.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 26 April, 1870.

Minute Paper.—Proposed Extensions beyond Goulburn, Bathurst, and Murrurundi.

WITH a view of preparing careful estimates of the proposed extensions of the Railway from Goulburn, Bathurst, and Murrurundi, I propose to send out a competent staff (so far as the present balance on the Trial Survey Vote will permit) to improve the original trial surveys, so that most reliable information can be given as to the exact cost of each extension. I propose to commence with the Southern Railway, from Goulburn to Yass, and to prepare estimates for the gauges of 4 feet 8½ inches, 3 feet, and 2 feet; to reduce the width of formation in cuttings, for the gauge of 4 feet 8½ inches, from 18 feet (the width of the present lines) to 12 feet; to adopt curves of 20 chains radius, and inclines of 1 in 40 where any saving can be effected in earth-works, to reduce the depth of ballast, and to shorten the sleepers to 8 feet.

I propose to use rails of 75 lbs. per yard, the same as at present, but to dispense with the chairs (which will effect a saving of about £300 a mile), to have sleepers of an inferior quality to those now in use, and to construct as far as practicable the bridges and culverts of timber; to erect timber stations and timber platforms, and to reduce the cost of construction by every possible means.

For the gauge of 3 feet, I propose to have a formation width in cuttings of 10 feet, and to use a rail without chairs of 60 lbs. to the yard.

For the gauge of 2 feet, I propose a formation width of 9 feet, and to adopt a rail of 50 lbs. to the yard.

As little is known by this department of the country between Wagga Wagga and Albury, I think it would be advisable to have a trial section taken through that district, so as to complete the trial surveys to the boundary of this Colony.

If the Commissioner approve of this suggestion, I will despatch the surveyors in the early part of next month.

JOHN WHITTON.

Approved—J.S., 26/4/70.

(E.)

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 4 August, 1870.

Memoranda to Mr. Mason.

ACTING upon instructions I have received from the Honorable the Minister for Public Works, I have to direct Mr. Mason to make immediate arrangements for leaving Sydney and taking charge of the trial surveys between Wagga Wagga and Albury.

Mr. Mason's first duty will be to explore the country and determine upon a line to be surveyed and levelled. This must be done before any surveyors are sent into the field; and on Mr. Mason reporting to me that the exploration of this length is completed, I will send up a staff of surveyors to proceed with the work.

Having completed the examination of this portion of the line, Mr. Mason must connect it, at the most convenient point, with the former trial survey which was made from Goulburn to the Murrumbidgee, and also examine the whole of the country through which this survey was made, as far north as Yass, with a view to improving the section. This length will also have to be relevelled after the necessary deviations have been decided upon.

The plans to be plotted to a scale of 10 chains to an inch, and the sections to scales of 10 chains to an inch and 100 feet.

The flood-levels to be accurately ascertained, and every inquiry made as to the quality of the timber in the neighbourhood, its suitability for Railway purposes, and cost; similar information must be obtained with reference to stone, bricks, and ballast.

Progress Reports to be forwarded fortnightly to this office.

JOHN WHITTON.

It is not necessary to continue this survey; years may elapse before any steps can be taken for the construction of a Railway in the locality where the Assistant Engineer and his party are employed; the Engineer-in-Chief for Railways will be good enough to withdraw the whole staff off this work immediately.—J.B., 23/12/70.

I presume, from the Commissioner's minute, that all trial surveys are to be at once stopped. If this is so, it will be my painful duty to have to recommend that notice be given to the following gentlemen that their services will not be required after the 31st January, 1871:—

Mr. Melrose,
Mr. Mann,
Mr. Palmer,
Mr. Francis,
Mr. Jamieson,
Mr. Kennedy.

J.W., 28/12/70.

This is the intention of the Government at present.—J.B., 3/12/70.

(F.)

The Engineer-in-Chief to The Commissioner.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 5 August, 1870.

Minute Paper.—Proposed Extensions of Southern, Western, and Northern Railways.

WITH reference to the proposed change of gauge for the extensions beyond Goulburn, Bathurst, and Murrurundi, I must express my decided opinion that any reduction would be attended with the most serious inconvenience, and cause great loss to the revenue.

It has been assumed that a very large traffic on all the lines will be derived from the carriage of live stock; and, setting aside the difficulty of changing wild cattle wherever the difference of gauge may exist, I assert that no traffic of this description can be carried economically on a less gauge than 4 ft. 8½ in., and on a 2-ft. gauge it would be impossible to conduct such a traffic with safety.

It has been asserted by the advocates of the narrow gauges (3 ft. 6 in. and 2 ft.) that a 40-lb. rail can be used on such lines, and thus a great reduction on first cost of construction can be effected.

To this I say, that a rail weighing only 40 lbs. to the yard is utterly useless on any gauge where locomotives are employed.

The Cawnpore and Lucknow Branch Railway in India was laid with rails weighing 40 lbs. to the yard, with a gauge of 5 ft. 6 in., and was worked by locomotives; and although the traffic was light, the rails failed within twelve months of the opening of the line.

Many other examples could no doubt be found to show that what is termed a cheap Railway is always the most costly, as the extra cost of working and maintenance is, by the advocates of this system, left entirely out of the calculation.

From M. Higinbotham's Report to the Commissioner of Railways in Victoria, on the subject of Railway Extension, I have taken the subjoined particulars, showing the estimated cost of the North-eastern Railway of that Colony, as compared with the cheapest known lines in the United Kingdom.

No. 6—continued.

" I propose to take each of these cases, for the purpose of showing what each line would have cost if constructed by labour paid at Victorian rates ; and, with a desire to understate rather than overstate the case that I am laying before you, I will assume that the price of labour here is one and a half times higher than in England and Scotland, and only twice as high as in Ireland. I will assume also that the weight of the rails on each line is the same as I propose for the North-eastern Railway—viz., 72 lbs. to the yard—this latter assumption being the least favourable that I can make for the purpose of my argument. You will observe that I have made allowance in the following calculations for the higher price paid for land in the United Kingdom than here, and also for the parliamentary and law expenses incurred there.

" Great Northern and Western Railway of Ireland.

" Cost per mile in Ireland.		Cost per mile in Victoria.	
	£		£
" Permanent-way materials	1,106	+ 25 per cent. for freight, &c.....	1,382
Ballast	629	× 2 for difference in labour	1,258
Sleepers	462	Same here	462

Parliamentary and law expenses	50	Nil
	<u>£5,000</u>		<u>£6,054½</u>

No. 6—*continued.*

It will be seen, however, that the rate of wages in the Colonies assumed by Mr. Higinbotham, with a view of not overstating his case, is considerably less than the actual difference known to exist; but even with the rates he has taken, the railways which are proposed to be constructed in the Colonies bear very favourable comparison with the cheap lines stated to have been constructed in the United Kingdom.

I have no hesitation in saying that thoroughly good lines on the 4 ft. 8½ in. gauge, with rails 70 lbs. to the yard, can be constructed to Yass, Orange, and Tamworth, for about £7,000 per mile.

Since preparing my last estimate, which amounted to £8,000 a mile, I have had additional trial sections taken, and I find that the earthworks shown on the original section can be considerably reduced by alterations in the direction of the lines.

As these revised trial surveys are still in progress, I am not yet able to forward a detailed estimate of the cost of these extensions.

JOHN WHITTON.

(G.)

Department of Public Works,
Sydney, 20 September, 1870.

HAS the Engineer-in-Chief for Railways obtained sufficient information as to the extension of the lines from Goulburn to Yass, from Bathurst to Orange, and from Murrurundi to Tamworth, to enable him to state at what rate per mile these extensions can be constructed if they are to be worked by locomotive engines?

JOHN SUTHERLAND.

Mr. Whitton, B.C., 23/9/70.—J.R.

The revised trial sections are not yet completed, but from the reports of the different surveyors I anticipate that the earthwork will be reduced nearly one-half; other works, tunnels, and bridges will also be modified, and a saving be made in their construction. I consider that a good permanent way is absolutely essential for the public safety, and I therefore propose to use a steel rail, 70 lbs. to the yard (single-headed); sapling-sleepers, to reduce first cost, might be used, also a smaller quantity of ballast than that laid on the existing lines. The fencing might be erected with any description of timber the district would afford, and wooden station-buildings, platforms, &c., be erected in the first instance. If these suggestions be adopted, and all the bridges and culverts be constructed in the most economical manner with the timber in the district through which the lines pass, I believe a good railway for locomotive purposes may be made for £7,000 per mile.—J.W., 26/9/70.

Commissioner, 26/9/70.

Cabinet.—J.S., 27/9/70.

Sum placed on Estimates for extensions in accordance with this Estimate.—J.S., 8/10/70.

(H.)

RAILWAYS.—REPORT FROM ENGINEER-IN-CHIEF, WITH DETAILED ESTIMATE OF EXTENSIONS TO YASS AND ORANGE.

The Engineer-in-Chief to The Commissioner for Railways.

Department of Public Works,
Railway Branch,
Engineer's Office, Sydney, 8 February, 1871.

Sir,

Referring to my previous reports on the cost of the proposed extensions from Goulburn to Yass, Bathurst to Orange, and Murrurundi to Tamworth, I have now the honor to lay before you a detailed estimate of the cost of the lines to Yass and to Orange; and although the surveys of the extension to Tamworth were stopped before the revised surveys were completed, sufficient was done to justify me in stating that the extension from Murrurundi to Tamworth will not cost more than the extensions to Yass and to Orange. I therefore propose to give detailed estimates of the two extensions last named.

Extension from Goulburn to Yass.

On leaving the Goulburn station, the line almost immediately crosses Sloane-street, and for about a mile runs parallel with the road to Braidwood, then follows for a short distance the course of the Mulwarree Ponds, and taking a westerly direction, follows generally the course of the Main Southern Road, across the first, second, and third Breadalbane Plains, and near the head of Mutbilly Creek or Boorangullen Chain of Ponds, reaching the summit of the Cullarin Range at an elevation of 2,388 feet above sea-level, at a distance of 21 miles from Goulburn and 155 miles from Sydney.

Winding round the Cullarin Range, on the north side, the line again approaches the Southern Road, running nearly parallel with it, still keeping on the north side from 150 miles to 163 miles, passing at 161 miles about half a mile to the north of Frankfield Inn, and crossing the Fish River at 162½ miles, about 5 chains on the north side of the Main Southern Road.

The line now diverges to the north of Gunning Hill, and crossing Gunning Creek, passes about a quarter of a mile to the north of the town of Gunning, and then follows the course of the Southern Road up to 167 miles from Sydney.

From this point the line takes a more northerly direction, crossing Four-mile Creek, Oolong Creek, Sandy Creek, Jerrawa Creek nearly at its junction with Catherine Creek, and reaches the summit of Muddoonen Range at an elevation of 2,225 feet above sea-level, and at a distance of 180 miles from Sydney, or 46 miles from Goulburn.

From this point the line descends by tolerably easy gradients to a point about 190 miles from Sydney, on the Main Southern Road, about 2 miles on the north-west side of North Yass, crossing, in its course, Manton's Creek, Yellow Creek, and Bango Creek.

At that point, 190 miles from Sydney, I propose to erect a station for North and South Yass, as it would be impossible to take the railway through those towns without great cost and a considerable increase in the length of the line.

The earthworks on this length are light, and there are no bridges of importance.

The steepest gradient is 1 in 40, and the smallest radius of a curve is 20 chains.

The quantities for all the works have been most carefully taken out, and I am satisfied this extension can be completed for the amounts stated in the following detailed estimate, which shows an average cost of £6,786 5s. 4d. per mile.

Extension from Goulburn to Yass—Length 56 miles and 4 chains.

	£	s.	d.
Earthwork	110,473	5	6
Culverts	14,186	10	0
Brickwork in bridges	6,636	15	0
Timber bridges and flood-openings	14,674	8	0
Fencing	10,770	0	0
Level-crossings, gates, and gate-houses	2,400	0	0
Occupation level-crossings and gates	5,376	0	0
Permanent way, laid and ballasted complete, including all materials	168,150	0	0
Do. do. do. for sidings at stations	7,500	0	0
Station-buildings, platforms, &c. (including water-supply)	15,000	0	0
Engineering and supervision	16,800	0	0
Land	8,064	0	0
	<u>£380,030</u>	<u>18</u>	<u>6</u>

At the rate of £6,786 5s. 4d. per mile.

No. 6—continued.

Extension from Bathurst to Orange.

This extension commences at a point 144 miles 45 chains from Sydney, near to Mutton's Creek, and a short distance on the south-east side of the proposed station in the city of Bathurst.

For a distance of about 4 miles the line follows generally the direction of the Vale Road, passing to the west of the Hen and Chickens Inn; then diverging to the west, crosses a number of small spurs of the range between the Carcoar and Caloola Roads; closely approaches the Teapot Swamp Road, which it follows, and crosses several times for a distance of 7 miles, reaching the main range at Fitzgerald's Mount, at an elevation of 3,021 feet above sea level, and at a distance of 162 miles from Sydney and 17 miles from Bathurst.

After passing Fitzgerald's Mount, the line runs in a southerly direction for a distance of a little more than a mile, when it takes a north-westerly direction, crossing the road from Bathurst to Carcoar, at 170 miles from Sydney; then Dungeon Creek, King's Plains, the main road from Bathurst to Orange, at 175½ miles, the Pretty Plains at 180½ miles, then Gosling Creek, and terminates in the town of Orange, at 191 miles from Sydney, and 41½ miles from Bathurst.

The section accompanying this report has been taken over the red line on plan of second trial survey, but the alternative line shown in blue for about 5 miles from Orange is the line I propose to adopt, and which terminates in a Government reserve on the south side of the town.

The earthworks on this extension are light, and there are no bridges of importance, nor a single tunnel.

The steepest gradient is 1 in 40, and with the exception of one curve of 16 chains radius at Fitzgerald's Mount, there is no other curve on any part of the line of a less radius than 20 chains.

The quantities of all the works have been most carefully taken out, and they can be completed in the most substantial manner for the amounts stated in the subjoined estimate.

Extension from Bathurst to Orange—Length 46 miles and 35 chains—

	£	s.	d.
Earthworks	108,759	6	6
Culverts	9,421	11	0
Bridges and flood-openings	11,335	14	8
Fencing	9,000	0	0
Level-crossings, gates and gate-houses	6,880	0	0
Permanent way, laid and ballasted complete, including all materials	139,500	0	0
Do. do. for sidings.....	6,000	0	0
Station buildings and platforms (including water supply)	10,000	0	0
Engineering and supervision	14,000	0	0
Land.....	6,696	0	0
	£321,592	12	2

At the rate of £6,915 19s. 4d. per mile.

These estimates are based on the assumption that steel rails will be used, weighing 70 lbs. to the yard; but should it be deemed advisable to use the ordinary wrought-iron rails of the same weight, the cost would be reduced by about £220 per mile. Should it be considered desirable to use lighter engines on these extensions, and to travel at a reduced speed, a wrought-iron rail weighing 60 lbs. to the yard might be used, which would reduce the present estimates by about £550 per mile.

The estimate for each line would therefore be as under:—

Comparative cost of Extensions, with the undermentioned weight of rail:—

	Steel Rails, 70 lbs. per yard.	Iron Rails. 70 lbs. per yard.	Iron Rails. 60 lbs. per yard.
	£	£	£
Goulburn to Yass	6,786	6,566	6,236
Bathurst to Orange	6,916	6,696	6,366

For the Southern Railway I would recommend the adoption of the heavier rail, as this line will at no distant day be the great highway to Melbourne, and speed will then be a matter of considerable importance.

The sleepers are to be the best the district will afford.

The fencing to have two rails only, and to be formed of saplings if other suitable timber be not obtainable in the district.

The stations, platforms, and gate-houses, to be of timber throughout, and constructed in the most economical manner possible.

From the detailed estimates it will be seen that the earthworks, bridges, and culverts cost nearly £3,000 per mile, or about the same as the cost of the permanent way with steel rails 70 lbs. to the yard; therefore, in a tolerably level country, where few culverts and bridges would be required, and where the earthworks would only amount to what is technically called "forming," the cost of a railway would be considerably below the amount stated in my estimate.

For branch railways, or feeders to the main line, rails 60 lbs. to the yard might be laid down, and worked by locomotive engines; but if such feeders be worked by horses, a rail weighing 40 lbs. to the yard might be adopted.

It is true that engines are now running on rails of 40 lbs. to the yard, but I am satisfied that there is no economy in using light rails where locomotives are employed.

A permanent way with 60-lb. rails might be constructed for about £2,450 per mile, including laying, ballasting, and sleepers, and with a 40-lb. rail, for about £2,050 per mile.

I stated in my report, dated 5th August, 1870, that on the Lucknow and Cawnpore Railway in India rails 40 lbs. to the yard had been laid down, and the line worked by locomotives, but that these rails failed within twelve months of the opening of the line.

The Melbourne and Hobson's Bay Railway was laid, in the first instance, with rails weighing 55 lbs. per yard. The weight of the engines used on this line was under 25 tons, yet these rails failed in less than three years.

The line was relaid about fourteen years ago with rails weighing 75 lbs. per yard, and these were a year ago in good order.

The St. Kilda branch of the Hobson's Bay Railway was laid in 1857 with rails weighing 55 lbs. to the yard, on longitudinal sleepers, yet in less than two years these rails had to be taken up, and the line was relaid with rails weighing 75 lbs. and 80 lbs. per yard, which a year ago were in good condition.

I strongly advise that the standard gauge of 4 ft. 8½ in. be maintained throughout the whole railway system in this Colony, as the difference between the gauge and 3 ft. 6 in. is too small (14½ in.) to justify a break of gauge with all its attendant inconveniences.

I am aware that a gauge of 3 ft. 6 in. has been recommended for branch lines in India, but it must not be forgotten that the standard gauge of India, is 5 ft. 6 in. and I have little doubt that had the 4 ft. 8½ in. gauge been laid down originally on the Indian lines, no break of gauge would have been sanctioned.

The plans and sections of the second trial surveys of the extensions from Bathurst to Orange, and from Goulburn to Yass, on which these estimates are based, accompany this report.

I also append a table of the gradients and heights on each line.

I have, &c.,
JOHN WHITTON.

(L.)

Minute from the Engineer-in-Chief to The Commissioner.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 24 January, 1872.

Subject :—Revised Estimates for proposed Extensions to Yass, Orange, and Tamworth.

WITH reference to the Commissioner's verbal instructions relative to the cost of the proposed Railway Extensions from Goulburn to Yass, Bathurst to Orange, and Murrurundi to Tamworth, I have the honor to forward a revised Estimate of the cost of the Extension from Goulburn to Yass, with a view to greater economy in the first cost of construction.

My former Estimate, dated 8th February, 1871, included brickwork in culverts and viaducts, a steel rail of 70 lbs. per yard, gate-houses for public road, level crossings, and land.

I propose now to reduce the formation width of cuttings and embankments to 15 feet; to lay down an iron rail of 60 lbs. per yard; to dispense with brickwork in culverts and bridges and use timber only, such as the district will afford; to dispense with all gate-houses and gates at public road level crossings; to use bottom ballast only (such material as may be found in the district); the boxing-up the sleepers with ballast to be performed afterwards.

The sleepers to be 8 feet long instead of 9 feet, to be cut out of saplings or split from large trees as may be found most economical. The whole of the fencing to have two rails only, and to be formed of saplings, or any other timber which may be found in the district.

The cost of land I have not included, but probably it would be about £150 per mile.

The steepest incline to be 1 in 40, and the smallest radius of a curve 19 chains.

EXTENSION FROM GOULBURN TO YASS.

Length, 56 miles.

Earthwork	£	s.	d.
Earthwork	100,411	7	0
Timber culverts	11,200	0	0
Timber bridges and flood openings	16,800	0	0
Fencing	5,376	0	0
Public road level crossings	240	0	0
Occupation level crossings and gates	3,360	0	0
Permanent way	133,616	0	0
Do. for sidings at stations	4,772	0	0
Station buildings, platforms, &c., including water supply	12,500	0	0
Engineering and supervision	14,000	0	0
	£302,275	7	0

At the rate of £5,397 15s. 6d. per mile.

Similar reductions can be made in the cost of the Extensions to Orange and Tamworth if a similar mode of construction be adopted.

This Estimate may be further reduced by using a rail of 40 lbs. to the yard, but this would necessitate new locomotive stock, as a rail of that weight would not carry the present engines.

I do not, however, advise the use of a 40 lb. rail, or any rail below 75 lbs. per yard, if of iron, as extreme cheapness in construction means a heavy charge upon revenue for maintenance.

JOHN WHITTON.

No. 6—continued.

(K.)

Minute from the Engineer-in-Chief to The Commissioner.

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 19 June, 1872.*Subject* :—Revised Estimates for proposed Extensions to Yass, Orange, and Tamworth.

In submitting the revised Estimates of the Extensions from Goulburn to Yass, Bathurst to Orange, and Murrurundi to Tamworth, I have to call attention to my memorandum of 24th January, 1872, in which I explained in detail the alterations I proposed to make, with a view to greater economy in first cost of construction.

In that report I proposed to reduce the formation width of cuttings and embankments to 15 feet, instead of 18 feet; to have iron rails 60 lbs. to the yard, instead of steel rails 70 lbs. to the yard; to dispense in a great measure with brickwork in culverts and bridges, using timber only; to dispense with all gate-houses and gates at public road level crossings; to use bottom ballast only, and to box up the road after the line had been opened for traffic, and the cost charged to working expenses.

The sleepers to be 8 feet long instead of 9 feet, to be cut out of saplings or split from large trees, as may be found most economical.

To have two rails only for the fencing, which is to be formed of saplings or any other timber which may be found in the district.

The cost of land I did not include, but probably it will be about £150 per mile.

With the alterations above suggested, the line from Goulburn to Yass might be opened for £5,397 a mile; from Bathurst to Orange for £5,743 6s. 8d. per mile.

The revised sections from Murrurundi to Tamworth have not been completed, in consequence of the services of the surveyors having been dispensed with, but I have no doubt this length could be constructed for about £5,500 per mile.

I have always held the opinion that the Southern line should be extended to Albury as a first-class line, as it will at no distant day become an important through line to Melbourne, upon which speed will be a matter of the greatest importance; and although I have prepared estimates for an inferior line from Goulburn to Yass (in accordance with the wishes of the late Commissioner), I strongly advise that a first-class line be constructed, which may be done (as some portion of this length is through very easy country) at a cost of about £7,000 per mile.

I wish it to be distinctly understood that what is generally considered an extraordinarily cheap line in the first cost of construction is not in reality a cheap line to the Country, as whatever is left deficient in the first cost of construction must of necessity be made good at the expense of revenue, if the lives of the public are to be properly protected.

The inferior lines which I propose to construct to Orange and to Tamworth will be perfectly safe at a speed of 20 miles an hour, as the only difference I intend to make between these and the first-class line I propose to Albury or Wagga Wagga is in the ballast, sleepers, and weight of rail.

I think it right to observe that, since these estimates were prepared, a considerable rise has taken place in the price of iron, amounting to between two and three pounds per ton; and should this increase continue, or should the price further increase, these estimates will to that extent be also increased.

The price of labour has also increased, in consequence of the mining operations now being carried on in the Colonies; and I fear, unless very large importations of the labouring classes take place, the progress of railway works will be unsatisfactory.

If the Southern line be constructed, as I have recommended, as a first-class line, and the extensions to Orange and Tamworth as second-class lines, the estimate will be as under, viz. :—

Goulburn to Yass, 56 miles, @ £7,000	£392,000
Bathurst to Orange, 46½ miles	
Murrurundi to Tamworth, 59 do.	
105½ miles, @ £6,000	633,000
Kelso to Bathurst	60,000
Total	<u>£1,085,000</u>

JOHN WHITTON.

(L.)

FESTINIÖG RAILWAY SYSTEM.

The Secretary of State for the Colonies to The Officer administering the Government of New South Wales.

(Circular.)

Downing-street,
10 April, 1871.

My Lord,

I have the honor to transmit to you a report by Mr. Guilford L. Molesworth, Director-General of the Ceylon Railway, upon the Festiniog Railway system.

Mr. Molesworth's high reputation as an Engineer renders the information contained in this report very valuable to Governments or individuals interested in the construction of cheap railways.

I have, &c.,
KIMBERLEY.

Copy of a Letter from Guilford L. Molesworth, Esq., Director of Public Works, Ceylon, to the Right Honorable the Secretary of State for the Colonies.

London, 24 March, 1871.

My Lord,

In accordance with the suggestions of Sir James Elphinstone, I have visited the Festiniog Railway, and have now the honor of laying before you my views respecting it.

I have already reported at some length to the Government of Ceylon on the subject of light railways; and, as my visit to Festiniog has not materially altered the opinions I then expressed, my report will, to a great extent, consist of a repetition of those views.

The Festiniog line was originally opened as a horse tramway or railway, for the purpose of connecting a large group of slate quarries with Portmadoc, the nearest harbour. The length of the line is about 13¼ miles, with a branch of a mile in length, making a total of about 14¼ miles. It passes through a rough country, but the curves enable it in most parts to keep tolerably close to the contour of the hills, and to avoid heavy works, except here and there; there are however two tunnels unlined of 60 and 700 yards respectively, and some heavy rock cuttings and embankments. The terminus of the main line is about 800 feet above the level of the sea; the average gradient is about 1 in 90, and the maximum gradient (with the exception of a short and unimportant portion at the top) is about 1 in 80; practically, the line may be said to consist of one continuous descending gradient of 1 in 90 for 12¼ miles, with about a mile of level at the end nearest to the shipping port. The traffic on the railway is about 140,000 tons annually, of which about 90 per cent. is slate, the rest almost entirely of coal and lime. There is also a passenger traffic of about 90,000 or 100,000 passengers per annum, chiefly composed of workmen or others connected with the slate quarries.

No. 6—continued.

The line was for thirty years worked by horses, which drew the empty trucks up the gradient, and were themselves in their turn brought down with the loaded train, in trucks specially constructed to carry them, as the gradient is sufficient to enable the loaded trains to descend by their own weight without any motive power.

About the year 1863 the use of horses was abandoned, and a sum of £50,000 was expended out of the revenue of the railway in improving it, and rendering it suitable for locomotives.

The total cost of the line is said to have been about £87,000, including the cost of rolling stock, or about £6,000 per mile.

The land through which the line passes is comparatively valueless, and the railway has been free from the ruinous expenses of a Parliamentary opposition, which have added so much to the burden of the majority of English lines.

The railway is a single line, with a gauge of 2 feet, and with crossing sidings about 16 or 18 chains long at intervals.

The sharpest curves are $1\frac{1}{2}$ chain, or 115 feet radius.

The formation width is 8 feet in cutting and 10 feet in embankment. The fencing is chiefly of dry stone walling, for which the natural cleavage of the rock (in laminated strata with fine beds) offers great facilities.

The culverts and smaller works are also of dry masonry, but the masonry of the bridges and larger works is set in mortar. The natural cleavage being favourable for the construction of cheap masonry, and indeed in many cases walling has been adopted for the retention of the embankments in preference to the adoption of slopes.

The permanent way is formed of double-headed rails, weighing 48 lbs. to the yard, fished and laid with cast-iron chairs on transverse sleepers, 9 inches by $4\frac{1}{2}$ inches, and 4 feet 6 inches long. The distance of the sleepers is 3 feet apart, but less at the joints.

The rolling stock is of a very simple character. The buffers are central, and about 1 foot 8 inches above the level of the rails. The coupling is also central; the wheels are 1 foot 6 inches diameter, with journals about 4 inches long, working in white metal bearings. The wheels are of cast-iron, with wrought-iron tires, and there are also some wrought-iron wheels, but these are faulty in design.

The trucks weigh about 1 ton each, the greater number being designed with open-barred sides for slates; they have a wheel base of about 3 feet, and a capacity of about 45 cubic feet; they have no springs, and the brackets carrying the bearings for the journals are of cast iron, bolted on to the frames.

The carriages are built by Messrs. Brown, Marshall, & Co., and are well and substantially made; they have a wheel base of about 5 feet 6 inches, and are furnished with central spring buffers, springs, and axle-boxes, working in axle-guards in the usual manner. The passengers sit back to back, with their sides in the direction of the line; and the flooring of the carriages overhanging the wheels is within a few inches of the level of the rails.

The internal dimensions of the carriages are about 10 feet long by 6 feet 3 inches wide; they weigh about $1\frac{1}{2}$ ton, and are intended to carry twelve first class, or fourteen second and third class, passengers, giving a width of 1 foot 8 inches for first class, and 1 foot 5 inches for second and third class passengers.

There are two classes of engines employed for working the line—

1. Single locomotives, with 4 coupled wheels of 2 feet diameter, $8\frac{1}{2}$ -inch cylinders, 12-inch stroke, 5-foot wheel base, and about 10 tons weight.

A double bogie engine on Mr. Fairlie's principle, with 4 cylinders, each $8\frac{3}{8}$ inches diameter, and two sets of 4-inch coupled wheels, 2 feet 4 inches diameter; stroke, 13 inches; wheel base of each bogie, 5 feet; total wheel base, 19 feet; pressure of steam, 160 lbs. per square inch; total weight of engine, $19\frac{1}{2}$ tons.

The latter was not working when I visited the railway. The single engines are capable of taking a load of about forty-five empty trucks, with break-van, and three or four passenger carriages (or a total load of from 50 to 60 tons up the line. There are no stations to speak of, and no platforms are required for the carriages, the wayside stations consisting merely of a crossing, siding, and a hut, to serve as booking-office and waiting-room.

The slates are loaded at the quarries and unloaded at the port by agents of the respective quarries, and not by the Company's servants.

The description above given comprises the leading features and details of this interesting little railway, which reflects great credit upon all concerned in it, and shows what it is possible to do on so narrow a gauge. The plan of central buffing and coupling is one that has long been considered a desideratum with engineers, but there has been a difficulty in introducing it on English railways without confusion and considerable expense. I consider it a great improvement on the system of double buffers, especially on a railway abounding in curves.

An attempt has been made, by the publication of a series of plausible letters in the *Times*, about the beginning of last year, to give to lines of this character an undue importance. These letters, though useful in calling attention to the subject, have exercised a somewhat mischievous influence, by giving a fictitious colour to facts which need no such misrepresentations to commend themselves; and as this influence has been wide-spread, it becomes necessary that the true facts of the case should be known.

The advantages thus claimed for the Festiniog Railway may be briefly summed up as follows:—

1. Its working expenses are only $44\frac{1}{2}$ per cent. of its receipts, whereas in English lines of ordinary gauge they average 48 per cent.

2. It yields an interest of $29\frac{1}{2}$ per cent. on the original capital, whereas ordinary lines yield only from 6 per cent. to *nil*.

3. The dead load on the Festiniog Railway is only one-third of the weight carried, whilst on the ordinary gauge the dead weight for similar freights is more than half the weight of the freight.

4. On the English lines of ordinary gauge the dead load carried for each passenger is a ton, or even more, whilst on the Festiniog system it may be reduced to 5 cwt.

5. The exceptionally narrow gauge effects a very large saving in first construction.

6. The loads being comparatively light, there is an immense saving in wear and tear.

These conclusions, though apparently based on statistics, were so much at variance with the results of my own experience that before I could adopt them I deemed it necessary to analyze the facts carefully, to ascertain whether there were any exceptional circumstances connected with the Festiniog Railway, or whether the advantages above claimed were wholly and solely due to the adoption of the 2-foot gauge. The first point which struck my attention was the fact that, notwithstanding the advantages claimed for the system, the expenditure per train mile was nearly double that of the average of English railways, and more than three times as much as that of some of the Irish railways, on which the rates of labour would probably more nearly resemble those of a remote Welsh district like Festiniog. The features that appear to be chiefly exceptional on the Festiniog Railway are—

That the traffic almost exclusively consists of slates; that the rate charged for freight is at least double the rates of ordinary railways;—

That the traffic is almost entirely down hill, on easy gradients requiring power for little more than the haulage of the empty trucks back again, and that this circumstance has enabled the traffic to be worked with remunerative result by horses alone.

Now let us see how these facts affect a comparison with English trains of the ordinary gauge.

I will take the advantages claimed for the Festiniog Railway *seriatim* in the order in which I have given them above.

1. The working expenses are stated to be $44\frac{1}{2}$ per cent. of the receipts, but on examination of the Financial Statement for the year ended June, 1869, I find that the receipts amounted to £23,696, whilst the actual expenditure has been £13,053, so that the actual expenditure has amounted to 55 per cent. of the receipts, certain deductions having been made from the actual expenditure before instituting the comparison with other railways.

Now I suppose that no deduction of this kind has been made from any of the English railways with which it has been compared, though, of course, the expenditure of all railways will be subject to charges of a character which might be excluded from "working expenses" in the strict sense of the term.

How far such deductions are fair it is impossible for me to say, but I certainly observe in the statement items which, in my opinion, cannot fairly be deducted from working expenses; for instance, tonnage for right of way, which would in ordinary railway accounts be debited to rent, and form a portion of the working expenses. Again, "rebate" (or remission of a part of the receipts to the freighter) which if deducted from the working expenses should in all fairness be also deducted from the receipts

No. 6—continued.

in forming a comparison between the receipts and expenses. Waiving, however, these objections, and assuming for the sake of argument that 44½ per cent. is the fair proportion, let us enter into a fair comparison between this and 48 per cent. of the English railways (on some of the Irish railways it is 39 and 33 per cent., and in one case as low as 31 per cent.)

The Festiniog Railway being a small line to a number of slate quarries has practically a monopoly of the traffic, consequently it can charge for transport rates higher than those charged by the majority of English lines, which are in keen competition with each other. The charge for slates is 2½d. per ton per mile, and 2¾d. for other traffic, which may be said to be almost entirely mineral, being of coal and lime. Now the mineral rates charged on the ordinary English lines vary from ¾d. to 1d. per ton per mile, or less than half the rates charged on the Festiniog Railway (in one case within my knowledge the rate for minerals scarcely exceeds one-fourth of the Festiniog rate, and that subject to rebate). It is true that, on the average of English lines, the distance is greater than on the Festiniog line, and that the terminal expenses or cost of loading would not be spread over so many miles; but, on the other hand, neither the loading nor the unloading of slates on the Festiniog Railway is undertaken by the Company's servants, but by the agents of the different quarry-owners, who are the freighters, so that there are no terminal expenses to speak of.

For simplifying the question, however, I will assume that the rates of freight are double those ordinarily charged, though three times would be probably nearer the mark.

Now, it is clear that whatever may be charged to the freighters, the amount of that rate can exercise no influence on the working expenses, which must remain the same whether the rate charged be 2½d., or 6d., or 1d., or ¾d.

Suppose then, for the sake of fair comparison, that we take the same rates as those of other railways, which I assume to be half those of the Festiniog Railway, the receipts will be reduced to one-half, whilst the working expenses remain the same; so that the proportion of working expenses immediately mounts up to 89 per cent. of the receipts; or, if we take the total expenditure, we have a proportion of 110 per cent., or an expenditure exceeding the receipts.

2. To deal with the fact that the Festiniog line yields 29½ per cent. interest on its original capital, I will not stop to inquire how far the average of English lines have suffered by taking up, leasing, or guaranteeing unremunerative lines to prevent them from falling into the hands of a rival Company, although this is notoriously the principal cause of low interest on the English railways. I will simply accept the facts as they stand, and form the comparison on that basis. It appears then that the Festiniog Railway Company, whilst working the line with horses, realized such profits that they were enabled to expend a sum of £50,000 out of their profits, in additions to the line, and in rendering it capable of being worked by locomotive power. If this additional capital be taken into consideration, the amount of interest will be reduced to 12½ per cent. on the outlay; still this is a handsome return, but if we are to institute a fair comparison with other railways, we must see how this interest is obtained. To do so I must again revert to the rates.

Suppose, for instance, that the Festiniog Railway Company were forced by competition, or otherwise, to carry their traffic at the same rates as those adopted on other lines, which I have assumed at half the rates now charged on the Festiniog line, the receipts would at once be reduced to one-half, or instead of £23,676 they would only amount to £11,838, whilst the working expenses still remaining unaltered would be £13,050, or a deficit, instead of 12½ per cent. interest. In these comparisons I have assumed the whole of the traffic to be a "mineral" traffic, consisting of slates, though, strictly speaking this is not the case, but the passenger carriages only form one-twentieth of the number of vehicles: and even the other trucks, which almost exclusively carry a "mineral" traffic of coal and lime, do not form one-twentieth portion of the whole. I have, therefore, simply confined my remarks to the question of slate (or "mineral") traffic, though probably some slight reduction might be made in my figures for the small amount of traffic that may not be carried at such high rates. My aim has been to place before you in as clear and concise a manner as possible the principles upon which a fair comparison can only be made.

The Festiniog Railway was, it appears, a profitable concern when worked by horses; and it would have been easy to establish the superiority of horse-power over locomotive power, were interest on capital, or proportion of working expenses to receipts, to be the only criterion of their relative merits.

3. I now come to the question of the proportion of dead weight of rolling stock to freight; and in this respect the Festiniog Railway has an undoubted advantage so far as slate traffic is concerned, for slate is a heavy and compact article of freight, and a considerable weight of it may be packed in a small compass; consequently, if a small truck be sufficient to contain as much as a pair of axles can bear, the small truck must have the advantage so far as dead weight is concerned; but few of the English railways have a traffic of one uniform dense character like that of the Festiniog Railway; and it is generally necessary, in order to avoid multiplication of rolling stock, to have a few types of truck capable of carrying freight of all kinds; but even if a railway of the ordinary gauge were to have a traffic of slates alone, I doubt whether the trucks could be constructed so as to have so small a proportion of dead weight as on the 2-foot gauge.

The case, however, wears a very different aspect when we arrive at the consideration of a bulky and less weighty freight; take for example, coffee in "parchment," which I suppose forms from 90 to 95 per cent. of the freight from Kandy to Colombo. Its bulk (weight for weight) must be at least eight or nine times that of slate (and this is no extreme case; for unpressed hay, straw, and other agricultural produce, are thirty times the bulk of slate). It would be necessary, therefore, to employ eight or nine of the slate trucks to carry an amount of coffee equalling the weight of slate that might be carried in one truck; in other words, the dead load will have to be increased eight or nine fold when you begin to carry coffee in the Festiniog truck (or thirty-fold in the case of hay and straw). This is on the assumption that the slate trucks are used for the conveyance of coffee; and I have assumed this in order to simplify the question, and show the principle involved; at the same time trucks might be designed on the 2-foot gauge, in which the dead load might be reduced below the proportions I have given in the simple comparison of bulk with bulk. There is no doubt, however, that whilst small vehicles give the least dead load for dense compact freights, the larger are more economical for light bulky freight; and this principle is evidently being recognized in those parts of India in which cotton traffic is large; for I learn that on some of the Indian railways an endeavour is being made to economize the dead load by increasing the size and capacity of the trucks.

4. The fourth point would be too absurd to combat, were it not so gravely and plausibly insisted upon by the writer of the letters of the *Times*, who, after going into some elaborate proofs to show that a ton of dead weight or more is carried for every passenger, continues—"surely it must be a severe reproach to mechanical science so long as a ton of passengers means according to one calculation, 20 tons, or, according to another, 33 tons, &c.;" and then he proceeds to show that, by the system he advocates, carriages may be constructed so that a passenger and his dead load, instead of weighing a ton or more, may only weigh 5 cwt. Now, any one who has the slightest acquaintance with the working of railways knows that the principal causes of this excessive weight have nothing to do with "construction" or "mechanical science," but with the traffic arrangements and with the travelling public. The dead weight is caused by the necessity for providing for the maximum number of passengers that may possibly travel on the railway, by the haulage of empty carriages, by the system practised by the travelling public of reserving empty compartments for themselves, and by innumerable facts well understood by traffic managers. Even the most superficial observer travelling on the English railways must have noticed, especially on branch lines, that the carriages are seldom filled to a third of their capacity, and that many are quite empty. This explains the secret of the immense dead weight. Whilst travelling on the Festiniog Railway I noticed that, so far as the first-class traffic was concerned, the dead load exceeded 2½ tons per passenger, without taking into account the share of dead load of engine and break-van, for there was only one passenger in the carriage on the up journey and none on the down. Our third-class carriages on the Ceylon Railway, when they are properly filled (as they almost always are), do not amount to 4 cwt. per passenger, including the weight of the passenger—and they are of no special construction—so that the wonderful improvement of 5 cwt. expected by the writer in the *Times* is by no means so great as it appears to be on paper. There is certainly room for the reduction of dead load in the construction of carriages to a limited extent, but the travelling public of England will not bear it. I remember that, several years ago, on a railway in the north of England, some carriages were constructed which reduced the dead load to 1½ cwt., exclusive of the weight of the passenger himself, but it was found that, practically, these carriages involved more dead weight than those of ordinary construction, because the public objected to travel in them, and the passengers in them were but few. After about a year's trial they were withdrawn. As a rule, the dead weight due to faulty construction or wasted space (both in goods and passenger traffic) is a mere bagatelle compared with that necessitated by traffic arrangements.

5. I now come to the cheap construction of light railways. This advantage on investigation will be found to be less than might at first sight be imagined. The cost of land will be nearly the same in the case of the light railway as it is in that of the broader gauge.

The fencing, the telegraph, the signals—precisely the same.

No. 6—continued.

The stations: nearly the same, the sidings longer, because a decrease in the width must entail increase in the length of the trains.

The permanent way will, perhaps, show the greatest saving, but that will be effected chiefly in the sleepers. It is a significant fact that the rails adopted on the Festiniog Railway are of greater weight than those originally adopted and used for many years on the 7-foot gauge of the Great Western Railway; on the other hand, the Great Western rails were laid on longitudinal sleepers, which admit of some reduction in the weight of rails.

The saving in the earthwork varies very much, but decreases relatively with the magnitude of the work. Take, as an extreme instance, the heavy embankments required to keep the Gampola Railway above flood-level. In an embankment of 50 feet height, with slopes of $1\frac{1}{2}$ to 1, the slopes which form the principal portion of the contents will remain the same, whatever may be the gauge; the only saving is a slip cut from the middle of the embankment, and each foot saved in width would only represent a total saving of $\frac{1}{10}$ th part of the whole; in other words, a little more than 1 per cent. The saving in bridges of large span would be but small, because the weight of the train bears so small a proportion to the weight of the bridge itself. The culverts cannot be reduced to any appreciable extent, except slightly in length; the faces would remain the same. The difference of cost between a 7-foot gauge and the ordinary 4' 8 $\frac{1}{2}$ " gauge, is considered by engineers who have investigated the question to be about 7 or 8 per cent. Even Captain Tyler, R.E., who has so strongly advocated the light system, and whose position as Government Inspector of Railways has done so much to bring the subject prominently before the public, even he admits that, "in flat countries very little saving can be effected by reducing the gauge"; but he believes that, "in mountainous districts sharper curves, which work more easily in the narrow gauge, can be better employed, so as to enable costly works to be avoided." If this be the case, then comes the question—"Are sharp curves precluded by the ordinary gauge?" A few years ago such a question would have been answered in the affirmative, for when the Ceylon Railway was first designed it was almost unique amongst railways, and I had no small opposition to overcome in the Colony because the curves in my proposed line were so sharp. My proposal was then designated as "a series of zig-zags and chamois-leaps at right angles to one another."

Since that time, however, the extension of railways to districts previously considered inaccessible to the locomotive has led to the adoption of still sharper curves; and the attention of engineers has been directed to the improvement of rolling stock so as to enable it to pass without difficulty round such curves. The sharpest curves of the Festiniog Railway are 115 feet radius, and the wheel base only 5 or 6 feet; but lately a steam carriage, 43 feet long, has been exhibited near London, running round curves of only 50 feet radius, at a speed of 25 miles per hour, on the ordinary gauge of 4 feet 8 $\frac{1}{2}$ inches, so that the greatest element of economy claimed for the exceptionally narrow gauge is, to some extent, illusive, inasmuch as, with the ordinary gauge, curves can be used which are twice as sharp as the sharpest curves on the Festiniog Railway.

6. It now only remains for me to discuss the sixth advantage claimed for the Festiniog system, being that the light character of the rolling stock reduces the wear and tear considerably. This is true to a certain extent, but less than might at first sight be imagined, because it must be remembered that the great causes of wear and tear on English railways are the high speed and heavy engines: in fact, this is admitted in the letters of the *Times*, from which the following is a quotation:—"The carriages and waggons are comparatively innocent. Go to him" (the engineer of the line) "and he will tell you—"We carry millions of tons on our line, and we ought to carry as many millions more without hurt, were it not for so-and-so's engines; they tumble and grind along and break down all before them. What should be a perfect road for years, with not more than two men per mile to look after, is now hammered out in as many months, with five times the number of men to look after.""

Now, heavy trains combined with high speed require heavy engines, and cannot be adopted without extensive wear and tear; but the Manchester and Liverpool Railway was for many years worked by locomotives as light as those used on the Festiniog Railway, and I well remember the time when the southern division of the London and North Western Railway between London and Birmingham was worked by small four-wheeled engines, scarcely one-third the weight of the present monster engines.

There is no reason why light engines, and even waggons and carriages of a lighter character, should not be employed on railways of ordinary gauge, provided the speed be restricted.

To recapitulate. I am of opinion that the advantages claimed for the Festiniog line may be disposed of as follows:—

1. The proportion of working expenses to receipts would be far greater than that of the average of English lines, were the rates of freight the same.
2. The interest of 29 $\frac{1}{2}$ per cent. would dwindle down to a deficit, were the ordinary mineral rate charged.
3. The advantages of dead load do not hold good in the case of lighter and more bulky freights than slate.
4. The dead load of passenger traffic is due to traffic arrangements rather than to any speciality of construction.
5. The sharp curves which are claimed as the principal cause of saving in construction are not peculiar to the Festiniog gauge.
6. Light engines and rolling stock may be employed without having recourse to the exceptionally narrow gauge.

There are few lines in England in which the traffic descends by its own gravity as on the Festiniog Railway, or on which the greater part of the traffic requires no power beyond the hauling back of the empty trucks; the gradients are most favourable, being practically about 1 in 90 for the whole distance, and yet the expenses per train mile are nearly double those of the average of English lines, and three times those of some of the Irish lines.

An endeavour has been made to show that the working expenses should be greater on the Festiniog lines, because the trucks are hauled back empty; but on the other hand, it must be remembered that the traffic is of such a character that the trucks one way may be filled to their full extent, and that as the traffic is "through" there is but little shunting, so that at least half the capacity of the trains may be considered to be utilized; whilst on ordinary railways, as a general rule, taking into account miscellaneous freights, half-loads, and empty returns, scarcely more than one-third of the trains run can be considered available.

Moreover, the comparison has been made between the working expenses of a low speed railway and those of high speed railways. Now high speeds must be proportionally more expensive than low, the tractive force of 12 miles to that of 50 miles being about as 1 to 2 $\frac{1}{2}$ apart from any consideration of increased wear and tear from impact.

In bringing forward arguments to refute the extravagant claims set up for the exceptionally narrow gauge, I do not wish to condemn either the light system or the Festiniog Railway. I believe that the former possesses many advantages, and may be adopted with great advantage under suitable circumstances; and the latter is a most interesting work, and reflects great credit on the engineer for the manner in which he has overcome the difficulties of working so small a gauge, and for the successful introduction of locomotives on it; but I do protest against the conclusion that the facts elicited by the working of the Festiniog Railway prove its superiority over the ordinary gauge under all circumstances, as its supporters endeavour to show.

It is not unusual when engineers bring forward arguments in opposition to the light system to consider that their opposition is actuated by "antiquated notions"; that they are attached to the orthodox plans to which they have been accustomed all their lives, and that, consequently, they are averse to any change.

I believe, however, that my antecedents will free me from any such imputation; and my past reports to the Government of Ceylon show that I have for years contemplated the introduction of light railways into Ceylon, should it be determined to open up certain mountain districts by railway communication. It would, however, be, in my opinion, a great mistake to make a break of gauge in carrying out the extension to Gampola; the features of the country are such that little if any saving would be effected by the adoption of a different gauge from that of the main line; and as Gampola is a centre into which the traffic of several districts converge, it would be most unwise to have a break of gauge between it and the main line, for in that event it would be more advantageous to the freighters to cart their traffic a few miles further along the road to the main line rather than dispatch them at Gampola to be subject to a change of vehicle after a few miles of railway journey.

The evils of a break of gauge are not to be overlooked, and the advantages should be well marked to justify it. I feel sure that if the Gampola Extension were to be laid to any other gauge than that of the main line, it would at some future time be relaid to the proper gauge. The Arconum and Conjeveran Railway, not many years ago, was laid down on a 4-foot gauge, and was intended to inaugurate a new system of light railways for India. There was no necessity in that case for any departure from the regular gauge, and I learn that it is now being relaid to the regular Indian gauge of 5' 6", after a heavy sacrifice of rolling stock and permanent way. I am strongly of opinion that reform in rolling stock is much more required than in gauge,

No. 6—continued.

and I think it would be well when any gauge has been once adopted in a country to see how far it may be possible, by means of modern appliances for passing round curves, by engines specially designed for low speeds and by light rolling stock, to secure the advantages of a light railway, without having recourse to a break of gauge.

I have, &c.,
GUILFORD L. MOLESWORTH.

To the Col. Sec.—B., 15 July, 1871. A copy of Mr. Molesworth's report may be forwarded to the Secretary for Public Works, for perusal of Engineer-in-Chief of Railways, and his consideration of how far the principle of the Festiniog Railway may be of practical avail in this Colony.—20 July, 71. JOHN R., 24 July, 71.

The Principal Under Secretary to The Under Secretary for Public Works.

Sydney, 25 July, 1871.

Sir,

In transmitting the accompanying printed copy of a Report by Mr. Guilford L. Molesworth, Director General of the Ceylon Railway, upon the Festiniog Railway system, as received by His Excellency the Governor from Her Majesty's Principal Secretary of State for the Colonies, I am directed by the Colonial Secretary to suggest that the Secretary for Public Works should be invited to cause the same to be forwarded for the perusal of the Engineer-in-Chief for Railways, and for his consideration of how far the principle of the Festiniog Railway may be of practical avail in this Colony.

I have, &c.,
HENRY HALLORAN.

Engineer-in-Chief for Railways will be good enough to report.—J.B., 27/7/71. Report herewith.—J.W., 8 Aug., 1871. Commissioner, 71/2817.

Minute Paper of the Engineer-in-Chief for Railways.

(71-2817.)

Department of Public Works,
Railway Branch, Engineer's Office,
Sydney, 5 August, 1871.

In compliance with the request of the Honorable the Colonial Secretary, contained in his letter, dated 25th July, 1871, that I would peruse the report of Mr. Molesworth upon the Festiniog Railway, and consider how far the principle of such railway might be available in this Colony, I have to offer the following remarks:—

In the first place, I have to observe that the whole subject of the Festiniog Railway has been so ably and fairly dealt with by Mr. Molesworth that little more remains to be said on the subject.

The gauge and traffic on this line are both exceptional, the former being 2 feet, and the latter almost exclusively slates. I know of no other railway having a traffic where so much dead weight can be so conveniently packed for haulage, and for which an exceptionally narrow gauge could be used.

The heavy traffic also being down-hill, nearly the whole cost of haulage or working is in taking the empty trucks back to the mines on an average incline of one in ninety only.

No circumstances could be more favourable for economy in working, and yet Mr. Molesworth says that, "the expenses per train mile are nearly double those of the average English lines, and three times those of the Irish lines." The gauge of the English lines being 4' 8½", and that of the Irish 5' 3".

Therefore, so far as cost of working is concerned, with a most favourable traffic there is a positive disadvantage in adopting a gauge of 2 feet.

It is stated by Mr. Molesworth that the rate for slates is 2½d. per ton per mile, and 2¼d. for other traffic, which is almost entirely mineral, and consists of coal and lime.

The rate charged in this Colony for the conveyance of minerals and for agricultural produce is little more than half of the above rates, and all working expenses, caused by higher rates of wages, and increased cost of fuel and stores, are more than double those on the Festiniog Line.

This Festiniog line is exceptional in every way. It is an isolated line, and subject to no competition; nearly its whole traffic is carried down-hill; the loading and unloading of slates is all done by the freighters, and the terminal expenses are therefore very small.

The cost of the line is stated to have been £6,000 per mile, including rolling stock, with rails weighing 48 lbs. to the yard, but it is not stated what proportion of this amount was expended upon the works. The land through which the line passes is said to be valueless, and the railway has been free from ruinous Parliamentary expenses. If, as I believe, the cost of the proposed extensions in this Colony does not exceed £7,000 per mile, with a 70-lb. rail and with a gauge of 4' 8½", they will bear favourable comparison with the boasted cheapness of the 2-foot gauge on the Festiniog line, if the difference in the cost of labour and materials be taken into consideration.

The question of gauge however has very little to do with the cost of a railway, and it has always appeared to me remarkable that the public should have been so grossly, deluded by the advocates of the exceptionally narrow gauges on this subject.

The moment a railway extension is spoken of, the difficulties of the country are never considered, but the unthinking portion of the public rush at once to the conclusion that by adopting what to me appears the useless gauge of 2 feet, nearly all cost of construction is at once got rid of.

The following remarks which bear on this question are from Mr. Fowler's report on narrow gauge railways in India.

22. The chief causes of difference of cost in railways are nearly as follows:—

- 1st. Heavy works to obtain superior gradients to enable the same power to take greater loads.
- 2nd. Heavy works to obtain curves of large radius for high speeds.
- 3rd. Heavy rails, fastenings, and sleepers.
- 4th. Greater dimensions of formation, ballast, drainage, &c.
- 5th. Greater strength of bridges for greater weight and speed.
- 6th. Works for accommodating large traffic at stations.

These and similar works, and not gauge, cause the vast difference of cost between a railway for the accommodation of heavy and rapid traffic, and one to suit the requirements of light and slow traffic; and although the causes above enumerated may possibly even quadruple the total cost of a railway, it will be seen that they are only very slightly influenced by gauge.

Upon any railway which has to convey an ordinary traffic, I consider the 2-foot gauge all but useless. It would be impossible on such a gauge to carry with safety wool, hay, or cattle; and as these products will form a large portion of the traffic on the lines in this Colony, I consider the 2-foot gauge inadmissible for goods traffic, and most inconvenient for passengers.

The cost of railways being therefore influenced very slightly by a reduction of gauge, I strongly advise that no change of gauge be made in the construction of any railways in this Colony, as I am satisfied that no saving can be effected by a reduction in the width of gauge at all commensurate with the inconvenience which will be occasioned, not only by a break of gauge but by the still greater inconvenience of complication in the rolling stock.

The general impression appears to be that the difference in the cost between the railways now proposed beyond Bathurst, Goulburn, and Murrurundi, and those already constructed, arises from some great scientific discovery in England, which has been slow in finding its way to these Colonies.

Nothing, however, can be further from the truth; the great difference arises almost entirely from the fact that on the extensions named the character of the country is exceedingly favourable, that deep cuttings are unnecessary, that there are no rivers to cross, subject to heavy floods, and that therefore large and expensive bridges are not required.

Some reduction has been made in the cost of the permanent way for the extensions, by dispensing with chairs and keys, by a reduced formation width, and by decreasing the quantity of ballast; but this saving is small in comparison with that effected by the absence of heavy works.

No. 6—*continued.*

I will take this opportunity to offer my unprejudiced opinion that the best interests of the Colony would be promoted by extending with all despatch the Southern Railway to the Murray, at Albury, so as to effect through communication by railway with Melbourne and the intermediate districts, not only with a view to the through traffic, which might be anticipated, but mainly with the object of providing the settlers in this Colony with easy access to the ports of both Melbourne and Sydney, as I think whatever restrictions are placed upon the means of communication, the traffic will always find its way to the nearest and most favourable market; and if a better market could be found in Melbourne than at Sydney, it would clearly be to the benefit of the producers in this Colony to have the Melbourne market open to them by the cheapest of all roads.

Another great advantage to be derived from the completion of the Southern Railway will be the transmission of mails and passengers from Sydney to Melbourne, when the mail service is conducted by a branch line of steamers from Singapore through Torres Straits, by the action of the New South Wales and Queensland Governments.

The Victorian Government would also be benefited by the adoption of this route, as the mails would be delivered in Melbourne in less time than by the present route *via* Galle. The time occupied in travelling by railway from Sydney to Melbourne would be about twenty-one hours.

I must apologize for having gone beyond the matter referred to me, but I trust the importance of the question raised will be considered a sufficient justification for the course adopted.

It may be gathered from my remarks that I do not consider a gauge of 2-feet could be used in this Colony for ordinary traffic, and nothing could justify the use of such a gauge upon any railway other than one so exceptionally circumstanced as that of the Festiniog, and this railway may, in my opinion, be looked upon more as a curiosity than as an example to be followed.

With reference to the "Fairlie engine," which has been used in the working of this line, I desire again to call attention to the fact that it is in reality two engines, having four cylinders, two boilers, two sets of motion, and duplicate in every respect.

Two tank engines coupled together of precisely similar construction would represent the Fairlie engine, and do the same amount of work, but with this additional advantage, that they could be used separately if required.

JOHN WHITTON.

The Honorable the Chief Secretary.—J.B., 15/8/71. Principal Under Secretary, B.C., 15/8/71.—J.R. While this report shows that the principle of the Festiniog Railway can be of no avail in this Colony, it strongly urges completion of railway communication with Victoria.—16 Aug., /71 Seen.—JOHN R.

(M.)

Department of Public Works,
Sydney, 1 July, 1872.

MINUTE PAPER.—RAILWAY TRIAL SURVEYS.

WILL the Engineer-in-Chief be good enough to state what has been done with reference to the trial surveys beyond Goulburn, Bathurst, and Murrurundi, for the information of Mr. Sutherland.—J.R.

From Goulburn to Yass working surveys have been made and the line staked out. Tenders might be invited for this length in about a month.

Beyond Yass trial surveys (very rough) have been taken to Narrandera, on the Murrumbidgee; but my opinion is that surveys should be made to Albury, *via* Wagga Wagga; and for the present it might be sufficient to construct a railway to Wagga Wagga, connecting it with the Murrumbidgee. But, as the railway will ultimately be extended to Albury, it would be advisable so to construct this portion of the line that no difficulty may be hereafter experienced in crossing the river, and in avoiding as much as possible valuable property in Wagga.

From Bathurst to Orange trial surveys have been made, and I think the best line has been very nearly determined upon.

From Murrurundi to Tamworth trial surveys have been taken; but as that portion of this length crossing the Liverpool Range would, if constructed over the line now levelled, be very costly, additional trial sections are absolutely necessary before any line can be adopted.

I recommend that surveyors be at once sent to the south and the north, for the purpose of finally determining the best line for railway extension in those districts.

The Southern line, after leaving Yass, should proceed towards Albury, in the direction of Bowning, Binalong, Murrumburrah, Cootamundry, Junee, and Wagga Wagga.

J.W., 8/7/72.

Commissioner, 8/7/72. Rys., 9/7/72. I approve of the surveyors being sent as soon as possible for determining the best lines for railway extension.—J.S., 15/7/72. Recd., 9/8/72. Mr. Whitton, B.C.—J.R., 9/8/72.

No. 7.

RAILWAYS—CORRESPONDENCE RESPECTING QUALITY OF IRON USED IN MANUFACTURE OF RAILS FOR THIS COLONY.

(A.)

The Under Secretary for Finance and Trade to The Colonial Agent General.

The Treasury, New South Wales,
20 April, 1870.

Sir,

I had the honor, by direction of the Colonial Treasurer, to forward to your address, by book post, *via* Marseilles, a copy of the Report of a Select Committee of the Legislative Assembly of this Colony upon "Railway Extension"; and I am now to invite your earnest attention to paragraph 14 of that Report, in which the Committee deem it their duty to call the attention of Parliament to disclosures as to the quality of the iron used in our Railways, in the evidence given before them (references thereto quoted), which have led the Committee to believe that the Colony "has been for years largely and constantly defrauded to an enormous extent in the article of rails." Dated 25 March, 1870.

It having been represented to Mr. Samuel that the specification for the supply of such rails is of the most stringent kind, and invariably for rails of the best quality, it becomes necessary that the Government should be furnished with an immediate explanation of the fact that it was not discovered in England that the rails referred to in the evidence were not manufactured in accordance with that specification.

I have, &c.,
HENRY LANE.

(B.)

The Colonial Agent General to The Under Secretary for Finance and Trade.

Agency of the Government of New South Wales,
8, Adam-street, Adelphi,
London, W.C., 15 July, 1870.

Sir,

Referring to my letter of the 17th of last month (No. 286), I have the honor to transmit herewith, for the information of the Honorable the Treasurer, the enclosed copy of a letter I have just now received (3-20 p.m.) from Mr. Fowler, together with copies of its enclosures.

No. 7—*continued.*

2. While I do not doubt that the particular rails reported by the Engineer-in-Chief, forming a part of those supplied by Messrs. Bolckow & Vaughan, and the Weardale Company, respectively, did prove defective in wear, I regard it as so very desirable in every case of complaint that both sides, especially that against which the complaint is directed, shall be thoroughly satisfied that every possible justice has been done them in the matter, that I do not hesitate to recommend that the applications for information severally made by the Firm and Company in question shall be complied with; and that the proposal of the one to send out to the Colony an Agent of their own, specially charged to investigate the whole matter, and the request of the other to have all their damaged rails sent Home at their own expense, to be examined, in conjunction with themselves, by an Inspector appointed by Mr. Fowler, shall be assented to and complied with.

3. The whole tone of their letters, and the fact that the courses they propose will involve considerable expense to themselves, evidence good faith, and their adoption will, on the defective quality of their several rails being proved in the way they themselves propose, preclude contest against the right of the Government to have, in such case, their value refunded.

4. I have received the Inspector's reports, forwarded for my perusal by the consulting Engineer, but their number and volume render impossible their examination before the mail closes. I shall, however, as early as possible, carefully go through them, and report the result when forwarding the further reply which Mr. Fowler states his intention of making.

I have, &c.,
W. C. MAYNE,
Agent for the Colony of New South Wales.

[Enclosure.]

John Fowler, Esq., to The Colonial Agent General.

2, Queen-square-place,
Westminster, S.W.,
15 July, 1870.

Sir,

I beg to acknowledge receipt of your communication dated the 13th day of June, enclosing a letter from the Under Secretary for Finance and Trade of the 20th April, and also a Report of the Select Committee of the New South Wales Parliament, on the subject of Railway Extension, in which occurs (paragraph 14) allusion to evidence given before the Committee, by officers of the Government, on the subject of the permanent-way materials exported from England and inspected by me.

I have carefully read through the evidence alluded to, and particularly that which was given by Mr. Thomas and by Mr. Mason.

I find that the only portion of Mr. Thomas's statements which are corroborated by Mr. Mason is as to the wear of the rails; and on this subject a report was received from the Colony in the early part of the year, in which complaints were made by the Engineer-in-Chief of the bad wear of the rails laid down on the railway between Marulan and Goulburn, and requesting that in future tenders be not invited from the firms who supplied rails so complained of, viz., those of Messrs. Bolckow & Vaughan and the Weardale Iron Company; and you thereupon instructed me not to apply to these firms for any future tenders.

These instructions have been carried out, but I have felt it right not to permit the question to rest there, and I accordingly communicated at the time with Messrs. Bolckow & Vaughan, whose rails had failed to the greatest extent, and have received the enclosed letter from those gentlemen.

In the case of the Weardale Company, I did not write to them at the time, as I understood their works had changed owners since the period when the rails were supplied, but I have since found that this is not the case, and have therefore written to them on the subject, and enclose their reply.

With respect to these replies I think you will consider they have fairly met the case, as far as they possibly could with the information before them, and you will probably suggest that the further particulars they have asked for should be given to them.

With regard to these firms, Messrs. Bolckow & Vaughan are the largest rail manufacturers in the Cleveland District of Yorkshire, and the Weardale Iron Company are one of the oldest and most respectable firms in the South Yorkshire District.

The characteristic of the iron manufactured by Messrs. Bolckow & Vaughan is hardness and great wear; on the other hand, the characteristic of South Yorkshire iron is great toughness, and it is somewhat softer than that manufactured by Messrs. Bolckow & Vaughan. Both firms have an excellent reputation, and have always evinced a desire to turn out rails of a satisfactory character; and I am at a loss to understand why these particular rails should exhibit wear so rapidly as is described in the report; and I would suggest that the Government should ascertain if the lines have been properly maintained, and kept at a proper level by careful packing.

I can certainly undertake to say that the defects have not arisen from the want of sufficient supervision during the course of manufacture; that supervision was close and constant, as you will perceive by my Inspector's voluminous reports made from time to time during the execution of the orders; and these are now sent for your perusal, together with the instructions given to them.

I will reply further on some other portions of the evidence contained in the report in a few days.

I am, &c.,
JOHN FOWLER.

[Sub-enclosures.]

Messrs. Bolckow, Vaughan, & Co., to John Fowler, Esq.

Bolckow, Vaughan, & Co. (Limited),
General Manager's Office,
Middlesbro-on-Tees, 6 January, 1870.

Dear Sir,

In reply to your communication on the subject of the rails supplied by us for the New South Wales Railways, we can only state our great regret that you have to complain of them in any way.

We hope you will excuse us saying that, as we never before in our long experience knew any considerable number of our rails to fail within moderate time under reasonable work, and as the rails we supplied for New South Wales were, we believe, in every respect at least equal to those we generally make, we feel convinced that those now under consideration must have met with exceptional treatment.

We would like to have particulars of the defects complained of, and we hope you will oblige us by obtaining a list of the rails in detail, with the nature of the defects set against each, and, as well, information as to the position in the line in which each was placed,—whether at or near stations, watering-places, or other extremely worked portions of the railway.

Rather than rest under the imputation of having supplied to you rails of bad quality, we will send out to New South Wales an agent of our own, specially charged to investigate the whole matter.

We confidently assert that there is not in Great Britain any railmaker whose character stands higher than our own, and we know how readily you may test this assertion if you consider it needs testing.

During the last three or four years we have supplied to the Great Northern Railway, the North-eastern Railway, the London and North-western Railway, and sundry other of the chief of the English railways, enormous quantities of rails, which have always given the greatest satisfaction. To the three Companies named we sent about 30,000 tons within four or five years, and we shall feel much satisfaction if you will make application to any of those Companies as to the manner in which our contracts have been executed.

We are, &c.,
BOLCKOW, VAUGHAN, & Co. (Limited),
p. EDW. WILLIAMS,
General Manager.

2, Queen-square-place, Westminster,
London, S.W.

No. 7—continued.

John Rogerson, Esq., to John Fowler, Esq.

The Weardale Iron and Coal Co. (Limited),
Judhoe Iron Works, Newcastle-upon-Tyne,
12 July, 1870.

Dear Sir,

We have received your letter of the 23rd ultimo, from which we see with great concern that a complaint has been made of the quality of the rails supplied by us to the New South Wales Railway, between the years 1862 and 1864, and that upon a length of 20 miles, which has been opened only two and a half years, sixty-eight of our rails have been taken up.

We deem it necessary to ask what proportion of the 20 miles were laid with the rails supplied by us, and had they been previously used in the construction of the railway before being laid down in the permanent way, or laid at stations,—were they crushed or laminated, or did they break when in use? For the distance named the quantity is small under ordinary circumstances, and below the average on lines in the north of England, while ordinarily a larger number fail from insufficient ballasting, bad sleepers, and accidental wear.

As this is a charge seriously affecting our reputation as makers of the highest class rails only, we request that all the damaged rails be sent home at our expense, and we trust you will appoint an Inspector to examine the same with us, in order that the charge may be properly investigated, and at the same time supply us with the information of the amount of work the rails have undergone.

You are no doubt fully aware that we make our rails and iron from a uniform quality of minerals, and the iron supplied by us stands the highest tests and wear, and that we supply the principal English and Indian Railways, from whom we have no complaints. The high quality of the iron is such that besides the Cumberland hæmatite it is the only iron in England that can be converted into steel by the Bessemer process.

We remain, &c.,

(For the Weardale Iron & Coal Co.),
JOHN ROGERSON.2, Queen-square-place,
Westminster.

(C.)

The Agent-General for New South Wales to The Under Secretary for Finance and Trade.

Agency of the Government of New South Wales,
8, Adam-street, Adelphi,
London, W.C., 11 August, 1870.

Sir,

Referring to my letter No. 299, of 15th July last, I have the honor to enclose, for the information of the Honorable the Treasurer, copies of communications I have this day received from Mr. Baldry, in Mr. Fowler's unavoidable absence from England.

2. Time does not admit of my having copies *in extenso* made of the documents forwarded to me from Mr. Fowler, but I have examined these, and have found that they show the results set forth in the letter of yesterday giving the annual cost of maintenance of several single lines of Railway in England and Ireland, and their general average per annum under that head.

I have, &c.,
W. C. MAYNE,
Agent-General for New South Wales.

[Enclosure A.]

J. D. Baldry, Esq., to The Agent-General for New South Wales.

2, Queen-square-place, Westminster, S.W.,
10 August, 1870.

Sir,

Mr. Fowler being engaged as a member of the Commission appointed by the Indian Government (who are about to carry out small gauge railways in India) in the inspection of the 3 ft. 6 in. gauge railways of Norway, will not return to England in time to continue his answer on the subject of the Report of the Select Committee of the Legislative Assembly of New South Wales, by this mail.

I beg therefore that you will kindly consider that he has by no means exhausted his reply, or that he does not intend to say anything further on the subject, but that by the engagements I have referred to he is detained from England.

I am, &c.,
J. D. BALDRY.

[Enclosure B.]

J. D. Baldry, Esq., to The Agent-General for New South Wales.

2, Queen-square-place, Westminster, S.W.,
10 August, 1870.

Sir,

With regard to the maintenance of permanent-way in the Colony, respecting which some evidence was given before the Select Committee on Railway Extension, it has occurred to me that so far from the cost being in excess of what it should be, that really it was smaller than might be expected.

To ascertain this in some measure by comparison, I have procured some returns of the cost of maintaining similar lines here; the single line system although now increasing has been little used, and it is not easy to find cases that may be cited as parallel, but the following are perhaps nearly so:—

	£	s.	d.
Single line in the Isle of Wight	173	12	3
Single branch tributary-line to the Great Northern Railway	144	17	9
Severn Valley Railway tributary to the Great Western Railway, average of five years	152	12	8
Average of five railways in Ireland	146	7	2
	4)617	9	10
General average per annum	154	7	5½

I enclose the documents.

No. 7—continued.

From these cases, which I think are fair averages of cost of single lines, you will notice that the maintenance is but little below that of the lines in New South Wales; and considering the large extra rate of labour in the Colony, which constitutes the greater part of the cost, the inference is that either some element of expense is left out of the return given at page 4 of the appendix, which shows the average cost of maintenance for five years to be £162 12s., or that the lines in New South Wales have not sufficient labour bestowed upon them, and the permanent-way materials would of necessity deteriorate in more rapid manner than should fairly be attributable to them.

Without attaching too much importance to these comparisons, you may perhaps think it worth while to draw attention to this subject in the Colony.

I am, &c.,
JOHN FOWLER.
per J. D. BALDRY.

(Enclosure C.)

The average cost in five years in New South Wales was £162 12s.; in 1869 it was £127.
MAINTENANCE and renewal of Permanent-way on the lines of Railway in the United Kingdom, for the year 1867.

Name of Company.	Length in Miles.			Maintenance of Permanent-way per mile.	Remarks.
	Double.	Single.	Total.		
All Railways in the United Kingdom.....	7,834	6,403	14,247	£ 264	
England and Wales.....	6,378	3,659	10,037	302	
Great Northern.....	419	105	524	366*	See note below. do. Average, £207 14s. 3d. Total working expenditure, £571 per mile; proportion of expenses to receipts, £43.
Great Western.....	845	513	1,358	311*	
Somerset and Dorset.....	66	66	121	
South Devon.....	34	78	112	245	
Rhymney.....	3	22	25	289	
Swansea Vale.....	20	20	156	
Vale of Clyd.....	10	10	213	
Isle of Wight.....	12	12	140	
Cornwall.....	4	62	66	190	
Festiniog.....	14	14	107	
Sishowy.....	14	14	212	
SCOTCH RAILWAYS.					
All Lines in Scotland.....	966	1,316	2,282	208	Railways having for the most part single lines of rail are taken, in order better to compare with our Railways.
Forth and Clyde Junction.....	30	30	168	
IRISH RAILWAYS.					
All Lines in Ireland.....	500	1,428	1,928	134	It will be seen that the single lines exceed the average for all lines; doubtless this is exceptional.
Belfast and Northern Counties.....	7	144	151	150	
Dublin, Wicklow, and Wexford.....	18	89	107	181	
RECAPITULATION.					
England and Wales.....	6,378	3,659	10,037	302	
Scotland.....	966	1,316	2,282	208	
Ireland.....	500	1,428	1,928	134	
The above combined.....	7,844	6,403	14,247	264	

* These two lines are quoted in answer to Mr. Thomas's statement before Committee, that the maintenance, &c., was from £80 to £100 per mile. (See answer to question No. 73.)

(D.)

The Colonial Agent General to The Under Secretary for Finance and Trade.

Agency of the Government of New South Wales,
8, Adam-street, Adelphi,
London, W.C., 31 August, 1870.

Sir,

I have the honor now to enclose, for the information of the Honorable the Treasurer, Mr. Fowler's explanation with reference to the allegations on which paragraph 14 of the "Report from the Select Committee on Railway Extension" was based.

2. That explanation appears to me so clear and satisfactory that, confining myself to corroboration on some points, I shall not weaken its force by, nor encumber it with, comment.

3. I have had the data in this office as to the prices of rails examined, and I am consequently in a position to testify to the correctness of the averages given by Mr. Fowler in paragraph 3 of his letter and its enclosure No. 1.

4. I have gone through the original reports made from time to time to Mr. Fowler by his inspectors charged with the supervision of the engines under construction, which place it beyond doubt that these "were not only erected in England, but tried in steam, and also in shunting on the line."

I shall return those reports to Mr. Fowler, they being records of his office. I do not forward copies of them, because to make such would occupy much time to no good purpose, and their transmission would involve very largely increased and unnecessary postage.

5. As regards the steps taken by Mr. Fowler to secure good quality of rails, I would refer the Treasurer to the specifications under which they have been supplied. These are in possession of the Railway Department, and will speak for themselves.

The enclosed copy of Mr. Fowler's instructions to his inspectors at the works will show the Treasurer that these gentlemen have carefully considered, and stringent orders calculated to secure watchful supervision, the application of proper tests, and the faithful performance generally of the contracts.

No. 7—*continued.*

6. Mr. Fowler having placed unreservedly in my hands for perusal, the reports, references, and communications addressed to him by the inspectors at the several works charged with the supervision of the contracts for permanent way material, and his replies and communications, I have carefully gone through those connected with Messrs. Bolekow & Vaughan's contracts for rails, &c. These range, in connection with the material for the Southern Line, over the period from the 20th of April, 1866, to 31st August, 1867, are included in thirty-four separate reports and letters, containing 101 pages of manuscript; in connection with that for the Western Line, extend from the 4th of September, 1867, to the 26th of November, 1867, are fifteen in number, and contain thirty-one pages of manuscript.

Mr. Fowler's communications to the inspectors and contractors in connection with both, range through both periods, are twenty-nine in number, and contain forty-six pages of manuscript. I have given these details to prove that strict attention to the instructions given them is exacted by Mr. Fowler from his inspectors.

The perusal of all the documents referred to has left no doubt in my mind,—would leave, I consider, no room for doubt in any candid mind,—that the supervision at the works during the execution of the contracts was closely and constantly directed to the faithful carrying out of the specifications, that the application of proper tests was full and repeated, and that no undue leaning whatever was shown towards the contractors.

7. I should be wanting in mere justice to Mr. Fowler, did I not, in forwarding his explanation, emphatically state my absolute conviction that, in no case coming within the range of his duties as Consulting Engineer, have the interests of the Colony been otherwise than jealously and faithfully guarded by him. That this should be so, the Colony had full right to expect; that it has been so, Mr. Fowler's unblemished reputation, his high character, and his professional position, all guarantee.

I have, &c.,
W. C. MAYNE,
Agent General for New South Wales.

[Enclosure.]

New South Wales Railways—Instructions for Rail Inspector.

- 1st. The Rail Inspector is to be supplied, before the work of this contract is commenced, with—
 - A copy of the specification.
 - A template of the rail contracted for.
 - Gauges for measuring exactly the position of the holes to be punched in the ends of each rail.
 - A measure to determine the exact length of each rail.
- 2nd. The inspector is to see that there is a lever machine placed near the rolling mill, which will admit of 20, 30, and 35 tons, or any intermediate number of tons, being put on the centre of a length of rail placed on bearings 3 feet 6 inches apart, and is to send up a sketch of this machine, and his calculations proving that it will weigh correctly.
- 3rd. He is to see that the mode of manufacture specified is exactly carried out, unless he shall receive, in writing, an authority from Mr. Fowler to allow a deviation from this mode of manufacture.
- 4th. He is to apply the templates to the rails rolled at each mill, to prove the rails are perfectly true to the templates.
- 5th. He is to weigh and measure ten separate rails, and report the exact length and weight thereof. This is to be done at the commencement of the contract, and repeated as he may be instructed.
- 6th. He is to select certain rails and see that the length of each is within a quarter of an inch of that specified, and also to take care that the method employed in placing the rail when it is cut insures regularity and exactness in the required lengths.
- 7th. He is frequently to apply his gauges to each end of rails to prove that the holes are correctly punched, and see that the gauge used is correct.
- 8th. He is to select for himself two or more 4-foot lengths of rails which fairly represent the bulk then made, and to test their deflection; and if the deflection be more than $\frac{1}{8}$ inch under a 20-ton load, or more than 2 inches under a 30-ton load, he is to make further tests and have the stack of rails so placed and marked as to ensure its not being delivered as a part of the contract, unless with the written authority of Mr. Fowler, to whom he shall in the meantime have made his report in detail with the result of such tests.
- 9th. He is to have one of these lengths slightly nicked all round and laid on its side under a tilt hammer with a piece of say $\frac{3}{4}$ -inch iron put on it and broken with one blow of the hammer. One end of this broken piece he is to send to the London Office; and if in his opinion it is not of good quality, he is to report this fact to Mr. Fowler at the time of forwarding the sample.
- 10th. He is to keep all his original tests, measurements, and remarks, in order, in one note-book, which Mr. Fowler will examine from time to time.
- 11th. His reasons for rejection will be, unsoundness, flaws, and bad welding of the pile, irregular lengths, bad punching, not square or not straight, not bearing tests, fracture showing bad quality, or any other imperfection detracting from the wear or strength of the rail; and his note-book must contain a careful register of these.
- 12th. He is to make a weekly return of rails made, examined, tested, and passed.

(E.)

John Fowler, Esq., to The Colonial Agent General.

2, Queen-square Place,
Westminster, S.W.,
23 August, 1870.

Sir,

In continuation of my letter of the 15th July, replying to your communication enclosing letter from the Secretary of Finance and Trade, of the 20th April, I will now beg to make one or two observations as to the evidence given before the Select Committee of the Legislative Assembly, upon which the paragraph No. 14 in the Report was based; and in doing so, I will endeavour to confine myself to such portions as refer to the duties performed by me on behalf of the Colonial Government.

With regard to the evidence of Mr. Whitton, the Engineer-in-Chief, I have already replied to the specific complaint as to the wear of the rails between Marulan and Goulburn. I may, however, draw attention to the fact that, in Mr. Whitton's evidence, page 45, though the wear of the rails over the worst portion is shown to be $2\frac{1}{2}$ per cent. in five months,—in the total quantity as enumerated by that gentleman, including this worst portion, the quantity is less than 1 per cent. in forty months, and, excluding the worst portion (Marulan to Goulburn), it is but little more than $\frac{1}{2}$ per cent. (.56) or one rail in 176, in an average wear of forty-seven months, or nearly four years; which I venture to say is really proof of most excellent quality.

