12. Then you attribute the difficulty of furnishing the public with this return to the mode in which the papers were kept in the office? Yes, undoubtedly.

13. You were asked to furnish the Committee with the total number of applications for pre-leases;—have you that return? No, that is one of the returns I have not been able to prepare, because there was formerly no distinction made between the various classes of applications, and it would be necessary to go through the whole of the correspondence which would be a very tedious matter, as many letters are sent by way of reminders from persons who do not get answers at the time they expect. These would have to be read and laid aside, and the conditional purchases picked out.

14. Will you be able to furnish the Committee with this return within the next month? I shall not. With the clerical assistance I have at present it will be quite impossible for me.

15. Not even the number of applications? Not even the number.

16. Is there no book, no record in existence, from which at a glance you could ascertain? No.

17. Would you have to refer to the original manuscripts? Yes.

18. To a heap of papers? Yes, to all the papers that have been received on the subject since 1862.

19. There is no more business-like way of getting at these things? There is no other way by which I can do it correctly.

20. You will prepare it as soon as you can for the information of the Committee? I have already drawn attention to the necessity of preparing it, but the immense amount of work to be done in the department has prevented its being carried out.

21. *Mr. Creed.*] No pre-emptive lease can be obtained for any land unless it adjoins the conditional purchase? Unless it adjoins.

22. The purchase being on one side of a creek the lease cannot be on the other? Not if the stream is taken as a frontage stream. I think it has been allowed in some cases as an act of grace, but it has always been the understanding that it was an act of grace—that the parties had no right to it.

23. Supposing a man takes up a purchase on a pre-emptive right, in such a way that the edge comes to the pre-emptive lease and adjoins Crown land, has he a right to take a pre-lease? I should think so if he adjoins Crown land.

24. Pre-leases, I believe, are granted in any portion of Crown lands not previously leased as a pre-lease? Yes.

25. Or for mineral purposes? Yes.

26. *Mr. Macleay.*] You mean you cannot purchase on one run and get your pre-emptive lease on another? Yes, that is what I mean.

Robert D. Fitzgerald, Esq., examined:—

R. D. Fitzgerald, Esq.
27 Jan., 1873.

27. *Chairman.*] You are the head of the Roads Branch, are you not? Yes.

28. Have you long occupied that position? Yes, since 1868.

29. Under what circumstances does the Government proclaim roads for the convenience of the public? Generally under petition from the public, not always; sometimes we are requested by the Works Department.

30. *Mr. Creed.*] On the recommendation of a surveyor? The first action is petition from the public generally.

31. Independently of a petition of the public, if a surveyor recommended a road would you proclaim it? That is done sometimes.

32. *Chairman.*] The rule is that the public outside shall move you by petition, or otherwise, to make a road, and then it is entered upon? It is not a rule, but it is generally the case; sometimes it is proclaimed in consequence of an application from the public; sometimes at the request of the Works Department; and sometimes at the suggestion of the surveyor of the district.

33. It is generally proclaimed at the suggestion of the inhabitants of the locality? Yes.

34. Have the Government in any way anticipated the requirements of the public for roads in this country before they have been moved by the inhabitants? Yes, by reserving roads through lands intended for alienation.

35. Have they reserved them to any great extent in anticipating the requirements of the public, or have you waited until the public have moved them to give roads? They have reserved them in all instances where it has been supposed that a road would be wanted.

36. They have? Yes, in recent times.

37. Do you not think the proportion of roads reserved by the Government on account of public policy are very few as compared with what is necessary for the public convenience? I do not think so with reference to the land being measured now.

38. I am speaking of twelve years ago? Yes, since I have had charge of the Roads. I had charge of the Alienation from 1861, before I had charge of the Roads, and then it was the practice to reserve all roads in anticipation of the settlement of population.

39. Then how is it that after population has settled, fencing put up, and improvements made, Government have been asked to proclaim roads over so many improved properties? There are several reasons why it is necessary; one is, that in many cases the land is not cleared at the time the road is selected, and that a shorter and better way is discovered after the occupation of it. Another cause is the demand for a road in a direction it was not anticipated it would be required. The opening of a new gold-field would require a more direct and better road than would be necessary for mere occupation.

R. D. Fitzgerald, Esq.
27 Jan., 1873.

40. Are you not aware that in many cases throughout this country, along alluvial flats and creeks, no roads were proclaimed until these lands had been taken up, fencing put on, and improvements made, and that then the Government had to run roads through this improved, pull down the fences, destroy improvements, and give compensation, because settlement had not been anticipated? I do not within the last few years, except in the way I have stated.

41. Have you not had to refuse a great number of roads on account of the expense of running them through these improved lands of late years? Yes, but in those cases it has been through land alienated a considerable period back—not within the last twelve years.

42. Are there not a great number of cases now in the office in which transit is almost a legal right, and transit is almost impossible in a district, because the roads are not proclaimed on account of the expense of fencing? There are a great many cases of the kind which cause much inconvenience.

43. Have the Government anticipated the requirements of the public in those districts where it was obvious that some day settlement would take place, as in these alluvial flats? I do not think it has been much overlooked in the last twelve years—there was formerly a system of dividing the land into square blocks and of running roads between them. These roads are unsuitable, and have to be replaced by others, but that has not been the practice recently. Many of the old farms have no access left to them.

44. You are aware that in the early days of the Colony, when grants were given to veterans under the old survey system, a wise forethought was taken of future settlement by leaving roads for approach to water and to market between a certain number of farms? There was a system of leaving roads, but I do not think it was a wise one generally. Many of these grants had no access to them and had to obtain it at Quarter Sessions.

45. Has it ever struck you that there is great delay in deciding upon petitions sent in, asking for the proclamation of roads for the public convenience? I think there might be less delay; I think the law is in great part the cause of that.

46. Sometimes for years these cases remain undecided;—do they not? Not since I have had charge; they are often refused, and of course that cannot be considered as leaving the case undecided—that occurs often.

47. Is not that very like leaving it undecided? I do not look upon it as leaving it undecided; if a road is refused there is decided action upon it; afterwards it may become of more importance and be granted. I call a thing undecided when it remains without final action on the part of the Government.

48. When you say no, you do not always mean it as a refusal for a road? I do not understand the question.

49. You say although refused it still may be granted? I say when refused they may be granted afterwards, but still they are refused.

50. Can you give the Committee a return showing the number of applications made for public roads since 1861, the date of application for, and the name of each road, or the locality in which it is situated, and the date on which each was finally opened or refused? Yes, I think it can be given. (*Vide Appendix**)

51. Have you not in many cases informed applicants for public roads that they were refused for the present in anticipation of legislation on the roads question? Yes.

52. What was the meaning of that? It has been done in very few cases since I have had charge; it was done before; there was a Bill to enable the Government to put public gates on the roads, and it would have facilitated the opening of many roads if it had been passed, as it was hoped it would be.

53. Does the department now anticipate the future requirements of the Colony by reserving roads on creeks and rivers where there is no settlement at present but where there is likely to be in future years? Yes.

54. How do you account for the great delay that takes place after you proclaim a road before your officer in the field goes and opens it on the ground, and pulls down the fences? Delay occurs at every stage; first of all, the law requires thirty days for the receipt of objections; then, very frequently, these objections have to go back to the surveyor for his report; then there is very often delay to enable the surveyor to go to the part of the district where the road is situated, as he may be at work at some other part of it when the objections are sent to him; then when his report comes back there are very often additional objections raised, and the matter very often has to be referred to the district surveyor after we have the report from the local surveyor.

55. But in cases where it is beyond the stages where objections can be taken—where there is only the final step to be taken of the surveyor in the field going and taking down the fence? I do not think there is much delay between the confirmation and the final opening.

56. What control have you over these surveyors if they do not attend to it? We have the control that the Surveyor-General has over those who are employed under him; but if a surveyor has a distinct instruction that he must have (say) a conditional purchase surveyed, he may not be able to attend to instructions for the opening of a road at a long distance off.

57. You are aware that a conditional purchase would concern only an individual, and that the opening of a road would concern the whole public? Yes, but if a surveyor has other work in his hands which he has definite instructions to carry out, he cannot always go from one part of his district to another and leave his work. The opening of a road is a matter of grace and custom, it is not a matter of law; and I believe the roads belong to the public from the time they are confirmed.

58. The public would not be justified in pulling down a fence without official authority? I believe they could do it.

59. And very likely lay themselves open to an action? Yes; it would not be a discreet action for a private individual, but should be done by the public authorities.

60. *Mr. Creed.*] What provision is there for roads for stock; of course a simple one of one or two chains is of no value? There is hardly any provision at present for travelling stock, except that in some places we have made reserves, which are virtually roads of 20 chains wide.

61. For how far? Such a reserve has been made in New England.

62. Do you not think that roads in this part of the Colony reserved in this way would be a great advantage? Yes.

63. The sum total of your evidence on this point is that there is no provision made for travelling stock? There is great difficulty in connection with it. Under 19th clause of the Alienation Act persons are entitled

* No promise was given to furnish this return. It was not asked for.

- R. D. Fitzgerald, Esq.
27 Jan., 1873.
- entitled to drive stock along any track that is used or required, and where there are two tracks in existence if we were to amend those tracks and survey a through road we should, under the present law, be inflicting a third road upon the run-holder without his having the power to close either of the others.
64. Of course no evil arises until the land on each side is alienated, and then stock is virtually shut out? The roads are sometimes fenced across by the run-holder.
65. *Mr. Macleay.*] Not along the road? No, across the road.
66. They can feed a quarter of a mile from the track;—can they not? Half a mile. Sometimes the road is diverted around enclosures, such as fattening paddocks.
67. *Mr. Creed.*] Of course the object is in those country districts which are liable to be alienated, to leave a road of 2 chains to prevent the country from being made bare? Yes; some of the roads are 3 chains.
68. Do you think it would be advisable that a main road of (say) 20 or 30 chains wide should be reserved? I think so.
69. Say from the Darling to the more settled districts? Yes, I think so.
70. In fact, the main roads of the Colony, for the purposes of travelling stock? We are hardly in a position to do so under the existing law.
71. It would be an advantage? Yes.
72. You say it has been done in one or two places, but only for short distances? It is a tolerable long road.
73. What length? From Gunnedah to Breeza, about 20 miles. It is not a road in fact; it does not come under my notice; it is a reservation that actually amounts to a road.
74. You say roads are reserved on lands lately alienated;—are they reserved definitely, or as roads leading to certain places but undefined? The roads are marked.
75. If a man applies for 40 acres of land, through which a road is reserved, does he get other land in lieu of that taken for the road? The road is not included in the alienation.
76. So that he gets 40 acres of land independently of the road? Yes.
77. Are you aware that in many old grants as, for instance, the Peel River grant, the A. A. Company's grant, and Mr. Stewart's at Bathurst, there is great trouble with roads? Yes.
78. Are you aware that it involves an expense of £60 or £70, and in some cases of £100 an acre, for compensation? * Yes.
79. Is not that a great evil? It is.
80. Is there any power to alter that? I know of none, except by Act of Parliament.
81. Have the A. A. Company allowed you to take a road through their land? Yes, one road has been opened with consent.
82. You have power only to proclaim it with consent? We could take it, but we must give compensation, and the compensation that would be required would be so heavy as to be out of the question.
83. What would you recommend where Crown Lands are thus cut off from settlement, and rendered of comparatively no value—I think you said you would recommend an Act of Parliament? I do not know that I would recommend one, but I can see no other course.
84. You see an evil that can be remedied only in that way, and yet you do not recommend the remedy? I hardly like to recommend a course that interferes with private property;—that is the only means I see.
85. Do you know the length of the A. A. Company's grant? No, I do not. One of them is 30 miles by 13 miles.
86. What is the road that is proclaimed there; is it the Great Northern Road? No, it is a road across the property. We have a petition just in for a road through its length, but I think it is not likely the Company will consent to grant it.
87. When was the other permitted? Two or three years ago. We have taken some roads through their property in various places, but it has always been with their consent. I think in many cases it is the travelling stock they are afraid of; they do not object to a road for ordinary use.
88. You have no charge of the maintenance of roads? No.
89. Do you know if there is a broad road, or a broad piece of land reserved for stock between Moama and Deniliquin? No, there is a road between Moama and Deniliquin.
90. Is there any broad piece of land? I think this road is 3 chains wide. Any road through a run gives a right of half a mile on each side.
91. Is there a strip of land reserved from Moama to Deniliquin (say) a mile broad? I do not know of any.
92. *Chairman.*] Could you suggest to the Committee any means by which the requirements of the public for roads could be facilitated—any improvement upon the present system of granting them? I think the Bill brought before Parliament, if it had been passed, would have facilitated the action upon roads.
93. From your practical experience in the Department, could you suggest any particular means that would facilitate the proclamation of roads, and avoid circumlocution? Nothing more than is embodied in that Bill.
94. Do you remember who introduced it? It was introduced four times by Mr. Wilson and by Mr. Robertson. It was virtually the same Bill, and passed the Lower House.
95. *Mr. Creed.*] With regard to fencing—when a road is proclaimed through ground that is enclosed you make compensation for fencing? It is the practice of the Department to grant fencing, except where there is an undoubted right of usor for a time prior to the enclosure of the land.
96. Supposing the case of one of the old grants—that the grant was prior to any right of usor? I do not mean that the grant should be prior, but that the usor of the road is of long existence.
97. If the enclosure was prior to the right of usor, you would still give compensation? I do not remember a case in which it has been pleaded that the fencing has been prior to the right of usor. There are very few cases where fencing has been refused.
98. Do you know a case of this kind, where a road has been carried through enclosed land, and the owner has been required to put fencing, and instead has put up gates at either end? I do not; the money for fencing is invariably given to the person through whose land the road passes.
99. Do you not think it would be better in such cases that the Government should spend £20 in putting up gates than £500 or £600 for fencing to the holder of the land, who may not choose to employ it in that way? I do not think so as the law is at present. If the money is given to the party to protect himself by a fence, and he does not choose to do so, the public may remove any obstructions to the road, and, in many cases, slip panels have been removed. In many cases persons would prefer gates instead of having the water fenced off by a line of fencing on either side of the road. 100.

100. *Chairman.*] In the case of reserved roads not proclaimed, what position are they in with regard to the public—can the public travel over them without their being proclaimed or opened? Yes; the reserved roads not having been included in the grant, they remain dedicated.
101. What right have they? The same as in the case of a proclaimed road.
102. Would the public have the right to knock down a fence and pass over them? Yes.
103. And not be liable to legal consequences? Quite so.
104. There are many of these roads in the old districts of the Colony that ran between the 25 or 30-acre veteran grants, which are now enclosed and used as the property of the owners of those grants? I did not exactly understand what you meant—I spoke of those recently reserved. I believe if they have had them in occupation for sixty years they have a right against the Crown.
105. If not sixty years? I believe the Crown has the right to resume them within sixty years, but it is a nice question when it comes to so long an occupancy as that, whether the public have any rights.

R. D. Fitz-
gerald, Esq.
27 Jan., 1873.

THURSDAY, 30 JANUARY, 1873.

Present:—

MR. CREED, | MR. STEWART,
MR. TUNKS.

JAMES AUGUSTINE CUNNEEN, ESQ., IN THE CHAIR.

Lindsay George Thompson, Esq., called in and examined:—

106. *Chairman.*] You hold a position in the Mineral Lease branch of the Lands Department? I have charge of the Miscellaneous branch, of which the Mineral Lease branch is a subdivision.
107. You have the principal control of the business in the Mineral Lease branch other than gold? Yes.
108. The whole of the leases and purchases of mineral lands other than gold pass through the office of which you are the head? Not purchases—simply leases.
109. All mineral leases must be taken out at the head office in Sydney;—are they not? Yes.
110. They cannot be taken out at the local offices throughout the country? No.
111. Purchases of mineral lands other than gold cannot be taken out at the head office—they must be taken out at the local office? Yes.
112. So that the rule is distinctly opposite as to where mineral lands can be leased and where they can be purchased? Yes.
113. What is the reason of this distinction;—is there any good reason for it, independently of the law? There is no reason, except the law.
114. Have you formed any opinion as to whether it would or would not be convenient to the public throughout the country to allow them to lease land at the local offices, instead of travelling perhaps hundreds of miles to Sydney, or employing an agent to take it up? The only advantage that perhaps might accrue would be preventing mere speculators from taking up land. I know it has been the practice, during the recent rush, for persons to come to the office and take up land north or south of previous selections, evidently without any personal knowledge of the ground, but following the lead of persons who were known to have experience in taking up country.
115. These were purely speculative selections? Yes.
116. If the *bonâ fide* selectors who discover the land were allowed to take it up at the local offices this would be avoided? It would.
117. Do you think it would facilitate the acquisition of mineral lands by the inhabitants of the rural districts, to allow them to lease it at the land offices in their own districts? I do not know that they would get information as to whether they could have the land applied for any earlier, or perhaps so early, because the applications would have to be referred to the head office, and from thence the instructions would have to be issued to the surveyors, whereas now those instructions are issued immediately on the selection being reported. If it could be otherwise it would be a great convenience to the local districts.
118. Is there any good reason why there should be a distinction made between leased and purchased mineral lands—that is, why the one should be allowed at the local offices and not the other? I do not know that there is. The disadvantage as regards conditional purchases is the same as would be the case if selections were made at the local offices.
119. A person is allowed to purchase at the local office but not to lease? Exactly.
120. In other words, he must pay 10s. an acre as deposit on a purchase, but the local office will not take 5s. on a lease. It seems an anomaly;—does it not? I daresay a different arrangement could be made if the law would allow it.
121. It seems reasonable that if one is allowed the other should be? It does seem reasonable, and except for the time taken up in the necessary reference to the head office there would be no objection; but if that objection is not held in the case of mineral conditional purchases I do not see why it should be held in the case of mineral leases.
122. A register of all mineral selections for other than gold mining, which was kept at the Land Office, was allowed to be discontinued, was it not? Yes.
123. Has that been resumed? Yes, and completed up to date.
124. How long is it since it was completed? It has been completed now for some two or three months, I think. It was recommenced as soon as it was possible to get hands to work at it.
125. What information does this register contain? It contains a sort of synopsis of each case—the date on which the selection was made, the name of the selector, the description of the land, the number of acres applied for, the amount of the deposit, and the date from which the lease takes effect, &c.
126. Are the whole of the selections entered as they occur, or is this register divided into selections in the north, south, and west, for more easy reference? They are entered as they occur.

L. G.
Thompson,
Esq.
30 Jan., 1873.

L. G.
Thompson,
Esq.

30 Jan., 1873.

127. *Mr. Creed.*] Are they placed alphabetically? No, we have an index for alphabetical reference, but the leases are entered consecutively, and bear consecutive numbers, commencing from the time of passing of the Crown Lands Occupation Act to the present time.

128. *Chairman.*] Is this register open to the public? It is yet a question whether it is or not. The Minister for Lands has not quite decided the point, but when a reference to it is asked for it is never refused, except in doubtful cases. It has often happened that, when mineral prospectors have sent to the office descriptions of land they have selected, other persons have applied to see these selections, and it has been found afterwards that selections have been taken up adjoining these prospectors' selections. In order to prevent purely speculative selections of this kind the Minister for Lands has been of the opinion that the register should not be open to the public. It is not, however, a decided question as yet, but where there has been any good reason shown inspection has not been refused.

129. What is considered a good reason? Whatever the Minister might consider a good reason. If we have an idea that speculative selections are about to be made to the detriment of *bonâ fide* selectors, we should question the party's right to see the register, and not allow him to do so without the Minister's authority.

130. It is an accomplished fact? At the time it was not. At the time these selections were made we had no information at all—no register,—and it was very inconvenient to allow them to look over the original applications, which was the only way of giving them information. The reason of it was that there was no clerical assistance available at the time to keep up the register. This register was in existence from the passing of the Occupation Act, and it had to be discontinued on account of the great pressure of work. It was discontinued for six or eight months. It is now kept regularly.

131. Do you not think allowing the public to inspect this register might facilitate them in taking up the public estate? I do not think the descriptions as furnished by selectors generally would aid the public much; they are too indefinite.

132. Take a particular locality, say Cope's Creek: Supposing a number of gentlemen came here intending to invest their money in mineral lands, how could they ascertain what lands were still open for selection on Cope's Creek, or those which had been already leased, if they had not the opportunity of seeing the register? The register would not give them the desired information. They could only get accurate information after survey. The register is simply a collection of indefinite descriptions, sometimes so vague that it is impossible even for the surveyors to allocate the land, except by having the parties on the spot to point it out.

133. Are you not aware that certain capitalists who wish to take up land, are in the habit of getting lists of selections in a particular locality, say at Cope's Creek, and then send a person to inquire on the spot where Jones's, Brown's, and Robinson's selections are, and by that means they know what land has not been taken up? I do not recollect such a thing having been done. I do not know of anybody who could give that information even if he had the descriptions.

134. *Mr. Stewart.*] Was it not done in the case of some selections made at Port Hacking, on Hacking Creek? It might have been done there—that is a known part of the country—but Cope's Creek is quite unknown, so far as surveying is concerned. Port Hacking has been surveyed.

135. *Chairman.*] I suppose the policy of the department is to assist the public in taking up the public estate under the Act? Yes.

136. What information is there to enable the public to distinguish between what has been taken up and what they wish to lease? They could obtain no information on that point.

137. You could not assist them? No, except in cases where the land to which they refer as adjoining has been surveyed.

138. You could give them no information as to the land you have open to lease? None whatever in unsurveyed localities.

139. Do you not think, if it was possible to arrive at that, it would be very desirable? It would be very desirable that the public should be furnished with every information it is possible to give them.

140. *Mr. Creed.*] Do you not think that so long as land can be taken up on lease only in Sydney, the original prospectors, who are often ignorant men, may be forestalled by sharp speculators having their agents in Sydney, because, not knowing how to proceed, they may go first to the local land office to inquire whether they can take it up there, and so by their inquiries there and elsewhere allow information as to the locality to get abroad, before they are able to secure the land for themselves? No doubt that may happen, and it is a very hard case.

141. Do you not think that for this reason, if for no other, the present system should be changed? It would be desirable on that score to allow selections to be taken up at the local offices. The only objection I see to it is that the surveyors would not receive their instructions so quickly.

142. It would only make a difference of two posts? It might make more. It would not depend upon us altogether; there would be the local land agent. But, as I have said already, if it is not an objection in the case of mineral conditional purchases it ought not to be an objection in the case of leases.

143. In case mineral leases were allowed to be taken up at the local land offices it would be advisable not to have them taken up at all in Sydney, except for the Sydney District? Exactly so; otherwise there would be constant clashing.

144. Have you not found already that a good deal of confusion has arisen from the fact that, while mineral purchases have been taken up at the local land offices, mineral leases of the same land have been taken up in Sydney? There has been some confusion, but not much. At present, mineral purchases can only be taken up on one day in the week at the local land offices, and on that day the office in Sydney is closed for leases; they can only be taken up here on the days when the local offices are not open.

145. *Mr. Tunks.*] Is not possession an important element in a question of that description? The Minister for Lands holds possession to be effectual where other things are equal. Where two persons have selected the same land, and one person has gone into possession and the other has not, the Minister gives the preference to the party who has taken possession, unless it is shown that the other had a prior right. The principle is that one avails himself of all the powers the law gives him, while the other does not.

146. Could you define what you mean by other things being equal;—would this sort of equality be necessary: that they should send (say by post) their applications on the same day, and at the same hour of the day, and then that one being in possession he would have a preferent claim to the other? That would be one item in the merits of the case.

L. G.
Thompson,
Esq.

30 Jan., 1873.

147. *Mr. Creed.*] Two men may have given descriptions intended to apply to the same plot of land, but both so vague that they might be taken to mean land half a mile off;—of course in such a case the man in possession has given the best practical description? Yes, no doubt.

148. Does the law require any possession at all? No.

149. Do you not think it would be a great advantage if each applicant were required to mark out his land on the spot? I think so, even if he were only required to mark one corner, and cutting a trench to show the direction of the lines, thus L.

150. Do you not think it would be a very great advantage if the surveyors' plans were charted up as soon as sent in, on a model or standard plan, from which photo-lithographs could be taken from time to time for distribution by sale? It would if it could be done; but the surveyors' plans come in very irregularly. I know, as a fact, that surveys are detained at the local surveyors' offices, about which we know nothing whatever, although the public in Sydney have all the information. I have tried hard to get the surveys sent down here, but without effect at present.

151. At whose office are they kept? At either the local surveyor's or the district surveyor's.

152. That is matter of neglect on the part of those officers? It amounts to that.* They say there is some reason for it, that they are unable to get these plans charted up and examined.

153. Is not all charting done in Sydney? They have to be examined at the local office.

154. Even though all the plans did not come in, would it not be a great advantage to have all the plans charted that did come in? I do not know that it would, because they would not give reliable information in that desultory way.

155. They would if the surveyors were kept up to the mark? There are 17,000 leases applied for up to the present time, and no doubt if they could once be charted up the plans could be kept up, and it would be a great advantage.

156. *Mr. Tunks.*] Is that practicable under the present system? I do not belong to the Survey Office, but it seems to me practicable enough.

157. If there is an interval of 10 miles between two selections, what means would the Department have of putting them on a general plan? All surveys start from some known point or from some point which is so many miles or chains or links on a certain bearing from some known point. Every plan has some point on it which will show its connection with some other plan. There would be no difficulty whatever I should think in charting them all to one general model.

158. I would ask you whether sending applications of selectors to the surveyors does not give them opportunities of obliging their friends in cutting up the land? All surveys are subject to the approval of the Surveyor General.

159. Can the surveyors undertake without any authority from the Minister for Lands to determine whose selections are right and whose are wrong? I have heard it said that they do. But all these surveys are under the approval of the Surveyor General. Some of the public are under the impression that a surveyor can take a selection where he pleases; but it is not the fact and it is not admitted by the office.

160. It is generally reported that information has been improperly obtained from persons in the office in Sydney;—have any of the clerks been dismissed or suspended for mal-practices? There are none under suspension now, but one of the clerks was dismissed or allowed to resign, I forget which.

161. Have many applications been made for selections which there is no possibility of the applicants obtaining for minerals other than gold? Yes.

162. And the probability is, that there will not next year be the same amount of money from this source that there has been during the past year? I think not.

163. *Chairman.*] Have many persons taken up and paid money for the same land during the recent rush for mineral leases? Yes, in many cases.

164. In cases where two or more persons have taken up the same land, by what rule is the Department guided in deciding to whom the land shall belong;—according to precedence of the application to select? No, according to the report of selection.

165. What does that mean? A person applies first for authority to select, and produces a receipt from the Treasury, showing that he has paid the deposit. An authority to select is then given him, by virtue of which he reports a selection, and the person who first reports a selection and gives a definite description is entitled to the land as against any one subsequently reporting a selection of the same land. The law requires an accurate description, but it is impossible to give it in purely speculative selections, and that is one reason, I imagine, why the Minister has allowed possession to determine the right in cases of conflicting claims.

166. Do I understand that where two or more persons have selected the same land, if one of them has taken possession his claim is held good against that of the man who has only given a description? It would stand as against a selection with a very indefinite description, but I do not think it would stand against one with a definite description.

167. With regard to the refund of money, where the Government receive money from more than one person for the same land, do they refund, when the question of right is settled, to those who do not get the land? No, the payment of the money is not for a particular portion of land but for authority to select, but when the selection is made the payment goes towards the first year's rent.

168. *Mr. Creed.*] By grace? By law.

169. You buy leave to select and pay for it? Yes.

170. And having got that you have all you bargained for? Yes.

171. Do you not think that leave to select is a piece of formality which is a great evil? Yes, I think it might be done without.

172. *Chairman.*] Is it not stated by the regulations that money paid for leave to select should be considered as rent? It is taken as rent eventually.

173. Do you not think that by the 60th regulation it is evidently intended to be rent—"The rent shall be 5s. per acre, payable annually in advance at the Colonial Treasury; the first payment to be made on application for authority to select"? Yes, no doubt that is so.

174. *Mr. Tunks.*] What do you mean when you speak of a definite description of these lands;—do you mean a survey? I mean what is stated in the 67th regulation:—"The authority to select, when granted, shall be

* NOTE (on revision):—It may not be neglect. The surveyors are overworked, as well as officers at head quarters.

L. G.
Thompson,
Esq.
30 Jan., 1873.

be in force for twelve months from its date; and after making his selection the holder will be required immediately to report the same to the Minister for Lands by transmitting the form appended to such authority, filled in with full particulars as to the situation and proposed limits of the lot selected, and the minerals for the working of which the lease is desired."

175. Are there any restrictions as to water-frontage or otherwise? These selections must be made in accordance with the rules which apply to conditional purchases. The reason is that they can be converted into conditional purchases.

176. In converting a selection of this kind into a freehold, would any of the previous expenditure go towards the purchase money? No, no rent will in any case be refunded.

177. I am not talking of rent now; I mean money expended in making improvements? The money expended upon the land would come within the improvement clauses.

178. Notwithstanding that by its means a lot of tin for instance had been taken out of the land? Yes.

179. Would that be an improvement, to take the tin out of the land? The improvement would consist in the development of the mine.

180. *Chairman.*] If the deposit on account of mineral leases is calculated as rent, do you not think it is unfair to receive rent from more than one person for the same selection? If it should be calculated as rent, certainly.

181. Is it not contrary to the practice that prevails in the case of conditional purchases, where, if a man does not get the land he applies for, his deposit is refunded? Yes.

182. And also in the case of squatters who pay deposits on tendering for runs? Yes.

183. *Mr. Creed.*] Do you not think the forfeiture of the deposit acts as a check on merely speculative selections? Yes, as a great check.

184. Is not that an advantage? I think so. It would have involved us in great difficulty during the recent rush if these deposits had been returnable.

185. Men making *bonâ fide* selections do not suffer? No, only in cases where they have been forestalled.

186. *Mr. Tunks.*] Will you define the difference between a *bonâ fide* man and a speculator? A speculator is a man who takes advantage of the experience of others, without having taken any trouble at all himself in the matter of discovery. A *bonâ fide* selector is one who takes out his authority, and who by himself or his agent selects his land with the intention of going to work upon it.

187. *Chairman.*] How long is it generally from the time a selection is made till the survey follows? The surveyor is allowed six months to make his survey from the time the papers are forwarded to him, and if he has not sent it in by that time the Surveyor General calls his attention to the instructions.

188. Are not what are called special surveys obtained? The only case in which special surveys would be made would be were a number of selections had been made on a certain creek which could be all surveyed together; but no person could come to the office and say he had made a selection and require a surveyor to be sent specially to survey it.

189. Have many mineral leases—the actual documents—been issued? Not yet. Applications are being made for them, and we are preparing them; but only one has been issued.

190. *Mr. Creed.*] With regard to completing the surveys within six months, do you find that as a rule the surveyors work as hard as possible? Yes. It is to their interest to do so.

191. And if any surveys have gone beyond that time it has been from inability to get the work done? Yes.

192. *Chairman.*] Could you suggest to the Committee any improvement in the organization or carrying out of the Land law in respect to mineral leases other than gold? I think allowing selections to be made at the local land offices would be an improvement, and also marking the land. I think, too, that the public should have every possible information.

193. Have mineral selectors generally renewed their leases? I do not know; we have not had returns from the Treasury.

194. Do you anticipate that many will forfeit their leases? I do; I suppose about a fourth or a fifth will renew.

FRIDAY, 7 MARCH, 1873.

Present:—

MR. CREED, | MR. RODD,
MR. STEWART.

JAMES AUGUSTINE CUNNEEN, Esq., IN THE CHAIR.

William Elliott, Esq., was called in and examined:—

W. Elliott,
Esq.
7 Mar., 1873.

195. *Chairman.*] I believe you are a grazier living in the Lachlan District? I am.

196. Do you remember that in the beginning of the year 1861 you applied to the Government for a lease of some Crown Lands in the Lachlan District? I do.

197. About what date was it when you applied to lease these lands? About the 9th of August, 1861.

198. Are you sure that it was in August, or was it not in May, 1861? I tendered in May, and I had a letter from the Lands Office in August. The date of the tender was May, 1861.

199. Had you reason to believe that those lands for which you applied were unoccupied Crown Lands? I had very strong reasons to believe it.

200. You were a resident of the district? Very nearly twenty years.

201. You knew where the land was situated? I did exactly.

202. And you described the situation of this land in your tender? I did.

203. What reply did you get to your application for a lease of this country? I received this letter, dated "Crown Lands Office, Sydney, August 9th, 1861." (*Vide Appendix 1.*)

204. Did you receive any further communication? I did.

205. What was the purport of it? About the 30th of November I received this letter, dated "Crown Lands Office, Sydney, 27th November, 1861." (*Vide Appendix 2.*)

206. Would you have any objection to hand these letters in as evidence? I want the originals, but you can have copies.

W. Elliott,
Esq.

7 Mar., 1873.

207. In November, 1861, you were informed that this land was under lease? I was.
208. Had you any reason to doubt the fact of its being then under lease? I had very strong reasons for doubting it. In fact I knew it was not under lease.
209. Had you any reason to think that it was being occupied by others without rent being paid for it? I had reason to think so.
210. It was your impression that they were occupying land without paying rent for it? They had no authority there whatever.
211. And you wished to obtain the land and pay the rent for it? That was my idea. I was quite prepared to pay the rent offered in my tender.
212. Did you at any time take any further steps in the matter? I did. I heard that this party ———
213. You heard who? I heard that on the dismissal or removal of Mr. Beckham, the local Commissioner, in or about 1869 or 1870, and the appointment of Mr. Futtor, that two parties had tendered for this very ground that I had tendered for in 1861.
214. For the land that you had been refused? For the land that I had been refused. And immediately after I heard that they had tendered for it, and that one of them had got it, I took steps to assert my right.
215. What were the names of these tenderers? Mr. Gibson and Mr. Barrett.
216. They tendered for the same land that you had been refused? Exactly so.
217. Was a lease granted to either of them? The lease was granted to Mr. Gibson.
218. What action did you then take? I wrote to the Crown Lands Office at once.
219. What representation did you make to the Crown Lands Office? I called their attention to my tender lying in the office for the very same land for which a lease had been granted, and wished to know how it was that a lease had been granted for the land when a lease had been refused to me in 1861.
220. You wrote to inquire how it was that the land for which you had applied and been refused had afterwards been granted under lease to Mr. Gibson? Yes; nine years afterwards.
221. What was the reply from the Department to this communication? This was it: A letter dated "Occupation of Lands, Sydney, 2nd August, 1872." (*Vide Appendix 3.*)
222. Then this reason which they give you is different from the reason which they gave you for declining it in the first instance? In the first instance the reason which they gave me was that the ground was already under lease.
223. And when they had leased the ground after your application for it had been refused, they gave you this other reason: that you did not make a deposit? They gave me this lame reason. The fact was that my tender was disposed of on the 27th of November, and this regulation did not become law until the 31st of December,—over a month afterwards.
224. The last reason which they gave you in this communication was, that when you tendered in May, 1861, you did not send in a deposit? No; they gave me this reason: that there was a regulation issued on the 1st of November, 1861, which provided that all tenders which had then been received but not disposed of must be accompanied by a payment into the Treasury of £2 10s.
225. But your application was before that regulation was promulgated? My application was before that; and my tender was disposed of before that regulation was promulgated.
226. And therefore that regulation could not apply at all to you? It could not apply to me in any way.
227. Therefore when you brought them to account for granting a lease to others which they had refused you, they then gave you this reason, which is also wrong, since it does not apply to your case at all? It does not apply to my case; not in any way whatever. You will see by this letter that my tender was disposed of on the 27th of November previous.
228. But whether or not, they gave you two reasons—first, they stated that the land was already under lease to another party? Yes.
229. And then, when you reminded them that they had granted a lease, they then alleged as another reason that you had not complied with a regulation which was not in force at the time you made the application. Is that the fact? Yes.
230. And you were thus deprived of getting a lease of this land which you were the first to apply for? I do not know that I was the first. Two parties applied before me, but they have since died.
231. But you applied before this party, Mr. Gibson? He did not apply for it until 1870. He had occupied it as long as the old Commissioner was in office, and there was not the slightest reason for him to apply for it. But the moment a new Commissioner, Mr. Futtor, was appointed to the district, there was a rush between Mr. Gibson and Mr. Barrett as to who should get their tenders in first. Mr. Gibson got his tender in first.
232. Did you take any further action when you were refused a second time? I did. Being absent from Sydney, I applied to Mr. Lane, of George-street, to write to the Commissioner of Crown Lands about this matter, and to take some steps to see me righted. Mr. Lane received this letter from Mr. Pretious, which was the last letter I received. It was handed to me by Mr. Lane on my arrival in Sydney. It is dated "Occupation of Lands, Sydney, 12th February, 1873." (*Vide Appendix 4.*) That was all the satisfaction I could get. The matter was thoroughly closed, not by the Minister but by Mr. Pretious. That is supposed to silence me for ever; and the land is given to those persons who occupied it in the face of my tender.
233. Where these the persons who occupied it without paying rent? Yes; for nearly twenty years, and for nine years after I tendered for it.
234. You were refused it, and they were allowed to occupy it for nine years after that? Yes; without paying rent.
235. You were deprived of the lease of the land? I was.
236. And as a consequence the public revenue was to that extent deprived of the rent which ought to have accrued to it for the use of the public estate? Yes, for twenty years to my knowledge; and rent ought to have been paid for it for nine years before the lease was granted to Mr. Gibson, and before the Government got anything for it.
237. Carrackabool is the name of the land? Yes.
238. On what watercourse is it? Barbajill Creek intersects it.
239. About what area is it? It lies between the two runs of Mr. Gibson.
240. Have you any idea of the area? The area of Boga Bogalong is estimated to be 75,520 acres, or 12 miles; and the area of Caragabal is estimated at 26,880 acres, or about 5 miles; and that would make about 17 miles in Gibson's two runs. Instead of that he has got about 40 miles. 241.

- W. Elliott, Esq. 241. Where is Carrackabool? Carrackabool is between the other two runs.
 7 Mar., 1873. 242. What do you estimate the extent of the country you applied for? About 84,000 acres, or thereabouts. It is much over that; but I would sooner be within it than over it. It is 40 miles from one boundary of Gibson's to the other.
 243. And you would have paid rent for these 84,000 acres of Crown lands for nine years had you have been permitted? Yes; rent and assessment.
 244. And during that time the land was lying idle, or being used by persons who paid no rent? It was.
 245. Mr. Rodd.] Could you bring proof of that? I can.
 246. That no rent was being paid? That no rent was being paid.
 247. Mr. Creed.] Do you know what rent is being paid now? I have not the slightest idea.
 248. Have you any objection to state the amount of your tender for it? Station property at that time was of very little value. I could not tell you from memory. I have not seen the tender since it went into the office.
 249. Chairman.] Have you any description of the country for which you tendered? It is described in the tender exactly, lying between these two runs of Boga Bogalong and Carragabal. The boundary is minutely described. The description is sufficient to enable the Commissioner or anybody else to know exactly where the ground is. I think it a very great hardship that I should have been used in this way.
 250. Mr. Rodd.] Is the same gentleman in possession of this land that owns the other two runs? Yes, he is, and always was in possession of it; and he did not trouble himself at all about it until Mr. Beckham was removed. The moment a strange man came he put in a tender for it.
 251. Is Mr. Beckham living? I do not know. He was removed from our district.
 252. Mr. Creed.] In what year was he removed from your district? In 1869 or 1870.
 253. Chairman.] Have you any reason to suppose that it was on account of Mr. Beckham being removed that induced them to tender? I am perfectly satisfied of it.
 254. Then Mr. Futter reported that there was vacant country? He told me so himself.
 255. That is with regard to the first refusal? The moment Mr. Futter came into office in our district he was called upon by Mr. Barrett to inspect this country.
 256. Mr. Creed.] That was only last year? In 1870.
 257. You have not applied for the land since 1861? I have not; but I have applied to know what has become of my tender.
 258. The only tender you ever made was in 1861? That was the only tender I ever made.
 259. Chairman.] When you moved in the matter a third time you were informed that the case could not be reopened? I was; because it had been decided on by competent authority.
 260. Mr. Rodd.] I understood you to say that you could bring proof that Mr. Gibson paid no rent during the time he held possession of the land? I could not bring that, excepting through the Lands Office. I can prove that he occupied the land.
 261. I understand you to say that you could bring proof that he paid no rent? It is impossible for me to do that; but it does not appear officially; I will prove by a hundred persons that he occupied the land, and then it is for him to show that he paid the Government rent for it.
 262. Chairman.] I suppose from the fact of your being a resident in the district you knew the boundaries of this unoccupied country? I did; and I have a description of the boundaries of the occupied country in my hand. I got them from the Lands Office to-day.
 263. That does not contain this unoccupied country? No.
 264. You know it from your own knowledge of the natural features of the country, and from a tracing you have gone over at the Lands Office of the adjoining runs in which this land is not included? I do. The matter is very simple. Up to 1870, Mr. Gibson was paying rent for one run containing 12 miles, and another containing 5 miles, that is 17 miles altogether. But from one end of the country to the other which Mr. Gibson claims is at least 40 miles.
 265. He occupied 40 miles, while he had only the right to occupy 17? That is the best description I can give. From the eastern boundary of Carragabal to the western boundary of Boga Bogalong is 40 miles. All this country he has occupied for some twenty years to my knowledge, and I do not believe he has ever paid a shilling for it; and now when Mr. Beckham is removed, and a new Commissioner comes into the district, Mr. Gibson goes very quickly and shoves a tender in on the top of me and everybody else, and he gets the preference over us all, although he has had the use of land for so many years.
 266. Mr. Creed.] Is Mr. Beckham in the Service now? I think he has been removed, and for something very like this; but I should hardly think that when this matter comes to be investigated I shall have to be the sufferer to the extent I really have been.

FRIDAY, 14 MARCH, 1873.

Present:—

MR. ROBERTSON, | MR. STEWART.

JAMES AUGUSTINE CUNNEEN, ESQ., IN THE CHAIR.

A. O. Moriarty, Esq., was called in and examined:—

- A. O. Moriarty, Esq. 267. Chairman.] You were formerly Chief Commissioner of Crown Lands? I was Chief Commissioner of Crown Lands in New South Wales for 10 years, and I was 25 years in the Public Service.
 14 Mar., 1873. 268. You wrote to the Chairman of the Committee last Session to the effect that you wished to be examined before this Committee? I made that request because I had become aware incidentally that certain evidence had been tendered before this Committee, and that certain evidence had been sought by this Committee, the direct effect of which was highly damaging to me, in my estimation. I wished in justice, not merely to myself, but to others, to have an opportunity before that evidence was sent forth to the Colony, of placing my evidence before the Committee in reply to that. That request was denied me. The evidence taken last Session was published, and up to this moment I have never had an opportunity of saying a word in reply to it. I am here now in obedience to a summons of this Committee. I have not repeated my request this Session.

269. Would you wish to make any statement to the Committee? It is rather late now to reply to statements made last Session. I am prepared now to answer any questions you may put to me, but I trust to be permitted to make a fuller statement before the inquiry terminates.
270. As you are here, and must have a considerable knowledge of the subject referred to this Committee, I will ask you one or two questions. In what state is the survey of squattages now;—are there many of them actually surveyed? A great number of them are surveyed.
271. Those which are surveyed, I suppose, are all charted? Not all. The answer yes or no would hardly do justice to that question. For many years the Government declared that it was their intention to survey the squatting runs. From 1851 to 1859 that was the declared intention of the Government, although many persons practically acquainted with the subject regarded the idea as an absurdity. I had repeatedly written and spoken on the subject, endeavouring to show that the thing was impracticable and unnecessary at the time; but it was not until 1859 that the attempt was abandoned. A great number of people had actually paid into the Treasury the estimated amounts for the measurement of their runs, and these sums were lying in the Treasury for several years, the duty of surveying never having been undertaken. When people were crying out for the measurement of small farms near the townships, anyone acquainted with the subject would see that the surveyors had more than they could do to accomplish the work near at hand, and any attempt to carry out the measurement of runs in the unsettled districts then would have been a mere farce.
272. It has been given in evidence that a system of plotting runs without surveying them—plotting them in the office on a scale—obtains. On what system is that principle of mapping runs formed? It came about in this way: In the undulating country on the Dividing Range, or the slopes of the Dividing Range, as might have been anticipated, the runs were divided by the natural features of the country—mountain ranges, rivers, creeks, and watercourses; but in the great level country of the western interior that would not be practicable. In allotting runs to applicants there were no means of dividing the country except by some system of projection based on such natural features as do exist. A number of runs were applied for and brought under rent without their boundaries being determined, and one of the first things done afterwards was to determine them in some way. Many detached surveys, not known to the department, were made, by which isolated points and features were determined by the squatters for their own convenience. Mr. Du Faur became aware of the existence of these surveys, and he got a large number of them together, by means of which he was able to prepare a kind of skeleton map, forming a reliable basis of projection.
273. How far can these maps be relied upon in the public interest, as they contain only what is represented on the sketches made in the office, and have been prepared without seeing the country? Everything that Mr. Du Faur has on his maps is absolutely reliable. They are more critically tested than many other maps, and I should say generally more reliable technically than any published in the Colony. The projections are the result of the closing together of great lines, and the minutest accuracy is necessary to bring them together. He has admitted as a basis nothing but what has been absolutely determined.
274. Before these plottings took place how was the estimate of acreage arrived at? In the first instance the applicant would set out the run which he wished to take up. It was examined, and the points of it fixed upon the ground as closely as possible; and the contents of it would be estimated by the bearing and direction of the external lines.
275. Was this done by the Commissioner? The applicant's estimate was revised by the Commissioner, after personal inspection of the country.*
276. Something more is now done? The descriptions and estimates are still further revised upon the better information which has now been obtained.

A. O.
Moriarty, Esq.

14 Mar., 1873.

TUESDAY, 8 APRIL, 1873.

Present:—

MR. RODD,

| MR. STEWART.

JAMES AUGUSTINE CUNNEEN, ESQ., IN THE CHAIR.

Abram O. Moriarty, Esq., called in and examined:—

277. *Chairman.*] You were formerly before the Committee as a witness? Yes; on its last meeting.
278. You were then desired to defer your evidence to some future occasion? Yes; I desired to have my evidence deferred in order that I might be able to reply to anything that it might seem to me desirable to answer in the further evidence before the Committee.
279. Having seen that evidence, would you wish to make any statement in reference to it? With the permission of the Committee, I would like to refer to some matters which I think require comment. I may, however, state to the Committee, that having been probably more than any other person concerned with the administration of the land laws, and having been more than any other person, except their author, concerned in the preparation and consulted during the progress of enactments of the present laws, I naturally felt that the inquiry of this Committee would be a matter of deep interest to me; and I thought it probable that I might be of some slight assistance to the Committee in their inquiry. I found, however, that the inquiry by the Committee was—I will not say limited, but that it was directed to the bringing out into strong relief matters—mere trumpery matters as compared with the great question of the administration of the land laws—in which my official conduct is called in question. There are matters upon which some evidence has been taken by the Committee, some of which I am sorry to say are at variance with the fact. Probably it is not designedly so, but it is so much the case in some instances that I feel bound to ask the Committee to permit me to explain them.

A. O.
Moriarty, Esq.

8 April, 1873.

280.

* NOTE (on revision):—This, at least, was the intention of their instructions, but very imperfectly carried out in too many instances.

A. O. Moriarty, Esq. 280. Before you go any further, will you permit me to ask you what you mean by "trumpery matters"? I did not say, or at least did not mean to say, that the Committee's inquiries were trumpery matters in themselves, but that for an important inquiry of this kind matters of that character had been too much dwelt upon in connection with myself.

8 April, 1873.

281. By whom? By the Chairman of the Committee, and by one of the first witnesses examined—Mr. Pretious.

282. What are the trumpery matters to which you allude? The first I refer to is the matter connected with some runs called the Salt Lake Run, and some others.

283. To what else? To the statement made by Mr. Pretious with reference to having no record in the office of fees and deposits received in connection with runs.

284. What part of the inquiry respecting the Salt Lake Run do you regard as trumpery? The whole matter. It is not a subject that deserved to occupy the notice of the Committee.

285. That is your opinion? I think I should have no difficulty in proving it. I may, however, mention to the Committee, that when I spoke of trumpery matters, what I meant to say was that any matter in which blame has been attributed to me was trumpery, especially as compared with the large inquiry as to the administration of the land laws for the last ten years. With regard to this Salt Lake country, I should like, with the permission of the Committee, to say that during many years country was taken up in the far interior, especially in localities newly explored, and when the applications were sent in, it was almost of necessity very imperfectly described. Many blocks of this country would fall in after being rented for some years, and then, in accordance with the Regulations, these blocks would be at once again put up to lease, under the descriptions of the original leases, these being the only descriptions in the office. This was exactly what happened in the case of this Salt Lake Run. The original application for the run gave a very loose description, and after a time the run was forfeited and fell in to the Government. It was at once advertised for sale by auction under the description under which it had been held by the original lessee, and given in many years previously. Not being sold by auction, the blocks were re-advertised under the same description, the Department not knowing that there was any defect in it. They were advertised in the ordinary routine as being open for application. On this an application was made for the run, and then the fact of the existence of a discrepancy was brought to my knowledge by an officer of the Department. An investigation was at once undertaken, and it was then found that there was a serious discrepancy between the described boundaries of the Salt Lake blocks and the boundaries of other runs adjoining. I caused some further inquiry to be made, and whilst this was pending, I declined to accept the application, as I did not wish to commit the Government to the issue of any lease whilst I had a doubt whether there was room for any new lease in the locality. That is the substance of this Salt Lake matter.

286. Are you not aware that the Salt Lake was a run which had been forfeited? Yes, I have said so.

287. That according to the regulation it was advertised for the lease to be sold by auction? Exactly.

288. That not being sold at auction it was again advertised as open to be taken up by any person? That is what I have stated.

289. When you advertised the sale of the lease, and also when you advertised it as open for occupation, did you on both occasions advertise the description? We did. It was the same description in each case.

290. And when a person applied for the run, he was informed that the Government were not in a position to give him the run as set out in the advertised description? Yes. I have explained so.

291. How did it happen that you came to advertise a description when you were not in a position to give what you described? For the simple reason that this run, like eighty-hundredths of the runs in the interior, at that time was in a country that had not been surveyed. In these cases, as the surveys are made and connected, it often turns out, for instance, that the distance between two watercourses which had been taken in a rough-and-ready-way for boundaries, was not so great as had been imagined. The consequence would be that there would not be the extent of country expected to exist; or it might be found that the boundaries lay partly within those of some other lease. All this can only be ascertained by actual survey.

292. But do you not think it a most unbusiness-like way of doing things to advertise land for occupation until you are sure whether you have it or no? It would be very desirable if it were possible to have every run surveyed before it was advertised, but as the Committee are doubtless aware, no squatting runs had been surveyed until within a recent period. It was not till some years after that the survey of runs became more general.

293. If a private individual had a quantity of land to lease, and advertised it as having certain boundaries, if you applied to lease that land and were then informed that you could not have it with those boundaries, as he found he had not got them, would you not think that a very unbusiness-like way of proceeding? The comparison hardly holds good, because a private individual never can let land that is not well known and that he does not know to belong to him, and of which the boundaries are not well ascertained. But as far as the Government were concerned, the entire lands of the Colony had been of necessity let without the boundaries being known definitely. Detailed surveys of the runs in the far interior are only now proceeding, for the demand on the Survey Department in past years was so great that the survey of squatting runs was never seriously undertaken. Some twelve years ago there was such a great and unsatisfied demand for land in small farms, that the Legislature found it necessary to introduce the system of free selection before survey; indeed, for years after, the squatting districts were thickly occupied, the Survey Department was not expected to know anything beyond the nineteen Counties, and all the squatting runs were beyond these. As far as the country beyond was concerned, we had to take it as it existed in the ideas of those who took it up, and of the officers who dealt with their applications. It was not only in the case of the Salt Lake but also in a large number of other runs that the Government gave leases with some particular creek or range as the leading point of the boundary; and it would be found afterwards that this creek or range was not in the position assigned to it by the lessee; and then, as other leases often depended upon the boundaries of the first, some confusion and difficulty would be experienced.

294. Were these descriptions defective by reason of their vagueness? I do not say that they were all vague, because care was always taken to lay down some certain point to start from; but the position of these points was sometimes found to be mistaken.

295. I am not alluding to the care, but what I mean is, were they vague so far that the runs were not actually in the position which the lessees, by their descriptions, would lead the public to believe? That may have been the case in some instances. In some particular cases it may have been so, but it was not a general thing

296. In how many cases? In my experience, I should say, in some half-dozen cases.

297. Not more? I am speaking only from memory, but I should think that certainly there could not have been a dozen such cases.

298. Do you not think that the Government ought not to advertise, as correct, a thing which they did not know to be so; it would be easy to say that it was not known what the area and boundaries were, instead of the Government giving its weight and authority to an advertisement representing a certain run to have such an acreage and such boundaries, when the latter were not actually known? I think, as a matter of fact, the acreage was never given as actual, but always as estimated; and the boundaries were never stated in such a way as to mislead.

299. You think correct boundaries were always given? Yes, the lessees would give correct boundaries for their own protection, but they would be given in such a way that their effect would not appear until the run came to be measured.

300. They were simply boundaries on paper? No. They were something more than that; they were boundaries sometimes defined by natural features, sometimes made on a projection from information correct in so far as it existed of the actual features. That check may have been incorrect in many cases from a variety of causes; and in about a dozen cases it was found that the features were not placed as recorded. I have always thought that all the information necessary for defining the boundaries ought to be had, and I have done my best to carry out that idea.

301. Would you not think that a fair subject of inquiry for this Committee—into this mode of advertising runs by descriptions, which cannot afterwards be guaranteed? Possibly it may be so; but in general the descriptions have been reliable.

302. Why then do you call it a trumpery matter? Pardon me; that is not what I referred to as a trumpery matter, but only the subject in so far as it imputed blame to me.

303. It was not with reference to yourself, but to the misleading of the public by the advertisements in the *Government Gazette*, that the attention of the Committee was directed? Allow me to observe, that there is not an old estate in the country that might not be said to be held under an erroneous description, if that description were looked into critically. But every one knew that the boundaries of these runs had not been measured, and that what was advertised was only an approximate estimate of the contents. If you ask me the question whether it would be advisable for all forfeited runs to be measured before they are put up for sale, I should say at once that it would be a most desirable thing. But at the same time it would have been utterly impossible formerly, and the only effect of such an attempt would have been to arrest for an indefinite period the redisposal of forfeited leases.

304. You think it would be a wise thing if the Government were to be in the position of saying that they could give to the purchaser all that they represent in the advertisement? I do, certainly.

305. Have you any further statement to make? I should add to my answer, with reference to the measuring of forfeited runs before they are disposed of, that this matter formed the subject of frequent regulations* before the present Act came into force; but there was such a large area to be dealt with, and so many leases, that the Government found it necessary ultimately to dispose of the leases without being measured. Every branch of the Survey Department had as much work as it could manage, and if this had been thrown upon the Department it would have caused such enormous arrears that one-half the country would never be under rent; so we were forced to take the best information we could get in regard to the leases, and that was the description of the original lessees, after examination by our own officers, the Commissioners of Crown Lands.

306. It also seems that the Government, in some of these descriptions, included parts of runs already leased; so ignorant were they of what they offered to the public that they not only gave wrong descriptions but also included the property of other persons in what they offered for sale? Exactly; and that was the very reason why, in the case of the Salt Lake Run, I thought it advisable to have some inquiry made before disposing of the lease. It was ascertained that the position of certain trees which guided the frontage marks was different from what it was supposed to be, and that consequently the run was not of the same extent as it was advertised.

307. It was the same with the Hermitage and the Gumble Plains blocks and some others? No. I think that was not the case in these instances. I think that many of these runs were found on a continuation of lines being run from different points remote from each other to involve a conflict in description.

308. It was stated in a return from the Lands Department that these blocks were not leased because they were found to contain within their boundaries parts of other runs? Yes; that is to say, that in the course of dealing with an enormous number of cases some erroneous overlapping was found to have occurred in a few. With regard to the Gumble Plains, some of these blocks were taken up with reference to an outlying range, to springs and to other places, whilst some other blocks were taken up with reference to the main natural feature,—the river bank. When the survey went from the river, and these unconnected points were connected by actual survey, there was found to be some conflict of description.

309. Are you aware that in some cases Crown tenants have occupied a great deal more country than was included in their lease, and that in some instances this over quantity has been applied for and refused, whilst the lessee has been allowed to hold it without paying rent;—do you know any cases of that kind? A great number of cases have come to my knowledge in which lessees have occupied and have attempted to hold areas largely in excess of what they paid for. I may mention the case of the Murrumbidgee Plains as a strong instance of this. The rivers Murrumbidgee and Edward, and the Billyong Creek formed the frontage, and the holders of these runs only paid for 10 miles out from it; at the same time they claimed all the back country, some millions of acres between them, without paying for it. This claim was strenuously resisted by myself, and so successfully; that these great plains were cut up into runs, let for high rents, and now compose some twenty or thirty of the most valuable runs in the Colony. The same process is going on everywhere else. The squatter naturally tries to get as much country as he can. They like to have elbow-room to work their flocks. They feed out as far as they can do so unchecked, and wherever they have a colorable claim to country they assert it.

310. Trying at the same time to elbow others out? Yes; and one of the chief functions of my office, as I conceived it, was to resist this attempt on the part of individuals, to monopolise large tracts of country, for which they paid nothing; and my having done so has resulted in a very considerable increase of the squatting revenue. Under instructions from the various Ministers for Lands, this subject was very minutely

* NOTE.—See Regulations, 28 July, 1849; 1 January, 1850; 22 November, 1851; and 15 July, 1853.

A. O.
Moriarty, Esq.
8 April, 1873.

minutely dealt with. Every individual case was separately looked into, and every claim was critically examined before it was decided upon. Rules were laid down, providing for the way in which these cases were to be disposed of, but in no case was the squatter allowed to retain country which did not come within the limits of his recorded description, fairly interpreted. If it appeared on a survey, as it often did, that that description, when put together, when the various points were known, included an area much in excess of that claimed in the description, rules were laid down by which a relative and proportionate excess of rent should be recovered. I think the rule was, that if there were found to be in excess to the extent of one-third of the country held, the Government insisted upon a reassessment, and payment of additional rent in proportion. If there were found to be an excess of two-thirds, the Government, in addition to that, claimed an immediate reappraisal and an adjustment of the rent, from the date of the then current lease.

311. *Mr. Stewart.*] Was this done in many cases? Yes, in very many cases; and large sums were returned to the Treasury by the action thus taken. I may say, however, that some of these claims were dealt with by succeeding Ministers in their own way, and that many large sums, which had been recovered and paid—in some cases willingly paid—were afterwards remitted. In all my own proceedings in this matter I laid it down as a rule that no squatter should get into his run land which his description did not fairly include, and which the faith of the country was not fairly pledged to lease him.

312. *Chairman.*] When a Crown tenant holds country not included in his lease, and another person becomes aware of it, and applies to lease the surplus country, how is a case of that sort dealt with;—when what the squatter would term an outsider comes in and applies for the surplus country—how is he dealt with;—has he a lease granted to him? If the country so applied for does not come fairly within the terms of the description of the leaseholder, and if the outsider be the first tenderer, he gets it as a matter of course. If he does not get it, I think it is possible in some cases; in fact I am certain it has happened in some cases, and specially in one that I have in my memory—that it has been proved that the land had been tendered for in former years by some one else, when, from imperfect knowledge of the country, the tender has been refused under the impression that no vacant country existed. In that case the Crown would revert to the old tender, and the old tenderer who had previously been refused would get the spare country. There is one case, as I just remarked, that comes within my knowledge. In this case the late Mr. Robert Fitzgerald held some large runs on the Big River, and Mr. Single tendered for some land at the back, contending that it did not come within Mr. Fitzgerald's descriptions. Mr. Fitzgerald laid claim to all this country, and with his great influence against me I still contended for what I considered to be the public interest. Mr. S. C. Brown, a Member of this House, knows all the details of this case, having been engaged in it, and he could tell you the battle he made for it, and the trouble I had in resisting the claim, backed as it was with all Mr. Fitzgerald's wealth and personal influence. A survey, however, was at last ordered to be made, to see whether, on measurement, the descriptions would take in this back country. On the survey being made from the various points mentioned in the description it was found that the back country was not taken in by the description; thereupon Mr. Single's tender was accepted; but upon investigating the matter I found that another person, Mr. Morrison, I think it was, had tendered some years before for part of the same country, but his tender had been refused on the ground that there was no vacant country. Knowing of this tender, I considered that the tenderer was entitled to the land, and I recommended that the tender should be re-opened, though it had been previously declined. It was re-opened and was accepted for part of the excess on Mr. Fitzgerald's runs.

313. Was that the usual course? That would be the usual course; in fact the course uniformly adopted where the tenant could not show that the land tendered for came within the meaning of his recorded boundaries.

314. Do you remember any case in which a person, not the occupier, has applied for country of this description, tendered for a lease of surplus ground, and been refused it, and then that the squatter who occupied the ground has applied for it and got it; in fact, where the outsider was refused, and where the Crown tenant got the land, though he did not apply for it till after the other? If such a case has occurred, it was most certainly illegal. I always acted on the principle that the first applicant for unlet country had a right to it by law. At the same time I know how difficult it is to convince Crown tenants that land which they have long looked upon as theirs does not belong to them; and it is equally difficult to convince applicants that the country they have applied for is not vacant country.

315. Have you any further statements to make, or are there any other matters you would like to allude to? I am very unwilling to take up the time of the Committee, but there are some which I feel, in justice to myself, that I ought to refer to. I find that an hon. Member, Mr. Baker, in the discussion on the motion for appointing this Committee, referred to some case which he stated had come within his own knowledge, and which, if it had occurred as he described it, would have evinced the grossest mismanagement in the office under my charge. The case was this, and these are the hon. gentleman's own words as given in the newspaper reports:—"Another matter was that of tenders for runs. To his knowledge a tender had been sent in and the deposit paid, and in spite of frequent applications no information could be obtained whether the run was leased or not. After fifteen months a letter was received, stating that the money had never been received in the office. A land agent was instructed to make inquiry, and after four or five months it was found out that the money had been received and had never been acknowledged. At last he was told that he could not have the run, because some one else had applied for it." At the time this statement was made I had no connection with the Department, and I consequently could not furnish materials for setting the matter in its proper light, but I wrote to Mr. Baker, asking him the name of the person to whom he had referred. That hon. gentleman was kind enough to furnish me with the name, and I found at once, as I expected, that Mr. Baker had been in error as to his facts. What the facts of the case really were the following letter from the person concerned will show:—

"Euroka, Morangarell, Bland,
"7 August, 1872.

"A. O. Moriarty, Esq., No. 3, Spring-street, Sydney,—

"Sir,

"I received yours, dated 3rd ultimo, referring to my tender for Long Reach, or East Carabah.

"You request information as to whom and when I paid the deposit for my tender, dated January, 1870. The whole affair is very simply explained.

"It is true I sent in a tender, dated as above, but through my not being acquainted with the formality required, I neglected to send the deposit at the same time.

"Receiving

"Receiving no answer, I was induced to commission Mr. Hanson, land agent, Sydney, to look after the business for me. The first letter I got in reference to my tender was from him, stating that no deposit had been paid in, and requesting me to forward the deposit, £2 10s., together with his fee, also £2 10s.

A. O.
Moriarty, Esq.
8 April, 1873.

"I sent him the £5; that was, I believe, in April, 1870, as near as I can remember, for afterwards I got so little satisfaction that I have kept but little of the correspondence. However, it seems that he put in another tender, and paid the deposit in June, 1870, for which I have an acknowledgment from the Government. Mr. Hanson was confident of my tender being accepted, and said that no tender could take precedence of mine.

"I trust you are satisfied with my answer to your questions. I have simply stated the matter as it occurred.

"Should you have anything to communicate with reference to my tender, I shall be happy to hear from you.

"I am, &c.,

"CHARLES BURRETT."

Thus the whole matter was simply this:—The person puts in a tender, and fails to send the deposit with it; he employs an agent who discovers the mistake, puts in a fresh tender, with a deposit accompanying it, and in due course gets an answer acknowledging it. There are also several matters stated in evidence by Mr. Pretious, in relation to which I really cannot understand his evidence. In the first place he states that there was no record kept of deposits forwarded with tenders for runs. I do not know if it occurred to him that in making that statement he, who was an officer receiving a salary of £450 a year to supervise the clerical arrangements of the office, was making a very serious charge against himself; but, as a matter of fact, the statement is incorrect. There is not only one record of such transactions but there are six records of them. What these are I will shortly describe. The first of these in the Department of Lands is a book which is kept locked up in the tender-box. In that book is recorded every instance in which a tender is forwarded, and in which the amount of cash, if any, accompanying each tender, is specially noted. This book was designed by myself as an additional counter check upon the records of the office. It was not in any way under my control or within my reach, being kept in the tender-box under three keys, each held by a different person. In this, in every instance, is noted the tender and the cash received with it, the entries being signed by the Board. It is then locked up in the tender-box when the Board breaks up, and remains altogether beyond the control of the Department. No. 2 record is the endorsement by the Board on the tender, with a statement of the amount of cash, if any, received. No. 3 record was contained in the covering minute. All the tenders of each month were placed in a covering minute, on which again was noted the particulars of the tenders, and the total amount of cash, if any, received. These covering minutes are records of the office, and the tenders and all relating to them are kept under their cover, and arranged in the same order as that in which they are opened. No. 4 is this:—Tenders are entered in a separate tender register in the Crown Lands Office. In this register there is no special record of the deposit paid; but the fact of a tender being entertained and forwarded for report, as noted in the register, was evidence that the deposit had been paid, because, if it were not paid, the tender would be declined on that account, and would be noted accordingly in the register. The 5th record is the acknowledgment of the receipt of the tender and deposit sent to the party tendering, and of which copies are kept in the letter-books of the Department. No. 6 record is by the routine of the tenders themselves, those being regular, that is with the deposit paid, being sent on, and those which are irregular being at once declined.

316. If that be the case Mr. Pretious ought to have been able to give us a return of the amounts received as deposits? No doubt. It could be prepared without the least difficulty. There is another statement he made to which I take exception, and that is, that receipts and payments never went through him. He must surely have forgotten the practice of the office; everything went through him, unless he happened to be out of the way at the moment. It sometimes occurred, however, that in an emergency I would send for the accountant and make the payments through him direct; but as a matter of routine all papers and instructions went to Mr. Pretious, and from him to the accountant. With regard to these fees passing through the office, the whole amount of them was only a very petty affair, being fees on transfers and deposits on tenders. They were of small amount, and were regarded by me as matters merely clerical, which were balanced up and arranged every month, and to which, beyond seeing this done, I gave little attention. No considerable amount at all ever passed through the office, except through misdirection, or when personal acquaintances of my own would send me money to pay for them, and when this happened I always took care to have such remittances recorded in the office, and by these means they might easily be traced. Every communication received by me during my holding of office has been carefully recorded, and that record will show every communication I received, the subject to which it referred, and the contents or enclosures, if any. That may be had at any time, for though the administration may alter, the record will still exist.

317. Mr. Pretious states that the receipt of money for leases at the Occupation Branch of the Lands Department was in violation of the Regulations under the Crown Lands Occupation Act? He is in error there, as the Regulations will show. It was found that persons in possession of country that they were not paying for, sometimes applied for a lease of it as vacant country without the least intention of taking it up, their only object being to shut out others from applying. To prevent this sort of thing from being continued we called upon persons applying for forfeited leases to forward the amount of the rent with their applications. When these were approved of, they were transmitted to the Treasury, who were then authorized to receive the money, which would not previously have been receivable at the Treasury. But transactions of that sort were only few in number, and did not, I suppose, amount to a hundred pounds in any year. Then again, in question 585, he is asked: "Was it then the Treasury which took action in the matter;—did any persons who had deposited this money for leases ask why their cases were not decided upon, and then upon inquiry at the Treasury find that their money had not been paid in there?" And to this he replies: "I am unable to state whether any particular case of that kind occurred or not; these moneys were never paid into the Treasury through me." Here Mr. Pretious is in error, because all communications of what kind soever with the clerks of the office passed through him. Then again, in question 596, he is asked: "There was no record kept?" and he answers: "No; the moneys were handed to the late Chief Commissioner, and the office knew nothing of when they were paid into the Treasury." Here again

he

A. O. Moriarty, Esq.
8 April, 1873.

he is quite wrong as a matter of fact. His statement that the moneys were always handed to me is inconsistent with the fact, because the money as paid was handed to the clerk and not to me. Of course if it came by post it came first to me of necessity; but the documents relating to it were always immediately afterwards handed over by me to Mr. Pretious, or it would go to him through a clerk. I desire to state further that during the whole time I held office, never upon any occasion was any pecuniary transaction conducted by me relating to Crown Lands, except through the agency of the Department. In question 632 he is asked as to the origin of the inquiry, and he answers: "I am not aware. I do not at present recollect what was the first cause of that inquiry, whether it was from a private source or otherwise. I know less of that inquiry, and less of the cause of that inquiry, than perhaps any person, though I may have been supposed to have known a great deal of it. I have not seen the papers to this day." Mr. Pretious is under some slight misapprehension here. Those papers which were produced to Parliament at my instance will show a memorandum of Mr. Pretious's dealing with the whole question. However, as a matter of fact, I am not aware of any person having made any inquiry or complaint, of the kind alluded to in the question put to the witness. I have reason to believe that some complaints were privately made during Mr. Cowper's Administration, which resulted in his sending an officer to investigate the accounts of the Crown Lands Office, of which I was the head. That led to a correspondence, in the course of which many things were stated that I never heard of until I saw the papers that were laid before Parliament; there was not a material point in those papers which I had not dealt with in a way that would have been satisfactory to any impartial tribunal, except only in so far as there were matters in them that I had not previously heard of. In fact the history of my removal from office was this: Some few months before this inquiry took place, about the beginning of 1870, the Under Secretary for Lands resigned, and I was asked to undertake the duties of that office in addition to those of my own. I was not anxious for the office; I did not apply for it in any way, because I knew it would bring with it no increase of remuneration whilst there would be great additional responsibility cast upon me. I undertook the duties, as I thought that in doing so I might be able to simplify many matters in which from the division of the offices there was a great deal of needless routine in referring from one to the other. Much of this I thought might be remedied by my holding the two offices. Soon after I had undertaken this additional duty, Mr. Forster left the Government, and no successor to the post of Secretary for Lands was appointed for some months, so that there was no person administering the Department at all during that time. The then Premier, Mr. Cowper, used to visit the office occasionally, but in so far as his supervision went it was rather an incumbrance than an assistance, owing to the time I lost in watching and waiting for interviews with him and his ignorance of the business. The result of this was that my own ordinary duties fell into arrear, and my health was almost completely destroyed, added to which I did not receive the assistance I should have had from subordinate officers. There were thus arrears of correspondence, and my own broken health, impairing my own energy, oversight and neglect occurred in matters to which my attention should have been but was not directed, and were made the most of, until the ultimate issue was my removal, with intended disgrace from an office I had filled with honor for twenty-five years; and it might have entailed starvation upon myself and my children after I had held for ten years the administration of one of the largest sources of public wealth, if I had not stood a little higher in general estimation than those who assailed me. Had it been earlier in the Committee's proceedings there are many matters that I might have suggested to them as fit subjects for inquiry, but now I presume the Committee will consider it too late to enter upon them. I may add that the inquiry into the cash accounts of the office was intimated to me about the 27th of May, 1870; and I think the papers will show that every sum of money that ever came into the Lands Office was finally arranged with the Treasury before the 5th June, only some four or five days after the inquiry, although my health was then in such a state that Dr. Alleyne assured me that unless I had instant rest my hold upon life was not a very strong one. As soon as I became aware of the substance of the papers which were laid before Parliament, I at once took exception to a number of statements in them, which were entirely new to me, and which were untrue. I addressed a memorial on the subject to Lord Belmore, and His Excellency handed that memorial to Sir James Martin, the then Premier, to be dealt with; but I have never had an answer to it from that day to this.

WEDNESDAY, 16 APRIL, 1873.

Present:—

MR. STEWART,

MR. TUNKS.

JAMES AUGUSTINE CUNNEEN, ESQ., IN THE CHAIR.

Mr. Charles M'Keown called in and examined:—

- Mr. C. M'Keown.
16 April, 1873.
318. *Chairman.*] You were for some time a resident on the Darling? Yes; in the Albert District.
319. You have been in the employment of the Government under the Crown Lands Commissioner? I have.
320. You had the collection, for a time, of the licenses for cutting timber on and taking stone and so forth from Crown Lands? Yes; for a portion of the time I was there.
321. Under whose instructions did you act? Under the instructions of Mr. Commissioner Woore.
322. He was Commissioner for what? Commissioner of Crown Lands.
323. For what district? For the Albert District.
324. You were paid your salary through the Public Treasury, were you not? I was.
325. In your position as collector of rents and licenses were you under the direction of the Commissioner? Yes; under his direction exclusively.
326. Did you find that he took an interest in the performance of his public duties? No; I am sorry to say I did not.
327. Did he perform them in such a manner as to be of advantage to the country? He did not.
328. In what respect did he fail? In refusing me the opportunity of doing my public duty by requiring me to do private work for himself.
329. Did he employ you in doing private work for himself at times when you ought to have been engaged in the service of the Crown? He did; and not only me but a number of other men besides.

Mr. C.
M'Keown.
16 April, 1873.

330. While you were in the service of the Crown? Yes.
331. And while you were paid from the Public Treasury? Yes.
332. Who were these other men? I will give you their names as they appear on the pay-sheet. They were, Michael Garra, Timothy Carroll, Charles M'Keown, Thomas Kelly, William Plaisted, Daniel M'Keown, James Baxter, and S. H. Vernon. It may be necessary for me to explain that these men were not all employed at one and the same time, but at different periods of the four years, from 1865 to 1869, that I was in the district.
333. And these men were all paid by the Government? Yes, from the Public Treasury.
334. And you were one of them? I was one of them during the whole of the time.
335. You signed the Government abstract for your wages? Yes; the usual monthly abstract; and we gave Mr. Woore authority to receive such wages from the Government on our account.
336. Do you state that during the time you were paid a salary by the Government you, and these men you have mentioned, were employed in the private service and for the personal benefit of the Commissioner? I do.
337. Will you state how you were employed in his private service? I will state the way in which I was employed in each year, as near as possible.
338. Let me ask you first how you were paid? Our money was paid monthly by the Government.
339. Who prepared and sent in the abstracts? Mr. Woore. I may say, in regard to the payments, that in joining the Service every man had to give Mr. Woore an authority to draw his wages. When the abstracts were sent in, the Government paid the whole amount into Mr. Woore's account in the Union Bank at Sydney, and when we required our money he would give us a cheque for it.
340. Will you now state, as succinctly as you can, how you were employed in the personal service of Mr. Woore? For the first five months of 1865 I was employed tailing horses. Our party then consisted of three—Timothy Carroll, Michael Garra, and myself; the other two men were employed—Michael Garra as a kind of valet to Mr. Woore, mending his boots and clothes, cleaning his boots, washing his clothes, and otherwise attending to his comfort; Carroll performed duties somewhat similar. Then for about eight weeks of 1865 we were out on the Paroo, measuring and defining boundaries. After that the Commissioner left the district for six months. Our party then consisted of four men by the addition of Thomas Kelly, and during six months these men had nothing at all to do. In 1866 Mr. Woore returned in February, bringing with him another man, William Plaisted, to be placed on the staff and to assist us.
341. To assist you in doing nothing? Exactly. After his arrival I had some conversation with him, and questioned him about this man. He then told me that he had employed him in South Australia at £15 5s. per month, and that he had engaged him to build a house as he was a stone-mason. He was put on our staff, though he had no horse nor any equipments of any kind for doing the work we had to perform. He remained on our staff for five months, and during that time he never did any of our public work. He was working with the other men of the staff upon Mr. Woore's private work. Timothy Carroll had then left, and the four of us who remained were employed in raising stone to build a large house on the Darling for Mr. Commissioner Woore. We were engaged raising limestone and other things necessary for the construction of a large building.
342. And this man? He worked at his trade as a mason, and we worked the same as he did, the only thing being that he had the advantage of us from being employed at his trade, as well as from his not requiring any horse or equipment the same as we did. All he had with him were his chisels and hammers and other things for doing his work as a mason.
343. Was this house you were engaged upon the property of Mr. Woore? It was.
344. And while you were employed upon the building were you paid by the Government? I was.
345. Was this mason also paid by the Government? He was; for about five months, as near as I could judge.
346. Did he sign the pay abstract? Yes; just the same as I did myself.
347. Though he was working at the time in building a private residence for Mr. Woore? Yes; most certainly.
348. Were any others of the Crown Lands staff so employed? Yes; the whole of us. We were all employed over the building, with the exception of Michael Garra; he was cooking for the party during the time. He then held the position of Crown Lands bailiff; and his duty was to act as cook to the party.
349. What land was this house built upon? It was built on Crown Lands in the first instance, and Mr. Woore thought he would be able to sell it to the Government; but I believe they declined to buy it. He was then advised to free-select the ground, as the Government would not take the house. Mr. Woore led me to believe in the first instance that it was Government property, that he was building it for the Government, and hurried us on with the work on that account, promising when the house was completed to get the Government to erect barracks at the rear for the men. He acknowledged himself afterwards that the house was his, and that he would sell it to the Government if they would give him £750. It was a very extensive property.
350. Do you know where these pay abstracts now are? I should say that they would be in the Crown Lands Office.
351. Do you know the address of the man Plaisted? I know where his address was last September; he was then on the Roper River, in the Northern territory. I was in communication with him in reference to this very case.
352. What were the particular duties of the Crown Lands Commissioner; what did he employ the staff at when they were employed in the Public Service? He usually employed two to accompany him when he went out to define boundaries and to assess runs, and the other two were left at home to protect the house and to carry on the work of the place, just like ordinary labourers. When he went out he would lay them out a certain amount of work to be done whilst he was absent, and he expected to find it all performed when he came back—such work as building out-houses, trenching ground for the garden, and such like. He always left them something to do.
353. How did you define the boundaries when you were out with the Commissioner? It was done by a machine with a wheel—a perambulator I think it is called. It had a dial on the upper part of it, which marked off the rods, furlongs, and miles, over which the wheel travelled. It was an instrument that could not possibly be accurate, or even approximate to the right measurement, as the correctness would

Mr. C.
M'Keown.
16 April, 1873.

- have to depend altogether on the man who held it. The dial on the top was just like the face of a clock, and everything had to depend upon the way this was placed, and it required the man to know whether he had it on the right side or the wrong side. If you had it on the wrong side to you you have the machinery upside down, and then the indicators would travel backwards. A man might do this by accident, and go some distance in this way, and then, not liking to acknowledge his mistake, he would turn it right, and go on without saying a word of what he had done. A man making a mistake of this kind would not stop within 10 miles of the actual distance, consequently there was nothing about it that was accurate.
354. Did I understand you correctly to say that during the six months Mr. Woore was absent there were four of you left behind doing nothing, and that during that time you were paid monthly from the Public Revenue? Quite so.
355. And that at the end of six months he came back and brought another man to help you to do nothing? Yes.
356. And that during the five months which succeeded you were working privately for him in the erection of a building? Yes, for five months.
357. And that during that time you did no other work? Never any public work.
358. And during that time you were paid from the Public Revenue, and signed the regular Treasury abstract? Yes, just the same as upon all other occasions.
359. When the house was completed did this man Plaisted leave or was he still retained in the Service? No; he left when the house was finished.
360. Then he was brought specially to do this work? Yes, brought from South Australia purposely for it. He was engaged in Adelaide for nine months.
361. During the whole time he was with you he was never engaged upon any duty for the Public Service? Never for one single day, or for one moment.
362. Who now owns this house which Plaisted was employed in building? Mr. Commissioner Woore; to the best of my knowledge he has not yet sold it.
363. Did the Commissioner occupy it? Yes.
364. As his private residence? Yes; he had it built in contemplation of his marriage.
365. *Mr. Stewart.*] How do you know that he said he wished to sell it to the Government? He acknowledged to me that he desired to sell it; that he wanted the Government to buy it; and that if they would take it he was going to leave the district.
366. *Chairman.*] While you were employed in the Service, and for the private benefit of the Commissioner, had you to neglect your duty of collecting licenses from persons taking timber and stone off Crown Lands? I did, certainly. I knew that I was neglecting my public duty, but then any refusal from me to attend to the private work I was ordered to do would have been followed by my instant dismissal.
367. About how many was the average number of runs of which during the year this Commissioner laid down the boundaries or furnished the descriptions? I could not state accurately how many, but I am quite sure that they were not many, and certainly not the half of what he might have done had he been desirous of performing his public duties.
368. Where did the material come from, of which this house was built? From Crown Lands, about a mile distant from the house was where the stone came from. The limestone was got about 7 miles away; and the freestone came from about the same distance. I raised the whole of the freestone myself, and carted it with my own horse and a dray of Mr. Woore's, which he bought.
369. Was it the duty of the Crown Lands Commissioner to serve out the blankets for the aborigines? I believe it was his duty as a Justice of the Peace, but I do not know whether it was his duty as Commissioner. I know that as a Justice of the Peace he had such blankets—a bale of them.
370. How did he reach these aborigines to supply them with the blankets? He gave a few out to the police station when one was formed there; and then he gave a few about to the squatters in the neighbourhood.
371. In order that they might he distributed? Yes, to be distributed among the blacks.
372. Were these blankets marked or branded in any way? Yes, in the usual way such blankets were branded. To the best of my belief they had the word "Aborigines" branded on them, and a broad-arrow or a crown. I have seen them and handled them repeatedly, but just at the present time I cannot say positively how they are marked. They were branded just the same as all other blankets for the blacks are marked throughout the Colony.
373. Are you aware whether the Commissioner in any way employed any of the public property for his own use and benefit? I am.
374. In what way did he use them? When the house was finished and all closed up he went to town to be married, and during his absence he had the windows hung with these blankets in place of blinds. Then he used them as covers for the floor to prevent the dust rising from the ground into the carpets. Then he had the saddlery put in a spare room and all covered up with these blankets. I can produce the man who put the blankets on the floor; and as to the saddlery, I used them there myself. The blankets were laid down on the floor; it was an earthen floor, to prevent the dust and damp from rising up and injuring the carpet. Under the piano there was an extra layer of blankets, so that no damp should strike up and injure it. During the process of laying them on the floor, Mr. Woore himself helped the man, and he said that the blankets were of no use to the blacks, as they were all damaged, and he held them up to show where they were some of them stained with water.
375. Is there any further statement which you would desire to make to the Committee? I would wish to state that in gathering the money for the licenses to cut timber, I received no receipt from Mr. Woore for any money I might hand over to him; and I also desire to mention the case of a widow lady at Wilcannia, from whom I received the sum of £1 for an annual license to cut timber. About six months after she had paid me this lady's team was seized in the bush by a member of our staff for having been engaged in cutting timber without a license. I gave her a receipt for the money she had paid me, and that was all she required, for on its production from the Commissioner she could get her license from the Court at any time. She, however, neglected to take out the license, and when the case came on in Court Mr. Woore was unable to discover from his books that she had paid the money, although I had handed it over to him six months before. I happened to be away at the time, and as she said she had paid me the money, the case was postponed till my return. When I came back Mr. Woore asked me if she had paid, and I told him "Yes, she had." He said that he could not find it amongst the butts of the license forms, and he did not see from his memoranda that I had returned the money for it. I explained to him how I had given him the money, and he was then satisfied, and said that very possibly he had mislaid the lists I had given him, and that it was no doubt

doubt all right. I mention this to show the very loose manner in which the Commissioner kept his accounts, making it doubtful whether these receipts ever found their way into his accounts.

376. Or whether they ever reached the Government? Quite so.

377. *Mr. Stewart.*] Did this lady have to pay again? No. On my word that she had paid she was discharged. Mr. Woore did as he liked with the Bench. He was supreme.

378. *Chairman.*] Then you assert that he kept his accounts in such a way that he did not know who had paid the license money and who had not? He did not. He could not find out in this case, and when I asked him for the list which I had given in with the money I had handed over to him, he could not produce it. He told me that it was very likely he had lost it, but on my word he said he was satisfied that she had paid. The widow lady had also lost the receipt which I had given her, and therefore could not prove the payment, and she had never gone for her license because the receipt itself was sufficient.

379. At what station did Mr. Woore live? At a station known as Moorabene, 9 miles from Wilcannia; that is where all the work I speak of was performed. There is another important work in the shape of a tramway that we did for him. He was desirous of having a nice garden surrounding his house, and for that purpose after his house was finished, and all the heavy work was completed, the next work that the men were put to was a tramway, about 130 yards in length, down the steep bank into the river. This occupied us about nine months in the construction.

380. *Mr. Stewart.*] Was it an iron tramway? No, a wooden one. That was the only expense to which Mr. Woore was put—the purchase of the sawn timber for the rails. All the posts were cut and carted by the Government men and their horses, and were brought a distance of about 15 miles.

381. *Chairman.*] What was it used for? To bring water up out of the river, by a kind of box which ran down the rails into the water. When the box reached the water there was a valve opened by the pressure and so filled the box with water. When it was filled, it was drawn up by a horse attached to a rope running through a block. When the box left the water the valve closed by the pressure of the water inside. When it came up to the top over a tank, a man withdrew a bolt and let the water out into the tank; then from that it went all round the house and was distributed over the garden.

382. Was this on Mr. Woore's private property? Yes.

383. Laid down on his own land? Yes.

384. And constructed by men in the Public Service? Yes.

385. And by men who were paid from the Public Treasury whilst engaged in constructing this work? Yes. Another matter in connection with this property was, that when it was surveyed by Mr. Surveyor M'Cormick, Mr. Woore had to pay for the survey; and the Government men were given to the surveyor to assist him in the work. I will not be positive about the date when this occurred; but I know that two of the men were sent to assist Mr. M'Cormick in surveying this property, which survey I believe was paid for privately by Mr. Woore. After the Commissioner had finished with the tramway there was nothing to employ the men upon, so he set them to work excavating outhouses out of a large bank which ran round near the bed of the river. It was a fine place for anything of the kind, and he started two outhouses—one for his buggy and another for a fowl-house.

386. *Mr. Stewart.*] Was it an excavation in rock? No. It was all earthwork; it was a large bank of earth, and we excavated into it, and then put up a stout timber frame capable of bearing the pressure of the earth and rendering everything secure. Everything was kept very cool in these places, and they made fine sheds for buggies and carts, being exceedingly cool. There were two of these places excavated, and they occupied us about six months.

387. *Chairman.*] Was this on Mr. Woore's private property? Yes; the house and the outhouses were all within a hundred and fifty yards of each other—they were all connected.

388. Then it appears that these Public Servants were employed more by Mr. Commissioner Woore and for his benefit than they were in the service of the Government? Quite so.

389. More for his benefit than for the benefit of the public? Quite so. Another matter I would mention is this: I was instructed by Mr. Commissioner Woore to proceed to Carpawlin Station, there to take charge of a horse team, the property of Donald Macrae, for the purpose of carting iron and other materials intended for the house then building; being a distance of about 65 miles from a station named Winterigo, belonging to Mr. Duffield, of South Australia, where the material was to be obtained. I drove this team belonging to the Carpawlin Station for about a fortnight, when the proprietor, Mr. Macrae, instructed me to inform Mr. Commissioner Woore that he could no longer have the use of it, as he required both the team and dray for himself, and could not possibly do without it any longer. I had not at this time finished carting all the goods which were left at Winterigo, where the steamer had thrown them out, not being able to get any further up the river; but being told that I could no longer have the horses and dray, I informed Mr. Woore, and he instructed me to proceed to the Hillara Station, on the Darling, distant 110 miles from Wilcannia, and to take with me two horses belonging to the party, where I would find a dray and harness which he had recently purchased. That dray I was to bring down to the camp with the horses I took up. This I did; and then he instructed me, on my return, to break in the horses best fitted for draught and the property of members of the staff. After breaking these horses in, I used them carting lime, sand, wood, and stone for some months.

390. What were the lime, sand, wood, and stone used for? For building purposes in connection with the house as before mentioned. I may state that before the limestone was discovered—before it was known that such a thing existed in that part of the country, Mr. Woore instructed me to take William Plaisted and Thomas Kelly to a lake about 25 miles distant from the Darling, where there was known to exist a very excellent substitute for lime, called by the aborigines copacha or copar, but more generally known as gypsum. I proceeded to this lake under instructions from Mr. Woore, and commenced operations with the two men, and quarried a large quantity of this copar. We remained about three weeks on the lake, suffering great privations and working very hard. In that time we raised about 30 tons of this copar. After raising this much, I received instructions from Mr. Woore to return to the river with the party. When I came back to quarters he informed me that he had discovered genuine limestone about 7 miles distant from the river, and instructed me to take my party out to where the limestone was said to exist. I obeyed his instructions, and remained about three weeks at the last-named place, raising limestone. After raising a large quantity, quite 30 or 40 tons of stone, I received instructions to bring the party in to the river; and Mr. Woore then told me that so far as the copar we had raised was concerned he would not bother about it—that he would not have it; and he then set the party to work to excavate

Mr. C.
M'Keown.

Mr. C.
M'Keown.
16 April, 1873.

excavate the foundation of the house. The men were then told off to different occupations, as the mason was beginning then to work at his trade, and actually build the house. Thomas Kelly was told off as mason's labourer, and myself as the horse driver.

391. To cart materials? Yes; to cart and carry on the work; and Michael Garra was cook, which he had always been when at head-quarters. When the party was sent away the cook did not accompany them—they had to look out for themselves; and he stopped at home to attend to the wants of Mr. Woore; when the party were in at head quarters he attended to their wants alone.

392. Whilst you were told off to perform this work on Mr. Woore's private mansion, were you paid wages from the public purse? Yes, every month. We did not draw our money every month, but Mr. Woore received it for us every month.

393. Your pay was furnished every month by the Government? Yes, decidedly so. This work was continued up to the time when the house was finished. Another matter that I would call attention to is, that in August, 1867, Mr. Woore received notice from the head of the department, informing him that he would not be allowed any longer to employ so large a staff of men; and he was directed to give the men one month's notice, with the exception of one man, who was to be retained to perform the duties of Crown Lands bailiff. It may be necessary to state that just at the very time when he received this notice, Mr. Woore had obtained leave of absence to leave the district for a second time, for the purpose of making his marriage tour, and that he received this notice the mail prior to his intended departure. The party at that time consisted of Michael Garra, Thomas Kelly, Daniel M'Keown, James Baxter, and myself—five in all. I was at the time 55 miles distant, tailing horses, and the other four men were employed working about the place on the river. I received a notice from Mr. Woore, informing me of the decision of the Department in reference to the staff, and also informing me that I was selected as the man to be kept; as to the other members of the staff, he promised to pay them out of his own pocket for a period of three months, providing they would give their assent to remain in camp as usual, and to perform the different work as usual until such time as he returned from Adelaide. He stated at the same time that if they would only stop on he was sure that he would be able to get each one's salary for him in full, and besides that to get him reinstated. Well, three men out of the four he did get reinstated, from what representations I cannot say, but I know that he did not pay them from his private pocket, for they signed back abstracts for their pay, the same as usual.

394. And they were still retained by him in his private service? Yes, just the same as they were before.

395. Could you inform the Committee how it was that the Commissioner became possessed of the land on which he built his house;—did he conditionally purchase it? I believe he did, but I cannot state this of my own knowledge. It is only from hearsay that I can say I believe so. It was well known from general repute that he did free select the land; and he told me on more than one occasion that he wished to sell it.

396. How many acres are there? 40 acres of his own, and besides that he claims a right of run for 2 miles on the river and 2½ miles back. I do not know on what ground he claims it.

397. Perhaps as a reserve? I cannot say on what condition he holds it, but I know that he impounds indiscriminately for that distance. I was not one of the two men who assisted Mr. M'Cormick to survey the ground, or I might have given your more correct information. The land however is altogether valueless, except for the site of a house.

398. It is no good for agriculture? None whatever, without irrigation.

399. Mr. Tunks.] How long were you in the Public Service under the Commissioner? Rather more than four years, commencing on the 1st March, 1865, and terminating in September, 1869.

400. You say that Mr. Woore promised that you should be kept on;—was that promise kept? It was.

401. And the other men who were promised to be paid;—were they paid? They were.

402. And they were kept on too? They were—all of them. He told them he thought he could arrange it with the Department when he came back, and he did so.

403. Have they been continued in the Service ever since? No, there are none of them in the Service now.

404. When Mr. Woore returned they got three months pay? Yes, they signed back abstracts for it.

405. And then they all remained? Yes.

406. And you kept on till September, 1869? I did.

407. How was it you came to leave the Service? I was discharged for refusing to do private duty.

408. Did you make any representation to any one as to the manner in which you were so frequently employed?* No. I did not know who to represent it to.

409. What did you refuse to do? I refused to accompany buggy when Mrs. Woore went visiting.

410. On that he dismissed you? I was dismissed instantly. I gave a month's notice when I refused to go, but he would not take that and sent me away on the spot.

411. Have you located in that neighbourhood since then? Within 130 miles of it.

412. If you had kept on there with Mr. Woore I suppose you would not have said a word of what you have now told us? I believe I would; only at the time I did not know who to tell it to.

413. You have been there four years, and during the whole of that time there has been the same state of things; you might have found some opportunity of telling it? Yes; but I did not discover till within the last few months that I was in the Service that Mr. Woore had done wrong in employing us as he did.

414. That is strange, seeing that you appear to have kept a diary of the occurrences? A great deal of this that I have referred to has been written from memory.

415. Written after you were dismissed? Yes; written now within the last few days in order that I might give this evidence. I have nothing to gain, but I had to lose in giving this evidence; and I give it solely in the public interest.

416. Where do you live now? On the Lachlan.

417. How far from Sydney? About 300 miles.

418. And you come down all that distance as a public duty to give us this information? Yes, I do.

419. And will you say that you have come to Sydney for this sole purpose? Yes; for this and for no other purpose.

* NOTE (on revision):—The question was to the authorities. If asked as here written, I would have said yes. I wrote a letter to the *Pastoral Times* and it appeared in that paper.

420. When did you first discover that this Committee was sitting to inquire into the working of the Lands Department? On last Thursday evening.

421. Then it is quite by accident that you are here? Yes, it is.

422. And you say that you came to Sydney in the public interest, solely for the purpose of making this known? For that purpose only. Mr. C.
M'Keown.
16 April, 1873.

423. And that when you came to Sydney you found this Committee sitting, and proffered to give evidence? Quite so.

424. And before that you were not aware that such a Committee was sitting? No; I had not the slightest knowledge of it.

425. You were dismissed in 1869? Yes.

426. So that you have maintained this determination of seeing justice done four years after you were dismissed? Yes; three years and five months.

427. Are you going to leave Sydney now? That will depend upon what information I get from the Committee. If they are likely to want me again shortly I will not go back; but at present my wife is in Victoria, so that I look upon that as my home, and of course I am anxious to join her. If, however, there is anything coming on within a reasonable time, I would remain in Sydney. I could have stated further, if I had time, that Mr. Woore received another intimation from the Department in 1869 about discharging his men; and there were other matters, such as his taking two of the party, myself and another, to South Australia, and keeping us there for five weeks.

428. *Mr. Stewart.*] What did he take you there for? For the purpose of escorting him when he went to bring his wife from Adelaide. He went away, and left us camped whilst he went to meet the coach that his wife was to come up in. He instructed me to wait there for him with his horses and conveyance.

429. And you waited there five weeks? Yes.

430. *Mr. Tunks.*] What is the population of Wilcannia? It is very small indeed; there are only just a few houses. It is a station on the Darling, between Bourke and Menindie. There was no township there at all when I went there first.

ADMINISTRATION OF THE LAND LAW.

APPENDIX.

[Handed in by E. Du Faur, Esq., 27th January, 1872.]

A.

RUNS advertised for auction sale during the years 1863 to 1872 inclusive, and withdrawn from sale for the reasons noted herein.

District.	Name of Run.	Day of Sale.	Remarks.
Wellington	Albert Water-hole	1 April, 1863	Boundaries imperfectly defined.
"	Back Daroubalgie	" "	Temporarily reserved for a Gold Field at Local Commissioner's request.

"	" " I	" "	
"	" " K	" "	
"	" " L	" "	
Warrego	Back Dunlop Range	" "	Forfeiture reversed.
"	Bugga	" "	Supposed to include part of another run.

Of the fifty-nine runs above referred to, forty-six were withdrawn from sale on the former lessees showing sufficient cause to satisfy the Minister for Lands that the forfeitures should be reversed on payment of rents with fines.

Of the remaining thirteen runs, seven were subsequently better defined, and the runs sold at auction; three were found to have been almost entirely taken up by alienation and pre-leases, and the tenures were cancelled.

Two—Back Daroubalgie and Crowl Creek No. 6—were reserved for special purposes, and subsequently leased; and Bugga is at present held back until disputed boundaries of adjoining runs are determined.

APPENDIX.

23

A 2.

RETURN showing the areas of 197 runs in the District of Bligh, and of 260 runs in the District of Lachlan, as originally estimated, and as at present determined by actual survey, or by reliable compilation.

The runs underlined are those of which all the boundaries have been surveyed; the remainder have only been partially surveyed, or are projected from surveyed frontages, or other known points; and the areas of the latter, as at present estimated, are generally as reliable, and in many cases more so, than those which have been fully surveyed, as it has not always been the practice of surveyors, when marking runs at cost of the lessees, to make close traverses of the bends of the frontages.

In both cases the areas have generally been calculated only to the nearest 500 or 1,000 acres.

E. DU FAUR.

10th February, 1873.

BLIGH DISTRICT.

[*Handed in by Mr. William Elliott, 7 March, 1873.*]

C 1.

The Chief Commissioner of Crown Lands to Mr. Wm. Elliott.

Crown Lands Office,
Sydney, 9 August, 1861.

Sir,
I beg to inform you that I have referred your letter, dated 14th ultimo, respecting your tender for a run called "Carrackbool," to the Local Commissioner, Mr. Beckham.

I am, &c.,
A. ORPEN MORIARTY,
Chief Commissioner of Crown Lands.

C 2.

The Chief Commissioner of Crown Lands to Mr. Wm. Elliott.

Crown Lands Office,
Sydney, 27 November, 1861.

Sir,
With reference to my letter, dated 9th August last, I have now to inform you that Mr. Commissioner Beckham has reported that the land described in your tender for the run called "Carrackabool" is already under license, and that it has been applied for by tender more than once before, and refused.

I have, &c.,
A. ORPEN MORIARTY,
Chief Commissioner of Crown Lands.

C 3.

The Officer in Charge, Occupation of Lands, to Mr. Wm. Elliott.

Occupation of Lands,
Sydney, 2 August, 1872.

Sir,
Referring to your letter of the 27th ultimo, addressed to the Honorable the Minister for Lands, respecting the rejection of your tender for a new run of Crown Lands (noted in the margin), I have the honor to direct your attention to the 50th clause of the Regulations of 1st November, 1861, by which it was provided that all persons whose tenders had then already been received, but not disposed of, must pay into the Colonial Treasury, on or before the 31st of December, 1861, a deposit of £2 10s. on each tender, and that all tenders on which no such deposit should have been paid by that date should be rejected.

As you failed to comply with the requirements of the clause referred to, your tender, on that ground alone, must necessarily have been declined.

I have, &c.,
A. O. PRETIOUS,
Officer in Charge.

C 4.

The Officer in Charge, Occupation of Lands, to Henry Lane, Esq.

Occupation of Lands,
Sydney, 12 February, 1873.

Sir,
In reply to your letter of the 4th inst., I have the honor to inform you that Mr. Elliott's tender having been declined under competent authority, and for what appeared to be sufficient reasons, the matter cannot now be re-opened.

I have, &c.,
A. O. PRETIOUS,
Officer in Charge.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

GULGONG GOLD FIELDS.

(PETITION OF CERTAIN MINERS, RELATIVE TO A DISPUTED MINING CASE AT.)

Ordered by the Legislative Assembly to be printed, 5 March, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned holders of miners' rights and business licenses on the Gulgong Gold Field,—

HUMBLY SHOWETH :—

That your Petitioners, by virtue of their miners' rights, took up claims in the month of November, 1872, upon Crown Lands, situated on the Cudgegong River, and were afterwards prevented from working said claims by reason of the land being claimed by Alexander Browne and party as being part of an auriferous tract applied for to be leased by them.

That your Petitioners sent a memorial to the Honorable the Minister for Lands on the 4th December, 1872, asking that an inquiry be held before any decision be given by the Minister on the application of Browne and party; such inquiry was held in the month of January, 1873, before the local Commissioner, T. A. Browne, Esq., and in the presence of the parties interested, at which your Petitioners urged legal objections to the granting of such lease, and the evidence sustained the same.

That the local Commissioner and the Commissioner-in-charge (W. Johnson, Esq.) reported in favour of your Petitioners and against the applicants for the lease.

That the Minister for Lands sustained such report, and agreed with the Commissioners on all points, but afterwards granted a re-hearing; and your Petitioners were informed by Commissioner Browne that such re-hearing would take place in the presence of your memorialists on the 13th February, in the Court House, Gulgong. Relying upon the good faith of such promise your Petitioners abstained from further efforts to support their rightful claim to work the ground.

That your Petitioners have now learned with surprise and indignation that the matter has been decided by the Minister on the 11th February, without reference to them, and by which the recommendations of the local Commissioner and the Commissioner-in-charge were ignored and the Minister's decision in your Petitioners' favour reversed. Your Petitioners have been unable to learn what evidence has been taken at the re-hearing, the local Commissioner refusing to state whether any evidence had been taken or not, or to furnish any information whatever in reference thereto.

Your Memorialists therefore claim the right to be heard; and pray that your Honorable House will permit them to know the nature of the evidence, if any, which deprives them of their mining claims, to which they are fully entitled according to law; and further, that you will take such other steps to mete out justice to your Petitioners as your Honorable House in its wisdom may deem necessary.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 748 Signatures.]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

GOLD FIELDS.

(CLAIM OF BROWN AND PARTY, GULGONG.)

Ordered by the Legislative Assembly to be printed, 23 April, 1873.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 12 March, 1873, That there be laid upon the Table of this House,—

- “Copies of all Papers connected with the claim of A. Brown and Party,
- “for two leases of auriferous land near Two-mile Flat Gold Field, Gulgong,
- “and all Papers relating to objections thereto.”

(Mr. Garrett, on behalf of Mr. John Robertson.)

SCHEDULE.

Statement of Mr. Gold Commissioner Browne on the subject, with two enclosures and tracing. 16 July, 1872.	15
--	----

GOLD FIELDS.

No. 1.

MESSRS. ROBINSON, BINDER, FRAZER, AND OTHERS TO THE SECRETARY FOR LANDS.

Gulgong, 4 December, 1872.

SIR,

We the undersigned miners, resident on the Gulgong Gold Fields, beg respectfully to direct your attention to an application for two leases, 25 acres each, of alluvial ground for gold mining purposes, situated at Cudgong River, made by Messrs. Paul Harford, Alexander Brown, John Hill, and J. Brown, dated respectively* 26th June and † 28th October, 1872, and request that the same will not be granted for the following reasons:—

*See Enclosure A to No. 3.

†See Enclosure B to No. 3.

- 1st. That owing to a misdescription of the land applied for we were led into error, and could not lodge an objection to the same within the period specified by the Regulations, the land being described by the applicants as being within 2 miles of "Two-mile Flat," whereas it is distant more than 4 miles.
- 2nd. That the ground so applied for has been improperly marked, and includes both banks of the Cudgong River, as well as a large portion of the river bed.
- 3rd. That the ground cannot be considered and is not tested and abandoned ground within the meaning of the 125th regulation.
- 4th. That the depth of sinking is under 50 feet, and the gold-field not being proclaimed five years the ground is exempt from the operation of the leasing Regulations.

We have recently taken up claims upon this land, and are now prohibited from mining on the same by the Commissioner until the lease be either granted or refused, and we earnestly hope you will take the premises into your favourable consideration, and if, on inquiry, the foregoing statements are found correct, you will be pleased to refuse the lease, and permit us to pursue our lawful occupation as miners upon the ground in dispute.

We have, &c.,

ROBT. ROBINSON,
W. BINDER,
JAMES FRAZER,
AND 45 OTHERS.

For the report of Mr. District Gold Commissioner Johnson, B.C., 9th December, 1872.—O.R. (for the U.S.) To be returned. Referred to Mr. Commissioner Browne, for his report.—WHITTINGDALE JOHNSON, G.C., B.C., 12 Dec., 1872.

No. 2.

THE UNDER SECRETARY FOR LANDS TO MESSRS. ROBINSON, BINDER, FRAZER, AND OTHERS.

Department of Lands,
Sydney, 9 December, 1872.

GENTLEMEN,

Your letter, under date the 4th instant, on the subject mentioned below, has been referred for the report of Mr. District Gold Commissioner Johnson.

2. As soon as the necessary information has been obtained, a further communication will be made to you.

I have, &c.,

OSBORNE RICH,
(For the Under Secretary.)

SUBJECT:—Objecting to an application for two leases of 25 acres each, situated at Cudgong Creek, for gold-mining purposes, made by Messrs. Paul Harford, Alexander Brown, J. Hill, and J. Brown.

No. 3.

THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD DISTRICT TO THE UNDER SECRETARY FOR LANDS.

Western Gold Fields Office,
Bathurst, 3 February, 1873.

SIR,

I have the honor to transmit herewith * a report from Mr. Commissioner Browne on † the applications for leases of auriferous tracts, noted in the margin.

2. No objections were lodged against either application within the time prescribed, but it appears that the ground applied for, which is alluvial, is not within a gold-field proclaimed for upwards of five years, nor does the Commissioner consider that it comes within the category of tested or abandoned ground, or that it cannot be worked to advantage in the ordinary manner, without the aid of machinery, &c. Under these circumstances the leases in question could not be granted under the 125th regulation; and notwithstanding the failure of the objectors to lodge their protest within fourteen days, I must endorse the opinion of the Local Commissioner, that they should not be recommended for approval.

Messrs. Wilson and Brown, No. 2776. Messrs. Brown, Hill, & Comp., No. 4271.

*See Enclosure C. † See A & B.

I have, &c.,

WHITTINGDALE JOHNSON,
Commissioner in charge of the Western Gold Fields.

[Enclosure

[Enclosure A to No. 3.]

(Schedule S.)

Form of Application for an Auriferous Tract.

Mudgee, 26 June, 1872.

Sir,

2776.—£27 1's.

We beg to make application to lease, for a period of 10 years, under the Regulations for Mining upon Crown Lands, the auriferous tract below described.

We have, on the 26th day of June, 1872, marked the ground, and posted notices as required by the Regulations, of intended application, on the ground applied for, and at the Mining Registrar's office.

The number of our party is two.

The names of the shareholders are Henry Wilson and Alexander Brown.

Description of locality and extent of claim applied for:—25 acres, situated on the Cudgegong River, immediately below Mr. Rouse's paddocks, about 3 miles from Two-mile Flat.

We agree to fulfil the labour and all other conditions required by the Regulations.

HENRY WILSON.
A. BROWN.

The Commissioner for Gold Fields at Gulgong.

[Enclosure B to No. 3.]

(Schedule S.)

Form of Application for an Auriferous Tract.

28 October, 1872.

Sir,

4271.—£28.

We beg to make application to lease, for a period of 10 years, under the Regulations for Mining upon Crown Lands, the auriferous tract below described.

We have, on the 25th day of October, marked the ground, and posted notices as required by the Regulations, of intended application, on the ground applied for, and at the Mining Registrar's office.

The number of our party is four.

The names of the shareholders are Alexander Brown, John Hill, Paul Harford, and James Brown.

Description of locality, and extent of claim applied for:—On the Cudgegong River, and about 2 miles in an easterly direction from the Two-mile Flat, 25 acres.

We agree to fulfil the labour and all other conditions required by the Regulations.

A. BROWN,
For self and party.

The Commissioner for Gold Fields at Gulgong.