With regard to Mr. Mason's evidence, he must have been misinformed as to the price paid for rails. You will perceive by the enclosed statement that the average price paid for rails in 1866 and 1867 was £7 12s. 9d. per ton, instead of £8 19s. per ton, as stated by Mr. Mason (at page 27 of the Report), and (at page 29) the average price said by Mr. Mason to have been paid for rails during the years 1859 to 1863 was £8 0s. 8d. During the portion of that period in which I was concerned in the purchase of rails for the Colony, viz., 1861 to 1863, the average price is shown to be £7 11s. 4d. per ton. I believe you have data in your office by which you can corroborate these facts.

As regards the suggestions offered by Mr. Mason with a view of ensuring better quality of rails, it is obvious at once that the mode recommended in his evidence (page 29, question 735), viz., that of inspection and test subject to rejection on arrival of the materials in the Colony, would not by any means afford a better security of good rails, and it would materially increase the cost without ensuring the only test not applied in England, viz., that of wear.

No. 7—continued.

I have for years considered the question of the best method of obtaining really good wearing rails, and in England I now adopt the system of guarantee for a certain number of years, in addition to inspection during manufacture, and this I find to be the best plan, because here the substitution of new rails for those that fail is a matter of comparatively small expense, and adds but little to the first cost; but it would so much increase the cost of the rails if a similar plan were adopted for those sent to the Colony, that it is cheaper to rely on inspection in England, and take the risk of a few failures, than to have them guaranteed for, say, five or seven years, which would add greatly to the price without anything like equivalent advantage.

As regards the mode of purchasing the rails, I think that under the system of open competition you get somewhat lower prices, but inspection becomes more difficult, and in spite of every care you are more liable to get inferior rails; whereas in a limited competition from selected manufacturers of high reputation, you get a much smaller percentage of inferior rails, but perhaps pay a little higher price.

The best method to be adopted in the selection of manufacturers is, I still venture to think, what was done when rails were first purchased for the Colony, and what has been again resorted to lately, viz., the selection of firms of the very highest reputation only (but in sufficient numbers to ensure a wholesome competition), so that with the attention we give the inspection here in England, you secure materials of the best possible quality, and at a reasonable price.

As regards the evidence given by another of the officers of the Colonial Government (Mr. Thomas) of the charges brought against myself, and the inferences drawn by him, I will say as little as possible. The statements are fortunately corrected for the most part by the evidence of the Engineer-in-Chief, and I will therefore only reply to a few of the salient points in the evidence which were not corrected, in order to show the weight that should be attached to that evidence.

Mr. Thomas (at page 3) says that the cost of maintenance on the Great Western Railway and Great Northern Railway, in England, is £90 or £100 per mile (here Mr. Thomas clearly refers to the main lines of these two railways, because he speaks of the enormous day and night traffic). I enclose letters from the Engineers of those Companies, by which it will be seen that, during the years 1867-8-9, the cost of maintenance of permanent way on those railways in one case was three times that sum, and in the other is £528, or more than five times that sum!

Mr. Thomas says (at page 23) that "engines have come out that had not been put together in England, and could not be put together in the Colony."

Enclosed are my inspectors' reports, which will show that the engines were not only erected in England, but tried in steam, and also in shunting on the line; and I enclose affidavits which Messrs. Stephenson and Messrs. Beyer & Peacock have forwarded in reply to my letter, in which I enclosed a copy of that portion of Mr. Thomas's evidence referring to these engines.

I will only instance one or two other cases in Mr. Thomas's evidence, not otherwise referred to, in further illustration of its inaccuracy.

In referring to locomotives, Mr. Thomas states (at page 20) that the power exerted by a powerful engine is 60-horse power. This is certainly less than one-fourth of the power exerted by ordinary locomotives. I enclose details and figures to show this, as relates to two classes of engines we have sent out to the Colony.

At page 7, Mr. Thomas states that he is familiar with the process of kyanizing timber, and that it is by means of kreosote. Mr. Thomas cannot possibly have had any familiarity with this process as he states, for it is effected by means of chloride of mercury (corrosive sublimate), and not by kreosote. The name given to it was from Kyan, the person who first introduced it.

The animus that suggested a complaint as to the falling of a stone (pages 4 and 23) which broke a rail is self-evident, and, but for the explanatory evidence of the Engineer-in-Chief, would not have been made known to the Committee. This stone or rock must have fallen with a force of more than 100 tons!

Many other inaccuracies occur in Mr. Thomas's statements, but they have been either already dealt with or corrected by subsequent evidence.

As regards the prices paid by the Colonial Government, and the statements made by Mr. Thomas (page 4) that they are greatly in excess of those paid by Companies in England,—I may say that comparison as to cost is exceedingly difficult to arrive at. The market, specification, urgency of delivery, time of year, and other causes, all in one way or other tend to affect the price, and therefore comparisons are fallacious; but the enclosed letters from engineers of two of the largest English railways, viz., the London and North-western, and the Lancashire and Yorkshire, show that the price is much about the same as paid by those Companies, although in the case of English railways they take delivery generally on any portion of their line, whereas our delivery is free on board in London or Liverpool; in fact, the prices paid by the Colony have been fair and just, without fear or favour to any man, and of the market value for the quality of rail supplied.

As regards the personal portions of Mr. Thomas's evidence, I am able to say, and that most emphatically, that any charges of neglect or carelessness in carrying out the orders for the Colony are unjust and totally without foundation.

With respect to the duties themselves which I perform,—having had to carry out very large works of construction throughout Great Britain and elsewhere during the last thirty years, and having always paid the greatest attention to the quality of materials used in construction,—I am convinced that there is no system of supervision and inspection established in this country for similar purposes which is more efficient and complete than my own, nor is more care taken in examination and testing of materials; but of course it may possibly happen that sometimes and under some conditions an article passes which it would be better should not pass; absolute perfection is unattainable, and where materials are manufactured in many parts, some portions may escape the most vigilant; but if on the whole the materials delivered are in accordance with the spirit and conditions of the specification, and at least equal to the standard of similar materials supplied to first-class railways in England, the object of inspection is effected; and I have no hesitation in saying that such has been the case with materials sent to Sydney, and inspected by me.

I repeat therefore what is a patent and provable fact, that every article supplied from England for the Government of New South Wales is obtained from the manufacturers on the best terms that are possible, that a large staff of competent and experienced inspectors are employed and liberally paid by me, and that every means are used to prevent anything being sent out that does not comply with the requirements of the Colonial Government; and I believe that on the whole I have succeeded in procuring for the Government an honest fulfilment of the contracts entered into for them.

I trust it will not be understood that I am claiming here an undue preference for my services, or deprecating the proper right of the Colonial Government to ask explanations from their Agent or officers whenever they see fit occasion to do so; but I think that, occupying the position I do in England, my public character claims for me some consideration and weight in the replies that I make from time to time in these explanations, and that it should be considered I would not descend to make excuses untruthfully for any omissions of duties either by myself or my employés; and I must be permitted to express my regret that censure should have been based upon evidence so obviously exaggerated, and which I fear was influenced by some personal feeling.

I am, &c.,
JOHN FOWLER.

Richard Johnson, Esq., to John Fowler, Esq.

The Great Northern Railway,
Engineer's Office,
King's Cross, London, N., 26 July, 1870.

Dear Sir,

At the request of Mr. Baldry, I have much pleasure in handing to you herewith, in detail, the cost per mile of our main line maintenance from London to Askerne (160½ miles) for the past three years.

I am, &c.,
RICHD. JOHNSON.

[Enclosure No. 3.]

W. G. Owen, Esq., to J. Baldry, Esq.

Great Western Railway,
Engineer's Office, Paddington, W.,
2 July, 1870.

Dear Sir,

The average cost of maintenance and renewals in—

1867	was	£305	9	0	per mile per annum.
1868	"	280	13	1	"
1869	"	273	8	9	"

We have no record made up of the cost of *single* lines, or of mixed gauge lines; but if you will let me know what you require I shall be very glad to pick up the results from our returns.

It is necessary to know the particular circumstances connected with each class of maintenance, before we are able to draw safe conclusions; as for instance, most of our single lines are very modern, and the maintenance is therefore *lower* than it will be when they attain an average life.

The opening of every new piece of single line with light traffic materially reduces the general average of the whole system, and might if unexplained lead to the impression that we are spending too little on the line.

Yours truly,
W. G. OWEN.

2, Queen-square Place, Westminster.

We shall be happy to send you any detail Mr. Fowler wishes for.

[Enclosure No. 5.]

Charles Manby, Esq., to John Fowler, Esq.

24, Great George-street, Westminster, S.W.,
26 July, 1870.*New South Wales Railway.*

Dear Sir,

In reply to your letter, enclosing an extract from evidence given by an officer of the Government, before the Legislative Assembly, in respect of engines supplied for the New South Wales Government, we beg to transmit to you the affidavit of Mr. G. K. Douglas, the engineering manager of our works, corroborated by that of Mr. Crow, the general foreman of construction, and Mr. Anderson, the foreman of the erecting shop, as to the fitting, erection, and trial of our engines Nos. 1541 to 1549 inclusive, before we delivered them for shipment; and this statement can be corroborated in every respect by your own inspector, who was at our works during the construction and the whole time of the trials of these engines.

We are, &c.,
Pro ROBERT STEPHENSON & Co.,
CHARLES MANBY.

A.

AFFIDAVIT OF MR. G. K. DOUGLAS.

New South Wales Railways.

WHEREAS it has come to the knowledge of Messrs. R. Stephenson & Co., of the borough and county of Newcastle-upon-Tyne, engine manufacturers, that certain statements have been made in the Colony of New South Wales, reflecting on the manner in which certain locomotive engines, numbered by them 1541 to 1549, both inclusive, were constructed, packed, and sent out to such Colony: Now I, George Katz Douglas, of Newcastle-upon-Tyne aforesaid, engineering manager of the manufactory of the said firm, do hereby make oath and say as follows:—

1. I well remember the said engines, numbered respectively 1541 to 1549, both inclusive, having seen them continually in course of their construction.
2. That the said engines were manufactured of the best materials, and in a thoroughly workmanlike manner; that after their construction they were carefully fitted and properly tried under steam, with every part attached; that everything was done which could be done to ascertain that every part had been perfectly fitted and was in thorough working order, before the said engines were taken to pieces, numbered, figured, lettered, and packed for shipment to the said Colony.
3. That the said engines were carefully inspected during the progress of their manufacture, trial under steam, and packing, by a competent independent inspector, appointed by Mr. John Fowler, civil engineer, London.
4. That the said engines were so distinctly marked and lettered that they could have been erected, on their arrival in the said Colony, by any ordinarily intelligent engine-fitter conversant with the construction of locomotive engines; all the parts having been, as before stated, carefully figured, numbered, and lettered, as is the consistent practice of the said Robert Stephenson & Co.
5. That I have been engineering manager of the said firm of Robert Stephenson & Co., for a period of nine years, and during that time no locomotive engine has ever been allowed to be sent out from the said works without its having been first entirely and completely erected, perfectly fitted, and thoroughly tried under steam; and in order to insure the utmost efficiency, the boilers have been invariably subjected to two severe trials,—first under steam, with a pressure of two hundred pounds per square inch; and, secondly, with cold water under hydraulic pressure, prior to the erection of the engines and their trial under steam, in the presence of the inspector appointed by the engineer acting for the purchaser.
6. That in every particular, the usual practice of the said firm of Robert Stephenson & Co. was carried out in regard to the said engines, numbered 1541 to 1549, both inclusive; and generally, that the said engines were constructed and fitted in such a perfect manner as would with justice have been perfectly satisfactory to any practical locomotive engineer of experience.

GEORGE KATZ DOUGLAS.

Sworn at Newcastle-upon-Tyne aforesaid, this 18th day of July, 1870, before me,—

R. R. DEES,

A Commissioner to Administer Oaths in Chancery in England.

This is the affidavit of George Katz Douglas, marked A, referred to in the affidavit of George Crow and Robert Anderson.

Sworn before me, the 18th day of July, 1870,—

R. R. DEES.

No. 7—continued.

AFFIDAVIT OF MR. G. CROW AND MR. R. ANDERSON.

New South Wales Railways.

WE, George Crow, of the borough and county of Newcastle-upon-Tyne, general foreman for the firm of Messieurs Robert Stephenson & Company, and Robert Anderson, of Newcastle-upon-Tyne aforesaid, foreman of the erecting shop in the manufactory of the said Messieurs Robert Stephenson & Company, jointly and severally make oath and say as follows:—

1. That each of us has read the affidavit of Mr. George Katz Douglas, dated the eighteenth day of July, one thousand eight hundred and seventy, hereunto annexed, marked A, relating to the construction, fitting, numbering, lettering, trials, and proving of the engines numbers 1541 to 1549 inclusive, and which said engines were sent out to the Colony of New South Wales.
2. That the statements made in the said affidavit by the said George Katz Douglas are all correct and true in every respect.
3. That all the precautions for obtaining the best class of work and of precision in fitting and adjustment, as detailed in the affidavit of the aforesaid George Katz Douglas, are and have been invariably taken in all the work entrusted to our supervision by Messieurs Robert Stephenson & Company.

And I, the said George Crow, for myself say that I have during the period of thirty years had the personal superintendence of the construction, putting, and fitting together of all engines manufactured by the said firm of Robert Stephenson & Company.

And I, the said Robert Anderson, for myself say that I have for ten years been foreman of the erecting shop of the said firm of Robert Stephenson & Company.

GEO. CROW.
R. ANDERSON.

Sworn by the said George Crow and Robert Anderson, at Newcastle-upon-Tyne aforesaid, this 18th day of July, one thousand eight hundred and seventy, before me,—

R. R. DEES,
A Commissioner to administer Oaths in Chancery in England.

[Enclosure No. 6.]

I, Richard Peacock, of the firm of Beyer, Peacock, & Company, engineers, Gorton Foundry, near Manchester, in the county of Lancaster, England, do hereby solemnly and sincerely declare that, as locomotive engine-builders, my firm have constructed up to this date, for use in the Australian Colonies, the following locomotive engines, namely, sixteen engines for the New South Wales Railways, twenty-nine for the Victorian Railways, and two for the South Australian Railway; and that, in accordance with our invariable practice, each of the said engines, before it left our works, was erected, the boiler tested by hydraulic pressure, and the engine tried in steam; and I further declare that in no case have we ever delivered a locomotive engine from our works without having it first erected, the boiler tested by hydraulic pressure, and the engine tried in steam, whether such engine was to be used in Great Britain, Ireland, the Colonies, or in foreign parts: And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the fifth and sixth years of the reign of his late Majesty King William the Fourth, intituled "An Act to repeal an Act of the present Session of Parliament intituled 'An Act for the more effectual Abolition of Oaths and Affirmations taken and made in various Departments of the State and to substitute Declarations in lieu thereof and for the more entire suppression of voluntary and extra-judicial Oaths and Affidavits and to make other provisions for the Abolition of unnecessary Oaths.'"

R. PEACOCK.

Voluntarily made and subscribed before, and taken and received by }
me, at the city of Manchester, in the county of Lancaster, this }
second day of August, 1870, before me,—

RICHD. RADFORD,
A Commissioner to administer Oaths in Chancery in England.

[Enclosure No. 7.]

Mr. Fowler's Memorandum as to Locomotives.

2, Queen-square-place, Westminster, S.W.,
23 August, 1870.

Stevenson's engines (1541 to 1549) :—

18-inch cylinders.
24-inch stroke.
4-foot wheels (six-coupled).
Working pressure, 120 lbs.

The weight of these engines is, I believe, about 30 tons each = 67,200 lbs. weight, which divided by 6 gives about 10,200 lbs. adhesion.

The tractive power of such an engine—

$$= T = \frac{D^2 \times P \times L}{W} = \frac{324 \times 60 \times 24}{48} =$$

Where D = diam. of cylinder in inches

P = mean pressure $\frac{1}{2}$

L = stroke in inches

W = diam. of driving-wheel in inches

T = tractive force in lbs.

$$= 9,720 \text{ lbs.} = T$$

The power exerted in running—

$$= \frac{\text{Train resistance in lbs.} \times \text{Speed in feet per minute.}}{33,000} = \text{H.P.}$$

The ordinary duty of such an engine is, say a train of 400 tons on the level at 20 miles per hour,—

$$400 \times 10 = 4,000 \text{ traction of wagons.}$$

$$45 \times 20 = 900 \text{ traction of engine and tender.}$$

$$\text{Then } \frac{4,900 \times 1,760}{33,000} = 261 \text{ H.P. exerted.}$$

No. 7—*continued.*

With regard to Beyer and Peacock's engines—

18-inch cylinders.
24-inch stroke.
5'-9" wheels (four-coupled).

Here the adhesion, by reason of there being less weight on the coupled wheels, would be less, and the tractive power would be also less, say 6,760 lbs.; but at least an equal power would be developed by the engine, by reason of the higher speed that would be attained with the larger wheels.

With an ordinary load 35 to 40 miles could with ease be run, say 150 tons at 40 miles per hour,—

Tons.	
150	× 10 = 1,500
45	× 20 = 900

	2,000
then $\frac{2,400 \times 3,520}{33,000}$	= 256 H.P. exerted while running.

This statement, both as regards this engine and Stephenson's engine, is *considerably* below the actual power, all the results given are within the mark; and the accompanying letter from Mr. Beyer, one of the first practical engineers in Europe, to whom I wrote on the subject, quite coincides with this view.

[*With Enclosure No. 7.*]

C. F. Beyer, Esq., to John Fowler, Esq.

Gorton Foundry,
Manchester, 3 August, 1870.

Dear Sir,

I have collected, during a great many years, performances of locomotive engines on various railways, and under almost every variety of circumstances, and find that in their ordinary working 1 square foot of fire-grate will supply steam to move 600 lbs. resistance at 12½ miles per hour, or is equal to 20-horse power.

My concern has been making for your New South Wales Railways in all sixteen engines.

Thirteen outside cylinder engines, four coupled wheels, and three inside cylinder single engines; and as the former have a fire-grate area of 14½ square feet, and the latter 14 square feet, their power would be represented by 295 and 280 horse-power respectively.

Believe me, &c.,
C. F. BEYER.

[*Enclosure No. 8.*]

William Baker, Esq., to John Fowler, Esq.

London & North-western Railway,
Engineer's Office, Euston Station,
London, N.W., 25 June, 1870.

My dear Sir,

I have pleasure in sending you, on the other side, the prices we have paid for rails, asked for in your note of the 21st instant.

Yours truly,
WILLIAM BAKER.

STURGES MEEK.

No. 7—continued.

New South Wales.—Great Western Railway.

Extension Rydal to Bathurst.

Order for double-headed rails 75 lbs. per yard (Indent R. 55.)

Total amount about 4,480 tons.

Amount delivered 1,076 tons 19 cwt. 0 qrs. 7 lbs.

Contractors—The Parkgate Iron Co., Rotherham.

REPORT ON RAILS.

Report No. 5,
30th Oct., 1869.

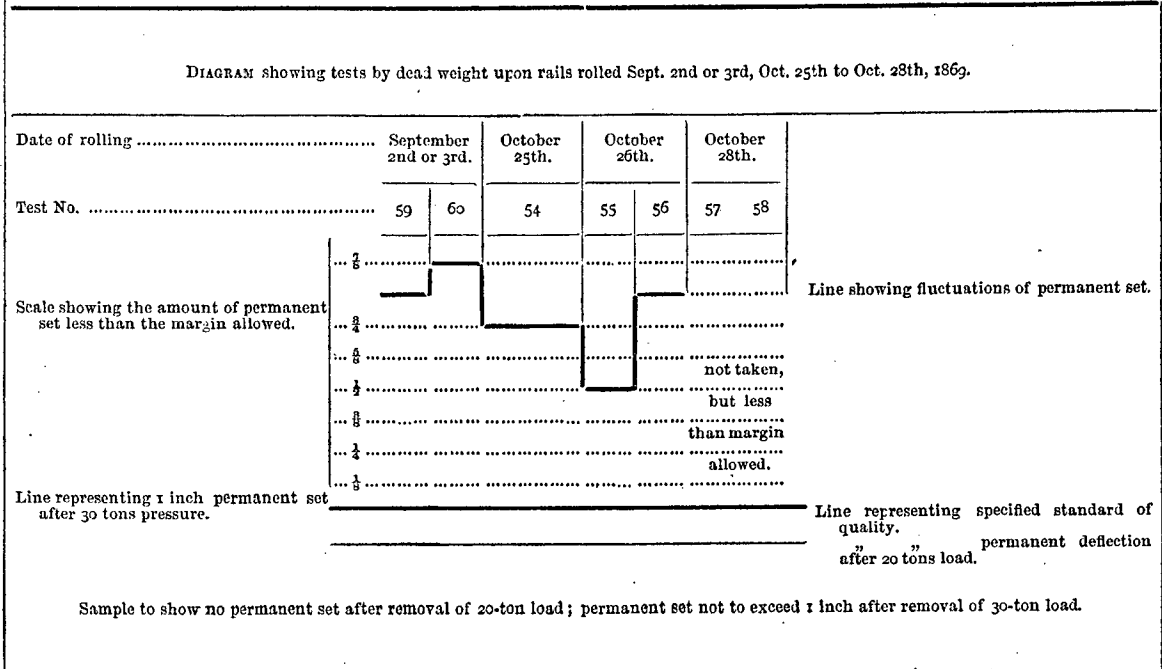

John Fowler, Esq.

Sir,

In accordance with your instructions, I have attended at the works of the Parkgate Iron Co. daily during the time that they have been rolling for the above order, from Oct. 25th to 28th inclusive, and beg to report that the rails rolled during that time are satisfactory in all respects, the section (average weight between 74.4 and 75.2 lbs. per yard), length, manufacture, and tests, being in accordance with the specification.

I have endeavoured by repeated tests to ascertain the quality of the rails, both judged by the specified method of testing and by observing their manufacture throughout.

The following diagram compiled from the details of tests attached, shows the tests made during the past week, the first tests being those made on the rails rolled in September and retained for subsequent tests before approval.

No. 7—continued.

The following is the condition of the order at the present date, an additional delivery than here shown was made of 644 rails, 24 feet long, weight 172 tons 10 cwt., forwarded to Liverpool for shipment per "Comadre," but until these rails have complied with the requirements of the specification they will not be entered on the delivery lists.

DIAGRAM showing the amounts to be delivered in each month, and the amount delivered up to 30th October, 1869.

New South Wales, Great Western Railway.—Extension, Rydal to Bathurst.

Order for double-headed rails, 75 lbs. per yard (Indent R 55).

Contractors and Manufacturers, the Parkgate Iron Co., Rotherham.

EXPERIMENTS ON FINISHED RAILS.

Description of the specified tests to which samples have to be subjected previous to the approval of the Rails.

By the falling weight.

"THE rails to be cut into lengths of 4' 6", which shall be tested on both heads under a falling weight of 1,800 lbs. raised 5 feet high, the bearings for the rail being placed 3' 6" distant from each other in the clear, and laid on a solid foundation.

"The rails to stand two such blows on either head without fracture, and the permanent deflection is not to exceed 1½ inches after this test."

Experiment on Sample No. 46, Parkgate Iron Works, October 26th, 1869.

When rolled.	No. of blows given.	Descent of weight.	Permanent set at A.		Remarks.
			More than allowed by—	Less than allowed by—	
October 25th	1st.	5 ft.	Rail not broken.

No. 8.

PROPOSAL TO DISPENSE WITH NIGHT MAIL TRAIN.

A.

MINUTE FOR CABINET.

24 January, 1870.

THE Postal Department has drawn attention to the late arrival of the Southern and Western mails. This arises from the necessity of bringing these mails by the early goods train, and owing to the great increase of traffic and the want of engine power, this goods train is unavoidably late.

The Railway Department would be relieved of considerable expense if it were possible to dispense with the night mails. There are now two trains running to Goulburn daily, one of which would be sufficient if the postal arrangements could be altered.

It is submitted that this question should be considered first,—as regards the desirability of economising the expenditure by altering the time of arrival and departure of mails (the Railway Time-table could be made to meet an alteration of the kind); and secondly,—if the public convenience will not admit of the change—whether the expense incurred should not be made to fall upon the Postal instead of the Railway Department.

B.

The Commissioner for Railways to the Postmaster General.

Department Public Works,
Railway Branch,
Sydney, 16 February, 1870.

Sir,

I have the honor to address you on the subject of the Mail Trains. It will, doubtless, be in your recollection that when the Railway was about to be opened to Goulburn the question of abolishing the 5 o'clock p.m. train—used as the Mail Train, was brought under discussion; and that it was then shown, that if postal exigencies could have admitted of it, this train might have been discontinued at a saving to this Department of £24,000 per annum.

2. As a further extension of the Great Western Railway is shortly to be opened, this appears to me to be a favourable opportunity for the revival of the question, and as the saving that will now be effected by the discontinuance of this train will be £30,000 per annum, I desire to urge upon you to consider this important subject without delay, with a view to its being ascertained whether in consideration of the large saving that will accrue, the postal arrangements might not be made to admit of the discontinuance of the 5 p.m. train in favour of a mail train to leave Sydney from 7 to 9 a.m. The evening mail train to arrive in Sydney, from 6 to 8, or 9 o'clock.

3. If this arrangement cannot be carried out, I request that you will have the goodness to favour me with a statement of the reasons that will prevent it, in order that the same may be submitted to the Cabinet.

4. I must ask you for an early reply, as if the proposal is to be approved, it is desirable to bring it into operation upon the opening of the further extension alluded to.

I have &c.,

JOHN SUTHERLAND,
Commissioner for Railways.

C.

The Postmaster General to the Commissioner for Railways.

(Objections to proposed alteration in running the Mail Trains.)

General Post Office,
Sydney, 23 February, 1870.

Sir,

I have the honor to inform you, in reply to your letter dated the 16th instant, No. 70/138, on the subject of the Mail Trains, that I have very carefully considered the proposals contained therein, and beg to state that in the event of its being determined to make the alterations proposed in the hours of starting, and the discontinuance of certain trains, so far as this Department is concerned there shall be no objections whatever raised, and the necessary postal arrangements for giving effect thereto will be made with the least possible delay.

2. The objections to the proposed alterations which will certainly be made will come from the business portion of the Sydney public and of the whole Western and Southern Districts. These objections may be stated as follows, viz:—

The mails arriving here, say at 6 p.m., could not be delivered until 8 p.m., and then only to the few persons whose places of business are kept open until that hour. To the majority, the mails leaving Goulburn, Bathurst, &c., *some 12 hours earlier than at present*, would not be delivered until the following morning, no earlier than at present, whilst the reply to those letters instead of leaving as at present at 5 p.m. the same day, would be delayed in Sydney under the proposed arrangement until next morning; thus absolutely lengthening the course of post between Goulburn and other places and the Metropolis by 24 hours.

Other objections exist, the importance of which will depend on the precise hours which may be fixed for the departure of the trains. If, for instance, the train from Sydney were to leave at 7 a.m., the pillar and suburban boxes would have to be emptied some hours earlier than at present to accommodate the Railway Mails, to the inconvenience of those persons who may post for Sydney and suburbs, and who under present arrangements can so post up to 7:30 a.m.

The hour for posting at the Head Office, supposing the train were to leave at 7 a.m., would be 6 o'clock; if at 8 a.m., it would be 7 o'clock; or if at 9 a.m., 8 o'clock.

The closing of the mails at any of these hours would be most inconvenient to business.

Complaints would doubtless come from many places which now receive two mails daily, but which would only receive one. I am, however, of opinion that one mail a day is ample to and from the places alluded to.

3. I have laid before my Honorable Colleague the principal objections I take to the alteration of the present time-tables for the mail trains. There are, doubtless, other objections which do not at the present moment occur to me; and I much fear that if the mails to and from the Southern and Western interiors arrive and depart, as is proposed, the dissatisfaction will be so loud and general, that the existing hours, which cannot be improved upon (except in respect to there being more punctuality observed in the arrival of the morning train), would have to be reverted to.

I have, &c.,

DANL. EGAN.

No. 11.

List of Locomotive Engines on the Railways of New South Wales, 31 December, 1871.

GREAT SOUTHERN AND WESTERN LINES.

No.	Description of Engine.	Diameter and position of Cylinders.	Diameter of Wheels.			Whether coupled or single.	Length of Stroke.	Maker's Name.	Commenced to run.	Remarks.
			Leading.	Driving.	Trailing.					
1	Tender	16 inches inside	5 ft. 6 in.	5 ft. 6 in.	3 ft. 9 in.	Coupled	2 ft. 0 in.	R. Stephenson	May, 1855	
2	Tender	16 inches inside	5 ft. 6 in.	5 ft. 6 in.	3 ft. 9 in.	Coupled	2 ft. 0 in.	R. Stephenson	Sept., 1855	
3	Tender	16 inches inside	5 ft. 6 in.	5 ft. 6 in.	3 ft. 9 in.	Coupled	2 ft. 0 in.	R. Stephenson	Sept., 1855	
4	Tender	16 inches inside	5 ft. 6 in.	5 ft. 6 in.	3 ft. 9 in.	Coupled	2 ft. 0 in.	R. Stephenson	Sept., 1855	
5	Tender	14 inches inside	4 ft. 6 in.	4 ft. 6 in.	3 ft. 6 in.	Coupled	1 ft. 10 in.	Hawthorn	Nov., 1856	Formerly "Governor General."
6	Tender	15 inches outside	3 ft. 6 in.	5 ft. 6 in.	3 ft. 6 in.	Single	1 ft. 10 in.	Fairbairn	Mar., 1856	
7	Tender	15 inches outside	3 ft. 6 in.	5 ft. 6 in.	3 ft. 6 in.	Single	1 ft. 10 in.	Fairbairn	April, 1856	
8	Tank	15 inches outside	3 ft. 6 in.	5 ft. 6 in.	3 ft. 6 in.	Single	1 ft. 10 in.	Manning, Wardle, & Co.	Jan., 1859	
9	Tender	15 inches outside	3 ft. 6 in.	5 ft. 9 in.	3 ft. 6 in.	Single	1 ft. 10 in.	Manning, Wardle, & Co.	Dec., 1858	
10	Tender	17 inches inside	3 ft. 6 in.	5 ft. 6 in.	5 ft. 6 in.	Coupled	2 ft. 0 in.	Railway Works, Sydney	June, 1870	This engine was numbered 10 in order to fill gap in the numbers caused by old No. 10 having been sent to Great Northern Railway in 1866.
11	Tender	15 inches outside	3 ft. 6 in.	5 ft. 9 in.	3 ft. 6 in.	Single	1 ft. 10 in.	Manning, Wardle, & Co.	Oct., 1861	
12	Tank	16 inches outside	3 ft. 6 in.	5 ft. 6 in.	3 ft. 6 in.	Single	1 ft. 10 in.	Manning, Wardle, & Co.	Nov., 1861	
13	Tender	16 inches outside	3 ft. 6 in.	5 ft. 0 in.	5 ft. 0 in.	Coupled	1 ft. 10 in.	Manning, Wardle, & Co.	June, 1863	
14	Tender	16 inches inside	3 ft. 6 in.	6 ft. 0 in.	3 ft. 6 in.	Single	1 ft. 8 in.	Beyer, Peacock, & Co.	Nov., 1865	Engines numbered 14 to 16 in Report for 1864 are now numbered 29 to 31.
15	Tender	16 inches inside	3 ft. 6 in.	6 ft. 0 in.	3 ft. 6 in.	Single	1 ft. 8 in.	Beyer, Peacock, & Co.	Jan., 1866	
16	Tender	16 inches inside	3 ft. 6 in.	6 ft. 0 in.	3 ft. 6 in.	Single	1 ft. 8 in.	Beyer, Peacock, & Co.	Sept., 1865	
17	Tender	18 inches inside	4 ft. 0 in.	4 ft. 0 in.	4 ft. 0 in.	Coupled	2 ft. 0 in.	R. Stephenson	May, 1865	
18	Tender	18 inches inside	4 ft. 0 in.	4 ft. 0 in.	4 ft. 0 in.	Coupled	2 ft. 0 in.	R. Stephenson	Sept., 1866	
19	Tender	18 inches inside	4 ft. 0 in.	4 ft. 0 in.	4 ft. 0 in.	Coupled	2 ft. 0 in.	R. Stephenson	Sept., 1865	
20	Tender	18 inches inside	4 ft. 0 in.	4 ft. 0 in.	4 ft. 0 in.	Coupled	2 ft. 0 in.	R. Stephenson	Jan., 1867	
21	Tender	18 inches inside	4 ft. 0 in.	4 ft. 0 in.	4 ft. 0 in.	Coupled	2 ft. 0 in.	R. Stephenson	Jan., 1867	
22	Tender	18 inches inside	4 ft. 0 in.	4 ft. 0 in.	4 ft. 0 in.	Coupled	2 ft. 0 in.	R. Stephenson	Jan., 1867	
23	Tender bogie	18 inches outside	3 ft. 0 in.	5 ft. 9 in.	5 ft. 9 in.	Coupled	2 ft. 0 in.	Beyer, Peacock, & Co.	April, 1867	
24	Tender bogie	18 inches outside	3 ft. 0 in.	5 ft. 9 in.	5 ft. 9 in.	Coupled	2 ft. 0 in.	Beyer, Peacock, & Co.	Feb., 1867	

324-7

GREAT SOUTHERN, WESTERN, AND RICHMOND LINES.
LIST of Machinery in Workshops, &c., 31st December, 1871.

1 20-horse power steam engine, with 2 boilers 20 ft. long and 5-ft. 6-in. diameter. For driving machinery at Sydney.	1 6-in. common cutting lathe.	2 small drilling machines.
1 5-ft. 6-in. Railway wheel lathe.	1 5-in. do.	1 plate bending machine.
1 4-ft. do. This was originally a tire-grinding machine, but was converted into a lathe.	1 12-ft. planing machine.	1 tire do.
1 3-ft. 6-in. do.	1 6-ft. do.	1 45-cwt. steam hammer, with 3 ton crane, boiler, &c., complete.
1 12-in. screw cutting lathe.	1 3-ft. do.	1 15-cwt. do. with 1 ton crane, &c., complete.
1 11-in. do.	1 double-headed shaping machine, 18-in. stroke.	1 hydraulic press.
1 9-in. do.	1 bolt and nut shaping machine.	1 vertical saw.
1 6-in. do.	1 slotting machine, 12-in. stroke.	2 circular saws.
1 9-in. common do.	1 small slotting machine, 7-in. stroke.	1 fan for smiths' fires.
	1 punching and shearing machine.	1 locomotive engine weighing machine.
	1 bolt screwing machine.	2 overhead cranes attached to wheelathes.
	1 radial drilling machine.	1 travelling crane.
	1 vertical do.	
	4 crab winches.	
<i>Engines and Pumps for supplying water.</i>		
1 6-horse power engine and pair of 7-in. pumps at Sydney, with tubular boiler.	1 6-horse power engine and two pairs of 3½-in. pumps at Penrith. This engine was formerly used for pumping at Sydney.	
1 4-horse power (Garrett and Marshal's) pumping engine at Sydney.	1 4-horse power engine and pair of 4-in. pumps at Blackheath.	
1 4-horse do. do. at Liverpool.	1 4-horse power engine (portable). This is an old engine formerly in use at Liverpool. It requires a thorough repair.	
1 4-horse do. do. at Wingecarribee.	1 3½-in. hand pump at Duck River.	
1 4-horse do. do. at Blue Mountain.	1 pair of 4-in. hand pumps at Windsor.	
1 6-horse power engine and pair of 7-in. pumps at Menangle.	1 3-in. hand pump at Richmond.	
1 4-horse power engine and 7-in. double acting pump at Bargo.	1 3-in. hand pump at Blacktown.	
1 4-horse power engine and pair of 4-in. pumps at Barber's Creek.	1 pair of 3-in. hand pumps at Rydal.	
1 4-horse do. do. at Goulburn.		

GREAT NORTHERN RAILWAY.

LIST of Machinery and Pumping Engines on this Line, 31st December, 1871.

1 self-acting slide break and surfacing lathe, moveable bed 20 feet long; base plate 30 feet long.	1 self-acting double-headed shaping machine.
1 self-acting screw cutting lathe, 12-in. centres, bed 15 ft. long.	1 bolt and nut screwing machine to screw from ½ in. to 2 in diameter.
1 self-acting lathe, 6-in. centres, bed 6 ft. long.	1 punching and shearing machine, arranged so that both operations can go on at once, to punch ¼-in. holes in ½-in. plate.
1 lathe, 10-in. centres, bed 12 ft. long—not self-acting.	1 small punching press, for punching small holes in sheet iron.
1 foot lathe, 8-in. centres, bed 6 ft. long; turning patterns.	1 small machine for making bolts and nuts.
1 self-acting planing machine, to plane work, 6 feet long and 3 ft. 6 ins. wide.	1 hydraulic press for drawing wheels off and on their axles.
1 self-acting slotting machine, 12-in. stroke.	1 machine for weighing engines.
1 self-acting vertical drilling machine to drill holes 2 inches diameter in centre of work 2 ft. 8 in. diameter.	
<i>Engines and Pumps for supplying water.</i>	
1 stationary engine and boiler for driving this machinery, 10-horse power.	1 pumping engine and boiler, 4-horse power, at Camberwell.
1 pumping engine and boiler, 3-horse power, at Honeysuckle Point.	1 do. do. at Murrurundi.
1 pumping engine and boiler, 3-horse power, at West Maitland.	1 do. do. at Aberdeen.
1 pumping engine and boiler, 3-horse power, at Thorsby's Creek.	1 hand pump, 3½ ins. diameter, 6½ ins. stroke, at Morpeth.
	2 do. 4 ins. do. 5¼ do. at Singleton.
	1 do. do. do. at Anvil Creek.
	1 do. do. do. at Wingen.

NEW SOUTH WALES.							
Rates for Live Stock.							
Cattle—each.	2 Cows, or 5 Calves, or 20 Sheep, or 15 Pigs— $\frac{1}{4}$ Truck.	4 Cows, or 10 Calves, or 40 Sheep, or 30 Pigs— $\frac{1}{2}$ Truck.	8 Cows, or 20 Calves, or 80 Sheep, or 60 Pigs—Full Truck.	Bulls—each.			
3d. per mile.	4d. per mile.	7d. per mile.	10d. per mile.	7d. per mile.			
Minimum charge:—Cattle, 6s., or at rate for $\frac{1}{2}$ truck; calves, 1s. 6d.; sheep or pigs, 1s.; bulls, 10s. 6d.							
CATTLE.							
In numbers of not less than 16, will be conveyed at owner's risk, at 8d. per mile per waggon—to be loaded and unloaded by owners.							
RATES FOR SHEEP.							
Sheep in flocks, conveyed at owner's risk, as follows, viz.:—							
Not exceeding 40 miles 5d. per head.							
40 to 60 " 6 $\frac{1}{2}$ d. "							
60 to 80 " 7 $\frac{1}{2}$ d. "							
80 to 100 " 8 $\frac{1}{2}$ d. "							
100 to 120 " 9d. "							
Over 120 " 10d. "							
To be loaded and unloaded by owners.							
The charge for sheep in flocks is for any number when the number at per head exceeds the charge for a full truck.							
CONDITIONS FOR CONVEYANCE OF LIVE STOCK.							
The Commissioner does not guarantee arrival at any particular time, nor for any particular market.							
Live stock, in full trucks, or portions of trucks, will be conveyed to and from such stations only as have accommodation for loading or unloading; and flocks and herds only at convenient times to be previously arranged with the Traffic Manager.							
In all cases of conveyance of live stock, owners must unload same within three hours after arrival, or the stock will be unloaded by the Department, at owner's risk, and a charge of 2s. per truck will be made.							
Rates for Fresh Meat.							
In van-loads of not less than 6 carcasses of beef, or 20 ditto mutton, or 10 ditto pork or veal.							
Distance.	Beef 4 $\frac{1}{2}$ Carcass	Pork or Veal 4 $\frac{1}{2}$ Carcass	Mutton 4 $\frac{1}{2}$ Carcass	Distance.	Beef 4 $\frac{1}{2}$ Carcass	Pork or Veal 4 $\frac{1}{2}$ Carcass	Mutton 4 $\frac{1}{2}$ Carcass

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BOWENFELS COAL MINING AND COPPER SMELTING COMPANY'S RAILWAY BILL.

(PETITION AGAINST—MR. ANDREW BROWN.)

Ordered by the Legislative Assembly to be printed, 18 February, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of Andrew Brown, of Coerwull, Lithgow, in the Colony of New South Wales,
Esquire,—

RESPECTFULLY SHOWETH:—

1. That a Bill has been introduced into your Honorable House, for the purpose of enabling certain persons carrying on business at Bowenfels and Sydney, under the name and style of the "Bowenfels Coal Mining and Copper Smelting Company," to construct a Railway or Tramway from land in Lithgow Valley, belonging to them, to and to connect the same with the Great Western Railway.

2. That by the said Bill it is proposed to enable the said persons to take compulsorily certain lands, the property of your Petitioner.

3. That the portions of land proposed to be taken from your Petitioner comprise a mill race, the property of your Petitioner, serving to the supply of power to a flour mill and cloth factory of your Petitioner, long established on your Petitioner's land, and giving constant employment to a large number of industrious persons.

4. That the Bill makes no provision for enabling your Petitioner to enter upon the lands of which it is proposed compulsorily to deprive him, for the necessary purposes of cleansing, repairing, or renewing the said mill race, as occasion may from time to time require; and if the said Bill should pass into law, your Petitioner could not so enter without being a trespasser.

5. Before the introduction of the said Bill into Parliament, the promoters thereof had correspondence with your Petitioner in respect of the liberty desired by them to cross his estate; and your Petitioner proposed to afford them such liberty, on payment of a reasonable toll to your Petitioner in respect of the traffic to take place over your Petitioner's land; but the said promoters informed your Petitioner that if he would not then sell them the land, they would take it by force of the authority of Parliament.

6. Your Petitioner respectfully submits to your Honorable House that your Petitioner's flour mill and cloth factory, long established, are of equal interest with, and are equally beneficial to the Colony with the coal mines and smelting works of the promoters of the said Bill, and that public advantage may not necessarily result from any impediment which such promoters in seeking their own gain throw in the way of your Petitioner.

7. That it is not the case of a public interest to which private interests must yield, but is that of one private interest seeking to make good bargain with another private interest by the force of legislative authority.

8. That if the said Bill pass into law, proper provision should be made for the maintenance of your Petitioner's mill race, and for enabling your Petitioner, from time to time, and at all times hereafter, to enter upon the land of which he is to be deprived, for the purpose of viewing, cleansing, repairing, and, when needful, of reconstructing his said mill race, and that the arbitrator's declaration should contain an averment that such arbitrator is not interested directly or indirectly in the said "Bowenfels Coal Mining and Copper Smelting Company," or in the works of the same.

Your Petitioner, therefore, humbly prays that his interests may have the favourable consideration of your Honorable House, and that he may have such relief in the premises as to your Honorable House may seem meet; and that your Petitioner may be heard before your Honorable House, by himself, his Counsel, or Solicitor, and may be permitted to adduce evidence in support of his case.

And your Petitioner will ever pray, &c.

ANDREW BROWN.

Coerwull, 13 February, 1873.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE

ON THE

BOWENFELS COAL MINING AND COPPER SMELTING
COMPANY'S RAILWAY BILL;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE,

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
11 *February*, 1873.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1873.

1872-3.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 42. FRIDAY, 7 FEBRUARY, 1873.

5. BOWENFELS COAL MINING AND COPPER SMELTING COMPANY'S RAILWAY BILL (*"Formal" Motion*):—
Mr. Robertson moved, pursuant to Notice,—
(1.) That the Bowenfels Coal Mining and Copper Smelting Company's Railway Bill be referred to a Select Committee for consideration and report.
(2.) That such Committee consist of Mr. Clarke, Mr. Garrett, Mr. Hill, Mr. Lackey, Mr. G. A. Lloyd, Mr. Terry, Mr. Single, Mr. Sutherland, Mr. J. S. Smith, and the Mover.
Question put and passed.

VOTES No. 43. TUESDAY, 11 FEBRUARY, 1873.

8. BOWENFELS COAL MINING AND COPPER SMELTING COMPANY'S RAILWAY BILL:—Mr. Robertson, as Chairman, brought up a Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 7th February, 1873.
Ordered to be printed.

**BOWENFELS COAL MINING AND COPPER SMELTING COMPANY'S
RAILWAY BILL.**

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, to whom was referred for consideration and report, on the 7th February, 1873, the "*Bowenfels Coal Mining and Copper Smelting Company's Railway Bill*,"—beg to report to your Honorable House,—

That they have examined the Witness* named in the margin (whose * Wm. Glover,
Esq. evidence will be found appended hereto); and that, the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Clauses of the Bill, in which it was not deemed necessary to make any Amendment.

Your Committee now beg to lay before your Honorable House the Bill without Amendment.

JOHN ROBERTSON,
Chairman.

No. 2 Committee Room,
Sydney, 11 February, 1873.

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 11 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Robertson, | Mr. Garrett,
Mr. Clarke.

Mr. Robertson called to the Chair.

Entry in Votes and Proceedings appointing the Committee, *read* by the Clerk.

Printed Copies of the Bill *referred*, and Original Petition to introduce the same before the Committee.

Present:—G. W. Lucas, Esq. (*Solicitor for the Bill*).

William Glover, Esq. (*one of the Promoters of the Company*), called in and examined.

Room cleared.

Preamble *read* and considered.

Question,—“That this Preamble stand part of the Bill,”—*put* and *passed*.

Bill *read* and *agreed* to.

Chairman to report the Bill to the House without Amendment.

WITNESS.

Glover, William, Esq.....

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

BOWENFELS COAL MINING AND COPPER SMELTING
COMPANY'S RAILWAY BILL.

TUESDAY, 11 FEBRUARY, 1873.

Present:—

MR. CLARKE, | MR. GARRETT,
MR. ROBERTSON.

JOHN ROBERTSON, Esq., IN THE CHAIR.

George Lucas, Esq., appeared as Solicitor for the Bill.

William Glover, Esq., called in and examined:—

1. *Mr. Lucas.*] You are one of the proprietors of the Bowenfels Coal Mining and Copper Smelting Company? Yes. W. Glover,
Esq.
2. You have established collieries at Bowenfels in this Colony? Yes.
3. In conjunction with coal mining, you intend erecting buildings and works for the purpose of smelting copper and other ores? Yes. 11 Feb., 1873
4. You also intend constructing a line of railway from your coal mine in Lithgow Valley to a point on the Great Western Railway? We do.
5. For the purpose of getting your coal more easily to the railway? Yes.
6. What is the distance of this branch line from point to point? About half a mile, within a chain.
7. *Chairman.*] That is the line you now desire power to construct? Yes.
8. *Mr. Lucas.*] The proposed railway passes through private land, the property of Mr. Andrew Brown? Yes.
9. You are one of the Promoters of the Bill for the construction of the railway? Yes.
10. This Bill contains authority to construct the proposed railway, limiting the width thereof to sixty-six feet, including foundations, abutments, and supports? Yes.
11. It vests in the Company without conveyance the ground and soil, and so much of the site of the said railway as passes over the land of the said Andrew Brown, with all rights thereto? Yes.
12. The Bill contains all the usual clauses for compensation and other things connected with such matters? Yes.
13. Have you a plan of the proposed railway? Yes. (*Plan produced.*)
14. Can you inform the Committee what is the area of land taken from Mr. Andrew Brown? One acre, one rood, and nineteen perches.
15. Is the line of railway marked at every station throughout the survey? It is.
16. Have you heard of any intention to oppose this Bill, on the part of Mr. Andrew Brown or the Government? No; on the contrary, I have been given to understand by one of our co-proprietors that Mr. Brown would offer no objection.
17. Notice has been given in the public prints, and everything complied with that is required by the Standing Orders of the Legislative Assembly? Yes.
18. You intend working these coal mines on a much larger scale when the Bill becomes law? Yes.

BOWENFELS COAL MINING AND COPPER SMELTING COMPANY'S RAILWAY BILL.

- W. Glover,
Esq.
- 11 Feb., 1873.
19. Is it likely the Government will take coal from your mine? Without a doubt, because they have had it already. The original proprietors had the first contract with the Government for supplying their engines with coals.
20. Who do you think will be the chief consumers of your coal? We look to Bathurst and the western copper mines, also the suburbs of Sydney, Penrith, Parramatta, and all the country from Penrith to Sydney: we think we are bound to command the coal trade of the suburbs.
21. Have you made any estimate of the quantity of coal you are likely to send away from the mine during the first year after the branch line of railway is completed? We calculate on something like from thirty to forty or fifty thousand tons a year when we get the mine and railway into full operation.
22. The passing of this Bill will enable you to give the Government railway a large increase of freight both to Bathurst and to Sydney? Yes, not only for the conveyance of coal to Sydney and Bathurst, but for the conveyance of ore from the copper mines; and there is also bound to be a large increase in the population of the district, causing extra traffic in the way of passengers, and goods for their supply. In various ways our operations will increase the traffic on the Government railway.
23. So that it will be for the public interest and advantage that you should have permission to construct this line? Yes, I think so decidedly.
24. Is the coal of good quality? Unquestionable.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY DEPARTMENT.

(EXPLANATIONS AND REPORTS IN CONNECTION WITH EVIDENCE GIVEN BEFORE SELECT COMMITTEE ON CIVIL SERVICE.)

Ordered by the Legislative Assembly to be printed, 25 April, 1873.

Explanations and Reports in connection with the Evidence given before the Select Committee on the Civil Service, as regards the Railway management.

No. 1.

MINUTE PAPER.

Mr. Holroyd has given some evidence before the Select Committee on the Civil Service, which reflects upon the present management of the Railway business. I request that the Commissioner will go very carefully through this evidence, and report to me thereon. Mr. Holroyd's replies to questions 737 to 741, 750 to 752, should receive particular attention.

Mr. Moody's evidence also requires inquiring into, especially that having reference to the alleged inefficiency of the staff, and the necessity for their receiving education at the hands of Mr. Moody.

JOHN SUTHERLAND.
17th March, 1873.

Having, in accordance with the instructions of Mr. Secretary Sutherland, carefully perused the evidence of Mr. Holroyd, more particularly his replies to Questions 737 to 741 and 750 to 752 inclusively, and compared them with the records of the Department, I have the honor to report as under.

22nd April, 1873.

JOHN RAE.

Mr. Holroyd's Evidence.

THE COMMISSIONER TO THE ENGINEER-IN-CHIEF FOR RAILWAYS.

As I find certain allusions to you and the officers in your department made by Mr. Holroyd in his evidence before the Select Committee on the Civil Service, I have the honor to request that you will be good enough to peruse his evidence, more particularly his answers to question 733, 734, and 735, and favour me with any observations you may desire to make thereon.

JOHN RAE.

THE ENGINEER-IN-CHIEF TO THE COMMISSIONER FOR RAILWAYS.

In accordance with your request, I have the honor to forward to you my replies to Mr. Holroyd's statements, with reference to myself and the officers and men under my charge.

JOHN WHITTON.

Question 733.

I believe I am correct in stating that no instructions whatever were given to me by Mr. Holroyd, with reference to preparing drawings for offices at the Redfern Station, and I am borne out in that impression by the fact that no drawings for a new station at Redfern were ever prepared, or any sketches made, until 1870, six years after Mr. Holroyd had ceased to be Minister.

Question 734.

Mr. Holroyd here does me a great injustice, in stating that he could never find out my reasons for objecting to build offices at the Redfern Terminus, and I believe he is the only Minister who ever held office who will accuse me of refusing to give reasons for any course I proposed to adopt. I may, however, be permitted to state, that if Mr. Holroyd had asked in writing for my opinion, he would most assuredly have had it; but I have no recollection of any such conversation as he alludes to.

I dare say that Mr. Holroyd's coachman is a very respectable man, and a very intelligent man in that station of life in which Mr. Holroyd has been pleased to place him, but he is hardly the class of man one would expect Mr. Holroyd to consult on railway management or railway practice; but as Mr. Holroyd has hazarded an opinion on the authority of his coachman, I regret I am compelled to say that, from inquiries I have made, the statement of that respectable person is not strictly correct, as no wages have ever been paid by the use of a trolley between Sydney and Picton, or Sydney and Penrith.

Therefore, three men at 6s. 6d. a day were not employed trolleying the Paymaster up the line.

With reference to the number of men employed on the permanent way, I have no hesitation in saying that there are not more than are absolutely required to provide for the public safety, and that there are not more men per mile than during Mr. Holroyd's tenure of office as Minister.

The remainder of Mr. Holroyd's statement with reference to the dismissal of men is fully explained in the following correspondence.

Question 735.

Great Southern and Western Railway.—Engineer's Department.

(No. 1,888.)

23 March, 1864.

Memorandum to Mr. Trotter.

The following copy of a minute of the Honorable the Minister for Public Works is forwarded for your information and guidance.

W. H. QUODLING.

(64/421.)

No repairs to gates, platforms, bridges, fences, station-houses, sheds, &c., on the different lines of Railway are in future to be done by day-work, if the estimate for any such work shall amount to £5, without the authority of the Minister for Public Works. All such works, the laying permanent way, and other works on the said lines, to be executed, as far as practicable, by contract.

Tenders to be called for at once for laying and relaying permanent way. The contractor to find the labour, and the Government the materials.—A.T.H., 16/3/64.

MEMORANDUM TO THE ENGINEER-IN-CHIEF FOR RAILWAYS.

G. S. R. Way and Works Branch,

24 March, 1864.

REFERRING to copy of Minister's minute of 16/3/64, forwarded for my information 23/3/64, I beg respectfully to ask whether the labour of taking up and relaying the portion of the up line from Parramatta Junction, Sydney-wards, that yet remains to be done, is to be let by contract? The material, *i.e.* rails, spikes, sleepers, but not ballast, are on the ground for a portion of the work, and the remainder could be supplied as required.

It was intended to have started this work directly after Easter, and the sooner it is done the better.

I have a number of men at present employed that I must discharge if the work is to be done by contract.

I may add that by reason of the peculiar nature of the work a contract will not be advantageous because a number of men will have to be employed to load ballast and other materials, whose time when not engaged will not be very profitably occupied.

I am, &c.,

DURANT TROTTER.

The Commissioner.—W.H.Q., 24/3/64.

Submitted.—J.R., 29/3/64.

I recommend that this work be done by the Department, and not offered for public competition.—

J.W., 6/4/64.

Submitted.—J.R., 6/4/64.

Resubmit when I am more at leisure, after Parliament has been prorogued.—A.T.H., 13/4/64.

End of month.—13/4/64.

Resubmit, 7/6/64.

Resubmitted, 7/6/64.—J.R.

Since my last minute I am informed that Mr. Trotter has been able to dispense with the services of fifty-eight men on the permanent-way. For the present I will continue the present system with the reduced staff—allowing an addition to the service for *emergencies only*, for which a special requisition must be sent to me.—A.T.H., 9/6/64.

Mr. Whitton, B.C., 9/6/64.

Mr. Trotter, for information.—J.W., 14/6/64.

Mr. Trotter, to be returned.—W.H.Q., 15/6/64.

The Honorable the Minister for Works is in error respecting the number of men discharged from the permanent-way, *i.e.*, from the permanent staff.

A reduction of *six* was made by direction of the Engineer-in-Chief, who went through the accounts, &c., with me, and decided where a reduction could be made.

The fifty-two men also discharged were *extra hands*, put on for a special purpose, *viz.*, the relaying and repairs on the line between Sydney and Parramatta, and the wages were charged to a special vote and not to revenue.

When the work was finished—except the portion still remaining to be done—the men were kept on for a short time to do various necessary works; and when these were finished, as no determination had been come to respecting the remainder of the relaying, they were discharged.

Seven men employed on the Picton line on account of the banks, &c., were also discharged at the same time.—D.T., 17/6/64.

Submitted.—J.R., 22/6/64.

Seen.—I think Mr. Trotter should have commenced the above minute in a different style.—A.T.H., 23/6/64.

Mr. Whitton.—J.R., B.C., 24/6/64. J.W., 29/6/64.

Mr. Trotter.—W.H.Q., 29/6/64. D.T., 30/6/64.

Department of Public Works,
Sydney, 23 May, 1864.

FROM this time no fresh hands are to be put on the permanent-way, except under a minute from the Minister of this Department. As the relaying of the up line at the Junction requires to be done take the men who can be spared from other parts of the line to do this service, more especially as Mr. Trotter informs me that with fifty men the relaying necessary can be accomplished in four days.

A.T.H.

In future, place one ganger over four men at least.—A.T.H.

I have the honor respectfully to submit to the Honorable the Minister for Works that I did not say that the necessary relaying could be done in four days with fifty men, but that with about fifty men it could be done in a week. I afterwards also explained to the Minister that this remark referred to a portion of the work only, as it could not conveniently all be done at once, and that to do the whole would take about a fortnight.

I have the honor also most respectfully to submit that to take all the men required to do this work from other parts of the permanent way would be a very serious risk; and is therefore a step, which as I am held by the terms of my appointment *solely responsible* for its efficient maintenance, I do not feel justified in taking, unless the Minister will hold me blameless for any accident that might happen whilst so many men are off the lines.

Twenty or perhaps twenty-five men could be spared to assist in doing this work, but the complement should be made up with extra hands.—DURANT TROTTER, 27/5/64.

Mr. Whitton.—J.R., B.C., 31/5/64.

The whole of the men should not be taken off their lengths for any purpose; but as it appears some of them can be spared for the purpose of assisting in relaying the up line near to the Junction, I recommend that the necessary extra hands should be employed by Mr. Trotter, so that the work may be completed as rapidly as possible.—J.W., 1/6/64.

Submitted.—J.R., 2/6/64.

The system of gangers and gangs is, in my opinion, absurd as at present conducted, and needs immediate reform. Yesterday I saw one ganger and two men packing sleepers on the Liverpool extension, work in which one ganger could overlook five, six, or more men. I hear constantly of the men complaining of the great difference in their and the gangers' pay, considering that they all do similar work. I will allow Mr. Trotter to engage twenty-five men (extra hands) for one week to relay the line, and these, with the twenty-five permanent men, will be able to do the work in the week. If preparations are made by getting the sleepers adzed and placed ready for laying before the 50 men are put on it will expedite the work.—A.T.H., 2/6/64.

Mr. Whitton, B.C., 3/6/64.

The Minister is probably not aware that the ganger has to walk over his length every morning and evening on week days, and once every Sunday, and three miles is therefore as great a length as can be given to one man if it be expected that he will carry out his instructions, and, in my opinion, it would not be consistent with public safety to give any increase in length. If, therefore, the lengths cannot be increased, it follows that to employ three or four men where two only are required would be a waste of public money.

I have no doubt many of the men do complain of the difference in wages between themselves and the gangers, but it should not be forgotten that the ganger is *responsible* for the length and not the men; that the ganger has to walk over his length every Sunday, which the men have not; also, that the ganger is a skilled laborer; the men are ordinary laborers.—J.W., 6/6/64.

Submitted.—J.R., 7/6/64. Seen.—A.T.H., 7/6/64.

Mr. Quodling, to note, B.C., 10/6/64.
Mr. Trotter, for information.—W.H.Q., 18/6/64. Seen.—D.T., 20/6/64.

Page 36. Questions 737, 738, 739, 740, 741.

Mr. Holroyd says that when he was Minister there was not a single porter on the line between Sydney and Parramatta, and that now, when fewer trains are running, there is a clerk and one or two porters, *if not more*, at every station, where formerly all the duties were done by the Station-master alone.

This is an exaggerated statement. There is no clerk employed at any of the suburban stations, *viz.*, Newtown, Petersham, Ashfield, Burwood, and Homebush. There are at each of these stations 1 Station-master and 1 porter.

In 1864 the Station-master did the duty, except at Burwood, where a porter was employed. The number employed, in addition to those engaged in 1864, amounts to 4; and the Traffic Manager states that the increased goods' traffic at these stations necessitated the employment of porters.

Although the tonnage at Newtown has fallen off, as compared with 1864, about 28 per cent., it has increased at Petersham 500 per cent., at Ashfield 350 per cent., at Burwood 200 per cent., and at Homebush 200 per cent. The revenue from these stations in 1864 amounted to £8,797. For last year the revenue was £12,967—showing an increase of £4,170; while the expense of the four extra porters amounted to only £510.

Mr. Holroyd is also mistaken as to the number of trains.

In 1864, there were 9 "down" suburban trains and 8 "up." There are now 12 "down" and 13 "up."

Mr. Holroyd adds—"With respect to the porters in Sydney, their name is legion. It is really painful to see the public money misspent in keeping so many porters on the platform of the Redfern Station. You are actually tumbling over them at every turn." This statement is as exaggerated as the last. See my minute of 16th instant, p. 9, herewith, where I state that after a thorough investigation, I do not feel justified in recommending any reduction in their numbers at present; and in this opinion I am borne out by the practical experience of Mr. Richardson, Acting Traffic Manager, Mr. Higgs, Assistant Traffic Manager, Mr. Crawford, Mr. Carlisle, and Mr. Paull, whose reports are appended.

MR. CARLISLE to THE COMMISSIONER FOR RAILWAYS.

John Dart	40	½	35/- \mathcal{P} week	"	4th "
Walter Williams	60	6	6/- \mathcal{P} diem	Greaser	3rd "
George Bridge	60	2	6/- " "	Night-watchman	3rd "
James Jones	60	11	5/- " "	Messenger, &c.	4th "
George Perrie	44	5½	7/- " "	Weigh clerk	1st V.G.
Thos. Ward	27	2	7/- " "	"	2nd G.

Character—V.G., Very good; G., Good; M., Middling.

All the men under my charge are sober and generally efficient, many of them superior. No complaint has been made by the foreman against any one during the last six months, either on account of drink or other irregularity, which would necessitate my recommending his removal. The number of men employed at this station is not in excess of the requirements, their time being fully occupied. The duties of receiving porters are particularly onerous and responsible.

THOMAS CARLISLE,
Station-master, Sydney, in charge of Goods Branch.

To the Commissioner for Railways.

17/4/73.

LIST of Men employed at the Redfern Station (Coaching Department), 16th April, 1873.

Name.	Age.	Years in Service.	Class.	Rate of Wages.	Situation.	Remarks.
J. Hankin	38	10½	2	10/- per diem	Booking Clerk	Good, steady man.
T. Bonamy	27	10½	1	10/-	Do.	Do. do.
— Pritchard	20	8 mths	4	30/- per week	Parcel Office	Junior; improving.
W. Sutton	63	15	3	8/- per diem	Night Clerk	Good, steady man.
J. Robinson	44	17½	1	12/-	Guard	Good, careful, steady man.
R. Darby	55	17½	1	12/-	Do.	Do. do.
C. Fitzpatrick	46	12	2	10/-	Do.	Good, steady man.
A. Miller	43	15	2	10/-	Do.	Do. do.
A. Clissold	40	13½	2	10/-	Do.	Do. do.
J. Gordon	29	5	2	10/-	Do.	Do. do.
M. Curran	34	6	3	10/-	Do.	Steady man.
J. Pike	48	10	2	10/-	Do.	Good, steady man.
S. Yorke	24	4	2	10/-	Do.	Do. do.
Geo. Dean	30	5½	2	10/-	Do.	Do. do.
Geo. Gee	33	12	2	8/-	Do.	Do. do.
Wm. Lutton	26	7	3	8/-	Do.	Steady man.
D. Conroy	35	6	3	8/-	Do.	Do. do.
W. Hegarty	29½	9½	1	9/-	Head Porter	Good, active, steady man.
Geo. Bellingham	34	5½	1	8/-	Ticket Collector	Do. do.
H. Perfeet	32	6½	1	8/-	Parcel Porter	Do. do.
S. Payne	38	6½	2	8/-	Do.	Good, steady man.
G. Nupier	40	4	2	7/-	Couplings	Good man for coupling trains, and steady.
A. Lemond	33	4½	3	7/-	Horses and carriages ..	Pretty good man.
J. Humphrys	35	4	3	7/-	Collects tickets	Steady man, but slow.
J. Chasling	28	5½	4	7/-	Washing and sweeping ..	Only fit for cleaning, &c.
R. Ward	35	2½	2	7/-	Luggage-man	Good, careful, attentive man.
E. Delaney	30	3½	2	6/-	Collects tickets	Do. do.
E. Gagan	34	2	2	6/-	First-class carriage sweeper.	Do. do.
Wm. Morrison	32	1	3	6/-	Luggage-man	Steady man, and improving.
Wm. M'Fadden	48	1	4	6/-	Second-class carriage sweeper.	Steady man; not active.
M. Gibbons	38	7 mths	4	6/-	Horses and carriages ...	Steady man.
O. Rowland	35	6 mths	4	6/-	Do.	Can't be depended on.
J. Stewart	33	2½ yrs.	2	6/-	Luggage-man	Good, steady man.
Wm. Hartley	28	6 mths	2	6/-	Do.	Good, steady man, and active.
R. Cavanaugh	23	5 "	4	6/-	Lamp-cleaner	Only fit for lamp-cleaner assistant.
H. Buchanan	29	4 years	4	6/-	Brass-cleaner	Steady man; not active.
J. Bartholemew	32	4 "	2	6/-	Luggage-man	Good, steady, active man.
J. Cavillion	35	5 mths	3	6/-	Lamp-cleaner	Good man for lamps.
G. Twyford	38	2 "	4	6/-	Office-cleaner	Only fit for cleaning.
J. Murray	35	3 years	4	35/- per week	Watchman on line	Useful man.
J. West	60	8 "	4	30/-	Watchman, yard	Old and infirm, but required.
A. Monteith	63	6 mths	4	30/-	Messenger	Useful.
Mrs. Monteith	50	2 "	4	20/-	Attendant, Ladies' Room	Useful.
G. Rae	14	8 "	4	20/-	Telegraph Operator	Good attentive boy.
Fred. Richardson	18	1½ "	4	30/-	Do.	Pretty fair clerk for Telegraph.
Geo. Bettridge	25	4 "	4	6/- per diem	Parcel Office	Acting as Clerk in Parcels Office; not suited for heavy work.
J. Harrison	35	10 yrs.	2	9/-	Guard, Funeral Trains...	Good, steady, active man.
J. Williams	26	1 "	3	6/-	Porter, Mortuary Station	Do. do.
J. Johnstone	22	3½ "	2	8/-	Clerk	Good, steady man.
Geo. Douglas	31	8 "	1	9/-	Signal-man	Good, steady, careful man.
H. Ludford	30	6¼ "	1	9/-	Do.	Do. do.
J. Bradley	32	4¾ "	1	9/-	Do.	Do. do.
A. Ball	38	17 "	2	8/-	Pointsman	Good man, and steady.
R. Watson	35	11½ "	1	8/-	Shunter	Good, steady, careful man.
C. King	32	5½ "	1	8/-	Guard	Do. do.
R. Crawford	28	2½ "	1	8/-	Ballast Guard	Do. do.
— M'Namee	40	10 "	2	8/-	Do.	Good, steady man.
H. Clarkson	25	4 "	2	7/-	Do.	Do. do.
T. Doyle	30	3½ "	2	7/-	Shunter	Do. do.
H. Campbell	38	5½ "	3	7/-	Do.	Steady man.
Wm. Hobbs	47	2½ "	4	7/-	Greaser	Do. do.
E. Bayless	30	5 "	4	6/-	Do.	Do. do.
E. Johnson	24	4½ "	2	6/-	Shunter	Good man, and steady.
Wm. Wells	35	8 mths	3	6/-	Do.	Steady man.
H. Hilbon	44	8 "	4	6/-	Point-cleaner	Steady, attentive man.
R. Gray	49	4 years	4	6/-	Do.	Steady man.
J. Dugan	33	4¼ "	2	7/-	Shunter	Do. do.

All the men at this station are absolutely required for the working of the traffic. Ticket collectors, luggage and horse carriage, and dog-men, are only employed as such when trains start and arrive. They are employed between trains washing and cleaning carriages, horse-boxes, &c., &c., averaging 43 daily and 10 spare ones once a week.

I have never at any time had an excess of men, and all are fully employed, except when trains are either starting or arriving; they are then on the platform to give passengers assistance if required.

ALEXR. CRAWFORD.

Station-master, Redfern, in charge of the Coaching Branch.

P.S.—I may state that five men are expressly told off to carry in passengers' luggage, and are in constant attendance on passenger trains for this purpose.—A.C., 21/4/73.

To the Commissioner.

Having been called upon to give an opinion of the state of the Traffic Branch, as regards the efficiency of the officers and servants, and further, as to whether there is a greater number of persons employed at the different stations than is called for by the requirements of the traffic, I have the honor to state, without fear of contradiction, that the officers and servants of the Traffic Branch are, as a body, as respectable, intelligent, and efficient men as it would be possible to meet with in any other department, or in any other pursuit, mercantile or otherwise, in the community.

I honestly believe that it would be impossible to carry on the work of the Commissioner with any degree of satisfaction to the public, or to the department, with fewer hands than are at present employed.

I may here state that my experience extends over a period of six years service in the Traffic Branch, during which time I have five times received promotion. For nearly two years I was employed as travelling Audit Clerk, during which time I visited each station monthly, and had every opportunity of becoming acquainted with the qualifications of the officers and servants. For nearly a like space of time I was in charge of the Goods Branch at Redfern Station, where I again had the opportunity of becoming thoroughly acquainted with the qualifications of the clerks and men who were placed under my control, and who, taken collectively, form the chief emporium of labour in the Traffic Branch. I have been later assistant to Mr. Moody, and am at present, for the second time, acting as Traffic Manager.

A. RICHARDSON,
Acting Traffic Manager,
22/4/73.

I HAVE never known a case, during the whole time I have been in the Service, when more men were taken on than were required for the work; in fact, while I had the management of the coaching at Redfern Station I often have been short of men, and applied for them without effect. In November, 1871, I applied for an assistant guard for goods train, but did not get one for several months, and then Deigan was appointed, who was then in the lamp room. With reference to Mr. Holroyd's statement (Q. 741), as to a batch of five porters having been sent by Mr. Sutherland, in September last, to be put on though there were no vacancies for them, I can give a flat denial to the statement. This was the month before I left Sydney for Newcastle, and they could not possibly have been taken on without my knowledge.

I consider that the number of the porters, instead of being "excessively excessive," as stated by Mr. Holroyd (Q. 736), is not more than required for the service, and frequently we are short-handed. It is not surprising that people unacquainted with railway management, when they see the number of porters on the platform at the time when trains are starting and arriving, when their services are required, may imagine that they are too numerous, and that when the trains have departed they will have nothing else to do; but it should be known that after the departure of the trains they have to wash and clean carriages, station-lamps, &c., between the running of the different trains.

As far as I am able to judge, the employes on the line are trustworthy, steady, and efficient, quite up to their duties, and their numbers cannot safely be reduced.

JOHN HIGGS,
Assistant Traffic Manager,
19/4/73.

To the Commissioner.

To the Commissioner for Railways,—

Sir,

According to your request, I have the honor to furnish you with the following information in reference to the number of men employed in this department, their general efficiency, sobriety, and honesty.

In regard to the first, I beg to state that it would be an impossibility to work this department with a smaller number of men than now employed; and out of the number employed, I can safely state that a large proportion is thoroughly efficient, and better men to fill their positions could not be found in Sydney; the remainder of the men are quite up to their work. As a proof of this, I may mention that during the time that I have had charge of this department I have only found it necessary (to the best of my belief) to report one man for inefficiency, and that man was some time since dismissed. I likewise beg to state that the men employed have their time fully occupied by their duties, with the exception of three days a week, viz., Mondays, Wednesdays, and Thursdays, when there is a little slack time from about 11.30 a.m. until 3 p.m.; and out of this time there are two hours for dinner, when only half the usual number are at work, one-half having from 12 to 1, the other from 1 till 2; and in the wool season this is far from being the case, as every minute of their time is fully occupied, and the men having a little spare time at midday, fully make up for it in the evening when the rush of goods for transmission takes place. We have sent during the last three months from this station 3,009 loaded trucks.

I have, &c.,
CHARLES PAULL,
Foreman.

To the Commissioner.

With reference to the batch of five men alleged to have been sent by Mr. Sutherland to be put on, though their services were not required, I have obtained from the Acting Traffic Manager the following list of the men who were employed at Sydney Station in the coaching branch in the month of July, 1872; and the changes which occurred in the staff during the following five months as they occurred.—J.R.

Geo. Bellingham.	Wm. Deacon.
Geo. Parsons.	Wm. M'Fadden.
Henry Perfect.	Joshua Chaseling.
Saml. Payne.	C. Irvine.
Albert Lemond.	Josiah West.
John Humphreys.	John Murray.
Ed. Delaney.	John Booth.
Moses Woods.	James L. Merlin.
Saml. Thompson.	Robert Smith.
E. Gagan.	G. R. Henson.
Wm. Morrison.	

August, 1872.—

Wm. Deacon removed to Goulburn.
Moses Woods detached to Liverpool.

September, 1872.—

Robert Smith removed to Windsor *vice* Dugdale.
Chris. Irvine dismissed.
A. Warby and M. Gibbins appointed in their room.

October, 1872.—

Geo. Henson appointed Station-master, Mulgrave.
Wm. Rowland appointed to succeed him.

November, 1872.—

Mitchell, Craddock, and Turner, put on temporarily, preparing carriages and cattle waggons for Christmas Holidays; since dispensed with.

December, 1872.—

A. Warby exchanged with Robt. Ward, of Menangle.
Stewart put on for extra work.

A. RICHARDSON,
22/4/73.

To the Traffic Manager.

In the minutes of evidence taken before the Select Committee of the Civil Service, on 12th February, 1873, Mr. Holroyd is reported to have said—"A short time ago, in the month of September, I had to make a complaint to Mr. Moody, the Traffic Manager. After I had made my complaint, I said—'Mr. Moody, how thronged your platform is with porters!' He replied—'Yes, there are a great many.' I said—'Why do you have them here, they cannot be necessary?' He said—'Well, what am I to do? Mr. Sutherland sent me down the other day a batch of five porters to put on the Railway.' I said—'Had you any vacancies for them?' He said—'No.' I asked—'Did you write to the Minister and tell him that you had no vacancy?' He said—'Why, he ordered me to put them on, and I put them on.' This is a cost to the Country of between £500 and £600 a year."

I have to request the Traffic Manager to state whether the above is a correct report of what took place, and, if otherwise, that he will oblige me with a full explanation of the matter.

J.R., 18/3/73.

I am quite sure Mr. Holroyd has drawn upon his imagination for the alleged conversation.

Mr. Holroyd never came near me except to make complaint, or something akin to it, and was never sufficiently amiable to induce me to enter into such a confidential conversation.

I have an indistinct recollection of Mr. Holroyd calling at my office when a good many men were hanging around the door and on the steps, and he in a very authoritative tone asked what all those fellows were doing there; and it is very likely I replied "How can I help it?—they are sent up to me."

Mr. Holroyd's manner to me has never been inviting enough to induce me to enter into conversation beyond what business demanded.—R. MOODY, 18/3/73.

To Commissioner.

Mr. Holroyd's evidence. Question 750.

Mr. Ellis was for four years in subordinate capacities on the Railway,—shunter, porter, &c., and was appointed Station-master at Ashfield, in February, 1862. He resigned Ashfield Station on 1st February, 1867, having met with an accident. He joined afterwards as a guard, and was subsequently made signalman, which last position he resigned on the 23rd September, 1871, in consequence of his wages having been reduced, and the Commissioner, Mr. Byrnes, refusing to promote him.

Question 751. (Mr. Trotter's services.)

MR. Trotter was appointed to superintend the permanent way, in July, 1862, by Mr. Secretary Arnold. He resigned that appointment on 30th June, 1866. Mr. Secretary Byrnes, who was in office at the time, then appointed Mr. Thomas. As regards Mr. Trotter's alleged extravagance, I find no information from the records of the department; but one thing is clear,—that if he were extravagant, he would appear to, have been more so during Mr. Holroyd's year of office than during any succeeding year, as the working expenses of the Railway during those periods per mile open will show. (See page 18.)

Question 752. (Changing Guards.)

THIS is necessary to meet the exigencies of the traffic. If it were not done, some guards would have too much work and others too little; it arises in a measure from the day trains running three times a week only.

The average number of miles each guard travels daily by through trains is 111,—if he does no other work. If he runs a shorter distance, he has shunting work to do, and to run trains short distances,—yard work, &c., &c.

Question 752. (Mr. Herald.)

MR. Holroyd speaks of the Newcastle Station as one of great importance, requiring a man of Railway experience, and would imply that by the removal of Mr. Cox to Murrurundi, and by the appointment of Mr. Herald to Newcastle, this was lost sight of.

It is my belief that there is hardly a man on the Railway who has had so much experience as Mr. Herald. He was for thirteen years employed on the Great Eastern Railway, England,—five years as Goods Clerk, London terminus, six years as Station-master, and two years out-door Inspector for Goods Manager.

He left England for the benefit of his health, and was appointed, so far back as 1857, Station-master at Liverpool. He returned to England, and was again employed on the Railways there. In 1866 he was an applicant for Railway employment here; there being no other vacancy, he accepted the position of porter at Newcastle; the very station at which he is now Station-master. In 1869 he was appointed Goods Clerk at Muswellbrook. In 1870 his services were so highly thought of that he was transferred to the Traffic Manager's Office, Sydney. In 1871 he was appointed to take charge of the outside duties of the Goods Branch at Redfern, and he was in 1872 made Station-master at Tarana; indeed, because of his usefulness and his experience, this officer has been sent where these qualities were most required, and his removal to Newcastle was decided upon at a time when it was considered that a zealous, experienced Station-master was most urgently required at that place.

Question 752. (Mr. Cox.)

No injustice whatever was done to Mr. Cox; he was remunerated for his services as Acting Traffic Manager. The Government have purchased from him the house he erected on Crown Lands at Newcastle, and, with the Minister's sanction, I have issued instructions for the immediate erection of a residence for him as Station-master at Murrurundi.

Mr. Cox first entered the Railway service in October, 1855, as Station-master, Burwood; he resigned that position in May, 1858. In December, 1858, he was an applicant for re-employment; he was not however successful until April, 1864, when Mr. Holroyd appointed him Station-master at Liverpool, with a salary of £200 a year. He was placed over the heads of many Station-masters to whom Liverpool Station would have been promotion.

Mr. Cox had been but a few days at Liverpool when he was promoted by Mr. Holroyd to Newcastle, with a salary of £250 a year, and £50 a year in lieu of a house.

He was recently removed to Murrurundi, at the same salary and allowance. Mr. Holroyd says that Murrurundi was then made a first-class station. This is wrong. Murrurundi, since the day it was opened, has always been a first-class station; and the officer whom Mr. Cox succeeded was paid the same salary and allowance as Mr. Cox.

Question 752. (Mr. Higgs.)

MR. Higgs entered the Railway Service as porter, October, 1855. Promoted as Station-master, Homebush, Dec., 1856. Removed to Hexham, on the G.N.R., July, 1858. Promoted to Newtown, on the G.S.R., May, 1859. Promoted to Parramatta Junction, June, 1860. Promoted to Redfern, June, 1863. Promoted to Assistant Traffic Manager on the Great Northern Railway, October, 1872..

Question 752. (Extra Clerk at Newcastle.)

The allegation made by Mr. Holroyd that a clerk had been appointed under the Station-master at Newcastle (Mr. Herald), nominally, but who, virtually, is the clerk of Mr. Higgs, the Assistant Traffic Manager, is not supported by the facts of the case.

Mr. Higgs has had no addition made to his staff, and he carries on the work with the same number of hands as his predecessor, viz., 2, cashier and general clerk, and an assistant clerk; both of whom were in the office when he took charge.

The only alteration made is that the relieving clerk (Mr. Robins), who is general for all stations, has been removed from Singleton to Newcastle, to do duty at the latter station when not required at other stations; he is not exclusively employed at Newcastle, but does duty there instead of at Singleton when not required for relieving purposes.

He works for Mr. Herald, and not for the Assistant Traffic Manager.

Question 752. (Railway charges.)