[Sub-Enclosure to Enclosure B to No. 3.]

(Schedule U.)

Gulgong.

I, ALEXANDER BROWN, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare that I have complied with all the requirements of the Regulations, with regard to the applications for leases for the ground applied for by me on the 29th day of October ultimo, situate on the Cudgegong River, and about 2 miles from the Two-mile Flat; and I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of her present Majesty, intituled "An Act for the effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

A. BROWN.

Made and signed before me, at Gulgong, this 14th day of November, 1872,—

LESTER S. DONALDSON, J.P.

[Enclosure C to No. 3.]

Mr. Gold Commissioner Browne to The Commissioner in charge of the Western Gold District.

Gulgong, 5 December, 1873.

Sir,

Application
No. 116, 28 Oct.,
1872—25 acres.
Application
No. 64, 26 June,
1872—(25 acres),
forwarded
10 August.

I have the honor to transmit the application, No. 116, of Alex. Brown and others, for (25) twenty-five acres of auriferous alluvial land, upon the Cudgegong River, in an easterly direction, and about 2 miles from Two-mile Flat.

Alex. Brown and Henry Wilson also, upon 26th June last, applied for (25) twenty-five acres at the same place. The ground so applied for is common. The bed of the Cudgegong is included within the pegs of both applications. The No. 64, 26 June, 1872—(25 acres), number of the latter application is 64. The former application bears date 28th October.

The regulations in both cases as to statutory declarations and payment of deposit and survey fee, also as to marking and the posting of notices, have been complied with.

A rush having taken place, I visited the ground on 2nd instant, and found various parties of miners located within the pegs of applicants, who claimed—

1. As having applied in due form under regulation 128.
2. As having complied with regulation 131.
3. As not having been objected to within fourteen days.
4. As upon tested and abandoned ground.
5. As upon a portion of the Two-mile Flat Gold Field.

The miners, who had pegged out claims, rested their title to occupation upon these points, viz. :—

1. That the ground applied for could not be legally held under lease, not being situated on any Gold Field proclaimed for a longer period than five years.
2. That the site had been wrongly described in the applications, being 3 or 4 miles from Two-mile Flat Gold Field.
3. That it was new ground, and not "tested or abandoned," the shafts pointed out being only a few feet in depth, and not having been bottomed.
4. That pegs and notices had not been put up in compliance with regulation 128.
5. That applicants had illegally pegged in the river-bed, not having applied formally to lease the bed of a river or stream.

Having heard all statements, I referred the miners in occupation to regulation 132, by which it appeared to me that applicants having marked out the ground for the lease in respect of which they had applied, all persons who had not previously been in lawful possession of such ground must be deemed to be trespassing and encroaching. That it was competent for applicants to proceed against them for damage in respect of such trespass and encroachment. That the fourteen days having passed within

within which time alone objections could be entertained, it was not in my power to hear such. That the application of 28th October should be sent to the Commissioner in charge, with my report thereon, it being his province to recommend the granting or refusal of the lease. In the meantime all persons, except the applicants, were restrained from working on the ground. With reference to the granting or otherwise of application 116, I have the honor to state that the exact locality, in my opinion, forms a portion of the northerly extension of the Cudgegong Gold Field, proclaimed 6th July, 1868. The depth of ground is under 50 feet. There are several old holes, all rather shallow, upon the ground applied for. The bed of the river, in my opinion, should not have been included in the pegs unless applied for as a claim in bed of river or stream.

Having regard to the depth of sinking, and to the date of the proclamation of the Gold Field in which it is situated, I am led to consider that the application No. 116 does not come within the meaning strictly of regulation 125, and should not therefore be accorded a lease.

I have, &c,
T. A. BROWNE,
Commissioner.

No. 4.

TELEGRAM FROM MR. G. ROUSE TO THE SECRETARY FOR LANDS.

Biragambil, 1 February, 1873.

* I KNOW the land on Cudgegong River, said to be Brown's leases, situated between my lucerne paddock and Cunningham's farm. I never authorized any person to turn miners off that ground, and never claimed same. I only returned Saturday night from stations on Macquarie. Will make declaration if necessary.

* This refers to evidence of James Daley. See Sub-Enclosure B to Enclosure to No. 25.

No. 5.

TELEGRAM FROM MR. A. BROWN TO THE SECRETARY FOR LANDS.

Gulgong, 3 February, 1873.

I HAVE been informed there have been statements produced against the issuing of my leases. If such is the case, will you kindly defer your decision in the matter, as I am in a position to contradict the whole of those statements, and produce statutory declarations that such statements are untrue? The declarations will satisfy you the ground I claim has been tested and abandoned; also, the locality has been proclaimed a gold field since 1862. (Vide regulation 125.)

No. 6.

TELEGRAM FROM MR. A. BROWN TO THE UNDER SECRETARY FOR LANDS.

Gulgong, 4 February, 1873.

INFORMED this day Minister deciding question—our leases on Cudgegong River. Have been unable to obtain from local Commissioner object of his last inquiry. We relied as to first lease on Departmental letter, stating same approved and ordering survey. Hear to-day leases likely to be cancelled. If being re-opened as to first lease, beg delay decision until Friday, when we purpose visiting Commissioner, desiring to be heard before condemned.

No. 7.

THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD DISTRICT TO THE UNDER SECRETARY FOR LANDS.

Western Gold Fields Office,
Bathurst, 4 February, 1873.

SIR,

In accordance with the instructions contained in your minute of the 9th December last, on the annexed objection to lease applications No. 64 and 116, at Two-mile Flat, near Gulgong, by certain miners on that gold-field, I do myself the honor to forward herewith the report of the local Commissioner, and the evidence taken before him in the matter in dispute. See No. 1.
4 December, 1872
Returned herewith. No. 1.

2. It will be perceived that Mr. Commissioner Browne on this re-hearing, as it were, of the case, has reversed the opinion expressed by him in his previous report, transmitted in my letter of the 3rd instant, which was then unfavourable to the issue of leases for the applications in question. As this inquiry has been more searching than the previous one, and as the objections appear to have been made long after the time prescribed in the Regulations within which objections to lease applications may be lodged, I am inclined to consider that this recommendation in favour of the issue of the leases to Messrs. Brown and Co. should be accepted, in lieu of the previous advice for their refusal. See Enclosure to No. 25.
No. 3.

I have, &c.,
WHITTINGDALE JOHNSON,
Gold Commissioner.

P.S.—In addition to the reasons mentioned in Mr. Commissioner Browne's report for his recommendation of Messrs. Brown and Co.'s applications for approval, I would direct attention to Mr. Brown's affidavit, attached to the proceedings, of the large amount already expended on the ground, the necessity for the employment of steam machinery, &c., which brings it within the category of land eligible for leasing under the 125th regulation, even if untested alluvial. I have, therefore, no hesitation in endorsing Mr. Commissioner Browne's recommendation, and in advising the approval of the applications of Messrs. Brown & Co.—W.J., G.C. See sub-enclosure G to No. 25.

Recommendation of Commissioner approved. Of course the leased tracts will not include the river.—
J.S.F., 10/2/73.

No. 8.

TELEGRAM FROM THE UNDER SECRETARY FOR LANDS TO MESSRS. A. BROWN AND PARTY.

Sydney, 5 February, 1873.

REFERRING to your telegram of yesterday, the case is still pending; further evidence required.

No. 6.

No. 9.

No. 9.

TELEGRAM FROM THE UNDER SECRETARY FOR LANDS TO MR. GOLD COMMISSIONER BROWNE.

Sydney, 6 February, 1873.

See Enclosure
C to No. 3.

IN your report of 5 December last, you state that Brown's application, No. 116, does not come within the meaning strictly of regulation 125. The Minister for Lands requires evidence as to whether the ground in dispute is tested and abandoned workings of any depth, in accordance with regulation 125, as he cannot arrive at a correct decision without these facts. Both sides in the case should be heard.

No. 10.

THE UNDER SECRETARY FOR LANDS TO THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD DISTRICT.

Department of Lands,
Sydney, 11 February, 1873.

SIR,

No. 7.
Messrs. Wilson
and Brown, No.

No. 21.

MR. A. BROWN to THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD DISTRICT.

Gulgong, 20 February, 1873.

DEAR SIR,

Being in a hurry, I have asked Mr. Clarke to write for me the following:—I am subjected to a great deal of annoyance by Mr. Plunkett and his clique with reference to my leases. Mr. Plunkett has some twenty or more of his countrymen about him, and they with others have endeavoured to take forcible possession of my ground. I have summoned ten parties, and obtained an order or prohibition under 14th section from a Justice, staying all persons working thereon.

Notwithstanding all this, Mr. Plunkett leaves here for Sydney to-day, to interview the Hon. John Robertson and raise a fresh disturbance, a sum of money having been subscribed to defray his expenses; and further, he is to receive a half share in each claim, provided he ousts me, whilst Messrs. Sweeney and Colhoun are to receive the other half share. This very fact will convey to you some idea of the principles of the agitators I have to deal with, and I shall be very glad to learn that business in connection with your Department necessitates your presence in Sydney.

A. BROWN.

Mr. Farr.—Inform that having received the decision of the Hon. Minister for Lands in their favour, I cannot move further in the matter.—W.J., 25 February, 1873.

No. 22.

A. BROWN AND PARTY to THE SECRETARY FOR LANDS.

TELEGRAM from THE SECRETARY FOR LANDS to THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD DISTRICT.

Sydney, 25 February, 1873.

IN reference to telegram of to-day, Minister requires all reports, evidence, and affidavits, from first to last. If any at Gulgong telegraph for them.

No. 25.

THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD DISTRICT to THE UNDER SECRETARY FOR LANDS.

Western Gold Fields Office,

Bathurst, 25 February, 1873.

SIR,

In reply to your telegram of this date, I have the honor to return all papers in connection with the objections to the leases of A. Brown and Co., at Two-mile Flat, near Gulgong, transmitted with your letter of the 11th instant, intimating the approval of the said leases by the Honorable the Minister for Lands.

I have, &c.,

WHITTINGDALE JOHNSON, G.C.

P.S.—With reference to your second telegram, the enclosed are all the papers in this office, and I have telegraphed to Mr. Gold Commissioner Browne, at Gulgong, to forward all papers (if any) in his possession to you. I am under the impression that all the documents in the case were transmitted through me.—W.J., G.C.

[Enclosure to No. 25.]

Mr. Gold Commissioner Browne to The Commissioner in Charge of the Western Gold District.

Gulgong, 29 January, 1873.

Sir,

I have the honor to acknowledge a petition and other papers connected with two (2) lease applications (Nos. 64 and 116) by Alexander Brown and others, for certain auriferous alluvial ground on the Cudgegong River, near Two-mile Flat.

I have the honor to state that I have delayed my report thereon, for the reception of certain evidence on both sides, which is hereby transmitted.

It is sought to be proved, by objectors to the leases, that the ground in dispute was not "tested and abandoned" in the proper sense of regulation 125. It is alleged that miners at a former period were induced to discontinue their workings, on the assumption that they were trespassers upon purchased land.

I have the honor to state that having carefully reviewed the additional evidence tendered, I am of opinion that these objections and proceedings would not have been taken but for a report having arisen that applicants had struck gold. I do not consider that the objectors have made out a case for the refusal of either lease. The ground is certainly shallow, and not of a description as to sinking, which the tenor of the Regulations favours as suitable for holding under lease. But I am led to the belief, after mature deliberation, that the disputed area must be considered, equitably speaking, as coming within the meaning of tested and abandoned ground; and I therefore see no valid reason for refusing either lease.

I have, &c.,

T. A. BROWNE,
Commissioner.

[Sub-Enclosure A to Enclosure to No. 25.]

EVIDENCE taken upon an Official Inquiry touching the applications to lease certain auriferous tracts on the Cudgegong River, Local numbers—64 and 116.

John Treble, miner, states:—I have taken up a claim, in conjunction with others, upon some disputed ground; I know the boundaries of these leases in dispute; Brown and Harford and others; the leases as applied for include both sides of the Cudgegong River and a considerable portion of its bed; I know certain persons who sunk shafts upon the ground previous to the leases being applied for: I am aware that certain parties were ordered off the ground; they abandoned the ground in consequence of an order from Mr. Rouse; I do not consider the ground tested and abandoned; the sinking does not exceed (40) forty feet; it has not been proclaimed a gold field for five years; an injunction has been placed upon my claim, and I am now prevented from working; upon the side of the river where the rush has taken place there have been (2) two holes sunk upon the lower lease previous to application; by the lower lease I mean the lease next to the purchased land; there are a large number of holes which have been sunk by the present leaseholders since their application for the lease.

Cross-examined:—The leases take in nearly the whole of the Crown lands; I believe there are (4) four or (5) five holes sunk in the second lease before application; I cannot swear that there are not twelve shafts sunk before application; I will swear that the locality has not been proclaimed a gold field for five years; I was not present when Mr. Rouse ordered off miners from the ground; I was told so; I have bottomed a shaft there; Mr. George Rouse, junior, claimed the ground for his father; work has been done by other persons since they were first ordered off; a person named Davoren was ordered off; he worked there three years ago; I forget the names of the others; Davoren is the only man that I know of who worked there; I do not know of my own knowledge where he worked; for all I know it may have been on Mr. Rouse's property where Davoren worked; the statements I have made about persons being ordered off the ground where the lease has been applied for, are founded on hear-say.

Re-examined:—I know of, my own knowledge, that there are four or five holes on the second lease; I have merely heard that they were made by persons who were ordered off by Mr. Rouse.

JOHN TREBLE.

Taken before me, at Gulgong, 13 January, 1873,—
T. A. BROWNE, P.M.

[Sub-Enclosure B to Enclosure to No. 25.]

James Daly states:—I am a miner and I know the ground in dispute, to which the rush took place; I worked on that ground as a miner about four years ago; I bottomed one shaft at between 10 and 12 feet; I commenced another; when down 25 feet Mr. Rouse's man stopped us (I cannot say which Mr. Rouse); Copeland was acting for Mr. Rouse; he said it was Mr. Rouse's private property; we left in consequence; I have lately ascertained that it is not true—that it is not Mr. Rouse's ground; I have ascertained that it is the same ground now in dispute, being Crown land between two portions of Mr. Rouse's purchased property; I have not taken up a claim on the said ground; I am not in any way interested; I have been called upon to give evidence.

Cross-examined by Mr. Truman:—I saw the ground to-day; I was going past; I was asked to go and see the ground; I recognized the shafts which were put down by me four years since; they are on the left bank of the river; I know the ground, but I have only seen one peg; I don't know the actual boundaries; I have been told that that is the rush; I was not present at the rush; I heard the rush took place to the same ground as I worked at four years ago; I recognized the shafts I put down; I swear they are not on Mr. Rouse's property; they are too far from Cunningham's fence; I don't know how many yards; I have heard Mr. Rouse has 40 acres outside of Cunningham's fence; I can't say whether 40 or 50; I have heard 40; I saw my shaft to-day at a distance; it is not on Mr. Rouse's ground; I have been told they are Crown lands; I know it by Mr. Rouse's boundary being defined; I found gold on the surface; I did not abandon it; I was forced to leave; the gold I found on the surface was not payable; Copeland claimed the ground between Mr. Cunningham's fence and the fences of Rouse's paddocks; I partly guess where the lower lease next Cunningham's is.

Examined by Mr. Plunkett:—The ground I speak of as being the same where the rush took place is known to me by seeing the shafts of the rush; I have been there to-day—at the recent rush at the Cudgegong River; that is the very same ground I was working at four years ago, and was ordered off by Copeland.

JAMES DALY.

Taken before me, at Gulgong, 14 January, 1873,—
T. A. BROWNE, P.M.

[Sub-Enclosure C to Enclosure to No. 25.]

James Frazer states:—I am a miner; I know the ground in dispute; I have taken up a claim there with others; I know the land was applied for under lease by Brown, Harford, and others; I know that the leases embrace both sides of the river, and a portion of its bed; I have known the ground the last six years; I know persons were mining there four years ago; I know they left; Lawler and Menane told me they were hunted off the ground as being Mr. Rouse's; I was a mate of Lawler's; they told me they sunk one hole; they bottomed a shaft at night after being hunted off it, and got three grains to the dish; an injunction is now placed upon my claim until the lease is granted or refused; the depth of sinking does not exceed 40 feet; I was there when the Commissioner visited the ground; I saw several shafts there; the majority of them were new shafts; I know the leaseholders sunk the greater portion of them; I know the ground has not been tested and abandoned since the rush to Two-mile Flat, six years since; I know Copeland; he was overseer for Mr. Rouse about four or five years since—about the time the persons I speak of were sinking the shafts.

Cross-examined by Mr. Truman:—I went to work in December; I don't know whether the leaseholders got gold; I heard there was a rush; when I went to the ground I visited the prospectors' shaft; they had wash-dirt there, or earth that looked like it; I had taken up my claim before I saw it; I do not recollect anyone telling me the leaseholders had got gold; I had visited the ground three weeks before I took up the claim; I had been there a month or two before; I have been there every 10 months; most of the bottomed shafts have been sunk by the leaseholders; I have seen them sinking shafts; I have seen the same men; they said they were working for Alick Brown, one of the leaseholders; I believe they have put down about nine; of my own knowledge I can't say; I know they have put down two; I saw them working in two shafts; I don't know of my own knowledge whether they have put down more than two; I don't know how many shafts have been bottomed; there are only two old shafts on the two leases; I only speak of shafts bottomed; I don't call the others shafts, only holes; I saw the bottom of one five or six years ago; I helped to wash it; I got a few colours.

Re-examined:—A public road goes through this ground; my visits were on the way to Two-mile ground; it is a road generally used; there is a crossing at the river.

Re-examined by Mr. Truman:—I am certain the road goes through the north corner of one of the leases; the nearest corner of the river to Cunningham's; I believe that is the north.

JAMES FRAZER.

Taken before me, at Gulgong, 14 January, 1873,—
T. A. BROWNE, P.M.

Adjourned to 16 January, 1873,—T. A. BROWNE, P.M.

[Sub-Enclosure D to Enclosure to No. 25.]

Francis Devlin states:—I am a miner, residing at Red Hill, Gulgong; I know the new rush at Cudgegong River, near Cunningham's farm; I was one of a party who sunk some shafts there three years ago; I was prevented, and my party, from sinking, by young Mr. George Rouse; he met us as we were going to work; he said the ground belonged to his father; I left, and the party, in consequence; I sunk one shaft; we did not test and abandon this ground; I am not interested in this inquiry; I know the road going through the ground; we were sinking on the left-hand side of the road going towards Two-mile Flat, 50 yards or so from the road; I have not seen the lease pegs.

Cross-examined:—I know Two-mile Flat; I call the land in dispute more than 3 miles from Two-mile Flat.

FRANCIS DEVLIN.

Taken before me, at Gulgong, 16 January, 1873,—

T. A. BROWNE, P.M.

[Sub-Enclosure E to Enclosure to No. 25.]

I, *George Thomas*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare that I have been employed by the leaseholders (Messrs. Brown and others) to work on their leased tracts situate on the Cudgegong River, near Biragambil. There were no other parties working on this ground when I went to work there. When I first went on to the leases I saw a number of old abandoned shafts sunk thereon. I have carefully examined these shafts last week by the request of Mr. Brown, and have counted over twenty shafts which were sunk some time ago. I come to this conclusion by the appearance of the earth thrown up, and the grass growing over the same. It was only after we discovered gold that an attempt was made to rush the leased tracts. And I make this solemn declaration, conscientiously believing the same to be true and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

GEORGE THOMAS.

Made and signed before me, at Gulgong, this 25th day of January, 1873,—

LESTER S. DONALDSON, J.P.

[Sub-Enclosure F to Enclosure to No. 25.]

I, *Roland Edwards*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare that I have been employed by the leaseholders (Messrs. Brown and others) to work on their leased tracts situate on the Cudgegong River, near Biragambil. There were no other parties working on this ground when I went to work there. When I first went on to the leases I saw a number of old abandoned shafts sunk thereon. I have carefully examined these shafts last week by the request of Mr. Brown, and have counted over twenty shafts which were sunk some time ago. I come to this conclusion by the appearance of the earth thrown up, and the grass growing over the same. It was only after we discovered gold that an attempt was made to rush the leased tracts. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

R. EDWARDS.

Made and signed before me, this 25th day of January, at Gulgong,—

LESTER S. DONALDSON, J.P.

[Sub-Enclosure G to Enclosure to No. 25.]

See Enclosure A
to No. 3.
See Enclosure B
to No. 3.

I, *Alexander Brown*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare that I have applied for two alluvial leases of 25 acres each, situate on the Cudgegong River, near Biragambil, the said leases being dated 26th day of June, 1872, and the 28th day of October, 1872, respectively. I have duly complied with the regulations in every particular and made the necessary declaration, enabling me to occupy and work. I have expended up to the present date over £300 by employing labour and have not as yet received any returns. I have succeeded in finding what I believe to be payable gold, and upon my making such discovery a number of men attempted to rush my leases, but were ordered to discontinue such trespass by Mr. Commissioner Browne. When I went to examine the locality, prior to my applying for the said leases, I saw a number of old abandoned shafts sunk upon what is now my leased tracts. I believe there are over twenty such shafts and they are easily recognizable now. There were no objections lodged against my applications within the fourteen days, as required by the Regulations. Exception to my leases was only taken after my discovery of gold. Lastly, the land applied for by me to be leased is situate on the banks of the Cudgegong River. The Cudgegong River and its banks for half-a-mile on each side has been proclaimed a gold field since 1862, or about ten years ago. I intend erecting extensive steam machinery for the purposes of pumping and washing. And I make this solemn declaration, conscientiously believing the same to be true and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

A. BROWN.

Made and signed before me, at Gulgong, this 28th day of January, 1873,—

LESTER S. DONALDSON, J.P.

[Sub-Enclosure H to Enclosure to No. 25.]

I, *George Moore Rouse*, of Biragambil, in the Colony of New South Wales, Esquire, do solemnly and sincerely declare that I know the boundaries of the land belonging to my father, George Rouse, Esquire, of Biragambil, and situate on the Cudgegong River. There is a portion of Crown lands situate between two portions of my father's property. I know the land well, and believe it has been applied for by Messrs. Brown and others as an alluvial lease. I have never ordered any miners off this portion of Crown lands, or prevented any person or persons working thereon, or instructed any person on my father's behalf to do so. I have on two several occasions, about four years ago, taken men and shown them the boundaries of my father's property, and what was Crown lands, in order that they might test and prove the ground for payable gold outside my father's land. I never claimed this portion of Crown lands as being my father's property. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty intituled, "An Act for the effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

GEO. M. ROUSE.

Made and signed before me, at Gulgong, this 28th day of January, 1873,—

S. A. BLACKMAN, J.P.

[Sub-

[Sub-Enclosure I to Enclosure to No. 25.]

I, *Richard James Hassall*, of Morowolga, near Guntawang, in the Colony of New South Wales, Esquire, do solemnly and sincerely declare:—I own an estate at Morowolga, and have resided there about twenty years. I know the ground applied for by Brown and party, and situated between blocks belonging to George Rouse, Esquire. I am aware there were many holes sunk upon this ground, more than ten, and they were sunk some time since, long before Brown came there. I believe such holes to be bottomed. From my knowledge of mining, I consider the ground had been tested and abandoned before Brown came there. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the Act of Council of New South Wales, 9th Victoria, No. 9.

R. J. HASSALL.

Made and declared this 8th day of February, 1873, at Gulgong, before me,—
T. A. BROWNE, J.P., and Commissioner for Affidavits.

[Sub-Enclosure J to Enclosure to No. 25.]

I, *Rowland Edwards*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare, as follows:—I know the boundaries of the ground applied to be leased by Brown and party, comprising 50 acres on the Cudgegong River. Within those boundaries there are fifteen holes, which appear to have been sunk about two or three years, and around the boundaries and close thereto there are fourteen more holes or shafts, apparently sunk about two or more years. Thirteen of the holes are from 15 to 30 feet deep, ten from 10 to 12 feet deep, and six from 5 to 6 feet deep. I believe the majority of them are bottomed. Traces can be seen in some of the heaps around the holes of portions of rock, proving incontestably that such holes have been bottomed. I consider the ground to have been tested and abandoned. I have been a miner for twenty-one years. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the Act of Council of New South Wales, 9th Victoria, No. 9.

R. EDWARDS.

Made and declared before me, this 8th day of February, 1873, at Gulgong,—
T. A. BROWNE, J.P., and Commissioner for Affidavits.

[Sub-Enclosure K to Enclosure to No. 25.]

I, *Abraham Brown*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare, as follows:—I have been a miner for fifteen years. I know the boundaries of the leased land applied for by Brown and party, and comprising 50 acres on the Cudgegong River. Within those boundaries there are fourteen shafts sunk, and fifteen in the immediate vicinity of the boundaries thereof. I believe the majority of the said holes to be bottomed. Evidence exists in the shape of portions of rock at some of the shafts that the same have been bottomed beyond all doubt. I consider the ground to have been tested and abandoned. The holes in question have been sunk, I should say, over two years. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the Act of Council of New South Wales, 9th Victoria, No. 9.

The
ABRAHAM × BROWN.
mark of

Made and declared, at Gulgong, this 8th day of February, 1873, being first read over and explained to said Abraham Brown, before me,—

T. A. BROWNE, J.P., and Commissioner for Affidavits.

[Sub-Enclosure L to Enclosure to No. 25.]

I, *Joseph Knight*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare:—I am a miner and have been so for twelve years. I know the boundaries of the ground applied to be leased by Brown and party, and comprising 50 acres upon the Cudgegong River. I have been working in the vicinity of this ground on and off for the last two years. There are a number of shafts upon the 50 acres and in the vicinity thereof. Those shafts were sunk long before Brown came there. I believe the majority of such shafts to have been bottomed. Miners would never sink so many holes without bottoming. I consider the ground to have been tested and abandoned. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the Act of Council of New South Wales, 9th Victoria, No. 9.

JOSEPH KNIGHT.

Made and declared this 8th day of February, 1873, at Gulgong, before me,—
T. A. BROWNE, J.P., and Commissioner for Affidavits.

[Sub-Enclosure M to Enclosure to No. 25.]

I, *Edward Smith*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare:—I am a miner, and have been so for eighteen years; I know the boundaries of the ground applied to be leased by Brown and party—50 acres upon the Cudgegong River. I have been working in the vicinity of this ground on and off for the last two years. There are a number of shafts upon the 50 acres and in the vicinity thereof. Those shafts were sunk long before Brown came there. I believe the majority of such shafts to have been bottomed. Miners would never sink so many holes without bottoming. I consider the ground to have been tested and abandoned. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the Act of Council of New South Wales, 9th Victoria, No. 9.

T. A. BROWNE, J.P., and Commissioner for Affidavits.

[Sub-Enclosure N to Enclosure to No. 25.]

I, *Walter Denis*, of Gulgong, in the Colony of New South Wales, miner, make oath, and say:—I know the ground of 50 acres of which Alexander Brown has applied for a lease. It is situated on Mudgee or Cudgegong River. I worked it for five or six days some four years since with my mate, James Daly, and was turned off by a person called Copeland, an agent or overseer of Mr. Rouse. We should have finished the shaft if not so prevented. The shaft remains unsunk, or not bottomed, to the present date. Copeland told us it was Mr. Rouse's land. I never knew any one but Daly and myself to work there.

WALTER DENIS.

Sworn at Gulgong, the 22nd of February, 1873, before me,—
T. A. BROWNE, a Commissioner of Affidavits.

[Sub-

[Sub-Enclosure O to Enclosure to No. 25.]

In the matter of the dispute concerning a lease of 50 acres of auriferous land, on the Cudgegong or Mudgee River, applied for by Alexander Brown, of Gulgong, and now before the Honorable Minister for Lands.

I, *Christopher Young*, of Gulgong, in the Colony of New South Wales, storekeeper, make oath and say:—I have intimately known the ground, 50 acres of which Alexander Brown has applied to lease for the last four years, and at any time during that period I have not known more than two miners working upon the ground; there could not have been many men working on the ground without my knowing; it was generally supposed to be the property of Mr. Geo. Rouse, of Biragambil.

CHR. YOUNG.

No. 26.

MR. GOLD COMMISSIONER BROWNE TO THE UNDER SECRETARY FOR LANDS.

Gulgong, 26 February, 1873.

SIR,

I have the honor to state that I received this morning a telegram from the Commissioner in charge, directing me to send all papers in my possession, if any, in the Brown's lease applications, to the Lands Office.

I have the honor to enclose A. Brown's application to lease 1,000 yards of the Cudgegong River bed, of date 12th February; also, A. Brown's notice, 12th February, relinquishing claim to bed of river, as included in leased tracts.

See A & B.

I have, &c.,
T. A. BROWNE.

[Enclosure A to No. 26.]

Form of Application for an Auriferous Tract.

Gulgong, 12 February, 1873.

Sir,

We beg to make application to lease, for a period of fifteen years, under the Regulations for Mining upon Crown Lands, the auriferous tract below described. We have, on the 12th day of February, marked the ground, and posted notices, as required by the Regulations, of intended application, on the ground applied for.

The number of our party is one.

The name of the shareholder is Alexander Brown.

Description of locality and extent of claim applied for:—1,000 yards of the Cudgegong River bed, situate from near the fence of the lucerne paddock of Mr. Geo. Rouse, near Biragambil, down the stream.

I agree to fulfil the labour and all other conditions required by the Regulations.

ALEXANDER BROWN,
By his Agent, HENRY TRUMAN.

To T. A. Browne, Esq., P.M., Commissioner for Gold Fields at Gulgong.

[Enclosure B to No. 26.]

Brown & Wilson, and Brown, Hill, & Harford to Mr. Gold Commissioner Browne.

Gulgong, 12 February, 1873.

Sir,

We have the honor to inform you that we relinquish all claim to the bed of the Cudgegong River, which may be included within the leased tracts situate on the banks of the said river, near Biragambil, and applied for by us.

No. 28.

EVIDENCE OF MR. ERNEST BIEBER.

I, *Ernest Bieber*, of the Glebe, near Sydney, in the Colony of New South Wales, gentleman, and ex-manager of the Biragambil Gold Mining Company, do solemnly and sincerely declare as follows:—That at the time certain leases were applied for by A. Brown and party for land immediately adjoining the abovenamed Company, on the Cudgegong River, I employed from 40 to 50 men, who were principally collected out of working miners who were for some time located in the district. In endeavouring to make myself acquainted with the gold-bearing properties of the district, several of the abovementioned men drew my attention to the abovementioned land to the effect that gold had been found there, but never in any payable quantities. I went to look at the said ground repeatedly in order to form an opinion of its auriferous nature, and I saw a number of old shafts and abandoned workings, leaving me to conclude if gold had been found there it had not been obtained in sufficient quantities to encourage further workings. Some time afterwards, meeting Brown, I drew his attention to the fact that the ground had been abandoned, which ultimately led to the result of Brown applying for the said ground. The ground in question is situated between the old Diamond Mines Diggings and the Jordan Diggings, and the Two-mile Flat Diggings,—all connected by old workings on the Cudgegong River, which district was then considered old and abandoned workings to the extent of 5 or 6 miles, and on a proclaimed gold-field, inasmuch as the few men still remaining in the district flocked to me for employment when I commenced operations in the Biragambil Company, proving the worked-out condition of the said ground. And I make this solemn declaration, conscientiously believing the same to be true and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

ERNEST BIEBER.

Subscribed and declared at Sydney, this 27th day of February, 1873, before me,—
H. GREVILLE, a Commissioner for Affidavits.

No. 29.

EVIDENCE OF MR. CHARLES WILLIAMS.

I, *Charles Williams*, of Gulgong, in the Colony of New South Wales, miner, do solemnly and sincerely declare that I know the ground applied for to be leased by Alexander Brown and party, situate at Cudgegong River, near Biragambil. I, with my mates—eight in number—worked on this ground eighteen months ago. I assisted to sink six shafts, each of which was bottomed by my party, and abandoned as not being payable. I saw at that time many other abandoned shafts in close proximity to those put down by our party, and from my experience as a miner of nine years standing, I consider such ground may be honestly considered as having been tested and abandoned. I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her Majesty, intituled "An Act for the effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

CHARLES WILLIAMS.

Mr. District Gold Commissioner Johnson is requested to report as to survey.—O.R. Leases for issue were prepared and forwarded on the 10th instant.—WHITTINGDALE JOHNSON, G.C.

APPENDIX.

APPENDIX.

New South Wales, }
to wit. }

In the matter of the application of Henry Wilson and Alexander Brown for a lease of 25 acres of auriferous land, situate on the Cudgegong River, under the Gold Fields Act of 1866. With 2 Enclosures, and tracing marked A, B, and C.

I, THOMAS Alexander Browne, Esquire, being the Gold Commissioner residing nearest to the abovementioned 25 acres of auriferous land, being satisfied by the declaration of the abovenamed Henry Wilson that the abovenamed applicants have complied with all the requirements of the Regulations set forth with regard to applications for leases under the said Act, and no objections having been lodged against the granting of the abovementioned lease, do permit the said applicants immediately to occupy the said 25 acres of alluvial land, subject to the decision of the Government as to the granting of such lease.—As witness my hand, this 16th day of July, A.D. 1872.

T. A. BROWNE,
Commissioner.

[Enclosure A.]

To the Honorable The Minister for Lands.

The Memorial of Alexander Brown and Henry Wilson, of Gulgong, Miners,—

RESPECTFULLY SHOWETH:—

That your Memorialists, upon the 26th of June last, applied to the Commissioner at Gulgong for a lease of 25 acres of alluvial ground, situate on the Cudgegong River, about 2 miles from Two-mile Flat,—your Memorialists having previously pegged the ground and posted the preliminary notices, paid the rent for lease and survey, obtained the certificates (form T), and duly posted same.

The Commissioner reported thereupon, no objection being raised with 14 days, and the Chief Commissioner sanctioned the commencement of work.

Your Memorialists have employed men for a period of 15 weeks, and have expended over £150 upon the ground.

About ten days since, upon your Memorialists finding gold, the ground was rushed by some three or four hundred men, and the Local Commissioner, by virtue of the 132nd regulation, has ordered the miners to desist from occupying or mining.

The objections raised by the miners, assisted and supported by a class of agitators to be found on every extensive gold-field (who court popularity to serve their own ends), are as follows:—

First,—That the ground is not within a proclaimed gold-field of five years standing; that it is not tested and abandoned; that the employment of steam machinery is not necessary; that it is not marked off according to the Regulations, in consequence of a portion of the river-bed being included within the pegs; and that it is described as being about 2 miles from Two-mile Flat, whereas they allege it is more.

Your Memorialists allege, in answer, that this field has been proclaimed more than five years by various proclamations, extending over the last fourteen years, one of which proclaimed a certain distance upon each side of the Cudgegong River, throughout the entire Mudgee district, and this ground being upon the banks.

That there are twenty old abandoned shafts upon the ground, twelve of which were pointed out to the Commissioner; and reference is here made to the interpretation of the words "tested and abandoned ground" in the Regulations, meaning "ground upon which three or more shafts have been bottomed and tried and then abandoned."

A large proportion of this ground must inevitably involve wet sinking, thereby rendering the employment of large and powerful machinery necessary, and in the draft of a prospectus about to be issued this was estimated at £2,000.

Nothing in the Regulations or Act prevents the taking up of a portion of a river-bed, included with other ground, provision only being made for taking up a river claim complete in itself; and it appears but reasonable, supposing a lead of gold or a quartz-reef to run underneath a river-bed, that a lease of it could be taken up, including the banks, and unreasonable to suppose that the river-bed must be taken up separately, and the river-banks in other and distinct leases.

The interpretation clauses of the Act as to Crown Lands entitles a miner to take all Crown Lands, &c., and your Memorialists ask not for the river-bed but for the earth underneath the river, and the lead of gold running therein.

With reference to the alleged discrepancy in the distance, this could not mislead if true (for the distance outside is but 3 miles) inasmuch as the Regulations requiring pegs and the notice of application, miners were put in full possession of the intention to lease.

But apart from the alleged defects now pointed out by the miners (and their friends the agitators) it is most respectfully submitted by your Memorialists that they are entitled to their ground apart from such defects, even if valid, in consequence of their having in every way complied with the requirements of the Act and Regulations, and their application having been favourably reported on upon their having commenced work, expended a large amount of money, been in occupation for nearly six months. And the Government so far recognized their right to lease as to direct the Mining Surveyor upon the field to survey the tracts applied for, and finally, that by the one hundred and twenty-ninth regulation no objection will be entertained after the expiration of fourteen days from the posting of the T notices.

Your Memorialists therefore humbly pray that in justice to them you will direct that the lease applied for by them be at once issued.

And your Memorialists will ever pray.

A. BROWN,
A.B., for HENRY WILSON.

[Enclosure B.]

To The Honorable The Minister for Lands.

The Memorial of Alexander Brown, John Hill, Paul Harford, and James Brown, of Gulgong, Miners,—

RESPECTFULLY SHOWETH:—

That your Memorialists upon the 28th day of October instant applied to the Commissioner at Gulgong for a lease of 25 acres of alluvial ground, situate "on the Cudgegong River, about 2 miles in an easterly direction from the Two-mile Flat,"—your Memorialists having previously pegged the ground and posted the preliminary notices, paid the rent for lease and survey, obtained the certificates (Form T), and duly posted same.

The Commissioner we believe has reported upon the lease, although some delay has taken place.

Your Memorialists have employed men for a period of three weeks, and have expended £50 upon the ground.

About ten days since upon your Memorialists finding gold, the ground was rushed by some three or four hundred miners, and the local Commissioner, by virtue of the one hundred and thirty-second regulation has ordered the miners to desist from occupying or mining. The objections raised by the miners (assisted and supported by a class of agitators to be found on every gold-field, who court popularity to serve their own ends) are as follows:—First, that the ground is not within a proclaimed gold-field of five years standing; that it is not tested and abandoned ground; that the employment of steam-machinery is not necessary; that it is not marked off according to the Regulations in consequence of a portion of the river-bed being included within the pegs; and that it is described as being about 2 miles from Two-mile Flat, whereas they allege it is more.

Your

Your Memorialists allege, in answer, that this field has been proclaimed more than five years, by various proclamations extending over the last fourteen years, one of which proclaimed a certain distance upon each side of the Cudgegong River, throughout the entire Mudgee District, and this ground being upon the banks.

That there are twenty old abandoned shafts upon the ground, twelve of which were pointed out to the Commissioner, and reference is here made to the interpretation of the words "tested and abandoned ground," in the Regulations, meaning ground upon which three or more shafts have been bottomed and tried, and then abandoned.

A large proportion of this ground must inevitably involve wet sinking, thereby rendering the employment of large and powerful machinery necessary, and in the draft of a prospectus about to be issued this was estimated at £2,000.

Nothing in the Regulations or Act prevents the taking up of a portion of a river-bed included with other ground, provision only being made for taking up a river claim complete in itself; and it appears but reasonable, supposing a lead of gold or a quartz-reef to run underneath a river-bed, that a lease of it could be taken up including the banks, and unreasonable to suppose that the river-bed must be taken up separately, and the river banks in other and distinct leases.

The interpretation clause of the Act as to Crown Lands entitles a miner to take all lands, &c., and your Memorialists ask not for the river-bed but for the earth underneath the river and the lead of gold running therein.

With reference to the alleged discrepancy in the distance, this could not mislead if true (for the distance outside is but 3 miles), inasmuch as the Regulations requiring pegs and the notice of application, miners were put in possession of the intention to lease. But apart from the alleged defects now pointed out by the miners (and their friends the agitators) it is most respectfully submitted by your Memorialists that they are entitled to their ground, apart from such defects, even if valid, in consequence of their having in every way complied with the requirements of the Act and Regulations, and their application having been favourably reported upon—their having commenced work—expended a large amount of money—been in occupation for six weeks; and the Government so far recognized their right to lease as to direct the Mining Surveyor upon the field to survey the tract applied for, and finally, that by the one hundred and twenty-ninth regulation no objection will be entertained after the expiration of fourteen days from the posting of the T notices.

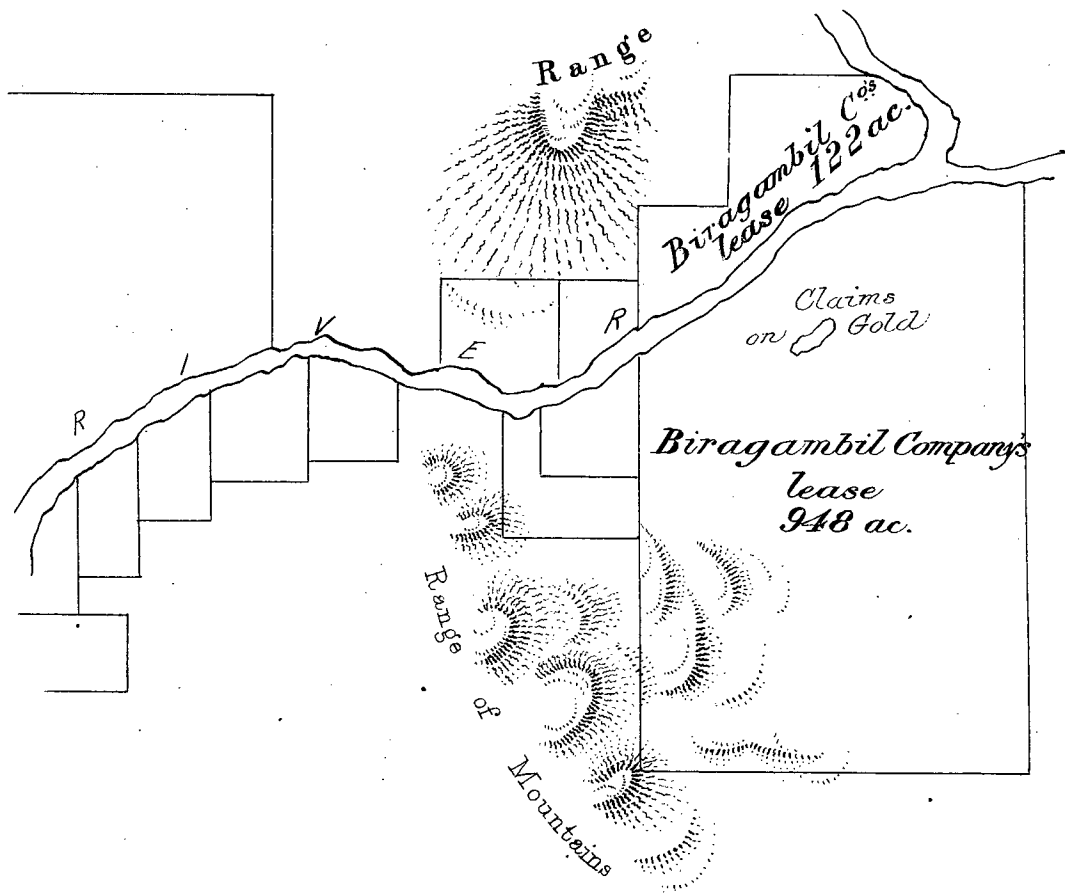

Your Memorialists therefore humbly pray that in justice to them you will direct that the lease applied for by them be at once issued.

And your Memorialists will ever pray.

A. BROWN,
For self and party.

1872.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

QUARTZ CLAIM ON TURON RIVER.

(CORRESPONDENCE IN REFERENCE TO DISPUTE FOR POSSESSION OF.)

Ordered by the Legislative Assembly to be printed, 12 November, 1872.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 6th August, 1872, That there be laid upon the Table of this House,—

“ Copies of all Correspondence, and of all Applications, Memorials, Reports, Minutes, or other Documents, dated since October, 1871, having reference to any application by Charles A. Williamson, or by Williamson and party, or by Edward White, or by White and party, or by Charles de Boos, or by De Boos and party, for a Quartz Lease or other Claim upon the Turon River; or to any dispute or litigation between any of the said parties or persons about the said claim or any adjacent claim.”

(Mr. Forster.)

SCHEDULE.

NO.	PAGE.
1. Mr. District Gold Commissioner Johnson to Under Secretary for Lands, forwarding 108 applications for leases of auriferous tracts, including application No. 1,076 of Messrs. C. De Boos and E. White, dated 29 November, 1871. 15 January, 1872	2
2. Minute of Executive Council, approving of same; with minutes thereon. 20 January, 1872.....	2
3. Under Secretary for Lands to Mr. District Gold Commissioner Johnson, returning same, for issue of lease. 29 February, 1872	3
4. Mr. District Gold Commissioner Johnson to Under Secretary for Lands, reporting on statement of C. A. Williamson, as to the survey of Lease No. 1,676, for Messrs. De Boos and White, at the Lower Turon River; with evidence, letters, and plans enclosed, and minutes thereon. 9 May, 1872.....	3
5. Under Secretary for Lands to Messrs. De Boos and White, forwarding copy of Mr. Johnson's report. 17 May, 1872	6
6. Mr. C. De Boos to Minister for Lands, further respecting his claim to lease of 5 acres at Wythe's Hill, against caveat by Mr. Williamson, and Mr. Johnson's report. 20 May, 1872	6
7. Under Secretary for Lands to Mr. Gold Commissioner Johnson, in reply to No. 4. 13 June, 1872	7
8. Same to Mr. C. De Boos, in reply to No. 6. 13 June, 1872.....	7
9. Mr. C. W. Weekes to Minister for Lands, asking, on behalf of Mr. Wilkinson, for issue of lease to be deferred until further evidence has been heard in the matter; with minute thereon. 13 June, 1872	8
10. Mr. C. A. Williamson to Minister for Lands, requesting permission to copy the letters and documents in the case of Williamson v. De Boos and White; with minute thereon. 19 June, 1872	8
11. Under Secretary for Lands to C. A. Williamson, in reply to above. 20 June, 1872	8
12. Messrs. Roxburgh, Slade, & Spain, in reference to the disputed claim between Mr. C. A. Williamson and Messrs. De Boos and White, for said lease of 5 acres at Wythe's Hill, and requesting the issue of same to be stayed until their rights have been determined by the Supreme Court; with minute thereon. 22 June, 1872	8
13. Under Secretary for Lands to Messrs. Roxburgh, Slade, & Spain, in reply to above. 5 July, 1872	9

QUARTZ CLAIM ON TURON RIVER.

No. 1.

MR. DISTRICT GOLD-COMMISSIONER JOHNSON TO THE UNDER SECRETARY FOR LANDS.

Gold Commissioner's Office,
Bathurst, 15 January, 1872.

SIR,

108.

I have the honor to forward herewith the applications for leases of auriferous tracts noted in the margin.

2. In each case the Regulations have been complied with, the terms appear to be satisfactory, and the ground applied for is not required for any public purpose; I beg therefore to recommend that the applications be approved.

I have, &c.,

WHITTINGDALE JOHNSON,
Gold Commissioner.

These seem regular. Prepare Minute for Executive Council.—O.R., 17 January, 1872.

Approved.—J.B.W., 18 January.

[Enclosure to No. 1.]

FORM of Application for an Auriferous Tract.

29 November, 1871.

1076—£7.

Sir,

We beg to make application to lease for a period of five years, under the Gold Fields Regulations, the auriferous tract below described.

We have this day posted notices, as required by the Regulations, of intended application, on the ground applied for, and at the Commissioner's Office.

The number of our party is two.

The names of the shareholders are Charles De Boos and Edward White.

The constitution of the Company is as follows:—Each shareholder paying an equal amount of expense of working.

We propose to work the ground, if leased, in the following manner:—By sinking on the reef in the usual manner, until the stone is tested, when machinery will be provided.

Description of locality, and extent of claim applied for:—Five acres, situated at Wythe's Hill, and within fourteen men's ground, more or less, from the land of the South Star Company, and immediately south of Marranan's 4-acre lease.

We annex a statement of the conditions under which we are prepared to take up the lease.

The Commissioner for Gold Fields,
at Bathurst.

CHARLES DE BOOS.
EDWARD WHITE.

CONDITIONS annexed.

We engage to keep employed on the claim five men, inclusive of our own party, and to have that number employed at the expiration of seven days from the date on which the lease is issued to us, or within such time as may be specified in the conditions indorsed on the lease; and we further engage to have in operation the machinery above specified, from and after the same date.

CHAS. DE BOOS.
EDWARD WHITE.

No. 2.

MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Department of Lands,
Sydney, 20 January, 1872.

The enclosed applications (particularized in the annexed Schedule) for 108 leases of auriferous tracts in the Western Gold Fields, being in accordance with the Gold Fields Regulations, are recommended for the approval of His Excellency the Governor and the Executive Council.

J. BOWIE WILSON.

The Clerk of the Executive Council,
B.C., 20 January, 1872, W.W.S.

EXTRACT from Schedule alluded to.

No.	Name.	Locality.	Area.	Period.
.....	Chas. De Boos, Ed. White.....	Wythe's Hill, Tambaroora	acres 5	years 5

The Executive Council have approved of the several applications of leases of auriferous tracts, Western District, set forth in the annexed Schedule, and advise accordingly.

ALEX. C. BUDGE,
Clerk of the Council.

Approved.—B., 31 January, 1872.

No. 3.

THE UNDER SECRETARY FOR LANDS TO MR. DISTRICT GOLD-COMMISSIONER JOHNSON.

Department of Lands,
Sydney, 29 February, 1872.

SIR,

I am directed by the Secretary for Lands to return to you the enclosed applications for leases of auriferous tracts in the Western Gold Fields, which accompanied your letter of the 15th ultimo, and to inform you that His Excellency the Governor and the Executive Council have approved of the leases in question being granted.

108.
No. 1.I have, &c.,
W. W. STEPHEN.

No. 4.

MR. DISTRICT GOLD-COMMISSIONER JOHNSON TO THE UNDER SECRETARY FOR LANDS.

Western Gold Fields Office,
Bathurst, 9 May, 1872.

SIR,

With reference to the annexed statement of Mr. C. A. Williamson as to the measurement of a lease of 5 acres of a quartz reef at Wythe's Hill, Lower Turon, for Messrs. De Boos and party, I do myself the honor, for the information of the Honorable the Minister for Lands, to furnish my report thereon.

2. Mr. Williamson's letter very clearly states his case; and having closely investigated the matter, and had a carefully prepared plan* of the locality furnished from actual survey by Mr. Licensed Surveyor M'Hattie, I am led irresistibly to the conclusion that Mr. Williamson's allegations are correct, and that the ground measured for Messrs. De Boos, White, & Co., is not the ground marked or applied for by them in November, 1871. A glance at the plan, after the perusal of Mr. Williamson's letter and an inspection of Messrs. De Boos' application, will show that the latter tallies exactly with the site which was not surveyed, and which would not have encroached upon Mr. Williamson's subsequent application for 15 acres in January last; whereas the lease as surveyed is in the very heart of Williamson's lease, and would in a few weeks be worked by a tunnel which he is driving into the hill. With the exception of that of the principals, who had little direct information to afford, the evidence, as may be observed by its contradictory character as to facts, was, in my opinion, very unreliable, and I have not been in any way guided by it as to my determination in this matter; but it was admitted on the part of Mr. De Boos' party that two leases had been marked within a short time of each other—one that described by Williamson, and the other that surveyed, although only one application to lease was made describing the ground precisely as not measured, and which by no ingenuity can be twisted into a description of the locality as surveyed. The place also shows that the early working by Messrs. De Boos and White's party were all on the base line described by Williamson.

Enclosed—A.
(* Separate Appendix.)

B.

Enclosed—C.

3. Under the circumstances, I can advise no other course than the refusal to issue Messrs. De Boos & Co's. lease as measured, which will be tantamount to its cancellation, the area voluntarily abandoned by them having been applied for by other parties, who cannot now be dispossessed, in order that the survey should be made in accordance with the application.

4. I enclose notes of the evidence taken in this case, and the correspondence with this Office on the subject. I may add that I personally inspected the locality in the presence of both parties to the dispute, before taking evidence in the matter.

C.

I have, &c.,
WHITTINGDALE JOHNSON,
Commissioner in charge.

As it does not appear that Messrs. De Boos & Co. have been informed of the decision arrived at by the Commissioner, I think before taking further action in the case they should be communicated with and shown this report.—J.B.W., 13 May.

I disapprove of the decision come to by the Commissioner in this case, and therefore advise that a lease be granted to De Boos & Co.—J.S.F., 3 June. Inform.

[Enclosure to No. 4.]

B.

Mr. C. A. Williamson to Mr. District Gold-Commissioner Johnson.
Sydney, 23 February, 1872.

Sir,

I have the honor to inform you that the ground surveyed by Mr. Surveyor Sharpe for De Boos and White is not the ground as described by them in their application of 29th November, 1871; they never had pegs in the ground until I found gold in the 15 acres lease applied for by me on or about the 9th day of January, and which I have been working ever since. In proof of the ground not being the same, I enclose copies of affidavits made before the P.M. at Tambaroora. The ground in dispute is quite different to that originally taken up by De Boos and White, and pegged out and described in their application, No. 1,076, of 29th November, 1871, as per following description, which agrees with the affidavits:—"Situated at Wythe's Hill, and within 14 men's ground more or less from the land of the 'South Star Company,' immediately south of Marranan's 4-acre lease." The ground now claimed by them, and on to which they shifted their pegs during my absence in town, and surveyed by Mr. Sharpe, is considerably to the east, on a totally different line of reef, and several hundred yards from the ground originally pegged out.

I have further the honor to request that you will not recommend the lease to be issued to the applicants until you have decided on the case.

I have, &c.,
CHARLES A. WILLIAMSON.

[Sub-enclosure

[Sub-enclosure to Enclosure B to No. 4.]

Hill End, 21 February, 1872.

I, *Denis M'Inerney*, maketh oath and say, that I know the ground originally marked out by Patrick Marranan, on the South Star Line, next and adjoining a 4-acre lease held by Patrick Marranan, now known as the Southern Cross, south of it; I nailed the boards on the pegs in that ground; the ground surveyed by Surveyor Sharpe, and pointed out to him by Patrick Marranan, *alias* Pat the Rambler, is not the ground on which I put the boards on behalf of White and party on the 29th November, 1871, or about that date; I wrote the application of the lease,—put the application on the pegs; the same pegs, with the applications and boards, are now about (150) one hundred and fifty yards from the original base-line, the pegs having been moved.

DENIS M'INERNEY.

Witness,—JAMES THERRY.

Signed before J. W. LEES, P.M., Tambaroora.

[Sub-enclosure to Enclosure B to No. 4.]

Hill End, 21 February, 1872.

I, *George Hoole*, maketh oath and say, that I have been over the ground of the Confidence Company, situate north bank of "Turon," several times during the month of January, before Mr. Williamson took up the ground and since, and I distinctly swear that there were no pegs or notices of White and party, or any other, on the ground now said to be taken up by White and party, except those of C. A. Williamson; I have seen the same notices of White and party on quite different ground, further west; and that the attempt of White and party to take possession of the ground of the Confidence Company is an attempt at fraud.

GEO. HOOLE.

Witness,—JAMES THERRY.

Signed before J. W. LEES, P.M., Tambaroora.

[Sub-enclosure to Enclosure B to No. 4.]

Hill End, 21 February, 1872.

I, *Thomas MacMahon*, maketh oath and say, that I have been over the ground of the Confidence Company several times during the month of January, before Mr. Williamson took up the ground and since, and I distinctly swear that there were no pegs or notices of White and party, or any other party, on the ground now said to be taken up by White and party, except those of C. A. Williamson; I have seen the same notices of White and party on quite different ground, further west; and that the attempt of White and party to take possession of the ground of the Confidence Company is an attempt at fraud.

THOMAS MACMAHON.

Witness,—T. R. ALLT.

Signed before J. W. LEES, P.M., Tambaroora.

[Enclosure to No. 4.]

C.

Dispute as to measurement of Lease on Lower Turon.—Williamson and party *versus* De Boos and White.

Hill End, 19 March, 1872.

Charles Alexander Williamson states:—On the 9th January, 1872, I applied for a lease of 15 acres, described as on the north bank of Turon, west of the Honest Lawyer's and Champion's Extended Claims, both of which leases have been surveyed; the pegs now stand in the same position as when placed by me on that date; within one week I proceeded to work the claim; at the expiration of fourteen days I had six men to work; I have been over the ground surveyed as for White & Co.,—passed over the spot where the southern peg now is, and never observed it until after the survey; the survey of this ground includes part of the lease applied for by me; I have also passed along the line of the South Star Reef, and have seen the same boards now on the surveyed ground on the South Star Line, about 15 yards to the west; I have seen them in that position in the end of December, and on the beginning of January; the northern peg was close to a surveyor's mark; the southern peg was almost due south from it; about the beginning of January, I was on the South Star Line with Patrick Marranan; he said he had a 4-acre lease to the south of Campbell's lease, and beyond that a 5-acre lease, applied for by himself and White, on the same line; the South Star Line is about 200 yards to the west of the present surveyed line of the disputed lease; no objections have been lodged to my application for the 15 acres; I have been at work for two months; I marked the ground personally,—one peg on the northern boundary, where it now stands, on the 9th January, and another peg on the southern boundary, where it now stands; the pegs, as near as I could step it, were 480 yards apart, allowing for horizontal measurement; I was alone when I marked the ground; I measured from the northern peg; I came down a ravine to the foot of the bluff, and obtained a peg opposite the Chinaman's workings, and placed it where it now stands, on the southern boundary; the drives are respectively about 10 and 40 feet from the base-line peg to the west; I saw notices of application by Emmett without date, within my boundaries, but ascertained the ground was not applied for from the man who marked it; Emmett's base-line was the same as mine; I am confident my marking did not embrace the lease of White and party as seen by me previously; I am perfectly certain their pegs did not then stand as the lease is now surveyed; I can state that the boards now on the pegs are the same as those on them in their previous position.

CHAS. A. WILLIAMSON.

Denis M'Inerney states (miner) not employed by the complainant:—I assisted to mark out a lease for Messrs. White & Co., in company with Patrick Marranan,—this was the marking with boards; I nailed the boards on existing pegs; the northern peg was on the southern peg of base line of the four acres of Southern Cross 4-acre lease; the southern peg was 148 yards in the continuation of the base line of the Southern Cross; this reef is known as the South Star Line of Reef; I never assisted to alter the position of these pegs; the pegging took place on 28th November, and I wrote the notices on boards; I never saw the Surveyor's pegs until yesterday; I marked out a 5-acre lease on South Star line; I stepped in the proportion of forty-eight yards to the acre; I am certain I marked the boards for a 5-acre lease; I never saw the base pegs in their present position until four days past; I identify the boards as the same I placed on the South Star line. I am confident sure the northern peg is 150 yards from its original position; the southern peg is not so far, but neither pegs are in their original position. White and myself were in Mr. Williamson's two tunnels; I am the first man ever worked Mr. White's five acres in South Star line; I was paid so much a week, and worked for five days; I was paid by White & Co.; the ground I worked is not within the Surveyor's pegs of lease as now measured; some portion of the workings may be within the side lines, but I am certain some are outside; I was working about the centre of original marked claim at that date; I never wrote any other boards for a 5-acre lease of Patrick Marranan; the posted-up board was dated 28th November; I had to take the pegs out of ground to nail board on, and I then replaced them.

DENIS M'INERNEY.

Denny,

Denny, recalled, states:—I was employed by White & Co. on the 2nd January, and not in December.

Arthur Robinson (miner):—I was giving pay to mark out a machine site for Mr. Lewis; early in December I saw a man named Denny working on the South Star line; I went a little further down and saw a peg with brand on, White and party; I know where the ground is now surveyed; the pegs are not in the same position; the original northern pegs were about 120 yards to the east; the southern peg is about 100 yards; the southern peg was near a mass of rocks and a sawn stump; the stump is close to it, it might be five or ten yards from it, on the South Star line of reef; I know Marranan's 4-acre lease in South Star line; the survey peg and northern boundary peg were close together, I think about the early part of December; I saw the same pegs in same position the latter part of December. I think it was about the end of December I saw Denny; I saw the board after I had spoken to Denny; it was the southern peg I saw after speaking to Denny; it was on the right hand side of track as I went toward river.

ARTHUR ROBINSON.

Charles De Boos:—I am one of the applicants in lease of White & Co.; I was not present at the marking of lease; I first saw the ground on the 28th or 29th December; I went on the ground, and was shown the boundaries by Marranan; I can speak as to the position of the southern boundary, especially because I complained at Marranan for pegging so close to the Bluff; I thought he should have gone more west; I cannot speak as to the northern boundary; I have since inspected the boundaries, about seven or ten days back; I believe the southern boundary is still in the same position as seen by me in the end of December; in addition, as I walked along the eastern side line with Patrick Marranan, he showed a peg of Emmett's within our boundary; I complained to Emmett on my return to Sydney; he promised to alter it; I have seen a blow of quartz some short distance from Emmett's peg; I have a very indistinct recollection of the position of blow of quartz; I do not think Emmett's peg was on the edge of cliff; I have a very indistinct recollection of this. I paid wages for work commenced fourteen days after application.

CHAS. DE BOOS.

Patrick McGovern, (miner):—I went, in company with Patrick Marranan, on the 24th or 25th November, to peg out a lease for E. White & Co.; I assisted to put the pegs in with Pat. Marranan; I wrote the notices; I put the pegs where they stood yesterday; I never removed them; I saw a peg put up for Williamson on 9th January; I saw the south peg had been shifted to the west over 80 yards, about a week afterwards I first saw notice for application; the peg he saw near the crossing had Williamson and Thomas Macmahon's names on it, about the end of December, or early in January; the peg was there on the 9th January; the board had C. A. Williamson & Co.; the notices of application had Williamson & Macmahon on them; the board was on the peg when it stood in the same position it originally did; the same board is now on the peg in its altered position; I cannot say whether the names have been altered; date on Emmett's notice, 31st December; Emmett's pegs were not in the ground when I marked out for White & Co.; Mr. Williamson's pegs as originally placed would have taken in part of this lease; I know Patrick Marranan's 4-acre lease since the 11th October; when I first commenced to work on it, there was a peg, E. White & Co., at the southern boundary of Marranan's 4-acre lease; it was for lease dated 12th December; it was marked after the disputed lease; I assisted to mark it; I do not know who marked the boards; Dennis M'Inerney wrote out the boards for first lease, I think Marranan wrote himself for second lease, but cannot say; I did not see Denny put on the boards, but I helped to peg out second lease, 12th December.

PAT. MCGOVERN.

E. A. Leonard (miner) states:—Mr. Williamson, myself, and others, were riding out to Root Hog; Mr. Williamson left us, but returned shortly afterwards, and told us that he had pegged out a 10-acre lease; I cannot fix the date; I went subsequently to look at the line of reef, and saw White & Co.'s peg in the same place as now stands; the third week of January I believe they had struck gold; I have never seen the pegs since until yesterday; when I first saw the pegs it was about two days after Williamson's men had commenced work; I saw that the peg was inside Williamson's ground (the ground claimed by Williamson), and I looked direct north and I saw the men at work sinking shaft; they said they were working for "Pat the Rambler"; the shaft was I believe the same; I saw yesterday a line of the South Star reef would bound a portion of the 5-acre lease; it would be south of South Star claim; if not intimately acquainted with ground I would not give such description; the peg as far as appearance is the same, just as old-looking when I first saw it as it is now; I was not on the ground between 28th November and third week in January; I know nothing whatever of the original position of the pegs, except that was the position; I never saw the northern peg—I did not go as far—I only went to the shaft; I know nothing of the original pegging of the ground except what I have now said; I have seen Williamson's southern peg; I read the notice on the board, but cannot say whether it is C. A. Williamson or C. A. Williamson & Co.; I have never seen Williamson's notice in any other position.

E. A. LEONARD.

Patrick Marranan states:—I am a miner; the ground I pegged out on the 28th November with McGovern is the same ground that has been surveyed for White and Co.; the northern peg has been drawn in to the Surveyor's mark, the southern peg is as it stood originally; about 12th December I marked another lease for White & Co. of 5 acres to the west of disputed lease; the peg of second lease was placed at the southern cross boundary; M'Govern wrote the notices, M'Inerney wrote the boards; I wrote the boards for the lease surveyed; when Mr. De Boos came up in the latter end of December, I showed him his 5-acre lease, he then put two men on to work, and kept them at work ever since; men commenced work on 2nd January; I recollect Mr. De Boos complaining that the peg was too near the Bluff; when I showed him the ground, I gave my reason that there would not be ground enough; the plan shown to Mr. Johnson was not where I placed the peg for surveyed lease—it was for White's second lease; M'Inerney was with me when I marked out White's second lease, not when I pegged out measured lease; I am certain the boards on surveyed lease are in my handwriting; first work commenced was trenching, and that is on the surveyed lease; I am certain the shaft was commenced before that gold was struck in Williamson's claim; I never moved any pegs on the surveyed lease after I first fixed the boards, except when the Surveyor moved the northern peg, because too much ground had been pegged off; I told White that it would take in the big reef and lay to the east; this surveyed lease is south of the South Star Claim; there was no other line talked of at that time except the South Star Claim in that neighbourhood.

PATT MARRANAN.

Frank De Boos:—I took away the peg from the southern end of Pat. Marranan's 4 acres,—it had a board on with writing to the effect application of 5-acre lease, White and Co.; I saw the peg on-edge of Bluff in the end of December; I was living in that neighbourhood for about a month previous.

F. G. DE BOOS.

Mr. Manby, as agent for White and party, objects to re-opening case, on following grounds:—

1. That White and Company's lease has been duly surveyed.
2. That no objection to the lease was preferred to the Commissioner in charge, and upheld before the expiration of fourteen days from the day of posting the notices.
3. That the Commissioner in charge has been authorized to issue the lease to White and party.
4. That White and party, in pursuance of Reg. 13 of 17th February, 1870, have entered on and occupied their ground, and worked therein continuously from fourteen days after application to present time.

ED. MANBY.

Tuesday, 19th March, 1872.

Mr.

Mr. C. De Boos to The Commissioner in charge, Western District.

Sydney Morning Herald,
29 March, 1872.

Sir,

The evidence in the case of Williamson *versus* myself having concluded, I must crave your permission to call your attention to the fact that the witness Arthur Robinson, who volunteered evidence against me and in favour of Mr. Williamson's case, was proved before you on the following day, in the dispute between that witness and myself, to have been guilty of deliberate falsehood, by stating at one time that he pegged out at midnight, and at another that he pegged out at 6 o'clock in the morning, and that he looked at his watch to ascertain the time.

With regard to the witness Dennis M'Inerney, this man had been on terms of great intimacy with Pat Marranan, the latter advancing him money—some £14 or £15—to build an oven and to start in business as a baker; Dennis, however, spent in drink a portion of the money advanced for business, Pat got angry, sent him adrift, and refused to advance any more money. Hence the ill feeling which in men of this kind makes them reckless of what they may state so long as they can injure an opponent; all this would have been got out in Pat Marranan's evidence, had I not, as you are aware, been so exceedingly unwell on the day Pat was examined.

I would also call to your memory that two of the men employed in the shaft on the disputed ground declared that it had been commenced on the Monday following the day they were first set to work; the day they were set to work was Tuesday, January 2nd, so that the following Monday would be the 8th January.

Mr. Emmett has promised to write me a letter verifying my statement as to what took place between us with regard to his agent having pegged in on my ground and identifying this ground with that claimed by Williamson; I shall take the liberty of enclosing you this letter by to-morrow's post.

I have, &c.,
CHAS. DE BOOS.

Mr. C. De Boos to The Commissioner in charge, Western District.

S. M. Herald Office,
2 April, 1872.

Sir,

I beg to enclose you note from Mr. E. N. Emmett, referred to in my letter of last week.

Yours, &c.,
CHAS. DE BOOS.

Mr. E. N. Emmett to Mr. C. De Boos.

Greville's Room,
Sydney, 28 March, 1872.

Dear sir,

In answer to your verbal application, I beg to state that a Mr. Hubburd alleged to me that he had marked out a certain portion of land for a lease (say 15 acres) on the gully adjoining the Bluff at the Turon; that on or about the 9th January last you spoke to me, that one of my pegs was on your ground, and that I promised to see the thing rectified. I was afterwards informed that the land had been jumped by a Mr. Williamson.

I remain, &c.,
E. N. EMMETT.

No. 5.

THE UNDER SECRETARY FOR LANDS TO MESSRS. C. DE BOOS AND E. WHITE.

[Urgent.]

Department of Lands,
Sydney, 17 May, 1872.

GENTLEMEN,

With reference to your application of the 29th November last, for a lease of 5 acres of a quartz reef at Wythe's Hill, Lower Turon, objected to by Mr. C. A. Williamson, on the ground that the land surveyed for you is not the same applied for by you,—I am directed by the Minister for Lands to forward to you a copy of the report received from the Commissioner in charge of the Western Gold Fields in the matter.

I have, &c.,
W. W. STEPHEN.

No. 6.

MR. C. DE BOOS TO THE SECRETARY FOR LANDS.

Greville's Rooms,
20 May, 1872.

SIR,

Mr. Commissioner Johnson's report on the caveat of Mr. Williamson to the issue of a lease of 5 acres at Wythe's Hill to myself and party, reminds me more of a laboured address of an advocate for one suitor, than of the calm balancing of a Judge weighing the evidence on each side with a view to justice.

Mr. Commissioner Johnson took evidence verbally on the ground, and afterwards, at the instance of Mr. Williamson, took it in writing at Hill End; and yet after all this trouble and after this unusual course, Mr. Commissioner Johnson throws aside the evidence, and finds his opinion on a plan not in evidence, but one made by a surveyor, at the instance and under the direction of Mr. Williamson, and which I have had no opportunity of seeing or objecting to.

You will perhaps pardon me if I call your attention to the facts which Mr. Commissioner Johnson puts aside.

On the 21st November, I being in Sydney, the ground was pegged out for me; the person I sent up is not a miner, and when he returned to Sydney he gave me the description "next to Marranan's 4-acre lease." As I knew the ground only as the "South Star" line I put in those words in addition. No other reef had then been opened, and the ground was known generally as the "South Star" line. I trust there is no "ingenuity of torturing" in this explanation.

On

See sub-enclosure dated 23 Mar., 1872.

See enclosure to No. 1.

See Gold Commissioner Johnson's report of 9 May, 1872, No. 2.

On the 24th November, the lease was paid for in accordance with the Regulations, and the notice "Applied for lease" was put up; no objection was made and sustained within the fifteen days prescribed by the then Regulations. The ground was surveyed, and no objection made. The Commissioner reported on it to the Government, and Mr. Commissioner Johnson, as he admitted, received orders from the Government to issue the lease. That issue, however, was delayed, and in the meantime Mr. Williamson entered a caveat to the lease. Surely under such circumstances it would be the duty of the Commissioner to see that very strong evidence was adduced by the appellant, before he so much as called upon the respondents to reply, and yet Mr. Commissioner Johnson says he was "in no way guided" by the evidence.

Putting aside the antagonistic evidence of the two men produced by Mr. Williamson, and of the two men who pegged out for me, Mr. Commissioner Johnson can hardly ignore the facts that I saw the ground last Christmas before Mr. Williamson pegged out—and that I declare distinctly—to the southern pegs; that my son saw and declared to the pegs prior to that time; that I complained of Mr. Emmett's centre peg encroaching on my lease, taking about half of it; that Mr. Williamson jumped Emmett's ground on the 6th or 8th January; and that Williamson subsequently, on the 9th, the date at which he claims to have pegged, and shifted his pegs sixty yards lower down the river, thus swallowing up the whole of my lease; and that I spoke to Mr. Emmett in Sydney about his encroachment at a time when I could have had no knowledge of Williamson pegging. Surely these facts were worthy of consideration, especially after the Minister had ordered a lease to issue to me. And I would further point out that had my lease been issued to me in due course my position would have been unassailable; whereas now there is no finality until it may suit Mr. Commissioner Johnson's convenience to obey the orders of his department; for even though this had been decided in my favour, caveats innumerable may have come in from other quarters.

My letter to Mr. Commissioner Johnson has pointed out the little value to be attached to the evidence adduced by Mr. Williamson, and as I do not wish to weary you with too many details, I will conclude by submitting that Mr. Commissioner Johnson's report ought not to be confirmed,—

First.—Because no objection was made and sustained within the fifteen days prescribed by the Regulations.

Second.—Because a lease having been ordered to issue, I have actually a promise of a lease virtually amounting to a lease.

Third.—Because Mr. Commissioner Johnson ought not to have thrown aside the evidence, and given his decision on that which was not evidence.

Fourth.—Because a survey made under the direction of an interested party, behind the back of his opponent, ought not to override the survey actually made by direction of the Government in the usual course by their proper officer, and,—

Fifth.—Because the evidence given, if looked at impartially, points conclusively to the justice of my position.

I have, &c.,

CHAS. DE BOOS.

No. 7.

THE UNDER SECRETARY FOR LANDS TO MR. GOLD-COMMISSIONER JOHNSON.

Department of Lands,
Sydney, 13 June, 1872.

SIR,

In reference to your letter of the 9th ultimo, reporting on the statement of Mr. C. A. Williamson No. 4. as to the measurement of a lease of five acres of a quartz reef, at Wythe's Hill, Lower Turon, applied for by Messrs. C. De Boos and E. White,—I am directed to inform you that the Minister for Lands disapproves of the decision arrived at by you in this case, and has therefore approved of the lease in question being issued to Messrs. De Boos and White, as authorized by the letter from this Department of the 29th No. 3. February last.

I have, &c.,

W. W. STEPHEN.

No. 8.

THE UNDER SECRETARY FOR LANDS TO MR. C. DE BOOS.

Department of Lands,
Sydney, 13 June, 1872.

SIR,

Referring to your letter of the 20th ultimo, respecting the decision of the Commissioner in No. 6. charge of the Western Gold Fields, in a dispute between you and Mr. C. A. Williamson, for a gold-mining lease of 5 acres south of Marranan's lease of 4 acres, Wythe's Hill, Lower Turon,—I am instructed to inform you that the Minister for Lands, having carefully considered all the circumstances of the case, has directed that a lease be granted in your favour, of which the Commissioner in charge of the Western Gold Fields has been apprised.

I have, &c.,

W. W. STEPHEN.

No. 9.

No. 9.

MR. C. W. WEEKES to THE MINISTER FOR LANDS.

279, George-street,
Sydney, 13 June, 1872.

SIR,

Having learned that a lease is about to issue to Messrs. De Boos and White, for an auriferous selection on the Confidence line of reef, Turon River, and which has been in dispute with Mr. C. A. Williamson,—I have the honor to request, on behalf of myself and co-partners with the said C. A. Williamson, that issue of such lease be deferred until further evidence has been heard. I understand that it can be proved by evidence on oath that the selection now claimed by De Boos and White is not the one originally taken up by them according to their application, but that it is a portion of (15) fifteen acres taken up and legally held by C. A. Williamson.

I have, &c.,
C. W. WEEKES.

Shall this request to stay issue of the lease for the present be granted.—W.W.S., 13 June, 1872.

Williamson & Co. placed their case before the Commissioner, by documentary and verbal evidence, and De Boos & Co. were heard in reply; this evidence was laid before me, and upon it I founded my decision. I cannot re-open the case, therefore my decision must be carried out.—J.S.F., 18 June.

No. 10.

MR. C. A. WILLIAMSON to THE MINISTER FOR LANDS.

Sydney, 19 June, 1872.

SIR,

I have the honor to request that you will grant me permission to copy the letters and documents in the case of Williamson, and De Boos and White.

I have, &c.,
CHAS. A. WILLIAMSON.

Mr. Williamson to have copies of documents and plan, by his paying for the cost of same at the usual rate.—J.S.F., 20 June.

No. 11.

THE UNDER SECRETARY FOR LANDS to MR. C. A. WILLIAMSON.

Department of Lands,
Sydney, 20 June, 1872.

SIR,

No. 10. In reference to your letter of the 19th instant, applying for copies of letters and documents on the case of Williamson v. De Boos and White, I am directed by the Minister for Lands to inform you that it is not customary to furnish copies of papers, and the great press of business will not admit of copies being made in the office, but there will be no objection to allow you to have copies of these documents, and plan, being made after office hours by a gentleman temporarily employed in the department, on your paying the cost of same at the usual rate.

I have, &c.,
W. W. STEPHEN.

No. 12.

MESSRS. ROXBURGH, SLADE, & SPAIN, to THE MINISTER FOR LANDS.

Exchange, Sydney,
22 June, 1872.

SIR,

Not having received any communication from you as promised in the matter of your decision on the dispute between Mr. C. A. Williamson and Messrs. De Boos and party, we can only conclude that you do not see fit to reconsider it. We regret this, as from the papers which we have since had the opportunity of perusing, it appears that Mr. De Boos seems to have had, and availed himself of the opportunity of pleading his cause before you,—a privilege which has not been open to our client. We have laid the papers (since our Mr. Slade's interview with you) before Counsel, and are advised that the best and most expeditious way to test the rights of the parties is by an action of trespass, and we have now, with all becoming and respectful submission, and yet in a firm attitude of remonstrance, to request that you will be good enough to direct that no lease shall issue to either party until their rights have been determined by the Supreme Court.

We feel convinced that this fair opportunity of obtaining redress, if we are entitled to it, will not be refused us, and that you will see fit to give the necessary order for the applications on both sides to remain

. 9

remain in their present state, until we can obtain a decision of the Court, which we undertake to do with all reasonable dispatch. May we ask the favour of a reply as to whether you will be pleased to concede our request or not?

We have, &c.,

ROXBURGH, SLADE, & SPAIN.

The Minister was under the impression that Mr. Slade or his client was to call again. He cannot, however, order the withholding of a lease the issue of which has been authorized by the Executive Council; neither does he consider that the fact of the lease issuing will affect the case, should the Supreme Court decide in favour of Mr. Williamson.—W.W.S., 28 June, /72.

No. 13.

THE UNDER SECRETARY FOR LANDS to MESSRS. ROXBURGH, SLADE, & SPAIN.

Department of Lands,
Sydney, 5 July, 1872.

GENTLEMEN,

Referring to your letter of the 22nd ultimo, on behalf of Mr. C. A. Williamson, stating that ^{No. 12} you received no intimation of the decision come to in reference to the dispute between Mr. C. A. Williamson and Mr. De Boos and party, for an auriferous lease of 5 acres at Wythe's Hill, Tambaroora, and requesting that the issue of the lease to either party may be stayed until their rights have been determined by the Supreme Court,—I am directed to inform you that the Minister for Lands was under the impression that Mr. Slade or his client was to call again at this office.

2. The Minister for Lands cannot, however, order the withholding of a lease the issue of which has been authorized by the Executive Council; neither does he consider that the fact of the lease issuing will affect the case, should the Supreme Court decide in favour of Mr. Williamson.

I have, &c.,

W. W. STEPHEN.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DISPUTED LAND NEAR ORANGE.

(ORIGINALLY IN POSSESSION OF MESSRS. CONNOLLY, NOW ADJUDGED TO BELONG TO H. L. NELSON, ESQ., M.P.)

Ordered by the Legislative Assembly to be printed, 19 December, 1872.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23 July, 1872, That there be laid upon the Table of this House,—

“ Copies of all the papers in reference to a piece of land near Orange, originally in the possession of Messrs. Connolly and party, but now, by a decision of the Commissioner, taken from them, and adjudged to belong to Mr. Nelson, the Member for Orange.”

(*Mr. Buchanan.*)

SCHEDULE.

NO.	PAGE.
1. Mr. District Gold Commissioner Johnson to Under Secretary for Lands, reporting on conflicting applications of Mr. H. L. Nelson and J. B. Connolly, for a lease of 10 acres of an auriferous tract at Back Creek, near Ophir; with application of Mr. Nelson, objections, letters, and evidence enclosed; with minutes thereon. 12 June, 1872	2
2. Minute of Executive Council, approving of lease of 10 acres at Back Creek, near Ophir, being issued in favour of Mr. H. L. Nelson; with minutes thereon. 16 July, 1872	5
3. Messrs. Ellis & Makinson to the Minister for Lands, protesting, on behalf of Messrs. J. B. Connolly and party, against the decision given in the matter of the disputed right to the land above referred to, and requesting that the granting of a lease for the same may be deferred until the matter has been settled by the Supreme Court; with minutes thereon. 24 July, 1872	5
4. Same to same, relative to the same subject, and enclosing copy of opinion, given by Mr. Darley, barrister-at-law, in the matter; with minute thereon. 15 August, 1872	6
5. Under Secretary for Lands to Mr. District Gold Commissioner Johnson, in reply to No. 1. 16 August, 1872	6
6. Same to Messrs. Ellis & Makinson, in reply to No. 3. 26 September, 1872	7
7. Petition of John B. Connolly, by Messrs. Ellis & Makinson, to His Excellency the Governor, praying that a lease may not be issued until the case has been tried in the Supreme Court; with minutes thereon. 4 October, 1872	7
8. Principal Under Secretary to Messrs. Ellis & Makinson, acknowledging receipt of petition. 11 October, 1872	8
9. Under Secretary for Lands to Messrs. Ellis & Makinson, in reply to No. 4. 14 October, 1872	8
10. Messrs. Ellis & Makinson to Minister for Lands, respecting the petition of Mr. J. B. Connolly, and asking for a decision of His Excellency and the Executive Council in the matter; with minutes thereon. 6 November, 1872	8

DISPUTED LAND NEAR ORANGE.

No. 1.

THE COMMISSIONER-IN-CHARGE, WESTERN GOLD DISTRICT, to THE UNDER SECRETARY FOR LANDS.

Western Gold Fields Office,
Bathurst, 12 June, 1872.

SIR,

I do myself the honor to report on the enclosed papers with reference to the conflicting applications of Messrs. H. L. Nelson, M.P., and Mr. J. B. Connolly, for a lease of an auriferous tract of 10 (ten) acres at Back Creek, near Ophir.

2. The case was investigated by the resident Commissioner, Mr. J. T. Lane, at Orange, who gives his opinion that the probabilities are in favour of Mr. Connolly as the prior legal applicant for the ground. From this decision Mr. Nelson appeals; and on a perusal of the evidence I must admit that I cannot agree with Mr. Commissioner Lane's view of the case, as there does not appear to me to have been any such irregularity in Mr. Nelson's mode of application as to deprive him of his undoubted priority of selection by having been the first to mark out the ground in dispute, and to lodge the required deposit, within the prescribed time, with the local Commissioner, whereas Mr. Connolly made his application to a Commissioner of another district. The evidence as to size of posts, &c., is contradictory, and where such is the case I consider that the prior applicant is entitled to the benefit of the doubt. I am therefore of opinion that, under the circumstances, Mr. Nelson's application should be received and Mr. Connolly's cancelled.

I have, &c.,

WHITTINGDALE JOHNSON,
Commissioner-in-Charge.

Submitted.—O.R., 14.

The decision of the Commissioner-in-Charge, Mr. Johnson, is approved.—J.S.F., 24 June, 1872.

[Enclosure A to No. 1.]

Form of application for an auriferous tract.

1872.—£12.

Received, 12
April, 1872.—
JOHN T. LANE,
Commissioner.

Sir,

I beg to make application to lease, for a period of 15 years, under the Gold Fields Regulations, the auriferous tract below described.

I have this day posted notices, as required by the Regulations, of intended application, on the ground applied for, and at the Commissioner's Office.

The number of my party is one.

The shareholder is myself.

HARRIS LEVI NELSON.

THE constitution of the Company is as follows :—

I propose to work the ground, if leased, in the following manner :—Sinking and driving.

Description of locality and extent of claim applied for :—10 acres, situated at Back Creek, near Ophir.

The preparatory operations necessary for me to perform to enable me to work the claim are sinking and driving.

I annex a statement of the conditions under which I am prepared to take up the lease.

H. L. NELSON,
33, Lower Fort-street, Sydney.

Conditions annexed.

THE machinery I engage to employ is as below described, viz. :—

Steam—Horse-power of engine—

Other machinery—

I engage to keep employed on the claim five men, inclusive of our own party, and to have that number employed at the expiration of 14 days from the date on which the lease is issued to me, or within such time as may be specified in the conditions indorsed on the lease; and I further engage to have in operation the machinery above specified from and after the same date.

H. L. NELSON,
33, Lower Fort-street, Sydney.

The Commissioner for Gold Fields West,
at Bathurst.

[Enclosure B to No. 1.]

H. L. Nelson, Esq., M.P., to The Commissioner-in-Charge, Western Gold District.

Sydney, 33, Lower Fort-street,
24 April, 1872.

Sir,

On or about the 5th instant I took up 10 acres of land, for gold-mining purposes, at Chambers Creek. I forwarded my application for the same, together with my cheque for £12 for rent and survey fee, by Mr. Charles Hughes, of Bathurst.

Will you kindly inform me if you have received such application? and, if so, please send me a receipt for same and oblige

Yours, &c.,

H. L. NELSON.

Mr. Farr,—Has this been received, and where has receipt been sent?—W.J., 25 April, /72.

[Enclosure

[Enclosure C to No. 1.]

H. L. Nelson, Esq., M.P., to Edwd. Farr, Esq.

33, Lower Fort-street,
Sydney, 29 April, 1872.

Dear Sir,

Last week I wrote to the Commissioner, asking him to forward me the enclosed receipt, which is to hand this See B. morning from Mr. Chas. Hughes. I now return it for correction, and will feel obliged if you will insert the name of Harris Levy Nelson, which is my name, instead of Harris Levy & Co., which must be an error.

If you refer to the application made by me you will there find the name correct.

I am, &c.,
H. L. NELSON,
Per M. DE LISSA.

[Enclosure D to No. 1.]

The Commissioner-in-Charge, Western Gold District, to Mr. Gold Commissioner Lane, Orange.

Western Gold Fields Office,
Bathurst, 14 May, 1872.

Sir,

I have the honor to enclose the papers with reference to the objections lodged against an application for a lease by Mr. H. L. Nelson, by Mr. J. B. Connolly, who has made an application for the same ground, and to request that you will hold the necessary inquiry into the matter on the 27th instant, of which both parties to the dispute have been notified. To be returned with report.

I have, &c.,
W. JOHNSON, G.C.C.

[Sub-Enclosure 1 to Enclosure D to No. 1.]

Mr. J. B. Connolly to The Commissioner-in-Charge, Western Gold District.

Sir,

I hereby object to a lease of 10 acres at Back Creek being granted to H. L. Nelson, for the following reasons, viz. :—

1st.—That he or his representative has not pegged the ground at all.

2nd.—That the ground was open for any miner to occupy it on the 15th, his notice of intention being dated on the 8th.

3rd.—That I met Mr. Nelson on the ground on the 19th, and that he made no alteration in pegs or notices; he positively told me, in the presence of five others, he paid his money on the 9th April.

I therefore claim a legal and prior right to the ground, and have complied with all the requirements of the Act, &c. Of course, subject to your decision.

Yours, &c.,
JOHN B. CONNOLLY.

[Sub-Enclosure 2 to Enclosure D to No. 1.]

Telegram from Mr. J. B. Connolly to The Commissioner-in-Charge, Western Gold District.

Bathurst, 28 April, 1872.

I HEREBY object to a lease 10 acres, Back Creek, near Orange, being granted to H. L. Nelson. I claim a legal and prior right to the ground.

[Sub-Enclosure 3 to Enclosure D to No. 1.]

H. L. Nelson, Esq., M.P., to The Commissioner-in-Charge, Western Gold District.

33, Lower Fort-street, Sydney,
30 April, 1872.

Sir,

I am in receipt of yours of the 29th instant, stating that a counter application has been made by Mr. Connolly for the lease of 10 acres, applied for by me on the 12th instant, on the ground that my application was informal, the conditions of marking and notice not being complied with, and that my application is held in suspense, &c.

In reply I beg to inform you that on the 8th or 9th instant the ground referred to was taken up for me by Mr. M'Connell, of Ophir, duly marked out, posts erected, and notices fixed thereon, and that there was not then any other ground marked off in this vicinity. On the 12th instant I lodged my application, with cheque for rent and survey-fee, with the Commissioner at Orange, and notice was duly posted at the Court House there. On the 20th instant I visited the ground, and shortly afterwards Mr. Connolly and others arrived there, and I was surprised to find that in the interim the same ground had been marked off by him. I told him that he was trespassing on my property, and his reply was that he had also applied for it.

I therefore claim to be entitled to this lease by priority of selection and application, and having duly complied with the Regulations.

I am, &c.,
H. L. NELSON,
p. M. DE L.

Mr. Farr,—Attach, with other papers, to Nelson's application.—W.J., 6 May, 1872.

[Enclosure E to No. 1.]

Mr. Local-Commissioner Lane to The Commissioner-in-Charge, Western Gold District.

Orange, 1 June, 1872.

Sir,

I have the honor to forward herewith the evidence taken before me in the matter of the dispute between Nelson and Connolly. You will perceive that the evidence is very conflicting, but I believe the probabilities are in favour of Connolly.

I have, &c.,
JOHN T. LANE,
Local Commissioner.

[Sub-Enclosure

[Sub-Enclosure to Enclosure E to No. 1.]

MINUTES of investigation touching objections to granting a lease at Back Creek, applied for by H. L. Nelson on the 12th April, 1872, before J. T. Lane, Esq., P.M., at Orange, Monday, 27th May, 1872 :—

John B. Connolly saith : On the 16th April last I proceeded, in company with James Garvey, one of my partners, to Back Creek, being the ground in dispute, situated between Ophir and Ironbarks ; I observed a piece of paper attached to a stick about the size of a broom-handle ; the stick was stuck in a stump about 5 or 6 feet from the ground ; I do not think the stick was more than an inch in diameter if squared ; I do not think it was 2 inches in diameter ; I read the paper ; it was a notice of intention on the part of Mr. Nelson to apply for a lease of 10 acres at Back Creek ; I took it for a mock notice (like many), and Mr. Nelson remarked he thought that it was his ; I laid claim to it ; Mr. Nelson then said his rent was paid on the 9th of April ; after some conversation he remarked, that if he got the ground I could go halves with him, or if I was the best entitled to it he should expect halves from me ; I told him I should have to think about the matter ; this conversation took place in the presence of Garvey, Johnson, and one of the M'Connell's.

Cross-examined : I arrived on the ground on Monday, 15th April ; I read the notice on the 16th ; I could read it distinctly, and saw your name signed to it ; I read the notice without unfastening from the stick ; the stick was about an inch in diameter ; the paper was tied round the stick ; when I came on the others that are put up with no intention of paying for the lease ; in consequence I did not take much notice of it ; there may be other pegs down but I did not notice any ; there was no cut trench, the ground was untouched ; I then pegged out the ground and put my notices on ; I went to Hill End and made application to Mr. Lees in due form ; I paid £14 13s., and received three certificates, one of which I posted on the Court House and one on each of my lease-line pegs ; I put them up two days after receiving the certificates from the Commissioner ; I have been in the possession of the ground since the 16th April ; I met Mr. Nelson on the ground on the 19th April ; Garvey was present, and also William Johnson, of Shepherd's Creek ; we spoke about the ground on the 19th ; I found you there ; you called me ; you may have told me I was trespassing on your ground ; I called upon you in Sydney after lodging the objection ; I went to see what you had to say about the ground ; I did not ask you if you would still give me an interest ; you made the remark that you had given me a good offer ; I have had mining disputes before.

To the Commissioner : Neither on the 16th nor on the 19th did I see any triplicates, Commissioner's notices, posted on the ground ; they could not have been there without my seeing them.

JOHN B. CONNOLLY.

Taken before me, at Orange, this 27th day of May, 1872,—

JOHN T. LANE, Commissioner.

Postponed until Friday, 31st May, 1872.

James Garvey saith : I remember the 16th April last going to Back Creek, in conjunction with John Connolly, and taking up 12 acres of ground ; after we had marked the ground I observed a peg in a stump ; it was about an inch and a half in diameter ; the stump was about 4 feet high ; there was a small piece of paper tied lengthways on the peg, and signed, "H. L. Nelson and party" ; I read the paper, which contained a notice of intention to apply for 10 acres at Back Creek, and dated the 8th April ; Connolly and I erected two posts, in accordance with the Regulations, and affixed to each post a notice of intention to apply for 12 acres ; on the 17th April Connolly and I made the application for the lease, and lodged it with Commissioner Lees, Tambaroora, and paid the sum of £14 10s. ; on the same day we received the triplicate certificates ; one we posted at Tambaroora, and on the 18th we affixed the other two on the pegs ; on the 18th and the two following days we observed that there were no Commissioner's certificates of Mr. Nelson having applied for the ground ; on the 19th April I was present on the ground, when a conversation took place between Mr. Nelson and Mr. Connolly ; Mr. Nelson said if he (Nelson) had a better right to the ground he would go halves with him (Connolly), and he supposed that Connolly would do the same ; Mr. Connolly replied that he would think about it ; I am quite sure there was only the one peg on the ground, or within the area marked by us.

Cross-examined by Mr. Nelson : I first arrived on the ground on the evening of the 15th ; before we proceeded to mark out the ground we searched for notices, and could only find the one I have described ; I am a partner with Connolly ; you were on the ground when I arrived on the 19th ; I heard no angry words between you and Connolly ; I heard you tell Mr. Connolly that he was trespassing on your ground.

JAMES GARVEY.

Taken before me, at Orange, this 31st day of May, 1872,—

JOHN T. LANE, Commissioner.

Mr. H. L. Nelson : On the 8th April last I instructed Edward M'Connell to proceed to Back Creek and mark off 10 acres of ground for me under the new Gold Fields Regulations ; I handed the notices written on half sheets of note-paper ; on the 12th I made application to the Commissioner, Orange, for a lease of 10 acres at Back Creek, and paid the sum of £12 ; I received two of the Commissioner's certificates, and the other was posted at the Registrar's Office, Orange ; the two I received I forwarded to M'Connell, of Ophir, requesting him to post them on the ground ; on the 19th I went to Back Creek in company with Samuel and Edward M'Connell ; Edward M'Connell pointed out the ground he had marked out for me ; I then observed two Commissioner's notices on the ground, signed by Mr. Commissioner Lees, and dated the 17th April ; shortly after I arrived, on the 19th, Connolly, Johnson, and Garvey came on to the ground ; Mr. Connolly told me that he had pegged out that ground ; I replied that I had made application for it on the 12th at Orange, and that he was trespassing ; I told Connolly that rather than have any law about it I would give him an interest in it ; I received a receipt from Mr. Johnson for the money, and also the triplicate certificates, having been forwarded to my address in Sydney.

Cross-examined by Mr. Maddock, Counsel for Connolly : I had a miner's right on the 8th April (miner's right produced) ; on the 19th April I received the two Commissioner's certificates, and at once forwarded them to M'Connell ; the other certificate was posted at the Court-house on the 12th ; my reason for offering Connolly an interest in the ground was simply to save any dispute, but when he threatened me with law I told him he should not have one inch of it ; this proposition to give Connolly an interest was after I accused him of being a trespasser.

H. L. NELSON.

Taken before me, at Orange, this 30th day of May, 1872,—

JOHN T. LANE, Commissioner.

Edward M'Connell : I am a miner, residing at Ophir ; on the 8th April last I received instructions to take up some ground for you, and on the 9th I proceeded to Back Creek and pegged off 10 acres ; my brother and I put in two pegs ; I believe they were 3 inches through ; I am not quite sure ; they might be more.

Cross-examined by Mr. Maddock : The ground I marked out for Mr. Nelson is the same marked out by Connolly ; the peg I put in was stuck in a stump about a foot or more from the ground ; I only saw one of Connolly's pegs, which was inside of the one I put in the stump ; I did not measure the size of the pegs, and could not swear they were 3 inches ; I do not remember when I received the notices from Mr. Nelson ; I handed them to my brother the following day.

By Mr. Nelson : At the time I pegged off the ground there were no notices on it ; I stuck the peg in the hollow of the stump.

EDWARD M'CONNELL.

Taken before me, at Orange, the 30th day of May, 1872,—

JOHN T. LANE, Commissioner.

William

William M'Connell : I reside at Ophir, and hold a miner's right ; about the 22nd of April I stuck two Commissioner's notices on two pegs at Back Creek ; the pegs upon which I put the notices had notices upon them of your intention to apply for the ground ; the pegs upon which your notices were, I think, might be about 3 or 4 inches in diameter ; the certificates were nailed on a board, and the boards nailed to the pegs by a 3-inch nail.

Cross-examined by Mr. Maddock : I do not know the distance between the two pegs, nor do I know the height of the stump.

WILLIAM M'CONNELL.

Taken before me, at Orange, the 30th day of May, 1872,—

JOHN T. LANE, Commissioner.

[Enclosure F to No. 1.]

H. L. Nelson, Esq., M.P., to The Commissioner-in-Charge, Western Gold District.

33, Lower Fort-street,
Sydney, 4 June, 1872.

Sir,

Referring to the objection lodged by Mr. Connolly against my application for lease at Back Creek, I have ascertained, since the hearing of the case before Mr. Commissioner Lane, at Orange, that the objection was not lodged until the 28th April, while my application was made on the 12th of that month ; and as the Regulations require that any such objection must be made within fourteen days, I would submit that he has no right in Court, and that the objection cannot therefore be sustained. I will feel obliged if you will give this matter your earliest attention, and note the objection I now make in connection with the other papers in the case.

I am, &c.,
H. L. NELSON.

No. 2.

MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Department of Lands,
Sydney, 16 July, 1872.

THE enclosed application (particularized in the annexed schedule) for a lease of auriferous tract in the Western Gold Fields, being in accordance with the Gold Fields Regulations, is recommended for the approval of His Excellency the Governor and the Executive Council.

JAMES S. FARNELL.

The Executive Council advise that a lease of the auriferous tract in the Western District, set forth in the annexed schedule, be granted as herein recommended.

ALEX. C. BUDGE,
Clerk of the Council.
Confirmed, 29 July, 1872.

B.C., 17 July, 1872.—W.W.S.
Approved.—H.R., 31/7/72.

Min. 72-47, 22 July, 1872.

...	Harris Levy Nelson	Back Creek, near Ophir	acres. 10	years. 15

No. 3.

MESSES. ELLIS & MAKINSON TO THE SECRETARY FOR LANDS.

89, Elizabeth-street,
Sydney, 24 July, 1872.

SIR,

We have the honor, on behalf of Mr. J. B. Connolly and party, respectfully to protest against a decision which we understand you are about to make against them in the matter of a dispute between them and Mr. H. L. Nelson as to a 12-acre gold lease at Back Creek, near Ophir. Our clients object, that whereas it is not disputed that they fulfilled the necessary conditions and paid their rent, and are in possession, it appears (and is not in fact disputed) that Mr. Nelson did not comply with the Regulations in the following particulars :—(1.) His notices did not contain the date of posting. (2.) He did not post his Commissioner's certificates as soon as practicable, nor till after Connolly and party had posted theirs. (3.) That his application was not lodged with the nearest Commissioner, viz., at Hill End. (See interpretation clause.) The weight of evidence is that Nelson's posts were not of the proper size.

We respectfully submit that a lease to Mr. Nelson would be void under section 7 of the Act, not being in accordance with the Regulations, and that a lease should not be granted until the matter has been, as it must be, settled by the Supreme Court,—the more especially as our clients are in possession, and have complied with the Act and Regulations, and have paid their rent.

We shall be much obliged if you will allow us a personal conference on the matter.

We have, &c.,
ELLIS & MAKINSON.

This

This case has been decided upon its merits by the Commissioner, and there are no circumstances in it that justify me in reopening it; and any defect (if there was any) prior to that decision was, I think, cured by it. As to the granting of a lease in accordance with the Regulations, that affects the case in its present stage. Granting of a lease in accordance with the Regulations, in my opinion, means as to terms, rent, labour conditions, &c., &c., and as to the efficient working of the ground. I therefore cannot see any reason why the lease should not be granted to Nelson.—JAMES S. FARNELL, 10 August, 1872.

No. 4.

MESSRS. ELLIS & MAKINSON to THE SECRETARY FOR LANDS.

89, Elizabeth-street,
Sydney, 15 August, 1872.

SIR,

No. 3.

With reference to our letter of 24th July last, respecting a lease at Back Creek, near Ophir, held by our client, Mr. J. B. Connolly, and claimed by Mr. Nelson, we have the honor to inform you that we have submitted the papers to a leading counsel (Mr. Darley). We enclose copy of his opinion, omitting those parts which, referring more to our remedies than to the rights of the parties, it is useless to trouble you with.

We beg again earnestly to renew our application that the lease may be withheld until the Supreme Court has decided who is entitled to it; and we hope that on reading Mr. Darley's opinion you will be convinced that this is the proper course.

We have, &c.,
ELLIS & MAKINSON.

Submitted, with previous paper containing the Minister's decision.—O.R., 19 Aug.

Having approved of the Commissioner's in this case, my authority is concluded, and consequently I have no power to withhold the lease. I think Mr. Connolly should apply or appeal to the Executive Council.—J.S.F., 3/9/72.

[Enclosure to No. 4.]

COPY OF OPINION.

THIS is one of those numerous cases now arising, which illustrate the want of legislation existing to regulate an important industry; a dispute of this sort ought not to be possible. In the first place, I am distinctly of opinion that the Minister for Lands, simply as such Minister, has no power or authority to decide anything in the matter. It is true that being the Minister charged with the administration of the gold fields, his voice in the Executive Council must have and indeed should have much weight; but this is a matter altogether for the Executive, including the Governor—(see the 7th section);—the lease therefore should be granted by the Executive to him who first fairly complied with the Regulations, and if the Minister cannot satisfy himself as to this so as to inform the Executive he should advise the Executive to stay their proceedings and let the matter be determined by a jury. I think it is to be regretted that there is not in the Gold Fields Act a similar provision to that contained in the 6th section of the Lands Occupation Act, which enables the Minister to refer disputes of this description to arbitration; this would in the majority of cases settle the matter easily. If Nelson should go upon the land, Connolly may bring an action of trespass against him, or, as matters stand at present, Nelson may bring an action of trespass against Connolly. I think that in this action the inchoate right of the parties may be determined, and I think that the evidence clearly establishes that Connolly is the person who has strictly complied with the Regulations while Nelson has not. I do not base my opinion upon the size of pegs and matters of that description, but upon the fact that no certificates were posted upon the ground on the 16th, when Connolly arrived, although they had been granted on the 12th of April, and also upon my impression gained from reading the evidence that were it not that Connolly went to the land Nelson might not even now have taken it up.

14th August, 1872.

FREDK. M. DARLEY,
151, King-street.

No. 5.

THE UNDER SECRETARY FOR LANDS to THE COMMISSIONER-IN-CHARGE, WESTERN GOLD DISTRICT.

Department of Lands,
Sydney, 16 August, 1872.

SIR,

No. 1.

In reference to your letter of the 12th June last, reporting upon the conflicting applications of Messrs. H. L. Nelson and J. B. Connolly, for a lease of an auriferous tract of 10 acres at Back Creek, near Ophir, I am directed to inform you that the Minister for Lands has approved of the decision arrived at by you in this case, viz., in favor of Mr. Nelson.

2. I am at the same time to state that a return of all the correspondence, &c., in this case having been called for by the Legislative Assembly, on the motion of Mr. Buchanan, M.L.A., the papers transmitted in your letter now under reference will be retained in this office, copies of them being required to be made for the return in question, and I am to request you to forward any other papers you may have in your possession relating to this matter for that purpose.

I am, &c.,
W. W. STEPHEN.

No. 6.

No. 6.

THE UNDER SECRETARY FOR LANDS TO MESSRS. ELLIS & MAKINSON.

Department of Lands,
Sydney, 26 September, 1872.

GENTLEMEN,

Referring to your letter of the 24th July last, protesting, on behalf of Messrs. J. B. Connolly^{No. 3.} and party, against the decision arrived at by the Government in the matter of a lease of auriferous tract at Back Creek, near Ophir, claimed by them and Mr. H. L. Nelson, I am directed to inform you that this case has been decided upon its merits by the Commissioner, and there are no circumstances in it, in the opinion of the Minister for Lands, that would justify him in re-opening it; any defect (if there was any) prior to that decision was, he thinks, cured by it.

2. In regard to the granting of a lease in accordance with the Regulations affecting the case in its present stage, the Minister for Lands is of opinion that the granting of a lease in accordance with the Regulations means as to terms, rent, labour conditions, &c., and as to the efficient working of the ground.

3. Mr. Secretary Farnell sees no reason why the lease in question should not issue in favor of Mr. Nelson.

I have, &c.,
W. W. STEPHEN.

No. 7.

PETITION OF JOHN B. CONNOLLY TO HIS EXCELLENCY THE GOVERNOR.

To His Excellency Sir HERCULES GEORGE ROBERT ROBINSON, Knight, Commander of the Most Distinguished Order of St. Michael and St. George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies, and Vice-Admiral of the same.

The humble Petition of John B. Connolly, of Hill End, gold-miner,—

RESPECTFULLY SHOWETH :—

1st. That in the month of April last your Petitioner, under section No. 7 of the Gold Fields Amendment Act of 1866, and the Regulations of the twenty-first day of March, one thousand eight hundred and seventy-two, number one hundred and twenty-eight, applied for a lease of, and took up, twelve acres of land at Back Creek, near Ophir, paid the rent therefore, and has ever since been in possession.

2nd. That subsequently, Mr. Harris Levi Nelson claimed to have applied for a lease of ten acres, part of the said twelve acres, previously to your Petitioner, and that thereupon, in accordance with number one hundred and twenty-nine of the said Regulations, an inquiry was held before Mr. Commissioner Lane.

3rd. That it appeared in evidence upon the said inquiry, and was not in fact seriously disputed by Mr. Nelson :—

I. That your Petitioner had fulfilled the requirements of the Act and Regulations, had paid his rent, and was in possession.

II. That Mr. Nelson had failed to comply with such requirements in that—(1.) His notices did not contain the date of posting. (2.) That he did not post his Commissioner's certificates as soon as practicable, nor till after your Petitioner had posted his. (3.) That Mr. Nelson's application was not made to the nearest Commissioner, that is, to Mr. Commissioner Lees, at Hill End.

4th. That Mr. Commissioner Lane reported to his immediate superior, Mr. Commissioner Johnson, of Bathurst, in favour of your Petitioner, but that Mr. Johnson on reading the papers thought fit to report to the Honorable the Minister for Lands in favour of Mr. Nelson.

5th. That the Honorable the Minister for Lands on reading the evidence (which has not been taken fully or on oath) could not see grounds for disturbing the decision of Mr. Commissioner Johnson without further inquiry, and being of opinion that he, the said Minister, has not of himself further authority in the matter, has informed your Petitioner that his proper course is to petition your Excellency and the Executive Council.

6th. Your Petitioner begs respectfully to refer your Excellency to the papers on record in this matter, more particularly the letters of your Petitioner's solicitors to the Honorable the Minister for Lands, bearing date the twenty-fourth day of July and the fifteenth day of August last, and the copy of opinion of Mr. Frederick Mathew Darley, barrister-at-law, enclosed in the last-mentioned letter.

7th. That your Petitioner, in accordance with such opinion, is about to take proceedings in the Supreme Court against the said Harris Levi Nelson, to determine the said dispute and obtain an authoritative decision of the legal questions now for the first time raised under the said Act and Regulations; and that it is possible that if a lease is at once issued to the said Harris Levi Nelson, the jurisdiction of the said Supreme Court may be ousted, and your Petitioner turned out of possession without having an opportunity of trying his right.

Your Petitioner therefore humbly prays,—

That your Excellency, with the advice of the Executive Council, will, in exercise of the discretion vested in your Excellency by the seventh section of the said Act, either grant a lease of the said twelve acres to your Petitioner, or refrain from granting a lease to the said Harris Levi Nelson until the proceedings now about to be taken in the Supreme Court have been terminated.

And your Petitioner will ever pray, &c., &c.

Dated this fourth day of October, in the year of our Lord one thousand eight hundred and seventy-two.

ELLIS & MAKINSON,
Solicitors for the Petitioner,
89, Elizabeth-street, Sydney.

Colonial Secretary.—H.R., 5 Oct., 1872.
 The Under Secretary for Lands, B.C., 8 Oct., 1872.
 For consideration of Cabinet.—J.S.F., 31 Oct.

The decision of the Cabinet does not appear to have been given in this case. Is there not a more recent paper in this matter?—O.R., 16 Nov.

No. 8.

THE PRINCIPAL UNDER SECRETARY to MESSRS. ELLIS & MAKINSON.

Colonial Secretary's Office,
 Sydney, 11 October, 1872.

GENTLEMEN,

No. 7. I am directed by the Colonial Secretary to acknowledge the receipt of a petition, addressed to His Excellency the Governor, from Mr. J. B. Connolly, forwarded by you on the 5th instant, respecting a lease of 12 acres of land at Back Creek, near Ophir, and to inform you that your communication has been brought under the notice of the Secretary for Lands.

I have, &c.,
 HENRY HALLORAN.

No. 9.

THE UNDER SECRETARY FOR LANDS to MESSRS. ELLIS & MAKINSON.

Department of Lands,
 Sydney, 14 October, 1872.

GENTLEMEN,

No. 4. In reference to your letter of the 15th August last, enclosing a copy of an opinion given by Mr. Darley, barrister-at-law, in the matter of the disputed claim of Messrs. J. B. Connolly and party and Mr. H. L. Nelson, to a lease of an auriferous tract at Back Creek, near Ophir,—I am directed to inform you, that the Minister for Lands having approved of the decision arrived at by the Commissioner in charge of the Western Gold District in this case, his authority is concluded, and he cannot therefore withhold the issue of the lease as requested.

2. If Mr. Connolly wishes to pursue the matter further he should now, in the Minister's opinion, apply or appeal to the Executive Council.

I have, &c.,
 W. W. STEPHEN.

No. 10.

MESSRS. ELLIS & MAKINSON to THE SECRETARY FOR LANDS.

89, Elizabeth-street,
 Sydney, 6 November, 1872.

SIR,

No. 7
 No. 8. Referring to the Petition of J. B. Connolly to His Excellency the Governor, forwarded on the 4th October last, and the letter from the Colonial Secretary's Office of 11th October last, stating that the same had been referred to you, we have the honor to beg for a speedy decision of His Excellency and the Executive Council in the matter, which is of considerable importance to our client.

The prayer of the petition is merely that a lease may not be issued until the case can be tried in the Supreme Court. We confidently hope that you will recommend the prayer, for you may remember that the decision of Mr. Commissioner Lane was in favour of our client, though Mr. Commissioner Johnson's (made on reading the evidence only) was against him, and that you declined to disturb Mr. Commissioner Johnson's decision on the ground that the evidence was so imperfectly taken as not to enable you to form an opinion one way or the other. The case is therefore evidently one for further inquiry.

We are, &c.,
 ELLIS & MAKINSON.

This case has, by direction of the Minister, been referred to the Cabinet.—O.R., 11 Nov.
 Yes; and will be considered as soon as possible.—J.S.F., 14 Nov., /72.
 Resubmitted (for the consideration of the Cabinet).—O.R., 18 Nov.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOLD FIELDS.

(REPORT OF COMMISSIONER, ON SOUTHERN, FOR 1872.)

Ordered by the Legislative Assembly to be printed, 11 February, 1873.

THE COMMISSIONER, SOUTHERN GOLD DISTRICT, to THE UNDER SECRETARY FOR LANDS.

Southern Gold Fields Office,
Young, 13 January, 1873.

SIR,

I have the honor to submit, for the information of the Honorable the Secretary for Lands, a Report on the Southern Gold Fields, for the year 1872.

The marked prosperity that has attended the gold-mining industry in this Colony during the past year has been fully participated in by the district under my charge; and it is gratifying to me to state that the general improvement that has taken place in the prospects of the Southern Gold Fields has not been characterized to the same degree by the artificial stimulus that has obtained in other parts of the Colony, which, like all undue popular excitement, is invariably followed by corresponding reaction and depression.

The almost universal interest that has been shown by all classes of the community in mining matters has led to the promotion of a very large number of Companies, formed in a number of instances for the purchase of claims and tracts of known value, and in many other cases for the purpose of developing the resources of ground hitherto untried. The former class of Companies, I have every reason to believe, proved to be of incalculable benefit to the mining interest, and has afforded safe and remunerative investment for shareholders; but I am afraid that speculations of the latter class have led to some serious abuses; for although it is necessary to allow a certain width of discretion to those who are charged with the formation of Companies, in the terms and means they adopt in order to bring their undertakings to a successful issue, still I am sure it will not be denied that in a number of instances of recent occurrence the public have been grossly deluded by the glowing prospectuses that have been issued by promoters, whose highly coloured and tempting descriptions of their properties have—to use a mild term—been formed on very insufficient data. I know of nothing that is so calculated to bring the mining industry into disrepute, or to cause mining ventures to be regarded with suspicion, as the abuses I have alluded to above; and it is to be regretted that, at a time when the public are prepared to give every countenance and substantial assistance to the development of that industry, their confidence should be shaken, and they should suffer loss, through the misrepresentations and the greed of designing promoters.

The apparently inexhaustible Araluen Gold Field has, during the past year, yielded the large return of 23,044 ozs., which gives it the first place, in a gold-producing point of view, in the Southern District. This yield is 5,502 ozs. in excess of that of the previous year, and the increase is attributable to the fact that the floods which frequently cause such loss and devastation, and present such impediments to mining operations, have not been of late so severe or prevalent as in former years. The resources of the Gold Field may well be said to be unfailing, and, with fair and ordinary seasons, it must continue to be one of the most productive Fields in the Colony. A new feature in mining industry at Araluen has sprung into existence, through the discovery of some quartz reefs; and 670 tons of stone from these workings have yielded 600 ozs. of gold. With mature development, this branch of mining promises to assume great importance in that district.

The Gold Fields in the vicinity of Braidwood have not undergone much change during the past year. The sluicing claims in the creek, and in the adjacent slopes at Major's Creek, continue to yield very fair returns, but show a falling off when compared with previous years. The quartz reefs do not appear to be of a very productive character, but I am informed that, with proper industry and perseverance, they are very likely to improve.

Mining matters at Gulph Creek show marked signs of improvement, and the workings of that neighbourhood are extending in every direction; so much so that I have found it necessary to recommend the proclamation of additional reserves for gold-mining purposes. Some very promising gold-bearing quartz reefs have quite recently been discovered; and the auriferous indications observable in the slopes of Mount Dromedary, and the watersheds of the Tuross River and its tributaries, present large and permanent fields for mining industry.

Along the eastern coast, on the Mogo Gold Field and towards Nelligen, some active prospecting is being carried on, and already some reefs of a promising character have been found; and it is only the absence of the machinery necessary for testing their real value that now retards their more mature development.

At Spring Creek, Nerrimunga, the mining population shows some increase of late, and much vigour is displayed in the operations that are being carried on there.

Considerable interest in mining has shown itself on the part of the inhabitants of Gundaroo Creek, where some reefs have been discovered, and some excitement has consequently ensued; little, however, is yet known of the importance of this discovery. I have reasons for believing that at no very distant period the country in that neighbourhood, and thence towards Brook's Creek near Bungendore, will be found to be gold-producing. The abandoned claims at Mac's Reef have once more attracted attention, and have been taken up for the purpose of giving them a further trial. It has always been a matter of astonishment to me that these reefs have been so long neglected, for they possess large quantities of stone, which is so far payable as to remunerate in a very handsome manner any Company that worked them on a proper system. I believe that the stone would yield an average of half an ounce to the ton, and the position of the reefs afford unusual facilities for the convenient erection of machinery. When it is known that the Port Phillip Company on the Clunes reefs in Victoria are now working on levels at a depth of 700 feet, for a return of 4 dwts. to the ton, and are paying dividends, it is indeed surprising that these reefs should have remained so long undeveloped.

In the month of August last a Gold Field was proclaimed at Manama, in the district of Yass, in consequence of some discoveries that were reported. My inspection of the workings on the quartz reefs there did not impress me very favourably with regard to them, and I attributed the excitement that prevailed to the anxiety of the local inhabitants, and to their apparent want of knowledge in mining matters. It is possible, however, that on further trial these reefs may prove productive. They will yield an abundance of stone; if it can be shown to possess the requisite gold-bearing qualities.

At Grenfell mining matters are in a highly satisfactory state, and all the principal claims there have been purchased by and transferred to Companies, which are very successfully formed, and which possess capital necessary to ensure the proper and systematic working and arrangement of the mines. The property of the Grenfell Consols Company, hitherto known as O'Brien's Reef, is of great known value, and the prospects of the mine are most encouraging; and it promises to be a very regular dividend-paying concern. Engel's Company, on the Homeward Bound Reef, and O'Brien's Company, on the Lucknow, also possess very valuable properties, and I think will prove safe and profitable investments to the shareholders. In alluvial mining around Grenfell nothing very notable has occurred; some claims at the Seven-mile have been fairly productive, and have maintained a limited industrious population. The deep ground on the Tyagong Creek flats has again come into notice, and it is anticipated that some rich leads, which there is every reason to believe exist there, may before long be struck and traced.

The amount of gold sent by Escort during the past twelve months shows a slight falling off from that of the previous year, but I know that this may safely be attributed to the supervision of operations in all the principal gold-producing claims, pending the completion of the arrangements that were necessary for their being transferred to and taken possession of by the Companies that had purchased them.

The recent unusually wet season has enabled the owners of sluicing claims at Burrangong to carry on their operations with much success. There are large areas of ground that will pay handsomely when worked in this manner, and, with a plentiful supply of water, will afford occupation to miners for some years to come. Some attention is now being given to the development of quartz reefs on this Gold Field, which, without doubt, will some day lead to important results. The alluvial deposits have been remarkably rich, and it follows that the reefs that yielded the gold are equally so; in course of time they will be traced, and some valuable resources will be then opened up. These remarks are, of course, also applicable to all our alluvial Gold Fields. A Company has been formed to work a very promising reef at Stony Creek, and the results of the various crushings of stone from it have been highly satisfactory. At Wombat also considerable activity is manifested in connection with reefs, and a crushing-mill has been kept nearly constantly at work operating on the stone yielded by them. In some instances, I am led to believe, the results have been satisfactory. I regret to have to state that the Phoenix (late the Telegraph) Company, at Opossum Flat, has within the last month been compelled to suspend their operations, owing to the exhaustion of their capital, and the want of funds necessary to enable them to carry on their labours. This is all the more to be regretted as the preparatory appliances so urgently required by the wet nature of the ground had approached completion; and, had the Company been able to hold out for a short time longer, the claim would have been in full working order, and would have soon produced some good returns. When I see so many thousands of pounds thrown after mere bubbles, I cannot but deplore that a promising enterprise like this should be allowed to languish for the want of a very small further outlay.

The Cumbamurra River Gold Field shows fair prospects of assuming some considerable mining importance, and a large amount of capital is being expended in connection with some of the works. The Marshall McMahan reef has been very productive, and Heffernan's claim alone, which is now the property of a Company, has produced gold to the value of £15,000; and during the five months that the Company have owned the property, they have paid three dividends of one shilling each on the shares. Some other Companies have been successfully launched in connection with this and the other adjoining reefs, and will soon be ready to commence active operations. A promising enterprise has also been projected by the Cumbamurrah Sluicing Company, to work some large tracts of surface ground on the slopes of the Cumbamurrah River. The preparatory works necessarily involve a large outlay of capital, in the cutting of races and the construction of flumes and dams. On the completion of these, the Company will be in a position to operate upon their ground, with, there is good reason to believe, satisfactory results.

The prospects of the Muttama and Gundagai Gold Fields are very good, and a great revival of interest in regard to the various reefs that are known to exist has taken place. At the former place some veins of unusually rich stone have been opened up, and the specimens shown me were among the richest I ever saw. A Company has been formed to work them, and I anticipate soon to hear a good account of the results of the first crushings. The neighbourhood of Gundagai abounds in quartz reefs, which I think are now in a fair way to be worked systematically and advantageously.

Of all the Gold fields in the Southern Gold District, that at Adelong has shown the most marked and substantial improvement during the past year. The mining excitement that has prevailed has turned attention

attention to workings that had long remained abandoned, and were regarded as worthless; and these have been taken up, and in most instances have proved to be of great importance and value. The whole length of the well-known Victoria, Donkey Hill, Currajong, and other reefs, are now re-occupied, and the works on them are in active operation. The prospects of the Victoria Reef are most encouraging and satisfactory, and large Companies have been formed in connection with some of the claims. Among them I may mention the Research Company's claim, which is now producing stone that is averaging twelve ounces to the ton, and that of Williams's Company, which, with 75,000 shares, lately declared a dividend of 4s. per share.

The bed and the banks of the Adelong Creek have for a great distance been taken up under lease, and mining plants and appliances of the most approved and costly descriptions have been and are being erected in connection with them. The property of the Wynyard Company has been very productive, and has been worked very energetically until quite recently, when an accident to their underground works necessitated a temporary suspension of their operations. The Adelong United Company possess a valuable property below the Wynyard Company, and are now prepared to commence work with the most perfect mining plant I ever saw. At Reedy Flat, Upper Adelong, the valuable sluicing areas continue to yield the most handsome returns, and show no signs of exhaustion.

At Lac-ma-lac, in the Tumut District, some fine gold-bearing reefs have been opened up, which hold out promise of being very valuable properties. They have not been worked to any extent as yet, but the Companies that are in course of formation for their development will doubtless soon give a good account of them. The miners at Tumberumba have shown that they have great confidence in the productiveness of that Gold Field, by the large number of tracts they have secured under lease in the creek and adjacent slopes and flat. Mining matters in that district had until recently been on the decline, but a most favourable reaction has now set in, and the impetus thus given will be productive of some important results. Although the reefs that were discovered at Ournie have not fulfilled, in every case, the anticipations that were held out with regard to them, still some have proved to be highly productive; and, as an instance, I may state that 77 tons of stone from the Peep-o'-Day reef, lately yielded 340 ozs. of gold. A further prospecting of the country in that neighbourhood would, I think, lead to some valuable discoveries.

Energetic endeavours are again being made to develop the reefs at the Black Range, near Albury, and the real nature and value of their resources are now in a fair way to be ascertained.

In concluding this special notice of my district, I have only to add that the Gold Fields generally are in a very encouraging and promising condition. In some localities prospecting is being carried on in a very vigorous manner, and it is only fair to presume that such efforts will be attended with discoveries of real importance. There still remains ample room for increased energy and perseverance in the matter of prospecting, for I find that in most cases such enterprise is chiefly confined to the immediate vicinity of some already-developed workings. There are areas of many thousands of square miles in extent in this Colony that have never been touched by the pick of the prospector, and yet, to all appearances, are as likely to contain hidden treasures as any of the most productive of the Gold Fields. I am not an advocate for the offering of rewards for the discovery of Gold Mines, for I think such a pursuit ought to be left entirely to private enterprise; and, moreover, I have observed that, in this Colony and in Victoria, the inducements held out by rewards of this nature have not been productive of any real benefit. I have no doubt that the increased attention that is being attracted to our Gold Fields will effect the cure, and that at no distant date prospecting will be pursued on a more extended scale, and in a more enterprising spirit.

The yield of gold for the year, which shows a slight decline from that of the previous one, does not at a first glance bear out my assertion as to the mining prosperity of the Southern District; but it must be borne in mind that during this period, in nearly all the principal producing claims a suspension of operations took place, in some cases for months together, in order to allow time for the completion of the arrangements and negotiations for the formation of Companies in connection with them; and it must also be noted that, in the majority of cases where large tracts of known value have been taken up, insufficient time has yet elapsed to allow for the progress of the works so far as to render them gold-producing.

The number of miners during the year has been 5,423. Of these, 3,351 have been engaged in alluvial mining, and 2,072 on quartz reefs. They have obtained 90,180 ozs. of gold; of which 58,736 were from the alluvial workings, and 31,444 from the quartz reefs. This yield gives an average of over 16½ ozs. per man employed, equal in money value to upwards of £66. The gold from the quartz reefs was produced by 34,139 tons of stone, which is an average of nearly 18½ dwts. to the ton.

It will be observed from the tabulated form attached to this Report, that the amount of capital now laid out in machinery is £59,412, and in other works connected with mining in this district, such as the construction of races, dams, and reservoirs, £56,275.

The number of races is 766, conveying 1,468 sluice heads of water, and of the aggregate length of 1,504 miles. The number of dams and reservoirs is 507. It will also be seen that Companies have been promoted, of which the aggregate capital amounts to £358,864.

My collections of revenue have amounted from all sources to the sum of £6,532 5s., being £3,350 15s. in excess of the previous year. Of this sum, £2,459 5s. was for miners' rights, and £220 10s. for business licenses, and £3,852 10s. for leases of auriferous tracts.

The leased tracts include 568 acres of alluvial ground, 2,073 acres on quartz reefs, and 25,500 yards of the beds of rivers and creeks.

It is much to be regretted that another year should have elapsed without some amendment of the Gold Fields Act, as regards the constitution of the Court of Appeal. The present Court is totally ineffective, and does not command the confidence of the mining community; but the many objections to it have been so often pointed out as not to require repetition here. The deciding of disputes by the unpaid Magistracy has proved the reverse of beneficial. It is not reasonable, and is unfair to these gentlemen, that they should be called upon to perform duties that require special experience and qualifications.

The complications likely to arise through the selection of lands ostensibly for minerals other than gold, but in reality and in fact for gold-mining purposes, demands some immediate and stringent check and prevention. It does not appear to me that any regulations hitherto promulgated with regard to mineral selections are calculated to cure such an abuse; and I think that the discovery of payable gold within any such selection should *ipso facto* effect its cancellation, unless it could be shown beyond all doubt, and to the satisfaction of some properly authorized officer, that the minerals other than gold for which it was selected had been actually found and traced within the area in payable quantities.

It is gratifying to me to state that the Gold-mining Regulations issued on the 21st March last have proved generally satisfactory and of easy adaptation; and I think I may say they have assisted in some degree in the improvement of the mining interest. Some doubts have at times arisen in my mind as to their entire consistency with the Gold Fields Act; but such points, I have no doubt were duly considered by the Crown Law Officers. I am aware that these Regulations did not meet with approbation in some places; but I think the objections to them have been urged by individuals who are to be found on most Gold Fields, and who seem to consider it their inspired mission and *spécialité* to legislate for their fellows; and any code of Regulations that does not emanate from them, or respecting which they are not consulted, is pretty sure to be denounced by them. I have only to say that in my district the present code has worked very satisfactorily, and all reasonable and intelligent miners have viewed them very favourably.

I have, &c.,

G. O'MALLEY CLARKE,
Commissioner-in-Charge, Southern District.

RETURNS of Revenue received for Miners' Rights, Business Licenses, and Leases of Auriferous Tracts, in the Southern Gold District, during the year 1872.

Southern Gold District Office,
Young, 13 January, 1873.

G. O'MALLEY CLARKE,
Commissioner.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOLD FIELDS.

(REPORT OF COMMISSIONER ON NORTHERN—FOR 1872.)

Ordered by the Legislative Assembly to be printed, 11 February, 1873.

THE COMMISSIONER IN CHARGE OF THE NORTHERN GOLD DISTRICT TO THE UNDER SECRETARY FOR LANDS.
Northern Gold Fields Office,
Armidale, 18 January, 1873.

SIR,

Adopting the usual official-course, I do myself the honor of herewith presenting my annual Report on the condition and prospects of the Northern Gold Fields, under my especial supervision.

2. It will be seen, from an examination of the accompanying statistics, that a most remarkable impetus has been given to the mining industry during the past twelve months in this individual district, and I have every reason to believe that the progress already made will be attended with permanent results.

3. Although only two or three new gold fields have been actually proclaimed in my district during the past year, the proclamation of several is under Ministerial consideration at present, and whilst several new ones have been discovered, a number of those previously partially worked and practically abandoned have been reopened with, I have every reason to believe, fair prospects of being remunerative. The absence of crushing machinery has, perhaps, militated more against the development of several new gold fields than anything else. The proprietors of the claims are men of little or no capital, and have been unable to induce parties to put machinery on the ground. Large quantities of stone have been raised at Glen Morrison and The Gulf, and at present await crushing, which exhibit remarkable richness; but to a great extent the workings have been abandoned, owing to the cause, above referred to. From conversations with these men, I am led to believe that if some simple co-operative scheme were in force with regard to the working of crushing-machines, based upon those adopted in several of our collieries, there would be no apathy on the part of the claimholders to take their share of the venture. Hitherto, the only means most of them have had of proving the payable character of the reefs have been by simple assay of small parcels of picked stone, a test imperfect in itself, and one not in favour with capitalists. From inspection of stone raised on many reefs at Glen Morrison, Little River, and Solferino, I can speak decidedly as to the richness of the reefs, but their development is at present retarded through the lack of machinery for crushing.

4. Although I am not called upon to offer any comment upon the measure for the future management of our gold fields, now before Parliament, I may observe that one remarkable defect in the late Regulations seems to me to have been, that too large areas have been allotted to the lessees of auriferous tracts, and the delay in the survey has practically tended to the shutting out of the operative miners, who, attracted by the report of the payable character of the field, have travelled from distant localities to find the ground taken up by parties whose object has mainly been to job the land on the market, and with little idea of practically working it. This evil, I think, might at least be mitigated by increasing the present rental, and curtailing the area upon the one hand; and if not abandoning the labor clause entirely (at present in many cases nearly a dead-letter), at all events modifying it considerably.

5. The nomadic character of our population on the gold fields has been repeatedly advanced as an argument against the stability of the gold-mining industry, and it has been felt that a certain amount of insecurity in commercial circles arose through the unsettled habits of the gold-mining population. If the facilities for obtaining homesteads were increased, I am of opinion that the population would become more settled, as the attractions of a home would tend materially to counteract this roving propensity.

6. The amount of judicial work falling to my lot as Commissioner during the past year, as applied to the settling of disputes, has not been in comparison with the gigantic strides the industry has taken; but I may be permitted to observe that a great deal of unnecessary work might be saved to the Commissioner by a simplification of the Regulations, dealing in point of fact with abstract principles than with elaborate details. Most of the disputes arise out of a misconception of the Regulations by but moderately educated men, and their ambiguity hence gives rise to much petty litigation.

7. It will be remembered that the early part of the last year witnessed some excitement amongst the tin-miners, and numbers of public companies were being floated in this and the neighbouring districts. Although many of them have been either wound up, suspended operations, or are now being worked under the tribute system, I see nothing to lead me to anticipate any falling off either in the yield of ore or the working of the tin fields generally. Unquestionably a great many bubble companies were floated, working expenses grossly under-estimated, and a great amount of extravagance exhibited in the preliminary operations. These evils have, to a great extent, cured themselves, and under a more systematic and economical mode of working I have every reason to believe that the tin mines of this district will prove highly productive for many years.

8. To give a general idea of the remarkable progress made in the Mining Department of this district, I may observe that in 1871 the gross collections in this office were £739 5s., whereas in 1872 they reached £8,915 10s., or over 1,200 per cent. increase, whilst the applications for leases have increased from 17 in 1871 to 837 in 1872. From the number of applications received daily, I anticipate no-falling off in the present year.

9. I have been induced to extend this report beyond the usually prescribed limits, and perhaps to advance opinions uncalled for, and probably of little value. I trust, however, that in view of the fact that the Government have now before Parliament a measure having for its object the reorganization of the Gold Fields Regulations, some justification will be accepted from this seeming departure from official routine.

I have, &c.,
J. BUCHANAN,
Commissioner in charge of Northern Gold District.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

GOLD FIELDS.

(REPORT OF COMMISSIONER ON WESTERN, FOR 1872.)

Ordered by the Legislative Assembly to be printed, 11 February, 1873.

THE COMMISSIONER IN CHARGE OF THE WESTERN GOLD FIELDS TO THE UNDER SECRETARY FOR LANDS.
Western Gold Fields Office,
Bathurst, 20 January, 1873.

SIR,

I do myself the honor, for the information of the Honorable the Minister for Lands, to submit my annual report upon the condition and prospects of the Western Gold Fields.

2. The past year has been distinguished by an unprecedented vigour in mining pursuits, and a corresponding advancement in the development of the Western Gold Fields, which cannot fail to produce a lasting and beneficial effect, and establish gold mining in all its branches as one of the most important of the settled industries of the Colony.

3. A comparison between the revenue received in 1871 and during the past year will show the extraordinary increase in the occupation of auriferous Crown Lands, the greater part of which are being worked by capital provided by the portion of the community who are non-residents upon the Gold Fields, and who have hitherto stood aloof from all investments in gold mining, the development of which interest, until within the last three years, had been left to the almost unaided efforts of the working miners, who were principally employed upon the alluvial gold fields. Now, however, the quartz-reefs, which require a large expenditure in labour and machinery for their efficient working, are, by the aid of capital, being mined to a depth hitherto deemed inaccessible, or beyond the influence of the auriferous lodes, and in many instances with a success as gratifying to the investors as it is indicative of the permanence and wealth of our gold fields.

4. I annex returns showing the number of miners' rights and business licenses and leases applied for in 1872, the estimated population, the machinery employed in connexion with mining operations, and the yield of gold from each gold field of importance in this district. These returns show an advance under every head over those for 1871, and the gross collections give an increase of no less than £31,317, being £42,196 in 1872, and only £10,879 in 1871. This arises principally from the additional applications for leases of auriferous tracts,—22,054 acres having been taken up in 1872, and only 1,556 acres during the previous year. The yield of gold as by the escort return has also increased to the extent of 89,176 ozs. 15 dwts. 9 grs., being 287,667 ozs. 5 dwts. 23 grs. for 1872, as against 198,490 ozs. 10 dwts. 14 grs. in 1871.

5. The gold fields at Gulgong and Hill End are still the chief centres of attraction, the former as an alluvial field, but now also developing auriferous reefs, and the latter as a purely quartz-mining district,—the alluvial there having long since been exhausted. In the yield of gold, Gulgong surpasses all others; the deep leads there are still proving prolific, and quartz-reefs, evidently the matrix of the rich alluvial deposits in the Cudgegong basin, are being opened out in all directions. New alluvial leads are also being discovered in the neighbourhood, and the prospects of this, which may be considered as the most important gold field in the Colony, are in every way encouraging. Here also capital is stepping in to work in large areas, and with the aid of machinery the auriferous drift beneath the basaltic formation, which, with the presence of water, impeded the operations of the working miner. I cannot conclude these remarks upon the Gulgong Gold Field, without expressing my opinion that its development has been seriously retarded by the operation of the frontage system. Having for a time administered that code at Gulgong, and watched for three years the result of the system, I have arrived at the conviction, that however plausible the theory upon which it is based may appear in actual working, it is a system which, on the whole, is injurious to the miner, the uncertainty, delay, and interminable litigation attending its operation, more than counterbalancing the supposed economy of labor or other advantages. I am satisfied that a system of extended areas for deep and difficult ground would be found far more advantageous than, and put an end to the present uncertain tenure of claims held under the frontage regulations. In expressing these views, I feel that I am only echoing the sentiments of the larger portion of the mining community at Gulgong and elsewhere. The only other alluvial field of any importance is Currajong, in the Lachlan District, which contains deep leads, but inferior to those at Gulgong in permanence and production, although

although for a time highly remunerative and supporting a considerable population. There is also every probability of the discovery of additional alluvial leads in the neighbourhood of Currajong. Quartz-reefing there, however, on an extensive scale, is now taking the place of the alluvial workings, and establishing this gold field on a permanent basis.

6. Of the quartz-mining districts, Hill End and Tambaroora still embrace the largest share of public attention, from the astounding yields from the line of claims on Hawkins's Hill, which retained during the past year their character for permanence and wealth. Although the bulk of the gold produced has been obtained from the comparatively few claims on the known line of Hawkins's Hill veins, the steady work which has been progressing on the belt of reefs, extending from Chamber's Creek to Hargraves, is beginning to tell, and will shortly augment the escort returns from these fields, as yet eclipsed by those from the alluvial leads at Gulgong. Not only at various points have reefs containing gold in remunerative quantities been discovered, but powerful machinery for quartz-crushing, replete with the latest appliances for amalgamation and extraction of gold from the surrounding metals, has been erected, and will soon be in full work, adding largely to the returns from these districts.

7. At Sofala, Wattle Flat, Trunkey Creek, and Tuena, quartz-reefing, which for a time had languished, has been resumed with vigour, and with every prospect of success when a sufficient depth shall have been attained. Indeed the fact has now everywhere been proved to demonstration that the permanent and most valuable deposits, both in alluvial and quartz mining, lie at a depth, the extent of which has not been determined on any gold field in this Colony—the richest yields, especially in quartz-reefs, having been found at the extreme depths yet reached. I do not doubt but that returns equal to those from Hill End will, in the course of time, reward the labors of the miners at the places I have mentioned. An attempt to describe in detail the various gold fields and localities where mining operations are being carried on in the Western District would elaborate this report unnecessarily, and I have no departmental means of ascertaining with accuracy the progress of the workings which is daily supplied to the public journals by competent reporters. The statistical returns, however, which I have annexed, show the main facts in connection with each gold-field of any importance.

8. I do not anticipate that the same number of leases or any approach to it, applied for during the last, will be taken up during the ensuing year, as many of them will never be worked or occupied; but I have estimated that the second payment on those received and the new applications will bring up the revenue for 1873 to the standard of 1872. That many of the numerous companies for working quartz-reefs, hastily formed, with insufficient capital, must collapse, is self-evident; but even if one-tenth of the mining ventures projected are successful, a career of prosperity in gold-mining will be entered upon that has as yet been unknown in New South Wales.

In conclusion, I trust that as the anticipations entertained in my report of 1871 of the prosperity of the past year have been fully realized, the present temporary evil in mining affairs may only be the precursor of renewed vigour in that direction, by the investment of capital with more caution, and the establishment of companies on a sounder basis for developing the mineral wealth of the country. Many of the works being carried on are in their nature for a lengthened period of an unproductive character, but solid results will ere long be obtained from mines at present of little apparent value. This is especially noticeable in the vicinity of Hill End, where the sinking is through strata of the most unyielding character, and the progress necessarily slow. Such ground can only as a rule be profitably worked in large areas, and with ample capital at command. To attempt to work it in ordinary claims without capital is now found to be quite impracticable, and, with the exception of comparatively shallow alluvial deposits, the same may be said of all classes of gold-mining at the present date. The era of gold digging is rapidly giving way to that of gold-mining, and our gold fields were never in a more hopeful condition as regards their future development than at present, although the feverish excitement concerning them has somewhat abated in consequence of the results, disastrous in many instances, of rash and unguarded speculation in mining ventures, which from the first contained no element of success.

I have, &c.,

WHITTINGDALE JOHNSON,
Commissioner in charge of the Western Gold Fields.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOLD FIELDS.

(DISPUTED MINING CASE—DEWSON *v.* MALONEY.)

Ordered by the Legislative Assembly to be printed, 17 March, 1873.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 4 February, 1873, praying that His Excellency the Governor would be pleased to cause to be laid upon the Table of this House,—

“Copies of all Correspondence, Minutes, &c., between the Secretary for Lands and others (including depositions taken before Walcha Bench),
“having reference to the disputed mining case of W. Dewson *v.* T. Maloney
“and others, at the Glen Morrison Reef, near Walcha.”

(*Mr. Rodd.*)

SCHEDULE.

NO.	PAGE.
1. J. Rodd, Esq., M.P., to Minister for Lands, enclosing particulars of the mining dispute upon the Glen Morrison Reef, near Walcha, between Dewson and party and Maloney and party, together with letter from Mr. H. Roman, dated 15th June, 1872, with enclosures A to F, with minute thereon. 21 June, 1872.....	3
2. Mr. H. Roman to J. Rodd, Esq., M.P., on the same subject. 22 June, 1872.....	6
3. Same to Minister for Lands, on the same subject. 8 August, 1872.....	7
4. Telegram from Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, directing the area to which T. Maloney and others are entitled at Glen Morrison Reef, to be at once measured off. 13 August, 1872...	7
5. Telegram from Mr. E. Marriott, Gold Commissioner's Clerk, to the Under Secretary for Lands, in reply to the above. 14 August, 1872.....	7
6. Telegram from Mr. District Gold Commissioner Buchanan to Under Secretary for Lands, relative to the decision given by the Bench of Magistrates in this case, with minute thereon. 19 August, 1872.....	7
7. The Under Secretary for Lands to J. Rodd, Esq., M.P., in reply to No. 1. 26 August, 1872.....	7
8. Same to Mr. Henry Roman, in reply to No. 3. 27 August, 1872.....	8
9. Telegram from Mr. H. Roman to J. Rodd, Esq., M.P., same subject, with minute thereon. 28 August, 1872.....	8
10. Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, in reply to No. 6. 29 August, 1872.....	8
11. Telegram from the Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, directing him to lay base line and measure off claims as previously instructed. 29 August, 1872.....	8
12. Telegram from Under Secretary for Lands to Mr. H. Roman, informing him to the same effect. 29 August, 1872.....	8
13. Telegram from Mr. District Gold Commissioner Buchanan to Under Secretary for Lands, intimating that he is urgently required at Oakwood to lay down base lines of reefs. 30 August, 1872.....	8
14. Telegram from Mr. District Gold Commissioner Buchanan to the Under Secretary for Lands, in reply to No. 11. 30 August, 1872.....	9
15. Telegram from the Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, in reply to No. 13. 31 August, 1872.....	9
16. Telegram from Mr. H. Roman to J. Rodd, Esq., M.P., complaining of Mr. District Gold Commissioner Buchanan in reference to laying down base lines. 31 August, 1872.....	9
17. Telegram from Mr. A. R. Fremlin to J. Rodd, Esq., M.P., to the same effect. 31 August, 1872.....	9
18. Telegram from Mr. W. G. Brereton to the Minister for Lands, requesting that Mr. District Gold Commissioner Buchanan be allowed to proceed to Gulf to lay down base line, with minute thereon. 31 August, 1872.....	9
19. Telegram from Mr. District Gold Commissioner Buchanan to the Under Secretary for Lands, respecting the laying down of base lines at Glen Morrison Reef, and being prevented proceeding to Oakwood. 31 August, 1872.....	9
20. Minute of the Under Secretary for Lands. 31 August, 1872.....	9
21. Telegram from the Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, in accordance with above minute. 31 August, 1872.....	10
22. Mr. District Gold Commissioner Buchanan to the Under Secretary for Lands, in reference to Nos. 10, 11, 15, and 21, with minute thereon. 31 August, 1872.....	10
23. Telegram from the Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, directing him to proceed to Oakwood to settle dispute in the case of Brereton and others. 3 September, 1872.....	10
24. Telegram from the Under Secretary for Lands to Mr. W. G. Brereton, informed to the same effect. 3 September, 1872.....	10
25. Mr. Henry Roman to the Minister for Lands, further respecting the matter of Dewson and others v. Maloney and others, quartz-mining dispute at Glen Morrison, with enclosure, with minutes thereon. 4 September, 1872.....	11
26. Mr. A. R. Fremlin to the Minister for Lands, further respecting the measurement of certain auriferous ground at the Glen Morrison Reef, near Walcha, in dispute between Messrs. Dewson and party and Messrs. Maloney and party, with enclosures A and B, with minute thereon. 1 October, 1872.....	11
27. J. Rodd, Esq., M.P., to the Minister for Lands, forwarding copies of original documents relating to the laying down of the base line on Golden-bar Reef, Glen Morrison; enclosures A and B. 8 October, 1872.....	12
28. The Under Secretary for Lands to Mr. A. R. Fremlin, in reply to No. 26. 22 November, 1872.....	13
29. Same to J. Rodd, Esq., M.P., in reply to No. 27. 22 November, 1872.....	13
30. J. Rodd, Esq., M.P., to the Minister for Lands, acknowledging receipt of No. 29. 22 November, 1872.....	13
31. The Under Secretary for Lands to J. Rodd, Esq., M.P., in reply to No. 30. 30 November, 1872.....	13
32. Telegram from the Under Secretary for Lands to Mr. District Gold Commissioner Buchanan, asking for return of papers in the disputed gold-mining case, Dewson v. Maloney. 19 December, 1872.....	14
33. Telegram from Mr. E. Marriott, Gold Commissioner's Clerk, to O. Rich, Esq., Lands Department, in reply to above. 19 December, 1872.....	14

GOLD FIELDS.

No. 1.

J. RODD, ESQ., M.L.A., TO THE SECRETARY FOR LANDS.

307, George-street,
Sydney, 21 June, 1872.

SIR,

I have the honor herewith to hand you particulars of a quartz-mining dispute upon the Glen Morrison Reef, recently heard before the Walcha Bench, presided over by Mr. Commissioner Buchanan. Mr. Henry Roman's letter, dated June 15th, 1872, which I have the honor also to enclose, with copies of summonses, depositions, &c., fully describes the nature of the case.

Trusting that you will cause an early inquiry to be made,

I have, &c.,
JAMES RODD.

Submitted.

This case has been decided by the Bench of Magistrates twice, and under the 15th section of the Gold Fields Act their decision is binding.—J.S.F., 23/7/72.

[Enclosure to No. 1.]

Presented by Mr. Rodd, M.P., 21/6/72.

To James Rodd, Esq., J.P., M.L.A.

Uralla, Rocky River, 15 June, 1872.

Dear Sir,

At the request of my co-partners in the quartz-mining dispute upon the Glen Morrison Reef, recently heard before the Walcha Bench, presided over by Mr. Gold Commissioner Buchanan, I beg to lay before you a statement of facts connected with the same, together with certified copies of the evidence taken therein, and of all extracts from Mining Registrar's books having reference thereto, and at the same time respectfully to request you to be kind enough to give the same your earnest attention, and to place the matter in its proper form before the Hon. the Minister for Lands, in order that a thorough revision and inquiry may be made and justice done therein. In addressing you, one who is deeply interested in mining property, it is unnecessary for me to dilate upon the importance and value of quartz-claims, and the probable serious injury that may be inflicted upon a party, by the misinterpretation or malversation of the laws and regulations having reference thereto; therefore I will simply make a statement of the facts of the case, and those fully borne out by the accompanying documents will, I feel assured, enlist your powerful aid in securing us justice.

On the 22nd March last some of our party and its representatives went upon the reef, and paced off the ground held by Maloney and party, they refusing to allow the ground to be taped by us; the extent of this was found to be over 200 paces, equal to yards.

The evidence taken at the hearings gives precisely what took place at this time. Our party thereupon rode a distance of 60 miles, waited upon Mr. Gold Commissioner Buchanan in Armidale, and requested to be put in possession of the ground held by Maloney's party, in excess northward of their workings.

Mr. Gold Commissioner Buchanan being at that time on the eve of departure for the Solferino Reefs, and expecting to be absent for three weeks, directed us to apply to the Walcha Bench, and stated that upon his return he would, if the matter was not before settled, then adjudicate in it.

A complaint was laid and summons accordingly issued, and after its issue Maloney for the first time registered a claim; this registration is dated 28th March, for 6 men, extent of ground 440 feet. (Vide certified copy herewith.) The registration took place ten days after the reporting of payable gold, and the request for a prospecting claim for four men although but three men were registered in the protection area. (Vide certified copy.) Subsequently at the hearing two of these six men were admitted by defendants to be in New Zealand, and also an admission made that neither of them nor their representatives held miners' rights, though this latter admission is omitted to be taken down in the depositions.

Upon the 18th of April the case was called on for hearing before the Walcha Bench, presided over by Mr. Gold Commissioner Buchanan (certified copies of the depositions appended.) After hearing evidence the Court was cleared for a consultation by the Justices, and upon its reopening the case was dismissed on the following grounds:—That we having complained that defendants held their claim and ground in excess under Regulations prior to the 21st March, whilst by the first regulation of the code of that date all former Regulations were repealed, and our claim to the ground being made on the 22nd March, the information was consequently informal. The concluding proviso of such first regulation to this effect "that any existing interest or privilege shall not be affected by these Regulations" was however completely ignored by them. Reference to the certified extract from mining registry will show by the Registrar's memo. or remark that any claim Maloney had was under the old Regulations. I will refer to clauses in the Regulations prior to the 21st March, bearing upon this dispute, in hope it may save you time and trouble in looking them up.

The complaint was laid under 14 sec. Gold Fields Act, 1866, 24 September, 1869, General Regulation No. 8. Spare ground and ground held in excess.

34, 35, 36. Protection areas.

37. Prospecting claim.

41. Protection area, quartz-reef.

42. (Referring to No. 40.) Prospecting claim—quartz-reef.

46 & 47. Base line and registration.

No. 6. Extent of quartz-claim, &c.

17 Feb., 1870.

The prospectors under these for four men's claims, which on the 18th March they were directed by Mr. Gold Commissioner Buchanan upon their report to take, would be entitled to an extent of 240 feet over 600 feet they in fact held; and even by their own sworn admission they held 400 feet, 440 feet or 480 feet; the copies of registration are corroborative of this.

Upon the dismissal of this case, upon an assumed informality, application was immediately made for fresh summons, which was granted by the Bench upon an information *de novo*. Six days after the issue of second summons, Maloney's party registered (vide certified copy, 24th April) whilst the matter is in dispute, and again for six men under Regulations 21st March.

The second summons was made returnable on the 2nd May, and all parties then attended the Court at Walcha, when in consequence of Mr. Gold Commissioner Buchanan's absence the hearing of the case was adjourned for one month.

On the 30th May the case was again heard by the Bench, presided over by Mr. Gold Commissioner Buchanan, and after hearing the evidence (certified copy appended) the Bench again dismissed the case without comment; the concluding words of Hillier's, (one of defendants) evidence being that they held 480 feet.

By the existing Regulations a quartz prospecting claim is 100 yards or 300 feet, so that by their own sworn evidence defendants held ground in excess. Were they entitled under the new or old Regulations?

As in the former case, I will point out Regulations in existing code, bearing upon such a case.
 21st March, 1872—No. 1. Repeals former Regulations.
 General Regulations 177. Mode of taking possession.
 180. No objection to mode, &c.
 181. Ground held in excess.

Quartz-claims 64. Prospecting area and claim.
 65. Registration of discovery, &c.

I have deemed it necessary to refer to No. 65 in this code, in order that I may fully explain that No. 1 and other claims north, and No. 1 and other claims south, were held and registered under the old Regulations, and consequently they could not have a shadow of right to remove their pegs. At the time of our party making claim to the ground held in excess, No. 1 south shaft was down 30 feet, and No. 1 north from 15 to 20 feet, and neither one nor the other had disputed Maloney's extent of ground.

At the present time we are informed that No. 1 north have now taken out their claims, originally registered and held for six men at 30 feet per man, 180 feet at 50 feet per man or 30 feet, the 120 feet thus appropriated by them making, with the 480 feet held by the prospectors, the 200 yards, as deposed to by our party.

In this matter we have been involved in litigation of nearly three months—have been compelled to travel over 400 miles—have been compelled to expend some considerable amount of money—and have lost much valuable time only, as we believe, to be unfairly dealt with.

I will not trouble you with further details, feeling assured that you will at once see the merits of the case; and in your hands we leave our cause with the assurance that you will do what is right for us.

I have, &c.,

For self and party,
 HENRY ROMAN.

P.S.—Our party never raised any objection to Maloney's party being entitled as prospectors, although this reef, now called the "Golden-bar," was more than two years since opened as the "Sons of Temperance Reef," claims registered and shafts sunk upon it, gold obtained, considered by many to be payable. One shaft was at that time sunk near 50 feet, and this is included in the ground held by Maloney. Fossicking in these old shafts has been the principal prospecting done by Maloney; setting apart this, their protection area registry had expired three weeks before they applied to Commissioner Buchanan for a prospecting claim.

N.B.—Mr. Roman has forgotten to state that we, the plaintiffs, never took a step without consulting Commissioner Buchanan, and that at last he went out on the reef and laid the base line down without giving us, the disputants, any notice, and then the next day sat on the Bench and dismissed the case. Also, that the country has been put to a great expense and bother in framing Gold laws, but this shows that the Commissioner sets himself as supreme interpreter. In this case we might justly say "Is there not a cause?"

A. R. TREMLIN.

INFORMATION (GENERAL PURPOSES).

New South Wales, }
 Walcha, to wit. }

Dewson and others v. Maloney and others.

BE it remembered, that on this twenty-eighth day of March, in the year of our Lord one thousand eight hundred and seventy-two, at Walcha, in the Colony of New South Wales, William Dewson, of Uralla, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the peace of our Lady the Queen in and for the Colony of New South Wales, and complains to me that on or about the twenty-second day of March, in the year of our Lord one thousand eight hundred and seventy-two, that at Glen Morrison, in the Colony aforesaid, Thomas Maloney, Mark Newman, William Richard Hillier, and Andrew Gallagher did trespass upon a mining claim belonging to the said William Dewson, Henry Roman, George Smith, John T. Hare, James Taylor, and Alfred Reginald Fremlin, by preventing the said parties from occupying and working a certain portion of a quartz-claim at Glen Morrison aforesaid, such claim being ground held in excess by the said Thomas Maloney, Paul Stanley, William Richard Hillier, and Andrew Gallagher, under Gold Fields Act and Regulations thereunder, dated 24 September, 1869, No. 42, and 17th February, 1870, No. 6, contrary to the Act in such case made and provided, whereupon the said William Dewson and party prays that I, the said Justice, will proceed in the premises according to law.

WILLIAM DEWSON.

Taken at Walcha, in the said Colony, on the day first above written, before me,—

DAVID BELL,
 Justice of the Peace.

[Sub-Enclosure C to Enclosure to No. 1.]

Police Office, Walcha,
 18 April, 1872.

PRESENT:—James Buchanan, P.M.; Abraham Nivison, J.P.; John Fletcher, J.P.; David Bell, J.P.; C. D. Fenwick, J.P.; and G. R. Gill, J.P.,—Esquires.

William Dewson and others v. Thomas Miner Maloney and others, for holding ground under the Gold Fields Act in excess.

William Dewson, being duly sworn, states: I am a gold-miner, residing at Uralla; I produce my miner's right; I heard the information read over; it is true Maloney is a shareholder, and is one referred to in the information on the 22nd March; I went on the quartz-reef at Glen Morrison; I asked one of the shareholders to show me his pegs; he showed me one peg, marking the southern boundary; he refused to show me the others; I told him that I had stepped from the peg marking the southern boundary to a similar peg standing within a short distance of a shaft known as No. 1 north, and found ground contained upwards of 200 paces; I told him he held far more ground as prospectors than the Regulations provided for, and that I claimed for myself and party the ground held in excess by them northwards of their workings; he said if any one pegs out this ground I will put a peg in them; I told him there was no necessity for any pegging of that kind, and again claimed the ground held by them in excess northwards of their working, and that I intended to register the same, pending the Commissioner's decision; I came to Walcha the same day, and registered the ground provisionally with a mining registrar.

Examined by Maloney: I did not speak to you; I spoke to Hillier that day; Hillier would not allow me to tape the ground.

W. DEWSON.

Sworn before us, this 18th April, 1872,—

J. BUCHANAN, P.M.

Henry

Henry Witherden, being duly sworn, states: I remember being on the quartz-reef on Thursday, the 22nd March last; I went on to a claim there, supposed to be the prospectors; I heard Dewson ask the men on the prospecting claim to show him the pegs, and they did not do so; he asked them again if they would allow him to put a peg in the ground, they said, "No; the man that would put a peg in the ground I would put a peg in him"; Dewson told him he would take other proceedings; I made the ground 215 paces; the conversation was mostly by the tallest man; it was the evening before I stepped the ground, and again in the morning.

HENRY WITHERDEN.

Sworn before us, this 18th April, 1872,—

J. BUCHANAN, P.M.

This closes complainant's case.

For the Defence.

Thomas Miner Maloney, being duly sworn, states: I am a gold-miner, and one of the defendants in this case; I produce my miner's right; on the 22nd of March last I recollect Dewson and others coming on the ground; they did not ask me about any pegs; I heard nothing.

By the Bench: There are six of us in partnership, Thomas M. Maloney, A. Gallagher, M. Newman, J. Corbet, and Michael Rooney are in New Zealand, and W. R. Elliott; we have been mates twelve months—Maloney, Elliott, Gallagher, and Mark Newman; 440 feet marked out on the supposed line of reef is the ground we claim; I registered the prospecting area with Mr. Buckland; I did not bring the registration paper with me; it is at my hut; I registered since the commencement of this case in the Mining Registrar's book; the registration is dated 28th March, 1872. ABRAHAM NIVISON, J.P.

Court House, Walcha,
30 May, 1872.

PRESENT:—J. Buchanan, P.M.; David Bell, J.P.; G. R. Gill, J.P.; C. D. Fenwick, J.P.; and A. Nivison, J.P.

William Dewson and others v. Thomas Maloney and others, for holding ground in excess at Glen Morrison, under the Gold Fields Act and Regulations. Postponed from May 2nd to this day.

Defendant pleads "Not guilty."

William Dewson, being duly sworn, states:—I am claimant in this case; I appear on behalf of the party; defendant is one of the parties complained of; on the 22nd March last I went to the Glen Morrison quartz-reef, and asked one of the prospectors to show me his pegs; he showed me one, marking the southern boundary of his claim; he refused to show the others; I told him that I had stepped over the ground from the peg marking the southern boundary to a similar peg fixed within a few yards of No. 1 north; I found it to contain upwards of 200 paces; I told the prospectors they have far more ground as prospectors than the Regulations provided for, and that I claim the ground held in excess by them for myself and party of six; I spoke to Hillier; he said if anyone pegged the ground he claimed he would put a peg in them; I said there was no necessity for any pegging of that kind, and again claimed the ground in excess, northward of their working; I came into Walcha on the same day, and applied for a registry provisionally, pending the Commissioner's decision.

By the Bench: There was a case affecting this matter some time since; the information was laid informally, and it was dismissed; I never had any possession of the land before this time; it is about 40 miles to the nearest gold-field.

WM. DEWSON.

Sworn before us, this 30th May, 1872,—

J. BUCHANAN, P.M.

For

For the Defence.

Thomas Miner Maloney, being sworn, states:—I am one of the defendants in this case; I recollect the 22nd March last; I recollect seeing the complainant on the ground; he said nothing to me; I have prospected about nine months on the ground; after I worked there a couple of months I saw encouragement; I came in, and took out a prospecting area; four of us worked in the prospecting claim; there are five of us at present; I hold 400 feet; I and party all hold miners' rights; I have registered the claim; I have worked on it about nine months; I am pegged up by No. 1 north and No. 1 south.

By William Dewson: The Mining Registrar measured my area, supposed to be 200 yards; I pegged the ground out after it was measured; the measurement took place long before I reported payable gold on the 18th or 19th March last.

No. 2.

MR. H. ROMAN to J. RODD, Esq., M.L.A.

Uralla, 22 June, 1872.

Dewson and others v. Maloney and others.

DEAR SIR,

I beg to acknowledge receipt of your favour of 18th instant, and to thank you for your prompt action herein.

By reference to my former communication upon this subject, I believe you will find stated therein the reason assigned by the Police Magistrate and Gold Commissioner for the dismissal of the case in the first instance. It was, that the information was bad, consequent upon our stating therein that defendants held their claim under Regulations prior to those of 21st March, 1872, our claim to the ground in excess not being made until 22nd March. This objection was raised under No. 1 regulation, 21st March, not at the proper time (the initiation of the case), but after the whole evidence had been heard, and whilst the Court was cleared for a consultation by the Justices; so that even at that stage of the proceedings no opportunity was afforded us to argue against the objection.

This case has caused a great deal of excitement throughout the district, and a very prejudicial statement respecting the action of our party in it has been purposely circulated, so that, in simple justification of our own characters, it has become necessary for us to adopt some means to place it in its proper light before the public.

From information this day received, and in which credence can be placed, Maloney's party have this part week washed out of 13 loads of casing between 80 and 90 ounces of gold, and the stone is showing very rich.

Again thanking you for myself and party,

Yours, &c.,
HENRY ROMAN.

Not with the papers.

No. 3.

MR. H. ROMAN TO THE SECRETARY FOR LANDS.

Park House, Park-street,
Sydney, 8 August, 1872.

SIR,

I have the honor to direct your attention to the quartz-mining dispute at the Glen Morrison Reef, near Walcha,—Dewson and others against Maloney and others,—the papers in connexion with which case have been placed before you by Mr. James Rodd, Member for the Northern Gold Fields.

Being aware that through those papers and personal explanations of the matter you are in possession of the full facts and merits of the case, I have the honor respectfully to request that after having Mr. Gold Commissioner Buchanan's reasons for not at once placing us in possession of the ground held in excess by Maloney and party, in accordance with the Gold Fields Regulations, and our application made to him thereunder on 24th March last, instead of referring us to a Bench of Magistrates, you will be pleased to direct that gentleman to proceed forthwith to the disputed ground, measure off Maloney and party's proper area (a prospecting claim for four men) under Regulations in force on 18th March last, and give Dewson and party possession of the ground held in excess, northward of Maloney's workings, according to the claim made by them to the same under Gold Fields Regulations, 21st March, 1872.

Begging your earliest attention to this matter,

I have, &c.,

HENRY ROMAN,

Pro Dewson and Company.

The Minister desires that the area to which J. Maloney and others are entitled at Glen Morrison Reef, near Walcha, may be at once measured off, giving Dewson and Company the land properly belonging to them. Telegram to Commissioner Buchanan.—W.W.S., 13 August, 1872.

19 August, 1872.

DEWSON v. Maloney, Glen Morrison Reef. A competent tribunal—five Magistrates—decided that Dewson and party had no title to the disputed land. I do not think I have any power to upset decision; please instruct.

MINUTE of the Under Secretary for Lands on No. 6:

THE Minister for Lands considers that although the Gold Commissioner has (as he states) no right to interfere with the decision of the Magistrates, it was not in their power to arrive at a decision when there had been no measurement and no base line laid down, in the absence of which it could not be ascertained what particular land either party was entitled to.

This is what is now required to be done.

No. 22.

MR. GOLD COMMISSIONER BUCHANAN TO THE UNDER SECRETARY FOR LANDS.

Gold Commissioner's Office,
Armidale, 31 August, 1872.

SIR,

In acknowledging the receipt of your letter of the 29th instant, and subsequent telegrams, the last received this afternoon, on the subject of the dispute upon the Glen Morrison Reefs between Messrs. Dewson and others and T. Maloney and others,—I have the honor to inform you that the Minister has been entirely misinformed in supposing the Magistrates of Walcha disposed of the case prior to the laying down of the base line and measurement of claims; the reverse is the fact. I myself laid down the base line of both reefs in the presence of the whole population of Glen Morrison, and had the claims measured prior to the dispute being settled by the Walcha Bench.

The law provides a remedy from the decision of the Bench should Dewson and others choose to avail themselves of it. I allude to sec. 21 of 30 Vict., No. 8. This appears to me to be the legal and proper course. I cannot help respectfully suggesting that it appears to me the more regular course for Messrs. Dewson and others to have adopted in this matter, if they imagine they had any cause of complaint against the decision arrived at by the Bench in their case, would have been, to have made these statements in writing. I should then have been prepared to have fully replied thereto on my own part, and might if necessary have also obtained the views of the other Magistrates who acted with me. Up to the present time I have never been informed the grounds upon which these parties have based their grievance. My experience as a Magistrate for the last twenty years, and Senior Gold Commissioner of the Colony, warrants me in asserting that *ex-parte* statements, however plausible, are most dangerous to act upon. I had in the present case of Dewson and others *v.* Maloney and others, an opportunity of hearing fully both parties, and came to the conclusion, in which I was borne out by every other member of the Bench, that Dewson and party had no right whatever to the ground they claimed. I shall be most happy to forward to the Honorable the Minister for Lands, should he require them, copies of the depositions taken in the case. Your telegram of to-night has prevented my proceeding to Oakwood. I regret this beyond measure, as very large interests are at stake, and large numbers of miners await my arrival and decision on grave disputes. It seems to me the baseless claim set up by Dewson and party is of no moment as compared with these other important duties. In conclusion I would, with the greatest respect, state, that I am prepared to carry out at once any definite instructions in this or any other matter in connection with my duty the Honorable the Minister for Lands may forward to me.

I have, &c.,
J. BUCHANAN, G.C.

MINUTE of the Under Secretary for Lands on No. 22.

IN reference to the latter part of this letter, Mr. Commissioner Buchanan has in accordance with verbal instructions received yesterday from the Minister been directed to proceed to Oakwood.

W.W.S., 3 Sept.

Approved.—J.S.F., 3/9/72.

No. 23.

TELEGRAM FROM THE UNDER SECRETARY FOR LANDS TO MR. GOLD COMMISSIONER BUCHANAN.

3 September, 1872.

PROCEED to Oakwood as proposed; settle dispute—Brereton and others; lay down base lines; return to Armidale as soon as practicable.

No. 24.

TELEGRAM FROM THE UNDER SECRETARY FOR LANDS TO MR. W. G. BRERETON.

3 September, 1872.

COMMISSIONER instructed to proceed to Oakwood to settle disputes, yours and others, and to lay down base line.

No. 25.

11

No. 25.

MR. H. ROMAN to THE SECRETARY FOR LANDS.

Uralla, 4 September, 1872.

Sir,

Being aware of the absence from Sydney of Mr. James Rodd, M.L.A., who has been in correspondence with you upon the matter of Dewson and others against Maloney and others,—quartz-mining dispute at Glen Morrison,—I deem it my duty to forward to you personally a communication just received by one of my partners (Mr. Fremlin) from Mr. District Gold Commissioner Buchanan, in answer to a letter addressed to him on the *15th ultimo, having reference to the appointment of a time for putting Dewson and party in possession of land properly theirs. Having the fullest assurance that the statements therein contained are not reconcilable with the true facts of the case, I have deemed it necessary to put you in possession of the same, and I trust this will be ample apology for my again troubling you in this affair.

I have, &c.,

HENRY ROMAN,
(Pro Dewson and party.)

[Enclosure in No. 25.]

Mr. Gold Commissioner Buchanan to Mr. A. R. Fremlin.

Gold Commissioner's Office,
Armidale, 3 September, 1872.

Sir,

Referring to your communication of the 15th ultimo, on the subject of my proceeding to Walcha to put you in possession of your ground at Glen Morrison Reef, I have now to inform you that I have no such instructions as stated by you in your letter. I have delayed answering your letter until now, pending communication with the Lands Department. On the receipt of definite instructions, such as you indicate, the matter of course will meet with my immediate attention.

I am, &c.,

J. BUCHANAN, G.C.

MINUTE of the Under Secretary for Lands on No. 25.

Is it necessary to pursue this matter any further in the absence of further information from the complainant? There is no specific charge in Mr. Roman's letter against the Commissioner, calling for any explanation.

W.W.S., 13 Sept.

It is not necessary. If the parties desire to make a specific charge against the Commissioner, of course they are at liberty to do so.—J.S.F., 26/9/72.

No. 26.

MR. A. R. FREMLIN to THE SECRETARY FOR LANDS.

307, George-street (Rodd's Office),
Sydney, 1 October, 1872.

SIR,

I have the honor again to bring before your attention the case of W. Dewson and others *v.* See No. 7. T. Maloney and others, in reference to the disputed ground at Glen Morrison Reef. I beg to refer to your communication of 26th August last, addressed to James Rodd, Esq., M.L.A., in which you stated instructions had been sent to Mr. Commissioner Buchanan to have the area to which T. Maloney and others were entitled at Glen Morrison Reef, near Walcha, at once measured off, giving W. Dewson and party the ground properly belonging to them—(letter marked 72-1,186 Ml.)

On behalf of W. Dewson and others (with whom I have interest) I have to complain that your instructions of that date have not been obeyed, but that instead, Mr. Commissioner Buchanan, in a letter to you, dated 31st August last, states, "that he himself laid down the base line in the presence of the whole population of Glen Morrison, and had the claims measured prior to the dispute being dismissed by the Walcha Bench."

I have the honor to request you will cause an investigation to be made into the statements of Mr. Buchanan, as I am in possession of evidence that they are not in accordance with the facts of the case. The only time Mr. Buchanan was ever at Glen Morrison was on the 29th May last, in proof of which I beg to hand you enclosure, marked A 1, by which you will see that the base line was laid in the following manner on the Golden-bar Reef. Mr. Buchanan, on the occasion referred to, merely put one peg in, and declared the base line of above reef ran N.N.W. and S.S.E.; and further, that neither on that day nor since no claims have been measured. I beg also to hand you enclosure, marked B 2, in further attestation of the truth of our statements.

As you have now placed before you our contradiction to Mr. Buchanan's statements, I beg the favour of your investigating our case at your earliest convenience.

I have, &c.,

A. R. FREMLIN,
(Acting for W. Dewson and others.)

[Enclosure

[Enclosure A to No. 26.]

WE, the undersigned, being gold-miners holding miners' rights, were present when Mr. Gold Commissioner Buchanan paid his official visit on the 29th May last. That upon that occasion, after inspecting the prospectors' workings, he put one peg in and declared that the base-line of the "Golden-bar Reef" ran by compass N.N.W. and S.S.E., and that the "Golden Star" was a parallel reef running in the same direction; and that at that time no claims were measured off either by Commissioner or by any other person.

Glen Morrison, near Walcha,
27 September, 1872.

JOHN WALMSLEY.
his
RICHARD x DOOLAN.

JAMES WATSON.
T. WHITE.

Witness to the above signatures,—HENRY ROMAN, gold-miner, Uralla.

[Enclosure B to No. 26.]

WE, the undersigned, Certify that we, being gold-miners, and holding miners' rights have forwarded a requisition to Mr. Commissioner Buchanan since his visit here, to come upon Glen Morrison to lay down base lines properly, and measure off claims.

Glen Morrison, near Walcha,
27 September, 1872.

NATHANIEL RIPON.
MONTAGUE TAYLOR.
JAMES WATSON.
And seven others.

MINUTE of the Minister for Lands on No. 26.

1. Having personally investigated the matter of complaint in reference to Mr. Commissioner Buchanan, I find that he has done all that could reasonable be expected of him as a non-professional surveyor, and therefore he has carried out my instructions to the best of his ability.
2. I admit that the miners are under great disadvantages in not having their claims properly marked off. This will be immediately attended to, and the cause of complaint removed as soon as possible. Instructions will be given to a surveyor to lay down base lines, and to measure off the claims.
3. The dispute between Dewson and party and Maloney and party is a question as to whether Maloney and party are entitled to a prospector's claim under prior or the present Regulations. Upon this question I offer no opinion, because I have no jurisdiction or authority to decide in the matter. The parties aggrieved have their remedy under the Gold Fields Act by an appeal to the Court of Petty Sessions.

JAMES S. FARNELL,
28/10/72.

Mr. District Gold Commissioner Buchanan, B.C., 22 Nov., /72.—O.R. (for the Under Secretary.)
To be returned.

No. 27.

J. RODD, Esq., M.L.A., to THE SECRETARY FOR LANDS.

307, George-street,
Sydney, 8 October, 1872.

I have the honor herewith to hand you copies of the original documents relating to the laying down of "base line" on Golden-bar Reef, Glen Morrison. No. 1. Copy of notice calling public meeting. No. 2. List of miners present, including Maloney, Gallagher, Newman, and Hillier, defendants in a case of disputed ground Dewson v. Maloney and others. No. 3. The resolutions and requisition forwarded to Mr. Commissioner Buchanan, with his memo. endorsed.

I have, &c.,
JAMES RODD.

[Enclosure A to No. 27.]

To the miners and shareholders working on the reef, so called, the Golden-bar, Glen Morrison,—

Wishing you, the said miners and shareholders of the said reef to give your support, and likewise to take action in reference to request the Commissioner (Mr. Buchanan) to come and lay the base line according to law, and likewise to bring a practical surveyor with him, and also that a requisition be got up for that purpose, hoping you the miners and shareholders will entertain the object, and be in favour of a public meeting being called, and elect a Chairman to devise the best means to procure the said object in view.

[Enclosure B to No. 27.]

Mr. W. Barraclough and others to Mr. Gold Commissioner Buchanan.

Glen Morrison Diggings,
26 August, 1872.

Sir,

At a public meeting, held in the Glen Morrison Diggings, on the 26th instant, and appointing a Committee out of the said number to carry the following resolutions into effect:—

Resolved,—“1st. That this meeting think it highly desirable that something ought to be done more definite in laying the base line on the said reefs, as the gold-miners feel somewhat injustice done to them, and as they are unable to know from what source that such is the case, but in looking over the rules of the Gold Fields' Act we see that the law has not been carried out in its proper form.”

“2nd. That the Commissioner be requested to come here and lay the base line according to law.”

“That the Commissioner be requested to appoint a practical mining surveyor to lay the base line.”

Hoping this will meet your approbation, and give it your earliest consideration,

Yours, &c.,
W. BARRACLOUGH,
Chairman of Committees.
DAVID KERR,
Secretary of Committees.
JAMES WATSON,
And 50 others.

No. 28.

No. 28.

THE UNDER SECRETARY FOR LANDS to MR. A. R. FREMLIN.

Department of Lands,
Sydney, 22 November, 1872.

SIR,

In reply to your letter of the 1st ultimo, on behalf of Mr. W. Dewson and party, further^{No. 26.} respecting the measurement of certain auriferous ground at the Glen Morrison Reef, near Walcha, in dispute between them and Messrs. T. Maloney and others, I am directed by the Minister for Lands to inform you, that the miners are no doubt under great disadvantages in not having their claims properly marked off, but this will be immediately attended to, and the cause of complaint removed as soon as possible. Instructions will be given to a surveyor to lay down base lines, and to measure off the claims.

2. In regard to the dispute between Dewson and party, and Maloney and party, as to whether Maloney and party are entitled to a prospector's claim under prior or the present Regulations, this is a question which Mr. Secretary Farnell cannot offer an opinion, because he has no jurisdiction or authority to decide in the matter. The parties aggrieved however have their remedy under the Gold Fields Act by an appeal to the Court of Petty Sessions.

I have, &c.,
OSBORNE RICH,
(For the Under Secretary.)

THE UNDER SECRETARY FOR LANDS to J. RODD, Esq., M.L.A.

Department of Lands,
Sydney, 22 November, 1872.

SIR,

In reference to your letter of the 8th ultimo, enclosing copies of certain documents relating^{No. 27.} to the laying down of base line on Golden-bar Reef, Glen Morrison, I am directed by the Minister for Lands to inform you, that the miners are no doubt under great disadvantages in not having their claims properly marked off, but this will be immediately attended to, and the cause of complaint removed as soon as possible. Instructions will be given to a surveyor to lay down base lines, and to measure off the claims.

2. In regard to the dispute between Messrs. Dewson and party, and Messrs. Maloney and party, therein alluded to by you, as to whether Maloney and party are entitled to a prospector's claim under prior or the present Regulations, this is a question which Mr. Secretary Farnell cannot offer an opinion, because he has no jurisdiction or authority to decide in the matter. The parties aggrieved however have their remedy under the Gold Fields Act by an appeal to the Court of Petty Sessions.

I have, &c.,

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TRUNKY GOLD FIELD.

(RETURNS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 24 April, 1873.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 24 July, 1872, That there be laid upon the Table of this House,—

“ A Return showing the amount received for Mineral Leases, Publicans’ Licenses, Wholesale Wine and Spirit and Business Licenses, and Miners’ Rights, for the District of Trunkey, during the last three years.”

*(Mr. Buchanan.)**Question—*

- (1.) The amount received for Mineral Leases for the District of Trunkey, during the years 1870, 1871, 1872.
- (2.) The amount received for Publicans’ Licenses and Wholesale Wine and Spirit Licenses, for the District of Trunkey, during the years 1870, 1871, 1872.
- (3.) The amount received for Business Licenses and Miners’ Rights for the District of Trunkey, during the years 1870, 1871, 1872.

Answer.

(1.)

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—HOLDERS OF MINERS' RIGHTS AND BUSINESS LICENSES, TAMBAROORA.)

Ordered by the Legislative Assembly to be printed, 16 January, 1873.

The Petition of the undersigned holders of miners' rights and business licenses, residing in the Mining District of Tambaroora,—

HUMBLY SHOWETH :—

1. That your Petitioners have long suffered under vexatious delays and pecuniary loss by the inefficiency of the Gold Fields Regulations issued from time to time by the Government.

2. That in the opinion of your Petitioners the inefficiency complained of is to be traced to the want of mining knowledge on the part of those entrusted with the framing of the Regulations hitherto issued.

3. That for the many admitted grievous evils under which the miners of New South Wales suffer, some of the remedies provided by the proposed Mining Act of 1873 are not only altogether inefficient, but, in the opinion of your Petitioners, are calculated to aggravate them by making that which was before very obscure and difficult to understand still more obscure and more difficult, especially in the details of the proposed Bill.

4. Your Petitioners would particularly and most respectfully urge on the attention of your Honorable House the fact that the authority to make Regulations for the government of the Gold Fields still remains in the same powers as of old, and therefore we have little hope that there will, under the proposed new Act, be any amendment in this most important respect.

5. Further, your Petitioners wish most humbly to protest against the interference with the arrangement of details exhibited in the body of the Bill now before your Honorable House: First—because the arrangement of such details can be more efficiently effected by other means; second—because by the insertion of the said details the Bill has become so voluminous that, in the opinion of your Petitioners, it is to a large majority of those who are expected to be conversant with it totally incomprehensible.

6. Your Petitioners believe that all Regulations whatever affecting the details of the government of the Gold Fields should be framed by the miners themselves, subject to the approval of the Governor and Executive Council.

7. For this purpose you Petitioners humbly suggest that a central Board, sitting in Sydney, and consisting of ten members, nine of whom should be elected by the different divisions of the Gold Fields, and the tenth to be appointed by the Governor, with the advice of the Executive Council, would meet the requirements of the Gold Fields; and they are further of opinion that any other method by which Regulations are framed will be liable to the same objections as those that have already from time to time been tried and found wanting.

8. Your Petitioners humbly pray that your Honorable House will take the foregoing objections and suggestions into your favourable consideration, and relieve them from the disadvantages under which they at present labour, by amending the Bill in such a way as will render it at once easily understood by the miners, and conducive to the welfare of the community.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 91 Signatures.]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—HOLDERS OF MINERS' RIGHTS AND BUSINESS LICENSES, TAMBAROORA.)

Ordered by the Legislative Assembly to be printed, 16 January, 1873.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned holders of miners' rights and business licenses residing in the Mining District of Tambaroora,—

HUMBLY SHOWETH:—

1st. That your Petitioners have long suffered under vexatious delays and pecuniary loss by the inefficiency of the Gold Fields Regulations issued from time to time by the Government.

2nd. That, in the opinion of your Petitioners, the inefficiency complained of is to be traced to the ignorance of the details of mining life on the part of those entrusted with the framing of the Regulations hitherto issued.

3rd. That for the many admitted grievous evils under which the miners of New South Wales suffer, some of the remedies provided by the proposed Mining Act of 1873 are not only altogether inefficient, but, in the opinion of your Petitioners, are calculated to aggravate them by making that which was before very obscure and difficult to understand still more obscure and more difficult, *especially* in the details of the proposed Bill.

4th. Your Petitioners would particularly and most respectfully urge on the attention of your Honorable House the fact that the authority to make Regulations for the government of the Gold Fields still remains with the same powers as of old, and therefore we have little hope that there will under the proposed new Act be any amendment in this most important respect.

5th. Further, your Petitioners wish most humbly to protest against the interference with the arrangement of details exhibited in the body of the Bill now before your Honorable House: First—because the arrangement of such details can be more efficiently effected by other means; second—because by insertion of the said details the Bill has become so voluminous that, in the opinion of your Petitioners, it is to a large majority of those who are expected to be conversant with it totally incomprehensible.

6th. Your Petitioners believe that all Regulations whatever affecting the details of the government of the Gold Fields should be framed by the miners themselves, subject to the approval of the Governor and the Executive Council.

8th. Your Petitioners humbly pray that your Honorable House will take the foregoing objections and suggestions into your favourable consideration, and relieve them from the disadvantages under which they at present labour, by amending the Bill in such a manner as will render it at once easily understood by the miners, and conducive to the welfare of the community.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 151 Signatures.]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—HOLDERS OF MINERS' RIGHTS AND BUSINESS LICENSES, GULGONG GOLD FIELDS.)

Ordered by the Legislative Assembly to be printed, 16 January, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned holders of miners' rights and business licenses, resident on the Gulgong Gold Field,—

HUMBLY SHOWETH :—

That your Petitioners were pleased to learn, by the speech of His Excellency the Governor, when opening the present session of Parliament, that a Bill would be at once introduced to amend the laws relating to mining. The Government having since introduced the promised Bill, your Petitioners regret to find that it is not calculated to remove the serious grievances which the gold-miners for many years have patiently suffered, in the hope that the oft promised reform would be initiated every session of Parliament.

That your Petitioners have, in public meeting assembled, considered the Mining Bill now before your Honorable House, and have disapproved of it as a whole, for many and divers reasons hereinafter stated in this Petition, and they most humbly submit for your consideration these reasons, with the hope that the defects of this Mining Bill will be dealt with as your Honorable House in its wisdom may deem best for the development and progress of the great mining industry.

That experience has proved to your Petitioners that the great cause of dissatisfaction and distrust in the management of the gold fields has been the grossly defective character of the various codes of Regulations made from time to time by virtue of the powers vested in the Governor and Executive Council. For nearly twenty years the power to frame the Mining Regulations has been vested in this one source, and with the worst results. The Regulations have been ever obscure in meaning, deficient in details, illiberal in their provisions, and many of them, *ultra vires*, calculated to foster litigation, and have beyond doubt checked the development of the vast auriferous wealth of the Colony. Your Petitioners are strongly of opinion that the miners should be entrusted with the framing of the Mining Regulations, to be approved of by the Governor and Executive Council, ere they become law. And as a Legislative body for this purpose your Petitioners suggest the creation of one central Mining Board for the whole Colony, consisting of ten members, nine of whom to be elected by the miners of the various gold fields, grouped in nine mining divisions, three for each Gold Fields electorate, so that every class of mining would be fairly represented,—the tenth member to be an official chairman, appointed by the Government; this Board to sit in Sydney and the members to be paid a reasonable sum for their time and travelling expenses. By the adoption of this plan your Petitioners earnestly believe that many if not all of the existing defects in the Mining Regulations would be remedied and an impetus given to the development of the gold fields that would be productive of the best results for the miner and capitalist. Educated practical mining experience would be secured for the framing of the Regulations, while the power to veto would still be retained by the Governor and Executive Council.

Your Petitioners have on the discovery of almost every new gold field found that much injustice has been inflicted on the miners by the delay in proclaiming the gold field as required by the Gold Fields Act. If the whole Colony were proclaimed a gold field—as has been the case in Victoria since 1857—all the injustice, delay, and fraud which results from the present necessity for a proclamation would be abolished, while the *bonâ fide* settlement of the public lands would not be retarded and speculative free selection become an evil of the past.

Your Petitioners humbly beg to point out to your Honorable House the pernicious character of the latter part of clause 18 of this Bill, which provides "That it shall be lawful for any holder of a miner's right to take possession of Crown Lands for gold-mining, either for himself or on behalf of any number of persons collectively, being each the owner of a miner's right." This proviso has been tried in several gold

Colonies

Colonies (including this Colony), but was promptly repealed in deference to a strong expression of public opinion on its grave injustice to the miner. By it one man holding dummy miners' rights can occupy a whole lead in claims and farm them out to the working miner on exorbitant terms. By it one man can occupy ground for over hundreds of miles distant to the detriment and exclusion of miners located on the gold field. It is antagonistic to equity, to the development of the gold fields, and will if passed into law jeopardize the peace and good order of the gold fields, as it will legalise a disordered principle, scouted and earnestly condemned by the whole of the miners of Australasia.

Your Petitioners are of opinion that the radical changes contemplated by clauses 24, 25, and 27 of this Bill relating to business licenses is fraught with much injustice to the various business classes of the gold fields.

The increase of the business license fee from one pound to five pounds per annum is retrogressive, and the selling by auction of business and residence areas, improved by the occupants, is antagonistic to the principles of the Land Act of 1861, and in many cases will be absolute ruin to the occupiers.

These clauses are unjust in principle, oppressive in character, and calculated to seriously retard the permanent settlement on the gold fields.

Your Petitioners humbly beg to enter their emphatic protest against the clauses of this Bill relating to gold-mining leases. They deprecate the granting of gold-mining leases indiscriminately on any Crown Lands, being of opinion that the lands open to lease should be only such ground as cannot be effectually worked by ordinary parties of miners, and that only the term "rent" and "maximum area" should be contained in any mining statute, the conditions of the lease being provided for by regulation in order that they could be promptly amended from time to time to meet the requirements of this class of mining tenements, and check the occupation of large areas of auriferous land by impecunious adventurers for purely speculative purposes to the detriment of the working miner and the legitimate mining capitalist.

Your Petitioners view with much alarm the provisions of clauses 50 and 51, relating to special leases, as inimical to the best interests of the miner. These clauses are wrong in principle, and have proved a failure in the Colony of Victoria, from the mining statute of which Colony they have been artlessly copied. No such inducement is required in this Colony owing to the geological character of the auriferous country. Your Petitioners humbly and most earnestly hope that these clauses will be rejected by your Honorable House. Your Petitioners desire to point out a grave defect in clause 84, relating to gold being found in a mineral lease. The clause as it now stands would enable mining speculators under the guise of a mineral lease to occupy 640 acres of auriferous ground to the exclusion of the miner. Your Petitioners would humbly suggest that if gold is found in payable quantities in a mineral lease it should at once be reduced in size to the maximum area of a gold-mining lease, otherwise a fraud upon the public revenue and a monopoly detrimental to the interests of the working miner will result.

Your Petitioners, while approving of the principle of creating wardens (Part 2 of the Bill) by which one officer having allotted to him a defined district shall have supreme control therein, being responsible directly to the Minister in charge of the Gold Fields only for its good management, yet they object to the great and unnecessary discretionary power vested in the said wardens as opposed to the true principles of government, and productive of grave abuses impossible to prevent while human frailty exists. The experience of the management of the gold fields during the past twenty years has furnished indisputable proof of how unwisely and tyrannically this discretionary power vested in Gold Commissioners has been exercised, Gulgong furnishing ample proof; and your Petitioners with all due respect for the wisdom and intelligence of the compilers of this Bill fail to see how calling these officers wardens will imbue them with those superhuman qualifications requisite to enable them to perform their manifold and onerous duties conscientiously and efficiently.

Your Petitioners therefore humbly ask that the duties of these wardens should be excised from the Bill, and clearly defined by mandatory mining regulations, as more compatible with an equitable administration of justice on the gold fields. Your Petitioners view with much distrust the constitution of the Wardens Courts as provided in this Bill, as being productive of delay and a much increased cost in hearing mining disputes. No provision is made for hearing petty disputes on the ground, which, on populous gold fields are very numerous, and rendering their hearing by summons compulsory in a Wardens Court will prove unprofitable to all parties concerned, except the legal profession, and will in many cases be a denial of justice. Your Petitioners strongly disapprove of only three assessors sitting in these Courts with the warden, and especially of the decision of the warden and one assessor being of greater effect than that of two assessors.

The number of assessors should be four, who, with the warden, should have co-equal powers as a jury. Your Petitioners also disapprove of the mode of compiling the list of assessors, and of summoning them for this Court, as too cumbersome for the prompt settlement of simple mining disputes.

Your Petitioners disapprove of the constitution of the Mining Appeal Court provided by this Bill as one that will be productive of ruinous delay and excessive cost. The long intervals between the sittings of the District Courts, the technical and complex mode of entering and hearing appeals, requiring a well-trained legal mind to correctly comprehend, and the limited powers conferred on assessors in deciding appeals will, your Petitioners believe, be productive of grave dissatisfaction amongst the mining community, and lead to much hard-earned money being spent in what may be called technical litigation, which, by creating a more simple tribunal, presided over by a Judge, would be saved.

Your Petitioners are of opinion that an Appeal Court for the rehearing of mining disputes should be thoroughly local in its sittings, so as to enable the miner to avail himself of it at the minimum cost. It should be prompt in its action, and reasonable in its cost, otherwise it will be practically a denial of justice. Its decisions should be based on the mining statute in force, and the regulations made thereunder, so that the jury of assessors would be able by their mining experience and general intelligence to give a decision on every case free from technicalities, and governed by the same laws as those under which the dispute arose.

Your Petitioners humbly suggest that all the clauses of this Bill relating to the conditions of occupation, the registration and the forfeiture of any claim or share therein, should be omitted, and being more effectively dealt with by regulations which could be promptly and suitably amended from time to time as the changing circumstances of the mining industry may demand. Their retention in the Bill will be found productive of much evil, and a serious clog upon the efficient working of claims on every gold field.

Your

Your Petitioners humbly beg to express their disapproval of Part 4, relating to mining upon private property, as not being calculated to settle this grave question on an equitable and satisfactory basis. Your Petitioners are of opinion that mining upon private lands should be compulsory on the owner and open to any holder of a miner's right on notice of intention to mine being given to the owner. Ample restrictions as to the mode of entering upon the land, and the manner of mining, could easily be provided by regulation,—the damage to the lands to be determined by appraisement and arbitration and paid by the miner before work is commenced. Your Petitioners do not enter into the details of this serious question, being of opinion that the legislative body, suggested in the third paragraph of this Petition, would deal with them most effectively, and are further of opinion that such a vexed question would be more carefully considered if dealt with in a Bill separate from that relating to gold fields management.

In conclusion, humbly pray that your Honorable House will give their objections and suggestions your most favourable consideration, and as a result so amend the Mining Bill now before you as to make it an effective measure of mining reform, calculated to benefit the miner—develop the gold fields—materially increase the prosperity of the Colony,—and remove the many serious grievances which the working miner in his arduous occupation has now to contend with in earning his daily bread.

And, as in duty bound, your Petitioners will ever pray.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—HOLDERS OF MINERS' RIGHTS AND BUSINESS LICENSES, STONEY CREEK, IRONBARKS, BURRENDONG, AND MOOKERWA GOLD FIELDS.)

Ordered by the Legislative Assembly to be printed, 16 January, 1873.

The Petition of the undersigned holders of miners' rights and business licenses, resident on the Stoney Creek, Ironbarks, Burrendong, and Mookerwa Gold Fields,—

HUMBLY SHOWETH:—

That your Petitioners were pleased to learn by the speech of His Excellency the Governor, when opening the present Session of Parliament, that a Bill would be at once introduced to amend the laws relating to mining. The Government having since introduced the promised Bill, your Petitioners regret to find that it is not calculated to remove the serious grievances which the gold-miners for many years have patiently suffered, in the hope that the oft promised reform would be initiated every Session of Parliament.

2nd. That your Petitioners have in public meeting assembled considered the Mining Bill now before your Honorable House, and have disapproved of it as a whole for many and divers reasons hereinafter stated in this Petition; and they most respectfully submit for your consideration those reasons, with the hope that the defects of this Mining Bill will be dealt with as your Honorable House in its wisdom may deem best for the development and progress of the great mining industry.

3rd. That experience has proved to your Petitioners that the great cause of dissatisfaction and distrust in the management of the gold fields has been the grossly defective character of the various codes of Regulations made under the Gold Fields Act, by virtue of the powers vested in the Governor and Executive Council. For nearly twenty years the power to frame the Mining Regulations has been vested in this one source, and with the worst results. The Regulations have been ever obscure in meaning, deficient in details, illiberal in their provisions, and many of them (*ultra vires*) calculated to foster litigation, and have been beyond doubt the means of checking the development of the vast auriferous wealth of the Colony. Your Petitioners are strongly of opinion that the miners should be entrusted with the framing of the Regulations, to be approved of by the Governor and Executive Council, ere they become law; and as a legislative body for this purpose they humbly suggest one central Mining Board, consisting of ten members, nine of whom to be elected by the miners of the various gold fields, grouped in nine mining divisions, the tenth to be an official chairman, appointed by the Government,—this body to sit in Sydney, and to be paid a reasonable sum for their time and travelling expenses. By the adoption of this plan your Petitioners earnestly believe that many if not all of the existing defects in the Mining Regulations would be remedied, and an impetus given to the development of the gold fields that would be productive of the best results for the miner and capitalist. Educated practical mining experience would be secured in framing of the Regulations, while the power to veto would be still retained by the Governor and Executive Council.

4th. Your Petitioners have on the discovery of almost every new gold field found that much injustice has been inflicted on the miners by the delay in proclaiming the gold field, as required by the Gold Fields Act. If the whole Colony were proclaimed a gold field, as has been the case in Victoria since 1857, all the injustice, delay, and fraud which results from the present necessity for a proclamation would be abolished; while the *bonâ fide* settlement of the public lands would not be retarded, and speculative "free selection" become an evil of the past.

5th. Your Petitioners are also of opinion that the radical changes contemplated by clauses 24, 25, and 27 of this Bill, as relating to business licenses, is fraught with much injustice to the business classes on the gold fields. The increase of the license fee from £1 to £5 per annum is retrogressive; and the selling by auction of business and residence areas, improved by the occupants, is antagonistic to the principles of the Land Act of 1861, and will, in many cases, be absolute ruin to the occupiers. These clauses are unjust in principle, oppressive in character, and calculated to seriously retard the permanent settlement of the gold fields.

6th. Your Petitioners humbly beg to enter their emphatic protest against the clauses of this Bill relating to gold-mining leases. They deprecate the granting of gold-mining leases indiscriminately on any Crown Lands, being of opinion that the lands open to lease should be only such ground as cannot be effectually worked by ordinary parties of miners; and that only the term "rent" and "maximum area" should be contained in any mining statute, the conditions being provided for by regulation, in order that they could be promptly amended from time to time to meet the requirements of this class of mining tenement, and check the occupation of auriferous land by impecunious adventurers for purely speculative purposes, to the detriment of the working miner and legitimate mining capitalist.

7th. Your Petitioners view with much alarm the provisions of clauses 50 and 51 relating to special leases as inimical to the best interests of the gold fields. These clauses are wrong in principle, and have proved a failure in the Colony of Victoria, from which they have been artlessly copied, and are altogether unnecessary in this Colony, owing to the geological character of the auriferous country. Your Petitioners humbly and most earnestly hope that they will be omitted from the Bill.

8th. Your Petitioners humbly beg to bring under the notice of your Honorable House a grave defect in clause 84, relating to gold being found in a mineral lease. The clause, as it now stands, would enable mining speculators, under the guise of a mineral lease, to occupy 640 acres of auriferous ground to the exclusion of the miner. Your Petitioners would humbly suggest that if gold is found in payable quantities in a mineral lease it should at once be reduced in size to the maximum area of a gold-mining lease, otherwise a fraud on the public revenue, and a monopoly detrimental to the interests of the working miner, will result.

9th. Your Petitioners while approving of the principle of creating wardens (Part 2 of the Bill), by which one officer having allotted to him a defined district, shall have supreme control therein, being responsible directly to the Minister in charge of the gold fields only for its good management, yet they object to the great and unnecessary discretionary power vested in the said wardens as opposed to the true principles of government, and productive of grave abuses, impossible to prevent while human frailty exists. The experience of the management of the gold fields during the past twenty years has furnished indisputable proof of how unwisely and tyrannically this irresponsible discretionary power vested in Gold Commissioners has been exercised; and your Petitioners, with all due respect for the intelligence and wisdom of the compilers of this Bill, fail to see how calling these officers wardens will imbue them with those superhuman qualifications requisite to enable them to perform their manifold and onerous duties efficiently and conscientiously. Your Petitioners therefore humbly ask that the duties of these wardens should be excised from the Bill, and clearly defined by regulations as more compatible with an equitable administration of justice on the gold fields.

10th. Your Petitioners view with much distrust the constitution of the "Wardens Courts" as provided in this Bill, as being productive of delay, and a much increased cost in hearing mining disputes. No provision is made for hearing petty disputes, which on populous gold fields are very numerous, on the ground; and rendering their hearing by summons compulsory in a Wardens Court will prove unprofitable to all parties concerned, except the legal profession, and in many cases be a denial of justice. Your Petitioners strongly disapprove of only three assessors sitting in these Courts with the warden, and especially of the decision of the warden and one assessor being of greater effect than that of two assessors. The number of assessors should be four, who, with the warden, should have co-equal powers as a jury. Your Petitioners also disapprove of the mode of compiling the assessor's list, and of summoning them for this Court, as too cumbrous for the prompt settlement of simple mining disputes.

11th. Your Petitioners disapprove of the constitution of the Mining Appeal Court provided by this Bill as one that will be productive of ruinous delay and excessive cost. The long intervals between the sittings of the District Courts, the technical and complex mode of entering and hearing appeals (requiring a well-trained legal mind to correctly comprehend), and the limited powers conferred on assessors in deciding appeals, will, your Petitioners believe, be productive of grave dissatisfaction amongst the mining community, and lead to much hard-earned money being spent in what may be called "technical litigation," which, by a more simple tribunal, presided over by a Judge, would be saved. Your Petitioners are of opinion that an Appeal Court for rehearing mining disputes should be thoroughly local in its sittings, so as to enable the miner to avail himself of it at the minimum cost. It should be prompt in its action and reasonable in its cost, otherwise it will practically be a denial of justice. Its decisions should be based on the mining statute in force and the Regulations made thereunder, so that the jury of assessors would be able by their mining experience and general intelligence to give a decision on every case free from technicalities, and governed by the same laws as those under which the dispute arose.

12th. Your Petitioners humbly suggest that all the clauses of this Bill relating to the conditions of occupation or registration, or forfeiture of any claim or share therein, should be omitted as being more effectively dealt with by Regulations, which could be promptly and suitably amended, from time to time, as the changing circumstances of the mining industry may demand. Their retention in the Bill will be found productive of much evil, and a serious clog upon the efficient working of claims on every gold field.

13th. Your Petitioners humbly beg to express their disapproval of Part 4, relating to mining on private property, as not being calculated to settle this grave question on an equitable and satisfactory basis. Your Petitioners are of opinion that mining on private lands should be compulsory on the owner, and open to any holder of a miner's right, on notice of intention to mine being given to the owner,—the damage to the lands to be determined by appraisal and arbitration, and paid by the miner before work is commenced. Your Petitioners do not enter into the details of this serious question, being of opinion that the legislative body, suggested in the third paragraph of this Petition, would deal with them most effectively; and are further of opinion that such a vexed question would be more carefully considered if dealt with in a Bill separate from that relating to gold fields management.

In conclusion, your Petitioners humbly pray that your Honorable House will give their objections and suggestions your most favourable consideration, and as a result so amend the Mining Bill now before you as to make it an effective measure of mining reform, calculated to benefit the miner, develop the gold fields, materially increase the public prosperity, and remove the many serious grievances which the working miner in his arduous occupation has now to contend with in earning his daily bread.

And your Petitioners, as in duty bound, will ever pray.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—MINERS AND OTHERS, BILLABONG GOLD FIELD.)

Ordered by the Legislative Assembly to be printed, 16 January, 1873.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of Miners and others residing on and about the Billabong Gold Field,—

SHOWETH :—

That your Petitioners view with great distrust the new Gold Fields Bill before your Honorable House.

That your Petitioners humbly submit that the Bill is unsuited to the requirements of the management of the Gold Fields in general ; that your Petitioners humbly beg to enter their emphatic protest against division 3, as likely to encourage adventurers, who are to be found on the Gold Fields, for purely speculative purposes, to the detriment of the working miner.

Your Petitioners also humbly beg to protest against the provisions of clauses 50 and 51, relating to special leases.

Your Petitioners view with much concern the very great discretionary power given to Wardens, in Part II of the Bill.

Your Petitioners, therefore, humbly pray your Honorable House will give their objections your most favourable consideration, and so amend the Mining Bill now before you as to make it an effective measure of mining reform ; and your Petitioners will, as in duty bound, ever pray.

1872-3:

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—MINERS AND OTHER RESIDENTS OF CUNNINGHAM CREEK.)

Ordered by the Legislative Assembly to be printed, 17 January, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Miners of Cunningham Creek and Cumbamurra Gold Field, and its vicinity,—

RESPECTFULLY SHOWETH:—

That the miners resident in this district are gratified at Parliament taking up the cause of mining reform.

That the new Mining Bill possesses many provisions which are good, as, for instance, the appointment of a Mining Minister and department.

That the Bill has many and grave defects, as, for instance, that provision which gives the Governor and Executive Council power to frame Regulations which, in our opinion, should be framed by the miners themselves, first to be approved of by the Governor and Executive Council; and we respectfully suggest that one central Mining Board be established, consisting of ten members, nine to be elected, and a competent Chairman to be appointed by the Government; the Board to sit in Sydney, and the members to be paid a fair sum for their time and travelling expenses.

That, in consequence of the various new features presenting themselves on nearly every new gold field, your Petitioners are strongly of opinion that a Board of the above mentioned description is the only effectual method of dealing with the matter satisfactorily to the miners, and for the better development of the mineral resources of the Colony.

That your Petitioners are strongly in favor, to prevent the unnecessary delay and inconvenience that naturally arises from the delay in proclaiming gold fields by the Government, that the whole Colony should be proclaimed a gold field, the same as in Victoria.

That the Act is far too elaborate, and contains many things which could be better provided for by regulation.

That your Petitioners pray that the House will amend these defects in Committee, and at once pass a measure to suit the requirements of the miners as quickly as possible.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 90 Signatures.]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINING BILL.

(PETITION FOR AMENDMENT—MINERS, STOREKEEPERS, AND OTHERS, OF PEEL RIVER AND ADJACENT GOLD FIELDS.)

Ordered by the Legislative Assembly to be printed, 4 February, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned miners, storekeepers, and other residents of the Peel River and adjacent Gold Fields,—

HUMBLY SHOWETH:—

That your Petitioners have seen with considerable satisfaction that it is the intention of Parliament to make some change in the laws relating to the management of the Gold Fields of this Colony.

That your Petitioners have considered the new Mining Bill now before your Honorable House, and desire to express their satisfaction that it contains some beneficial provisions, such as the establishment of separate Department of Mines, presided over by a responsible Minister.

Also the appointments of Wardens in separate districts, to take charge of mining affairs.

Also the proclamation of Gold Fields by the discovery of payable gold. Also several other satisfactory arrangements.

That your Petitioners, while admitting that the new Mining Bill is, on a whole, an improvement upon the present Gold Fields Act, are strongly of opinion that it contains some provisions which, if they become law, will be very injurious to the mining community, particularly the provision whereby, in clause 86, the mining regulations are to be framed by the Governor and Council,—an arrangement which has been tried for years and has signally failed, and which will not, in the opinion of your Petitioners, be much better under a Mining Department.

That your Petitioners would strongly recommend the amendment proposed by the Honorable the Member for Gold Fields South as a great improvement on the proposed regulation.

That clause 24, whereby licenses are to be charged £5 be not more than £1, as at present.

That clause 89, enacting that all proceedings in Wardens Court by summons, is bad and should not become law—that summary proceedings in all cases of encroachment.

Clause 129, that provisions for District Courts be Mining Courts of Appeal, is faulty, and should be made final in all cases of appeal.

Clause 151,—holders of miners' rights having under cultivation more than $\frac{1}{4}$ acre of land should not be subject to any fine,—the Warden be empowered to authorize entry upon any land held in excess of $\frac{1}{4}$ acre.

Clause 73,—delaying the issue of lease after being granted,—should be abridged and issued as in clause 47 of Regulations 1866.

Clause 74, that one pound fee to be paid to Warden for delivery of lease should not be allowed.

Clause 50, that the words "leave it to the opinion of Warden" be omitted; that it read,—“that expensive works are requisite.”

Part 4,—clauses bearing on private property are very bad and oppressive. Your Petitioners would recommend the resumption of auriferous lands. That your Petitioners pray your Honorable House will amend the many grave defects which are in the Bill, when the measure gets into Committee.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 111 Signatures.]

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINERAL SELECTION AT TOGO.
(PETITION AS TO DECISION OF MINISTER FOR LANDS—MINERS OF BRAIDWOOD.)

Ordered by the Legislative Assembly to be printed, 7 November, 1872.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Miners in the District of Braidwood,—

RESPECTFULLY SHOWETH:—

That your Petitioners became aware of the existence of a copper lode at Togo, in the District of Shoalhaven, from information received from one of their co-partners.

That immediate steps were taken by them to inspect the lode and mark the ground, and the amount of rent for sixty acres, with application for a lease under the Crown Lands Act, was forwarded to Mr. Duguid, of Sydney, on the 7th of July last, and that the application was made by that gentleman in the name of your Petitioners on the 8th of the same month.

That during this time one George Orford, who had been informed of the lode by one of your Petitioners, took or directed one Captain Stobo (who had recently arrived in the district in search of copper) to the ground.

That your Petitioners have been informed that at some subsequent date the said Captain Stobo also applied for a lease of the same ground.

That your Petitioners have been informed that the Honorable the Minister for Lands has authorized the issue of a lease of the ground to Captain Stobo, to the exclusion of your Petitioners, notwithstanding that they were the discoverers and first applicants.

That your Petitioners believe that a great injustice has been done to them by the Honorable the Minister for Lands being deceived by and upon some false and *ex parte* statement.

Your Petitioners therefore humbly pray that your Honorable House will take such action in the matter as may appear meet, in order that justice may be done.

And your Petitioners, as in duty bound, will ever pray.

October 15th, 1872.

MINERAL SELECTION AT TOGO.

(MADE BY MESSRS. M'GRATH, BENNISON, AND LARMER.)

Ordered by the Legislative Assembly to be printed, 27 November, 1872.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 9th August, 1872, That there be laid upon the Table of this House,—

“Copies of all applications, correspondence, documents, and minutes
“relative to a Mineral Selection made by Messrs. M'Grath, Bennison, and
“Larmer, at Togo, county of St. Vincent.”

(Mr. Robertson.)

SCHEDULE.

NO.	PAGE.
1. Messrs. A. Brown and T. S. Jones, enclosing Treasury receipt, and requesting authority to select two portions of 80 acres each, for the purpose of working copper. 8 July, 1872.....	2
2. Under Secretary for Lands to Messrs. Brown and Jones, in reply to above, conveying authority desired. 8 July, 1872	2
3. Messrs. Brown and Jones to Minister for Lands, notifying selection of 80 acres, situated on the west side of Togra Creek, for copper. 8 July, 1872	2
4. Same to same, notifying selection of 80 acres, situated on the east side of Togra Creek, for copper. 2 July, 1872 ...	3
5. Messrs. M'Grath and party, enclosing Treasury receipt, and requesting authority to select one portion of 60 acres, for the purpose of working copper. 8 July, 1872	3
6. Under Secretary for Lands to Messrs. M'Grath and party, in reply to above, conveying authority to select 60 acres. 8 July, 1872.....	3
7. Messrs. M'Grath and party, notifying selection of 60 acres, situate near Togo Creek, for tin. 8 July, 1872.....	4
8. Messrs. Brown and Jones to Minister for Lands, claiming to hold the land selected by them against the persons who have applied for portion of same, with minute thereon. 11 July, 1872.....	4
9. Statutory Declaration by Thomas Shell Jones. 16 July, 1872.....	4
10. Same by Robert Stobo. 16 July, 1872.....	4
11. Messrs. Duguid & Co., on behalf of Messrs. M'Grath and party, respecting their disputed right to their mineral lease of 60 acres on Togo Creek. 17 July, 1872.....	5
12. Statutory Declaration by Alfred Brown. 20 July, 1872	5
13. Mr. R. Stobo to Minister for Lands, on same subject. 22 July, 1872	5
14. Messrs. Duguid & Co., enclosing Statutory Declarations by Messrs. W. E. Larmer and W. N. Bennison and John M'Grath; also letter from Mr. Bennison, respecting the mineral lease in dispute. 23 July, 1872	6
15. Mr. R. Stobo to Minister for Lands, further respecting disputed mineral lease at Toga Creek. 25 July, 1872	6
16. Memorandum of Mr. Thompson. 26 July, 1872	7
17. Statutory Declaration of Alfred Brown. 27 July, 1872.....	7
18. J. B. Wilson, Esq., to the Minister for Lands, corroborating the declarations made by Messrs. M'Grath and party in regard to their right to the mineral lease in question. 29 July, 1872	7
19. J. B. Wilson, Esq., to Minister for Lands, on same subject. 6 August, 1872	7
20. Under Secretary for Lands to Messrs. Duguid & Co., in reply to No. 11. 14 August, 1872	8
21. Under Secretary for Lands, in reply to No. 15. 14 August, 1872	8
22. Petition of Messrs. Duguid & Co., agents for Messrs. M'Grath and party, to His Excellency the Governor, appealing against the decision given by the Minister for Lands in the case of the mineral lease of land at Togo Creek, in dispute between their clients and Captain Stobo. 19 August, 1872	8
23. Under Secretary for Lands to Messrs. Duguid & Co., in reply to above. 4 October, 1872	8

MINERAL SELECTION AT TOGO.

No. 1.

MESSRS. BROWN AND JONES TO THE SECRETARY FOR LANDS.

Sydney, 8 July, 1872.

SIR,

We have the honor to enclose a receipt for the sum of £40, which we have deposited in the Colonial Treasury as the first year's rent for two portions of 80 acres each, which we are desirous of leasing under the 22nd clause of the Crown Lands Occupation Act; and we request that we may be favoured with the necessary authority to enable us to select the area specified, for the purpose of working copper.

We have, &c.,
ALFRED BROWN,
per T. S. JONES.
THOS. S. JONES.

[Enclosure to No. 1.]

NEW SOUTH WALES.

(No. 11,120.)

The Treasury, 8 July, 1872.

RECEIVED from A. Brown and T. S. Jones the sum of forty pounds, for deposit on application for authority to select 160 acres for mineral purposes, in two 80-acre blocks.

£40 : 0 : 0

No. 2.

THE UNDER SECRETARY FOR LANDS TO MESSRS. BROWN AND JONES.

Department of Lands,
Sydney, 8 July, 1872.

GENTLEMEN,

Selection
reported at 2:35,
8/7/72.

In compliance with the request contained in your application of this date, I am instructed by the Secretary for Lands to convey to you authority to select, within twelve months from this date, two blocks of 80 acres each from any available Crown Lands, for the purpose of working minerals other than gold, subject, of course, to all prior claims, and to all the conditions of the Crown Lands Occupation Act of 1861, and the regulations founded thereon.

2. If no unobjectionable selection be reported to this Department within twelve months from this date, the present authority will be considered obsolete, and the first year's rent already paid by you will be forfeited.

I have, &c.,
LINDSAY G. THOMPSON,
For the Under Secretary.

No. 3.

MESSRS. BROWN AND JONES TO THE SECRETARY FOR LANDS.

Notification of selection of land for mining purposes other than gold-mining.

Sydney, 8 July, 1872.

SIR,

Received at 2:35,
8/7/72.

We have the honor to report to you that, in pursuance of the authority conveyed to us in the letter of the Under Secretary for Lands, dated 8th instant, we have selected the portion of Crown Lands hereunder described, for the purpose of working copper, viz. :—80 acres, county of _____, parish of _____, situated on the west side of Togra Creek,—one half south the other half north of the crossing-place to Quereira Station.

We have, &c.,
ALFRED BROWN,
per T. S. JONES.
THOS. S. JONES.

No. 8.

MESSRS. BROWN AND JONES TO THE SECRETARY FOR LANDS.

32, Hunter-street,
11 July, 1872.

SIR,

Understanding that portion of the land taken up by us under mineral lease at Togra or Tonga Creek, county of St. Vincent, has been tendered for by written application in Sydney by some other persons, we have the honor to inform you that such persons have never been on the ground, and as we are in possession and occupation, under the authority of the Minister for Lands, we claim to hold it against all merely speculative selectors, in accordance with the decision of the *Minister for Lands and the opinion of the Crown Law Officers.

We are, &c.,

ALFRED BROWN,
per T. S. JONES.
THOS. S. JONES.

* This must refer to a previous decision in another case, by a former Minister.—J.S.F.

Let a statutory declaration be made as to the facts of possession and occupation on the 8th July.—
J.S.F., 15/7/72.

No. 9.

STATUTORY DECLARATION BY THOMAS SHELL JONES.

New South Wales, City of Sydney, }
to wit. }

I, THOMAS SHELL JONES, of No. 32, Hunter-street, in the City of Sydney, in the Colony of New South Wales, do solemnly and sincerely declare, that the two 80-acre blocks of land at Togra or Tonga Creek, in the county of St. Vincent, taken up in the names of Alfred Brown and myself on the 8th instant, were taken up on account of Robert Stobo, and I agree to transfer them to him when required; and I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "*An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits.*"

THOMAS S. JONES.

Taken and declared in the City of Sydney, in the said }
Colony, this 16th day of July, 1872, before me,— }

G. R. ELLIOTT, J.P.,

No. 10.

STATUTORY DECLARATION BY ROBERT STOBO.

New South Wales, City of Sydney, }
to wit. }

I, ROBERT STOBO, of _____-street, in the City of Sydney, in the Colony of New South Wales, do solemnly and sincerely declare, that I am the rightful owner of the two 80-acre blocks of land on Tanga Creek, taken up under the 22nd clause of the Crown Lands Occupation Act by Messrs. Alfred Brown and Thomas Jones on the 8th instant, and that on that day I was in possession of the land, and had

had two men at work upon it, opening up the ground to trace the lode of copper ; and I declare moreover, that the insertion of Messrs. Brown and Jones's names as the selectors of the land from the Crown was done in error, and that to the best of my belief they are willing to transfer to me absolutely all their right and title to the land in question ; and I further solemnly declare that, to the best of my knowledge and belief, no other person whatever had been on the ground to prospect it or work on it, as I have had two men there from the 3rd instant, and that on the 8th instant they were in possession and at work on it on my account ; and I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "*An Act for the more effectual abolition of oaths and affirmations-taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits.*"

ROBERT STOBO.

Taken and declared in the City of Sydney, in the said }
 Colony, this 16th day of July, 1872, before me,— }

R. PEEL RAYMOND, J.P.,
 One of Her Majesty's Justices of the Peace.

No. 11.

MESSRS. DUGUID & CO. (ON BEHALF OF MESSRS. M'GRATH AND PARTY), to THE UNDER SECRETARY FOR LANDS.

74, Pitt-street North,
 Sydney, 17 July, 1872.

SIR,

We understand that certain parties are disputing the right of our clients, the Messrs. M'Grath, Larmer, and Bennison, to their mineral lease of 60 acres on Toga Creek, county of St. Vincent, selected on 8th instant, on the grounds that our clients are merely speculators and not *bonâ fide* selectors. We shall be prepared to lay before you in a few days statutory declarations from our clients, showing that they were not only in possession of the land on the day named, but that they had been prospecting in the neighbourhood for many weeks previous.

Pending the production of these documents we have to request that you will be so good as to withhold judgment in this case.

We have, &c.,
 DUGUID & CO.

No. 12.

STATUTORY DECLARATION BY ALFRED BROWN.

New South Wales, City of Sydney, }
 to wit. }

I, ALFRED BROWN, of Elizabeth-street, Redfern, in the City of Sydney, in the Colony of New South Wales, do solemnly and sincerely declare that the two 80-acre blocks of land at Togra or Tonga Creek, in the county of St. Vincent, taken up in the names Thomas Shell Jones and myself, on the 8th instant, were taken up on account of Robert Stobo, and I agree to transfer them to him when required ; and I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "*An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits.*"

ALFRED BROWN.

 Colony, this 20th day of July, 1872, before me,— }

GERARD PHILLIPS,
 One of Her Majesty's Justices of the Peace.

No. 13.

MR. R. STOBO to THE SECRETARY FOR LANDS.

Sydney, 22 July, 1872.

SIR,

I would most respectfully beg to bring to your notice the following circumstances in connection with the disputed mineral lease at Tonga Creek :—

I was the first who thoroughly prospected the land about Narriga, and about the end of May, having discovered good indications, left for Sydney to take up land, and, after doing so, found I had been anticipated by Larmer, M'Grath, and others, having taken it up by telegram.

Since then, after great expense and labour, I discovered good ground on Tonga Creek, left two men in possession, with tools, provisions, &c., and left for Sydney to take up the land, which was done on the 8th instant. I now learn that the same parties—Larmer, M'Grath, and others—had taken it two hours before I did, although I was in undoubted occupation.

Under these circumstances I would humbly crave your favourable consideration, as if I fail in getting this land the consequences will be ruinous to me.

I have, &c.,
 ROBERT STOBO.

No. 14.

MESSRS. DUGUID & Co. to THE UNDER SECRETARY FOR LANDS.