THE anomalies in charging sand to Parramatta and sand from Parramatta, as also fruit between Goulburn and Sydney and Sydney and Goulburn, arose through a difference being made between the "up" and the "down" journey. This distinction, under the new rate-sheet, has been abolished. It was made general in the rate-sheet issued by Mr. Byrnes, all special class goods being charged an increased rate for down journey.—J.R.

No. 2.

Mr. Moody's Evidence.

MINUTE PAPER.

HAVING been instructed by the Minister for Works to make a thorough examination into the character and competency of the employés in the Traffic Branch of the Railway Department, and the amount of work performed by them, to test the accuracy of certain allegations made before the Select Committee of the Legislative Assembly on the Civil Service—to the effect that the employés were generally inefficient, and that their numbers could be reduced one-half without injury to the Service,—I lost no time in examining the clerical staff in the Traffic Manager's Office, and reporting the result of that examination to the Minister. A report was also procured from the Traffic Auditor, whose duties bring him in constant communication with the Station-masters and their clerical subordinates, as to the qualification of these officers, the manner in which their books are kept, and the clerical work performed. These reports satisfactorily show that there is no foundation for the allegation as to the incapacity of these officers, who have been found on examination to be intelligent, steady, and zealous in the discharge of their duties.

In further attention to the Minister's instructions, I took advantage of the Easter holidays to visit, in company with him, every station on the Southern and Western lines. We inquired into the character and competency of every employé on these lines; their length of service; their duties, and the manner in which these duties were performed; the average amount of work at each station; and the number of hands required for carrying out the duties with efficiency.

This inquiry has strengthened the conviction I formerly entertained, that on the whole, the employés in the Traffic Branch are well fitted for the duties they have to perform. None of them are reported as unable to read and write; many of them, from their education, are fitted for higher positions. They are, as a class, sober and steady men—none other are retained in the Service. Many of them are highly intelligent, and capable of performing satisfactorily the most important duties that can be entrusted to them. We had not time to examine each man personally; but the Station-masters, who are responsible for the proper performance of their duties, and are thoroughly acquainted with their capabilities, supplied all necessary information. In general they expressed themselves as fully satisfied with the manner in which the men perform their duties. Some are naturally more efficient than others; and, as far as possible, the best men are placed in the most responsible offices.

Some of the men who have been long in the Service, and are too old for the heavier duties, are removed, as opportunities occur, to easier stations, and their places supplied by younger and stronger hands.

With reference to the number of the employés: notwithstanding the assertion that the numbers could be reduced by one-half without injury to the Service, I can only state that, after thorough inquiry at every station, and with a strong desire to have the work performed with the smallest number of hands possible, I am unable, while the night mail trains continue to run, to recommend any reduction in the number employed. It must not be understood that the number of employés is a fixed quantity; it is regulated by the amount of traffic, and is reduced and increased as the exigencies of the work to be performed require. In the wool season, for instance, a large number of extra hands are taken on temporarily, but they are not retained a day longer than is absolutely necessary.

The Minister for Works, on a recent visit to the North, made a similar inspection of the different stations on the Northern line, and arrived at a similar conclusion, as to the general efficiency of the employés, and their numbers not being in excess of the requirements of the Service.

On the whole, I feel satisfied that a better class of men than those employed on our Railways need not be desired; and, considering the amount of their duties and the rapidly increasing traffic, I do not feel justified in recommending any reduction in their number at present.

The reports referred to are forwarded herewith.

JOHN RAE.

16 April, 1873.

To The Traffic Manager,—

The Minister having brought under my notice that you have stated that the clerks in your office are inefficient, and that you are obliged to educate them as in a school, and requested me to take the first opportunity of inquiring personally into these statements, and report to him the result of my inquiries, I have to inform you that I will call at your office this afternoon or to-morrow morning for the purpose.

J.R., 17/3/73.

Protest herewith.—R. MOODY, 18/3/73.

THE COMMISSIONER FOR RAILWAYS TO THE SECRETARY FOR PUBLIC WORKS.

Report upon the efficiency of the Clerks employed in the Traffic Manager's Office, Sydney.

In attention to Mr. Secretary Sutherland's request, I yesterday, accompanied by the Chief Clerk for Railways, attended at the Traffic Manager's Office, to inquire into the allegations made by him that, with the exception of one efficient clerk recently appointed, the clerks in his office are not efficient.

My attention was particularly drawn to Mr. Moody's statement before the Select Committee on the Civil Service, as follows:—

“225. Are there many clerks under your immediate supervision? I have one efficient clerk, recently appointed, and I have other clerks in the office.

226. Are they efficient? They are not efficient for my purposes. They can sometimes copy a document correctly if it is given them, but they cannot do much more than that. They are improving since I have had them at school, as I may call it. I have felt that I was unable to rely upon their work for months, until I paid that close attention to it myself, to the injury of my health no doubt, which has brought them up to greater efficiency.

227. Were they inefficient in writing—the mere clerical duties? In the general carrying out of their duties. For instance, if I gave them a document of this kind (*referring to the classification-sheet*) to make out, very likely after they had done it I would have to do it over again myself, to show them how to do it.”

And again :

“ 236. In the case of these inefficient clerks placed under you, how is it that you put up with them at all ; I think you should be in my place for one week to understand that question fully.

237. Do you mean to say you are compelled by your position to keep a number of inefficient clerks against your own judgment? If I did not, I should not be able to draw my salary long.

238. If you were left to yourself would you keep these clerks? No, I would not.”

I requested Mr. Moody to name the clerks whose inefficiency he alluded to. In reply, Mr. Moody said that the present clerks were not inefficient, and that in his evidence he had been alluding to things of the past. As this statement did not correspond with what I understood he had told Mr. Secretary Sutherland, nor with the evidence given before the Select Committee, I decided to examine the clerks myself, to inspect the books they kept, as also the books kept by their predecessors.

The Record Books, containing a short abstract of the contents of all letters and papers received in the office and their disposal, were first submitted to me, and I was gratified to find that not only were they now admirably compiled, but that during the whole time Mr. Moody had been Traffic Manager, as also before that period, they bore evidence of having been most carefully and faithfully kept. The handwriting of the different Record Clerks, Mr. Herald, Mr. Nealds, and the present holder, Mr. Marks, as displayed in the books, is exceedingly good, and the Index to the Register had, I found, been accurately compiled. I was the more pleased to find this portion of the work so well carried out, as my long experience in official business has taught me that the effective administration of the business of an office mainly depends upon the accuracy with which the records are kept.

Mr. Moody's staff consists of the following clerks, viz. :—Mr. Richardson, Mr. Marks, Mr. Cullen, Mr. Allaband.

Mr. Richardson,—who has the general supervision of the office, conducts the correspondence, and is responsible for the work of all the clerks who are placed under him.

As Mr. Moody admits that this officer is thoroughly efficient—a fact also otherwise well known—and as he is responsible for, and has the supervision of the work of the rest of the clerks, I considered it desirable to obtain his statement as to their duties, and the manner in which they are carried out.

Mr. Richardson says :—“ Mr. Marks has been 3½ years in the office ; he acts as Record Clerk, and has so acted since May, 1870 ; the number of papers registered averages 3,000 a year. Mr. Marks carries the work out unaided ; there are no arrears, and the work is performed most satisfactorily. Mr. Marks also copies papers when required ; makes out returns ; he has the capacity to perform the work properly, and does so to my entire satisfaction.”

In reference to Mr. Moody's statement that the clerks are improving since he has had them at school, I requested Mr. Marks to state how he was employed before entering the Railway Service. He stated that, eight years ago, in England, he was in the service of an Underwriter at Lloyd's ; afterwards in a merchant's office ; and for two years and eight months he was a ledger-keeper in the Bank of New South Wales.

Mr. Cullen, the next clerk, keeps the Store Book, containing the supply requisitions, in duplicate, from the various stations ; he also keeps the ledger showing the supplies each station receives ; he copies and sends out the Special Train Notices, and assists in copying and dispatching the “ General Orders ” of the Traffic Manager. Mr. Richardson says that he performs his duties very fairly ; he is very neat and tidy in the way he does his work (a fact established to my satisfaction by the production of his ledger), and, though a little slow, can be depended upon for accuracy. He has been twelve months in the office.

In reply to my inquiry as to previous employment, Mr. Cullen stated that he had served an apprenticeship of four years in a merchant's office, and did not when he entered require, nor has he received, any “ schooling,” beyond an explanation of the nature of the duties he was to perform ; as before entering, he had passed the Civil Service examination.

Mr. Allaband, the only other clerk in the Traffic Manager's Office, compiles the statement of the truck returns, showing daily the number of trucks arriving at and leaving each station, and the number left at each station for loading ; he makes, each morning, a summary of these returns, and performs the work accurately ; he is also charged with the duty of press-copying all the letters, general orders, &c. ; he assists in copying, and makes himself generally useful. Mr. Richardson states that he is very zealous and painstaking ; his handwriting, though fair, is not so good as that of the other clerks, but he is rapidly improving in this respect ; the defect in the handwriting is attributed to a change in style, having previously been accustomed to slant his letters from left to right. Mr. Allaband has been only 2½ months in the office. He is a compositor and printer by trade ; served his time at Messrs. Reading & Wellbanks, and was recently engaged as a compositor in the *Herald* office ; no “ schooling ” could therefore be required at the hands of the Traffic Manager in his case.

Mr. Richardson, in conclusion, said, without contradiction from Mr. Moody, who was present during the whole time, that the clerks in the office are efficient ; they are quite able to carry out the duties required, and are intelligent and zealous in the discharge of them ; they are fully employed ; the office hours being from half-past 8 a.m. to 5 o'clock p.m.—one hour being allowed for dinner.

I may remark generally, that the work to be performed in the Traffic Manager's Office is not of a high class order. With the exception of the correspondence, which is not heavy, and the records, the work is of a character which is usually given to junior clerks to perform, and appears to me to be well conducted by the present staff. After carefully examining the books before and since Mr. Moody took office as Traffic Manager, I can find no evidence that the work was ever inefficiently performed.

As the inquiry was confined to the efficiency or otherwise of the clerks now employed in Mr. Moody's office, I did not extend my investigation beyond that.

Mr. Moody alluded to several junior clerks he had had from time to time in his office. There is no direct evidence however of their inefficiency, and the books of the office produced to me bear no record that such was the case. Nearly all of them are still in the Traffic Branch, employed at the various stations, and are spoken of as doing their work efficiently.

After a patient inquiry and careful investigation, I can find nothing to support Mr. Moody's statements.

JOHN RAE.

18 March, 1873.

Efficiency of the Railway Clerks.

To The Commissioner,—

I have the honor to request that this Memo. be attached to the report of the Commissioner, as to his inquiry yesterday into the state of efficiency of the clerks under the Traffic Manager.

1st.—I most respectfully protest against the present state of the office being taken as a test of the truth of what I stated before the Select Committee, because Mr. Richardson is a competent clerk, with nothing to do except the routine duties with the clerks under him. See Mr. Moody's Evidence before Committee.

2nd.—Upon Mr. Richardson entering into the office, I had Mr. Roberts, who, although he professes to have had a good many years Railway experience, I have found to be so thoroughly abroad that I was unable to send him out for station duty, or to get for me any information I required; and as to get for me any information I required, and as to mere routine duty, checking guard's sheets, pay lists, or general copying, he was so unreliable and careless as to render him next to useless, and very troublesome, as all his work had to be checked; he was sent into the Parcels Office.

3rd.—Mr. Sotheren had previously been removed from at least two offices before he was sent to me, and was (although writing a very nice hand) quite useless as a clerk, even for copying; he had no knowledge enabling him to be of any service, except he were under the care of some other person to direct and watch him, and even then could get through but a very small share of work. He was tried at station work and utterly failed, and has since been under the Station-master, Goulburn, as parcels' clerk.

4th.—Mr. Pritchard, although a sharp, intelligent, and attentive youth, had not received an education sufficient to enable his services to be made available for office business without some previous training, and he was put into the Parcels Office.

5th.—Mr. Marks kept the record book, which is a literal copy of the minutes, and indexed the same; he did nothing else, except an occasional job given to him, and has repeatedly stated to me that he preferred keeping at his desk to learning station duties.

6th.—Mr. Cullen attended to the store requisitions, and copied general orders, and has had no opportunity of learning station duties, not having evinced any desire to do so.

7th.—The present state of the clerks under the control of a competent man, with three inefficient removed, will bear no analogy to the state of things represented by me, because as I desired the office to be and as it ought to be, I should have at least two clerks in the office efficient for station duty, one would be almost constantly employed, and the other occasionally.

8th.—It will be seen that out of the five clerks I had not one efficient so as to send out to stations for information, or to relieve a Station-master for a day or two, and three out of the five were quite inefficient for general purposes.

I enclose a list of those who have come under my office for three years and a half, numbering in all 20 persons.

R. MOODY, 18/3/73.

Clerks as when first entering office.

Mr. Marks	An educated young man, but had not much knowledge of office duties; not efficient for Station duties.
Mr. Neale	Very useful.
Mr. Badcock	Could only be made very little use of in the office.
Mr. Watsford	Very useful, but not efficient.
Mr. Launder	Not efficient, but very useful.
Mr. Herald	Efficient; now Station-master.
Mr. Hornidge	Efficient as to station duties; now Station-master.
Mr. Thompson	A good clerk; since appointed Station-master.
Mr. Sotheren	Inefficient.
Mr. Roberts	May have been a good clerk once, but is very little use now; cannot be depended upon.
Mr. Cullen	A good clerk for mere routine.
Mr. Richardson	Thoroughly efficient.

Youths.

Burge, Abrahams, Hoowen, Bull, Drew, Booth, Goodwin, Moreton, Conellan.

Mr. Richardson, from his thorough knowledge of the clerical staff of the Traffic Department, will be good enough to furnish me with his opinion of the efficiency or otherwise of the clerks whose names are appended to Mr. Moody's protest; the date of their appointment, the nature of the duties they have been called on to perform at different times, and to state, as far as possible, by whom, or on whose recommendation they were appointed.—J.R., 19/4/73.

Traffic Manager's Office,
Sydney, 21 April, 1873.

In obedience to the Commissioner's instructions, I have the honor to submit the following report on the officers referred to in Mr. Moody's protest, the nature of their duties, and how these duties have been and are performed.

Mr. Marks.—Still in the Traffic Manager's office, acting as record clerk; gives complete satisfaction in the performance of his duties.

Mr. Neale.—The records of the office show that he must have been an efficient officer; he was promoted from that position to be assistant to the cashier. His principal duty is to pay the men along the line, and he has shown himself a trustworthy and efficient officer.

Mr. Badcock.—Mr. Badcock before entering the Railway Service had many years of experience in mercantile offices. He was first station clerk at Mittagong, and was selected for the Traffic Managers' office. He was an excellent book-keeper and correspondent, his handwriting being admirable. He was promoted to Camberwell Station, on the Great Northern Railway, where he now is, and performs the duties with efficiency.

Mr. Watsford.—Was employed as relieving station clerk for about five years, and performed the work in a most efficient manner; in fact, for the duties of relieving, it would be a hard matter to find a man better qualified. He was promoted to South Creek Station, as Station-master.

Mr. Landers.—Was employed as copying and corresponding clerk, and there is no record in the office to show that his work was not efficiently performed. Sent to the goods-shed, where he gave me every satisfaction; afterwards promoted to be clerk to the Superintendent of Way and Works, 20/1/72. (See Mr. Mason's report below.)

Mr. Herald left Manager's office to be goods foreman on the 9th February, 1871. (See separate report on Mr. Herald's services, page 8.)

Mr. Hornidge.—22/8/72 removed from Rydal Station, where he had performed most efficiently the duties of chief goods' clerk. There is no record to show that while in the Traffic Manager's Office, his work was not efficiently performed. Was, after serving some months in the office, appointed relieving Station-master, the duties of which post he performed in an able manner. Soon after promoted to Station-mastership, Sutton Forest.—1/5/72. Now at Mount Victoria.

Mr. Thompson.—Promoted from Rydal to the Traffic Manager's Office. The books in the office and the correspondence in the letter book clearly prove that the work allotted to him was performed in an able manner. Promoted to Rydal Station as Station-master, 4th July, 1872.

Mr. Sotheren.—12/1/72 sent from the office of the Superintendent of Way and Works to be clerk in Traffic Manager's Office. Wrote a very good hand, and while kept as a copying clerk I cannot find that there is any record to show that he did his work inefficiently. On the 6/7/72, without any previous knowledge of station duties, he was appointed relieving clerk, and very naturally failed to give satisfaction to the Traffic Auditor. He was subsequently sent to Goulburn as parcels clerk.

Mr. Roberts was transferred from the office of the chief clerk on the 9th July, 1872. Was not adapted to take the lead in office or other work, as dependence could not be placed on the correctness of his labour. Wrote however a good clear hand, and could get through a good deal of work. Under careful supervision could be made very useful for copying, &c.

Mr. Cullen.—Appointed April 1st, 1872, as clerk in the Traffic Manager's office, where he still remains, and performs the duties allotted to him in a satisfactory manner.

YOUTHS.

C. Burge.—Transferred from Picton to Traffic Manager's office, 22/8/71. Promoted on the 20/1/72 to the goods-shed, where he failed to give satisfaction. (Retired on sick leave.)

Abrahams.—Appointed messenger in the Traffic Manager's office on the 5th July, 1870. Resigned 5th August, 1870.

Hooker.—Never in Traffic Manager's office. Now deceased. He was employed in the Parcels Office.

Bull.—Telegraph clerk. Resigned from ill health.

Drew.—Appointed messenger in Traffic Manager's office and telegraph clerk, April 1st, 1872. Removed to Junction as telegraph clerk, where he gives satisfaction.

Booth.—Appointed messenger in Traffic Manager's office, and telegraph clerk; removed to Wallerawang as telegraph clerk where he gives satisfaction.

Goodwin.—Telegraph clerk. (Left service.)

Morton.—Telegraph clerk. Promoted to Parramatta Junction, where he proves himself efficient.

Conellan.—Appointed to Traffic Manager's office; removed to goods' office, where he proved himself a most efficient clerk, 23/3/72.

It is impossible for me to say precisely by whom these clerks were recommended, but I will do so as far as possible:—

Mr. Marks—By Mr. Sutherland.

Mr. Neale—(Appointed before Mr. Moody's time.)

Mr. Badcock—chosen by Mr. Moody.

Mr. Watsford—(Appointed before Mr. Moody's time.)

Mr. Landers—chosen by Mr. Moody. (See Mr. Mason's report below.)

Mr. Herald—chosen by Mr. Moody.

Mr. Hornidge—chosen by Mr. Byrnes.

Mr. Thompson—chosen by Mr. Moody, I believe.

Mr. Sotheren—transferred by Mr. Byrnes.

Mr. Roberts—chosen by Mr. Moody.

Mr. Cullen—appointed by Mr. Byrnes.

Mr. Burge—appointed by Mr. Byrnes.

Mr. Abrams—By Mr. Moody.

Mr. Hooker was not in Traffic Manager's Office.

Mr. Bull— do. do.

Mr. Drew—By Mr. Byrnes.

Mr. Booth—By Mr. Byrnes.

Mr. Goodwin—(Appointed before Mr. Moody's time.)

Mr. Morton—(Appointed before Mr. Moody's time.)

Mr. Conellan—By Mr. Byrnes.—

A. RICHARDSON,
Acting Traffic Manager.

Railway Department,
(Permanent Way Branch),
Sydney, 22 April, 1873.

THIS is to certify that Mr. Landers has been engaged as Principal Clerk in this office, and immediately under my direct supervision, since the 12th January, 1872.

I have always found him exceedingly intelligent, industrious, and thoroughly efficient in everything appertaining to the duties of his office.

WILLM. MASON,
Engineer in charge of (Pt. Way Branch) Existing Lines.

MINUTE PAPER.

By the instructions to Traffic Auditor of 8th April, 1870, paragraph 2:—"All books, accounts, tickets and forms kept by Station-masters are placed under the direct supervision of the Traffic Auditor, and he is held responsible for the proper keeping of all such station books and accounts, &c., &c., &c."

It has been represented that this work is carried out by inefficient officers, and consequently, it is presumed, in an inefficient manner.

The Commissioner will obtain from the Traffic Auditor a report on each station, as regards the clerical work; he will give a list of the employés engaged in this work, and will state, opposite the name of each, what his clerical duties consist of, and how they are carried out. I should like to know how each man so reported upon has been engaged since he entered the Service, the pay he received when he entered, his length of service, and his present pay, and general qualifications.

JOHN SUTHERLAND.
21/3/73.

Traffic Auditor, B.C., 24/3/73.—J.R.

In forwarding the accompanying return of officers employed in clerical work on the Southern and Western lines, I may observe, with respect to the terms used in describing the manner in which their work is performed, that they are intended to stand, as regards merit, in the following order:—

1. Most efficiently.
2. Very efficiently.
3. Efficiently.
4. Satisfactorily.
5. Fairly.
6. Indifferently.

It must also be pointed out that these terms are intended to apply only to each man's performance of his *present* duties, and that the duties devolving upon the various officers are very different, both as regards the amount and difficulty of work to be performed.

With respect to the general qualifications, or the efficiency of the staff as a whole, and taking a practical view of the matter, it is my opinion, after many years of experience among the men, that the Commissioner might well be congratulated upon possessing so competent and reliable a body of men—men who have, in the performance of their clerical duties at least, proved themselves to be the very reverse of inefficient.

At Sydney and the terminal stations the assistants in the Goods' Department give every satisfaction. This is especially the case in the Sydney Goods Shed. The porters upon whom some portion of clerical work devolves are men, I consider, whose abilities qualify them for any clerical work in the Traffic Department. In almost every case in which men occupying the position of porters have been called upon to undertake more or less of clerical work, I have been surprised and pleased with the intelligence, aptitude, and tractability displayed.

At Goulburn the Goods Clerk is a most efficient officer, and he is well satisfied with his assistant. The books are, I consider, a pattern of neatness and correctness.

At the terminal station on the Western line we have just lost, through resignation, another very efficient Goods Clerk, whose duties are at present being carried on by the remainder of the staff.

Parramatta and Wallerawang are the only remaining stations having assistant clerks.

At Parramatta the assistant has been well trained, and will prove a useful and efficient clerk, I believe, in any capacity.

At Wallerawang the Goods Clerk is a young man of ample ability for his post, and is at present giving satisfaction; although, from want of zeal and application on his part, as Goods Clerk at Macquarie Plains, he failed in the proper performance of his work.

Commissioner for Railways.

D. VERNON,
Traffic Auditor.
4/4/73.

Name.	Length of Service.	Pay when entering.	How engaged since entering.	Present Pay.	Nature of present Duties	How performed.

No. 3.

Mr. Sutherland's Evidence.

On the subject of his not interfering in the dismissal of men. Question No. 549, page 25.

At Mr. Sutherland's request, I have obtained the following evidence in the case of the dismissal of Carr and Irvine.—JOHN RAE.

*Mr. Charles Paull gives the following information :—*I recollect a man Carr being dismissed. I was present in the Traffic Manager's office. I had orders from the Traffic Manager to bring Carr to meet the Minister at 10 o'clock. I did so. Mr. Sutherland was present. Mr. Moody said there was a man at Petersham wished to get away for a few days, and he wanted Carr to take his place. Carr declined to go, pleading bad health; and I was instructed by Mr. Moody to suspend him, which I did before he appealed to Mr. Sutherland. Carr said to Mr. Sutherland he thought it was inhuman in Mr. Moody to send him to Petersham, as he was not able to make a fire and cook for himself, and it might be the death of him. I went away and heard no more till I got notice from Mr. Moody to call on Carr and inform him that he was to be dismissed after a week's notice, which I did. He threatened to appeal to Mr. Sutherland. I remember being called before Mr. Sutherland in the Traffic Manager's office to answer for a charge of insubordination on my part. On a Wednesday night (the day of Mr. Moody's return from the north) a man came to my house stating that Mr. Parkes had sent him to get a few lines from Mr. Moody, or myself in his absence, to say whether he could be capable of fulfilling the duties of porter in the goods department. I told him I did not like to do so, but as Mr. Moody would be in bed, I, being afraid of offending Mr. Parkes, gave him a few lines, stating that I believed Mr. Giles would be competent to perform the duties. Next morning I was sent for by Traffic Manager. He read this note and asked me how dare I do such a thing. I told him that if I had done wrong it was through ignorance and I hoped he would forgive me and such a thing would not occur again. He said it was an act of insubordination and if he did his duty he ought to suspend me; that it was disgraceful on my part to have done it, and I was never to speak to him again, except on business, and in writing. I was brought before Mr. Sutherland in the Traffic Manager's office. Mr. Moody said this is a letter I had sent to Mr. Parkes—it was a thing he meant to put down—writing to Ministers. Mr. Sutherland said as this matter has not been brought before me in writing I shall not interfere between the Traffic Manager and Mr. Paull, but I believe Mr. Paull will not fall into a similar error again.

I have been several times in the Traffic Manager's office when I have heard Mr. Sutherland distinctly refuse to interfere between the Traffic Manager and the men, stating that if the men are not satisfied with the decision of the Traffic Manager they can appeal to the Minister, in writing, who would then deal with their case.

CHARLES PAULL,
Foreman, Goods Department,
19/4/73.

Mr. Higgs' Statement.

I REMEMBER a lamp-cleaner of the name of Christopher Irvine being dismissed by the Traffic Manager, when I was acting as Station-master at Redfern Station. I recollect Mr. Sutherland being in the Traffic Manager's Office when Irvine was called in with reference to his dismissal. Irvine was complaining sorely of the treatment he had received from the Manager, and wished the Minister to interfere and reinstate him. The Minister declined to interfere, unless Irvine appealed in the usual course, through the Traffic Manager; and added that, if it was found Mr. Moody had done wrong by dismissing him, he would deal with Mr. Moody the same as with any man on the line. Mr. Moody stated that Irvine had informed him that he was a detective, and not fit to have any command over men. Irvine asked Mr. Moody for a letter of recommendation written by Lord Belmore. Mr. Moody acknowledged that he had such a letter, but declined to give it up, stating it was a private document. Mr. Sutherland asked Irvine if it was true that he had told Mr. Moody that he was more fit for a detective than to have charge of men. Irvine acknowledged that he had done so, but not until he was unjustly dismissed and Mr. Moody declined to return him Lord Belmore's letter of recommendation. Mr. Sutherland replied that whatever the provocation, this was an act of insubordination; and he declined to interfere in the matter. Irvine was accordingly dismissed by Mr. Moody, and is not now in the Service.

JOHN HIGGS,
Assistant Traffic Manager, G.N.R.,
19/4/73.

*Christopher Irvine states :—*I recollect being called into the Traffic Manager's Office about September last. I may state that the day previous Mr. Moody came on the platform and said I must go to Macquarie Plains. I told him I was in such a position that I could not see how I could go. He replied, "You must go—you have got my orders." Then I said, "If it's imperative that I must go I have an option which I must exercise by sending in a week's notice to leave." He said, "Oh! very well that's understood, and walked off." This was before dinner-time. I told Mr. Higgs I should send in my resignation at once. Immediately after dinner Mr. Higgs informed me the Traffic Manager wanted to see me. I went over with Mr. Higgs and saw him. Mr. Moody said, "Mr. Irvine, I have thought over what I spoke to you about this morning,

and as you have taken no notice of the matter, you are now dismissed—not suspended, but dismissed.” “Oh,” I said, “that’s very extraordinary. A few minutes ago it was arranged that I should send in a week’s notice, and now you tell me I am dismissed; that’s very strange. As you think fit to dismiss me, will you return Lord Belmore’s letter?” “Certainly not,” he replied. I told him I should appeal to Mr. Sutherland before I should accept dismissal. He said he did not care for Mr. Sutherland, or any one else; he would have no one to dictate to him. I asked him if he had power to dismiss me. He said, “Yes.” He repeated he would be master here. Up to this time my language and demeanour were quite respectful, and always had been while I was in the Service. Then I told him, “It’s an old adage, Mr. Moody: Put a beggar on horseback and he will ride to the devil,” being irritated at his refusal to give up Lord Belmore’s letter and my unjustifiable dismissal. I told him at the same time that in the way he was going on if he got plenty of rope he would hang himself in six months. He then sent for a policeman to give me into custody; the policeman came, but was too wise to interfere.

I said to Mr. Moody that he was more fit for his old office of detective or lock-up-keeper at Castle-maine. When I first went on the Railway, Lord Belmore spoke to Mr. Byrnes and gave me a letter to Mr. Moody. I had been nearly 4 years clerk in the London and North-western Railway Manager’s Office. Mr. Moody said I must go into the goods-shed for a few days, and I must not kill myself working, and the first vacant clerkship I should have. He added, “I dare say there will be a row in the House among the Members, but I do not care a bit for that. I will flash Lord Belmore’s letter in their face, and they cannot say I have not appointed a respectable man.” I appealed to Mr. Sutherland the same day, and saw him the following morning. He asked me to meet him on the following day at the Traffic Manager’s Office, which I did. Mr. Moody brought several charges against me which had no foundation, as Mr. Moody knew—

1st. That I was ashamed to appear in uniform.

2nd. He remarked—“These gentlemen labourers will never do”; though I was never reprimanded, and was always spoken highly of by those in authority over me.

3rd. That I kicked up a hubbub among the men about the wages.

Mr. Sutherland turned on me, and said I had done entirely wrong—that if I had any grievance I should have made application in the usual way, through Mr. Higgs. I told Mr. Sutherland that was precisely what I had done. He (Mr. Sutherland) turned to Mr. Moody and said, “I never saw this application.” Mr. Moody said he thought it too trumpery an affair to bring before him, although Mr. Moody told me distinctly that he had brought the matter before the Minister, and he would do nothing for me. When I called on Mr. Sutherland, at the Traffic Manager’s Office, he asked me if it was true that I had told Mr. Moody he was only fit for a detective. I said, “Yes; but not until I was dismissed, and Moody refused to return my letters.” Mr. Sutherland said, “If you said so I can do nothing for you, as I must maintain the discipline of the Department.”

C. IRVINE,
19 April, 1873.

RAILWAYS OF NEW SOUTH WALES.

STATEMENT of Working Expenses for the years 1864 to 1872 inclusive.

Year.	Average miles worked.	Working Expenses.	Cost for Working Expenses per mile open.	Permanent-way Maintenance per mile open.
1864	126½	£ 103,714	£ 820	£ 267·99
1865	143	108,926	761	212·65
1866	143	106,229	743	189·39
1867	175	117,324	670	155·32
1868	225	144,200	641	133·34
1869	269	176,362	655	150·52
1870	329	206,003	626	176·32
1871	350	197,065	563	174·74
1872	384	207,917	541	161·40

22 April, 1873.

JOHN RAE,
Commissioner for Railways.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE

ON

P A T E N T S ;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE,

MINUTES OF EVIDENCE,

AND

APPENDIX.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
14 *March*, 1873.

SYDNEY : THOMAS RICHARDS, GOVERNMENT PRINTER.

1873.

1872-3.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 8. TUESDAY, 19 NOVEMBER, 1872.

12. PATENTS :—Mr. Burns moved, pursuant to *amended* Notice,—
- (1.) That a Select Committee be appointed, with power to send for persons and papers, to inquire into and report upon the Law in reference to Patents, with a view to the amendment thereof.
 - (2.) That such Committee consist of Mr. Innes, Mr. Allen, Mr. W. C. Browne, Mr. Teece, Mr. Lee, Mr. Cunneen, Mr. Combes, Mr. Tunks, Mr. Wearne, and the Mover.
- Debate ensued.
Question put and passed.
-

VOTES No. 65. FRIDAY, 14 MARCH, 1873.

3. PATENTS :—Mr. Burns, as Chairman, brought up a Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 19th November, 1872, together with Appendix.
Ordered to be printed.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 19th November, 1872, *with power to send for persons and papers,—to inquire into and report upon the Law in reference to Patents, with a view to the amendment thereof,—*beg to report to your Honorable House :—

1. That the law is in an unsatisfactory state, and should be amended with as little delay as practicable, in order that a more exact and less expensive process than at present prevails for investigating and determining upon applications for Patents may be adopted.

2. That the fees, and all charges connected with Patents, ought to be fixed at rates no more than sufficient to cover the expense actually necessary for providing protection to inventors, and should also bear relation to the time for which the Patents are to remain in force.

3. That the system of Provisional Registration ought to be introduced.

4. That all business, and particularly records, connected with Patents, ought to be entrusted to an officer of the Government, who should be easily accessible to the public.

5. That the assimilation of the Patent Laws of the Colonies is to be desired.

Your Committee are also of opinion that various suggestions made by the witnesses, and to be found in the evidence, as to matters of detail, are deserving of consideration.

J. F. BURNS,
Chairman.

No. 2 Committee Room,
Sydney, 11th March, 1873.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 29 NOVEMBER, 1872.

MEMBERS PRESENT :—

Mr. Burns,		Mr. W. C. Browne,
Mr. Combes,		Mr. Lee.

Mr. Burns called to the Chair.

Entry in Votes and Proceedings, appointing the Committee, *read* by the Clerk.
Committee deliberated.

Ordered,—That H. Halloran, Esq. be summoned to give evidence next meeting.

[Adjourned until Tuesday next, at *Twelve* o'clock.]

TUESDAY, 3 DECEMBER, 1872.

In the absence of a Quorum, the meeting called for this day lapsed.

FRIDAY, 6 DECEMBER, 1872.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Cunneen,		Mr. Wearne,
		Mr. W. C. Browne.

Henry Halloran, Esq. (*Under Secretary, Colonial Secretary's Department*), called in and examined.
Witness withdrew.

H. W. Cooper, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That John Musson, Esq., and F. Beer, Esq., M.D., be summoned to give evidence next meeting.

[Adjourned until Tuesday next, at *half-past Eleven* o'clock.]

TUESDAY, 10 DECEMBER, 1872.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Teece,		Mr. W. C. Browne.
------------	--	-------------------

F. Beer, Esq., M.D. called in and examined.

Witness withdrew.

John Musson, Esq. called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That John Williams, Esq. be summoned to give evidence next meeting.

[Adjourned until Friday next, at *half-past Eleven* o'clock.]

FRIDAY, 13 DECEMBER, 1872.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Combes,		Mr. Cunneen,
		Mr. W. C. Browne.

W. F. Gibson, Esq. (*Sydney Mint*), called in and examined.

Witness withdrew.

John Williams, Esq. (*Crown Solicitor*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Captain Mann and Professor Watt be summoned to give evidence next meeting.

[Adjourned until Thursday next, at *half-past Eleven* o'clock.]

THURSDAY,

THURSDAY, 19 DECEMBER, 1872.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Combes, | Mr. W. C. Browne.

Professor Charles Watt called in and examined.

Witness withdrew.

Captain G. K. Mann called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

THURSDAY, 23 JANUARY, 1873.

In consequence of the Sitting of the House, of the 22nd instant, not having been concluded at the time appointed for the meeting of the Committee this day, no meeting could be held.

THURSDAY, 27 FEBRUARY, 1873.

In the absence of a Quorum, the meeting called for this day lapsed.

FRIDAY, 7 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Lee, | Mr. Cunneen,
Mr. Wearne.

G. Milner Stephen, Esq. called in and examined.

Witness *produced* Patents taken out in the Colonies of Victoria and Queensland, and *handed in* copy of a letter, relative to the Patent Law, addressed by him to the Delegates of the Australian Colonies. (*Vide Appendix B.*)

Witness withdrew.

Committee deliberated.

[Adjourned until Tuesday next, at *half-past Three* o'clock. Then to consider Report.]

TUESDAY, 11 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Tunks, | Mr. Teece,
Mr. Lee, | Mr. Wearne,
Mr. Cunneen, | Mr. Combes.

Chairman submitted Draft Report. Same read 1° then 2° paragraph by paragraph.

Motion made (*Mr. Cunneen*), and *Question*,—That the Draft Report of the Chairman be the Report of this Committee,—*put* and *passed*.

Chairman to report to the House.

LIST OF WITNESSES.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

PATENTS.

FRIDAY, 6 DECEMBER, 1872.

Present:—

MR. W. C. BROWNE, | MR. CUNNEEN,
MR. WEARNE.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

Henry Halloran, Esq., called in and examined:—

1. *Chairman.*] You are the Principal Under Secretary? Yes.
2. You are aware I think of the object of this Committee,—that it has reference to the patent law of the Colony? Yes, I understand that from the summons I received.
3. Can you explain the process under which patents are obtained in the Colony? Officially?
4. Yes? Under the patent law which was passed in 1852, any person the author of an invention pays into the Treasury the sum of £20. He sends with that a petition asking for letters patent, and covering, as a rule, a written specification, and diagrams or plans illustrative of the invention. That petition, with its accompanying documents, is referred to a Board consisting of two persons, named or approved by the Colonial Secretary, for their report. These gentlemen make a report, after due investigation I presume. If they report that there is no objection, or if they recommend that letters patent be issued, the approval of the Governor and the Executive Council is taken on a recommendation from the Colonial Secretary that such letters patent do issue.
5. That is the usual official course pursued? That is the usual official course, supposing there is no objection—no defect.
6. Do you know on what matters the parties to whom the reference is made are called upon to report? Upon the novelty, the originality of the invention, as claimed in the petition.
7. Do you know what steps (if any) are taken to give notice to persons who may have conflicting claims, to enable them to lodge objections to the granting of the patent applied for? We are not aware of the existence of any conflicting claims, nor can we suppose that conflicting claims exist, because the applicant, who pays his £20, makes a statement in the petition that *he* is the originator of the invention.
8. Has it never occurred to you that it would be desirable to have some means of advertising the public before the patents are issued? We act entirely according to the law. You ask my opinion?
9. Decidedly; not as to the law? Yes, I think it would.
10. It would be an improvement if some means were taken to notify the public of the different applications, and that time should be given to persons who have claims to come forward and prove them? It would be desirable, I have not the slightest doubt. I think that is the practice in Victoria. I have seen notices of the kind in the Victorian Gazette.
11. Are you aware that the law in Queensland at the time of separation was the same as it is here, and that an Act has since been passed in that Colony providing for provisional registration? I am not aware. I have not seen the Act.
12. Do you think it desirable that the law should be so amended as that protection should be given for some limited period, until investigation should take place with regard to conflicting claims for patents? I think so. That is what is called "provisional registration."

H. Halloran,
Esq.

6 Dec., 1872.

- H. Halloran, Esq.
6 Dec., 1872.
13. Has it ever occurred to you that the fees charged in the first instance on applications for patents in this Colony are too high? The Legislature has fixed by law that the fees should be so much.
14. Irrespective of the law, do you think that they are too high? I do not know that I do.
15. Do you not think that it would be an improvement to make the fees progressive—to make the first fee a low one, and increase the fees from time to time, as persons who take out patents should from time to time have opportunity to determine their commercial value? You mean a smaller fee for provisional registration, which might never result in a patent being issued?
16. That is one point I should like to have considered. Suppose that after provisional registration a patent is issued—would it not be better that the first fee should be lower, and that after time had been allowed to determine the commercial value of the patent another fee should be given? That is, the patent would cost £20, we will say, and you suggest that the applicant should pay £10 for provisional registration, and £10 at some subsequent period?
17. Yes? But how are you to get it from him?
18. The patent would be subject to charges from time to time. Are you acquainted with the law in Victoria? I am not. It is a very lengthy Act.
19. *Mr. Cunneen.*] When the plans and specifications of patents are lodged, what are the duties of the Commissioners or officers who are to report upon them? To report would of course imply investigation. The gentlemen to whom these applications are referred are generally scientific men.
20. What would be the object to which they would direct their attention? They would report as to the originality of the thing desired by the applicant to have patented.
21. Would their investigation be a protection against the plagiarizing of any person's ideas? I should think the Supreme Court would soon determine that. If I take out a patent and you attempt to make use of my invention, I should proceed against you in the Supreme Court.
22. I suppose the officer who examines the patent and specification inquires whether it is really original? I think so. I believe in the fidelity of the persons to whom we refer. They are professional men generally; sometimes they are business men.
23. How are they compensated? They get three guineas each.
24. For each investigation? For investigation on each patent. If they report adversely, the balance of the £20 is returned to the petitioner, who thus does not lose the whole amount.
25. Are the gentlemen who report paid out of the £20? They are paid out of the £20. The Crown Solicitor gets £5 10s. 6d., the Solicitor General gets £5, the Solicitor General's clerk gets £1, and I think about £2 remain in the Treasury to the good.
26. *Mr. W. C. Browne.*] What duty does the Crown Solicitor undertake in this matter? He prepares the letters of registration.
27. And the Solicitor General? He peruses and approves the draft letters of registration.
28. And the clerk? The clerk gets £1 also.
29. Do you not consider these fees exorbitant? I do not know that I can pass an opinion on that point. They have been fixed, I suppose, by sufficient authority.
30. In your opinion, would you consider them exorbitant? Professional men like to be paid high fees.
31. Do you think that the duties are of so arduous a character that it is necessary to compensate them so highly? I do not think that professional men look upon five guineas as a high fee.
32. All these fees are deducted from the £20? All these fees are deducted from the £20. The Government does not pay—it is the individual.
33. If the applicant is not successful? All is returned to him except the £6 6s., which go to the two persons who report adversely. The balance is returned to him.
34. Could you suggest any means which would be less expensive to the applicant than the present method? Any cheaper method than the application to the Crown Solicitor, the Solicitor General, and the Solicitor General's clerk?—I should say that if the sum paid were £10 only, according to law, their rates of remuneration must be reduced one-half. The way to make the fees less in amount is to make the sum paid by the individual less. £20 does seem a large sum; but the patent which the individual takes out may put a fortune into his pocket, or, on the other hand, he may lose the whole amount of £20.
35. Have you heard any complaints from the outside public of these exorbitant charges? I do not think so, not even where the applicants have failed. Where they succeed, they often find that the patent is of no commercial value.
36. *Mr. Wearne.*] How many patents are taken out annually? I have not looked to that. I could not tell you now, but I will let you know. (*See Appendix A.*)
37. *Chairman.*] Where are the plans and specifications lodged after the patents are issued, or in the first instance, when they are applied for? I think they are with us.
38. In the Office of the Colonial Secretary? Yes, until we send them to the Government Printer, by whom they are published. There are two or three volumes of colonial patents published already.
39. Do you not think that the plan which they have in Victoria of having an officer to look after these matters, and a place where the public can gain information, would be desirable here? I did not know that they had that in Victoria, but I do not see what the public would have to do with these matters, other than the individuals who take out the patents.
40. Would it not be desirable where a patent was first applied for, that any person having an interest in the matter should be able to go to some office where they could examine the specification and lodge objections to the granting of the patent if they thought fit, before the patent was issued? Then you would also afford them an opportunity of making themselves masters of the property of another individual.
41. But that could not arise if the applicant had provisional registration? Certainly not, if he had provisional registration.
42. Have you known any instance in your experience where a patent was refused? Yes.
43. How long have you been Principal Under Secretary? Since January, 1866.
44. Within that time how many applicants do you think have been refused? I cannot say. Not very many. I think half a dozen would be the full number.
45. Are any other fees charged besides the £20? The law admits of nothing more being charged in the first instance.
46. None of this is carried forward to the Revenue of the Country? Yes, there is a small balance; I think it is nearly two pounds out of the twenty.

SELECT COMMITTEE ON PATENTS.

47. *Mr. Wearne.*] Who appoints the persons to whom the patents are referred? The Colonial Secretary H. Halloran, Esq.
 48. Approves? He nominates.
 49. The Colonial Secretary does not necessarily nominate the same persons as a Board to report upon each patent? No, not the same Board. A gentleman may understand perfectly well the principles of chemistry, for instance, who may not understand another matter such as architecture. Having looked at the scale of charges, I think £2 3s. 6d. is what remains out of the £20. 6 Dec., 1872.

H. W. Cooper, Esq., called in and examined:—

50. *Chairman.*] You are Managing Clerk for Messrs. Allen, Bowden, and Allen? Yes. H. W. Cooper, Esq.
 51. You have had a good deal of business to transact in connection with taking out patents for that firm? I have had a considerable amount of business of that kind. 6 Dec., 1872.
 52. Has the question of the amendment of the law in reference to patents come under your consideration? I have not considered it fully. I certainly have considered it in one point of view, which I will name to the Committee directly.
 53. You are aware of the process which has to be gone through now to obtain a patent? Yes.
 54. Do you think it would be an improvement of the law if we had here the same system which prevails in Victoria, in Queensland, in New Zealand,—that of giving provisional registration? I think that that is decidedly the best plan; it would be an improvement on the system which obtains here.
 55. That is, giving protection for a time until the application for the patent has been investigated? Quite so. I am aware of the difference between the law of this Colony and that of Victoria and Queensland.
 56. Do you think that it would be an improvement also that time should be given, and that a notice should be given of the different applications for patents, so that persons having any counter-claim might come in and lodge it? If the original applicant is fully protected by registration, I think it would be advisable that some such plan should be adopted.
 57. Do you think it very inexpedient that matters of this kind should be referred to a Board which is not in the habit of advertising in the first instance notice of the application for a patent? It is decidedly objectionable. I can refer the Committee to an instance within my own knowledge, showing how badly the present practice works.
 58. Perhaps you would state the instance to illustrate the principle? The names of the parties I need not mention. A client of Messrs. Allen, Bowden, and Allen, had a person in his employment for a considerable length of time to whom he paid skilled wages; and during the time of his employment the employer suggested an improvement in his particular manufacture, and after some consideration it occurred to him that the object he had in view could be accomplished in a particular manner. He employed this skilled workman to make the necessary machinery. The thing was completed sufficiently to test its practicability. The principle of the invention originated with the employer; the workman was only employed to carry it out. When the employer was away from Sydney, an application for a patent was sent in by the servant for the invention which had been suggested by the employer, and carried out in his time and with his own money and materials.
 59. In a case of that kind the patent could only be set aside by action in the Supreme Court? Yes, and I will point out the peculiar hardship of that case. It came to the knowledge of the employer that the application for a patent had been made. We, as his solicitors, set out the facts in a petition to His Excellency the Governor, requesting that he would refer it to the Committee to whom the original petition had been referred. That was done, but the Committee entertained some doubts as to whether they could enter into the question of conflicting rights at all; and after some hesitation, the question was referred to the Crown Law Officers. The Solicitor General gave it as his opinion that inasmuch as the original applicant had sent in a petition stating that he was the author and designer of the invention, and had deposited the £20 in the Treasury, the Committee to whom it was referred could do nothing but report whether or not the specification disclosed an invention which could be registered. The report was made and the patent granted.
 60. It was granted to the original applicant? It was granted to the original applicant, although not the inventor.
 61. That could have been obviated if there had been power to investigate the matter and to deal with it on its merits? Quite so.
 62. If registration had been only provisional that could not have happened? No.
 63. Has it appeared to you that there should be some officer whose special business it should be to take charge of specifications for patents, and to afford information to the public with reference to them? I understand that duplicates of all letters of registration containing specifications and plans, where they admit of it, are filed in the Prothonotary's Office now, and any person requiring to see them can do so. The practice is that an applicant for a patent sends in a petition. He has one specification and one set of drawings enclosed. He has a second specification and set of drawings, which, upon intimation that the patent is granted, are generally sent to the Crown Solicitor's Office, who annexes them to the letters themselves. The duplicate is filed in the Prothonotary's Office. The Act requires that that shall be done within three days after letters of registration are granted, and, as a matter of convenience, the solicitors generally allow one of the clerks in the Crown Solicitor's Office to do that for them. They generally pay him a fee. So far as regards the public, every petition granted may now be seen in the Prothonotary's Office.
 64. Who is the party who has charge of them? One of the clerks in the Prothonotary's Office.
 65. Have you considered whether the fees paid in the first instance are not too high for a man of moderate means? Yes, considering that many of the patents are really of no value. It seems to me that a small fee for provisional registration would meet the fairness of the case, and an increased fee when the patent was granted.
 66. Do you think it would be a proper thing to have a progressive scale, according to the term of the patent? Considering that the patent is for the exclusive benefit of the patentee, I think there should be a progressive scale. If it is considered right to grant patents, of course there should be some corresponding benefit to the public in the shape of fees, which go into the Revenue.

- H. W. Cooper, Esq.,
6 Dec., 1872.
67. Are you aware what fees are paid to the Crown Law Officers and others for the examination of patents? No, I cannot tell at all. I know that when £20 are paid into the Treasury no portion ever comes back. I have always understood that each of the gentlemen to whom the matter is referred receives three guineas, and as to the rest we never hear of it. We generally pay an additional fee of two guineas for registration.
68. *Mr. Wearne.*] You say that it costs two guineas? The two guineas is a matter for which I consider the solicitors are to some extent responsible. They pay it rather than jeopardize the patent, which might not otherwise be registered within the time limited for that purpose.
69. *Chairman.*] Are you aware that the Solicitor General and the Crown Solicitor receive each a fee of £5? Not until I heard it mentioned in this House.
70. Can you see any necessity for those large fees to those gentlemen? Certainly not. I should think it was part of their official duty to issue the letters of registration, and the remuneration for doing it should be included in their official salaries, especially as the work is done during office hours.
71. I think you have been many years with Messrs. Allen, Bowden, and Allen—Have you known many instances where patents were refused? None in which I have been concerned; they have all been granted.
72. *Mr. Wearne.*] From your experience, what alteration would you make in the law as it now stands? I should not like to answer that question at present; it would involve a considerable amount of consideration. The question of patents is one of great difficulty; it has been for some time past before the public in England; and without having my attention specially turned to the subject, I should not like to venture an opinion beyond what may be gathered from the evidence I have already given.
73. *Chairman.*] You are aware that there has been no legislation on the subject in this Colony since 1852? There is but the one Act.
74. Has your attention been directed to the fact that in Queensland, where the same law existed as that which prevails in this Colony, they have felt it necessary to pass an Act giving provisional registration? Yes.
75. That was passed in 1867? That is so.

TUESDAY, 10 DECEMBER, 1872.

Present:—

MR. W. C. BROWNE, | MR. TEECE.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

Frederick Beer, Esq., M.D., C.D., and O.D., called in and examined:—

- F. Beer, Esq.,
M.D., C.D.,
and O.D.,
10 Dec., 1872.
76. *Chairman.*] You are aware of the object of this Committee? Yes.
77. I understand you take some interest in the law with reference to patents? I do.
78. Do you think the patent law of this Colony is susceptible of amendment? I think it requires a great deal of amendment.
79. What amendments would you suggest? I think there should be a radical alteration in the mode of proceeding for obtaining patents. Instead of having to pay at once a high entrance fee, as it may be called, I think the first payment should be fixed at a minimum, the greater portion of the payment being deferred until such time as the inventor had had an opportunity of bringing out his invention.
80. Are the fees now payable too high? A great deal too high, paid, as they are now, the whole at once. I do not say they would be too high if the payment were spread over a period sufficient to allow the inventor to reap some profit.
81. Are you aware of the scale of fees in Victoria? Not precisely; I think the first payment is the same as in Tasmania—£5.
82. They amount to £7 or £8 altogether, I think, within the first two years? I think that would be reasonable.
83. Have you any objection to the principle on which patents are now issued? Yes, because it appears that once you have made your specification you cannot alter it, and if you are not yourself well skilled in such work, or have it drawn up a hand well skilled in it, you may be floored, as I have been in my very first patent.
84. I believe you have taken out some patents? I have four, and one has been under consideration these six months which is worth all the others put together.
85. You think the system that prevails here of issuing a patent, after application, upon the report of two persons, to whom it is referred, without any publicity, is a bad one? Very bad. Perhaps the system is more to be complained of than the payment.
86. Are you in favour of provisional registration—giving protection for a provisional period until the invention is examined? Yes, I think that would be a great step, and notice of any such application for provisional registration should be given, not only in this Colony, but in other Colonies and at Home; that would be a protection to the inventor; whereas now, by the time you get your patent and bring it into notice, which gives great labour and trouble, the thing has gone afloat, and may appear in some other Colony under a different guise, with perhaps some little improvement. I think also there should be an alteration of the law with regard to the examining of patents. Instead of handing them over to what they call experts, there should be an Examiner of Patents, who should have a competent knowledge of several branches of science; he ought to be well versed in natural philosophy, organic and inorganic chemistry, and in the principles of the natural sciences.
87. One man could hardly have sufficient knowledge for such an office—for instance, what would a chemist know about mechanics? He might call in assistance when he required it; but if a man is properly and liberally educated, no branch of science should be quite dead to him.
88. How would you have the patent determined upon? On its principles.
89. By whom? By a judge who is capable of doing it. As it is now, you go to the Colonial Secretary's Office, and the Under Secretary probably recommends certain persons to be the Examiners, and he may select two wrong persons. The first requirement is that the Examiners should understand the nature of the invention.

90. You condemn the present system of examining—How would you have the patents examined before they are issued? By as competent a person as could be got for the office of Examiner of Patents, and in any case in which he did not think himself competent to decide alone, he could call for the assistance of one or two persons whom he might think qualified to help him on the points in question. I believe the great facility with which patents are granted is a great fault, because it gives no guarantee that the invention is worth a cent; on the other hand, if it were carefully examined and people had a kind of moral guarantee that the granting of the patent implied that it was worth something, it would be a great advantage to the inventor, and help him very much to bring his invention into notice. The inventor is not usually flush of money, and by the time he has paid the cost of trials and experiments, and the £22 which is demanded for the patent, he is completely left without means, and not able to bring out his invention. His great difficulty is to find some one to help him to bring it before the public, who are wholly ignorant of it, and he has to teach them and make them understand its value. Persons who might be disposed to come forward with pecuniary assistance will not do so, because they cannot trust their own senses or judgment, and the inventor is perhaps for years unable to do anything; but if the patent from the Government were a guarantee that the principle of the invention was correct and worth something, then the self-interest of capitalists, who are always on the look-out to catch hold of something good, would induce them to assist in bringing out the invention and making it a practical success. As it is, the inventor suffers discouragement in every direction, and the Country loses by it.

F. Beer, Esq.,
M.D., C.D.,
and O.D.

10 Dec., 1872.

91. Would you be in favour of notice being given to the public of any application for a patent, before the patent was granted? Yes; I would have an office open to the public where all patents and applications for patents should be registered in such a way that every one might be able to see their nature—not only a register of patents in this Colony, but from the other Colonies, and from England, America, and other Countries.

92. Supposing there were an office like that, it would involve some expense; would not that have to come from the patents issued? The first fees should be sufficient to cover that; £5 would be quite sufficient as a first payment. I would give notice of all patents to the Governments of other Countries,—France, Germany, England, America, and other places where they have Patent Offices, so that if an application for a similar invention had been previously lodged, the fact might be known, or that anybody subsequently applying for the same principle might find that a patent had been already issued.

93. *Mr. Browne.*] You are familiar with the whole process of obtaining patents for New South Wales, I presume? Yes.

94. Are you of opinion that the present fees are too high? To commence with, yes.

95. Could you suggest to the Committee any means by which the present method of obtaining patents would be rendered less expensive? I do not see why the Crown Solicitor should have ten guineas for putting the seal on the document, when he is already well paid.

96. Are you aware what are the duties of the Crown Solicitor and Solicitor General in reference to patents? The application is laid before Examiners to see whether it should be recommended to the Executive, and when it is approved the applicant gets notice that the Crown Solicitor has received orders to issue letters of registration, and then you must pay two guineas more within three days; it is first £20 to the Colonial Treasury, and when you get notice it is two guineas more for registration at the Supreme Court; and out of the whole money the Crown Solicitor gets ten guineas, while the Examiner gets only three guineas.

97. The Crown Solicitor has very little to do with it? Besides inserting the title, he puts the patent in the press to put the seal on it, the same as he would copy a letter, as I believe.

98. Do I understand that when you say the Examiner of Patents should be familiar with organic and inorganic chemistry, you mean that he should be familiar with these sciences on account of the applications for patents for compound preparations—patent medicines and so on? Yes, preserves, pickles, any process for the preparation of leather, &c., or anything involving a knowledge of chemistry. He should also have a thorough knowledge of physics; for example, of hydraulics, pneumatics, optics, acoustics—in fact, of all of the natural and exact sciences. Some of these patents may be very simple, but others require a knowledge of several subjects.

99. Do you think the fees, from the number of applicants that apply during the year, would be sufficient to pay this Examiner? They may not; but I would not make it a matter of revenue; I think, as a general rule, the fees would cover the expenses.

100. The Patent Office, you think, ought to be entirely distinct from any other Office? Yes; and the models and drawings should be left in a museum. It might be attached to the Department of Mines, for the Patent Officer would be the best adviser to the poor miner, who is now too much in the hands of mere would-be engineers and iron-workers. Then the resources of the Country would be developed properly and economically, and there would not be so enormous a quantity of capital wasted as there is at present.

John Musson, Esq., called in and examined:—

101. *Chairman.*] You take an interest in the law of this Colony in reference to patents? I do.

102. I think you have taken out some patents yourself? I have taken out one, as attorney for another party.

J. Musson,
Esq.

10 Dec., 1872.

103. Will you tell us in what way you think the law of this Country might be amended? I think we should have provisional registration, and that the fees should be much lower than they are at present. The fee for provisional registration should be about £2; in Victoria it is £2 10s.; but I think £2 would be quite enough.

104. What are the advantages of provisional registration? It allows a person time to perfect an invention—to try it, in fact. If I am trying to perfect an invention at the present moment, I am employing persons who are liable to pirate that invention, and I lose the benefit of my exertions. Inventors are proverbially poor people, and therefore the fee should be small.

105. Are there any other advantages of provisional registration—for instance, should not time be afforded for the public to come in, after getting notice, and prove any better claim to the invention? Undoubtedly. I think the patent should be referred to a competent Examiner or officer appointed for the purpose.

106. Do you think one officer would be sufficient to inspect and report on applications? Yes, at present, quite so.

- J. Musson,
Esq.
10 Dec., 1872.
107. Do you think one officer would be better than a Board? You might have a Board to refer any special matter to.
108. You think there should be an official, I presume, whose business it should be to keep a register of all patents and give information? Yes, whose salary should have nothing to do with granting the patents; he should be altogether on salary, and receive no fees.
109. If the fees were reduced, do you think sufficient would be obtained from the patents to cover the salary of such an official and pay the expenses of the office? Yes, I think so. At first I do not think the duties would take the whole time of an official. There should be a suitable library with reference to patents.
110. Do you not think patents granted elsewhere should be registered here? Undoubtedly.
111. That would involve some expense? You already get the English and American patents, and the additional expense would be very trifling.
112. I presume there is a willingness on the part of Patent Offices to exchange their publications? Yes.
113. You have paid some attention to the patent laws of Victoria, Queensland, and New Zealand? Yes.
114. Is it the fact that inventors have more confidence in taking out patents in those Colonies than in New South Wales? In Victoria and New Zealand,—yes. The law of Queensland is similar to ours, except that it allows provisional protection on payment of a fee of £2. I have no hesitation in saying that a very large number of patents taken out here are pirated—patents which have been published elsewhere.
115. If time were allowed in each case, and notice given to the public of the application, that would not be the case? No.
116. Can you see any advantage to the public or to inventors from having applications referred to the Crown Law Officers? No. If it is a matter of law it might be referred, but as a rule I cannot see the advantage. If that is done, the applicant for the patent should pay the necessary fee.
117. If it is litigated? Yes. In Victoria there are fees put down for appointments with the Law Officers.
118. In cases where conflicting claims arise? Yes.
119. You are aware that in Victoria, in cases not contested, the fees at first—for the issue of a patent for the first two years—only amount to about £7 or £8? Not so much; on depositing the specification £2 10s., and on obtaining letters patent £2 10s. That is for the first three years. Before the expiration of the third year £15 must be paid. If the patent turns out to be good for anything it can well afford to pay £15.
120. You are in favour of this progressive scale? Yes.
121. You would not object to this fee—£15, at the end of the third year? I think it is heavy. The Act was passed eight years ago, and I think the fee is more than sufficient now to pay expenses. At the end of the seventh year there is an additional fee of £20. I think half these fees would be sufficient. No patent should be granted that has previously been published, unless, of course, to the patentee or his assigns. In Victoria I believe they claim that, although a patent has been granted and published elsewhere, they can take it afterwards. I am of opinion that that should not be allowed upon any consideration. For instance, if a person sees a published patent in England or the States, he should not be allowed to take it out in this Country.
122. You think the original patentee only should be allowed to do that? Yes; otherwise it would be a pirated patent. The intention of the law in Victoria was that it should not be allowed, but a person may state that he invented it at the same time as a person in England or America, and his statement cannot be disproved. I think the fact of a patent having been published elsewhere should be sufficient to prevent the granting of that patent to any one here, unless to the patentee or his assigns. I would also recommend that the Examiner or Patent Officer, in case of refusal of a patent, should be compelled to assign reasons and refer the party to any previous device. These grounds the applicant should be allowed opportunity to controvert and to require a second examination, and if on a second examination his claim should still be rejected, he should be allowed an appeal to a special Board or to the Supreme Court. Patents are sometimes of immense value, and this would be a safeguard against an unjust refusal. Then I would recommend that a patent should be granted to the *bonâ fide* inventor who first reduces his invention to practice, or first notifies the office by an application for a patent, as between two independent inventors he certainly deserves most credit and deserves the reward who first reduces his invention to a practical shape, and first gives the public an opportunity to use it. One man may conceive the idea of an invention and may yet require years before he may be able to reduce it to practice. You see I make a distinction between the man who merely conceives an idea and another who carries out the invention practically. The man who carries it out should be declared the true inventor. It is so now I believe in the States, but formerly it was quite the contrary. In Melbourne it is not so, and litigation has arisen on the point who was really first inventor.
123. Would not the first inventor, *primâ facie*, be the party who lodged the first application for a patent? Yes, I approve of that system. In some cases there may be hardship, but what is the use to the public of a man who invents an idea and does not carry it out?—The person who introduces the invention benefits the public. Another requisite is, that witnesses should be compelled to give evidence in contested cases in the same way as witnesses in the Supreme Court. Some people may not like to give evidence, but they should be compelled to do so in the interests of justice. I may mention that in America, according to the *Scientific American*, the fees for each caveat, 10 dollars; on filing an application for a patent for seventeen years, 15 dollars; on issuing original patent, 20 dollars; then, on application for the extension of the patent beyond seventeen years, 50 dollars; on granting the extension, 50 dollars. The new patent law of Canada makes the fee for five years, 20 dollars; for ten years, 40 dollars; fifteen years, 60 dollars. There is some very interesting information in *Engineering* about the number of patents granted for some years. In 1869, the number of applications in England was 3,786, and in the States, 19,251. I do not know whether the Committee have ever seen the patent papers from other Colonies. Here is a South Australian one (*produced*). It says distinctly that if the patent is not a new invention the document is of no use at all. Here is a New South Wales patent (*produced*). That invention has been patented in England, and in North and South America; but although it has passed in various parts of the world, it has to go through the same routine here as a new patent. I think it would be an immense advantage if the patent laws were alike in all the Colonies, for it is a very expensive thing now to take out a patent.

FRIDAY, 13 DECEMBER, 1872.

Present:—

MR. W. C. BROWNE, | MR. COMBES,
MR. CUNNEEN.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

William Frederick Gibson, Esq., called in and examined:—

124. *Chairman.*] You are employed in the Sydney Mint? Yes.
125. In what capacity? I am now Coiner; formerly I was Accountant.
126. Has your attention been called at all to the operation of the law in this Colony as to patents? Not as to the law, but as to the practice some years ago.
127. How long ago? About 1863 or 1864, when Captain Ward was Deputy Master of the Mint. I was then Registrar and Accountant to the Mint, and applications for patents were referred from the Colonial Secretary's Office to Captain Ward, to report with another Commissioner.
128. You are not aware of any change in the practice since then? No, I do not know anything at all about it now.
129. Will you state what was the practice then, so far as it came under your observation? The applicant's papers were sent on to Captain Ward, and some other person was selected to report with him. He was always one of the Commissioners, so far as I could understand. The Commissioners would examine into the matter, and having satisfied themselves, the application was granted or rejected, as the case might be. I have seen very few cases rejected.
130. It came under your observation that Captain Ward was often appointed one of the Examiners? Yes. There might be a great many others of whom I had no knowledge; but it appeared to me that Captain Ward was always one of the Commissioners for such patents as came to the Mint, which were only sent to the Mint because he was required to report thereon.
131. Do you know what steps the Commissioners took to determine whether a patent ought to be granted or not? I do not know. The thing appeared to me to be done off hand. But there might have been inquiry that I knew nothing of. The Commissioners might have met outside the Mint.
132. Did you ever know any instance in which these Commissioners reported against the application for a patent? I do not remember any; but it is long ago, and I cannot charge my memory accurately.
133. Has it occurred to you that the system was very loose and open to objection? It often struck me that the system was a curious one. In other words, I conceived that the plan adopted did not satisfy the inventor, if he was to be satisfied, that what he was seeking to patent had got a fair practical consideration. Necessarily so, because a man might understand one thing—a patent churn, for instance—and not know anything about a set of harness.
134. Do you think the interest of the public was sufficiently considered in giving patents in this loose kind of way? I do not know how far the public had to do with it; I thought it was a matter more for the inventor and the Government.
135. Did it not appear to you that there should be some opportunity afforded to persons who conceived that they had claims for the same patents, to come in and prove their claim? Certainly. It often struck me that a man might be infringing another's patent.
136. Has it occurred to you that notice should be given to the public in some way, in order to allow objectors to put forward their objections? Most decidedly.
137. Do you know what fees were paid to the Commissioners? Three guineas each, I think.
138. Do you not think the work performed by the Commissioners could be better performed by some responsible officer appointed by the Government to act as Examiner of Patents? I think it could be better done by employing a practical man, a manufacturer of a similar article, or one who would be likely to use it. For instance, I recollect a set of harness coming there, which was riveted. I might have my ideas about it, whether it was good or bad, but I should think my evidence would not be very conclusive, whereas if any two practical men, such as Mr. Woods, of the Omnibus Company, Mr. Binnie or Mr. Brush, manufacturers of such articles, reported upon it, it would give satisfaction to the inventor if they passed it, and very likely, if the invention gave evidence of practical usefulness, these men would give the Colony the benefit of it by bringing it into practical use.
139. Is it not the object of the inquiry by Commissioners chiefly to determine whether anybody else has a similar patent in existence? I do not think so; it appeared to me to be whether it was desirable to grant the patent or not.
140. Would not both these elements come into consideration? If that is the case, there should be a depository of plans of all other patents.
141. Do you not think there should be some office where intending patentees and other persons might get information? Yes.
142. *Mr. Combes.*] Did it occur to you that the applications for patents that came to the Mint to be reported on by Captain Ward, probably had some reference to the extraction of gold or other metals from minerals, or were patents having reference to some metallurgic process or mechanical means of reducing ores—something that Captain Ward in his capacity as Deputy Master of the Mint would have had some technical knowledge of? It did not strike me so; for instance, there was the case I have alluded to of a patent for harness.
143. As far as your knowledge goes, there was no preliminary examination of patent records to see whether the same invention had been patented before—whether in fact it was an invention or not? I do not know whether it was done elsewhere, but certainly not there.

W. F. Gibson,
Esq.
13 Dec., 1872.

John Williams, Esq., Crown Solicitor, called in and examined:—

John
Williams,
Esq.
13 Dec., 1872.

144. *Chairman.*] I may ask you, in general terms, whether your attention has been specially drawn to the Patent law in this Colony? Only so far as carrying out the present Act is concerned.

145. Has it occurred to you that the law might be amended with advantage? I cannot say I have paid any attention to that part of the subject.

146. Have you heard complaints made by patentees of the want of provisional registration? Yes.

147. Do you think it would be an advantage to have that kind of registration here as well as elsewhere? I am sure of it. I had an instance yesterday. A party came and informed me that he had an invention he was obliged to bring before the public at once, because somebody else had got hold of his notions and would bring it out. At the same time he said it would not be worth his while to apply for a patent if he could not provisionally register it. Had he been able to provisionally register it he would have done so yesterday, and then brought in proper plans in the ordinary way.

148. I suppose you are aware that provisional registration is the law in Victoria and Queensland? I believe it is.

149. I suppose you are familiar with the course pursued here in dealing with patents? I am.

150. Do you know what inquiry is made, as a preliminary matter, before the application is referred to Commissioners to report? No; it comes to me after it has been to the Commissioners. The process is this:—The applicant for a patent, or registration rather, sends in his petition and drawings, with a Treasury certificaté of his having paid £20, to the Colonial Secretary. That application is then referred to scientific persons, or persons supposed to have some special knowledge of the subject, for report; and upon their report coming in, the papers are sent to me to prepare the patent. That is the first time I see them.

151. What is the principal object of the reference to the Commissioners? That I do not know. I imagine it is to ascertain whether the idea is a new one, and one for which a patent ought to be granted.

152. Before the matter could be dealt with satisfactorily, there should be a preliminary inquiry as to whether any previous patent for the same idea had been granted or not? I have often so thought, but I do not see how it is practicable. There may be patents in other Colonies for the very same thing.

153. With regard to this Colony, I mean? I fancy the published reports would show that. I imagine the Commissioners have to inquire whether it appears to be a new invention or not.

154. Do you know where the records of patents are kept? In the Supreme Court.

155. Are they of easy reference? Very.

156. Are you aware of any cases in which applications for patents have been refused? No; if they are refused I should have no notice of them.

157. How many patents were granted last year? Only by reference to the books. About thirty, I think.

158. What takes place in your office in reference to the granting of patents? We look to see that the petition is regular, and accompanied by a receipt for the payment of the money, that the plans and specifications are annexed to it, and that it seems to be in form. If the applicant is acting under a power of attorney, or as assignee of the inventor, we have to see whether the power of attorney or the assignment is sufficient.

159. Is the draft of the patent submitted to the Crown Law Officers? It is submitted to the Solicitor General.

160. Do you see any necessity for that? It is usual in all cases where legal forms are concerned.

161. Are you aware that many inventors are men of moderate means, and can ill afford to be taxed for their inventions? I hardly think they are taxed for their inventions; they pay for the exclusive privilege of using their inventions.

162. Have you heard complaints of the fees? I have.

163. Would you be in favour of the fee, in the first instance, being very moderate, and afterwards increased when the inventor has had time to test his invention? I think you must take the fee when the patent is granted; when once the patent is granted, I do not see how you can get the fee. There ought to be a small fee for provisional registration, to continue for three or six months, and then, if the inventor thinks it worth while to take out a patent, I do not see why he should not pay the full patent fee. I think in the first instance the fee should be small.

164. I may tell you that in Victoria the fees are, on depositing plans and specifications £2 10s., on obtaining patent £2 10s., with a further fee before the expiration of the third year of £15, and before the expiration of the seventh year, £20. These fees are in cases where no objections are raised. Do you not think it would be better to have moderate fees like these? There would be no legal objection to following that plan. It is a mere question of expediency. I am not a disinterested witness on the subject, being interested in some of the fees myself.

165. Do you see any absolute necessity for reference of these patents to more than one lawyer? I think it is advisable. The fees are paid to the Attorney and Solicitor General at Home, and form in fact the main source of the Attorney General's income. The patent fees amount to a large sum there.

166. Do you think it would be advisable to have an officer whose special duty it should be to give information to the public concerning patents, and to investigate applications? I scarcely think the fees for the number of patents applied for would pay the expenses of such an officer, even with the present fees.

167. It might be made an adjunct to some other office? I should think not. An Examiner of Patents would have to be a man of singularly extensive knowledge; and unless he had had some scientific training in the matter to which the patent related, he would not be able to tell whether it was an infringement or not. In England these questions call for the highest class of scientific evidence.

168. Do you not think that before letters patent are issued there should be notice, published in the Press, of the application for a patent, so as to allow persons with conflicting claims to come in? With the system of provisional registration I think that ought to be done, but with the present system it would be impracticable.

169. *Mr. Combes.*] It appears from what you have said that you think there should be a preliminary process for provisional registration—Does it not also appear to you that, while useful to the inventor or his agent, it would also be a protection to the public, because if, during the term of provisional registration, it were found that the invention were not original the patent would not issue? Yes; or parties having prior inventions affected by the later one might object to it. If we had provisional registration with small fees, notice should be given of such provisional registration, and of the intention of the applicant to apply for complete registration.

170. *Mr. Cunneen.*] If any person's prior right is infringed by a patent granted under the present system, he can obtain a prohibition? Yes; if there are two patents granted which are in effect the same, the holder of the first can obtain a prohibition against the infringement of his rights by the second.

171. Does our patent law protect inventions patented in England? No; they have to register them here, I think. * I am not prepared to say, off-hand, how that is, but my impression is that an English patent does not protect them out here; I think patents granted in England are protected only in England.†

172. If a person in this Colony patents an invention here, is it protected in Victoria or the other Colonies? No; the inventor has to protect his invention by separate patents in each of the Colonies, if he wishes to do so.

173. Then the patent only protects the patented article in the Colony in which the patent is taken out? That is so.

174. Supposing an inventor here registers his invention under the Patent Act, but another person immediately goes to Melbourne and patents it there as an original invention, how would the inventor and patentee here be affected? I should imagine he could set aside the registration at Melbourne, because it ought to be registered by the first inventor or his assignee. It would be a false registration by a person professing to be the inventor who was not the inventor.

175. *Mr. Combes.*] You are aware that people apply for patents here without being the assignee or the inventor, and they still get the patents? I have heard of such cases, but I am not aware that the registration has ever been questioned.

John
Williams,
Esq.

13 Dec., 1872.

THURSDAY, 19 DECEMBER, 1872.

Present:—

MR. W. C. BROWNE,

MR. COMBES.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

Charles Watt, Esq., called in and examined:—

176. *Chairman.*] You are aware, I presume, of the object with which this Committee has been appointed? I have seen from the newspapers that the Committee has been appointed, but I cannot say that I am aware of the precise objects of its inquiry.

177. We have been appointed for the purpose of inquiring into the working of the existing Patent Law, with a view to recommending its amendment in such particulars as may be deemed necessary. Let me ask you first if you have ever taken out any patents? Yes, I have taken out one in this Country, and three in England. That is on my own account, but I have been much concerned for other persons in taking out patents both here and in England.

178. You have acted here in the taking out of patents? Yes, both here and at Home; but I may say that in this Colony I have acted more on the part of the Government than of the patentees in the matter of patents.

179. You have acted on behalf of the Government in cases where a patent has been applied for? Yes, in this Colony I have.

180. When you have entered upon these inquiries, have you read any circular setting forth the particular objects you would have to inquire into? No, nothing of the kind; simply a notification that the subject was referred to me and some other gentleman, to inquire into and report upon.

181. And then you and the other party to whom the subject has been referred have reported to the Government? Exactly.

182. Upon what points did you report? As to the novelty of the matter sought to be patented—in so far as we knew. I wish the Committee to understand that I desire to be very careful in any observations I make, because a very wide subject may be here opened up; and I may add that when I use the word novelty, I mean by that a thing not known to the Examiners to have been previously worked.

183. Here or elsewhere? No; not altogether in that wide sense. If you desire it, I can mention a case which will perfectly illustrate my meaning.

184. What are the means by which you ascertain whether or not the alleged discovery has been previously brought into operation? Here?

185. Yes, in this Colony? With reference to this Colony, all that we can do is to look over the patents which have been granted, and see by comparing them with the specification referred to us whether they are in any way infringed upon—that is the only way we have of dealing with the matter.

186. Where do they keep these records of patents previously granted? Up to the present time we have had a great deal of trouble in searching into these records. There is certainly not so much trouble now, but the arrangements might be better.

187. Who has them now? We have had to go to several offices before we could search them all. There are some of them at the Supreme Court, but they were not all to be seen there; then there were some at the Government Printing Office, and others in various offices.

188. There is no one office then dedicated to the purpose? No, there is no one office that I am aware of in which you can see them all.

189. Has there been no official whose special business it has been to hunt up information for the Examiners? No, not that I am aware of.

190. No special officer to whom this branch has been entrusted? No, I believe not.

191. It has been left to the Examiners to get through the business in the best way they could? Exactly.

192. Do you not think it would be desirable to have some such officer to have the custody of the papers and records, and to prepare information for the Examiners? Yes, the information ought to be capable of being obtained somehow in one office, without having to search in other places.

193.

* NOTE (on revision):—This was in reply to a question as to whether a patent granted in England extended to this Colony.

† ADDED (on revision):—In Godson and Burke on the Law of Patent and Copyright, page 134, the law upon this point is thus stated:—"The privileges derived from a patent take effect only in England, but if the Colonies are named therein then it extends to them, and on the form of patent given provision is made for including the Colonies by inserting these words—'and also within all our Colonies and plantations.'"

C. Watt, Esq. 193. Your report, as an Examiner, would be, I presume, first, whether the object proposed to be patented was something new, and next whether it was a proper thing to have a patent granted? No, our report hardly takes so wide a range as that. We are called upon to recommend the prayer of the petitioner to be granted, or otherwise; but we are not expected to give any opinion as to its workable character. If the thing is new, we should have to report favourably, and a patent would be granted even though it were an utterly worthless discovery. We are not required to report upon the value of a supposed discovery in any way.

19 Dec., 1872.

194. But you can easily understand that there are some things which it would not be proper to grant a patent for? Except in one way, I do not think that we should interfere, and that would be with reference to the wide claims so often set up by patentees; beyond this I do not think that we have any right to use our judgment as to the propriety of granting a patent; we are called upon to report on nothing beyond the novelty of the matter submitted to us.

195. And this novelty, as far as you have yet gone, has reference to this Colony alone? I may answer generally, yes, but that answer will require some qualification.

196. What opportunities are given to the public to lodge opposition to claims to patents, where such claims infringe upon the rights of others? None that I am aware of; it is left entirely to the Examiners to protect the public.

197. Do you not think it would be desirable to have something in the Patent Law to provide for provisional registration of a discovery? That is a very difficult subject,—one upon which there is a good deal of difference of opinion. Speaking in the light of my Home experience, I can say that it is a privilege which has been very much abused.

198. Is not that the case with all privileges—that they are all more or less abused? That is true, but this is one peculiarly liable to abuse. Possibly it may not be so much so here as in England; at the same time, at the present moment I should hardly be prepared to say whether it would be desirable to alter the law in this respect or not.

199. In this Colony do you not think it would be a benefit to the inventor if he could secure himself by registration whilst he was perfecting his invention? Yes, if you study the interest of the *bonâ fide* inventor and his alone, it would probably be an improvement. But the way in which this privilege is abused in England is this: there are persons there who make a trade of taking out patents, and the moment they find attention being drawn to any particular branch of industry a number of so-called inventions are provisionally registered so as to shut out the real inventors. They put in what they call inventions, renewing them year after year, so that when a real discovery is made, the discoverer finds himself impeded. Take for instance the manufacture of candles; when attention was drawn to the improvements in this manufacture, hundreds of patents were provisionally registered, to the great injury of men who were seriously engaged in perfecting improvements.

200. Would you not have a body of special instructions for the guidance of Examiners and the regulation of applications for patents? That would depend entirely upon how you framed your Patent Law in the first instance.

201. Would it not be an improvement to have such a code of regulations? No doubt it would.

202. Is it your opinion that it would be an improvement upon the present system if there were some publication of patents prior to the issue of letters of registration? The difficulty I see in the way of such a publication is that it would only have the effect of giving information to others, which, for the sake of the inventor, would be better kept quiet.

203. Are you aware that under the Patent Law of Victoria they publish in the public Press all notices of applications for patents? Yes, I am aware they do; and possibly it may be useful to a certain extent, but I do not think it would be found very beneficial. I know that it is not considered so in England, nor would it have much effect as regards the great body of the public; besides, in Victoria they only advertise in one or two papers, and very little attention is paid to the notices even if they are seen.

204. But do you not think it would be a protection to persons having counter-claims, since it would enable them to see what claims were being made? In that view it would be desirable to have a publication of some kind, but I think it ought only to be in the Patent Office, where it could be readily seen. I do not think that anything would be gained by advertising. Men who are inventors are generally engaged working hard at the perfection of their invention, and are consequently not likely to give up much of their time in looking over newspaper advertisements, whilst even if they did, the notices might be lost in the crowd of advertisements, and so never be seen by them.

205. Are you aware that after the Commissioners report, their report is referred to the Crown Law Officers? Yes, I have heard so.

206. Do you think that at all necessary—that after the subject has been referred to competent persons and decided upon, lawyers who know nothing of the matter should be referred to? It is not necessary as regards the substance of the patent; but with reference to the legal part of the business, only a lawyer can deal with that, as matters now stand; errors would creep in that would vitiate the patent, unless it were framed by a lawyer.

207. However, I presume you do not see any necessity for the large fees which are at present demanded? I have some difficulty in answering that question, from the fact that persons applying for patents show so large an amount of ignorance, not only of what they require, but of what is required from them. Their claims are frequently so obscure that you can scarcely make out what it is that they do claim. They have generally no knowledge of the Patent Law, and it is only with much difficulty that the Examiners can deal with them. They write out what they call a specification, which is frequently barely comprehensible, and after having done that they think that all they have to do is to claim everything which they can reach by any possible stretch of their application. This gives a great deal of difficulty to the Examiners, who have to sift over these widespread claims, and to decide which of them are tenable and which objectionable. This is the objection I have to any reduction of the fees. The applicants do not at all understand the law, and so throw a vast amount of needless trouble upon those who have to deal afterwards with the applications.

208. But is not all this trouble confined to the Commissioners—do they not decide upon the whole matter in the first instance? The way of it is this: if a patent is referred to me, I look over the specification, and I find at the end that there are some half a dozen claims made. When I come to consider these with reference to the specification of the subject, I perhaps only allow* two out of these six claims. So that you will see from this, the trouble we have had which the applicant ought not to have cast on us.

209.

* NOTE (on revision):—A portion of these claims, and then the subject is referred to the Crown Law Officers.

209. Exactly; and I am not speaking of the fees to the Commissioners; but according to your showing C. Watt, Esq. the whole matter is considered by the Commissioners, and their report shows clearly the extent to which the patent shall be issued. In that case, what necessity is there for the matter to be afterwards sent to a barrister? I can assure you that it is very necessary, for in the majority of cases it is actually difficult to pick out from the application and specification what the applicant means. 19 Dec., 1872.

210. But that is dealt with by the Commissioners? No, they only report upon it; they do not touch it in any way, but only say what in their opinion may be granted.

211. They make clear what the man wants by saying what shall be granted? No; they report what they conceive he is entitled to.

212. Where is the difficulty in drawing out a patent in accordance with the opinion of the Commissioners—that opinion being clearly expressed? That is a matter on which I have a very strong opinion. These patents require to be very carefully worded, or they are next to useless to the patentees, especially in any matter of general manufacture where patents may become numerous. Take for instance the preservation of meat: the applications for patents for modes of preservation are very numerous and complex, and if they are not very carefully worded will be sure to be upset in a Court of law, and then all the benefit of the patent would be gone. Any person taking out a patent ought to have it in such form as to stand good in a Court of law, and he can only have this by its being drawn in proper form, and only a lawyer can so draw it.

213. Should there not be some competent officer attached to the Patent Office to do this? Yes, if you get a competent person; but only a lawyer could do it properly.

214. Has it not occurred to you that the fees charged here for patents are too high? It has occurred to me that where money enough is charged to secure the inventor, by giving to him a patent which, as at Home, shall be a proper document that will stand a contest in a Court of law, it will be better for him than to have a low charge and a document that is useless to him.

215. Then you think the Government do not charge too much? As far as the Examiners are concerned, we get three guineas for each patent we deal with, and I can assure you that, in the majority of cases, we do a very large amount of work for that amount.

216. You think that the Examiners do the principal work in this business? I do not wish to say that.

217. However I presume that you would be an advocate for moderate fees? Yes; and with reference to the drawing out of specifications—that is a thing which requires to be done with great care, as the whole value of the patent depends upon it. I have myself paid fifty guineas for drawing out the specification for a patent in England, so important is it considered there.

218. But in England they have a large number of patents, and they naturally become complicated—it is hardly so here? Our patents are the same here in matters in which we are interested. In meat-preserving, in quartz-crushing and the concentration of ores, there are a much larger number of patents than is generally believed. In England the patents are generally numerous; here they are numerous only in specific instances.

219. Would you recommend a scale of fees just sufficient to cover the charges of registration in the first instance, and then an additional fee if it is required to extend the registration, say after the first three years? Yes, I should certainly suggest that the registration should be extended if the patentee can show that he has not gained any remuneration from his patent within a certain time.

220. How long would you give in the first instance? That must depend entirely upon the nature of the subject of the patent. Some inventions may be of very great importance, and yet not be called into operation for some years after registration. At all events, as a general rule, if it were an original invention, I would grant a patent for seven years; if it were not worked within that time then the patent should expire; if it be worked, then I would allow it to continue on for another seven years, or for fourteen years in all.

221. You would make the patentee turn his discovery to account or forfeit his patent? Yes, within a reasonable time.

222. For the protection of the public, should he not be compelled to make his patent available? Yes, it should be worked by somebody, or the patent should lapse, otherwise the patent laws would become a very serious obstruction to improvement.

223. Then, as I understand you, you are in favour of an amendment of the present law, so as to admit of provisional registration, and of the appointment of a person to have charge of the Patent Office, as well for the benefit of the Commissioners as of the public? Yes, I consider the latter a most important matter for consideration.

224. And the fees for registration ought not to be more than the actual cost entailed on the Government? The fees would have in that case to depend entirely upon the nature of the claim registered. Some of these, as I have mentioned, involve an immense amount of trouble and consequently expense.

225. Do you think that other Patent Offices would be willing to exchange with ours copies of their records and other documents? Yes; not their specifications, for they are very voluminous, but their records they would. A great deal however would depend upon whether in amending the patent law it would be so framed as to have reference to the patents of other Countries. This will be a matter well worthy of the consideration of the Committee, for some very curious things are done at present. A person some time since applied for a patent, having brought with him photographs of machinery employed in America, of which he could not in any way claim to be the inventor, and did not apply as agent of the inventor.

226. You would make a distinction between those patents which have been in existence in other Countries and new discoveries made in the Colony? Yes, I think it quite possible and even desirable to give two classes of registration; one to the introducer, not acting as agent for any inventor, in regard to some modification of a patent particularly adapting it to this Country, and the other to the *bonâ fide* inventor.

227. Would you not have a registration for discoveries made in other Countries? Yes, if they were registered here within a certain period after the foreign registration. In England you were required to take out a patent for Scotland and Ireland within six months of registering for England, or else the patent would not be granted for those parts of the Empire.

228. Have you any more suggestions to offer on this subject? I am exceedingly anxious that something should be done to improve the present state of things, but the subject is a very difficult one to deal with; there is no Country having a Patent Law in which that law has not been objected to.

229. Do you not know that the Patent Law in Victoria has worked well? I have heard the reverse.

230. Do not persons generally say that it does? No, I have never heard the real *bonâ fide* inventor make such an observation.

C. Watt, Esq. 231. Do you know that in Queensland they have a system of provisional registration? Yes; and if it is not abused, no doubt provisional registration is a very good thing; but it is so likely to fall into abuse; and then it becomes irksome, more especially to the real inventor. In my opinion, the greatest safeguard we could have for our patents would be the establishment and recognition of legitimate patent agents, as in England. My experience of some of the persons who now draw out the specifications for patents originating in this Colony is that they are either mere visionaries, or perfectly ignorant of the matters with which they are dealing; that they make their claims so wide that it is scarcely possible that they could stand good in a Court of law. There was one man recently sent in a specification for a patent, and he included in it and in his drawing everything connected with the matter, right down to the poker. He laid claim to all contained in his specification and drawings.

19 Dec., 1872.

232. The Government, however, could hardly interfere in this manner? No, they need not interfere. If a good law were established I believe it would give rise to the occupation of Patent Agents, who would make it their business to draw out these specifications in a proper manner, and in that case they would come before the Examiners in a way that would give very little trouble; whilst they would prevent many needless applications. Such applications are sometimes made, and I may mention the case of a person who fancied that he might take out a patent for crushing seeds the produce of this Country, although the same seeds have been crushed in other Countries in the same way for years past. The seeds being the produce of the Country led him to believe that he was entitled to a patent. There are many similar things which have occurred in my experience. The persons do not know how to apply the law, so that a good Patent Agent, knowing the law and the whole course of procedure, would save expense to applicants and trouble to the Patent Office.

233. Over what time has your experience of the Patent Law in this Colony extended? About twelve or fourteen years.

234. During that time how many cases do you think that you have dealt with? I have no record with me to show the number of cases. They came very uncertainly and irregularly, and I have besides had several rehearings referred to me.

235. Is there no record kept? Not that I am aware of; and as to getting at the number, I cannot speak as to what the other Examiners have done, whilst I cannot even give a guess as to the number of cases I have dealt with myself.

236. Can you give us any idea as to the number of applications you have refused during the time you have been Examiner? I cannot say positively, but there may have been some four or five; but until recently there were very few applications—not more than one coming to me on the average in six months.

237. The other Examiners have also refused applications? I believe so. They, I suppose, would be something about the same.

238. What is about the average number of patents applied for yearly? That I could not say, for until recently the number was very small; latterly, however, they have increased so much as to throw out all calculation, and besides that I have been doing double duty in the absence of Professor Smith.

239. The great increase of mining business in the Colony has probably given a great impetus to the applications for patents? Yes, the majority of the applications which have come before me lately have been connected with that and meat-preserving.

240. *Mr. W. C. Browne.*] Have you any other suggestions to offer? I would merely say that if the patent is not worked within a certain number of years after registration, it ought to be regarded as expired; at the same time I would reserve to the patentee the right of extending the period of his patent, in cases where he has worked it and spent money over it without getting a fair return for his outlay. I had a case of that kind in England, where a patent was obtained for the manufacture of manures, and was renewed, I believe, to seven years, after having been originally granted for fourteen years, on the ground that the patent was a valuable discovery, and the patentee had not been remunerated for his outlay and discovery. Then I am in favour of collecting all the patents in one Patent Office, where a list should be put up of every patent that has been granted in the Colony, adding the new patents to the list every three months, so that all persons might be posted up in them to the most recent date. These lists should also be printed, because manuscript does not catch the eye so well as printed documents, especially in the case of uneducated people. Every facility ought to be given for searching the records of the Patent Office.

241. How many of the patents in this Colony are for original discoveries? Some of them are, but the great bulk of them are merely introductions to this Country of discoveries made elsewhere. That was one of the difficulties the Examiners had in the first instance; they did not know what was meant by the word "new." A thing might be perfectly new in this Colony, and yet it might have been used in France, for instance, for the last five or six years.

242. So that you decided to refer the word "new" to the Country in which you lived? Yes, with some reservations.

243. And in consequence of the law being so indefinite great confusion has been caused? That is the great difficulty, with regard to patents, all over the world—the finding out what is new. It is so much a difficulty that men who have thought much over the subject, with a view to amendment, hardly know how to remedy it.

244. Is there then no remedy for it? Everything must depend altogether upon the clear ideas of the persons who constitute the Board, and in the drawing out of the specification. Another thing is, that I would recommend the taking of a declaration from the person bringing in a claim for a patent—either that he is the real inventor or that he is the agent of the inventor.

245. *Chairman.*] Have you anything further to add to your evidence? Yes. It has often struck me, with regard to the Examiners, that as they are appointed as a Board, and that as two of them usually sit to decide upon an application for a patent, it might happen, in the case of a difficult inquiry, that there may be a difference of opinion, by which the interest of the applicants may be jeopardized, or at all events retarded. It has struck me that the inventor might be allowed to appoint a third person, recognized by the Government, to stand in the position of the inventor before the Board, and to give such explanations as might be required to make the matter clear.

246. Would you have him to act as umpire in the event of a difference of opinion? No, only to point out and explain matters in connection with the application, which the applicant himself may not have the ability to do.

247. How is it now if the Examiners do not agree? I have not known a case. They would, I presume, report to the Government that they could not agree.

248. If such a provision were made as that which you suggest, a decision would be come to by a majority? C. Watt, Esq.
I do not desire that I should wish him to stand in such a position as to be able to give the Examiners all possible information relative to the patent. Differences of opinion may arise solely from the applications not being properly understood, so that they are read different ways by different Examiners, and I would wish to prevent that sort of thing, and have the inventor's case fairly before the Board. It would, at all events, have the effect of preventing him from fancying that he was unfairly treated.

19 Dec., 1872.

249. If the Examiners do not agree, what happens then? Then I suppose the Government would reappoint Examiners.

250. And should they do the same? That would possibly be a difficulty. It would however be prevented by what I suggest; for if the inventor were allowed to come in by his agent to explain by some acknowledged scientific authority what the discovery of the applicant really was, there would remain then only the question of novelty to be decided, and there would be very little chance of difference of opinion when once the thing was understood. A scientific man would be able at once to appreciate the difficulty of the Board, and to offer explanations in a way that the inventor might not be able to do, and that would be appreciable by the Examiners.

Capt. G. K. Mann called in and examined:—

251. *Chairman.*] I believe that you have been one of the Commissioners appointed by the Government to report upon applications for patents? I have been.

Capt.
G. K. Mann.
19 Dec., 1872.

252. Could you tell us the actual course pursued by the Commissioners in dealing with these applications? The application is referred to two gentlemen, who then appoint a day for meeting. At the meeting the specification, drawings, and all matters pertaining to the application are carefully gone into. Search is then made, if necessary, for the purpose of ascertaining whether the alleged discovery is a veritable new invention. If there is no doubt about the matter, or if after examination it becomes apparent that the discovery is a new one, the application is recommended for registration in the Colony, in accordance with the provisions of the Act.

253. Have you, within your experience, found any difficulty in getting all the requisite information relative to prior registration, so as to enable you to deal with applications satisfactorily? I think there is room for improvement in this respect. There might be greater facilities given for reference to prior registrations. I can hardly say that there is any actual difficulty about looking through the registrations, but there is no doubt that it takes a certain amount of research. In cases where the Examiners desire to satisfy themselves by research, the great difficulty I have always felt has been to assure myself that my search through the records has been definite and complete—as to whether I may not have left something behind me unexamined. That is what I have sometimes felt. But generally, with regard to the patents taken out in the Colony, we have not found much difficulty in coming to a conclusion.

254. In what way has the difficulty arisen? It has arisen in most cases from the indefinite form in which the specifications and claims have been put before us in the first instance.

255. Would it not be an advantage if there were a proper officer appointed to take charge of the records of the office, and to be in a position to put before the Examiners all necessary information relative to previous patents? Yes. If there were such an officer, and the registration were so conducted as to be perfect, with a view to put all these matters fairly and completely before the Examiners the reports would necessarily be more satisfactory. In order to lay my views as clearly as possible before the Committee, I had drawn up a paper embodying my ideas as to what alterations and amendments were required in the existing law. That I have unfortunately mislaid, and I the more regret it as this very point was touched upon. If the registration were perfect, so that we might be sure that we had everything before us in making our inquiries, and if the specifications and claims were made in some prescribed form so as to free them from doubt, the difficulties we now experience would be, to a very great extent, removed. The specifications ought to be accompanied by distinct claims, as one of our main difficulties now arises from the very obscure manner in which the claims are made.

256. Upon what matters have the Commissioners to report—is it solely as to the propriety of registration? Our duty is to see that the application does not infringe upon any previous patent; to take care that a registration is not granted for some means or appliance in general use; and also, to inquire and determine whether the applicant is the original inventor, or the agent or assignee of the inventor, or whether he may not, in fact, be pirating the invention of some other person. The Act certainly does not specify very clearly what are our duties in this respect, but we have always gone into these points. One of the difficulties we have met with arises from this very branch of the inquiry; since, when the party has sent in his papers, and they have not been accompanied by any power of attorney from the inventor, or some sufficient information to guide us, we have occasionally doubts as to whether the applicant is the real inventor or only the agent of the inventor. All these points require settling by the adoption of some distinct form.

257. You think it would be an improvement if applicants were bound in the first instance to declare in their application whether they were the inventors, or the agents of the inventors? Yes, in such cases as might be necessary. It would not be necessary in every case, because the agent might put in his application accompanied by such documents in the shape of power of attorney or authority as would render a declaration unnecessary. In the majority of cases, however, it is necessary that it should be clearly set out whether the applicant is the original inventor, or whether he is the agent or assignee of the inventor, accompanying his statement with the necessary legal documents, or in their absence with a declaration.

258. Are you an advocate for giving public notice of all applications for patents? No.

259. Not by public advertisement? No, not at all.

260. Would it, in your opinion, be an improvement on the existing law if parties requiring a patent should be allowed to take out provisional registration? It would.

261. And then that public notice should be given of all such applications before they are dealt with by the Commissioners.—If all such claims were advertised in some newspaper or in the Government Gazette, parties who conceived that they had patent rights which would be infringed by the application could come before the Commissioners and contest the application? I am not clear upon that point; I do not think that by advertising you would gain the end which you desire to reach; you might do so at times; but as a general rule I do not think you would.

262. Are you aware that in Victoria they do this? I understand that such is the system pursued.

- Capt. G. K. Mann. 263. And you think the law here requires improvements in some respects? Decidedly so.
264. Will you be good enough to state in what directions you would recommend the improvements to be made? I have reduced my remarks to writing, and with the permission of the Committee will read them.
- 19 Dec., 1872. (Witness reads document. See Addendum.)
265. I find from this document that you are in favour of the registration being provisional, in the first instance, for one year? Yes; with power to renew at the end of each year, to the extent of three years.
266. Do you think it would be desirable that the fees in the first instance should be moderate,—fixed at an amount just sufficient to cover the outlay of the Government in examination and registration? Yes, that is the principle upon which the provisional registration should be based.
267. Then, for the extension beyond the one year, there should be an additional fee? Yes, I think there should be a gradually increasing fee after the first year, increasing yearly for each year afterwards.
268. Do you think there should be another fee charged at the end of the three years? Yes, I would have the provisional registration extendable for three years, but there should be an increasing fee for each renewal.
269. About what amount would you recommend for the fee? I should think £4, £5, and £6, for the provisional registration, for the first, second, and third year.
270. Are you aware that, under the present system, when you send in your report to the Government, that report is referred to the Crown Law Officers? Yes, I believe it is. I understand that the course pursued is to send the report to the Crown Law Officers, but whether they are empowered to interfere with or override our report I am not in a position to state.
271. Have you ever heard any complaints made at the expense attending the getting out of patents in the Colony? No; the only complaints I have heard have been as to the absence of all provision for provisional registration. The complaints have been, not so much as to the expense as to the fact that there is no intermediate course, and that parties are compelled to take out their patents at once, and pay all the fees there and then.
272. Do you think that there is any necessity for the intervention of lawyers after applications have been dealt with by gentlemen thoroughly understanding the subject? If provisional registration were allowed, and fixed forms were adopted, the intervention of lawyers would hardly be required.
273. Do you not think that there should be some officer of the Government to whom should be entrusted the duty of taking charge of the records of the office, and giving all necessary information to the Examiners and to the public? I think it would be a very desirable thing to have an officer of that description, in order to afford every facility for reference both to the Examiners and to the public generally.
274. Then you would like to see every application for a patent accompanied by a full specification and description? Yes; there should be a full specification and drawings, and what is more important, there should be a distinct claim. After the application is made by the inventor or his agents, there should follow the words,—“I claim” so and so; and the claim should be distinctly and unmistakably set out.
275. Mr. Combes.] That is the usual process in other Countries, I believe? It is.
276. Chairman.] All this could be done if there were a Government officer to supervise the applications? I believe so. It would save the Examiners a large amount of doubt, and would render the records of the office all the more serviceable to the public.
277. Do you think that other Patent Offices would exchange their records with those of the New South Wales Office? Yes, I think they would readily do so.
278. I think you mentioned, in the document you read, that you would issue the patent at once, without going through the form of provisional registration, in cases where there was no doubt? I would leave that optional to the applicant. I would allow him to apply for the permanent patent, or for provisional registration, just as he might think fit; so that if, on the examination of the application by the officers appointed to examine into it, it should appear that there was no doubt that there was a veritable invention, the Examiners should have the power of recommending the issue of a permanent registration.
279. At once? Yes.
280. That would necessitate his payment of the whole amount of the fees? It would be optional with him to take out permanent or provisional registration.
281. Why would you not make the registration provisional in all cases? Because if a man has made a really important discovery and wishes to secure it, he should be protected at once.
282. Would not provisional registration give him all the security he might require? Yes; but the provisional registration would be an extra expense, and an additional £2 or £3 is often a consideration with inventors. Where a discovery is certain, the sooner it is permanently protected the better. It is only in cases of doubt, when the value of a discovery, or where the discovery itself is doubtful, that provisional registration becomes of value.
283. Would you leave a discretionary power in the hands of the Commissioners as to the kind of registration to be granted? The Examiners should inquire as they do now, and should report whether it was an invention or an adaptation, and they should have discretionary power, where they find that a claim is not a veritable new invention or adaptation, to refuse the issue of a registration. All I propose is this, and that the system should be one of provisional registration, but that there should be an arrangement under which it should be open, under peculiar circumstances, to grant the issue of a direct patent at once without the preliminary form, if applied for.
284. Mr. Combes.] On the report of the Commissioners provisional registration ought to be granted at once? Yes, I think there ought to be nothing to come between their reports. There is another point, and that is as to the effect of registration, and the advantages it should entail. For my own part I lay great stress upon the desirability in this Colony of not allowing patents from other Countries to be registered here, except by the agents or assignees of the original discoverers; and then if such registration be not made within a reasonable time after the patent has been granted in such Country that the discovery should be regarded as public property. Here again another question arises, and that is, whether if such a rule be adopted it should apply to patents all over the world, or only to those patents taken out in the British Dominions.
285. And you would not issue permanent registration should a certain time elapse without the discovery being turned to profitable account? That is a matter that is being very much canvassed at Home at the present time. It is possible that a discovery may be one of very great importance, and yet, owing to a series of circumstances, it may not have been turned to account for two or three or more years. It would be unjust to refuse protection in such a case, so that the matter is a very difficult one to determine. There have been many instances of this kind under the Patent Laws at Home, and the only way of dealing with them is by leaving some discretionary power in the hands of the Examiners.

ADDENDUM.

All applications for provisional registration, for revision of specification and claims, or for permanent Letters Patent, to be referred to a Board of not less than two competent Examiners for report.

Provisional registration obtainable for one year, with power of renewal of same for a second and third year, on payment of a rateably increasing fee of say £4, £5, £6, subject to the report and recommendation of the Examiner.

Permanent registration or Letters Patent obtainable without provisionable registration, or at any time during current period of provisional registration, if applied for; and if recommended by the Examiners, in pursuance of such application, on payment of the permanent fee (say £20 in addition to any fee paid or payable for provisional registration), and on compliance with all required conditions.

Petition for registration, either for permanent, provisional, or revision of specification, to be accompanied by detailed specifications and drawings where applicable, such descriptions to conclude with a distinct claim or claims based upon specification, &c., &c.

Board of Examiners to determine as far as practicable—

1. Whether any similar patent or registration exists in the Colony or elsewhere.

2. Whether the claim or claims embrace any arrangement, process, machinery, or appliance already in use.

3. Whether all the provisions of the Act and Regulations have been complied with.

The Board of Examiners to report to the Government accordingly on the claim or claims, recommending or rejecting them *in whole or in part*, if found at variance or otherwise with required conditions.

Government to remunerate Members of the Board of Examiners by payment of a fee for each report.

Registration or patent to be granted in accordance with the report of the Board, and not without or before such examination and report.

Specifications, drawings, and claims lodged for provisional registration may be revised prior to or for permanent registration or patent, but not subsequently, on payment of provisional fee.

Inventions and discoveries registered or patented in any part of Her Majesty's Dominions, or under any Foreign Government, to be registerable in this Colony only by the original patentee, his assignees or duly authorized agents; such registration, &c., to be taken out within from date of such original registration or patent.

If not so registered or patented in the Colony, such inventions and discoveries to become public property, and may be generally used in the Colony, and cannot thenceforth be registered or patented in the Colony.

Government to appoint an officer to the charge of all records of patents or registrations, and as complete a library as practicable to be formed by the exchange of copies of published records with other Countries and Colonies.

Petitions for registration or patents to be accompanied by a duly certified declaration, or by powers of attorney or other satisfactory document, certifying that the applicant is either an original inventor, assignee, or legally authorized agent.

Capt.
G. K. Mann.

19 Dec., 1872.

FRIDAY, 7 MARCH, 1873.

Present:—

MR. CUNNEEN,

MR. LEE,

MR. WEARNE.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

George Milner Stephen, Esq., Barrister-at-law, called in and examined:—

286. *Chairman.*] I believe you have taken some interest in the Patent Law of this Colony? Very much. G. M.
Stephen, Esq.

I have taken out three patents in the three Colonies.

287. Will you be good enough to tell the Committee, as briefly as you can, in what way you think the Patent Law of this Colony might be amended with advantage? 7 March, 1873.

In answer to your question, if you will permit me, I will read a letter which I addressed to the Delegates at the recent Intercolonial Conference, from which you will gather my views on the main facts. The appointment of your Committee directed my attention to the subject, and, as I was well acquainted with the Ministers of the neighbouring Colonies, I thought that I ought not to lose the opportunity of bringing the matter under the notice of the Conference. I therefore wrote this letter to them, which, Mr. Budge informed me, the Conference took into consideration, and that they cordially concurred in it. Mr. Francis took upon himself the duty of promising to submit the matter to the Law Officers of his Government, with a view to the framing of a Bill to be sent down to each of the Colonies, in order that there might be uniform legislation on the subject, as I have suggested in this letter, which I will now read. (*Vide Appendix B.*)

288. Are you aware what action was taken by Mr. Francis on your letter? I am informed by Mr. Budge that my letter was read, and that all the members of the Conference concurred in the propriety of joint action on the subject. And Mr. Francis said that, as they were greatly pressed for time, he would take the letter to Victoria and submit the matter to his Law Officers, with a view to having a Bill brought before the Legislature, a copy of which he would transmit to all the Colonies, in order that there might be uniform legislation. As showing the importance and the value of the subject, I thought the Committee would be pleased to see three patents I have myself taken out for my patent gold "cradle-amalgamator" and "hammer-battery." Our own Act is certainly the most liberal, because it grants the patent for *fourteen* years, and the one payment answers for all. The next most liberal law appears to be that which exists in Queensland, but under it my patent is granted only for *seven* years—a time which is altogether unremunerative. In these Colonies, where news does not travel fast—where parties have not the opportunity of seeing inventions—it is only by a very slow process that anything makes headway. Three years have rolled over since I took out this patent, and I have only sold one machine in Queensland. It wants time to develop itself. The next patent is one which was issued at Melbourne, on payment of about £20. It is granted for *fourteen* years; but within three years I have to pay a further sum of £15, and within seven years a further sum of £20.

289. *Mr. Cunneen.*] In addition to the first £20? Exactly.

290. *Chairman.*] That is in Victoria? Yes, in Victoria.

291. But you paid less in the first instance for your patent in Victoria than in Queensland? If I remember rightly, I made a preliminary payment of £2 for registration for a few weeks, and after that I had to pay £15 15s.

292. Have you considered the question of provisional registration? I think it is very important that there should be an opportunity given for provisional registration. It enables parties to ascertain whether they really are the first in the field or not; and, if they find that a patent has already been taken out for substantially the same thing, of course, as prudent men, they would desist from going on. If the patent is granted, all the expenses have to be paid. I had to pay £60 for the three patents I have taken out; the nominal

G. M.
Stephen, Esq.
7 March, 1873.

nominal amount was £57, but a few guineas for extra fees brought the actual payments up to £60. Supposing, after I had taken out these patents, I had discovered that any other person had really patented the same idea, these patents would have become worthless; for all patents are "declared void" if you are not the first and original inventor. If there were a provisional registration, giving a sufficiently long time to make diligent inquiry, by searching the records of the different offices—and there ought to be a record of all the different patents taken out in the different Colonies sent interchangeably from each Colony to the other—inventors would then be able to ascertain whether they really were the first in the field, and whether it would be worth their while to proceed.

293. Do you see any necessity for the heavy expenses charged against inventors, or for the fees charged for legal advice about patents? Certainly not. There is one fee which I think is wholly thrown away, which is simply a legal extortion, and that is the fee paid to the Crown Solicitor.

294. The Attorney General receives a fee of £5 5s.? The Attorney General in England has from time immemorial made up his income largely by these fees. They are his principal emolument, and there are reasons for it. It is always supposed—and it is substantially done—that the Attorney General advises the Crown as to the propriety of issuing the patent; and there it issues direct from the Crown. In this Country also it is desirable that the Attorney General should receive a fee, but then he ought to do more for his money. In the neighbouring Colony of Victoria, the Attorney General calls upon the public, by notice in the Gazette—and there is a regular printed form for the purpose to be filled in—to show cause, if there be any, why a patent should not be granted to the applicant. That is a great protection to the public, and at the same time to the unfortunate inventor; who, if he finds that he is not the first in the field, at once withdraws any further application. It is a very judicious arrangement, and is something in the nature of a tribunal in the first instance to decide upon the matter. But here the Crown Solicitor has nothing in the world to do. Here is the printed form, from which the Committee will see that there is nothing whatever to be done, but to write in the name—"George Milner Stephen," with the description or name of the invention. Any clerk could do it. That is the whole duty which the Crown Solicitor performs. He is not even bound to register the patent at the Supreme Court, but as a matter of practice one of his clerks does perform that service, and parties willingly give a private fee to that gentleman of two guineas, in order to protect them from the risk of the patent not being properly registered in the time required by the Act. That is a fee paid by the consent of parties, and is not exacted by the officer; but the fee of five guineas to the Crown Solicitor is paid out of the £20 which you lodge in the first instance.

295. *Mr. Lee.*] It does not go to the Revenue? It does not go to the Revenue. I think a portion of the fee goes to the scientific gentlemen who examine into the matter. I do not remember whether the number of those who compose the tribunal is fixed by the Act, but the Examiners are not always judiciously selected.

296. *Chairman.*] What change would you recommend? I will illustrate the matter by a reference to a particular case. Two gentlemen, for whom I have the profoundest respect—both distinguished in their particular vocations—were appointed as Examiners. But the mind of one gentleman had been directed all his life to a particular branch of scientific knowledge—at least, so I should suppose from the great learning he displayed in it—quite apart from mechanical inventions, and yet he was one of the gentlemen chosen to say whether a particular contrivance was a good mechanical invention,—whether or not it deserved a patent. I think that the selection ought to be made another way. It is not doing justice to an inventor, unless he is allowed to have a voice, as it were, in some way in the tribunal. Examiners may, if they are grossly ignorant of the matter, give a decision in favour of every applicant; and, on the other hand, if they fancy they know too much, they may, by relying solely on their own judgment, err on the other side, and not do justice to the inventor's more immediate and direct, and therefore superior knowledge upon the point. I think it would be a fairer system if the Government were to appoint a scientific man, and place him at the head of the Patent Office. He should be, as it were, the President of a Board, one member of which should be appointed on his recommendation; as he ought to know the men in the community most competent to enter into any given subject, and he could recommend one name as Government nominee. And two names ought to be submitted to the Government by the inventor, from which one could be selected.

297. *Mr. Lee.*] Of what number does the Board of Examiners now consist? I think two; but I believe the number is quite optional with the Government. I have not looked at the Act, but I believe it is so.

298. *Chairman.*] But in practice the number has been two? In practice it has been two. I think you will see what I mean. Supposing a gentleman to be a great chemist,—to have spent all his life in studying the component parts of substances, and in trying experiments upon them, to find out how one chemical substance acts upon another—such a man could hardly be supposed to be "well versed" in the parts of a complicated machine.

299. I understand that you would be in favour of allowing the appointment of one of the Examiners, at all events, to be in the hands of the Government? Yes; under the recommendation of the head of the Patent Office, who ought to be a scientific man; and, of course, possessing a large acquaintance with the contents of his Books of Register.

300. And as to the appointment of the second? I would allow him to recommend the name or names for appointment to the Government, and I would allow the inventor to submit two names, from whom one should be taken as his *quasi* arbitrator. It should be rather in the nature of an arbitration. The public could not by any possibility lose anything if the sole desire were to protect their interests; because, if the invention is not *new*, the patent is worthless,—after all the ceremonies it may have gone through, and after it has received the great seal of the Colony. If it is a *new* invention, the inventor has a right to see that his interests are protected; and it is desirable, in order to secure his interests in his invention, that there should be present at the examination some one who has seen it, who has mastered it in all its details, and who can point out what are its advantages, if he has not the ability himself to do so.

301. Have you found from experience that there should be some one whose special business it would be to attend to all matters in connection with patents? Undoubtedly. It is a most important thing. A gentleman should be placed at the head of the Patent Office, who should be a man of diversified ability, having a practical knowledge, amongst other things, of machinery, and also, perhaps, of chemistry and other kindred sciences. And then, the next most important thing is to have an ample register of all the patents that have been granted in America (which is the most prolific Country on earth now for inventions), in England, and in the sister Colonies.

302. *Mr. Lee.*] But would not the system you have alluded to, the system you propose, involve the creation and support of an expensive establishment? The fee of £5 5s., now thrown away as a fee to the Crown Solicitor, would almost cover everything.

G. M.
Stephen, Esq.
7 Mar., 1873.

303. Would you appoint officers without salary? The salary should be based on that ratio. I think you could cut down all these expenses a good deal more. First of all, the Examiners receive a fee of £3 3s. each, and if the £6 6s. were divided between three, that would give a fee of £2 2s. to each of them, and then if the officer in charge of the Patent Office had the £5 5s. which is now paid to the Crown Solicitor, that would give him a total fee of £7 7s., which, with the fees received in his department, ought to go a long way to cover all expenses. That would, however, be keeping up to the inventor the expense of taking out patents, which I still submit ought to be cut down, even though the public purse had to pay for it.

304. *Chairman.*] Might not the officer in charge of the Patent Office have time to attend to other business? Certainly; his duties would not occupy all his time.

305. *Mr. Lee.*] Are you not of opinion that the law ought to be altered so as to lessen the present enormous charges? That ought to be a *sine qua non*. I may call attention to a passage in my letter, which, out of respect to your Committee, I did not send to the Press:—"And by promptly communicating the fact of each patent or provisional registration being issued to each of the other Colonies, in order to check processes of inventions just perfected, or on the eve of maturity." I will illustrate what I there refer to in this way. Recently a dispute took place on an application for a patent by the foreman of a factory. The master declared that he employed this foreman, as being a skilful mechanic, to try a series of experiments. The man carried out the experiments at the master's cost, and just as they appeared to terminate in a successful result, he rushed off and applied for the patent which his master had intended to take out. He was before the master, and when the master tried to upset the patent he could not do so—and so the foreman obtained the patent; whether rightly or wrongly, of course none of us can tell. But if my suggestion were embodied in legislation by this Parliament and the Parliaments of the other Colonies, the real inventor would be protected always. For instance, if a master has got an idea that a certain thing can be invented, all that he has to do is to try experiments up to a certain point, more or less remote from the final result, and the moment he finds that the thing is good, he can *provisionally register* it, making provision for any improvements he may effect while perfecting it. So that "provisional registration" would protect him from piracy. I was obliged actually to try experiments with my patent cradle before the public, and at no place could I get water enough excepting in front of the police office; hence I had scores of people around me whilst I was making experiments; and when any failures and so forth occurred, I had to turn round to my foreman and whisper to him at some distance from the crowd. If any clever man had seen the experiments then, he could have robbed me of the benefit of the invention, by going down to Melbourne and taking out a patent there, and I could not have prevented it. If I had known that I could have got a provisional registration in each of these Colonies, by the payment of a couple of guineas, I would have obtained it with the greatest pleasure, to protect myself from being robbed.

306. *Mr. Lee.*] Is your patent in anything like general use in the Colony? A number of them have been sent into different parts; and where the machines fall into good hands, very gratifying reports reach me from the owners of them. When they fall into bad hands, the parties cannot make them a success adequate to their expectations; but in other places they have been proved to be eminently successful. I may say also, that in drawing attention to existing evils in the Patent Laws, which I have done rather forcibly in that letter, you will observe that I have endeavoured to point out (and you, gentlemen, will probably point out in your Report, if you agree in opinion), that as soon as an inventor has obtained his letters patent, and his invention is proved to be a good thing in the Countries of Europe, it is taken up by tens of thousands; while in the Colonies we have never more than a few scores of persons to buy a patented article, so that there is no adequate reward to the inventor in the Colony.

307. *Chairman.*] You mean that the inventor has a much more limited community to appeal to? Yes; and the only way that the Parliament can make it up to him is by letting him have an extended term.

308. And by making the expense of the patent no more than is sufficient to afford the necessary protection to the inventor? That is all; and yet going a little way towards meeting the expense of keeping up an ample register, for that is the great benefit which the Colony will derive from having a Patent Office. In England, I may state, cases are continually occurring where inventions are pirated by workmen in the employ of the inventor—scoundrels who rush off immediately to one of the patent agents, describe the invention as well as they can; and the agents, who are all clever draftsmen, can from the description prepare a tolerably close approximation of the invention, which is then being proceeded with; and, if the unfortunate inventor has not protected himself by provisional registration, there is no possibility of redress. Just before I last left England, a gentleman had invented a method of working cotton cloth, so as to imitate leather, for bookbinding, &c.; and so close was the resemblance that it was not easy to tell whether you had leather or cotton in your hands. Knowing that I was just going out to the Colony, the gentleman allowed me to go into his manufactory and see the whole thing going on. He was then manufacturing without a patent, because he could not afford the cost, and was also trying further experiments. Another instance which came within my own knowledge was a case which occurred in the Strand; where a man, to avoid the expense of taking out a patent, was actually working in the cellar under his shop at an invention for cutting cork into excessively thin slices for ventilating hats. I happened to be lodging there at the time I was taking my terms for the Bar; and finding that I was fond of inventions and machinery, the man took me down to see the process going on. I mention these circumstances to show the force of my recommendation contained in that letter to the Delegates regarding "Provisional Registration."

PATENTS.

APPENDIX.

[*To Evidence given by Henry Halloran, Esq., 6 December, 1872.*]

A.

[*Handed in by G. M. Stephen, Esq., 7 March, 1873.*]

B.

46, Wynyard Square, 31 January, 1873.

To the Hon. the Delegates for the Intercolonial Conference.

Gentlemen,

I respectfully ask permission to bring under your notice a subject of rising importance to the several Colonies you represent, but which appears not to have been included in the list of matters engaging your consideration.

It is the direct benefit each Colony would derive, by assimilating their Patent Laws, by lessening the expense to parties in taking out Letters Patent or Letters of Registration, by enabling inventors obtaining such in one Colony, to enjoy the benefit in all the others, on filing, in the proper offices, duplicates of the patents, &c., with the specifications duly certified, and the payment of a small registration fee, by periodically interchanging records of all patents, &c., granted, and by promptly communicating the fact of each patent or provisional registration being issued to each of the other Colonies; in order to check piracies of inventions just perfected, or on the eve of maturity, and also of assisting the Examiners in framing their reports upon the claimed inventions.

I would also humbly invite your attention to the great advantage each community would reap through the encouragement of the arts and manufactures, by enabling parties to "register Articles of Utility," as in England.

I do not presume to offer any arguments for the consideration of your Honorable Board—most of them will suggest themselves; but I venture to lay before you a list of the patent fees payable in the Australian Colonies, as compared with the great Countries of Europe, where the populations count by tens of millions; and hence, where the consumption of any article patented may reward the inventor in a thousand-fold greater degree than in these Colonies.

List of Patent Fees :—

New South Wales.....	£20
France.....	£12 12s.
Belgium.....	£12 12s.
Holland.....	£12 12s.
Austria.....	£20
England.....	£30

I have, &c.,

G. MILNER STEPHEN, F.G.S.,
Barrister-at-Law.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LETTERS OF REGISTRATION OF INVENTIONS

UNDER

16 VICTORIA, No. 24.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
21 *April*, 1873.

SYDNEY THOMAS RICHARDS, GOVERNMENT PRINTER.

1873.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

LETTERS OF REGISTRATION OF INVENTIONS.

(DESCRIPTIONS, SPECIFICATIONS, &c., ACCOMPANYING APPLICATIONS FOR.)

Ordered by the Legislative Assembly to be printed, 21 April, 1873.

RETURN (in part) to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 10 May, 1861, A.M., praying that His Excellency the Administrator of the Government would be pleased to cause to be laid upon the Table of this House (in addition to the Return already upon the Table),—

“(1.) A copy of the Descriptions and Specifications accompanying any applications for Letters of Registration of Inventions under the Act of Council 16 Victoria, No. 24, together with the date of application for such Letters of Registration, and when granted; also, copies of the Plans or Sections annexed, and of the Report, in each case.

“(2.) That His Excellency will cause similar Returns to be laid before Parliament annually.”

(*Mr. Hart.*)

INDEX.

No.	NAME OF APPLICANT.	DATE OF APPLICATION.	NATURE OF INVENTION.	WHEN GRANTED.	PAGE.
263	Daniel Baddeley Pritchard.	8 December, 1870.....	"Remfry Separator," for the classification and concentration of ores, minerals, and metals, according to their specific gravities.	1871. 24 January.....	1
264	Frederick Beer	31 December, 1870 ...	A differential specific gravities alluvial gold-washing apparatus, and gold-saving amalgamator in quartz-crushing operations, with concentrator of pyrites.	21 February	3
265	William Rea	21 January, 1871	Improved method for washing, drying, or preserving wool, or fabrics of woollen, linen, or cotton texture, by machinery and chemical substances.	24 February	5
266	Henry Dundas Gloag ...	16 January, 1871	Invention by means of which sugars and syrups may be manufactured, clarified, and decolourized at low temperatures, by the application of improved filters and an economical use of alcohol.	9 March.....	9
267	Thomas Carr	14 February, 1871 ...	An improved manufacture of flour and semolina from wheat and other seeds, and in the application and adaptation of certain machinery and arrangements to the purpose.	14 March	13
268	George William Wigner	14 February, 1871 ...	Improvements in the mode of, and apparatus for treating and purifying sewage, or water impregnated with sewage, and making manure therefrom, part of which apparatus is applicable to other purposes.	13 April.....	17
269	Henry Dale Edwards and William Thomas Gore.	14 February, 1871 ...	Improvements in the method of constructing soaks or dips for washing or dipping sheep.	13 April.....	23
270	George Warsop.....	30 March, 1871.....	Improvements in obtaining motive power by means of air and steam, and in apparatus employed therein.	11 May	25

A.D. 1871. 24th January, No. 263.

REMFRY SEPARATOR.

LETTERS OF REGISTRATION to Daniel Baddeley Pritchard, for a Machine called the "Remfry Separator."

[Registered on the 25th day of January, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS DANIEL BADDELEY PRITCHARD, of the city of Melbourne, in the Colony of Victoria, consulting engineer, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention intituled the "Remfry Separator," for the classification and concentration of ores, minerals, and metals, according to their specific gravities, which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Daniel Baddeley Pritchard, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Daniel Baddeley Pritchard, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Daniel Baddeley Pritchard shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-fourth day of January, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Remfry Separator.

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME :

I, DANIEL BADDELEY PRITCHARD, of the city of Melbourne, in the Colony of Victoria, consulting engineer, do hereby declare the nature of my invention, and the manner in which the same is to be performed, to be particularly described and ascertained in and by the following statement, that is to say: the invention is intituled the "Remfry Separator," for the classification and concentration of ores, minerals, and metals, according to their specific gravities. The machine is shown upon the drawings annexed, and may be described as a hutch or trough of wood, iron, or other like substance, and divided longitudinally and transversely into two or more compartments. Each of the two compartments are fitted with a sieve or grating of metal, and a loose piston. Upon the sieves or gratings a bed or layer of ore, mineral, or metal is laid, from one to six inches in thickness, according to the material to be concentrated; and this bed or layer must be about the same specific gravity as the ore, mineral, or metal it is desirable to concentrate in that compartment of the machine. Where several ores, minerals, or metals have to be separated and concentrated at the same time, each of the compartments have a different bed or layer of ore, mineral, or metal, or where only one class of ore, mineral, or metal, has to be separated from its gangue, then several compartments may have the same material for the bed, the densest being the first saved, and others in their order of density. The piston in each compartment is made to work loosely, and of the same area as the sieve or grating adjoining it, and may be of wood, iron, or similar substance, and is connected by a rod of metal or wood to an adjustable crank, eccentric or other motion, upon a shaft of metal, and this shaft is fitted with fast and loose pulleys or gearing, to be driven by animal, steam, water, or other power. The stroke of the pistons varies according to the thickness of the beds, from $\frac{1}{4}$ inch to 2 inches. The machine is fitted with valves and cocks for discharging the water or concentrated material as required. The pistons have a speed varying from 100 to 200 strokes per minute, about 150 strokes being the average. The material forming the beds must have the particles a little larger than the meshes of the sieves or gratings.

The action of the machine will be explained by the following statement, namely:—The hutch or trough is first filled with water, and the pistons set to work at their proper stroke and speed as above specified. The ores, minerals, or metals having been previously pulverized, are fed to the machine by hand or by suitable self-acting machinery, together with a proper supply of water for keeping the material in motion, and causing it to flow continuously over the sieves or gratings. The motion of the pistons form a pulsating movement in the water of the hutch or trough, which transmits a forcing and suction action through the sieves or gratings, whereby the beds are opened and closed alternately, and the ores, minerals, or metals settle by gravitation through the beds and sieves into the body of the machine, the lighter particles, such as pulverized quartz or other gangues, being carried away by the water, and pass out at the end of the machine as wastes.

This machine will receive disintegrated material direct from the machinery used for reduction, and no other dressing apparatus is necessary. In the treatment of auriferous and argentiferous ores it will dispense with the use of mercury altogether.

CLAIMS.

Firstly:—I claim specially the mode of continuous action for the separation, classification, and concentration of ores, minerals, and metals, by means of loose pistons, having adjustable strokes, agitating beds of ores, minerals, or metals, whereby other ores, minerals, or metals of about the same or greater specific gravities are separated from each other, or from their gangues, and classified and concentrated as described in this my specification, or shown upon the drawings herewith.

Secondly:—I claim, generally, the arrangement of my machine for separating, classifying, and concentrating ores, minerals, and metals, whereby the same can be treated direct from the machinery used for pulverization, and dispensing with all other dressing apparatus and the use of mercury.

In witness whereof, I, the said Daniel Baddeley Pritchard, have hereunto set my hand and seal, this eighth day of December, one thousand eight hundred and seventy.

D. B. PRITCHARD.

Witness to the signature of the said }
Daniel Baddeley Pritchard,— }
FRANK P. PRITCHARD,
Draughtsman,
Collins-street, West Melbourne.

This is the specification referred to in the annexed Letters of Registration, granted to Daniel Baddeley Pritchard, this twenty-fourth day of January, 1871.

AMALGAMATOR, &c.

LETTERS OF REGISTRATION to Frederick Beer, for a Differential Specific Gravities Alluvial Gold-washing Apparatus, &c.

[Registered on the 23rd day of February, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS FREDERICK BEER, of Sydney, in the Colony of New South Wales, Doctor of Medicine, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention of a "Differential specific gravities alluvial Gold-washing Apparatus and Gold-saving Amalgamator in quartz-crushing operations, with Concentrator of pyrites," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Frederick Beer, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Frederick Beer, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Frederick Beer shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-first day of February, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

SPECIFICATION.

Amalgamator, &c.

SPECIFICATION.

THE Amalgamator or Gold-washing Apparatus is based on the difference of specific gravities of the substances brought into contact.

It consists of a cylinder open at each end, the lower one resting in a circular pan; a rod runs in the centre of the cylinder from its base to the top, to which at the lower end is attached an agitator, something like that of a churn. The pan being charged with mercury, the tailings are fed into the cylinder with a stream of water, and the weight of the water in the cylinder overcoming at a certain point the resistance of the mercury below it, forces the earth and water upwards through the mercury from the bottom of the pan outside the cylinder, leaving the gold (if any) to be readily retained by the quicksilver, while the water and sludge float away over the edge of the pan. The entire process is a simple and exhaustive one.

The Amalgamator or Agitator can be rendered self-acting by placing a small waterwheel between the shoot containing the water and tailings and the orifice of the cylinder, so that before it plunges into it, it turns the wheel by its weight, and thus turns the Agitator in just proportion to the rapidity and quantity of the flowing substance.

If the Amalgamator is used for a general gold-washing machine, a grating or wire must be placed across the top of the cylinder or across the mouth of the shoot or "longtom" wherein the stuff to be worked is first thrown (stones, gravel and all), in order to catch and to retain the larger stones, which need only be removed by forking, like in working with the "old tom." All free gold passes thus through a body of mercury (every inch of mercury requiring 13 inches of cylinder for the accumulation of water), and is solved and retained, whilst the small stones, sand, and water, rise constantly to the surface, on account of their buoyancy, and are floating over the edge of the pan. Desulphurized tailings can be also passed through with great ease, and all fine gold will be retained.

My Concentrator I construct by placing across a long shoot or trough, at certain intervals, boards 5 or 6 inches high, giving the shoot, wherein the pyriteous tailings with the water from the stampers run, sufficient slope for the sand to run off freely and the heavier pyrites to take the lowest position. By raking up from time to time all debris above the board, and exposing them to renewed action of the water, the tailings can easily be concentrated to $\frac{1}{3}$, or that the pyrites form at least 50 per cent., when they are taken away with a shovel and saved for treatment in the proper apparatus. The tailings, after depositing thus nearly all pyrites, may be allowed to run through the Amalgamator.

I claim to have produced by these various improvements and their combination a general gold-washing and amalgamating machine, suitable as well for alluvial workings as for extracting gold from crushed quartz, which will supersede in usefulness all other methods, it being self-agitating, self-acting, simple, effective, and of trifling expense.

FREDERICK BEER, M.D., C.D., O.D.

This is the specification referred to in the annexed Letters of Registration, granted to Frederick Beer, this twenty-first day of February, 1871.

IMPROVED METHOD FOR WASHING, DRYING, AND PRESERVING WOOL, &c.

LETTERS OF REGISTRATION to William Rea, for a New and Improved Method for washing, drying, and preserving Wool, &c.

[Registered on the 25th day of February, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS WILLIAM REA, of Rockhampton, in the Colony of Queensland, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for a new and improved method "for washing, drying, and preserving Wool, or fabrics of woollen, linen, or cotton texture, by machinery and chemical substances," which invention is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said William Rea, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said William Rea, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said William Rea shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-fourth day of February, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improved method for washing, drying, and preserving Wool, &c.

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, WILLIAM REA, of the Colony of Queensland, send greeting :

WHEREAS I am desirous of obtaining Letters of Registration in the Colony of New South Wales, for an invention for washing, drying, and preserving Wool, or fabrics of woollen, linen, or cotton texture, by machinery and chemical ingredients, and the following are the particulars of the said invention.

As applied to the washing and drying of wool and fabrics, I use a machine called a Dash-wheel. I use another machine in connexion with the first, called an improved Hydro-Extractor. The chemical ingredients I use are salt and water, or salt-rock and water, or sea-water, and occasionally sulphurous acid, in addition to any of the common washing ingredients.

The machine termed a Dash-wheel is drum-shaped, and set on an axle like a grindstone, as is shown in plan annexed, as fig 2. It is driven by a belt or wheel. The interior is divided into four compartments, into which sheepskins, fabrics, or clotted wool is placed, through the large holes in the side of the wheel ; the rim is closed ; the water or washing fluid is let into the compartments in a continuous stream through an opening in the other side near the axle, by means of pipes coming from tanks above ; the mouths of these pipes must not be larger than the opening in the wheel, and must not touch the wheel. Each pipe has a stop-cock. There are three tanks ; one to hold soap and water or other common washing mixture ; one to hold salt and water or sea-water ; one to hold fresh water.

In this machine I first place the fabrics, sheepskins, or clotted wool to be washed, generally having previously soaked them in tubs in soap and water or other common washing mixture, and this mixture is what I mostly use when the materials to be washed are in the Dash-wheel ; but when sheepskins are very clean I sometimes use salt and water, and after that pure water only, to wash off the salt.

The dimensions of the wheel are about six feet in diameter, and the motion about twenty-six revolutions per minute.

The sheepskins, after coming from the Dash-wheel, I hang up to sweat in a room, in the common method. When I take the wool off the skins, it is placed in the Hydro-Extractor to be rinsed and dried, as described below for fleece-wool. When I take the fabrics or loose wool from the Dash-wheel, I put them also into the Hydro-Extractor, to be rinsed and dried or partially dried.

The Hydro-Extractor I have made with a tight-fitting lid, one half of which is a fixture ; the other half opens on a hinge, and is lifted up when any material has to be put in or taken out.

There is an outer fixed machine, and an inner one called a basket, which revolves on a spindle coming from below and worked by a pulley under the outside casing. It is made of wire or perforated metal. The outer machine or casing is of cast-iron, and made massive at the bottom ; at the top it is a little higher than the revolving inner one. Through the half-lid, that is a fixture, I introduce a large pipe, which on getting inside, divides like the prongs of a fork ; and goes down, nearly touching the bottom. All the part below the lid is perforated with holes all round and at the ends, to admit either fluid or hot air ; this is called the main pipe, and extends about two feet above the outer case ; into this large pipe four smaller pipes empty themselves when the taps are opened ; one conveys salt and water or sea-water ; one conveys soap and water, or other washing mixture ; one conveys pure water ; and one conveys hot air from a furnace. Each of the three pipes first named connects with a tank above.

When I wash fleece wool I put it into the Hydro-Extractor, either rolled up or one fleece laid open against another till the machine is full. The machine is then set in motion, the speed being from six hundred to twelve hundred revolutions per minute. The tap is turned on from the tank holding the salt and water or sea-water, till the solution comes from the machine in a clear state, then the tap is turned off, and the tap from the pure water turned on to wash the salt from the fibres of the wool. Should the wool be required whiter or cleaner, the tap of fresh water is turned off and the soap and water turned on. The time for each tap running will be from two to four minutes, according to the state of the wool. Plenty of holes or outlets must be left at the bottom of the outer machine to allow the dirty water to escape. When the last tap is turned off, I then turn on the hot air, and in two to four minutes more the wool is dried. I use all the washing liquids named and the hot air at as uniform a temperature as possible, say about ninety degrees of Fahrenheit in such case. When I find the hot air does not enter the machine fast enough, I drive it into the Hydro-Extractor with a fan. When the hot air is turned off, cool air may be allowed in, either by the pipe with the cold air tap or by opening the half-lid. When the wool is dry the machine is for the first time stopped, the wool is then taken out, and either spread out in the air or put in the bale. A fresh lot of wool is then put in. When fabrics come out only partially dried, they are taken to another room and the drying completed by hot air.

A steam-engine of twelve horse-power will drive about six Hydro-Extractors such as that described, each being from forty to fifty inches in diameter.

When wool or woollen fabrics are required brighter in colour, or when it is desired to prevent the heating of wool in transit, or during a wet season where it may be submerged by floods, or when wool from sunken vessels becomes saturated with sea-water, I place the wool or woollen fabrics (after having been washed) in wooden tubs tightly covered, in a solution of sulphurous acid, from six to twelve hours ; the mixture to be,—acid about one-third, and cold water about two-thirds. When taken out, the wool or fabric is again put into the Hydro-Extractor and there dried. Instead of a solution, the sulphurous acid may be applied in the form of fumes of sulphur inside a close building, in the inside of which no iron or iron nails must be used. In a room of twelve feet square two or three pounds of sulphur will be enough. I put the sulphur on a plate or plates ; the wool is put in—in a moist state, but it must not be dripping—spread out on tiers of netting ; the sulphur is then ignited and the doors closed for ten to twelve hours ; it is then taken out, and if not quite dry it is put into the Hydro-Extractor and dried by the heated air.

The use and advantage of salt and water or sea-water, when used as described, is, that it keeps the yolk or the greater part of it on the fibres of the wool, and thus retains the elasticity and strength of the fibre, at the same time that the dirt or the greater part of it is removed ; it also enables me to use any water, no matter how hard or brackish. When sea-water can be had at hand, it forms a great saving in wool-washing by this process. When possible, I save the salt and water and the soap and water in tanks after

Improved method for washing, drying, and preserving Wool, &c.

after it has passed through the wool, which I use again after the sediment has settled. The proportion of salt I use to the gallon of water is from two to three ounces. The washing materials in the tanks I heat, either by a direct fire or by a steam-pipe from the boiler of the steam-engine. The hot air I procure either by a pipe from the furnace under the boiler or by a separate furnace. To regulate the heated air going into the Hydro-Extractor, I have a short pipe leading into the hot-air pipe, as shown in the plan, with a tap to let in the cold air when required.

DESCRIPTION OF THE DRAWINGS.

Figure 1. Outside view of "The Improved Hydro-Extractor." A, the outer cylinder; B, pulleys for driving same; C, tank for holding salt and water; D, tank for holding soap and water; E, tank for holding water only; F, main pipe for leading into Hydro-Extractor; G, pipe from tank C; H, pipe from tank D; I, pipe from tank E; J, pipe for heated air; K, furnace; L, short pipe for admitting cold air; MMM, taps in pipes above named; N, spindle on which the inner cage or basket revolves.

Figure 1A. Inside view of Hydro-Extractor. O, the inner cage or basket; P, branching pipe for conveying fluid or heated air; Q, waste pipe leading to cistern or tank for collecting fluid; RRR, tanks for collecting liquid after having been used; S, open pipe for allowing heated air to pass off.

Figure 2; being front view of Dash-wheel. A, axle resting on standards; B, standards; CCC, holes into which wool or other material is placed.

Figure 2A. Back view of Dash-wheel. DDDD, openings wherein water or other fluid is jettied into the four compartments; EEEE, holes for allowing dirty liquid to pass out.

I claim as my invention my process as a whole, as hereinbefore set forth, by the means of two machines, one working or being used in connexion with the other, and by the use of a heated solution of salt or salt rock, or of sea-water, for washing wool, and for retaining a large portion of the yolk, and in some cases by the use of sulphurous acid to improve the colour of the wool or of woollen fabrics, and to prevent the wool from heating and, after the above process, the further treatment of drying or partially drying the said wool or fabrics by heated air, in the manner and for the purposes described. I claim the improvement of a covered top to the Hydro-Extractor, and the perforated pipe inside of same for liquids or heated air.

In witness whereof, I have hereunto set my hand and seal, the twentieth day of January, 1871.

WM. REA.

DISCLAIMER.

I do not claim as my invention the washing of fabrics by any new solution, but merely the washing them in the machinery of the particular construction named, and partially drying them with heated air in the Hydro-Extractor.

20th January, 1871.

WM. REA.

INVENTION FOR THE MANUFACTURE OF SYRUPS.

LETTERS OF REGISTRATION to Henry Dundas Gloag, for an Invention for the manufacture of Syrups.

[Registered on the 9th day of March, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS HENRY DUNDAS GLOAG, of Brisbane, in the Colony of Queensland, Captain of Her Majesty's Royal Artillery, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention by means of which Sugars and Syrups may be manufactured, clarified, and decolorized at low temperatures, by the application of improved filters, steam, and an economical use of alcohol, which said invention is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Henry Dundas Gloag, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Henry Dundas Gloag, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Henry Dundas Gloag shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court, at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this ninth day of March, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Invention for the Manufacture of Syrups.

SPECIFICATION.

I call my invention "A novel process of manufacturing, clarifying, and decolorizing Syrups and Sugars at low temperatures, by the application of improved filters, steam, and an economical use of alcohol."

The improvements I claim to have discovered are threefold, and comprise (1) the construction of closed vessels or pans for the concentration of cane-juice and other liquids at low temperatures; (2) a mode of applying steam for the concentration of cane-juice and other liquids; and (3) an apparatus and means for the clarification and decolorization of syrups and sugars.

After the juice has been extracted from cane in the ordinary manner, I propose to clarify it by passing it through an improved form of filter of the following character:—The filter (figure V) consists of a circular or other vessel of wood or metal, furnished with arms, *p p*, on which it swings in bearings, so as to be reversible, in order that the orifice F or D may remain up or down as desired. The interior of this vessel is fitted with tubes, *t t*, screwed from the lower surface in the bottom *b b*. These tubes are closed at the upper end, and may be made of perforated copper, fine wire gauze, or any other suitable material. They are covered with fine calico or flannel bags, which are secured round the lower extremity of each tube close to the bottom, *b b*, of the vessel. This vessel has close fitting covers on both ends, with orifices, F and D, in them, and may be bolted on.

In filtering, the liquid entering at F passes through the exterior of the tubes, *t t*, to their interior, and then escapes into the under part of the vessel through the lower ends of the tubes, as shown by the arrows. If necessary, there may be stop-cocks at F and D.

When the filter requires to be cleaned, it is reversed on its arms, P P, and water is introduced through D and clears away any sediment that may have settled on the outer surface of the tubes *t t*; or, if stop-cocks are supplied at F and D, steam may be used for this purpose.

This filter presents a large area of drawing surface, and therefore permits the use of a very fine material for filtering without loss of time.

After the juice has been passed through the filter, it is introduced into a closed vessel or pan for concentration. This pan, according to the new process, may be made in two or more parts, viz., body and cover, &c., of any suitable forms, such as are represented in the accompanying drawings. The body and cover are bolted together by nuts. In the body a coil of piping is arranged, into which steam can be admitted by a regulating valve situated at S; the steam after traversing the coil escapes at the nozzle, *e*, in the pipe R C, and rushing downwards, passes into the atmosphere by the outlet O. In the cover of the vessel (figure I) there is a man-hole, C, and an arm, A R O, formed and fixed as shown in the diagram; at any convenient place in the arm, A, a valve may be placed, which can be closed from the exterior of the vessel as at H (figure I). This valve closes the communication between the interior of the pan B and the atmosphere. E is a pipe which may pass, if desired, through a stuffing-box, so as to permit of its being raised or lowered in the arm A R O; it terminates in a nozzle, *f*. Its purpose is for bringing steam direct from the boiler or source of supply, and it is furnished with a valve at E for regulating the quantity of steam. In figure I, V is a vacuum gauge; T, a thermometer; L, is a liquid gauge; D, the discharge orifice for emptying the vessel B, by the cock *m*; P, a vessel screwing into the cover of the pan B for the purpose of introducing specific charges into the pan without the admission of air; W is a steam jet for washing the interior of pan B.

An arrangement for taking samples of the contents of the pan without admitting air, is represented in section at K, and acts something after the manner of a syringe. It consists of a small cylinder provided with a piston. The cylinder is screwed in any convenient manner and at any suitable place into the lower part of the pan. There are two small stop-cocks shown in figure II, one at the end of the cylinder nearest the pan, closing the communication between the interior of the pan B and the cylinder; the other shutting the outlet from the cylinder to the contents of the pan B. The piston being close up to the cock nearest the pan, and both cocks being closed, the one next the pan is opened and the piston is pulled outwards; the cock next the pan B is then closed, and the one communicating with the atmosphere is opened, and the sample is procured by pushing the piston inwards.

In concentration of any liquid in the pan B, say cane-juice, the proper charge is inserted and steam is admitted into the coil, the quantity being regulated by a valve at S. This steam heats the air and liquid in the pan, and then escapes by the nozzle *e* and outlet *o*, creating a downward current in the R O, and driving the air out of it. The valve in the arm A R O being open, the heated air and vapour from the liquid will rise and pass into the arm A, from which the air has been drawn by the current of steam escaping from the nozzle *e* in the pipe R O, creating a partial vacuum in the pan B, and thereby causing evaporation to go on at low temperatures. If the steam and condensed water escaping from the nozzle are not sufficient to draw off the vapour rising from the liquid in the pan, the auxiliary jet *f* can be used. When a partial vacuum is obtained in the pan, it may be preserved by closing the valve in the arm A before shutting off the steam jet or jets. The temperature of the contents of the pan B is always shown by the thermometer T.

The vessel P may be used for different purposes; (1) for admitting specific charges into the pan B; (2) for the decolorization of syrups in the manufacture of sugars in the course of concentration, by allowing a given quantity of rectified spirit obtained by the distillation of the refuse in sugar-making such as juice from cane-tops, skimming from clarifiers, or molasses, &c. In the decolorization of sugars, it is also proposed to pass a jet of such spirit, raised to vapour, into the centrifugal machine, after the molasses have been driven off; the spirit being raised to vapour of the required tension by means of a steam coil in a closed vessel.

For the more economical use of such spirit in the decolorization of syrups, it is proposed to pass a current of it in the form of vapour, at the proper time and temperature, through the contents of the pan B.

The apparatus for effecting this in an economical manner is shown in figure 4, and consists of two parts; (1) a closed vessel heated by a steam coil and furnished with a thermometer, and (2) a condenser C, contained in a vessel or barrel, B, with a worm, W, communicating with the interior of the pan B and condenser C.

This

Invention for the Manufacture of Syrups.

This apparatus is used and worked as follows:—Steam is admitted into the coil in the vessel A by opening a stop-cock marked 1. This raises the spirit in A to vapour, which can be sent through the condenser C by opening stop-cocks 4 and 7. The vapour then drives the air out of C and W, and when all the air is expelled, these cocks 4 and 7 are closed, and cold water is admitted into the vessel B, through which a constant flow can be maintained by means of the cock marked 6. The vapour in C and W is thereby condensed and a vacuum created. The cane-juice in the pan B being at the proper degree of concentration, and the vapour in A at the proper temperature, the valve in the arm A is closed, and the steam which heats the pan is cut off by closing the valve S. The cock 3 is then opened and the spirit vapour is there admitted into the annular pipe in the pan B, which is fixed in any convenient manner such as is represented by dotted lines in figure II. This pipe is pierced with suitable holes in order to permit the vapour to pass into and through the contents of the pan B. The vapour can at any time be allowed to escape from the pan into the vessel C, in which it is condensed by opening the cock 5. While the cocks 3 and 5 are open a current of vapour will run through the pan, and when this current has been maintained for a sufficient time the cock 3 is closed, and shortly afterwards the cock 5 is shut. The valve S is then opened, and steam is again admitted into the coil in the pan, and the valve in arm A is raised, and the concentration of the contents goes on till the required density is reached.

The spirit in the condenser C may be readmitted at the proper time into the vessel A by the cock 2, and the steam from the coil in figure IV may be passed into the pipe R O, in figure II, as represented in the drawing; or if the pan B is supplied with a condense water box C, as in figure II, it may be passed into the box.

From the foregoing brief explanation it will be seen that my process comprises a means for clarifying cane-juice or other liquids by a tubular reversible filter. The use of a closed vessel to which steam is applied, as shown in the plan, and explained in the description, so as to produce concentration of a liquid in partial vacuum, without the use of air pump or condenser; also a method of using spirit obtained from the refuse in sugar-making for the purpose of decolorizing syrups and sugars without using animal charcoal. And I make a distinct claim for the especial novelty of each step in my process.

(Figure 3 represents a form of pan with a slight modification in the application of the steam. The steam for heating the contents of the pan passes into a condense water box C, the water escaping at O; the vacuum is created by a small jet of high-pressure steam from a small nozzle; the air and vapour are drawn out through slits in the periphery of the lower cone, in the direction indicated by the arrows 1, 2, and A A.)

HENRY DUNDAS GLOAG.

This is the specification referred to in the annexed Letters of Registration granted to Henry Dundas Gloag, this ninth day of March, 1871.

BELMORE.

REPORT.

Sydney, 1 February, 1871.

SIR,

The application of Captain H. D. Gloag, for Letters of Registration for an invention styled "A novel process of manufacturing, clarifying, and decolorizing Syrups and Sugars at low temperatures, by the application of improved filters, steam, and an economical use of alcohol," having been referred to us, we have the honor to report that we have examined the specification and drawings accompanying the same, and see no objection to the issue of Letters of Registration as prayed for.

We have, &c.,

J. SMITH.
CHAS. WATT.

A.D. 1871, 14th March. No. 267.

IMPROVED MANUFACTURE OF FLOUR AND SEMOLINA.

LETTERS OF REGISTRATION to Thomas Carr, for an improved Manufacture of Flour and Semolina.

[Registered on the 15th day of March, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS THOMAS CARR, of the city and County of Bristol, in the United Kingdom of Great Britain and Ireland, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "An improved Manufacture of Flour and Semolina from wheat and other seeds," and in the application and adaptation of certain machinery and arrangements to the purpose, which is more particularly described in the specification marked A, and the three sheets of drawings marked B C and D respectively, hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Thomas Carr, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Thomas Carr, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Thomas Carr shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this fourteenth day of March, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

SPECIFICATION.

Improved Manufacture of Flour and Semolina.

A.

SPECIFICATION.

I HAVE discovered that wheat may be reduced to flour by percussion while it is unsupported and falling freely or is being projected through the air, the said percussion resulting from the blows of continuous acting beaters striking at an adequate speed the unsupported wheat while it is thus so falling freely or being projected through the air, and that the flour so produced has peculiar and superior qualities differing very materially from the flour of wheat as produced by the ordinary process of reducing it between two acting surfaces which temporarily support it while undergoing the operation, such as in grinding it between a pair of millstones, or crushing it between parallel rolls or stamping it between a pestle and mortar.

The advantages derived from this new system of manufacture are as follows:—The flour obtained is of a more granular character, which enables it to absorb more water and produce a lighter and more wholesome bread, the bran also is scaled off more effectually and in a form admitting of being subsequently more perfectly separated from the flour by the ordinary dressing-sieves or bolting-machines, and moreover, from the fact of its being dispersed through the air in the surrounding chamber in the process of reduction (being thrown from the machine in a radiating shower), greater facilities are thereby afforded for the lighter cerealine and other deleterious matters being thoroughly extracted by an exhaust current of air, than the ordinary process of manufacture admits of, and thus a better and purer flour is obtained, while at the same time the cost of manufacture is greatly reduced both in the expenditure of motive power and in repairs, and consequently a flour is obtained from which a cheaper and better bread can be made than has been heretofore practicable.

My improved manufacture of flour consists, therefore, as will be understood from the above explanation, of wheat reduced to flour by subjecting the grain to the percussion of any suitable continuous acting beaters, travelling at a suitable speed, and striking the said wheat while the same is unsupported and falling freely or is being projected through the air. In the preceding explanation I have only referred to the grain of wheat, but my system or mode of manufacture is also applicable for producing flour from maize, beans, pease, and other seeds.

My invention further consists in the application and adaptation of my Patent Disintegrator, under sundry modifications and arrangements, combined with other mechanisms, to the manufacture of flour from wheat or other seeds, on the above-described novel system of disintegrating it, as the most appropriate machine that I am aware of for effecting the desired object; but inasmuch as I had designed and hitherto solely used and applied that machine for the reduction of materials of such high specific gravities as those of ores, minerals, earths, and like materials, none of them as previously made are at all capable of reducing wheat to flour, by reason of its low specific gravity, and it became requisite therefore, to adapt it to such a purpose, that sundry important alterations should be made in it.

I have practically ascertained that a machine constructed as hereinafter more particularly described, and of large diameter, with numerous cages (by preference from about twelve to sixteen), and driven at about 800 revolutions per minute for each reverse moving set of beaters or cages, will reduce the wheat introduced into the central orifice of the machine and discharge it in a radiating shower from its periphery into the surrounding casing or chamber, in a state resembling that in which it issues from a pair of ordinary millstones, but that the bran is in a state admitting of its being more effectually separated, while the resulting flour is in a fine granular state, possessing greatly superior qualities to the flour of wheat obtainable from the ordinary horizontal stones and other flour mills; and that owing to its dispersion through the air as it issues from the machine, a fan or blast cylinder acting exhaustively will filter out from it the light cerealine and other objectionable matter in a far more effectual manner than can be otherwise done, and moreover, that the quantity of flour produced with a given power, time, space, and expense, equally surpasses all previously known means, inasmuch as I have found that one of these machines, taking 30-horse power to drive it, and occupying but little if any more space than that usually required for two pair of millstones and their gearing, is fully capable of producing as much flour per day as 25 pair of millstones of the ordinary size, which require about 100-horse power to drive them.

I will now describe the modifications in my Patent Disintegrator to adapt it to the manufacture of flour, without otherwise describing the machine itself, its peculiar combination and application of principle, mode of action, and system of disintegrating matter, which have been already sufficiently described in my previous patents and elsewhere.

By preference I select the arrangement in which the different sets of cages are mounted on two separate solid shafts, placed, by preference, horizontally end to end and in the same line.

The shafts are made, by preference, of steel, with the heads to which the disc plates are secured cast or forged upon them. The discs are turned with recesses for the rings of each cage, and each set of cages and discs is balanced by a fly-wheel on the outer end of the shaft, which fly-wheel is calculated so as to counterbalance the mass of the cages and discs on the shaft both at rest, and when in motion to get rid of all tendency to vibration at the high speed required.

The first two or more cages rotate in the same direction so as to distribute the grain and scale off the bran without reducing it to powder, and also to give increased strength to carry the annular disc.

When the cages of the machine are upon horizontal axes, the grain fed in drops by gravity to the lower part of the cages, so that the larger part of the work is done in the lower section of the cages, and one important feature consists in an arrangement which will distribute the grain by centrifugal force more equally in every part of the cages, and thus bring the whole of the bars simultaneously into operation; this arrangement also acting to protect the cages (the bars only being of sufficient strength to operate upon seeds) from the casual entrance of metal and other objectionable matter. The arrangement last referred to consists of a cylinder within the inner cage, having a series of narrow slits or holes in it all round, sufficiently large to allow the grain or seed to pass, but too small to admit of pieces of matter of a much larger size than grain passing, and of another cylinder within the first-named, having corresponding slits or holes. One cylinder is fixed and the other is adjustable so as to open the spaces formed by the two cylinders to a greater or less extent by making the holes or slits coincide with each other more or less perfectly.

The grain to be operated upon is introduced into the inner chamber formed by the two cylinders, and its escape therefrom is retarded by the narrowness of the exit slits to such extent that it takes an entire

Improved Manufacture of Flour and Semolina.

entire revolution or thereabouts before the grain received when passing the feeding-spout is fully discharged from the rotating chamber; thus every part of the cages receives a due proportion, and comes into simultaneous operation throughout their entire circumference. To increase the draught through the machine, a few narrow fan-blades may be applied to the outer periphery of the cages.

Figure 1 is a longitudinal side elevation in section of the machine for reducing wheat and other seeds to fine or coarse flour; figure 2 is an end or front sectional view of the same machine, showing an outside view of one half of the casing and a section of the other half; and figure 3 is a plan thereof, showing the shafts and base plate, but omitting the discs and cages. *A* is the foundation, *a* is the plate, formed in four castings, with pedestals cast in it for the two shafts. These shafts *c* and *d* are formed of steel, with solid disc ends, to which the discs for the cages are secured. The discs are of wrought-iron plate, and the bars, by preference, of steel. To the disc head of the shaft *c*, a disc, *c*¹, is secured by rivets or otherwise, and to this disc, an annular disc, *c*², is secured, into which all the bars *c*³ of one set of cages are secured; the ends of each set of bars forming a cage being connected together in a ring, *c*⁴. To the disc head of the shaft *d* a disc, *d*¹, is secured in which the inner ends of the bars *d* forming three cages are secured, the outer end of these bars being all secured in one annular disc, *d*², in which the bars *d*³ are secured that form the cages which come between those carried by the large disc on the shaft *c*. The ends of the bars forming each set of cages carried by the annular disc *d*² are collected together in a ring (*d*⁴), and each disc is recessed to give space for the rings of each cage.

In the machine shown there are 14 cages, the first three cages from the centre containing 34, 40, and 46 bars respectively, and all rotate in the same direction, while the other 11 cages contain in succession 52, 58, 62, 70, 74, 79, 85, 91, 98, 102, and 109 bars respectively, which rotate in opposite directions. *e*¹ is a cylinder, with slits or holes in it, secured to the annular disc *d*², and *e* is another similar cylinder secured inside the first-named, but so that it can be adjusted by slightly rotating it. The front of the latter cylinder forms an annular disc. The grain is fed by a pipe, *f*, having an outlet branch on each side of the shaft *d*. *e*³ and *d*⁵ are the pulleys for the driving belts, the shafts *c* and *d* being driven in opposite directions by means of an open and crossed strap. *c*⁶ and *d*⁶ are the balancing fly-wheels, formed by a central disc of malleable iron plate, with rings riveted on each side of it as shown. A wrought-iron boiler-plate casing of any convenient form may be used to enclose the cages, and in its upper part a pipe is fixed which is connected with an exhausting fan that withdraws the cerealine and discharges it into a suitable chamber.

The mixed flour and bran will fall to the lower part of the recess below the cages, and may be removed by a screw, *i*, as shown.

The shafts, discs, and rings, and the fly-wheels and pulleys, are turned up as true and are balanced as accurately as possible, and the shafts *c* and *d* are each driven at about 800 revolutions per minute.

I have now particularly described the nature of my invention and the mode of carrying it into effect, and claim as my invention,—

Firstly.—The improved manufacture of flour and semolina from wheat or other seeds, produced by percussion with any suitable beaters striking at an adequate speed the said wheat or seeds while the same are unsupported and falling freely or being projected through the air as hereinbefore described.

Secondly.—The application of my Patent Disintegrator to the reduction of wheat and other seeds into fine or coarse flour, as hereinbefore described.

Thirdly.—The construction of the machine for reducing wheat or other seeds to flour, substantially as hereinbefore described, with the number of cages considerably increased beyond the four alone hitherto used, and two or more of the first inner cages all rotating in the same direction, and with the distributing cylinders and counterbalancing fly-wheels substantially as described.

Fourthly.—The combination of an exhausting draught with the casing or chamber in which the reducing machine works, to draw away cerealine or other deleterious matter from the flour, substantially as described.

In witness whereof, I, the said Thomas Carr, have hereunto set my hand and seal, this sixth day of October, in the year of our Lord one thousand eight hundred and seventy.

IMPROVEMENTS IN THE MODE OF AND APPARATUS FOR TREATING AND PURIFYING SEWAGE, &c.

LETTERS OF REGISTRATION to George William Wigner, for Improvements in the mode of and Apparatus for treating and purifying Sewage, &c.

[Registered on the 14th day of April, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS GEORGE WILLIAM WIGNER, of the city of London, in England, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in the mode of and Apparatus for treating and purifying Sewage, or Water impregnated with Sewage, and making Manure therefrom, part of which Apparatus is applicable to other purposes," which said invention is more particularly described in the specification, marked A, and the two sheets of drawings, marked B and C respectively, all of which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said George William Wigner, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said George William Wigner, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said George William Wigner shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court, at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirteenth day of April, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in the mode of purifying Sewage, &c.

A.

SPECIFICATION of the invention of GEORGE WILLIAM WIGNER for his invention of "Improvements in the mode of and Apparatus for treating and purifying Sewage, or Water impregnated with Sewage, and making Manure therefrom, part of which Apparatus is applicable to other purposes," referred to in his Petition for Letters of Registration within the Colony of New South Wales.

My invention consists firstly of the process hereinafter described for treating and purifying sewage, or water contaminated therewith, and making manure therefrom. The said process is as follows:—I add to the sewage or water to be purified the following substances, or some of them, as hereinafter explained, *videlicet*, alum, blood, clay, magnesia or one of its compounds (by preference the sulphate), burnt clay (otherwise known as ballast), chloride of sodium, animal charcoal, vegetable charcoal, magnesian limestone, sulphate of alumina, sulphate of iron, sulphate of lime, and alumina. The sulphate of alumina, sulphate of iron, sulphate of lime, and alumina in a commercially pure or manufactured state, may be added to the other substances above mentioned, or crude alum containing sulphate of alumina, sulphate of iron, sulphate of lime, and free alumina, or any of them in the form of impurities, may be added to the said substances. If any of the said substances should be present in sufficient quantity in the sewage, such substance or substances may of course be omitted. The proportions in which the aforesaid substances are to be used vary according to the nature of the sewage to be purified; for instance, if a large proportion of urine be present, I increase the proportion of clay; if the sewage is much diluted, I increase the proportion of alum and blood; if the sewage contains a large proportion of street refuse, I decrease the proportion of clay. For ordinary sewage I find the following proportions to answer well.