74, Pitt-street North,
Sydney, 23 July, 1872.

SIR,

No. 11.

Referring to our letter of the 17th instant, we have now the honor to enclose statutory declarations from W. E. Larmer, W. N. Bennison, and John M'Grath, relative to the selection made by them of 60 acres of land for mineral purposes, on 8th instant, at Togo Creek. We also beg to enclose Mr. Bennison's letter on the subject, to the contents of which we have to request you will be good enough to give your most particular attention.

Asking that Mr. Bennison's letter may be returned to us after perusal,

We have, &c.,
DUGUID & CO.

[Enclosures.]

A.

WE, W. E. Larmer, of Braidwood, licensed surveyor, and W. N. Bennison, of Braidwood, miller, do solemnly and sincerely declare, that with reference to an application to select 60 acres at Togo Creek, as a mineral lease, on the 8th instant, that we were *bond fide* prospectors in the neighbourhood of that land for several weeks; also, that I, W. E. Larmer, have camped out all the winter as prospector; and we make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "*An Act for the effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits.*"

this 22nd day of July, 1872,— }

J. H. GRIFFIN, J.P.

B.

I, JOHN M'GRATH, farmer, of Quiera, near Togo Creek, do solemnly and sincerely declare, that on the 8th instant I was in possession of certain land at Togo Creek, which was taken up as a mineral lease on behalf of myself and six other persons, and that I have been in possession of the land ever since. I further declare that I have been prospecting for minerals in the locality in question for several weeks, and that the selection of the land referred to was a *bond fide* result of my prospecting labor; and I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "*An Act for the effectual abolition of oaths and affirmations taken and made in the various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits.*"

C.

Mr. W. N. Bennison to Messrs. Duguid & Co.

Braidwood, 22 July, 1872.

Gentlemen,

In accordance with my father's (Mr. Bennison, senior's) intimation, received by me on Thursday last, I proceeded to the Togo mine, and have returned last evening, bringing with me John M'Grath, whose declaration is herewith transmitted to you. Had I known at the time I started that Frank M'Grath's declaration would be required, I should have brought him back with me. He was also prospecting the mine previous to application. It was by the merest chance that Stobo was laid upon the scent of the mine. Mr. Larmer and myself also herewith declare to having been prospectors in the neighbourhood for many weeks previously. If you think it quite necessary Frank's declaration can be obtained, though it seems hard we should be compelled to fight such a shadow as Stobo, and have to ride for a hundred miles to bring the parties from the mine to make these declarations, there being no Magistrate nearer than Braidwood. You will understand that this is the second time that Stobo has attempted this trick. The first was with the Corang (St. Bernard) mine, when, knowing well that Bernard M'Grath was the discoverer of that mine, after infinite toil, as a prospector, he (Stobo) endeavoured to wrest from M'Grath all the advantages attendant on the discovery; and though M'Grath's application was first for that mine, and he (Stobo) knew that he was so, yet kept him at bay for a fortnight, stating that he was acting by the advice of Mr. Brown, of the Lands or Treasury.

I am, &c.,
W. N. BENNISON.

No. 15.

MR. R. STOBO to THE SECRETARY FOR LANDS.

Sydney, 25 July, 1872.

SIR,

I would most respectfully beg to submit to you the following additional facts in connection with the disputed mineral lease at Tonga Creek.

On the 4th June I paid for and took up 40 acres on the Shoalhaven River, one and a-half mile above the junction of the Corang. After being on the ground from 10th to 13th June, Larmer and two M'Grath's came and told me the ground was theirs as they had taken it, by telegram, several days before I did. I had therefore to leave and look for fresh ground. The 40 acres still stand in my name, and I submit that I am entitled to hold, if not the whole of the land selected on Tonga, at least the 40 acres taken up on the 4th June; and I am prepared to prove that neither Larmer or the M'Grath's had prospected the disputed ground from the 26th June till 8th July, as I have one of the men here who held possession for me from the 3rd till 13th July; and further, that their first application was very indefinite, and did not state which side of the creek the 60 acres were to be taken, nor was it specified that it was to be on both sides of the creek.

I have, &c.,
ROBERT STOBO.

DECLARATION OF ALFRED BROWN.

I, ALFRED BROWN, do hereby solemnly declare that I was at Tonga Creek, county of St. Vincent, from Tuesday, 2nd July, till Tuesday, 16th July, and that I was joined by Hugh Henry on Saturday, the 6th July, with tools and provisions; and that we commenced work, clearing away to show copper-lode, on Monday, the 8th instant; and that we held possession for Robert Stobo, who had gone to Sydney to take up the land; that I remained on the land till the 16th instant; and that, to the best of my knowledge and belief, Hugh Henry has continued to hold the land for R. Stobo ever since.

I further solemnly declare there was no one prospecting or at work, or anyone even seen on the ground, except one man after cattle, from the 8th to the 13th July, and that, to the best of my knowledge and belief, Hugh Henry and myself were the only persons near the ground, viz.,—the two blocks applied for by Robert Stobo: And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the sixth year of the reign of His late Majesty King William the IV, intituled, "*An Act to repeal an Act of the present Session of Parliament intituled An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the State and to substitute declarations in lieu thereof and for the more entire suppression of voluntary and extra-judicial oaths and affidavits and to make other provisions for the abolition of unnecessary oaths,*" and by virtue of the provisions of an Act of the Governor and Legislative Council of New South Wales, made and passed in the ninth year of the reign of Her Majesty Queen Victoria, intituled "*An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits.*"

No. 18.

J. B. WILSON, Esq., to THE SECRETARY FOR LANDS.

Sydney, 29 July, 1872.

SIR,

On the 8th July Messrs. M'Grath, Bennison, and Larmer made a mineral selection of 60 acres at Togo Creek, county of St. Vincent, in which I have an interest, and I understand they have been called upon to make a declaration to the effect that they were in possession of the ground when the selection was made. This declaration has been sent in; and in further corroboration of it I beg to inform you that two of the Messrs. M'Grath's live in the immediate locality, in fact, within a mile of the ground, and not only marked the selection, but have been on it, both at the time of selection and daily since. The party making the declaration, to the effect that the Messrs. M'Grath & Co. were not in possession, are, in fact, the only speculative prospectors.

I have, &c.,
J. BOWIE WILSON.

No. 19.

J. B. WILSON, Esq., to THE SECRETARY FOR LANDS.

Sydney, 6 August, 1872.

SIR,

Referring to my previous letter, and our conversation yesterday, respecting Messrs. M'Grath & Co.'s mineral selection at Togo, county of St. Vincent, which is disputed by a Captain Stobo, and concerning which a declaration has been made by a Mr. Brown, to the effect that none of the Messrs. M'Grath's party were on the ground from the 2nd July to the 16th July, and a counter-declaration by J. M'Grath, to the effect that he was on the ground daily from the date of selection, I beg leave to suggest, as you appear to consider the priority of actual occupation of so much importance, that further evidence be called for, as I distinctly state that Mr. Brown's declaration can be *clearly disproved*, and that of Mr. M'Grath verified by incontestable evidence. See No. 18.

I would also draw your attention respectfully to the fact that Captain Stobo, the claimant, has, by his own showing, never been in possession.

As I stated in my former letter, my excuse for writing to you is that I have an interest in Messrs. M'Grath and Company's claim.

I have, &c.,
J. BOWIE WILSON.

No. 20.

THE UNDER SECRETARY FOR LANDS to DUGUID & Co.

Department of Lands,
Sydney, 14 August, 1872.

GENTLEMEN,

With reference to your letter of the 17th ultimo, on behalf of Messrs. M'Grath and party, respecting their claim to a mineral lease of 60 acres on Togo Creek, in the county of St. Vincent, included in a mineral selection applied for and taken possession of by Captain Stobo, I am directed to inform you that after a full consideration of the several declarations of the parties interested in this matter, the Minister for Lands has decided in favour of Captain Stobo.

I have, &c.,
W. W. STEPHEN.

No. 21.

THE UNDER SECRETARY FOR LANDS to CAPTAIN STOBO.

Department of Lands,
Sydney, 14 August, 1872.

SIR,

Referring to your letter of the 25th ultimo, further respecting the mineral lease on Togo Creek, in the county of St. Vincent, in dispute between Messrs. M'Grath, Larmer, and Bennison and yourself, I am directed to inform you that the Honorable the Minister for Lands has given his decision in your favor.

I have, &c.,
W. W. STEPHEN.

No. 22.

PETITION OF MESSRS. DUGUID & Co.

To His Excellency SIR HERCULES GEORGE ROBERT ROBINSON, Knight Commander of the Most Distinguished Order of St. Michael and St. George, Governor and Commander-in-Chief of the Colony of New South Wales and its dependencies, and the Executive Council of New South Wales.

The Petition of Duguid and Co., agents for Messrs. M'Grath, Bennison, & Larmer,—

HUMBLY SHOWETH:—

That on the eighth day of July last, Messrs. M'Grath, Bennison, & Larmer made a mineral selection at Togo, county of St. Vincent, and that some time afterwards the same piece of land was selected by Messrs. Brown & Jones.

Notwithstanding the priority of selection by Messrs. M'Grath & Co., the Honorable the Minister for Lands has decided that the lease of the said land should be granted to a Captain Stobo, Mr. Brown having declared that the selection by Messrs. Brown & Jones was made in mistake, and that the selection made in their names should have been in the name of Captain Stobo.

Your Petitioners believe that this decision is contrary to law and equity, and that Messrs. M'Grath & Co. are entitled to the lease of this land on account of their priority of selection, and also from the fact of their having been in constant occupation.

Your Petitioners therefore humbly pray that your Excellency and the Council may be pleased to cause a reconsideration of this case, and, should the decision of the Honorable the Minister for Lands be affirmed, to delay the issuing of a lease to the said Captain Stobo, pending a reference to the Legislative Assembly, the Honorable Member for West Sydney (Mr. Robertson) having moved for a copy of the papers in this case, which has been ordered to be laid on the table of the House.

And your Petitioners will ever pray.

74, Pitt-street North,
Sydney, 19th August, 1872.DUGUID & CO.,
Agents for MESSRS. M'GRATH, BENNISON, & LARMER.Cabinet have considered petition, and see no reason for interfering with decision of Minister.—
H.P., 18/9/72.The Under Secretary for Lands informs Messrs. Duguid & Co. of the decision of the Cabinet.—
L.G.T., 20/9/72.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS OCCUPATION ACT OF 1861.

(REGULATIONS FOR WORKING FOR GOLD ON LAND LEASED FOR MINING PURPOSES OTHER THAN GOLD.)

*Ordered by the Legislative Assembly to be printed, 8 November, 1872.*Department of Lands,
Sydney, 13 September, 1872.

MINERAL LEASES.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Regulation having reference to working for gold on land leased under the Crown Lands Occupation Act of 1861, for mining purposes other than gold, and determining the conditions upon which, when gold is found to exist upon any such lands, the lessees shall be entitled to extract and retain possession of the same.

JAMES S. FARNELL.

From and after the 1st day of October next, whenever payable gold is found to exist on lands leased under the Crown Lands Occupation Act of 1861, for mineral purposes other than Gold-mining, it shall be lawful for the Lessee or Lessees of the said lands to retain the said gold, notwithstanding that the same is reserved by the lease, upon payment by way of rental, in addition to that prescribed by the above-mentioned Act, of a royalty of 5 per centum upon the value of the gold obtained.

In any cases, however, in which the auriferous nature of the land so leased, or the quantity of gold obtainable therefrom in proportion to any other minerals, shall appear to him to justify it, the Minister for Lands shall have a discretionary power of refusing to allow the said lands to be worked upon royalty, and causing the Lessee or Lessees to work the same under, and at the rental prescribed by the Gold Fields Regulations.

Persons extracting gold under a royalty will be required to enter into a Bond for the due payment of the same, any infraction of the conditions of which will involve the forfeiture of their leases.

1872.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TIN-BEARING COUNTRY, DISTRICT OF INVERELL.

(REPORT BY C. T. WILKINSON, I.S., ENCLOSING REV. W. B. CLARKE'S REPORT ON GEOLOGICAL SURVEYS, 7 MAY, 1863.)

Ordered by the Legislative Assembly to be printed, 15 January, 1873.

MR. LICENSED-SURVEYOR WILKINSON to THE SURVEYOR GENERAL.

Inverell, 6 December, 1872.

SIR,

At your request I have the honor to furnish you with a few notes on the geological character of part of the tin-bearing country in the district of Inverell.

Since my arrival here, and until within the last fortnight, I have been almost entirely occupied with the survey of the new village at the Bundarra Crossing on Cope's Creek, so that at present I am able to give you only a short description of the geology of the country in the vicinity of Cope's Creek.

With the exception of those on Lower Cope's Creek, I have examined most of the principal tin mines from near the Bundarra Crossing to the neighbourhood of the village of Tiengah, including the Britannia, Darby's Creek, Albion, New Banca, Cope-Hardinge, Hit or Miss, Pentowan, Inverell, Victoria, Lyngarra (Captain Swinton's), Morning Star, St. Helena, Comet, and other mines.

The principal geological formations in this district are greenstone-trap, granite,—and, about two miles north from Cope's Creek some of the hills are cropped with tertiary gravelly cement, and a remarkable sandy ironstone, composed almost entirely of small round ferruginous concretions.

The surface features of the country are very broken, consisting of irregular lines of rugged hills, seldom higher than 500 feet, and where of granite formation are frequently covered with huge masses and boulders of rock of the most grotesque forms, while, in places along the tortuous course of Cope's Creek, narrow alluvial flats occur, and in others the rocky hills terminate abruptly, forming wild precipices and ravines—no slight obstacles to the progress of the surveyor.

At the Bundarra Road Crossing, and for 2 miles to the south, the formation is greenstone-trap; but immediately to the north and west the granite appears, and extends for some distance.

This greenstone-trap consists in some places of a hard—almost black rock, resembling dense basalt, and contains small nests of radiating crystals of a greenish mineral, probably epidote; in other places it changes into a hard crystalline quartzite, like an altered fine-grained sandstone. This forms excellent road metal, and is easily quarried, for near the surface it readily breaks up into small angular fragments. With the exception of some granite about a mile from the Bundarra Road, this trap rocks extends to the eastward up Cope's Creek as far as Captain Swinton's station, where it is traversed in a north-westerly direction by several dykes (one 10 yards wide) of entire granite. These dykes are split up by numerous vertical joints, running E. 5° N., similar to those in the adjoining granite. Quartz veins occur in the greenstone, and as there is little doubt but that some of them will be found auriferous I would encourage prospectors to test them; several coarse specks of gold from the alluvial in the creeks have been shown to me.

The granite formation varies much in character, from the simple binary combination of quartz and felspar to that with mica added, the three components varying in colour and in proportion even within the space of a few yards. Eastward of Captain Swinton's station it becomes porphyritic, and assumes a white speckled appearance, from the numerous enclosed crystals (about an inch in size) of white felspar (orthoclase). In many places cavities occur in the granite; these are frequently lined with beautiful crystals of smoky quartz; small nests of radiating crystals of black tourmaline (school) are also common in the rock.

Thin veins of quartz and vertical joints traverse the granite in a northerly direction; these have been "faulted" in a remarkable manner by another set of joints running between E. 5° N. and N.E., the faults or slips are, on a small scale, as perfect as those commonly seen in the carboniferous and other sedimentary strata. They are well shown in the granite at the Rex Tin-mining Company's ground on Middle Creek, or the Cope-Hardinge mine, near Tiengah; and again, about 8 miles lower down Cope's Creek. Indeed, throughout the whole granite area I now describe, the system of joints and veins prevails, and in some parts so regularly is the granite split up or cleaved by these vertical joints that it has the appearance of a stratified formation with the strata turned up on edge.

I have paid particular attention to this system of joints and veins, for at present no minerals of value have been found in those having a *meridional* direction, while with but one or two exceptions it is only in the veins and joints bearing E. 5° N.E. (which are evidently of more recent origin) that the tin lodes have been found in the vicinity of Cope's Creek. It is of the greatest importance that the modes of occurrence of the tin ore should be clearly ascertained, in order that the miner may be guided with certainty in his prospecting operations.

In the Boundary Tin-mine several quartz veins have been opened in ordinary tertiary granite; they strike E. 20° N., and the dip is nearly vertical. The quartz is coarsely crystalline, and the tin ore occurs in crystals scattered through it, also to a small extent through the encasing granite walls. One of the veins now about to be opened has a soft and more felspathic casing than the others. Another reef has been struck on Simonis' mineral lease, near Sutherland's Water. It consists of an irregular dyke or vein of felspathic granite about 2 feet thick, traversing, in a direction E. 15° 20' N., porphyritic granite. Narrow veins of quartz run through the dyke, and both it and the quartz contain thin lodes and patches of pure tin ore beautifully crystallized. The stone is much stained with green and red oxides of iron. The general character of this dyke should I think encourage further prospecting of it.

About half a mile to the westward another lode of tin ore has been discovered on Thompson's land; it occurs in hard granite, is about 3 inches thick, with a thin parting of quartz running along the middle of it, and its bearing is the same as the other lodes in this district,—about E.N.E.

On the Hit or Miss Co.'s ground, at the head of Long Gully, a soft felspathic eurite dyke, about 2 feet wide, has been opened to a depth of 20 feet; its dip is vertical, and a lode of solid tin ore, from 2 to 4 inches thick, follows down the centre of it; it should be further prospected. A few yards to the east a quartz reef crops out on the surface, apparently connected with this lode. For two or three hundred yards from this lode several smaller lodes of tin ore, from a quarter to one inch thick, with thin quartz veins, have been disclosed by removing the surface soil, which is rich in small angular fragments of tin ore, evidently derived from these lodes. All the lodes strike about E. 20° N.

About a mile to the S.W., on the Wollumbi Co.'s land, a shaft has been sunk 25 feet in hard grey porphyritic granite, traversed by several narrow dykes of white eurite. In these, 11 thin seams (each about a quarter of an inch thick) of oxide of tin, in fine crystals, have been found in a width of about 5 feet. They all bear E.N.E.

On the north side of Cope's Creek, about a mile from Captain Swinton's station, Messrs. Martin and Irwin have found a dyke about 20 feet wide of white felspathic eurite in granite of a similar character; its direction is E. 5° N., and a few thin seams of tin ore and quartz run through it. The surface soil on the side of the hill below this dyke is now being sluiced, and yields from 20 to 40 lbs. of tin ore to the load. About one mile to the N.E., Messrs. Martin and Irwin have another block of land adjoining that of the Inverell Company. Here, in the surface soil at the head of a gully, they have found lumps of solid tin ore 3 or more inches thick; these are not waterworn, and must therefore have been derived from a lode not far distant, in prospecting for which several thin lodes of tin ore have been found; also a quartz vein 4 inches thick, with crystals of tin ore scattered through it; their course is about E. 15° N.

At the Britannia Co.'s Mine, on Darby's Branch Creek, above its junction with Cope's Creek, a quartz vein 8 inches thick traverses granite in the same direction as the joints, E. 20° N. It contains iron pyrites, galena, and green carbonate of copper. I have collected specimens of this stone for assay.

As before mentioned, some of the hills north of Cope's Creek are capped with deposits of gravel and ironstone. These are of tertiary formation, and in lithological character resemble the older pliocene drifts and leads of Victoria. Exactly as we should expect, therefore, I have observed in these hills patches of very *waterworn* gravel, which appears to be the remains of an alluvial lead or watercourse, that in the older Tertiary period flowed across the country now occupied by a very different system of drainage. Near the Cope-Harding mine, a small patch of this waterworn drift occurs, which the prospector of it informed me yielded from 4 to 15 pounds weight of stream tin to the dish; but being cemented it could not be well sluiced without crushing. About half a mile to the south the drift is seen again, partly covered up by a flow of basaltic lava. This lava stream, as is frequently the case in Victoria and elsewhere, may indicate the course of the old valley down which it flowed. I advised the proprietors of the land to prospect this spot. The tertiary formation may be noticed again on one block of the Inverell Co.'s land, and in the ranges to the N.E. a small patch also occurs on Sawpit Hill, on Captain Swinton's land.

The new Banca Tin Mining Co. are now sluicing the surfacing from the top of a range where this tertiary drift has been all-but removed by denudation. It averages about 13 pounds weight of stream tin to the load. The tin ore is coarse and as much waterworn as the rounded pebbles of the drift from which it is derived,—significant evidence of the former transporting force of the old water stream, whose gravelly channel is now marked only by isolated remnants here and there on the tops of the ridges; the intervening spaces having been washed away by recent atmospheric influences, which have hollowed out the present valleys.

On the New Banca Company's ground this drift deepens towards the north, and, overlaid by basaltic lava, it appears to continue in a north-easterly direction, but I had not time to examine it further.

Hitherto miners have carefully confined their operations to working the recent alluvium in the beds of the creeks; surfacing on the sides of the hills has been carried on to some extent, but the creek drifts have yielded the largest supply of tin ore. Narrow alluvial flats extend along the course of Cope's Creek; in them the alluvium seldom obtains a greater thickness than 20 feet, the wash-dirt scarcely averaging 2 feet thick. In the bed of the creek but little stripping is required, and the wash in places averages 3 feet deep. The yield is from a few ounces up to 8 or 10 pounds' weight (in some instances) of stream tin to the dish, and is generally the same in most claims, though some have larger rich patches than others. In Mr. Holme's claim, the "Victoria," between Captain Swinton's station and the Inverell Company's mine, *eleven cwt.* of stream tin in one day have been obtained by twelve men.

I have collected statistics from twenty-seven mines, the yield of tin ore up to the present time, together with the number of the men employed, &c. These statistics show that 310 were employed for an

average

average period of *four months*, and that the total yield of tin ore has been 319 tons; of this, one mine, the Britannia, has raised 50 tons in six months.

In estimating from these data the average earnings per man, it must be remembered that, owing to the inclemency of the weather, floods, and the time required for the erection of necessary improvements and machinery, the miners were not actually employed in raising tin ore probably more than three-quarters of the average time above stated. When the weather becomes more settled, and the miners fully employed, the average returns from Cope's Creek will probably increase.

The above-mentioned 319 tons of ore were from only twenty-seven mines. There are other mines in this district which I was unable to visit. However, I believe that the total yield of stream tin from Cope's Creek up to the present time will not much exceed 400 tons.

From the foregoing notes it will be seen that a geological examination of the Cope's Creek District is not without much interest and value. We notice that the four principal formations are greenstone trap, granite, the older tertiary gravels, and the recent alluvial deposits.

In the greenstone trap I believe that auriferous quartz reefs will reward the prospector. The granite in this district is, so far as we know, the source of the tin ore, and from what has been ascertained up to the present time, we learn that the tin lodes are associated with the numerous veins and joints which traverse the granite in a direction between E. 5° and N.E., and also that the largest lodes yet discovered occur with quartz veins in felspathic eurite dykes. Should larger dykes, therefore, of this character, and having the above-mentioned bearing, exist, they may probably be found to contain profitable tin lodes. There is no reason why such lodes may not exist: hitherto so little attention has been devoted in searching for them.

The discovery of the older tertiary alluvial leads is doubtless of much importance. Where this old drift has been tested *in situ* it has been found rich in coarse stream tin. If the actual channel of the old stream could be found it might be found richly payable. But I would also draw the attention of prospectors to where the present gullies have cut through the lead and redistributed its rich contents in their own channels a few hundred yards lower down. Where similar instances occur in Victoria, the beds of the existing gullies are sometimes found richer than that of the old lead they have cut through; they have as it were ground-sluiced the contents of the lead which once crossed the present valley, and have concentrated its rich minerals within their own narrow channels.

With reference to the richness of the recent alluvial deposits in Cope's Creek, the statistics which I have given above will speak favourably. Some of the smaller claims cannot take long to be worked out, while many others it will require several years to exhaust them of their riches, according to the number of men employed and the system of management.

I cannot believe that in many cases astonishing rich yields will be revealed, but there can be no doubt that tin-mining in this district will become a profitable industry for a numerous population during many years to come.

Rich specimens of copper ore found in the district have been shown to me.

Sapphires of various colours are of common occurrence with the stream tin in Cope's Creek.

Two diamonds are said to have been found in Darby's Branch Creek,—on the Britannia Mine. I am informed that as many as *sixty* diamonds from one claim and *forty* from another were obtained lately in the Bora or Maids Creek, a few miles S.W. from the Bundarra, crossing Cope's Creek.

I have taken barometric observations (with an aneroid) of the principal localities from Murrurundi to Inverell, and in this district, in order to ascertain approximately their heights above sea level, but these I hope to embody in a future Report on the Inverell District.

In the years 1852 and 1853, I believe, the Rev. W. B. Clarke explored the Northern Districts,* and reported on their tin-bearing character.

I wish that I had here his "Northern Reports" for reference,—they would be most valuable for me.

I have, &c.,
C. T. WILKINSON,
Licensed Surveyor.

Recommended that this report be brought before the public, as it contains most valuable information, and perhaps laid before Parliament. At the same time, it might also be well to publish an extract from the Report of the Revd. W. B. Clarke, dated 7th May, 1853; the portions marked in pencil appear to bear most upon the subject—the whole report being too lengthy for publication.—P.F.A.

Copy of this to be prepared for laying before Parliament, together I think with the accompanying printed papers.—J.S.F., 3/1/73.

[Enclosure.]

Letter from the Rev. W. B. Clarke, to the Honorable the Colonial Secretary, on the Geological structure of the western slopes of the Highlands of New England, between the summits of the Cordillera and the interior, in the basins of the Gwydir and Macintyre Rivers.

REPORT No. VIII.

Tarahmbwoan, Ranger's Valley, Severn River,
7th May, 1853.

Sir,

During the period which has elapsed since I had the honor of forwarding my last Report, I have been engaged in exploring the western falls of New England, and a considerable tract in the district of the Gwydir; but I have had to contend with, at least, seven weeks of rainy weather, and therefore the interval that has occurred has been extended longer than I anticipated. I trust, however, that the following remarks will show that I have not been neglectful of the objects of my expedition.

In the instructions which I had the honor of receiving from His Excellency the Governor General, I was directed to follow down "the westerly waters towards the meridian of Warialda," and to "examine so much of the adjacent country as time might allow."

I have now the honor of stating, for His Excellency's information, that I have followed down in succession every main creek and river for a considerable distance to the westward, between the Rocky River and the Mole inclusive, that I have examined the Macintyre River (crossing it at seven different points between its source and its junction with the Severn), and that

that I have followed the Gwydir to the termination of the ranges to the westward of Warialda, having seen the sun set upon an horizon as level as the Pacific, in the direction of Moree, where Major Mitchell, in his expedition of 1832 (about 9th January), reached the Gwydir. As I was within less than 100 miles of the point on the Karoola where that expedition terminated, and as I have seen a considerable portion of the upper part of that river, as well as crossed the tracks of the late Mr. Cunningham in his expedition of 1827, I did not consider it necessary to pursue my journey further west, into what is known to be an almost level country, with scarcely a rise of a few feet above the elevation of the interior; and as the desert traversed by the late Mr. Kennedy, between the Warrego and the Culgoa, lies not more than 250 miles to the westward of my last station, I consider that I have completed the observations necessary for a due west and east section from that desert to the highest part of the Cordillera, having carried a chain of barometrical observations backwards and forwards, between the commencement of the interior and the summit of the "Dividing Range."

As it is my intention to complete the section, on the same west and east course to the tidal waters, should I be enabled to succeed, I feel confident that this undertaking will not be considered unimportant in its results to the physical history of this country, especially as respects its geological structure.

I have further to state, for the information of His Excellency, that I have made careful barometrical observations on every summit, in succession, of the Ben Lomond Range, for the purpose of assisting in the settlement of a doubtful determination, and have obtained data, by the barometer and theodolite, for the calculation of the differences of level throughout a considerable part of the area under discussion.

Lastly, I have, during this survey, explored the Gold Field on the Bingera, and associated creeks falling into the Gwydir.

It is now my duty to lay before His Excellency a succinct account of the general geological results at which I have arrived.

I wish, however, to premise, that one of the objects which I had in view, in examining so many of the creeks and rivers in succession, was to ascertain whether an opinion expressed by me in my Report of the 15th November 1852 was correctly formed, and if so, what is to be considered the northern boundary of the auriferous tract alluded to in the following extract from the Report in question:—

"Looking at the disposition of the waters between this neighbourhood," (the Peel River) "and the head of the Hastings, on the one hand, and Bingera, on the other, I expect that in a north-west direction from Cobrabad to the latter Gold Field, the precious metal will be found generally distributed over a breadth of country perhaps thirty miles wide," &c.

From what I had since seen, I think I might have safely written *sixty or eighty*, instead of thirty miles; but I would wish to explain, for the benefit of persons in Europe, who may perchance be misled by the interpretation of the word "*miles*," that I do not, of course, allude to miles of solid gold, but to miles of land in which gold, more or less, may be found. From some expressions in English journals, which have, I fear, wilfully or carelessly misled many intending emigrants, whose imaginations and cupidity overreach their common sense, I deem it right to repudiate any such exaggerated accounts as the evil genius of Mammon has invented out of expressions which are strictly true as relating to the superficial area of certain auriferous tracts of country, but literally false if they are to be received according to the meaning which, it seems, for purposes best known to the interpreters, has been assigned to them. I have always been very anxious to avoid any exciting language, and I have been sorry to learn that out of those statements which I thought I had guarded by much caution (for which caution I have been sometimes blamed by persons in the Colony), the invention of the designing, or the eagerness of the covetous, has distilled a conclusion which my published statements do not justify, and to which no private letters of mine to persons in or out of the Colony, lend any authority. Having universally refused, when solicited, to give any information to Gold-dealing Companies, and having referred to these Reports to His Excellency as the only exposition of my views for which I hold myself responsible, I deem it right, and a solemn duty to the Government, to the Legislature, to the in-coming population of the Colony, and to myself, to declare that if, as I have been informed, my name has been employed in deceiving any persons at Home, it has been without my sanction or knowledge, and against the fairest interpretation of the words which I may have used in describing such parts of the country as I have found to be auriferous.

I can appeal with satisfaction to many persons in the Gold Fields, who have expressed their confidence in these Reports by stating that, after following my tracks, they have found that I have never "deceived them." Such persons would not interpret an auriferous tract 80 miles wide to mean 80 "miles of gold"; and it is in the desire of saving disappointment to some who may be unfitted for the laborious occupation of gold-seeking, and the doubtful results of even diligent work in a rich Gold Field, that I take occasion to introduce this warning, in my own defence, and for their benefit, that though gold may be procured easily enough in some localities, and though it may occur in an area of 80 miles wide and 150 miles long, the success will, probably, be obtained by few, and disappointment be felt by many.

The geological formations of which the present area is composed consist of various granites, porphyries, serpentine, and ordinary trappean products; metamorphic and unchanged slates, quartzites, and limestone; a series of carboniferous deposits, identical with that of the Hunter and Wollondilly basins; and alluvial deposits derived from the preceding, which are either spread locally, and of no considerable thickness, on the slopes of the rocks from which they have been produced, in the bottoms of dried lagoons, now forming muddy plains; or, as in the case of the interior, in deep stratified drift, through which the great rivers wind their sluggish way in drouthy weather, or in times of flood pour a muddy torrent to the far interior, between banks which they have cut in their passage through the slightly declining country.

It will simplify the description of this region to arrange the formations under separate heads.

I. GRANITE.—Rocks of this description, apparently of more than one period of emission, have been already described in my former Reports. They may be considered as forming a narrow band on the western side of the table-land between Boorolong and Maryland, sometimes cresting the Cordillera, but generally occupying a position subordinate in elevation to the trappean rocks, which form the frequent peaks and platforms, and which have forced their way through the granite or connected porphyry which it has overflowed. At the back of Maryland the grey granite is flanked by red granite, which also appears in various points between Warwick and Maryland, and between the latter place and the Severn, to the north-west of which line the country is chiefly slate.

The grey granite, which is auriferous on the Rocky River, is continued down the Bundarra or Gwydir to the neighbourhood of Mount Drummond, and is more or less auriferous throughout.

Granite, also auriferous, occurs about the Dividing Range at Boorolong, and as far as Larrayanuar (Sandy Creek); at the heads of Clarendon Creek and Sandy Creek, in both of which I found particles of gold.

Cope's Creek runs through granite, and is also auriferous.

Granite occupies a considerable area at the head of that creek, as at New Valley, and on the M'Intyre, between the junction of Ouerra Creek with that river and Newstead Creek. Paradise Creek also flows in part through granite. In the two last-mentioned localities I found no gold, the character of the rock being different to that of the Bundarra.

Granite also occurs in the lower part of Graham's Valley, and at Stonehenge and Beardy Plains, as well as near Dundee, where it is metalliferous, but, so far as I have seen, without gold. A singular grey hornblendic granite occurs about the junction of the main branches of the Severn, at Tarahmbwoan (meeting of the waters), and about Ranger's Valley.

Granite appears slightly near Nullamana, at the head of Frazer's Creek, and somewhat to the eastward of the junction of the Severn and M'Intyre. Between Ottley's Creek and the latter river I traversed a wide range of granite, the character of which induced me to think that gold will be found in small quantity in that range. It appears in the low grounds at Bannockburn, near the head of Byron Creek, and in the same way at Gurahmin, but rises to some elevation between the latter place and the M'Intyre, at Bukkulla. It extends for 17 or 18 miles to the northward of Gurahmin. It is probably connected with the appearance of the same formation between the falls of Cope's Creek and Keera. The Gwydir there breaks through the ranges in such an abrupt manner as to render the country impassable. It has, in this respect, an analogy with the Snowy River, near Biddi; it is in each case due to the direction of the main joints traversing the rock. A third instance is supplied by the M'Intyre, south of Coorubarumbarate, which traverses for some distance a vertical gorge of granite, giving to the river a character very much in contrast with its usual features. The Mole also flows in part through a gorge of granite. Grey granite occupies a portion of the country below the range, east of Terrahihi, between the Weah-waa and Horton's River, and on the latter; and I think may be found in some of the deep defiles which intersect the broken knot of mountains of the Nundawar Range, as between Tyreel and Caroga, on the west side of the former range.

Although it is very probable that other localities, which my time did not allow me to explore, might prove a still more extended existence of granites, the above examples are sufficient to show that it is widely distributed in the area under discussion, and, in connection with the already described tracts of granite on the Upper Namoi and Gwydir, which are known to be auriferous, it is probable that other auriferous patches may exist in the basal granitic region, or in some of the creeks not yet explored, in the higher portions of it. As granite exists on the table-land of New England, and on the deep and precipitous

falls to the Clarence (on the geology of which river I hope hereafter to be able to report), and about Maryland rises into lofty domes of striking outline as seen from the westward, we shall perceive that the solid nucleus of the mass of country represented by the districts of New England and the Upper Clarence, and in part by those of the Gwydir and Liverpool Plains, is granite of some kind, and that some of these granites may be the oldest formations, though from their connection with other igneous masses it is equally probable that other portions of the granites are of later eruptions. The granite about Mount Mitchell is auriferous.

I have not deemed it necessary to particularize the numerous observations I have made on the changes of mineral constitution and structure of these granites; it may suffice to say that their texture varies, and that their composition passes, on the one hand, by sensible or insensible gradations, into ordinary trappean rocks, and on the other, into binary and simple rocks, in which felspar and quartz respectively exclude all other materials. I wish, however, to mention, that at one spot (Bannockburn), the granite holds numerous lumps of steatitic matter, partially decomposing, which seems to disclose a connection with *magnesian* rocks, of which there are abundant examples in the serpentines hereafter to be mentioned, and the localities of which are not very far distant. At any rate, this granite contains more than the usual proportion of magnesia.

These granites are occasionally traversed by quartz veins, as well as veins of felspar, the latter mineral having been segregated on each side of a thin fissure, instances of which occur at Gurahmin.

The whole of the granites betray marks of erosion and decay, and some singular instances of rocking stones may be noticed in almost every granite locality; they are not, however, so well developed as in the grey variety, nor do they present the lofty pyramidal terminations which are so striking in the southern counties, being generally rounded, peeling off in concentric flakes. Crystals of blue, smoky, and brown quartz, as well as limpid rock crystal, occasionally occur; tourmaline in radiating masses is also met with.

Of metals beside gold I have met with sulphuret of antimony, as near Mount Mitchell and in the Boorolong Run, (as well as from the neighbourhood of Gara); graphite and molybdenite in radiating masses occur in the granite east of Dundee, and in more plentiful quantity near New Valley; wolfram and oxide of tin, with tourmaline, occur near Dundee and in Paradise Creek, and it is probable that this ore of tin is plentifully distributed in the alluvia of other tracts, as I have found it amidst the spinelle rubies, oriental emeralds, sapphires, and other gems of the detritus from granite. Iron also occurs in various modes in the veins traversing granite; and I am informed that both copper and lead have been detected in granite along the Peel; I saw the specimens but did not find them.

Such indications as the above prove that a granitic region is not so barren as some persons may be inclined to suppose.

If the ore of antimony should be found in any quantity hereafter, it will be valuable, but the experience of geologists is against the probability that it will be found abundant in or near granite of the age to which I am inclined to refer its matrix in New England.

Whilst thus naming metals from the district of New England, I take occasion to correct an error in my Fourth Report, which was accidental, by substituting the word *lead* for *galena*. The spe. gr. showed that the metal was not common galena or sulphuret of lead, but *native lead*, a mineral of very rare occurrence, and respecting the existence of which in other countries there has been much discussion among geologists. On looking into some notes made years ago, I find that I had recorded, as existing in the neighbourhood of the Peel, the occurrence of green malachite and a yellowish-white highly magnetic metal, having spe. gr. of 8.0 and a hardness of 5.5, the form also and other characteristics of placodine (an arsenical nickel); it dissolved readily in nitric acid, but was partially oxidised superficially. It has since been found on Wear's Creek, further to the south-west.

It may be interesting to mention that the loftiest elevation at which I have found granite in this journey was about 4,800 feet above the sea, and the lowest about 800 feet, on the same north-westerly slope from the Cordillera. The direct distance being 64 miles, the declivity of the plane (supposing it continuous) would be 62½ feet per mile: the fall of the waters being very much less, we have a plain proof that the river channels must run in deeply fissured rocks, as I have shown in the case of the Macintyre and Mole, or that the granites are, probably, of different epochs.

Before I quit this section, I would remark that, independently of the resemblance which I have seen in this region, amongst granitic and associated rocks, to those characters which I saw granites, &c., assume in the European Alps and in Devon and Cornwall, there are some circumstances mentioned in the recent history of Professor Forbes' scientific "Travels through the Alps of Savoy," (a work of which, probably, not two copies have found their way to this Colony), which appear to me to bear upon the age of the rocks respecting which I am writing. I beg leave, therefore, to cite the following passages, premising that I have already, in one of my former Reports (28th August, 1852), mentioned from another authority that *Gold* occurs in the Alpine granite of the region described by Professor Forbes:—

"The mass is granite, in which *sapphires* are found, though rarely in the *Couloir* immediately beyond the angle"; (the locality is on the *Mer de Glace* of Chamouni). "I have found a singular porphyritic rock amongst the fragments, containing felspar and *epidote*, which it is difficult to refer to any class of *primitive rocks*." (p. 78.)

"The glacier of Bosson has brought down beside and beneath it a great mass of debris of the rocks of Mont Blanc, including *serpentines of doubtful origin*." (p. 180.)

I add also, from Sir H. de la Bèche's Report on the Geology of Cornwall and Devon, that his friend "Mr. R. W. Fox obtained small nests of *plumbago*" (graphite) "from one of the *elvans* near Deveron, the only instance, we believe, of the occurrence of this mineral which has yet been noticed in Cornwall." (p. 182.) The same author also says that Mr. Fox obtained "*oxide tin in the form of crystals of felspar*;" (p. 390); it is in similar form that I have seen oxide of tin in New England, and the graphite of Dundee occurs as that of Deveron.—These resemblances may not do much towards the settlement of a question of epochs, but when there are other points of resemblance, they must not be forgotten.

II. PORPHYRY.—Connected with true granite there is in this region an immense display of porphyries of various compositions. In some places they appear to pass insensibly from and into masses of true granitic type; at other localities, they put on a form which unites them with ordinary trap. Thus, from a porphyritic granite to *eruite*, and thence to *cornean* bases with interspersed crystals of quartz, or larger masses of that mineral, which again assumes the condition of dykes or veins, or to mixtures of quartz and steatitic crystals in such a base, there is every variety of composition, colour, texture, and structure.

There is also an abundance of hard porphyry with double six-sided prisms of quartz and pale felspar crystals embedded in a base of felsparite, which sometimes so closely resembles the famous *Roborough stone* of Devonshire as to lead me to suspect that some of this New England porphyry exists as *elvans* amidst the granite, though the porphyry under one or another of its characters occupies wide tracks and assumes the forms of long ranges, the sweeping curves or rounded bosses of which are due to the different conditions of hardness. In general, I have found the granite nuclei surrounded by porphyry; but occasionally there is a distinct evidence at the planes of junction of some extraordinary transmutation. The porphyries are often divided by fissures and joints which, for some distance, are persistent, and so arranged as frequently to give the notion of stratification, but this appearance is as often cut off by a fresh arrangement of joints and a nodular structure, so that the joints resolve themselves into fissures produced by the cooling of boss-like swellings under irregular tension of the mass.

That this formation exists under some of the country now covered by black or red trappean alluvia was proved to me by my examination of the matters thrown up from wells attempted to be sunk on some of the so-called plains. In one instance, at King's Plains, I found that under the black surface soil the upper part of the hard porphyry was decomposed and loose, and completely altered by the long abode of water upon it before the upper soil had accumulated, and that the double hexagonal pyramids of quartz had been accumulated in heaps by the recent rains.

The porphyry contains veins of quartz on the heights above Moredun Creek; at the junction of Ouerra Creek with the Macintyre River, and at Corajin (Gragin) Creek; on the heights above Turracabad, and above Yarrabarra, and in other places near Ranger's Valley.

It appears to be associated with quartz rock on Pinduri Creek (as at Tower Hill Station) and near Weean Creek, and the intermediate change is marked by quartz porphyry along Frazer's Creek from Tolkiva to Gunnygeeren, and between that creek and Bukkulla, on the western side of the N. by E. strike which it there assumes, ridges of ironstone, containing iron which merely requires heating once or twice to become malleable, separating it from the trappean track along the Macintyre, which thus flows in a trappean channel on that point, between quartz porphyry and the granite range before mentioned as extending from Bannockburn. Quartz rock also occurs on the Beardy water branch of the Severn River at Yarrowford, and is connected with the porphyry which ranges thence for 30 or 40 miles towards the north-west. At that spot there is a little gold.

The base of the whole country, with the exceptions I have pointed out under the former section, and with some few which I may not have noticed, is composed of these different porphyritic rocks in the area roughly defined by the following limits. From Larraganum on Sandy Creek, where it joins the granite, about 8 miles from Boorolong, to Ollera (George's) Creek, Limestone Creek, (so called from nodules of alluvial calcareous matter in the surface soil), Moredun Creek, Ouerra Creek, to Wellingrove Creek and Strathbogie, including the ranges at the heads of the Karaula or Macintyre River, Undunbalah or Paradise Creek, Coorubarumbarat or Newstead Creek, Furracabad Creek, and the western sources of the Severn, to Talkibon and Taramboi feeders of the Mole River, (Deepwater and Castlereagh Creeks), thence crossing the Severn to Arawatta and Frazer's Creek and to the head of Byron Creek, and so along the ranges separating the waters of the Macintyre from those of the Gwydir, we have an irregular but general outline of about 3,700 square miles, in which porphyritic rocks under various modifications are strikingly developed.

In such an area there must, I think, be metals of some kind, but save the ores of iron I fell in with none; the abundance of quartz veins leads me to believe that further research amidst the broken country and rough defiles which I but hastily examined, might detect what has escaped my observation. But if, as I have already inferred, the porphyry assumes the nature of elvans, the metals about Dundee may belong to the porphyry rather than the granite, which at the point in question assumes a porphyritic character and finally merges into porphyry. The occurrence of porphyry of this class on the edge of an auriferous region in New England is quite in analogy with the occurrence of similar porphyry on the edge of the granitic Gold Field of the Araluen district. (See Report of 21st October, 1851.)

III. TRAPPEAN ROCKS.—Bursting through both granite and porphyry and overflowing them, basalts, amygdaloids, and a small proportion of greenstone, form a third kind of igneous rocks in the area under discussion.

They form the culminating points of the Cordillera on the Ben Lomond Range, and break out along the spurs from that range in various places on the western falls. That they have issued from the granite is shown very remarkably by several examples along the banks of the Macintyre a little below the junction of Ouerra Creek, and upon the broken ranges between the head of Paradise Creek and the junction with the river. The granite exists in the former place in well-rounded disintegrating masses, and it is in the midst of these and overflowing them, that a singular lumpy basalt forms semi-columnar ridges and platforms, presenting at a little distance the appearance of deeply fissured beds of conglomerate. A similar fact was noticed at a spot called Goodunbyangee. The trap is in a state of disintegration, and covers the slopes with its fragments. The granite was in a weathered condition before this trappean outburst.

On the ranges before alluded to, at least 600 feet above the other locality, and the exact spot of which I cannot define, because it is in the midst of the mountains, I found a similar instance, accompanied by a distinct change in the underlying rock, which is there a porphyritic granite over coarse crumbling granite. Between the trap and the porphyritic rock there is interposed a soft layer of redde, a substance very common on porphyry near trap, as at Ollera, and which was deposited from the trap upon the older formation.

The most remarkable example of similar changes which I observed was just above the junction of Ouerra Creek. The granite there exhibits most extraordinary conditions. The surface is decomposed, and the disintegrated materials have been deposited in waving layers concentric with the harder unaltered portions of granite upon them. A series of joints, defining the edges of the unaltered nodules of granite, pass through the re-deposited substance, and these joints are in part filled with ferruginous matter, whilst at a little distance veins of limpid quartz, some of them twelve inches wide, cut through other parts of the decomposed granite, from south-west to north-east; the whole is covered by a thick deposit of pebbles of trap cemented by calcareous matter, which owes its origin to the decomposition of that rock. The quartz is of the same character as that in porphyry which I noticed at Eden in 1852.

Again, on one of the branches of Bella Creek flowing towards Ottery's Creek from the trap range between Gragin and Gurahmin, a thick deposit of white and red clay containing fine particles of quartz lies between porphyry and an amygdaloidal trap, which passes into a variety very similar to that which occurs at Muswellbrook in the valley of the Hunter.

There are numerous other instances of change in position, in both the porphyry and granite regions, which prove unquestionably that some of the trap rocks have issued out of the granitic formation and overflowed it. I do not doubt that, as in the instance noticed in King's Plains, so in a variety of others, the porphyry as well as the granite had been decomposed superficially before the trappean outburst, and that in many cases the trap, as before mentioned in the neighbourhood of Boorolong (Report VI), has flowed in ancient valleys of the older granitic period.

Hereafter I will produce evidence to show that the period of the overflow was, at least further westward, posterior to the carboniferous formation, and that, therefore, it was, to a great degree, contemporaneous with the formation of the dykes and hills of trap which traverse the deposits of sandstone in the County of Cumberland.

Properly, the consideration of these rocks should have been deferred, but I have brought together the oldest and youngest of the formations because of their igneous character and their frequent association.

The disintegration of the lofty masses of trap which form such numerous peaks and flat-topped ranges in the western quarters, and even immediately under the "Dividing Ranges" of the eastern and western waters, has produced an enormous deposit of black or reddish-brown mud in the flat-bottomed valleys amidst the mountains, especially along the M'Intyre. It has served to fill up numerous hollows and basins which must once have been lagoons or swamps, and which in wet weather are still perfect sloughs. Mingled with this tenacious mud which covers also so vast an area of the Liverpool Plains, are fragments and partly rolled pebbles of the harder rocks that present themselves in half-stratified deposits in the banks of many of the creeks, which, as Swan Brook for instance, have cut their channels partly through them. In travelling from New England to the Gwydir I passed over nearly sixty miles, most of them consecutive, of this black alluvial soil, and as it was wet from recent heavy rains I found it most unpleasant. But it is said to afford rich pasture, and, therefore, stations are numerous upon it.

It has been before remarked, that calcareous concretions are common in this soil. The abundance of lime set free in the disintegration of the softer traps is the origin of these; and there must be an enormous amount of them, for they are collected by modern rains in hollows and channels and lie in heaps upon the slopes of many of the creeks, from the table-land downwards to the flat interior.

I think it not improbable, however, that during the trappean outbreak calcareous matter may have been produced independently.

It fell to the lot of myself and two gentlemen who joined my party, to pass the night on one occasion in the bed of a creek, being the driest place we could find, near the head of Swan Brook. In the morning I found myself amidst a trappean deposit of a somewhat different kind to what I had before seen in New England.

The lower parts of the banks were formed of hard nodular trap, jointed and apparently bedded; over these was a deposit similar to what is called "volcanic ash," entangling nodules and patches of trap, the whole bound together by calcareous matter, and covered by thin seams and layers of impure earthy lime which also coated many of the pebbles. I counted thirty-two separate layers of this calcareous biscuit. It is not improbable, therefore, that the breaking up of such deposits may, in part, account for the small concretions of lime which strew the black alluvium. And again, the outburst of springs at the junction of trap with other formations may account for the deposit of calcareous tufa so common throughout this country, and which forms bars across creeks by cementing the loose blocks and shingle, and, as I saw recently in a creek in the Bingera Gold Field, has invested the moss which covers the rocks and taken their impression, forming a similar tufa to those of Coton in Cambridge-shire and of Harrowgate in Yorkshire.

That much of the trap has overflowed is seen by the thin tile-like clink stones which occasionally are met with. The amygdaloids are sometimes empty, but the cells of the vesicular portions are occasionally charged with crystals of chabazite and lime. I have seen but few instances of minerals of the zeolite family, which are common in the Illawarra District, but agates and chaledony are ubiquitous in certain portions of the trap country, lying in numerous and singular forms upon the surface of the plains. I have seen several which appear to have been collected around an organic form of probably marine vegetation, the agate appearing in radiating tube-like patches as if the silica had been deposited upon some tough seaweed. But it is difficult to conjecture how the form could have been preserved in the hollow of a heated trappean paste or mud, so as to allow the subsequent infiltration upon it of the siliceous liquid.

I have not attempted to point out the separate localities where the trap rocks break out. These can only be shown upon a map, which cannot be coloured in the time at my command. I would, however, observe, that these rocks have broken out and assisted in forming the whole of the ribs from the backbone of the Cordillera, sending offsets south and north, and limiting the basins of the waters flowing to the interior, the furthest rocks upon which, save those obscured by alluvium, are of hornblende or felspathic trap, basalt, greenstone, or some form of porphyritic trap.

IV—AURIFEROUS FORMATIONS.—The auriferous country of which I am next to make mention, is hemmed in by the granitic and porphyritic rocks before described, on the north-east; and on the west and south-west by the porphyritic and trappean ranges of Nundewar, the Gwydir or Drummond's Range, and the headlands that mark the embouchure of that river into the ocean-like interior, at Bareena (Gravesend), Tulumbah, and Ko-ungundarra, westward of Warialda; eastward and north-eastward of these localities a long range in continuation of the separation between the waters of the Macintyre and Gwydir, from the neighbourhood of Cope's to Otley's Creek, confronts the long series of cone-like peaks at the end of the Gwydir Range, by those of Balfour's Peak, and Carajin, the latter of which is the most elegant and graceful hill of the kind I have anywhere seen. It takes its name from its representing a "tall fellow," which is also the meaning of *Courada*, the lofty summit which, amidst the more grotesque forms of Bounboorienbri, Terregee or Wohr Rock, Corya and Yalladirinda, presents itself in some aspects as a peak. Thus rocks of igneous origin form the furthest bulwarks of the mountain region against the intrusion of the winds which once blew over a waste of waters, but now range across a level region of alluvia supplied by the hills to the eastward.

It is impossible to avoid the conviction that at one period the level interior must have been so occupied by waters. Seen from any of the points in advance to the westward, the perfect level of the horizon, high up, as is the ocean seen from a cliff, with the undulations and refractions in the atmosphere along the tops of the trees, just as waves are seen under similar influences, and with the estuary and bay-like forms of the flat land coming up to the bases and between the spurs of the hills, it requires but little imagination to fill in again these bays and open spaces with water, and to imagine such solitary hills as Bareena, in advance of the headland, as an island, since it is yet separated by the channel of the Gwydir from the range to which it belongs, and stands in the midst of the plain, as many an island on the shores of the present sea.

It is the influence of forces, which belongs to the province of geology to describe and apply, that has changed the face of Nature from what we conclude it once was, to what we behold it now; and viewed by the light which Geology casts upon these mysterious works of Nature, and looking forward to the progress of events which have already covered large tracts of this reclaimed bed of ocean with flocks and herds and the habitations of civilized man, it is equally impossible to check the conviction that, before another century, this vast region, which was so difficult of access to its first explorer in 1832, may, by the aid of the iron in Australian hills, or the woods that clothe them, be traversed with ease from one coast to the other, and see even treasures buried by alluvial floods below the soil disinterred for the benefit of posterity.

With the facts before me it is not simple fancy which prompts this opinion. Whatever share the Karaula may have had (and that may have been but little, for reasons to be named hereafter), in bringing down alluvial gold from the hills, the Gwydir has probably contributed no little auriferous detritus, and burying it beneath the accumulated sediment which it has deposited at the mouth of its estuary.

It is of this probability, and the facts connected with it, I have now to treat; and in the following section, the metamorphic results of which I have produced but a few examples above, will be shown to have been of a more important character in the period intermediate between the granitic and the carboniferous eras of *slates and metamorphic rocks of the Bingera country*.

From the preceding statements it would naturally be concluded that the north-eastern limit of the auriferous region stretching from the highlands of New England towards the north-westward is nearly along the dividing ranges separating the waters of the Gwydir from those of the Macintyre. Such is very nearly the fact; for if a line be drawn from the head of Ollera Creek to the head of Otley's Creek, a distance of 70 miles, on a bearing N. 45° W., little (if any) gold is found to the north-east of that line for many miles, and some gold will be found in almost every portion of the country to the south-west of it.

I am now to discuss that portion of the country which occurs north-westward of the granitic gold field of the upper part of the Gwydir and Namoi system, on which I have previously reported, and which is known by the name of the Bingera Gold Field.

The formations in this district repose in apparent regular order upon the gold-bearing rocks to the south-eastward; they consist of slates, quartz rocks, jasperoid rocks, conglomerates, limestone, and flag-stones, with bands of serpentine and diallage rock, the laminae directed chiefly from S. to N., or varying within limits of 20° to 30° on either side of that normal trend.

As slate rocks break out in the area between Turrabeile Creek and the Namoi, this slate country is evidently connected, geologically, with the Western Gold Fields, the junction being interrupted by the interference of the igneous chain of the Liverpool and Warrumbungle Ranges.

Looking then to this disposition of things, and the strike of the rocks, it is quite in accordance with the regular geological sequence to find the slate formation placed where it is found. The mean elevation of the country between the bends of the Namoi and Maule's Creek is about 1,000 feet above the sea, and the greater part of that area is nearly a dead level. The beds which I described as containing the casts of *Lepidodendra*, about the Peel, are found also at the head of the Manilla River, and those are succeeded in the ascending series by still younger carboniferous beds, of which I shall treat in the following section.

From beneath these lower grits and shales rise those formations which occupy the country between the gold-bearing granites of the Upper Gwydir and the Macintyre system. The height attained by them is from 2,000 to 2,800 feet above the sea, consequently, on the supposition that they were once continuous upwards to the present level of gold-producing rocks of the same formation about the head of the Peel, there must have been a great denudation; for without it the slope to the north-westward of a continuous plane would be, at least, 22 or 23 feet per mile, which the actual dip of the beds does not sanction and, in any case, as the slate formation appears to mantle round the granite, a denudation over the latter formation, at least, is a necessary result.

The western side of this elevated country which, from the generally level surface in continuous spaces, has much the character of a table-land, is bounded by the loftier trap and porphyritic clink-stone range of Mount Lindsay, having serpentine at its base between that range and the Rocky Creeks which flow from the Nundawar Range to the Horton River. In linear direction this boundary is about 60 miles in extent; it is, however, probably even more extensive, for serpentine is found in patches about the Bresi country, and is common in the drift of the Namoi.

At the head of Mywon or Myall Creek, where these formations commence on the eastern border, the breadth to the junction of the Horton and the Gwydir is about 30 miles. The eastern boundary is scarcely definable, because it inosculates with the western boundary of the granite gold field.

This area is not altogether in one block, for it is divided by the waters of the Horton, which flow in a valley, called by Mr. Cunningham, Wilmot's Valley, and by those of Bingera Creek, which flow in what the same traveller called Stoddart's Valley. These creeks are about 15 miles asunder, flowing nearly parallel to themselves and the meridian.

The field which is now worked as the Bingera Gold Field is eastward of Bingera Creek, and the chief researches have been made upon the high land between it, the Gwydir, and Keera Creek. Through this country there run to the Gwydir two creeks, Baro and Courongurra Creeks, both of which have supplied gold.

I may briefly describe this tract as occupied by a few slates of soft character, and a variety of metamorphic rocks of great hardness. The base seems to be a very hard siliceous greywacke conglomerate, and the originally softer rocks have been silicified and hardened into jaspers and flinty slates of precisely the same character as those which present themselves in the Hanging Rock district, and on the Cockburn River. In the bed of the Gwydir I detected amidst the river drift below Moruleroi, even fragments of other rocks of the same age, which I did not see *in situ*; amongst these were hard unabraded regular-sided pieces of Goonoooonoo grit, and quartz pebbles filled with epidote. These must have been derived from beds like those at the head of the Peel. The west side of the gold tract is composed of a ridge of serpentine, varying through shades of green, and much contorted, in which are numerous veins of picrolite, and of opaline meerschaum; lumps also of diallage rock occur between the laminae of the serpentine which are contorted around them.

This serpentine occurs in various parts of the Gold Field, and much of the gold has been extracted from its detritus, as it is on the "dry diggings" at Hanging Rock. The slates, when they are unaltered, are either brown or grey, seldom dark blue; they pass into flinty slate, jasper, and fibrous hone-stones. The latter occur on the middle part of the Upper Bingera Creek, close to serpentine. The jaspers, as well as the softer rocks, are traversed by quartz veins, and by bands of quartz of considerable thickness; some of these still contain gold in matrix, and below them the metal may be procured from the surface. On one part of Boro Creek the strike of the jasperoid rocks is about N. 10 E., dipping 20° to N.N.W., the cleavage planes dipping 70° to E. At the Commissioner's camp on Bingera Creek, the same rocks have a strike of nearly N. 20° W. dipping sensibly to eastward. In consequence of those deviations from the meridian, the hardness of the rocks, and the convulsions to which they have been subjected, the country along these creeks is very broken, but the phenomena are on a small scale compared with those of the head of the Peel and its affluents.

In the midst of the slates occur patches of grey limestone much water-worn and superficially fluted, evidently very fossiliferous, but in such a condition as to leave only the most imperfect traces of encrinital stems, a few corals, and a turbo or allied

allied shell. I could not find a single specimen capable of furnishing an idea of species, or of leading to identification of the age, but I doubt not the rock is not younger than Devonian, and not older than the upper Silurian. I traced the slates and limestone, which is there but a little more perfect, to the neighbourhood of Warialda, where also serpentine, entangling diallage rock, occurs close to the limestone, which is altered by the contact.

In the lower ground of Stoddart's Valley, near the junction of Bingera Creek, the slates are soft and bedded with grits, like those of Brogalong in Mancero. Mywon or Myall Creek, which I descended to the junction with the Gwydir, flows through a country of similar formation, of grey and brown slates and grits, with jasper and quartz; also intersected by parallel bands of serpentine, running N. and S., and throwing off at Keriongobeldi, the slates and other rocks to N.E. and N.W. In one place, north of this, I found the slates much contorted, and dipping 38° to 42° to N.E., and in another serpentine slate dipping also 38° to N.W. On the northern part of Mywon Creek there is abundance of trap, and I observed that the same phenomena which I noticed at Loondah (Salisbury) is exhibited there. The rocks altered by trap are covered by fragments and pebbles of the same, so as to present the appearance of a trap covered by conglomerate. So great is the analogy between one gold district and another.

The higher ranges eastward of Mywon Creek are clad with pines, and their contour and bare surfaces greatly resemble the limestone and siliceous ridges between Tamworth and Mowara Creek. I have little doubt they are of the same geological character, but I had not time to visit them.

To the westward the Myall Ranges, which terminate at the Gwydir, are steep, and exhibit on the summit beds of sandstone, of which I shall make mention hereafter, and which also rests on the summit of the ranges between the Manilla and Cobbadah.

Between Bingera Creek and Warialda the spurs from the Mywon Range run to the westward. As I traversed them in a north direction, I traced the slates and other associated rocks breaking out in the banks of the watercourses, and gradually becoming covered on their lower extremities by the carboniferous formation.

The occurrence of serpentine, limestone, &c., near Warialda, in connexion with these indications, proves that the formations are continuous under the alluvial drift, which has covered all the low grounds throughout the region with innumerable fragments of quartz, iron, jasper, and other metamorphic rocks, the softer slates having gone in the formation of the soil. The accumulation of pebbles of these substances in all the creek-banks and in the river beds proves how vast has been the destruction of the formations by denuding causes.

The continuation of these formations northwards cannot be doubted, however interrupted they may be by the intrusion of the porphyry and other igneous rocks on the Mackintyre. At a place in the bed of that river between Cookanbalondan and Wapollawaa, I found an insulated patch of brittle and altered aluminous-quartzose rock, with broken and contorted laminae, having a strike of N. 60° W., and a dip varying from 56° to 77° and 86° to the north-eastward. I believe this to indicate the ancient existence of the slate formation in that part of the country; it has since been destroyed by the agency of igneous forces and denudation. It occurred on the right bank of the river in the midst of black alluvium, and the river being in flood I could not examine beyond the locality. It lies about 12 miles E.N.E. from the head of Myall Creek. To the northward at Wallangra and near Ashbee's, about the 151st meridian, limestone again breaks out, of the same character as that at Bingera and Warialda, with parallel bands upon the Mole, in the neighbourhood of slates and granite; and on the heads of Mackintyre Brook which are the northern sources of Dumaresq River, and to the westward of the extremely broken country at the back of Bolivia and Maryland, soft as well as compact slates, with the accompaniments of a gold country, present themselves, showing by their appearance there that the granite is surrounded by a mantle of that formation.

Gold has been reported to me as having been found near Wallangra and at another place near by (Gunyan on the Severn), but I had no time to examine into the truth of the statement. A similar report was made to me respecting the head of Boomi Creek, which flows from a range between Otley's Creek and Callandool, and on which there is a conspicuous hill called "Blue Nobby." I am not inclined to think much gold could occur in such a country, except at a great depth below the surface; but eastward of this locality between the Karaula and the Dumaresq there is a bare tract, amidst the dense brigalo scrubs that are frequent in that country, which has induced some keen gold hunters to expect the metal there. The abundance of sandstone and trap in that vicinity forbids any hope of future profitable search. A bare tract is not generally a good indication of a Gold Field. I will give another reason further on.

Without going beyond the limits of the present producing field on the Gwydir, I will now mention under what circumstances gold is found there.

It has already been long known that gold has been found near Barraba, Cobbadah, as well as at Triabundie, and in various places in the Namoi country, as near Quierindie and Borah; not to multiply these, I will merely remark, that all the rocks from these localities and others further south, which I have examined, are in conformity with the indications about Bingera; the same serpentines, slates, and other rocks occasionally breaking out.

The extent of likely gold country on the Gwydir is therefore very considerable. And over all this, whether on the ranges, their slopes or side summits, or in the valleys, gold seems to be scattered in the same general way; not occurring, as in the granite region, in small and regular particles (except on the outskirts of the field, where I found by washing, some fine gold in inconsiderable creeks as well as between Bingera and Cobbadah, towards which I carried the same formations), but in water-worn irregular coarse lumps and rounded fragments of all sizes, which lie upon the surface or just beneath it, and are collected readily after rain by the knife, which at Bingera is a common tool, in consequence of this facility and the difficulty of procuring water.

One piece of gold weighing 26 ounces without any admixture of other mineral matter was procured from a creek which had not been much excavated. This gold I saw. The vein from which it was derived must have been very considerable. I measured a piece of ground, excavated on the very surface of the highest point of what are called "The Dry Diggings," and found it to be 60 feet long, 7 feet wide, and 2 feet deep, in all 840 cubic feet. In 27 days, three men took from this plot, only 2 feet deep, gold worth £800. Other instances of good success were related to me on competent authority: so that this field must have presented to the first comers great inducements; and I can readily understand that Mr. Commissioner Bligh did not misrepresent, according to such examples, the probable future value of the locality. I have myself seen persons pick up gold from the road side, in Stoddart's Valley, and I found gold myself, at but a little way below the surface. Gold has also been found on the range between the Horton and Bingera, on the range between the mouth of Bingera Creek and Gunerie, and in the alluvium of the Gwydir, near Morulleroi. It has also been found in Myall Creek, and in a variety of localities in the neighbourhood of the ranges on which the metal is collected.

Examining carefully into the geological features of the country, I was persuaded that all this gold was derived from veins of quartz, and that it must be of local origin. To say nothing of the improbability that a lump of gold weighing 26 ounces would be carried by any such streams as now exist, under the present conditions of position and dryness of the climate and soil, to a great distance,—and it clearly could not come from the higher granite country of the Rocky River, or any part of that region, where the gold is fine,—it is not worth conjecturing whether it could have been brought down from the Hanging Rock country, though the similitude of the gold found in the two fields is very great.

Taking into account the physical circumstances of the country, I cannot but conclude, that either an extensive denudation of gold-producing rocks which once covered the gold-granite of the upper Gwydir country, has left its spoils upon the lower levels of Bingera and its neighbourhood, or that a similar denudation of higher beds of that formation, now strewn with gold, must have taken place; and, since we find that the veins of quartz yet existing, carry gold in them, and many of the fragments of gold are still sprinkled with relics of quartz, the conclusion necessarily is, that this Bingera country was once far richer than now, and that there is every probability that formerly a gold region extended, with few interruptions, from the Macquarie Basin to the Darling Downs, of which the principal remaining portions are the country along the Namoi and Gwydir, and that about the heads of the Condamine and the Dumaresq Rivers, and Macintyre Brook, where there is an extensive development of slates resting upon the higher granite country of Maryland, and in the creeks which traverse them there is gold.

But, if this conclusion be adopted, it will occur to one to consider whether there must not be many spots yet untried which will repay labour, and whether in a region where the detrital accumulations are so enormous that wells from 70 to 90 and 140 feet have been dug through them, along the Gwydir, without reaching water, and where consequently, the drift from the mountains must have been filling in the old cavities of the far west for ages, there must now of necessity be some gold, however deep, buried beneath it, from the wear of the dry land, which has evidently, by the action of the ocean itself, during oscillations of the submarine platform and the atmospheric agencies during long ages, converted a watery waste into an abode for man.

The only reply to these deductions should be the extensive use of the *boring rod*, which is the only instrument that could detect their value, or show that they are chimerical.

In the meantime, I think that the Bingera Field has not been fairly tried, and that a *laborious* population is required there. No one can find gold where it does not exist, but no one can obtain it successfully who prefers repose to toil, and who thinks it of use only to gratify evil indulgences. That metals exist in this Gold Field, in more abundance than is supposed, is rendered probable by the abundance of iron which occurs there, by the existence of veins of carbonate of copper, and by the presence of tellurium, which is sometimes frequent in the gold-washing; I believe it has been mistaken for rhodium, but this last-named metal has, in some instances, the regular hexagonal form, and cannot be mistaken readily for that scarce and probably seldom simple metal, rhodium.

I cannot take leave of this field without acknowledging the courteous and kind attention of Mr. Commissioner Bligh, who accompanied me to the several localities, and offered me every assistance and information in his power, during my stay on the Gwydir; and I deem it only an act of honesty to express my opinion that he did not deserve some of the comments that were made on his early Reports.

I will only add to this section, that copper and lead are both distributed in other portions of the western falls of New England, that the former occurs on the Manilla waters, near Borah, and the latter at Stony-batta Creek; the ores of copper are red and grey. Viewing the associations of rocks, it is probable that extensive deposits will be hereafter found in other places.

V.—CARBONIFEROUS FORMATION.—In my Report of 6 November, 1852, I stated my opinion that there is a regular sequence of the various beds of this formation down to the *Lepidodendra* beds of the Manilla and Goonogoonoo; I have now to show that the middle beds of this formation, those of the Hunter and Hawkesbury, are widely distributed on the western border of the country between New England and the interior. Sir T. L. Mitchell, in 1831,* found strata having the usual strike and dip of this region, and bearing fossils which evidently belong to the similar rocks, which I have found abundant in similar organic remains at the base of the carboniferous beds on the Paterson and Hunter; and more recently, I have obtained from the same neighbourhood, near the junction of the Peel and Muluerindie Rivers, other fossils which are identical with species common near Wollongong, in the Illawarra, where they occur in beds that pass in ascending order into the coal-bearing grits and sandstones of the Wollondilly and Hunter basins.

Mr. Stutchbury† has also described very carefully the order and direction of the coal beds of Dubbo and Talbragar, with which I was slightly acquainted some years since, and coal beds occur, under similar conditions, on the Castlereagh. From the heads of that river to the base of the Nundawar Range the flat country bears many evidences of the continuation of the same formation, in patches of sandstone, conglomerate, and in fragments of fossil wood, which occur either on low ridges, or in the drift that is spread over the surface or forms the banks of creeks.

I have also mentioned that sandstone caps some of the ranges on the Gwydir.

We have, therefore, evidence of the continuation of the carboniferous formation so far; and, from what has been adduced, it is plain that the order of succession common on the eastern waters is also the consistent character of the formation on the western.

As Mr. Stutchbury's operations have commenced in the Namoi country, he will probably work out successfully the details of succession in that district, and be able to verify the proofs which I am about to bring forward as to the extension of the carboniferous formation in nearly an unbroken line, and with only such interruptions as older or younger rocks may produce, and in continuation of the same formation from the extreme south, as far as Darling Downs, from which the researches of the Surveyor General, Mr. Kennedy, and Dr. Leichhardt, have extended it to the far north. I may hereafter be able to show that there is a similar continuation of the same formation on the eastern waters, that extensive coal fields occupy the basins of the Karua, Gloucester, Clarence, Richmond, and other coast rivers, as the basins of the Wollondilly and Hunter are occupied.

I have already stated, in former Reports, that there is some evidence of the existence of patches of this formation on the highlands of Maneroo and New England, whence it has been denuded. During my late explorations I came upon a patch of sandstone in the midst of trap, which, at the junction of the two rocks, exhibited the identical character of those rocks of "doubtful age" which I saw in Maneroo amidst the trap, and which, therefore, I can now refer to the carboniferous formation, as the relics of abraded, hardened and denuded strata. I expected, therefore, in addition to the existence of fossil wood, which I have since discovered on the high ranges of the Cordillera, north of Ben Lomond, to be able to detect some of the beds associated with coal on the lines of westerly section which I adopted in the parallels of 30° and 29° from and to the tableland and the Interior. The only instance which I found, however, eastward of the 151st meridian on that parallel, was of so singular a character that it deserves to be distinctly recorded. I have before mentioned the singular condition of the trap over granite on the banks of the Macintyre, between Ouerra Creek and Paradise Creek. On examining the former rock on the right bank of the river, I found beds of grit and sandstone of unmistakable character entangled in the trap, and these had become exposed by the decay of the latter. The space occupied by these beds was very confined; but there was sufficient exposure to exhibit the phenomenon clearly. I afterwards became acquainted with the existence of a small tract of a coarse freestone on the edge of a range a little below the spot in question. The occurrence of sandstone unaltered in connection with igneous rocks of this class is not the only one in New South Wales, for there is an instance of trap resting on unaltered sandstone not far from Kircobil, in the Liverpool Plains. In that case, as in this, it is probable the sandstone was protected by the interposition of some heat-resisting clay. With so many instances at hand of the great changes effected in sandstones, conglomerate, and other rocks, by the agency of heat, this example, affording almost the sole evidence of the former existence of now extensively destroyed strata, is curious and interesting.

In the Gwydir district the carboniferous formation begins to develop itself in some force about the 151st meridian. Westward of this meridian, it crests the summits of the Mywon Ranges, the Bingera, Cobbadah, and Horton River Ranges,—mantles round the flanks of Nundawar, and passing by Warialda and the Mosquito Mountains to Otley's Creek, the Macintyre, and Dumaresq Rivers, and at the back of the slate country of Macintyre Brook, stretches to the Condamine.

It was the presence of the crumbling sandstones of this formation, and the arid scrubs of brigalo and myall about the Blue Nobby Range, that induced me to dissent from the opinion that gold will be found there in any abundance. In all the line of country just indicated the formation is interrupted by outbursts of basalt, amygdaloid, or other trap, the detritus of which forming black plains of mud, is in striking contrast with the sandy wastes arising from the disintegration of sandstone, and which alternate with the former. These are on the same level with the Liverpool Plains, from 800 to 1,100 feet above the sea. The vegetation partakes of the character of the soil,—bare surfaces of muddy soil being in alternation with ridges clad with pine, myall, brigalo, dogwood, grasstree, white-gum, spotted-gum, and ironbark.

The neighbourhood of Warialda furnishes the best position for examining the geological phenomenon connected with the succession of the carboniferous and the underlying formations.

From the head of Reedy Creek which rises near Corajin to its junction with the Gwydir, there are many instructive superpositions of strata.

At that place the porphyry already described is covered by beds of conglomerate and sandstone, which contain seams of cannel coal, that have occasionally been used in the furnace. The conglomerates are coarse, and pass into sandstone, as on the Hunter. These are surmounted by beds of grit and sandstone, and ferruginous conglomerate, which alternate together, the whole presenting a series of beds which, in colour, consistency, and all physical conditions of structure, are in no degree different from beds of the same formation which I have explored in various parts of the sea-board. It would be easy to imagine that we had not left the coast, in some of the broken ranges in this tract of country. To detail the succession of constantly varying beds is unnecessary on this occasion; but there are two sections which are deserving of especial notice. The first occurs on Kelly's Gully, a branch of Reedy Creek.

In the bed and on the banks of the creek, serpentine, extremely distorted, containing veins of pterolite and nodular masses of diallage rock, and having the appearance of schistose structure, the laminae being much distorted around the diallage rock, abuts upon and surrounds a dome-like mass of grey marble, of which the fossils are nearly obliterated. Next to the marble is a bed of thin green jaspery substance, which, in broken fragments, also studs the surface of the limestone, adhering to it. The strike of the limestone is apparently from south to north. Resting upon this conjunction are beds of that peculiar conglomerate which occurs on Mount Murulla, and in other parts of the Hunter River coal-field, and which have sometimes occasioned to observers doubts as to the supposed origin of some of the green and red pebbles contained in them. The conglomerates at Kelly's Gully settle the question, for, in addition to hard and quartz-bearing pebbles of flinty slate, quartz, and other siliceous pebbles, there is a considerable proportion of pebbles of the very green rock which is now found in contact with the underlying marble, and of those jasperoid masses which occur in the Gold Field.

* Australia, 1-38. † Report of 1st July, 1852.

I have before proved that porphyry has assisted largely in the composition of the conglomerate of the Hunter, and other parts of the eastern coal-fields.

We see here that the metamorphic rocks of the Gold Field have also assisted, and therefore, though the rocks may, in part, have been impregnated since the coal-bearing strata were formed, the rocks which contain gold must have been partially destroyed before the coal-bearing strata were deposited; and therefore there may be, in the case of the older gold, if there were different periods of production, drift gold below the carboniferous deposits in some very ancient conglomerates. The question respecting those conglomerates which are known to retain gold becomes therefore interesting; and the suggestion that some of the carboniferous beds, derived from gold-bearing rocks, might hold traces of gold equally so, though, in a commercial point of view, a search for gold in such strata would be likely to disappoint.

Over the conglomerates of Reedy Creek, sandstones quite undistinguishable from those of the great sandstone territory of New South Wales, rise in succession, till the formation attains a height of from 1,300 to 1,800 feet above the sea, except where it caps the range, opposite Bingera, that point being about 400 feet higher.

I do not doubt that coal in some abundance, will be found in the range of these beds, the strike of which seems to be north-east, as on the coast.

The occurrence of these crumbling rocks of sandstone on the edge of the western interior is of more importance to the superficial character of the country than nearer the sea.

We know from the explorations of Sir T. L. Mitchell that the furthest rocks he met in his journeys along the Darling were of this very formation, the insulated masses forming the separate ranges in that direction being merely preserved by the transmuting action which they had undergone, and their summits exhibiting rock-basins and hollows excavated by water when they were portions of a tract of country along whose surface torrents and waterfalls might have existed. These now stand as solitary monuments on the wilderness, to mark the fact that there has been a past as affects Australia, but without an indication to mark its epoch. Various patches of these rocks occur between the Gwydir and Karaula; and near Yagobie there is a slab, called "the polishing stone," marked by the mogos of the aborigines of long-past times.

From the statements made by explorers, it is clear that the alluvia of the desert owe much of their origin to the decay and destruction of the formation of which these solitary masses are the relics. And so long as sandstones and shales and conglomerates like those on the western border of the Cordillera remain, so long will the softer portions continue to waste away and be borne downwards by rain and floods, obscuring the watercourses in which they travel, and filling up the hollows which were once natural reservoirs. This is not conjecture; for the summits of the sandstone ranges in the Gwydir district are traversed by joints, and are crumbling away year by year, the phenomena exhibited by the nodular blocks of a granite region being imitated by the rude and picturesque columns and tottering masses of rock, with their fillets of harder material between the fluted bands of the softer, which at a distance represent the outlines of old castles and towers, wherever the looser strata are exposed to the elements. The harder beds of conglomerate and grit have suffered only a rounding and smoothing process.

In Reedy Creek near Warialdra, and in many others further north, where in the memory of man (and that country has been inhabited by white men not twenty years), there were abundant waterholes, there are now vast heaps of white or yellow sand, and, in the former, Mr. Bligh pointed out to me a great accumulation of dry sand which was brought down in the flood of 1848, and which nearly blocks the creek.

But whilst this decay goes on in some parts, it is prevented in others by the presence of a preserving covering of pyrogenous rock. Thus, at Colagoon (Lagoon) below Tulambah, there is the following section in ascending order:—

1. Grey grit	} 280 feet.
2. Soft sandstone	
3. Hard sandstone	
4. Grit	
5. Soft ferruginous sandstone	
6. Trap	305 feet.

This trap forms an extensive series of arms on what is called the Highland Plain Range above the Gwydir, and at one point is called Koungundarra or the Springs, because at the junction water wells out, offering a contrast to the ordinary geological fact of water generally breaking out when the harder material is below; in this case, however, the trap is broken by semi-crystalline arrangement, and the rain filters down to the sandstones below that have been slightly hardened by the overflow of the trap.

This brings me to the last point I have to touch on, after noticing the proof that the foregoing section affords of the truth of the inference I made above, respecting the age of the trappean rocks. In this case, and in hundreds of others, they are younger than the youngest sedimentary deposits not alluvial, for they pass through granite, porphyry, slate, coal-measures alike (the summits of the Gold Field exhibiting points of trap in abundance), and overflow them, and amidst the conglomerates I could not detect a single fragment derived from any of them.

The question of water-supply in a dry country is a matter of geological as well as social importance. In the district of the Gwydir, and other similar countries, where the rains are not periodical, but paroxysmal, drought often succeeds to a time of plenty. The interior country is made up of alluvia, surrounding, as it appears, low, flat, and limited tracts of rock (at least it is so to the Karaula and Barwin, whence I have received fragments of sandstone from low bars of that rock across the stream), the disintegration of which, where the masses are larger, yet swells the alluvia, and through the looser portions of these alluvial deposits, the water which falls, even in scanty seasons, filters downwards to great depths, for wells have been sunk without attaining it, and the rivers alone contain a supply. But, in the progress of advancement, the herds and flocks trample down the surface and lay it bare from those retentive plants the roots of which once collected and held the moisture. The rains, therefore, run off more readily where they are not absorbed, and thus, gradually, though the elements be equally abundant in rain, the surface of the earth must become drier, from the two causes assigned. If, then, the interior is to be tenanted, or traversed by railroads, something must be done to obtain a permanent water supply. On the other hand, having seen drift high up in the branches of trees, as it is plain great floods occasionally visit the western waters, it becomes a painful thing to contemplate the condition of the flocks and herds, and those who have charge of them, in the far west, should one of these paroxysmal phenomena which in the historic period of this Colony covered a wide tract with what was taken for an inland sea, again take place; for, if the subterranean channels should become charged, a few wet seasons would reconvert the wilderness and the now-fertile borders of it into a lake, and the inhabitants would perish.

At a time when the population of the country is rapidly increasing, it cannot be beyond a thoughtful man's duty to weigh such contingencies as Nature presents to his reflections.

In conclusion, I have to state that, before I left the Gwydir, I was anxious to find a locality whence I could review the extensive field in which I have been occupied, in order to satisfy myself as to some of the conclusions at which I had arrived respecting the order of the formations described in this Report. Such a point of view offered itself from the summit of Koungundarra, and I regret that I am unable to convey with sufficient clearness, by a panoramic sketch, the scene which presented itself.

To the eastward were in the furthest distance the peaks and ranges stretching higher and higher towards the head of the Macintyre and the mountain bordering the table-land, the country receding on the one hand into the more level region of the Dumaresq River, and on the other merging into the ranges bordering on the Granite Gold Field, the dim summits of the rolling country about the Rocky River closing in the view. Below this, towards the south, the Bingera Gold Field, with its broken lumps of ranges along Boro Creek, and the ranges opposite, with the courses of the Gwydir and Horton well defined by the depression of their valleys, carried the eye to the south-west, where the summits of Nundawar and the other volcanic ranges rose superior to all others. And between these and the eastern horizon, the ranges of Myall Creek, and below them, the broken low cliffs of the carboniferous formation filled in the middle ground; whilst to the westward were the peaks and headlands of the Gwydir or Drummond's Range, with the river below flowing through an extensive well-wooded valley, the summits of the trap hills of Tulambah and Bareena forming the opposite projections, and beyond these was a clear level horizon stretching for 85° of the arc; the northern landscape consisting of the peaks of Corajin and Balfour, below the massy forms of the Mosquito Ranges.

I thus saw the whole of the geological features at a glance, and was enabled also to see that my conclusions were correct; and these I now have the honor of submitting to His Excellency in an extended Report, which contains sufficient details to connect this Survey with those that have been carried on to the southward, and to form a connection with the geological notices contained in the works of Dr. Leichhardt and the Surveyor General.

I am far from presuming to think that this Report embodies everything which might be expected, or which I have observed; but it is difficult to introduce all the details of such an extensive region in a brief abstract prepared in the field.

I hope, however, the above statements will be sufficient to convey a general idea of the structure of the country, and I am confident that, however the outlines I have drawn may be filled in hereafter by those whose leisure will be less limited than mine, they will not, in any material point, be overruled. It now remains for me to append the result of my observations on the elevation of the Ben Lomond Range.

The basis I took for the observations were at Moredun, Lalambula, Stonehenge, and Beardy Plains.

The former place, by comparison with twenty-two sets of contemporaneous observations of the Legislative Council Barometer, Sydney, is 3,631 feet above the sea.

Lalambula, by forty-eight sets of like observations, is 3,550 feet above the sea. By barometric observations between Moredun and Ben Lomond, and by angles taken from a hill two hundred and twenty feet above Lalambula, the mean, which differs but little from either extreme, gives 5,000 feet as the height of Rowendahl, the true Ben Lomond. The heights above the sea of the other points on that range are as follow :—

1. West end of Rumbec, on the westerly spur above Graham's Valley	4947 feet.
2. Joconda Peak (cleared)	4927 "
3. Aro-indal (North Brother)	4923 "
4. Boulgering Peak	4754 "
5. Flat under Rowendahl	4039 "

These were obtained by carrying the barometer up and down from peak to peak, and checked by the theodolite. These peaks separate not only eastern and western waters, but also form the various divisions of the latter; they are, therefore, important points in any survey; and as the range is the highest part of the "Cordillera" near the Gold Fields, it seemed to me well worth the trouble to attempt the settlement of the question as to the relative heights.

Dr. Leichhardt makes Ben Lomond* 5,063 feet, by the boiling-water apparatus which I lent him; that apparatus required distilled water, which he could not obtain, and a contrivance which the vessel he employed did not supply, to prevent the effect of steam upon the thermometer. These two difficulties caused him, I think, to place many of his points too high, the very opposite case with observations by the aneroid, which, on former occasions caused me to place some of my southern elevations too low. The difference between Dr. Leichhardt's calculation and mine for Ben Lomond is far less than those which he has recorded in other localities in New England and my results for the same.

When my leisure allows, I will calculate the height of many other localities in New England and on the lines of section across the "Cordillera," but at present I am unable to add more to the list which I have already furnished.

I have the honor to be,

Sir,

Your most obedient Servant,

W. B. CLARKE.

* The spot I selected as the highest was marked by a small heap of stones, which I thought had been collected by my long-absent friend; but I am told the point he selected was on the road, at least one hundred feet below. This makes the difference more proportionate to those I find between his and my own results for Dundee and Stonehenge.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CATTLE SALE YARDS ACT AMENDMENT BILL.
(PETITION AGAINST—CERTAIN PERSONS ENGAGED IN SELLING HORSES AND OTHER STOCK.)

Ordered by the Legislative Assembly to be printed, 25 February, 1873.

To the Honorable the Legislative Assembly of New South Wales.

HUMBLY SHOWETH :—

That your Petitioners have for some years been engaged in the business of selling horses and other stock, consigned to them from nearly all parts of the interior.

That to provide accommodation for the reception, exhibition, and sale of such stock, your Petitioners have incurred great expense, and their premises would compare favourably with any in the Colony. That a Bill before your Honorable House, entitled, "*A Bill to amend the Cattle Sale Yards Act of 1870*," would, if passed into law, operate most prejudicially to your Petitioners and to their constituents.

That your Petitioners humbly pray that your Honorable House will take the foregoing into consideration, and refuse to pass the Bill aforesaid without amendments, which will allow them to sell stock on their own premises, as heretofore, unmolested by special taxation.

[Here follow 109 Signatures.]

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CATTLE SALE YARDS ACT AMENDMENT BILL.

(PETITION AGAINST—CERTAIN PERSONS ENGAGED IN THE BUSINESS OF SELLING HORSES AND OTHER STOCK.)

Ordered by the Legislative Assembly to be printed, 7 March, 1873.

To the Honorable the Legislative Assembly of New South Wales.

HUMBLY SHOWETH :—

That your Petitioners have for some years been engaged in the business of selling horses and other stock, consigned to them from nearly all parts of the country.

That to provide proper accommodation for the reception, exhibition, and sale of such stock, your Petitioners have incurred great expense, and their premises are equal to any in the Colony.

That a Bill before your Honorable House, entitled “ *A Bill to amend the Cattle Sale Yards Act of 1870,*” would, if passed into law, operate most prejudicially to your Petitioners, and to their constituents.

That your Petitioners humbly pray that your Honorable House will take the foregoing into consideration, and refuse to pass the Bill aforesaid without amendments, which will allow them to sell stock on their own premises, as heretofore, unmolested by special taxation.

[*Here follow 35 Signatures.*]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CATTLE SALE YARDS ACT AMENDMENT BILL.

(PETITION AGAINST—GEORGE KISS.)

Ordered by the Legislative Assembly to be printed, 26 February, 1873.

To the Honorable the Legislative Assembly of New South Wales.

HUMBLY SHOWETH:—

That your Petitioner has for some years been engaged in the business of selling horses and other stock consigned to him from nearly all parts of the interior.

That to provide proper accommodation for the reception, exhibition, and sale of such stock, your Petitioner has incurred great expense, and his premises are equalled by none in the Colony.

That a Bill before your Honorable House, entitled, "*A Bill to amend the Cattle Sale Yards Act of 1870,*" would, if passed into law, operate most prejudicially to your Petitioner and his constituents.

That your Petitioner humbly prays that your Honorable House will take the foregoing into consideration, and refuse to pass the Bill aforesaid, without amendments, which will allow him to sell stock on his own premises, as heretofore, unmolested by special taxation.

GEORGE KISS,
Pitt-street.

1872-3.

NEW SOUTH WALES.

LIVE STOCK.

REPORT

FROM

ACTING CHIEF INSPECTOR, FOR THE YEAR 1872.

Presented to both Houses of Parliament, by Command.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1873.

LIVE STOCK.

REPORT ON SHEEP, CATTLE, AND HORSES, FOR THE YEAR 1872.

THE ACTING CHIEF INSPECTOR OF STOCK TO THE HONORABLE THE MINISTER FOR LANDS.

Stock Branch,
Department of Lands,
Sydney, 25 March, 1873.

SIR,

I have the honor to submit for your consideration a Report on the number and state of the Sheep, Cattle, and Horses, throughout the Colony, for the year ending 31st December, 1872.

I.—SHEEP.

1. Number and Distribution.

As will be seen by the Returns made by Sheepowners for 1871-72, tabulated below, the sheep in the Colony have increased from 16,766,012 to 17,873,696, being an increase for the past year of 1,107,684.

The Districts in which the largest increases have taken place, are Albury, Boorowa, Coonamble, Corowa, Cassilis, Coonabarabran, Deniliquin, Gundagai, Hay, Inverell, Jerilderie, Menindie, Mudgee, Murrurundi, Warialda, and Young; and those that have decreased most are,—Carcoar, Cooma, Dubbo, Glen Innes, Goulburn, Queanbeyan, Wagga Wagga and Yass.

The following Table shows the number of Sheep returned to the several Clerks of Petty Sessions throughout the Colony in 1871 and 1872, and the increase for the latter year.

District.	No. of Sheep, 1871.	No. of Sheep, 1872.	Increase, 1872.	Decrease, 1872.	District.	No. of Sheep, 1871.	No. of Sheep, 1872.	Increase, 1872.	Decrease, 1872.
Albury	280,245	293,957	13,712	Merriwa	96,893	106,606	9,713
Armidale	450,436	461,393	10,957	Mudgee	160,340	184,694	24,354
Bathurst	185,220	172,786	12,434	Murrurundi ..	308,142	388,645	80,503
Balranald	468,219	428,543	39,676	Muswellbrook ..	32,926	33,398	472
Barraba	52,237	52,237	Maitland	750	750
Bega	6,005	3,354	2,651	Narrabri	341,703	341,703
Berrima	11,556	12,279	723	Obley	40,900	40,900
Braidwood	40,902	27,934	12,968	Oberon	82,788	70,139	12,649
Boorowa	199,593	246,635	47,042	Oranger	10,783	6,662	4,121
Bombala	242,968	200,238	42,730	Paterson	4,180	3,500	680
Bourke	632,670	561,687	60,983	Queanbeyan ..	262,188	230,656	31,532
Bundarra	93,626	93,626	Rockstone	126,308	85,831	40,477
Carcoar	346,046	271,250	74,796	Rylstone	38,002	47,383	9,381
Cowra	139,947	145,088	5,141	Stroud	1,500	1,500
Coonamble	219,295	236,826	17,531	Singleton	118,691	88,256	30,435
Corowa	403,083	475,184	72,101	Scone	132,809	123,477	9,332
Cassilis	189,514	270,074	80,560	Shoalhaven ..	518	518
Coonabarabran ..	516,544	898,641	382,097	Sofala	10,656	7,778	2,878
Cooma	475,870	462,429	13,440	Ten-mile Creek	67,566	67,566
Campbelltown ..	2,680	2,500	180	Trunkay Creek ..	12,708	10,516	2,192
Cannonba	57,818	87,146	29,328	Tenterfield ..	132,387	111,561	20,826
Camden	7,453	4,372	3,081	Tumut	53,800	39,794	14,006
Cootamundry ..	17,000	19,350	2,350	Tamworth	389,494	419,628	30,134
Dubbo	459,000	371,442	87,558	Toogong	39,590	39,590
Deniliquin	837,955	855,008	17,053	Tumberumba ..	35,000	41,000	6,000
Dandaloo	10,500	10,500	Tambaroora ..	28,505	17,539	10,966
Eden	2,796	2,892	96	Warialda	789,099	1,044,901	255,802
Euston	40,600	56,393	15,793	Wollombi	830	830
Forbes	232,647	221,713	10,934	Wagga Wagga ..	791,979	761,692	30,287
Glen Innes	312,764	236,826	75,938	Windeyer	6,890	8,286	1,396
Gundagai	79,930	122,654	42,724	Walgett	211,842	158,748	53,094
Gunnedah	336,461	325,875	10,586	Wellington ..	142,339	154,908	12,569
Grenfell	16,314	12,872	3,442	Wentworth ..	268,240	281,847	13,607
Gunning	93,928	89,120	4,808	Walcha	247,502	190,076	57,426
Goulburn	262,414	197,142	65,272	Wee Waa	338,464	338,464
Gongolgon	20,635	11,000	9,635	Wollongong ..	1,360	1,360
Grafton	1,150	1,150	Yass	191,376	153,355	38,021
Hargraves	14,200	15,536	1,136	Young	471,625	700,319	229,694
Hay	2,250,096	2,375,118	125,022	Totals	16,580,542	17,666,620	2,487,669	1,382,863
Hartley	10,775	10,775	Add lots under 500	185,470	207,076	21,606
Inverell	262,930	355,714	92,984	16,766,012	17,873,696	2,509,275	1,382,863
Jerilderie	108,951	421,872	312,921
Kiandra	1,000	1,200	200
Liverpool	1,600	1,600
Moama	32,277	60,936	28,659
Molong	210,556	206,310	4,246
Menindie	477,449	578,850	101,401	Net Increase on the year 1871	1,107,684

Of

Of the above lots of sheep under 500, there were 3,660 in the Albury district, 800 in Balranald, 25,850 in Bathurst, 650 in Bourke, 1,986 in Braidwood, 17,310 in Carcoar, 13,373 in Cooma, 5,662 in Coonabarabran, 1,739 in Corowa, 760 in Deniliquin, 4,723 in Dubbo and Cannonba, 2,500 in Eden, 7,444 in Forbes, 7,561 in Glen Innes, 3,000 in Grafton and Casino, 21,150 in Goulburn, 3,450 in Gundagai, 3,963 in Hay, 5,117 in Maitland, 1,500 in Menindie, 3,083 in Merriwa, 5,400 in Mudgee, 2,358 in Narrabri, 60 in Port Macquarie, 5,200 in Singleton, 8,644 in Sydney and Picton, 10,667 in Tamworth and Armidale, 520 in Wagga Wagga, 4,540 in Warialda, 740 in Wentworth, 3,000 in Windsor, 14,680 in Yass and Queanbeyan, and 16,022 in the Young District.

The following numbers will show the number of sheep in the Colony during each of the last twelve years:—

Year.	No.	Year.	No.
1861	6,119,169	1867	15,066,377
1862	6,550,896	1868	16,000,000
1863	7,169,126	1869	16,848,217
1864	9,089,463	1870	16,218,825
1865	9,650,106	1871	16,766,012
1866	11,644,593	1872	17,873,696

It will be seen, therefore, that the number of sheep has been steadily increasing each year up to the present time, with the exception of the year 1870, when their number decreased by 791,434, caused chiefly by the long drought which prevailed during the latter part of 1868 and the whole of 1869.

2. Lambing.

The lambing has, on the whole, not been a good one, owing principally to last winter having been so severe, and the ewes in low condition at lambing season. The highest percentages were in the Districts of Wentworth, Balranald, Bourke, Coonabarabran, and Forbes; and the lowest in Merriwa, Warialda, Windsor, Glen Innes, and Gundagai. The following are the percentages in the different Districts:—Albury, 68½; Bathurst, 64; Bourke, 80; Balranald, 85; Braidwood, 70; Carcoar, 82; Coonabarabran, 84; Corowa, 67; Cooma, 75; Deniliquin, 68; Dubbo, 75; Forbes, 88; Glen Innes, 61; Goulburn, 56; Grafton, 75; Gundagai, 63; Hay, 67; Maitland, 75; Menindie, 75; Merriwa, 50; Mudgee, 77½; Narrabri, 73; Port Macquarie, nil; Singleton, 70; Tamworth, 77; Wagga Wagga, 73; Warialda, 50; Wentworth, 89; Windsor, 50; Yass, 70; and Young, 65,—being an average for the whole of the Colony of 68½ per cent.

3. The Clip.

The Inspectors report the clip as being very good, both as regards quantity and quality, being well grown and thoroughly sound. The highest averages were in the following Districts:—Wentworth, Balranald, Hay, Deniliquin, and Menindie; and the lowest in the Mudgee, Eden, Braidwood, Carcoar, and Albury Districts.

The average weight of the clip throughout the whole of the Colony is—*Greasy* 4 lb. 12 oz., and *Washed* 2 lb. 14 oz.. Of this, two-thirds are Combing and one-third Clothing, and the proportionate weight of Combing wool over Clothing is 11¼ oz. per sheep.

4. Imported Sheep.

The number of sheep imported into the Colony during the year 1872 was 1,808. Of these, 1,789 passed through their two months' quarantine in Sydney, 75 at Morpeth, and 10 at Grafton. Of which, 1,375 were Merino, 148 Lincolns, 1 Cotswold, 20 Negretta, 7 South Downs, 251 Leicesters, and 6 Romney Marsh.

It will be seen by the table below that these sheep were principally imported from Victoria and Tasmania, and several small lots were also brought from England. The number of coarse-wool sheep imported, consisting principally of Leicesters and Lincolns, exceeds that of any previous year. These have been in several cases bought in small lots by farmers in the County of Cumberland, who, I am pleased to report, are combining sheep-farming with, and as an auxiliary to, the cultivation of cereal crops. These sheep appear admirably adapted for this purpose, producing fleeces weighing, when washed, from 5 lbs. to 7 lbs. each, which fetches from 1s. 6d. to 2s. per lb.; and lambs at 4 months old weighing from 40 lbs. to 50 lbs. each. The Leicester and Lincoln breed appear most in favour with the farmer, as carrying the largest fleece with the greatest amount of carcass.

The following Table shows the number of Sheep imported into the Colony, from January 1st to December 31st, 1872.

Several of the above lots were consigned to stock agents here, and sold by them in small numbers; consequently they are scattered through different parts of the Colony.

5. *Improvement in our Sheep.*

The Inspectors report an improvement in the quality of the sheep throughout the Colony, which has been brought about principally by careful culling, and the introduction of rams from the Stud Flocks in the Mudgee and Merriwa Districts, and the large importations from the principal flocks of Victoria and Tasmania. Paddocking, which is now becoming general in most districts, has also added very much to the improvement of our flocks.

The large introduction of Stud Sheep during the last few years has already left its mark; and I have no doubt that now, as most of our sheepowners see the benefit to be derived from breeding only from first-class stock, the flocks will continue to improve.

6. *Diseases and ailments of the Sheep.*

Scab.—I have much pleasure in reporting that the Colony is still free from this dreaded disease. The utmost vigilance has to be exercised by the Inspectors and Boundary Riders along the banks of the Upper Murray, where, on the Victorian side, large numbers of diseased sheep are running at large, and are frequently detected by our Boundary Riders crossing into New South Wales, and destroyed.

The greatest care has also to be exercised at our ports, where sheep are continually arriving from places infected with scab. Two diseased lots have been brought into Sydney during the last year—one from London direct, and the other lot from London *via* Melbourne. These sheep have been placed in an isolated quarantine, where they remain six months, and receive several dressings before being allowed to go inland.

Catarrh.—This disease has not made its appearance during the last year. The means adopted with the few flocks infected, about two years ago, in the New England District, appears to have entirely stamped it out, or at any rate checked it for a time.

Cumberland Disease.—Cumberland Disease has only made its appearance in six Districts throughout the Colony, principally in the North-western Districts, and then only slightly, the number of deaths being comparatively small in number.

Yellows.—This disease has only appeared in one District on the Upper Murray, where on some runs it has been very prevalent.

Red Water.—Red Water has only shown itself slightly in four Districts.

Grass Seeds.—Ten Districts report Grass Seed as being very prevalent, especially so in the Southern and Western Districts. Fencing and paddocking the stock appears to be the best means of eradicating it.

Dogs.—Both tame and native dogs are very troublesome to the sheepowners, especially the former in the more settled Districts. Many owners have had to abandon sheepfarming in consequence of the destruction caused by tame dogs. As will be seen by the following tabulated Table, legislation for the registration and putting a collar on all dogs is loudly called for by the sheepowners throughout the Colony. If this was done, owners of destroyed sheep would then in most cases be able to come on the owners of these destructive dogs for compensation for property destroyed.

Native dogs, too, might in a great measure be exterminated by laying poison in each District throughout the Colony simultaneously. This might be carried out by the different Boards of Sheep Directors having power to appoint men to poison throughout their District.

The

The following Table will show the losses from native and tame dogs in the various Districts, and the owners' opinions as to the best means of extirpating them:—

THIS Table shows the opinions of the Sheepowners, given through the Inspectors, as to the necessity for Legislation and destruction of Native and Tame Dogs.

District	Native Dogs numerous or otherwise.	Extent of losses by Native Dogs.	Best means of extirpating them.	Extent of losses from Tame Dogs.	Do you approve of Legislation for		Remarks.
					Native Dogs	Tame Dogs.	
Albury	Nil	Nil	All destroyed already.	Considerable.	No	Yes	Registration should be made compulsory.
Balranald	Very few	About 1 per cent.	Poison with strychnine.	Very slight	Yes	do	
Bathurst	Numerous	Considerable.	Poisoning	3,086	Against	For	In favour of legislation for tame dogs.
Bourke	do	5 per cent.	Poison with strychnine.	Nil	Strongly in favour in both cases.		Owners should be compelled to poison.
Braidwood	Very few	About 1 per cent.	do	Considerable.	Yes	Yes	Owners should be compelled to poison at stated periods.
Carcoar	A few	Slight	Poison	do	do	do	
Cooma	Rather troublesome	5 per cent.	do	Very few	Greatly in favour of Legislation for both.		Registration fee should be high.
Coonabarabran	Troublesome in many cases	2 to 5 per cent.	do	Troublesome in a few cases	Yes	Yes.	
Corowa	None	None	do	Considerable.	No	do	Registration of all tame dogs.
Deniliquin	A few periodically	Slight	do	Several	Decidedly	Decidedly	Compulsory Act. Register tame, and destroy native dogs.
Dubbo and Cannonba.	Numerous	Very considerable.	do	Very few	Approve	Approve.	
Eden	do	Considerable.	do	Slight	Yes	Yes	Legislation strongly recommended for both tame and native dogs.
Forbes	do	4 per cent.	do	do	do	do	Compulsory destruction. Registration.
Glen Innes	do	2 per cent.	Poison with strychnine.	A few	do	do	Registration of all dogs throughout the Colony.
Grafton and Casino	None	None	do	None	do	do	
Goulburn	Occasionally	Slight	do	Considerable.	do	do	Registration of all dogs should be made compulsory. Fee should be heavy.
Gundagai	A few	do	Poison	Very slight	do	do	
Hay	Troublesome	do	do	Very few	No	No	
Maitland	Numerous	Considerable.	do	Several cases.	Yes	Yes	
Menindie	do	3 per cent.	do	Slight	do	do	Poison native dogs, and register tame.
Merriwa	No information.						
Mudgee	{ 4. Numerous 19. Nil	One case, 100	By strychnine.	108	Yes	Compulsory registration	Every dog should be taxed.
Narrabri	Numerous	Considerable.	Poison	Considerable.	do	Yes.	
Port Macquarie	Badly	do	do	Nil	do	do	
Singleton	Nil			Considerable.		do	Compulsory registration.
Sydney and Picton	A few	Nil	Poison	do		do	Strong in favour.
Tamworth	Numerous	Considerable.	do	do	Yes	do	
Wagga Wagga	A few	Very slight	do	do	No	do	Registration.
Warialda	Numerous	Slight	do	None	Doubtful.		
Wentworth	do	3 per cent.	do	Slight	do		Blacks' dogs very troublesome.
Windsor	Nil	Nil	do	do		Yes	Tame dogs should be heavily taxed, and have collar with owner's name.
Yass	A few	do.	do	Considerable	Yes	do	Registration of all tame dogs.
Young	Occasionally	Slight	do	do	do	do	

Footrot.—By the following Table it will be seen that no less than twenty-four Districts suffered more or less from footrot. The principal remedies tried, and in most cases successfully, were butter of antimony, arsenic, carbolic acid, and bluestone. It will be noticed that where bluestone has been tried by itself the result has not been satisfactory, but when mixed with arsenic it has had a good effect.

Fluke.—Twelve Districts are reported as infected with fluke; two badly, and ten only slightly. The remedies tried have been sulphate of iron and salt, gunpowder, and Pottie's medicine, with generally good results.

Worms.—It will also be observed by the following Table that in almost every District where footrot and fluke have appeared, that worms have also been prevalent. Eleven Districts have suffered from worms, some of them very severely. The principal remedies tried have been sulphate of iron and salt, gunpowder, turpentine and kerosene, with favourable results; a change of pasture is also recommended. All the Inspectors report the extremely wet season to be the principal cause.

RETURN

RETURN by Inspectors, showing the prevalence of Footrot, Fluke, and Worms, and cause, the remedies tried, and their effect in the several Sheep Districts throughout the Colony.

District.	How affected.	Cause.	Cures tried.			Results.	Remarks.
			Footrot.	Fluke.	Worms.		
Albury.....	Footrot badly; fluke slightly	Wet weather	Bluestone and arsenic, butter of antimony, bluestone and tar arsenic.	Sulphate of iron and salt.....	Good.....	No worms.
Balranald	No disease.	do	Butter of antimony, bluestone and tar, nitre and muriatic acid.	Salt	Fair	Nitre and muriatic acid the best for footrot.
Bathurst.....	Footrot and fluke badly; worms very slight.	do	Arsenic troughs and lime	Satisfactory.	
Bourke.....	Footrot slightly	do	Bluestone, tar, and kerosene	Sulphate of iron and salt.....	Salt and sulphur.....	No remedy	Salt and sulphur a preventive.
Braidwood	Footrot, fluke, and worms badly.....	do
Carcoar	Footrot, fluke, and worms very prevalent.	Rocky run, and wet season	Bluestone and arsenic, butter of antimony.	Gunpowder, sulphate of iron, and salt.	Gunpowder drench, sulphate of iron and Liverpool salt.	Good.	
Cooma	Footrot, fluke, and worms slightly.....	Wet ground	Bluestone and fat, butter of antimony.	Salt, and kept on dry ground	Satisfactory	Use plenty of salt for worms.
Coonabarabran.....	Footrot slightly	do	Lime-water and bluestone—simple paring.	Successful	Lime-water is almost a certain cure.
Corowa	Footrot very slightly	do	Paring and solution of arsenic	Good.	
Deniliquin	Footrot slightly	do	Butter of antimony	Cured.	
Dubbo and Cannonba	Footrot prevalent; worms very slightly	Wet season.....	Bluestone, arsenic, and lime, butter of antimony.	Sulphate of iron and salt.....	Checked the disease	
Eden.....	Footrot slightly	Wet ground	Bluestone and arsenic, kerosene and tar, carbolic acid.	Good.	
Forbes	Footrot and fluke very slightly	do	Arsenic, butter of antimony	Pottic's medicine	Satisfactory	Arsenic the best cure for footrot.
Glen Innes.....	Footrot, fluke, and worms badly.....	do	Not stated	Sulphate of iron and salt, sulphur, salt, and turpentine.	Gunpowder, sulphate of iron and salt, and change of pasture.	do	
Grafton and Casino	No disease.	do
Goulburn	Footrot, fluke, and worms badly	Continued wet weather	Allen's ointment, arsenic and bluestone, bluestone and turps, strong lime-water, butter of antimony.	Sulphate of iron and salt.....	Brine and turps, kerosene oil, salt and sulphur.	Favourable.	
Gundagai	Footrot slightly; worms very badly	Wet weather	Bluestone and arsenic	Not stated	Very good	One owner lost 4,000 sheep from worms.
Hay	No disease.	do
Maitland.....	Footrot, fluke, and worms slightly	Wet marshy run	Bluestone	Sulphate of iron and salt	Sulphate of iron and salt.....	Good.....	Sulphate of iron and salt not effective.
Menindee	No disease.	do
Merriwa	do.	do
Mudgee	Footrot and fluke slightly.....	Incessant rain	Bluestone and butter of antimony	Rock salt and change of run	Doubtful.	
Narrabri	Footrot slightly	Wet ground	Bluestone water	Not effective.	
Port Macquarie	Footrot badly	Not stated	Nil	No cure tried.....	Owners in this District take no care of their sheep.
Singleton	Footrot, fluke, and worms slightly.....	Wet weather	Bluestone and arsenic	Sulphate of iron and salt	Liverpool salt and sulphate of iron	Not stated.	
Sydney and Picton	Footrot badly	Wet ground	Copper dissolved in nitric acid	do	
Tamworth	do	Wet season and dirty yards	Carbolic acid, bluestone, bluestone and kerosene, caustic, butter of antimony, arsenic.	Carbolic acid the best remedy.	
Wagga Wagga	Footrot slightly.....	Wet season.....	Arsenic	Most successful	Allen's ointment tried with favourable results.
Warialda	Footrot, fluke, and worms slightly.....	do	Bluestone	Salt and sulphate of iron	Liverpool salt	Not stated.	
Wentworth	No disease.	do
Windsor	do.	do
Yass	Footrot, and worms slightly.....	Wet season.....	Arsenic	Turpentine, kerosene, and soap	Favourable.	
Young	Footrot badly; worms and fluke slightly	Wet seasons	Arsenic, bluestone, and kerosene oil	Not stated	Sulphate of iron and salt, turpentine	Good.	Arsenic is the best cure for footrot.