Alum	338 parts by weight.
Blood	2	" " "

With respect to the blood, I would observe that it is most important to use what may be termed "live blood," *i.e.*, blood which flows direct from a healthy animal as it is being slaughtered, and which is allowed to drop or flow upon clay and is immediately mixed therewith, as blood so used retains for a considerable time the properties which fit it for use as a purifying agent.

When crude alum containing any of the above-named substances as impurities is used, the said alum should be used in sufficient quantity to furnish the proper proportions of the ingredients which it contains.

The substances above enumerated are added to the sewage in the proportion of four pounds of the mixture of the said substances to 1,000 gallons of sewage. In most cases it is preferable to mix the said substances with a small quantity of water and add the mixture in a liquid state to the sewage; the said substances are then thoroughly mixed with the sewage, which is allowed to flow into settling or precipitating tanks. The greater part of the organic and other impurities will be immediately separated in the form of large flakes, which rapidly fall to the bottom, leaving the supernatant water clear and inodorous, or nearly so. The said water may then be allowed to flow away into a river, or be disposed of in any other way, the sediment or mud being allowed to accumulate at the bottom of the tanks. The said sediment will be found to possess the power of precipitating the impurities contained in a further quantity of sewage; the said sediment may therefore be pumped or otherwise taken from the tanks and mixed with fresh sewage, the sediment therefrom being allowed to subside in the same way as before. The sediment may in some cases be used five or six times over in this way. When the sediment no longer possesses the power of precipitating the impurities in the sewage, it must be removed from the tanks and dried. Instead of mixing the sediment with a further quantity of sewage as above described, the said sediment may be removed from the tanks as soon as a stratum of sufficient depth has been deposited, and after being so removed be dried. A small quantity of a powerful acid (such as sulphuric acid, nitric acid, or hydrochloric acid, but by preference sulphuric acid) may be thoroughly mixed with the said sediment (when it is nearly dry), which will retain the ammonia in a soluble form. Any suitable acid may, however, be mixed with the sediment as aforesaid. By the term "suitable acid" I mean an acid which will combine with ammonia, and which is procurable at such price as to be commercially available. When dried the sediment will be a valuable manure. The sediment may, however, be used as a manure without the addition of an acid. The sediment may be dried in any convenient manner, as for instance, by adding a sufficient quantity of sulphate of lime, but I prefer to dry the said sediment by means of centrifugal hydro-extractors furnished with the apparatus hereinafter described. My invention further consists of the improved apparatus hereinafter described and illustrated in figures 1 to 6 (both inclusive) of the accompanying drawings, for effecting the purification of the sewage by mixing chemical substances therewith and precipitating the impurities as hereinbefore described.

Figure 1 of the said drawings is a horizontal section of the said apparatus; figure 2 is a vertical longitudinal section of the same taken on the line VZ figure 1; figures 3 and 4 are transverse sections of the said apparatus on a larger scale, the said sections being respectively taken on the lines T, U, and VX, figure 1; figure 5 is a vertical section of the mud-well hereinafter referred to; and figure 6 represents on a larger scale side and end elevations of one of the stirrers, *d*², hereinafter referred to. The same letters and figures of reference indicate the same parts in each of the several figures.

A

Improvements in the mode of purifying Sewage, &c.

A is a pit, which I term a "catch pit," into which the sewage is caused to pass on its way from the main sewer to the mixing pit B. The pit A is formed with a sloping bottom, a^1 , and a mud channel, a^2 , leading into a well, a^3 . The sewage as it passes through the said pit deposits parts of its sand and other suspended matters, which are conveyed by the channel a^2 to the well a^3 , whence they are pumped out or otherwise removed. CC are mixing pits, in which the chemical substances to be used for the purification of the sewage are mixed previously to being added thereto. The said pits are furnished with agitators or stirrers, consisting of shafts, DD, which revolve in bearings, d^1d^1 , and carry radial arms, d^2d^2 , formed of flat blades of iron twisted as represented in figure 6, so as somewhat to resemble the blades of a screw propeller. EE are endless chains carrying buckets, e^1e^1 , by which the chemical substances are raised from the pits CC, and delivered through troughs or channels, e^2e^2 , to the mixing pit B, into which the sewage passes from the culvert a^4 . The said substances are mixed with sewage by means of a shaft, F, which revolves in bearings, f^1f^1 , and to which are affixed radial arms, f^2f^2 , furnished with tangs or teeth, f^3f^3 , which work between stationary tangs or teeth, f^4f^4 , fixed either to a bar, f^5 , extending across the pit as shown, or in the bottom of the pit itself. As the shaft F revolves, the tangs or teeth, f^3f^3 pass between the tangs or teeth, f^4f^4 and tear up and thoroughly macerate any coarse solid matter contained in the sewage, and mix with the said sewage the chemical or other substances used for its purification. The shafts DD and F may be driven by steam or other suitable motive power. G^1G^1 , G^2G^2 , G^3G^3 , are precipitating tanks into which the mixture of sewage and chemical substances passes from the mixing pit B, the said mixture being introduced through a culvert b^1b^2 and opening b^3b^3 in the brick-work. The bottoms of the tanks slope toward the line VX, and have mud channels, g^1g^1 , g^2g^2 , g^3g^3 . H is a well constructed at the junction of the tanks G^1G^1 , G^2G^2 (see figures 1, 2, and 5). The sediment or mud deposited by the sewage in the tanks G^3G^3 passes into the channels g^2g^2 , and thence through openings, g^4g^4 , in the partition wall to the tanks G^2G^2 . The said openings may be furnished with penstocks. The sediment or mud in the tanks G^1G^1 G^2G^2 passes into the channels g^1g^1 g^2g^2 , and thence through penstocks, $h^1h^1h^1$, into the well H, whence the said sediment or mud is removed by means of a pump or other suitable apparatus (not shown). As the sewage flows from one set of tanks to another it passes over the transverse partition walls, and the effluent water is received in the collecting culvert I, through or over which the said water is delivered to the filter K, whence the said water passes in a pure or nearly pure state to a river or other suitable outlet; or the said water may be discharged into the river or other outlet without filtration.

My invention further consists of the improvement hereinafter described in the construction of the said filter.

As filters of this description are ordinarily constructed, the top layer of filtering medium consists of charcoal or other chemical substance, which is apt to get disturbed or removed when the filter is being cleaned. Now, in order to obviate this difficulty, I stretch over the said top layer of charcoal k^1 or other chemical material a sheet of canvas, k^2 , or other similar permeable material, which protects the said charcoal or other similar chemical substance from removal or disturbance, and over the said sheet of canvas or other material I put a layer of sand, k^3 , which intercepts the coarser portions of the impurities in the effluent water aforesaid, so that when it is wished to clean the filter the said layer of sand and the impurities intercepted thereby can be removed without disturbing the charcoal or other chemical substance.

My invention further consists of the improvements hereinafter described, and illustrated in figures 7, 8, 9, 10, 11 and 12 of the accompanying drawings, in centrifugal dripping machines (otherwise known as "hydro-extractors") used for drying sewage deposit, with mud, sugar, and other moist or plastic substances.

The said machines consist of perforated metallic cylindrical baskets or sieves for containing the substance to be dried, which baskets or sieves revolve within cylindrical casings into the annular space between which baskets and casings the water extracted from the substance under treatment is thrown by centrifugal force. Such substance as it is dried accumulates around the internal circumference of the basket or sieve, and is usually removed therefrom by shovelling or digging.

Now this part of my invention consists of the machinery or apparatus hereinafter described, to be applied to centrifugal drying machines, for the purpose of removing and discharging therefrom, while the same are in motion, the sewage deposit, mud, sugar, or other substance accumulated around the side of the basket or sieve as aforesaid.

Figure 7 is a plan of part of a hydro-extractor and of the apparatus above referred to, the said apparatus being represented partly in section; figure 8 is an elevation of the same; figure 9 is a vertical section of part of a hydro-extractor furnished with the aforesaid apparatus; figure 10 is a plan of the plate e^3 hereinafter referred to; figure 11 is a plan of part of the basket B and of the plate e^4 , and tool-holder e^5 hereinafter referred to, part of the said basket being broken away in order the better to exhibit the said plate; and figure 12 is an elevation showing the way in which the discharge-pipe and cutting-tool hereinafter described are held together. The same letters and figures of reference indicate the same parts in all the figures.

A is the cylindrical casing in which revolves the basket or sieve B in which the mud or other substance is dried. The said casing and basket are of the ordinary kind. C is the dovetail bed fixed to the edge of the casing. A and D is a sliding bracket (somewhat resembling the slider of the slide-rest of a lathe) which bracket is traversed as required in the direction of a radius of the machine, by means of a screw, d^1 , turned by a winch, d^2 , which said screw works in a screw-box, d^3 , carried by the said bracket, or the said bracket may be traversed by means of any other suitable mechanical arrangement. The inner end of the bracket D projects over the inner edge of the basket B, and carries a dovetail slider, E, to which vertical motion in either direction is imparted as required by means of a worm, d^4 , affixed to or cast with an axis, d^5 , which turns in bearings, d^6d^6 . The thread of the said worm engages in a rack, e^1 , formed on the slider E. The axis d^7 carries a bevel-toothed wheel, d^7 , which is turned by means of another bevel-toothed wheel, d^8 , mounted on a shaft furnished with a winch, d^9 . Any other suitable mechanical arrangement may, however, be employed to raise and lower the slider E. On the lower end of the said slider is affixed or formed an axis, e^2 , and a plate, e^3 (see figure 4); e^4 (see figure 5) is another plate, which is capable of partial rotatory motion on the axis e^2 . To this plate is affixed a socket, e^5 (furnished with clamping screws) or a bracket, which socket (or bracket) carries the delivery pipe F (or a channel), to which is affixed the cutting-tool, G, used for removing the substance accumulating around the side of the basket B, the said discharge-pipe and tube being held together by a union nut, H, furnished with a shoulder, h , which abuts against a shoulder, g , on the

Improvements in the mode of purifying Sewage, &c.

the end of the cutting-tool, as represented in figure 6. $e^6 e^6$ (see figure 4) are concentric curved slots, through which pass screws, $e^7 e^7$ (see figure 5), furnished with nuts, $e^8 e^8$, by means of which arrangement the plate e^1 and the socket and cutting-tool carried thereby, can be fixed at any angle to which they may have been moved. The cutting-tool used may be either tubular or of any other form suitable for cutting. When a tubular tool is used, it may be of any convenient form in cross section, and communicates with a discharge-pipe which rises and falls with the slider E. In some cases an india-rubber or other flexible tube may be attached to a cutting length of metal tube, so as to discharge the substance at any convenient point. When a cutting-tool which is not tubular is used, the discharge pipe referred to is or may be dispensed with, and an endless travelling belt or band or an endless chain of buckets may be used for effecting the removal from the machine of the substance taken from off the side of the basket or sieve by the said tool.

The action of the apparatus is as follows:—The bracket D is moved towards the circumference of the basket B, and adjusted so as to cause the cutting-tool G to enter the substance to be removed. The said tool is then moved up and down so that as the said substance is brought under the operation of the said tool by the revolution of the said basket, a helical cut is made in the said substance. The portion thus cut away from the mass passes through the cutting-tool and the discharge-pipe in connection therewith, or (where a cutting-tool which is not tubular is used) on to the endless band or belt hereinbefore referred to. When the cutting-tool has arrived at the end of its upward or downward traverse, and before its motion is reversed, the bracket D is again moved towards the side of the basket so as to cause the said tool again to enter the substance to the depth required for the next cut.

Having thus described the nature of my invention and the manner in which the same is to be performed, I wish it to be understood that I do not confine myself to the precise details and proportions hereinbefore described, as the same may be varied without departing from the nature of my said invention; but I claim as my invention,—

- Firstly*—The improved mode, hereinbefore described, of deodorizing and purifying sewage or sewage-water by means of the chemical substances hereinbefore specified, and the obtaining by such means of a sediment which may be used as a manure.
- Secondly*—The deodorization and purification of sewage by means of sediment or mud already precipitated from sewage or sewage-water, as hereinbefore described.
- Thirdly*—The addition of a suitable acid to the said sediment or mud, as hereinbefore described, in order to retain the ammonia, and thereby improve the quality of the manure made from such sediment or mud.
- Fourthly*—The construction and use of a “catch pit” with a mud channel and well, as and for the purpose hereinbefore described.
- Fifthly*—The improved agitators or stirrers hereinbefore described, and illustrated in figures 1, 2, 3 and 6, of the accompanying drawings, for mixing and incorporating the chemical substances used for the purification of sewage, that is to say, revolving shafts furnished with radial arms consisting of twisted iron blades somewhat similar to the blades of a screw propeller.
- Sixthly*—The improved mixing apparatus hereinbefore described, and illustrated in figures 1, 2 and 3 of the accompanying drawings, that is to say, a revolving shaft having radial arms furnished with tangs or teeth which work between stationary tangs or teeth, as and for the purpose described.
- Seventhly*—The improved arrangement of precipitating apparatus hereinbefore described, and illustrated in figures 1, 2, 4 and 5, of the accompanying drawings, that is to say, tanks having sloping bottoms and mud channels for collecting the sediment or mud precipitated from the sewage or sewage-water passing through the said tanks, and also a well or wells into which the said sediment or mud passes from the said channels, essentially as described.
- Eighthly*—The improvement hereinbefore described, and illustrated in figures 1, 2 and 6^a of the accompanying drawings, in the construction of filters used for filtering sewage-water, that is to say, stretching over that which in filters of the ordinary construction is the top layer of filtering substance a sheet of canvas or other similar permeable material, and spreading a layer of sand over the said canvas or other material, as and for the purpose described.
- Ninthly*—The improved apparatus hereinbefore described, and illustrated in figures 7 to 12 (both inclusive) of the accompanying drawings, to be applied to hydro-extractors, for the purpose of removing therefrom the substance dried therein, that is to say, a suitable cutting-tool carried by sliders working in brackets, the said sliders being so arranged and worked as to give to the said tool the horizontal and vertical motions necessary to enable it to remove the mud or other substance accumulated around the side of the revolving basket, the said mud or other substance being discharged from the said basket either by means of an endless belt or of an endless chain of buckets, or through a pipe attached to the cutting-tool.

As witness my hand, this thirteenth day of September, 1870.

G. W. WIGNER.

IMPROVEMENTS IN THE METHOD OF CONSTRUCTING SOAKS OR DIPS FOR WASHING OR DIPPING SHEEP.

LETTERS OF REGISTRATION to Henry Dale Edwards and William Thomas Gore, for Improvements in the method of constructing Soaks or Dips for washing or dipping Sheep.

[Registered on the 14th day of April, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS HENRY DALE EDWARDS and WILLIAM THOMAS GORE, both of Melbourne, in the Colony of Victoria, civil engineers, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in the method of constructing Soaks or Dips for washing or dipping Sheep," which is more particularly described in the specification and sheet of drawings which are hereunto annexed ; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four ; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years : And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report in part favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Henry Dale Edwards and William Thomas Gore, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, so far only, however, as the mechanical appliances described in the said specification and sheet of drawings are concerned, for and during the term of fourteen years from the date hereof ; to have, hold, and exercise unto the said Henry Dale Edwards and William Thomas Gore, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended : Provided always, that if the said Henry Dale Edwards and William Thomas Gore shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirteenth day of April, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Soaks or Dips for washing or dipping Sheep.

SPECIFICATION of HENRY DALE EDWARDS and WILLIAM THOMAS GORE, both of Melbourne, in the Colony of Victoria, Civil Engineers, for an invention intituled "Improvements in the method of constructing Soaks or Dips for washing or dipping Sheep."

OUR invention consists of certain improvements in the method of constructing Soaks and Dips for washing or dipping Sheep, which have for their object the easy removal of the dirt resulting from either of these operations, whilst at the same time retaining the great body of the water or ley in which the sheep have been soaked or dipped.

In order to accomplish this purpose, we construct each of our soaks or dips with adjustable false bottoms, so as to form two distinct chambers when required; the upper one being for the purpose of retaining the great body of the water or ley in which the sheep have been soaked or dipped (as the case may be), and the lower one being simply a receptacle for the dirt which is precipitated during the operation. The communication between these two chambers is kept open until it is thought advisable or necessary to cleanse the lower chamber from the dirt which has accumulated in it, when the false bottom is placed in position so as to isolate each chamber. The lower chamber is then flushed out (provision being made for this purpose), and the communication between the two chambers renewed.

Now it is evident that the mechanical details of this method of constructing soaks or dips might be greatly altered or varied without departing from the nature thereof, so that, although in the drawings hereto attached we have illustrated the best method that we are acquainted with for accomplishing the objects of our invention, we do not confine ourselves to the mechanical details therein set forth.

Referring to these drawings, where the nature of the different views and the scale upon which they are drawn is distinctly marked, it will be found that the soak or dip tanks are marked A, the false bottoms (which are made in the shape of long conical valves) B C and D, B being the upper half, C a layer of india-rubber between the edges of the two halves, and D the lower half. E are parallel motion links, F valve seat or framing for false bottoms, J cam, K outlet valve, L inlet valve, M cam handle, N supports, and P cam spindle.

When about to be used, the outlet and inlet valves are closed, the false bottoms raised as shown in transverse section, and water or ley supplied. The sheep are then soaked or dipped (as the case may be), and the dirt descends and passes down each side of the false bottoms into the lower chamber or dirt receptacle. When required, the false bottoms are closed by means of cam handle M, the outlet valve K is opened, and this lower chamber flushed by means of a stream of water or ley supplied through inlet valve J. These two valves are then closed, and communication between the two chambers reopened by raising the false bottoms again.

The method of raising and lowering the false bottoms can be seen clearly on reference to the drawings, the spindle P having a cam, J, fixed on it underneath each false bottom, so that by turning round said spindle the false bottom is raised, and by returning it the false bottom is lowered.

We claim,—

1st. The construction of soaks or dips for washing or dipping sheep, with adjustable false bottoms so as to form two distinct chambers when required, in the manner and for the purposes substantially as herein described and explained.

2nd. The peculiar construction of these false bottoms and the mechanical arrangements for adjusting them, as illustrated in the drawings hereto attached, and marked B C D E F J M and P.

In witness whereof, we, the said Henry Dale Edwards and William Thomas Gore, have hereto set our hands and seals, this twenty-second day of December, one thousand eight hundred and seventy.

HENRY DALE EDWARDS.
W. T. GORE.

This is the specification referred to in the annexed Letters of Registration, granted to Henry Dale Edwards and William Thomas Gore, this thirteenth day of April, 1871.

BELMORE.

REPORT.

Water Police Office,
Sydney, 24 February, 1871.

SIR,

We have the honor to return herewith the Petition of Messrs. Edwards and Gore for Letters of Registration for improvements in the method of constructing Soaks or Dips for washing or dipping Sheep, forwarded to us with the accompanying drawings and specification herewith, also returned by your blank cover communication of the 18th instant, and to state that we have carefully considered the same.

We now beg to recommend that Letters of Registration be granted to the Petitioners, for the improvements in the method of constructing Soaks or Dips described in detail in the drawings and specifications submitted by them, but we are of opinion that in the said Letters they should be confined to the mechanical appliances which they have thus described.

We have, &c.,

CHARLES COWPER, JUNIOR.
A. O. MORIARTY.

IMPROVEMENTS IN OBTAINING MOTIVE POWER BY MEANS OF AIR AND STEAM, &c.

LETTERS OF REGISTRATION to George Warsop, for Improvements in obtaining Motive Power by means of Air and Steam, &c.

[Registered on the 13th day of May, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :—

WHEREAS GEORGE WARSOP, of No. 9 Burton-street, Nottingham, England, Engineer, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in obtaining Motive Power by means of Air and Steam, and in Apparatus employed therein," which is more particularly described in the specification which is hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said George Warsop, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said George Warsop, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said George Warsop shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this eleventh day of May, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in obtaining Motive Power by means of Air and Steam, &c.

SPECIFICATION.

TO ALL TO WHOM IT MAY CONCERN:

BE it known that I, GEORGE WARSON, of No. 9, Burton-street, Nottingham, Engineer, am in possession of an invention for Improvements in obtaining Motive Power by means of Air and Steam, and in Apparatus employed therein"; and I, the said GEORGE WARSON, do hereby declare the nature of the said invention, and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement thereof, that is to say:—

This invention has for its object improvements in obtaining motive power by means of air and steam, and in apparatus employed therein. The machinery which I employ consists of a steam boiler and an engine, which may be similar to those now in use, and the engine works an air pump or pumps, drawing in cold air and forcing it through a coil of pipes or other suitable chamber heated by the furnace, and from this heated coil or chamber the air passes into the boiler, and is caused to rise in a finely divided state through the water therein contained. The air and steam together pass from the boiler to work the engine. The heating of the air after it leaves the pump or pumps may be effected by passing it through hollow fire-bars, or apparatus such as is now employed for superheating steam may be used for heating the air. The air is caused to be finely divided as it passes through the water, by means of partitions of wire gauze or other openwork or perforated material. The engine may be either a condensing or non-condensing engine; if it be a condensing engine, I employ the air-forcing pump to aid in drawing the air from the condenser.

In order that my said invention may be most fully understood, I will proceed to describe the manner in which I prefer to carry the same into effect.

I take an ordinary high-pressure steam-engine, but of larger size than would, if it were worked in the ordinary manner, be required for the office which it has to perform, and I apply to this engine—which, in the first instance, I will suppose to be non-condensing—an air-pump or air-pumps, by preference of such capacity that for each stroke they will together yield a measure of compressed air of the boiler pressure of the engine, equal to about one half to $\frac{2}{3}$ of the measure of mixed air and steam which is expended at each stroke of the engine. In this case more than half of the power obtained in the working cylinder will be expended again in compressing the air, and the area of the working cylinder must be proportionally large. These proportions, however, may be varied, and it is advantageous frequently so to construct the engine that they may be varied from time to time as may be required, by altering the effective length of stroke of the air pumps, then by reducing the quantity of air a greater power may be obtained from the engine, but less economically. The air-pumps may conveniently be worked by eccentrics or cranks on the main shaft of the engine, and may be of ordinary construction. I prefer that the valves of the air-pump should be ordinary conical valves, and the valves should be of sufficient area to give free passage to the compressed air, with but a short lift; for it is important to the proper working of the engine that the valves should close again rapidly as soon as the stroke of the pump is completed. The inlet valve may in each case be a spring pallet working over a passage in the piston, which is of a sufficient area freely to admit the air, and the pallet spring is not sufficiently strong to oppose to it any considerable resistance, but the spring is yet sufficient when the entry of the air ceases to cause the immediate return of the pallet, so that it may cover closely the mouth of the inlet passage at the time that the delivering stroke of the air-pump commences.

The boiler may be of any good construction; so long as it has a considerable water capacity and depth it need not be larger than in the ordinary proportion to the effective power of the engine. In the flue, or otherwise in connection with it, an air-heating apparatus is provided; such a heating apparatus may be used as has heretofore been employed for superheating steam; it should be capable of raising the compressed air from the air-pumps to a temperature at least equal to, and advantageously it may somewhat exceed, the saturated steam temperature corresponding with the pressure at which it is intended to work. The engine may be worked at any high pressure; 50 lbs. per square inch above the atmospheric pressure is a suitable and convenient pressure, but greater economy may be obtained by the use of a higher pressure. Coils of wrought-iron pipes in the boiler furnace and flue form a convenient air-heating apparatus, and in small engines a part of the coil may advantageously form the fire-bars of the boiler. The compressed air, after passing through the heating apparatus, is admitted into the boiler at the lowest part of the water space, through a valve which is employed to prevent the escape of water from the boiler into the heating apparatus; this valve also, it is found convenient to make like the exit valves of the air-pumps. The heated air, as it rises up through the water in the boiler, is caused to be divided into as many and minute streams as possible, by means of suitable partitions. I have found for this purpose the use of wire gauze to be convenient, and I arrange it as observation may in each case suggest. Wherever the air rises up in quantity, there I oppose to it a number of thicknesses of wire gauze sufficient to reduce the flow, and in this way I distribute the air, and cause it to ascend equally, or nearly so, in every part of the boiler. It is important that the distribution of the air amongst the water in the boiler should be attended to, for in this engine one main purpose which the water in the boiler performs is to regulate the heat of the air, absorbing from it any excess of heat it may have acquired before it enters the boiler, or supplying heat to it, as the case may require. The air and steam together pass from the boiler to the engine and are admitted to the working cylinder as when using unmixed steam, but in this case the power of the engine will result for the greatest part, or in great part, from the expansion of the air by heat between the time when it is taken in by the air-pumps and the time when it is passed together with the steam into the working cylinder. The degree to which the steam and air are expanded in the working cylinder will, as heretofore, depend on the conditions of the application in each particular case, but I would remark that with this engine expansion may advantageously be carried to a considerable extent without there being any necessity to steam-jacket the cylinder, the cylinder being simply clothed with felt in the usual way.

When the expansion is to be carried far, it is desirable that the air should enter the boiler at a temperature considerably above that of the water which the boiler contains, and then the mixed steam and air will pass off from the boiler at a heat a good many degrees above that of saturated steam at a corresponding pressure, or in fact, the steam which the mixture contains will be, to a small extent, superheated, and so is in a state to be very advantageously worked expansively.

The

Improvements in obtaining Motive Power by means of Air and Steam, &c.

The exhaust steam and air from the engine I cause to pass through a tubular casing; it is clothed with felt to prevent loss of heat, and the pipe which receives the compressed air immediately it comes from the air pumps is made to pass through the interior of the casing from end to end, entering it near where the exhaust air and steam escape, and leaving it to pass to the air-heater near where the exhaust steam and air enters from the cylinder. The casing should be made sufficiently long to avoid any great loss of heat with the exhaust air and steam if the engine be of the non-condensing class.

When a condensing engine is used, I connect the air-forcing pump with the condenser, so that through the greater part of its stroke it sucks from the condenser, but towards the end of the stroke the piston of the air-forcing pump passes over a port in the side of the cylinder, and this port admits air of atmospheric pressure by a passage fitted with an inlet valve.

I would remark that, by means of these arrangements, the theoretical economy of an air-engine—that is to say, that of an engine worked by the expansion of air by heat—are to a considerable extent practically realized, whilst many of the difficulties attendant on the use of air-engines are avoided. The steam boiler affords a ready means of regulating the temperature of the air, as already stated, and also of obtaining the requisite pressure for starting it,—ensures that the temperature of the mixed air and steam passing to the cylinder shall never rise so high as to injure the lubricants there employed,—and the steam itself, as in an ordinary steam-engine, furnishes sufficient moisture to prevent the rubbing surfaces from being absolutely dry. The manner adopted for heating the air also, it may be observed, is such as to preclude the possibility of the air carrying with it dust and cutting particles into the working cylinder. The engine may, where the nature of the work renders it desirable, have more than one working cylinder; and again, it is not essential to my invention that the engine should be of the cylinder construction,—it may be a rotary engine, although in all cases I prefer a cylinder engine.

The invention is applicable to locomotive as well as to stationary and portable engines; and, in its application to locomotive engines, a considerable advantage is that the quantity of water which is required for its supply is much smaller than is required by an ordinary steam-engine of the same power. In the case of locomotives, the air may first be heated by passing through a coil of pipes in the smoke-box before passing into the heating apparatus in the furnace, and so utilize the waste heat in the smoke-box. In some cases, especially in large engines, a separate fire may be employed for the air-heater.

What I claim as my invention is, the combining air-forcing apparatus, with an engine suitable to be worked by steam or other fluid, such air-forcing apparatus taking in air in a cold or comparatively cold or unheated state, and forcing it through a pipe or passage heated by a furnace externally, and thence into a boiler, from whence, in a heated state and in combination with steam generated in the boiler, it passes to the engine, which it actuates as herein described.

I also claim the so arranging the air-forcing apparatus employed in combination with a condensing engine that it may aid in withdrawing the air from the condenser as herein described.

In witness whereof, I, the said George Warsop, have hereunto set my hand and seal, this twentieth day of December, in the year of our Lord one thousand eight hundred and seventy.

GEORGE WARSOP.

This is the specification referred to in the annexed Letters of Registration, granted to George Warsop, this eleventh day of May, 1871.

IMPROVEMENT IN CARRIAGE-BRAKES.

LETTERS OF REGISTRATION to Andrew Newell, for an Improvement in Carriage-brakes.

[Registered on the 13th day of May, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS ANDREW NEWELL, of Collins-street West, in the City of Melbourne, in the Colony of Victoria, merchant, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention of an "Improvement in Carriage-brakes," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Andrew Newell, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Andrew Newell, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Andrew Newell shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this eleventh day of May, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvement in Carriage-brakes.

SPECIFICATION of Invention of ANDREW NEWELL, of Collins-street West, in the city of Melbourne, in the Colony of Victoria, for Improvement in Carriage-brakes.

I, Andrew Newell, of Collins-street, in the city of Melbourne, in the Colony of Victoria, merchant, do hereby declare that the following is a full, clear, and exact description of my invention for "Improvements in Carriage-brakes," which will enable others skilled in the art to make and use the same, reference being had to the accompanying drawing, forming part of this specification.

My invention relates to Carriage-brakes, and my object is to effect an improved combination of the parts operating in connection with the brake-bar.

Figure 1 is a plan-view of a running part of a wagon provided with my improved brake.

Figure 2 is a longitudinal sectional elevation of the same, and

Figure 3 is a modified arrangement, adapted to lighter carriages.

Similar letters of reference indicate corresponding parts.

A represents the brake-shoe supporting bar, and B, a tongue or bar attached thereto, and extending nearly to front axle, and then through a slotted plate, C.

These bars A and B are arranged on the frames or bars D, to slide back and forth a short distance, to move the brake-shoes E against the hind wheels or away from them.

For moving them, the front axle F, to which the curved plate is attached, is allowed to move back and forth under the bolster G, the king-bolt H being arranged in a slotted plate, I, projecting forward of the axle and attached thereto, to admit of such movement, the same being effected by the action of the animals in holding back, in going down-hill, or pulling a-head when not going down-hill.

K is a small plate attached to the under side of the bolster, and arranged to arrest the backward moving of the axle.

The brake-shoes E are made eccentric to the pivots on the working faces L, to increase the pressing as they are rolled down by the friction of the faces of the wheels of the wagon, and thereby bind more effectively with the same amount of sliding movement than would be the case if made concave, and dependent wholly on the movement of the bar A towards the wheels for their resistance.

In figure 3 I have shown a modified arrangement of the axle, bolster, and king-bolt, adapted for light carriages, in which the slotted plate I is dispensed with, and a slot is made on the angle-plate K, also a groove in the under side of the rocker G, and the king-bolt passes through the axle in the usual way.

The axle strikes against the end of the bar B, and forces it back, where it may be left to be moved forward again to relieve the wheels, by the action of the latter thereon, or the bar may be connected with the axle in any suitable way to be drawn forward.

Having thus described my invention,—what I claim as new, and desire to secure by Letters of Registration, is, the combination with bolster, sliding front, axle, and king-bolt of the angle-plate K and slotted plates C I, relatively arranged as described, to regulate the backward and forward throw of the axle.

ANDW. NEWELL.

This is the specification referred to in the annexed Letters of Registration, granted to Andrew Newell, this eleventh day of May, 1871.

BELMORE.

REPORT.

Sydney, 3 April, 1871.

SIR,

The application of Mr. Andrew Newell for Letters of Registration for an "Improvement in Carriage-brakes" having been referred to us, we have examined the specification and drawing accompanying the same, and we have now the honor to report that we see no objection to the issue of Letters of Registration, as prayed for.

IMPROVEMENTS IN MACHINERY FOR MAKING BRICKS, &c.

LETTERS OF REGISTRATION to Riley Briggs, Augustus Morand, and Thomas Shann Derham, for Improvements in Machinery for making Bricks, &c.

[Registered on the 17th day of May, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS RILEY BRIGGS, AUGUSTUS MORAND, and THOMAS SHANN DERHAM, of Leeds, in the County of York, in England, have by their Petition humbly represented to me that they are the assignees of the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in Machinery for making Bricks and similar articles," which is more particularly described in the specification, marked A, and the three sheets of drawings marked B C and D respectively, all of which are hereunto annexed; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Riley Briggs, Augustus Morand, and Thomas Shann Derham, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Riley Briggs, Augustus Morand, and Thomas Shann Derham, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Riley Briggs, Augustus Morand, and Thomas Shann Derham, shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this seventeenth day of May, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Machinery for making Bricks, &c.

A.

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME :

BE it known that we, RILEY BRIGGS, AUGUSTUS MORAND, and THOMAS SHANN DERHAM, all of Leeds, in the County of York, in that part of the United Kingdom of Great Britain and Ireland called England, are the assignees of the author or designer of an invention for "Improvements in Machinery for making Bricks and other similar articles"; and we, the said Riley Briggs, Augustus Morand, and Thomas Shann Derham, do hereby declare the nature of the said invention, and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement thereof (that is to say):—

This invention has for its object improvements in machinery for making bricks and other similar articles, for which purposes, according to this invention, the crushing-rolls, pug-mill, moulds, and pressing-dies, with their actuating mechanism, are all arranged in combination upon one base plate, and the material to be worked is fed through a hopper to the crushing rolls, passing thence into the pug-mill, wherein it is tempered, and which forces it into the moulds, wherein it is formed (when making bricks) into perfect common or unpressed bricks of the ordinary well-known descriptions; and these unpressed bricks are afterwards conveyed by self-acting means from the moulds to the pressing-dies, which latter are made slightly larger laterally than the former, and wherein the bricks are finally pressed and condensed (to prepare them for drying or baking) between top and bottom plates combined with cross heads and side rods.

The crushing rolls are actuated by worm wheels and worms or endless screws running in vessels containing oil or other lubricant, and the pug-mill is provided with an adjustable trap-door or opening at its lower end, which serves as a vent in case of an excessive downward pressure of the clay, and for other useful purposes. The moulding table is caused to rotate intermittently by means of a ratchet and pawl held in position by a spring, and provided with an eccentric cam or device for throwing it out of gear, the pawl receiving motion through suitable connections from a crank disc or cam worked by gearing from the main shaft. The bottom plates of the moulds in the upper portion of the moulding table are provided with projecting stalks or rods passing through guides in a lower portion of the table, to prevent the plates from getting jammed in the mould boxes, and are furnished with anti-friction rollers running on inclines, for lifting the plates and thereby raising the moulded bricks out of the moulds. The moulds are lubricated by a pad carried by a rod or plunger, to which reciprocating motion is imparted, and the upper parts of the moulded bricks are afterwards passed under a lubricating roller or pad. By these means the bricks, on afterwards entering the pressing dies, are caused to lubricate them and their respective plates, so as to prevent the adhesion of the bricks thereto, for which purpose also the top plate of the press is suitably heated, preferably by passing steam through it. The shaft for giving motion to the moulding table carries also a cam, which by means of suitable connections actuates the slide of the steam cylinder. The moulded bricks are moved from the moulding table to the pressing dies by means of a lever or rod, which receives intermittent motion from a cam carried by the cam shaft already referred to; and in connection with this lever is a stop or guard lever or rod arranged to act in combination therewith, so that the guard lever approaches the other lever and determines the precise point to which the moulded bricks are delivered. Each pressed brick, on being expelled from the pressing die, is pushed forward by the approach of the succeeding moulded brick to the delivering apparatus, by which it is removed away from the machine ready for drying or baking. This delivering apparatus consists of an endless band or belt, or bands or belts, receiving motion in a peculiar manner by passing under and over driving pulleys or rollers, by which it or they is or are held so as to prevent slipping, and in combination with the delivering apparatus is a brush placed above it and rotating in a contrary direction, so as to remove the excrescences and loose particles of clay or plastic material from the faces of the bricks or cakes. These improvements are applicable to the manufacture of tiles and other similar articles, by adapting the moulds and dies to the articles to be moulded and pressed. The moulds and dies may be arranged singly or in sets of two or more, so as to produce several bricks or other articles simultaneously. We have described above a complete process of making a completely compressed brick, but the apparatus is so constructed and arranged that if necessary that part of it only which is used in forming unpressed bricks can be detached and be successfully employed in making ordinary unpressed bricks, which in that state are fit for ordinary use.

We will now proceed to describe the manner of carrying the said invention into effect, reference being had to the accompanying drawings, in which figure 1 (sheet 1) is a sectional elevation, through the lines AB, figures 2 and 3, of a machine constructed according to this invention; figure 2, an elevation, partly in section, at right angles to figure 1; figure 3 (sheet 2) a sectional plan through the line CD of figures 1, 2, and 5; figure 4, a detached section (through EF, figures 1 and 2) of the ratchet motion by which intermittent motion is given to the moulding table; figure 5, a detached elevation of the steam-press; figure 6, a plan of the press cylinder; and figure 7 (sheet 3), a plan of the top of the machine, with worm wheels in section.

aa are a pair of crushing rollers, and *a¹a¹* scrapers to prevent the clay clinging to them. These scrapers rest in bearings at each end in the ordinary manner, and are kept in contact with the rollers by balance weights placed at the ends of rods, as shown in figures 1 and 2. *b* is the pug-mill; it is made in four parts bolted together, as shown, for greater convenience in erection and management, and is provided as usual with a hopper, *b¹*, for catching all that falls from the rollers, and having a sliding or adjustable door, *b²*, provided with a suitable handle as shown. *c* is the pug-mill shaft, provided with knives, *d*, and a double-bladed bottom knife, *d¹*. *e* is the table, turning on a fixed stud, *e^{*}*, and bearing upon an anti-friction roller, *y*, placed under that part of the table which is beneath the pug-mill. *e¹ e¹* are the moulds in the table; *e² e²*, their bottom plates; *e³ e³*, their stalks or guide rods; and *e⁴ e⁴*, the anti-friction rollers, which raise the rods by passing up an incline, *e⁵* (seen best in figure 1), and move the plates and moulded bricks from the position shown at X to that at Y. *f* is the bottom disc, and *g* the ring from which it receives motion by means of the pawl *h*. *h¹*, a spring which presses the pawl *h* into the recesses of the ratchet disc *f*; and *h²*, an improved eccentric or cam arrangement for drawing the pawl *h* back and holding it out of gear, so that

the

Improvements in Machinery for making Bricks, &c.

the other parts of the machine may be worked without turning the table. The eccentric or cam h^2 has its eccentric portion in contact with the ring g , and turns on an axis fixed to the pawl h ; it is shown in figure 4, in such position that the pawl h will gear with the teeth of the ratchet disc f and cause it to rotate, but if the position of the eccentric or cam h^2 is reversed by turning it half-way round on its axis in the direction shown by the arrow, by means of the handle h^3 attached to it for that purpose, the pawl h will then be lifted clear of the teeth in the ratchet disc f and the machine may then continue to operate, and the ring g to reciprocate without moving the table e , reciprocating motion (in this case through about a quarter of a revolution) is given to the ring g by means of the connecting rod g^1 , whose other end is actuated by the pin of the rotating crank or disc g^2 affixed to the shaft o . A second pawl, y^1 , prevents any return motion of the table. i is the cylinder of the press by which the moulded bricks are pressed, and i^1 its piston and piston rod, which we prefer to cast in one piece as shown. The piston rod is rigidly connected with two cross-heads, j, j^1 , and side rods, j^2 . The upper cross-head j carries the top pressing plate j^3 , and the lower cross-head j^1 is connected with the bottom plate j^4 by means of vulcanized india-rubber springs, j^5 , passing at their upper parts over pins, j^6 , fixed to the bottom pressing plate j^3 , and at their lower parts under similar pins attached to the lower cross-head j^1 . These elastic rings serve to keep the bottom plate and lower cross-head as closely together as possible, and to prevent the up-stroke of the cross head from projecting the plate upwards. k is the die in which the bricks are pressed. This die is made slightly larger laterally than the moulds e^1 ; the proportion of increase which we have found best in making ordinary pressed bricks being about two-tenths of an inch in each direction. l, l, l are the rollers for driving the delivery belt or band m , which passes also over a small roller, l^1 , for bringing it close to the press die. n is the valve rod actuated intermittently from the shaft o , by means of the cam p and lever p^1 , whose fulcrum is carried by a bracket at the point p^2 , as will be readily understood from the drawing. The lever p^1 is slotted, and in its slot it carries an adjustable spindle, provided with an anti-friction roller, which takes into the groove in the cam p , but may be drawn back out of the influence of the cam by unscrewing a nut and sliding the spindle along the slot in the lever. The nut is by preference made in the form of a small hand-wheel, as shown at p. 3. r is the delivering lever by which the moulded bricks are delivered from the rotating moulding table e to the press die k . This lever, whose fulcrum is at r^1 , is actuated by a second cam, r^2 , on the shaft o , and gives a reciprocating motion to a slide, r^3 , faced with felt or other woollen material, and working on a fixed slide bar, r^4 . The lever r also gives motion, through a connecting rod, s , to the check or guard lever t , having its fulcrum at t^1 . The moulds e^1 are lubricated in succession by the padded plunger u , which is attached to and reciprocates with the rod w^1 , working in the fixed guide w^2 , and actuated by the disc w^3 and connecting rod w^4 , as shown best in figure 2. In combination with this arrangement for lubricating the sides and bottoms of the moulds, and from them the corresponding parts of the bricks, we employ a lubricating roller, v , carried by an arm, v^1 , hinged at v^2 . This roller lubricates the upper sides of the moulded bricks as they pass under it on their way to the press. w is a tank or vessel formed in the cast-iron framing of the machine, and contains oil or other lubricant, which is supplied to the plunger u and roller v by means of pipes, w^1 , provided with regulating taps or cocks, w^2 . We prefer to use a pipe having two branches with taps or cocks (as shown in figure 3) for supplying lubricant to the plunger, but for the roller we have found that one orifice is sufficient.

To further guard against adhesion of the brick to the top plate of the press, we heat the latter by passing steam through it. The steam may be taken from the under side of the press cylinder by elastic or jointed pipes, and passed through a hole formed in the top plate, the waste steam being conducted away from the opposite end of the hole by means of another elastic or jointed pipe leading to a drain or otherwise as may be most convenient. 1 is the driving pulley by which motion is imparted to the machine through the medium of a clutch, 2, keyed to the shaft 3, and which clutch may be thrown out of gear by the handle 4 in the ordinary manner. 5 is a pinion keyed to one end of the shaft 3, and giving motion to the wheel 6 keyed on to the shaft 7; this shaft 7 also carries the spur wheels 8 and 9 and the mitre wheel 10.

The spur wheel 8 gives motion to another spur wheel, 11, turning on a fixed stud. This wheel 11 gives motion to the vertical shaft o , through the medium of the mitre wheels 12 and 13. The wheel 9 gives motion to the wheel 14 for actuating the disc w^3 . The mitre wheel 10 gives motion to the mitre wheel 15 which is keyed upon the shaft c of the pug-mill. The driving shaft 3 also carries two worms, one of which is shown in section at 16, figure 2, and both of which are seen in plan at figure 7. These worms run in vessels containing oil or other lubricant, as shown in section at 17 in figure 2, and in plan at figure 7. The worms impart motion in opposite directions to two worm wheels, one of which is keyed to the shaft of each crushing roller, as shown at 18 in figures 2 and 7. The shaft o carries a spur-wheel, 19, which drives the delivery rollers l , through the medium of the spur and mitre wheels 20, as is shown in plan at figure 3. The shaft of one of the delivery rollers l carries a band wheel, 21, from which motion is imparted to the band wheel 22, secured to the axis of the cylindrical brush 23, as shown in figures 1 and 3. In the arrangement we have drawn, the motive power of the press is obtained from steam entering the valve-chest i^2 by the pipes 24, and exhausting through the pipe 25, but we do not confine ourselves to this precise arrangement of press. Q is the base plate upon which the whole of the mechanical parts are arranged to operate in combination, z, z being the main pillars and framing of the machine, as is clearly illustrated in the drawings. z^1 is an ordinary platform for the attendant, which is shown only in figure 1.

The operation of the machine is as follows:—The clay or brick earth is thrown into the hopper H above the rollers aa , by passing between them, it is crushed, and it then enters the pug-mill b , falling by its own gravity until it comes under the influence of the helical knives d, d . These knives d, d rotate, and so cause the clay or brick earth to descend, and while it is descending the said knives mix and amalgamate it, and water is admitted through perforations in the pipe P (the supply of which may be regulated by the attendant) for the purpose of rendering the clay or brick earth plastic. The descent of the clay continues until it is forced by the double bottom knife d^1 in a compact mass into the mould X . When this mould is full the table e rotates by means of the intermittent motion it receives from the disc f and ratchet h , before referred to; the brick is then passed under the lubricating roller v , by which its top is lubricated; it is then raised by the incline e^5 to the position shown at Y in figures 1 and 3, and from this position it is removed.

Improvements in Machinery for making Bricks, &c.

removed by the delivering lever r and its slide r^3 to the press; steam is then admitted above the piston r^1 , and gives the pressing blow, after which the steam is admitted below the piston and lifts the brick out of the die k . The pressed brick is finally pushed forward on to the delivery belt or band, m , by the advance of the next moulded brick, and is carried to any convenient distance from the machine ready for drying or baking. The moulds e^1 (in the table) from which the bricks have been taken afterwards successively assume the position in which the lubricating plunger u enters them and oils their sides and bottom plates previously to their again passing under the pugmill, as hereinbefore described, after which the moulds are refilled from the pugmill for making other bricks, and the operation proceeds as before. In starting the machine the ratchet motion of the table is thrown out of gear in the manner hereinbefore described, and the vent door of the pug-mill opened wide, the machine is then put in motion (with the table standing still) until a stream of compact clay issues from the pug-mill vent b^2 ; the vent is then nearly closed and the table thrown into gear. By these means the first brick is produced perfect without leaving any mess or loose dirt about the working parts of the machine. The novel combination of parts, arranged as hereinbefore described, forms a compound machine capable of making either pressed or unpressed bricks, and of changing from one to the other without stopping the machine, the change being readily effected at the will of the attendant, who for that purpose throws the press into or out of gear by means of the hand-wheel p^3 , working in the slotted lever p^1 hereinbefore described. We would remark that extra rolls may be added for crushing stony earth, and in this case they are driven (by preference) by connecting rods from the lower rolls, the upper and lower ones being coupled like locomotive wheels, thus avoiding the use of gearing and introducing a particularly neat arrangement. For this purpose an engine may be attached to the machine for driving it, and may be contained on the same base plate.

Having described the nature of this invention and the manner of performing it, we would remark that the details shown in the drawings may be modified without departing from the distinctive features of the improvements, which relate to—

- Firstly.—The combination of parts forming the machine for grinding, pugging, moulding, lubricating, pushing off from the moulding table e , pressing, delivering, and brushing the bricks or blocks, constructed, arranged, and operating substantially as described.
- Secondly.—Constructing the moulding machine for producing the complete common bricks without pressing them in the moulds of the rotating table, so that it may be either used for producing unpressed bricks or used in combination with the apparatus for subsequently pressing the bricks in a separate die of different dimensions, the whole being arranged upon the one base plate, so as to form a compound machine as hereinbefore described.
- Thirdly.—The application of the plunger u and roller v , arranged and operating together substantially as hereinbefore described, for the purposes specified.
- Fourthly.—The application of the worm-wheels and worms or endless screws running in oil or other lubricant in the vessels 17, for driving the grinding rollers, the whole being arranged and operating as hereinbefore described, and illustrated in the accompanying drawings.
- Fifthly.—The use in the machine above described of the delivery lever or rod r , in combination with the stop, check, or guard lever, or rod t , for determining the exact position of the brick to be pressed as described.
- Sixthly.—The use, for the purposes above specified, of the delivering rollers l and l^1 and band m , in combination with the rotating brush 23, for removing excrescences and loose particles of clay or plastic material from the faces of the bricks or cakes as they leave the machine, the whole constructed and operating substantially as described.
- Seventhly.—The use of the lower disc f of the circular table e as described, to form guides for the stems e^3 of the mould plates e^2 , such guides being situated below the anti-friction rollers e^4 , and the use, in combination with the said disc f , of the ring g carrying the pawl h , arranged to be thrown out of gear, and to operate, together with the pugmill vent b^2 , in the manner and for the purpose described.

In witness whereof, we, the said Riley Briggs, Augustus Morand, and Thomas Shann Derham, have hereunto set our hands and seals, this twenty-ninth day of December, in the year of our Lord one thousand eight hundred and seventy.

IMPROVED PROCESS OF ENGRAVING.

LETTERS OF REGISTRATION to Edward Roper, for an Improved Process of Engraving.

[Registered on the 3rd day of June, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS EDWARD ROPER, of the city of London, in England, artist, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention intituled "an Improved process of Engraving," which is more particularly described in the specification which is hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant, unto the said Edward Roper, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Edward Roper, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Edward Roper shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this second day of June, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improved Process of Engraving.

SPECIFICATION.

THIS Invention consists of an Improved Process of Engraving, for the purpose of producing relief Plates direct from the drawings of the artist, at a less cost and in a better style than by any other process.

The process itself may be thus briefly described:—A sheet of zinc, perfectly flat, is first moistened with a strong solution of sulphate of copper, and upon it is distributed an even layer of oxide of zinc, upon which is laid an ordinary steel plate, such as is used by steel-engravers; it is then placed in a powerful (say hydraulic) press, where it is submitted to such pressure that on removal the oxide of zinc is found to have assumed a solid compact mass with a surface equal to an enamelled card, and which is rendered still more solid by a strong coating of common glue painted on with a brush. When dried and repressed the plate is ready to be drawn upon, the ink used being of such a nature as never to dry until it comes in contact with the plate, when it does so instantaneously. When the drawing is finished, instead of spending hours, as would have been the case had the drawing been made upon wood, in carefully picking out every particle of white, brushes are used of various degrees of stiffness, which by hand and in some cases by a machine, are caused to revolve on the surface, and in a very short time all the oxide of zinc, untouched by the artist, is removed, leaving the ink lines standing up in clear sharp relief. This engraving can be carried to almost any depth. All that now remains to be done is to saturate what is left upon the plate with a solution consisting of one part by weight of chloride of zinc and two parts of water, which renders all as hard as marble, and it is then ready for the stereotyper or electrotyper, who, by the ordinary methods in every-day use, produces a metal block from it by which impressions may be taken to an unlimited extent.

The ink hereinbefore referred to consists of a combination of two parts by weight of chloride of zinc with one part of syrup or gluten, and sufficient lampblack to give it the necessary blackness; the whole having sufficient water added to it to reduce it to the consistency of common ink. If it should spread in using, it will be found to contain too much gluten.

Having thus described the nature of this invention and the manner of performing it, I would have it understood that I do not confine myself to the precise details herein set forth, such as the use of revolving brushes to remove the superfluous oxide of zinc after the drawing is completed, or the precise proportions of the component parts of the ink, &c., so long as the nature of the said invention be retained; but I claim—

First.—The use of oxide of zinc, for the purpose of producing a surface or plate for drawing or engraving.

Second.—The use of common glue for hardening such surfaces or plates.

Third.—The use of chloride of zinc, in combination with any other suitable materials, for the purpose of producing an ink that will not dry except when applied to plates or surfaces made as herein mentioned, and that will then dry instantaneously.

Fourth.—The use of chloride of zinc and water, for the purpose of producing a hardening solution for the aforesaid plates.

Fifth.—The process as a whole.

This is the specification referred to in the annexed Letters of Registration granted to Edward Roper, this second day of June, 1871.

BELMORE.

REPORT.

Sydney, 11 May, 1871.

SIR,

The application of Mr. N. Duffield, on behalf of Mr. Edward Roper, for Letters of Registration for "an Improved Process of Engraving called Graphotype," having been referred to us, we have the honor to report that we have examined the specification accompanying the same, and see no objection to the issue of Letters of Registration as prayed for.

We have, &c.,

J. SMITH.

CHARLES WATT.

**IMPROVEMENTS IN THE CONSTRUCTION OF STONE-BREAKING AND
CUBING MACHINES.**

LETTERS OF REGISTRATION to Arthur Hope and Hugh Junor Browne, for
Improvements in the construction of Stone-breaking and Cubing Machines.

[Registered on the 7th day of June, 1871, in pursuance of the Act 16 Vict., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of
Her Majesty's Most Honorable Privy Council in Ireland; Governor and Commander-in-Chief of
the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS ARTHUR HOPE, of Prahran, near Melbourne, in the Colony of Victoria, and HUGH JUNOR BROWNE, of Melbourne aforesaid, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of an invention intituled "Improvements in the construction of Stone-breaking and Cubing Machines," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and have humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Arthur Hope and Hugh Junor Browne, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Arthur Hope and Hugh Junor Browne, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Arthur Hope and Hugh Junor Browne shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this seventh day of June, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in the construction of Stone-breaking and Cubing Machines.

SPECIFICATION of ARTHUR HOPE, of Prahran, near Melbourne, in the Colony of Victoria, Engineer, and HUGH JUNIOR BROWNE, of Melbourne, aforesaid, Merchant, for an Invention intituled "Improvements in the construction of Stone-breaking and Cubing Machines."

THIS invention consists of certain improvements in machinery, for the purpose, first, of breaking stone in a cubical form, and second, for lessening the power required to break stone, when the form in which it is broken is not a material consideration.

The first part of this invention is illustrated in figures I to III and VIII to XII inclusive; figure I being a side elevation, figure II a side sectional elevation, and figure III a plan (on lines *a b* in figures I and II) of our improvements in machinery for cubing stone. Figure VIII represents a cross section of a method of constructing the back end of the frame different to that shown in figure II. Figure IX represents a cross section of the faces of the upper jaws; figure X represents an elevation of the working face of the lower fixed jaw; and figure XI represents an elevation of the working face of the lower movable jaw. Figure XII represents a side sectional elevation of another mechanical arrangement for working the movable jaws, which might be substituted for (although we do not think it so good as) that shown in figure II.

A is the frame or foundation by which the various parts are supported; B, is space between the upper jaws; C, space between the lower jaws; D, receptacle for stone discharged from upper jaws; E, discharge shoot for cubical stone; F, discharge shoot for screenings and dust; G, pawl attached at its lower end to lower movable jaw H; I, toggles; J, guide block worked by and suspended from link K attached to crank shaft L; M, fly-wheels; N, fast and loose pulleys; O, part formed on top of upper back toggle; P, cam for working upper movable jaw Q; R, fixed jaws secured in position by wedges S; T, buffer springs for producing back action of movable jaws.

The mode of operation is as follows:—The stone to be operated upon is fed into the space B, where having been reduced in size by the action of the jaw Q, it falls into the receptacle D, from whence it descends (through ribs or guides on the face of the lower fixed jaw, as shown in figure X) into the space C, and by the action of the jaw H is forced in a cubical form through the orifices or dies in the lower fixed jaw R (which should be steel-faced), and falls into the shoot E, which carries it away. It will be noticed that the ribs or guides on the face of the lower fixed jaw fit into recesses made more than large enough to receive them in the face of the lower movable jaw, as shown at figure XI; the extra space in such recesses being made for the purpose of allowing the dust to escape. It will also be noticed that there are perforations in that part of the shoot E which is over the mouth of the shoot F. These are for the purpose of permitting the passage of any dust or screenings that might pass through with the cubical stone, although the principal part of such dust, &c., would fall down between the lower jaws, and from thence be discharged into the said shoot F; the pawl or pawls G preventing the passage of any stone not treated. As the dust has a tendency to accumulate behind and fill up the space in which these pawls work, cores are put in, to afford relief and escape from such dust.

In machines for this purpose constructed on the same principle as ours, it is necessary that the action of the movable jaw should be alternate, so that when the lower movable jaw is forcing the stone through the orifices in the lower fixed jaw, the upper movable jaw should be drawing backward and discharging the stone it has broken into the receptacle D, so as to provide a fresh supply for the lower jaws when they are ready to receive it. It is also necessary that the stroke of the upper jaw Q should be much less than that of the lower. Both these necessities are met in the machine represented in the drawings before referred to, by means of the very peculiarly shaped guide-block marked J, the toggles I, cam P, the part marked O on the top of upper back toggle, and the upper part of the back end of the frame A. On the downward stroke the guide-block J acting upon the parallel toggles I forces the jaw H forward upon the lower fixed jaw R, and reduces the stone to the required size, in the manner herein set forth. On the upward stroke of the guide-block J, a deviating movement is produced by its action on cam P which forces the movable jaw Q forward, so as to break the stone fed into the space B; part marked O on the upper back toggle acts upon the upper part of the back end of frame A, as shown in figure II, and thus checks the backward movement of the guide-block J.

The difference between the back end of the framing shown in figure II and that in figure VIII consists in this,—that in the latter case provision is made for counteracting the wear of the toggles, and regulating the gauge of the jaws, by the use of wedge-blocks adjustable by means of screws.

Although the drawings show the lower jaw H worked on the down stroke and the upper jaw Q on the up stroke of the guide-block J, it may nevertheless be reversed.

The second part of this invention is illustrated in figures IV to VII inclusive, figure IV being a side sectional elevation of a machine for breaking stone when the form in which it is broken is not a material consideration.

The remaining figures showing respectively sectional plan and side elevation of a square bush forming one of the improvements in this machine, and a plan of one of the shifting plates attached to such bush.

U is the crank shaft, V connecting rod between it and the lever W; X is the movable jaw, and V the fixed one; Z being the buffer spring for producing the back action of the movable jaw. 1 is a square bush having a series of movable plates, 2, attached to the back of it; 3 being simply an adjustable screw. On the crank shaft we place a fast and loose pulley, 4, and on each end of it we place a fly-wheel, 5. 6 is the frame.

We place two fly-wheels upon the crank shaft in such a position as to clear the frame, and on the outer end of such shaft we place fast and loose pulleys.

The mode of operation is so obvious, on reference to the method of working the upper movable jaw in figure II, that it does not need describing here, and it is only necessary to state that the bush 1 is fitted into the frame and has movable plates, 2, for the purpose of regulating the size or gauge of the stone broken by this machine.

By taking away any of the plates, it is evident that the gauge becomes larger, and by adding them it becomes smaller.

The lever W may be substituted by one of the first order if so preferred, and the application of power in this machine may be made to work a double set of jaws in one frame, by placing the lever in an upright position and one pair of jaws at each end of the frame.

Having

Improvements in the construction of Stone-breaking and Cubing Machines.

Having thus described the nature of our invention and the manner of performing same, we would have it understood that we claim—

First.—The use of a fixed jaw having orifices in it (like the lower fixed jaw R—figures II and X), whether set angularly, vertically, or horizontally, and without reference to the shape of such orifices, for the purpose herein described and explained.

Second.—The use of a sliding jaw, with its face working or set angularly, horizontally, or vertically, for the purpose herein described and explained.

Third.—The use of the means for imparting the alternate and differential motion of the movable jaws H and Q, consisting of toggles I, guide-block J, link K, part O on upper back toggle, and cam P.

Fourth.—The combination of the above improvements with the other mechanical parts shown in figures I and II, so as to produce a complete stone-breaking and cubing machine.

Fifth.—The method of working the movable jaw of stone-breaking machines by means of lever W (figure 4), whether constructed as a lever of the first or second order, and whether placed in an angular or vertical position—and the method of regulating the gauge of the stone to be broken by means of the square bush 1 and plates 2—substantially as herein described and explained, and illustrated in the drawings hereto attached.

In witness whereof, we, the said Arthur Hope and Hugh Junor Browne have hereto set our hands and seals, this day of one thousand eight hundred and seventy-one.

This is the specification referred to in the annexed Letters of Registration granted to Arthur Hope and Hugh Junor Browne, this seventh day of June, 1871.

BELMORE.

SELF-ACTING TILTING MACHINE.

LETTERS OF REGISTRATION to Thomas Walters, for a Self-acting Tilting Machine.

[Registered on the 8th day of June, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS THOMAS WALTERS, of the city of Brisbane, in the Colony of Queensland, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention or improvement styled "A Self-acting Tilting Machine," which is more particularly described in the specification and drawing which are hereto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Thomas Walters, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Thomas Walters, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Thomas Walters shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this seventh day of June, in the year of our Lord one thousand eight hundred and seventy-one.

(I.S.)

BELMORE.

Self-acting Tilting Machine.

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, THOMAS WALTERS, of Brisbane, in the Colony of Queensland, plumber, send greeting :

Know ye, that the following is a specification of my invention, intituled "A Self-tilting Machine," that is to say,—the plan herewith shows both the construction of the machine and the method of applying the same. This invention consists of a self-tilting machine, which has been designed for the more easy and regular tilting of casks and other heavy articles.

I take a chain of sufficient strength and pass one end of it through the head or stem of a hook, so as to permit of its sliding on the chain, and fasten one end of such chain to the upper portion of a quadrant, whilst at the other end I affix another hook. This quadrant is grooved on its periphery, and forms one extremity of a lever, which is supported horizontally by a pin or spindle projecting from that portion of it which forms the centre of the circle of which the quadrant is a section, and which pin or spindle is itself supported by any approved means.

On this lever I place sliding weights sufficiently heavy to overcome any resistance that may be offered by the cask or other article which it might probably be required to tilt. I also make a straight ratchet on the upper surface of the lever, to receive a pawl, which is attached to the support of the lever, so as to prevent it from flying back if it should be suddenly relieved from the weight.

When about to be used, the two hooks are to be attached to the respective ends of the cask or other article to be tilted (the sliding hook being attached to that end which is required to be raised). The sliding weights must then be slid along the lever so as to cause the quadrant to rise, thus tightening the chain and causing a good grip to be had by each hook, the pawl meanwhile sliding into the ratchet teeth, and preserving the position when once it is gained.

Having thus described the nature of this invention and the manner of performing it, I would have it understood that I do not confine myself to precise details, such as the size or the material of which the various parts of my self-tilting machine may be made or manufactured, but I claim as my invention the particular construction of the tilter, as herein described, and the method of using it, as herein explained.

And I do hereby declare the above to be a true description of my invention.

In witness whereof, I, the said Thomas Walters, have hereunto set my hand and seal, this twenty-sixth day of April, in the year of our Lord one thousand eight hundred and seventy-one.

THOMAS WALTERS.

This is the specification referred to in the annexed Letters of Registration, granted to Thomas Walters, this seventh day of June, 1871.

BELMORE.

REPORT.

Sydney, 15 May, 1871.

SIR,

Having examined the specification and drawing transmitted under your B.C. communication of the 9th May, of an invention or improvement styled "A Self-acting Tilting Machine," we do ourselves the honor to report that we see no objection to the issue of Letters of Registration for a term of fourteen years in favour of Thomas Walters, in accordance with his claim.

NEW METHOD OF SUPPORTING AND WORKING STEAM SAW-MILLS.

LETTERS OF REGISTRATION to Michael James Cummins, and James Swinbourn, for a new method of supporting and working Steam Saw-mills.

[Registered on the 16th day of June, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS MICHAEL JAMES CUMMINS, contractor, and JAMES SWINBOURN, engineer, both of Melbourne, in the Colony of Victoria, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of an invention intituled "a new method of supporting and working Steam Saw-mills," which is more particularly described in the specification and sheet of drawings which are hereunto annexed ; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and have humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years : And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Michael James Cummins and James Swinbourn, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof ; to have, hold, and exercise unto the said Michael James Cummins and James Swinbourn, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended : Provided always, that if the said Michael James Cummins and James Swinbourn shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this sixteenth day of June, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

New method of supporting and working Steam Saw-mills.

SPECIFICATION of MICHAEL JAMES CUMMINS, contractor, and JAMES SWINBOURN, engineer, both of Melbourne, in the Colony of Victoria, for an invention intituled "a new method of supporting and working Steam Saw-mills."

THIS invention has been designed for the purpose of providing means for utilizing the fine trees that grow on the banks of some of the rivers in this and the adjacent Colonies, which cannot be reached from the land, on account of the swamps or the steepness of the banks. At the present time these trees are worse than useless, as they are constantly carried away by every flood and settling in the river-beds, produce serious obstructions to the river traffic, thus necessitating the repeated expenditure of considerable sums of money in their removal.

We propose to obviate the difficulty of conveying these trees to the saw-mills erected on the land, by providing saw-mills supported on a floating foundation, so that they can be brought to the trees, instead of the trees being brought to them.

We propose also, where thought advisable, to work these saw-mills from a shaft, also used for the purpose of imparting motion to screws or paddles, so as in fact to make a combined steam-boat and steam saw-mill, the power of the engine or engines being used at one time for propelling the boat, and at the other for working the saw-mill. Of course, in order to do this with facility, it would be needful to have connecting and disconnecting gear of the simplest character. In order, however, that our invention may be more clearly understood, we have illustrated it by drawings, showing the method of arrangement which we propose to adopt, although we do not confine ourselves precisely to it.

Referring then to the drawings, where the same letters indicate the same parts wherever they occur, it will be found that figure I shows plan, and figure II side sectional elevation of a combined steam-boat and saw-mill, as hereinbefore referred to. A is the boiler; B the engine; C shaft, having on its end fly-wheel, D; E is the main-crank shaft, and F is the lever-clutch, for connecting and disconnecting it to the paddle-shafts G G, on which are paddles, H; I is pulley connected by belt to fly-wheel D, fixed on shaft E, on which pulley J is also fixed, for driving circular saws, marked J¹; K is vertical saw rack frame; L L are stern rolling ways for receiving the trees to be sawn, and can be raised or lowered by a crane or cranes M and crab-winch N; O is the rudder working under the rolling-ways.

In addition to the above, we also propose to use an endless chain, attached to the main shaft, for pulling the logs up on the ways; and side ways to be laid on the banks for getting the logs on board.

Of course we do not confine ourselves to the size or number of the engines, boilers, saw-frames, or any other mechanical parts which we have described, as it is evident that they might be altered or varied without in any way affecting our invention. And we wish it distinctly to be understood that, save and except as hereinafter stated, we do not claim any novelty in the construction of the steam-boat or the saw-mills working thereon, although we think that the size of the vessel illustrated (which is intended to be ninety feet long, by thirty feet broad, and four and a half feet deep) and the method of arrangement shown is a useful and practical one.

It will be seen that by using our combined steam-boat and saw-mill a great economy is effected in comparison with the steam saw-mills on land, inasmuch as the very expensive horse and jinker plant is dispensed with; independently of which, there are many facilities provided not otherwise obtainable, as for instance, the alternate use of the steam-power for propelling the vessel and bringing the saw-mill into the position required, and then working the machinery for sawing up the timber. The loaded lighters might also be towed behind, and the branches of the trees, together with every other part not suitable for other purposes, could be cut into firewood and profitably disposed of.

Having thus described the nature of our invention, and the manner of performing same, we would have it understood that we claim—

- 1st.—The use of floating foundations for steam saw-mills.
- 2nd.—The mode of working same from the crank-shaft which would otherwise be used for working the propellers of the vessel, as herein described and illustrated in the drawings hereto attached.

This is the specification referred to in the annexed Letters of Registration, granted to Michael James Cummins and James Swinbourn, this sixteenth day of June, 1871.

BELMORE.

REPORT.

Sydney, 15 May, 1871.

SIR,

Having examined the specifications, description, and drawings of an invention "designed for the purpose of utilizing trees growing on the banks of rivers," transmitted under your B.C. communication of the 6th May,—we do ourselves the honor to report that we see no objection to the issue of Letters of Registration in favour of Messrs. James Cummins and James Swinbourn, in accordance with the terms of their claims, for a term of fourteen years.

We have, &c.,

GOTHER K. MANN.
E. O. MORIARTY.

IMPROVEMENTS IN MEANS OR APPARATUS FOR CLEANSING OR DRESSING METALLIC ORES.

LETTERS OF REGISTRATION to Charles Frederick Collom, for Improvements in means or apparatus for cleansing or dressing Metallic Ores.

[Registered on the 26th day of July, 1871, in pursuance of the Act 16 Victoria, No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS CHARLES FREDERICK COLLOM, of Calstock, in the county of Cornwall, England, mining engineer, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in means or apparatus for cleansing or dressing Metallic Ores," which is more particularly described in the specification, marked A, and the eight sheets of drawings, marked B, C, D, E, F, G, H, and I, respectively, all of which are hereunto annexed ; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four ; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years : And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Charles Frederick Collom, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof ; to have, hold, and exercise unto the said Charles Frederick Collom, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended : Provided always, that if the said Charles Frederick Collom shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-fourth day of July, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Means or Apparatus for cleansing or dressing Metallic Ores.

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, CHARLES FREDERICK COLLOM, of Calstock, in the County of Cornwall, England, Mining Engineer, send greeting :

WHEREAS I am desirous of obtaining Royal Letters Patent for securing unto me Her Majesty's special license that I, my executors, administrators, and assigns, and such others as I or they should at any time agree with, and no others, should and lawfully might, from time to time, and at all times during the term of fourteen years (to be computed from the day on which this instrument shall be left at the Office of the Chief Secretary), make, use, exercise, and vend within the Colony of New South Wales and its Dependencies, an invention for "Improvements in means or apparatus for cleansing or dressing Metallic Ores"; and in order to obtain the said Letters Patent I must, by an instrument in writing under my hand and seal, particularly describe and ascertain the nature of the said invention, and in what manner the same is to be performed, and must also enter into the covenant hereinafter contained: Now know ye, that the nature of the said invention, and the manner in which the same is to be performed, is particularly described and ascertained in and by the following statement, that is to say:—

The object of my invention is to save time and labour, and at the same time more effectually to cleanse metallic ores.

In carrying out my invention, I employ a circular table, which is so formed that the upper surface of the same shall decline from the centre towards the outer circumference equally all round.

This table is caused to revolve by means of a shaft or axis, to which it is affixed by arms or other suitable means; and around the inner circumference of the table I arrange a pipe or pipes, for the reception of water from a cistern or other source of supply. The pipe or pipes are perforated, and the water from the same runs constantly down the inclined surface of the table.

The ore to be operated upon (which has been previously crushed, if required) is fed to the circular table at a point towards the inner circumference or upper part of the incline of the table, by means of a launder or shoot, supplied with a stream of water; and the ore, after being so deposited on the table, is carried round away from the launder or shoot, and whilst being so carried will be washed or dressed by means of the continual flow of water from the pipe or pipes; and the various particles, according to their specific gravity, will be carried a greater or less distance down the inclined table, and thus separated one from the other, whilst the refuse or tailings will be washed over the edge of the table into a suitable receiver or hutch, placed around the outer circumference of the table.

The various qualities of ore may be drawn off by streams of water supplied from perforated pipes or tubes, or by other suitable means, so arranged as to operate one after the other; the first taking away the ore towards the outer circumference of the table, and the other successively taking the ore from nearer the inner or upper surface of the table, and consequently the most valuable ore will be left till last.

The point in the distance, from the top to the bottom of the incline of the table, at which the launder or shoot shall deposit the ore on the inclined table, will be regulated from time to time, according to the size and specific gravity of the particles of ore under operation; and the inclination of the table itself will also be arranged according to the size and specific gravity of the ores to be cleansed or dressed.

In place of employing means of removing the ore from the table, I in some cases place the axle or shaft of the table at an angle, and by that means obtain a constantly increasing angle to the inclined table during one-half of the revolution of such table; and by that means I am enabled to get rid of, first, the refuse, and then, gradually, of the more valuable portions of the ore.

According to another modification of my invention, instead of forming the table so that its surface shall decline from the centre towards the outer circumference, and removing the ore from the outer circumference of the inclined table, I in some cases form such table declined from the outer circumference towards the centre, and I remove the ore from the inner circumference; in which case the pipe or pipes for water will be arranged above the inclined table, towards the outer circumference.

In some cases, revolving or stationary brushes may be arranged over the surface of the table, in position to turn over or keep in motion the ore under operation.

According to another modification, the inclined table is divided into two parts, one half being arranged at one angle whilst the other is arranged at a different angle, and the pipe for washing off the ore is bent, so as to serve the purpose of two pipes.

In this case, the head or ore on the upper portion is washed off first into a launder or shoot, and is carried thereby into a receiver or hutch, whilst the ore on the lower portion of the table is washed off afterwards into another receiver.

The water and the refuse or tailings from the general surface of the table will be washed off into other receivers.

When it is required to wash or dress silver or gold, I prefer to employ a single table, in the surface of which I form grooves for the reception of mercury.

But that the nature of my invention may be fully understood, I will, by the aid of the accompanying drawings, proceed more fully to describe the same:—

DESCRIPTION OF THE DRAWINGS.

Figure 1 shows a plan; figure 2 a side view; figure 3, a section; figures 4, 5, 6, and 7, detail views of apparatus, arranged according to my invention.

In each of the views, the same letters of reference are employed to represent corresponding parts whenever they occur.

a is the main framing; *b* is the main or driving shaft, to which motion is communicated by means of a steam-engine or other suitable power; *c* is a pinion affixed on the shaft *c*¹, gearing into a pinion, *b*¹, affixed on the shaft *b*, supporting and carrying the circular table *f*, which is so formed that the upper surface of the same shall decline from the centre or inner circumference *g* to the outer circumference *h*, equally allround. The table *f* is affixed to the shaft *b*, by means of sockets, *j*, arms, *k*, and stays, *k*¹. *l* is a circular pipe, which, by means of the connecting pipes *m*¹, receives a supply of water from a main pipe or tube, *m*, supplied with water from a cistern or other source of supply.

The

Improvements in Means or Apparatus for cleansing or dressing Metallic Ores.

The circular pipe l is perforated on its under side at l^1 , and the water from the same runs constantly down the inclined surface of the table f .

The ore to be operated upon, which has been previously crushed, if required, is fed to the circular table f by means of a launder or shoot, n , through which a stream of water flows; and the ore, after being so deposited on the table f , is carried round away from the launder or shoot in the direction of the arrow o , and whilst being so carried will, by means of the continual flow of water from the circular pipe l , be washed or dressed, and the various particles of ore will, according to their specific gravity, be carried a greater or less distance down the inclined table f , and thus separated from the refuse or tailings, which will be washed over the edge f^1 , of the table f into the receivers or hutches, pp^1 , placed around the outer circumference of the table f . $l^1 l^1$ are stops or disconnections in the circular pipe l ; $m^2 m^2$ are taps or valves for the regulation of the supply of water to the various portions of the circular pipe l ; gg are stationary brushes, arranged over the surface of the table f , in position to turn over and keep in motion the particles of ore under operation; these brushes are retained in position by rods or wires, $g^1 g^1$. $l^2 l^2$ are pipes or tubes, which are perforated on their lower sides, l^2 , and receive water from the circular pipe l , and are so arranged as to operate one after the other; the first, l^2 , being perforated from 5 to 6, and taking the ore away from the outer circumference of the table f , and washing it into the receiver or hutch s , whilst the pipe l^2 is perforated its whole length, and washes the ore from the inner or upper surface of the table f , and consequently the most valuable, into the receiver or hutch s^1 .

The pipes $l^2 l^2$ are formed with a bend, l^2 , which is furnished with a plug, l^2 , capable of removal at pleasure, in order that, when, by rubbing the hand along over the perforations in those pipes, any dirt in those perforations which has been pressed up into the interior of the pipes, by removing the plug l^2 and allowing the water to flow through the pipe freely, all impurities contained in the perforations will be washed away.

The receivers or hutches p and p^1 are formed inclined from the point at which they leave their main receiver or hutch s or s^1 , in order that the water may readily flow away to the outlets p^2 and p^3 .

p^4 are hutches or stops, which may be used when required to retain any ore or solid matters deposited in the receivers or hutches pp^1 ; and they are capable of being raised or lowered at will, to retain a greater or less quantity of the matters washed into those receivers as may be required.

z is a drain for the purpose of carrying off any rain or moisture accumulating under the table f .

Figures 8 and 9 show, by plan and sectional views, portions of a table arranged according to another modification of my invention.

In this and the following modifications I have only shown so much of the apparatus as will explain the alterations from the apparatus already described.

According to this arrangement, the axle or shaft b of the table f is arranged to revolve at an angle, by which means a constantly increasing angle is obtained to the surface of the table f , during one-half of its revolution. The ore is fed to the table f by the launder or shoot n , at the upper part, f^2 , of the same, where the angle is least; and the ore, after being so deposited, is carried round by the table and washed by means of a stream of water from the circular pipe l , as in the previous arrangement. l^1 is a pipe fixed at the lowest part of the table f , for the purpose of washing the ore remaining on the table f into the receiver s . In most cases, however, with this arrangement, this pipe may be dispensed with. The water and the refuse or tailings are carried off by means of the circular receivers or hutches p and p^1 , as in figures 1, 2, 3, 4, 5, 6, and 7.

In this arrangement only one-half of the table will be used at one time, the ore being deposited at the upper and washed off at the lower side of the same.

Figures 10 and 11 show, by plan and sectional views, another modification of my invention. In this case, instead of forming the table declining from the centre towards and removing the ore from the outer circumference of the inclined table, I arrange the table to decline from the outer circumference f^3 towards the inner circumference f^4 , and I feed the ore to the table by the launder n , at the outer circumference, and I remove the ore from the inner circumference f^4 .

The circular pipe l is arranged round the outer circumference f^3 , and causes a constant flow of water to pass down the table, for the purpose of washing or dressing the ore deposited by the launder or shoot n .

The ore is washed off by means of a pipe or tube, l^1 , as in the previous arrangement. $m^1 m^1$ are service pipes, receiving water from the mains m , for the supply of water to the apparatus, by means of the upright pipes or tubes m^3 . The circular pipe l is supported by means of the upright pipes m^3 , which are bent over so as to be out of the way of the revolving table f .

$t t^1$ are a pair of receivers or hutches, arranged round and below the inner circumference f^4 of the table f . The hutch or receiver t receives the water and the refuse or tailings from the whole circumference of the table, except that part from 1 to 2—where it is covered by a shield, u .

The object of the shield u is to prevent the ore, after being washed or dressed, from passing into the receiver or hutch t , and to conduct it into the receiver or hutch t^1 . $l^2 l^2$ are shoots to carry off the water and matters from the receivers or hutches $t t^1$.

It will be seen that the receivers or hutches $t t^1$ are formed inclined from the point 4 to the point 5, and the shoot l^2 from the receiver or hutch t^1 passes through the receiver t . A side view of the launder or shoot n is shown in dotted lines in figure 11.

Figures 12 and 13 show, by plan and sectional views, another modification of my invention, in which the surface of the table f , instead of being in one plane, is divided into two parts, x and y ; the part x being arranged at one angle, whilst the other, y , is arranged at another angle; and the pipe l^2 , employed for the purpose of washing off the ore, is bent so as to serve the purpose of the two pipes $l^2 l^2$, shown in figures 1 to 7.

In this case, the "head" or ore on the upper portion x of the table f is washed off first into the launder or shoot l^2 , and is carried thereby into the receiver s , whilst the ore on the lower portion, y , of the table f , and consequently that of least value, is washed off by the lower portion l^{2*} , of the pipe l^2 , into the receiver s^1 .

The water and the refuse or tailings will be washed into the receivers or hutches p or p^1 , as in figures 1 to 7.

Figure

A.D. 1871. No. 278.

Improvements in Means or Apparatus for cleansing or dressing Metallic Ores.

Figure 13* shows a detail view of this arrangement.

Figures 14 and 15 show, by plan and sectional views, an arrangement of apparatus particularly applicable to washing, cleaning, or recovering gold and silver from other matters.

In this arrangement, a single table is employed, similar in every respect to that shown in figures 1 to 7, except that in this case I form grooves, A, in the table f, for the reception of mercury, to absorb and retain the metal.

Having thus described the nature of my invention, and the means by which the same may be carried into effect, I would have it understood that I do not confine myself to the precise details shown and described, as the same may be varied without departing from the peculiar character of my invention; but what I do claim is,—

- 1st. The arrangement or combination of means or apparatus for cleansing or dressing metallic ores, substantially as shown and described.
- 2nd. I claim the use of a double table, and parts connected therewith, substantially as shown and described in respect of figures 12 and 13.
- 3rd. I claim the use of a table provided with grooves for the reception of mercury, substantially as shown and described in respect of figures 14 and 15.
- 4th. I claim the use of perforated pipes, *l*, *l*², and *l*^{*} (provided with plugs or stops, *l*¹, capable of removal), for the purpose of washing off the washed or dressed ore from the tables, substantially as shown and described in relation to the various modifications of my invention.