II.—CATTLE.

1. *Number of our Cattle.*

No returns having been made by cattle-owners to the Clerks of Petty Sessions since 1868, I have quoted the number of cattle from the Statistical Register; and, as these Returns have only been made up to the end of 1871, I am as yet unable to state the increase for 1872.

The following are the Returns as copied from the Statistical Register for the last ten years, by which it will be seen that the number of cattle in the Colony at the end of 1871 stood at 2,014,888.

It appears there was then 425,289 less cattle than in 1863, the year before pleuro-pneumonia made such havoc in our herds. The lowest number was in 1867, when it was reduced to 1,728,427, since which time they have been steadily increasing.

Year.	No.
1862	2,620,383
1863	2,032,522
1864	1,924,119
1865	1,961,905
1866	1,771,809
1867	1,728,427
1868	1,761,411
1869	1,795,904
1870	2,195,096
1871	2,014,888

I believe that the year 1872 will show a considerable increase over 1871, as will be seen from the following tabulated Table, which shows that thirty Districts are reported as increasing, only two as stationary, and one decreasing:—

2. *Description of the Cattle.*

The cattle throughout the Colony are more of the short-horn than any other breed, there having been larger numbers of short-horn sires brought to the Colony than any other.

The only other pure-bred cattle used for sires to any extent are Herefords and Devons, large numbers of which are now being used throughout the Colony; the demand for them far exceeding the supply. They are generally considered by stock-owners as more suited to upland and poor districts. Not being so large, they have also a tendency to fatten much quicker in poor country; and being more active, can carry their beef to market better than the larger short-horn cattle.

On very few stations are the cattle of a distinct breed. Their want of uniformity is to a large extent attributable to the great variety of breeds from which they are descended. The hitherto unenclosed state of the country, and consequent impossibility of keeping the different breeds separate, has also tended to their deterioration.

As our cattle-owners are now, in most districts, fencing their runs, and also breeding more from *thoroughbred sires*, we may soon expect to see more herds of distinct breeds.

3. *Estimate of the different classes of Cattle.*

The cattle nearest approaching Short-horns, Herefords, and Devons, may be classed, in round numbers, as follows.—

SHORT-HORNS.	
First-class pedigree stock	4,500
Well-bred stock	140,000
Middling	900,000
Inferior	200,000
	<hr/>
	1,244,500
HEREFORDS.	
First-class pure	1,400
Well-bred stock	30,000
Middling	90,000
Inferior	14,000
	<hr/>
	135,400
DEVONS.	
First-class pure	600
Well-bred stock	800
Middling to inferior	1,600
	<hr/>
	3,000

4. *Improvement of the Cattle.*

The cattle throughout the Colony are reported as very much improving. This appears to have been brought about by the introduction of good bulls, both imported and from the herds of our stud-breeders; combined with fencing the runs, which has made a marked improvement in the cattle.

RETURN showing the increase and decrease, improvement and deterioration of the Cattle, and the number and breed of Pedigree Stock introduced into the various Districts.

376-B

District.	Increasing or Decreasing.	Extent of Increase or Decrease.	Cause of Increase or Decrease.	At large or in Paddocks.	Benefits of Fencing.	State of the Herd.			Pedigree Stock Introduced.			Remarks.

5. Imported Cattle.

During the past year, 47 head of cattle have been imported from Great Britain, and amongst them are animals of rare merit, many of them being first prize winners at the principal shows throughout the United Kingdom, which cannot fail to add considerably to the improvement of our stock. These cattle have undergone two months' quarantine on Shark Island, and were dressed several times with disinfectants before being allowed to go to their destination.

TABLE showing the number and breed of the Cattle imported from England, from the 1st January to the 31st December, 1872.

Date.	Breed.						Total.	Where from.	Importers' names.
	Short Horn.		Hereford.		Devon.

Dec. 28	1	1	" ...	" Gilchrist, Watt, & Co.
Totals	25	16	2	Nil	2	2	47		

In addition to the above, several small lots of Shorthorn and Herefords have been imported here from Victoria, selected from the principals herds there. Many large lots of Devons have also been brought from Tasmania. This breed of cattle appears to be growing very much in favour with our cattle-breeders.

6. Ailments and Diseases of the Cattle.

Foot and Mouth Disease (Vesicular Apatha).—I am pleased to report that the dreaded Foot and Mouth disease has not made its appearance amongst our cattle during the past year.

One lot of cattle brought here by the "Ranee," showed signs of the disease shortly after leaving England, but on their arrival here all symptoms had left them. As a precautionary measure, these cattle were kept apart from other quarantined stock and placed on Garden Island, where they were several times washed with disinfectants, and after remaining in quarantine for about three months, were taken by sea to an adjoining Colony.

During the outbreak in Victoria, and until all the diseased cattle had been destroyed, and the Districts through which they had passed had been reported upon, no cattle were allowed to cross the border or come into our ports from that Colony.

Cancer.—This disease has shown itself in a mild form in each of the following Districts:—Carcoar, Dubbo, Forbes, Gundagai, Hay, Narrabri, Tamworth, and Windsor.

Ophthalmia.—Ophthalmia has only made its appearance in three Districts, namely:—Carcoar, Narrabri, and Tamworth. In the last-mentioned District it is reported as being prevalent.

Poison Pea.—Poison Pea made its appearance in the Dubbo and Glen Innes Districts; but as there is now an abundance of feed, no deaths are reported through it.

Cumberland Disease.—A few slight cases of this disease are reported in the Dubbo, Cannonba, Forbes, Narrabri, and Tamworth Districts.

Black Leg.—Black Leg has appeared in the Braidwood, Cooma, Goulburn, Maitland, and Port Macquarie Districts. From the Inspectors' abstracts, the number of deaths in the Cooma District from this disease is stated to be 33 per cent.

Bleeding at an early stage of the disease would appear to be the best remedy tried.

Pleuro-pneumonia.—There is scarcely a District that was not more or less affected by the last outbreak of this disease. Seven are reported as having been badly affected, eighteen slightly, and only four Districts quite free. Inoculation appears to be the best preventative, and to be generally believed in by cattle-owners. It would appear that, in the inoculated herds, the disease left at from one week in some cases to six months in others; whereas in the uninoculated herds it remained from six months to two years. The deaths, too, after inoculation appear few compared with the number of deaths in the uninoculated herds.

Legislation appears to be very much required to prevent owners of diseased cattle driving them through clean runs, and also to compel drovers to give notice to owners of runs in which cattle are travelling through, to enable such owners to examine them, and keep their own stock out of the road. This, too, would act in a great measure as a preventative to cattle-stealing, as it would enable stockholders to see if their own or neighbour's stock were being taken away by dishonest drovers.

III.—HORSES.

1. *Number of the Horse Stock.*

By the Statistical Returns, the number of Horses in 1871 was 304,100. This was a decrease on the previous year of 33,497, and an increase on any of the previous *eight* years. The numbers returned for the last ten years stand thus :—

Year.	No.
1862	273,389
1863	262,554
1864	284,567
1865	282,587
1866	278,437
1867	280,201
1868	280,818
1869	280,304
1870	337,597
1871	304,100

From the returns made by stock-owners to the different Inspectors, it appears that the Horse Stock is slightly increasing in twenty-four Districts, stationary in seven, and decreasing in one only. They are also reported as improving in twenty-five Districts, and stationary in seven. The Districts reported as most improving are where the largest number of thoroughbred sires have been introduced, as well as where the greatest number of runs have been fenced,—fencing being very necessary for the destruction of wild horses.

The Horse Stock is also reported as being in a very healthy condition; no disease, of an epidemic or contagious nature, having been noticed amongst them during the past year.

I have the honor to be, Sir,

Your most obedient servant,

GEORGE S. YEO.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BATHURST CATTLE SALE YARDS BILL.

(PETITION AGAINST—HENRY ROTTON.)

Ordered by the Legislative Assembly to be printed, 8 April, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Farmer and Grazier, residing at Blackdown, Bathurst,—

RESPECTFULLY SHOWETH :—

That your Petitioner has heard that a Bill, emanating from the Council of the Municipality of Bathurst, has been introduced into, and is now under the consideration of your Honorable House, “to authorize the erection and maintenance of cattle sale yards, &c., &c.”

That the following objections prevail against the passing of the Bill :—

First.—That the Bill, so far as your Petitioner is aware, has not been published in Bathurst; the public, therefore, have not been afforded an opportunity of expressing an opinion of approval or disapproval of its provisions.

Second.—That the site upon which the sale yards are proposed to be erected is a portion of seven hundred and sixty-two acres of land already dedicated to the public for purposes of recreation, and for the laying out of a park thereon; that diverting the land to any other purposes will seriously interfere with the pleasures, exercise, and health of the inhabitants of the town, and will in fact be a breach of faith with the said inhabitants, by taking away from them what is now their undoubted right by free gift from the Government, under the authority of the Parliament of the Colony, conveyed in the Land Act of 1861.

Third.—That the third clause of the Bill (as now constructed) gives the Council power to impose “fees and charges” outside the boundaries of the Municipality; that such power will result in an undue interference with trade, and will be an imposition upon individuals not subject to the Council.

Fourth.—That there are other smaller towns near to Bathurst, and within the limits proposed in the Bill, namely: Peel, eight miles; Dunkeld, six miles; Raglan, four miles; Eglington, three miles; and Kelso, only one mile distant; which will be very injuriously affected if the Bill passes into law.

The last-named town (Kelso) is already a considerable place, and fast growing into importance, where will probably be the terminus of the Great Western Railway, at which all the live stock going from the Western Districts to Sydney will have to be “yarded” and taken in the train, and the Council will be empowered to impose a fee upon all such cattle.

Fifth.—That there is a certainty of a large meat trade (if not unwisely interfered with) being carried on between the Western Districts and Sydney so soon as the Railroad is completed to Kelso; that yards and slaughter-houses must be erected near the terminus (within the distance proposed in the Bill), at which the Council will be empowered to demand fees and charges, thus fettering a trade likely to prove of great mutual benefit to the country producer and the Sydney consumer, and to add considerably to the Railway revenue.

Sixth.—That endowing Borough Councils with power to collect dues outside their own boundaries will sooner or later bring them into collision with Suburban and Country Municipalities certain hereafter to be established.

Seventh.—That the Municipality of Bathurst is already deeply involved in debt, and its revenues mortgaged; the Council cannot therefore erect sale yards and buildings without increasing their debt, which will be impolitic, and unjust to the ratepayers and holders of their outstanding debentures, particularly as the proposed erection of sale yards is but a speculation, and the Council has no good data to warrant the expectation of sufficient revenue from them.

Eighth.—That your Petitioner is individually interested in this matter, being the proprietor of freehold property, and therefore a ratepayer in the Borough of Bathurst, and is a resident in its immediate vicinity, largely engaged in farming pursuits and the breeding of stock, and he will be injuriously affected by the passing of the Bill.

Your Petitioner therefore most respectfully prays your Honorable House to take these premises into your favourable consideration, with a view either to rejecting the Bill altogether or to amending it so as to obviate the objections complained of; and your Petitioner, as in duty bound, will ever pray, &c., &c.

HENRY ROTTON.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

BATHURST CATTLE SALE YARDS BILL.

THURSDAY, 13 MARCH, 1873.

Present :—

MR. COMBES,
MR. WEBB,

MR. HAY.

MR. DRIVER,
MR. BENNETT,

EDWARD COMBES, Esq., IN THE CHAIR.

E. Webb, Esq., M.L.A., examined :—

1. *Chairman.*] Your name is Edward Webb? Yes.
2. You have resided for many years in the town of Bathurst? Yes.
3. Are you aware of the objects of the Bill now before this Committee? Yes.
4. Is it expedient that sale-yards for the sale of cattle should be established on the Common at Bathurst? Yes, it is very necessary.
5. Why? The cattle at present are sold within the Municipality. They are driven through the streets during the hours of daylight, and several accidents have occurred. I think one person has been killed by cattle being driven through the streets. It is therefore very dangerous; and there is no suitable place in the neighbourhood of Bathurst for the sale of cattle.
6. *Mr. Driver.*] Is it necessary, Mr. Webb, that the Municipal Council of Bathurst should be compelled to erect suitable buildings and yards? Yes.
7. Would the erection of these yards be a great boon to the public of Bathurst? Yes; there has been a public meeting held on the question, and resolutions unanimously come to on the question, requesting the Council to take action.
8. Then, as far as you are aware, there is no objection to the proposed course? No; far from it. The people are anxious it should be carried out.
9. Are you aware whether a similar feeling exists among the graziers and stockowners of the district? Yes, they are anxious for them, because now all the business is centred in the hands of certain individuals. The Council will not allow yards to be erected, and all cattle have to be sent for sale to these two persons, who have virtually a monopoly of the business. All persons complain of this monopoly, except these two.
10. All persons interested complain of it? Yes, all persons interested, except the two persons I have referred to, and you can't expect them to complain.

E. Webb, Esq.
M.L.A.

13 Mar., 1873.

Robert D. Fitzgerald, Esq., called in and examined :—

11. *Chairman.*] Your name is — ? Robert D. Fitzgerald.
12. You are in the Survey Office? I am the Deputy Surveyor General.
13. Are you aware that certain land, containing by admeasurement 5,433 acres, was, by notice in the *Government Gazette* in 1866, dedicated as a Common for the town of Bathurst? No; there is a mistake in that. These amounts appear to be taken from the temporary Common. There is a temporary Common of 543 acres, and that appears to be it.
14. *Mr. Driver.*] Has not land been dedicated? Yes; 762 acres.
15. Is that a portion of the land there described? No. There is a temporary Common of 543 acres, but it does not affect this portion of land. It does not come into it. This comes into the 762 acres.
16. Which has been already dedicated to the public? Yes. It was dedicated for Commonage and for public recreation.
17. On what date? The 10th January, 1865.
18. How much;—700 acres did you say? No; 762.

R. Fitzgerald,
Esq.

13 Mar., 1873.

- R. Fitzgerald, Esq. 19. Have any persons been appointed Trustees of that Common? Yes; the Council of the Borough were appointed Trustees.
20. When? On the 7th November, 1871, by *Gazette* notice of that date.
- 13 Mar., 1873. 21. Has the *Gazette* notice been given? Yes; they were appointed by *Gazette* notice of that date.
22. And you say the land described in the schedule to this Bill forms part of the 762 acres so dedicated? Yes. The description is not a good one. I may call your attention to that. There are some mistakes in it. For instance: "bearing 240 chains 40 links" should be "240 degrees 40 minutes, distant 21 chains 44 links." That will bring it near a road. I don't know whether it is intended to be on the road.
23. That is the Carcoar Road? I believe it will be near it.
24. *Chairman.*] Go on Mr. Fitzgerald? I think it would be an improvement to put in the "Southern" instead of "South-west," but it does not much matter; and I think that the description should run thus: "10 acres of land, portion of 762 acres, dedicated for Commonage and public recreation at Bathurst, and known as the Park."
25. Can you give us this paper? Yes; the descriptions are in that.
26. *Mr. Driver.*] And this amended description handed in by you is correct? Yes; at least I believe it is so. It is at any rate consistent in itself, which the other one is not. The land is a portion of the 762 acres at any rate.

1872.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WALKER AND CARLOW STREETS ENCLOSURE BILL.
(PETITION AGAINST—INHABITANTS OF ST. LEONARDS.)

Ordered by the Legislative Assembly to be printed, 22 November, 1872.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of the District of St. Leonards,—

HUMBLY SHOWETH:—

That your Petitioners have observed with concern that there is a Bill before your Honorable House which proposes to enclose those portions of Walker-street and Carlow-street, which intersect the public reserve for purposes of recreation within this district, set apart as a public place.

Your Petitioners are desirous to show that if the Bill now before your Honorable House should receive the assent of your Honorable House there will be no public thoroughfare through the said reserve; that the property-owners in the vicinity will suffer damage, and have a fair claim for compensation; further, that the general public will be put to serious inconvenience, without any corresponding advantage.

Before the said reserve was formed at all there was a thoroughfare, which ran at angles; said thoroughfare was a great convenience to persons proceeding to Middle Harbour. This is now closed; and if your Honorable House should consent to the Bill now before your Honorable House, the reserve (consisting of forty acres) will be entirely shut out from all wheeled vehicles or equestrians.

Your Petitioners therefore humbly pray that your Honorable House will refuse to give your assent to the said Bill; and your Petitioners will, as in duty bound, ever pray.

[*Here follow 44 Signatures.*]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WALKER AND CARLOW STREETS ENCLOSURE BILL.

(PETITION AGAINST—CERTAIN RESIDENTS AT NORTH SHORE.)

Ordered by the Legislative Assembly to be printed, 25 March, 1873.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of the North Shore,—

HUMBLY SHOWETH:—

That your Petitioners are made aware, by means of the public Press, that a Bill is now before your Honorable House to legalize the shutting up of portions of Carlow-street and Walker-street, in the township of St. Leonards, North Shore.

Your Petitioners would respectfully beg leave to state that, about eighteen months ago, the Corporation of the Borough of St. Leonards, without calling any meeting of the Inhabitants or consulting them in any way, shut up the streets in question, and that the Bill now before your Honorable House is brought in to legalize this most illegal act; and that one of the Aldermen, who was a party to thus shutting up the streets, has been instrumental in getting up the Petition in favour of the Bill recently presented to your Honorable House.

That, in the opinion of your Petitioners, it is highly undesirable that the streets in question should be shut up, for the following reasons:—

1. That the whole of the traffic to Middle Harbour, the Forts, and the Water Reserve, is thrown into Falcon-street and Ridge-street, causing a detour of more than half a mile.
2. That both these streets have very steep gradients—in some places as much as one in fifteen, and are therefore unfit for heavy traffic.
3. That Ridge-street is totally impassable at the south-east corner, owing to a precipice, but a roadway has been temporarily opened by cutting off about an acre of the Reserve, as shown on the Plan attached to the Bill.
4. That both Carlow-street and Walker-street where they pass through the Reserve, are not only perfectly level and fit for any traffic, but are fully half a mile nearer.
5. That property in the neighbourhood of the Reserve has been much depreciated in value by the shutting up of the streets in question.

Your Petitioners therefore pray your Honorable House not to pass the Bill.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 300 Signatures.]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WALKER AND CARLOW STREETS ENCLOSURE BILL.

(PETITION IN FAVOUR OF—CERTAIN INHABITANTS OF THE DISTRICT OF ST. LEONARDS.)

Ordered by the Legislative Assembly to be printed, 7 March, 1873.

Walker and Carlow Streets Enclosure Bill.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the Subscribers hereto, who are Inhabitants of the District of St. Leonards,—

HUMBLY SHOWETH:—

That your Petitioners view with satisfaction the course taken by the Hon. Member of St. Leonards, in endeavouring to secure for the residents on, and visitors to, the north side of the Harbour of Port Jackson one large reserve instead of several small reserves, as will be secured by the Bill before your Honorable House.

That the Petition, signed by forty-four persons, against what is termed the resumption of Walker and Carlow Streets, does not represent the wishes generally of the District. That the majority of the persons signing said Petition have no immediate interest in the question, not living in the Borough in which the reserve is situate, and on which it is chargeable.

That several of those persons have been induced to sign under misrepresentations.

That the reserve was intended for the use of the public generally, and not for the exclusive benefit of property-holders in the vicinity.

That the enclosure as now effected will produce a more desirable place of public recreation than if the same area be intersected by public carriage thoroughfares of a chain in width.

That the public thoroughfares for foot-passengers are not necessarily interfered with, and more actually exist than are contemplated by the Petitioners against the resumption.

That the resumption does not contemplate any absence of carriage-drives and footways, if such should be deemed desirable.

That foot-passengers, who constitute the great majority of the population, are more likely to be accommodated by going as they please in one large area, than if they were obliged to pass through four separate and distinct squares, each with its gates and wickets.

That the maintenance of the said reserve must in the main depend upon voluntary subscriptions. That it has been cleared, fenced, and planted, mostly by voluntary subscriptions from people who understood that the reserve was to be closed, or rather, that the two streets were not to be continued through the reserve. That the reserve, as now improved, has increased the value of all the surrounding property more than twofold. That the property surrounding is more likely to be permanently increased in value by a large area of park in front than by having four small squares, with dusty streets intersecting them.

That the maintenance of two streets through the said reserve will entail upon the ratepayers of the Borough one-half mile of street, with kerbing, guttering, together with one mile of additional fencing and gates, the whole of which will be saved by leaving the reserve as it now stands.

That no material inconvenience can result from enclosing the continuation of Walker and Carlow Streets across the reserve, as—

Firstly,—The traffic must proceed at right angles if the streets be opened.

Secondly,—The traffic now proceeds to and from the south, from the corner near the R. C. Church, and can, without the least impediment, proceed along Ridge and Alfred Streets to Falcon-street, or along Miller-street.

Thirdly,—The traffic must proceed along these routes, as that by Walker-street is impracticable by physical features; and even were it rendered practicable, no saving of distance to Middle Harbour could take place, as far as the subsequent passage by or through the reserve is concerned.

That the only objection which has any weight, viz., the prevention of carriages and horses from going across at right angles, from points halfway from any corner to points directly opposite, applies equally to any person living on any part of the surrounding property; and, if seriously entertained, must tend to the removal of all fencing whatever, and to leaving the reserve a bare common, with nothing but paths crossing it in all directions.

That the only persons who are interested in the question involved in the last paragraph are people living or owning property at the corners of the following streets:—Walker-street with Ridge and Falcon Streets, Carlow-street with Miller and Alfred Streets,—and these are nearly all of them favourable to closing the reserve.

That no delay is entailed on foot-passengers, and the *utmost* delay caused to vehicles and horses is the length of one side of the reserve, which, at the rate of eight miles an hour, equals two minutes, and at three miles equals five minutes.

That such delay is not likely to be incurred by owners of the property named.

That the "resumption" does not imply *any* interference unnecessarily of any traffic, should such be deemed of public utility hereafter.

That should the "resumption" not take place, no diagonal route is thereby allowed.

That your Petitioners are of opinion that more advantage accrues to the public generally from the reserve as enclosed at present, than would accrue should the streets be continued.

Your Petitioners, therefore, humbly pray that your Honorable House will give your assent to the said Bill, and your Petitioners will, as in duty bound, ever pray.

[*Here follow 166 Signatures.*]

1873.

1872-73.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 23. FRIDAY, 13 DECEMBER, 1872.

7. WALKER AND CARLOW STREETS ENCLOSURE BILL:—Mr. Tunks moved, That this Bill be “now read a second time.”
Debate ensued.
Mr. Stewart moved, That the Question be amended, by omitting the words “now read a second time,” with a view to inserting the words “referred to a Select Committee for consideration and report.”
“That such Committee consist of Mr. Burns, Mr. Farnell, Mr. Forster, Mr. Hill, Mr. Macintosh, “Mr. Neale, Mr. Tunks, and the Mover.”
Debate continued.
Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.
Question,—That the words proposed to be inserted in place of the words omitted be there inserted,—put and passed.
Main Question then,—
(1.) That the Walker and Carlow Streets Enclosure Bill be referred to a Select Committee for consideration and report.
(2.) That such Committee consist of Mr. Burns, Mr. Farnell, Mr. Forster, Mr. Hill, Mr. Macintosh, Mr. Neale, Mr. Tunks, and the Mover,—
put and passed.

VOTES No. 60. FRIDAY, 7 MARCH, 1873.

2. WALKER AND CARLOW STREETS ENCLOSURE BILL:—Mr. Tunks presented a Petition from certain Inhabitants of the District of St. Leonards, in favour of the passing of this Bill.
Petition received.
Ordered, on motion of Mr. Tunks (*with the concurrence of the House*), that the Petition be printed, and referred to the Select Committee now sitting on the Bill.

VOTES No. 68. WEDNESDAY, 19 MARCH, 1873.

6. WALKER AND CARLOW STREETS ENCLOSURE BILL:—Mr. Tunks, as Chairman, brought up a Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 13th December, 1872.
Ordered to be printed.

WALKER AND CARLOW STREETS ENCLOSURE BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, to whom was referred, for consideration and report, on the 13th December, 1872, the "*Walker and Carlow Streets Enclosure Bill*," and, on the 7th March, 1873, a *Petition from certain Inhabitants of the District of St. Leonards, in favour of the passing of the Bill*,—beg to report to your Honorable House,—

That, having examined the Witnesses named in the List,* and considered * Vide List of Witnesses, p. 6. the Bill referred to them, your Committee are of opinion that such Bill should be passed by your Honorable House.

WILLIAM TUNKS,
Chairman.

No. 2 Committee Room,
Sydney, 19 March, 1873.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 30 JANUARY, 1873.

MEMBER PRESENT:—

Mr. Tunks.

In the absence of a Quorum, the meeting called for this day lapsed.

TUESDAY, 4 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks,		Mr. Hill,
Mr. Burns,		Mr. Stewart.

Mr. Tunks called to the Chair.

Entry in Votes and Proceedings appointing the Committee, *read* by the Clerk.

Committee deliberated.

Ordered,—That Mr. D. R. Gale, Mr. G. A. Bell, Mr. V. Zahel, and Mr. G. Barnett, be summoned to give evidence next meeting.

[Adjourned to Friday next, at *half-past Two* o'clock.]

FRIDAY, 7 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks in the Chair.

Mr. Farnell,		Mr. Stewart,
		Mr. Hill.

Mr. D. R. Gale called in and examined.

Witness withdrew.

Mr. G. A. Bell called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. V. Zahel, Mr. G. Barnett, Mr. J. Rothwell, and S. H. Pearce, Esq., be summoned to give evidence next meeting.

[Adjourned to Tuesday next, at *Two* o'clock.]

TUESDAY, 11 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks in the Chair.

Mr. Stewart,		Mr. Hill,
		Mr. Macintosh.

S. H. Pearce, Esq., called in and examined.

Witness withdrew.

Mr. V. Zahel called in and examined.

Witness withdrew.

Mr. G. Barnett called in and examined.

Witness withdrew.

Mr. J. Rothwell called in and examined.

Witness withdrew.

R. D. Ward, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That M. W. S. Clarke, Esq., M.A., Mr. W. James, and Mr. L. Solomons, be summoned to give evidence next meeting.

[Adjourned to Friday next, at *Two* o'clock.]

FRIDAY,

FRIDAY, 14 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks in the Chair.

Mr. Burns, | Mr. Hill.

M. W. S. Clarke, Esq., M.A. (*Alderman, Borough of St. Leonards*) called in and examined.
Witness withdrew.

Mr. L. Solomons called in and examined.

Witness withdrew.

Mr. W. James called in and examined.

Witness withdrew.

Mr. L. J. Harnett examined.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

FRIDAY, 21 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks in the Chair.

Mr. Farnell, | Mr. Burns,
Mr. Hill.

T. J. Cook, Esq., called in and examined.

Witness withdrew.

Mr. James Booth called in and examined.

Witness withdrew.

[Adjourned to Wednesday next, at *half-past Two* o'clock.]

WEDNESDAY, 26 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks, | Mr. Burns.

In the absence of a Quorum, the meeting called for this day lapsed.

FRIDAY, 28 FEBRUARY, 1873.

MEMBERS PRESENT:—

Mr. Tunks, | Mr. Stewart.

In the absence of a Quorum, the meeting called for this day lapsed.

WEDNESDAY, 5 MARCH, 1873.

MEMBER PRESENT:—

Mr. Tunks.

In the absence of a Quorum, the meeting called for this day lapsed.

WEDNESDAY, 19 MARCH, 1873.

MEMBERS PRESENT:—

Mr. Tunks in the Chair.

Mr. Hill, | Mr. Burns.

Bill considered.

Preamble postponed.

Clause 1 *read and agreed to.*

Preamble *read and agreed to.*

Chairman to report the Bill to the House, without Amendment

Chairman then submitted Draft Report. Same *read and agreed to.*

Chairman to report to the House.

LIST OF WITNESSES.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

WALKER AND CARLOW STREETS ENCLOSURE BILL.

FRIDAY, 7 FEBRUARY, 1873.

Present:—

MR. FARNELL, | MR. HILL,
MR. STEWART.

WILLIAM TUNKS, ESQ., IN THE CHAIR.

Mr. David Robertson Gale called in and examined:—

1. *Chairman.*] You are aware of the nature of this inquiry, Mr. Gale? Yes.
2. You reside at the North Shore? I reside in Carlow-street—one of the streets shut up.
3. Answer my question, if you please? Yes, I reside on the North Shore.
4. You are one of those who signed a petition against the enclosure of the Park at North Shore? Yes, I signed a petition.
5. The allegations in the petition are the complaint you have to make in the matter? Our complaint is that the streets are shut up, and that they ought to be open.
6. And that the enclosure of the Park where those streets, if formed, would cross it, damages people's property? It depreciates its value.
7. That is immediately round the neighbourhood at which it is proposed the enclosure should take place? Yes, of course, more immediately around the square where the enclosures are proposed.
8. Will it damage any property belonging to you? I am a landholder a little lower down. I consider that it would damage the property of all the parties.
9. You are a landholder where? In Miller-street.
10. Whereabouts in Miller-street? Daniel Eldridge's store, which is a little lower down.
11. Is that in the municipality of St. Leonards at all? Not now. It was. It is adjacent—cut off by the street joining it.
12. Is that in the neighbourhood of the reserve? It is not in the immediate neighbourhood.
13. How far is it off? I suppose it is about a quarter of a mile from the reserve.
14. Do you state to the Committee that the closing of those streets at the reserve damages that property? I reckon that it damages the value of property all round about.
15. Does it damage that property? I consider that it does. My tenant often complains about the street being shut up; he occasionally goes with a vehicle to Middle Harbour, and has to make a detour of about a quarter of a mile in consequence.
16. Who is your tenant? Daniel Eldridge.
17. Do you know that the Corporation have charge of this property? The Mayor and Councillors are the Trustees, I believe.
18. Have you made any representations to them in the matter? No, not directly; others have, with the result of which I have been informed.
19. Your objection to this Walker and Carlow Streets Enclosure Bill is that it will have the effect of damaging people's property immediately about the reserve more especially, and in the whole neighbourhood generally? Yes.
20. Is it a fact that the value of property has been depreciated by what has already taken place there? It is a matter of opinion simply. As far as my own observation goes, and my own opinion also, I take it that

Mr. D. R.
Gale.

7 Feb., 1873.

Mr. D. R.
Gale.
7 Feb., 1873.

that property has been very much depreciated in value from the streets being shut up. That is the case more particularly in regard to those allotments in the immediate neighbourhood, where parties are residing or will reside when they build. A great deal of the property there has not yet been built upon.

21. There is a fence across the road now? Carlow-street is entirely shut up at both ends where it enters and leaves the reserve.*

22. You have seen that? I have at present to go through between the wires of a five-railed fence.

23. Do you think you are under any obligation to speak the truth when you come to give evidence before this Committee? Yes.

24. And you have seen that both ends of the street are closed? Yes.

25. You have seen it? I have. There is an opening a little above, but not at the street.

26. You have seen that as well? I have seen that as well. I am judging where it leaves by the stones; the alignment stones are lower down considerably. Where Carlow-street intersects Alfred-street there is an opening of about two and a half feet for passengers to pass in and out. The stones must be about two chains below the other opening.†

27. However, you have seen it, and it is enclosed? Yes; the stones are lower down.

28. And there is no opening there? There is no opening just at the street.

29. And in that immediate neighbourhood property has been depreciated by the enclosure? Certainly, because you have a detour to make. In fact, unless by cutting off a portion of the reserve at the south-east corner close to where Ridge-street would intersect Alfred-street you could not get along. Before these streets can intersect each other there is a precipice, and a portion of the reserve just above the top of it has been cut off in order to get a road round that way.

30. Is that open to the public? It is open by the fence being run in upon the reserve ground cutting off about an acre of it at the corner.

31. But the roadway is open? The roadway is open certainly along a portion of the reserve.

32. In the event of that portion of the reserve being closed, what other way would there be? In the event of the roadway into Ridge-street being shut up, the only other way would be by taking a northerly direction into Falcon-street.

33. Suppose you started from the Roman Catholic Chapel? Suppose I started from the Roman Catholic Chapel and follow Ridge-street, I should come to a precipice which I could not get down. In order to make a temporary roadway there, about an acre of the reserve has been cut off, as shown on this plan. (*Showing witness printed Plan appended to Walker and Carlow Streets Enclosure Bill.*) The roadway crosses the corner of the reserve into Alfred-street. If I had an allotment there, I should have to go in a northerly direction into Falcon-street, and that would entail I suppose about half a mile of a detour round the reserve at the very least. I am in treaty for ground to build upon just there. It would be a great advantage for me to have a direct roadway through Carlow-street to get to Sydney. If the portions of the reserve at the corner which is open now were shut up, I should have to take a different direction to get to Sydney, because Alfred-street is not open yet; it follows down and leads into Sydney by the top of Neutral Bay.

34. *Mr. Hill.*] How long do you say you have been living in this locality? Four years and better; in fact, five years last September.

35. At the time you went there, there was no difficulty about Carlow-street? No, because the reserve was not fenced in; it is only fifteen months or thereabouts since it was fenced in.

36. At that time was Carlow-street much used? The street was in its natural state; in fact there are only three cottages at present built in the street, with the exception of another one which stands convenient to it, and the ground attached to it runs to the corner of Carlow-street.

37. Then, so far as your own opinion goes, you think that the enclosure of Carlow-street depreciates the value of the property you have alluded to? I have no doubt it does; I have not the least hesitation in saying so.

38. *Chairman.*] Was that portion of Carlow-street enclosed used commonly before for vehicles? No; the track led in a different direction, but through the reserve.

39. Was not that track in a state of nature? It was in a state of nature. The bush track which existed before the shutting up of the street led off at the south-west corner in a direct line for Middle Harbour, at an angle through the square.

40. Carts and other vehicles went through this as well as passengers? Conveyances and foot-passengers took this as the nearest and as the best road. In point of fact, there was not a single street formed at that time in the neighbourhood.

41. As a matter of fact, you know, from having lived there so long, that that track was more through the centre of the reserve than through any other part? Yes; and the bush track was formed on the easiest gradient; it is almost level; but the gradient is very steep at the north or south end of the reserve, where the traffic is now driven; it is very steep, particularly in Ridge-street; I suppose it is one in fifteen in some parts.

42. *Mr. Hill.*] And the distance round is much greater? Suppose a party were living at the south-east corner of the reserve, and instead of being able to get by Ridge-street, by reason of the present encroachment in the park being shut up, he would have to take a detour to the north along Alfred-street, passing Carlow-street, which is now shut up, till he came to Falcon-street, following that street westward, and then coming up along the western side of the reserve by Miller-street, in order to get to Sydney.

43. If Carlow-street were kept open, the distance would be much shorter? Yes.

44. *Mr. Farnell.*] I understand you to say that the track usually used by the people of North Shore went diagonally across the reserve? Nearly so; it crossed over in a diagonal direction, entering Falcon-street, and followed on to Middle Harbour.

45. That has been the road usually in use; and Carlow and Walker Streets, which cross the reserve, have never been used? They were not formed at this time; most of the streets have been formed since the reserve was fenced in.

46.

* NOTE (on revision):—I wish to make a correction here, so far as that at the east side of the Reserve there is an opening at Carlow-street for foot-passengers of about two and a half feet; on the west side next me there is no opening.

† NOTE (on revision):—There are two openings of about two and a half feet on the east side of the reserve; one where Carlow-street intersects Alfred-street, and another about two or three chains higher up the hill to the north.

Mr. D. R.
Gale.
7 Feb., 1873.

46. I also understand you to make some objection to the deviation across the south-east corner of the reserve, on the supposition that the road there may be closed up—Is it likely to be closed up? It is an encroachment at present on the reserve; it is not the Surveyor-General's alignment of the street.
47. Are you aware that it can be done? By Act of Parliament, of course.
48. Without an Act of Parliament? Not without an Act of Parliament.
49. I understand you to say, if that deviation is made, or if that encroachment on the reserve takes place, it will afford all the convenience necessary for the traffic? Yes, but with a much steeper gradient.
50. But it will afford it? It will afford it.
51. Are not the gradients of the streets generally steep on the North Shore? Of course there is a steep gradient all the way up from the water, except in parts, to where the Catholic Chapel stands, and then the ground becomes undulating.
52. If this deviation is made across the south-east corner of the reserve, by the road leaving Ridge-street and going into Alfred-street,—and if, as I understand you to say, that deviation will afford all the convenience for traffic of persons residing on the east of that street,—how then will your interests be affected by the closing up of Carlow and Walker Streets, where they cross the reserve?
Chairman.] He has no interest—he is only going to have.
- Witness.*] I have an interest lower down.
- Chairman.*] Not in that Municipality? It was in it until very recently.
53. *Mr. Farnell.*] You stated that the closing of these streets will deteriorate the value of property—how will it do so? By causing a detour of a quarter of a mile.
54. Detour from where? Supposing a party from Middle Harbour wants to get to Sydney, instead of going along Carlow-street, which is a level street all the way—
55. Is it a road at all? It is not formed; at present it is shut up.
56. *Chairman.*] Was it ever formed? It was never formed any more than the other streets.
57. Was it ever cleared of the stumps? No.
58. *Mr. Farnell.*] Has it been aligned? Boundary stones are set up.
59. On that street? On both streets, by the order of the Surveyor General.
60. How many persons will be inconvenienced by the closing up of these streets, supposing that it will be an inconvenience? It is impossible for me to say how many. It is not to the present that I am looking at, but to the future, when the whole neighbourhood will be populated and built upon. The traffic of all the parties living in the direction of Middle Harbour and the Sandspit comes this way.
61. Point out to me on the plan the course they would take? A person coming from that direction would have to come down Alfred-street and along by Ridge-street, as long as the deviation of the road at the south-east corner was kept open.
62. Whereabouts is the ferry? About southerly.
63. Where would be Middle Harbour? To the north-east.
64. Then a person coming from Middle Harbour would pass down Alfred-street? He could pass down there as long as the deviation at the corner was kept open.
65. He could do so by passing over the deviation at the south-east corner of the reserve? Yes.
66. And then down to the ferry? Yes, by a very steep gradient.
67. Would it be any advantage to him to pass out of Alfred-street into Carlow-street, which crosses the reserve parallel with Ridge-street, and then to go down to the ferry? It would be very important, for he could take a heavy load that way, but he could not do it along Ridge-street.
68. Owing to the steepness of the gradient? Yes.
69. Could not that gradient be reduced by the expenditure of money? Yes, but the hills are steep.
70. After you go out of Carlow-street into Ridge-street, what road is that? Miller-street—a good road all the way down to the ferry.
71. Is it your opinion that the making of a reserve in a township deteriorates the value of property? The making of a reserve?
72. Yes,—improving and planting of a reserve? Certainly not. But my opinion is, that if a public meeting had been called, it would have ascertained it to be the wish of the majority that these streets should have been left open; that would be the opinion of the majority, as far as I could ascertain it.
73. I am asking you for your opinion? My opinion is that it would be more beneficial to the public traffic if these streets were left open than if they were shut up—not only better but shorter.
74. How is it then that these streets were never used? They got a diagonal track across the reserve.
75. They got a better road? It followed the ridge, and was shorter to go.
76. You have given evidence to the effect that the making of this reserve would damage the value of people's property—Is it your opinion that a reserve made in a township, and improved and enclosed, deteriorates the value of property? Certainly not, under proper regulations, with a view to accommodate the traffic passing along.
77. Do you think it has not made traffic there, that reserve? It would be a deprivation to force the traffic into a road with a steep gradient.
78. Is it your opinion that the making of a reserve, enclosing and improving it, in a locality where there is a population such as exists at St. Leonards, depreciates the value of property in its vicinity? Under proper regulations, I should say not, because a reserve for public recreation in all townships is a very desirable thing; but then it would be prejudicial to the public traffic, to the heavy traffic, to throw it into unsuitable roads, when you might have better and shorter roads.
79. What is the area of the reserve? About 40 acres are included in the reserve, or rather 37.
80. Then I think I understood you to say that, if this deviation were made across the south-east corner of the reserve, the closing of these streets would not be so inconvenient? It would enable a vehicle to pass along, but it would be prejudicial to the heavy traffic, because the other road is better and levelled.
81. That applies to the Middle Harbour traffic? To the Middle Harbour traffic.
82. *Mr. Hill.*] Or to persons going to the batteries? Or to the batteries, and also to Manly Beach and Pitt Water, in which direction a punt has been recently established, and a road formed.
83. *Chairman.*] You say that the road you call the diagonal road was the best road to accommodate the public? Yes, the original track was the nearest and the levellest.
84. Are you not aware that there was some other reason why that road should be taken than the one you have mentioned? I am not aware of any other reason.

- Mr. D. R. Gale.
7 Feb., 1873.
85. Do you not know that there was an impassable place at the corner of Carlow and Miller Streets? That is not impassable.
86. Was there not an impassable place there? There was a small creek there, but there was a bridge; it has not been impassable ever since I have known the North Shore; the bridge was a temporary bridge.
87. That was occasioned by the creek running through Mr. Zabel's property? Yes.
88. Where did the creek emerge from the reserve across Falcon-street? It emerged nearly opposite Allan's.
89. Was that a passable road—that was not a good road there, was it? That is one of the roads at present in use. The road has been bridged over by you since, under municipal authority.
90. It is passable now? Yes.
91. But previously this creek crossing these two roads interfered with the traffic? No heavy traffic could have passed over them; the bridges were only suitable for light traffic.
92. *Mr. Hill.*] You have no objection whatever to this reserve, excepting the closing of these streets? I have no objection; in fact, I am in favour of all reserves for public recreation in townships; I am much in favour of it, and always disposed to advocate reserves for this purpose; but this Carlow-street is certainly a very level street, and, if formed right through the reserve, it would be the best road for all the traffic to Middle Harbour and the batteries.
93. In fact, it is the road which would be used by all the people who live on the eastern side right away to the water? Yes, for heavy traffic.
94. *Chairman.*] If you go from the western side to the eastern side, is it level all the way? It is undulating; it is the best road to the eastern side, and in the direction of Middle Harbour.
95. I ask you is the road you speak of from the western side of the reserve to the eastern side of the reserve, as laid down on the plan—is that the best road? It would be the levellest and the shortest road if formed in the direction of Middle Harbour.
96. You have said that the angle at the south-east corner of the reserve is an encroachment? Yes.
97. Are you prepared to dispute the proposition that the Council has a right to determine the use of this place? I am not prepared to dispute anything.
98. I mean as regards their legal right? It is a question not for me to say.
99. You have made no representation of your views in the matter? No; I believe others have.
100. You were an Auditor of the Council? Yes, I had access to the accounts.

Mr. George Allan Bell called in and examined:—

- Mr. G. A. Bell.
7 Feb., 1873.
101. *Chairman.*] You are aware of the nature of this inquiry, Mr. Bell? Yes, certainly.
102. You are not one of the petitioners against the enclosure of Walker and Carlow Streets Bill? No, I am not.
103. You are an objector, nevertheless? I objected to sign the petition because they brought me a clean sheet; if I had seen other people's names I might have signed.
104. But nevertheless, you object now to the enclosure of these two streets? I have not so particular an objection to the streets being closed as I have to the thing being fenced out; that is not so good as it could have been done in another way.
105. Perhaps you will state, in your own way, the objection you have to this Bill? I never saw the Bill; I do not know what it is.
106. It simply proposes to close from cart traffic Carlow and Walker Streets, so far as they pass through the reserve? My idea of the park altogether would be this—that it would make a far better park to allow the streets to remain closed as they are, and then to put up a gate at the corner of the Roman Catholic Chapel, and run a road through the reserve to the Middle Harbour Road; that is the most direct line of road that could be made to suit all the people, and every one who lives beyond. Make that a proper avenue from corner to corner through the Domain; that is the most easy road for carriages of any kind.
107. Have you any idea of the means at the disposal of the Council which has charge of the reserve? I have not.
108. Having regard to the present state of the roads generally on the North Shore, do you think that the Council would be justified in laying out money for improving the direction of the road in the way indicated by you? I think they have laid out more money there than would have done it.
109. Well, take what has been laid out to be wasted, still would they be justified in laying out money from their small means to make a road there? I do not know what means you have got, and I do not know the money was got to do what has been done already.
110. You know that certain improvements have been made on the reserve during the last two years? Yes, if improvements you call them.
111. It has been fenced in? Fenced in and fenced out.
112. The fence is across the streets at the end? Yes.
113. On three sides of it trees have been planted? Yes.
114. And the interior is being filled up as fast as means will permit? Yes, some loads of stuff have been driven in there.
115. You are aware that public subscriptions have been asked for to do this work? I am aware that something was got up in the School of Arts to assist it.
116. In addition to that, is it within your knowledge that subscriptions have been asked for? I do not know, indeed; I never was asked for anything.
117. The underwood and stumps have to some extent been taken out of the reserve? They are as bad as ever now.
118. Is it a fact that it has been cleared? It is a fact that it has been attempted to be cleared.
119. Have you any idea, from your own judgment, of the cost of what has been done? No, I never formed any opinion on it.
120. At present you are not in favour of removing this wire fence? I say it would be better if it were done as I said. There are no gates in the proper place; the gates ought to be where the street comes up.

Mr. G. A.
Bell.

7 Feb., 1873.

121. You object to the position of the entrances? Yes, certainly.
122. Did you ever represent that to the Council? I never made any objection about it, neither in one way nor in another.
123. You have never made any objections? I never made any objections, but I said all along when the entrances were made they were put in the wrong place.
124. You stood by all the time, and never represented this to the Council? What would have been the use?
125. Is it true that you have never made any representations to the Council? I may have talked it over with the Aldermen, but not to the Council generally.
126. Have you ever made any representations to the Council as to this matter of the improper position of the gates at the entrances? I have talked about it with the Councillors.
127. Have you made any representation to the Council? I did not.
128. Do you know how long the wire fence has been up, or about how long? One or two years.
129. Within two years? Not so much as two years.
130. Have you noticed any depreciation in the value of property by reason of that enclosure? I do not know.
131. Has property decreased in value within the last two years? I have not heard much about property; property is a great deal less there now than it was at one time; I have known allotments to be sold there at one time for £50.
132. You must be aware that the question is about this fence. If the fence has not been up more than two years we need not go beyond that? The land that I speak of was sold before the fence was there.
133. Therefore the fence did not affect that? The fence did not affect that.
134. Has property depreciated in value during the last twelve or eighteen months? I do not know anything about property; I am not in the market, either buying or selling.
135. Is it your opinion that property has been depreciated? I cannot say what my opinion is.
136. Has it improved in value, in your judgment? I do not think there is much improvement in it.
137. You do not think that there is much improvement in the immediate neighbourhood of the reserve since the fence was put up? Not much improvement in regard to land.
138. I mean in regard to the selling value? I could not tell you, because I have never had any traffic in the market in that way.
139. You know the road spoken of as the diagonal road, leading from the Roman Catholic Chapel to Middle Harbour? The old road—what they call the bush road?
140. Yes? I am aware of that.
141. That was never a road regularly laid down? It was never proclaimed; it was a bush road.
142. Was it not difficult to get round by Miller and Falcon Streets, by reason of the creek flowing into Willoughby Falls—before the Corporation came into existence was there not a bad place there near Allan's? There was a creek there, and no bridge.
143. If people had been disposed to go down by the surveyed road they could not have gone down that way? They have always gone that way; you could not take the right road.
144. You could have gone with a cartload from the Roman Catholic Chapel along Miller-street and Falcon-street to Middle Head, as easily almost as by going across the reserve? No.
145. What was the impediment? That creek you speak of was across Falcon-street.
146. That was a bar for some time? You could not go so readily that way as you could right through the reserve.
147. Was not that creek a bar to the traffic by way of the authorized road, up to the time of the Corporation coming into existence? There was a creek at Zahell's corner.
148. And that same creek had to be crossed again in Falcon-street, near Allan's place. Certainly.
149. That was an impediment to the traffic going on the regular road at that time? There never was much impediment at Zahel's corner.
150. But you would not go that way across to Middle Harbour while you could get across the reserve? I would rather go straight across the reserve from the Roman Catholic Chapel than I would over these two creeks by the road.
151. You know where the corner is cut off from the reserve? Yes.
152. Is that an accommodation to the public or otherwise? I do not know; it is a very steep descent.
153. Is not a large quantity of stone brought up there for building and other purposes? There is a good deal of building-stone brought up that way. The road where the corner is cut off at Ridge-street is very steep.
154. Which is the road you speak of as being the diagonal road leading into the eastern end of Carlow-street? It would cross Carlow-street altogether, and go from one corner of the reserve to the other.
155. By following Carlow-street, would you not land into a gully? There is a swamp there; but the street comes out across the top of the swamp; you would have to cross little of the swamp.
156. Carlow-street continues into the head of Neutral Bay. From those quarries would it not be as steep to go northwards as eastwards? Certainly not.
157. In any case you would have to get to the Roman Catholic Chapel? Yes.
158. Would you not have to get there whichever way you went? Yes.
159. Would there not be as much ascent one way or the other in that quarter of a mile? Yes.
160. Do I regard you as an opponent of the measure, or in favour of it as it now stands? I would rather see the park without these streets, if a street were made diagonally through it.
161. Would you not need an Act of Parliament to open a road there? Why should you need it?
162. *Mr. Hill.*] How far do you live from this reserve? I should think about ten or fifteen chains.
163. How long have you lived there? For the last twenty-six or twenty-seven years; I may say thirty years.
164. If the streets marked on the plan of the reserve were closed, is it your opinion that property would be depreciated in value or not? I think it would. What land people have already bought, they have bought it with these streets opening through the reserve.
165. How long is it since you have used the original road already spoken of by the Chairman, leading to Middle Harbour, Middle Head, and all the eastern portion of North Shore? I dare say I have not been across it for the last two years.

- Mr. G. A. Bell.
7 Feb., 1873.
166. How long is it since you first knew it to be used? That track has been the road ever since I have been on the North Shore.
167. From your first knowledge of that road, it was always sufficiently wide, was it not, for vehicles of all descriptions? It was not very wide, but it was wide enough for carts to pass one another.
168. And it was nearly level from beginning to end? It was a little up and down, but very little.
169. Was it a better road than the road you have to use now? It could not be a better road, because it was a natural bush road.
170. Was it a better road? No, it was not.
171. Was it an easier road? It was an easier road.
172. And that was the reason it was used? Certainly.
173. Was it shorter or longer than the present road? A good deal shorter.
174. I think you have already stated in your evidence that you would have no objection to this Bill, provided proper gates were fixed? If there were proper gates, that would put everybody at rest.
175. If proper gates were erected, would the park or reserve be injured or deteriorated? The park would be injured or deteriorated if the gates were allowed to be kept open; they must be shut as people pass through them; if that were done, it would satisfy everybody in that neighbourhood, I think.
176. The road at present used round the park is very steep, I think? From Alfred-street to Ridge-street the road is very steep. You have to rise a little to go up to the Roman Catholic Chapel; there is a rise from Carlow-street to Alfred-street. The old road diagonally across, with proper gates at the entrances to the park, would be the best road; if that were done, no person would have anything to say. There are two red gates in Walker-street, and people could walk across there.
177. You do not think that this enclosure has depreciated the value of your property? I do not think it has done me either good or harm.
178. Then your only reason for giving evidence is your desire to see that road formed, which you believe to be the best road? I would not like to see the park cut up into four pieces; but if the road I speak of was put through, and laid out by degrees, they might make it one of the prettiest parks about Sydney.
179. *Mr. Farnell.*] I understand you to say that you do not approve of the streets as they now stand in the reserve? I would rather see the park without them than see it cut up into four pieces; none of it ought to be fenced off there—it ought to be all one piece.
180. You think that those streets ought to be closed, provided a diagonal road were made through the park? If that road were made through, I do not think the inhabitants would object.
181. *Mr. Hill.*] That is your individual opinion? Yes, and the opinion of all other people with whom I have talked on the subject. There are forty acres of it, I believe, and then Walker and Carlow Streets would go into the park to increase its size.
182. *Chairman.*] If the road you speak of were formed, would it not produce a great deal of dust in the park, and would not that be an element of depreciation? I do not think there would be much dust that way.
183. Not if it were open to traffic? There is so much good gravel there that I do not think it would be. At present there is dust.
184. You have stated to the Committee that you do not know the income of the Corporation. If I tell you it is £400 from rates and £200 from endowment, and that the Municipality reaches from the heads to Gore's Bay, and from the harbour to Middle Harbour, do you think it would be a fair expenditure of the Council's income, to make the road in the way you suggest,—a road which would be for the convenience of one or two persons at Middle Harbour, whilst persons all round the park want roads to their houses? Well, I think it would be well spent money to do it.
185. *Mr. Hill.*] That is, to make the diagonal road? Yes.
186. *Chairman.*] You think it would be justifiable to neglect other places to that extent, in order to do that work? I think it would be justifiable.

TUESDAY, 11 FEBRUARY, 1873.

Present:—

MR. HILL, | MR. STEWART,
MR. MACINTOSH.

WILLIAM TUNKS, Esq., IN THE CHAIR.

Simeon H. Pearce, Esq., called in and examined:—

- S. H. Pearce, Esq.
11 Feb., 1873.
187. *Chairman.*] You are aware of the nature and object of the present inquiry? I am.
188. That is to say, that there is a Bill before Parliament to authorize the enclosure of part of Walker and Carlow Streets, in the town of St. Leonards, to which enclosure, I believe, you object? Yes.
189. Will you state to the Committee what is the nature of your objection? My objection is that, when I purchased the land from the Government, I purchased it with a view of having a road through these streets, as shown on the plan then exhibited.
190. You say "the land"—what land do you mean? The land here—(*pointing out on Plan*). One allotment in Carlow-street, and one allotment in Walker-street, both being streets leading through the reserve, which it is proposed to enclose.
191. *Mr. Stewart.*] Do you think it will have any influence on the value of your property, if these streets are shut up in the way proposed? Most certainly.
192. In what way—beneficially, or how? The reverse of beneficial.
193. *Chairman.*] You are the owner of land in Walker-street? Yes; I purchased a corner allotment from the Government.
194. What streets does it front? It is at the corner of Walker and some other street that I do not recollect its name.
195. Have you ever seen this allotment you speak of? Well, I cannot say I have; but I know the place very well, and, knowing it as a corner lot, I bought it, many years ago, from the Government, solely because it was a corner allotment, with two open streets—one on each side of it.

196. Then, as the owner of property in these two streets, you object to this enclosure, because of the injury you believe the closing of these streets will do your property? I do.
197. Are you aware that the roadway has already been enclosed by a wire fence running round the sides of the reserve? No, I was not aware of it.
198. And that it has been enclosed for some time past? No; I have not been there for a good while.
199. How long? Not for two years past.
200. Then you have not seen your allotments for the last two years? No.
201. You know, however, where the reserve is? I do.
202. And you know that there is a road which runs through it diagonally towards the Middle Harbour Road? Yes; I believe the Middle Harbour traffic used to come over that way. You mean the old track?
203. Yes? I recollect it well.
204. In your opinion, would the opening out of that track into a road be an advantage, or would you close it up? Yes, I believe that all these tracks ought to be closed, and all the streets opened and laid out for the convenience of the public as soon as possible. My reason for this opinion is, that the streets are all laid out in straight lines, which is an advantage, whilst property has been purchased on each side of them on account of these streets. As the value of this property depends upon the streets being kept open for traffic, there can be no doubt that they ought to be kept open, and all the by-tracks closed. Whatever by-tracks there are running across the reserve, they ought to be closed at once. I know that if I had anything to do with the Municipality, that is the course I should propose.
205. You think, then, that the Municipal Council of St. Leonards has some authority in this matter? Yes, as far as the streets are concerned, and the keeping them open, but they have no right to close any of the streets. I know, from my experience of municipal matters, that they have no such power to close public streets, which these are.
206. You are aware of the mode by which streets are made public streets? Yes; they are dedicated.
207. Will you undertake to say that these streets have been dedicated to the public? As to the dedication, I do not think they have been—that is, not in the strict legal sense of the term; because, until there has been an alignment made, or Proclamation issued, they cannot be legally opened and dedicated; but there is this well-known fact, that the allotments on these two streets in question were sold by a plan showing these two streets running right through the reserve. Those who buy property by a plan have a right to insist that the plan by which they purchased should be adhered to. Whether they be tracks or streets shown on the plan, for the convenience of purchasers, they cannot be stopped unless with the consent of the purchasers.
208. Is it not within your knowledge that the Government have frequently altered the plans of townships? Yes; but not without the consent of the parties who have purchased, or without an Act of Parliament.
209. Is it not within your knowledge that this very plan of the town of St. Leonards has been altered? Yes, I am aware it has; it was enlarged from what it originally was.
210. Has not the street of which your allotment is a corner been altered with the rest? Not to my knowledge. Carlow-street was the same as is marked on the plan before the Committee, and I have no doubt this plan is a copy of that by which I bought. I happened to be Commissioner of Crown Lands for the Metropolitan District at the time of the alteration or enlargement you speak of, and I believe it was I who suggested that the township should be extended.
211. Do you remember seeing two streets called Ridge-street and Alfred-street? No doubt I have seen them, but I do not know them by those names.
212. You have not been about that neighbourhood lately? No; certainly not within the last two years.
213. *Mr. Stewart.*] Do you consider the value of your land would be depreciated by enclosing these streets? I do, very considerably.
214. If the road be cut off, you would have to go round about to go from one side of the reserve to the other, and you would have to go by a steeper track? Yes; it would be a worse road, and a longer distance round. I do not know what distance it would be, but it would be something considerable.
215. Will you measure the distance? Suppose I wanted to go from one side of the reserve to the other, I should have to go round about a quarter of a mile one way and a quarter of a mile the other, or half a mile going and coming.
216. *Chairman.*] Suppose you want to go where? My land is situated on the north of the reserve, and if I wanted to go due east from that property to Carlow-street I should have to go ten chains south and ten chains again north, in addition to what I should have to go over if I went direct through the streets as shown on the plan.
217. *Mr. Stewart.*] How about the approach to the water reserve—would the closing of these streets interfere with the access to that reserve? (*Witness examined the Plan.*) I know the whole of this locality very well when on the ground, but it is so long since I was there that I hardly recognize it on the Plan; but it must undoubtedly have the effect of interfering with the approach from Carlow-street.
218. On account of the people having to go round about to reach it? Yes.
219. What actual difference of value do you think it would make to your property were these streets closed? I should consider that it would reduce the value one-fourth at least.
220. So that, if this Bill were passed into law, you consider that you would be entitled to compensation? Most certainly, because I bought the land from the Government on the express understanding that these streets were to be opened, and reserved as such.
221. *Mr. Hill.*] Do you recollect the track from Ridie-street running across the centre of the reserve? Yes, I do, well.
222. It was a well-defined cart road, was it not? It was.
223. How long have you known that track to be in existence? It was about 1848 when I first went over there in my official capacity. I have known it since then, except the last two years.
224. It was a much easier and more level road than that by the streets as laid down in the plan? Yes. Carts going to Middle Harbour always took it, on account of its being more accessible.
225. From what you know and have seen of that track, would you rather see that shut up and the streets opened, or the streets closed and the track left open? There would be no necessity whatever for keeping that track open if the Municipal Council would make and keep those streets in passable order.
226. Have you ever been round this new road by Ridge-street and Alfred-street? No, I have not been in

S. H. Pearce.
Esq.
11 Feb., 1873.

- S. H. Pearce, Esq.
11 Feb., 1873.
- in that locality for two years. I do not know the street you allude to, except as it appears on the map.
227. How, then, do you come to the conclusion that your property would be depreciated in value, when you have not seen it for two years, and do not know how the change will affect it? In this way:—I know very well where the reserve is, and I know certainly that from the situation of my property its value must be depreciated if these streets through the reserve are closed, as it will be benefited if they are kept open.
228. It is a matter, I suppose, to which you have given a good deal of your attention? It's.
229. And from thinking over it, with your former experience of the ground, you have come to the conclusion that your property will be seriously depreciated in value if these roads be closed? I have. I know that we had some difficulty in inducing the Government to allow of this reserve being made for the benefit of the public; *and on account of its being reserved, allotments fetched higher prices than they otherwise would have done.* But if the streets through it are closed, the reserve, instead of being an advantage, will be the reverse, as that would destroy the value of the land purchased as *business sites* for business purposes.
230. *Mr. Macintosh.*] Do you think that an allotment on the south side of Alfred-street would be injured by this enclosure, considering that the water reserve is immediately north of it? By closing the street?
231. Yes? Undoubtedly, because if you have to go to Lane Cove —
232. I am not speaking of that, but of the water reserve; that is, north of Carlow-street. Now, I want to know would the land in Ridge-street be benefited by the closing of these streets? No, not in my opinion.
233. Considering that from there you would have to go immediately north to the water reserve, it must manifestly be a disadvantage? Certainly, because you would have to go east before you could get to the nearest part of it, and then you would have to travel further north to get to the water; whereas, if the streets were open, you could get there at once by a direct line.
234. *Mr. Hill.*] What you mean by that, I presume, is, that there will be a great saving of distance? Yes; going to the water reserve by Walker-street instead of going *round one-half of the reserve.*
235. Can you speak from memory as to the gradients of Ridge-street or Alfred-street? No, I cannot; I recollect the position, and that is all.
236. You recollect the position, but not the natural features of the spot? No; it is so long ago since I was there that I can hardly be expected to recollect all you refer to.
237. You say that your allotments would be depreciated in value—Would all these allotments be equally depreciated were these streets closed? Yes, in my opinion every allotment around the reserve would be depreciated in value by the closing of these two streets. The reason is obvious. Parties bought the land believing those streets would be opened, *and that facilities would be given for traffic, so as to make valuable business sites.* If you close the streets, you deprive them of this traffic, and that must be a *disadvantage to a business site* in a Government township.
238. *Chairman.*] You are aware that part of Macquarie-street has been closed in that way? Yes, by Act of Parliament.
239. You stated just now that, as a matter of fact, the land facing south to this reserve would be materially damaged by this enclosure? No, not as a matter of fact, but I gave it as my opinion that it would be.
240. Do you know anything of this locality of your own knowledge? No, I cannot say that I do during the last two years. I cannot say anything about it now from any knowledge obtained lately; but from the very intimate acquaintance I had with the locality for many years, as Commissioner of the district, until a few years back, and from an inspection of the plan before me, I can come to such a conclusion as to state confidently and without doubt that all the properties in the neighbourhood of the reserve will be injured by the closing of these streets; and for this reason,—that people will have to go a longer distance if they want to go either east, west, north, or south on the reserve. The streets being open is a saving of nearly a quarter of a mile each way, or half a mile altogether there and back, to persons living at opposite sides of the reserve who desire to visit each other. For instance, if I were on my allotment in Carlow-street, I should, if the streets were closed, have to go nearly half a mile out of my way to get down to the water.
241. That is to the head of Neutral Bay? Yes.
242. Is that a practicable route? Not at present, and the fact is that there are no practicable routes there, nor will be, any more than there are in other similar places, until the Municipal Council stir themselves to make them. There were no practicable routes round about Randwick until we went to work and made them.
243. What is the distance from the south-east corner of the reserve to the water? Measuring from the map, it gives the distance to be about 12 chains.
244. And what is the elevation of that corner about the water? It is a great deal higher than the water.
245. How much higher? I dare say 200 feet, if not more.
246. Will you venture to say that it is not 300 feet? No, I will not.
247. Then with a fall of 300 feet in twelve chains, I would like you to tell me how a practicable road is to be obtained? I know there is a great declivity, but the roads are not *made straight down it.* If they were so, it would be impossible to get up them. They are made to take the *siding of the ridge, so as to suit the fall of the land,* and as shown on the map.
248. You have said that if this Bill be passed, you will require compensation for the injury done to your land. Now, will you be willing to submit your case to arbitration, and to pay any amount which may be found to be in excess of the value you put on your land, through its being enhanced by this improvement? No; I do not want to sell my land, nor want arbitration.
249. But if an inquiry were made by independent persons unconnected with the municipality, would you place your case before them on the understanding that you were to receive compensation if it were decided that the land was injured, and to pay if it were found that it was benefited? I do not think that is a question which I am called upon to answer. *I purchased this land from the Government with a right to these roads, and I do not consider that any person has a right to deprive me of the convenience of them.* If it is decided to take them, then the Government should take back the land I purchased upon a condition which they are no longer in a position to fulfil. If the Government think fit, they can, as far as I am concerned, resume the land, by paying me what I gave for it, and giving me fair interest on the amount I paid; I shall be quite satisfied to let them do this; but you must remember that it is a very serious thing to the purchaser to talk of closing streets after allotments on them have been bought. *Town allotments*

allotments are very different from country lands; there is no telling what they may be worth in the course of time, if the town becomes a business place. But if *the traffic be stopped by closing the streets*, the land is made to a certain extent valueless; certainly valueless as business sites, for no business can be conducted when *all traffic is stopped*. In my own case, I gave a higher price for my land on account of one being a corner allotment, with the anticipation of the streets being opened and the traffic coming that way. I may erect a store or public-house, and so get a valuable business site; but if you shut up the street which comes past my land, its value as a business site is altogether gone. It is on this account that streets are looked upon as a great advantage; and it is on account of them that people *buy town property, and give a longer price for it than they do for country lands*. If it were not for the access to the land given by the streets, people would not buy these town lands, and certainly not at the price now given, if they bought them at all.

S. H. Pearce,
Esq.
11 Feb., 1873.

250. *Mr. Hill.*] Then if it had not been for the streets, you would not have given the price you did for your land? Certainly not. I value them now at £100 each. I gave £36, I believe, for one of them; and they were purchased as town allotments, with these streets guaranteed. The price I gave, with interest and compound interest, would bring the value of the land nearly up to what I have mentioned.

251. *Chairman.*] Dealing with it as a country township, where a number of persons were settling down in quiet country residences, and apart from all considerations of business, would it not give greater value to the land for this purpose if the reserve were improved and closed, and the traffic diverted to another direction? Yes; I can quite understand that there may be persons who wish to *stop or divert the traffic, in order to put an advantage in their own way*.

252. But if it could be shown that the land was benefited by improving this reserve, would that alter your opinion? Yes; but I do not see how you can show this. Of course, if you are going to make all the houses *gentlemen's country residences*; it is very possible that such persons as would live there would not wish to have the traffic past their houses; but if you are going to build a shop or a public-house, you would like to get all the traffic you could to pass it.

253. That is your view of the matter? Yes. A township is laid out and sold for building *and for business purposes*, and not for mere private residences. A private gentleman who wants to make himself a quiet residence goes into the suburbs, and does not buy an allotment in the heart of a township, where he will be surrounded by manufactories and other nuisances. In my opinion, the value of a town allotment depends altogether upon *the traffic in the streets*.

254. So that, following out your idea, if every block in the township were cut up and subdivided, and more streets made, increased value would be given to the ground? No; I do not go so far as to say that; because, as far as these blocks are concerned, the reserve is necessary for the town, for public purposes. A place of recreation is required, but it ought to be kept in the way in which it was originally laid out, so as not to interfere with the traffic which purchasers had been led to expect when purchasing.

255. Then you think that the reserve is useful for the sake of public recreation and health? Yes, most certainly.

256. But would not traffic through it in the way that would be permitted by leaving these streets open depreciate the value of these blocks as a reserve? No, I think not.

257. With dusty roads such as they are in St. Leonards, would not these passing through the reserve take away from its use as a place of recreation? No; or if it did, then it would be the duty of the Municipal Council to water the streets and abate the nuisance referred to.

258. *Mr. Hill.*] Supposing these roads to be kept open, is there really any reason why the beauty of this reserve need be destroyed? No, I think not. I know what I would do if I had anything to say in the matter: I should advise that all the four blocks of the reserve *should be fenced in separately*. It would answer all the purpose, and would inconvenience nobody, and the only thing then against it would be the cost of the extra bit of fencing which would be required.

259. You think the Municipal Council ought to do this? I do; the same as we have done at Randwick.

260. *Chairman.*] Do you know what the revenue of the St. Leonards Municipality is? No; I do not care much about that—it has very little to do with the matter. I know what we have done at Randwick; the number of reserves we have there is very much greater than any St. Leonards is likely to have, and we have been able to deal with some of them in fencing and planting trees, &c.

261. *Mr. Macintosh.*] In closing this centre street, it would have very much the effect of closing the centre of Park-street where it crosses the Racecourse? Yes, precisely the same.

262. *Chairman.*] Where would these streets lead to? One would lead to the water.

263. And the other? That would lead out to the water reserve, and subsequently right out to Middle Harbour, near long Bay.

264. To what portion of Middle Harbour would it lead? To that part which is about half-way up from the Falls, and near Long Bay.

265. And where would the other lead to? Down to the water, at Neutral Bay, or part of the harbour.

266. Are you sure that it would do this? Yes, it would lead down to the waters of Neutral Bay. These two streets will lead to important places, or places that will be important in the future, and will be precisely similar to what now are the roads running through Hyde Park to St. James's Church in the one direction, and from Park-street in the other.

267. *Mr. Macintosh.*] Are you aware of where the church is? Yes.

268. How would this shutting up the streets affect persons going to church from the north of the reserve? It would affect them so far that they would have to go ten chains out of their way to get to it; that is, to the Church of St. Thomas, or the Episcopalian Church.

Mr. Vinzenz Zahel called in and examined:—

269. *Chairman.*] You reside at the North Shore? I do.

270. You are aware of the objects of the present inquiry? I am. It is about these two streets—whether they shall be shut up or not.

271. You understand the position of these two streets where they cut through the reserve? Yes.

272. You know these other streets in the vicinity—Ridge-street, and Fowler-street, and Falcon-street? Yes.

Mr.
V. Zahel.
11 Feb., 1873.

- Mr. V. Zahel.
11 Feb., 1873
273. As I understand it, you object to the Bill now before Parliament, because it proposes to enclose these two streets, Walker and Carlow streets? Yes, I do; most decidedly.
274. I believe you took round the Petition against the Bill, and collected signatures to it? Yes, I did.
275. Will you state the reasons why you object to this Bill? My reason is this,—that the streets were dedicated to the public by the Government, and that I bought the land on these streets subject to the streets, and of course paid a larger price for it. Land about there was easily to be had at about £12 an acre, and my allotments cost me £40* something each for the quarter† acre. I believe they originally sold at the rate of £120 per acre when they were put up for sale by the Government. Had it not been for these streets shown in the plan, they certainly would never have been bought at that price.
276. As I understand it, you object to this enclosure because you believe it will injure your property? Decidedly so. It not only injures my property, but it injures the best and most level road we have in that locality. We could go along a road as level as this table, if you had taken, say, two feet from the top and filled up the hollow at the creek.
277. That is the road which runs from corner to corner of the reserve? No; I allude to Carlow-street;—it is a level, and, by closing it, you force us into a street which is nothing more than a steep hill.
278. Is it not a fact within your knowledge, that the land has been very much improved by the course taken by the Municipal Council? Yes, so far as they have gone, they have improved it; no doubt of it.
279. But has not what the Council have done made the land of four-fold value to what it was? No. I wish you could get me a customer for mine at half that advance.
280. Do you know the land that was purchased by Harnett and Arnold? I do.
281. Do you know what was paid for it? A pound, or something of that sort, a foot. But it is only a narrow slip of land.
282. Is it not a square block? No. It was originally; but it has been cut up into small allotments, and this is one of them.
283. Do you know Daley's allotment opposite? Yes.
284. Has not that been sold lately at a price very much beyond what could have been got for it a few months back? I know that it has been sold, but I cannot say what it fetched. I heard, I think, that it was sold for £170 or £175. I believe that was the price, but I will not be positive about it. But it is the streets which bring the traffic which gives the value, and if you close the streets it reduces the value.
285. Then, according to your opinion, the traffic by a property is what gives it value? Most decidedly.
286. In your view, then, would it be an advantage to open other streets and roads, so as to make a traffic where there is none now? That is a point I am not prepared to go into.
287. Or, would it not be advantageous to you, not to open other roads, so as to have all the traffic brought past your property? That is beyond the question in this case.
288. Do you not object to the opening of Ridge-street, because it will divert the traffic from other streets? Yes; but not because it will injure me.‡
289. Did you not object to having a corner cut off one portion of the reserve in order to carry the road along where the ground was passable? Yes, most decidedly; and I did so, because, by taking off this corner, the public would be losing about one acre of ground. If the Municipal Council had wanted to carry the road there, they might have put a bridge across the end of the street to take the traffic through, instead of wasting about one acre of public ground, as they did, by taking off this corner. Moreover, this corner was cut off for the special convenience of certain parties; and I also mentioned, in my evidence, that, in consequence of this and the non-formation of Ridge-street, at the south-east corner, there is no access to certain allotments in that neighbourhood.
290. But opening a road through the reserve would bring the traffic to your place? Yes, decidedly; and I bought it solely on account of these streets—that they would bring traffic to the land.
291. Then you object to closing the streets because it would injure your property? Yes.
292. And you and others think that this road across the reserve would be of more use? Which road?
293. The road or track which runs diagonally across the reserve? Nothing of the kind is required, in my opinion.
294. But you say something in your petition about a diagonal road which crosses the reserve, and the great convenience it would be to the inhabitants? I don't see that it would be any convenience, because it is only a bush track.
295. Then you do not give in your adhesion to that paragraph in the petition? Certainly not, if it is meant to substitute this track for Carlow and Walker streets, now shut up.
296. Did you read the petition before you signed it? It was read to me, I remember; but I do not recollect anything about that diagonal road. I am sure if I had seen that in the petition, I should not have signed it, because taking a road diagonally across the reserve would entirely spoil it as a recreation ground. That would be as bad one way as closing it all in would be in the other.
297. Then you do not assent to that paragraph of the petition? No. I was not aware that it was there, or that such a thing was contemplated; and I do not believe that more than one or two persons knew that paragraph was in it.
298. And if that diagonal road was opened, you think it would damage the reserve? I do, most decidedly and most distinctly.
299. The petition says—"The undersigned inhabitants and others of the District of St. Leonards"? Yes.
300. Where does that district extend to,—how far does it go? It goes all round about there.
301. But this petition purports to be signed by persons residing in the District of St. Leonards? Yes, and so they are. There are one or two who have signed, who do not reside there permanently, but they were living and working there at the time they signed.
302. Do you comprehend Redfern within the area to which in your view the district of St. Leonards extends? No, I do not.
303. Who are Allen and Burt? They were builders at St. Leonards when they signed this petition.
304. Do they live in Redfern? They were residents at St. Leonards when they signed; but, in my opinion, every resident in New South Wales has a right to come to our reserve and exercise his limbs there—the same as we can go to Sydney and do the same on their reserves.

* Revised :—£70.

† Revised :—half.

‡ Revised :—No; because it is a Government street.

305. Who is Joseph Hume, junior? He lives over there.
306. What is his age? He is between fourteen and fifteen years old.
307. Where do the majority of those who signed this petition live? In St. Leonards. I know this, that I got eighteen of the signatures, myself, and they are all signatures of persons residing in the Municipal District of St. Leonards. Twenty-five were got by the grocer.
308. Was Mr. Thomas Dangar's one of the signatures you obtained? No; the grocer got his.
309. Then your objection amounts to this: Enclosing the roads will damage your property considerably, and you consider you will be entitled to compensation for that damage, if the roads be closed? Not at all. What I come here for is not to get compensation, but to keep the roads open.
310. You do not come here in opposition to the St. Leonards Corporation? No; I come here to oppose the proposed action of the Trustees of the reserve.
311. Is it not the fact that the Corporation possesses all the power over this land? Yes; they are the Trustees, I believe.
312. *Mr. Hill.*] How long have you lived at St. Leonards? Somewhere about sixteen or seventeen years.
313. How long is it since you purchased this land from the Government? About seventeen years ago.
314. Then, as I understand it, you have no objection to the reserve being fenced in, so long as the roads through them are kept open? That is all I want, and that is all that the whole of us want.
315. You prefer to travel by Walker and Carlow Streets, rather than by Ridge-street or Alfred-street? Yes.
316. Are they inferior streets? Yes, certainly they are.
317. In what way? They are longer round and steeper.
318. Do they make the distance much longer? Yes, very much longer.
319. You do not come here to give evidence out of opposition to the Municipal Council of St. Leonards? Not at all.
320. But all you come for is to say that, if these roads are closed, your property will be depreciated in value? Yes.
321. *Mr. Macintosh.*] If these roads were carried out as originally laid down in the plan, they would be of more advantage to the residents than cutting off this corner as is now done? I object to so much land being taken off the reserve as is now done. What I want, is, to have the reserve as it was given to us by the Government.
322. One person has signed this petition who is only fourteen or fifteen years of age? Yes.
323. How many others of the same age have signed? Not one other.
324. Are you aware whether that youth was connected in any way with property there? I am not.
325. He is simply a resident there? That is all, I believe.
326. *Chairman.*] By how much is the reserve diminished by the road cutting off the corner? I calculate that it takes off about an acre.*

Mr. V. Zabel.

11 Feb., 1873.

Mr. George Barnett called in and examined:—

327. *Chairman.*] You are aware of the nature and objects of the present inquiry? Yes, a little.
328. I believe you signed a petition against the passing of a Bill to enclose Walker and Carlow Streets in the Municipal District of St. Leonards? I did.
329. Will you state to the Committee what are your objections to the course proposed? My objection is, that the closing of these streets will injure the property which I have bought there.
330. Your objection, then, is, that it will damage the property there which is held by you? Yes.
331. Will you state to the Committee where that property is? Yes. It is next to the corner of Carlow-street, near the Carlow-street entrance upon the reserve.
332. How long have you had property there? I had it before you closed in the reserve with a fence.
333. How long ago is that? I cannot say the exact date, without looking at my papers.
334. Is it two years ago? I dare say it is.
335. When you say you have had the land a longer period than the road has been enclosed, is it within your knowledge that the progressing of the fencing was delayed by reason of the difficulty about procuring the money to pay for it, and that, owing to this circumstance, the fencing extended over a very considerable period? I was not aware of it.
336. Then, as I understand you, your objection is, that this closing the streets will damage property of yours near Carlow-street? Yes.
337. And are you of opinion also that it would be advantageous to open a road diagonally across the reserve? No; I have nothing to say on that point; my objection is against the streets which have been dedicated to us being taken away from us. The diagonal road I have nothing to do with.
338. I presume then that you dissent from that clause in the petition which states that this diagonal road would be a convenience to the public? It is not mentioned in the petition, that I am aware of.
339. Look at this (*Witness looks at Petition*)? Yes; I see that there is a clause to that effect. That was all very well, as far as the Middle Harbour Road went; but that had nothing to do with what I signed for. All I signed for was to have the streets which the Government had dedicated to us.
340. Then you dissent from that clause? No, I neither dissent nor assent—I have nothing to do with it.
341. Is it not within your knowledge that the land about the reserve has been very much increased in value by the improvements which have been made upon the reserves? Mine has not.
342. But is it not the case with regard to the land generally? I think not—not generally. It may be so about your side of the reserve; but about the north-west corner, where no entrance is reserved, the land is anything but improved in value.
343. Are you aware that the Corporation of St. Leonards has the charge of this reserve? I am.
344. Have you made them aware of your objection to the insufficiency of entrances into the reserve? No, I have not.

Mr. G.
Barnett.

11 Feb., 1873.

345.

*NOTE (on revision):—In addition to the evidence above specified, I mentioned particularly that, in the event of Carlow and Walker Streets being closed, the people living on the south and south-west sides of the reserve would have to go round the whole of the reserve to get to the water reserve for their water, involving a detour of fully half a mile.

- Mr. G. Barnett.
11 Feb., 1873.
345. This has never been stated by way of a grievance to those who could remedy it; and these parties have never failed to set it to rights after being complained of? I think I have spoken of it often enough.
346. But not to the Corporation? I did not think it would be much use to say anything to them.
347. Still you never tried it? I have spoken to several of the Aldermen on the subject, and I got the same answer from all of them; and that was, that it was all Mr. Tunks's doing.
348. Will you object to mention any person who said that? Mr. Mathews,—he said it for one.
349. *Mr. Hill.*] In your objection to this measure, you are not actuated by any dislike to the municipal body? Not in the least.
350. And you come forward to give your evidence solely because you think your property will be injured by closing these streets? That is my only reason.
351. How long have you lived in the St. Leonards District? Off and on, about twenty-seven years.
352. Then you know the place well? Yes, very well.
353. You would have no objection to the reserve being fenced in, if the roads are kept open as laid down in the plan of the township? Not the least.
354. If these roads be closed, will the value of your property be enhanced or depreciated? If they are kept open, the value will certainly be enhanced.
355. And, if closed, I suppose it will be depreciated? I am sure of it.
356. *Mr. Macintosh.*] Is Carlow-street of an easier gradient from east to west than Ridge-street or Falcon-street? It is.
357. Would the shutting up of Carlow-street make the distance longer to the water reserve, by the round which would have to be taken? I do not know what you call the water reserve.
358. The only place where water is obtainable? Yes; if you shut up Carlow-street, it would of course be longer round from some places.
359. Are you aware that there are already two blocks fenced in? No; only one.
360. You have no objection to their being fenced in, in that way, so as to leave an open road through? No objection at all.
361. But you require that these streets should be kept open? Yes.

Mr. James Rothwell called in and examined:—

- Mr. J. Rothwell.
11 Feb., 1873.
362. *Chairman.*] You are aware of the nature of the present inquiry? Yes. There is a Bill to enclose Walker and Carlow Streets.
363. You are one of those who oppose that enclosure? Yes; that is the object of our petition—the closing these two streets.
364. Against the closing? Yes; we are petitioning against the closing; but the action of Parliament by the Bill is to close the streets.
365. Will you state what reasons you have for opposing the passing of this measure? It would be rather hard to do so, according to my notion. In the first place, the town has been laid out altogether contrary to what it ought to have been, according to the formation of the ground. This is owing to the circumstance that Sir George Gipps always insisted that towns should be laid out to the cardinal points. In this instance, the direct roads to Middle Harbour and elsewhere run directly *vice versa*, and are of course cut across by these roads or streets laid out to the cardinal points. The land having been sold with the streets running in this way, this reserve has become from its position rather detrimental to the main traffic of the town. If this reserve is closed in, the traffic will have to go all round the streets laid down by the surveyors, and that will be a great injury to all the property abutting on these two streets.
366. Then, do I understand you to say that the original track running diagonally across the reserve is the one which, in the interest of the public, it would be desirable to open? No, I do not say that. As far as the traffic from Middle Harbour to that part of the town is concerned, it will come by that road; but the main road and the direct road to Middle Harbour is not through there.
367. Which would be the direct road? Straight up from the Point. The road I go to reach the reserve is a mile and a half or two miles out of the direct road.
368. Then going the direct road to Middle Harbour, you would not go by the reserve at all? I should not do so, if I was going to St. Leonards.
369. But having to go to Middle Harbour, would it make much difference in the length of the journey to go round Ridge-street instead of across the reserve? I would always sooner go across the reserve than have to go all round it.
370. No inconvenience is experienced from the fencing in of the block already enclosed? I will not say that. You have to go forty or fifty panels from the corner before you get to an opening.
371. Are there not a number of openings? There are, but they are not openings that you can drive through with a horse.
372. Then if there was an enclosure of these streets, the property in the neighbourhood would be depreciated? No, not depreciated—you cannot do that if you try—you cannot depreciate the value of the property, so long as people continue to come and settle in the neighbourhood, as they are now doing. We have a steady increase of population going on there, and that is one reason why I would not wish to have any of the streets shut up. The Corporation, however, may do what it likes, but it cannot depreciate the value of the property.
373. *Mr. Stewart.*] Then, according to that, there is no objection to enclosing these streets? Yes, but there is. You might as well close the entrances to the Government Domain, in Sydney, as shut up these streets which run through our reserve.
374. *Mr. Hill.*] What I understand you to say to the Chairman, is, that if these roads are closed up, the value of property will not be depreciated? It cannot be depreciated.
375. *Chairman.*] It cannot be depreciated, because nothing the Corporation can do can have that effect? Exactly. It will not be owing to any good management of the Corporation, but to the great influx of inhabitants which are coming in there.
376. Than you are not an advocate for this diagonal road? I would rather have the other.

ON THE WALKER AND CARLOW STREETS ENCLOSURE BILL.

377. Is your property affected by the closing of these streets? I should rather think it is, when I should have to go an additional two miles out and two miles in if they are closed.

378. Would it not be as reasonable to say twenty miles as two miles? No, that would be an exaggeration; but two miles is nearer the mark.

379. And only nearer the mark than the other? No; it is the distance.

Mr. J.
Rothwell.

11 Feb., 1873.

Robert Dalzell Ward, Esq., called in and examined:—

380. *Chairman.*] You are an Alderman of the Municipality of St. Leonards? I am.

381. And have been so for several years? Yes.

382. You know the objects of the present inquiry? Yes, from hearsay.

383. You are aware that the Corporation of which you are an Alderman has passed a resolution asking me to introduce a Bill to authorize the closing of Walker and Carlow Streets? Yes.

384. And that any action which has been taken in connection with this reserve has been in accordance with votes of the Corporation? Yes. I believe the Council agreed unanimously that this step should be taken.

385. The fencing in of the reserve was in no way my individual act? Certainly not.

386. You have been many years a resident of St. Leonards? Yes, about twenty years.

387. Will you state your view of what will be the effect upon the neighbourhood of the reserve by the present action of the Corporation? My opinion is, that the present action of the Corporation will tend to increase the value of property in the neighbourhood. By improving the reserve they are making a slightly object take the place of a wilderness, whilst by giving reasonable facilities for entrance they will not prevent its use as a recreation ground. And, as far as the roads, the closing of which is so much objected to, are concerned, even if they were allowed to remain open, nothing more would be done to them for the next twenty years beyond what has been already done. The expense of making streets is so great that we are not likely to be able to bear it for the next twenty years; and, even supposing they were made, they would be useless, for there need be no traffic on them.

388. I believe that a portion of land at the head of Neutral Bay and facing Alfred-street was recently sold at a good price? I have heard so, but I am not in a position to speak with certainty.

389. Are you aware that the cost of fencing the reserve, of trenching the ground, and of purchasing and planting the trees, has all been borne by public subscription? Yes, principally, it has been.

390. Ought not that to be regarded as an evidence of the approval of the general public of the action taken by the Municipal Council, when they subscribe money voluntarily to carry out the objects of the Council? Yes, of itself it would be a very strong evidence; but, beyond that, I know myself, from mixing with people of all stations in life, that nearly the whole public are in favour of the Council's proposal for improving the reserve.

391. That is, of the improvements as they now stand? Yes.

392. *Mr. Stewart.*] Including the shutting up of these two streets? I do not understand these objections to the shutting up of the streets; at all events, in so far as Carlow-street is concerned, that street is already shut up at present. In Carlow-street there is a culvert which the Council put down at some expense, which made passable what was before an utterly impassable track. There was no possibility of making the road over without the culvert over into the street, and that has had the effect of virtually closing the street.

393. The culvert does not come very far into the street, I presume? No, only a few feet—some 10 or 12 feet. So that, as far as the public is concerned, if a gate were left here, they would not have much access in this direction.

394. If closed, would it be an advantage or a disadvantage to the adjacent property? It would not be a disadvantage to close it against traffic, in so far as business is concerned, because this street leads nowhere at present.

395. Does it not lead to Middle Head? No; the Middle Head Road goes along here (*indicated on plan*). Any person going to Sydney by Ridge-street would go round, as a matter of course, for he would gain nothing even though the street were left open.

396. *Chairman.*] There was some reason formerly for passing through the centre of the reserve—in order to obtain a crossing? Yes, there was a difficulty about crossing, except at one particular spot.

397. And of necessity they went across the reserve to reach that spot? Yes; but now there is a good road by Falcon-street and Mail-street. Alfred-street, as it has been called, is a steep street, but any one coming from Carlow-street into the Middle Harbour Road would have to go up that incline, though perhaps the steepest gradient is about Alfred-street. Then again, cutting up the reserve into four blocks spoils it to a certain extent as a reserve for recreation, and the intention is to run a fence round the four blocks, leaving them open to each other.

398. They are not to be separately enclosed? No; there is to be one enclosure, taking in the whole of them.

399. It has already been trenched round three sides, and planted with ornamental trees? Yes.

400. And having been planted with valuable trees, it is necessary to protect them? Yes. If the through streets are left open we must protect the trees, either by paling them round or by fencing off the roads, and fencing the roads round would give about an additional mile of fencing.

401. And the interior enclosures would give an additional 80 chains? Yes.

402. Do you know how much is taken off the reserve at the angle? No, I do not.

403. One of the blocks has been already fenced in? It has.

404. That one of which a portion has been reserved for a cricket ground? Yes.

405. A road right through that would altogether spoil it? It would destroy it as a cricket ground.

406. An angle has been taken off one of these blocks, but that has been done in order to afford access to the quarries below? Yes; it was utterly impossible to continue the road straight down over there. It may look all very well upon paper, but on the ground there is a sheer drop down, where no road could be carried.

407. Could you say how long this fence has been up? I cannot say exactly, but I should think not more than eight or nine months.

408. Since that time has any increase taken place in the value of property in the vicinity of the reserve?

R. D. Ward,
Esq.

11 Feb., 1873.

R. D. Ward,
Esq.
11 Feb., 1873.

I cannot of my own knowledge say that there has, because I have not made any inquiries to satisfy myself. I have heard that there have been some sales of land, and at a high price, but I have not purchased any myself, nor have I had any direct information from the purchasers as to what was given for it. I am not therefore justified in saying what I have heard upon mere hearsay.

409. Would not the means at the disposal of the Corporation be more judiciously expended in furnishing a roadway to persons who live round the reserve, rather than in making a diagonal road across the reserve, for no other purpose than to accommodate persons going backwards and forwards through the municipality? I do not think the Council would be justified in making the road, even though it saved a considerable distance, which it does not.

410. The only advantage is that it would be a level road? Yes, pretty nearly so; but the saving of distance is very trifling, being only the difference between the length of the diagonal and that of the two sides; and to people going any distance, or to Middle Harbour, it would not make much difference in the length of the journey.

411. And persons driving out in a carriage for pleasure would think very little of an additional distance of 8 chains? They would not notice it.

412. *Mr. Hill.*] Have you any property in the immediate vicinity of the reserve? No; I have no personal interest in the matter, one way or the other.

413. Will you be good enough to say distinctly, whether you think it will depreciate the value of property near these streets, if they are closed? I do not think it will be depreciated, but I believe that it will be more improved, by making the roads passable to the properties which are occupied, without any reference whatever to the middle roads going through the reserve. I know that it is just barely possible to make the side roads passable, but the funds of the Corporation will not allow of the other roads being made.

414. Then I assume that you do not think that property will be decreased in value by closing these streets? No, I do not.

415. What would you say were I to tell you that a number of witnesses have given it as their opinion that property would be very largely depreciated by this enclosure? I should say that it was simply a matter of opinion. I do not say that property will be enhanced in value, but that I think it will, and I believe I could get a great many holders of property to say that it will also.

416. *Mr. Macintosh.*] Instead of being an objection, you think that the closing of these streets will be a benefit to property? I have no doubt of it, for then there will be some chance that Miller-street, and Ridge-street, and Falcon-street, will be placed in good repair, and that will be an advantage to the property.

417. Then it is the making the roads that will benefit the property, and not fencing in the reserve? Partly.

418. In making the roads the value of property is increased? There is no doubt about that.

419. More so than it will be by fencing in these streets? I will not say more so, because the improvement made by fencing in the reserve has been so great that it has naturally increased the value of the surrounding property. I say naturally, because the owners of the property see the Reserve kept in good order, and planted with handsome trees, instead of being a wilderness of bush, as it was before. Admitting this to be an improvement, it is impossible that we can continue it without fencing off the cattle.

420. Is there any portion of Walker-street going through the reserve? Yes.

421. That is a tolerably level street, as it is now? Yes, that portion of it.

422. Vehicles could go along it? Yes; with some little formation it will be passable enough.

423. It leads on to the water reserve? Yes.

424. Suppose a person to be on Ridge-street, would it not be desirable to give him facilities for going down for water through Walker-street, instead of going all the way round, and being forced to take a heavier gradient? It would certainly be a shorter road for him.

425. And a more level road? Yes. But the question that then arises is this—Is the interest of a few individuals to override an advantage to the general public?

426. What do you think a mile of that fencing, such as you are using there, would cost? I am not in a position to say.

427. Do you think it would take £20 to do it? I should say it would be nearer £100.

428. So much as that? Yes; a mile of fencing, with five wires, and the posts to support them, will take a great deal of money.

429. That is the chief objection then—the expense? No. I should like to see the reserve fenced in as a whole; it would then really be an improvement to the municipality.

430. You have no property of your own to benefit by this? None.

431. *Chairman.*] If it were fenced off in blocks would it not interfere with foot-passengers? Yes; they would only be able to get through at the gates, wherever they were placed.

432. Fencing in blocks would be of no advantage if there were only the ordinary openings? No; and I should like to see it left open within the outside fence for many purposes.

433. *Mr. Stewart.*] Do you not think that the area, 80 acres, is too large for the locality—that it is four times as much as you require for a reserve? You have to consider the increase of population that is likely to ensue. Besides, this is the central part of the town, and towns require a large open space here and there for sanitary purposes, and this is the only open space we have in the town.

434. *Chairman.*] Is there not a difficulty now in obtaining water from the water reserve, so that in a short time it is hardly likely to be of any benefit to the public? If the population is large, as it promises to be, I shall pity any one who has to depend upon the water reserve for his supply of water.

435. In fact it is the gathering ground of the whole township? Yes. And there are no means of preventing the pollution of the water; the land all round it has been sold instead of being reserved; and the consequence is, that there are now no means of preventing the pollution of the water.

436. It will become in time nothing more than a great sewer? Yes, I believe so. It may perhaps do for cattle or horses, but it will be impossible to use it for domestic purposes.

437. This question of water supply for St. Leonards has been brought under the notice of the Municipal Council? It has.

438. You were authorized by the Council to reply to the queries addressed to it by the recent Water Commission? I was.

439. You did answer those queries? Yes.

440. And your answer is to be found in the Proceedings of the Water Commission? Yes. I may say, in conclusion, that if I were to go round with a petition in favour of closing the reserve, I am sure I could get ten signatures for every one that is appended to the petition against it.

R. D. Ward,
Esq.

11 Feb., 1873.

FRIDAY, 14 FEBRUARY, 1873.

Present :—

MR. BURNS,

MR. HILL.

WILLIAM TUNKS, ESQ., IN THE CHAIR.

Mr. Mordaunt William Shipley Clarke, M.A., Licensed Surveyor, called in and examined :—

441. You have resided at the North Shore for many years? Yes, for sixteen years.
442. You are an Alderman of the Borough of St. Leonards? Yes.
443. You are aware that the Municipal Council authorized me to introduce a Bill with the view of enclosing portions of Walker-street and Carlow-street? Yes. We were not sure about there being streets at all through the reserve—that they had ever been formally dedicated.
444. You are aware that a petition has been presented against the passing of that measure? Yes.
445. You have seen the petition? Yes.
446. Do you remember the allegations contained in it? They were to the effect that formerly there was a diagonal or zigzag road leading from the Roman Catholic Church to the corner of Alfred and Falcon streets, and that the closing of that road would seriously inconvenience people going to Middle Harbour, and thereby affect the value of property in the neighbourhood.
447. Is it your opinion that the course proposed to be followed by the Bill would have the effect stated by the petitioners? I cannot see that the Bill has anything whatever to do with either of these cases, because this road was only a road on sufferance, and even if these streets were opened, no diagonal road would be allowed across any of the blocks into which the reserve would then be cut up. Persons travelling in that direction would have to go at right angles if the reserve were enclosed, whether the reserve were enclosed as it is, or if the streets were continued through it, whichever way they went; and it is just the same distance one way as the other.
448. The Municipal Council is Trustee for the township reserve? Yes.
449. Will you look at the plan?—The block of 8 acres opposite the Roman Catholic Church was dedicated some years before the existence of the Municipal Council? I do not know. It is stated to have been dedicated in 1867. I do not know when the Council was established.
450. Have you any notion what it was dedicated for? I believe it was for cricket and public recreation.
451. A diagonal road running through that block would destroy the ground for the purpose intended? Yes, as the direction of the diagonal takes up the only *naturally* favourable site for playing on.
452. Will you state your opinion, whether, in the event of this diagonal road being opened, it would not be necessary to have other diagonal roads leading to every house round the reserve? Yes, I think so.
453. So that ultimately the reserve would be a series of roads? Yes; we might as well have no fencing whatever, and turn it into a common at once.
454. Will you state what action the Municipal Council has lately taken with a view to improving this reserve? They endeavoured to raise subscriptions for clearing, fencing, and planting trees, and the ladies of the North Shore assisted; they had a concert and paid the money into the Council funds, and an equal amount to that raised by the inhabitants was given by the Government. The whole of the ground has been fenced in with wire fencing, and three sides have been planted. There is a pathway formed along Walker-street, and openings to pass through have been made in different places.
455. Has any representation been made to the Municipal Council as to the insufficiency of the entrances, or anything connected with it? Nothing official.
456. Would we have been able as a Corporation to have accomplished this improvement unless the public had been with us with their subscriptions? No; it would have been impossible.
457. Have you any knowledge of the present value of land, or how land has been affected by these improvements within the last year? In some places, since this reserve has been planted and enclosed, the value of land has increased to double what it was. Land sold by the Government a short time ago doubled its value in a very short time afterwards.
458. If we were to continue Carlow-street eastward, would we have any practical route to the waters of Neutral Bay? No; it is stopped by Thrupp's grant. At any rate, it is impossible to get down there, for it is precipitous, and the other way it goes only to West-street and is stopped by Lithgow's land.
459. *Mr. Hill.*] Do you know that the diagonal road spoken of existed long before Walker and Carlow Streets were marked out? I cannot say about that. I have heard that that road, originally only a bush track, was opened up by Mr. Bloxsome.
460. Which do you consider the most important to the public, the cricket ground or the diagonal road that leads to Middle Harbour? I really cannot say. I should think that as the place is in a certain district, the benefit of the district should be first considered. Middle Harbour and Middle Head are visited principally by strangers to the place.
461. You have travelled over Ridge-street, I apprehend? Yes.
462. What do you consider the gradient of that street in going to Middle Head? It varies. One part of it—about three-fourths—is pretty level, considering the roads there; it descends, then, down to the south-east corner, I should say, at a gradient of about 1 in 15.
463. *Chairman.*] As regards the question of a cricket ground or a road, will that apply, as the ground is dedicated for a particular purpose, irrespective of the Council? I do not see that we could interfere with that piece of ground at all; it is dedicated for a particular purpose.
464. Have you anything to suggest in this matter? Only that the traffic from the Roman Catholic Church must always be along Miller-street, because Walker-street is impracticable without huge engineering works; and even if it was made practicable, the other is an easier gradient. Even if these streets are allowed to remain open, people must travel at right angles, and very little time would be lost by going along one street instead of another.

Mr. M. W. S.
Clarke, M.A.

14 Feb., 1873.

ADDENDUM.

Mr. M. W. S.
Clarke, M.A.

ADDENDUM.

14 Feb., 1873. It should not be forgotten that a considerable saving to the district will result from not opening out another half-mile of street, with its corresponding mile of fencing.

I am of opinion that, should Ridge-street be formed and reduced to one gradient, it would compare very favourably with the greater part of the streets in the city of Sydney; and this formation might interfere with the so-called "easy" track that is said to exist in the upper portion of Walker-street. It must not be forgotten that the route by Miller-street is that almost invariably taken.

The saving of time by taking a straight diagonal (which the old track was not, even by approximation) is about that caused by a length of 11 chains. The difference between the old route and the circuit was only about 8 chains, and this can hardly be said to cause *serious* inconvenience. The continuation of the streets will not secure any right to a diagonal route, as the four squares into which the reserve would then be divided will *each* be fenced in.

I think it a pity to sacrifice a fine large area which can be made very ornamental, and which must eventually be a place of great resort for the inhabitants of Sydney and suburbs, for the sake of a traffic which is at present nearly imaginary, and which at the best of times cannot be seriously interfered with.

I consider that the whole of the lands reserved for the public have been to a great extent turned from their legitimate use by an undue deference to people who use horses and carriages, which are beyond the reach of nine-tenths of the community. The Outer Domain, of Sydney, is a great example of this.

As the reserve forms a considerable part of the gathering ground for collecting the water for the upper portion of the creek which runs subsequently through the only "water reserve" in the district, I think it would conduce more to augment the supply and keep it purer by enclosing the whole area.

Mr. Lewis Solomon called in and examined:—

Mr.
L. Solomon.

- 14 Feb., 1873.
465. *Chairman.*] You have resided on the North Shore for many years? Yes, above twenty, I think.
466. You live in the neighbourhood of what is called the Township Reserve? Yes.
467. You are aware that a Bill has been introduced into Parliament having for its object the enclosure of that portion of Walker and Carlow streets which passes through the reserve? Yes.
468. You are aware that a petition has been presented to Parliament against the measure? Yes.
469. Will you state to the Committee whether you are in favour of or against the Bill? I am very much in favour of it.
470. Do you think the neighbourhood has been improved by the outlay of money on the reserve lately by the Corporation? Very much.
471. Has the value of property been much improved? Yes; land there was formerly almost unsaleable.
472. You were one of several persons who petitioned the Government some years ago to dedicate one of these blocks for a cricket-ground? Yes.
473. Was that done at the time? Yes; one block was applied for, at first, but we found it would be better to have another, and they gave us another. I was one of the Trustees.
474. You had no means to improve it, and nothing was done? No.
475. Are you aware that lately subscriptions have been entered into for carrying out improvements on and about the reserve? Yes.
476. Is it likely that persons would contribute their money unless they approved of what was done? No; I would not have given a penny if there was to be a road through it.
477. *Mr. Hill.*] When you say that land was unsaleable until the improvements were made in the enclosure, do you mean that no land had been sold in that locality? No, but it brought a much better price afterwards;—the price has risen very much.
478. *Mr. Burns.*] Have you known any sales of land in this locality since the improvements were made? Yes, very lately.
479. How much per cent. over the prices similar lands brought previously? I could hardly tell you. Mr. — was the owner of a large block of land there for seventeen years, and as soon as this reserve was improved it was cut up, and four or five acres sold immediately. I bought one. The park being cleared, this place is beautiful now, where before it was rough bush; it is now fenced in, formed, and planted.
480. You think it would be to the advantage of the locality that this Bill should become law? Yes. All my property is about there. I have six houses within a stone's throw, and land as well. I should be very sorry to see any roads cut through the reserve.
481. *Chairman.*] The traffic of wheeled vehicles would occasion dust? Yes, it would destroy the place altogether.
482. *Mr. Hill.*] Have you travelled along Ridge-street and Alfred-street, towards Middle Head? No; I have gone by Falcon-street to Middle Head.
483. You consider Falcon-street very much easier than Ridge-street and Alfred-street? Yes.
484. *Chairman.*] The Government has lately been able to sell land in this neighbourhood that had been previously unsaleable? Yes, land that was refused before at an upset price has been sold for more than the old upset price since the improvements.
485. *Mr. Hill.*] Do you say that the increased value of this land arises solely from these improvements, or from time? From the improvements.

Mr. William James called in and examined:—

Mr.
W. James.

- 14 Feb., 1873.
486. *Chairman.*] You have resided at North Shore for many years? Yes, about twenty years.
487. You are living not far from the reserve? About a couple of hundred yards.
488. Are you aware that a Bill has been introduced into Parliament with the view of closing Walker and Carlow Streets to cart traffic? Yes.
489. Do you approve of that? Yes; I would certainly prefer closing the streets, and keeping the reserve as it is.
490. Is it your opinion that the neighbourhood has been improved or injured by the course taken by the Municipal Council in this matter? Wonderfully improved.
491. You have considerable property in the neighbourhood? Yes.
492. And you are in favour of this Bill passing? Yes, decidedly.
493. Has it come to your knowledge, in any way, of late, that land has increased in value in that neighbourhood since the improvements have been commenced? I have not been buying or selling, but I should say it has much improved in value.

Mr.

Mr. Laurence Joseph Harnett examined:—

Mr. L. J.
Harnett.

494. *Chairman.*] You bought some land, a short time since, facing the reserve at St. Leonards? Yes.
495. Have you any objection to state what you paid for it? I paid £120 for it about sixteen months ago; and I sold it a few days since for £312.

14 Feb., 1873.

FRIDAY, 21 FEBRUARY, 1873.

Present:—

MR. BURNS,

MR. FARNELL,

MR. HILL.

WILLIAM TUNKS, ESQ., IN THE CHAIR.

T. J. Cook, Esq., called in and examined:—

T. J. Cook,
Esq.

496. *Chairman.*] What is your name? Thomas John Cook.
497. You are the Mayor of the Borough of Victoria, North Shore? Yes.
498. You are aware of the object of the present inquiry? Yes.
499. You are the owner of property in the vicinity of the Reserve, North Shore? Yes.
500. Is it your opinion that the passing of a Bill to enclose the roads which would run through the reserve against vehicle traffic would be advantageous to the public or not? It would be advantageous.
501. Do you think it would injure property in the immediate vicinity? No; on the contrary, I believe it would improve it.
502. By common report, land has very much improved about there, has it not? Very much indeed.
503. That is lately? Yes.
504. As a landholder in that neighbourhood, you would sooner have the reserve kept as at present in one paddock than cut up into four by these streets? Yes.
505. *Mr. Farnell.*] You are aware that a petition has been presented against the closing of these streets? Yes; in fact I was asked to sign it.
506. Has that portion of Walker and Carlow Streets included in the reserve ever been used? No.
507. Is it your opinion that the closing of those streets would be any inconvenience to the people of the North Shore? No, none whatever.
508. If these streets were open, the traffic through them would be by persons living at a considerable distance, such as at Middle Harbour, would it not? It would not affect them one bit; the only persons whom it would affect would be those who live on the east side or the west, and require to go directly across from one side to the other.
509. Do you think that the fact of the reserve being where it is, and that the closing of the streets through it, would deteriorate the value of property in the vicinity? Would deteriorate the value of property?
510. Yes? The closing of the streets?
511. Yes? No, certainly not.
512. One person has given it in evidence that although favourable to the reserve, he is of opinion that a street should be made diagonally across the reserve, to afford facilities to persons travelling from Middle Harbour to Sydney: do you approve of that? No, I do not see that it would be any advantage.
513. *Chairman.*] A road across from the Roman Catholic Church to your property at the corner of Alfred-street? Going from Sydney to Middle Harbour, the road would cut off a corner of the reserve, but it would be a very little saving in distance—very little indeed.
514. *Mr. Farnell.*] Supposing these streets to be closed, and that diagonal road across the reserve were not to be made—what road would those persons take coming to Sydney? They would either have to go along Alfred-street and Ridge-street, or they would have to go along Falcon-street and Miller-street to get to Sydney.
515. Those roads would afford all the convenience necessary? Yes; thus, for instance, if I were leaving Blue's Point, and wanted to get to my property at the north-east corner of the reserve at Alfred-street, it would be just as easy for me to go by the present roads as it would be to go diagonally across the reserve; it would not make a difference of more than a few minutes.
516. Would not a road going diagonally through the reserve be very injurious to it? I should think it would be very injurious; it would spoil the cricket ground, which has been turfed in its centre.
517. That land was dedicated as a cricket ground before the Corporation came into existence? Yes.
518. Then, to run a road through it would be a violation of the trust? I should think so; at any rate it would spoil the ground.
519. Would there be any inconvenience to persons going backwards and forwards that way to the water reserve? No.
520. Is not the water reserve more likely to become a sewer than a water reserve? In the course of years.
521. A large quantity of Government land, which otherwise would have been unsaleable, has been sold in consequence of the roads made round the reserve? Yes.
522. If a person were at Mr. Zahel's house on the west side of the reserve near Carlow-street, it would be more convenient for him to go along by the church to the harbour than it would be for him to follow out Carlow-street to the eastward? Yes.
523. Going eastward would lead you down into the head of a gully? Yes.
524. An impassable place? Yes.
525. As a matter of opinion, would it not be more desirable that the Corporation, with its limited means, should make one good road round the reserve, than a number of badly constructed roads through it? Every one would admit that.
526. On the whole, you are in favour of the Bill passing? Yes.
527. *Mr. Burns.*] Do you think that property generally about this locality has been improved in value by the improvements made by the Corporation in the reserve? Yes, very much.
528. Are you aware of any sales of land that have been made since the improvements were made? Yes.
529. Did the prices realized show an improvement in the value of the ground? Yes.

21 Feb., 1873.

- T. J. Cook, Esq.
21 Feb., 1873.
530. How long have you lived in that locality? About seventeen years.
531. *Chairman.*] Have you any suggestions to make to the Committee? No; but I may point out, that if these roads—Carlow and Walker Streets—are not enclosed, it will take twenty chains of the reserve.
532. *Mr. Farnell.*] Twenty chains by one? Yes.
533. That is two acres? Yes.
534. *Chairman.*] Do you think the reserve is too large for the neighbourhood, or otherwise? It would be an advantage to make it larger rather than smaller; and dusty roads going through it would be very disagreeable.

Mr. James Booth called in and examined:—

- Mr. J. Booth.
21 Feb., 1873.
535. *Chairman.*] What is your name? James Booth.
536. How long have you resided at the North Shore? Fifteen years altogether.
537. You are the owner of property opposite the township reserve? Yes.
538. Will you state to the Committee your trade or profession? I am a gardener.
539. You have been employed a good deal on the North Shore in ornamental gardening? Yes; for the last fifteen years, with a few intervals.
540. You work for your living? Yes.
541. You are the owner of a small place at the corner of Walker and Falcon Streets? Yes.
542. Which is occupied as a florist's garden? Yes.
543. You know the nature of this inquiry? Yes.
544. That is to say, that the Municipal Council have authorized a Bill to be introduced into Parliament, to enclose a portion of Walker-street and Carlow-street running through the reserve, against vehicle traffic? Yes.
545. Will you state to the Committee the sort of improvements which have taken place in that reserve during the last twelve or eighteen months, with a view to ornament? A certain portion of it was improved as a cricket ground; and then it was thought desirable to plant some trees.
546. It was no use planting trees in the reserve until the place was fenced in? The reserve has been fenced in. The ground has been trenched, and three sides of it have been planted with a line of ornamental trees.
547. What trees are they? Ornamental trees, such as pines, camphors, figs of sorts.
548. A length of three-quarters of a mile of these trees has been planted? Yes; on three sides of the reserve.
549. If all this expense has been gone to by the inhabitants subscribing the money for the purpose out of their own pockets, would not that be a proof of their concurrence in the work done? There is not the least doubt of it. It was not like a rate, but the money for the purpose was subscribed voluntarily by the people, and they must have had the thing at heart, by the way they went forward with it.
550. As an owner of property in that neighbourhood, are you in favour of the enclosure of these streets, Walker and Carlow Streets, against cart traffic, where they pass through the reserve? Yes.
551. You are against leaving the reserve open? Yes; I should think it would spoil the park altogether to make roads through it.
552. One block would be much better than four? Yes, much better.
553. Would that be more or less convenient for persons going through it? It would be more convenient to have it in one block than four.
554. That is, for foot-passengers? For foot-passengers.
555. On the whole, you are in favour of the Bill to enclose these streets being passed into law? Yes.
556. *Mr. Hill.*] You have property in that locality? Yes.
557. Have you been long resident there? Fifteen years.
558. What is your opinion as to the value of property,—has it been depreciated or increased by the enclosure of this place? Increased.
559. Have you ever travelled down Ridge-street and along Alfred-street? There is a little hill rising from the foot of Alfred-street to Ridge-street.
560. That is leading to Middle Head? Yes.
561. Is there a means of getting rid of that incline by going along Falcon-street? It is a much easier road.
562. But longer? No, I do not think there is any difference in the length; there cannot be much difference in the length, because if you start from the Roman Catholic Church and go along Miller-street and Falcon-street, the distance is nearly the same as if starting from the same point you go along Ridge-street and Alfred-street.
563. *Chairman.*] In the latter case the corner is taken off? The corner is cut off.
564. *Mr. Hill.*] When you first went there, fifteen years ago, you used to travel along a bridle path which would run through the centre of the reserve, leading from the corner at the Roman Catholic Church to the opposite corner at Falcon and Alfred Streets? Yes; we used to call it Bloxom's Road.
565. Do you not think that it would be better for the sake of people travelling to Middle Harbour and Middle Head if that road were left open? No, I do not. I do not think that it would make five minutes difference to a person travelling on foot, and with a vehicle the time would be less.
566. And easier? And easier as it is now.
567. You would not have it kept open? No.
568. *Mr. Farnell.*] Do you think that if these roads were made through the reserve, it would be injurious to the trees planted within it? Yes.
569. You think that the whole block should be kept intact as a reserve? I think it should be kept intact as a reserve.
570. And that the enclosure should be the extreme boundaries, or the exterior portion of it? Yes.
571. Do you think on the whole that the property has improved in the vicinity of the reserve recently? Yes, much improved.
572. The value of the property? Yes, the value of the property.
573. *Chairman.*] You have noticed the small angle cut off on the south-east corner? Yes.
574. You are well acquainted with the place? I know the locality well.

575. If the whole of the reserve had been fenced in, that road at the corner would have been impracticable? Yes; Ridge-street would have run right into a gully there. Mr. J. Booth.
576. Is it within your knowledge that large quantities of stone from that place find their way into the township, for road-making and other purposes? A great quantity of stone is obtained from there. If that road were closed, there would be no other way of getting it through there except by cutting up the reserve and taking it all the way round by Alfred-street. 21 Feb., 1873.
577. Then the taking of that half-acre from the reserve is a great accommodation to the people? Yes.
578. Where could anybody get stone on the North Shore now without paying for it, if it were not for this road—Is not all the land sold? I do not know of any other land about there where you could go and take the stone away.
579. *Mr. Hill.*] But there might be without you knowing of it? There might be.
580. *Chairman.*] At any rate, that is centrally placed, and it is Corporation property to that extent? Yes.
581. And easy of access? Yes. There could not have been a road made round there without a great deal of expense, if the reserve had been all fenced in. There is a very steep gully down there, falling Neutral Bay way.
582. The ground in the reserve has been stumped and partly cleared? A large portion of it has.
583. On the whole, are you in favour of the Bill passing to enclose these roads against vehicle traffic? Yes.
584. Have you anything to suggest to the Committee? No, I have nothing in particular to say. I know there is a great difference in the place now compared with what it was when I first went there.
585. You know where the creek crosses Miller-street, opposite Zahel's? Yes.
586. In what condition was that when the Corporation came into existence? Impassable almost.
587. You know where the same creek crosses Falcon-street, through Alderman Allan's property? Yes; that was very bad—you could not get across it.
588. At that time Ridge-street was not open to the public? No.
589. Then in what way could persons have gone to Middle Head without reference to that diagonal road? That was the only way they could go. I was living in Falcon-street, about eighty yards from Miller-street. I was moving about 180 yards up the street, and I had three-quarters of a mile to go round because I could not get over the creek in Falcon-street.
590. If the bridge there were to be raised, would not that reduce the gradient on that road? That is the only bad bit on the road, and it is on account of the creek being there. If that hollow were filled up, the road would be very much improved.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ROAD THROUGH MUNICIPALITIES AT NORTH SHORE.

(PETITION IN FAVOUR OF GOVERNMENT RESUMING—INHABITANTS OF PARISHES OF WILLOUGHBY AND GORDON.)

Ordered by the Legislative Assembly to be printed, 31 January, 1873.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the Parishes of Willoughby and Gordon, on the North Shore of Sydney,—

RESPECTFULLY SHOWETH:—

That since the formation of the four Municipalities at the North Shore of Sydney aforesaid, the main road leading from Sydney through the same has been placed in the hands and under the control of the said Municipalities.

That two of the said Municipalities have levied toll on the said main road (Willoughby and East Saint Leonards); the other two have also power to do so. One of the said Municipalities (East Saint Leonards) having only about half-a-mile of the said road under its jurisdiction, and from the nett proceeds there will be a revenue of from two hundred to three hundred pounds per annum.

That in consequence of having to pay the present tolls, coupled with the ferry fare, and the small prices wood, fruit, and other produce now realize in the Sydney market, the woodmen and growers in the district are with difficulty able to maintain themselves and families.

That since the said road has been so placed under the power of the said Municipalities, portion thereof has been kept in a very bad state of repair, and is sometimes in an impassable state.

That the said road, if placed in the hands or control of Trustees, would, from the income of one toll, soon yield a sufficiency to maintain it in proper order and repair.

Your Petitioners therefore humbly pray that the Government may be pleased to bring into Parliament a Bill to resume the control and management of the said main road from Sydney through all the said Municipalities, and to vest the same road in such Trustees as the Government may be pleased to appoint.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 235 Signatures.]

1872-3.

NEW SOUTH WALES.

SYDNEY SEWERAGE AND WATER SUPPLY.

(SIXTEENTH ANNUAL REPORT OF MUNICIPAL COUNCIL—1872.)

Presented to Parliament, pursuant to Act 20 Vict. No. 36, sec. 75.

THE TOWN CLERK TO THE PRINCIPAL UNDER SECRETARY.

Town Clerk's Office,
Sydney, 18 February, 1873.

SIR,

I do myself the honor, by direction of the Right Worshipful the Mayor, to transmit, for the information of the Parliament of New South Wales, the Sixteenth Annual Report of the proceedings of the Municipal Council of Sydney, under the Sewerage and Water Acts, during the year 1872.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

SIXTEENTH ANNUAL REPORT of the Municipal Council of the City of Sydney, of their proceedings under the Sewerage and Water Acts.

THE Municipal Council of the City of Sydney have the honor to submit, for the information of the Parliament of New South Wales, the following Report of their proceedings in connection with the Sewerage and Water Works, together with Statements of Receipts and Expenditure during the year 1872.

SEWERAGE.

The main sewers in the city have, with the exception of a portion of that in Pitt-street, been in good working order during the year. The invert of the Pitt-street Sewer, between Market and Hunter Streets, was found to have been much injured by storm water acting upon work which had been originally badly done and constructed of inferior material, but has been thoroughly repaired.

The following additions to the main sewers, in the southern section of the city, have been satisfactorily completed:—Pitt-street, south of Hay-street, 264 feet lineal of 3-ft. oviform brick. Elizabeth-street to Foveaux-street, through Mrs. Hughes' property, one thousand and thirty (1,030) feet of 3 ft. 6 in. oviform brick. Elizabeth-street south, fifty (50) feet of 4 ft. 6 in. oviform brick.

Four hundred and sixty (460) additional house connections have been made with the sewers, making a total of six thousand four hundred and sixty-seven (6,467) houses throughout the city.

During the year, two thousand one hundred and eighty-nine (2,189) yards of stoneware pipe drains have been laid, of the dimensions and in the localities detailed in Schedule A.

WATER.

The pumping machinery at Botany has been constantly at work throughout the year, excepting an occasional stoppage when the high and low service reservoirs have been telegraphed as full.

The engines and pumps have been in efficient working order. No more than two of the engines have been worked at any time, and they have been changed occasionally, to admit of repairs required caused by ordinary wear and tear. The whole of the machinery is now fully capable of meeting the present requirements of the city.

In the early part of October last, the roofs of the engine-house and boiler-house were much damaged by severe storms, but the needful repairs have been effected.

On the 5th December, a fracture was discovered in the 30-inch main passing through Mr. Baptist's gardens, occasioned by the soft nature and sinking of the ground, but the leakage was quickly stopped by strapping the main with four bands.

The register at the Botany engines shows that ten hundred and sixteen millions four hundred and fifteen thousand five hundred and thirty-four (1,016,415,534) gallons of water had been delivered into the low level reservoir, in Crown-street, and four hundred and seventy-four millions four hundred and twenty-five

five thousand eight hundred and fifty-six (474,425,856) gallons into the Paddington reservoir. The total quantity pumped has been fourteen hundred and ninety millions eight hundred and forty-one thousand three hundred and ninety (1,490,841,390) gallons; an average of twenty-eight millions six hundred and seventy thousand and twenty-six (28,670,026) gallons weekly, being an increase on the supply of the previous year of one hundred and sixty-six millions six hundred and thirty-two thousand one hundred and twenty-two (166,632,122) gallons; accounted for by the fact that the tunnel from Lachlan Swamp was not in use for upwards of four months, whilst being cleaned out and repaired.

During the year 1871 many alterations were made in the arrangement of the city mains, by which a much larger supply of water was obtained through Busby's Tunnel. In the course of an examination of this work, it was found that very considerable and serious obstructions existed throughout its length; and after a careful survey, it was determined to undertake the thorough cleaning out and repair of the aqueduct from end to end. This work has been most successfully and satisfactorily completed, as will appear from the detailed Report of the City Engineer appended hereto (B).

Reference was made in the Report for the year 1871, to experiments which were being made to test the capabilities of the Lachlan Swamp, by means of Tubular Wells sunk into the sand. Since that time an experimental tube has been placed near the Randwick Road, to a depth of eighty-five (85) feet, and the yield of water therefrom by means of a chain-pump has been satisfactory, and sufficiently encouraging to induce a further trial of this means of obtaining and making available the large quantities of water with which the Lachlan and Botany Swamps are charged. The further development of this scheme is now engaging the attention of the Council. A very considerable amount of work has been carried out during the year, in constructing embankments at the head of Lachlan Swamp and at Randwick Road, and along the course of the Botany stream, for the purpose of backing up and partially retaining the water. All these works, as far as they have been completed, are of a most satisfactory character and have answered their purpose, as may be proved by the fact that, notwithstanding an unusual rainfall during the season, the water has been retained in these embankments and thrown back upon the swamps, so that no escape has taken place at the weir at the Botany engine-house during the past twelve months.

Preparations are now being made for the reconstruction and enlargement of the engine-pond reservoir at Botany, so as to increase its storing capabilities from twenty-four millions to eighty millions of gallons of water. The existing embankment has been found to be very defective in its construction, and not capable of retaining water, and the carrying out of this work has become a matter of necessity.

The result of the experiments connected with the cylindrical well, and the particulars of the works completed, and about to be undertaken in the construction of the embankments, as well as the general question of water supply to the city, are detailed in the reports of the City Engineer appended (C and D).

The extended survey of the watershed between Randwick, Long Swamp, and Botany, has been completed, and is a valuable addition to the records attached to the Water Department.

The usual annual contracts for the supply of coal, pipes, locks, &c., and general stores, have been satisfactorily carried out.

The quantity of pipes laid during the year, for the extension of water supply to the city and suburbs (see Appendix E) has been four and a half miles, and one hundred and thirty yards in length. The total number of houses now receiving and paying for water is eighteen thousand eight hundred and six (18,806).

FINANCIAL.

The Annual Statements of the Receipts and Expenditure on account of the Water and Sewerage Works, for the year 1872, certified by the City Auditors, are appended hereto.

Adopted by the Municipal Council of the City of Sydney, this eighteenth day of February, A.D. 1873.

JAMES MERRIMAN,
Mayor.

CHAS. H. WOOLCOTT,
Town Clerk.

APPENDIX B.

City Engineer's Office,
12 October, 1872.

Gentlemen,

I have much pleasure in being able to report that the tunnel from the Lachlan Swamp to Hyde Park has been successfully cleared out from end to end.

In my report to the Council on the 8th June last, I then stated that the necessary operations of clearing the tunnel had been commenced, and that from forty to fifty men were employed thereon. I had then little idea of the great difficulties attendant on carrying out this work, the magnitude and arduous nature of which I have endeavoured to show in this Report.

It was not until the 16th May that all preliminary arrangements were complete, by providing sufficient plant, in the shape of crab-winchies, chains, blocks, skips, &c., and the work of clearing commenced, which was started at several shafts simultaneously (of which there are twenty-seven in all), and the work continued without intermission until 20th September, when the last skip was taken out. The number of men employed throughout the entire time averaging about forty-five, and during the last month they had to work night and day.

Operations commenced at Hyde Park, and continued without any great difficulty until the 17th shaft was reached, when it was found that the bottom of this shaft was considerably under the ordinary level of the tunnel, and the water some height up the shaft. The roof of the tunnel, between Nos. 16 and 17, dipped into the water, and it was necessary here to introduce a Californian pump to lower the water, so as to enable the men to proceed with the work. The sand, stone, and muck was found, at shaft No. 17, to rise above the crown of tunnel, and up the shaft a short distance. Two other shafts, Nos. 18 and 20, were similarly sunk, and three pumps had to be introduced to keep the water under, the men having also to work night and day to enable this portion to be completed. I would here wish to testify to the praiseworthy manner in which the men worked, under great difficulties, they being the whole time in water, which was frequently up to their middles, whilst in some of the headings (owing to scarcity of air) the candles on several occasions would not burn. The skips also had to be dragged by the men from the places at which they were filled to the nearest shaft, whence they were hoisted to the surface, the lead at times being very long.

The number of skips of stone, sand, and muck taken out are as follows:—

Stone and muck	309 skips
Sand and muck	714 do
Stone	2,238 do
Sand.....	5,341 do
Muck.....	1,394 do
Sand and stone	292 do
Total.....	10,288

The number of dray-loads taken out of the tunnel, from the 29th April to the 2nd October, and carted away, are as follows:—

Sand	1,000 loads.
Muck.....	349 „
Stone.....	124 „
Total	1,473 dray-loads.

The appearance of the tunnel on going through it, now that it has been cleared, is very variable. In some places it swells out into large caverns, with the roof 10 and 11 feet in height. At other places it gets contracted, with the roof dipping down, so as to leave a passage of only 3 feet in height and width, with about 18 inches of water, for often many chains in length at a time. The irregularities, windings, and turnings are innumerable, as the measured distance through the inside will show, in comparison with the distance measured on the surface.

	Miles.	Chains.
Measured distance through tunnel	2	8
Surface measurement from shaft to shaft.....	1	72

During the progress of the work, side drives were found in six different places; the first leading from the first shaft in Park Road for a distance of 8 chains towards Moore Park, where, owing to its cutting into sand, it had been evidently stopped, and the end walled up. There is a shaft in this drive.

The second is in the Rifle Range, between shafts Nos. 14 and 15, and is 70 links long, the end being also walled up in a similar manner.

The third starts at the bottom of shaft No. 17 (also in the Rifle Range), and runs in the same direction as the others for a distance of 4 chains.

The fourth, between the 18th and 19th shafts, 48 links long, with a branch drive from it running north for 26 links.

The fifth occurs between the 19th and 20th shafts, and is 126 links in length; and the sixth, between shafts 22 and 23, for a length of 175 links. All these drives run in the same direction, viz., towards the south-west.

There were found nine stone culverts built in the tunnel, ranging from 1 foot 8 inches to 1 foot 11 inches in width, and from 3 to 4 in height—the total length being 681 feet. These culverts were evidently built where the rock was soft and faulty, for the purpose of strengthening the tunnel against the surrounding pressure.

In several places under South Head Road these culverts had to be strengthened by cast iron segmental arches, and at other places shored up with hardwood. The tunnel now, on inspection, is perfectly sound, safe, and clear from end to end, or from Hyde Park to the mouth in Lachlan Swamp.

As

As the clearing proceeded, the irregularities on the bottom of the tunnel were innumerable, and at four or five places I found it necessary to have the rock cut away where ridges occurred, as they dammed back the water for considerable distances and depths. On the occasion of the final inspection by two of the Aldermen and myself, the depth of water varied from 3 feet to a few inches, the average being about 15 inches throughout from Hyde Park to Moore Park; the remainder from that to the mouth of the tunnel in the Lachlan Swamp would have been nearly all under water had it not been for the three Californian pumps, which were kept going night and day, in order to get rid of the large quantities of water, which must have entered through fissures in the rock from springs in the tunnel itself, as the water was entirely shut off at the mouth by dams and sluices.

I have had a 24-inch water-lock built into the mouth of the tunnel at the Lachlan Swamp, in masonry and cement, to enable us to control the water properly, and let it into the tunnel in such quantities as may be required, as well as for the purpose of raising the permanent head of water in the swamp to a higher level.

The cost of the whole of the work has been, in labour.....	£1,611	8	11
Plant and materials	191	17	2
	£1,803	6	1

Although this expenditure seems large, yet it will repay itself in a very short time, and has been incurred in executing one of the most useful works that have been undertaken in connection with the water scheme since the tunnel was first formed, as the water is supplied from this source entirely by gravitation, and costs nothing for delivery.

Before the work of clearing commenced, the water from the tunnel could only be turned in to a portion of the low-lying parts of the city, for about two hours in the morning, when the supply was exhausted. But this was not to be wondered at, as the water had to percolate through the sand and ballast, with which, in many places, the tunnel was entirely choked up. The contrast since clearing is very marked indeed, as the supply since the day on which the water was turned in (the 27th September, 1872) has never ceased; nor has the water from the low level or Crown-street reservoir been turned in to supplement it in any way.

To show the quantity of water now supplied by the tunnel, I have taken two weeks, one before and another after the water was let in, of very similar weather, for comparison.

	Gallons.
During the week ending 31st September, there was pumped from Botany	28,253,808
Week ending 19th October.....	21,487,824
	6,765,984
Water from the springs and fissures in the tunnel itself, 35,000 per day.....	245,000
Total for the week	7,010,984

being a supply of over 1,000,000 gallons per day from the tunnel alone by gravitation. This has proved already a great relief to the Botany engines, as shown by the daily returns since the tunnel has again been brought into requisition, the engines having been stopped for from four to five hours at a time, and on one occasion twice in the day. They have also not been working at so great a speed.

Whilst this work was being proceeded with, my attention was particularly directed to preserving and storing the water in the Lachlan Swamp, above the level of the tunnel, so as to have it in reserve when the water was cleared.

For a number of years back it has been the custom in dry weather to cut drains or races through the swamp; and, by continually deepening those year after year, they have at length assumed the character of deep streams or gullies, varying in depth from 5 to 20 feet. At six different places I have caused embankments to be thrown across these races, which back up and retain a very great quantity of water. The largest of these embankments is about 120 feet long, 12 feet 6 inches deep, and 20 feet wide on top.

In addition, I have had the southern side or bank of the main race raised and strengthened where it was low or showed signs of weakness, from the mouth of the tunnel all the way across the swamp to Cutt's drain on the eastern side.

I would advise the still further raising and strengthening of this part of the work, as every foot of water in height we gain here can be utilized, as the lock I have had inserted in the mouth of the tunnel will regulate the discharge.

I have, &c.,
FRANCIS BELL,
City Engineer.

APPENDIX C.

City Engineer's Second Report of the Municipal Council of Sydney on Capabilities of the Botany Watershed, &c.

City Engineer's Office,
Sydney, 8 June, 1872.

Gentlemen,

I have the honor to further report upon the investigations made, and tests applied, to ascertain the capabilities of the watershed which supplies the city with water.

TUBE WELLS.

After my former Report, the Council sanctioned the proposal that the sum of £700 should be expended in testing the capabilities of tube wells sunk in the sand. In accordance with this resolution, I at once proceeded to carry it into effect, and have had a cast-iron cylinder, of 5 feet external, and 4 feet 4½ inches internal diameter between the flanges, sunk to a depth of 81 feet 6 inches below water-level, or 85 feet 2 inches below surface of ground, close to the old engine-house at Lachlan Swamp.

As we met with so many difficulties in sinking this trial well, and the delays were so frequent and disappointing, I think it advisable to enter more fully into the detail of the experiments made than would have otherwise been necessary.

The sand pump which I had made in Sydney did its work most effectually, and the cylinder was sunk with great facility whilst in sand, having been sunk as much as 7 feet in one day. The original intention was only to sink the tube to a depth of 60 feet, and when this was done the chain pump was put in and got to work, but it was found that the water was so muddy, and such a large accumulation of mud and clay had collected in the cylinder, that it was considered advisable to sink the cylinder deeper to get through the clay, and four more lengths were procured for this purpose. In sinking further, it was found that within a few inches of where the bottom of the cylinder had been, a bed of clay was met with 6 feet in thickness, and of so heavy and tough a nature that the sand pump had no effect on it, and we had to procure the services of a diver to cut through it, hence the reason of the muddy water and clay. This deep bed of clay occurring here was the more remarkable, as a boring had previously been put down within a distance of 30 feet of it, to a depth of 96 feet 6 inches, or 7 feet 6 inches below sea-level; and only one small band of clay, 2 inches thick, was met with.

The cylinder was finally sunk to a depth of 85 feet below surface of ground, where one side of it rested on hard sand, with a band of iron-stone ¾ of an inch thick running through it. At a depth of 2 feet below the bottom of cylinder, clay was again found, and, by boring, we ascertained this bed to be 7 feet 6 inches in depth, with hard sand below. On starting the pumps, the water was very muddy, and when it was lowered suddenly in the cylinder to a depth of 47 feet from the surface, there took place a great rush of mud, sand, and clay into the cylinder, finally attaining a height of 20 feet from the bottom, thus showing the enormous pressure of the water at that depth; for the sand at the bottom being so charged with clay, the water was unable to percolate through it, hence the great rush when the bottom did move. This, as it turned out, was a great benefit, as it cleared away all the mud and clay, and the space has been refilled with pure sand. The cylinder was once more cleared out by means of the sand pump, and, as a precaution to prevent any great rush of sand, I inserted, under the lower flange

flange of the cylinder, or 6 feet from the bottom, two cast-iron gratings, with brass wire gauze between them. The bottom one was 5 inches thick, with conical holes 1 inch in diameter at small end, and as close as they could be placed together, with polls which fell down as they passed each flange of the cylinder to prevent the grating from rising. The upper grating was 3 inches thick, with holes as close as could be placed, $\frac{1}{2}$ inch in diameter, bolted firmly to the bottom grating, and closely fitting between the flanges of the cylinder. The chain pump was once more inserted, and the result of the pumping I will now detail. On lowering the water in the cylinder, the influx of the sand at the bottom was very gradual, and rose at the rate of about 1 inch per minute, until it finally attained a height of about 7 feet above the grating. We continued the pumping from the 11th till the 23rd April, and the sand in the bottom of the well gradually lowered until it was only 6 feet over grating. To effect this, we, by various means, caused the sand in the bottom to be much disturbed, and by continuing the pumping, all the earthy and vegetable matter in the sand was drawn off with the water, which became clearer and clearer each day, and the yield greater and greater, without any rising of the sand at the bottom; but, as above stated, the lowering of it from 7 to 6 feet above the grating. The daily increase of water, by continuously pumping, was very remarkable, and was caused, no doubt, by the fine earthy and vegetable matter, as well as the fine particles of sand, being drawn off in the water pumped. Latterly the water was pure and clear. The yield of water per minute, when it was at a depth of 45 feet from surface, was, on—

23rd March,	20	gallons per minute.
11th April,	36	” ”
13th ”	72	” ”
15th ”	75	” ”
16th ”	84	” ”
22nd ”	86	” ”
23rd ”	88	” ”

and had the pumping been continued, supposing the cylinder had been sunk in pure sand, instead of having encountered the clay, compact sand, and band of ironstone, which has been the case in this experiment, I feel confident that the yield would have amounted to at least one hundred gallons per minute, from a well of 4 feet 4 $\frac{1}{2}$ inches in diameter.

It must also be borne in mind, that the seam of ironstone, on which one side of the tube well is resting, is a material obstacle to the ingress of the water. However, taking the actual quantity of water obtained, without allowing for the above-mentioned disadvantages, viz., 88 gallons per minute, or at the rate of 5,280 gallons per hour, it will be seen that the yield from a cylinder of double the diameter would be four times that quantity, or 21,120 gallons per hour.

I may mention as a fact worthy of notice, that, notwithstanding that the pumping was continued, sometimes for several days consecutively, it did not cause the slightest perceptible variation in the level of the surface water in the immediate vicinity of the cylinder, thus clearly showing that the water pumped must be drawn from a large area.

The quantity of water pumped to the high level reservoir from Botany, during the year 1871, was 414,735,562 gallons, equal to 1,136,262 daily; so that three cylindrical wells, 9 feet in diameter, would give more than the quantity at present required, or 1,520,640 gallons.

These experiments have fully confirmed my original expectations, as stated in my first Report, in the following words:—“I would propose to sink in the sand cylindrical iron wells, at such places as may be determined on—it may be that we might require three or four—and to have one large one to pump from, &c.”

In sinking any future cylinders, care should be taken to have borings put down in the exact spots where they are to be, so that we would not have the difficulties to contend with that occurred while sinking the first one. The yield of water when the cylinder is entirely in pure sand, must necessarily be very much greater than if it was close to a clay bottom.]

From these experiments the following deductions can be made:—That the sand rises in the cylinder in proportion to the depth sunk under the surface water. In this one the bottom of the cylinder is 81 feet 6 inches below the surface water, and the sand in the well attained a permanent level of about 12 feet above the bottom, leaving 69 feet 6 inches of water in the well.

The temperature of the water drawn from this depth is always uniform, and I have ascertained this to be 63° Fahr. tried at various times from the 24th February up to the present; whereas the water delivered to the city during the summer was from 75° to 80°; and if the water was brought from a distance in open channels, I have no doubt it would reach a temperature of 85°, as I found it to be at the surface in the Lachlan stream on the 28th February last.

The wells could be placed so as to pump the water to the high level reservoir, at about 80 feet less elevation than by pumping from Botany.

The engines, if erected near Randwick, would be away from any attacking force from the seaboard; and the supply of water being so near the city, no other scheme could compete with it as to cheapness, provided the water is permanent.

TRIAL BORINGS.

Since my last Report, I have been steadily prosecuting my investigations with reference to the depth of sand below the permanent water level in the several swamps and lagoons, and the borings have revealed a depth of sand over the entire basin far beyond what I had anticipated. At appropriate places scattered all over this sand basin of about 4,150 acres, I have caused eleven (11) test borings to be put down in different parts of this area, some to a considerable depth, and find that the average depth of pure sand is 81 feet. As the position of these borings had been determined on so as to give the fairest possible approximation of the actual capacity of this sand basin, I consider this average to be as correct a one as can be made; and, calculating on the same basis as my former Report, I find the probable quantity of water stored in the sand will amount to 22,879 millions of gallons, which quantity is altogether independent of our present consumption of 1,884 millions from all sources, this latter being derived entirely from the sandhills above these levels, which up to the present time have never failed us.

Most of the borings have been sunk through pure sand to considerable depths below sea level. At No. 10 bore, which was put down near the long swamp on the right-hand side of the Bunnerong Road, the 3-inch tubes were sunk to a depth of 127 feet, or 61 feet 6 inches below sea level—117 feet being pure sand. At a depth of 47 feet below sea level, a quantity of water was procured, which in appearance was beautifully clear, and to the taste apparently the same as that from Botany.

The results of an analysis of one gallon of this water gives of salts in solution (consisting of chloride of sodium, carb-magnesia, iron, and sulphate of lime), in all nine (9) grains, being quite as pure as the water at present supplied from Botany.

The Botany watershed, from careful surveys and observations, contains about 5,560 acres; and if we take the average annual rainfall for the last thirty-two years, that being the only period of which any reliable record has been taken, viz.,—49·435 inches, we have from the rainfall on this area alone 6,235,854,487 gallons, or over 3 $\frac{1}{4}$ years' supply at the present rate of consumption; this is, however, without allowing for evaporation, and my opinions on this latter point are not changed since my Report in September last.

The following figures will speak for themselves:—

	Million gallons per annum.
Average yearly rainfall for the last thirty-two years, on area of watershed 5,560 acres.....	6,237
The Water Commissioners recommended that provision should be made to supply 250,000 inhabitants, at the rate of twelve million gallons per day.....	4,380
The present consumption, from all sources, is estimated at five millions of gallons per day	1,884

LACHLAN SWAMP TUNNEL.

On the 8th April last, I found it necessary to report that the tunnel was not working to my satisfaction, owing to considerable obstructions that were found at the bottom of many of the shafts, and I recommended that immediate steps be taken to clear away all deposits and obstructions. I received instructions on that date to do so, and at once proceeded to act upon them. Having had all the shafts opened to ventilate the tunnel, the overseer, Mr. John Stacey, started at Hyde Park and travelled through it, encountering many obstacles and difficulties in the way, owing to heaps of ballast and sand, which had evidently never been removed from the time of the completion of the tunnel; they being the debris caused by the workmen in its construction; many of these barriers having evidently been placed there at that time, for the purpose, I suppose, of keeping back the water whilst the men were at work.

Stacey, on proceeding up the tunnel, found the water varying in depth from a few inches to 4 and 5 feet, and the deposits and obstructions in many places so formidable that it was with great difficulty he could get through by creeping on all fours,

fours, with his back rubbing against the top of the tunnel, and this for many chains in length; and at two or three places he could not proceed any further, as the top of the tunnel dipped into the water. Operations were commenced at Hyde Park, or the lower end, proceeding upwards, and the tunnel has now been cleared as far as the Park Road at the Rifle Range, with the exception of about one chain in length under the Barracks; and this portion will, I have no doubt, be entirely completed by Saturday afternoon. The water has been lowered in the portions cleared from 1 to 3 feet; the number of men employed is between forty and fifty, and the number of cart-loads of stuff, consisting of ballast, sand, and muck taken out and carted away, amounted on the evening of the 6th instant to 400 loads. On examining the tunnel under the South Head Road, many of the covering stones were found cracked and in a dangerous state. This has now been repaired, by inserting cast-iron segments or arches under them, let into and springing from the masonry on each side: the number inserted has been thirty-three. When the work of clearing has been completed, I have no doubt but that the increase of water will be very considerable. I have found also that the yield of water from the tunnel alone, without any coming in from the Lachlan Swamp (as it has been completely cut off by sluice gates), is about 30,000 gallons in the twenty-four hours; but this can be greatly augmented hereafter, as many places where there were heavy springs in the shafts and roof, from fissures in the rock, have been plugged up whilst the men were at work.

DAMS No. 1 & 2.

On the 26th March last, instructions were given me to repair No. 1 Dam, which had been carried away during the heavy floods of the year 1868. I have much pleasure in being able to report that this dam has been reconstructed of sufficient stability. I am having the whole of the embankment well turfed, and the waste-weir or bye-wash, which I have placed at a distance from the artificial embankment for safety, is of sufficient width and strength to carry off any water from floods, or withstand any shock it might be called upon to sustain in the event of any of the upper dams giving way.

Having carefully inspected the old site of No. 2 Dam, I found that it was a very ineligible position for an embankment, and have, accordingly, recommended a new dam to be constructed lower down the stream, where the swamp bed is not so spongy as in the case of the old site, and where the embankment will not require to be so long as was the former one. I have also been able to avail myself of the natural level of the ground to the north of the proposed dam, so that no artificial bye-wash will be needed, which, in itself, is a great advantage. The new embankment will also back up $2\frac{1}{2}$ millions of gallons more than it would have done if reconstructed on the old site.

ENGINE-POND DAM.

With a view to the enlargement of this dam, both with regard to extending its area and also raising the embankment, I am now having a series of borings sunk through the present puddle-bank at the sea embankment, in order to ascertain whether it has been originally built in a proper bed of either rock or clay. The result of the ten holes at present sunk shows that the puddle-bank does not extend more than from 8 to 12 feet below the level of the surface, and, in every instance, is merely resting on sand, the bed of clay varying from 2 to 4 feet beneath the bottom of the puddle; and also, that there is no puddling whatever at the back of the masonry of the flood-gates; thus showing that the dam is really not able to retain the water in it without very considerable leakage. I therefore fear it will be necessary, before raising the dam, to form a proper puddle dyke, resting on the bed clay, through the entire length of the embankment, altogether independent of the present puddling. I purpose continuing the borings along the east side of the engine-house paddock, to enable me to form an estimate of the probable cost of the enlargement.

EXTENSION OF SURVEY, &c.

I have been greatly delayed in the prosecution of my calculations respecting the capabilities of the Botany country, &c., owing to the unexpected length of time which the survey has taken in its execution; and, I am sorry to say, that I am not as yet able to report that it is completed. I have repeatedly urged the great value it would be to me, with a view to its being finished before this (as ample time has elapsed since it was first undertaken), but without success.

Finally, I would remark, that I feel great pleasure in being able to confirm the opinions enunciated in my first Report with reference to our Botany water supply, and to reiterate my unshaken confidence in the scheme which I have proposed as an extension of it.

The great advantages which will be derived from relieving the Botany engines of much of their present duty, and of supplying the highest parts of the suburbs by means of pumping machinery stationed at the Lachlan, is too well known to the members of the Council for me to repeat the opinion I have already expressed at different times on that subject. With the tunnel working free of all obstructions, the Botany dams repaired and rebuilt, increased reservoir accommodation, and a system of tube-wells sunk at appropriate places to supply the higher levels of the city, I see no reason for indulging in the cry that Sydney ought to seek elsewhere for a source of water supply.

I have, &c.,
FRANCIS BELL,
City Engineer.

ADDENDA.

LACHLAN AND BOTANY WATER SUPPLY.

Present consumption, from all sources (being at the rate of about 5 million gallons daily per annum).....	1,884	Million gallons;
Water Commissioners recommend that provision should be made to supply a population of 250,000, at the rate of 12 million gallons per day; equals an annual supply of	4,380	
Average rainfall for the last thirty-two years (49,435 inches) on area of Botany watershed, 5,560 acres, equals per annum	6,237	
Quantity of water stored in sand basin, equal to about $5\frac{1}{2}$ years' supply at the rate recommended by Water Commissioners, or 12 millions per day.....	22,879	
Amount of rainfall for $5\frac{1}{2}$ years (taking the above annual average) equals.....	32,744	
Total quantity of water contained in sand basin, and $5\frac{1}{2}$ years' average annual rainfall, would give $12\frac{1}{2}$ years' supply at the Water Commissioners' maximum rate.....	55,623	

FRANCIS BELL,
City Engineer.

APPENDIX D.

City Engineer's third Report to the Municipal Council of Sydney, on capabilities of the Botany Watershed, and extension of present Water Supply, &c.

City Engineer's Office,
24 October, 1872.

Gentlemen,

I have the honor again to report on the progress made with the additional works now in the course of construction for the purpose of impounding more water, as well as on the further investigations made in ascertaining the capabilities of the watershed from which the city is supplied.

DAM No. 2.

In my Report of the 8th of June last, I mentioned that No. 1 Dam was reconstructed; since then No. 2 Dam has also been completed, a small portion only of the flank embankment remaining still to be done.

LACHLAN DAM.

Good progress is being made with the Lachlan embankment parallel with the Randwick Road; about three-quarters of the work being now completed; and, as there are about eighty men constantly employed, I consider that in about six weeks it will be in a sufficiently advanced state to commence storing water. This embankment is over half a mile in length (45 chains), and the quantity of water that will be impounded in the reservoir itself, when full, I estimate at 45 million gallons.

ENGINE-

ENGINE-POND RESERVOIR, BOTANY.

At present this reservoir is only able to retain about 24 million gallons,—a capacity totally inadequate to impound anything like the quantity of water which at times is discharged into it, and which has hitherto been lost in consequence. It is proposed to increase the capacity of this reservoir by raising the level 6 feet 6 inches higher, which will have the effect of giving a very much greater depth, as well as increasing the superficial area to about 50 acres. The quantity of water it will then be able to contain I estimate at about 80 million gallons.

The sea embankment of this reservoir has been ascertained to be anything but water-tight, as a great quantity of water is found to escape into the bay. With the view of remedying this, I have had borings taken along the centre of its entire length, as well as along the site of the proposed extension of embankment: the result of these shows that in no instance has the puddle been carried down to the bed clay, which exists here at depths varying from 10 to 33 feet from the surface. I estimate this entire work will cost (including the purchase of 5 acres of land for the diversion of the Blackwater Creek) about £7,000. Of all the reservoirs, this is the only one, being the lowest and nearest the sea, that is necessary to be perfectly water-tight, as all the water that escapes through the others can be arrested here. I am now much pleased to say the Council have approved of these works, and they will be proceeded with as quickly as possible.

To sum up the aggregate of the additional impounding capacity of all these reservoirs, we have—

	Million gallons.
No. 1 storing capacity, when full	30
No. 2 ditto ditto	32
Lachlan Reservoir ditto	45
Increase to Engine-pond Reservoir ditto	56
	163

This is independent of what will be thrown back into the sand and stored there above and around Nos. 1, 2, and Lachlan Reservoirs, equal to the height that the water stands at in the reservoirs. I have estimated this quantity to be about 150 million gallons, so that the total storing capabilities of all these new works will amount to about 313 million gallons, or about ten weeks' supply at our present rate of consumption.

EXTENSION OF SURVEY.

Since the loss of the field books and plan of portion of the survey of the Botany watershed, a contract has been entered into with Mr. Handcock for its completion. The survey is now being rapidly proceeded with, the greater part of the triangulation is done, and I am in hopes that the work will be completed and handed over within the contract time.

TEST BORINGS.

Since my last Report, five additional borings have been put down, and the average gives a depth of over 80 feet of pure sand from the surface: they are as follows:—

DEPTH OF SAND AT EACH BORING.

No 1.	75' 0"	on clay and sand.
2.	96 6	still on sand.
3.	59 0	on clay.
4.	104 6	ditto.
5.	73 0	on rock.
6.	92 0	on clay.
7.	47 6	on rock.
8.	54 0	on rock. Here water rose through the tube 18 inches above surface of ground.
9.	123 0	on clay.
10.	95 0	ditto.
11.	75 0	ditto.
12.	97 9	ditto.
13.	43 9	on rock.
14.	89 0	ditto.

Average depth of sand equals 80.36 feet, result of fourteen borings distributed over the area of the watershed.

These figures fully confirm my former calculations, and prove beyond a doubt the immense natural reservoir here revealed. All these borings were taken at spots where the water was standing at the surface of ground, thus proving that this immense body of sand, 5,560 acres in extent, and averaging 80 feet in depth, is charged entirely with water of the very purest description. Thus (basing my calculations on the experiments recently made by me, which showed that the sand contains one-third of its own bulk of water), and assuming that only one-fourth of this is available, I find that we have the enormous quantity of 30,274 million gallons of water that has never yet been touched, which we can always draw from when required, and within reach, I may say, of our very doors. This, as I have shown before, is quite independent of our present supply, which comes entirely from the surface, and from the sandhills which rise above the inclined plane, and is partially stored in the several reservoirs. As shown in my former Report, the average yearly rainfall is 6,237 million gallons: this added to that contained in the sand basin (viz., 30,274 millions) gives 36,511 million gallons, or over nineteen years' supply at the present rate of consumption of five millions per day, even if no rain should fall during that time; but, as I have just stated, the average yearly rainfall is 6,237 million gallons on this catchment area (being one-third more than the greatest quantity recommended by the Water Commission), which would be replenished yearly; so that we have always this vast store of water to fall back on, in the emergency of any lasting or severe drought; and I maintain that our watershed of 5,560 acres of sand 80 feet deep, a fourth of which is water, or 5,560 acres of water 20 feet deep, will always be amply sufficient for any future requirements, if proper means be adopted to utilize it.

As it has been incontestably proved that there is this large supply of subterranean water obtainable from the sand, I would now advert to the quality, temperature, &c., of the same. By the last mail from England, I received from the celebrated hydraulic engineer, S. C. Homersham, Esq., C.E., reports and pamphlets, &c. of the most valuable kind, all bearing on this question. In England and on the Continent subterranean water is now being gradually introduced, where practicable, for the supply of large towns, in lieu of river and surface water. Mr. Homersham, in his letter to me, states:—"River or flood water impounded in reservoirs always proves to be more or less contaminated with decayed vegetable matter, derived from fallen leaves and blossoms, as well as with other more deleterious impurities—such as the growth and decay of coniferæ in the water, the exuvie of animals and fish, all of which get dissolved in the water or mixed with it, and afford nourishment to numerous vegetable and animal organisms, the spores and ova of which are conveyed into the water by the air, or washed into it by floods, &c. In this country a careful microscopical examination of river water shows such water to be pervaded by numerous minute living vegetable and animal organisms and fungi, with germs and ova, all more or less detrimental to the health of those who drink such water. These impurities more especially abound in warm seasons of the year, when the normal temperature of such water in this Country is about 70° Faht. In New South Wales, where the temperature of river and surface water is 80° to 85° Faht. in summer, or 10° to 15° higher than here, decomposing organic matter, and these classes of impurities, cannot fail to be more abundant, and more detrimental to health. Now, careful examination proves that in its normal condition subterranean spring water is entirely free from all such impurities."

If we analyze the return that appeared in the *Herald* of the 14th instant of the annual rates of mortality in the United Kingdom and Sydney, we find that in all the cities and towns where the mortality is greatest the water is obtained from river or flood water impounded in reservoirs—such as Dublin 34.9, Glasgow 33.5, Liverpool 37.0, for every 1,000 of population, &c.; but in Portsmouth (which is supplied entirely by spring water obtained from wells) the mortality is only 19.8—the lowest in the entire list; thus proving beyond doubt that water obtained from wells is much more wholesome than surface water. Compare Sydney and suburbs with these, and we find the mortality of Sydney to be 21.9, and suburbs 14.0. The water now supplied

supplied to Sydney and part of the suburbs is of the purest description, being filtered rain-water, springing from the bases of the various sandhills throughout the Lachlan and Botany watersheds; and from this wholesome water being supplied to the inhabitants may mainly be attributed the health of the city and suburbs, as compared with the English cities and towns; and we may safely assume the quality of the water has something to do with the rate of mortality. It would, therefore, be in my opinion most unwise to seek for another source of supply, when our present can be developed and augmented sufficiently for our requirements. I may here cite some of the principal towns in England that are supplied by wells:—Winchester, Arundel, Brighton, Dover, Deal and Walmer, Ramsgate, Canterbury, Gravesend, St. Albans, Hull, Portsmouth, Plumstead, Woolwich, Charlton, Blackheath, and Walford.

Last year the Corporation of Edinburgh promoted a Bill in Parliament to supply that city with water by *gravity from Loch St. Mary*. The Bill after great investigation was thrown out in the Lords; for, though the water was very soft (indeed almost as soft and free from mineral matter as distilled water), yet the microscope showed that it contained numerous living organisms, both vegetable, animal, and fungi, such as undoubtedly proved the water to be unwholesome for drinking and domestic use.

I have dwelt thus long on this most important subject, with the object of showing the incalculable value it will be to the inhabitants of Sydney and suburbs for them to obtain a sufficient supply of the most wholesome and purest water, delivered at a temperature of 63° Fahr., the entire year through, at a moderate cost, not greater than the present rate; and this object can be achieved by drawing the filtered water from the sand by means of wells, and pumping into receiving reservoirs for delivery.

If we compare this scheme with that proposed by the Commissioners, where we find it is intended bringing the *surface and flood waters a distance of 63 miles*, principally running in open streams or conduits, and impounded in large reservoirs, with all the impurities of living organisms, both vegetable and animal, and fungi, which must be developed to a very great degree in this warm climate—with the water delivered to the inhabitants in the summer at a temperature of not less than from 80° to 85° Fahr., in addition to the immensely increased cost to the householders and consumers, to say nothing of the probable great increase of mortality which would most likely arise by using such water—if, I repeat, we compare the two schemes, I have little hesitation in saying that the extension of our present magnificent conserving basin will be that which will be pronounced to be the most advisable and economical of the two.

TUBE WELL.

During the very dry weather which continued for so many months during this year, and when the surface water began to show symptoms of not being able to keep up the requisite supply, I thought it advisable to try and supplement it by pumping water from the experimental tube well at the Lachlan, and allow it to flow down to Botany. Before starting the pump, I found, on sounding, that at the bottom of the well, which was 71 feet 4 inches deep, and resting on the sand, which stood in the well 15 feet from bottom of cylinder, there was a deposit of very tenacious fine pulverized clay, about 3 inches in thickness. This deposit was caused from the sediment in the water which came from the stratum of clay which was within a few inches of the bottom of cylinder. I regret much that I had not this clay deposit taken out before I commenced pumping, for I feel assured in that case the test of the yield of water would have been very different; however, the principle is proved beyond a doubt, that water can be pumped in immense quantities from the deep sand beds, as will hereinafter appear. The pump in the test well was started on the 23rd September, just five months from the last of the former experiments, which showed a yield of 88 gallons per minute, or 126,720 gallons per twenty-four hours. This was tested over and over again, and gave the same result. On the last occasion, however, the yield was very much less, but this was easily accounted for from the fact of the length of time (five months) for the sediment to form into a hard crust of clay on the surface of sand, which prevented the water from percolating through it; and also as the cylinder itself had settled down into or within a few inches of the bed of clay. The yield of water by the last trial, under these very unfavourable circumstances, was 48 gallons per minute on starting; but on continuous pumping night and day, which was done from 23rd September to 5th October, the yield increased to 51 gallons per minute. If the wet weather had not set in and the water from the pump no longer likely to be required, it had been my intention to have taken out the chain pump and lowered once more the sand pump to clear away the clay sediment. Even this yield of 51 gallons per minute, or 72,888 per day, must be taken as a very satisfactory result as the yield derivable from a tube well of only 4' 4½" in diameter. If I had been enabled to have retained the bottom of the tube in the pure sand, and not to have allowed it to approach the clay, I will venture to say the yield would have been at the very least four times greater. It was most unfortunate sinking the well where we did, as we came on the outside of the spur of the clay bed which runs out here, and which has been clearly defined by the borings that have been taken since. My object also in sinking where I did was to be close to the engine, to facilitate our sinking and pumping. As these experiments are the first of the kind that have ever been made in any part of the world, and there being no previous experience to guide us, we must necessarily expect to meet with difficulties and disappointments at the outset, and it is only by persevering that we can hope to gain the knowledge necessary to overcome them when they occur. I can now say with confidence that we have gained that experience which will enable us to proceed with the construction of cylindrical wells that will yield large quantities of water. I now, by experience, have found that after the cylinder is sunk to a certain depth, and the sand cleared to the bottom, if the water be lowered in the well the sand rises proportionally, provided the cylinder is prevented sinking; therefore, after the cylinder has been sunk to the proper depth, and before the water is pumped out, sand should be filled in, proportionately high to the depth of the cylinder, as it is incumbent on us to arrest the bottom in pure sand, and not allow it to touch the clay on any account; otherwise we do not get the requisite quantity of water. Other means should be adopted in addition at the surface of ground to prevent the cylinder sinking too far. *The yield of water from sand is, however, sufficiently known to give us the greatest confidence in our proceedings.* As an instance, Mr. Robert Stevenson, in his Report, in 1840, to the London and Westminster Water Company, states,—“In the county of Durham two shafts within a few yards of one another are now in process of being sunk for the purpose of a coalpit. They have encountered a *stratum of sand* lying between the magnesian limestone and the coal formation, abounding with water to an extraordinary degree. For some months past, and up to the present moment, more than 10,000 gallons per minute, or 14,000,000 gallons per twenty-four hours, have been pumped from the *stratum of sand* crossing these two shafts.”

Mr. Homersham, in his communication to me by this mail, states,—“He had a well sunk, during the year 1865, in the parish of Cheddington, Bucks, for a depth of 116 feet in the gault clay, with a borehole 35 feet further carried through the clay into the lower *greensand*; and the yield of water from the borehole, *four inches internal diameter*, was 160 gallons per minute, or about 230,000 gallons per twenty-four hours. Some wells sunk, geologically speaking, in a similar “sand formation,” yield from one to one and a half million gallons per day.

It being satisfactorily proved that an immense body of water does exist in the sand basin of the Lachlan and Botany Swamps, of the purest and most wholesome quality, I will now proceed to describe how it may be obtained. I would propose to sink four cylindrical wells on the south side of the Randwick Road, at different levels, and sufficient distances apart to enable them to be connected by syphons to a large receiving one at the lowest level, which I propose should be situated close to where the stream crosses the Bunnerong Road, under Constitution Hill; and here I would propose to erect engines and pumping machinery, and pump the water from here to the high level reservoir at Paddington, and also to another reservoir proposed to be built at Woollahra. In making my estimate of the number of wells requisite to yield sufficient water to supply the high levels of the city, I have taken 5·86 gallons to the square foot per minute as the yield from a well when the bottom of cylinder is in sand, and over 80 feet in depth; that having been the ascertained quantity after many trials.

The cylinders I propose to have of wrought iron, being so much lighter than cast iron, each 15 feet in diameter, and sunk to such depths as the nature of the ground will permit. These four should yield on the above basis 1,000 gallons per minute each, which would give, in twelve working hours, 2,880,000 gallons, or in twenty-four hours 5,760,000 gallons, or just five times the quantity now being delivered to the high level reservoir. These would all discharge into one large receiving well for pumping from, say 30 feet diameter and 40 feet deep, with bottom. I would propose to erect four engines, seventy-five horse power each, with adequate pumps, &c., and to construct and lay from thence a 30-inch wrought iron main to connect with the Paddington high level reservoir, and connect the Paddington with the Woollahra reservoir by means of a 20-inch main. These works are subject to great enlargement at any future time when the requirements of the city demand it.

The

The following is my estimate for the proposed additional works, by the erection of pumping engines and wells for a high level service :—

Four cylindrical wells 15 feet diameter, 80 feet deep each, including cost of sinking, at £2,000 each	£8,000 0 0
One large receiving well, 30 feet diameter and 40 feet deep	2,000 0 0
Connecting syphon pipes from wells, with, locks, &c.	3,000 0 0
Three 75 h.p. engines, including boilers at £40	9,000 0 0
One 75 h.p. spare engine, do. do.	3,000 0 0
Engine and boiler house, chimney, &c.	6,000 0 0
600 tons wrought iron 30-inch main from engines to Paddington.....	21,000 0 0
160 tons wrought iron 20-inch main from Paddington to new reservoir at Woollahra	5,800 0 0
Paddington reservoir to be increased to double the capacity	5,000 0 0
New reservoir, Woollahra, to contain 5,000,000 gallons	9,500 0 0
Locks, stopback, valves, &c.....	3,000 0 0
12-inch main from Paddington reservoir to Crown-street reservoir	3,100 0 0
Purchase of land, say	1,000 0 0
Contingencies, 10 per cent.	6,800 0 0
	<hr/>
	£86,200 0 0
	<hr/>
Reticulation of mains through Paddington and Woollahra, &c., say 11 miles.....	16,800 0 0
	<hr/>
Total.....	£103,000 0 0

ESTIMATED REVENUE.

By a return just received, the number of rateable houses in Paddington is 939 (say rooms) 5,634 Do. Woollahra 755 (say rooms) 5,284	
	<hr/>
10,920	
say 11,000 rooms from high level service, at 5s.	2,750 0 0
Estimated number of rooms in Camperdown, Darlington, Waterloo, Alex- andria, &c., &c., 11,000 at 5s.	2,750 0 0
	<hr/>
Total.....	£5,500 0 0

The working expenses, however, would amount to about much the same, but the revenue would be increasing yearly with the same expenditure, as instance the present revenue derivable from the water rate.

Total receipts on account of the Water Fund for the year 1871	£33,357 0 0
Annual cost of pumping, including wages of Botany staff, coals, general repairs, stores, &c., and cost of reticulation through the city, with office expenses, &c.	12,000 0 0
	<hr/>
Total net Revenue, exclusive of Interest on Capital	£21,357 0 0

By the Water Act the Corporation are empowered still to raise additional capital to the amount of £46,500.

At present the average daily supply delivered to the Paddington or high level reservoir, 1,140,000 gallons; and if the Botany engines be relieved of this duty (which is equivalent to about 2,122,000 gallons delivered to the low level reservoir), we have this additional quantity which can be made available for the low-lying parts of the city and suburbs, as well as relieving altogether the Botany engines from the great strain of pumping to the high level; the advantages of which I need not comment upon.

In other words, we should calculate at present, in extreme cases, on pumping to the high level reservoir weekly 10 million gallons, and to the low-level ditto 24½ millions. But if we pumped entirely to the low level, using the same power and for the same time, the quantity delivered would be 39½ million gallons, or 15 millions per week more than at present.

The advantages that would be derived by the execution of this scheme would be the supplying entirely the two high service reservoirs from the wells, sufficient for the present supply to the city, in addition to what would be required for Paddington and Woollahra; also, the further extension of the low service mains to Camperdown, Darlington, Waterloo, Alexandria, &c.; the great relief to the engines at Botany in not having to pump to the high level reservoir: and by laying a main (included in my estimate) from the Paddington to the Crown-street reservoir, we could, on an emergency, supply the latter from the wells, in case of any accident happening to the Botany engines, and *vice versa*, so that we would always have two sources of supply to depend on, instead of one, as at present.

Whilst reviewing the entire water scheme, I would wish to summarize the several alterations and additions that have been and are being carried out by me. Commencing with the watershed that supplies the tunnel, otherwise "Busby's Bore," we have been, during the last few months steadily constructing small dams across the several creeks and drains throughout the Lachlan Swamp, with the object of conserving the water as much as possible, by throwing it back into the sandhills and flats, and also with the view of restoring the swamp as nearly as possible to its original state. Some of these dams are of considerable size, and have answered my expectation in every respect. The one we are at present engaged on is about 4 chains in length and 20 feet in height, and will be furnished with a 9-inch outlet pipe, with lock, &c. This dam will be capable of retaining a great quantity of water, which it will back up for some half-mile in length.

Since the tunnel was cleared out and brought again into operation, it has been working most satisfactorily, the low portions of the city having been *entirely* supplied by it ever since: the quantity of water it has delivered being fully one million gallons daily by gravitation.

The next work is the Lachlan reservoir (in progress), which is estimated to contain 45 million gallons; the Dams Nos. 1 and 2, estimated to contain together 62 millions; and the enlargement of the engine-pond reservoir, which will add about 56 million gallons to its present capacity.

With all these additional means of storing and supplying the water, the extension of the mains and services throughout the city and suburbs is still keeping pace with it, and the great responsibility of augmenting our present supply still remains.

The Botany engines cannot do much more than they are now performing; and indeed it would be highly injudicious to increase their work; therefore it is most essential that an additional supply should be obtained, and the only one that could be *immediately carried out* is the plan that I have suggested, which can be at once proceeded with.

Any other scheme would take years and years to construct, at an immense cost—fully ten times greater than will be that of the one I propose—and must necessarily supply (as I have endeavoured to show in the course of this Report) water of a much less wholesome description than that which can be procured from the "sand basin" of our present watershed.

I have, &c.,
FRANCIS BELL,
City Engineer.

SEWERAGE AND WATER SUPPLY.

(LANDS GRANTED TO THE MUNICIPAL COUNCIL OF THE CITY OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 24 April, 1873.

RETURN to an *Order*, made by the Honorable the Legislative Assembly of New South Wales, dated 21 December, 1871, That there be added to the Return ordered by this House on the 18th April last, referring to Sewerage and Water Supply,—

“ A Statement showing the situation and approximate area and value, on
 “ the 1st January last, of all landed property, either within or without the
 “ City, which has been granted or otherwise handed over by the Govern-
 “ ment to the Municipal Council of Sydney ; also, the terms on which, and
 “ the purposes for which, such lands are held by the Corporation.”

(Mr. Farnell, on behalf of Mr. Tunks.)

NEW SOUTH WALES.

SYDNEY SEWERAGE ACT AMENDMENT BILL.
(PETITION AGAINST PASSING OF—H. C. BURNELL, CHAIRMAN OF MEETING OF RATEPAYERS OF
THE CITY OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 18 March, 1873.

The Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the ratepayers of the City of Sydney,—

HUMBLY SHOWETH:—

That your Petitioners are made aware, by means of the public press, that a Bill is now before your Honorable House to amend the present Sewerage Act.

Your Petitioners would therefore respectfully beg to state that it is highly undesirable and unnecessary to amend this Act, for the following reasons:—

Firstly. There is a general scheme of water supply and sewerage before the Government at the present time.

Secondly. The sewerage as hitherto carried on by the Municipal Council is inefficient, as witness the effect of the late rains.

Thirdly. The present rates if properly expended are sufficient for all Municipal purposes.

Your Petitioners therefore pray your Honorable House not to pass the Bill.

And your Petitioners, as in duty bound, will ever pray.

Signed by order of the Meeting, on their behalf,

H. C. BURNELL,
Chairman.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867.

(PETITION PRAYING FOR AMENDMENT OF—MAYOR AND ALDERMEN OF THE MUNICIPALITY OF LIVERPOOL.)

Ordered by the Legislative Assembly to be printed, 26 March, 1873.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the Mayor and Aldermen of the Liverpool Municipality,—

HUMBLY SHOWETH:—

That your Petitioners, understanding that a Bill is before your Honorable House for the purpose of amending the Municipal Act of 1867, as to the mode of appointing the Mayor, pray your Honorable House may be pleased to further consider the advisability of amending the said Act generally; as the decisions of Judges, and the copious notes appended by Mr. St. Julian, show that the said Act is defective in many respects.

Your Petitioners pray your Honorable House may be pleased to take the said premises into consideration, and will, in duty bound, ever pray, &c.

[*Here follow 8 Signatures.*]

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MARKETS AMENDMENT BILL.

(PETITION AGAINST—GREENGROCERS, DEALERS, AND CITIZENS OF THE CITY OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 23 April, 1873.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Greengrocers, Dealers, and Citizens of the City of Sydney,—

RESPECTFULLY SHOWETH:—

That a large number of your Petitioners are retail dealers in vegetables, garden produce, and other edibles.

That your Petitioners, in the above paragraph mentioned, obtain a subsistence for themselves and their families, by (in some cases) keeping shops for the sale of vegetables and fruit, and by carrying the above-mentioned goods in carts and other vehicles about the streets of the city, for sale to the customers of your Petitioners; and that by this means, the commodities above mentioned are brought to the doors of the citizens of Sydney, who in many instances reside at great distances from the markets, or from greengrocers' shops, and who would otherwise be unable, except with great trouble and loss of time, and at greater cost and expense, to obtain the goods above mentioned.

That your Petitioners have observed that "A Bill to extend the powers of the Municipal Council of Sydney with respect to the Sydney Markets" has been introduced into, and read a first time in your Honorable House.

That the object proposed by the second clause of the said Bill is apparently to enable the Corporation of the City of Sydney to prohibit the sale of any of the articles in the said Bill mentioned, in any of the streets of the City of Sydney, unless upon payment of such fees as the said Corporation of the City of Sydney may appoint; and that the said Corporation may make By-laws, whereby any person who shall sell any of the said articles without license shall be liable to pay a penalty, the amount whereof is left entirely at the discretion of the said Corporation.

That the third clause of the said Bill (in twenty-fifth and following lines thereof) provides that, until such By-laws as aforesaid may be made, the By-laws made and passed by the Municipal Council of Sydney, on the ninth day of September, in the year of our Lord one thousand eight hundred and seventy-two, for regulating the Markets of the City of Sydney, shall be in full force and effect.

That on or about the twenty-first day of March last, James Hunt, one of your Petitioners, was convicted at the Water Police Court, Sydney, and fined twenty shillings with costs, and in default of payment thereof, levy and distress was ordered to be made of his goods and effects, and in default of there being sufficient goods he was ordered to be imprisoned seven days, for selling potatoes from a cart in Woolloomooloo-street, not being in the markets or open spaces adjoining, or the house, shop, or premises of the said James Hunt, without having paid the dues thereon, contrary to the By-law in that case made and provided.

That the By-law lastly above referred to is the fifty-second of the said By-laws of the ninth day of September, one thousand eight hundred and seventy-two, whereby no person was allowed to sell vegetables from a cart, except upon payment of four shillings per week, or ten pounds eight shillings per annum, to the said Corporation.

That the said James Hunt applied to the Supreme Court of New South Wales for a writ of prohibition, restraining the Magistrate who decided the said case, the complainant (who was the Clerk of the Markets), and the Municipal Corporation of the City of Sydney, from further proceeding in respect to the said conviction; and on the twenty-ninth day of the said month of March the said conviction was set aside, and a prohibition unanimously granted by the sitting Judges of the said Supreme Court: the said Judges deciding that the said fifty-second of the said By-laws was *ultra vires* and illegal, and that the said Municipal Corporation had no power or authority to pass or make any By-laws restraining the sale of goods outside the Markets.

That by the said Bill now before your Honorable House, it is proposed to make the said By-law valid, which the said Supreme Court has declared to be invalid.

That all the garden and other produce sold by your Petitioners as aforesaid are purchased in the Sydney Markets, from the wholesale dealers and growers, who, before they are allowed to sell the same, have to pay certain dues and fees to the said Corporation; and your Petitioners respectfully submit that the object of the said Bill, and of the said By-laws, is to make the same articles liable to two duties, namely—one to be paid by the growers and wholesale dealers, and the other by those of your Petitioners who are retail dealers.

That your Petitioners respectfully submit that, inasmuch as grocers, bakers, wood and coal merchants, and many others, are not in any way restricted in the sale and delivery of their goods, so the retail dealers aforesaid should not, under the above circumstances, be restricted in the sale by them of what are necessary articles of consumption, and that the free sale by them of such articles, which are brought to the doors of their customers in all weathers, would be a great public benefit.

Your Petitioners therefore humbly pray that, inasmuch as the effect of the said Bill passing into law would be to enable the said Municipal Corporation of Sydney to tax a particular class only, that (except the first clause of the said Bill) your Honorable House will not pass the said Bill or enact the same, and that your Honorable House will grant to your Petitioners such relief as to your Honorable House may seem meet.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 351 Signatures.]

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF KIAMA—BY-LAWS FOR FREE LIBRARY.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 22nd August, 1872.**BOROUGH OF KIAMA.—BY-LAWS FOR FREE LIBRARY.**

THE following By-laws made by the Council of the Borough of Kiama, for regulating the Free Library established by that body, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF KIAMA.**BY-LAWS FOR REGULATING THE KIAMA FREE CIRCULATING LIBRARY.**

1. The books received by the Kiama Municipal Council from the Kiama School of Arts, shall constitute a circulating library, to be called "The Kiama Free Circulating Library," which shall be under the control and management of the Municipal Council.
2. The Council shall appoint a Librarian, who shall make out and keep a catalogue of all books in the Library.
3. It shall be the duty of the Librarian to be in attendance at the Library between the hours of 12 noon and 2 P.M. on every day on which municipal business may be legally transacted, to issue and receive books.
4. The Librarian shall keep a book in which he shall enter the name and number of every book issued, the name of the person taking the book, the date on which it was issued, and also the date on which the book was returned to the Library.
5. The persons who shall be at liberty to use the Library shall be every householder residing within the limits of the Borough of Kiama.
6. Not more than one volume shall be issued to any person at one time, nor shall any person be allowed to take a book from the Library until he shall have returned any book or books he or she may have previously taken out: Provided that in cases where six members of a household are known to be able to read, it shall be competent for the Librarian to issue three volumes (if applied for) to the members of such household.

7. The period for which any book may be kept shall be one month, under a penalty or fine of three-pence per week for every week that such book may be kept beyond that time.

8. Any book or books lost or damaged by any person shall be replaced at his or her expense within one month, and in default the person or persons so offending may be sued for the value of such book or books by the officer in charge of the Library.

9. Any person in a state of intoxication applying for a book shall not be entitled to receive one.

10. Any person behaving in a disorderly manner while in the Library or on the premises, or damaging any property in such Library, shall for every such offence be liable to a fine of not less than five shillings, and shall replace the damaged property.

11. All fines and penalties incurred under these By-laws may be recovered in a summary way before any two Justices in Petty Sessions, and such fines so recovered shall be paid over to the Treasurer of the Municipal Council, together with costs, within seven days, and may be applied to defray the working expenses of the Library. And in default of such payment being made, the amount may be recovered by levy and distress on the goods and chattels of the persons so defaulting.

Made and passed by the Kiama Municipal Council, this
9th July, 1872.

JOSEPH PIKE, Mayor.

JAMES SOMERVILLE, Council Clerk.

MUNICIPALITIES.

(BOROUGH OF KIAMA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 20th August, 1872.

BOROUGH OF KIAMA.—BY-LAWS.

THE following By-laws, made by the Council of the Borough of Kiama, for the preservation of public health, the removal of offensive and unwholesome matter, the care and management of the public thoroughfares within the Municipality, for the general good government of the same, for the care and management of the public streets in the Town of Kiama and the Village of Jamberoo, and also the wharfs, jetties, piers, public thoroughfares, and cemeteries in the Borough, for regulating the slaughtering of cattle, for preventing cattle, &c., from straying on the roads and streets of the Borough, and for regulating the signing of cheques and levying for rates by warrant of distress, having been confirmed by His Excellency the Governor with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF KIAMA.

BY-LAWS.

BY-LAWS for the preservation of public health, the removal of offensive and unwholesome matter, and the care and management of the public thoroughfares within the Borough of Kiama, and for the general good government of the same.

1. If any person shall throw, deposit, place, or leave, or permit or suffer to run or flow any night-soil, offal, putrid meat, or fish, or entrails of fish, carrion, dead animals, blood, dung, manure, oyster-shells, bones, broken glass, earthenware or china, cut or broken pieces of tin, zinc, hoop-iron, or sheet-iron, dust, ashes, refuse of fruit or vegetables, or other offensive or dangerous matter or thing, or earth thrown out from excavations, into or upon any public thoroughfare, court, market, wharf, highway, or reserve within the said Borough, or into any drain, channel, sink, creek, or watercourse,—or shall allow any such, or any deleterious matter or thing, whereby the health and safety of the inhabitants might be endangered, to accumulate or remain upon any private premises, land, or property within the said Borough,—every person so offending shall for such offence forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay a fine or sum not exceeding five pounds nor less than forty shillings: Provided always that in cases of necessity the Council may grant licenses to applicants to use in certain places such matters otherwise offensive as may be required for building, manufacturing, or other purposes, for a limited time or from time to time, as the Council may deem for the public good.

2. If any person shall permit or suffer to be at large, in any public thoroughfare, street, market, wharf, highway, or reserve within the said Borough, any ferocious dog or bitch not being muzzled,—or if any person shall, after public notice given by the Mayor or his deputy, directing dogs to be confined on suspicion of canine madness, permit or suffer any dog or bitch to go at large,—or if any dog or bitch otherwise quiet shall at any time run after and annoy any person on foot or on horseback, or riding in any vehicle, so as to cause alarm and danger,—then the owner of such dog or bitch shall for such offence forfeit and pay the fine or sum of five shillings, and for a second offence shall forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings.

3. If any person shall ride or drive any horse, mare, or other animal, or leave or suffer to remain any horse or other animal, or wheelbarrow, dray, cart, waggon, gig, truck, or any other carriage or vehicle, drawn by horse, mule, bullock, or other animal, on or along any footway in the public thoroughfares of the said Borough, every person so offending shall for such offence forfeit and pay the fine or sum of five shillings, and for every subsequent offence shall forfeit and pay the fine or sum of ten shillings.

4. If any person shall leave, or suffer to remain, any wheelbarrow, dray, cart, gig, truck, or other carriage or vehicle, drawn by horse, mule, bullock, or other animal, in any thoroughfare, court, market, or highway, in any town or village within the said Borough, for any longer time than may be necessary for transacting business,—or if any such carriage or vehicle as aforesaid, with draught animal or animals attached, shall be left standing without being in charge of a person competent to control and manage the same,—the owner or user thereof shall forfeit and pay the fine or sum of five shillings for the first offence, and the fine or sum of ten shillings for the second offence, and the fine or sum of twenty shillings for the third and every subsequent offence.

5. If any person shall draw any timber, stone, or other heavy material on or along any road, street, or highway maintained at the cost, or being under the control and management of the Municipal Council, without the said articles being placed upon or suspended from a wheeled carriage proper for the purpose,—or shall lock or cause to be locked the wheel or wheels of any timber-carriage, dray, or other vehicle,—every person so offending shall for such offence forfeit and pay the fine or sum of ten shillings, and for the second offence shall forfeit and pay the fine or sum of twenty shillings, and for every subsequent offence shall forfeit and pay the fine or sum of five pounds.

6. If any person shall in any street, public thoroughfare, court, market, wharf, highway, or reserve within the said Borough, sell, or show, or offer or expose for sale or hire, any horse, mare, foal, gelding, or filly, bull, cow, heifer, mule, sheep, goat, swine, or other animal,—or place any caravan containing any animal for show, or any other show,—or shall otherwise exhibit any public show except in such places as shall be allowed for such purposes by the Mayor or his deputy,—every person so offending shall for such offence forfeit and pay the fine or sum of five shillings, and for a second offence shall

forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings.

7. If any person shall cut or fall, or remove or destroy any standing timber or brush, in or upon any street, thoroughfare, court, market, highway, or reserve, within the said Borough, without the permission of the Mayor or his deputy, every person so offending shall for such offence forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings.

8. If any person riding or driving any horse, or driving any horse, mule, or other animal harnessed to any dray, cart, waggon, gig, truck, or other carriage or vehicle, shall, within the said Borough, ride or drive the same furiously, or so as to create alarm and danger to the public, or to endanger the safety of any person on any public thoroughfare in the said Borough, every person so offending shall for such offence forfeit and pay the fine or sum of ten shillings, and for a second offence shall forfeit and pay the fine or sum of twenty shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings.

9. If any person or persons shall fence across, or fence in, or in any way obstruct any public street, or road, thoroughfare, or highway within the said Borough, such person or persons so offending shall upon conviction forfeit and pay a fine or sum of not less than two pounds nor more than five pounds for every such offence.

BY-LAWS for the care and management of the public streets in the Town of Kiama and the Village of Jamberoo, and also the wharfs, jetties, piers, public thoroughfares and cemeteries in the Borough of Kiama.

1. Any person trespassing by erecting a fence on any public street, thoroughfare, or lane, in either the town or village aforesaid, shall for every such offence forfeit and pay a sum not less than forty shillings nor exceeding ten pounds. And any person having any fence or other obstruction erected or placed on any street, road, or by-way in any part of the said Borough, shall be compelled to remove the same within three months after notice to that effect has been duly served on the parties so offending, who will be subject to the fine or penalty of five pounds for every week that such fence or obstruction may remain after the expiration of the time stated in such notice.

2. Any person encroaching upon any public street, thoroughfare or lane, in either the said town or village, by erecting or causing to be erected any house or other building in whole or any part thereof, shall for every such offence forfeit and pay a sum not less than ten pounds nor exceeding twenty pounds; and in the event of such obstruction being permitted to remain one month after such conviction and notice to remove the same, a further fine or penalty of one pound each day shall be inflicted whilst such obstruction remains, agreeably with the provisions of 2nd Victoria, No. 2, section 43; and such obstruction or obstructions may be removed by the Mayor or his deputy, at the cost of the party or parties so offending.

3. Any person trespassing upon any cemetery or public burying ground within the said Borough, by falling or removing timber, or depasturing cattle, horses, sheep, or swine therein, or by destroying or removing any gate or fence belonging to said cemetery or public burying ground, shall for every such offence forfeit and pay a sum not less than forty shillings nor exceeding ten pounds.

4. No dray, cart, or other vehicle drawn by draught animal or animals shall be allowed to remain on the wharf longer than the time actually occupied in loading or unloading; and no such vehicle shall at any time be left upon the wharf or entrance thereto, unless in charge of a person competent to manage the same. The Municipal Council to have power to regulate the mode of entering and leaving the wharf, and of conducting the business thereon.

5. No goods, merchandise, produce, or live stock, shall be allowed on the wharf for any longer time than may be necessary to ship, store, or cart away the same, and shall only be deposited

for such immediate intention upon such part of the wharf as shall be indicated by the Agent concerned as being the place appointed by the Mayor or his deputy.

6. No shells, lime, timber, stones, bricks, iron, or other building or bulky material, shall be allowed to remain on the wharf for more than two clear days after being landed.

7. No buoys, chains, anchors, ropes, or boats, shall be allowed to remain on the wharf, except such as may be in immediate use.

8. All empty cases, kegs, casks, boxes, fowl-coops, and crates, shall be kept in such places as may be set aside for their reception.

9. Any person or persons offending against these By-laws, or against any one or against any part of any one thereof, to which no penalty has been attached, shall for the first offence forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings; and it shall be lawful for any person indicting under these By-laws to proceed, primarily, against the servant or agent in charge of the property on account of which the offence is committed; or, secondarily, against the owner or proprietor, or the Chairman or Director of the Company in whom or which the property may be vested.

10. All fines or penalties imposed by authority of any of the By-laws passed by the Council of the said Borough shall be paid over to the Treasurer, and shall be appropriated as said Council shall direct.

11. Where a fine or penalty has been imposed under any of these By-laws, without any express provision for the payment of costs, the convicting Justices shall, in all such cases, together with the fine or penalty, adjudge and order the payment of costs of suit.

BY-LAWS to regulate the slaughtering of cattle—to prevent cattle and other animals from straying on the roads and streets of the Borough—to regulate the signing of cheques and levying for rates by warrant of distress.

1. No slaughterhouse, or place for slaughtering cattle, sheep, and swine, shall be allowed within one hundred yards of any public road or street in the Borough of Kiama; and any person or persons using any premises as a place for slaughtering cattle, sheep, or swine, being situated within the distance of one hundred yards of any public road or street within the Borough, shall upon conviction forfeit and pay for each and every such offence a fine or sum not exceeding five pounds nor less than ten shillings, with costs of suit.

2. Any person who shall suffer any kind of cattle, horse, mule, swine, sheep, or goats, belonging to him or her, or under his or her charge, to depasture, stray, go about, or to be tethered in or on any street, road, or public place within the said Borough, shall forfeit and pay in respect of every such offence any sum not exceeding two pounds nor less than five shillings.

3. All payments ordered to be made by the Council shall be by cheques, and such cheques shall be signed by the Mayor or Chairman *pro tem.*, and countersigned by the Town Clerk, and by one Alderman nominated by the Council for that purpose.

4. It shall be the duty of the Mayor of the Borough, upon proof having been given to him of the due service of notice upon each and every defaulting person, or ratepayer in default of payment of rates, to issue distress warrants against all such defaulters within one month after such default shall have occurred, and shall have been reported to him, and to cause such warrants to be enforced by distress and sale of the goods and chattels of such defaulters, for recovery of the rates due, with costs.

Made and passed by the Municipal Council of Kiama, this twenty-fifth day of June, in the year of our Lord one thousand eight hundred and seventy-two.

(L.S.) JOSEPH PIKE, Mayor.

By order of the Council,

JAMES SOMERVILLE, Council Clerk.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF FIVE DOCK.—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 27th August, 1872.

THE following By-laws, made by the Council of the Municipal District of Five Dock, for regulating their own proceedings, and the duties of the officers and servants of the Council—for the collection and enforcement of rates—in relation to roads and streets and encroachments thereon, and to offences and nuisances—and for the general good rule and government of the Municipality—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

By-LAWS of the Municipality of Five Dock, passed by Council,
25th March, 1872.

REGULATION OF PROCEEDINGS.

Days of ordinary meeting.

1. The Council shall meet on the second Monday in every month, at eight o'clock in the evening, or at such other day and hour as may, by resolution of the Council, be from time to time appointed.

Course of procedure.

2. The following shall be the course of procedure at such meetings:—

- 1st. The reading and confirmation of the minutes of the proceedings of previous meetings.
- 2nd. Statement of accounts showing the moneys received and paid since last meeting, with the balance in the Bank.
- 3rd. The presentation of reports and petitions.
- 4th. The reading of correspondence.
- 5th. Motions.
- 6th. Such other business as may lawfully be brought before the Council.

Petitions.

3. All petitions shall be received as the petitions of the persons signing the same only; and it shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

Petitions and correspondence may be dealt with without previous notice.

4. The Council may at any meeting resolve, without previous notice, that any petition be received, and that the same or any correspondence read be referred to a Committee.

Mayor to preserve order.

5. The Mayor shall preserve order, and may at any time call to order any Alderman who may appear to him to be out of order.

Calls to order.

6. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

Mayor's decision on points of order final.

7. Every point of order shall be taken into consideration immediately on its arising, and the decision of the Mayor thereon shall be conclusive.

Mayor may take part in proceedings.

8. The Mayor may take part in all the proceedings of the Council.

Questions put by Mayor.

9. The Mayor shall put all questions, first in the affirmative and then in the negative, and may do so as often as may be necessary to enable him to determine the sense of the Council thereon, and thereupon he shall declare his decision, which shall be final.

Mayor to decide as to pre-audience of Aldermen.

10. If two or more Aldermen rise to speak at the same time, the Mayor shall decide which of them shall be entitled to pre-audience.

No Alderman to speak twice on same question or amendment, except in Committee.

11. No Alderman shall speak twice on the same question, unless in Committee, or in explanation when he shall have been misrepresented or misunderstood: Provided that any Alderman, although having previously spoken, may speak once on every amendment, and that the mover of every question shall always have the right of final reply.

No Alderman to make personal reflections.

12. No Alderman shall digress from the matter under discussion, or make personal reflections on, or impute motives to, any other Alderman.

No Alderman to speak for more than fifteen minutes.

13. No Alderman shall speak upon any motion or amendment for a longer period than fifteen minutes, without the consent of the Council.

Aldermen using offensive expressions to apologize.

14. When any Alderman shall make use of any language or expression offensive, or capable of being applied offensively to any other Alderman, the Alderman offending shall be required

by the Mayor, or if in Committee by the Chairman, to withdraw such language or expression, and to make an apology satisfactory to the Council.

Debate may be adjourned.

15. A debate may be adjourned to a later hour of the same day or to another day.

Alderman adjourning debate entitled to precedence on resumption.

16. The Alderman upon whose motion any debate shall be adjourned shall be entitled to precedence on resumption of the debate.

Any Alderman may divide the Council, &c.

17. It shall be competent for any Alderman to divide the Council on any question, both in full Council and in Committee of the Whole Council, and upon such division those who are upon the affirmative side shall seat or range themselves on the right hand of the Mayor, and those who are on the negative side shall seat or range themselves on his left hand, and no Alderman shall leave his seat or place till the names of the Aldermen and how voting shall have been taken down by the Council Clerk or person officiating for him; and in all divisions every Alderman present shall be compelled to vote.

Divisions to be entered on minutes.

18. All divisions of the Council shall be entered on the minutes of the proceedings.

Questions to be read when required.

19. Any Alderman may require the question or matter under discussion to be read for his information, and upon such request the question or matter aforesaid shall be read.

How amendments to be put.

20. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment shall have been moved and seconded, the question shall first be put on the last amendment, and then on the next preceding the last, and so on in inverse order to that in which they shall have been moved, unless when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, then the next lowest, and so on to the highest.

Motions must be seconded.

21. No notice shall be taken by the Mayor of any motion unless it be seconded.

Motions to be in writing and not withdrawn without leave.

22. The Council Clerk shall put every motion into writing, which shall be signed by the mover; and every motion when seconded and read by the Clerk shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

Council Clerk to give notice of Committee meetings.

23. The Council Clerk shall give notice of the intended meetings of any Committee to the members thereof, whenever requested so to do by the Chairman of such Committee.

Motions and amendments.

24. If the proposer of any motion be absent when the same is called on in order, and has not deputed any member to take charge of it for him, such motion shall be struck off the business paper.

Rules observed in Committee of the Whole, &c.

25. The rules of the Council shall be observed in a Committee of the Whole Council, except the rule limiting the number of times of speaking.

Report of Committee to be signed by Chairman.

26. Every report of a Committee shall be signed by the Chairman thereof.

PROCEEDINGS.

By-laws may be suspended on emergency.

27. Any of these by-laws relating to or affecting proceedings at meetings of the Council may be suspended *pro tem.* in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

Treasurer's accounts to be laid before Council.

28. The Treasurer's accounts shall be laid before the Council once in each month, or oftener if required by the Council.

PROTECTION OF FUNDS AND RECORDS.

Officer of Council may not be surety.

29. In cases where security is required by the Municipalities Act, it shall not be competent for the Council to accept as surety any of its members, nor any person holding office under the Council.

Expense of proposed works to be first ascertained.—Accounts to be examined by Finance Committee.

30. No work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been previously ascertained by the Council; and all accounts to be paid by the Council shall be examined by a Finance Committee and reported on by them before any warrant shall be issued for the payment thereof.

Records, &c., to be kept private.

31. Excepting as otherwise provided by law, if any person, being a member or officer of the said Council, shall, without permission of the Council first had and obtained, show, lay open, or expose any of the books, papers, or records, he shall on conviction thereof forfeit and pay a penalty of not less than five shillings nor more than forty shillings, and on every subsequent conviction a penalty of not less than twenty shillings.

Custody of records, seal, &c.

32. The common seal and all charters, deeds, muniments, papers, and records of the Council shall be kept in the Council Chambers or office of the Council, in the custody of the Council Clerk, unless the Council shall otherwise order for any purpose. And the common seal shall not be used, except at a meeting of the Council and with the signatures of the Mayor and Council Clerk.

Records, &c., not to be defaced or altered.

33. Any person, being a member or officer of the said Council, who shall deface, alter, or destroy, or attempt to deface, alter, or destroy, any such common seal, charter, deed, muniment, paper, or record, shall on conviction thereof forfeit and pay for the first offence a penalty not exceeding twenty pounds nor less than five pounds, and upon every subsequent conviction a penalty of not less than ten pounds.

Nor removed.

34. Any person, being a member or officer of the said Council, who removes or attempts to remove any such seal, charter, deed, muniment, paper, or record from the Council Chamber, without leave from the Council first had and obtained, shall on conviction thereof forfeit and pay a penalty of not more than twenty pounds nor less than two pounds, and for every subsequent offence a penalty of not less than two pounds.

LEVYING RATES, &c.

Due dates for rates.—Defaulters.

35. The rates and taxes levied by the Council shall be held to be due and payable on such day or days as the Council shall by resolution from time to time appoint. Every person not paying his or her rates and taxes at the office of the Council or to the Council Clerk or other proper officer of the Council, within thirty days after any of the days so appointed for payment thereof, shall be deemed a defaulter: Provided that due notice of such rate shall have been given in manner as required by the Municipalities Act of 1867.

Council Clerk to furnish List of Defaulters.

36. It shall be the duty of the Council Clerk to furnish the Mayor and Council, or any Committee, as directed, with lists of all persons so in default.

Mayor to issue distress warrants.

37. It shall be the duty of the Mayor to issue and direct the enforcement of distress warrants against the goods, chattels, and effects of all such defaulters, as by resolution of Council from time to time directed.

How distresses to be made.

38. All levies and distresses shall be made under warrant, signed by the Mayor; and all proceedings under or in respect of such distresses and warrants, and the sale of goods levied upon by virtue thereof, shall be the same as in distresses for rent under a lease or demise.

Roads and streets, and encroachments thereon, &c.—Who to mark out roads, &c.

39. The Surveyor of the Municipality, or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for marking out when and where necessary the roads, streets, lanes, and thoroughfares which now are or shall hereafter be under or subject to the care, construction, or management of the Council. In marking out such roads, streets, lanes, or thoroughfares, recourse shall be had when practicable to the plans under which the land with frontage to the road, street, lane, or thoroughfare in question shall have been sold. The Surveyor shall also be the proper officer for marking out, when deemed necessary by the Council, the carriage and footways in such roads, streets, lanes, or thoroughfares, or other public places; but it shall be sufficient for him for this purpose to place posts at the corners or intersections of the streets, roads, lanes, or thoroughfares, or

wherever the same may be necessary or desirable, so as to give a width of forty-two feet for the carriageway and twelve feet for the footway on each side when the road, street, lane, or thoroughfare shall be sixty feet wide, and in proportion, and in the discretion of the said officer, in any public roads, streets, lanes, or thoroughfares, or other public places of other width than sixty feet.

No encroachment allowed on streets, &c.

40. Whenever any road, street, lane, or thoroughfare has been marked out in manner herein provided, no house, shop, fence, or other structure shall be allowed, except as hereinafter mentioned, to project or encroach on any part thereof; and in order that the due alignment of the roads, streets, lanes, or thoroughfares within the said Municipality shall be observed, and that no encroachment shall be made thereon, it shall not be lawful for any person, unless for any temporary or other purpose permitted by the Council, to erect or put up any building, erection, obstruction, fence, or enclosure, or make any excavation or hole, on, under, or near such road, street, lane, or thoroughfare, unless due notice of the same shall have been given to the Council of the Municipality at least three weeks before any such building, erection, obstruction, fence, or enclosure, excavation, or hole as aforesaid shall be commenced to be erected, or put up, or made, and the assent in writing of the Council first obtained. And in default of the same, the person so offending shall forfeit and pay for every such offence a sum of not exceeding five pounds nor less than two pounds, and on every successive conviction for a similar offence shall forfeit and pay a penalty of not less than three pounds.

Footways may be levelled.

41. When any footway shall have been marked out in manner hereinbefore directed, the Surveyor may cause the same to be levelled, and made as nearly as practicable of equal height and breadth and with an equal slope and inclination; and for this purpose may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway, or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for any of the said footways.

Encroachments must be removed on notice.

42. The Surveyor or other such officer or person may at any time, on the order of the Council, and upon due notice of thirty days, direct the removal of any building, fence, or other obstruction or encroachment in and upon any road, street, lane, or thoroughfare under the charge of the Council. Notice shall in this case be served either personally or at the usual or last known place of abode of the person to whom such obstruction or encroaching structure belongs, or who has erected the same or caused it to be erected.

43. In any case where, after service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing the same shall not remove it within a reasonable time, it shall be lawful for the Council to direct the removal of the same under the superintendence of its own proper officer, and at the cost of the person so offending, provided that the expenses thereby incurred shall in no case exceed the sum of ten pounds, or at the Council's option to proceed against the offender for breach of by-law, the penalty not to exceed twenty-five pounds nor be less than one pound; and in every case of successive offence the penalty on conviction not to be less than five pounds.

Or may proceed by action.

44. In every case where the obstruction or encroachment cannot be removed unless at a greater cost than ten pounds, it shall be open to the Council either to direct such removal and to pay all the costs thereof above ten pounds from the funds of the Council, or to proceed by action of trespass against the person causing such obstruction or encroachment, or to proceed as for breach of such by-laws as aforesaid.

To apply also to obstructions by digging, &c.

45. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation; and any person who shall wilfully obstruct or interfere with the Surveyor or other officer as aforesaid, or any person acting for or under him, or either of them, in the exercise of any of the duties or powers by these by-laws imposed or cast on the said Surveyor or officer, shall on conviction forfeit and pay a penalty of not less than two pounds nor more than twenty pounds.

Offences, nuisances.—General good order of Municipality, &c.

46. No person shall be at liberty to enter upon any road, street, or lane within the Municipality, for the purpose of opening any drain or sewer, or to remove any stone, sand, gravel, or turf, or to cut down trees thereon, without leave being first obtained from the Council or their proper officer; and any person who shall offend against this by-law shall pay a sum not exceeding five pounds.

47. Any person who shall ride any horse, or shall drive any horse or other animal harnessed to any carriage, cart, dray, gig, omnibus, or any vehicle, furiously on any road or street or lane

within the Municipality, so as to create alarm, or so as to endanger the safety of any person or any property in any public thoroughfare, shall for every such offence pay a penalty not exceeding five pounds.

As to damaging public buildings, &c.

48. Any person who shall damage any public building, wall, parapet, sluice, bridge, road, street, sewer, water-course, or other property of the Municipality, shall pay the cost of repairing the same, and if the same be wilfully done shall also forfeit and pay a sum not exceeding twenty pounds nor less than five pounds: Provided that such cost and penalty shall not exceed in the whole the sum of fifty pounds.

Throwing filth on carriage-ways, &c.

49. If any person shall, in any street, road, or lane, throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriageway or footway of any such street or road,—or shall kill, slaughter, dress, scald, or cut up any, beast, swine, calf, sheep, lamb, or other cattle, in or near to any of the said streets or roads as that any blood or filth shall run or flow upon or over or be upon such carriage or foot way,—or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the footways of any street or road, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow or truck, or any cask,—or shall wilfully lead, drive or ride any horse or other beast upon any of the footways, in, upon, or abutting, or within twenty feet of any such road, street, or lane,—shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Bathing prohibited within certain limits.

50. It shall not be lawful for any person to bathe within the said Municipality, in any waters exposed to view from any road, street, or dwelling-house, in or near to the said Municipality, between the hours of six in the morning and eight in the evening; and any person who shall offend against this by-law shall forfeit and pay a sum not exceeding twenty shillings; and it shall be lawful for any constable to arrest any person who shall be found bathing contrary to the provisions hereof, and such person to convey before any Justice of the Peace, to be dealt with according to law.

Nuisance from closets, &c.

51. Upon representation by any respectable householder that the closets, drains, ashpits, grounds, or hog-sties of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this by-law, to go upon such premises for the aforesaid purpose; and if any such premises shall be found a nuisance, or otherwise offensive, notice in writing shall be given to the proprietor or resident of such premises, that if within forty-eight hours after the service of such notice the nuisance shall not be removed, the proprietor, tenant, or occupant of the aforesaid premises shall, upon conviction before any two Justices of the Peace, be liable to any penalty not exceeding twenty pounds.

Houses of ill-fame.

52. Upon the representation of any respectable ratepayer that any house or premises within the Municipality and near to the residence of such ratepayer, is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of the names, ages, sexes, and occupations of all the inmates of the said house or premises; and upon non-compliance with such request, or if upon consideration the said Committee consider the house to be one of ill-fame, they shall with the sanction of the Council declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice; and if such nuisance be not so abated, the holder of such house or premises, or any person resident or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds: And if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum of not less than five pounds nor more than fifty pounds; and if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house or other person residing or being therein as aforesaid shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

Throwing rubbish in water-course, &c.

53. Any person who shall cast any filth or rubbish into any public water-course, sewer, or canal, or shall obstruct or divert from its channel any such sewer, canal, or water-course, shall forfeit a sum not exceeding five pounds nor less than one pound, and shall in addition to any such forfeiture pay the cost of removing such filth or obstruction or of restoring such water-course or canal to its proper channel: Provided that such cost and penalty shall not together exceed the sum of fifty pounds.

Excavations to be protected by fence or wall.

54. It shall not be lawful for any person to make any quarry, excavation, or opening in the ground, on any premises within six feet of any public road or footpath within the limits of the Municipality, until the owner or occupier of the said property shall have erected a good substantial fence or wall at least four feet high around such parts of the said property as adjoin such public road or footpath; and any person neglecting or refusing to enclose any premises upon which any such quarry or excavation shall be made, shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than ten shillings; and all existing quarries or excavations situated within the limits of this Municipality shall be enclosed and protected in the manner aforesaid within one month after due notice to that effect shall have been given by the Municipal Council; and in the event of the failure or neglect of the owner or occupier of any such last-mentioned premises to enclose the same after notice as aforesaid, such person so offending shall be subject to the penalty aforesaid.

Works and Contracts for same.

55. Tenders shall be called for all works undertaken by the Council upon such terms and subject to such conditions as to the Council may seem expedient; and no tender shall be entertained unless it be accompanied by an agreement signed by two or more responsible parties agreeing to become sureties for the due fulfilment of the contract if tender be accepted: Provided that this law shall not apply to any labourers employed by authority of the Council. Contractors shall with sufficient sureties give bonds to the Council for the due performance of their contracts in such sum as the Council shall fix.

56. The Mayor and any two Aldermen, or in the absence of the Mayor from the Municipality any three Aldermen, may in writing order any sum not exceeding ten pounds to be expended in repairing any public work under the control of the Council which may be suddenly damaged, provided that it shall appear to them that such repair cannot be delayed until the next sitting day of the Council; and they may appoint a proper person to execute such repairs: Provided always that the making of such order shall be reported at the next meeting of the Council; and provided also that not more than one such order shall be made between the termination of one meeting and the commencement of another.

Finally adopted by Council, this 8th April, 1872.

TIM. MAHER,

Mayor.

GEO. A. HEWETT,

Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF MUDGEES—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 23rd September, 1872.

BOROUGH OF MUDGEES.—BY-LAW.

THE following By-law, made by the Council of the Borough of Mudgee, altering the day for the Council's Meetings, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

THE Council shall meet for the dispatch of business at the Town Hall, at the hour of seven o'clock P.M. in the winter months, and eight o'clock in summer months, every alternate WEDNESDAY, unless such day shall happen to be a Public Holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

Made and passed by the Borough Council of Mudgee, on the 29th day of August, A.D. 1872,—

H. M. INNES, Town Clerk.
Town Hall, Mudgee.

GEO. D. LANE,
Mayor.

1872.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF INVERELL—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 16th October, 1872.

MUNICIPAL DISTRICT OF INVERELL.

BY-LAWS.

THE following By-laws made by the Council of the Municipal District of Inverell,—for regulating their own proceedings and the duties of the officers and servants of the Council—for the collection and enforcement of rates—for preventing and extinguishing fires—for licensing public vehicles—for licensing and regulating public exhibitions, &c.—relating to streets and public places—public health—decency, &c.—and to the good rule and government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

PART I.

PROCEEDINGS OF THE COUNCIL AND COMMITTEES, DUTIES OF OFFICERS, SERVANTS, &C.

Ordinary Meetings.

1. The Council shall meet for the transaction of business on every alternate Monday, at 4 o'clock p.m., unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor.

2. If at any meeting of the Council the Mayor be absent, at the expiration of fifteen minutes after the appointed time for holding such meeting, the Aldermen then present (being a quorum) shall proceed to elect from themselves a Chairman for such meeting.

Business of ordinary meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected if erroneous, and signed by the Mayor or other Chairman. No discussion to be permitted on such minutes except as to whether they are correct.
- (2.) Correspondence to be read and orders made thereon if expedient.
- (3.) Petitions (if any) to be read and dealt with.
- (4.) Reports from Committees and minutes from the Mayor (if any) to be presented and orders made thereon.
- (5.) Questions as to matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council or any of the Committees or officers to be made.

- (6.) Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
- (7.) Orders of the day to be disposed of as they stand on the business paper.

Business may be taken out of regular order.

Provided that the Council may, by resolution without notice, entertain any particular motion or deal with any particular matter of business out of its regular order on the business paper without any formal suspension of this section, and may in like manner direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

4. At special general meetings of the Council the business, after the minutes shall have been read and signed, which shall be done in the same manner as at ordinary meetings, shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting.

5. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Council Clerk, not less than one nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he may have received, or shall have been required or directed so to enter in due course of law and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this Part of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

Business paper for special meeting.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

How business paper to be disposed of.

7. The business paper for each meeting of the Council shall, at such meeting, be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with, and such business paper so noted shall be a record of the Council.

Notices, &c., to be the property of the Council.

8. After the business paper shall have been made up as aforesaid, all notices of motion, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions—how to be moved.

9. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

Absence of mover.

10. No motion, of which notice shall have been entered on the business paper shall be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-mentioned Alderman.

Motion to be seconded.

11. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

12. When a motion or amendment shall have been made or seconded, any Alderman shall be at liberty to move an amendment thereon; but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

13. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

14. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question—further amendment may be moved thereon.

15. If an amendment be carried, the question, as amended thereby, shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

16. If any amendment, either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions of adjournment.

17. No discussion shall be permitted on any motion for adjournment of the Council; and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Orders of the day.

18. The orders of the day shall consist of any matters other than motions on notice, which the Council shall, at a previous meeting thereof, have directed to be taken into consideration, or which the Mayor shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

19. The Alderman who has the usual charge of, or who has previously moved in reference to, the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that the Mayor, as to any order of the day entered by his direction, arrange with and call upon any Alderman to move the same.

Petitions to be respectfully worded.

20. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—how received.

21. All petitions shall be received only as the petitions of the parties signing the same.

How petitions to be dealt with.

22. No motion, other than for the reception of a petition, shall, unless as hereinafter provided, be permissible on the presentation thereof, except that the same be referred to a Committee, or that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to the subject of any petition, or if the consideration of the subject of any petition shall have been made an order of the day, and such petition shall have been presented before such motion or order of the day shall have been called on, such order of the day, or the said motion, if otherwise unobjectionable, shall be considered in order.

Correspondence.

23. The Mayor shall have the same duty, in reference to letters addressed to the Council, before directing the same to be read, as by section 20 of this Part of these By-laws is imposed upon Aldermen presenting petitions. If not read, to be returned to the writer and reported to the Council. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council or any of its officers shall be presented or read by any Alderman. If the Mayor be absent and shall not have examined any such letters or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Section 22 to apply to letters.

24. Section 22 of this Part of these By-laws shall be considered as fully applicable to letters addressed to the Council or any of its officers as to petitions.

Reports from Committees.

25. Every report from a Committee shall be in writing, and signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's minutes.

26. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing signed by him.

How reports, &c., are to be dealt with.

27. No motion shall, unless as hereinafter provided, be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided that if any Alderman shall have given due notice in reference to any such report or minute, or if the consideration of such report or minute shall have been entered among the orders of the day, such order of the day or such motion, if otherwise unobjectionable, may be moved and considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is desirable that such report or minute should be ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of the Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid as will enable the Council Clerk to make the necessary entry on the business paper and to give such due notice.

Questions and statements.

28. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this Part of these By-laws.

Notice to be given.

29. Sufficient notice of every question shall be given to the person who is expected to reply thereto to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

30. It shall not be compulsory upon the Mayor or upon any Alderman so questioned as aforesaid to answer the question so put to him.

Question to be put without argument.

31. Every such question must be put categorically, without any argument or statement of fact.

Similar provision as to statements.

32. Every such statement must be made without argument.

No discussion on question, &c.; right of objection and of subsequent motion reserved.

33. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply

or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice as hereinbefore provided, of any matters properly arising out of or relating to any such question or reply, or refusal to reply, or any such statement as aforesaid.

Mode of addressing the Council.

34. Every Alderman who shall make or second any motion, or shall take part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while so doing, stand up in his customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or Officer to be questioned, and may be replied to in like manner: but in every such case the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy; and all members of the Council shall, on all occasions when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted.

35. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as hereinafter provided.

Limitation as to number of speakers.

36. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman other than the mover of such original motion shall have a right to speak once upon such motion and on every amendment thereon.

No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and seconder.

37. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

38. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, nor impute improper motives to any other Alderman.

Adjournment of debate.

39. A debate may be adjourned to a later hour of the day or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

40. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Mayor to decide points of order.

41. The Mayor or Chairman shall preserve order, and his decision upon disputed points of order or practice shall be final.

Mayor may address the Council.

42. The Mayor shall have the same right as any other Alderman to speak upon every subject or amendment.

Mayor may call member to order.

43. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

Decision of points of order.

44. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting on the same.

Motions out of order to be rejected.

45. Whenever it shall have been decided, as aforesaid, that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected.

How questions to be put.

46. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon.

Divisions.—Penalty for refusing to vote.

47. Any Alderman may call for a division, and the vote shall be taken by a show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

Rules applicable to business in Committees.

48. Sections 12, 13, 14, 15, 16, 34, 35, 38, 40, 41, 42, 43, 44, 45, 46, and 47 of this Part of these By-laws shall be taken to apply to the business in Committee of the whole Council, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

How call of the Council to be made.

49. A call of the Council may be ordered by any resolution, of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Such call to be compulsory in certain cases.

50. No motion, the effect of which, if carried, would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper, unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

51. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered. The Council Clerk shall call the names of all the members in alphabetical order, and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have been previously granted, or if such an excuse in writing shall have been received by the Mayor or Council Clerk as the majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reason for the same.

Penalty for absence.

52. Any member of the Council who, having had notice of the call, shall be absent without having been legally excused as aforesaid, and who shall fail to show that by reason of illness or other sufficient cause he was unable to send an excuse in writing as aforesaid, or who, having answered to his name, shall not be present when a vote is taken on the motion or business as to which such call was made, shall, for every such offence, be liable to a penalty of not less than five shillings nor more than two pounds.

STANDING AND SELECT COMMITTEES.

Standing Committees.

53. Besides such Special Committees as may from time to time be found necessary, there shall be two Standing Committees of the Council, each consisting of not less than three members, namely, a Finance Committee and an Improvement Committee.

Finance Committee.

54. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the said Municipal District, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Improvement Committee.

55. The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Chairman of Committees.

56. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, who may direct the Council Clerk to call meetings whenever he shall think it desirable.

Cost of works to be estimated before undertaken.

57. No works affecting the funds of the Municipality except as hereinafter is mentioned shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Cases of emergency and current expenses.

58. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

1. By order of the Improvement Committee or of the Mayor and one member of such Committee, for repairs or emergent works to the extent of three pounds.
2. By order of the Mayor, for necessary current expenses, to the extent of two pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting; such report to be signed by the Chairman of the Improvement Committee or the Mayor, or the Mayor and a member of the Improvement Committee, as the case may be, by whom such outlay shall have been authorized; also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council, and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

Completion of work to be reported by the Improvement Committee.

59. No works undertaken by the Council, shall be deemed to have been completed, and no order shall be made for the payment in full of the same, except upon a report or certificate to that effect from the Improvement Committee.

Common Seal—how secured.

60. The Seal shall be secured by a cover or box, which shall be kept at the Council Chambers in the custody of the Council Clerk. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk.

When and how common seal to be used.

61. The seal of the Council shall not be affixed to any document without the express authority of the Council; and every impression thereof so authorized shall be verified by the signature of the Mayor, or, in case of the illness or absence of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account, &c., are to be kept.

62. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers, in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same; but the Mayor may, for any special purpose, authorize their removal.

Books, &c., not to be shown or exposed to view without leave.

63. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without a written permission of the Mayor, unless as otherwise provided by law. Any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than five shillings nor more than two pounds.

Records not to be removed.

64. Any person removing such book, paper, or record from the Council Chamber, without leave from the Mayor, in writing, first had and obtained, shall be subject to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book, paper, or record, and shall not have returned the same, to prosecution for stealing such book, paper, or record, or to an action at law for detention of the same, as the circumstances of the case may warrant.

Penalty for defacing or destroying records.

65. Any person destroying, defacing, or wilfully or improperly altering any books, papers, or record, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

Bonds for good conduct.

66. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited in such custody as the Council may order; and no member, officer, or servant of the Council shall be received as a surety for any officer or servant.

Duties of Council Clerk.

67. The Council Clerk shall perform all the duties which by the Municipalities Act of 1867, or by the present or any other By-laws hereunder, he may be required to perform. He shall be the Clerk of all Revision Courts held in the Municipal District under the provisions of the Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council, and shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Special powers of Mayor.

68. The Mayor may from time to time define the duties of all officers and servants of the Council, and shall exercise a general supervision over all such officers and servants, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information.

Drafts of intended By-laws.

69. A draft of any intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same.

Motions for rescissions of previous orders.

70. Whenever a motion, the effect of which, if carried, would be to rescind any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion.