And I do hereby, for myself, my heirs, executors, and administrators, covenant with Her Majesty, Her Heirs and Successors, that I believe the said invention to be a new invention as to the public use and exercise thereof, and that I do not know or believe that any other person than myself is the true and first inventor of the said invention, and that I will not deposit these presents at the Office of the Chief Secretary with any such knowledge or belief as last aforesaid.

In witness whereof, I, the said Charles Frederick Collom, have hereunto set my hand and seal, this seventeenth day of February, in the year of our Lord one thousand eight hundred and seventy-one.

C. F. COLLOM.

Witness—WM. COLBORNE BROOKES,
British, Colonial, and Foreign Patent Agent,
20, King's Road, Bedford Row, London, England.

This is the specification, marked A, referred to in the annexed Letters of Registration granted to Charles Frederick Collom, this twenty-fourth day of July, 1871.

REPORT.

No. 14, Spring-street,
24 June, 1871.

SIR,

We have the honor to return herewith the Petition of Mr. Charles Frederick Collom, for Letters of Registration for Improvements in means or apparatus for cleansing or dressing Metallic Ores, forwarded to us with the accompanying drawings and description, by your blank cover of the 17th instant; and we have to report that, having examined the said drawings and description, and duly considered the same, we see no objections to Letters of Registration being granted as applied for, for the means or apparatus therein particularly specified and detailed.

We have, &c.,
CHAS. WATT.

A.D. 1871. 9th August. No. 280.

IMPROVEMENTS IN MACHINERY FOR MANUFACTURING BRICKS.

LETTERS OF REGISTRATION to Augustus Morand, for Improvements in Machinery for manufacturing Bricks.

[Registered on the 9th day of August, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS AUGUSTUS MORAND, of Brooklyn, New York, United States of America, now of Leeds, in the county of York, brick-machine manufacturer, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in Machinery for manufacturing Bricks," which is more particularly described in the specification, marked A, and the three sheets of drawings, marked B, C, and D, respectively, which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Augustus Morand, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Augustus Morand, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Augustus Morand shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this ninth day of August, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Machinery for manufacturing Bricks.

A.

SPECIFICATION.

AUGUSTUS MORAND, of Brooklyn, New York, United States of America, now of Leeds, in the county of York, Brick-machine Manufacturer.

“Improvements in Machinery for manufacturing Bricks.”

MY said invention relates to a machine which has a pug mill and a horizontally rotating mould wheel or table of the usual construction, the clay being passed through the said pug mill to the moulds in the table, and the bricks delivered therefrom, in a manner well understood by those familiar with this manufacture.

The object of my said invention is the production of a thoroughly efficient machine, which will be more simple of construction, more durable, compact, and convenient, and less costly, than the combined pugging and moulding machines hitherto used.

To effect this object, I construct my said machine in the following manner:—Upon a base-plate or bed of cast-iron, or other suitable material, I erect a strong upright frame or standard. Upon this standard the pug mill is supported above the mould wheel or table, and at one side of the centre of the same. The pug mill shaft is driven directly from a horizontal driving shaft, by means of a worm or screw and worm wheel—the worm being fixed on the horizontal shaft, and the wheel on the pug mill shaft. The said pug mill shaft is supported at the top in a bearing formed in a bracket, which is securely fixed on the side and near the top of the main frame or standard. The horizontal worm shaft is fitted to turn freely in small standards, which are firmly secured on the top of the main upright standard.

The mould wheel or table is supported to turn freely on a stud or short fixed shaft, which is secured on the base-plate or bed. This table has a rotating motion independent of the pug mill shaft, communicated to it by a second worm or screw, which gears into worm teeth on the mould wheel, on or near the periphery thereof. The said worm is fixed on a second horizontal shaft which is arranged below the first-mentioned worm shaft, and is supported to turn freely in standards fixed on the base-plate, or some other suitable part of the machine. The driving power is communicated from a steam or other engine, direct to one of the worm shafts, and these shafts are connected together by a belt or band passing over pulleys on the shafts.

It will thus be seen that I communicate the required rotating motion to the pug mill shaft and the mould wheel or table solely by the worm gearing, and use no other wheel gearing for this purpose in any part of the machine. By this means I greatly simplify the construction of the machine, and consequently diminish its cost and its liability to derangement, and render it more compact and convenient, while at the same time I obviate the unpleasant noise occasioned by the use of cogged or toothed wheels.

The moulds are formed in the table in the usual manner, and each mould is provided with a piston or follower for expelling the bricks from the moulds. These followers are operated by an inclined circular plate placed below the table. I prefer to give the bricks a slight compression while they are in the moulds, and I effect this compression by a peculiarly formed portion of the inclined plate below the pug mill. At the bottom of the said pug mill is a plate with an aperture through which the clay is forced, by the knives or blades of the pug mill, into the moulds. This bottom plate is extended beyond the pug mill, and forms a pressure-plate at the top of the moulds as they pass forward after being filled with clay. The inclined plate, acting on the followers as they pass under the aforesaid bottom plate, gives the bricks the desired compression. It is important, however, that this pressure should be relaxed as the moulds pass beyond the edge of the bottom plate, and I therefore make the portion of the inclined plate which lies under the edge of the said bottom plate parallel with the same for a short distance. The inclined circular plate, therefore, has the following peculiarity of configuration:—It is first made level to allow the filled moulds to pass from under the opening in the bottom of the pug mill, it is then inclined upward to a point nearly under the edge of the bottom or pressure plate, then made parallel with the said plate for a short distance, and from this parallel portion it is inclined upward to the point where the bricks are taken from the table; from this point or beyond it the inclination is reversed, to allow the followers to descend.

I prefer to have the bricks delivered automatically from the table upon an endless carrying belt or apron, which has one end arranged in close proximity to the table, so that it may receive the bricks directly therefrom. This belt or apron is passed over pulleys, one of which is connected, by means of another pulley and belt, with a driving pulley on the lower horizontal or worm shaft.

As the table rotates, the bricks in the moulds are gradually ejected therefrom, and, as fast as each brick is raised completely out of the mould, it is brought up to a guide bar or plate which lies parallel with the carrier belt or apron. In connection with this guide bar, or forming part of it, is a pusher, which drives the brick forward upon the apron, the latter then carrying it away from the table. I operate the said pusher by means of cam-like projections on the table, below the teeth thereon. The said pusher is forced outward by these projections, and is drawn inward after each brick is delivered, by a suitably arranged india-rubber or metal spring, or by a weight.

The pusher has a chamber or box, wherein I place some absorbent material or other contrivance for holding a quantity of lubricating matter, which may be conducted thereto from a reservoir, through a tube, or a groove or channel in the pusher-rod. As the pusher passes to and fro over the piston it lubricates the surface of the same. If it is desired to subject the bricks to a further compression after they have been removed from the moulds, I may place a press near the periphery of the table. I in this case arrange the aforesaid pusher to deliver the bricks first to the press, and then from the press to the carrier-belt.

DESCRIPTION OF THE DRAWINGS.

Figure 1 is a plan of my improved machine, partly in horizontal section.

Figure 2 is a side elevation, and

Figure 3 a back elevation of the same.

Figure 4 is a section on the line *x x* figure 1.

Like

Improvements in Machinery for manufacturing Bricks.

Like letters indicate corresponding parts throughout the drawings. *a* is the base-plate or bed, which is of convenient shape and dimensions for supporting the various parts of the machine; *b* is the upright frame or standard; *c*, the pug mill; *d*, the mould wheel or table; *e*, the pug mill shaft; *f*, the worm wheel on the same; *g* is the worm or screw geared in connection with the worm wheel *f*; *h* is the horizontal driving shaft, whereon the said worm is firmly keyed or otherwise securely fixed. It will be observed that the worm *g* is fitted and kept in place between the two bearings *h*¹ *g*¹ *g*¹ are shoulders on the worm *g*; *i* is a pulley whereby the shaft *h* receives motion from the engine; and *v*¹ is another pulley on the said shaft for driving the lower horizontal shaft. The worm *g* should have a tray or trough, *g*², placed below it, containing oil, so that the said worm while working shall be partially immersed therein. The bearings *h*¹ are bolted or otherwise firmly secured on the top of the standard *b*.

The upper end of the pug mill shaft *e* has a bearing in the bracket *e*¹, which is also firmly bolted or screwed upon the standard *b*. The said shaft is provided inside the pug mill with knives or blades in the usual manner. *j* is a hopper or shoot for conducting the clay into the pug mill. For convenience, I prefer to construct the cylinder of the pug mill in two parts, *c*¹ *c*², the latter of which may be readily removed or opened when it is desired to examine the interior of the pug mill.

The arrangement of the pug mill in relation to the table *d* will be readily understood by referring to figure 1, which shows clearly the moulds *d*¹ in the said wheel. I prefer to use eight of these moulds, but it is obvious that any other convenient number may be employed. *d*² is the centre pin or stud on which the table *d* rotates. The sectional view, figure 4, shows a convenient manner of securing the said pin. *d*³ is a socket or foot, which is firmly bolted or otherwise fixed on the base-plate or bed *a*. The pin *d*² extends up level with the top of the table *d*. The lower face of the boss *d*⁴ of the said table rests on the upper face of the socket *d*³, so that the table has a firm support thereon. *l* is the worm wheel or series of worm teeth on the table; *m* is the worm or screw, which is geared into the said worm wheel. *n* is the lower horizontal shaft on which the worm *m* is keyed or otherwise firmly secured. The worm *m*, like the upper worm *g*, is kept in place between two bearings, *n*¹, which are firmly bolted or screwed upon the base-plate *a*. *o* is a pulley on the end of the shaft *n*, whereby the said shaft is driven from the upper shaft *h*; *m*¹ is an oil trough similar to *g*².

It will be seen that the bottom plate *k* of the pug mill is wider than the diameter of the cylinder, and that it extends to the centre of the mould wheel, where it has passed through it a screw, *d*⁵, which is tapped into the pin or stud *d*². This screw and the screw *d*⁶ hold the pin *d*² firmly in the socket. The pug mill is firmly secured above the table upon the standard *b* by the arms *c*², which are firmly bolted or screwed to the said standard.

The inclined circular plate *p* is also firmly secured upon the base-plate *a*, below the table, as clearly shown in figure 2. The pistons or followers *q* have rollers, *q*¹, which run on the incline, and the bricks are raised out of the moulds as the followers pass from under the pressure plate *k* to the point of delivery on the incline.

As hereinbefore specified, the peculiar formation of the incline allows me to compress the bricks in the moulds, and relax the pressure as the bricks pass from below the pressure plate *k*. From 1 to 2 is a short incline which lies under the said pressure plate, and it is obvious that in passing over this incline the followers will be forced upward, and the bricks will be compressed between them and the plate *k*. If this pressure were continued beyond the edge *k*¹ of the said plate, the bricks in passing from under the said edge would be unequally compressed; I therefore make the portion of the inclined plane from 2 to 3 horizontal or parallel with the plate *k*, and while passing over this part the followers are not acted upon. From the point 3 to 4 the followers are gradually raised, and the bricks expelled from the moulds.

The devices for removing the bricks from the table are best shown in figures 1 and 2. *r* is the carrier belt or apron, which passes over the pulleys *r*¹ *r*². On the shaft of the pulley *r*¹, which is supported in the brackets *s*, there is a pulley, *r*³, which is connected by the belt *r*⁴ with the pulley *r*⁵ on the shaft *n*. *t* is the combined pusher and mould-lubricator, which is moved outward by the cam-projections *t*¹, one of which is arranged on the table outside each of the moulds. *t*² is a lever, whose fulcrum is at *t*³. The projections *t*¹ act on the part 6 of this lever. *t*³ is the spring for drawing back the pusher after each brick is delivered; *t*⁴ is the pusher guide, and *t*⁵ the guide brackets for the same.

The incline *p* is so arranged that the bricks are raised to the top of the table just before they come in contact with the guiding part *t*⁶ of the pusher rod; the cam-projection *t*¹ then forces the pusher outward, which delivers the brick to the carrier-belt. The pusher then returns into position to receive the next brick; as it passes over the top of the piston or follower it deposits thereon the lubricating matter, which is carried down into the mould as the follower descends. *u* is the chamber containing the lubricant, which may be supplied to the same continuously from a reservoir, or in any other convenient manner. I sometimes form the bottom plate of the pug mill with a receptacle for oil, which is admitted to the moulds as they pass under it.

In some cases I have two of the machines placed side by side, operated by a single engine, mounted upon the base-plate or the standards, the same worm-shafts serving for both machines.

CLAIMS.

- First.—Driving a pug mill shaft (when the same is arranged above a horizontally rotating mould table in a pugging and moulding machine) by a worm or screw and worm wheel.
- Second.—Driving the mould wheel or table of a pugging and moulding machine by a worm or screw geared into worm teeth on the said mould wheel or table.
- Third.—The pug mill and mould wheel or table arranged together with worm or screw gearing, applied to the shaft and table in such a manner that the required motion is imparted directly to them without the use of other wheel gearing in any part of the machine.
- Fourth.—A pusher (for delivering the bricks from the table to the carrier-belt, or to a press) operated by projections on the mould wheel or table.
- Fifth.—The combination with the said pusher of means for lubricating the moulds.

Sixth

Improvements in Machinery for manufacturing Bricks.

Sixth.—A machine for pressing and moulding bricks with the pug mill and mould wheel, the worm or screw gearing, the circular inclined plane and delivery apparatus, combined, arranged, and operating together substantially as set forth for the purposes specified.

Seventh.—The combined pushing and lubricating devices forced outward by cam projections on the mould wheel, and inward by a spring or weight, and arranged in combination with the said table and the carrier-belt, or with a press, substantially as set forth for the purposes specified.

SELF-ACTING MACHINE FOR THE SEPARATION OF METALS, ORES, AND MINERALS.

LETTERS OF REGISTRATION to Gustavus Wolff, for a Self-acting Machine for the separation and classification of Metals, Ores, and Minerals.

[Registered on the 17th day of August, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS GUSTAVUS WOLFF, of Grahamstown, in the province of Auckland, in New Zealand, Doctor of Philosophy, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for a "Self-acting Machine for the separation and classification of Metals, Ores, and Minerals, according to their size and different degrees of specific gravity," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Gustavus Wolff, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Gustavus Wolff, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Gustavus Wolff shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this seventeenth day of August, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Self-acting Machine for the separation of Metals, Ores, and Minerals.

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, GUSTAVUS WOLFF, of Grahamstown, in the province of Auckland, in New Zealand, Doctor of Philosophy, send greeting :

Whereas I am desirous of obtaining Royal Letters Patent for securing unto me Her Majesty's special license that I, my executors, administrators, and assigns, and such others as I or they should at any time agree with, and no others, should and lawfully might, from time to time, and at all times during the term of fourteen years (to be computed from the day on which this instrument shall be left at the office of the Patent Officer), make, use, exercise, and vend within the Colony of New South Wales and its Dependencies, an invention for a self-acting Machine for the separation and classification of Metals, Ores, and Minerals, according to their size and different degrees of specific gravity, and, in order to obtain the said Letters Patent, I must, by an instrument in writing under my hand and seal, particularly describe and ascertain the nature of the said invention, and in what manner the same is to be performed, and must also enter into the covenant hereinafter contained : Now know ye, that the nature of the said invention, and the manner in which the same is to be performed, is particularly described and ascertained in and by the following statement, that is to say :—

The machine may be described as a series of wooden boxes, marked *a a a* in the plans hereto annexed (or of almost any material), varying in size ; the smaller ones retaining the larger and heavier particles, the larger ones the smaller and lighter particles, slime, &c. The whole apparatus is self-acting. A stream of water containing the substances to be treated is conveyed by flume marked *b* in the said plans into the first of the said boxes, *a a a*, and thence into every following (subsequent) one of the whole series, depositing in its onward progress towards the flume marked on the plan *c*, the metals, ores, or minerals, according to their different sizes and specific gravity, and leaving the apparatus by the said flume marked *c*. Flume marked *d* is on the plans placed somewhere in the upper part of the apparatus, conveys a stream of clear water, which is admitted into the lower compartments, marked *e e e*, through apertures marked *f f f*, provided with slides marked *k k k*, or some other arrangements for the purpose of regulating the depth and flow of water, and to purify the materials brought into boxes *a a a*. The slots marked *g g g* allow the fluid from the said compartments, marked *e e e*, to act upon the fluid in the boxes *a a a*, when, by judiciously regulating the force and quantity of these two streams above referred to, the depositing of the substances, metals, ores, minerals, is brought about. *h h h* are apertures, with pipes, *i i i*, fixed thereto, for the purpose of drawing off the settled substances for further treatment. Neither the number or the size of the boxes *a a a*, nor of the compartments *e e e*, and their appurtenances, are defined, as they are to be varied according to the nature and other qualities of the materials to be treated.

And I do hereby, for myself, my heirs, executors, and administrators, covenant with Her Majesty, Her Heirs and Successors, that I believe the said invention to be a new invention as to the public use and exercise thereof, and that I do not know or believe that any other person than myself is the true and first inventor of the said invention, and that I will not deposit these presents at the office of the Chief Secretary or of the Patent Officer with any such knowledge or belief as last aforesaid.

In witness whereof, I have hereunto set my hand and seal, this fourth day of July, one thousand eight hundred and seventy-one.

GUSTAVUS WOLFF.

Signed, sealed, and delivered by the said Gustavus Wolff, }
in the presence of—

JAMES DE CORISH,
of Grahamstown,
Thames Gold Fields, N. Z.

This is the specification referred to in the annexed Letters of Registration, granted to Gustavus Wolff, this seventeenth day of August, 1871.

IMPROVEMENTS IN REAPING AND MOWING MACHINES.

LETTERS OF REGISTRATION to Joseph Nicholson, for Improvements in Reaping and Mowing Machines.

[Registered on the 26th day of August, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS JOSEPH NICHOLSON, of Melbourne, in the Colony of Victoria, agricultural implement maker, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is-to say; of an invention for "Improvements in Reaping and Mowing Machines," which is more particularly described in the specification, marked A, and two sheets of drawings, marked B and C respectively, which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Joseph Nicholson, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Joseph Nicholson, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Joseph Nicholson shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-fifth day of August, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Reaping and Mowing Machines.

A.

SPECIFICATION of JOSEPH NICHOLSON, of Melbourne, in the Colony of Victoria, Agricultural Implement Maker, for an invention intituled "Improvements in Reaping and Mowing Machines."

THIS invention consists of certain improvements in Reaping and Mowing Machines, which have for their object the lessening of the cost of manufacture, without interfering with the efficiency of such machines.

They refer mainly to the method of supporting the finger-bar. I propose to construct the finger-bar with only one bend in it, namely, where it rises from the level of the knife-bar towards the axle of the bearing-wheel; and in that part which does so rise, I propose to make a slot or a series of perforations one above the other, and large enough to receive the end of the axle of the bearing-wheel, which I propose should pass quite through it, and be fastened thereto by means of a nut screwed on to its end. The axle I propose to make of a piece of turned round iron, with a shoulder to keep it in position, and a screw thread on its inner end to receive the aforesaid nut.

I also propose to construct a bracket, with the upper portion thereof in the shape of a hollow oblong box, made of iron in one casting, through both sides of one end of which the axle is to pass, and against the inner side of which the shoulder on the axle is to rest. This bracket is to be cast with two sockets, one on each side, to receive the ends of the seat irons, and with a plane surface on which the pole is to rest, and to which it is to be attached by means of two screws, one at each end (a flange being cast on each side, to assist in keeping the pole in position). It is also to be made with flanges on the inner side, to receive the end of the finger-bar. It is also to be so made as to receive the gearing for imparting motion to the knife-bar.

Referring to the drawings hereto attached, where the nature of the figures are marked, and in which the same letters indicate the same parts wherever they occur, it will be found that the finger-bar is marked A; flanges to receive same, A¹; the axle, B; shoulder thereon, B¹; and screw-thread, B²; nut, C; bracket, D; flanges thereon, D¹; socket for driver's seat-iron, E; socket for raker's seat-iron, F; screws to connect pole to bracket, G; holes to receive such screws, G¹; H, toothed wheel for working on inner periphery of bearing wheel; eccentric for driving knife-bar, I; disconnecting gear for same, J; flap for oil cups, K; circular shield on outer side of bracket to prevent entrance of dust, L; shoulders cast on bracket, M.

Having thus described the nature of my invention, and the manner of performing same, I would have it understood that I do not confine myself to the precise details herein set forth and described, so long as the nature of my invention be retained, but I claim—

- 1st.—The method of supporting the finger-bar A by suspending it from one end of the axle B, and preserving it there by means of nut C and flanges A¹, substantially as herein described and explained.
- 2nd.—The construction of the upper portion of the bracket D in the form of a hollow oblong box.
- 3rd.—The construction of the bracket D with a plane upper surface for the pole to rest upon, either with or without flanges D¹.
- 4th.—The construction of the bracket D with perforations for passage of axle, one being smaller than the other, so as to form a resistance to the shoulder B¹ on axle B, and with shield, L, for excluding the dust.
- 5th.—The construction of the bracket D with sockets, E and F, for the purposes stated.
- 6th.—The construction of axle, B, with shoulder, B¹, and screw thread, B².

JOSEPH NICHOLSON.

This is the specification, marked A, referred to in the annexed Letters of Registration, granted to Joseph Nicholson, this twenty-fifth day of August, 1871.

BELMORE.

REPORT.

Sydney, 2 August, 1871.

SIR,

Having examined Mr. Joseph Nicholson's specification and plans for "Improvements in Reaping and Mowing Machines," transmitted for our report, under your B.C. communication of the 28th July,—we do ourselves the honor to recommend that Letters of Registration be granted to Mr. Nicholson, in accordance with his Petition and claim.

IMPROVEMENTS IN MACHINERY FOR BREAKING AND CUBING STONE.

LETTERS OF REGISTRATION to Jonas Brown Rider, for Improvements in Machinery for breaking and cubing Stone.

[Registered on the 15th day of September, 1871, in pursuance of the Act 16 Vic.; No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS JONAS BROWN RIDER, of Melbourne, in the Colony of Victoria, engineer, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in Machinery for breaking and cubing Stone," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four; and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Jonas Brown Rider, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Jonas Brown Rider, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Jonas Brown Rider shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this fifteenth day of September, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Machinery for breaking and cubing Stone.

SPECIFICATION of JONAS BROWN RIDER, of Melbourne, in the Colony of Victoria, Engineer, for an invention intitled "Improvements in Machinery for breaking and cubing Stone."

THIS invention consists of certain improvements in machinery for breaking and cubing stone, and has for its main object the preparation of road metal in a cubical form.

According to my invention, an oscillatory or vibratory motion is imparted to the upper part of a vertical lever or hammer, by means of a cam. This lever is situated in the centre of the machine, and is connected to the cam shaft by means of a pair of bushes working in a slot in such lever, the lower end thereof being supported by a pin or spindle proceeding from or supported by the side of the casing of the machine. On each side of this lever or hammer a jaw is attached, the lower portion of which has a flange which fits into a corresponding groove made for the purpose in the side of the lever, which projects at this point so as to permit of such groove being made, and also so as to support the jaw. The upper portion of each of these jaws is kept in position by means of an iron band passing around a lug at the top and binding them to the lever, so that by loosening this band, the jaws can be lifted out and fresh ones substituted for them with the greatest facility.

Opposite to each of these (movable) jaws is a fixed jaw, firmly attached to and supported by each end of the casing, and having lugs or flanges proceeding from each side of their upper ends, with slots cut in them, so as to permit of their being fastened by wedges to each side of the casing. The gauge of the stone to be broken is adjusted by the insertion of packing or lining between these jaws and the casing.

One marked peculiarity of my invention is the peculiar construction of the face of the jaws, which consists of a series of recesses, each made (by preference) in the shape of an inverted pyramid, so that the projecting and consequently acting surface of the face of each jaw consists of a series of transverse lines or ridges made at right angles to each other, and forming the base of the series of inverted pyramids just referred to. These lines or ridges are so arranged as that those on the movable jaws do not work opposite those on the fixed ones, but between them.

In order, however, that my invention may be more clearly understood, I will proceed to refer to the drawings hereto annexed, where the same letters indicates the same parts wherever they occur. Figure 1 represents a side elevation of my improved machine for breaking and cubing stone, whilst figure 2 shows a top view; figure 3, an end view, and figure 8, a side sectional elevation of same. Figures 4 and 5 are plans of the face of each set of jaws, and figures 6 and 7 are side elevations of the same. A is the casing of the machine; B, the driving shaft; CC, the fly-wheels, and DD are fast and loose pulleys. E is the vertical lever or hammer, supported by spindle F, and operated by cam G, to the shaft of which it is attached by a pair of bushes, H, working in slot I. JJ are the movable jaws, having flanges at the bottom, fitting into grooves, K, and lugs at the top, marked L, bound to the lever by means of iron band, M. NN are the fixed jaws, and OO the lugs or flanges at the top. The inverted pyramidal-shaped recesses are clearly shown in figures 4 and 5.

The working faces of the jaws I prefer to make of Bessemer steel; and the brasses are adjusted by means of a nut acting on the smaller end of a wedge upon which a screw-thread is cut.

The stone to be treated is to be fed into one or other of the spaces between the jaws, when it will be broken in a more or less cubical form by means of the projecting ridges. Of course other jaws might be substituted for them, if so preferred, and the method of operating them still retained. In the event of the stone to be operated upon being in large blocks, I should prefer to place two machines together, one above the other, so that the upper one could be used for breaking down the stone, and the lower one for cubing and finishing it.

The construction of jaws, with the working face removable, is obviously applicable to any other arrangement of machinery for the same purpose.

Having thus described the nature of my invention, and the manner of performing it, I would have it understood that I do not confine myself to the precise details herein set forth and illustrated by my drawings, so long as the nature of my said invention be retained, but I claim—

- 1st.—The use in stone-breaking or cubing machines of a movable jaw or jaws, operated by the direct action of a cam, substantially as herein described and explained.
- 2nd.—The use of jaws, in stone-breaking or cubing machines, having a removable face.
- 3rd.—The use of removable jaws in stone-breaking or cubing machines, when such jaws receive motion by a direct cam action, substantially as herein described, and illustrated in figure 1 of the drawings hereto attached.
- 4th.—The construction of stone-breaking or cubing machines in which both the movable and fixed jaws have horizontal as well as vertical corrugations or ridges therein, and recesses between such ridges, substantially as herein described and explained, and illustrated in figures 4, 5, 6, and 7 of the drawings hereto attached.

This is the specification referred to in the annexed Letters of Registration granted to Jonas Brown Rider, this fifteenth day of September, 1871. BELMORE.

REPORT.

SIR,

Sydney, 24 August, 1871.

We do ourselves the honor to return the documents transmitted under your B.C. communication of the 11th instant, and to report that, having examined Mr. Jonas Brown Rider's plans and specification for "Improvements in Machinery for breaking and cubing Stone," we recommend that Letters of Registration be granted, in accordance with his Petition, specification, drawings, and claim.

We have, &c.,

GOTHER K. MANN.
A. O. MORIARTY.

IMPROVED PROCESS FOR CLEANING WOOL, WOOLLENS, &c.

LETTERS OF REGISTRATION to Paul Toepler, for an improved process for cleaning all kinds of Wool, Woollen-yarn, Woollen-waste, Cotton-yarn, Cotton-waste, and such-like fibrous materials, &c., &c.

[Registered on the 26th day of September, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS PAUL TOEPLER, of Gracechurch-street, in the city of London, England, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "an improved process for cleaning all kinds of Wool, Woollen-yarn, Woollen-waste, Cotton-yarn, Cotton-waste, and such-like fibrous materials, and in separating the grease therefrom, and in the mode of treating the products resulting from such process to fit them for manufacturing purposes," which is more particularly described in the specification which is hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Paul Toepler, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Paul Toepler, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Paul Toepler shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-sixth day of September, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improved Process for cleaning Wool, Woollens, &c.

SPECIFICATION of PAUL TOEPLER, of Gracechurch-street, in the city of London, England, for an invention entitled "An improved process for cleaning all kinds of Wool, Woollen-yarn, Woollen-waste, Cotton-yarn, Cotton-waste, and such like fibrous materials, and in separating the grease therefrom, and in the mode of treating the products resulting from such said process to fit them for manufacturing purposes."

THIS invention is designed for cleaning animal and vegetable fibres, and freeing them from grease by a cold process, as follows:—The fibre intended to be cleaned is placed in a bath or vessel containing cold *amyl alcohol* and is left therein until the desired quantity of grease is separated or extracted from the fibre by the chemical action of the *amyl alcohol* thereon. The chemical compound or product thus formed by the *amyl alcohol* combining with the grease contained in or mixed with the fibrous materials, I propose to place in a still of the ordinary kind, and operate thereon with heat, by which I distil or bring over the *amyl alcohol* and separate it from the grease, and by these means am enabled to again use the *amyl alcohol*, and thus effect economy in the cost of the process.

The grease that remains in the bottom of the still contains a large percentage of stearine, well adapted for the manufacture of candles, and the residue from the grease may be employed for lubricating and other purposes.

Having now described the nature and object of my said invention for "An improved process for cleaning all kinds of wool, woollen-yarn, woollen-waste, cotton-yarn, cotton-waste, and such like fibrous materials, and in separating the grease therefrom, and in the mode of treating the products resulting from such said process to fit them for manufacturing purposes," together with the means by which it may be effected, I would remark that what I claim as my invention and desire to secure by Letters of Registration is, operating upon animal and vegetable fibres for cleaning them and separating the grease therefrom with cold *amyl alcohol*, and afterwards distilling the *alcohol* to separate it from the grease extracted from the fibrous materials, substantially as above described.

In witness whereof, I, the said Paul Toepler, have hereunto set my hand and seal, this eighteenth day of May, in the year of our Lord one thousand eight hundred and seventy-one.

PAUL TOEPLER.

Witnesses,—

W. HAUBERG,
9, Winston-street, King's Cross Road, London.
A. BROWNE,
85, Gracechurch-street, London.

This is the specification referred to in the annexed Letters of Registration granted to Paul Toepler, this twenty-sixth day of September, 1871.

BELMORE.

REPORT.

Victoria Chambers,
7 September, 1871.

SIR,

We have the honor to return herewith the Petition of Mr. Paul Toepler for Letters of Registration for "An improved process for cleaning all kinds of wool, woollen-yarn, woollen-waste, cotton-yarn, cotton-waste, and such-like fibrous materials, and in separating the grease therefrom, and in the mode of treating the products resulting from such said process to fit them for manufacturing purposes," transmitted to us, with the accompanying specification (in duplicate), by your blank cover, under date 5th instant.

We now beg to state that, having perused the said Petition and specification, and considered the same, we see no objection to Letters of Registration being granted, as applied for in terms thereof.

We have, &c.,

CHAS. WATT.
A. O. MORIARTY.

IMPROVEMENTS IN CONSUMING SMOKE.

LETTERS OF REGISTRATION to Edmund William Wright and Alfred Watts, for Improvements in consuming Smoke.

[Registered on the 31st day of October, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS EDMUND WILLIAM WRIGHT and ALFRED WATTS, both of Adelaide, in the territory of South Australia, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of "an invention for improvements in consuming Smoke," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and have humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Edmund William Wright and Alfred Watts, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Edmund William Wright and Alfred Watts, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Edmund William Wright and Alfred Watts shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirtieth day of October, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

SPECIFICATION.

Improvements in consuming Smoke.

SPECIFICATION.

Invention for Improvements in consuming Smoke.

THE object of this invention is to economize fuel, prevent smoke, arrest the formation and the emission of cinders and sparks, and preserve the smoke boxes, fire doves, blast pipes, chimney and tubes of locomotive and other steam-engines, by means of an improved method of and apparatus for utilizing the waste and spare or live steam, waste and spare heat, and waste or spare momentum of locomotive and other steam-engines.

In the first place it may be desirable to define the meaning of some of the terms used in the title of this invention.

By "waste steam" is meant the steam which ordinarily rushes up the chimney of high-pressure engines after it leaves the cylinders, and which is generally used in locomotives as a means of causing a draught through the furnace, and also the steam which is blown through the safety-valves, or through the cylinder or other cocks.

By "spare steam" is to be understood that quantity of steam which can be usefully drawn from the boiler of an engine without interfering with the duty of the latter in a visible, marked, or injurious manner, or creating an extra consumption of fuel. For instance: when the steam-pressure gauge shows that there is more steam than is required, the overplus may be termed "spare steam."

By "waste heat" is signified the heat of the furnace, now wasted; and the heat of the steam, which is now carried off by the blast or chimney draught, and which serves no useful part in the working of the engine.

By "spare heat" is meant the heat of the spare steam above referred to.

By "waste momentum" and "spare momentum" is to be understood that force which (in railway locomotives) is exercised by the engine in overcoming atmospheric resistance, and which, if the atmospheric resistance were removed or nullified, would still be needlessly exercised by the engine, as in engines running down inclines with the steam shut off.

Although it is preferred to combine and utilize the agents above mentioned, namely, those termed "waste" and "spare" steam, yet conditions may exist in which "live steam" simply may be advantageously used with the apparatus which forms the subject of this invention; for example, in marine, or condensing, or certain stationary engines, and which is adapted for such purpose accordingly, as will be well understood; and it should also be mentioned that the several agents before referred to may obviously be used separately or in combination with each other, and we claim the right so to use them.

We shall now describe the nature of the apparatus employed to carry this invention into effect. A dozen or more tubes (the number being in accordance with the size of engine), constructed of suitable metal, and of nearly but not quite the diameter of ordinary boiler tubes, and about from (4) four inches to (4) four feet long, are ranged side by side in the first instance, and through each of these tubes is passed a length of smaller tube, also constructed of any suitable metal, such smaller tubes being longer than the exterior tubes just mentioned. These rows of tubes are securely let into and fastened to two or more chambers, formed of suitable metal, in such a way that the series of outer and larger tubes shall have one hollow cross-head chamber common to them, and that the series of smaller and internal tubes shall have a similar hollow cross-head chamber apportioned to them also. After the tubes are securely attached to the cross-heads, each series to its own cross-head chamber or chambers, both sets of tubes are bent, curved, widened, or adapted to any form of boiler, tube, plate, and mouths of tubes therein placed, the tubes being previously softened, and properly filled with lead or other suitable materials or rosin, in order to permit such operation, namely, the bending or adaptation thereof, as before mentioned, to be effected as well known and understood.

The larger cross-head (or air) chamber has one or more orifices capable of taking one or more air pipes, and the smaller cross-head (or steam) chamber has one or more orifices capable of taking one or more steam pipes.

The apparatus having been formed and bent as desired, the free ends of the concentric tubes are inserted tightly, either horizontally or vertically, or both horizontally and vertically, into one or as many of the boiler-tubes in the smoke box end of the boiler as may be found desirable.

Air pipes are arranged to lead through the smoke-box from the air orifices of the larger cross-head air chamber, either to the front or side or top of the engine, but preferably to the front, where they terminate in bell-mouthed or other orifices, capable of being reversed when the engine runs backward; or the air-pipe is placed so as to rise through the engine-chimney, as in a marine engine's chimney, and is so bent that, while receiving the "waste heat" of the furnace, the products of combustion in the furnace do not mingle with the free atmospheric air which this apparatus causes to rush into the fire-box.

From the steam orifice in the second smaller cross-head or steam chamber a steam-pipe or pipes leads or lead from the blast-pipe or boiler, or from both, as the case may be.

The operation of the apparatus in the case of railway locomotive engines is as follows:—As the engine moves on, its force presses against the air, a quantity of which air is naturally driven down or into the air-pipes. The exhaust-blast of the engine sends steam through the smaller cross-head chamber, and "induces" the air, already pressed into the larger cross-head air chamber, to rush through the row of boiler-tubes already occupied by the apparatus.

The steam thus sent in parts with its heat to the atmospheric air thus induced or forced, and both so united strike the fire, thus acting mechanically by the force of the steam, and chemically through the double decomposition which ensues; as, if the steam be chemically decomposed and hydrogen set free, the oxygen of the atmospheric air, induced, or drawn, or forced, by the union of the momentum of the engine and influence of the steam in a heated state, will supply the equivalent of oxygen required by the hydrogen thus set free. The steam acts mechanically in repressing the rush of cinders and sparks.

The apparatus may be made in "comb-lengths," and any quantity sawn off and fitted to any engine or tube-plate of a boiler with great facility and rapidity.

As above described, two faults are occasioned: steam is not so easily "got up," owing to the fact of cold air being readily drawn through the boiler by the air passages, which communicate from the fore part of the engine through the smoke-box, cross-head chamber, and so through the boiler tubes; again, while running into a station, and while steam is shut off, cold air rushes in through the boiler tubes by the same orifices,

Improvements in consuming Smoke.

orifices, and so rather cools down the boiler, besides being otherwise unsatisfactory. To obviate these disadvantages, hanging or other suitable valves are sometimes introduced into the air-pipes, the same being acted upon, firstly by the indraught of the steam and of the air, and secondly by a direct outside blast of steam, "waste" or "live," but preferable by waste steam.

When desired, additional chamber or chambers, of convenient size, is or are attached to or added to the air supply pipe or pipes, which lead from the outer air through the smoke-box into the air cross-head chamber; or such additional chamber or chambers may be fixed in the hollow air cross-head chamber itself. Such additional chamber or chambers is or are fitted or sufficiently supplied with carbonaceous, bituminous, or hydro-carbon materials, solid or liquid, or in a semi-solid or semi-liquid state, or in the form of powder, so that as the heated air rushes on or over the same, it carries the vapour or ignitable portion thereof into the furnace, thereby greatly increasing the heat afforded from the latter, where the heated air supplies the oxygen as just described. Also, when desired, one or more of such additional chambers may be filled with any substances capable of generating oxygen, and of imparting the same to the air which passes over.

It should be mentioned that sometimes wedge-shaped blocks of fireclay, or metal, or perforated plates or gratings of clay or metal, are inserted in the fire-box end of the boiler-tubes, occupied by the before-mentioned apparatus, for the purpose of further dividing the counter blast of mixed steam and air, or mixed steam and carbonaceous material, and causing the same to mingle better with the heated gases. The wedge-shaped blocks can be used as deflecting plates, and may be varied in shape.

It is obvious that this invention, with such modifications as will be well known to and understood by persons acquainted with the subject, is applicable not only to railway locomotive engines but also to other kinds of steam-engines.

The annexed drawing illustrates the general arrangement of the apparatus hereinbefore described, as being what we recommend as the best form of apparatus applicable to railway locomotive engines, although the principle of the invention may be applied in various ways with similar results.

Having thus described the particulars and nature of our said invention, we wish to be understood that we do not confine ourselves to any particular form of apparatus for carrying out our invention, but what we do claim is, the introduction of atmospheric air, steam, and carbonaceous material, either separately or conjointly, into furnaces or fire-boxes, by means of pipes, tubes, or other channels passing into such furnaces or fire-boxes and projected on, into, or, under the fuel, so as to prevent the formation of smoke, and thus obtain a complete utilization of the fuel so used, and thereby its perfect combustion.

EDMUND W. WRIGHT (usual signature).
EDMUND WILLIAM WRIGHT (full name).
ALFRED WATTS.

Adelaide, 8 August, 1871.

This is the specification referred to in the annexed Letters of Registration granted to Edmund William Wright and Alfred Watts, this thirtieth day of October, 1871.

EXTRACTION OF GOLD AND SILVER FROM QUARTZ-TAILINGS AND OTHER WASTE.

LETTERS OF REGISTRATION to Frederick Arthur Willson and James Hartwell Williams, for an Improved Process for the extraction of Gold and Silver from Quartz-tailings and other waste.

[Registered on the 31st day of October, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS FREDERICK ARTHUR WILLSON AND JAMES HARTWELL WILLIAMS both of Sydney, in the Colony of New South Wales, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of an invention of a process having for its object the extraction of Gold and Silver from Quartz-tailings and other waste, which is more particularly described in the specification, marked A, and the papers of drawings, marked B and C respectively, all of which are hereunto annexed ; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and have humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years : And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Frederick Arthur Willson and James Hartwell Williams, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof ; to have, hold, and exercise unto the said Frederick Arthur Willson and James Hartwell Williams, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended : Provided always, that if the said Frederick Arthur Willson and James Hartwell Williams shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court, at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirtieth day of October, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Extraction of Gold and Silver from Quartz-tailings and other waste.

A.

SPECIFICATION of an Invention of an improved method of separating Gold and Silver from Quartz and other waste.

This invention has for its object the extraction of Gold and Silver from Quartz and other waste, by grinding or triturating it in iron, or wooden barrels lined with iron, caused to rotate with iron discs, in the presence of water, salt, caustic soda, and quicksilver, or some of them. The *modus operandi* is as follows:—Take the quartz or other waste, after it has been reduced to a certain degree of fineness by stamping or other means, and then employ an amalgamating barrel—those ordinarily in use answer well—and cause it to rotate by steam or other power. Introduce a number of discs of iron or other metal, of the description delineated in the drawing annexed; the best proportion of discs being twice the weight of the charge of tailings. Then introduce into the barrel a quantity of water, sufficient to thoroughly wet the tailings, but not to flood them, also chloride of sodium (common salt), in the proportion of from 1 to 2 per cent., and hydrate of sodium (caustic soda), in the proportion of from $\frac{1}{2}$ to 1 per cent., and quicksilver about $\frac{1}{4}$ per cent. or less, according as the tailings themselves are estimated to contain that metal or not. The barrel being closed, is caused to rotate for from about two to four hours. The discs rub against and slide over each other, reducing the quartz to such fineness as may be required, and preparing the gold for amalgamation. Then discharge the contents of the barrel into iron or wooden amalgamating pans or tubs, in which four or more iron or wooden arms are made to revolve, under iron or wooden projections, as delineated in the drawing, over a surface of quicksilver, sodiumized with amalgams A, B, and C, or some of them; and in this manner the particles of gold, previously prepared for amalgamation in the barrel, are brought into contact with the quicksilver in the pans or tubs, which takes them up. Two or more amalgamating tubs or pans may be necessary, according as their size may be large or small, or the charge great or small, but each should be sufficiently large to contain the charge of tailings originally placed in the barrel, with the water required to flush it out. The quartz or waste, after being washed in each tub or pan successively, for the time taken to reduce the tailings in the barrel, is then passed into a sluice-box, and from thence into a receiver, both of which are struck alternately by a beater moved by machinery, and the percussion thus produced causes the deposition of any particles of gold or amalgam which may have escaped amalgamation in the tubs or pans. The quicksilver used is then retorted and the gold recovered. Water is essential in all the operations. The discs to be used are best when of the size delineated, but may be of any size, provided a vertical section through them when lying flat shows a cone at each end with either straight or rounded sides, resembling those delineated in figure No. 2. In this improvement upon all previous processes and machinery for extracting gold and silver from quartz and other waste, we claim the reduction of the ore, and the sulphates it contains, in the presence of chloride of sodium and the hydrate of sodium, by means of the iron discs, of the form shown in the accompanying drawings; in which operation we believe the sulphur present in the sulphates enters into new combinations with the sodium of these chemicals, becoming sulphate of soda; while the chlorine of salt, under the heat and electricity generated by the friction of the iron discs among themselves, and against the side of the barrel, prepares any free or amalgamated gold the tailings may contain for final amalgamation in the amalgamating pans. We claim also the machinery shown in the drawings, and also the method for retrieving the gold contained in the tailings when discharged from the barrel, by washing them over a still and unbroken surface of quicksilver to which a magnetic influence has been imparted, by dissolving therein small quantities (the quantity can be determined by experiment only) of the amalgams of sodium. We further claim the machinery for obtaining by a percussion motion, as distinguished from a shaking motion, the deposition in the sluice-box and final receiver of whatever gold or amalgam of gold which may have escaped the action of the tubs or pans.

FREDERICK A. WILLSON.
J. H. WILLIAMS.

This is the specification, marked A, referred to in the annexed Letters of Registration, granted to Frederick Arthur Willson and James Hartwell Williams, this thirtieth day of October, 1871.

A.D. 1871, 30th October. No. 289.

**NEW METHOD OF INDICATING THE WEIGHT OF THE CONTENTS OF
ANY VESSEL AFLOAT.**

LETTERS OF REGISTRATION to Stephen Roff, William Brooks Hoffman, and Joseph Lukey, for a new method of indicating the weight of the contents of any vessel afloat.

[Registered on the 31st day of October, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS STEPHEN ROFF, WILLIAM BROOKS HOFFMAN, and JOSEPH LUKEY, all of Melbourne, in the Colony of Victoria, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of an invention intituled "a new method of indicating the weight of the contents of any vessel afloat," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and have humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Stephen Roff, William Brooks Hoffman, and Joseph Lukey, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Stephen Roff, William Brooks Hoffman, and Joseph Lukey, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Stephen Roff, William Brooks Hoffman, and Joseph Lukey, shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirtieth day of October, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

New method of indicating the weight of the contents of any vessel afloat.

SPECIFICATION of STEPHEN ROFF, WILLIAM BROOKS HOFFMAN, and JOSEPH LUKEY, all of Melbourne, in the Colony of Victoria, for an invention intituled "a new method of indicating the weight of the contents of any vessel afloat."

THIS invention has been designed for the purpose of indicating the weight of the contents of any vessel afloat, whether such contents be solid or fluid; so that, independently of its value for registering the weight of any cargo received or discharged, it will also indicate any increase in the weight of the contents of any vessel which may arise from leakage, its power of registering not being affected by the rolling or tossing of the ship when at sea.

This invention consists of the use and application of a column of water inside a vessel afloat, produced hydrostatically by the pressure of the water outside, for the purpose of indicating the weight of the contents of such vessel. Now, as the height of such column will vary with the extent to which such vessel is sunk in the water, and as the extent to which such vessel is sunk in the water will depend upon the weight of its contents, it follows that the weight of its contents will be indicated by the height of the column of water. When the weight is increased the column of water will rise, and *vice versa*; but inasmuch as the weight would in actual practice be generally placed on the vessel unevenly, it becomes necessary that this column should take its rise from the centre of gravity in the vessel, or as near thereto as practicable. And further—inasmuch as very large quantities of cargo can be placed on some vessels without sinking them in the water to any very appreciable extent, it becomes advisable, if not necessary, to multiply the motion of the water in such column, so that its slightest movement may be perceptibly indicated. This may possibly be done in many ways, but at all events we are quite certain it can be done by means of a float resting on the top of such column of water, and having a cord or chain proceeding from it and passing over a barrel, and kept taut by a weight suspended from its other extremity. The motion of this barrel can of course be multiplied in the ordinary way.

Now as the extent to which a given weight will sink different vessels in the water is variable, it becomes evident that this apparatus must be adjusted to each separate vessel, or rather that the dial on which the weight is indicated must be marked off differently.

In order, however, that this invention may be distinctly understood, we will proceed to describe it more fully, and to illustrate it by the drawing hereto attached.

Supposing, then, that we were about to attach this invention to a vessel, we should first ascertain its centre of gravity, and then make a hole as near thereto as practicable, of about one quarter of an inch in diameter, quite through the hull, and having temporarily corked it up we should proceed to erect a pipe of (say) three inches in diameter, and of such a length as to permit of the water rising in it to the utmost point it could possibly attain without the ship foundering, or of any less length that might be thought sufficient, and to the top of this pipe we should attach in any convenient way two small vertical tubes of any length, and supporting a dial at their extremity. Inside this pipe we should place a spherical vertical copper float of about two and three quarter inches in diameter, loaded with a little mercury.

Above the top of these tubes we should fix a barrel for supporting a silver chain, one end of which we should pass down one of the tubes and attach to the spherical float, whilst the other end we should pass down the other tube and attach to a counterbalance weight sufficiently heavy to cause the barrel to register the slightest motion of the float, and the weight of which we should regulate by that of the float. We should provide suitable bearings for the spindle of this barrel, to work in to one end of which (spindle) we should attach an indicator like that of a steam-gauge, although if the motion were too rapid or too slow we should regulate it by toothed wheels, as is well understood, and if preferred we could have two or more hands to indicate different denominators, such as tons, hundredweights, and pounds, or tons, tens of tons, and hundred of tons, in the same way as the hands of a watch are made to indicate hours, seconds, and minutes, or the indicators of a gas meter to mark the hundreds, thousands, and tens of thousands.

In adjusting this apparatus to any particular vessel, we should require some data to enable us to mark off the dial correctly. To obtain this we should proceed in one of two ways. We should either measure the ship and calculate the weight of water displaced by (say) every inch that she sunk in the water, and mark the dial accordingly; or (and by preference) we should place a sufficient weight on board to make a perceptible motion of the indicator (or one of them), and then taking it as the key or standard, should proceed to mark off the dial or dials accordingly—that is to say, if there were only one indicator and one dial, and by placing one ton on board the indicator moved half an inch, we should proceed to divide off the dial into half-inch spaces, each of which would indicate a ton, and so on if there were more than one indicator or dial.

We do not think that as a rule it will be required that the apparatus should indicate the weight of the vessel or its contents before such apparatus is attached to it, although we think it might be done by careful calculations of the displacement of the water as stated above. We desire to have the vessel in that condition when she is "down to her bearings," as it is technically termed; that is an empty vessel fully equipped.

In speaking of the hole in the bottom of the vessel, we have said that it should be about a quarter of an inch in diameter; but so long as it is sufficiently large to admit of the free entrance of the water, it does not matter (so far as regards the working of our apparatus) what size it is; and it would also work by making two holes at equal distances on each side of the centre of gravity, always preserving the column of water in the centre of gravity, or as near thereto as possible; and it would also work by making the hole in or about the centre of gravity, and conducting the water to a vertical pipe in any convenient part of the vessel, say, for instance, to the captain's cabin. And in the event of the hole being made in a wooden ship, we should place a pipe in it to prevent its closing. So long as the pipe above this hole is sufficiently large for the float to work in, it does not matter what size it is. And it is immaterial what is the weight of the float or its counterbalancing weight, if it is heavy enough to impart motion to the barrel. The pipe may be a common gas pipe with its flanges bolted or screwed to the bottom, and the tubes and float we should prefer to be of copper, and the chain of silver, simply because that material is less susceptible to the action of sea air or water than other metals.

Referring

New method of indicating the weight of the contents of any vessel afloat.

Referring to the drawing hereto attached, which illustrates the simplest form of this apparatus, it will be found that A is the hole in the hull, B the pipe erected above it for containing the column of water, C the tubes, D the dial, E the copper float, F the barrel above it, G the silver chain, H the weight.

Having thus described the nature of this invention and the manner of performing same, we would have it understood that we do not confine ourselves to the particular apparatus we have hereinbefore described and shown in the drawings hereto attached, nor to the shape or materials of which the several parts of such apparatus may be constructed, so long as the nature of the said invention be retained, but we claim—

- 1st.—The use and application of a column of water inside a vessel afloat, produced hydrostatically by the pressure of the water outside such vessel, for the purpose of indicating the weight of the contents of such vessel.
- 2nd.—The use of a float resting on such column of water, and acting as the medium of communicating motion to any suitable apparatus for the purposes substantially as herein described and explained.
- 3rd.—The particular apparatus for this purpose herein described and illustrated by the drawing hereto attached.

In witness whereof, we, the said Stephen Roff, William Brooks Hoffman, and Joseph Lukey, have hereto set our hands and seals this day of one thousand eight hundred and seventy-one.

This is the specification referred to in the annexed Letters of Registration granted to Stephen Roff, William Brooks Hoffman, and Joseph Lukey, this thirtieth day of October, 1871.

REPORT.

Sydney, 12 September, 1871.

SIR,

We do ourselves the honor to return to you the documents transmitted under your B.C. 7th instant, relative to Messrs. Roff, Hoffman, and Lukey's invention of a new machine for indicating the weight of the contents of any vessel afloat, and to report that, having examined the description and drawing, we recommend that Letters of Registration be granted in favour of Messrs. Roff, Hoffman, and Lukey, in accordance with Petition, specification, drawing, and claim.

We have, &c.,
GOTHEK K. MANN.
E. C. CRACKNELL.

**IMPROVED MODE OF TREATING WOOD AND OTHER VEGETABLE SUBSTANCES
FOR THE PREPARATION OF PULP SUITABLE FOR MAKING PAPER.**

LETTERS OF REGISTRATION to Vincent Elijah Keegan, for an improved mode of treating Wood and other vegetable substances for the preparation of Pulp suitable for making Paper.

[Registered on the 8th day of November, 1871, in pursuance of Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS VINCENT ELIJAH KEEGAN, of Boston, in the State of Massachusetts, United States of America, Doctor of Medicine, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention of "an improved mode of treating Wood and other vegetable substances for the preparation of Pulp suitable for making Paper," which is more particularly described in the specification which is hereunto annexed; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Vincent Elijah Keegan, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention and improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Vincent Elijah Keegan, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Vincent Elijah Keegan shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this sixth day of November, in the year of our Lord one thousand eight hundred and seventy-one.

BELMORE.

Improved Mode of treating Wood and other Vegetable Substances

SPECIFICATION.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, VINCENT ELIJAH KEEGAN, M.D., of Boston, in the State of Massachusetts, United States of America, send greeting :

WHEREAS I am desirous of obtaining Letters of Registration under the sign manual and seal of the Colony of New South Wales, for the exclusive enjoyment and advantage, for a period of fourteen years, of an invention for "an improved mode of treating Wood and other vegetable substances for the preparation of Pulp suitable for making Paper," of which I am the first and true inventor, now know ye, that the nature of the said invention, and the manner in which the same is to be performed, is particularly described and ascertained in and by the following statement, that is to say:—

My invention consists in saturating the wood or other vegetable substance intended to be converted into paper pulp with an alkaline or acid solution, and, after drawing off the surplus solution, subjecting the wood or other vegetable substance to a high degree of heat, whereby the proximates of the wood, plant, or other substances adhering to the fibres, and by which the fibres are agglutinated or bound together, are thoroughly decomposed or reduced, so that by washing they can be readily and effectually separated from, and without injury to the fibres.

I will now describe the mode of working my process which I prefer. I take by preference any of the soft woods, such as spruce or pine, which have been sawn into thin strips of about half an inch in thickness, and cross-cut them into lengths of from six to twelve inches, for the convenience of getting them into a suitable vessel. Larger or smaller pieces can be used, but the smaller the pieces the quicker the process can be worked. It will be found best to reduce the pieces to about an equal size.

The pieces or chips of wood to be treated are charged into a suitable vessel through a manhole. I prefer to use for this purpose a cylindrical vessel on a horizontal shaft, so that it can be rotated slowly during the working of the process.

I prepare in a suitable vat a solution of caustic soda of about 2⁰⁵ gravity, and by a suitable pipe run it into the cylinder containing the wood to be treated; and the manhole having been well and carefully closed and secured, I apply, by means of a hydraulic pump, a heavy pressure to the liquor, to force it completely and thoroughly into the pores of the wood. I have found a pressure of fifty pounds to the square inch, applied for about thirty minutes, when the pieces of wood are about half an inch thick, to be sufficient; but I do not wish to be understood as limiting myself to the degree or duration of pressure, nor to the gravity or strength of the solution, as these may be varied. I have found the solution at 23 Beaumé to answer a good purpose.

After the chips have been thoroughly saturated, the liquor which has not been forced into the pores of the wood is then drawn from the vessel and pumped back into the vat, for use in other charges, as it is not reduced in strength by the operation of saturating the wood; and the wood so saturated with the alkaline solution is then to be subjected to a high degree of heat, which I prefer to apply in the following way:—

The cylinder in which the wood is saturated with the alkaline solution is formed with an outer jacket, so as to leave a steam-tight chamber all around and at the ends (such vessels are well known in the arts), and this chamber is then supplied with a superheated steam to heat the saturated wood to a temperature of about 300 Fahrenheit for about two hours, at the end of which time all the proximates will have been dissolved or reduced, so that they can be separated by washing in water, which can be done in any suitable vessel with an agitator.

The washing is to be continued until the water comes off clean, after which the fibres will be found to be in a suitable condition to be worked into half-stuff, and then into pulp suitable for the manufacture of paper in the engines such as are usually employed for that purpose, and this can be done without or after bleaching, according to the quality or colour of the paper desired to be produced.

Instead of saturating the wood with the alkaline solution by pressure applied to force the solution into the pores, it can be done by boiling the wood in the alkaline solution for about thirty minutes, and then, after drawing off the solution, subjecting the saturated wood to the heating process as above described.

I have discovered that, after the wood has been well saturated with the alkaline solution, the pores not only contain the quantity of the solution required for dissolving the proximates, but that the chemical agent required to dissolve the proximates is thus brought into proximate if not immediate contact with the substances to be dissolved, or put into the required condition for being effectually separated from the fibres by the action of the heat afterwards applied; and that the action is not only much more rapid, but more effectual than when the wood or other vegetable substance is immersed in the alkaline solution, while, at the same time, the quantity of alkali required is much less than by any other process.

The small quantity of alkali present, and the short space of time required to dissolve the proximates, by reason of the presence of the chemical agent within the pores of the wood, enables me to obtain the required result without reducing the strength of the fibres.

And although I have above named caustic soda, I have done so because I have found that to be the best, but other bases of an alkaline or acid nature will answer the purpose under the mode of treatment above described, as the object is to introduce into the pores of the wood the chemical agent which is to dissolve or separate the proximates from the fibre, and then applying heat to effect the chemical change without the presence of a surrounding liquid.

And although I have named wood as the substance to be treated, it will be obvious that any other fibrous vegetable substances can be treated in like manner by the said process.

CLAIM.

What I claim as my invention, and desire to secure by Letters Patent, is the above process of treating wood and other fibrous vegetable substances, by saturating the wood or other vegetable substances with

A.D. 1871. No. 291.

77

for the preparation of Pulp suitable for making Paper.

with an alkali or acid, and, while so saturated, subjecting it to a high degree of heat, substantially as and for the purpose set forth.

In witness whereof, I, the said Vincent Elijah Keegan, have hereunto set my hand and seal, the sixth day of July, in the year of our Lord one thousand eight hundred and seventy-one.

VINCENT ELIJAH KEEGAN, M.D.

Witness—

A. M. SHURTLEFF, Boston, Mass.

This is the specification referred to in the annexed Letters of Registration granted to Vincent Elijah Keegan, this sixth day of November, 1871.

IMPROVEMENTS IN WASHING, SCOURING, OR CLEANSING CLOTHES, &c.

LETTERS OF REGISTRATION to Matilda Lang, for Improvements in Washing Scouring, or Cleansing Clothes, Wool, or Fibrous Manufactured Goods.

[Registered on the 6th day of December, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting:

WHEREAS MATILDA LANG, of Melbourne, in the Colony of Victoria, hath by her Petition humbly represented to me that she is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in Washing, Scouring, or Cleansing Clothes, Wool, or Fibrous Manufactured Goods," which is more particularly described in the specification which is hereunto annexed; and that she, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to her for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Matilda Lang, her executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Matilda Lang, her executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Matilda Lang shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this sixth day of December, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in Washing, Scouring, or Cleansing Clothes, &c.

SPECIFICATION of MATILDA LANG, of Melbourne, in the Colony of Victoria, for an invention intituled "Improvements in Washing, Scouring, or Cleansing Clothes, Wool, or Fibrous Manufactured Goods."

THIS invention consists of certain improvements in washing, scouring, or cleansing clothes, wool, or fibrous manufactured goods, for the purpose of reducing the cost of labour and materials employed therein, without injuring the articles treated.

I construct a table, the surface of which is roughened by corrugations or otherwise, and around which are sides elevated a convenient height above the surface thereof, so as to give it the appearance of a tray or trough. I also construct a manipulator, which has the under surface roughened by corrugations or otherwise, and on the upper surface thereof are convenient handles for moving it backwards and forwards by the hands; and in the event of any other motive power being employed, it could be easily attached to any suitable mechanical arrangement for the purpose.

The way in which I proceed to use this table and manipulator is as follows:—I first of all wet the articles to be washed with a solution of soap or alkali, and fold them up in convenient spherical or cylindrical parcels (by preference cylindrical). When they will not preserve this form, I place them in bags made in the required shape. I then place these parcels, one or more at a time, as may be convenient, upon the surface of the table. I also pour upon the surface of the table a convenient quantity of a solution of soap or alkali, which is retained on the table by the sides thereof. I then apply the roughened surface of the manipulator in such a way and with such an amount of pressure as that when I move it backwards or forwards it causes the spherical or cylindrical parcels to roll backwards or forwards with it, and it is during this operation that the dirt or grease, or matter to be removed or scoured away, becomes loosened or separated from the fabric or substance to be cleaned to such an extent or in such a way that it can thereafter be removed by rinsing the articles treated in water.

Having thus described the nature of my invention and the manner of performing it, I would have it understood that I do not claim the use of soapy or alkaline solutions or corrugated surfaces for washing clothes or wool or fibrous manufactured goods; and I desire it to be also distinctly understood that although I have stated what I believe to be the best means for putting my process into operation, I do not confine myself to those means, but I claim—

- 1st.—The impartation of a rolling motion to clothes, wool, or fibrous manufactured goods, when made up into parcels of a spherical or cylindrical or approximately spherical or cylindrical shape, in the manner and for the purposes substantially as herein described and explained.
- 2nd.—The use of a table (or tray) and a manipulator, with roughened or corrugated acting surfaces, for the purposes herein described and explained.

This is the specification referred to in the annexed Letters of Registration granted to Matilda Lang, this sixth day of December, 1871.

BELMORE.

REPORT.

Sydney, 3 November, 1871.

SIR,

In returning to you the documents transmitted under your B.C. of the 26th ultimo,—we do ourselves the honor to report that having examined the description of "Improvements in Washing, Scouring, or Cleansing Clothes, Wool, or Fibrous Manufactured Goods," accompanying Matilda Lang's Petition, we recommend that Letters of Registration be granted, in terms of her Petition, specification, and claim.

We have, &c.,

IMPROVEMENTS IN DEODORIZING SEWAGE, &c.

LETTERS OF REGISTRATION to Christopher Rawson, Philip Ovenden, James Wylde, William M'Cree, and Henry Hill, for Improvements in deodorizing Sewage, &c.

[Registered on the 16th December, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS CHRISTOPHER RAWSON, of number one Saint Swithin's Lane, in the city of London, General Manager of the Native Guano Company, PHILIP OVENDEN, of number seventeen, Lyndhurst Road, in the county of Surrey, Engineer, JAMES WYLDE, of Leamington, in the county of Warwick consulting chemist, WILLIAM M'CREE, of number two Russell Road, Leyton, in the county of Essex, analytical chemist and engineer, and HENRY HILL, of Hastings, in the county of Sussex, analytical chemist, all in the Kingdom of England, have by their Petition humbly represented to me that they are the authors or designers of a certain invention or improvement in manufactures, that is to say, of an invention for "Improvements in deodorizing and purifying Sewage, Urine, and refuse matters and liquids, and in making Manure therefrom, and in Apparatus for these purposes," which is more particularly described in the specification and sheet of drawings which are hereunto annexed; and that they, the said Petitioners, have deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and have humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to them for a period of fourteen years: And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Christopher Rawson, Philip Ovenden, James Wylde, William M'Cree, and Henry Hill, their executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof; to have, hold, and exercise unto the said Christopher Rawson, Philip Ovenden, James Wylde, William M'Cree, and Henry Hill, their executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended: Provided always, that if the said Christopher Rawson, Philip Ovenden, James Wylde, William M'Cree, and Henry Hill, shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirteenth day of December, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Improvements in deodorizing Sewage, &c.

SPECIFICATION of CHRISTOPHER RAWSON, of No. 1 St. Swithin's Lane, in the city of London, General Manager of the Native Guano Company, PHILIP OVENDEN, of No. 17 Lyndhurst Road, in the county of Surrey, engineer, JAMES WYLDE, of Leamington, in the county of Warwick, consulting chemist, WILLIAM M'CREE, of 2, Russell Road, Leyton, in the county of Essex, analytical chemist and engineer, and HENRY HILL, of Hastings, in the county of Sussex, analytical chemist, all in the Kingdom of England, for improvements in deodorizing and purifying Sewage, Urine, and refuse matters and liquids, and in making Manure therefrom, and in Apparatus for those purposes.

OUR invention in part relates to a process described in the specification of Letters Patent granted to George William Wigner, for the Colony of New South Wales, and bearing date the thirteenth day of April, one thousand eight hundred and seventy-one, No. 268, which Patent has been assigned to, and is now being worked by the Native Guano Company (Limited). According to that process, alum, blood, clay, manganate of potash, or other compounds of manganese, and other substances named in the aforesaid specification, were to be mixed together and added to the sewage, for the purpose of deodorizing and purifying it; and the mixture of sewage and the substances so added thereto was allowed to flow into tanks, in which the greater part of the organic and other impurities was precipitated. The mud or sediment thus formed was removed from the tanks and dried, for the purpose of making it into manure. When the said mud was partially dry, acid (by preference sulphuric acid) was added to it, to prevent loss of ammonia. The process above described is commonly known in England as the "A B C process."

Our invention consists of an improved mode of using the substances, or some of them (*inter alia*), mentioned in the specification hereinbefore referred to, in order that such substances may (by the separate use of such of them as have the property of neutralizing acids) act with greater or more beneficial effect than heretofore in the use of albuminous, albuminoid, and gelatinoid substances, in addition to the aforesaid substances, in aiding the precipitation of the impurities contained in the sewage, by means of an electric current generated by voltaic, electro-magnetic, or magneto-electric action, of a mode of destroying wholly or partially the offensive gases given off during the acidification or other chemical treatment, and drying of the mud hereinbefore referred to, of an improved mode of drying the mud hereinbefore referred to, in purifying the effluent water by aeration, and of improved apparatus for letting off the said effluent water.

In carrying our invention into effect we proceed as follows:—We mix in a suitable pit, tank, or vessel, alum, or (by preference, as cheaper and more efficacious, crude sulphate of aluminium, or other soluble compounds of aluminium, such as chloride and acetate of aluminium, blood, albuminous, albuminoid, and gelatinoid substances, such as either gelatine, glue, size, chondrin, isinglass, fish-skins, eggs, or other analogous matters, together with or in substitution for the blood) animal and vegetable charcoal, or any carbonized animal or vegetable substances, and clay with water. We, for the purpose of distinction, call this mixture the "A B C mixture." The said mixture is to be employed for treating ordinary town sewage of an alkaline or neutral nature. The portions of the ingredients of the above described "A B C mixture," and their selection, must be varied according to the nature of the sewage to be treated. In practice we find the following proportions give good results with ordinary town sewage:—

Ingredients contained in 100,000 parts of "A B C mixture"—

Crude sulphate of aluminium	3,000	parts by weight.
Charcoal	4,000	" "
Clay	10,000	" "
Blood	6	" "
Water	82,994	" "

The albuminous and albuminoid matters hereinbefore described (or any of them) may be used either in conjunction with or in substitution for the blood in forming an "A B C mixture."

When the albuminous and albuminoid substances are used in substitution for the blood, either of the following formulæ may be used:—

We digest three parts by weight of such albuminous or albuminoid substances in ten parts of hot water, until solution of diffusion in that liquid has taken place. We then add the solution in place of the six parts of blood.

Or, we mix

Crude sulphate of alumina...	3,000	parts by weight.
Charcoal	4,000	" "
Clay	10,000	" "
Glue	1	part
Water	82,999	parts

and we use this latter mixture in substitution for the "A B C mixture" herein first described.

When the albuminous and albuminoid substances are used in conjunction with blood, about one-half the quantity of the albuminous and albuminoid substances given in the two formulæ last described may be used.

The quantity of the mixture to be added to the sewage will be about one volume of the said mixture to one hundred volumes of the sewage, but of course the proportions and constituents will be subject to variation, according as the character of the sewage is found to change, the "feed" being regulated as required by any suitable mechanical means. We prefer such an arrangement as will allow of constant inspection of the "feed."

This "A B C mixture" is added to and mixed with the sewage, which is then passed or allowed to pass into settling tanks, where the precipitation of the impurities takes place. These tanks may be of any suitable construction, but we prefer to make them with sloping bottoms and mud channels, as described in the specification of Letters Patent granted to George William Wigner, in the Colony of New South Wales, and dated 13th April, 1871. The mud deposited is treated in the manner hereinafter described for the manufacture of manure.

The foregoing description relates to the use of the single pit, tank, or vessel for containing the substances to be used in the "A B C mixture" for the purification of the sewage. When two pits, tanks, or vessels are used, we proceed as follows:—We mix in one pit, tank, or vessel, the ingredients hereinbefore referred

Improvements in deodorizing Sewage, &c.

referred to as constituting the "A B C mixture." In the other pit, tank, or vessel we make a mixture which we designate the "alkaline mixture," consisting of one or more of the alkalis or their carbonates, or of the alkaline earths or their carbonates, mixed with or dissolved in water. The proportions of these ingredients and their selection will vary according to the acidity of the sewage to be treated, the object being to reduce the sewage to at least a neutral state. We may here state generally that the directions given in the specification of George William Wigner's Patent of 13th April, 1871, respecting the modifications of formulæ and the quantity of the purifying substances to be added to the sewage, apply to this invention also.

We add the "A B C" and the "alkaline" mixtures separately and simultaneously to the sewage, essentially as represented in figures 1 and 2 of the accompanying drawing; which figures respectively represent, in vertical section and plan, the mixing pit in which the said mixtures are added to the sewage. The same letters of reference indicate the same parts in both figures. *a* is the mixing pit; *b* is the sewer; *c* is the pipe through which the "A B C mixture" is added; and *d* is the pipe through which the "alkaline mixture" is added.

In some cases (especially where the sewage is acid) it is expedient to add the "alkaline mixture" to the sewage, in order to render it neutral or alkaline, previously to its receiving the "A B C mixture"; but we do not claim as of our invention the previous addition of the "alkaline mixture" to the sewage.

After the addition to the sewage of the "alkaline" and "A B C" mixtures in either of the two ways herein last described, the said sewage is passed, or allowed to pass, into settling tanks, for precipitation, as hereinbefore described.

The "A B C" and "alkaline" mixtures may, for the sake of economy and portability, be made up in a dry form, and so kept until required for use, at which time the requisite quantity of water may be added.

The precipitation of the impurities contained in the sewage or urine, or refuse matters and liquids, may be aided by means of an electric current, generated by voltaic, electro-magnetic, or magneto-electric action, employing poles or electrodes of carbon, platinum, or other material not prejudicially acted upon by the contents of the sewage or other matters under treatment. Instead of allowing the treated sewage, or urine, or refuse matters and liquids, to flow continuously through the said tanks, we prefer to allow it or them to remain quiescent in the said tanks for a sufficient time to allow of subsidence, after which we draw or drain off, or otherwise separate the supernatant water from the mud at the bottom of the tanks. It is important to do this without disturbing the mud. For this purpose we use a penstock or gate, hinged at its lower side to the sill or the side walls of the outlet passage through which the water is drawn off. The sides of the said penstock are furnished with double flanges of leather, caoutchouc, vulcanized india-rubber, or other suitable material, which work water-tight between quadrantal wing plates fixed to the sides of the said passage. A toothed quadrant worked by a worm and shaft (or any other suitable mechanical appliance) is affixed to the penstock, so that it can be lowered so as to allow the water to flow over its upper edge, or raised into a vertical position; or the said penstock may be raised and lowered by means of a chain.

Figures 3, 4, and 5 of the accompanying drawing represent a penstock constructed according to this part of our invention; figure 3 being a front elevation of the said penstock, figure 4 a section (taken on the line A, figure 3) and figure 5 a plan of the same.

The same letters of reference indicate the same parts in figures 3, 4, and 5. *a* is the penstock, which turns on hinges or pivots at *b*; *c c* are the flexible flanges, which are affixed to the penstock by means of a plate or frame, *d*, bolted to the said penstock; *c'* is a strip of leather, or caoutchouc, or other flexible material, which is similarly secured to the penstock and the sill, *e*, of the outlet passage *f*, so as to prevent water from passing between them; *g g* are the quadrantal wing plates between which the penstock works; *h* is a chain, by means of which the said penstock is raised or lowered as required.

Instead of the arrangement of flanges and wing plates described, the wing plates may be affixed to the sides of the penstock, and work between double flanges of leather, caoutchouc, or other flexible material, affixed to the sides of the outlet passage.

This arrangement is represented in vertical section in figure 6, and in plan in figure 7, in which figures the same letters of reference indicate the same parts. *a* is the penstock, and *b b* are the quadrantal wing plates bolted thereto; *c* is a strut, which keeps the said plates the requisite distance apart; *d d* are flanges or strips of leather, or caoutchouc, or other flexible material, which are affixed, by means of bars of wood, *e e*, in channels, *f f*, in the masonry or brickwork, *g*, of the outlet passage; *h* (see figure 7) is a caoutchouc or other elastic cushion, against which the lower edge of the penstock works water-tight.

The effluent water may, where necessary, be further purified as hereinafter described before leaving the works. Where the mud resulting from the purification and precipitation above described can be made into a manure, we remove such mud from the tanks (after draining off the supernatant water as hereinbefore described, by pumping, dredging, or other suitable means, and place it in an intermediate tank, where further settlement takes place, the supernatant water being here drawn off as far as possible. We then put the mud into a closed tank or cistern, which communicates by means of a pipe with a pump or a fan, or other forcing or exhausting apparatus. In this tank or cistern the sulphuric or hydrochloric or other acid, to be used for fixing or retaining the more or less volatile matters or other valuable constituents of the said mud, is added thereto, and stirred and incorporated or mixed therewith. As soon as this has been done, the pump or fan hereinbefore referred to is set in motion, and the offensive gases given off by the mixture of mud and acid are by this means commingled with chlorine or sulphurous acid in a vaporous or gaseous form. The chlorine or sulphurous acid gas may be generated by ordinary or well known means, either in the flue or chimney through which the foul gases pass or in the tank itself, in which latter case the fan is not required. By this means the offensive gases given off as aforesaid are either wholly or partially decomposed, and the foul smell arising from the mud under treatment is either wholly or partially removed.

This part of our invention is also applicable for deodorizing and reudering inoffensive foul gases accompanying sewage, or arising from it during its treatment.

When

Improvements in deodorizing Sewage, &c.

When the evolution of gases from the mixture of mud and chemicals has ceased or diminished, the said mud is dried. The drying of the said mud (which completes the manufacture of the manure) may be effected in any suitable way; as, for instance, by spreading the said mud on a suitable surface in the open air or under cover, and, if necessary, completing the drying by means of artificial heat; but we prefer to effect the drying of the said mud by means of the apparatus constructed as follows:—

The said apparatus consists essentially of a drying chamber, furnished with a drying floor, or several drying floors arranged one above another. The said floor or floors is or are heated from beneath by steam or other suitable heating medium, and hot air is drawn or forced over such floor or floors, so that the mud spread thereon, being heated both from above and below, is rapidly dried.

Figures, 8, 9, 10, and 11 of the accompanying drawing represent a drying chamber constructed according to this part of our invention. Figure 8 is a horizontal section of the said drying chamber; figure 9 is a transverse vertical section of the same, showing it with a roof; figure 10 is a transverse vertical section of the said chamber, showing the application of flat iron covers thereto; and figure 11 is a longitudinal vertical section of the same. The same letters of reference indicate the same parts in the several figures. *a* is the drying chamber, *b* is the drying floor, on which the mud *c* is spread; steam is introduced under the said floor, through a pipe, *d*, and branch pipe, *d'*, which latter is pierced with the holes *d² d²*. *c* is a pipe for drawing off the water formed by the condensation of the steam. *f f* are pipes through which the hot air is introduced above the drying floor, and *g g* are pipes through which the said air passes from the drying chamber either into the open air or into a chimney shaft. The course of the air is indicated by the arrows. The said pipes are splayed out as shown, and are furnished with guide plates or partitions, *f¹ f¹ g¹ g¹*, by which means the hot air is equally diffused throughout the chamber. The said air may be drawn or forced through the aforesaid pipes by means of a fan, or a draught may be obtained by leading the pipes *f f g g* into a chimney. *h h* are man-holes, through which the workman enters the drying chamber in order to spread or remove the mud or manure. Flat plates or covers, *i i*, are hinged to each side of the drying chamber, figures 10 and 11. The said chamber may in addition to these covers have a roof, as indicated in dotted lines in figure 10.

Several drying floors constructed as above described may be arranged one above another, steam being introduced under each floor, and hot air being drawn or forced over each floor. In this case openings (closed by means of suitable doors) are made in the sides of the apparatus (one opening to each floor), to allow of the insertion of the mud and the removal of the dried manure.

In order to decompose any offensive gases given off by the mud while being dried, we pass over it chlorine or sulphurous acid gas, or otherwise bring the said gases into contact.

When sulphurous acid gas is used in this or the preceding process, it may be produced by burning sulphur or coal containing a large proportion of sulphur, or from other sources. When the apparatus above described is used, the sulphurous acid gas may be produced by burning sulphur in the flue through which the hot air is introduced.

For the purification of urine or refuse liquids, or the further purification of the effluent water, where circumstances render a high degree of purity desirable, we mix with the said urine or refuse liquids or effluent water, sulphate of manganese, or other soluble compound of that metal converted into oxide by the addition of lime, either at or after the addition of such compound to the urine or refuse liquids, or effluent water. We take about four grains of the black oxide of manganese, and add thereto as much sulphuric acid as will dissolve it, and we add the solution of sulphate of manganese so formed to each gallon of the urine, refuse liquids, or effluent water decomposing with lime, as above described.

We would here observe that where manure is to be made, the above described treatment with sulphate of manganese should not be adopted.

Another mode by which we purify the effluent water consists in aerating it by means of atmospheric air. This may be done in a variety of ways, as, for example, by forcing the air into and through the effluent water, by means of force pumps delivering the air through finely perforated pipes into the said effluent water.

Having now described the nature of our invention, and the manner in which the same is to be performed, we wish it to be understood that we do not limit ourselves to the precise details hereinbefore described, as the same may be varied without departing from the nature of our said invention.

But we claim as our invention—

Firstly.—The use of albuminous and albuminoid substances in addition to the substances named in this specification, or in the specification of George William Wigner's patent above referred to of thirteenth April, one thousand eight hundred and seventy-one, or in substitution for the blood mentioned in the specification, in the treatment of sewage, urine, and refuse matters and liquids.

Secondly.—The improved mode hereinbefore described of using the substances by means of which the precipitation of the impurities contained in sewage, urine, and refuse matters and liquids is effected, that is to say, making two separate mixtures, the one hereinbefore termed the "A B C mixture" and the other "alkaline mixture," essentially as hereinbefore described, and adding both mixtures simultaneously and separately to the sewage, urine, or refuse matters or liquids to be purified, so that the said "A B C mixture" and the said "alkaline mixture" shall simultaneously meet and mix in and with the said sewage, urine, or refuse matters or liquids.

Thirdly.—The method hereinbefore described of aiding the precipitation of the impurities contained in the sewage, by means of an electric current generated by voltaic, electro-magnetic, or magneto-electric action.

Fourthly.—The method hereinbefore described of destroying wholly or partially the offensive gases accompanying the sewage, or given off from it during its treatment, or arising from sewage mud during its treatment, that is to say, mixing such gases with chlorine or sulphurous acid in a gaseous form.

Fifthly.—The purification of the effluent water, by aerating it with atmospheric air, essentially as hereinbefore described.

Sixthly.—

Improvements in deodorizing Sewage, &c.

Sixthly.—The improved apparatus hereinbefore described, and illustrated in figures 3, 4, and 5 of the accompanying drawing, for letting off the effluent water from the surface, that is to say, a hinged penstock working between wing plates, and furnished with flexible flanges and fittings, the whole constructed and arranged essentially as described.