Suits and prosecutions for penalties.

71. Suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute the operation of which may have been extended to the Municipality, shall be commenced or laid as follows, namely:—When against a member of the Council or any Auditor or any officer of the Corporation, by such officer as shall be named for that purpose by the Council; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by such officer or person as shall be appointed for that purpose by the Council or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council, or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of the Council or of the Mayor. And the conduct or prosecution of any suit or information may, on the order of the Council or of the Mayor, be entrusted to an attorney.

Power to suspend temporarily certain portions of these By-laws.

72. Any of the foregoing By-laws which relate to or affect the proceedings at meetings of the Council may be suspended *pro tempore*, without notice, in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

PART II.**COLLECTION AND ENFORCEMENT OF RATES.***Rates when due and payable.*

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

Time and place of payment.

2. All such rates shall be paid at the Council Chambers, during the hours appointed by the Council for that purpose, being the ordinary office hours of the Council.

Defaulters.

3. Every person not paying his or her rates as aforesaid within thirty days after any of the days so appointed for payment thereof shall be deemed a defaulter; and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distraint upon the goods and chattels of the defaulter.

Bailiff—how appointed.

5. The Bailiff of the Municipal District shall be appointed by the Council, and may at any time be removed by them.

Bailiff to find sureties.

6. The Bailiff shall find two sureties, to the satisfaction of the Mayor, to the extent of fifty pounds each, for the faithful performance of his duties.

Duties of Bailiff.

7. It shall be the duty of the Bailiff to make levies by distraint for the recovery of rates, in the manner hereinafter provided.

Warrant of distress.

8. All levies and distresses shall be made under warrant, under the hand of the Mayor, or of any Alderman who may for the time being be authorized to perform the duties of that office; such warrant to be in the form or to the effect of the Schedule hereunto annexed, and marked A.

Inventory.

9. At the time of making a distress the Bailiff shall make a written inventory in the form or to the effect of the Schedule marked B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distressed, or to some person resident in the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory shall be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall deliver a copy of such inventory to the Council Clerk.

Distress and sale, &c.

10. It shall be lawful for the Bailiff or his deputy, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof. And if the sum for which any such distress shall be made or taken, together with the costs of such distraint, shall not be paid on or before the expiration of five clear days, the Bailiff or his deputy may, between the hours of 11 in the morning and 2 in the afternoon on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Municipal District as the Bailiff may think proper to remove them to for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and the costs of such distraint, to the owner of the goods so sold on demand by such owner.

Goods may be impounded.

11. The Bailiff on making a distress as aforesaid may impound or otherwise secure the goods and chattels so distrained, of what nature or kind soever, in such part of the land or premises chargeable with the rate, or in such other place as shall be most fit and convenient for that purpose; and it shall be lawful for any person whomsoever, after the expiration of five clear days hereinafore mentioned, to come and go to and from such part of the said land and premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner to direct order of sale.

12. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods or chattels shall in such case be put up for sale according to such directions.

Proceeds of distress.

13. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within twenty-four hours after having received the same.

Deputy.

14. The Bailiff may, with the sanction in writing of the Mayor, or in his absence with the sanction of any two Aldermen of the Municipal District, authorize by writing under his hand any person to act temporarily as his deputy, and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every such case be held responsible for the acts of such deputy.

Costs.

15. There shall be payable to the Bailiff, for every levy and distress made under these By-laws, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Municipal District of Inverell, do hereby authorize you, _____, the Bailiff of the said Municipal District, or your deputy, to distrain the goods and chattels in the dwelling-house, or in or upon the land or premises of _____, situate at _____, for _____, being the amount of rates due to the said Municipality to the _____ day of _____, for the said dwelling-house, land, or premises (as the case may be), together with the costs of this distraint, and to proceed thereon for the recovery of the said rates and costs according to law.

Dated this _____ day of _____, 18 ____ . Mayor.

SCHEDULE B.

Inventory.

I have this day, by virtue of the warrant under the hand of the Mayor of the Municipal District of Inverell, dated _____, 18 ____, of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house, or in or upon the land or premises of _____, situate at _____, within the said Municipal District of Inverell, being the amount of rates due to the said Municipality to the _____ day of _____, and also the costs of this levy.

Dated this _____ day of _____, 18 ____ . Bailiff.

(List to be appended.)

SCHEDULE C.

Costs.

	s.	d.
For making every entry and inventory	2	6
For man in possession for a period longer than two hours	5	0
For man in possession every other day or part of a day	5	0
For sale and delivery of goods, one shilling in the pound on the gross proceeds of the sale, in addition to the costs of advertisements if any.		

PART III.

PREVENTING AND EXTINGUISHING FIRES.

Fire or combustible materials.

1. Every person who shall place or knowingly permit to be placed in any house, yard, workshop, out-offices, or other premises within the said Municipal District, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger any buildings, shall, on conviction for every such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials; and every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

Setting fire to matter without notice.

2. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air within five yards of any dwelling-house or other building, or boundary, or dividing fence within the said Municipal District, without having given notice in writing to the occupiers of the land adjoining to the land upon which such matter shall be, of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall for every such offence forfeit a sum not exceeding five pounds.

Erecting brushwood fences, &c.

3. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable materials, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall forfeit on conviction for every such offence a penalty of not more than five pounds, and shall remove such fence, stack, or covering within a reasonable time after such conviction. And any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wilfully setting fire to chimneys.

4. Every person who shall wilfully set or cause to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common "chimney," within the said Municipal District, shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

Negligently suffering chimneys to be on fire.

5. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimneys are situated shall forfeit a sum not exceeding forty shillings: Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case be heard that such fire was in nowise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servants.

Water-carts to be kept loaded at night.

6. Every owner and driver of a licensed water-cart shall keep such cart loaded with water during all times after sunset and before sunrise, and shall, if any building, premises, or property shall be on fire within the Municipality, attend at the place of such fire with such cart loaded with water, and shall continue to cart water by full loads to such place, and shall deliver such water in such manner as may be required by the Mayor or by any Alderman, or officer, or person duly authorized by the Council in that behalf, and then present, for extinguishing such fire; and every owner or driver who shall, without reasonable excuse, fail to comply with the provisions of this section shall forfeit a sum not exceeding ten pounds.

There shall be paid out of the funds of the said Municipal District to the owner of every licensed water-cart who shall have attended with any water at the place of any fire as herein provided, and delivered the same as required for extinguishing such fire, such reasonable compensation as the Council shall by resolution have appointed in that behalf; and also to such owners of such carts as shall have first and second in order attended with loads of water, such further sums, by way of reward, as the Council may by similar resolutions have fixed.

PART IV.

Licensing public vehicles.

All water-carters, carriers, and owners of vehicles plying or carrying passengers or goods for hire within the said Municipal District shall be licensed by the Council, and the owners shall have their names painted in legible letters with the word "licensed" on some conspicuous part of such vehicles respectively. The license fee shall be at the rate of ten shillings per wheel per annum, and be in force until the thirtieth day of June in each year; and every owner who shall omit or fail to comply with the provisions of this By-law shall forfeit a sum not exceeding forty shillings.

PART V.

PUBLIC EXHIBITORS.

Exhibitions, &c., to be licensed.

1. No exhibition other than such as may be licensed under the provisions of the Act 14th Victoria number 23, or exhibitions of a temporary character hereinafter specially provided for, shall be held or kept for hire or profit within the said Municipal District, nor shall any bowling-alley or other place of public amusement other than a place licensed as aforesaid or a place for temporary amusement hereinafter specially provided for, be used as such for hire or profit within the said Municipal District, unless and until the same shall be duly registered as hereinafter prescribed.

Temporary license by Mayor.—Penalty for exhibiting, &c., without license.

2. The Mayor may, by writing under his hand, permit any such exhibition as aforesaid, other than any exhibition requiring to be licensed under the said Act for not more than one week; and in like manner and for a like time may allow any place to be used for purposes of public amusement other than for entertainments requiring to be licensed as aforesaid; and every person holding or keeping any such exhibition or using any place within the said Municipal District for public amusement as aforesaid without such permission of the Mayor, shall forfeit and pay a sum not less than one pound nor more than five pounds for every day that such exhibition shall be so held or kept, or such place shall be so used for public amusement as aforesaid.

Buildings, &c., to be registered.

3. Every occupier of any building or ground in which any exhibition is held or kept, or any public amusement conducted as aforesaid, shall, in each year register at the office of the Council such building or ground, and a description of the exhibition or public amusement proposed to be held, kept, or conducted as aforesaid; and the name of such occupier and every person who causes, and every occupier of any building or land who permits any such exhibition or public amusement to be held, kept, or conducted for more than one week in or upon any such building or land not registered for the purpose, or without having obtained a certificate of registration as hereinafter mentioned, shall forfeit and pay for every offence a sum not less than one pound nor more than ten pounds.

Certificate of registration, &c.

4. The Council, upon the written application of any such occupier as aforesaid, stating the particulars aforesaid, may cause the aforesaid premises to be registered and grant to the applicant a certificate of such registration, unless upon inspection the building or land shall be found to be unsuitable for the purpose of the exhibition or amusement, or unless it shall appear to the Council that such exhibition or amusement is likely to entail any violation of public decency or to endanger the public peace, or be a nuisance to any inhabitant of the Municipal District.

Inspection.

5. Any officer or person appointed for that purpose by the Council may at all reasonable times enter into or upon and inspect any such registered building or land.

No exhibitions, &c., on Sundays, &c.

6. No such exhibition or place of public amusement as aforesaid shall be held or kept open or used for the purposes of such public amusements on Sunday, Christmas Day, or Good Friday; and every person offending against this By-law shall on conviction forfeit and pay a sum not exceeding five pounds nor less than one pound for every such offence.

Registration fee, &c.

7. For every registration as aforesaid the occupier of the building or land so registered shall pay to the Council Clerk, for the benefit of the Municipal District, a fee of one pound; and every such registration, whenever the same may be made, shall (subject to the power of suspension and cancellation herein contained) be in force until the thirty-first day of December thence next ensuing, and no longer.

Suspension or revocation of license.

8. The effect of any such registration as aforesaid may be suspended, or such registration may be cancelled, as the Council shall think fit, for any of the following causes, namely:—Whenever the occupier of the registered building or land, or the manager of any such exhibition or amusement as aforesaid, held, kept, conducted, or carried on in or upon such building or ground, shall have been twice convicted of offences against these By-laws within a period of twelve months; or whenever it shall be shown to the satisfaction of the Council that the superintendent, director, manager, or other person in charge of any such exhibition or amusement, is a confirmed drunkard, or that any such exhibition or amusement is being conducted in such a manner as to violate public decency, to endanger the public peace, or to become a nuisance to any inhabitants of the said Municipal District: Provided that before any such suspension or cancellation as aforesaid such occupier shall have notice that the Council is about to consider whether there shall be any such suspension or cancellation, and of the causes for this proceeding, and shall be allowed to show cause against the same.

Gaming, cruelty to animals, &c., prohibited.

9. No license shall be granted as aforesaid to or for any building or land wherein or whereon any games with dice, or other games of chance for money, or any bull-baiting, dog-fighting, cock-fighting, or other exhibitions or amusements opposed to public morality, or involving cruelty to animals, or likely to cause a breach of the peace, are proposed to be had, held, or carried on. And the occupier of any building or land so registered as aforesaid who shall permit any such game of chance, or exhibition or amusement, as are in the section before-mentioned, to be had, held, or carried on, in or upon such building or land, shall for every such offence forfeit and pay a sum of not less than ten shillings nor more than ten pounds.

Construction of term "occupier."—Change of occupancy.

10. Any person who shall superintend, direct, or manage, or shall be otherwise in charge of any such exhibition or public amusement as aforesaid in or upon any such building or land as aforesaid, or who shall reside in or upon any such building or land wherein or whereon any such exhibition or public amusement shall be held, kept, or carried on, or who, whether resident thereon or not, shall use any such building or land for the purposes of any such exhibition or public amusement, shall be deemed the occupier of such building or land for all the purposes of these By-laws; and the said By-laws shall be held to be as applicable in every case to any number of such occupiers as to any single occupier; and every such occupier whose name shall have been so registered as aforesaid shall be deemed and taken to be, and continue such occupier for all the purposes of these By-laws: Provided that in the event of any change in the occupancy of any such building or land as aforesaid, the parties concerned shall notify the same in writing to the Council Clerk; and if, after such inquiry as the Council may deem necessary, there shall appear no valid objection to such change of occupancy, an entry thereof shall be made in the registry, and a new certificate shall be issued (which, subject as aforesaid) shall be in force until the then next thirty-first of December, and no longer; and for every such certificate a fee of five shillings shall be paid to the Council Clerk, for the benefit of the Municipal District. And any person who shall make any false statement in any such notice or application as aforesaid, as to any of the facts or particulars required by these By-laws to be stated in such application or notice, shall, for every such offence, forfeit and pay a sum not less than one pound nor more than ten pounds.

PART VI.

STREETS AND PUBLIC PLACES, PUBLIC HEALTH, DECENCY, &c.

New roads to be reported upon.

1. No new public road, street, way, or other place proposed to be dedicated to the public, shall be taken under the charge or

management of the Council until after such road, street, way, or place shall have been examined by the Improvement Committee, or other Committee appointed for this purpose, and reported upon to the Council by such Committee.

Plan of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the Municipality shall open any road, street, or way, or lay out any place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management thereof, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, or other place as aforesaid.

Dedication of new roads.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record of the Council, and the proprietor or proprietors shall execute such further instrument dedicating such road, way, or place to public use or recreation as aforesaid as may be considered necessary by the Council, which said instrument shall be preserved as a record of the Council.

Who to mark out roads, &c.

4. The Surveyor of the Municipal District, or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for marking out when and where necessary the roads, streets, lanes, and thoroughfares which now are or shall hereafter be under or subject to the care, construction, or management of the Council, and the carriage or foot ways in each of such roads, streets, lanes, or thoroughfares.

Footways may be levelled.

5. When any footway shall have been marked out in manner herein directed, the Surveyor or other person as aforesaid may cause the same to be levelled and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination, and may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for the said footway.

The Improvement Committee to fix street levels, &c.

6. The Improvement Committee or any officer of the Council acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the level of all public roads, streets, and ways within the Municipal District and the carriageways and footways thereof: Provided that there shall be no change of levels in any such public road, street, or way until the same shall have been submitted to and certified by the Council as hereinafter directed.

Change of street levels.

7. Whenever it may be deemed necessary to alter the level of any such public road, street, or ways as aforesaid, the Improvement Committee shall cause a plan and section, showing the proposed cuttings, and fillings to be exhibited at the Council Chambers for fourteen days, for the information and inspection of ratepayers, and shall notify by advertisement in some newspaper circulating in the Municipal District that such plan is open for inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman of such meeting, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

8. Any person who shall form, dig, or open any drain or sewer, or remove, or cause to be removed, any turf, gravel, sand, loam, or other material, in or from any part of the carriage or foot way of any street or road, or any reserve, or other public place within the said Municipal District, without leave first had and obtained from the Council or from the Mayor, or who shall wantonly break up or damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

Temporary stopping of traffic for repairs, &c.

9. The Mayor, or any officer or person acting under the authority of the Council, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by destroying or removing any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty or sum not exceeding five pounds for every such offence.

Cellars or openings beneath the surface of footways prohibited.

10. Any person who shall make any cellar, or any opening, door, or window, in or beneath the surface of the footway of any street or public place, unless the plans thereof have been previously submitted to and approved by the Council, and the erections and openings made to the satisfaction of the Council, shall on conviction forfeit and pay the sum of five pounds ever and above the expense of filling up, remedying, or removing such cellar, opening, door, or window, so as the same shall not exceed fifty pounds.

Holes to be enclosed.

11. Any person who shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole, adjoining or near to any street or public place within the said Municipal District, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other buildings, or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same, and keep the same enclosed in a good and sufficient manner to the satisfaction of the Surveyor or other officer or person as aforesaid, or shall keep up or cause to be kept up and continued any such enclosure for any time longer than shall be necessary in the opinion of the Surveyor or other officer or person as aforesaid, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclose, shall forfeit and pay for every such refusal or neglect any sum not less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining the footways to be enclosed, under penalty.

12. Every owner or occupier of any house, building, premises, or land within the said Municipal District, having any entrance, area, garden, or other open space adjoining the footway or public place in such Municipality, or any quarry, excavation, or opening in the ground, or any premises within six feet of any such footway or public place, shall protect or guard the same by good and sufficient fences, rails, or other enclosures, so as to prevent danger to persons passing and repassing; and any such owner or occupier of any house, building, premises, or land having any steps adjoining the footway of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent danger to persons passing and repassing; and on failure thereof, any such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not less than forty shillings nor more than five pounds; and every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid, within one week after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wells to be covered over.

13. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway within the said Municipal District, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the Council, or shall have been left for such person at his or her last known place of abode, or on the said premises, shall on conviction forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered, contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

Throwing filth on roads, driving carriages and leading horses on footways.

14. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or remain, any dead animal, offal, dung, soil, ashes, rubbish, or any other filth or annoyance, or any matter or thing, in or upon the footway or carriageway of any street, road, lane, or other public place within the said Municipal District, or shall kill, slaughter, dress, scald, or cut up any swine, calf, sheep, lamb, or other animal in or so near to any such street or other public place as that any blood shall run or flow upon or over, or be on any such carriage or footway, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon the footway of any street, road, or public place, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, wheel, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, ride, or stand any horse, ass, mule, or other beast upon any such footway, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, and for the second and every subsequent offence a sum not less than ten shillings nor more than forty shillings.

Throwing filth into watercourses.

15. Any person who shall cast any filth, rubbish, or any dead animal, with intent of drowning such animal, into any public watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer, canal, or watercourse within the said Municipal District, shall forfeit a sum not exceeding five pounds nor less than ten shillings, and shall, in addition to such penalty, pay the cost of removing such filth or obstruction, or of restoring such watercourse, sewer, or canal to its proper channel, so as the same shall not exceed fifty pounds.

Throwing slops on the carriage and footways.

16. Any person who shall cast or throw, or shall cause, suffer, or permit to be cast or thrown upon any carriage-way or footway, any soapsuds, slops, or refuse water, or any refuse vegetables, or any other matter or thing, or shall cause or suffer or permit the same to run or flow from any premises in his or her occupation over any such footpath or carriage-way within the said Municipal District, shall for every such offence suffer and pay a sum not exceeding two pounds nor less than five shillings.

Rain not to be carried on to footpaths.

17. It shall not be lawful for any person whomsoever to carry, by means of pipes, gutters, or other contrivances, any rain-water from the roof of his or her premises or house, upon any of the footways of any street or public place within the said Municipal District; and any owner or occupier of any such house or premises who shall neglect or refuse to remedy any such pipes, gutters, or contrivances, when required to do so by any officer of the said Council, shall on conviction forfeit and pay any sum not exceeding ten shillings, and a like sum for every day or part of a day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises may convey any such rain-water by means of pipes laid under the surface of any such footways into the gutters adjoining the same: And provided also that all such pipes shall be laid down to the satisfaction, and under the superintendence of the Town Surveyor, or any other person appointed by the Council.

Placing carriages, goods, &c., on footways—Not removing them when required—Replacing the same after removal.

18. Any person who shall set or place, or cause to be set or placed, any stall-board, chopping-block, show-board, basket, wares, merchandise, casks, or goods of any kind whatsoever,—or who shall hoop, place, wash, or cleanse, or who shall cause to be hooped, placed, washed, or cleansed, any pipe, barrel, cask, or vessel, in or upon any carriage or foot way in any street, road, or public place within the said Municipal District,—or shall set, lay out, or place, or cause to be set, laid out, or placed any coach, cart, wain, waggon, dray, barrow, sledge, truck, or other carriage, upon any such carriageway, except for the necessary time of loading or unloading the same, or taking up or setting down any fare, or waiting for passengers when actually hired, or while actually engaged in harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage.—or if any person shall set or place, or cause to be set or placed in, upon, or over any such carriageway or footway, any stone, brick, lime, timber, or other materials or things for buildings (except as hereinbefore provided), or who shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or any other matter or thing whatsoever, from any house or premises over any part of any such footway or carriageway, or over any area of any house or other building or premises, or any other matter or thing, from and on the outside of the house or front, or any other part of any house or houses or other buildings or premises, over or next unto any such street, road, or public place, and shall not immediately remove the same upon being required so to do by the Council or any officer thereof,—or if any person who having, in pursuance of any such requisition as aforesaid, removed, or caused to be removed, any such stall-board, show-board, chopping-block, basket, wares, merchandise, barrow, sledge, or truck, carriage, timber, stone, bricks, lime, meat, offal, or other matter or thing, shall at any time thereafter again set, lay, or place, expose, or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid), in or upon or over any such carriage or foot way, of or next unto any such street, road, or public place as aforesaid,—shall, upon conviction for every such offence, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, and for the second and every subsequent offence a sum not exceeding forty shillings nor less than ten shillings.

Not to prevent the erection of awnings.

19. Nothing in these By-laws contained shall be deemed to prevent any person from placing a movable awning in front of

his or her shop or house: Provided that such awning be at least eight feet high above the proper level of the footway, and that the posts be kept close up to the curbstone or outer edge of such footway; and that the said posts and any framework be erected to the satisfaction of the Council, and as may from time to time be directed.

Damage to public buildings.—Extinguishing lamps, &c.

20. Any person who shall damage any public building, lamp, wall, parapet, sluice, bridge, road, street, sewer, watercourse, or other property of the Council of the said Municipal District, or improperly extinguish any lamp set for public or private convenience, shall pay the cost of repairing the same, and if the same be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds nor less than five pounds, in addition to the cost of repairing the same, so as the same shall not exceed fifty pounds.

Drawing or trailing timber, &c.

21. Any person who shall haul or draw, or shall cause to be hauled or drawn, upon any of the streets, roads, or public places within the said Municipal District, any timber, stone, or other material or thing otherwise than upon wheeled carriages or barrows, or shall suffer any timber, stone, or other material or thing which shall be carried principally or in part upon any wheeled carriage or barrow, to drag or trail upon any part of any such street, road, or public place, to the injury thereof, or to hang over any part of such carriage or barrow so as to occupy or obstruct the street or road, shall, upon conviction, forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings over and above the damage occasioned thereby.

Riding in drays, careless driving, &c.

22. If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street, road, or thoroughfare within the said Municipal District, not having some person on foot to guide the same (such carts as are drawn by one horse and driven or guided with reins only excepted),—or if the driver of any carriage whatsoever shall negligently be at a distance from such carriage, or in such a situation whilst it shall be passing upon such street, road, or thoroughfare that he cannot have the direction and government of horse or horses or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage on the left or near side of the road, street, or thoroughfare,—or if any person shall in any manner wilfully prevent any other person or persons from passing him, or any carriage under his care, upon such street, road, or thoroughfare, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so offending shall, upon conviction, forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings.

Riding or driving furiously.

23. Any person who shall ride or drive through or upon any street, road, or public place, within the said Municipal District, so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered, shall, on conviction, forfeit and pay a sum not exceeding five pounds nor less than two pounds.

Hours for driving cattle.

24. No person shall drive or cause to be driven through any street or public thoroughfare of the said Municipal District any live stock between the hours of 8 o'clock a.m. and 10 o'clock a.m., or between the hours of 12 o'clock a.m. and 2 o'clock p.m., or between the hours of 4 o'clock p.m. and 9 o'clock p.m., except calves and foals under the age of one year, quiet milch cows, horses or cattle broken to saddle or draught, and pigs, sheep, and goats; and any person or persons who shall drive or cause to be driven any live stock, except those above enumerated, through any street or public thoroughfare of the said Municipal District, between the hours above mentioned, shall, on conviction before any Justice or Justices of the Peace, forfeit and pay any sum not exceeding five pounds for every such offence.

Swine, &c., not to wander about streets.

25. Any person who shall breed, feed, or keep any kind of swine in any house, yard, or enclosure, situate and being in or within forty yards of any street or public place in the Municipality, or who shall suffer any kind of swine, or any horse, ass, cattle, mule, sheep, goat, or any other animal of like nature, belonging to him or her, or under his or her charge, to stray or to get about, or to be tethered or depastured in any street, road, or public place within the said Municipal District, shall forfeit and pay, for every such offence, a sum not exceeding forty shillings nor less than five shillings: Provided that if, after due inquiry shall have been made, the owner thereof cannot be discovered, it shall be lawful for the said Council to cause to be destroyed any swine or goats so straying or injuring property of any description.

Inspector may impound.

26. The Inspector of Nuisances, or any other person duly authorized by the Council, shall have the power to impound in the Inverell Public Pound all animals of every description found straying within the said Municipal District of Inverell.

Burning shavings, &c., in streets.

27. Any person who shall burn any shavings, rubbish, or any other matter or things, in any road, street, lane, or public place within the said Municipal District, or who shall, within ten yards from any dwelling-house, burn rags, bones, corks, or other offensive substance, shall, for every such offence, forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Placards not to be affixed on walls without consent.

28. It shall not be lawful for any person to paste or otherwise affix any placards or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, or erection, by chalk or paint, or in any other manner, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall forfeit and pay a sum not exceeding twenty shillings nor less than five shillings.

No rock to be blasted without notice to the Mayor, &c.

29. Any person who shall be desirous of blasting any rock within fifty yards of any road, street, public place, or private dwelling within the said Municipal District, shall give notice in writing twenty-four hours previously to the Mayor or any two Aldermen, who shall appoint a time when the same may take place, and give such directions as he or they may deem necessary for the public safety; and if any person shall blast, or cause to be blasted, any rock within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the Mayor or any two Aldermen as aforesaid, he shall, on conviction, forfeit and pay, for every such offence, any sum not less than one pound nor more than ten pounds.

Cleansing private avenues.

30. Any owner or occupier of any house or place who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Placing dead animals on premises.

31. Any person who shall place, or who shall cause or suffer to be placed upon any land or premises within the said Municipal District, any dead animal, blood, offal, night-soil, or any other offensive matter, so as to become a nuisance to the inhabitants thereof, shall on conviction suffer and pay a penalty not exceeding five pounds nor less than ten shillings for every such offence.

Allowing dead animals to remain on premises.

32. Any owner or occupier of any land or premises who shall suffer or permit any dead animal, blood, offal, night-soil, or any other offensive matter to remain upon the said land or premises after notice shall have been given to remove the same, shall be subject to a penalty not exceeding two pounds nor less than ten shillings for every day that the same shall so remain.

Hog-sties and nuisances not removed on notice, &c.

33. In case any privy, hog-sty, or any sink, cesspool, yard, or enclosure, or any matter or thing which shall at any time be in any place within the said Municipal District, shall be or become a nuisance, it shall be lawful for the Council, after due investigation, by notice in writing, to order the removal of the said nuisance within seven days after such notice shall have been given to the owner or occupier of the premises wherein such nuisance is situated, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises; and every such owner or occupier refusing or neglecting to remove or abate such nuisance pursuant to such notice and to the satisfaction of the Council, shall forfeit and pay a sum not exceeding ten pounds nor less than forty shillings.

Hours of removing night-soil, &c.

34. Any person who, within the said Municipal District, shall remove any night-soil or ammoniacal liquor, bones, or other offensive matter, or shall come with carts or carriages for that purpose between the hours of six o'clock in the morning and eleven o'clock at night,—or shall at any time remove any such night-soil or ammoniacal liquor otherwise than in properly covered and watertight carts or vehicles, or in such a manner as to upset, cast, spill, or strew any of the said night-soil, ammoniacal liquor, slop, urine, or filth, in or upon or near to any of the streets, roads, public places or footways of the Municipality,—or shall deposit or throw night-soil, ammoniacal liquors, bones, or other offensive matters, nearer to any street, road, or dwelling-house than shall from time to time be directed by the Council or by the Inspector of Nuisances,—or shall allow vehicles used for this purpose to stand on any premises nearer

to any road, street, or dwelling-house than shall from time to time be directed by the Council or Inspector,—shall upon conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound; and in case the person or persons so offending cannot be found, then the owner or owners of such carts, carriages, or other vehicles employed in and about emptying or removing such night-soil, bones, or other offensive matter, and also the employer or employers of the person or persons so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Penalty for not removing offensive matter on notice.—Council may abate nuisances.—Right of entry for such purpose.

35. Any person who shall suffer any waste or stagnant water, or any muck, filth, soil, or other offensive matter to remain in any cellar or place within any dwelling-house or premises within the said Municipal District for the space of twenty-four hours after written notice to him from the Inspector of Nuisances or other officer of the Council to remove the same,—or shall allow the contents of any water-closet, privy, or cesspool to overflow or soak therefrom,—shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than ten shillings, and a further sum of ten shillings for every day during which the offence shall be continued; and the Council may remove or abate, or cause to be removed or abated every such nuisance, and do what shall be needful for preventing a continuation or recurrence thereof; and the officers of the said Council shall for such purpose have power from time to time to enter any house or premises, and the expense incurred in carrying out the provisions of the By-law shall be paid to the said Council by the occupier or owner of the premises upon which the same exists, in addition to the penalties aforesaid, so as the same do not exceed in the whole fifty pounds.

Cleansing butchers' shambles, &c.

36. For prescribing the cleanliness of the said Municipal District and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer appointed by the Council from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shops, soap and candle manufactories, &c., fellmongering establishments and tanneries within the said Municipal District, and to give such directions concerning the cleansing of the same respectively, both within and without, as to him shall seem needful. And any butcher, or the owner or occupier of any such butchers' shops, tannery, manufactory, or establishment who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding five pounds nor less than one pound.

Inspection of premises.

37. Upon the reasonable complaint of any householder that the house, premises, yard, closets, or drains of the adjoining or neighbouring premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of, and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Damaging trees, &c.

38. Any person who shall wilfully and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any reserve or place under the management of the Council, shall forfeit and pay a sum not exceeding ten pounds nor less than one pound.

Extirpation of noxious weeds.

39. Any owner or occupier of land within the said Municipal District who shall permit or suffer to grow or remain on the said lands the weeds known as the Bathurst burr, Scotch thistle, or other noxious weeds, and who shall fail to extirpate, remove, or destroy the same within ten days after receipt of a notice in writing by post or otherwise from the Council so to do, shall for every such offence forfeit and pay a sum not exceeding five pounds nor less than twenty shillings.

Newly slaughtered carcass.

40. Every person who within the said Municipal District shall carry or convey, or cause to be carried or conveyed in any public street or place, the carcass or any part of the carcass of any newly slaughtered animal without a sufficient or proper cloth or other covering to conceal the same from public view, shall be liable on conviction to a penalty of any sum not exceeding forty shillings for every such offence.

Bathing prohibited within certain limits.

41. Any person who shall bathe near to or within view from any inhabited house, or from any public bridge, street, road, or other place of public resort within the limits of the said Municipal District, between the hours of six o'clock in the morning and eight in the evening, shall, on conviction, forfeit and pay for every such offence a sum not exceeding twenty shillings.

Indecent exposure of person.

42. Any person who shall offend against decency, by the exposure of his or her person in any street or public place within the said Municipal District, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

Houses of ill fame.

43. Upon representation by any respectable ratepayer that the house or neighbouring or adjoining premises is of ill fame, it shall be lawful for the Mayor and any Alderman to cause the residents of such house or premises to furnish to the Council a list of the names, ages, sex, birth-place, and occupation of all the inmates of the said house or premises; and upon non-compliance with such request, or if upon consideration the Mayor and any Alderman consider the house to be one of ill fame, they shall with the sanction of the Council declare the same to be a nuisance, and the Mayor shall cause a notice, in writing, to be served upon the holder of such house or premises, or other person residing or being therein and acting as such holder, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice, otherwise such holder or other person shall be liable to a penalty of not less than forty shillings nor more than fifty pounds, and on a second conviction shall be liable to a penalty of not more than fifty pounds nor less than five pounds.

Inspector of Nuisances may take legal proceedings.

44. The Inspector of Nuisances, or other person appointed by the Council, may take legal proceedings against any person or persons committing any offence or offences against any of the By-laws of the said Municipal District.

Penalties to be paid over to Treasurer.

45. All penalties under any of these By-laws shall be paid over to the Treasurer of the said Municipal District, to be appropriated as the Council may direct.

Interpretation of Mayor and Municipality.

46. Whenever in any of these By-laws the word "Mayor" is made use of, it shall, unless the context shall indicate a contrary intention, be construed also to signify and include any Alderman lawfully acting for the time being in the place or stead of the Mayor; and whenever the words "Municipal District" is made use of in the said By-laws, it shall be understood to signify the Municipal District of Inverell.

As to interference with officer of Council in enforcing By-laws.

47. Any person who shall obstruct or interfere with any officer of the Council or other person doing or performing any duty or act under any of the By-laws of the said Municipal District, shall forfeit and pay a penalty not exceeding twenty pounds nor less than two pounds.

Penalty.

For every offence against the provisions of these By-laws, except as otherwise provided, the offender shall be liable to, and shall pay a penalty not exceeding five shillings, to be recovered in a summary way before any Justice of the Peace; and all other penalties and fines imposed by these By-laws, except as otherwise provided, shall also be recoverable in a summary way before any Justice of the Peace.

Passed by the Council of the Municipal District of
Inverell, this 13th May, 1872.

JAMES HARVEY HINDMARSH,

J. R. HATCHER,

Mayor.

Council Clerk.

(BOROUGH OF ST. LEONARDS—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 22nd October, 1872.

BOROUGH OF ST. LEONARDS.—BY-LAWS.

THE following By-laws, made by the Council of the Borough of St. Leonards, for the control and management of the Cricket Ground in the Public Reserve in that Borough, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

WHEREAS a certain part of section fifteen of the public reserve vested in the Municipal Council of the Borough of St. Leonards has been set apart and enclosed by the Council, to be used as a cricket ground; and whereas it is expedient that the use of the same be placed under proper regulations: Be it therefore enacted as follows:—

1. The Council may, upon receipt of an application from any cricket club regularly constituted, and having rules and regulations, and having a Secretary and Treasurer, set apart for the use of such club such portion of the said cricket ground as the said Council may think fit.

2. The application aforesaid shall be in writing, signed by the Secretary of the club so applying; and there shall be annexed thereto a copy of the by-laws and a list of the members (with their respective ages) of such club, duly certified and signed by the Secretary thereof; and so often as any change shall be made in such By-laws, notice thereof so signed and certified shall forthwith be given to the Council, and a new list of members as aforesaid shall also be given to the Council on the first day of October in every year.

3. The Council may also grant leave to any such club to erect, in such position, and to such extent, and in such manner as the Council may direct, and from time to time to alter or remove, any booths, sheds, or buildings necessary to protect the cricketing property, clothes, &c., of the said club, or for the purpose of holding festivals; but the Council shall be the absolute owners of all such erections when built, subject to their lawful use by the said club, or removal by them, with the consent, in writing, of the Council first had and obtained.

4. Any cricket club that shall have a portion of ground so set apart for their use, may make such arrangements as they may think fit for any other cricket club whatever to play cricket on such portion of ground, and may collect from the members of such other club tolls for the purpose of maintaining such ground in order: Provided that the club so permitting the use of the ground shall be responsible for all damage and wear caused by such other club.

5. Every cricket club that shall have a portion of ground so set apart for their use, shall at their own expense maintain the same and the cricketing erections thereon in proper order and repair—injuries by fire, tempest, and (save as aforesaid) the acts of strangers excepted—and, if they shall neglect to do so, then the Council may, on the expiration of one week after notice in writing to the Secretary of such club of the

intention of the Council so to do, make such repairs and do such acts as may have become necessary through the default of the said club; and all costs so incurred by the Council shall be a debt due to them by the members of the said club jointly and severally, and may be recovered by action in any competent Court: Provided always that the Council, their servants or agents, may at any time enter on the ground used by any cricket club, and do such acts thereon as the Council may think fit.

6. During the months of June, July, August, and September, in every year, the right of all cricket clubs to play cricket upon any part of the said cricket ground, and their liability to keep the same in good order, shall be suspended, and the Council may allow the cricket enclosure to be used for such purposes as they may think fit.

7. Any person who shall offer any obstruction to any cricket club, or members thereof, so as aforesaid having the use of part of the said cricket ground, so as to hinder or annoy them in playing cricket thereon, or any person who, not being a member of any such club, shall, without leave of the Council, attempt to play cricket on any portion of the cricket ground, or who being a member of any such club, shall, without due leave first had and obtained, attempt to play cricket on any part of the cricket ground other than the ground set apart for the use of his own club, or any person who without leave of the Council shall attempt to play cricket on the cricket ground during the months mentioned in the last preceding By-law, or any person who shall wilfully injure the turf or the erections on the cricket ground, or shall attempt to pass or cross any fence on the reserves otherwise than by the gates or other openings intended for passage, shall on conviction before one or more Justices of the Peace be liable to a penalty not exceeding five pounds and not less than ten shillings: Provided that any person not offending against these By-laws or the general By-laws of the Municipality may lawfully enter upon and use all parts of the reserve.

8. Any license so as aforesaid given by the Council to any cricket club may at any time by notice in writing to the Secretary of such club be revoked; and nothing in these By-laws shall be construed to affect or diminish any right which the Council would otherwise have had against any person or persons whatsoever.

WILLIAM TUNKS, Mayor.

1872.

MUNICIPALITIES.

(BOROUGH OF EAST ST. LEONARDS—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 17th October, 1872.

BOROUGH OF EAST ST. LEONARDS.—BY-LAWS.

The following By-laws made by the Council of the Borough of East St. Leonards—for regulating their own proceedings—for the collection of rates—the care and management of public roads and streets—the regulation of public vehicles—the suppression of nuisances—for collecting and managing tolls, and for the general good rule and government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

PART I.

PROCEEDINGS OF THE COUNCIL AND COMMITTEES, DUTIES OF OFFICERS, SERVANTS, &c.

Ordinary Meetings.

1. The Council shall meet for the transaction of business on the first Thursday in every month, unless such day shall happen to be a public holiday. In the latter case, the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from themselves a Chairman for such meeting.

Business of ordinary meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected if erroneous, and signed by the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
- (2.) Correspondence to be read, and orders made thereon if expedient.
- (3.) Petitions (if any) to be read and dealt with.
- (4.) Reports from Committees, and minutes from the Mayor (if any), to be presented, and orders made thereon.
- (5.) Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of the Committees or officers, to be made.
- (6.) Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
- (7.) Orders of the day to be disposed of as they stand on the business paper.

Business may be taken out of regular order.

Provided that the Council may, by resolution without notice, entertain any particular motion, or deal with any particular matter of business, out of its regular order on the business paper, without any formal suspension of this By-law, and may in like manner direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

4. At special meetings of the Council, the business—after the minutes shall have been read and signed, which shall be done in the same manner as at an ordinary meeting—shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting.

5. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Council Clerk not less than one nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he may have received, or shall have been required or directed so to enter, in due course of law, and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this Part of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

Business paper for special meeting.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon, by the Mayor or Aldermen calling such meeting.

How business paper to be disposed of.

7. The business paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with, and such business paper so noted shall be a record of the Council.

Notices, &c., to be the property of the Council.

8. After the business paper shall have been made up as aforesaid, all notices of motion, requisitions, and directions as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions—how to be moved.

9. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper; and if not so moved, or postponed, shall be struck from such business paper and be considered to have lapsed.

Absence of Mover.

10. No motion of which notice shall have been entered on the business paper shall be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

11. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

12. When a motion or amendment shall have been made or seconded, any Alderman shall be at liberty to move an amendment thereon; but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

13. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

14. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question—further amendment may be moved thereon.

15. If an amendment be carried, the question as amended thereby shall become itself the question before the Council whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

16. If any amendment, either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved to the question to which first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions for adjournment.

17. No discussion shall be permitted on any motion for adjournment of the Council; and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Orders of the day.

18. The orders of the day shall consist of any matters, other than motions on notice, which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

19. The Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that the Mayor may, as to any order of the day entered by his direction, arrange with and call upon any Alderman to move the same.

Petitions to be respectfully worded, &c.

20. It shall be incumbent on every Alderman presenting a petition, to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—how received.

21. All petitions shall be received only as the petitions of the parties signing the same.

How petitions to be dealt with.

22. No motion other than for the reception of a petition shall, unless as hereinafter provided, be permissible on the presentation of such petition, except that the same be referred to a Committee, or that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to the subject of any petition, or if the consideration of the subject of any petition shall have been made an order of the day, and such petition shall have been presented before such motion or order of the day shall have been called on, such order of the day, or the said motion, if otherwise unobjectionable, shall be considered in order.

Correspondence.

23. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 20 of this Part of these By-laws, is imposed upon Aldermen presenting petitions. If not read, the letters to be returned to the writer and reported to the Council. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council or any of its officers shall be presented or read by any Alderman. If the Mayor be absent and shall not have examined any such letters, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Section 22 to apply to letters.

24. Section 22 of this Part of these By-laws shall be considered as fully applicable to letters addressed to the Council or any of its officers as to petitions.

Reports from Committees.

25. Every report from a Committee shall be in writing and signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's minutes.

26. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing signed by him.

How reports, &c., are to be dealt with.

27. No motion shall, unless as hereinafter provided, be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided that if any Alderman shall have given due notice in reference to any such report or minute, or if the consideration of such report or minute shall have been entered among the orders of the day, such order of the day or such motion, if otherwise unobjectionable, may be moved and considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is desirable that an order should be made upon such report or minute during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of the Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid as will enable the Council Clerk to make the necessary entry on the business paper and to give such due notice.

Questions and statements.

28. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this Part of these By-laws.

Notice to be given.

29. Sufficient notice of every question shall be given to the person who is expected to reply thereto to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

30. It shall not be compulsory upon the Mayor or upon any Alderman so questioned as aforesaid to answer the question so put to him.

Question to be put without argument.

31. Every such question must be stated in simple language as an interrogatory, without any argument or statement of fact.

Similar provision as to statements.

32. Every statement must be made without argument.

No discussion on question, &c.; right of objection and of subsequent motion reserved.

33. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice as hereinbefore provided, of any matters properly arising out of or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

Mode of addressing the Council.

34. Every Alderman who shall make or second any motion, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall, while so doing, stand up in his customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or Officer to be questioned, and may be replied to in like manner. But in every such case the question so put and the answer thereto may be objected to on the ground of disorder or irrelevancy. And all members of the Council shall, on all occasions when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted.

35. No Alderman shall be interrupted while speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitation as to number of speakers, &c.

36. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observations than may be necessary for the purposes of such explanation.

Mover and seconder.

37. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

38. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, nor impute improper motives to any other Alderman.

Adjournment of debate.

39. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

40. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Mayor to decide points of order.

41. The Mayor or Chairman shall preserve order, and his decision upon disputed points of order or practice shall be final.

Mayor may address the Council.

42. The Mayor shall have the same right as any other Alderman to speak upon every subject or amendment.

Mayor may call member to order.

43. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

Decision of points of order.

44. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

Motions out of order to be rejected.

45. Whenever it shall have been decided, as aforesaid, that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected.

How questions to be put.

46. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon.

Divisions.—Penalty for refusing to vote.

47. Any Alderman may call for a division, and the vote shall be taken by a show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not vote on such division, not being disqualified by interest or other disability from so voting, shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds.

Rules applicable to business in Committees.

48. Sections 12, 13, 14, 15, 16, 34, 35, 38, 40, 41, 42, 43, 44, 45, 46, and 47 of this Part of these By-laws shall be taken to apply to the business in Committee of the Whole Council, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

How call of the Council to be made.

49. A call of the Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Such call to be compulsory in certain cases.

50. No motion the effect of which if carried would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper, unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

51. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered. The Council Clerk shall call the names of all the members in alphabetical order; and if any members are absent a record shall be made of such absence, but if leave of absence to any such member shall have been previously granted, or if such an excuse in writing shall have been received by the Mayor or Council Clerk as the majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence.

52. Any member of the Council who, having had notice of the call, shall be absent without having been excused as aforesaid, and who shall fail to show that by reason of illness or other sufficient cause he was unable to send an excuse in writing as aforesaid, or who having answered to his name shall not be present when a vote is taken on the motion or business as to which such call was made, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds.

STANDING AND SPECIAL COMMITTEES.*Standing Committees.*

53. Besides such Special Committees as may from time to time be found necessary, there shall be two Standing Committees of the Council, each consisting of not less than three members, namely, a Finance Committee, and an Improvement Committee.

Finance Committee.

54. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the Borough, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Improvement Committee.

55. The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Chairman of Committees.

56. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, who may direct the Council Clerk to call meetings whenever he shall think it desirable.

Cost of works to be estimated before undertaken.

57. No works affecting the funds of the Borough, except as hereinafter is mentioned, shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Cases of emergency, and current expenses.

58. In cases of emergency the Mayor may authorize the expenditure of any sum not exceeding twenty pounds, and such expenditure shall be reported to the Council at the next meeting; and the Mayor may order the payment of wages of labour for officers, servants, and labourers employed at fixed rates of payment by order of the Council.

Completion of work to be reported by Improvement Committee.

59. No works undertaken by the Council shall be deemed to have been completed, and no order shall be made for the payment in full of the same, except upon a report or certificate to that effect from the Improvement Committee.

Common Seal—how secured.

60. The common seal shall be secured by a cover or box, which shall be kept at the Council Chambers, in the custody of the Council Clerk. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk.

When and how Common Seal to be used.

61. The seal of the Corporation shall not be affixed to any document without the express authority of the Council; and every impression thereof so authorized shall be verified by the signature of the Mayor, or in case of the illness or absence of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of accounts, &c., are to be kept.

62. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same; but the Mayor may for any special purpose authorize their removal.

Books, &c., not to be shown or exposed to view without leave.

63. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of Council without the written permission of the Mayor, unless as otherwise provided by law. And any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than five shillings nor more than five pounds.

Records not to be removed.

64. Any person removing any such book, paper, or record, from the Council Chambers, without leave from the Mayor in writing first had and obtained, shall be subject to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book, paper, or record, and shall not have returned the same, to prosecution for stealing such book, paper, or record, or to an action at law for detention of the same, as the circumstances of the case may warrant.

Penalty for defacing or destroying records.

65. Any person destroying, defacing, or wilfully or improperly altering any books, papers, or record, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

Bonds for good conduct.

66. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited in such custody as the Council may order; and no member, officer, or servant of the Council shall be received as a surety for any officer or servant.

Duties of Council Clerk.

67. The Council Clerk shall perform all the duties which, by the Municipalities Act of 1867, or by the present or any other By-laws thereunder, he may be required to perform. He shall be the Clerk of all Revision Courts held in the Borough, under the provisions of the Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council, and shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Special powers of Mayor.

68. The Mayor may from time to time define the duties of all officers and servants of this Corporation, and shall exercise a general supervision over all such officers and servants, and may order the preparation of any such return or statement, or the giving of any such explanation or information, by any such officer or servant, as he may think necessary; unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information.

Motions for rescission of previous orders.

69. Whenever a motion the effect of which if carried would be to rescind any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion.

Suits and prosecutions for penalties.

70. Suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute the operation of which may have been extended to the Borough, shall be commenced or laid as follows, namely:—When against a member of the Council or any Auditor, or any officer of the Corporation, by such officer as shall be named for that purpose by the Council; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by such officer or person as shall be appointed for that purpose by the Council or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council except on the order of the Council or of the Mayor. And the conduct or prosecution of any suit or information may, on the order of the Council or of the Mayor, be entrusted to an attorney.

Power to suspend temporarily certain portions of these By-laws.

71. Any of the foregoing By-laws which relate to or affect the proceedings at meetings of the Council may be suspended *pro tempore* without notice, in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

PART II.

COLLECTION AND ENFORCEMENT OF RATES.

Rates when due and payable.

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

When payable.

2. All such rates shall be paid at the Council Chambers, during the hours appointed by the Council for that purpose, being the ordinary office hours of the Council.

Defaulters.

3. Every person not paying his or her rates as aforesaid within thirty days after any of the days so appointed for payment thereof shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distraint upon the goods and chattels of the defaulter.

Bailiff—how appointed.

5. The Bailiff of the Borough shall be appointed by the Council, and may at any time be removed by them.

Duties of Bailiff.

6. It shall be the duty of the Bailiff to make levies by distraint for the recovery of rates, in the manner hereinafter provided.

Warrant of distress.

7. All levies and distresses shall be made under warrant, under the hand of the Mayor or of any Alderman who may for the time being be authorized to perform the duties of that office; such warrant to be in the form or to the effect of the Schedule hereunto annexed and marked with the letter A.

Inventory.

8. At the time of making a distress, the Bailiff shall make a written inventory in the form or to the effect of the Schedule annexed hereto marked B, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distressed, or to some person resident in the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall deliver a copy of such inventory to the Council Clerk of the Borough.

Distress and sale, &c.

9. It shall be lawful for the Bailiff or his deputy and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof. And if the sum for which any such distress shall be made or taken together with the costs of such distraint shall not be paid on or before the expiration of the following day, the Bailiff or his deputy may, between the hours of eleven in the morning and two in the afternoon on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Borough as the Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any) that may remain, after deducting the amount of the sum distrained for, and the costs of such distraint, to the owner of the goods so sold, on demand by such owner.

Goods may be impounded.

10. The Bailiff on making a distress as aforesaid may impound or otherwise secure the goods and chattels so distrained, of what nature or kind soever, in such part of the land or premises chargeable with the rate, or in such other place as shall be most fit and convenient for that purpose; and it shall be lawful for any person whomsoever, after the expiration of the following day hereinbefore mentioned, to come and go to and from such part of the said land and premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner to direct order of sale.

11. The owner of any goods or chattels so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such directions.

Proceeds of distress.

12. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress, within twenty-four hours after having received the same.

Deputy.

13. The Bailiff may, with the sanction in writing of the Mayor, or in his absence with the sanction of the Treasurer of the Borough, authorize by writing under his hand any person to act temporarily as his deputy; and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his surties shall in every such case be held responsible for the acts of such deputy.

Costs.

14. There shall be payable to the Bailiff for every levy and distress made under these By-laws, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of distress.

I, _____, Mayor of the Borough of East St. Leonards, do hereby authorize you, _____, the Bailiff of the said Borough, or your deputy, to distrain the goods and chattels in the dwelling-house, or in and upon the land or premises of _____, situate at _____, for _____, being the amount of rates due to the said Borough to the _____ day of _____, for the said dwelling-house, land, or premises (as the case may be), together with the costs of this distraint, and to proceed thereon for the recovery of the said rates and costs according to law.

Dated this _____ day of _____, 18 ____.

Mayor.

SCHEDULE B.

Inventory.

I HAVE this day, by virtue of the warrant under the hand of the Mayor of the Borough of East St. Leonards, dated _____ 18 ____, of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house, or in or

upon the land or premises of _____, situate at _____, within the said Borough, for _____, being the amount of rates due to the said Borough, to the _____ day of _____, and also the costs of this levy.

Dated this _____ day of _____, 18 ____.

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For making every entry and inventory	2	6
For man in possession for a period longer than two hours	6	0
For man in possession every other day or part of a day	6	0
For sale and delivery of goods, one shilling in the pound on the gross proceeds of the sale, in addition to the costs of advertisements (if any).		

PART III.

PREVENTING AND EXTINGUISHING FIRES.

Fire or combustible materials.

1. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger any buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

Setting fire to matter without notice.

2. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air within five yards of any dwelling-house or other building, or boundary or dividing fence, without having given notice in writing to the occupiers of the land adjoining to the land upon which such matter shall be of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall for every such offence forfeit a sum not exceeding five pounds.

Fire-works.

3. Every person who shall discharge any fire-arms without lawful cause, or who shall light any bonfire, tar-barrel, or fire-works upon or within ten yards of any public or private street or any public place, or shall sell gunpowder, squibs, rockets, or other combustible matter, by gas, candle, or other artificial light, shall forfeit a sum not exceeding five pounds.

Wilfully setting fire to chimneys.

4. Every person who shall wilfully set or cause to be set on fire any chimney-flue, smoke-vent, or stove-pipe, herein called in common "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

Negligently suffering chimneys to be on fire.

5. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimneys are situated shall forfeit a sum not exceeding forty shillings: Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard that such fire was in nowise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servant.

PART IV.

PUBLIC VEHICLES.

Fixed charges on public vehicles.

1. On and upon the first day of July next there shall be paid to the Council Clerk, for the benefit of the Borough, by the owner or owners of every public vehicle plying or carrying passengers for hire within the Borough, for every such public vehicle, an annual charge according to the scale specified in Schedule A hereto.

Days of payment, &c.

2. Every such charge shall be payable in advance annually or half-yearly according to the option of such owner. The days of payment of every such charge as aforesaid, when paid half-yearly, shall be the first day of January and the first day of July in each and every year. Every such half-yearly or annual payment, whether made on any of the before-mentioned days or at any other time, shall operate until the expiration of the then current half-year or year, as the case may be, and no longer.

Public vehicles licensed in Sydney entitled to ply on paying charges.

3. Every public vehicle duly licensed by the Municipal Council of the City of Sydney shall be entitled to ply or carry passengers for hire within the Borough, on production by the owner or owners thereof, or by some person on his or their behalf, of the license of such public vehicle, and on payment of the aforesaid charge.

Certificate of payment.—Driver to produce certificate when required.

4. On the making of every such payment as aforesaid, there shall be given to the person or persons making the same a certificate in the form or to the effect of Schedule B hereto. And the driver of such public vehicle shall at all times have the said certificate ready to produce, and shall produce the same when so required by the Council Clerk or other officer of the Council; and every such driver not producing such document when required shall, for every such offence, forfeit and pay a penalty of not more than one pound nor less than five shillings.

Penalties for plying, &c., if charges not paid—Proviso as to substitute vehicles.

5. The owner and driver respectively of any public vehicle, for or in respect of which such charge shall not have been paid as aforesaid, and which shall ply or carry passengers for hire in the Borough or any part thereof, shall forfeit and pay for the first offence a sum of not more than one pound nor less than ten shillings; and for a second offence and every subsequent offence, a sum of not less than one pound nor more than five pounds. And any person who shall act as the driver of any public vehicle shall be considered as the driver of such public vehicle for all the purposes of this By-law. And any such public vehicle which shall have been driven to or from any public stand for licensed vehicles appointed or to be appointed within the Borough, shall be deemed to have plied for hire or passengers within the meaning of this By-law: Provided however that nothing herein contained shall prevent the lawful use of any public vehicle which, in accordance with the By-laws of the City of Sydney or of the Municipal Council thereof, may have been put in use instead of any other public vehicle in respect of which such charge as aforesaid shall have been paid to the Council Clerk of the Borough, and which said last-mentioned public vehicle shall not at the time be plying or carrying passengers within the Borough.

Interpretation.

6. Whenever the words "public vehicle" shall be used in these By-laws, the same shall be understood to mean either an omnibus, omnibus car, or car; and an omnibus shall mean any vehicle upon four wheels drawn by two or more horses, for which an omnibus license shall have been taken out in the city of Sydney; an omnibus car, any public vehicle upon four wheels drawn by one horse, for which a similar license shall have been so taken out in the said city; and a car, any vehicle upon two wheels for which a license shall have been so taken out.

SCHEDULE A.

For every public vehicle plying for passengers—rate	£	s.	d.
per annum	3	0	0

SCHEDULE B.

Certificate.

No. _____
Municipal Council Chambers,
East St. Leonards, 18

This is to certify that _____, of _____, the owner of the public vehicle licensed by the Municipal Council of the City of Sydney, numbered _____, according to such license, has paid the sum of £ _____ being the charge required by the By-laws of this Borough to be paid for such public vehicle for the period of _____; and that the said public vehicle is authorized to ply or carry passengers for hire within the Borough, until the _____ day of _____ next.

Council Clerk.

PART V.

COLLECTION AND MANAGEMENT OF TOLLS.

Tolls established.

1. Tolls to the several amounts hereinafter prescribed shall be demanded, paid, and taken at the toll-gate mentioned and described in Schedule A hereto.

Collector's tenure of office.

2. A Collector shall be appointed by resolution of the Council of the said Borough, for such toll-gate, and shall be removable by a like resolution.

Sureties for Collector.

3. Such Collector shall find two sureties to the satisfaction of the Mayor, to the extent of fifty pounds, for the faithful performance of his duty.

Payment and recovery of tolls.

4. All such tolls shall be paid to the Collector thereof, to be appointed as aforesaid, in such several amounts for the respective animals or vehicles as are specified in Schedule B hereto; and if any person, liable to the payment of such toll, other than those exempted from toll as hereinafter provided, shall, after demand thereof, neglect or refuse to pay any such toll, the Collector thereof may prevent such person, or any such horse, beast, cattle, carriage, or other vehicle, in respect of which any such toll is payable, from passing through or by, or from being ridden, led, or driven through or by such toll-gate.

Exemption from toll.

5. No toll shall be demanded or taken, by virtue of this By-law, for any horses or carriages belonging to, or conveying or attending, or going to attend or convey, or returning from having conveyed or attended the Governor of the said Colony for the time being, nor of or from any of Her Majesty's Officers or soldiers being in proper staff, or regimental or military uniform, dress or undress, nor for any horse ridden, or any horse or carriage then employed by such officer or soldier upon or for Her Majesty's Service, or returning from such employment; nor of or from any member of any Corps of Volunteers going to or returning from exercise as such, for any horse ridden by such member, or for any gun-carriage, waggon, or other vehicle belonging to any such Corps, or then being employed exclusively for the purposes of the same, or returning from such employment, and not otherwise employed, nor for any horses, carriage, or other vehicle of or belonging to the Government or to the Council of the Borough, and then employed in the service of the said Government or Council, nor of or from any member of the Police Force being on actual duty, or prisoners under the charge of such member of the Police Force, or for any horse or carriage exclusively employed in carrying such member of the Police Force or prisoner or their baggage respectively, or returning from such employment, and not otherwise employed; nor of or from any minister of religion; nor of or from any person going to or returning from attending at a funeral, or going to or returning from any place of worship, on Sunday, Good Friday, or Christmas Day, for any horse or private vehicle ridden or driven by such minister or person; or for or in respect of any horse, beast, carriage, or other vehicle carrying the Post Office Mails; nor for any animal driven or going to or from water or feed; nor for any horse, carriage, or other vehicle which shall only cross the road beyond the said toll-gate, or shall not pass on any such road above the distance of two hundred yards: Provided always that every such member as aforesaid of any Volunteer Corps or of the Police Force shall have his dress and accoutrements according to the regulations of such Corps or Force for the time being.

False claim of exemption.

6. If any person shall claim or take the benefit of any of the exemptions from toll hereinbefore mentioned, not being entitled to the same, he shall on conviction forfeit and pay for every such offence a penalty of not less than one pound nor more than five pounds.

Evasion of toll.

7. If any person shall, with any horse, cattle, beast, or carriage, go off or pass from any street or road through or over any land or ground near to or adjoining thereto not being a public highway, and such person not being the owner, occupier, or servant, or one of the family of the owner or occupier of such ground, with intent to evade the payment of any toll payable under this Part of these By-laws,—or if any owner or occupier of any such land or ground shall knowingly or willingly permit or suffer any person (except as aforesaid) with any horse, cattle, beast, or carriage whatsoever, to go or pass through or over such land or ground, with the intent to evade any such toll,—or if any person shall give or receive from any person other than the Collector of such toll, or shall forge, counterfeit, or alter any note or ticket hereby directed to be given, with intent to evade the payment of any such toll or any part thereof,—or if any person shall fraudulently or forcibly pass through or by such toll-gate with any horse, cattle, beast, or carriage, or shall leave upon such street or road any horse, cattle, beast, or carriage whatsoever, by reason whereof the

payment of any toll shall be avoided or lessened, or shall take off or cause to be taken off any horse or other beast or cattle from any carriage, either before or after having passed through, by, or over such toll-gate, or having passed through or by the same shall afterwards add or put any horse or other beast to any such carriage and draw therewith upon any part of such street or road so as to increase the number of horses or other beasts drawing the said carriage after the same shall have so passed, whereby the payment of all or any part of the toll shall or may be evaded,—or if any person shall do any other act whatever in order or with intent to evade the payment of all or any of such toll and whereby the same shall be evaded,—every person shall for every such offence forfeit and pay any sum not less than five shillings nor more than five pounds.

Toll-board.

8. The Council shall cause to be put up and continued on some conspicuous place at or near such toll-gate as aforesaid, so that the same shall be visible to public view, a table painted in distinct and legible black letters at least two inches in length and of a breadth in proportion, on a board with a white ground, containing on the top thereof the name of the toll-gate at which the same shall be put up, and also containing a list of the tolls payable thereat, distinguishing the several tolls and the different sorts of animals or vehicles for which they are to be paid; and the said Council shall also cause to be provided tickets denoting the payment of the toll, and on such several tickets shall be specified the name of the toll-gate at which the same shall be delivered, and one of such tickets shall if demanded be delivered gratis by the Collector to every person paying any toll.

Collector's board—Offences by Toll-collector.

9. The Toll-collector at such toll-gate as aforesaid shall place or cause to be placed on some conspicuous place at or near such toll-gate, and so that the same shall appear to public view, his christian name and surname, painted in black on a board with a white ground, each of such letters of such name to be at least two inches in length and of a breadth in proportion; and such board shall be and remain at such toll-gate during the whole of the time during which the person whose name shall be expressed thereon shall be on duty thereat; and if any such Collector shall not place such board and keep the same there during the time he shall be such Collector as aforesaid,—or shall demand and take a greater or less toll from any person than he shall be authorized to do by virtue of this Part of these By-laws,—or shall demand or take a toll from any person or persons who shall be exempt from the payment thereof and claim such exemption,—or shall refuse to permit or suffer any person or persons to read, or shall in anywise hinder any person or persons from reading the inscriptions on any board put up or kept hereunder,—or shall refuse to tell his christian name and surname to any person or persons who shall demand the same on being paid the said tolls or any of them, or shall in answer to such demand give a false name or names,—or shall refuse or when required omit to give the person paying the toll a ticket denoting the payment thereof, and naming and specifying the toll-gate at which the same has been delivered, or upon the legal toll being paid or tendered shall unnecessarily detain or wilfully obstruct, hinder, or prevent any passenger from passing through or by such toll-gate,—or shall make use of any scurrilous or abusive language to any passenger,—every such Collector shall on conviction forfeit and pay for every such offence a penalty not exceeding five pounds.

10. Every such Collector of tolls shall keep and render such accounts of all his receipts for such tolls as the Council or the Finance Committee thereof may from time to time direct or require, and shall pay over all such receipts at such times and to such officer of the Council as the said Council may from time to time direct.

SCHEDULE A.

EAST ST. LEONARDS TOLL-GATE.

Situated on the Milsom's Point Road, at the junction of that road and the road to Neutral Bay, opposite the corner of the fence round Brisbane House.

SCHEDULE B.

Three horses or other animals	1	3
Four or more horses or other animals	1	6

PART VI.

STREETS AND PUBLIC PLACES, PUBLIC HEALTH, DECENCY, &c.

New roads to be reported upon.

1. No new public road, street, way, or other place proposed to be dedicated to the public, shall be taken under the charge or management of the Council until after such road, street, way, or place shall have been examined by the Improvement Committee or other Committee appointed for this purpose, and reported upon to the Council by such Committee.

Plan of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the Borough shall open any road, street, or way, or lay out any place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management thereof, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, or other public place as aforesaid.

Dedication of new roads.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record of the Council, and the proprietor or proprietors shall execute such further instrument, dedicating such road, way, or place to public use or recreation as aforesaid, as may be considered necessary by the Council, which said instrument shall be preserved as a record of the Council.

Who to mark out roads, &c.

4. The Surveyor of the Borough, or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for marking out when and where necessary the roads, streets, lanes, and thoroughfares which now are or shall hereafter be under or subject to the care, construction, or management of the Council, and the carriage or foot ways in each of such roads, streets, lanes, or thoroughfares.

No encroachment allowed on streets, &c.

5. Whenever any road, street, or lane has been marked out in manner herein provided, no house, shop, fence, or other structure shall, except as hereinafter mentioned, be allowed to project or encroach on any part thereof. And it shall not be lawful for any person to erect or put up any building, erection, obstruction, fence, or enclosure, or to make any excavation, hole, &c., or opening in, under, upon, or near to any such road, street, lane, or thoroughfare, unless the consent of the Council has been obtained to the erecting or making of any such building, erection, obstruction, fence, or enclosure, excavation, hole, or opening as aforesaid; and every person offending against this By-law shall forfeit and pay for the first offence a sum not exceeding five pounds nor less than forty shillings, and for the second and every subsequent offence a sum not exceeding ten pounds nor less than three pounds.

No balcony, &c., to project more than

6. No balcony shall be erected so as that the same or any part thereof shall project or hang over the footway of any street, road, or thoroughfare which shall be less than forty feet in width; and no balcony which shall project or hang over any street, road, or thoroughfare shall be more than five feet wide nor less than ten feet in height from the bottom of the floor-joists to the proper level of the footway; and every person who shall offend against this By-law shall on conviction forfeit and pay a sum not exceeding five pounds nor less than one pound for every day that such balcony shall be allowed to remain after such conviction.

Footways may be levelled.

7. When any footway shall have been marked out in manner herein directed, the Surveyor or other person as aforesaid may cause the same to be levelled and made as nearly as practicable of equal height and breadth and with an equal slope and inclination, and may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for the said footway.

Encroachments to be removed on notice.

8. The Surveyor or such other officer or person as aforesaid may, at any time, on the order of the Council and upon due notice of thirty days, direct the removal of any building, fence, or other obstruction or encroachment in or upon any road, street, lane, or thoroughfare under the charge of the Council. Notice shall in this case be served either personally, or at the usual or last known place of abode of the person to whom such obstruction or encroaching structure belongs, or who has erected the same or caused it to be erected.

Council may remove at expense of offender, or proceed for breach of By-law.

9. In any case when after service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing or permitting the same shall not remove it within thirty days after the service of the said notice, it shall be lawful for the said Council to direct the removal of the same, under the superintendence of its own proper officer and at the cost of the person so offending (provided that the expenses hereby incurred shall in no case exceed the sum of ten pounds); or at the option of the Council to proceed against the offender for breach of By-law; the penalty for the first offence not to exceed twenty-five pounds nor to be less than twenty shillings, and for the second and every subsequent offence a sum not exceeding twenty-five pounds nor less than five pounds.

Or may proceed by action.

10. In any case where the obstruction or encroachment cannot be removed unless than at a greater cost than ten pounds, it shall be open to the Council either to direct such removal and to pay all the costs thereof above ten pounds from the funds of the Borough, or to proceed by action of trespass against the person causing such obstruction or encroachment.

To apply to obstructions by digging, &c.

11. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation.

The Improvement Committee to fix street levels, &c.

12. The Improvement Committee, or any officer of the Council acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the level of all public roads, streets, and ways within the Borough, and the carriage-ways and footways thereof: Provided that there shall be no change of levels in any such public road, street, or way until the same shall have been submitted to and certified by the Council as hereinafter directed.

Change of street levels.

13. Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, the Improvement Committee shall cause a plan and section showing the proposed cuttings and fillings to be exhibited at the Council Chambers for fourteen days, for the information and inspection of ratepayers, and shall notify by advertisement in some newspaper circulating in the Borough that such plan is open for inspection. At a subsequent meeting of the Council, the said plan and section shall, if adopted, be signed by the Mayor or Chairman of such meeting and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

14. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, gravel, sand, loam, or other material, in or from any part of the carriage or foot way of any street or road, or other public place within the said Borough, without leave first had and obtained from the Council or from the Mayor, or who shall wantonly break up or damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Temporary stopping of traffic for repairs, &c.

15. The Mayor or any officer or person acting under the authority of the Council may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped, for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by destroying or removing any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty or sum of not less than five shillings nor exceeding five pounds for every such offence.

Cellars or openings beneath the surface of footways prohibited.

16. Any person who shall make any cellar, or any opening, door, or window, in or beneath the surface of the footway of any street or public place, unless the plans thereof have been previously submitted to and approved by the Council, and the erections and openings made to the satisfaction of the Council, shall on conviction forfeit and pay the sum of five pounds over and above the expense of filling up or removing such cellar, opening, door, or window.

Holes to be enclosed.

17. Any person who shall dig or make, or cause to be dug or made any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Borough, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever,—or shall erect or pull down any building, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Surveyor or other officer or person as aforesaid,—or shall keep up, or cause to be kept up and continued any such enclosure for any time longer than shall be necessary in the opinion of the Surveyor or other officer or person as aforesaid, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure,—shall forfeit and pay for every such refusal or neglect any sum not less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining the footways to be enclosed, under penalty.

18. Every owner or occupier of any house, building, premises, or land within the said Borough having any entrance, area, garden, or other open space adjoining the footway of any street or public place in such Borough, or any quarry, excavation, or opening in the ground, or any premises within six feet of any such footway or public place, shall protect or guard the same by good and sufficient fences, rails, or other enclosures, so as to prevent danger to persons passing and repassing; and any such owner or occupier of any house, building, premises, or land having any steps adjoining the footway of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent danger to persons passing and repassing; and on failure thereof, any such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not being less than forty shillings nor more than five pounds; and every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid within one week after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wells to be covered over.

19. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall, on conviction, forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

Throwing filth on roads, driving carriages, and leading horses on footways.

20. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or remain, any dead animal, offal, dung, soil, ashes, rubbish, or any other filth or annoyance, or any matter or thing, in or upon the footway or carriage-way of any street, road, lane, or other public place in the said Borough,—or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood shall run or flow upon or over, or be on any such carriage or foot way,—or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon the footway of any street, road, or public place, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast, upon any such footway,—shall, upon conviction, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, and for the second and every subsequent offence a sum not exceeding five pounds nor less than ten shillings.

Throwing filth into watercourses.

21. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning such animal, into any public watercourse, waterhole, bay, creek, or canal, or shall obstruct or divert from its channel any sewer, canal, or water-

course, shall forfeit a sum not exceeding five pounds nor less than ten shillings, and shall, in addition to such penalty, pay the cost of removing such filth or obstruction, or of restoring such watercourse, sewer, or canal to its proper channel.

Damage to public buildings.—Extinguishing lamp, &c.

22. Any person who shall damage any public building, lamp, wall, parapet, sluice, bridge, road, street, sewer, watercourse, or other property of the Borough, or improperly extinguish any lamp set up for public or private convenience, shall pay the cost of repairing the same; and if the same be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds nor less than five pounds, in addition to the cost of repairing the same.

Cleansing private avenues.

23. Any owner or occupier of any house or place who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Placing dead animals on premises.

24. Any person who shall place, or shall cause or suffer to be placed upon any land or premises within the Borough any dead animal, blood, offal, night-soil, or any other offensive matter, so as to become a nuisance to the inhabitants thereof, shall on conviction suffer and pay a penalty not exceeding five pounds nor less than ten shillings for every such offence.

Allowing dead animals to remain on premises.

25. Any owner or occupier of any land or premises who shall suffer or permit any dead animal, blood, offal, night-soil, or any other offensive matter to remain upon the said land or premises after notice shall have been given to remove the same, shall be subject to a penalty not exceeding two pounds nor less than ten shillings for every day that the same shall so remain.

Hog-sties and nuisances not removed on notice, &c.

26. In case any privy, hog-sty, or any sink, cesspool, yard, or enclosure, or any matter or thing which shall at any time be in any place within the Borough, shall be or become a nuisance, it shall be lawful for the Council, after due investigation, by notice in writing to order the removal of the said nuisance within seven days after such notice shall have been given to the owner or occupier of the premises wherein such nuisance is situated, or shall have been left for such owner or occupier at his or her last or usual place of abode or on the said premises; and every such owner or occupier refusing or neglecting to remove or abate such nuisance pursuant to such notice, and to the satisfaction of the Council, shall forfeit and pay a sum not exceeding ten pounds nor less than forty shillings. And it shall be lawful for the Council to indict, or cause to be indicted, for such nuisance, such person so neglecting or disobeying any such notice at the then next Court of General Sessions to be held nearest the Borough; and on such person or persons being found guilty thereof, such nuisance or nuisances shall be removed, taken down, and abated according to the law with regard to public or common nuisances; and the person so offending shall be subject to such punishment for the misdemeanor as the Court shall direct.

Hours for removing night-soil, &c.

27. Any person who shall remove any night-soil or ammoniacal liquor, bones, or other offensive matter, or shall come with carts or carriages for that purpose, between the hours of six o'clock in the morning and eleven o'clock at night, or shall at any time remove any such night-soil or ammoniacal liquor otherwise than in properly covered and water-tight carts or vehicles, or in such a manner so as to upset, cast, spill, or strew any of the said night-soil, ammoniacal liquor, slop, urine, or filth, in or upon, or near to any of the streets, roads, public places, or footways of the Borough,—or shall deposit or throw night-soil, ammoniacal liquor, bones, or other offensive matter, nearer to any street, road, or dwelling-house than shall from time to time be directed by the Council, or by the Inspector of Nuisances, or shall allow vehicles used for this purpose to stand on any premises nearer to any road, street, or dwelling-house than shall from time to time be directed by the Council or Inspector,—shall upon conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound; and in case the person or persons so offending cannot be found, then the owner or owners of such carts, carriages, or other vehicles employed in and about emptying or removing such night-soil, bones, or other offensive matter, and also the employer or employers of the person or persons so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Placing carriages, goods, &c., on footways—Not removing when required.—Replacing the same after removal.

28. Any person who shall set or place, or cause to be set or placed, any stall-board, chopping-block, show-board, basket, wares, merchandise, casks, or goods of any kind whatsoever,—or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any pipe, barrel, cask, or vessel, in

or upon any carriage or foot way, in any street, road, or public place within the Borough,—or shall set, lay out, or place, or cause to be set, laid out, or placed, any coach, cart, wain, waggon, dray, barrow, sledge, truck, or other carriage upon any such carriageway, except for the necessary time of loading or unloading the same, or taking up or setting down any fare, or waiting for passengers when actually hired, or while actually engaged in harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage,—or if any person shall set or place, or cause to be set or placed in, upon, or over any such carriageway or footway, any stone, brick, lime, timber, or other materials or things for building (except as hereinbefore provided),—or who shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or any other matter or thing whatsoever, from any house or premises, over any part of any such footway or carriageway, or over any area of any house or other building or premises, or any other matter or thing, from and on the outside of the house or front, or any other part of any house or houses, or other buildings or premises, over or next unto any such street, road, or public place, and shall not immediately remove the same upon being required so to do by the Council or an officer thereof,—or if any person who having, in pursuance of any such requisition as aforesaid, removed, or caused to be removed, any such stall-board, show-board, chopping-block, basket, wares, merchandise, barrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matter or thing, shall at any time thereafter again set, lay, or place, expose, or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid) in or upon or over any such carriage or foot way of or next unto any such street, road, or public place as aforesaid,—shall upon conviction for every such offence forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, and for the second and every subsequent offence a sum not exceeding five pounds nor less than ten shillings.

Not to prevent the erection of awnings.

29. Nothing in these By-laws contained shall be deemed to prevent any person from placing a movable awning in front of his or her shop or house; provided that such awning be at least eight feet high above the proper level of the footway, and that the posts be kept close up to the kerbstone or outer edge of such footway, and that the said posts and any frame-work be erected to the satisfaction of the Council, and as may from time to time be directed.

Burning shavings, &c., in streets.

30. Any person who shall burn any shavings, rubbish, or any other matter or thing, in any road, street, lane, or public place, or who shall within ten yards from any dwelling-house, burn rags, bones, corks, or other offensive substance, shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Drawing or trailing timber, &c.

31. Any person who shall haul or draw, or shall cause to be hauled or drawn, upon any of the streets, roads, or public places, any timber, stone, or other material or thing, otherwise than upon wheeled carriages or barrows, or shall suffer any timber, stone, or other material or thing which shall be carried principally or in part upon any wheeled carriage or barrow, to drag or trail upon any part of any such street, road, or public place, to the injury thereof, or to hang over any part of such carriage or barrow so as to occupy or obstruct the street or road beyond the breadth of the said carriage or barrow, shall upon conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings over and above the damage occasioned thereby.

Riding in drays, careless driving, &c.

32. If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street, road, or thoroughfare, not having some person on foot to guide the same (such carts as are drawn by one horse and driver, or guided with reins only excepted), or if the driver of any carriage whatsoever shall wilfully be at a distance from such carriage, or in such a situation, whilst it shall be passing upon such street, road, or thoroughfare, that he cannot have the direction and government of the horse or horses, or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare,—or if any person shall in any manner wilfully prevent any other person or persons from passing him, or any carriage under his care, upon such street, road, or thoroughfare, or by negligence or misbehaviour, prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same,—every such driver or person so offending shall upon conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings.

Riding or driving furiously.

33. Any person who shall ride or drive through or upon any street, road, or public place within the said Borough, so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered, shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds.

Swine, &c., not to wander about streets.

34. Any person who shall breed, feed, or keep any kind of swine, in any house, yard, or enclosure, situate and being in or within fifty feet of any street or public place in the Borough, or who shall suffer any kind of swine, or any horse, ass, cattle, mule, sheep, goat, or any other animal of like nature belonging to him or under his charge, to stray or to go about, or to be tethered or depastured in any street, road, or public place within the Borough, shall forfeit and pay for every such offence, a sum not exceeding forty shillings nor less than five shillings: Provided that if after due inquiry shall have been made and the owner thereof cannot be discovered, it shall be lawful for the said Council to cause to be destroyed any swine or goats so straying or injuring property of any description.

Placards not to be affixed on walls, &c., without consent.

35. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, or erection, by chalk or paint, or in any other manner, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall forfeit and pay a sum not exceeding twenty shillings nor less than five shillings.

No rock to be blasted without notice to the Council Clerk.

36. Any person who shall be desirous of blasting any rock within fifty yards of any road, street, public place, or dwelling, shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the Council Clerk, he shall on conviction forfeit and pay for every such offence any sum not less than one pound nor more than ten pounds.

Throwing slops on the carriage and foot ways.

37. Any person who shall cast or throw, or shall cause, suffer, or permit to be cast or thrown upon any footway or carriage-way, any soapsuds, slops, or refuse water, or any refuse vegetables, or any other matter or thing,—or shall cause or suffer or permit the same to run or flow from any premises in his or her occupation over any such footpath or carriage-way—shall, for every such offence suffer and pay a sum not exceeding two pounds nor less than five shillings.

Penalty for not removing offensive matter on notice.—Council may abate nuisances.—Right of entry for such purpose.

38. Any person who shall suffer any waste or stagnant water, or any muck, filth, soil, or other offensive matter, to remain in any cellar or place within any dwelling-house or premises in the said Borough for the space of twenty-four hours after written notice to him from the Inspector of Nuisances or other officer of the Council to remove the same, or shall allow the contents of any water-closet, privy, or cesspool to overflow or soak therefrom, shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than ten shillings, and a further sum of ten shillings for every day during which the offence shall be continued. And the Council may remove, or abate, or cause to be removed or abated every such nuisance, and do what shall be needful for preventing a continuation or recurrence thereof; and the officers of the said Council shall for such purpose have power from time to time to enter any house or premises, and the expense incurred in carrying out the provisions of the By-law shall be repaid to the said Council by the occupier or owner of the premises upon which the same exists, and be recoverable from either of them, together with the penalties aforesaid, and the costs of recovering the same, before any two Justices of the Peace in a summary manner, in pursuance of the provisions of the Act or Acts in force for the time being regulating summary procedure before Justices, in case such occupier or owner, on being summoned before any such Justices as aforesaid, shall neglect or refuse to pay the same.

Cleansing butchers' shambles, &c.

39. For prescribing the cleanliness of the said Borough and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer appointed by the Council, from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shops, soap and candle manufactories, &c., fellmongering establishments, and tanneries, in the said Borough, and to give such directions concerning the cleansing of the same respectively, both within and without, as to him shall seem needful. And any butcher, or the owner or occupier of any such butchers' shops, tannery, manufactory, or establishment, who shall refuse or neglect to comply with such directions

within a reasonable time, shall forfeit and pay a sum not exceeding five pounds nor less than one pound.

Inspection of premises.

40. Upon the reasonable complaint of any householder that the house, premises, yards, closets, or drains of the adjoining or neighbouring premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Inspector may impound.

41. The Inspector of Nuisances, or any other person duly authorized by the Council, shall have the power to impound in the Public Pound all animals of every description found straying in the Borough of East St. Leonards.

Bathing prohibited within certain limits.

42. Any person who shall bathe near to or within view from any inhabited house, or from any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Borough, between the hours of six o'clock in the morning and eight in the evening, shall on conviction forfeit and pay for every such offence a sum not exceeding twenty shillings; and it shall be lawful for any constable to arrest any person who shall be found bathing contrary to the provisions hereof, and such person to convey before any Justice of the Peace, to be dealt with according to law.

Indecent exposure of person.

43. Any person who shall offend against decency, by the exposure of his or her person in any street or public place within the said Borough, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five pounds.

Houses of ill fame.

44. Upon representation by any ratepayer that any house or premises within the Borough and near to the residence of such ratepayer is of ill fame, it shall be lawful for the Mayor to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupation of all the inmates of the said house and premises; and upon non-compliance with such request, or if the Mayor shall consider the house to be one of ill fame, he shall declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice. And if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds. And if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum not less than five pounds nor more than fifty pounds. And if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house, or other person residing or being therein as aforesaid, shall for every such third offence forfeit and pay a sum not less than ten pounds nor more than fifty pounds, and a further sum of ten pounds for every further period of forty-eight hours during which such nuisance shall continue.

Inspector of Nuisances may take legal proceedings.

45. The Inspector of Nuisances may take legal proceedings against any person or persons committing any offence or offences against any of the By-laws of the said Borough.

Penalties to be paid over to Treasurer.

46. All penalties under any of the By-laws shall be paid over to the Treasurer of the Borough, to be appropriated as the Council may direct.

"Mayor" to signify an Alderman acting as Mayor.

47. Whenever in any of the By-laws the word "Mayor" is made use of, it shall, unless the context shall indicate a contrary intention, be construed also to signify and include any Alderman lawfully acting for the time being in the place or stead of the Mayor.

As to interference with officer of Council in enforcing By-laws.

48. Any person who shall obstruct or interfere with any officer of the Council or other person doing or performing any duty or act under any of the By-laws of the said Borough, shall forfeit and pay a penalty not exceeding twenty pounds nor less than two pounds.

Passed by the Municipal Council of the Borough of East St. Leonards, this ninth day of May, A.D. 1872.

EDWD. LORD,

Mayor.

GEORGE L. COLEMAN,
Council Clerk.

1872.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF DARLINGTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 22nd October, 1872.

BOROUGH OF DARLINGTON.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Darlington, for regulating their own proceedings—for the collection of rates—for preventing and extinguishing fires and preventing accidents—for regulating public vehicles and public exhibitions—for the care and management of the public roads and streets—promotion of health and cleanliness—and for the general good rule and government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

36. General definition of nuisances, and who may take proceedings.
37. Penalties to be paid over to the Treasurer.
38. Interpretation of "Mayor" and "Borough."
39. As to interference with an officer of the Council in enforcing these By-laws.

BY-LAWS OF THE BOROUGH OF DARLINGTON.

SUBURBAN TO SYDNEY ON THE SOUTH.

PART I.

PROCEEDINGS OF THE COUNCIL AND COMMITTEES, DUTIES OF OFFICERS, SERVANTS, &c.

1.—General duties of the Mayor or presiding officer.

(1.) The Mayor or presiding officer shall preserve order, and his decision on all disputed points shall be final, but he is to state his decision without argument or comment.

(2.) The Mayor or presiding officer may take part in all the proceedings of the Council.

(3.) The Mayor or presiding officer shall put all questions, and declare the sense of the Council thereon.

(4.) If two or members rise to speak at the same time, the Mayor or presiding Alderman shall decide which member is entitled to pre-audience.

(5.) The Mayor or presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question (except in explanation and without introducing any new matter). The member introducing a motion to have the right of reply, and every member shall have the liberty of speaking once on every amendment as well as on the original motion.

(6.) The Mayor or presiding Alderman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative, and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

2.—Meetings.

(7.) The Council shall meet for the dispatch of business at the hour of 7-30 p.m. on the first Thursday in every month, unless such day shall happen to be a public holiday; in the latter case the meeting shall be held on such other day as the Mayor may appoint.

(8.) If the Mayor be not present within thirty minutes after the time appointed for the meeting of the Council, an Alderman shall be elected Chairman for the time being.

(9.) In the event of a quorum not being present at such meeting within half an hour of the time appointed, the names of the Aldermen present shall be entered in the Minute Book by the Council Clerk, and reported to the next meeting.

(10.) In the months of February and August in each year, the Mayor shall lay before the Council, for its adoption, the Treasurer's account for the previous half-year, duly audited; but should any Auditor not attend for the purpose of auditing the accounts when required by the Council to do so, or refuse to certify to the correctness of the account, unless he can prove to the satisfaction of the Council that the account is incorrect, he shall pay a fine of five pounds nor less than one pound, to be recovered in a summary way before any two Justices of the Peace, the said fine to be carried to the credit of the municipal funds.

(11.) The first business at every monthly meeting of the Council shall be the reading, confirmation, and signing of the minutes of the last preceding meeting; and no discussion (except as to whether they are correct) shall be permitted on such minutes.

Second.—Correspondence to be read, and orders made thereon, if expedient.

Third.—Petitions (if any) to be read and dealt with.

Fourth.—Reports from Committees and minutes from the Mayor (if any) to be presented, and orders made thereon.

Fifth.—Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters or circumstances requiring attention by the Council, or any of the Committees or officers, to be made.

Sixth.—Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.

Seventh.—Orders of the day to be disposed of as they stand on the business paper.

It shall, however, be competent to the Council, by a resolution and without any formal suspension of this section, to direct any particular motion or matter of business to stand over and have precedence at a future meeting.

3.—Special meetings.

At special general meetings of the Council the business shall be conducted in the same manner as at any ordinary meeting; the minutes shall be read and signed, and then the special matter entered on.

4.—Business paper.

Shall be made up for every ordinary meeting of the Council, special or otherwise, at least twenty-four hours before the time appointed for the meeting. The Council Clerk shall state briefly but clearly the nature of the business proposed to be transacted at such meeting: Provided always that at each such special meeting no other business than that for which it has been specially convened shall be dealt with.

5.—The business paper to be a record.

On every business paper, prepared as aforesaid, the Mayor or Chairman shall make a note in writing, stating the order in which the business shall be taken; and such entry shall be a record, which shall not be withdrawn or altered without consent of the Council.

6.—Motions how to be moved.

Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper; and if not so moved or postponed, shall be struck from the paper, and be considered to have lapsed.

7.—*Absence of mover.*

No motion of which notice has been given shall be proceeded with in the absence of the Alderman in whose name it stands, except by a written proxy for that purpose, produced by some other Alderman.

8.—*Motions and amendments how carried.*

No motion or amendment of a motion, or any subsequent amendment, shall be discussed, unless and until such motion, amendment, or subsequent amendment shall have been seconded, nor until the same shall have been reduced into writing; nor shall any second or subsequent amendment be taken into consideration until the previous amendment or amendments shall have been disposed of.

9.—*If amended question carried, a further amendment may be moved thereon.*

If any amendment is carried, the question as amended shall become itself the question before the Council, and any further amendment upon such question then ceases.

10.—*As to further amendments.*

Any member of the Council who shall move an amendment upon an original question, or an original question as amended, may vary the terms of the same, in order to give it consistency, but not so as to alter the meaning thereof, so that no more than one question shall be before the Council at one time.

11.—*Motions for adjournment.*

No discussion shall be permitted on any motion for adjournment of the Council, and if upon the question being put the same is negatived, the subject then under consideration, or the next in order on the business paper, may be proceeded with, and shall be discussed or disposed of before any subsequent motion for adjournment shall be received.

12.—*Orders of the day.*

The orders of the day shall consist of any matter, other than motions on notice, which the Council shall at any previous meeting thereof have directed to be taken into consideration, or which the Mayor shall have directed to be entered on the business paper for consideration.

13.—*How they are to be dealt with.*

The Alderman who has the charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the party called upon to move the same: Provided that the Mayor may, as to any order of the day entered by his direction, arrange with and call upon any Alderman to move the same.

14.—*Petitions to be respectfully worded.*

14. Every Alderman presenting a petition must acquaint himself with the contents thereof, and must ascertain that it does not contain language disrespectful to the Council, and, in presenting it, must state the nature and prayer of it; and such petition shall only be received as that of the parties signing the same.

15.—*How petitions are to be dealt with.*

No motion other than for the reception of a petition shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be referred to a Committee, or that its consideration stand an order of the day for some future meeting: Provided however that, if any Alderman shall have given due notice of a motion in reference to the subject of any petition, or such subject shall have been made an order of the day, and such petition be presented before such motion or order of the day be called on, such order of the day or motion (if otherwise unobjectionable) shall be considered first.

16.—*Correspondence.*

The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 14 of these By-laws is imposed upon Aldermen presenting petitions. If not read, to be returned to the writer, and reported to the Council. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council or any of its officers shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

17.—*Section 15 to apply to letters.*

Section 15 of these By-laws shall be considered as fully applicable to letters addressed to the Council, or any of its officers, as to petitions.

18.—*Reports from Committees.*

Every report from a Committee shall be in writing, and signed by the Chairman of such Committee, or in his absence by some other member of the same.

19.—*Mayor's minutes.*

The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing signed by him.

20.—*How reports, &c., are to be dealt with.*

No motion shall, unless as hereinafter provided, be permissible on the presentation of a report from a Committee, or a minute from the Mayor, except that the same be received or that it be received and that its consideration stand an order of the day for some future meeting: Provided that, if any Alderman shall have given due notice in reference to any such report or a minute, or if the consideration of such report or minute shall have been entered among the orders of the day, such order of the day or such motion, if otherwise unobjectionable, may be moved and considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is desirable that such report or minute should be ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or Member of such Committee signing such report, or of the Mayor as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable the Council Clerk to make the necessary entry on the business paper, and to give such due notice.

21.—*Questions and statements.*

No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 1 No. 5 of this Part of these By-laws; and the same must be put categorically, without argument or statement of fact, and when a statement is made it must be without argument.

22.—*Notice to be given.*

Sufficient notice of every question must be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

23.—*Answer not compulsory.*

It shall not be compulsory upon the Mayor or upon any Alderman so questioned as aforesaid, to answer the question so put to him. And no discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided however that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinafter provided, of any matters properly arising out of or relating to any such question or reply, or refusal to reply, or any such statement as aforesaid.

24.—*Mode of addressing the Council.*

Every Alderman who shall make or second any motion, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall while so doing stand up in his customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Mayor or officer to be questioned, and may be replied to in like manner. But in every such case, the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy; and all members of the Council shall on all occasions when in such Council address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be. And no Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as after provided.

25.—*Limitation as to number of speakers, &c.*

Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

26.—*Mover and seconder.*

An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without

any further observation than that he seconded the same shall be at liberty to speak on such motion or amendment; but he must not digress from the subject under discussion, nor make personal reflections on, nor impute improper motives to any other Alderman.

27.—*Adjournment of debate.*

A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to precedence on the resumption of the same.

28.—*Mayor to decide as to pre-audience or order.*

If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard, and upon all disputed points of order his decision shall be final.

29.—*Mayor may address the Council.*

The Mayor shall have the same right as any other Alderman to speak upon every subject or amendment.

30.—*Mayor may call Member to order, decide points of order or reject them.*

The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor, there shall be a necessity for so doing. And when called upon to decide points of order or practice, he shall state the provision, rule, or practice which he deems applicable to the case, without discussing or commenting upon the same; and whenever it shall be decided that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected.

31.—*How questions to be put.*

The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon.

32.—*Divisions—Penalty for refusing to vote.*

Any Alderman may call for a division, and the vote shall be taken by show of hands, and the names and votes of the Aldermen present when a division is called for who shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

33.—*Rules applicable to business in Committees.*

Sections 6, 12, 13, 14 and 15 of this Part of these By-laws shall be taken to apply to the business in Committee of the whole Council, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

34.—*How call of the Council to be made.*

A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any notice or matter of business before such Council. And no motion the effect of which if carried would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

35.—*Mode of proceeding.*

The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered. The Council Clerk shall call the names of all the members in alphabetical order, and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have been previously granted, or if such an excuse in writing shall have been received by the Mayor or Council Clerk as the majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

STANDING AND SPECIAL COMMITTEES.

36.—*Standing Committees.*

Besides such special Committees as may from time to time be found necessary, there shall be two standing Committees of the Council, each consisting of not less than three members, namely:—"A Finance Committee," and "An Improvement Committee."

37.—*Finance Committee.*

The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues; they shall inquire and report from time to time as to all matters which they may consider to affect the finances of the Borough, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

38.—*Improvement Committee.*

The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

39.—*Chairman of Committees.*

Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, who may direct the Council Clerk to call meetings whenever he shall think it desirable.

40.—*Costs of works to be estimated before they are undertaken.*

No works affecting the funds of the Borough, except as hereinafter is mentioned, shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

41.—*Cases of emergency and current expenses.*

In cases of emergency the Mayor may authorize the expenditure of any sum not exceeding five pounds, and such expenditure shall be reported to the Council at the next meeting, and the Mayor may order the payment of wages of labour for officers, servants, and labourers employed at fixed rates of payment by order of the Council.

42.—*Completion of work to be reported by Improvement Committee.*

No works undertaken by the Council shall be deemed to have been completed, and no order shall be made for the payment in full of the same, except upon a report or certificate to that effect from the Improvement Committee.

43.—*Common Seal how secured.*

The Common Seal shall be secured by a cover or box, which shall be kept at the Council Chambers in the custody of the Council Clerk. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk.

44.—*When and how Seal to be used.*

The Seal of the Corporation shall not be affixed to any document without the express authority of the Council, and every impression thereof so authorized shall be verified by the signature of the Mayor, or in case of the illness or absence of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

45.—*How books of account, &c., are to be kept.*

All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers, in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same, but the Mayor may for any special purpose authorize their removal.

46.—*Books, &c., not to be exposed to view or shown without leave.*

No member or officer of the Council, without the written permission of the Mayor, shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, unless as otherwise provided by law.

47.—*Penalty.*

Any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than five shillings nor more than pounds.

48.—*Records not to be removed.*

Any person removing any such book, paper, or record from the Council Chambers without leave from the Mayor, in writing, first had and obtained, shall be subject to a penalty of not less than ten shillings nor more than ten pounds; and nothing herein contained shall be held to affect the further liability of any person who shall have removed such book, paper, or record, and shall not have returned the same, to prosecution for stealing such book, paper, or record, or to an action at law for detention of the same, as the circumstances of the case may warrant.

49.—*Penalty for defacing or destroying records.*

Any person destroying, defacing, or wilfully and improperly altering any books, papers, or record, shall for every such offence be liable to a penalty of ten pounds nor less than five pounds.

50.—*Bonds for good conduct.*

All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited in such custody as the Council may order; and no member, officer, or servant of the Council shall be received as a surety for any officer or servant.

51.—*Duties of Council Clerk.*

The Council Clerk shall perform all the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder, he may be required to perform. He shall be the Clerk of all Revision Courts held in the Borough under the provisions of the Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council, and shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

52.—*Special powers of Mayor.*

The Mayor may from time to time define the duties of all officers and servants of the Corporation, and shall exercise a general supervision over all such officers and servants, and may order the preparation of any such return or statement, or the giving of any such information by any such officer or servant, as he may think necessary, unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information.

53.—*Drafts of intended By-laws.*

A draft of any intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same.

54.—*Motions for rescission of previous orders.*

Whenever a motion, the effect of which, if carried, would be to rescind any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion.

55.—*Suits and prosecutions for penalties.*

Suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute the operation of which may have been extended to the Borough, shall be commenced and laid as follows, namely:—When against a member of the Council, or any Auditor, or any officer of the Corporation, by such officer as shall be named for that purpose by the Council; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by such officer or person as shall be appointed for that purpose by the Council or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council except on the order of the Council or of the Mayor. And the conduct or prosecution of any suit or information may, on the order of the Council or of the Mayor, be entrusted to an attorney.

56.—*Power to suspend temporarily certain portions of these By-laws.*

Any of the foregoing By-laws which relate to or affect the proceedings at meetings of the Council, may be suspended *pro tempore* without notice in cases of emergency, if all the members of the Council then present shall deem such suspension necessary

PART II.

COLLECTION AND ENFORCEMENT OF RATES.

1.—*Rates when due and payable.*

All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

2.—*When payable.*

All such rates shall be paid at the Council Chambers during the hours appointed by the Council for that purpose, being the ordinary office hours of the Council.

3.—*Defaulters.*

Every person not paying his or her rates as aforesaid, within thirty days after any of the days so appointed for payment thereof, shall be deemed a defaulter; and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

4.—*Mayor to enforce payment.*

It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distraint upon the goods and chattels of the defaulters.

5.—*Bailiff—how appointed—and his duties.*

The Bailiff of the Borough shall be appointed by the Council, and may at any time be removed by them. It shall be the duty of the Bailiff to make levies by distraint for the recovery of rates in the manner hereinafter provided.

6.—*Warrant of distress.*

All levies and distresses shall be made under warrant under the hand of the Mayor, or of any Alderman who may for the time being be authorized to perform the duties of that office, such warrant to be in the form or to the effect as in the Schedule hereunto annexed marked A.

7.—*Inventory.*

At the time of making a distress the Bailiff shall make a written inventory in the form or to the effect as in the Schedule hereunto annexed marked B, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distressed, or to some person resident in the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall deliver a copy of such inventory to the Council Clerk.

8.—*Distress and sale, &c.*

It shall be lawful for the Bailiff or his deputy, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which such rate or rates shall have been made as aforesaid, and distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof. And if the sum for which any such distress shall be made or taken, together with the costs of such distraint, shall not be paid on or before the expiration of the following day, the Bailiff or his deputy may between the hours of eleven in the morning and two in the afternoon on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Borough as the Bailiff may think proper to remove them to for such purpose, and shall pay over the surplus (if any) that may remain, after deducting the amount of the sum distrained for and the costs of such distraint, to the owner of the goods so sold on demand by such owner.

9.—*Goods may be impounded.*

The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods and chattels so distrained, of what nature or kind soever, in such part of the land or premises chargeable with the rate, or in such other place as shall be most fit and convenient for that purpose; and it shall be lawful for any person whomsoever, after the expiration of the following day hereinbefore mentioned, to come and go to and from such part of the said land and premises where such goods and chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same, on account of the purchaser thereof.

10.—*Owner to direct order of sale.*

The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such directions.

11.—*Proceeds of distress.*

The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within *twenty-four hours* after having received the same.

12.—*Deputy.*

The Bailiff may, with the sanction, in writing, of the Mayor, or, in his absence, with that of the Treasurer of the Borough, authorize by writing under his hand any person to act temporarily as his deputy, and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

13.—*Costs.*

There shall be payable to the Bailiff, for every levy and distress made under these By-laws, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

WARRANT OF DISTRESS.

I, _____ Mayor of the Borough of Darlington, hereby authorize you _____ the Bailiff of the said Borough, or your deputy, to distrain the goods and chattels in the dwelling-house, or in or upon the land or premises of _____ situate at _____, for £ _____, being the amount

of rates due to the said Borough, up to the _____ day of _____, for the said dwelling-house, land, or premises, as the case may be, together with the costs of this distraint, and to proceed thereon for the recovery of the said rates and costs, according to law.

Dated this _____ day of _____, 18____, Mayor.

SCHEDULE B.

INVENTORY.

I have this day, by virtue of the warrant under the hand of the Mayor of Darlington, dated _____, of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house, or in or upon the land or premises of _____, situate at _____, within the said Borough, for £ _____, being the amount of rates due to the said Borough to the _____ day of _____, and also the costs of this levy.

Dated this _____ day of _____, 18____, Bailiff.

SCHEDULE C.

COSTS.

	s.	d.
For making every entry and inventory	2	6
For man in possession for a period longer than two hours	6	0
For man in possession every other day or part of a day	6	0
For sale and delivery of goods, one shilling in the pound on the gross proceeds of the sale, in addition to the costs of advertisements (if any).		

PART III.

1.—Preventing and extinguishing fires, preventing accidents.

Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger any buildings, shall on conviction for every such offence forfeit and pay a sum of not more than five pounds nor less than one pound, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

2.—Setting fire to matter without notice.

Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air, within five yards of any dwelling-house or other building, or boundary or dividing fence, without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be of his intention so to do, between the hours of 6 p.m. of any day to 6 a.m. of the following day, shall for every such offence forfeit a sum of five pounds nor less than one pound.

3.—Fireworks.

Every person who shall discharge any fire-arms without lawful cause, or who shall light any bonfire, tar-barrel, or fireworks, upon or within ten yards of any public street or private way, or any public place, or shall sell gunpowder or other matter of a dangerous or combustible nature, or erect any kerosene or chemical works within the boundaries of the Borough, shall for every such offence be liable to a penalty of two pounds nor less than two shillings and sixpence.

4.—Wilfully setting fire to chimneys.

Every person who shall wilfully set or cause to be set on fire any chimney, flue, smoke-vent, or stovepipe, shall for every such offence be liable to a penalty of two pounds nor less than ten shillings. Provided that nothing herein contained shall exempt the party offending from liability to a criminal prosecution.

5.—Negligently suffering chimneys to be on fire.

If any person, through the omission, neglect, or carelessness of the occupier his agents or servants of any premises within the limits of this Borough shall be on fire, the party occupying the same shall be liable to a penalty of one pound nor less than five shillings. Provided that it shall be competent to the party incurring such penalty to prove to the satisfaction of the Justices that the same did not arise from omission, neglect, or carelessness.

6.—Persons assisting in extinguishing fires.

In the event of fire, every means shall be taken by the Council its officers and servants for extinguishing the same, and they or any of them may call upon the licensed waterman having the care of the water supply within the said Borough to aid by all means in his power in extinguishing the same, and for that purpose there shall be paid to him or to any person extinguishing the same, out of the funds of the Council, a reasonable compensation, and to each of the fire-engines having priority of attendance thereat, and acting in extinguishing the same, such further sum by way of reward as to the said Council by resolution shall seem meet.

PART IV.

1.—Licensing public vehicles.

All owners of vehicles plying for or carrying passengers or goods for hire within the said Borough shall be licensed by the Council, and the owners shall have their names painted in legible letters, with the word "licensed" on some conspicuous part of such vehicles respectively. The license fee shall be at the rate of one pound ten shillings per wheel per annum, and be in force until the first day of January in each year. And every owner who shall omit or fail to comply with the provisions of this By-law shall be liable to a penalty of one pound nor less than five shillings for every such offence.

SCHEDULE REFERRED TO IN THIS BY-LAW.

2.—Certificate.

No. _____ Municipal Council Chambers, Darlington, 18____.

This is to certify that _____, of _____, the owner of the public vehicle called _____, licensed by the Municipal Council of the City of Sydney, and now numbered _____ according to such license, has paid the sum of _____, being the charge required by the By-laws of this Borough to be paid for such public vehicle for the period of twelve months; and that the said public vehicle is authorized to ply or carry passengers for hire within the said Borough until the _____ day of _____ next.

C. H.,
Council Clerk.

PART V.

PUBLIC EXHIBITIONS.

1.—Exhibitions, &c., to be licensed.

No exhibition other than such as may be licensed under the provisions of the Act 14 Victoria No. 3, or exhibitions of a temporary character hereinafter specially provided for, shall be held or kept for hire or profit within the said Borough, nor shall any bowling alley or other place of public amusement, other than a place licensed as aforesaid or a place for temporary amusement hereinafter specially provided for, be used as such for hire or profit within the said Borough, unless and until the same shall be duly registered as hereinafter prescribed.

2.—Temporary license by Mayor.—Penalty for exhibition, &c., without license.

The Mayor may, by writing under his hand, permit any such exhibition as aforesaid, other than any exhibition requiring to be licensed under the said Act for not more than one week, and in like manner, and for a like time, may allow any place to be used for public amusement, other than for entertainments requiring to be licensed as aforesaid; and every person holding or keeping any such exhibition, or using any place within the said Borough for public amusement as aforesaid, without such permission of the Mayor, shall forfeit and pay a sum of not more than £1 nor less than 5s., for every day that such exhibition shall be so held or kept or such place shall be so used for public amusement as aforesaid.

3.—Buildings, &c., to be registered.

Every occupier of any building or ground in which any exhibition is held or kept, or any public amusement conducted as aforesaid, shall in each year register at the office of the Council such building or ground, and a description of the exhibition or public amusement proposed to be held, kept, or conducted as aforesaid, and the name of such occupier; and every person who causes, and every occupier of any building or land who permits any such exhibition or public amusement to be held, kept, or conducted for more than one week in or upon any such building or land not registered for the purpose, or without having obtained a certificate of registration as hereinafter mentioned, shall forfeit and pay for every such offence a sum not less than £2 nor more than £5.

4.—Certificate of registration.

The Council, upon the written application of any such occupier as aforesaid, stating the particulars aforesaid, may cause the aforesaid premises to be registered, and grant to the applicant a certificate of such registration, unless upon

inspection the building or land shall be found to be unsuitable for the purpose of such exhibition or amusement, or unless it appear to the Council that such exhibition or amusement is likely to entail any violation of public decency, or to endanger the public peace, or be a nuisance to any inhabitant of the Borough.

5.—*Inspection.*

Any officer or person appointed for that purpose by the Council may at all reasonable times enter into, or upon, and inspect any such registered building or land.

6.—*No exhibitions, &c., on Sundays, &c.*

No such exhibition or place of public amusement as aforesaid shall be held or kept open or used for the purposes of such public amusements on Sunday, Christmas Day, or Good Friday; and every person offending against this By-law shall, on conviction, forfeit and pay a sum not to exceed £5 nor less than £1 for every such offence.

7.—*Registration fee, &c.*

For every registration as aforesaid the occupier of the building or land so registered shall pay to the Council Clerk for the benefit of the Borough a fee of £1; and every such registration, whenever the same may be made, shall (subject to the power of suspension and cancellation hereinafter contained) be in full force until the 31st day of December thence next ensuing and no longer.

8.—*Suspension or revocation of license.*

The effect of any such registration as aforesaid may be suspended, or such registration may be cancelled, as the Council shall think fit, for any of the following causes, namely:—Whenever the occupier of the registered building or land, or the manager of any such exhibition or amusement as aforesaid, held, kept, conducted, or carried on in or upon any such building or ground, shall have been twice convicted of offences against these By-laws within a period of twelve months; or whenever it shall be shown to the satisfaction of the Council that the superintendent, director, manager, or other person in charge of any such exhibition or amusement is a confirmed drunkard; or that any such exhibition or amusement is being conducted in such a manner as to violate public decency, to endanger the public peace, or to become a nuisance to any inhabitant of the said Borough: Provided that before such suspension or cancellation as aforesaid, such occupier shall have notice that the Council is about to consider whether there shall be any such suspension or cancellation, and of the causes for this proceeding, and shall be allowed to show cause against the same.

9.—*Gaming, cruelty to animals, &c., prohibited.*

No license shall be granted as aforesaid to or for any building or land wherein or whereon any games with dice, or any other game of chance for money, or other exhibitions or amusements opposed to public morality, or involving cruelty to animals, or likely to cause a breach of the peace, are proposed to be had, held, or carried on; and the occupier of any building or land so registered as aforesaid who shall permit any such game of chance, or exhibition, or amusement, as are in the section before mentioned, to be had, held, or carried on, in or upon such building or land, shall for every such offence forfeit and pay a sum of not less than ten shillings nor more than two pounds.