Seventhly.—The modification of the aforesaid apparatus hereinbefore described, and illustrated in figures 6 and 7 of the accompanying drawing, that is to say, a hinged penstock, furnished with wing plates working between flexible flanges affixed to the sides of the outlet passage, the whole constructed and arranged essentially as described.

Eighthly.—The improved method hereinbefore described, and illustrated in figures 8, 9, 10, and 11 of the accompanying drawing, of drying sewage mud, that is to say, by the use of steam heat underneath a drying floor, and a current of hot air above the mud spread on the said floor, essentially as described.

In witness whereof, we, the said Christopher Rawson, Philip Ovenden, James Wylde, William M'Cree, and Henry Hill, have to this our specification set our hands and seals, the tenth day of July, one thousand eight hundred and seventy-one.

C. RAWSON.
PHILIP OVENDEN.
JAMES WYLDE.

REPORT.

Victoria Chambers, Pitt-street,
Sydney, 23 November, 1871.

SIR,

We have the honor to return herewith the Memorial of Christopher Rawson, Philip Ovenden, James Wylde, William M'Cree, and Henry Hill, Esquires, with the accompanying drawings and specifications (in duplicate) illustrative of an invention for Improvements in deodorizing and purifying Sewage, Urine, and refuse matters and liquids, and in making Manure therefrom, and in Apparatus for those purposes, of which they represent that they are the authors or designers, and for which they are desirous of obtaining Letters of Registration.

We have the honor to report that, having perused the said Memorial and specification, and considered the matters therein set forth, we have to recommend that Letters of Registration be granted as applied for:

We have, &c.,
CHAS. WATT.
A. O. MORIARTY.

THE PRINCIPAL UNDER SECRETARY.

This is the sheet of Drawings referred to in the annexed Letters of Registration granted to Christopher Rawson, Philip Ovender, James Wylde, William M^c Cree, and Henry Hill this thirteenth day of December 1871. Belmore.

A.D. 1871, 22nd December. No. 294.

INVENTION FOR UTILIZING WASTE AND OLD LEATHER, &c.

LETTERS OF REGISTRATION to Alfred Edward Arnold, for an Invention for utilizing Waste and Old Leather, &c., &c.

[Registered on the 22nd day of December, 1871, in pursuance of the Act 16 Vic., No. 24.]

BY HIS EXCELLENCY THE RIGHT HONORABLE SOMERSET RICHARD, EARL OF BELMORE, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

TO ALL TO WHOM THESE PRESENTS SHALL COME, greeting :

WHEREAS ALFRED EDWARD ARNOLD, of Waverley, near Sydney, in the Colony of New South Wales, mechanical engineer, hath by his Petition humbly represented to me that he is the author or designer of a certain invention or improvement in manufactures, that is to say, of an invention for utilizing waste and old unperished Leather, converting such Leather, by process of cleansing, cutting, grinding and shredding, into a substance which, when pressed by hydraulic or screw power, will produce heels and soles for boots and shoes, and a variety of fancy useful articles, which is more particularly described in the specification and paper of drawings which are hereunto annexed ; and that he, the said Petitioner, hath deposited with the Honorable the Treasurer of the said Colony of New South Wales the sum of Twenty Pounds sterling, for defraying the expense of granting these Letters of Registration, as required by the Act of Council, sixteenth Victoria, number twenty-four, and hath humbly prayed that I would be pleased to grant Letters of Registration, whereby the exclusive enjoyment and advantage of the said invention or improvement might be secured to him for a period of fourteen years : And I, being willing to give encouragement to all inventions and improvements in the arts or manufactures which may be for the public good, and having received a report favourable to the prayer of the said Petition, from competent persons appointed by me to examine and consider the matters stated therein, and to report thereon for my information, am pleased, with the advice of the Executive Council, and in exercise of the power and authority given to me by the said Act of Council, to grant, and do by these Letters of Registration grant unto the said Alfred Edward Arnold, his executors, administrators, and assigns, the exclusive enjoyment and advantage of the said invention or improvement, for and during the term of fourteen years from the date hereof ; to have, hold, and exercise unto the said Alfred Edward Arnold, his executors, administrators, and assigns, the exclusive enjoyment and advantage thereof, for and during and unto the full end and term of fourteen years from the date of these presents next and immediately ensuing, and fully to be complete and ended : Provided always, that if the said Alfred Edward Arnold shall not, within three days after the granting of these Letters of Registration, register the same in the proper office in the Supreme Court at Sydney, in the said Colony of New South Wales, then these Letters of Registration, and all advantages whatsoever hereby granted, shall cease and become void.

In witness whereof, I have hereunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this twenty-second day of December, in the year of our Lord one thousand eight hundred and seventy-one.

(L.S.)

BELMORE.

Invention for utilizing waste and old Leather, &c.

DESCRIPTION and SPECIFICATION accompanying the application for Letters of Registration of an Invention under the Act of Council 16 Vic. No. 24, to be granted to ALFRED EDWARD ARNOLD.

THE nature of my invention, and the manner in which I perform the same, are particularly described and ascertained in and by the following statement, that is to say:—

1st.—The chief feature in this invention, and of which protection is sought, is converting waste and old unperished leather, by cleansing, cutting, grinding, and shredding the said leather, into a substance which, when pressed by hydraulic or screw power, will produce heels and soles for boots and shoes in a complete and finished state, ready for fixing, cleaning up, and polishing; also blocks of the substance to be sawn in sizes as required for covers of books, and to be compressed into moulds, and produce tool-handles, buffers for railway carriages, winkers for horses, handles for knives to imitate buck-horn, walking-sticks, and whips, helmets and buckets for fire brigades and other service, and all and every fancy article that can be manufactured by the process of my invention, I claim protection for.

2nd.—The substance when pressed is harder than leather, and impervious to water, is capable of taking varnish, or can be highly polished.

3rd.—The diagram No. I on drawing, marked *a, b, c, d, e, f, g*, is the machine for shredding the leather into a fibrous state to be used in bonding the substance. The machine is a steel wheel whose external face is covered with deep sharp cuts, saw-teeth shape, meeting in its middle at right angles to each other, and driven by steam power at a rate of 1,000 to 1,200 revolutions a minute; it is confined in a cast-iron box fixed on a stone foundation, the feeding is from the top, and the discharge at the bottom. The underside of the top is semicircular in shape, and fitted within $\frac{1}{8}$ of an inch of the wheel, regulated at pleasure by screws at the top. *a* is the elevation; *b* is the top of machine or cover; *c* is the section; *d* the plan with top off; *e* is the plan of the underside of top; *f* and *g* is another wheel with planes fixed for cutting leather.

4th.—The diagram No. II on drawing, marked *a, b, c*, is the mill for grinding the leather, consisting of two round cast-iron mill plates, on which will be fastened $\frac{1}{8}$ -inch thick steel plates cut similar to French mill-stones. The lower grinding plate derives its motive power from underneath by belt from steam-engine; the top plate is secured to the circular iron framing, and it is kept in its position by screw bolts. The feeding is from the top, and the discharge from the bottom. *a* is the elevation; *b* is the plan; *c* is the upper grinder.

5th.—The diagram No. III on the drawing, marked *a, b, c*, is the compound shredding mill, composed of a number of circular saws driven by steam power, and is similar in every other respect to the shredding mill (diagram No. 1). *a* is the side view of the saws; *b* is the section through the box; *c* is the plan.

6th.—The diagram No. IV on drawing, marked *a, b, c*, is the cutting lathe, provided with sharp semicircular steel knives, against which the leather to be cut is forced through an iron box, the whole fixed on strong cast-iron frame. *a* shows the knives; *b* is the side elevation; *c* is the box.

7th.—The diagram No. V on the drawing, marked *a, b*, is the cleaning vessel, heated by steam, and provided with revolving tormentor or teasing spokes. *a* is the section; *b* is the plan.

8th.—The diagram No. VI on the drawing, marked *a, b, c, d, e, f, g, h, i*, are moulds; *a, b, c, d, e*, for making heels of various sizes; *f*, for making soles; *g*, for winkers for horses; *h* and *i* for handles for tools.

9th.—Moulds for other articles are to be made of similar construction, the hydraulic or screw power being applied to the moulds in the usual manner.

10th.—The process of cleansing the leather is performed by the use of a liquid composition of common washing soda and potash, of such strength as required, put in the cleaning vessel, heated by steam, and the tormentor or teasing spokes driven by steam.

11th.—The substance to be pressed will be prepared by mixing the shred and ground leather together, with solutions made from glue, and the various stringent gums, resins, gum resins, &c.

Dated this first day of November, 1871.

ALFRED E. ARNOLD.

ADDENDA to Description and Specification accompanying the application for Letters of Registration of an invention under the Act of Council 16 Vic. No. 24, to be granted to Alfred Edward Arnold.

1st.—In the process of cleansing the leather, common washing soda, or any other soda, together with or without potash, may be used in the liquid composition to be put in the cleaning vessel.

2nd.—The substance to be pressed will be prepared by mixing the shred and ground leather together, by means of gums Arabic, Senegal, Kowrie, tragacanth, shellac, seedlac, sandrack, benzoin, copal, mastic, frankincense, or any gum, gum resin, or resin not herein named, soluble in water, spirits, ether, &c.; also, glue, gelatine, dextrine, starch, isinglass, Indiarubber, gutta percha, skimmed milk, and powdered chalk.

Dated this first day of November, 1871.

ALFRED E. ARNOLD.

This is the specification referred to in the annexed Letters of Registration granted to Alfred Edward Arnold, this twenty-second day of December, 1871.

BELMORE.

REPORT.

Invention for utilizing waste and old Leather, &c.

REPORT.

Sydney, 6 November, 1871.

SIR,
Having examined Mr. Alfred E. Arnold's description of his "invention for utilizing waste and old unperished Leather, &c., &c." transmitted under your B.C. of the 3rd instant, we do ourselves the honor to recommend that letters of Registration be granted to Mr. Arnold, in terms of his Petition, specification, drawings, and claim.

We have, &c.,
GOTHER K. MANN.
A. O. MORIARTY.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LOCAL LAND OFFICE FOR INVERELL.

(PETITION FOR ESTABLISHMENT—MINERS AND OTHERS, OF INVERELL.)

Ordered by the Legislative Assembly to be printed, 6 November, 1872.

To the Honorable the Legislative Assembly, in Parliament assembled.

The Petition of the undersigned miners and others, of Inverell,—

HUMBLY SHOWETH :—

That your Petitioners are residents of a district peculiarly distinguished for its great mineral wealth, and are largely interested in the development of the lately discovered tin-mines.

That your Petitioners suffer much loss and inconvenience from their inability to take up mineral lands at a local Government office, from the great delays which take place in surveying their selections, and from the very great uncertainty and risk which attach to the leasing of mineral lands, in consequence of the impossibility of obtaining official information, except by application to the Government offices of the metropolis.

That your Petitioners believe that the establishment in this district of a branch office of the Lands and Survey Departments, especially devoted to the mining interests, would be a great boon to a large number of their fellow colonists, would facilitate the taking up of mineral lands, and prevent much future misunderstanding and possible litigation, to say nothing of the prevention of much disappointment, waste of time, and pecuniary loss.

That your Petitioners believe that the present Gold Fields Regulations if slightly modified would meet the general requirements of the tin-miners.

Your Petitioners therefore pray that your Honorable House will take the premises into your favorable consideration.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 209 Signatures.*]

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RESERVES, JERRY'S PLAINS AND BREEZA ROAD.

(REPORTS ON.)

Ordered by the Legislative Assembly to be printed, 12 November, 1872.

MR. DISTRICT SURVEYOR EVANS TO THE SURVEYOR GENERAL.

Maitland, 14 September, 1872.

SIR,

In reference to instructions of July 19th, No. 72-102, respecting reserves on road from Jerry's Plains to Breeza, I have the honor to report on those within County Buckland.

Reserve No. 466.—On proceeding to this reserve, I found that the eastern boundary was marked by a substantial fence, defining the pre-lease of — Nowland, and at $12\frac{1}{2}$ chains north from the northern boundary I found another fence in a westerly direction. I recommend an extension of the present reserve by the addition of 200 acres along its northern boundary, so that the western boundary will be 52 chains

instead of 40 chains, as at present, and the eastern boundary 104 chains instead of 92 chains. I have marked the eastern and western boundaries, and the proposed extension on the north side.

Reserve No. 205.—I have marked the eastern and western boundaries. I found the reserves at Darling water were defined on the ground.

Reserves Nos. 242-8 and 178.—The road passes through the first-mentioned, and it is marked on the west by a fence, and on the north and south by a line of stakes; the other two are sufficiently marked by the surrounding measurements.

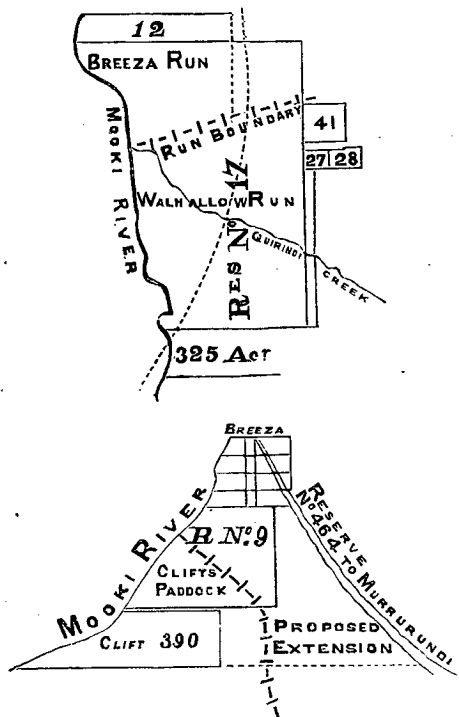

Reserve No. 10 is also marked on all sides, but it is unnecessary for travelling stock, and cattle cannot cross the Mooki River at this place.

Reserve No. 17 is marked on all sides. This is the best reserve on the whole road. The part on Walhollow Run is already open to the public; the other part, situated on Breeza Run, is not open. The position of the fences is shown on the sketch.

Reserve No. 9.—I have marked the boundaries of this reserve. I recommend an extension as shown on the sketch. Part of the reserve is within a paddock, but no practical inconvenience is thereby experienced.

All of these reserves except No. 10 should be reserved from lease, if not already so reserved.

I have, &c.,
THOMAS EVANS,
District Surveyor.

It is recommended that the reservations from lease and extensions as proposed should be carried out.—R. A. FITZGERALD, for Sur. Gen., 18 Octr., 1872.
Approved.—J.S.F., 31/10/72.

COPY of report of Mr. District Surveyor Evans on an application made by Mr. Charles Blaxland for the alteration of the boundaries of Reserve No. 22, in the County of Brisbane.

"MR. Blaxland's statement is quite correct; the reserve cuts unnecessarily into his paddock, which is a large one,—I believe about 25 miles round. I recommend that Reserve 22, County of Brisbane, be cancelled, and another reserve proclaimed, as shown on the accompanying tracing.* The dry creek forming the western boundary of Reserve No. 22 is not correctly laid down on the map; it joins the Merriwa Rivulet below the south-western corner of Windham's 2,560 acres, and therefore the description is incorrect. The country included in the proposed reserve is superior to that in Reserve 22, and there is a spring on it which is not included in existing reserve."

* Separate Appendix A.

THOMAS EVANS.

August 29th, 1872.—No. 72-77.

MR. DISTRICT SURVEYOR EVANS TO THE SURVEYOR GENERAL.

Maitland, 14 September, 1872.

SIR,

In reference to instructions of July 19, No. 72-102, respecting reserves on the road between Jerry's Plains and Merriwa, I have the honor to enclose a tracing† showing the position of certain reserves on and near that line of road. The reserve 5 on the north side of the river Hunter to the west of J. and G. Blaxland's 1,020 acres, edged red, is that to which Mr. W. C. Brown, M.L.A., alluded to when he asked the question in the Legislative Assembly,—“Is there a Village Reserve fenced in and occupied by Mr. White at Saddler's Creek, near the main road from Merriwa to Jerry's Plain?” I have seen Mr. White, and he states that he leases the reserve in question. This reserve is part of a large paddock enclosed by Mr. White, part being freehold and part leasehold. It is one and a half mile from the main road, but there is a road one chain wide marked on both sides, leading from the north-eastern corner of the reserve to the main road, which is accessible for cattle or sheep, and could, should it be required, be made passable for wheel traffic at a small expenditure.

† Separate Appendix B.

On the south side of the river, opposite Blaxland's 1,020 acres, is a reserve (5), also enclosed, and said to be leased by Mr. White. This reserve is accessible from the Saddler's Creek reserve when the Hunter is low. Both of these reserves should be reserved from lease, as this is the only possible turn-out between Denman and Jerry's Plains, a distance of about sixteen miles, and although off the road, the most suitable place between Wybong Creek and Jerry's Plains, a further distance of seven miles.

To open these reserves to the public it will be necessary that Mr. White's fence, at the northern extremity of the road leading from the main road to Saddler's Creek, V.R., dividing portions 80 and 32, parish of Althorp, County Durham, should be removed, and to do this throws open the whole of the paddock, which is a very large one. I have spoken to several drovers on the road, and they say they would be satisfied with a slip-panel or gate at this place, so that they might have access for their cattle to the reserve, and I think this course would not inconvenience Mr. White so much as if the fence was taken down, and the paddock thereby thrown open, in which case, to secure it, Mr. White would be compelled to fence off the reserve, and the road leading to it, at considerable cost.

By a green tint I have shown the position of a reserve at the confluence of the Goulburn and Hunter Rivers, which is included in a paddock of Mr. White's. There is not any road to give access to this reserve. By a green edging I have shown the position of a vacant portion of Crown Land on the south side of the road from Denman to Jerry's Plains, which I suggest be reserved from sale (not lease). If Mr. White thought it better for him to fence off the Saddler's Creek Reserve, the propriety of effecting a temporary exchange with him for the portions lying to the west of the road leading to Saddler's Creek Reserve could then be considered. This would secure a better access to the reserve.

I have, &c.,

THOMAS EVANS,
District Surveyor.

It is recommended that the withdrawals from lease and reservations proposed by Mr. District Surveyor Evans be carried out.—R. A. FITZGERALD, for Sur. Gen., 18 Octr., 1872.
Approved.—J.S.F., 31/10/72.

MR. DISTRICT SURVEYOR EVANS TO THE SURVEYOR GENERAL.

Maitland, 14 September, 1872.

SIR,

In reference to your instructions of July 19th, No. 72/102, I have the honor to report respecting the reserves on the road from Jerry's Plains to Breeza, within the County Brisbane.

Reserve No. 24.—I have re-marked the northern boundary from the Wybong Creek to the north-eastern corner of the conditional purchase. On the south boundary of J. Pike's (now Mrs. Merry's) 1,110 acres, further west, the country is extremely broken, and inaccessible for stock. Mrs. Merry states that she rents this reserve; she has placed a fence along the south side of the road from Wybong Creek, for about 35 chains, terminating in the hills, which are here inaccessible for cattle. There is also a fence from a point on the Wybong Creek, about 15 chains from the Goulburn River, which prevents stock crossing the Goulburn, and makes a secure paddock of the eastern part of the reserve, the western portion being altogether valueless and inaccessible.

Reserve No. 25.—East of Gungal Creek: The south boundary is sufficiently marked by Mrs. M'Kenzie's conditional purchase; east of that land the hills are inaccessible for cattle. West of Gungal Creek: I have marked a line commencing at 10 chains south from the north-western corner of Joseph Forster's conditional purchase, 40 acres, No. 62, west, to the mountain, a distance of half a mile. I recommend

recommend an extension to this reserve by an alteration in the northern boundary between Gungal and Giant's Creeks, so that the north boundary shall be a line east from the south-eastern corner of James Pepperdy's 50 acres to Saunders' conditional purchase, 40 acres, No. 45, thence south to the south-western corner of that land, thence east to Giant's Creek. The object of this extension is, that as at present proclaimed, no access between the two creeks, they being divided by a steep precipitous range, inaccessible for stock; but, by the alteration recommended, a gap suitable for the passage of stock, and for a roadway, is included in the reserve. Mr. James Pepperdy states that he rents this reserve. There are no fences on it.

Reserve No. 23.—Marked the eastern boundary from the south-eastern corner, northerly, about 1½ mile, to the mountain.

Reserve No. 22.—Mr. C. Blaxland has made an application respecting this reserve, which I have reported on. See my B.C., August 29th, 72/77 (72-4,561 Misc.)

Reserve No. 21.—I have marked the north, east, and south boundaries. This reserve is open to the public.

Reserve No. 11.—Marked the west and south boundaries. I recommend an extension to this reserve, to include the land south of portion 3-18 and west of existing reserve. There are no enclosures on this reserve.

Reserve No. 20.—Marked the south, west, and north boundaries. If there are any of the measured portions lying to the south of this reserve, and fronting Coulston's Creek, yet unsold, it would be well to extend the reserve, so as to include such portions, as at present marked. This reserve is destitute of water; no inclosures.

Reserve No. 19.—Commencing at the foot of Liverpool Range, on the northern boundary of W. C. Wentworth's 640 acres (western portion). I have marked easterly and southerly to the south-eastern corner of such 640 acres, thence easterly 1 mile to the south-west corner of W. C. Wentworth's 640 acres (eastern portion), thence northerly and easterly to the north-east corner of such 640 acres, thence southerly to the road. It is not necessary to mark the eastern boundary of this reserve, because there is an almost impassable range which divides the waters of Coulston's and Wybong Creeks within it, which forms a natural boundary on that side. On this reserve is a sheep-station, belonging to Mr. B. Bettington: the hut is only bark, and the yard made of boughs; both of little value. Unless in a very good season, there never will be much grass on any of these reserves, because the adjoining owners will take care to feed them down. The only way to remedy such a state of things would be to lease the different reserves with fixed charges for stock, as you would lease a toll-gate or ferry; but to attempt anything of the kind at present would be premature.

I have, &c.,
THOMAS EVANS,
District Surveyor.

It is recommended that the alterations in the Co. Reserves proposed by Mr. D.S. Evans should be carried out.—R. A. FITZGERALD, for Sur. Genl., 18 Octr., 1872.

Approved.—J.S.F., 31/10/72.

MR. DISTRICT SURVEYOR EVANS TO THE SURVEYOR GENERAL.

Maitland, 14 September, 1872.

SIR,

In reference to instructions of July 19th, No. 72-102, respecting reserves on the droving road from Breeza to Jerry's Plains, I have the honor to enclose a tracing* showing the position of Reserve No. 454, in the Liverpool Plains District, County of Buckland, part of which has been enclosed by Mr. James Seville. * Separate Appendix C.

This is the reserve to which Mr. W. C. Browne, M.L.A., alluded to, when he asked the question in the Legislative Assembly,—“1st. Whether a person named Seville occupies a water-reserve situated at the foot of Liverpool Range, near the road leading from Merriwa to Breeza? And, 2nd. Is he aware that Seville levies a charge upon all travelling stock that are obliged to procure water there?”

In answer to the first question, I have to state that Mr. Seville does occupy this reserve, and has fenced off the water from the main road; he has also erected a wool-shed (nearly new), hut, shed, and sheep-yard, on the reserve; and partly on it and partly on his own land are yards, all represented on the tracing. These improvements are worth not less than £300.

In answer to the second question, I have to state that Mr. Seville does make a charge for travelling stock; the place where they are watered, however, is on his own land. The only water on the reserve is in Jindon's Creek (Jones' Creek being generally dry), which is cut off the road by the fence. I have marked the western boundary of this reserve, and the parts of the northern and southern boundaries west of Seville's 320 acres, and of portion 18. I have also re-marked the frontage corners, and on the fences, the position of Seville's southern boundary. Mr. Seville explained to me that he had applied to purchase, in virtue of improvements, part of this reserve. This application should not be granted, because the part he desires to purchase contains the only water on the reserve.

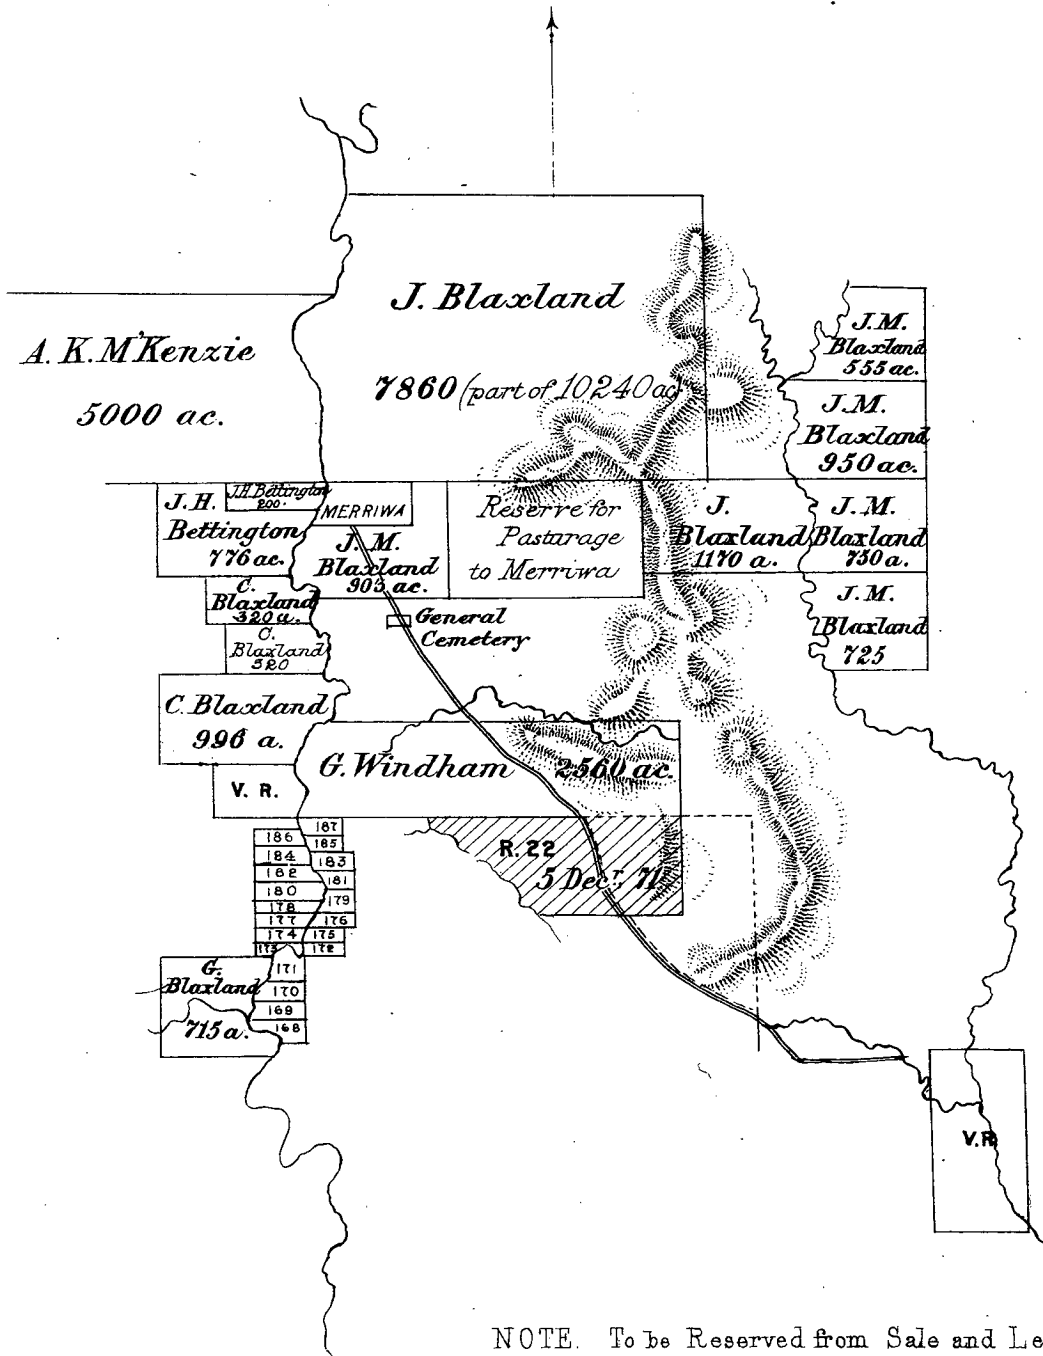

I have, &c.,
THOMAS EVANS,
District Surveyor.

[Three plans.]

SEPARATE APPENDIX A.

TRACING showing by a green tint Reserve No. 22, in the County of Brisbane, objected to by Mr. Charles Blaxland, being partly within his paddock, and now recommended to be cancelled; and by a green edging, the land which it is recommended may be reserved in place of it.

Scale—2 miles to an inch.

APPLICATION for the conditional purchase without competition of 112 acres unimproved Crown Land,
under section 13 of the Lands Alienation Act of 1861.

Received by me, with a deposit of £28, this 14th day of December, 1871, at 12 o'clock.

EDWIN H. TOMPSON,
Agent for the Sale of Crown Lands at Wagga Wagga.

14 December, 1871.

Sir,

I am desirous of purchasing, without competition, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 112 acres; and I herewith tender the sum of £28, being a deposit at the rate of five shillings (5s.) per acre on the area for which I apply, and on which it is my intention to reside.

I am, &c.,
HENRY BRADLEY ADAMS.
(A minor, aged 6 years.)
By his Agent, HENRY D. ADAMS,
Narrandera.

To the Agent for the Sale of Crown Lands
at Wagga Wagga.

Description:—County of Cooper, parish of Narrandera, 112 acres of land situated at Narrandera, on the east side of No. 75, and bounded by lines according to the Land Act to include the area.

Mr. Commins, to measure if unobjectionable—B.C., 29 Dec., 1871; noted, 29/12/71; (No. 157.)
The land is within the population reserve. I was not aware that there was such a reserve at Narrandera, but I now find there is on account of population according to the Census taken last year.—
GEORGE W. COMMINS, Licensed Surveyor, 29 June, 1872.

For cancellation; the land herein applied for comes within the population reserve of Narrandera—
Census of 1871.—P.A., 12 July.

Approved.—J.S.F., 1/8/72.

H. B. Adams, with refund form, and Agent informed.—17 Aug., 1872.

No. 2.

APPLICATION OF MR. B. W. ADAMS FOR CONDITIONAL PURCHASE, &c.

Cancelled, 12
Aug., 1872.

C.P., No. 71/4519. Land Agent's No., 159 of 1871. [Alienation Act, section 13.]
APPLICATION for the conditional purchase without competition of 86 acres 1 rood unimproved Crown
Land, under section 13 of the Lands Alienation Act of 1861.

Received by me, with a deposit of £21 11s. 3d., this 14th day of December, 1871, at 12 o'clock.

EDWIN H. TOMPSON,
Agent for the Sale of Crown Lands at Wagga Wagga.

14 December, 1871.

Sir,

I am desirous of purchasing without competition, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 86 acres 1 rood; and I herewith tender the sum of £21 11s. 3d., being a deposit at the rate of five shillings (5s.) per acre on the area for which I apply, and on which it is my intention to reside.

I am, &c.,
BENJAMIN WATMORE ADAMS.
By his Agent, HENRY D. ADAMS,
Narrandera.

To the Agent for the Sale of Crown Lands
at Wagga Wagga.

Description:—County of Cooper, parish of Narrandera, 86 acres 1 rood, being measured portions
Nos. 74 and 75 of 44 acres 2 roods and 41 acres 3 roods.

Mr.

3

Mr. Commins, to report on residence.—J.S.A., B.C., 29 Dec., 1871; noted, 29/12/71; (No. 158).

The land is within the population reserve. I was not aware that there was such a reserve at Narrandera, but I now find there is on account of the population, according to the Census taken last year. I believe the applicant is residing but I have not been on the ground.—GEORGE W. COMMINS, Licensed Surveyor, 29 June, 1872.

For cancellation; the land herein applied for comes within the population reserve of Narrandera—Census of 1871.—W.A.T., J.S.A.

Approved.—J.S.F., 1/8/72.

B. W. Adams, with refund form, and Agent informed.—17 Aug., 1872.

No. 3.

MR. LICENSED-SURVEYOR COMMINS TO THE SURVEYOR GENERAL.

Wagga Wagga,
15 August, 1872.

SIR,

With reference to the conditional purchases of H. B. Adams and B. W. Adams, in the parish of Narrandera, county of Cooper, which have been cancelled, owing to their being within the reserve, on account of population, at Narrandera, I have the honor to inform you that after inquiry I am of opinion that there are not 100 inhabitants in the town of Narrandera; therefore there should not be a population reserve at that place.

Mr. Adams has expended a great deal of money on his conditional purchases, and I respectfully suggest inquiry should be made as to whether there are 100 persons in Narrandera or not.

I believe Mr. Futter, Crown Lands Commissioner, is in a position to report on the subject.

I have, &c.,
GEORGE W. COMMINS.

No. 4.

THE UNDER SECRETARY FOR LANDS TO MR. HENRY B. ADAMS.

Department of Lands,
Sydney, 17 August, 1872.

SIR,

I am directed to inform you, that the application made by you at Wagga Wagga, on the 14th December last, for the conditional purchase of 112 acres of land, has been cancelled, as the land applied for is situated within the population reserve of Narrandera.

2. Enclosed is a form which, on being filled up and forwarded to the Treasury, signed by you, together with your deposit-receipt, will enable you at once to obtain the refund of the deposit paid on account of the above.

I have, &c.,
WM. BLACKMAN,
For the Under Secretary.

No. 5.

THE UNDER SECRETARY FOR LANDS TO MR. BENJAMIN W. ADAMS.

Department of Lands,
Sydney, 17 August, 1872.

SIR,

I am directed to inform you, that the application made by you at Wagga Wagga, on the 14th December last, for the conditional purchase of 86½ acres of land, has been cancelled, as the land applied for is situated within the population reserve of Narrandera.

2. Enclosed is a form which, on being filled up and forwarded to the Treasury, signed by you, together with your deposit receipt, will enable you at once to obtain the refund of the deposit paid on account of the above.

I have, &c.,
WM. BLACKMAN,
For the Under Secretary.

No. 6.

MR. H. D. ADAMS TO THE SECRETARY FOR LANDS.

Narrandera, 26 August, 1872.

SIR,

I have the honor to acknowledge the receipt of your letters, under date 17th instant, informing my sons, Benjamin W. Adams and Henry Bradley Adams, that their conditional purchases of the 14th December last are cancelled, as being within the population reserve of Narrandera.

In reply, I have the honor to state that the conditional purchases were made under the authority of information afforded me by Mr. Surveyor Commins, a copy of whose letter I attach. That there are five conditionally-purchased areas nearer to the town boundary than those occupied by my sons; that the population within the town boundary of Narrandera amounts only to fifty-five souls of all ages; and that an

an amount of £300 has already been expended in improvements on my sons' land, without reference to growing crops. Should the Government persist in what I cannot but call an act of spoliation, my only resource will be to bring the matter under the notice of Parliament, through the Member for this district, W. Macleay, Esq. I trust, however, that the sense of justice of the Government will induce them to reconsider their course of action.

I have, &c.,
HENRY D. ADAMS.

By the county map, in office use, the c.p.'s referred to were made in 1862 by Jackson, and in 1865 by Hilton.—T.H.L., 26 September, 1872.

This is a case in which the c.p.'s should not be allowed.—W.B., 20/9/72.

Approved.—J.S.F., 30/9/72.

H. D. Adams informed, October, 1872.

No. 7.

MR. H. D. ADAMS TO THE SECRETARY FOR LANDS.

Little Plain, near Narrandera,
1 October, 1872.

SIR,

On 26th August I addressed a letter to you with reference to the proposed ejection of my sons, Henry Bradley Adams and Benjamin Watmore Adams, from their conditional purchases at Little Plain, near Narrandera, on the plea that such purchases are within the population reserve of Narrandera, and informing you that the population of the township amounts only to fifty-five souls, according to the last Census.

I beg respectfully again to draw your attention to the subject, and to request an early answer as to the decision of the Government in the matter.

I have, &c.,
HENRY D. ADAMS.

To be referred to Mr. Wise to ascertain the correctness of the Census.—J.S.F., 25/11/72.

It will be seen on reference to the enclosed papers that the correctness of the return of the number of inhabitants at Narrandera for 1871 is denied both by Mr. Adams and the licensed-surveyor; indeed, the latter is of opinion that there are not 100 inhabitants, and consequently, that there ought not to be any population reserve there at all.—W.B.

The Registrar General.—W.B. (for the U.S.), B.C., 25 November, 1872.

These papers were returned to the Under Secretary for Lands on the 25th November, with an explanatory letter from this department.—G. F. WISE, Census Office, 27/11/72.

The U.S. for Lands.

No. 8.

THE UNDER SECRETARY FOR LANDS TO MR. H. D. ADAMS.

Department of Lands,
Sydney, 15 October, 1872.

SIR,

With reference to your letter of 26th August last, respecting the cancellation of the conditional purchases made by your sons, Henry B. Adams and Benjamin W. Adams, at Wagga Wagga, on the 14th December last, I am directed to inform you that as the portions in question, according to the Census of 1871, are situated within the population-boundary of Narrandera, the conditional purchases alluded to cannot be allowed.

I have, &c.,
W. W. STEPHEN.

No. 9.

THE REGISTRAR GENERAL TO THE UNDER SECRETARY FOR LANDS.

Registrar General's Department,
(Census of 1871)
Sydney, 25 November, 1872.

SIR,

I have the honor to return herewith, papers referring to the proposed ejection of Messrs. Adams from their conditional purchases at Little Plains, forwarded to me with a request that the correctness of the return of the population of the Village of Narrandera, as taken at the last Census, might be ascertained.

I beg to inform you, that on examination of the Census schedules it is apparent to me that the numbers given in the Census returns are quite correct, the population of the Village of Narrandera consisting chiefly of hotel-keepers and tradesmen, a list of whom is herewith enclosed.

Mr. District-Surveyor Commins appears to be of opinion that there were not 100 inhabitants on the 15th August, 1872, which would show a decrease of population since the taking of the Census.

Mr. Henry D. Adams was actually the collector employed in the Narrandera District, and his signature appears on the schedules accordingly.

I have, &c.,
E. G. WARD,
Registrar General.

[Enclosure

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TIMBER RESERVES.

(REPORT ON—IN CLARENCE, RICHMOND, AND TWEED RIVER DISTRICTS.)

Ordered by the Legislative Assembly to be printed, 10 December, 1872.

THE DIRECTOR OF THE BOTANIC GARDENS to THE UNDER SECRETARY FOR LANDS.

Botanic Gardens,
Sydney, 25 April, 1872.

SIR,

In accordance with the instructions of the Honorable the Secretary for Lands, I detached from this establishment, in the beginning of December last, my assistant, Mr. William Carron, to accompany the Government Surveyors in the Northern Districts of this Colony, for the purpose of selecting certain portions of country suitable as Forest Reserves. Twenty such selections have, in consequence, been made, viz., eleven in the Clarence and New England Districts, five in the Richmond River District, and four in the Tweed River District. Of these, five have already been reported on by Mr. Carron; and I now enclose, for Mr. Secretary Wilson's information, his reports on all the others. In choosing country for these reserves, I directed Mr. Carron to make selections in such localities as afforded the greatest number and variety of trees, and it will be observed from the lists of the trees, given as growing in each reserve, that my instructions have been carefully attended to. Should the Government finally approve of these reserves, it will be the means of preserving from total destruction many of the finest and most beautiful of our native trees. The-red cedar, *e.g.*, once so abundant from Illawarra to the northern extremity of this Colony, is now nearly all cut down, and it is a matter of much regret that even the young trees of this most valuable plant are now being felled for the timber. I would venture to suggest that similar reserves to these should be made, as far as practicable, on the Bellinger, the Nambuccra, the Macleay, the Hastings, and the Manning, otherwise the natural forest vegetation will soon entirely disappear.

I have, &c.,
CHARLES MOORE.

THE BOTANICAL COLLECTOR to THE DIRECTOR OF THE BOTANIC GARDENS, SYDNEY.

SIR,

I have the honor to report that the following fifteen reserves have been examined by me in conjunction with Mr. Donaldson, the District Surveyor, and on one other proposed reserve, situated on the head waters of the Clarence River, in New England; the timber trees are noted, but the exact boundaries have yet to be defined by the District Surveyor.

A list of the prevailing trees on each reserve is appended, and numbered from six to twenty in continuation of my report to the Honorable the Secretary for Lands on reserves numbered one to five, forwarded on the 28th December last.

Number six is a reserve containing about twenty-five square miles, situated at Coalbrook, on the road from Grafton to Tabulam, consisting of ridges and flats, well covered with a good quantity of timber of several kinds, chiefly hardwood.

The iron-bark, spotted-gum, and bastard-box are very fine, as well as some of the white tea-tree and forest-oak. This is the nearest hardwood reserve to North Grafton, where the supply of good timber is becoming very scarce.

(No. 6.)

LIST OF TIMBER TREES ON RESERVE NO. 6.

<i>Eucalyptus siderophloia</i>	iron-bark
„ <i>maculata</i>	spotted-gum
„ <i>saligna</i>	grey-gum
„ <i>tereticornis</i>	bastard-box
<i>Angophora subvelutina</i>	apple-tree
<i>Tristania neriifolia</i>	water-gum
<i>Banksia integrifolia</i>	honeysuckle
<i>Acacia Cunninghamii</i>	bastard-myall
<i>Melaleuca leucadendron</i>	white tea-tree
<i>Cargillia pentamera</i>	black-myrtle
<i>Orites excelsa</i>	
<i>Eugenia myrtifolia</i>	brush-cherry
<i>Casuarina tenuissima</i>	forest-oak

(No. 7.)

Number seven is a reserve situated at Mount Neville, near the road to Tabulam, and contains about 40 square miles, generally well covered with a great variety of timber of good quality; and a great deal of useful timber is growing near the reserve, which will furnish a large supply for some time.

The iron-bark, stringy-bark, and grey-gum amongst the hardwoods, and schizomeria ovata or "light-wood" in the brush timbers are very good.

LIST OF TIMBER TREES ON RESERVE No. 7.

<i>Angophora subvelutina</i>	apple-tree
<i>Callistemon saligna</i>	broad-leafed tea-tree
<i>Eucalyptus stellulata</i>	white-gum
" <i>siderophloia</i>	iron-bark
" <i>crebra</i>	white narrow-leafed iron-bark
" <i>amygdalina</i>	stringy-bark
" <i>robusta</i>	mahogany
<i>Melaleuca pauciflora</i>	tea-tree
<i>Tristania suaveolens</i>	swamp-mahogany
" <i>neriifolia</i>	water-gum
<i>Acacia Cunninghamii</i>	bastard-myall
" <i>glaucescens</i>	"
<i>Banksia integrifolia</i>	honeysuckle
<i>Trochocarpa laurina</i>	
<i>Schizomeria ovata</i>	light-wood
<i>Grevillea robusta</i>	silky-oak
<i>Hemicycelia sepiaria</i>	
<i>Eugenia Ventenatii</i>	large-leafed water-gum
<i>Diploglottis Cunninghamii</i>	native-tamarind
<i>Bradleya australis</i>	
<i>Alphitonia excelsa</i>	
<i>Achras australis</i>	black-apple

(No. 8.)

Number eight is a reserve of about forty-nine square miles, situated at Timbara, and consists principally of hardwoods. It contains a great deal of good timber; although not large, it appears generally sound.

The iron-bark, stringy-bark, and spotted-gum are many of them fine specimens, with straight round bolls of great height and a fair size.

LIST OF TIMBER TREES ON RESERVE No. 8.

<i>Eucalyptus robusta</i>	mahogany
" <i>resinifera</i>	red-mahogany
" <i>amygdalina</i>	stringy-bark
" <i>siderophloia</i>	iron-bark
" <i>maculata</i>	spotted-gum
" <i>rostrata</i>	flooded-gum
" <i>crebra</i>	white narrow-leafed iron-bark
<i>Callistemon saligna</i>	broad-leafed tea-tree
<i>Angophora intermedia</i>	apple-tree
<i>Melaleuca styphelioides</i>	prickly-leafed tea-tree
" <i>leucadendron</i>	white tea-tree
<i>Syncarpia laurifolia</i>	turpentine-tree
<i>Tristania neriifolia</i>	water-gum
" <i>suaveolens</i>	swamp-mahogany
<i>Acacia Cunninghamii</i>	bastard-myall
" <i>decurrens</i>	green-wattle
<i>Banksia integrifolia</i>	honeysuckle
<i>Casuarina tenuissima</i>	forest-oak
" <i>quadrivalvis</i>	swamp-oak

(No. 9.)

Number nine is a well situated hardwood reserve, containing about twenty-five square miles, near Lawrence, at no great distance from the Clarence River, and easily accessible from different localities where timber is likely to be required. It contains some excellent blue-gum, bastard-box, and iron-bark, as well as several other kinds.

LIST OF TIMBER TREES ON RESERVE No. 9.

<i>Eucalyptus siderophloia</i>	iron-bark
" <i>amygdalina</i>	stringy-bark
" <i>botryoides</i>	blue-gum
" <i>saligna</i>	grey-gum
" <i>tereticornis</i>	bastard-box
" <i>stellulata</i>	white-gum

LIST OF TIMBER TREES ON RESERVE No. 9—*continued*.

<i>Acacia Cunninghamii</i>	bastard-myall
<i>Banksia integrifolia</i>	honeysuckle
„ <i>serrata</i>	honeysuckle
<i>Tristania neriifolia</i>	water-gum
„ <i>conferta</i>	white-box or brush-box
<i>Callistemon saligna</i>	broad-leaved tea-tree
<i>Melaleuca styphelioides</i>	prickly-leaved tea-tree
„ <i>leucadendron</i>	white tea-tree
<i>Syncarpia laurifolia</i>	turpentine-tree
<i>Casuarina tenuissima</i>	forest-oak
„ <i>quadrivalvis</i>	swamp-oak

(No. 10.)

Number ten is a large reserve, containing about one hundred and twenty-five square miles, situated at Shannon Brook, near Wyon, and contains a great deal of excellent timber, of so many varieties that it is likely to prove valuable.

Much of the timber is of first-rate quality, particularly the iron-bark, stringy-bark, black-butt, and grey-box amongst the hardwoods; and pine, silky-oak, and yellow-wood amongst the brush timbers. The cypress-pine is plentiful on the ranges, and broad-leaved tea-tree, of large size, are very abundant on the moist flats.

LIST OF TIMBER TREES ON RESERVE No. 10.

<i>Araucaria Cunninghamii</i>	Moreton Bay pine
<i>Frenela columellaris</i>	cypress-pine
<i>Grevillea robusta</i>	silky-oak
<i>Stenocarpus saligna</i>	beef-wood
<i>Achras australis</i>	black-apple
<i>Diploglottis Cunninghamii</i>	native-tamarind
<i>Eugenia myrtifolia</i>	brush-cherry
<i>Acacia glaucescens</i>	bastard-myall
„ <i>Cunninghamii</i>	bastard-myall
<i>Daphnandra micrantha</i>	light yellow-wood
<i>Banksia integrifolia</i>	honeysuckle
<i>Casuarina tenuissima</i>	forest-oak
„ <i>quadrivalvis</i>	swamp-oak
<i>Tristania conferta</i>	white or bastard-box
„ <i>neriifolia</i>	water-gum
<i>Melaleuca leucadendron</i>	white tea-tree
<i>Callistemon saligna</i>	broad-leaved tea-tree
<i>Eucalyptus siderophloia</i>	iron-bark
„ <i>amygdalina</i>	stringy-bark
„ <i>resinifera</i>	red-gum
„ <i>maculata</i>	spotted-gum
„ <i>botryoides</i>	blue-gum
„ <i>pilularis</i>	black-butt
„ <i>rostrata</i>	flooded-gum
„ <i>crebra</i>	white narrow-leaved iron-bark
„ <i>saligna</i>	grey-box

(No. 11.)

Number eleven is a smaller reserve, containing two thousand five hundred and sixty acres, well situated at a short distance from Casino, and contains a very large variety of fine timber, consisting of between thirty and forty species of brush timbers and hardwood. Amongst the former the *Araucaria Cunninghamii* (pine), *Ceratopetalum apetalum* (coach-wood), and *Daphnandra micrantha* (light yellow-wood), are especially fine; and some capital grey-gum, flooded-gum, and grey-box, are amongst the hardwoods.

LIST OF TIMBER TREES ON RESERVE No. 11.

<i>Araucaria Cunninghamii</i>	Moreton Bay pine
<i>Stenocarpus saligna</i>	
<i>Grevillea robusta</i>	silky-oak
<i>Helicia glabriflora</i>	
<i>Orites excelsa</i>	
<i>Alphitonia excelsa</i>	
<i>Endiandra virens</i>	
<i>Tetranthera species?</i>	
<i>Podocarpus spinulosus</i>	white-pine
<i>Achras australis</i>	black-apple
<i>Diploglottis Cunninghamii</i>	native-tamarind
<i>Eugenia Ventenatii</i>	large-leaved water-gum
<i>Baloghia lucida</i>	brush blood-wood
<i>Anopteris Macleayanus</i>	

LIST OF TIMBER TREES ON RESERVE NO. 11—*continued*.

<i>Epicarpurus orientalis</i>	elm
<i>Ceratopetalum apetalum</i>	coach-wood
<i>Schizomeria ovata</i>	lightwood
<i>Harpullia Hillii</i>	
<i>Sterculia acerifolia</i>	flame-tree
" <i>lurida</i>	sycamore

<i>Eucalyptus stellulata</i>	white-gum
" <i>siderophloia</i>	iron-bark
" <i>amygdalina</i>	stringy-bark
" <i>rostrata</i>	flooded-gum
" <i>resinifera</i>	red-gum
" <i>robusta</i>	mahogany

(No. 12.)

Number 12 is a large reserve, containing eighty-eight square miles, situated on the Macpherson Range and the northern side of Mount Warning, at the head of the Tweed River, and probably contains a greater variety of timber trees than are to be found on the same area in any part of New South Wales.

Several species of tropical trees are to be found here which do not extend further south.

The large cedar has been nearly all cut, but there are a great many trees of small size which will prove valuable in a few years. The trees of *Flindersia Greavesii* (bolboro), *Sloanea australis* (maiden's-blush), *Geissois*, and *Eugenia* are especially fine and numerous.

The great quantity of first-rate timber on this reserve renders it very valuable; for not only are the brush timbers fine, but large, tall, and sound trees of several species of *Eucalyptus* are abundant.

This reserve contains about seventy species of timber trees.

The area of this reserve is large, but it can easily be reduced at some future time if necessary; but so much of the best timber has been cleared away during the last few years on the Tweed River, that I would strongly recommend this reserve should remain as it is for some years, when the cedar, which is now becoming so scarce, would prove of great value.

LIST OF TIMBER TREES ON RESERVE NO. 12.

<i>Cedrela Toona</i>	red-cedar
<i>Eugenia Jambolana</i>	durobbi
" <i>Ventenatii</i>	broad-leafed water-gum

Casuarina tenuissima	forest-oak
" quadrivalvis	swamp-oak
Grevillea robusta	silky-oak
Banksia integrifolia	honeysuckle

(No. 13.)

Number thirteen is a well situated reserve, containing about thirty-five square miles, on the south arm of the Tweed River. The greater part of the timber is very fine, comprising about fifty species of the most valuable timbers in the Colony; the young cedar trees are numerous, and there are yet a few fair-sized trees left.

The Gmelina Leichhardtii (white beech), Geissois Bentharii, Echinocarpus australis, Endiandra, Ceratopetalum, and Marara, are magnificent trees, and very numerous, as well as the narrow-leafed iron-bark, brush stringy-bark, and grey-gum.

(No. 14.)

Number fourteen. This reserve contains an area of about forty-eight square miles. It is situated on Terania Creek, a few miles above Lismore, and contains about sixty species of excellent timber-trees, comprising a great many cedars of small size, and some very fine *Araucaria Cunninghamii*, *Flindersia Greavesii*, *Dysoxylon Fraseranum*, and *Olea paniculata*, as well as several species of *Eucalyptus*, particularly the iron-bark, black-butt, and stringy-bark.

(No. 15.)

Number fifteen is a large reserve, and well situated at Cloud's Creek, on the road from Grafton to Armidale, which runs through it, and contains about 100 square miles. The timber trees, comprising between fifty and sixty species, many of them very fine. A good deal of cedar is yet standing, but of small size generally, and, as in most cedar-brushes, there has been great waste. Even now, in the vicinity of this reserve, the sawyers are cutting trees not more than 20 inches in diameter, and from these they take one or two 10-foot logs, and the rest is left to rot; there is, of course, at all times a great waste of cedar when such small trees are cut down.

The area of this reserve is large, but as a great deal of timber is likely to be required to supply the Western Districts, and much of that toward Armidale is of a very inferior quality, it is advisable to reserve as much as possible here, especially as there is so much good timber in it, such as *Daphnandra micrantha* (light-yellow wood), *Cadellia monostylis* (New England tulip-wood), *Ceratopetalum apetalum* (coach-wood), *Olea paniculata*, and several others, which are numerous, with tall straight trunks and perfectly sound. The *Araucaria Cunninghamii* (pine) are particularly fine and abundant; of the latter but very little has been cut at present. Some excellent hardwood is also abundant on this reserve, particularly *Eucalyptus bicolor* or white-box, which is highly spoken of by those who have used it, and is said to be the best hardwood in New England.

(No. 16.)

Number sixteen is a large reserve, situated on the Boyd River, at Broadmeadows, containing one hundred and five square miles, and the timber is of first-rate quality, consisting of about forty species of brush timbers and hardwoods, such as pine, rosewood, cypress-pine, iron-wood, turpentine, iron-bark, spotted-gum, stringy-bark, and bastard-box, all of which are exceptionally fine trees, and generally sound. The reserve is well situated, and will furnish a large supply of timber in a locality where it is likely to be much required in a few years.

(No. 17.)

Number seventeen is a small reserve, containing six hundred and forty acres, and well situated, at Cudgen, being a continuation of what is known as Cudgen Brush, which has all been free selected and nearly cleared.

It is at no great distance from the entrance to the Tweed River, on the south side, and good timber is already becoming scarce in the vicinity.

Although

Although small, this reserve contains about forty species of timber trees, many of them very fine, with tall straight trunks of large size, particularly *Eugenia Jambolana* (durobbi), *Tarrietia Carronii* (byong or iron-wood), *Gmelina Leichhardtii* (beech), *Flindersia Greavesii* (bulboro), *Elæocarpus grandis* (blue-fig), *Callistemon saligna* (broad-leafed tea-tree), and *Marara*, an undescribed tree, belonging to the natural order *Saxefragaceæ*, producing timber of an excellent quality, as well as rosewood and a fair quantity of young cedar.

Since Cudgen Brush has been free selected, this is the only place where a reserve of good timber could be made near the village of Cudgen, and will in a few years be very valuable.

(No. 18.)

Number eighteen is a small reserve, situated at Chindra, near Terranora, on the north side of the Tweed River. It contains about four hundred acres, and is well filled with good timber, consisting of about forty species, many of them not only fine trees but very numerous, particularly *Daphnandra micrantha*, *Rhus rhodanthema*, *Dysoxylon Fraseranum*, *Gmelina Leichhardtii*, and *Harpullia pendula*.

The large cedar has been all cut; but there are a good many trees of small size, which will ultimately prove of great value if allowed to stand.

This is the only situation on the north side of the Tweed River, near the Heads, where a reserve can be made, and, from the great variety of splendid timber it contains, will be valuable in the locality after a time, as the clearing has gone on very rapidly during the last few years in the vicinity.

(No. 19.)

Number nineteen is a reserve of twelve hundred and eighty acres, situated at Brokenhead, about fourteen miles from Ballina, on the Richmond River, generally known as the Three-mile Scrub. It contains about fifty species of timber trees, many of them of large size and sound, particularly *Ceratopetalum apetalum*, *Tarrietia argyrodendron*, *Dysoxylon Fraseranum*, *Araucaria Cunninghamii*, *Eucalyptus siderophloia*, *Eucalyptus rostrata*, and *Eucalyptus pilularis*. This is the only reserve which can be made near the Richmond River Heads, and, as the greater part of the best timber on the lower part of the river has been cleared off, it will ultimately be much required, and will furnish a large supply of good timber.

(No. 20.)

Number twenty is a well situated reserve, near the Grafton and Armidale road, in New England, between that road and Allan's-water. It contains a great variety of first-rate timber, and very little except cedar has been cut out of it, nearly all the large trees of which have been cut to supply Armidale and other places to the westward; trees are now being sawn in the vicinity, of very small size, and consequently there is great waste, as stated in report No. 15.

This reserve also contains some of the finest pine in the Colony, many of the trees being from 4 to 5 feet in diameter, and very tall. It also contains an immense number of fine trees of *Fagus Carronii*, a true beech; this timber has been but very little used at present, but very highly spoken of by those who have used it. Large quantities of the New England tulip-wood (*Cadellia monostylis*) are growing here; although these trees are not large, they produce beautiful wood of a brown colour in the centre, and a delicate yellow near the outside, easily worked, and takes a fine polish.

Akania Hillii, or prickly-ash, attains to a larger size here than on any of the other reserves. There are also a great many fine trees of flooded-gum, grey-gum, blue-gum, and white-box; the latter is said to be the best hardwood to be found for many miles round.

The *Araucaria Cunninghamii* (pine) on this reserve is growing at a greater altitude and further west, perhaps, than is to be found in any part of the Colony, proving it to be capable of standing a greater degree of cold than is generally supposed, as it is growing here within a few miles of the Guy Fawkes, which is higher than Armidale, and exposed to sharp frosts in winter.

„ stellulata	white-gum
„ saligna	grey-gum
„ pilularis	black-butt
„ species?	broad-leaved stringy-bark
„ hæmastoma	blue-gum

GENERAL REMARKS.

It will be seen from the lists of timber-trees appended to this report that most of the reserves contain a great many species, some of which have long been known to produce wood of the best quality for the various purposes to which they have been applied, while many others have never yet been properly tried; still, there is every reason to believe that several species will prove eminently useful for many purposes, if a due regard is paid to the time of cutting, seasoning, &c.

Most of these reserves are surrounded with good timbers of the same description as those reserved, and from this source a large supply of most kinds may be obtained for some time to come, with the exception of cedar, the large trees of which have been rapidly felled and taken during the last ten years from all the cedar brushes in the Colony, and the supply has greatly diminished in consequence.

From long habit in cutting nothing but cedar, many of the sawyers are felling trees of small size, thus tending still more rapidly to reduce the quantity to be furnished in future.

The small cedar, which is not suitable for making furniture, is used for various purposes, where other woods would answer as well. A great deal is cut on the borders of New England, and sent to the various diggings to the westward, for the purpose of making sluice-boxes, small buildings, &c., and unless something is done to prevent the cutting of trees under a certain size, and to stop the great waste in the forests, cedar must necessarily become very scarce in a few years.

There are other timber-trees which at one time were so plentiful on the Clarence River, such as *Harpullia pendula* (tulip-wood), and *Villaresia Moorei*, are now become so scarce that the tulip-wood can only be obtained in small quantities from the Richmond and Tweed Rivers, while *Villaresia* is only sparingly found on the Clarence.

Several of the reserves now reported on contain little else but hardwood, such as *Eucalyptus*, *Angophora*, *Tristania*, and *Melaleuca*, with *Casuarinas*, *Banksias*, and *Acacias*, on some portions,—as those at Coaldale, Fairfield, and Lawrence, as well as those at Glen Ulgie and Coldstream, reported on 28th December last; but all the other reserves contain both hardwood and brush timbers in great variety, as that at the north side of Mount Warning, on the Tweed, containing about seventy species; that at Terania Creek, sixty; and that at Cloud's Creek, on the Grafton and Armidale Road, between fifty and sixty species. The latter reserve, and that between Allan's Creek and the Armidale Road, which contains large forests of a true beech, must prove of great value, as the timber between them and Armidale is generally of a very poor description, and the timber from Allan's and Cloud's Creeks is of easy access from the road.

The trees of *Cadellia monostylis* (New England tulip-wood), and *Daphnandra* (light yellow-wood), are both larger and more numerous here than in any other part of the Colony; neither of them have been brought into use to any extent, although both are very beautiful woods,—the former a rich yellow and brown, and the latter a delicate yellow colour.

The *Fagus Carronii* (beech), only found at and near the head waters of the Bellinger, in New England, is very abundant here; it is, however, but little known at present, but is likely to prove a valuable timber for many purposes. It is now being tried in the district, but so little attention is paid to the time of cutting and seasoning that it is not very likely to have a fair trial.

The area of some of the reserves may appear large, but it has been thought advisable to make them so in the localities where it has been done to meet future requirements; and, if considered necessary, they may be reduced at some future time, although it is hardly likely they will be found too extensive in any case, when the rapid destruction of timber during the last eight or ten years is taken into consideration.

The District Surveyor, Mr. P. R. Donaldson, has been careful, as far as possible, not to check the operation of free selection, either by making the reserves, where practicable, on poor stony ridges, or in other localities where there is a great deal more unalienated land of the same description in the neighbourhood than is likely to be required for sometime.

It is evident that the Act and Regulations for cutting timber on Crown Lands generally are very little regarded, and something should be done to enforce them, particularly in regard to the barking of trees, as an immense number are annually destroyed by the system almost invariably adopted, of taking one sheet of bark from a tree and leaving the rest, when, if the trees were felled, and all the available bark taken, nothing like the number of trees would be killed to obtain the quantity of bark required; and fine young trees are generally selected for barking. It is not at all uncommon, when teams are returning without loading, for the drivers to strip a load of bark for sale, and to obtain this they seldom fall a tree.

The fees paid to the Government for licenses to cut timber on Crown Lands are nothing like what they would be if the regulations were more strictly enforced, for it is quite certain that not more than one in six pay a license, either for cutting cedar or hardwood, who are employed at it; this is very unfair to the honest man who pays his license, and a great temptation to him to evade it, when he knows so many are working without license; thus the revenue is defrauded, and the public estate injured.

The vegetation on the small islands which have been reserved on the Clarence River is likely to be destroyed, unless they are looked after, especially those below Grafton, as Heliman, Turkey, Freeburns, and other islands. The brush has already been partially destroyed on one of them, and steps should be taken to check this, or a great deal of damage may soon be done on these useful ornaments to the river.

I append a plan and description by Mr. W. A. B. Greaves, of reserve No. 20.

In submitting these reports, I take leave to state that I was occupied nearly four months in almost continuous travelling, in all weathers, and I trust my endeavours to carry out my instructions will meet with the approval of the Honorable the Secretary for Lands.

I have, &c.,
W. CARRON.

The plan alluded to in this Report on No. 20 Reserve was only a rough sketch by Mr. Greaves made before actual survey.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS.

(SELECTION OF JAMES MARSHALL ON GYRAH RIVER.)

Ordered by the Legislative Assembly to be printed, 15 January, 1873.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 16 July, 1872, That there be laid upon the Table of this House,—

“ Copies of all Correspondence between the Government and any person
“ or persons having reference to land selected by James Marshall, on the
“ Gyrah River, on the 21st October, 1869 ; and likewise, copies of all
“ reports and proceedings in any arbitration cases between the Manager
“ of the Bank of New South Wales and James Marshall, in connexion
“ with the said land.”

(*Mr. Terry.*)

SCHEDULE.

NO.	PAGE.
1. Report of Mr. Licensed-Surveyor Mann to Surveyor General, transmitting plan of a portion of land applied for by Robt. Marshall, as an additional conditional purchase. 21 December, 1868.....	3
2. Memo. from Surveyor General to Licensed-Surveyor Mann, with minutes thereon. 20 May, 1869	3
3. Mr. D. K. M'Intyre, on behalf of Mr. S. Smith, to Surveyor General, applying to purchase 40 acres of improved Crown Land, with minutes thereon. 10 June, 1869	4
4. Under Secretary for Lands to Mr. S. Smith, in reply to above. 1 October, 1869	4
5. Mr. D. K. M'Intyre (for Mr. S. Smith), in reply to above, with minutes thereon. 11 October, 1869	4
6. R. Marshall, application for conditional purchase of 40 acres of unimproved land. 21 October, 1869	5
7. Mr. D. K. M'Intyre (for Mr. S. Smith) to the Under Secretary for Lands, requesting an answer to previous letter of the 11th instant. 29 October, 1869	5
8. Same to same, respecting the applications of R. Marshall and S. Smith for the same portion, with minutes thereon. 4 November, 1869	6
9. Same to same, with minutes thereon. 15 December, 1869	6
10. Same to same, with minutes thereon. 22 December, 1869	7
11. Under Secretary for Lands to Mr. S. Smith, in reply. 17 January, 1870	7
12. Same to Under Secretary for Finance and Trade, informing him that Mr. S. Smith has received permission to pay into the Treasury £1 ls., as a fee for appraising the value of improvements effected on the land in question. 17 January, 1870	8
13. Mr. R. Marshall, appointing arbitrator as sole appraiser to fix and determine the value of improvements on certain disputed land on Gyrah River, enclosing declaration of Mr. Allingham. 2 March, 1870	8
14. Under Secretary for Lands to Mr. R. Marshall, informing of the cancellation of his conditional purchase of 40 acres, and enclosing form of refund of the deposit paid on account of same. 8 March, 1870	8
15. Same to Land Agent, Armidale, informing to same effect. 8 March, 1870	9
16. Mr. G. R. Allingham, extending time for making award. 30 April, 1870	9
17. Under Secretary for Finance and Trade to Under Secretary for Lands. 5 May, 1870.....	9
18. Report of Arbitrator (Mr. G. R. Allingham), with enclosure. 30 May, 1870	9
19. Robert Marshall to Surveyor General, complaining of the lessees of Gyrah Run trespassing on his additional selection, with minutes thereon. 30 June, 1870	10
20. Robert Marshall to Minister for Lands, respecting disputed selection between himself and Mr. S. Smith. 15 July, 1870.....	10
21. Mr. Robert Marshall to District Surveyor, Armidale, with minutes thereon. 13 August, 1870	10
22. Mr. R. Marshall to Minister for Lands, complaining of the lessees of Gyrah Run trespassing on his additional selection. 17 September, 1870	11
23. Mr. District Surveyor Greaves to Minister for Lands, reporting on the complaint made by Mr. R. Marshall, in his letter addressed to him respecting his additional selection; Marshall's letter enclosed. 25 May, 1871	11
24. Messrs. Fraser, Legh, and Anderson, to the Minister for Lands, on the same subject. Received on 25 May, 1871...	11
25. Under Secretary for Lands to S. Smith. 6 June, 1871	12
26. Mr. S. Smith to Chief Commissioner of Crown Lands, in reply to above. 26 July, 1871	12
27. Mr. C. M. Palmer, on behalf of Mr. Smith, to Chief Commissioner of Crown Lands, respecting his application for appraisement of improved land in question, with minutes thereon. 21 September, 1871	12
28. Under Secretary for Lands to Messrs. Fraser, Legh, and Anderson, in reply to No. 24, and enclosing copy of letter sent to Mr. S. Smith. 25 September, 1871.....	12
29. Messrs. Fraser, Legh, and Anderson, to Under Secretary for Lands, in reply to No. 28, with minutes thereon. 10 October, 1871	13
30. The Under Secretary for Lands to Robert Marshall, same subject. 31 October, 1871	13
31. Robert Marshall to Minister for Lands, in reply to No. 30, with minutes thereon. 12 December, 1871	13
32. Under Secretary for Lands, appointing Mr. E. P. Mann appraiser, with declaration of Mr. Mann. 9 January, 1872	14
33. Shepherd Smith, nominating and appointing Mr. E. P. Mann appraiser. 25 January, 1872	14
34. Statement of the facts of the case in dispute between S. Smith and R. Marshall, with minutes thereon. 6 February, 1872.....	14
35. Mr. E. P. Mann (appraiser appointed), reporting as to the value of improvements, with minutes thereon. 11 March, 1872	15
36. Crown Solicitor to Under Secretary for Lands, enclosing copy of Solicitor General's opinion, with minute thereon. 23 March, 1872	15

40. Same to Under Secretary for Finance and Trade. 20 November, 1872	17
41. Same to Land Agent, Armidale. 20 November, 1872	17
42. Same to R. Marshall. 20 November, 1872	17

CROWN LANDS.

No. 1.

REPORT FROM MR. LICENSED-SURVEYOR MANN TO THE SURVEYOR GENERAL, TRANSMITTING PLAN, &C.

Sydney, 21 December, 1868.

SIR,

I have the honor to transmit a plan* shewing the position of a portion of land situated in the parish of Donald, county of Sandon, being the land applied for by Robert Marshall under section 21, "Crown Lands Alienation Act of 1861":—

Containing.....	40 acres.
Soil.....	Light loam.
Water.....	Good.
Timber.....	Gum, peppermint, and stringy-bark.
Name of run.....	Gyrah.
Survey completed.....	6th November, 1868.

* Appendix.
Letter of In-
structions, B.C.,
18th September,
1868/66.
C.P., 68/1740.
No. 48.

There are no improvements upon this portion; Marshall resides on his first conditional purchase of 60 acres, which is improved by building, clearing, and fencing, to the value of £160.

This portion is measured according to a design for the subdivision of the adjacent land.

I have, &c.,

EDW. P. MANN,
Licensed Surveyor.

15 September, 1869.

No. 2.

MEMO. FROM THE SURVEYOR GENERAL TO MR. LICENSED-SURVEYOR MANN.

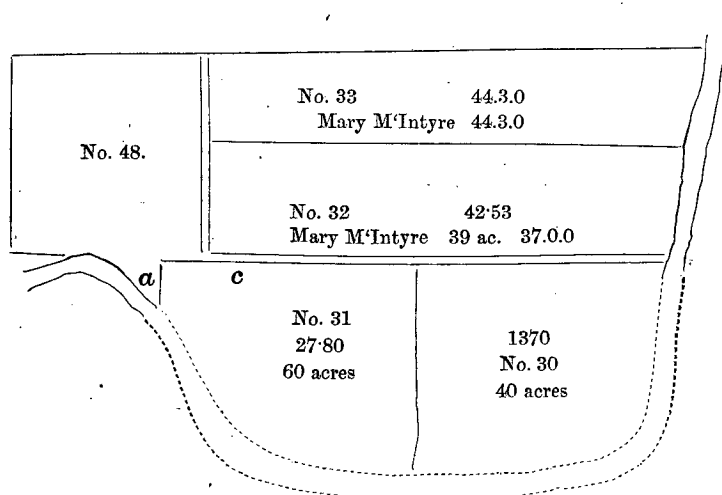

Charting Branch.

20 May, 1869.

MEMORANDUM of subjects requiring explanation or completion in connection with the survey and plan of No. 48, parish of Donald, county of Sandon, transmitted by Mr. Licensed-Surveyor E. P. Mann, letter No. 68/108, of December 21st, and on which Mr. Mann's report in explanation is requested.

Subject.

Report.

The distance from A to C is 3.50 chains.—EDD. P. MANN, 9 Sept., /69.

The northern boundary of portion 31 is 27.80 as entered in my field-book. If I have inserted any other length in my plan it is an error. The top of my figure 8 at first sight looks like 5.—W. A. B. GREAVES, 6 Oct., 1869.

The distance from A to C, taken from the above figures, does not accord with the distance given on the plan of portion No. 48.—P. F. ADAMS, 22 May. Folio 405.

Charting Branch, 22 September, 1869.

Mr. Greaves can perhaps explain the cause of the discrepancy within set forth, as the surveys adjacent to No. 48 are by him.—J.S.A., for S. Gl., 12 Oct. See reply on 1st page.

No. 3.

No. 3.

MR. D. K. M'INTYRE (ON BEHALF OF MR. S. SMITH) TO THE SURVEYOR GENERAL.
Application for the Purchase of Improved Crown Lands.

Gyrah Run, by Armidale,
10 June, 1869.

SIR,

Having erected the improvements detailed below, and which I estimate to be worth £40, I have the honor to apply that I may be permitted to purchase, without competition, under the provisions of the "Crown Lands Alienation Act of 1861," the Crown Lands on which they stand, and which are described hereunder.

The improvements referred to are now in my possession.

I have, &c.,
DUN. K. M'INTYRE,
(FOR SHEPHERD SMITH.)

Nature of Improvements:—

The improvements consist of sheepyard, huts, and fencing.

Description of Land:—

County of Sandon, parish of Donald, town of _____, allotment _____, section _____, 40 acres, on the west bank of the Gyrah River, and about 2 miles below Gyrah head station. It is bounded on the south and east by the Gyrah River; on the west by Robert Marshall's 60 acres conditional purchase; on the north by a line. The nearest Post Town is Armidale.

Referred to the Chief Commissioner of Crown Lands, B.C., 8th July, 1869.—W.M. THOMAS (for the Under Secretary).

Gyrah Run, district of New England, is held under a promise of lease by Shepherd Smith.—A.O.M., Crown Lands Office, B.C., 13 July, 1869. The Under Secretary for Lands.

Mr. Long, Q.—(Written by Mr. Thomas.)

Mr. Licensed Surveyor E. P. Mann for measurement if unobjectionable.—P. F. ADAMS, 17 August, No. 69/104.

As this land has been measured by Mr. Greaves and he has to visit the locality will he be good enough to report hereon?—E. P. MANN, August 20, 1869.

I do not consider the improvements erected upon this portion worth £40. The portion is No. 30 of the parish of Donald, formerly a conditional purchase of D. Cameron, senior (but never occupied); the improvements consist of bough yard, split fence, and hut.—W. A. B. GREAVES, B.C., 69/100, 20 August, 1869.

Applicant should be informed in accordance with Mr. Greaves's report.—G.L., 13/9/69.

No. 4.

THE UNDER SECRETARY FOR LANDS TO MR. S. SMITH.

Department of Lands,
Sydney, 1 October, 1869.

SIR,

No. 3.

In reference to your letter of the 10th June, applying to purchase, in virtue of improvements, 40 acres on the west bank of the Gyrah River, I am directed to inform you that your application cannot be complied with, as it appears from a report obtained from the Surveyor General that the improvements are not worth £40.

2. I am to add that the land will be brought to sale by auction, unless you state, within a month from this date, that you desire to appeal to appraisalment, the fee for which is £2 10s.

I have, &c.,
M. FITZPATRICK.

No. 5.

MR. D. K. M'INTYRE (FOR MR. S. SMITH) TO THE UNDER SECRETARY FOR LANDS.

Gyrah, by Armidale,
11 October, 1869.

SIR,

No. 4.

No. 3.

In reply to yours of the 1st instant, I have to inform you that the improvements on the 40 acres applied for on the west bank of the Gyrah River by Mr. Shepherd Smith, Sydney, on the 10th June last, were not examined for the purpose of ascertaining their value since the application was made. This being so, and as the value of the improvements exceeds £40, I have to request that you withdraw the 40 acres now referred to from sale, till the improvements are reported on by your surveyor. This he has not done as yet.

I have, &c.,
DUN. M'INTYRE,
(FOR SHEPHERD SMITH.)

N.B.—I shall be glad to hear, at your earliest convenience, that the land referred to above is withdrawn from sale.—D.K.M'I.

Mr.

Mr. Smith (through Mr. M'Intyre) states that the improvements, exceeding £40, have not been examined since the application was made. He asks that they may be reported upon by the surveyor, and that the land may, in the meantime, be withheld from sale.—29 October, 1869. (Written by Mr. Thompson.)

Surveyor General.—M.F., 1 Nov.

For papers.—P.F.A.

Mr. Johnson to stop sale, if advertised.—P.F.A., 5 Nov.

The portion herein alluded to is a forfeited C.P., 66-3,088, of D. Cameron, sen., and was offered for sale on the 29th October, 1869, as lot B, por. 30.—A.J., 8 Nov., 1869.

Mr. Smith should probably be so informed.—J.S.A., 8 Nov.

Was the land sold? There is a subsequent paper.—11 Nov.

Withdrawn by the agent, having been conditionally purchased. The name of conditional purchaser is not stated by the agent. All papers herewith.—16th.

Ascertain the name of the conditional purchaser, and prepare the usual letters, informing the persons interested that the value of the improvements must be determined by arbitration.—16 Nov.

The land was selected by Robert Marshall on the 21st October last.—17/11/69.

No. 6.

MR. R. MARSHALL'S APPLICATION FOR CONDITIONAL PURCHASE.

[Alienation Act, section 21.]

C.P., No. 69/4,088. Land Agent's No. 131, of 1869.

Application for the conditional purchase without competition, of 40 acres roads unimproved Crown Land, under section 21 of the "Lands Alienation Act of 1861."

RECEIVED by me, with a deposit of £10, this 21st day of October, 1869, at 10:15 o'clock.

SYDNEY BLYTHE,

Agent for Sale of Crown Lands at Armidale.

S. 348-1660.

21 October, 1869.

Sir,

I am desirous of purchasing, without competition, under the 21st section of the "Crown Lands Alienation Act of 1861," the portion of unimproved Crown Land hereunder described, containing 40 acres roads, which adjoins my conditional purchase of 60 acres, made on the 2nd August, 1866; and I herewith tender the sum of £10, being a deposit at the rate of five shillings (5s.) per acre on the area for which I apply.

I am, &c.,

ROBERT MARSHALL,
Armidale.

To the Agent for the
Sale of Crown Lands at Armidale.

DESCRIPTION.

County of Sandon, parish of Donald, 40 acres, being portion No. 30, advertised for sale by auction on 29th October, 1869, as lot B, original C.P. under sec. 13, 2nd August, 1866, 60 acres; additional C.P. under 21 sec., 16th July, 1868, 40 acres.

Cancelled by 69/13,596.
Revoked by 72/4,393, Mis.

No. 7.

MR. D. K. M'INTYRE (FOR MR. S. SMITH) TO THE UNDER SECRETARY FOR LANDS.

Gyrah, by Armidale,
29 October, 1869.

SIR,

I have not as yet received an answer to mine of the 11th instant, of which the following is a copy, addressed to you:—"Sir,—In reply to yours of the 1st instant, I have the honor to inform you that the improvements on the 40 acres applied for on the west bank of the Gyra River, by Mr. Shepherd Smith, Sydney, on the 10th June last, were not examined for the purpose of ascertaining their value since the application was made. This being so, and as the value of the improvements exceeds £40, I have to request that you withdraw the 40 acres, now referred to, from sale, till the improvements are reported on by your surveyor. This has not been done as yet.—I have, &c., DUN. K. M'INTYRE (FOR SHEPHERD SMITH)."

Although what is stated above are the facts in reference to the matters referred to, yet to prevent delay I desire that the improvements be appraised. As I have to be away from here in a few days an immediate answer will oblige.

I have, &c.,

DUN. K. M'INTYRE,
(FOR SHEPHERD SMITH).

No. 8.

No. 8.

MR. D. K. M'INTYRE (FOR MR. S. SMITH) TO THE UNDER SECRETARY FOR LANDS.

Gyrah, by Armidale,
4 November, 1869.

SIR,

Nos. 5 and 7.

No. 3.

While taking the liberty of calling your attention to my communications of the 11th and 29th ultimo, I beg to inform you that on Thursday, the 21st of last month, Mr. Robert Marshall applied for the 40 acres "improved land on the west bank of the Gyrah River" as an additional conditional purchase. This is the same portion of land applied for on the 10th June last by Shepherd Smith, Esq., of Sydney, under section 8 of "Crown Lands Alienation Act of 1861." Mr. Robert Marshall's application for this portion of land, as an additional conditional purchase, must have been made in ignorance of the provisions of the Act. The Act, the Regulations, and the form of application under the Act, describe in the following terms the lands that can and that cannot be conditionally purchased:—

Section 13. On and from the 1st day of January Crown Lands not containing improvements shall be open for conditional sale by selection in the manner following, &c.

Regulation 22. The following class of lands are excluded by the Act from such conditional purchase:—"Town lands, lands containing improvements," &c., under heading "Additional Conditional Purchases."

Regulation 40. Each such purchase shall be subject to all the conditions, save those for occupation and residence, provided for by section 22 of these Regulations.

Form B, which Mr. Marshall must have filled up, signed, and handed to the Land Agent in Armidale, is as follows:—"Sir,—I desire to purchase the portion of unimproved Crown Land hereunder described," &c.

As these extracts show that Mr. Marshall's application, now under consideration, being directly opposed to the provisions and regulations of the Crown Lands Alienation Act, cannot be entertained, even as a legal application under the Act, it need not in any way interfere to prevent an immediate answer to my communications.

I am sorry to be under the necessity of troubling you so often in reference to this matter, but as my doing so on this occasion at least is forced upon me, I hope you will bear with me.

I have, &c.,

DUN. K. M'INTYRE.

N.B.—About twelve months ago, since Mr. Licensed-Surveyor Mann estimated the improvements on the portion of land referred to above to be worth £36 10s., I heard of no valuation since; but additional improvements have been made since, to the value of some £10 or £20 sterling.—D.K.M'I.

The C. P. application should be placed herewith, and if the land is identical with the improved application, the former should be cancelled.—8/12/69. Yes.—10th Dec. Application in charting-room.—13/12/69. Mr. Trengrouse, 14th. Application not with me. Application herewith.—W.A.T., 18 Jan.

The application enclosed should now, I conclude, under late decision, be cancelled; but Mr. M'Intyre's valuation of the improvements should first be confirmed by the Surveyor.—W.W.S., 19th.

Mr. Adams.—Mr. Greaves reports that there are improvements, consisting of yards, fence, and hut. Their value is to be appraised. Whether of the value of £40 or not, the C.P. should doubtless be cancelled.—J.S.A., 22nd.

In accordance with the within minute of chief draftsman, and with decision on 69-6539 Misc., the conditional purchase of Robert Marshall should be cancelled.—22nd.

Cancellation noted on plans.—W.A.T., 11 March, /70.

No. 9.

MR. D. K. M'INTYRE (FOR MR. S. SMITH) TO THE SECRETARY FOR LANDS.

Roslyn Terrace,
Sydney, 15 December, 1869.

SIR,

Referring to the letter of the late Under Secretary for Lands, of the 29th ultimo, I have the honor to submit that there must be some error in the proceedings which have led to the proposed submission to arbitration, as the land in question is beyond a doubt subject only to the claims of the lessees of the Gyra Run in virtue of their improvements.

I have, &c.,

DUN. K. M'INTYRE,
(FOR SHEPHERD SMITH.)

Cannot be
obtained.
Gyra, 40 acres
improved land.

No. 7.

The application for this land, made by Mr. M'Intyre, on behalf of the Bank of New South Wales, was rejected on the surveyor's report that the improvements were not worth £40, and Mr. Smith, representing the Bank, was informed that the portion would be brought to auction sale unless within a month he signified his intention to appeal to appraisal. This he did by letter of the 29th October, but before any further steps could be taken the land in question was conditionally purchased by one Robert Marshall, as unimproved land; and in accordance with the usual practice in such cases, Messrs. Smith and Marshall were informed that the value of the improvements must be determined between them by reference to arbitrators by them severally appointed.

Mr.

Mr. M'Intyre has, I understand, personally objected to this mode of determining the matter, and has requested that the arbitration may be between the Government and the improver (the Bank), to the exclusion of the conditional purchaser, who would thus not be represented.

Whether Mr. M'Intyre's request should be complied with is a question for the decision of the Minister for Lands.—18th. (Written by Mr. Thomas.)

The C.P. cannot be allowed unless so as to exclude the improvements. The land certainly is not unimproved land. The question to be determined as between Mr. M'Intyre and the Government is the value of the improvements. If these do not amount to £40 in value, the purchase by Mr. M'Intyre, under the 8th section of the Alienation Act, would be contrary to the practice of the office, nor am I aware under what authority Mr. M'Intyre can claim to purchase in contravention of the practice; but it is quite clear that the conditional purchaser cannot be allowed to select as he proposes.—W.F., Dec. 21, 1869.

See letter from Mr. M'Intyre, in which he requests that Commissioner Harriott may be instructed to appraise the improvements. Whether Mr. M'Intyre's request should be complied with, or whether the appraiser for the district, Mr. Mann, should act, should perhaps be decided before effect is given to the above. Marshall's conditional purchase must, I apprehend, be cancelled under the decision recently given. The improvements are on a measured portion, which, if conditionally purchased, must be taken as measured.—6th. (Written by Mr. Thomas.)

To be appraised in the ordinary manner.

Immediate steps should be taken to give effect to decision as to cancellation of conditional purchase.—14th. (Written by Under Secretary.)

No. 10.

MR. D. K. M'INTYRE (FOR MR. S. SMITH) TO THE SECRETARY FOR LANDS.

Roslyn Terrace, Macleay-street, Sydney,
22 December, 1869.

SIR,

In my letter of the 15th instant, in reference to improvements on a portion of land on the west bank of the Gyrah River, I neglected to state that on the following grounds I consider Mr. Harriott, Commissioner of Crown Lands, Armidale, as suitable a person as can be appointed to appraise the value of these improvements:—

1st. He has experience in such matters.

2nd. The Government and the lessee having confidence in him can appoint him conjointly; and—

3rd. From his being Commissioner of Crown Lands his appointment will save expense.

Taking these facts into consideration, I hope Mr. Harriott will be appointed to appraise the value of the improvements referred to.

I have, &c.,

DUN. K. M'INTYRE,
(FOR SHEPHERD SMITH.)

Mr. Long.—In whose district is the land containing the improvements situated?—6th. (Written by Mr. Thomas.)

In Mr. E. P. Mann's district.—G.L., 6/1/70.

Mr. Mann will therefore, it is presumed, act on behalf of the Government in the appraisement of the improvements, in accordance with the decision on 69/6344 Misc., to which attention is invited.—6th. (Written by Mr. Thomas.)

Yes—pending the existence of present arrangements the usual practice will be followed.—14th. (Written by Under Secretary.)

No. 11.

THE UNDER SECRETARY FOR LANDS TO MR. S. SMITH.

Department of Lands,
Sydney, 17 January, 1870.

SIR,

In reference to the correspondence which has taken place on the subject of the improvements, in virtue of which you applied on behalf of the Bank of New South Wales to purchase 40 acres on the west bank of the Gyrah River, being portion 30, in the parish of Donald, which has since been conditionally purchased by Robert Marshall, I am directed to inform you that the Minister for Lands has now decided that Marshall's purchase must be cancelled, and that the value of the improvements effected by the Bank, which, according to the surveyor's report, are worth less than £40, will be referred to appraisement between the Government and the Bank, on your paying into the Treasury the appraiser's fee of £1 1s.

I have, &c.,

A. O. MORIARTY.

No. 12.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY FOR FINANCE AND TRADE.

Department of Lands,
Sydney, 17 January, 1870.

SIR,

I am directed to inform you that Mr. Shepherd Smith has received permission to pay into the Treasury, on behalf of the Bank of New South Wales, the sum of £1 ls., as the fee for appraising the value of improvements effected by the Bank on 40 acres, on the west bank of the Gyrah River, being portion 30, parish of Donald, and I am to request that you will receive the sum when tendered, and report to me when payment has been made.

I have, &c.,
A. O. MORIARTY.

No. 13.

MARSHALL v. SHEPHERD SMITH.

Appointment of Arbitrators under the "Crown Lands Alienation Act of 1861."

WHEREAS I, Robert Marshall, of Gyrah, near Armidale, in the Colony of New South Wales, farmer, have applied to purchase certain Crown Land, situate at Gyrah River, a description whereof is set out in the schedule hereinafter written; and whereas Shepherd Smith, Esquire, of Sydney, Manager of the Bank of New South Wales, claims the said land in virtue of improvements; and whereas the Minister of the Bank has directed that the matter in dispute shall be settled by arbitration under the "Crown Lands Alienation Act of 1861"; and whereas I am desirous of appointing an appraiser on my behalf in the matter aforesaid: Now I, the said Robert Marshall, do hereby, in pursuance of the provisions of the "Crown Lands Alienation Act of 1861," appoint George Robert Allingham, of Armidale, in the Colony of New South Wales, arbitrator on my behalf, to ascertain the value of the said improvements.

In witness whereof I have hereunto set my hand, this 2nd day of March, 1870,—

R. MARSHALL.

Witness—JAMES ROBERTSON, Armidale.

SCHEDULE REFERRED TO.

40 acres, on the Gyrah River, being portion No. 30 of the parish of Donald, county of Sandon, to determine if the said 40 acres contained £40 worth of improvements on the 21st day of October, 1869.

I, the within-named George Robert Allingham, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully, honestly, and to the best of my skill and ability, hear and determine the matters referred to me under the "Crown Lands Alienation Act of 1861."

G. R. ALLINGHAM.

Subscribed and declared this 30th day of May, A.D. 1870, before me,—

W. A. B. GREAVES, J.P.,
Armidale.

No. 14.

THE UNDER SECRETARY FOR LANDS to MR. R. MARSHALL.

(C.P. 69/4088.)

Department of Lands,
Sydney, 8 March, 1870.

SIR,

I am directed to inform you, that the application made by you at Armidale, on the 21st October, 1869, for the conditional purchase of 40 acres of land, has been cancelled, being for improved land.

2. Enclosed is a form which on being filled up and forwarded to the Treasury, signed by you, together with your deposit receipt, will enable you at once to obtain the refund of the deposit paid on account of the above.

I have, &c.,
A. O. MORIARTY.
(For the Under Secretary.)

[Enclosure.]

New South Wales.

REVENUE REFUNDED.

Department of Lands, Conditional Purchase Branch, Dr. to Robert Marshall.

	Amount to be refunded.
	£ s. d.
For the following refund, viz. :—	
Land Office at Armidale; date of selection, 21st day of October, 1869; deposit paid on 40 acres;	
selection cancelled; deposit to be refunded on 40 acres	10 0 0

I certify that the amount charged in this voucher as to computation, casting, and rate, is correct, and that the refund is duly authorized in terms of the Audit Act.

A. O. MORIARTY, Under Secretary for Lands.

THE UNDER SECRETARY FOR LANDS TO THE LAND AGENT, ARMIDALE.

Department of Lands,
Sydney, 8 March, 1870.

SIR,

I am directed to inform you that the application of Robert Marshall, on the 21st October, 1869, for the conditional purchase of 40 acres of land, has been cancelled, being for improved land.

2. A form for refund of deposit has been forwarded for the signature of the applicant, the nature of which you will be so good as to explain to him, if required.

I have, &c.,

A. O. MORIARTY,
(For the Under Secretary.)

No. 16.

MR. G. R. ALLINGHAM, EXTENDING TIME FOR MAKING AWARD.

Marshall *v.* Shepherd Smith.

Armidale, 30 April, 1870.

I HEREBY extend the time for making my award in the matter of the dispute in which I have been appointed arbitrator between Robert Marshall, of Gyrah, near Armidale, and Shepherd Smith, Esquire, Manager of the Bank of New South Wales, Sydney, to the 30th day of May, 1870.

G. R. ALLINGHAM.

Witness—JAMES ROBERTSON, Armidale.

No. 17.

THE UNDER SECRETARY FOR FINANCE AND TRADE TO THE UNDER SECRETARY FOR LANDS.

The Treasury,
New South Wales, 5 May, 1870.

SIR,

Referring to your letter of the 17th January last, I have the honor to inform you that the sum ^{No. 12} of £1 1s. has been paid into this office by Mr. Shepherd Smith, being the fee payable for appraising 40 acres on the west bank of the Gyrah River, parish of Donald.

I have, &c.,

HENRY LANE.

No. 18.

REPORT OF ARBITRATOR.

Appraisement by single appraiser.

To all to whom these presents shall come, I, Robert George Allingham, of Armidale, in the Colony of New South Wales, send greeting:—

WHEREAS on the 2nd day of March, in the year of our Lord one thousand eight hundred and seventy, I was duly appointed by Robert Marshall, of Gyrah, in the Colony of New South Wales, as the sole appraiser to fix and determine the value of improvements on certain unoccupied Crown Lands, situate at Gyrah River, a description whereof is set out in the Schedule in the paper writing hereto annexed, marked A.: And whereas I have entered upon the consideration of the value of the said improvements, and have heard and considered the evidence produced before me by or on behalf of the said Robert Marshall, no other person claiming to be heard: Now I, the said Robert George Allingham, do hereby declare the value of improvements erected on the land in dispute, on the 21st day of October, 1869, to be £22 10s.; and I assess and fix the costs of this appraisement payable to me at the sum of £2 10s., which said sum I direct shall be paid by Robert Marshall.

In witness whereof I have hereunto set my hand and seal, this 30th day of May, 1870.

G. R. ALLINGHAM,

Sole Arbitrator appointed.

The award as to value of improvements in this case precludes sale under the 8th clause. Should the portion now go on for auction?—G.L., 8/6/70. I think so.—J.S.A. Mr. Johnson, for auction accordingly.

[Enclosure to No. 18.]

A.

40 ACRES, situated on Gyrah River, parish of Donald, to ascertain the value of improvements erected thereon, on the 21st day of October, 1869.

G. R. ALLINGHAM.

No. 19.

MR. R. MARSHALL to THE SURVEYOR GENERAL.

Armidale, 20 June, 1870.

SIR,

Having been annoyed by the lessees of Gyrah Run trespassing on my additional selection, and making improvements thereon, I have the honor to request that you will be good enough to inform me, at your earliest convenience, if the Government intend to recognize the award which has been made in my favor, that I may take such steps as I may consider necessary?

I have, &c.,
ROBERT MARSHALL.

Probably Marshall should be informed that he cannot conditionally purchase improved land. The portion herein referred to is an area of 40 acres, on the Gyrah Run, under lease to Shepherd Smith, and contains improvements, his property, to the amount of £22 10s. He should also be informed that his conditional purchase application has been cancelled, and the land will go to auction.—G.L., 19/7/70.

Marshall should be informed that, as the improvements are on a measured portion which must be taken as measured, he cannot conditionally purchase the land; but the land is not yet, I think, in a position to go to auction. The application of Shepherd Smith to purchase it under the 8th clause has not been dealt with. Smith was told that, according to the surveyor's report, there were not improvements on the land of the value of £40; herewith he states that twelve months previously Surveyor Mann estimated the improvements at £36 10s., and that additional improvements, worth £10 or £20, were afterwards made. He appealed to appraisal, and paid the £1 1s. fee, and was informed that Marshall and himself should appoint an arbitrator to value the improvements. According to the papers he appears to have personally objected to this mode of deciding the matter, considering that the question of the value of the improvements was one between the Government and the improver, and not between the latter and the conditional purchaser. He seems to have taken no steps to act in the arbitration, and an award was duly sent in by Allingham, acting for Marshall. It has, however, been decided that all such proceedings are irregular; and as Marshall's interest in the land is disposed of, I submit that the improvements on the land should be appraised by the Government, and if found of insufficient value then that the parties be informed that the land will be brought to auction.—23rd July. (Written by Mr. Blackman.)

According to the surveyor's report it appears that the improvements at the date of Marshall's conditional purchase were under the value of £40; and the selection therefore (under the decision recently promulgated through the department) should stand, subject to appraisal, if the value be still disputed by Mr. Smith.—W.W.S., 7th.

Approved.—JOHN R.

No. 20.

MR. R. MARSHALL to THE SECRETARY FOR LANDS.

Armidale, 15 July, 1870.

SIR,

I wrote to you concerning the selection which was disputed between me and a man named Smith about a month ago, and have not had any reply to my letter since.

The land in question was left to arbitration, and the award being in my favour, and they are now trespassing and putting improvements on it. If you please write to me and let me know if Government will recognize the award which was made in my favour, as I want to commence and make improvements on it?

ROBERT MARSHALL,
Armidale.

No. 21.

MR. R. MARSHALL to THE DISTRICT SURVEYOR, ARMIDALE.

Armidale, 13 August, 1870.

SIR,

The arbitration between myself and Mrs. Mary M'Intyre having been given, I believe, in my favour, I wish you would inform me whether there is anything else required of me in this matter of my selection?

I have, &c.,
R. MARSHALL.

This is the case of a selector who desires to know if the Government recognize the arbitration it has called touching his claim to an additional selection on the Gyrah River. Marshall has seen me personally, and wishes authority from me to continue his improvements.—W. A. B. GREAVES, 5 Oct., 1870.

It cannot be gathered from these papers, nor from the conditional purchase books, that any arbitration took place in this matter.—28/10/70.

It is not stated in pencil memo. of 2nd November whether there has been any arbitration or not. The papers must have been returned I think before this.—W.W.S., 20 Dec.

Mr. Long.—Who would be the appraiser to act in this instance?—H.A.F., 9 May.

E. P. Mann.—G.L., 9 May, 1871.

No. 22.

MR. R. MARSHALL to THE SECRETARY FOR LANDS.

Armidale,
17 September, 1870.

SIR,

Having been annoyed by the lessees of Gyrah Run trespassing on my additional selection, it being left to arbitration, and the award being in my favour, I have the honor to request that you will be good enough to inform me, at your earliest convenience, if the Government intend to recognize the award which has been made in my favour, that I may take such steps as I may consider necessary?

I have, &c.,
ROBERT MARSHALL.

No. 23.

MR. DISTRICT-SURVEYOR GREAVES to THE SECRETARY FOR LANDS.

MR. ROBERT MARSHALL selected portion No. 30 on the Gyrah River, on the 21st October, 1869, and has occupied ever since. On a claim made by the lessee of the Gyrah Station, Marshall's claim was referred to arbitration under the Crown Lands Alienation Act and an award given in his favour. He has written to the Minister for Lands several letters, requesting to be put in possession of his selection by the Minister recognizing the award thus given, and in consequence of no satisfactory or indeed any reply he is now annoyed by the present lessees of the run, and is in constant reference to me. I desire very much that Marshall should be recognized in his holding, as he informs me he is a very serious loser by the delay that has taken place.

W. A. B. GREAVES, 25/5/71, B.C., 71/45.

[Enclosure.]

Mr. R. Marshall to The Secretary for Lands.

Gyrah River,
24 May, 1871.

Sir,

The additional selection No. 30, which I selected on the 21st October, 1869, and which I am now fencing, and being annoyed by Mr. Fraser, proprietor of Gyrah Station, who says that if I continue fencing it I must do it at my own risk—It is the second time that Mr. Fraser has been annoying me about the land on my own premises, and I do not want to be annoyed by Mr. Fraser or any other gentleman.

I therefore sincerely request that you will see into the matter, and put a stop to it as soon as possible.

I have, &c.,
ROBERT MARSHALL.

No. 24.

MESSRS. FRASER, LEGH, AND ANDERSON to THE SECRETARY FOR LANDS.

(Received, 25 May, 1871.)
Gyrah, Armidale, New England.

SIR,

We do ourselves the honor to inform you that a portion of Crown Lands, forming part of this run, particulars of which are given on the margin, was selected some years ago by a person of the name of Marshall.

On the application of a former owner of the station this selection was cancelled as it contained improvements, and the matter referred to the District Surveyor, who reported that the improvements on the land were not of the value of £40.

Further improvements were then erected on the land by the lessee, after which Marshall again selected the land, and now claims it, together with the improvements, which consist of a hut, sheep-yard, and about 150 roods of split fencing.

We do ourselves the honor, as now owners of the run, to request that you would inform us whether we are entitled to remove the improvements from this portion of land, and thus end the matter in dispute?

We submit that it will be a very great hardship if Crown tenants are not allowed the right to remove improvements valued at less than £40 from land selected on their runs.

This run still stands in the name of Mr. Shepherd Smith, former owner.

We have, &c.,
FRASER, LEGH, & ANDERSON.County Sandon,
Donald, portion
30.

MR. S. SMITH TO THE CHIEF COMMISSIONER OF CROWN LANDS.

Bank of New South Wales,
Sydney, 26 July, 1871.

SIR,

Referring to letter of the 6th ultimo from the Department of Lands, I now beg to make application for an appraisement of value of the improvements on the land, portion 30, parish of Donald, county of Sandon, with the view to purchase.

I have, &c.,
SHEPHERD SMITH,
General Manager.

No. 27.

MR. C. M. PALMER TO THE CHIEF COMMISSIONER OF CROWN LANDS.

Bank of New South Wales,
Sydney, 21 September, 1871.

SIR,

On behalf of Mr. Shepherd Smith I do myself the honor to refer you to his letter of the 26th July last, making an application for an appraisement of value of the improvements on the land, portion No. 30, parish of Donald, county of Sandon, with the view to purchase, and to request that you will favour us with the desired information.

I have, &c.,
CHAS. M. PALMER,
Assistant Secretary.

ACTION should I think be taken on these papers in Alienation Branch. It appears that Marshall has selected certain land claimed by the lessees of Gyrah Run in virtue of improvements. The surveyor reported the improvements to be worth *less than* £40, and therefore not a bar to conditional purchase. The lessees were however allowed to determine the value of the improvements by appraisement; this was done on behalf of Marshall only, and the value placed at £22 10s. It has been decided that the appraisement of improvements should be between the Crown and the owner, and not between the conditional purchaser and the owner; the before-mentioned proceedings, as also all similar proceedings, was deemed irregular (see memo., 23 July), and the parties claiming the improvements were informed in terms of Mr. Stephen's memo. of 7th August.

Marshall, who does not appear to have been informed that the appraisement was irregular, now asks to be placed in peaceable possession of his conditional purchase, the value of the improvements under the appraisement not being a sufficient bar to his conditional purchase, and the lessees ask for an appraisement to be made.—C.E.F., *pro*. Chief Draftsman, 3 Oct., /71.

Papers for Mr. L. Thompson for instructions as to fresh appraisement.

No. 30.

THE UNDER SECRETARY FOR LANDS TO MR. R. MARSHALL.

Department of Lands,
Sydney, 31 October, 1871.

SIR,

In reference to the correspondence which has taken place respecting the 40 acres of land on the Gyrah Run, portion 30, parish of Donald, in dispute between you and the lessees of that run, I am directed by the Minister for Lands to inform you that it has been decided that the determination of the value of the improvements by arbitration between you and the lessees of the run was irregular, and it has been set aside.

2nd. I am now to apprise you that the value of the improvements will be determined by appraisalment on behalf of the Government and the owner of the improvements.

3rd. The necessary instructions for appraisalment will be issued in the course of a few days, and on the receipt of the award you will be further communicated with.

I have, &c.,
W. W. STEPHEN.

No. 31.

MR. R. MARSHALL TO THE SECRETARY FOR LANDS.

Armidale, 12 December, 1871.

SIR,

I am in receipt of your letter dated 31 Oct., 1871, informing me that the Government had decided that the arbitration of the value of the improvements by arbitration between you and the lessees of Gyrah Run, was irregular, and it has been set aside.

I have the honor to inform you that in accordance with your letter of 29th Nov., 1869, I appointed an arbitrator, and on 2nd March, 1870, I gave notice by post to Shepherd Smith, Esq., that I had done so. After the lapse of the stipulated time, my arbitrator proceeded to value, and on the faith of that value I proceeded to fence the whole of the block of land with a good three-rail fence, at a cost of over £25, and think it exceedingly hard that I should be put to any further trouble after giving time, money, and labour.

Yours, &c.,
ROBERT MARSHALL.

This case is fully stated in 71/4331 (enclosed). Marshall now raises objection to the course which has been taken, stating, that on faith of an appraisalment resulting in his favour, he has made further improvements at a cost of £25.—(Written by Mr. Thompson) 25 Jany.

Mr. Blackman,—I should like a full statement of this case, as it does not appear to me to be stated in 71/4331, nor does there appear to have been any decision on the case.—J.B.W., 27 Jany.

No. 32.

No. 32.

APPOINTMENT OF APPRAISER BY GOVERNMENT.

WHEREAS on the 21st October, 1869, Robert Marshall, of Armidale, in the Colony of New South Wales, has conditionally purchased under the 21st section of the Alienation Act, 40 acres on the Gyra Run; and whereas Mr. Shepherd Smith, of Sydney, in the Colony of New South Wales, has objected to the purchase by Robert Marshall on the ground of his having improvements thereon to the value of £40, and of which land a description is set out in the Schedule hereinafter written: Now I, the Under Secretary for Lands, having been duly authorized by the Minister for Lands, in pursuance of the powers vested in him under and by virtue of the "Crown Lands Alienation Act of 1861," do hereby appoint Edward Peter Mann, of Armidale, in the Colony of New South Wales, to be the appraiser on behalf of the Crown, to appraise the value of the improvements on the said land at the date on which it was conditionally purchased by Marshall.

In witness whereof, I have hereto set my hand, this 9th day of January, 1872,—

LINDSAY G. THOMPSON.
(For the Under Secretary.)

Schedule referred to:—

40 acres, portion 30, parish of Donald, Gyra Run, county of Sandon.

I, the within-named Edward Peter Mann, do solemnly and sincerely declare, that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me under the "Crown Lands Alienation Act of 1861."

EDW. P. MANN.

Subscribed and declared this 23rd day of January, A.D. 1872, before me,—

C. D. FENWICK, J.P.

No. 33.

MR. E. P. MANN NOMINATED AND APPOINTED APPRAISER.

(A.)

WHEREAS I, Shepherd Smith, of Sydney, in the Colony of New South Wales, have made application to purchase certain unoccupied Crown Lands, situate at Gyrah Station, parish of Donald, portion 30, a description whereof is set out in my letter to the Minister for Lands, bearing date 21st September, 1871; and the Minister for Lands has intimated that he is willing to appoint Mr. Edward Peter Mann, of Armidale, in the Colony of New South Wales, to appraise the value of the said land on behalf of the Government; and whereas I am desirous of concurring in the appointment of the said Mr. Edward Peter Mann as such appraiser as aforesaid: Now therefore, I, the said Shepherd Smith, do hereby nominate and appoint the said Edward Peter Mann to be appraiser on my behalf, to the intent that upon his being appointed by the Minister for Lands, as appraiser on behalf of the Government, he may, as sole appraiser, determine the matters aforesaid.

In witness whereof, I have hereunto set my hand, this 25th day of January, A.D. 1872,—

SHEPHERD SMITH.

No. 34.

STATEMENT—SHEPHERD SMITH *versus* MARSHALL—GYRAH RUN.

IN June, 1869, Shepherd Smith (Bank of New South Wales) applied to purchase under the 8th clause of the Alienation Act, 40 acres, Gyrah River, being portion No. 30, parish of Donald, county of Sandon. The surveyor reported that the improvements on this portion were of insufficient value to confer a right to purchase. Smith then signified his intention to appeal to appraisement, and paid the fee, but before any steps in this respect could be taken, Robert Marshall conditionally purchased the land as unimproved, and according to the practice in force at the time, both Smith and Marshall were informed that the value of the improvements must be determined between them by reference to arbitrators severally appointed.

Smith objected to this course, contending that the questions of the value of the improvements was one between the improver and the Government, and took no steps in the arbitration, and the award was duly given in favour of Marshall.

It was subsequently decided that this arbitration was irregular and should be set aside, and that the value of the improvements should be determined between the Government and the owner to the exclusion of the conditional purchaser (in fact, as had been suggested by Mr. Smith).

Mr. Smith was apprised of this decision, and he asked that the appraisement might proceed, whereupon instructions issued.

Marshall now raises objections to this second appraisement, stating that on faith of an award already given in his favour he has since fenced the land at cost of £25.

L.S.T., 6/2/72.

Crown Law Officers,—Under this statement can first arbitration be set aside?—J.B.W., 7 Feb.

The Crown Solicitor,—W.W.S., B.C., 10 Feb., 1872.

To be returned.

15

No. 35.

REPORT OF APPRAISER.

Appraisement by single Appraiser.

To all to whom these presents shall come, I, Edward Peter Mann, of Armidale, in the Colony of New South Wales, send greeting:—

WHEREAS on the 9th day of January, in the year of our Lord one thousand eight hundred and seventy-two, I was duly appointed by the Minister for Lands, and on the 25th day of January, in the year of our Lord one thousand eight hundred and seventy-two, by Shepherd Smith, of Sydney, in the Colony of New South Wales, as the sole appraiser to fix and determine the price or value on 21st October, 1869, of the improvements on certain Crown Lands situate at Gyra, a description whereof is set out in the Schedule in the paper writing hereto annexed, marked 71/4950; and whereas I have entered upon the consideration of the value of the said land, and have heard and considered the evidence produced before me, by or on behalf of the Minister for Lands and the said Shepherd Smith: Now I, the said Edward P. Mann, do hereby declare the sum of £40 to be the value of the said improvements, and I assess and fix the costs of this appraisement payable to me at the sum of £2 10s., which said sum I direct shall be paid by the Minister for Lands.

In witness whereof I have hereunto set my hand, this 11th day of March, A.D. 1872.

The abovenamed value is the cost of first erecting the improvements at the time the land was conditionally purchased; I believe they had been erected about a year or two.

EDW. P. MANN.

Mr. Thompson,—Fresh instructions for the appraisement of the value of the improvements on this land were issued as between the Government and the improver in accordance with an opinion of the late Solicitor General; the award now received estimates the value of such improvements at £40, at the date of their first erection, and not at the date of selection, which took place a year or two afterwards. May the appraisement be received as it now stands, or should the case be referred back to the appraiser for more information? He was instructed in the appointment to appraise the value of the improvements at date of Marshall's conditional purchase; if so done their value might be less.—H. A. FITZPATRICK, 5/6/72.

Mr. Mann's failure to carry out the instructions issued to him will necessitate the issue of fresh instructions, and will further involve this already complicated case.—13/6/72.

No. 36.

THE CROWN SOLICITOR TO THE UNDER SECRETARY FOR LANDS.

Crown Solicitor's Office,
Sydney, 23 March, 1872.

SIR,

I have the honor to return the papers relating to the Gyrah Run, and the claims of Shepherd Smith and Marshall, and to state that I have laid them before Mr. Solicitor General Windeyer, who has been pleased to write an opinion on the matter, a copy of which I send you on the adjoining half-sheet.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

Under the opinion of the Honorable the Solicitor General the arbitration as between Mr. Smith and the Government may now proceed.—J.B.W.

Mr. Long,—Who will be the appraiser in this case?—H.A.F., 17 April, 1872.

Mr. E. P. Mann is the appraiser of the district.—G.L., 18 April.

[Enclosure to No. 36.]

Copy of Opinion.

I AM of opinion that Smith cannot be bound by the arbitration which has taken place, and that if the Minister for Lands decides to have another arbitration to settle the dispute between Mr. Smith and the Government he can do so without reference to Marshall.

W.C.W., S.G., 22/3/72.

No. 37.

MR. R. MARSHALL TO THE SECRETARY FOR LANDS.

Gyrah, near Armidale,
14 June, 1872.

SIR,

About three months ago, Mr. Surveyor Mann called at my free selection, No. 30, parish of Gyrah, near Armidale, to value certain improvements alleged to have been made by a former lessee of Gyrah Run, and told my wife he had been appointed an arbitrator to value the improvements on the ground for the present lessee of the run, I being from home at the time.

I have now to inform you, if Mr. Mann possessed such power, he has valued improvements made by me, as I had erected 99 rod of a 3-rail dividing-fence at my own expense, and I have erected 69 rod of a 3-rail fence since the arbitration, duly appointed by Government, was given in my favor by Mr. Allingham, the arbitrator, and which award has been sent to you. The value of the improvements by such award was £25 8s. 6d.

Had

Had Mr. Mann called upon me to point out the improvements erected by me since the date of selection, and the improvements also made by the present lessee of the run since I selected, he would not have screwed the value of the improvements up to £40, which I am informed he has done.

I respectfully request an inquiry into the matter at your earliest convenience.

I have, &c.,

ROBERT MARSHALL.

No. 38.

THE UNDER SECRETARY FOR LANDS TO MR. E. P. MANN.

Department of Lands,
Sydney, 1 July, 1872.

SIR,

Referring to former instructions sent to you for your guidance in the appraisalment of lands, I now forward the documents necessary to enable you to appraise the value of the improvements on the land particularized in the annexed Schedule.

I have, &c.,

LINDSAY G. THOMPSON,
(For the Under Secretary.)

NOTE.—The 28th section, clause 6, of the "Crown Lands Alienation Act of 1861," provides that a single appraiser or arbitrator must make his award *within sixty days* after his appointment, or within such extended time, if any, not exceeding thirty days, as shall have been duly appointed by him. Failure on part of any appraiser or arbitrator to comply with the terms of this section will, in the absence of sufficient explanation, involve the forfeiture of half the amount of appraisalment fee, *i.e.*, ten shillings in each case.

P.S.—These instructions are issued in lieu of those of the 9th January last. The appraisalment should have been made of the value of the improvements existing on land at the date of selection by Marshall, and not the cost of first erection, as incorrectly made by Mr. Mann in his previous award.

Registration No.	Name of Applicant.	Area.	Portion.	Section.	Situation of Land.
Ms. 72 2351	Shepherd Smith v. Marshall	a. r. p. At date of selection. 40 0 0	30	Parish of Donald, on the Gyra Run.

I am unable to make this award without entering into an investigation, for which I should require a special payment, as it would occupy me a long time and delay other pressing duties. I have already been engaged two days on the subject.

In March last, when I saw the improvements in question, I considered them worth £36.—E. P. MANN, 26 July, 1872.

Mr. Johnson,—Papers herewith. In some of these special cases the usual fee of £1 1s. is not sufficient compensation to the appraiser for loss of time occasioned by having to make his award. Mr. Smith paid the fee of £1 1s. in this instance, and anything over this amount paid to the appraiser the Government will be clearly at the loss of. Perhaps Mr. Mann may be allowed something extra for this appraisalment; but in future the parties seeking an appraisalment should be called upon to pay any additional cost the Government may be put to.—H.A.F., 24/9/72.

The cost of reappraisalment, caused by an informality in the appraisalment instructions, cannot be cast on the appraiser. The necessity for the *first reappraisalment* was clearly not caused by any fault of his. The necessity for the *second reappraisalment* is quite another matter. It will be seen that in the body of the first reappraisalment the appraiser, Mr. Knapp, states that on the 21st October, 1869 (the date of Marshall's conditional purchase), the improvements were worth £40, which valuation would have the effect of depriving Marshall of any claim to the land; but Mr. Mann attaches a foot-note to this award to the effect that the improvements were valued at *the cost of first erection*, being about a year or two *before* appraisalment, which note, when read in conjunction with his memo. of the 26th July last (hereon), would establish Marshall's claim as against the lessee. The case is therefore submitted for decision as to whether the reappraisalment is informal or not.—T.H.J., 2 Oct.

I think that under the circumstances the reappraisalment should hold good.—W.W.S., 23 Oct.

Approved.—J.S.F., 25/10/72.

N.B.—The memo. makes the appraised value of the improvements at time of selection under £40. (Written by the Minister.)

Inform Mr. Smith and then send to Alienation Branch for further action.—26th. (Written by Mr. Johnson.)

No. 39.

THE UNDER SECRETARY FOR LANDS to MR. S. SMITH.

Department of Lands,
Sydney, 8 November, 1872.

SIR,

With reference to the dispute existing between Mr. Robert Marshall and yourself, as to the value of the improvements on portion 30, containing 40 acres, on the Gyrah Run, conditionally purchased by Marshall, I am directed to inform you, that under the award made by Mr. E. P. Mann, which shows the value of improvements at date of selection to be worth less than £40, the Minister for Lands has decided that Marshall's selection must hold good, and your application to purchase the land in question, in virtue of improvements, cannot be entertained.

I have, &c.,
W. W. STEPHEN.

No. 40.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY FOR FINANCE AND TRADE.

(C.P. 69/4088.)

Department of Lands,
Sydney, 20 November, 1872.

SIR,

I am directed to state, for your information, and for notation in the Treasury books, that the cancellation, notified to you in the March 1870 list of cancellations, of Robert Marshall's conditional purchase of 40 acres, made at Armidale on the 21st October, 1869, has been revoked, and the purchase stands now in his name, as before.

I have, &c.,
WM. BLACKMAN,
(For the Under Secretary.)

No. 41.

THE UNDER SECRETARY FOR LANDS to THE LAND AGENT, ARMIDALE.

(C.P. 69/4088.)

Department of Lands,
Sydney, 20 November, 1872.

SIR,

I am directed to inform you, that the cancellation, notified to you by my letter of the 8th No. 15. March, 1870, of Robert Marshall's conditional purchase of 40 acres, on the 21st October, 1869, has been revoked, and the purchase stands now in his name, as before.

I have, &c.,
WM. BLACKMAN,
(For the Under Secretary.)

No. 42.

THE UNDER SECRETARY FOR LANDS to MR. R. MARSHALL.

Department of Lands,
Sydney, 20 November, 1872.

SIR,

With reference to your letter of the 14th June last, respecting the proposed reappraisal No. 37. of the improvements on the 40 acres of land, selected by you at Armidale on 21st October, 1869, at date of your application, I am directed to inform you, that the improvements alluded to have been reappraised, and that, as it appears from the award of the appraisers that they were not worth £40 at date of selection, the conditional purchase in question will stand good.

I have, &c.,
WM. BLACKMAN,
(For the Under Secretary.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

JOHN ROCHE ARDILL.
(PETITION RELATIVE TO SURVEY OF CERTAIN RUNS.)

Ordered by the Legislative Assembly to be printed, 12 February, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Roche Ardill, a Licensed Surveyor of New South Wales,—

RESPECTFULLY SHOWETH:—

That in the year 1867 your Petitioner made certain surveys in the Lachlan District, under the following conditions:—

That your Petitioner was given to understand that there was certain runs of vacant country in the Lachlan District, which had been tendered for by certain parties as runs for pastoral purposes, but that the Government had for the last thirteen years denied the existence of such country.

That your Petitioner entered into correspondence with the Chief Commissioner for Crown Lands on the subject, but that that officer informed your Petitioner that there was no vacant Crown Lands in the vicinity alluded to.

That your Petitioner then wrote a letter to the said Chief Commissioner of Crown Lands, asking if your Petitioner could show beyond the possibility of a doubt that the land was vacant would the parties who tendered for it get it. To this letter your Petitioner did not receive a reply, and he addressed a second letter to the same purpose, and with the same result.

That your Petitioner then went to Binalong, and there saw the local Commissioner of Crown Lands, who informed your Petitioner that there was not one perch of vacant country in that neighbourhood, but that if your Petitioner could show by actual survey that the runs were vacant, the parties who tendered for those runs should get them.

That from this encouragement your Petitioner entered into an agreement with the parties who tendered for the runs, that if he could show the country to be vacant, and that they got the runs, your Petitioner was to get fifty pounds for each run.

That your Petitioner, after about three months of hard labour to himself and four men, during which time the party suffered great privation, being in one instance for two whole days without water, owing to the sterile nature of the country, and the distance the river Lachlan proved to be from the Humbug or Yuglo Creek, and which entire distance was not shown on the Government plans, in consequence of which your Petitioner was deceived as to distance, and did not provide a sufficient supply of water.

That your Petitioner had to survey several old runs, in order to prove that the country tendered for was vacant, and on the 30th day of December, 1867, sent in his plans in four sections, extending from the Yuglo Creek to the Lachlan River, nearly two hundred miles, and which plan showed four runs namely,—Tea-tree Creek, tendered for by James White, Booramble South, or Maria's Lake East, Monument Flats, and Kalkoberto North, tendered for by Mrs. Wood and Walsh,—to be vacant.

That in the month of January, 1869, the Government caused the three latter runs to be sold by public auction, in Sydney, and that those three runs brought a rental of one hundred and seven pounds yearly, and a premium of six hundred pounds, and your Petitioner does not know how the fourth run, namely, Tea-tree Creek, was disposed of, but that James White, who tendered for it, did not get it.

That your Petitioner would have no claim against the Government were the runs legitimately disposed of, or the Land law allowed to take its course, for these runs never were leased, never were forfeited, and consequently could not legally be sold by auction, particularly not only to the prejudice of your Petitioner, but also to the parties who tendered for these runs.

That your Petitioner, on the receipt of information, that the runs were sold, sent in a bill to the Government, by which he claimed the cost of survey, namely, two hundred pounds, and which sum, or any part thereof, the Government refused and still refuses to pay.

Your Petitioner therefore prays that your Honorable House may be pleased to take these premises into your consideration, and grant relief; and your Petitioner, as in duty bound, will ever pray.

JOHN ROCHE ARDILL.

Molong, January 28th, 1873.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

JOHN ROBARDS.

(PETITION RELATIVE TO HIS FREE SELECTIONS AT MOLONG.)

Ordered by the Legislative Assembly to be printed, 4 March, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Robards, now an ostler in Molong, but late Free Selector at "The Shades," near Molong,—

RESPECTFULLY SHOWETH:—

That your Petitioner, in the year of our Lord one thousand eight hundred and sixty-five did select two portions of land at "The Shades," near Molong, as conditional purchases under the 16th and 22nd sections of the "Crown Lands Alienation Act of 1861"—one portion of fifty acres on the 1st of June, and one portion of forty acres on the 6th of July.

That previous to your Petitioner's selection, one Claudius Smith, an infant, by his agent, John Smith, had selected under the 16th section of the same Act, one hundred and sixty acres, the date of which selection was the 8th of July, 1862, being three years prior to your Petitioner's selection, and though three years had elapsed yet this one hundred and sixty acres was not surveyed, and that your Petitioner employed at his own expense a duly qualified licensed surveyor, who surveyed it and your Petitioner's two portions.

That in about twelve months after your Petitioner's selection, and four years after Claudius Smith's selection, the Government surveyor surveyed the land, paying no attention whatever to the previous survey, and so surveyed Claudius Smith's land as to make it embrace the greater part of your Petitioner's land.

That your Petitioner would particularly invite the attention of your Honorable House to the fact that the said survey was not made in accordance with the Land Act, or the Regulations thereunder, nor in conformity with the descriptions of the selector as deposited in the Lands Office, but by some rule, to your Petitioner unknown, which made the land to represent an indescribable figure, the outlines of which puzzled a licensed surveyor to trace on the ground.

That in consequence of this curious survey both your Petitioner's selections were cancelled, and in about eighteen months after your Petitioner's deposit money was refunded, and that on the contrary, had the survey been correct, your Petitioner could not be deprived of his conditional purchases.

That at the time of selection your Petitioner had a good team of twelve working bullocks, and every other appliance necessary for carrying on the working of a farm, but that when your Petitioner was deprived of his land that he had to sell bullocks, dray, &c., in order to liquidate certain debts incurred while clearing, stumping, and fencing the said selections.

That Claudius Smith never occupied nor resided on his selection, and that it was subsequently sold by auction at Molong, and that the said cancellation should have been made at the time of your Petitioner's selection, as the land had not been occupied during the three previous years.

That your Petitioner lost through this transaction about three hundred pounds, and was compelled to take the menial occupation of ostler, in order to support his wife and children.

Your Petitioner therefore prays that your Honorable House may be pleased to take these premises into your just consideration, and grant relief; and your Petitioner, as in duty bound, will ever pray.

JOHN ROBARDS.

Molong, Feb. 22nd, 1873.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE

ON THE

PETITION OF JAMES TWADDELL;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
17 *March*, 1873.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1873.

1872-3.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 57. TUESDAY, 4 MARCH, 1873.

11. PETITION OF JAMES TWADDELL:—Mr. Garrett moved, pursuant to notice,—

(1.) That a Select Committee be appointed, with power to send for persons and papers, to further consider and report upon the Petition of James Twaddell, presented to Parliament on the 18th March, 1870, complaining of injury and loss of property sustained by him on account of the discovery of gold in 1861, on his rented Crown Land, in the Pastoral District of Wellington.

(2.) That the Evidence taken before a Select Committee of the Legislative Assembly, in the Session of 1870-71, upon this petition, be referred to the Select Committee now appointed.

(3.) That such Committee consist of Mr. Farnell, Mr. Fitzpatrick, Mr. Neale, Mr. Stewart, Mr. J. S. Smith, Mr. Combes, Mr. Lackey, Mr. Warden, Mr. Booth, and the Mover.

Debate ensued.

Question put.

The House divided.

Ayes, 16.

Mr. Butler,	Mr. Warden,
Mr. G. A. Lloyd,	Mr. Terry,
Mr. Farnell,	Mr. Driver,
Mr. Sutherland,	Mr. Cunneen,
Mr. J. S. Smith,	Mr. Lackey,
Mr. Robertson,	<i>Tellers.</i>
Mr. Lucas,	
Mr. Cummings,	Mr. Macintosh,
Mr. Single,	Mr. Garrett.

Noes, 7.

Mr. Forster,
Mr. Bennett,
Mr. Scholey,
Mr. Fitzpatrick,
Mr. Tunks,
<i>Tellers.</i>
Mr. Wearne,
Mr. Stewart.

And so it was resolved in the affirmative.

VOTES, No. 66. MONDAY, 17 MARCH, 1872.

4. PETITION OF JAMES TWADDELL:—Mr. Garrett, as Chairman, brought up a Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Petition was referred on 4th March, 1873.
Ordered to be printed.

1872-3.

 PETITION OF JAMES TWADDELL.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 4th March, 1873, *with power to send for persons and papers, to further consider and report upon the Petition of James Twaddell, presented to Parliament on the 18th March, 1870, complaining of injury and loss of property sustained by him on account of the discovery of gold in 1861, on his rented Crown Land, in the Pastoral District of Wellington, to whom was referred, on the same date, the Evidence taken before a Select Committee on the same subject in the Session of 1870-71,—beg to report to your Honorable House,—*

That having carefully considered the evidence referred to them by your Honorable House, and also the evidence of the Witnesses named in the list,* your Committee are of opinion :—

1. That the Petitioner has proved the allegations contained in his petition, as to the holding of runs in 1861, in the pastoral district of Wellington, under the Orders in Council.
2. That in that year his runs were trespassed upon by large numbers of persons, in search of and digging for gold, under the authority of the Crown.
3. That by such trespass the Petitioner was seriously damaged in a pecuniary sense.
4. That the Petitioner should be compensated by the Crown for such damage.
5. That the amount of such damage should be ascertained by the Government in the usual way.

THOS. GARRETT,
Chairman.

No. 2 Committee-room,
Sydney, 17 March, 1873.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 6 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Garrett, | Mr. Lackey,
Mr. J. S. Smith.

Mr. Garrett called to the Chair.

Entry in Votes and Proceedings appointing the Committee, *read* by the Clerk.

Petition of James Twaddell, *read* by the Clerk, as follows :—

“ To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

“ The Petition of James Twaddell, of Droubalgie, near Forbes, in the Colony of New South Wales,—

“ HUMBLY SHOWETH :—

“ That your Petitioner is, and has been for the last fourteen years, the lessee of the run known as Droubalgie, on the Lachlan River, in the pastoral district of Wellington, in the said Colony, and also for the greater portion of that time, of the adjoining run, known as Back Droubalgie.

“ That in May, 1861, gold was discovered at a point on the boundary-line dividing the said run from the adjoining Bugabagil Run.

“ That in consequence of this and the succeeding gold discoveries which resulted in the formation of the town of Forbes and the Lachlan Gold Field, a population of several thousand souls was located within a few weeks on the spot, by far the largest portion being settled on the Droubalgie Run.

“ That by reason of this, and also from the fact of fifty square miles of the said Droubalgie Runs being withdrawn from lease, your Petitioner found it necessary to remove all his cattle, on which he was principally dependent, from the said run ; this he did, making a forced sale of the same to the number of about a thousand, at great loss to himself.

“ That afterwards, in consequence of the extension of the gold discoveries into the run Back Droubalgie, and the workings known as King's Lead, Queen's Lead, and others, attracting a large population which settled on the said run, it became worthless to your Petitioner, who forfeited it, in which condition it remained for two years, when your Petitioner had to pay a sum of £220 at auction to recover it.

“ That your Petitioner did, in the year 1862, apply to the then Minister for Lands, Mr. Robertson, and afterwards, in 1863, did petition Parliament for compensation, but owing to the fact of his Petition being mislaid, as his solicitors were informed by the then Clerk of the Executive Council, the matter was not taken into consideration, although a Petition, forwarded by Mr. Ranken, the holder of the adjoining Bugabagil Run was considered, and a large amount awarded to him as compensation.

“ That before the gold discoveries referred to, the runs Droubalgie and Back Droubalgie formed one of the finest pastoral properties on the Lachlan River, the value of which your Petitioner had been at great labour and expense in increasing, but in consequence of the total loss of the latter and of two-thirds of the former, your Petitioner suffered very great loss and became greatly reduced in his circumstances.

“ Your Petitioner would therefore again pray your Honorable House to take his case into consideration, and award such relief as may seem fit.

“ And your Petitioner, as in duty bound, will ever pray, &c.

“ JAMES TWADDELL.”

Printed copies of the Report and evidence *referred* before the Committee.

Committee deliberated.

Clerk directed to send to each Member of the Committee a copy of the Report and Evidence *referred* by the House.

Ordered,—That Mr. James Twaddell be summoned to give evidence next meeting.

Adjourned to Tuesday next, at *half-past two* o'clock.

TUESDAY, 11 MARCH, 1873.

MEMBERS PRESENT :—

Mr. Garrett in the Chair.

Mr. Combes, | Mr. Farnell,
Mr. Booth.

Mr. James Twaddell called in and examined.

Mr. James F. Williams called in and examined.

Witness withdrew.

Mr. C. R. Bidwell called in and examined.

Witness withdrew.

Mr. R. G. Mitchell called in and examined.

Witness withdrew.

Mr. Twaddell further examined.

Witness withdrew.

Committee deliberated, and decided to meet on Thursday next, at *half-past two* o'clock, to consider Report.

Adjourned accordingly.

THURSDAY,

THURSDAY, 13 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Garrett in the Chair.

Mr. Combes, | Mr. Stewart.

Chairman submitted *Draft Report*, same read 1° and considered. A Member having left the room, there was no quorum present.

Adjourned until *to-morrow* at three o'clock.

FRIDAY, 14 MARCH, 1873.

MEMBER PRESENT:—

Mr. Garrett.

In the absence of a quorum, the meeting called for this day lapsed.

MONDAY, 17 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Garrett in the Chair.

Mr. Combes, | Mr. Stewart,
Mr. Booth, | Mr. Warden.

Chairman's *Draft Report* read 2° paragraph by paragraph.

Paragraph 1 read and agreed to.

Paragraph 2 read amendment proposed (*Mr. Stewart*),— to omit the words "*under the authority of the Crown*," at the end thereof.

Question,—That the words proposed to be omitted be so omitted,—*put*.

Committee divided.

Aye, 1.

Noes, 3.

Mr. Stewart.

Mr. Combes,
Mr. Booth,
Mr. Warden.

So it was resolved in the negative.

Paragraph, as read, agreed to.

Paragraph 3 read and agreed to.

Paragraph 4 read.

Question,—That paragraph 4, as read, stand part of the Report.

Committee divided.

Ayes, 3.

No, 1.

Mr. Combes,
Mr. Booth,
Mr. Warden.

Mr. Stewart.

So it was resolved in the affirmative.

Paragraph 5 read and agreed to.

Motion made (*Mr. Combes*), and Question,—That the *Draft Report* of the Chairman be the Report of this Committee,—*put*.

Committee divided.

Ayes, 3.

No, 1.

Mr. Combes,
Mr. Booth,
Mr. Warden.

Mr. Stewart.

Chairman to report to the House.

LIST OF WITNESSES.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

MR. JAMES TWADDELL.

TUESDAY, 11 MARCH, 1873.

Present :—

MR. BOOTH,
MR. FARNELL,MR. COMBES,
MR. GARRETT.

THOMAS GARRETT, Esq., IN THE CHAIR.

Mr. James Twaddell called in and examined :—

1. *Chairman.*] You are the person who petitioned the Legislative Assembly in March, 1870, relative to a claim you have for compensation for loss sustained by you in consequence of the discovery of gold on your run? The same.
2. You also petitioned the Minister in 1862 on the same subject? In 1863, I think it was.
3. You applied personally to the Minister in 1862 or '63? Yes; it was either in '63, or toward the latter end of '62.
4. Did you petition Parliament at that time? Yes. A petition was sent in in 1863, but I believe it got lost in some way.
5. To whom did you entrust it? I entrusted it to Mr. Macintosh, of Bathurst, to have it delivered, and I believe it was sent down, but when inquiry came to be made it could not be heard of. Mr. Charles Cowper, jun., was Clerk of the Council at the time, and he said he could find no trace of it.
6. Then the petition went to the Executive Council? Yes, I believe so.
7. There was a Committee appointed by the Assembly, in 1871, to inquire into your case? There was.
8. And you gave evidence before that Committee? I did.
9. Have you lately read over the evidence which you gave before that Committee? The greater portion of it I have.
10. Have you any further evidence to offer beyond that which you have given before that Committee? Yes; I have some further evidence to adduce to prove the amount of capital I have lost.
11. Will you give us the particulars of what you consider to have been your loss? I consider that I lost at that time some 2,200 head of cattle from the gradual driving off of the cattle from the run by the occupation of the diggers. I had that number actually counted out of the yard in Mr. Speck's presence. After 1862 I never could manage to get a muster of them at all. They were brought into the yard for Mr. Speck to pick fat cattle out of, and I then had them counted, and there were 2,200 head; besides that there were many more out on the run, which had not been brought in. Allowing for what I sold there would be actually 2,000 head mustered.
12. Then you mustered 2,200 head, and allowing for what you sold, you consider you lost 2,000 head? Yes, quite that.
13. You would have had that number at your next muster? I do not reckon what the next muster would have been, because when I found my run taken up and my cattle disappearing, I got together 1,000 head, and took them off the run. After that I never got a muster at all, but got them in just as I could find them on the run, in lots of 20 or 30 or 40 head.
14. You reckon then that after taking away all these lots of cattle you were short of your number by 2,200 head? Yes, that is with the increase that there should have been from the herd.
15. Do you still hold any portion of this run? Yes.
16. How much of the run has been rendered valueless through the operations of the diggers? About the half of it.

Mr. J.
Twaddell.

11 Mar., 1873.

- Mr. J. Twaddell.
11 Mar., 1873.
17. That would be about $2\frac{1}{2}$ miles frontage? Yes, but $2\frac{1}{2}$ miles both front and back; but before that the proclamation of the Government took away 5 miles.
18. *Mr. Farnell.*] 3 square miles, or 5 miles square? It was 5 miles up along the river and 5 miles back from it.
19. That would be 25 square miles? Yes, exactly. There was first of all a proclamation proclaiming the whole country for 100 miles a gold-field. Then there was a second proclamation, taking away 5 miles along the river and 5 miles back, and then came this proclamation which gave me back half the frontage, so that I was $2\frac{1}{2}$ miles short of what I ought to have had.
20. *Chairman.*] Have you any documentary evidence beyond what you have already laid before the former Committee? No, nothing beyond that.
21. Have you any other evidence to bring forward in support of your claim? Yes, I have three witnesses, who knew the state of the Lachlan Gold Field at the time.
22. *Mr. Farnell.*] When you say you lost your cattle through the diggers coming on to your run, what do you mean? I mean that they were frightened away off the run by the presence of the diggers.
23. Was not that before the proclamation of this county as a gold-field? It was both before and after. The proclamation was in 1861, and the damage to my run and herd commenced at the same time as Mr. Rankin's, or within a few days of that time, for the gold was found in the first instance just on the boundary between Bugabagil, Mr. Rankin's run, and Droubalgie, my run. The lead from where it started on Mr. Rankin's run came in on mine. The greater part of the leads afterwards worked were opened on Droubalgie, the Caledonian, the Victoria, the Union, and others. There was a plan showing these leads and the boundaries of my run, before the Committee of 1870.
24. *Chairman.*] So that nearly all the lines of lead came through your land? Yes.
25. But the diggers came first on to Mr. Rankin's run? Yes.
26. *Mr. Combes.*] Then they went north? No; then other leads were opened, going up on the dividing ridge to the right. Strickland's reef and lead was altogether on the Back Droubalgie Run, and that contained $7\frac{1}{2}$ miles frontage by 5 miles back.
27. *Mr. Farnell.*] That proclamation you speak of, declaring this to be a gold-field, embraced each of your stations? Yes; the first proclamation took in all the country from about 12 miles below Forbes to the Boorwer Ranges, nearly 100 miles.
28. Then the effect of this was to legalize the occupation of your runs by the diggers? Yes, to a certain extent; and not only my run, but all the runs up the river.
29. And your complaint is, that the presence of these diggers frightened away your cattle? Yes.
30. And frightened them away to the extent of 2,200 head? Yes; at the time of the first and second proclamations there were still some cattle about on the run, in small mobs, but these were soon driven off as the leads extended, and the men spread out over the run.
31. What were cattle selling for at the time you lost yours? There were selling at from £3 to £4 per head.
32. How long after the proclamation did the diggers continue to occupy your run? They continued to occupy it in large numbers for about two years; then the numbers began to fall off, though there are some there still, to this day. These $2\frac{1}{2}$ miles, contained in the last proclamation, are still occupied by diggers.
33. When you say $2\frac{1}{2}$ miles, do you mean $2\frac{1}{2}$ miles square? Yes; off my run there is; but there is more than that, because there are another $2\frac{1}{2}$ miles taken off Rankin's run.
34. Are you claiming compensation for the loss of your run as well as for the loss of your cattle? Yes, for both.
35. And at what rate do you claim for your cattle? At £5 per head.
36. On what do you base your claim for compensation for your run? On the Orders in Council, which give me a distinct claim.
37. Had the Government power to do this? Not till November, 1861, when the Gold Fields Act was passed. I held the run under a fourteen years' lease, from the year 1845. The lease was extended afterwards, and ended in the year 1866.
38. How long before the Proclamation of the Gold Field did persons come on to and take up your run? They commenced coming on to the run in May, 1861. That was the time of the first discovery.
39. How long was that previous to the proclamation? I cannot say how long, but I believe about two or three months.
40. Do you think that the Government are responsible for damage you may sustain from persons going on to your run previous to their proclaiming it to be a gold field? Most certainly I do.
41. The Government did not authorize the occupation of the run prior to the actual occupation of the diggers? They did so; for they gave these men a license to go and dig for gold on any Crown Lands.
42. What—prior to November, 1861? Yes; the men were there before the end of May, with their miners' rights in their hands, and that is the same thing as a license.
43. *Chairman.*] Your run was proclaimed as a gold field under the Gold Fields Act for the time being? It was.

Mr. James Francis Williams called in and examined:—

- Mr. J. F. Williams.
11 Mar., 1873.
44. *Chairman.*] What is your business or occupation? I am an auctioneer.
45. Are you acquainted with the circumstances attendant upon the Forbes rush in 1861? Yes. I was there in the early part of October, 1861.
46. Are you aware that Mr. Twaddell has petitioned Parliament for compensation for damage done to his cattle and run by the influx of the diggers in that year? Yes. He told me he had done so.
47. Will you be good enough to tell the Committee what you know of this matter? When I went up there in October, 1861, there was an immense population there, so much so that you could scarcely get a passage through the streets. There were a great number of leads on the Lachlan Gold Fields. There were the north and south leads on Rankin's run, and nine or ten leads on Mr. Twaddell's run—the North and South Caledonian, the Victoria, the Union, and some others,—nine or ten in all. The Victoria lead extended along a distance of 9 or 10 miles.
48. Through the run of Mr. Twaddell? Yes.

49. Can you give us any idea as to what was the value of stock at that time? I cannot.
50. Are you aware of any damage having been suffered by Mr. Twaddell at that time? It is self-evident that he must have suffered damage when his run was taken possession of by the diggers. There were 20,000 or 30,000 men on the ground at one time, nearly the whole of them being on Mr. Twaddell's run. It was hardly likely that cattle would remain on the run when there was this large number of persons constantly moving about on it. The men were always going backwards and forwards to their claims; besides which, there were an immense number scattered about over the bush, stripping bark, hewing down timber, and cutting poles for building purposes. Then there were a large number of sawyers at work, for the demand for building materials was very large. I myself have paid £2 and £2 5s. per 100 feet for sawn timber.
51. Men were occupied in this way all over the run? Yes; going about all over it. There was a great demand for poles, and they were very difficult to be got.
52. With regard to travelling, in going to and from the Forbes Gold Field, was it necessary that the diggers should pass through Mr. Twaddell's run? I have seen whole hordes of people starting from the township at 6 o'clock in the morning, and then going out to the lagoons, where they camped for water. They had to leave at that early hour in order to get to their claims in such time as to prevent them from being jumped; they then remained on the claim two hours, shepherding, that being the regulation at the time.
53. And then they had to return? Yes. And it would be dinner-time before they would get back again.

Mr. J. F.
Williams.
11 Mar., 1873.

Mr. Crawford Robert Bidwell called in and examined:—

54. *Chairman.*] Are you aware that Mr. Twaddell has petitioned Parliament for compensation for losses he sustained by the taking up of his run by the diggers in 1861? I am.
55. Will you tell the Committee what you know of the circumstances of Mr. Twaddell's case? I was resident on Forbes in February, 1862, and I am aware that there was a very large population on his run at that time.
56. Were you engaged in any occupation there? I was managing for Mr. Christie, in the first instance, but afterwards I became connected with the Commissioner's Office, as an assistant.
57. Then you were enabled to gather some information respecting the gold-fields? Yes; as a digger in the first place—then as a speculator—and afterwards from my connection with the Commissioner's Office.
58. How many people do you think there were there? I was there in the busiest time of the rush; and if I say the number was something over 20,000 I am certain that I am within the mark when I give that number.
59. Do you think that Mr. Twaddell's run was more damaged by the rush of the digger than was the run of Mr. Rankin? Yes. There were more persons resident there and a greater dispersion of the population all over Mr. Twaddell's run than there was on Mr. Rankin's. From what I know of it the great bulk of the population was settled on Mr. Twaddell's run.
60. Do you know what was the price of stock at that time? Yes. I was then managing for Mr. Christie, and I know well what the price of stock was.
61. Did you sell for Mr. Christie? No, but I have made inquiries of the butchers, to ascertain the price at which stock was going.
62. And what was about the price then? The ruling price was from 15s. to 17s. per cwt.; that was for good cattle that would go from 7 to 7½ cwt. Beasts like that would be worth about 5 guineas a head.
63. Do you think that the rush of diggers in any way damaged the run? Yes. From my knowledge of what took place I can say distinctly that the influx of so large a number of inhabitants on to the run completely annihilated it as a cattle station. I had occasion to go a good deal over the run, and I can speak with certainty as to the effect which the rush had on it.
64. *Mr. Combes.*] Do you know the boundaries of Mr. Twaddell's run? Yes. They have been told to me, and I could point them out if I were on the ground. I was over a good deal of it.
65. At that time? At that time and afterwards.
66. Was not a portion of the town of Forbes on Mr. Twaddell's run? Yes, a large portion of it. Part of the Court House was on his run; his boundary-line came through it. The North Caledonian was also on his run.
67. The whole of the Caledonian, north and south, was on his run? Yes, it was; the Caledonian, the Union, and the Victoria leads were all on Twaddell's run.
68. The greater portion of the town was situated out in the direction of Mr. Twaddell's property, spreading that way instead of in the opposite direction? Yes, decidedly so; because the south lead and a portion of the lagoons cut it off from spreading in the other direction.
69. That portion known as the Caledonian lead was altogether on Twaddell's run? It was.
70. *Mr. Farnell.*] Do you know anything of cattle? Yes. I am a pretty good judge of fat cattle, and have a fair knowledge of what stock and stations should be.
71. I suppose you know nothing of the cattle lost by Mr. Twaddell—of the number or quality of the beasts? No. I know nothing at all of that.

Mr. C.
Bidwell.
11 Mar., 1873.

Mr. Richard Grant Mitchell called in and examined:—

72. *Chairman.*] Were you resident at Forbes in 1861? Yes. I was Clerk of the Bench at Forbes in the latter part of 1861.
73. As Clerk of the Bench was it part of your duty to issue miners' rights? During the absence of the Gold Commissioner I used to issue them.
74. Are you aware of what portion of Mr. Twaddell's run was taken up by the diggers? I cannot tell the exact portion, but it was well known that a great deal of his run was covered by the diggers at that time,—that is from August, 1861, to the end of 1862.
75. Were you there when the diggers first came on the ground? No; but I was one of the first officials there. Captain Brown, the Gold Commissioner, was the first, and then I came as Clerk of the Bench immediately afterwards.
76. Can you recollect what number of miners' rights were issued there from August to December, 1861? About 12,000 miners' rights were issued up to the end of the year. The diggers flocked there in thousands, as it was supposed that it would prove a second Ballarat.

Mr. R. G.
Mitchell.
11 Mar., 1873.

Mr. R. G.
Mitchell.

11 Mar., 1873.

77. It was the largest rush that had been known for some time? Yes, certainly the largest rush that had ever taken place in New South Wales.

78. Have you any knowledge of stock and station matters? I have from constantly watching the course of prices.

79. Then what in your opinion was the consequence of the influx of miners upon Mr. Twaddell's run;—would it destroy the run and depreciate the value of the stock? Yes. It made the run a huge camping-place for human beings instead of a pasture-ground for stock. The diggers went over the run everywhere, not only to prospect for gold but also to cut timber for building houses. Wherever you went over Mr. Twaddell's run, or Mr. Rankin's run, there you would be always able to see any number of men either felling timber or fossicking for gold.

80. Was Mr. Twaddell's run injured as much as Mr. Rankin's? I consider that the largest lot of diggers were on his run, so that it must have been injured to even a greater extent than Mr. Rankin's. There was a great deal more work going on, searching for gold on Mr. Twaddell's run, than there was upon Mr. Rankin's.

81. *Mr. Combes.*] Are you aware that by far the larger portion of the miners came from diggings adjacent to Forbes, and that they would consequently bring their miners' rights with them? Yes.

82. That is to say, that the number of the population was not to be judged of by the number of miners' rights issued by you? Not at all. If I was asked to give my opinion as to what was the amount of population I should say that it very much exceeded 12,000. In March, 1862, I should say that the population must have been over 20,000.

83. *Mr. Farnell.*] How long did this population continue in occupation of Mr. Twaddell's run? The population fell off, but the diggers have not left there to this moment. Up to this day there are miners there.

84. This large number of 20,000 did not continue there? No; but a good many of them did, and all the effects of their work were left behind them. All the holes were left there, so that it was not safe to walk from the town to the tents and huts that were scattered about.

85. *Chairman.*] Up to what time did the large number you have mentioned continue on the ground? Till the end of 1862; and then it began to dwindle down to 16,000 or 17,000. Then in the next year it went down to 10,000 or 12,000. It continued at about 10,000 for several years, but I left there in 1864.

86. *Mr. Farnell.*] Did this large population on the ground cause any increased demand for beef and mutton? Yes. It must have done so.

87. Did the miners kill people's cattle? Some of them were no doubt dishonest, for such is always the case when a large body of people comes together—there are sure to be some dishonest persons amongst them.

88. Were there any cases of cattle-stealing prosecuted before the Police Court? I cannot state positively, but I am under the impression that several such cases came before the Courts. I think, as far as I remember, that the principal cases which came before the Bench were cases of horse and cattle stealing. I know that there was constant trouble about the horses. The diggers were always complaining about their being stolen.

89. I suppose you have heard that Mr. Twaddell's cattle were driven, by this rush of diggers, over the boundary of his run? I have heard that the cattle on the run were driven away by the rush of the diggers, but I was not aware that they were Mr. Twaddell's at the time I went on to Forbes. I was a stranger to the locality, but I know that it was a common subject of remark that whoever was the owner of the run, his cattle were bound to disappear, because the men were flocking on to the run in thousands, not settling down in one place, but scattering themselves all over it, fossicking for gold or cutting timber.

90. Was it possible to carry on a grazing station with these miners on the ground? Altogether impossible. You might as well think of carrying on a grazing establishment in a bee-hive. It was perfectly impossible. The cattle disappeared, the sheep disappeared, everything in fact disappeared, even to the poor blacks, of whom there were a good many in the district, before the enormous rush that set in on the place.

91. When you say disappeared—were they killed, or were they driven away before the advance of the diggers? I cannot say how. They disappeared, but I am not prepared to say how.

92. You do not think that the miners kill the cattle? No; I do not say that; but if they did I hope they were brought to justice.

93. *Mr. Booth.*] Did the killing of the cattle cause their disappearance from the run? No, it was the sudden rush of such a large number of men that caused the disappearance. The influx of population was not confined to one place, but the men went all over the run fossicking about for gold, and timber to build their houses. It was the sudden influx of people upon all parts of the run that drove the cattle off, and even the sheep also.

94. Do you think that any of these cattle were sold for slaughter? I believe that some were.

95. Stolen, in fact? No doubt a great many were, but I cannot tell you positively, because I was not engaged in pastoral pursuits. But I know this, that wherever you went on the Droubalgie Run you would be sure to find men employed in gold-seeking or timber-getting. I knew the Droubalgie Run before this, for I used to travel through it on the road between Condobolin and Bathurst. Before the Forbes rush set in it was a very nice, quiet, and secure run. After that it was more like the City of Sydney than a pastoral station; and for the matter of that you might as well try to feed cattle or sheep in the City of Sydney as to do so there. The men went everywhere.

Mr. James Twaddell recalled and examined:—

Mr. J.
Twaddell.

11 Mar., 1873.

96. *Mr. Farnell.*] Can you give the Committee any idea of the value of your herd of cattle prior to the act of the Government in proclaiming your run a gold-field, which you complain affected the tenure of your leasehold in 1861? Yes. I can tell you that in 1861 I desired Mr. Speck to assist in counting the cattle out of the yard.

97. How did you come to ask him? I had sold him some fat cattle, and we mustered to enable him to pick them out. We counted 2,300 head, and all the cattle were not then within 500 or 600 head. He did not want many beasts, and so we only got in those cattle that were handiest; we did not get any more than were wanted for him to pick his lot from.

Mr.
J. Twaddell.

11 Mar., 1873.

98. Then you had more than 2,300 head? Yes; 500 or 600 head more.
99. Subsequent to this muster you sold 1,000 head at Albury? Yes.
100. That left 1,300? Yes.
101. How then do you claim for 2,300? Because the cattle ought to have increased in those years. I reckon that I had in my herd fully 1,000 head of breeding cattle.
102. *Mr. Combes.*] What did your herd principally consist of? Chiefly breeding cows. They were a mixed lot.
103. *Mr. Farnell.*] The 1,000 head you sold were a mixed lot? They were.
104. Were there any fat cattle amongst them? No, they were store cattle and cows.
105. Breeding cows? Yes.
106. What reason do you assign for selling these cattle? Because they were being driven away off my run on to the neighbouring runs, and it was impossible to keep them together; so I thought it better to get rid of them than to have them scattered over the country and lost. I should have had a much bigger claim against the Government this day if I had not sold off as many of the cattle as I could get hold of. Had I sold less I should have had a larger claim to put in.
107. Have you any cattle on this run now? Yes, about 150.
108. Any sheep? No, I had some, but I sold them off last year.
109. What area of run do you now hold? About 5 miles.
110. Do you mean 5 square miles? No, 5 miles by 5 miles—that is 25 square miles.
111. I believe you only claim compensation for the loss of your cattle? And for the loss of the run.
112. Do you remember giving evidence in April, 1871? I do.
113. Do you remember being asked this question: "Then in fact you have no claim for loss of run?" Yes, and I answered "No," but the next question explained the matter, to which I answered that I claim for the loss of cattle and the loss of $2\frac{1}{2}$ miles frontage taken away as commonage.
114. And that answer fully explains the claim you now make? Yes, exactly.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

FURTHER PROGRESS REPORT FROM THE SELECT COMMITTEE

ON THE

ADMINISTRATION OF THE LAND LAW;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE,

MINUTES OF EVIDENCE,

AND

APPENDIX.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
24 *April*, 1873.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1873.

1872-3.

**EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.**

VOTES No. 24. TUESDAY, 17 DECEMBER, 1872.

10. ADMINISTRATION OF THE LAND LAW :—Mr. Cunneen moved, pursuant to Notice,—
- (1.) That a Select Committee be appointed, with power to send for persons and papers, to inquire into and report upon the administration and working of the Crown Lands Alienation and Occupation Acts of 1861.
 - (2.) That such Committee consist of Mr. Farnell, Mr. Robertson, Mr. Stewart, Mr. Macleay, Mr. Creed, Mr. Garrett, Mr. Rodd, Mr. Tunks, Mr. Lucas, and the Mover.
 - (3.) That the Progress Report and Evidence on the same subject, laid upon the Table of this House and ordered to be printed on the 6th August, 1872, be referred to this Committee.
- Debate ensued.
Question put and passed.
-

VOTES No. 92. THURSDAY, 24 APRIL, 1873.

21. ADMINISTRATION OF THE LAND LAW :—Mr. Cunneen, as Chairman, brought up a further Progress Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 17th December, 1872, together with Appendix.
Ordered to be printed.

1872-3.

ADMINISTRATION OF THE LAND LAW.

FURTHER PROGRESS REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 17th December, 1872, *with power to send for persons and papers, to inquire into and report upon the administration and working of the Crown Lands Alienation and Occupation Acts of 1861*, to whom was referred, on the same date, the *Progress Report and Evidence on the same subject, laid upon the Table of the House*, and ordered to be printed on the 6th August, 1872, have agreed to the following Further Progress Report :—

Your Committee have to report that in consequence of the magnitude and importance of the inquiry, they find it impossible to conclude it this Session of Parliament.

Your Committee therefore report the evidence taken, to your Honorable House, recommend that it be printed, and that the inquiry be resumed early in the next Session.

J. A. CUNNEEN,
Chairman.

No. 3 Committee Room,
Sydney, 24th April, 1873.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 20 DECEMBER, 1872.

In the absence of a quorum, the Meeting called for this day lapsed.

WEDNESDAY, 22 JANUARY, 1873.

MEMBERS PRESENT:—

Mr. John Robertson, | Mr. Macleay,
Mr. Cunneen.

Mr. Cunneen called to the Chair.

Entry in Votes and Proceedings, appointing the Committee, read by the Clerk.
Committee deliberated.

Ordered,—That Mr. E. Du Faur, Mr. W. Blackman, and Mr. R. D. Fitzgerald, be summoned to give evidence next meeting.

[Adjourned until Friday next, at *Eleven* o'clock.]

FRIDAY, 24 JANUARY, 1873.

In the absence of a quorum, the Meeting called for this day lapsed.

MONDAY, 27 JANUARY, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Macleay, | Mr. Stewart,
Mr. Creed.

E. Du Faur, Esq., called in and examined.

Witness handed in return of runs advertised for auction sale during the years 1863 to 1872. (*See Appendix A.*)

Witness withdrew.

W. Blackman, Esq., called in and examined.

Witness handed in return of conditional purchases cancelled and forfeited, from 1st January, 1862, to 30 June, 1872. Also, return of pre-emptive leases granted from 1st January, 1862, to 31st December, 1871. (*See Appendices B1 and B2.*)

Witness withdrew.

R. D. Fitzgerald, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Thursday next, at *Eleven* o'clock.]

THURSDAY, 30 JANUARY, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Tunks, | Mr. Stewart,
Mr. Creed.

L. G. Thompson, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. Bradridge be summoned to give evidence next meeting.

[Adjourned to Tuesday next, at *Eleven* o'clock.]

TUESDAY, 4 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Cunneen, | Mr. Rodd.

In the absence of a quorum, the Meeting called for this day lapsed.

WEDNESDAY,

WEDNESDAY, 5 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Cunneen, | Mr. Rodd.

In the absence of a quorum, the Meeting called for this day lapsed.

THURSDAY, 6 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Stewart, | Mr. Rodd.

The witness summoned for to-day not being in attendance,—
Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY, 7 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Stewart, | Mr. Creed.

Mr. William Elliott called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY, 14 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Stewart, | Mr. John Robertson.

A. O. Moriarty, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 18 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Cunneen, | Mr. Stewart.

In the absence of a quorum, the Meeting called for this day lapsed.

TUESDAY, 8 APRIL, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Stewart, | Mr. Rodd.

A. O. Moriarty, Esq., called in and further examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 15 APRIL, 1873.

MEMBER PRESENT:—

Mr. Cunneen.

In the absence of a quorum, the Meeting called for this day lapsed.

WEDNESDAY, 16 APRIL, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Stewart, | Mr. Tunks.

Mr. Charles M'Keon called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

THURSDAY, 24 APRIL, 1873.

MEMBERS PRESENT:—

Mr. Cunneen in the Chair.

Mr. Rodd, | Mr. Stewart.

On motion of Mr. Stewart, it was resolved that Mr. Commissioner Woore be supplied with a copy of Mr. M'Keon's evidence.

The Chairman submitted Further Progress Report; same *read and agreed to*.
Chairman to report to the House.

LIST OF WITNESSES.

	PAGE.
Blackman, W., Esq.	1
Du Faur, E., Esq.	1
Elliott, Mr. W.	8

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

ADMINISTRATION OF THE LAND LAW.

MONDAY, 27 JANUARY, 1873.

Present:—

MR. CREED,
MR. CUNNEEN,

MR. MACLEAY,
MR. STEWART.

JAMES AUGUSTINE CUNNEEN, ESQ., IN THE CHAIR.

Eccleston Du Faur, Esq., examined:—

1. *Chairman.*] When on a previous occasion you gave your evidence before this Committee, you were asked to furnish us with a return showing the number of runs that had been forfeited, put up to sale by auction, that had been described in the *Government Gazette* and had been withdrawn;—have you this return? I have a return of all the runs that were withdrawn, but the major portion were withdrawn because the forfeiture was reversed. I have only about twelve cases in the last ten years in which they have been withdrawn. (*The witness handed in the same. Vide Appendix A.*)
2. There was also another return you were requested to prepare, of runs in the Bligh and Lachlan Districts, showing the estimated areas and the actual areas? I have brought up a return of 197 runs in the Bligh District and of 260 runs in the Lachlan District, showing the areas as originally estimated, the first estimates by the Commissioners many years ago, in some cases as many as twenty-five years ago; and the present areas, either from actual survey or from reliable compilation.
3. Does it distinguish those actually surveyed? No, but the maps are in such a state that the areas from compilation are almost as reliable.
4. That would be only an estimate, would it not? It would be an estimate.
5. Have you distinguished those actually surveyed from those only estimated? I have not. I can easily note on the schedules what runs are absolutely surveyed all round their boundaries.
6. Will you furnish that information when the Committee next meet? I will.

E. Du Faur,
Esq.
27 Jan., 1873.

William Blackman, Esq., examined:—

7. *Chairman.*] Do you remember that when you were last examined you were asked to furnish the Committee with some returns? I do.
8. These were not prepared when the evidence was printed;—have you them ready now? I have two of them made out, and those are all I have been able to prepare. This is one, showing the total number of conditional purchases cancelled and forfeited, from the 1st January, 1862, to 30th June, 1872. (*The witness handed in the same. Vide Appendix B 1.*)
9. Have you any other? I have here a return showing the number of pre-emptive lease applications granted in virtue of conditional purchases made, from 1st January, 1862, to 31st December, 1871. (*The witness handed in the same. Vide Appendix B 2.*) There was another asked for relating to the alteration in the leasing of lands in granting pre-leases within pre-leases. Mr. Stephen furnished that, and I have therefore not brought a second copy.

W. Blackman,
Esq.
27 Jan., 1873.

W. Blackman, Esq.
27 Jan., 1873.

10. You were asked for this return—the number of acres pre-leased in virtue of purchases above 320 acres, and also for a return of the number of acres of pre-leases on account of purchases of 320 acres or less? These are not prepared on account of the vast influx of business in the mining branch. In fact there were three or four hands taken from me for nine months, and in addition to that the work of the Conditional Purchase branch and the pre-emptive leases has wonderfully increased, so much indeed that it has been out of my power to prepare them.

11. Might it not in some measure be attributed to the manner in which the record of these applications is kept? Yes, undoubtedly, and when the branch was put under me I made an entire change in the mode of keeping the record of the pre-emptive leases so that it would be a matter of extreme facility from that time. Formerly the conditional purchases were all jumbled together, so that it would be necessary to go through the whole of the correspondence of the last ten years to see which were the applications made by virtue of conditional purchases. Now I put the letters C.P. against them on the list.