10.—*Construction of term occupier—change of occupancy.*

Any person who shall superintend, direct, or manage, or shall be otherwise in charge of any such exhibition or public amusement as aforesaid, in or upon any such building or land as aforesaid, or who shall reside in or upon any such building or land wherein or whereon any such exhibition or public amusement shall be held, kept, or carried on, or who, whether resident thereon or not, shall use any such building or land for the purposes of any such exhibition or public amusement, shall be deemed the occupier of such building or land for all the purposes of these By-laws; and the said By-laws shall be held and be as applicable in every case to any number of such occupiers as to any single occupier, and every such occupier whose name shall have been so registered as aforesaid shall be deemed and taken to be, and continue such occupier for all the purposes of these By-laws: Provided that in the event of any change in the occupancy of any such building or land as aforesaid, the parties concerned shall notify the same in writing to the Council Clerk, and if after such inquiry as the Council may deem necessary, there shall appear no valid objection to such change of occupancy, an entry thereof shall be made in the Registry, and a new certificate shall be issued, which, subject as aforesaid, shall be in force until the then next thirty-first day of December and no longer; and for every such certificate a fee of five shillings shall be paid to the Council Clerk for the benefit of the Borough; and any person who shall make any false statement in any such notice or application as aforesaid as to any of the facts or particulars required by these By-laws to be stated in such application or notice, shall for every such offence forfeit and pay a sum of not less than £1 nor more than £5.

PART VI.

STREETS AND PUBLIC PLACES, PROMOTION OF HEALTH AND CLEANLINESS, AND THE GENERAL GOOD GOVERNMENT OF THE BOROUGH.

1.—*New roads to be reported.*

No new road, street, way, or other public place, proposed to be dedicated to the public, shall be taken under the charge or management of the Council until after such road, street, way, or place shall have been examined by the Improvement Committee, or other Committee appointed for that purpose, and reported upon to the Council by the said Committee.

2.—*Who are to mark out roads, &c.*

A special Surveyor, or other person duly authorized by the Council in that behalf, shall be the proper officer for marking when and where necessary the roads, streets, lanes, and thoroughfares, which now are or shall hereafter be subject to the care, construction, or management of the Council, and the carriage and footways in such roads, streets, lanes, or thoroughfares.

3.—*Footways may be levelled.*

When any footway has been marked out by the Surveyor, or other authorized officer of the Council, he may authorize the same to be levelled in accordance with the plan, and for that purpose may remove any flagging, steps, or other matter or thing that may obstruct or injure, or tend to obstruct or injure the said footway, or render it unequal or inconvenient; and no person or persons hereafter may erect or place any matter or thing that can obstruct or injure the same in any of the streets, roads, or ways of the Borough, without the sanction of the Council first had and obtained, under a penalty of two pounds nor less than ten shillings.

4.—*The Improvement Committee to fix street levels, &c.*

The Improvement Committee, or any officer of the Council acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the level of all public roads, streets, and ways within the Borough, and the carriage-ways and foot-ways thereof: Provided that there shall be no change of levels in any such public road, street, or way, until the same shall have been submitted to and certified by the Council as hereinafter directed.

5.—*Change of street levels.*

Whenever it may be deemed necessary to alter the levels of any such public road, street, or way, as aforesaid, the Improvement Committee shall cause a plan or section showing the proposed cuttings and fillings to be exhibited at the Council Chambers for fourteen days, for the information and inspection of ratepayers, and shall notify by advertisement in some newspaper circulating in the Borough that such plan is open for inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman of such meeting, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

6.—*Notice in writing of proposed buildings must be given.*

No person shall be permitted to erect any house, shop, or other building, in any street, lane, or place within the Borough, without first serving notice, in writing, on the Mayor or Council Clerk before commencing the same, stating his intention, and describing the proposed situation of the building or erection, nor without having received an authority from the Mayor or Council, in order that they may inspect the same, and give the required level and alignment (for which a fee of 2s. 6d. may be taken): Provided always, if such erection shall only be required temporarily for exhibition or public amusement, a like certificate under the hand of the Mayor must be first had, binding the party or parties seeking the privilege not to extend the same to other purposes than that mentioned therein, under a penalty of one pound and removal of the erection.

7.—*No encroachment allowed on streets, &c.*

Whenever any road, street, or lane has been marked out, no erection of any description shall be allowed to project or encroach on any part thereof; and any person erecting or causing to be erected any building, balcony, verandah, fence, or enclosure, abutting on such road, street, or lane, without the consent of the Council first had and obtained for that purpose, shall be liable to a penalty of one pound nor less than five shillings.

8.—*No balcony to project beyond defined limits.*

No balcony shall be erected so as to project or hang over the footway of any street, road, or thoroughfare which shall be more than five feet wide, nor less than ten feet high from the bottom of the floor-joists to the proper level of the footway, under a penalty of five pounds nor less than one pound.

9.—*No turf or gravel, &c., to be removed from streets without permission.*

Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, gravel, land, loam, or other material, in or from any part of the carriage or foot way of any street or road, or any reserve, or other public place within the said Borough, without leave first had and obtained from the Council or from the Mayor, or who shall wantonly break up or damage any such carriage or foot way, shall, on conviction, forfeit and pay for every such offence a sum not exceeding one pound nor less than five shillings.

10.—*Temporary stoppage of traffic for repairs, &c.*

The Mayor, or any officer or person acting under the authority of the Council, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling in such street, lane, or thoroughfare, or by destroying or removing any obstruction that may be placed thereon for the purpose of suspending the traffic, shall be liable for every such offence to a penalty of one pound nor less than five shillings.

11.—*Cellars or openings beneath the surface of foot-ways prohibited.*

Any person who shall make any cellar, or any opening, door, or window, in or beneath the surface of the footway of any street or public place, unless the plans thereof have been previously submitted to and approved by the Council, and the erections and openings made to the satisfaction of the Council, shall, on conviction, forfeit and pay the sum of five pounds nor less than one pound, over and above the expense of filling up, remedying, or removing such cellar, opening, door, or window.

12.—*Holes to be enclosed.*

Any person who shall dig, or make, or cause to be dug or made any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Borough, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith inclose the same, and keep the same inclosed, in a good and sufficient manner, to the satisfaction of the Surveyor, or other officer or person as aforesaid, or shall keep up or cause to be kept up and continued any such inclosure for any time longer than shall be necessary, in the opinion of the Surveyor or other officer or person as aforesaid, and shall not place lights upon each side of the said inclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such inclosure,—shall forfeit and pay for every such refusal or neglect a sum of not less than five shillings nor more than two pounds.

13.—*Open spaces and steps adjoining the footways to be enclosed.*

Every owner or occupier of any house, building, premises, or land within the said Borough having any entrance, area, garden, or other open space adjoining the footway or public place in such Borough, or any opening in the ground or any premises, within six feet of any such footway or public place, shall protect or guard the same by good and sufficient fences, rails, or other inclosures, so as to prevent danger to persons passing and repassing; and every such owner or occupier of any house, building, premises, or land, having any steps adjoining the foot-way of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other inclosures, so as to prevent danger to persons passing and repassing, and on failure thereof any such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not less than five shillings nor more than two pounds; and every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other inclosures as aforesaid, within one week after such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

14.—*Wells to be covered over.*

Every person who shall have a well situated between his or her dwelling-house or the appurtenances thereof, and any road, street, or footway, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway, within the said Borough, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within forty-eight hours after notice in writing shall have been given to him or her by any officer of the Council, or shall have been left for such person at his or her last known place of abode, or on the said premises, shall on conviction forfeit and pay the sum of one pound nor less than five shillings; and for every day after such notice that such well shall remain open or uncovered contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

15.—*Throwing filth on roads, driving carriages and leading horses on foot-ways.*

Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or remain, any dead animal, offal, dung, soil, ashes, rubbish, or any other filth or

annoyance, or any matter or thing, in or upon the foot-way or carriage-way of any street, road, lane, or other public place within the said Borough, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood shall run or flow upon or over, or be on any such carriage or foot way,—or shall run, roll, drive, draw, place or cause, permit or suffer to be run, rolled, driven, drawn or placed upon the foot-way of any street, road, or public place, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow or truck, or any hogshead, cask, or barrel,—or shall wilfully lead, drive, ride, or stand any horse, mule, or other beast upon any such footway,—shall upon conviction forfeit and pay a sum of two pounds nor less than two shillings and sixpence.

16.—*Throwing filth into watercourses.*

Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning the same, into any public watercourse, waterhole, or creek, or shall obstruct or divert from its channel any sewer or watercourse within the said Borough, shall forfeit a sum of one pound nor less than five shillings, and shall, in addition to such penalty, pay the cost of removing the same, and restore such sewer, watercourse, and creek to its proper channel, in so far as he, she, or they may have injured the same.

17.—*Throwing slops on the carriage or foot ways.*

Any person who shall cast or throw, or shall cause, suffer, or permit to be cast or thrown upon any carriage-way or foot-way, any soapsuds, slops, or refuse water, or any refuse vegetables, or any other matter or thing of an offensive nature, or shall cause, or suffer, or permit the same to run or flow from any premises in his or her occupation over any such foot-path or carriage-way within the said Borough, shall, for every such offence, suffer and pay a sum not exceeding one pound nor less than two shillings and sixpence.

18.—*Rain to be diverted from the foot-paths.*

It shall not be lawful for any person whomsoever to carry, by means of pipes, gutters, or other contrivances, any rain-water from the roof of his or her premises or house, upon any of the foot-ways of any street or public place within the said Borough; and any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances, when required to do so by any officer of the said Council, shall, on conviction, forfeit and pay any sum not exceeding two pounds nor less than five shillings: Provided that the owner or occupier of any such house or premises may convey any such rain-water by means of pipes laid under the surface of any such foot-ways into the gutters adjoining the same, subject to the approval of the Improvement Committee.

19.—*Placing goods on foot-paths and not removing them when required.*

No person shall set or place any goods upon any carriage or foot-way in any street, road, or place within the Borough, nor shall cause the same to be placed or laid out on any cart, waggon, or truck, so as to be an obstruction to the carriage or foot way, and shall not remove the same when requested to do so by the proper officer of the Council, shall be liable to a penalty of one pound nor less than two shillings and sixpence.

20.—*Not to prevent the erection of awnings.*

Nothing in these By-laws contained shall be deemed to prevent any person from placing a movable awning in front of his or her shop or house: Provided that such awning be at least eight feet high above the proper level of the footway, and that the posts be kept close up to the kerbstone or outer edge of such footway, and that the said posts and any framework be erected to the satisfaction of the Council, and as may from time to time be directed.

21.—*Damage to public works.*

Any person who shall damage any building, lamp, wall, parapet, sluice, bridge, road, street, sewer, watercourse, or any other property of the Council of the said Borough, or extinguish any lamp set for public or private convenience, shall pay the cost of repairing the same, and if wilfully done shall forfeit and pay a sum of two pounds nor less than five shillings in addition to the cost of repairing the same.

22.—*Drawing or hauling timber.*

Any person who shall haul or draw any timber or other material tending to injure, or that shall injure any road, street, or way within the Borough, or that shall obstruct such road, street, or way, shall, on conviction, pay a sum not exceeding two pounds nor less than five shillings over and above the amount of damage occasioned thereby.

23.—*Riding or driving furiously, breaking horses, &c.*

Any person who shall ride or drive furiously, so as to endanger the life or lives of any person or persons within any of the streets, roads, or ways of the Borough, or shall break any horse, or shall drive any carriage for the purpose of breaking in such horse or horses, to the danger of the passengers in

any street, road, or way within the Borough, shall for every such offence pay any sum not exceeding two pounds nor less than five shillings.

24.—*Swine, &c., not to wander about the streets.*

Any person who shall breed, feed, or keep any kind of swine in any house, yard, or inclosure, situate and being within twenty yards of any street, road, or place within the Borough, or shall suffer the same to stray or go about, or be tethered or depastured in any street, road, or place within the Borough, shall for every such offence forfeit and pay a sum of two pounds nor less than five shillings; and the Inspector of Nuisances, or other officer authorized by the Council, may impound the same.

25.—*Burning shavings, &c., in the streets.*

Any person who shall burn any shavings, rubbish, or any other matter or thing dangerous or offensive, in any street, road, or way within the Borough, or who shall within ten yards of any dwelling-house burn rags, bones, corks, or other offensive substance, shall for every such offence forfeit and pay a sum of one pound nor less than two shillings and sixpence.

26.—*Placards not to be affixed on the walls without consent.*

It shall not be lawful for any person to paste or otherwise fix any placard or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, or erection, by chalk or paint, or in any other manner deface, unless with the consent of the owner thereof, under a penalty of one pound nor less than two shillings and sixpence for every such offence.

27.—*Cleansing private avenues.*

Any owner or occupier of any house or place who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance, shall for every such offence pay a sum of one pound nor less than two shillings and sixpence.

28.—*Placing dead animals on premises.*

Any person who shall place, or who shall cause or suffer to be placed upon any land or premises, or on any of the roads, streets, or ways of the Borough, any dead animal, blood, offal, night-soil, or any other offensive matter, so as to become a nuisance to the inhabitants thereof, shall for every such offence pay a sum of two pounds nor less than five shillings. And every person who shall suffer the same to remain upon their said premises so as to be a nuisance, shall also be subject to a penalty of two pounds nor less than five shillings, and shall be bound to remove the same.

29.—*Hog-sties and nuisances not removed after notice.*

In case any privy, hog-sty, sink, cesspool, yard, or enclosure, or any matter or thing of an offensive nature, shall at any time be in any road, street, or way, or in any other place within the Borough, so as to be a nuisance to the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, by notice in writing to be served upon the occupier or upon the premises, to order its removal within seven days; and every such owner or occupier refusing or neglecting to remove or abate such nuisance, shall for every such offence pay a sum of one pound nor less than two shillings and sixpence.

30.—*Removing night-soil at unreasonable hours.*

Any person who shall remove any night-soil or other offensive matter within the hours of six o'clock in the morning and eleven o'clock at night, or shall fail to remove the same in properly covered water-tight carts or vehicles, or in such a manner as to upset, cast, spill, or strew any of the said night-soil, slop, urine, or filth, in, upon, or near to any of the streets, roads, or ways of the Borough, or shall throw any such offensive matter in, upon, or near to the same, or shall suffer the same to remain for twenty-four hours in any such street, road, or place, shall for every such offence pay a sum of two pounds nor less than five shillings: Provided always that the employer or employers of the person or persons so offending shall be the party or parties liable to such penalty.

31.—*Penalty for not removing offensive matter on notice.—Council may abate it.—Right of entry for such purpose.*

Any person who shall suffer any waste or stagnant water, or any muck, filth, soil, or other offensive matter to remain in any cellar or place within any dwelling-house or premises within the said Borough, for the space of twenty-four hours after written notice to him from the Inspector of Nuisances or other officer of the Council to remove the same, or shall allow the contents of any water-closet, privy, or cesspool to overflow or soak therefrom, shall for every such offence forfeit and pay a sum of two pounds nor less than five shillings, and the like sum for every day that the same shall remain after such notice: And the Council may remove or abate the nuisance at the costs of the party or parties offending in the premises: Provided always that the employer or employers of the person or persons so offending shall be liable to and pay the penalty as aforesaid.

32.—*Inspection of premises.*

Upon the reasonable complaint of two or more householders, that the house, premises, yard, closet, or drains of the adjoining or neighbouring premises are a nuisance or offensive, the Inspector of Nuisances, or other authorized officer of the Council, shall make an inspection of the premises complained of; and he shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

33.—*Indecent exposure of person.*

Any person who shall offend against decency, by the exposure of his or her person in any street or public place within the said Borough, or in the view thereof, shall, on conviction, forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

34.—*Houses of ill fame.*

Upon the complaint of two or more respectable ratepayers that the house or neighbouring or adjoining premises is of ill fame, it shall be lawful for the Mayor or any Alderman to cause the residents of such house or premises to furnish to the Council a list of the names, ages, sex, birth-place, and occupation of all the inmates of the said house or premises; and upon non-compliance with such request, or if upon consideration the Mayor and any Alderman consider the house to be one of ill fame, they shall, with the sanction of the Council, declare the same to be a nuisance, and the Mayor shall cause a notice in writing to be served upon the holder of such house or premises, or other person residing or being therein, and acting as such holder, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice, otherwise such holder or other person shall be liable to a penalty of not more than five pounds nor less than two pounds for every such offence.

35.—*Noisome and offensive trades.*

No person shall carry on any noisome or offensive trade within the said Borough, so as to injure or be a nuisance to the inhabitants thereof.

Any manufacture, trade, or calling, the carrying on of which is attended with injurious effects to animal or vegetable life, or whereby any effluvia of a dangerous nature shall be evolved, shall be deemed a nuisance within the meaning of these By-laws; and the Inspector of Nuisances, or any officer appointed by the Council, may inspect the same, and if found to be dangerous, he may, by notice in writing served upon the occupier or upon the premises, call upon him or them to abate the same within seven days from the service thereof; and if the same is not abated within such time, the occupier of the premises where the same is carried on shall be liable to a penalty of five pounds nor less than two pounds for every such offence.

36.—*General definition of nuisances, and who may take proceedings.*

And, generally, anything that by definition of law can be held or construed to be a nuisance within the meaning of the Municipalities Act of 1867, or otherwise, according to the principles of the common law on which the Municipal is based, shall be deemed a nuisance, it shall be in the power of the Council to cause inquiry to be made, and the Inspector of Nuisances, or other officer appointed by the Council for that purpose, may take legal proceedings for the abatement of the same, and the party or parties offending therein shall be liable to a penalty of two pounds nor less than two shillings and sixpence for every such offence.

37.—*Penalties to be paid over to the Treasurer.*

All penalties under any of these By-laws shall be paid over to the Treasurer of the said Borough, to be appropriated as the Council may think fit.

38.—*Interpretation of Mayor and Borough.*

Whenever, in any of these By-laws, the word "Mayor" is made use of, it shall, unless the context shall indicate a contrary intention, be construed also to include and signify any Alderman lawfully acting for the time being for such Mayor; and whenever the word "Borough" is made use of in the said By-laws, it shall be understood to signify "The Borough of Darlington."

39.—*As to interference with an officer of the Council in enforcing these By-laws.*

Any person who shall obstruct or interfere with any officer of the Council, or other person, doing or performing any duty or act under any of the By-laws of the said Borough, shall forfeit and pay for every such offence a sum not exceeding two pounds nor less than five shillings.

Made and passed by the Municipal Council of the Borough of Darlington, on the eighth day of August, in the year one thousand eight hundred and seventy-two.

ROBERT MAZE,
Mayor.
CHARLES HARRIS,
Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF HAY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 14th November, 1872.

MUNICIPAL DISTRICT OF HAY.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Hay, for regulating their own proceedings and the duties of their officers and servants—for preserving order at Council Meetings—for determining the terms and modes of collecting and enforcing payment of rates—for suppressing nuisances—for compelling residents to keep their premises free from offensive or unwholesome matters—the killing of cattle and sale of butchers' meat—opening new public roads, ways, and parks—aligning and cleansing roads and streets—lighting—preserving trees and shrubs—preventing or regulating the bathing or washing the person in any public water near a public thoroughfare—preserving public decency—restraining noisome and offensive trades—and generally maintaining the good rule and government of the Municipality—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

PART I.

Meetings of Council.

1. The Council shall meet at the "Bush Inn," or at such other place as a majority of the Council shall from time to time appoint, for the dispatch of business, at 7 P.M., on every alternate Thursday, unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute-book.

Order of business.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected (if erroneous), and to be signed by the Mayor or presiding Alderman; no discussion to be permitted on such minutes, except as to whether they are correct.
- (2.) Petitions (if any) to be presented and dealt with.
- (3.) Correspondence to be read, and (if necessary) ordered upon.
- (4.) Reports from Committees, and minutes from the Mayor (if any), to be presented and ordered upon.
- (5.) Questions as to any matters under the jurisdiction, or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers, to be made.

(6.) Motions, of which notice has been given, to be dealt with in the order in which they stand on the business paper.

(7.) Orders of the day to be disposed of as they stand on the business paper: Provided that it shall be competent to the Council at any time, by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business paper, without any formal suspension of this section. Also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

4. At special meetings of the Council, the business—after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting—shall be taken in such order as the Mayor, or the Alderman at whose instance such special meeting shall have been called, may have directed.

5. The business paper for every meeting of the Council other than a special meeting, shall be made up by the Council Clerk not less than two, nor more than three, days before the day appointed for such meeting. He shall enter on such business paper a copy of the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he shall have received, or shall have been required or directed so to enter, in due course of law, and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this "Part" of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

8. The business paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with. And such business paper so noted shall be a record of the Council.

9. All notices of motion, and all requisitions from Aldermen, and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting shall be numbered by the Council Clerk as they are received. And each such notice, requisition, and direction shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been so disposed of shall have been duly verified, as required by section 3 of this "Part" of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk, shall be at liberty to withdraw the same any time before the making-up of the business paper.

10. After the business paper shall have been made up, as aforesaid, all the said notices of motions, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and amendments.

11. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

12. No motion of which notice shall have been entered on the business paper, shall except as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given; unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

13. No motion in Council shall be discussed, unless and until it be seconded.

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

15. No motion or amendment shall be discussed until it shall have been reduced into writing.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

17. If an amendment be carried, the question as amended thereby shall become itself the question, and the Council shall to all intents and purposes be bound by such amendment as if it were the original question.

18. If any amendment—either upon an original question, or upon any question amended as aforesaid—shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: provided that not more than one question, and one proposed amendment thereof, shall be before the Council at any one time.

19. No discussion shall be permitted upon any motion for adjournment of the Council, and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment, shall be receivable.

20. Every requisition by an Alderman that any particular matter of business be brought before the Council shall be regarded and treated as a notice of motion by such Alderman that such business be taken into consideration by the Council. And he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit, in reference thereto, which shall be consistent with the notice of such business and with good order. And if such Alderman be absent, or if being present and so called upon he shall make no such motion, then it shall be open to any other Alderman to make such motion. And when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given; subject, however, to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order. And if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business paper.

Orders of the day.

21. The orders of the day shall consist of any matters, other than motions on notice, which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

22. Section 20 of this "Part" of these By-laws shall be considered applicable to orders of the day. And the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move. Provided that as to any order of the day entered as aforesaid by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

Petitions.

23. It shall be incumbent on every Alderman presenting a petition, to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

24. All petitions shall be received only as the petitions of the parties signing the same.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition except that the same be received; or that it be received or referred to one of the Permanent Committees hereinafter mentioned; or that it be received, and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

Correspondence.

26. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 23 of this "Part" of these By-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

27. Section 25 of this "Part" of these By-laws shall be considered as fully applicable to letters addressed to the Council as to petitions.

28. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council: Provided, however, that any notice of motion consistent with good order may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports from Committees and Minutes from the Mayor.

29. All reports from Committees shall be written on foolscap paper, with a margin of at least one-fourth of the width of such paper; and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

30. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing. Every such minute shall be written upon paper of the same kind and with the same margin as a report from a Committee, and shall be signed by such Mayor.

31. No motion shall (unless as hereinafter provided) be permissible, on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable such Council Clerk to make the necessary entry on the business paper, and to give such due notice.

Questions and statements.

32. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this "Part" of these By-laws.

33. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and if necessary, for a reference to other persons or to documents.

34. It shall not be compulsory upon any person questioned as aforesaid to answer the questions so put to him.

35. Every such question must be put categorically, without any argument or statement of fact.

36. Every such statement must be made without argument.

37. No discussion shall be permitted as to any such question, or as to any reply, or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objections to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinbefore provided, of any matters properly arising out of, or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

Order of debate.

38. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding: Provided that, in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner. But in every such case, the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall, on all occasions, when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

39. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

40. Every mover of an original motion shall have a right of general reply to all observations, which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question, other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

41. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment, without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

42. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, nor impute improper motives to any other Alderman.

43. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned, shall be entitled to pre-audience on the resumption of the same.

44. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

45. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided, however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion; also, that if such request or requisition shall appear to the Mayor or Chairman not to have been made *bonâ fide*, it shall not be complied with.

46. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question as provided for by section 3 of this "Part" of these By-laws, except as is further provided for by section 38 of the same; but such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing), but shall be considered as still presiding.

Questions of order.

47. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided.

48. Every member of the Council who shall commit a breach of any section of this "Part" of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to

entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

49. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

50. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation, moved, used, or made by any other member, which such first-named member may consider out of order.

51. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission, such member may explain, retract, or apologize for the matter or remark alleged to have been out of order. And if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member on being called to order shall ask such permission to explain, retract, or apologize as aforesaid, the Mayor or Chairman may, of his own authority, grant or refuse such permission, as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of the Mayor or Chairman to take the sense of the Council, at once and without discussion, as to whether such permission shall be granted. And when any such explanation, retraction, or apology, shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with: Provided that, if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened; and provided further, that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order, after the same shall have been discussed.

52. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

53. Whenever it shall have been decided, as aforesaid, that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected. And whenever anything said or done in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction, or apology as the case may require.

54. Any member of the Council who shall have been called to order, and who after having been twice directed to withdraw as aforesaid shall refuse to do so, or who shall persist in any line of conduct or argument or of observations which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction, or apology as aforesaid when required so to do, or who shall be guilty of any other act of disorder as defined in section 48 of this "Part" of these By-laws, and shall refuse to make such explanation, retraction, or apology as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction, for the first offence, to a penalty of not less than ten shillings nor more than five pounds; and on the second conviction for the like offence, he shall be liable to a penalty of not less than one pound nor more than ten pounds; and on a third conviction, and for every further conviction for the like offence, he shall be liable to a penalty of not less than two pounds nor more than twenty pounds.

55. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice may, by motion on notice respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar questions of order or practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties unless and until it be rescinded, but shall have no retro-active operation: Provided, however, that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which, in his opinion, is contrary to law.

Mode of voting.

56. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

57. Any Alderman shall be at liberty to call for a division. In such case the question shall be put first in the affirmative and then in the negative; and the Aldermen shall vote by

show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote on such division—not being disabled by law from so voting—shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds.

Protests.

58. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must, however, be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute-book; but if in the opinion of the Council it be inconsistent with the truth, or disrespectfully worded, it may, by resolution on notice, be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin to the resolution ordering such expunction.

Committees of the Whole Council.

59. The following sections of this "Part" of these By-laws shall (except as is herein excepted) be taken to apply to the conduct of business in Committee of the Whole Council, namely:—Sections 14 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded), 15, 16, 17, 18, 38, 39, 42, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, and 57.

60. Whenever any member of the Council shall, while the Council is in Committee of the Whole, be considered guilty of an offence against good order within the meaning of section 54 of this "Part" of these By-laws, it shall be competent to any Alderman to move that the Council resume its sitting, and that such matter be reported; and if such motion be carried, such matter shall be reported accordingly, and an entry of such report shall be made in the minute-book. And whenever any Alderman shall have failed to vote on any occasion in Committee of the Whole Council, as required by section 57 of this "Part" of these By-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the minute-book: Provided that in the case of an Alderman failing to vote, as aforesaid, no special motion that the Council resume its sitting shall be necessary; but it shall be the duty of the Chairman of such Committee of the Whole, in making his report of the proceedings in such Committee, whenever such report may be made, to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

61. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the Whole Council, under the provision of section 47 of this "Part" of these By-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and, if such motion be carried, such decision shall be so embodied in such report whenever the same shall be made.

62. Any Alderman may, at any time during the sitting of a Committee of the Whole Council, move that the Chairman report "progress" (or "no progress," as the case may be), and that leave be asked to sit again at a later period of the same day or on any future day; or that no leave be asked to sit again. And if any such motion be carried, the Council shall resume its sittings, and a report shall be made accordingly; but no discussion shall be permitted on any such motion. And if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

63. All reports of proceedings in Committee of the Whole Council shall be made to the Council, *visà voce*, by the Chairman of such Committee; and a report of such proceedings shall be made in every case, except when it shall be found, on counting the number of members during the sitting of any such Committee, that there is not a quorum present. In the latter case, the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed: Provided that, in the making of any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

64. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute-book; but except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application as aforesaid for leave to sit again be considered to have been granted by such Council, until a motion shall have been made and passed for such adoption or for the granting of such leave. And every such motion for the adoption of a report, or for the granting of leave as aforesaid, and the order of debate on such motion, shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions. Provided, however, that where a report shall have been made, under section 60 of this "Part" of these By-laws of disorderly conduct in Committee, or, under section 57 of this "Part" of these By-laws, of failure to vote on division, or of any decision

in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded, and recorded as a statement thereof, and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.

65. A Call of Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

66. There shall, without any special order to that effect, be a Call of the Council for the consideration of every motion which may be made under section 55 of this "Part" of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

67. The Call shall be made immediately before the motion or business for which such Call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such Call shall be made as follows:—The Council Clerk shall call the names of all members in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent, a record shall be made of such absence. But if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

68. Any Member of the Council who, having had notice of such Call of the Council, shall not answer to his name as aforesaid, or who, being absent, shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that, by reason of extreme illness or any other sufficient cause, he has been unable to send an excuse in writing as aforesaid, or who having answered to his name as aforesaid shall not be present when a vote is taken on the motion or business as to which such Call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further Call on the resumption of such consideration; and the provisions herein, as to penalties for absence, shall have reference to such further Call. And if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

Standing and Special Committees.

69. There shall be four Standing Committees, namely,—a By-law Committee, a Committee for Works, a Finance Committee, and a Committee for General Purposes. These Committees shall be re-appointed every year, at the first meeting of the Council which shall be holden after the election of the Mayor.

70. Each of the three Committees first named in the last preceding section shall consist of three members, of whom one shall be taken from among the Aldermen for each ward. The Committee for General Purposes shall consist of the Chairmen of the three said first-named Committees.

71. The re-appointment of the three said first-named Committees may, on resolution of the Council, be made by ballot. In such case, a list or lists of the members for each Ward shall be handed to each member then present, who shall mark against the name of each such member the title of the Committee to which, in his opinion, such member ought to belong; and the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result. And if there shall be an equal number of votes for the appointment of any two or more members to any one of such first-named Committees, such Mayor or Chairman shall decide which of such members shall be appointed to such Committee.

72. The By-law Committee shall prepare, for the consideration of the Council, drafts of all such By-laws as may be required for the good government of the Municipality. They shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the Municipality, and shall take such steps as may be necessary for the prevention or punishment of offences against such By-laws or Statutes, and for the preservation of public health, order, and decency.

73. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report, from time to time, as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

74. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report, from time to time, as to all matters which they may consider to affect, or to be likely to affect, the finances of the Municipality, and as to such matters or subjects of the

like nature as they may be directed by resolution of the Council to inquire and report upon.

75. The Committee for General Purposes shall take cognizance of every matter, subject, or question, within the jurisdiction of the Council, not coming within the province of one or other of the before-mentioned Standing Committees, and shall from time to time inquire into and report upon any such subject, matter, or question as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

76. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which in the opinion of the Council a Special Committee ought to be appointed. And no Standing Committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as in his opinion ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot; and in the latter case, or if an amendment to the effect that such Special Committee be appointed by ballot be carried, each member then present shall receive a list of all the members of the Council, from which list he shall strike out all names but those of the persons of whom in his opinion such Special Committee ought to be composed, and the Mayor or Chairman shall examine such lists and shall declare the result. And in the event of its becoming necessary through an equality of votes to decide as to which of two or more Aldermen shall serve on such Committee, such Mayor or Chairman shall so decide.

77. Every Committee of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee within seven days after their appointment.

78. Appointments to the By-law Committee, the Committee of Works, and the Finance Committee, shall be for the whole municipal year.

The Chairmen of these three Committees as appointed or removed from the chairmanship of the same, shall be thereby and without any further order regarded as having been appointed to or removed from the Committee for General Purposes. The appointment of every Special Committee shall be considered to endure until the duties for which such Committee have been appointed shall have been fully performed: Provided, however, that nothing herein contained shall be held to affect in any way the right of such Committee to remove any Chairman of such Committee, or to appoint another such Chairman in his stead, or to militate against the general provisions as to Committees in sections 100 and 110 of the Municipalities Act of 1867; and that so much of this By-law as relates to the appointment, powers, and duties of Committees, shall be read and interpreted in connection with such last-mentioned general provisions.

79. The Council Clerk shall call a meeting of any Committee whenever requested so to do by the Chairman or any two members of such Committee.

80. The Chairman of each Standing Committee shall make, or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall on ceasing to be such Chairman hand over to his successor.

Expenditure.

81. With the exception of emergent matters, hereinafter specially provided for, no work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

82. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

(1.) By order of the Committee for Works, or of the Mayor and one member of such Committee,—for repairs or emergent works, to the extent of five pounds.

(2.) By order of the Mayor,—for necessary current expenses, to the extent of two pounds.

(3.) By order of the Mayor and two Aldermen, or without the Mayor, of any four Aldermen,—for any emergent purpose, to the extent of five pounds: Provided that nothing herein contained shall prevent the Mayor or any Alderman from expending any sum not exceeding twenty shillings, on repairs to emergent works: Provided also, that in every case, a detailed report in writing of any such outlay be laid before the Council at the next meeting; such report to be signed by the General Committee of Works or the Mayor, as the case may be, by whom such outlay shall have been authorized: Also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council; and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

83. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee, before any order shall be made for payment of such accounts or demands.

84. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the Officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment, before recommending payment: Provided, however, that such special report as last herein mentioned may be embodied with the report by which payment of the amount in question is recommended: Provided also, that in cases of special expenditure under section 82 of this "Part" of the By-laws, the report directed by that section to be laid before the Council shall, if the outlay shall have been lawfully incurred, be deemed a sufficient certificate: And provided further that, in regard to salaries and wages of labour, for officers, servants, and labourers employed at fixed rates of payment, by order of the Council, the certificate of the Mayor of the amount due to any such officer, servant, or labourer, and the order of such Mayor for payment of such amount, shall be a sufficient authorization for such payment. And such certificates, memoranda, and authorization shall be attached respectively to the reports from the Finance Committee, on the payments or outlays to which such certificates, memoranda, or authorizations shall have reference.

Common Seal and records of the Council.

85. The Common Seal shall be in custody of the Mayor; or if found more convenient, it may by resolution of the Council be placed in charge of the Council Clerk, and shall be kept in such secure form as the Mayor may direct.

86. The Common Seal shall not be attached to any document without an express order of the Council. In every case where such Common Seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or in case of the absence or illness of such Mayor by two Aldermen, and countersigned by the Council Clerk.

87. The Treasurer shall keep such books of account, and such records, statements, and memoranda of receipt and expenditure, in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda, from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same; also to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

88. The minute-book, letter-book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls and other records relating to elections, business papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business addressed to the Council or to the Mayor or to any officer or servant of the Council, orders, reports, returns and memoranda relating to municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. All such records other than the minute-book and other books, and other than electoral rolls and other records relating to elections, shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. Upon the face of every document thus registered to which there is any reference in the minute-book, there shall be a note of the page wherein it is so referred to. And, when any order has been made by the Council or a report has been brought up by any Committee thereof in reference to any document so registered as aforesaid, a note of such order or report shall be made upon such document. It shall be the duty of the By-law Committee to inspect the records from time to time, to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

89. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same, without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section, shall be liable on conviction, for the first offence, to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence, to a penalty of not less than five pounds nor more than twenty-five pounds.

90. Any person removing any such book or other record of the Council as aforesaid from the Council Chamber, or the place where by direction of the Council such book or other

record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal as hereinafter provided, shall for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid, and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law for detention of the same, as the circumstances of the case may warrant. Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor, in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform. Also, that the Mayor or the Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purpose of any prosecution or suit at law, by, against, or at the instance of the Council. But in all such cases, such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records, until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed. And provided also, that the Mayor, Council Clerk, or other officer of the Council who may be subpoenaed to produce any book or other record of the Council in a Court of Law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall before removing the same, leave at the Council Chamber a receipt for such book or other record as aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid, shall be legally responsible for the safe keeping and return of the same.

91. Any person destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than *five pounds* nor more than *fifty pounds*.

Officers and servants.

92. No appointment to any permanent office at the disposal of the Council, shall take place until public notice shall have been given, as hereinafter provided, inviting applications from qualified candidates for the same.

93. Every such appointment shall be made by ballot, in such mode as may at the time be determined on by the Council.

94. Nothing herein contained shall be held to prevent the appointment by the Council, without advertisement, of any salaried officer or servant of the Corporation, to any other permanent office or employment at the disposal of such Council, to which no further salary is attached; or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid for by allowance proportionate to the extent of such duties; or to prevent any similar appointment or employment by the Mayor, or by any Committee or officer of the Council, of any such officer or servant, under the authority of any By-law; or to prevent the employment, as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

95. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited with the Attorney or the Bankers of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

96. The Council Clerk, in addition to the duties which by the Municipalities' Act of 1867, or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipality under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

97. The Treasurer shall have charge of such books of account and other records of the Council, as are mentioned in section 87 of this "Part" of these By-laws, and shall be responsible for the safe keeping of the same. Any other officer of the Council may have any other records thereof committed to his charge by an Order of the Council, and in such case shall be responsible for the safe keeping of such records.

98. The duties of all officers and servants of the Corporation, other than the Council Clerk and Treasurer, shall be defined by such regulations as may from time to time, and in accordance with law, be made by the Council.

99. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary; unless such return

or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation, or information is on record as hereinbefore provided; or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *in voce* or put into writing, as the Mayor may direct.

100. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining. And no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the Mayor, who immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same. And if any such complaint be made to the Council, or to any member or officer thereof, it shall be referred to and investigated by the Mayor, before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by such Council. Provided that every report, explanation, and information which may be made or rendered in reference to every such complaint shall be in writing. And such Mayor shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith. And such complaint, with all reports, explanations, and information as aforesaid in connection therewith, and the Mayor's statement as aforesaid thereon, shall be laid before the Council at the next meeting thereof which shall be holden after the Mayor shall have made such statement, and shall be duly recorded. Provided further, that nothing herein contained shall be held to affect, in any way, the special powers conferred on the Mayor by section 152 of the Municipalities Act of 1867, or any other special power which now is or hereafter may be conferred by statute upon such Mayor.

Miscellaneous.

101. No leave of absence shall be granted to the Mayor or to any Alderman, otherwise than by a resolution of the Council adopted after due notice.

102. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work, or the supply of such material, shall be called for by public notice as hereinafter provided.

103. A draft of every future By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any rate-payer who may desire to inspect the same; and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

104. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion. Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same; or the passage, after due notice as hereinbefore provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

105. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council, after due notice, and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

106. Such suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute the operation of which may have been extended to the Municipality, as may have been directed by the Council, or by the By-law Committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows, namely:—When against a member of the Council—or an Auditor—or any officer of the Corporation—by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been intrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council—or the By-law Committee—or the Mayor—as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought, or information laid, as aforesaid, against any member of the Council, or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of such Council or of the Mayor, nor against any other person, except upon the order of the Council, or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any

such information be directed to be laid, as aforesaid, except on an express resolution of the Council, in any case where the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council, or where on the trial or hearing of any such suit or information the same shall have been dismissed on the merits: Provided that, in any such case, the conduct or prosecution of any such suit or information, may, on the order of the Council, be entrusted to an attorney.

107. In all cases where public notice is or shall be required to be given by any By-law, of any appointment, resolution, act, order, or regulation done, made, or passed, or proposed to be made, done, or passed by the Council, or by any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same in some newspaper circulating in the Municipality.

108. In all cases not herein provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

109. Any such section or sections of this "Part" of these By-laws, or any portion or portions of such sections or section as are not hereinafter excepted, may be suspended by resolution, on notice, at any meeting of the Council: Provided that there shall be a distinct statement in every such resolution, and in the notice of the motion whereon the same shall have been adopted, of the purpose for which such suspension is required; and that for every separate matter or business as to which such suspension is so required, there shall be a separate resolution aforesaid: And provided, also, that the following sections hereof shall never be suspended, nor shall any one of them, nor any portion of any such section be suspended on any pretence whatever, namely:—Sections 5, 6, 7, 8, 9, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 34, 38, 39, 42, 44, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 95, 98, 99, 100, 101, 104, 106, 107, and 108.

PART II.

COLLECTION AND ENFORCEMENT OF RATES.

Times and Modes of Collection.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be collected by half-yearly instalments. Each such instalment shall, as to every such rate and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

2. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may by resolution at the time of making or imposing such rates or any of them have appointed.

3. All persons liable to pay any rates as aforesaid, shall pay the amount thereof, within the time prescribed by the Act, into the office of the Council Clerk, during office hours, that is to say on every Wednesday, Thursday, and Saturday, between the hours of 10 a.m. and 3 p.m.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for payment of the same, as aforesaid.

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Enforcement by distress.

6. The Bailiff shall be appointed by resolution of the said Council, and shall be at any time removable by a like resolution.

7. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of fifty pounds each, for the faithful performance of his duty.

8. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

9. All levies and distresses shall be made under warrant in form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

10. If the sum for which any such distress shall have been made shall not be paid, with costs as hereinafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Municipality as the said Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus

(if any) that may remain after deducting the amount of the sum distrained for and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

11. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the rate-payer, on demand, at any time within one month after the making such distress.

12. The Bailiff on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates, as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

13. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

14. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

15. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

WARRANT OF DISTRESS.

I, _____, Mayor of the Municipality of Hay, do hereby authorize you, _____, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises, of _____, situate at _____, for _____, being the amount of rates due to the said Municipality to the _____ day of _____, for the said dwelling-house, (or land or premises), and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____, 187 _____.

Mayor.

SCHEDULE B.

INVENTORY.

I have this day, in virtue of the warrant under the hand of the Mayor of the Municipality of Hay, dated _____, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of _____, situated at _____, within the said

Municipality, for £ _____, being the amount of the rates due to the said Municipality to the _____ day of _____.

Dated this _____ day of _____, 187 _____.

Bailiff.

SCHEDULE C.

BAILIFF'S FEES.

	s. d.
1. For making entry into or upon the premises in executing a warrant, with or without inventory ..	2 6
2. If more than one hour in possession (additional)	2 6
3. For every other day or part of a day	2 6
4. Five per cent. on the net proceeds of sale.	

PART III.

Suppressing nuisances.

1. No householder or resident shall be permitted to allow his or her premises, yards, closets, or drains, to be a nuisance to the adjoining householders or residents.

2. No noisome or offensive trade shall be permitted to be carried on in any premises, to the inconvenience of the residents of adjoining houses.

3. Upon representation by any two respectable householders, that the house, yard, closets, hog-sties, or drains of the adjoining premises, are a nuisance or offensive, the Mayor and any two Aldermen shall cause an inspection to be made of the premises complained of; and if any such premises shall be found to be a nuisance or otherwise offensive, notice shall be given in writing to the proprietor or resident of such premises,

that if within seven days after such notice the nuisance shall not be removed, proceedings will be taken before Justices against the proprietor or tenant of the aforesaid premises, to obtain an order compelling the removal or abatement of such nuisance: And if such proceedings shall be taken, such person shall pay the cost thereof. And if such person, after any such order by Justices, shall not remove or abate such nuisance within the time ordered by such Justices, he shall be liable to a penalty of ten shillings for every day during which such nuisance shall not be removed or abated after the expiry of the time so limited by such Justices.

PART IV.

Streets and public places.

1. No new public road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park, shall have been examined by the Committee for Works and reported upon to the Council by such Committee.
2. Whenever any proprietor or proprietors of land within the said Municipality shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, park, or other place as aforesaid.
3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or other place to public use or recreation as aforesaid, as may be considered necessary by the Committee for General Purposes. And such further instrument of dedication shall also be preserved as a record of the Council.
4. The Committee for Works, or any officer or person acting under the supervision of such Committee shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipality, and the carriage-ways and foot-ways thereof. And it shall be the duty of such Committee, officer, or person to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads and streets, wherever the same may be considered necessary or desirable by the Council. Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council, as hereinafter directed.
5. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section, shewing the proposed cuttings and fillings, to be exhibited at the Council Chamber for fourteen days, for the information and inspection of rate-payers, and shall notify by advertisement in some newspaper circulating in the Municipality that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and the proposer and seconder of the motion for such adoption, and counter-signed by the Council Clerk. And such plans and section so signed and counter-signed shall be a record of the Council.
6. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any street or other public place within the said Municipality without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.
7. Any person who shall make any cellar, or any opening, door, or window, in or beneath the surface of the foot-way of any street or public place within the said Municipality, shall, on conviction, forfeit and pay the sum of five pounds, over and above the expense of filling up, remedying, or removing such cellar, opening, door, or window.
8. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole, adjoining or near to any street or public place within the said Municipality, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner to the satisfaction of the Committee for Works of the said Municipality, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise, during the continuance of such enclosure, shall forfeit and pay

for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

9. Every owner or occupier of any house, building, premises, or land, within the said Municipality, having any entrance, area, garden, or other open space, or any vacant building lot, waterhole, or excavated space, adjoining the footway of any street or public place in such Municipality, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and every such owner or occupier of any such house, building, premises, or land, having any steps adjoining the foot-way of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent the like danger to persons passing and repassing; and on failure thereof every such owner or occupier shall as often as he shall be convicted of such offence forfeit and pay any sum not being less than ten shillings nor more than forty shillings. And every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid, within seven days after any such conviction as aforesaid shall be deemed guilty of a further offence against this By-law.

10. Every person who shall have a well situated between his or her dwellinghouse or the appurtenances thereof, and any road, street, or foot-way within the limits of the said Municipality, or at the side of, or in any yard or place open or exposed to such road, street or foot-way, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid, shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last-known place of abode, or on the said premises, shall, on conviction, forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered, contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

11. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped, for the purpose of repairing the same or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

12. Any person who shall haul or draw, or cause to be hauled and drawn, upon any part of any street or public place within the said Municipality, any timber, stone, or other thing otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street or public place to the injury thereof; or to hang over any part of such vehicle or barrow so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall, upon conviction, forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

13. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animals, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way or foot-way of any street or other public place in the said Municipality; or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such foot-way, shall, upon conviction, forfeit and pay, for the first offence, a sum not exceeding forty shillings nor less than five shillings; for the second offence, a sum not exceeding five pounds nor less than ten shillings; and for a third and every subsequent offence, a sum not exceeding ten pounds nor less than one pound for each such offence.

14. Any person who shall ride or drive through or upon any street or public place within the said Municipality so negligently, carelessly, or furiously that the safety of any other person shall or may be endangered, shall, on conviction, forfeit and pay a sum not exceeding five pounds nor less than one pound.

Public property.

15. Any person who shall wantonly or maliciously break or injure any lamp, or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

16. Any person who shall damage any public building, bridge, culvert, sewer, watercourse, toll-bar, toll-board, or other public property within the said Municipality, shall pay the cost of repairing the same; and if such damage be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds nor less than forty shillings.

17. Any person who shall wilfully and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub,

or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Nuisances.

18. Any person who shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or that are under his or her charge, to stray or go about, or to be tethered or depastured in any such street or public place in the said Municipality, shall on conviction, forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Offences against public decency.

19. Any person who shall bathe near or within view of any inhabited house, or of any wharf, bridge, or other place of public resort, within the limits of the said Municipality, between the hours of six in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding twenty shillings nor less than five shillings for every such offence.

20. Any individual who shall offend against decency, by the exposure of his or her person in any street or public place within the said Municipality, or in the view thereof, shall, on conviction, forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five pounds.

PART V.

Slaughter-houses.

1. Every person who may from time to time be in that behalf appointed by the said Council, shall be the Inspector of Slaughter-houses and of animals intended to be slaughtered within the said Municipality. Provided that if any such Inspector shall have been appointed by the Governor for the said Municipality or for any district including the same, under the provisions of the Act fifth William the Fourth number one, such last-named Inspector shall be considered as the Inspector of Slaughter-houses and of animals intended to be slaughtered within the Municipality, for all the purposes of these By-laws.

2. The Inspector shall only inspect animals for slaughter in the yards adjoining licensed slaughter-houses.

3. Such Inspector shall from time to time enter into and examine all such slaughter-houses; and shall examine the milts or spleens and lungs and carcasses of all animals slaughtered, or any animals intended to be slaughtered therein.

4. The owner or occupier of any or every such slaughter-house used for the slaughter of animals intended for human food, shall keep the milts or spleens and lungs of all animals

slaughtered in the said slaughter-house for a period of six hours after the animals have been slaughtered, unless the Inspector of Slaughter-houses shall have previously examined the milts or spleens and lungs of such slaughtered animals. And any such owner or occupier as aforesaid who shall neglect or refuse so to do, shall forfeit and pay a penalty of not less than forty shillings nor more than twenty pounds.

5. If the owner or occupier of any such slaughter-house shall knowingly cause, permit, or suffer any animal infected with any disease affecting the milt or spleen or lungs, to be slaughtered in any such slaughter-house, or if after the slaughter of any animal it shall be found to be diseased, and such owner or occupier, as soon as the animal is inspected and condemned, shall not immediately thereupon cause the entire carcass to be destroyed by fire in the presence of the Inspector, such owner or occupier shall, for every such offence, forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds: Provided however, that should the owner of any animal which may be condemned by the Inspector object to the decision of that officer, such owner shall be at liberty to appoint some veterinary surgeon, or other competent person, as arbitrator in his behalf; and in the event of the Inspector and such veterinary surgeon or other competent person not agreeing, it shall be lawful and incumbent upon them, under a penalty of ten pounds each, to appoint an umpire, whose decision shall be final.

6. The blood, offal, and filth of all such animals as may be slaughtered in any such slaughter-house, shall be removed at least once in every twelve hours; and any owner or occupier of any such slaughter-house, who shall fail, neglect, or refuse to comply with this By-law, shall, for every such offence, forfeit and pay a penalty not less than forty shillings nor more than ten pounds.

7. Nothing herein contained shall extend to or affect any person or persons slaughtering, at his, or her, or their own residences within the said Municipality, animals, for his, or her, or their family, servants, or labourers.

8. The word "animal," shall, for the purposes of this "Part" of these By-laws, be held to include cattle, sheep, pigs, calves, lambs, and goats; and the words "slaughter-house," shall be held to mean any building or place wherein or whereat animals are slaughtered.

Made and passed by the Hay Municipal Council, this sixteenth day of September, in the year one thousand eight hundred and seventy-two.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF HAY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 4th December, 1872.

MUNICIPAL DISTRICT OF HAY.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Hay, regarding the Commons within the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

SUPPLEMENTARY By-laws for the Commonage situate within the Municipal District of Hay: Herdsman's Duties, Regulations, Charges and Collection of Fees.

Herdsman's Duties.

1. To carry out in their integrity the regulations that may from time to time be adopted by the Council for the management of the Commons.
2. To devote the whole of his time to the performance of the several duties pertaining to the situation.
3. Not to accept any presents or claim any perquisites for the discharge of any duties connected with his office.
4. To report himself, if possible, on Wednesday, Thursday, and Saturday in each week, at the Council Chambers, between the hours of 10 and 12; and to receive from the Council Clerk instructions relative to matters connected with the office.
5. To make himself acquainted with all horses and cattle placed in his charge; to keep a muster-roll; to see all stock at least once a week, and to use his best endeavours to retain them on the Commons; and immediately after it is known that any have strayed, to give information to the owners.
6. To allow no horses or other stock at any time on the Commons, except those registered or hereinafter provided for.
7. To run into the Council or Pound Yards all horses depasturing on the north side of the Commons, on Wednesday in every week. Horses to be kept in the yards until 2 o'clock P.M.
8. If not otherwise engaged, to bring in on other days of the week horses running on the north or south side, required by Commoners, who are willing and will be required to pay a fee of two shillings and sixpence per head for each horse brought in on those days—said fee to go to Council funds; and also to pay the puntage of their own and the Herdsman's horses.

Regulations, Charges, and Collection of Fees of the Commons for the Municipal District of Hay.

1. All persons who reside within the boundaries of the Hay Municipality to be allowed to depasture stock as herein

enumerated upon payment of fees according to the following scale, viz. :—

	Per annum.
	£ s. d.
For every horse, mare, gelding, colt, or filly.....	0 12 6
For every cow, bull, heifer, ox, steer, or calf	0 7 6
For every pig.....	1 0 0
For every sheep	0 3 6
For every goat—up to five—each	0 3 0
For every do. —up to ten—each	0 5 0
For every do. —over ten—each	0 7 6

Such fees to be payable half-yearly in advance, on the first day of June and the first day of December in every year.

2. All parties in charge of travelling stock shall give twenty-four hours notice in writing to the Council Clerk or Herdsman, previous to their depasturing on the Commons; and every party neglecting to give such notice shall be liable to a penalty not exceeding forty shillings.

3. Travelling stock, including horses, cattle, sheep, and pigs, not to be allowed to depasture on the Commons longer than three days,—the first day to be free of charge; for the remaining two days or part of a day the following charges must be paid to the Town Herdsman, viz. :—

For horses, at the rate of 10s. per day or portion of a day for every.....	100
For cattle, at the rate of 10s. per day or portion of a day for every	100
For sheep, at the rate of 5s. per day or portion of a day for every.....	1000
For pigs, at the rate of 5s. per day or portion of a day for every.....	25

4. Travelling mobs of cattle and sheep to depasture only on such portions of the Commonage as may be defined by the Council; if found upon any other part of the Commons to be treated as trespassers, and to be impounded.

5. All carriers and persons with horses and bullocks used by them to be allowed four days on the Commonage free of charge; after such time to pay three pence per head for every day or part of a day they remain on the Commons.

6. Butchers and others not to be allowed to run more than 150 sheep or 5 pigs, nor more than 15 fat cattle, at one time, and may arrange with Council to pay a sum yearly as average for such stock, which sum shall be payable half-yearly in advance on the 1st day of June and the 1st day of December in every year.

7. No entire horse or bull above six months old shall be allowed on the Commons without the consent, in writing, of the Council; and all foals and calves upon arriving at the age of six months will be charged with assessment.

8. A book shall be kept containing an account of all cattle registered, such cattle to have a distinguishing or private brand. They can also at the request of the owner be branded with the Town Commons brand, and for which purpose a brand will be kept by the Herdsman for the use of persons requiring it.

9. The Council will not be responsible for any stock depasturing on the Commons.

10. The Council will authorize the impounding of all horses, cattle, sheep, pigs, or goats trespassing on the Commons; an entry of which will be kept in a book, so that all damages and fees accruing from the same may be properly accounted for.

11. That all cattle suspected to be diseased shall be removed by the owners within twenty-four hours after notice to do so has been served; and in default of compliance with such notice, the Council shall have power to destroy such cattle at the risk and cost of the owners.

12. No cattle depasturing on the Commons, excepting cows in milk, to be disturbed or removed without permission of the Herdsman.

13. The Herdsman shall give to each person who shall register cattle a receipt for all moneys paid by him on account of the pasturage of such cattle, and which receipt shall set forth the distinguishing mark of such cattle. The receipt-book shall

have a duplicate block to be retained, and contain the Herdsman's brand, and the distinguishing mark of such cattle as set out in said receipt.

14. That no timber shall be cut or removed, or any sand, loam, earth, or gravel removed from any part of the Town Commons, without the permission of the Council Clerk, to whom application in writing must be made. Applications for brick-yards and residences to be made also in writing to the Council. The following fee for each person so engaged, to be paid half-yearly in advance from the time of taking out the license, will be charged, viz. :—

	Per annum.		
	£	s.	d.
Sawyers' licenses, hard and soft wood	3	0	0
Sawyers' licenses, hardwood only	2	0	0
Wood cutters and splitters	2	0	0
Brick-yard, including residence	5	0	0
Residence or occupation	2	10	0
Sand, loam, earth, or gravel	2	2	0
Do. do. per load.....	0	0	3

15. All parties violating any of the above by-laws shall subject themselves to the penalties and provisions enumerated and provided for by the Act of Victoria 11, No. 31, and the Impounding Act of Victoria 29, No. 2. All such other Acts and statutes which are now or hereafter may be in that case made and provided.

Agreed to unanimously at a meeting of the Council, held at the "Bush Inn," Hay, on Monday, 14th October, A.D. 1872.

FRANK JOHNS,
Mayor.

THOMAS CLAY,
Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF MACDONALD TOWN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 19th December, 1872.

MUNICIPAL DISTRICT OF MACDONALD TOWN.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Macdonald Town—for regulating their own proceedings—for the collection and enforcement of rates—for the management of roads and streets—for the prevention of fires—for the suppression of nuisances—and for the general good rule and government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the Municipalities Act of 1867.

HENRY PARKES.

MUNICIPAL DISTRICT OF MACDONALD TOWN.

BY-LAWS for regulating proceedings of the Council of the Municipality of Macdonald Town, for regulating the general business and good government of the Municipality.

Meetings of Council.

1. The Council shall meet for dispatch of business at half-past seven P.M. on the first Monday of every month; but when such day shall be a holiday, the Mayor shall appoint some other day not exceeding four days later than the said holiday.

2. In the event of a quorum not being present within half an hour after the time appointed, the names of the Aldermen present shall be taken down and entered into the minute-book by the Council Clerk, and every Alderman so absent shall pay a fine of two shillings and sixpence: Provided such fine shall be remitted only in case of accident, illness, or other causes, which shall be laid before the Council at the next meeting in writing by the absentee, and by them deemed satisfactory.

3. All such fines as aforesaid shall be paid to the Council Clerk within ten days after the person so fined shall have received or had left at his residence a notice of such fine; and, in case of default, the Mayor shall enforce the payment thereof under the provisions of the Municipalities Act of 1867. All such fines to be carried to the credit of the funds of the Municipality.

Duties of Mayor or Presiding Alderman.

4. The Mayor or Presiding Alderman, or Chairman at any Committee Meeting, shall preserve order; and his ruling upon all occasions shall be final, and no argument or discussion shall ensue thereon, but he may state his reasons for such decision.

5. The Mayor, Presiding Alderman, or Chairman shall decide as to pre-audience of members, where two or more desire to speak; and may call any member to order for refusing to comply with his decision, or speaking a second time on the same subject unless in explanation, and that by permission duly asked from and given by the Mayor, Presiding Alderman, or Chairman.

6. Every Alderman introducing a motion shall have the right of reply, and of speaking once on every amendment.

7. Every motion duly put and seconded shall be put first in the affirmative and then in the negative, and the Mayor, Pre-

siding Alderman, or Chairman may if he thinks fit, or shall if the mover (only) of the resolution requests, call upon the members to divide, in order that the correct sense of the meeting may be ascertained.

Order of Business.

8. The minutes of the last meeting shall be read, and if by resolution of the members present be considered correct, the Mayor or Presiding Alderman shall sign the same; but if any objection be made as to their correctness or any part thereof, the question shall be put to the Council; and if the Council shall so decide, the alteration shall be made and such alteration shall be signed in the margin by the Mayor or Presiding Alderman and the Council Clerk.

9. After the confirmation of the minutes, the order of business shall be as follows:—

10. Reading of correspondence.

11. Presentation of petitions.

12. Reports.

13. Motions.

14. Questions of which four days notice have been given, and no other questions can be asked.

Conduct of Business.

15. Every Alderman shall stand while speaking, and shall address the Mayor or Chairman.

16. Every Alderman shall confine his remarks to the subject before the Council.

17. No Alderman shall make any remarks of an offensive or personal nature upon any Alderman or officer of the Council.

18. No member shall speak longer than ten minutes on any subject under debate, except it be the mover of any motion; and he shall not speak for a longer period than twenty minutes, unless by the consent of the Council previously obtained.

19. A debate by motion may be adjourned to any time.

20. The Council shall vote by a show of hands, and every Alderman present shall be compelled to vote, excepting the Mayor or Presiding Alderman.

21. No member shall interrupt another while speaking, by acclamation or any other expressions of assent or dissent.

22. All petitions shall be presented by an Alderman and read by him to the Council, he previously having ascertained that it contains no language or other matter in any way disrespectful to the Council; and no petition shall be received unless its reception be moved, seconded, and carried.

23. All amendments must be in writing, and shall be delivered by the mover to the Council Clerk.

24. Amendments, after being seconded, shall be put and disposed of in the order in which they stand, beginning at the last and proceeding inversely until carried or the whole has been lost, when the motion shall be put.

25. No motion to rescind a resolution, or to affect it in any way shall be put upon the business-paper, unless by consent of the majority at a Call of the Whole Council.

26. A Call of the Whole Council may be ordered by resolution, of which due notice has been given.

27. The Council Clerk shall make out a paper, to be called the business-paper, which shall contain all matters to be considered; and all such papers shall be filed and become records of the Council.

28. All such business-papers shall be signed in the margin by the Mayor or Chairman, specifying the manner in which each matter has been disposed of.

29. Any member infringing or disobeying any of the aforesaid rules, shall be called to order by the Mayor or Chairman; and any member refusing to submit to the ruling of the Mayor or Chairman, on being called to order, he shall pay a fine of five shillings: all such fines to be enforced and subject to the same conditions as By-law No. 3.

Committees.

30. There shall be three Permanent Committees, viz.:—The Improvement, The Finance, and By-law, and all Reports of Committee shall be signed by the Chairman.

31. The Finance Committee shall examine and check all accounts, and shall watch over all the financial affairs of the Municipality.

32. The Improvement Committee shall have the general inspection of all roads, streets, ways, and other public places, under the care and management of the Council; and shall inquire and report on all necessary improvements or repairs that may be required; and shall finally examine and pass all works that have been carried out by resolution of the Council, and under the direction and supervision of the Mayor and his officers duly appointed by the Council.

33. The Mayor may in cases in emergency authorize the expenditure of any sum not exceeding five pounds until the next meeting of the Council, and by request in writing of not less than three Aldermen may authorize the expenditure of any further sum not exceeding ten pounds, but no further expenditure shall be permitted until the Council shall have met and authorized the outlay.

Collection of Rates.

34. All rates made by the Council may be paid half-yearly, viz.: Within seven days after the expiration of the thirty days allowed by law, and on or before the 31st day of August in each year, and shall be paid to the Council Clerk at the Council Chambers during office-hours.

35. The Council Clerk shall at the expiration of these dates lay before the Council a list of all persons whose rates are in arrears.

36. The Mayor shall take immediate steps to enforce payment of all rates due as aforesaid, according to the powers vested in him by the Municipalities Act of 1867.

37. The Council shall appoint a Bailiff, who shall make all levies or distresses for the recovery of rates due under the warrant of the Mayor, according to Schedule A hereto annexed.

38. The Bailiff shall be paid for all levies, entries, distresses, or warrants made under these By-laws, according to Schedule B hereto annexed.

39. The Bailiff shall at the time of making any distress make out an inventory of all goods, live stock, land, houses, or other property, and shall deliver a copy thereof to the owner of the property or goods so distrained upon, or the occupier thereof, or to some person on his or her behalf; or in the absence of any such owner or occupier, then such inventory shall be posted on some part of the premises; and a like copy shall be delivered to the Council Clerk.

40. It shall be lawful for the Bailiff and such assistants as he may require to enter into and upon any land, buildings, or other property in respect of which a warrant has been issued for the recovery of rates as aforesaid, and to distrain goods therein and thereon, and to remain in charge of such building or other property; and if the sum for which such distress shall have been made or taken be not on or before the expiration of five days, it shall be lawful to sell the said goods or any part thereof by public auction, either on the premises or at any other place within the Municipality; and the surplus, if any, that may remain after deducting all costs in addition to the sum distrained for, shall be paid over to the owner of the goods so sold.

41. The owner shall be allowed to point out the goods to be first sold, and so successively.

42. The Bailiff shall within forty-eight hours after such sale deliver to the Council Clerk the proceeds thereof, as also the inventory of the effects so sold.

43. In the temporary absence of the Bailiff through illness or business, the Mayor may appoint a substitute for the time being.

Management of Roads or Streets.

44. All roads and streets within the Municipality shall be formed as follows, viz.—One-sixth of the whole breadth on each side shall be reserved for a footway, leaving the central portion, the remaining two-thirds, as a carriage-way; unless in streets of 30 feet or less, when the footways shall be 4 feet wide.

45. No person shall erect any house or other building in any part of the Municipality without giving due notice in writing to the Council Clerk, describing the nature and situation of such building, the size, number of rooms, materials of which it is to be built, and all other necessary information; and the person giving such notice shall be entitled to receive, within seven days after receiving such notice, an authority duly signed by the Council Clerk to proceed with the said building, upon payment to the Council Clerk of a fee of two shillings and sixpence, without which authority no such building shall be erected, under a penalty of one pound.

46. All building notices shall be copied into a book to be kept for that purpose by the Council Clerk, and the notices to be filed and become records of the Council.

47. Any person placing any obstruction on any road, street, or footway, beyond the building-line, by the erection of any house, verandah, steps, fences, or any other obstruction, and not removing the same within fourteen days from the date of notice served on the premises or ground complained of, shall be liable to a penalty of five pounds.

48. All houses having frontages in a line with the footway shall be sufficiently spouted and guttered, to be laid under the footpath; and any occupier or owner of such houses not complying with this By-law, within fourteen days after due notice has been served on such premises, be liable to a penalty of one pound.

49. No person shall throw or deposit any rubbish, dead fowls, or animals of any description, or any offensive matter, into or on any road, street, lane, footpath, gutter, or any ground near to a public way, under a penalty of ten shillings.

50. No driver or other person shall wilfully or negligently do or cause to be done any damage or injury to the kerbstones, gutters, or footpaths, or to drive any horses, cattle, or other animals, or wheeled vehicles of any description, on the footpaths, under a penalty of ten shillings, in addition to the amount of damage done.

51. No person shall be allowed to place any building materials on the footpaths or streets, unless by the sanction of the Mayor, in writing, countersigned by the Council Clerk; and any building materials so placed, or any open cuttings or excavations, shall be protected by two lights, to be kept burning from sunset to sunrise; and for every such authority as aforesaid the sum of two shillings and sixpence shall be charged. Any person infringing this By-law shall be liable to a penalty of one pound: Provided always, the Mayor may in cases of urgency give a verbal permission, to extend over a period of not more than twenty-four hours.

52. No person shall place on the footpath or in the gutter, any cart, barrow, goods, or produce of any kind, to the obstruction of the public, under a penalty of ten shillings.

53. All horses, cattle, goats, pigs, or other animals straying in any road, street, lane, or any public place within the Municipality, shall be impounded, or the owner fined to the amount of ten shillings for each beast so found straying.

Prevention of Fires.

54. No person shall place or permit to be placed in any house, workshop, or other building, fire, gunpowder, or combustible or inflammable materials of any kind, so as to endanger contiguous buildings.

55. The Inspector of Nuisances, or other officer duly appointed, shall, upon receiving a representation in writing that fire is being used, or combustible matter stored to the danger of adjoining building, proceed to the premises complained of; and shall, if he thinks necessary, cause the danger to be removed immediately.

56. Any person lighting or making a fire in any street, lane, road, or any public place, within the Municipality, without permission of the Mayor first had and obtained, shall be liable to a penalty of one pound.

Suppression of Nuisances.

57. No person residing in the Borough shall be allowed to permit his or her premises, closets, or drains to be offensive to the neighbours.

58. No offensive trade shall be permitted to the inconvenience or annoyance of any resident in the Municipality.

59. No person shall breed or keep swine in any house, yard, building, or enclosure of any description, situate within forty yards of any public road or thoroughfare, under a penalty of not less than forty shillings nor more than five pounds for every offence.

60. The Inspector of Nuisances may at any reasonable hour enter into and upon any premises, stall, or place where meat, fish, or other articles of food are kept for sale, and examine the same; and if any such articles shall appear to him to be unfit for human food, he shall seize the same; and if it shall appear to any Justice of the Peace, upon evidence, to be unwholesome, he shall order it to be destroyed, and the owner thereof, or the person in charge of the premises in which it was found, shall be liable to a penalty of not less than forty shillings nor more than five pounds.

61. Upon representation in writing by any two ratepayers that any house within the Municipality, and within reasonable distance of such ratepayers, is of ill-fame, it shall be lawful for the Mayor to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupation of all the inmates of the said house and premises; and upon non-compliance with such demand, or if the Mayor shall consider the house to be one of ill-fame, he shall declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice. And if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall, on conviction thereof, forfeit and pay any sum not less than two pounds nor more than twenty pounds; and if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum not less than five pounds nor more than fifty pounds; and if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house, or such other person residing or being therein as aforesaid, shall for every such third offence forfeit and pay a sum not less than ten pounds nor more than fifty pounds, and a further sum of ten pounds for every further period of forty-eight hours during which such nuisance shall continue. And the Justices of the Peace before whom the case shall be heard shall be empowered to order instant levy and distress.

Penalty.

For every offence against these By-laws, except as otherwise provided, the offender shall be liable to and shall pay a penalty of not less than ten shillings nor more than five pounds, to

be recovered before any two Justices of the Peace. And all fines and penalties imposed by these By-laws shall be recoverable before any Justice of the Peace.

SCHEDULE A.

I, _____, Mayor of the Municipal District of Macdonald Town, do hereby authorize you, _____, Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house, or in or upon the land and premises of _____, situate at _____, for the sum of _____, being the amount of Municipal rates due to the said Municipality to the _____ day of _____ for the said dwelling-house, land, or premises; and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____, 187 _____

Mayor.

SCHEDULE B.

FEEs OF BAILIFF.

	s.	d.
For every warrant	3	6
For making every entry and inventory in the execution of the warrant.....	3	0
If in possession for five hours	5	0
For every other day or part of a day	6	0
And five per cent. on net amount of sale.		

INVENTORY.

I have this day, in virtue of a warrant under the hand of the Mayor of the Municipal District of Macdonald Town, dated _____, distrained the following goods and chattels in the dwelling-house, or in or upon the land and premises of _____, situate within the said Municipality for the sum of _____, being the amount of rates due to the said Municipality to the day of _____, 187 _____.

Dated this _____ day of _____, 187 _____

Bailiff.

Made and passed by the Council of the Municipal District of Macdonald Town, this fourth day of November, 1872.

HENRY KNIGHT,
Mayor.

1872-3.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF BROUGHTON VALE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 20th December, 1872.

MUNICIPAL DISTRICT OF BROUGHTON VALE.

BY-LAWS.

The following By-laws, made by the Municipal District of Broughton Vale, repealing their existing By-laws—for regulating the proceedings of the Council and the duties of the officers and servants thereof, relating to the subdivision and change of property—for determining the modes of collecting and enforcing payment of rates—for opening new public roads, &c.—for aligning roads and streets, providing for the proper care of the same, and preventing nuisances on or near such roads or thoroughfares, and in rivers or watercourses—for the extirpation of weeds and for the general management and good government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS.

By-laws for repealing the existing by-laws and for regulating the proceedings of the Council of the Municipal District of Broughton Vale, and the duties of the officers and servants of such Council—for determining the modes of collecting and enforcing payment of rates—the subdivision and change of property—opening new public roads, ways, and parks—aligning roads and streets, and providing for the proper care of the same, and for preventing nuisances on or near such roads or thoroughfares, and in rivers or watercourses, and regulations as to penalties and costs—the extirpation of weeds—and the general management and good government thereof.

PART I.

Repeal of existing by-laws.

1. The by-laws of the Municipal Council of Kiama, passed by the Council on the 16th day of November, 1859, and proclaimed by the Honorable the Colonial Secretary on the 7th day of December, 1859; also those passed by the Municipal Council of Kiama on the 14th day of May, 1867, confirmed by His Excellency the Governor Sir John Young on the 27th day of December, 1867, and proclaimed by the Honorable the Colonial Secretary on the said 27th day of December, 1867; and further the by-law passed by the said Council on the 20th day of July, 1869, confirmed by His Excellency the Governor, the Earl of Belmore, and proclaimed by the Honorable the Colonial Secretary on the 24th day of September, 1869, so far as they affect the Municipal Council of Broughton Vale, are hereby repealed.

PART II.

MEETINGS OF COUNCIL.

Ordinary Meetings.

1. The Council shall meet at the Council Chamber, for the despatch of business, and shall fix the day and the hour for holding the regular meetings by resolution; and in case such day shall happen to be a public holiday, the meeting shall be held on such other day as the Mayor may appoint.

ELECTION OF CHAIRMAN IN ABSENCE OF MAYOR.

Adjournment for want of a quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of thirty minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute-book.

ORDER OF BUSINESS.

Business at ordinary meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected (if erroneous), and after being confirmed by the Council, shall be signed by the Mayor or presiding Alderman; no discussion to be permitted on such minutes, except as to whether they are correct.
- (2.) Petitions (if any) to be presented and dealt with.
- (3.) Correspondence to be read, and (if necessary) ordered upon.
- (4.) Reports from Committees, and minutes from the Mayor (if any), to be presented and ordered upon.
- (5.) Questions as to any matters under the jurisdiction, or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers, to be made.
- (6.) Motions, of which notice has been given, to be dealt with in the order in which they stand on the business-paper.
- (7.) Orders of the day to be disposed of as they stand on the business-paper.

Business may be dealt with out of regular order.

Provided that it shall be competent to the Council at any time, by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business-paper, without any formal suspension of this section. Also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

4. At special meetings of the Council, the business—after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting—shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business-paper for ordinary meetings—how prepared.

5. The business-paper for every meeting of the Council other than a special meeting, shall be made up by the Council Clerk not less than two, nor more than four, days before the day appointed for such meeting. He shall enter on such business-paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he shall have received, or shall have been required or directed so to enter, in due course of law, as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this "Part" of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

Business-paper for special meeting.

6. The business-paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to members.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business-paper for such meeting, and shall embody the substance of such business-paper.

How business-paper is to be disposed of.

8. The business-paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business-paper of the mode in which each matter entered thereon has been dealt with. And such business-paper so noted shall be a record of the Council.

Notice of motion, &c., to be numbered as received, and preserved until matter disposed of, unless withdrawn before business-paper is made up.

9. All notices of motion, and all requisitions from Aldermen, and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting shall be numbered by the Council Clerk as they are received. And each such notice, requisition, and direction shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been disposed of shall have been duly verified, as required by section 3 of this "Part" of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk, shall be at liberty to withdraw the same at any time before the making-up of the business-paper.

After business-paper made up, all notices, &c., to be the property of the Council.

10. After the business-paper shall have been made up, as aforesaid, all the said notices of motion, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

MOTIONS AND AMENDMENTS.*Motions—how to be moved.*

11. Except by leave of the Council, motions shall be moved in the order in which they stand on the business-paper, and if not so moved or postponed shall be struck from such business-paper, and be considered to have lapsed.

Absence of proposed mover.

12. No motion of which notice shall have been entered on the business-paper, shall, except as hereinafter provided (see s. 20), be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from the first-named Alderman, or a verbal one.

Motion to be seconded.

13. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions to be in writing—only one amendment at a time.

15. No motion shall be discussed until it shall have been reduced into writing.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question binding on Council.

17. If any amendment be carried, the question as amended thereby shall become itself the question, and the Council shall to all intents and purposes be bound by such amendment as if it were the original question.

How subsequent amendments may be moved.

18. If any amendment upon an original question shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: Provided that not more than one question, and one proposed amendment thereof, shall be before the Council at any one time.

Motions for adjournment.

19. No discussion shall be permitted on any motion for adjournment of the Council, and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order upon the business-paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Requisitions from Aldermen—how to be dealt with.

20. Every requisition by an Alderman that any particular matter of business be brought before the Council shall be regarded and treated as a notice of motion by such Alderman that such business be taken into consideration by the Council. And he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit, in reference thereto, which shall be consistent with the notice of such business and with good order. And if such Alderman be absent, or if being present and so called upon he shall make no such motion, then it shall be open to any other Alderman to make such motion. And when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given; subject, however, to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order. And if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business-paper.

ORDERS OF THE DAY.*Of what Orders of the Day shall consist.*

21. The orders of the day shall consist of any matters other than motions on notice, which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business-paper for consideration.

How they are to be dealt with.

22. Section 20 of this "Part" of these By-laws shall be considered applicable to orders of the day. And the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid by direction of the Mayor, such Mayor may move or may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

PETITIONS.*Petitions to be respectfully worded.*

23. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—how to be received.

24. All petitions shall be received only as the petitions of the parties signing the same.

How petitions are to be dealt with.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received, or that it be received or referred to one of the

Permanent Committees hereinafter mentioned; or that it be received, and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

CORRESPONDENCE.

Duties of Mayor as to correspondence.

26. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 23 of this "Part" of these By-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Section 25 to apply to letters.

27. Section 25 of this "Part" of these By-laws shall be considered as fully applicable to letters addressed to the Council as to petitions.

Letters sent not to be discussed, but every letter may be subject of motion.

28. No discussion shall be permitted in reference to any letters which may have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council: Provided, however, that any notice of motion consistent with good order may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

REPORTS FROM COMMITTEES, AND MINUTES FROM THE MAYOR.

Form of report.

29. All reports from Committees shall be written on foolscap-paper, with a margin of at least one-fourth of the width of such paper; and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's minutes.

30. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing. Every such minute shall be written upon paper of the same kind and with the same margin as a report from a Committee, and shall be signed by such Mayor.

How reports, &c., are to be dealt with. Duties of Chairman, &c., in certain cases.

31. No motion shall (unless as hereinafter provided) be permissible, on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable such Council Clerk to make the necessary entry on the business-paper, and to give such due notice.

QUESTIONS AND STATEMENTS.

Limitations as to questions and statements.

32. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this "Part" of these By-laws.

Notice to be given.

33. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

34. It shall not be compulsory upon any person questioned as aforesaid to answer the questions so put to him.

Question to be put without argument.

35. Every such question must be put categorically, without any argument or statement of fact.

Similar provisions as to statements.

36. Every such statement must be made without argument. *No discussion on question, &c. Rights of objection and of subsequent motion reserved.*

37. No discussion shall be permitted as to any such question, or as to any reply, or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question or reply, or refusal to reply, or any such statement as aforesaid.

ORDER OF DEBATE.

Mode of addressing the Council, &c.

38. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding: Provided that, in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to such Alderman or officer to be questioned, and may be replied to in like manner. But in every such case the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall, on all occasions, when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted if in order.

39. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitation as to number of speeches, &c.

40. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question, other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and seconder.

41. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment, without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

42. No Alderman shall digress from the subject under discussion, or shall make any personal reflections nor impute improper motives to any other Alderman.

Adjournment of debate.

43. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned, shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

44. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Alderman may require question to be stated, &c., under certain restrictions.

45. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided, however, that no such request or requisition shall be so made as to interrupt the discussion; also, that if such request or requisition shall appear to the Mayor or Chairman not to have been made *bonâ fide* it shall not be complied with.

Mayor or Chairman may move or second motion, &c.

46. The Mayor or Chairman may move or second any motion or amendment, or put any question as provided for by section 3 of this "Part" of these By-laws, and such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The

Mayor or Chairman shall rise while so speaking (unless prevented by some bodily infirmity from so doing), but shall be considered as still presiding.

QUESTIONS OF ORDER.

Mayor or Chairman to decide points of order.

47. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided.

Acts of disorder.

48. Every member of the Council who shall commit a breach of this "Part" of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

Mayor, &c., may call members to order.

49. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

Any member may raise question of order.

50. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member, which such first-named member may consider out of order.

Mode of proceeding thereon.

51. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission, such member may explain, retract, or apologise for the matter or remark alleged to have been out of order. And if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member on being called to order shall ask such permission to explain, retract, or apologise as aforesaid, the Mayor or Chairman shall, of his own authority, grant or refuse such permission, as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of the Mayor or Chairman to take the sense of the Council, at once and without discussion, as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with: Provided that, if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be reopened; and provided further, that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order, after the same shall have been discussed.

Decision of points of order.

52. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

Motions out of order to be rejected.—Members to explain, retract, or apologise, &c.

53. Whenever it shall have been decided, as aforesaid, that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected. And whenever anything said or done in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction, or apology, as the case may require.

Penalties for persisting in disorderly conduct.

54. Any member of the Council who shall have been called to order, and who after having been twice directed to withdraw as aforesaid shall refuse to do so, or who shall persist in any line of conduct or argument, or of observations which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction, or apology

as aforesaid when required so to do, or who shall be guilty of any other act of disorder as defined in section 48 of this "Part" of these By-laws, and shall refuse to make such explanation, retraction, or apology as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction, for the first offence, to a penalty of not less than ten shillings nor more than five pounds; and on a second conviction for the like offence, he shall be liable to a penalty of not less than one pound nor more than ten pounds; and on a third conviction, and for every further conviction for the like offence, he shall be liable to a penalty of not less than two pounds nor more than twenty pounds.

Power of Council as to laying down General Rules, &c.

55. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or practice may, by motion on notice, respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar questions of order or of practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties unless and until it be rescinded, but shall have no retrospective operation: Provided, however that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which, in his opinion, is contrary to law.

MODE OF VOTING.

How questions are to be put.

56. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Division.—Penalty for refusing to vote.

57. Any Alderman shall be at liberty to call for a division. In such case the question shall be put first in the affirmative and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote on such division—not being disabled by law from so voting—shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds.

PROTESTS.

Mode of Protesting—Protest to be recorded, but may under certain circumstances be expunged.

58. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must, however, be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute-book; but if in the opinion of the Council it be inconsistent with the truth, or disrespectfully worded, it may, by resolution or notice, be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin to the resolution ordering such expunction.

COMMITTEES OF THE WHOLE COUNCIL.

Rules applicable to business in Committee.

59. The following sections of this "Part" of these By-laws shall (except as herein excepted) be taken to apply to the conduct of business in Committee of the Whole Council, namely:—Sections 14 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded), 15, 16, 17, 18, 38, 39, 42, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54, 56, and 57.

Disorderly conduct in Committee.—Refusal to vote.

60. Whenever any member of the Council shall, while the Council is in Committee of the Whole, be considered guilty of an offence against good order within the meaning of section 54 of this "Part" of these By-laws, it shall be competent to any Alderman to move that the Council resume its sitting, and that such matter be reported; and if such motion be carried, such matter shall be reported accordingly, and an entry of such report shall be made in the minute-book. And whenever any Alderman shall have failed to vote on any occasion in Committee of the Whole Council, as required by section 57 of this "Part" of these By-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the minute-book: Provided that in the case of an Alderman failing to vote, as aforesaid, no special motion that the Council resume its sitting shall be necessary; but it shall be the duty of the Chairman of such Committee of the Whole, in making his report of the proceedings in such Committee, whenever such report may be made, to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has failed to vote.

Divisions in Committees on points of order may be reported.

61. Whenever a decision upon any point of order shall have been given by the Chairman of a Committee of the Whole Council, under the provisions of section 47 of this "Part" of these By-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried such decision shall be so embodied in such report whenever the same shall be made.

How progress may be reported.

62. Any Alderman may, at any time during the sitting of a Committee of the Whole Council, move that the Chairman report "progress" (or "no progress," as the case may be), and that leave be asked to sit again at a later period of the same day, or on any future day; or that no leave be asked to sit again. And if such motion be carried, the Council shall resume its sittings, and a report shall be made accordingly; but no discussion shall be permitted on any such motion. And if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

Reports of proceedings in Committee.—Want of quorum in Committee.

63. All reports of proceedings in Committee of the Whole Council shall be made to the Council, *vis à voce*, by the Chairman of such Committee; and report of such proceedings shall be made in every case, except when it shall be found, on counting the number of members during the sitting of any such Committee, that there is not a quorum present. In the latter case, the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed: Provided that, in making any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

How reports are to be dealt with.

64. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute-book; but except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application as aforesaid for leave to sit again be considered to have been granted by such Council, until a motion shall have been made and passed for such adoption, or for the granting of such leave. And every such motion for the adoption of a report, or for the granting of leave as aforesaid, and the order of debate on such motion, shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions: Provided, however, that where a report shall have been made, under section 60 of this "Part" of these By-laws of disorderly conduct in Committee, or, under section 57 of this "Part" of these By-laws, of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof, and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

CALLS OF THE COUNCIL.

How call of the Council may be ordered.

65. A call of the Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Such call compulsory in certain cases.

66. There shall, without any special order to that effect, be a call of the Council for the consideration of every motion which may be made under section 55 of this "Part" of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

Mode of proceeding.

67. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent, a record shall be made of such absence. But if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence without legal excuse.—Further call when question adjourned.

68. Any Member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who, being absent, shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that, by reason of extreme illness or any other sufficient

cause, he has been unable to send an excuse in writing as aforesaid, or who having answered to his name as aforesaid shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration; and the provisions herein, as to penalties for absence, shall have reference to such further call. And if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

STANDING AND SPECIAL COMMITTEES.

Standing Committees.

69. There shall be two Standing Committees, namely—A General Committee for Works and a Finance Committee. These Committees shall be appointed every year, at the first meeting of the Council which shall be holden after the election of the Mayor.

Committee for Works.

70. The General Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report, from time to time, as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire into and report upon.

Finance Committee.

71. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report, from time to time, as to all matters which they may consider to affect, or to be likely to affect, the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire into and report upon.

Special Committees.

72. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which in the opinion of the Council a Special Committee ought to be appointed. And no Standing Committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, and it shall be incumbent upon the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as in his opinion ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot; and in the latter case, or if an amendment to the effect that such Special Committee be appointed by ballot be carried, each member then present shall receive a list of all the members of the Council, from which list he shall strike out all names but those of the persons of whom in his opinion such Special Committee ought to be composed, and the Mayor or Chairman shall examine such lists and shall declare the result. And in the event of its becoming necessary through an equality of votes to decide as to which of two or more Aldermen shall serve on such Committee, such Mayor or Chairman shall so decide.

Chairman of Committees.

73. Every Committee of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee within seven days after their appointment.

Term of service in Committee.

74. Appointments to the General Committee of Works, and the Finance Committee, shall be for the whole municipal year. The appointment of every Special Committee shall be considered to endure until the duties for which such Committee have been appointed shall have been fully performed: Provided, however, that nothing herein contained shall be held to affect in any way the right of such Committee to remove any Chairman of such Committee, or to appoint another such Chairman in his stead, or to militate against the general provisions as to Committees in sections 109 and 110 of the Municipalities Act of 1867; and that so much of this by-law as relates to the appointment, powers, and duties of Committees, shall be read and interpreted in connection with such last-mentioned general provisions.

Committee meeting, how held.

75. The Chairman shall call a meeting of any Committee, whenever he judges it necessary, or when requested to do so by any two members of such Committee.

Records of transactions in Committee.

76. The Chairman of each Standing Committee may make or cause to be made memoranda of all the transactions of such Committee, which memoranda he may hand to the Council Clerk to be kept with the records of the Council.

EXPENDITURE.

Except in emergent matters, cost of all work to be estimated before undertaken.

77. With the exception of emergent matters, hereinafter specially provided for, no work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Emergent matters.—Expenses authorized to be reported.—Outlay to be in accordance with Orders of the Council.

78 For emergent matters during the interval which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

By order of the General Committee for Works, or of the Chairman and one member of such Committee,—for repairs or emergent works, to the extent of two pounds: Provided, that in every case, a detailed report of every such outlay shall be laid before the Council at its next meeting; also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council; and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

All claims to be examined and reported upon by the Finance Committee.

79. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee, before any order shall be made for payment of such accounts or demands.

Certificate, memorandum, or report, required with each claim.

80. No payment shall be so ordered unless there shall be a certificate, memorandum, or report from the Committee, from the Mayor, or from the Officer of the Council to whom the direction or the guardianship of such expenditure properly belongs, showing that the demand is legitimate, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, before recommending payment.

COMMON SEAL AND RECORDS OF THE COUNCIL.
Common Seal—how secured.

81. The common seal shall be in the custody of the Mayor; or, if found more convenient, it may by resolution of the Council be placed in charge of the Council Clerk, and shall be kept in such secured form as the Mayor may direct.

When and how common seal to be used.

82. The common seal shall not be attached to any paper or document unless the same be signed by the Mayor, or in case of his illness or absence by an Alderman duly authorized by resolution of the Council and countersigned by the Council Clerk.

How books of account are to be kept and inspected.

83. All books of account and all records, statements, and memoranda of receipts and expenditure shall be kept in such manner and form as the Council, may direct. The Finance Committee shall have the right to inspect all the books of account, and to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

Records of the Council defined.—Provisions for proper keeping of same.

84. The minute-book, letter-book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls and other records relating to elections, business-papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business, addressed to the Council or to the Mayor, or to any officer of the Council, orders, reports, returns and memoranda relating to municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. All such records other than the minute-book and other books, and other than electoral rolls and other records relating to elections, shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. The Council Clerk shall be held responsible for the safe custody of all the records of the Council.

Impression of seal, &c., not to be taken, &c., without leave of Council.—Penalties.

85. No Alderman or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any books or records of the Council to any person other than a member of the same, without leave from such Council, except as otherwise provided by law. Any

member or officer of the Council who shall be guilty of a breach of this section, shall be liable on conviction, for the first offence, to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence, to a penalty of not less than five pounds nor more than twenty-five pounds.

Records not to be removed, &c.—Penalties.—Exceptional circumstances.—Receipt to be given in every case before document received.—Proviso as to use of records as matter of evidence.

86. Any person removing any such book or other record of the Council as aforesaid from the Council Chamber, or the place where by direction of the Council such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal as hereinafter provided, shall for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid, and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law for detention of the same, as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk, in order that such Clerk may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform. Also, that the Mayor or the Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit at law, by, against, or at the instance of the Council. But in all such cases such Clerk, Mayor, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records, until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed: And provided also, that the Mayor, Council Clerk, or other officer of the Council who may be subpoenaed to produce any book or other record of the Council in a Court of Law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall before removing the same leave at the Council Chamber a receipt for such book or other record as aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid, shall be legally responsible for the safe keeping or return of the same.

Penalty for defacing or destroying record.

87. Any person destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than five pounds nor more than fifty pounds.

OFFICERS AND SERVANTS.

Notice to Candidates.

88. No appointment to any permanent office at the disposal of the Council, shall take place until public notice shall have been given, inviting applications from qualified candidates for the same.

Mode of appointment.

89. Every appointment may be made by ballot, or in such other mode as may at the time be determined by the Council.

Exceptional cases.

90. Nothing herein contained shall be held to prevent the appointment by the Council, without advertisement, of any salaried officer or servant of the Corporation, to any other permanent office or employment at the disposal of the Council, to which no further salary is attached; or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid for by allowances proportionate to the extent of such duties; or to prevent any similar appointment or employment by the Mayor, or by any Committee or officer of the Council, of any such officer or servant, under the authority of any by-law; or to prevent the employment, as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

Bonds for good conduct.

91. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of officers and servants of the Council.

92. The duties of all officers and servants of the Corporation, other than the Council Clerk and Treasurer, shall be defined by such regulations as may from time to time, and in accordance with law, be made by the Council.

Duties of Council Clerk.

93. The Council Clerk, in addition to the duties which by the Municipalities' Act of 1867, or by the present or any other by-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipality under the provisions of the said Municipalities Act. He shall also conduct all the correspondence necessary on the part of the Council. He shall likewise have charge of all books, documents, and records of the Council, except such books or documents as may (under these by-laws) be entrusted temporarily to any other officer, and shall be responsible for the safe keeping of the same. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Duties of Treasurer, &c.

94. The Treasurer shall be in charge of the revenue of the Municipality under the direction of the Council, and shall keep the account of receipts and disbursements in such manner as said Council may approve. He shall be responsible for the safe keeping of any book or record committed to his charge by an order of the Council. Any other officer of the Council having any records so committed to his charge shall be responsible for the safe keeping of such records.

Special powers of Mayor.

95. The Mayor shall have the general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant, as he may think necessary; unless such return, statement, explanation, or information shall have been already prepared or given, or have been already placed on record as hereinbefore provided; or shall have been expressly forbidden or dispensed with by the Council. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *vivâ voce*, or put into writing, as the Mayor may direct.

MISCELLANEOUS.

Leave of absence.

96. No leave of absence shall be granted to the Mayor or to any Alderman, otherwise than by a resolution of the Council adopted after due notice.

Mode of letting work.

97. Whenever it is decided that any work shall be executed, or any materials supplied, it shall be done or supplied by contract. Tenders may be called for the execution of such work, or the supply of such material, by public notice as hereinafter provided; or the Council may, at its discretion, authorize the letting of the contract to the best advantage.

Drafts of intended by-law.

98. A draft of every intended by-law shall be in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same; and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

Motions for rescission of previous orders, &c.

99. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration of any by-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same; or the passage, after due notice as hereinbefore provided, and in due course of law, of any by-law, for the repeal or amendment of any other by-law.

Lapsed business.

100. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council, after due notice, and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

Suits and prosecutions for penalties, &c.

101. Such suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities' Act of 1867, or of any by-law made thereunder, or of any statute the operation of which may have been extended to the Municipality, as may have been directed by the Council, or by the Mayor, to be commenced and laid, shall be so commenced and laid as follows, namely:—When against a member of the Council, or an Auditor, or any officer of the Corporation, by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other

officer or person named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or by-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council, or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought, or information laid, as aforesaid, against any member of the Council, or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of such Council, or of the Mayor, nor against any other person, except upon the order of the Council, or of the Mayor. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid, as aforesaid, except on an express resolution of the Council, in any case where the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council, or where on the trial or hearing of any such suit or information the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may, on the order of the Council or Mayor, be entrusted to an attorney.

How notices are to be published.

102. In all cases where public notice is or shall be required to be given by any by-law, of any appointment, resolution, act, order, or regulation made, done, or passed, or proposed to be made, done, or passed by the Council, or by any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chamber for the space of four days, if so ordered by the Council; or on some conspicuous place readily accessible to the public; or when judged expedient by the Council, or required by law, by advertising the same in some newspaper circulating in the Municipality.

Power to suspend temporarily certain portions of these by-laws.

103. Any of the foregoing by-laws which relate to or affect the proceedings at meetings of the Council, may be suspended *pro tempore* without notice, in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

Mode of proceeding in cases not provided for.

104. In all cases not hereinbefore provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

PART III,

SUBDIVISION OF PROPERTY.

Change of occupier.

1. If the owner, tenant, or occupier of any property within the Municipality for which he or she is assessed shall give up the possession of such property, he or she shall, within seven days from the date of giving up the possession thereof, deliver to the Council Clerk a notice in writing showing and setting forth the name and address in full of the person to whom possession of such property has been given. And if any property shall be subdivided in the interval between one assessment and another, and let to two or more persons, the tenant or owner who previously occupied the whole of such property, or who is still in possession of a portion thereof, shall, within thirty days from the time of such subdivision being made, deliver to the Council Clerk a notice in writing, showing and setting forth the area, the rent, and the names in full of the occupier or occupiers of such subdivisions; and any such owner, tenant, or occupier, failing or neglecting to give such notice as is herein required, shall, on conviction, forfeit and pay any sum not exceeding five pounds, nor less than five shillings for every such offence.

PART IV.

COLLECTION AND ENFORCEMENT OF RATES.—TIMES AND MODE OF COLLECTION.

Rates under section 164 of the 31st Victoria, No. 12, to be collected yearly or half-yearly.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in said section, shall be collected yearly or half-yearly, as may be determined upon by the Council, in advance, and shall be held due and payable on such day as the Council shall by resolution from time to time appoint.

Rates to be paid at the Council Chamber and other places.

2. All persons liable to pay any rates as aforesaid shall pay the amount thereof within the time prescribed by the aforesaid Act, or by this "Part" of these By-laws, at the Council Chamber, to the Treasurer, and at such other place or places, and on such days and at such hours, as may be fixed by resolution of the Council.

Person served in error to return rate-paper.

3. Any person who has been assessed and served with a rate-paper in error shall, within fourteen days from the date of service thereof, return the same to the Council Clerk, failing which he shall be liable to pay to the Council the amount of rate for which such assessment has been made.

Defaulters.

4. It shall be the duty of the Treasurer to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for payment of the same as aforesaid.

Mayor to enforce payment.

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Rate-paper may be served through the Post Office, &c.

6. The Council may direct rate-papers to be sent through the Post Office to the person rated, addressed to his residence or last known place of abode, and the day of putting such rate-paper into the Post Office shall be deemed the date of service. Rate-papers, however, may be served in such other manner as the aforesaid Act, 31st Vict., No. 12, authorizes or directs.

ENFORCEMENT BY DISTRESS.

Bailiff.—Tenure of Office.

7. The Bailiff shall be appointed by resolution of the said Council, and shall be at any time removable by a like resolution.

Sureties for Bailiff.

8. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of twenty-five pounds each, for the faithful performance of his duty.

Duties of Bailiff.

9. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

Warrant of Distress.

10. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

Distress and Sale.

11. If the sum for which any such distress shall have been so made shall not be paid, with costs as hereinafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Municipality as the said Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

Inventory.

12. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the rate-payer, on demand, at any time within one month after the making of such distress.

Goods may be impounded.

13. The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates, as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded or secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner may direct order of sale.

14. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

15. The Bailiff shall hand over to the Treasurer all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

16. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this by-law, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

WARRANT OF DISTRESS.

I, _____, Mayor of the Municipal District of Broughton Vale, do hereby authorize you, _____, the Bailiff of the said Municipality, or your deputy, to enter in and upon the land or premises, or into the dwelling-house of _____, situate at _____, and to distrain the goods and chattels you may there find, for the sum of £ _____, being the amount of rate or rates due to this Municipality, according to the Schedule hereto annexed, for the said land or premises or dwelling-house, and to proceed thereon for the recovery of the said rate or rates, together with costs of the warrant, and your authorized charges for taking, keeping, and selling the said distress, according to law.

Given under my hand and the common seal of the Mayor and Aldermen of the Municipal District of Broughton Vale aforesaid, at the Council Chambers, Broughton Vale, this day of _____ 18____

[Seal.]

Mayor.

SCHEDULE B.

INVENTORY.

I HAVE this day, in virtue of the warrant under the hand of the Mayor of the Municipal District of Broughton Vale, dated _____, distrained the following goods or chattels in the dwelling-house, or in or upon the land and premises of _____, situate at _____ within the said Municipality, for the sum of £ _____, being the rate or rates due to the said Municipality to the day of _____ 18____

Dated this _____ day of _____, 18____

Bailiff.

(List to be appended.)

SCHEDULE C.

COSTS.

	s.	d.
For every warrant of distress	2	0
For every warrant and making levy	2	0
For making and furnishing copy of inventory	2	0
For man in possession, each day or part of a day	6	0
For mileage, where the warrant shall be executed, for every mile or part of a mile from the Council Chamber	1	0
For sale, commission, and delivery of goods, not exceeding one shilling in the £ on the proceeds of the sale, in addition to the costs of advertisements (if any.)		

PART V.

ROADS, &c.

New roads to be reported on.

1. No new public road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park, shall have been examined by the General Committee for Works and reported upon to the Council by such Committee or Inspector of Works.

Plan of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the said Municipality shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, park, or other place as aforesaid.

Dedication of new roads, &c.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or other place to public use or recreation as aforesaid, as may be considered necessary by the Council. And such further instrument of dedication shall be preserved as a record of the Council.

Alignment of roads, and removal of encroaching fences.

4. The Council may at any time cause an alignment of any proclaimed road within the Municipality to be made, and shall cause a notice in writing, signed by the Council Clerk or other officer, to be served either personally, or at the usual or last known place of abode of the occupier, tenant, or owner of any land, the fence, wall, or other erection whereof projects or encroaches on any such road or any part thereof, to remove such fence, wall, or other erection, within three months from the date of service of such notice; and if such fence, wall, or other erection be not removed within the time herein required, it shall be lawful for the Council to cause the removal thereof, at the cost of such occupier, tenant, or owner; and such occupier, tenant, or owner failing or neglecting to remove such fence, wall, or other erection within the time herein required, after service of notice as aforesaid, shall on conviction for every such offence forfeit and pay, in addition to the cost of removing such fence, wall, or other erection, any sum not less than one pound, nor more than ten pounds.

Removal of fallen trees, &c.

5. If any tree or part of any tree shall fall on or across any public road within the Municipality, from any land by which such road is bounded, it shall be lawful for the Mayor or any Alderman or officer of the Council to give notice in writing to the occupier, tenant, or owner, of such land, to remove such tree or the part of any tree forthwith; and if such occupier, tenant, or owner, on whom notice has been served as aforesaid, shall fail or neglect to remove such tree, or the part of any tree, the Mayor, Alderman, or officer giving such notice may cause such tree or part of any tree to be removed; and the occupier, tenant, or owner, on whom notice has been served as aforesaid, shall on conviction forfeit and pay for every such offence a sum of not more than two pounds nor less than five shillings, over and above the cost of removing such tree or part of any tree.

No turf, gravel, &c., to be removed from any streets or roads without permission.

6. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, gravel, soil, stone, or other material, in or from any part of the carriage or footway of any street, road, or other public place within the said Municipality without leave first had and obtained from the Council, or who shall break up or otherwise damage any such carriage or footway, shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Entrance to public roads to have culverts across the water-table.

7. Where an entrance has been made from any land by the occupier, tenant, or owner thereof to any public road within the Municipality, and the traffic caused by such entrance crosses the water-table of such public road, the occupier, tenant, or owner of any such land from which such entrance is made, shall on notice signed by the Council Clerk or other officer being served either personally or at the usual or last known place of abode of such occupier, tenant, or owner, by some person duly authorized by the Mayor, erect such necessary culvert across such water-table for the protection thereof from injury by the traffic caused by such entrance, as may be required by the Council, and in accordance with a plan and specification to be supplied by the Council for such purpose; and in case such occupier, tenant, or owner, making or causing, or permitting such entrance to be made shall fail or neglect to erect such culvert within thirty days from the date of such notice being served, it shall be lawful for the Council to cause such culvert to be erected at the cost of such occupier, tenant, or owner, on whom notice has been served as aforesaid; and if such occupier, tenant, or owner, of such land, shall fail or neglect to erect, or cause to be erected, such culvert within the time herein required, he or she shall on conviction forfeit and pay any sum not exceeding five pounds for every such offence, in addition to the cost of erecting such culvert as aforesaid.

Temporary stoppage of traffic for repairs, &c.

8. The Council or any officer or person acting thereunder being duly authorized, may, at any time cause the traffic on any road, street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this by-law, either by travelling on such road, street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber, &c.

9. Any person who shall haul or draw, or cause to be hauled or drawn, upon any part of any street, road, or public place within the said Municipality, any timber, stone, or other thing otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street, road, or public place, to the injury thereof; or to hang over any part of any such vehicle or barrow so as to occupy or obstruct the street or road beyond the breadth of the said vehicle or barrow, or shall lock

any wheel of any vehicle to the injury of such street or road, shall, upon conviction, forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

Driving carriages, &c., on footways.

10. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way, or footway of any street, road, or other public place in the said Municipality, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal in or so near to any such street, road, or other public place as that any blood or filth shall run or flow upon, or over, or be on any or either of any such carriage or footway, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street, road, or public place, any waggon, cart, dray, sledge, or other carriage, or any wheel, wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such footway, shall, upon conviction, forfeit and pay for the first offence a sum not exceeding forty shillings, nor less than five shillings; for the second offence a sum not exceeding five pounds, nor less than ten shillings; and for a third and every subsequent offence a sum not exceeding ten pounds, nor less than one pound, for each offence.

Cattle, &c., straying on roads and streets.

11. Any person who shall suffer any kind of cattle, horse, mule, swine, sheep, or goats belonging to him or her, or under his or her charge, to depasture, stray, go about, or to be tethered in or on any street, road, or public place within the said Municipality, shall forfeit and pay in respect of every such offence any sum not exceeding two pounds, nor less than five shillings.

Careless driving, &c.

12. If the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage on the left or near side of the said street, road, or thoroughfare; or if any person shall in any manner wilfully prevent any other person or persons from passing him, or her, or any carriage under his or her care, upon such road, street, or thoroughfare, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so offending shall, upon conviction, forfeit and pay any sum not exceeding forty shillings.

Riding or driving furiously, &c.

13. Any person who shall ride or drive through or upon any street, road, or public place within the said Municipality, so negligently, carelessly, or furiously, that the safety of any other person shall, or may be endangered, shall, on conviction, forfeit and pay a sum not exceeding ten pounds, nor less than two pounds, for every such offence.

Erection and removal of fences.

14. Any person who shall erect any fence, or remove any existing fence on the side of any road within the Municipality, without first giving the Council seven days notice in writing, such person shall, on conviction for every such offence, forfeit and pay any sum not exceeding five pounds.

Filling in water-tables, or diverting flow of water.

15. Any person who shall fill in, or cause to be filled in, or choked up, any water-table, culvert, or water escape on any road within the Municipality, or on land through which such water-escape passes, or shall in any way divert the flow of water without the sanction of the Council, shall, on conviction for every such offence, forfeit and pay any sum not exceeding ten pounds.

Dangerous trees, &c., to be removed.

16. If any tree, building, or other erection, shall be standing in such a tottering or dangerous state on any land within such a distance of any road within the Municipality, as shall, or may in the falling thereof, or any part thereof, endanger the life or lives of any person or persons passing along such road, it shall be lawful for the Council or the Mayor to cause a notice to be served on the owner, tenant, or occupier of such land, to remove any such tree, building, or other erection; and if such person, on whom notice as aforesaid has been served, shall fail, neglect, or refuse to remove any such tree, building, or other erection forthwith, he shall, on conviction for every such offence, forfeit and pay any sum not exceeding ten pounds; and the Court may authorize the Council to cause the removal of any such tree, building, or other erection forthwith, at the cost of such owner, tenant, or occupier, in addition to any penalty that may be inflicted upon him as aforesaid.

Standing trees, &c., on roads and public places not to be felled.

17. If any person shall cut or fall, or remove, or destroy any standing timber, or brush, in or upon any street, road, way, thoroughfare, or reserve within the Municipality, without the

permission of the Council, every person so offending shall for the first offence forfeit and pay, on conviction, the penalty or sum of ten shillings, and for every subsequent offence the penalty shall, on conviction, be extended to the forfeiture and payment of the sum of forty shillings.

Ferocious dogs not to be at large on road, &c.

18. If any person shall permit or suffer to be at large in any road, way, or thoroughfare within the said Municipality, any ferocious dog, and shall, after public notice given by the Council directing dogs to be confined, neglect or refuse to confine such dogs; or if any dog or bitch, otherwise quiet, shall at any time run after and annoy any person on foot or on horseback, or riding in any vehicle, so as to cause alarm or danger, then the owner of such dog so at large as aforesaid, or of such dog or bitch causing such alarm or danger, and refusing or neglecting to confine the same after public notice as aforesaid, shall for every such offence forfeit and pay, on conviction, the penalty or sum of not less than ten shillings, nor more than two pounds.

Road not to be obstructed.

19. Any person or persons who shall fence across, or fence in, or in any way obstruct any public road, highway, or thoroughfare within the said Municipality, shall, upon conviction, forfeit and pay a penalty of not less than ten shillings, nor more than two pounds, for every such offence.

Timber not to be placed in river or watercourse.

20. Any person or persons placing, or causing to be placed any timber or fallen trees in any river, creek, or watercourse within the said Municipal District, whereby any bridge, culvert, or road might be in danger of being destroyed in time of floods, if not removed within sixty days after receiving notice from the Council, shall, on conviction, forfeit and pay a penalty of not more than forty shillings, nor less than ten shillings, for every such offence.

Dead animals not to be cast on road or into any watercourse, &c.

21. Any person or persons who shall cast any dead animal on any road or public thoroughfare, or who shall cast any dead animal, or any animal with intent of drowning into any river, creek, or watercourse, in the said Municipality, or who shall suffer such animal to remain upon any such road or thoroughfare, or in any such river, creek, or watercourse after notice to remove the same, signed by the Mayor or by the Council Clerk, shall, on conviction, forfeit and pay any sum not exceeding five pounds, nor less than one pound; in addition to the cost of removing the same, incurred by the order of the Mayor, or upon that of any two Aldermen, to cause the said animal to be removed and destroyed.

Slaughter-houses not to be close to public thoroughfare.

22. No slaughter-house or place for slaughtering cattle, sheep, or swine shall be allowed within one hundred yards of any public road or thoroughfare within the said Municipality; and any person or persons using any premises as a place for slaughtering cattle, sheep, or swine within the distance of one hundred yards of any public road or thoroughfare within the Municipality aforesaid, shall, upon conviction, forfeit and pay for each and every such offence a sum, or penalty, not exceeding five pounds nor less than ten shillings; and it shall be lawful for any officer authorized by the Council to enter on the lands and premises, and to measure and ascertain the distance.

Who to mark out roads.

23. The surveyor of the Municipal District, or other officer, or person duly authorized by the Council in that behalf, shall be the proper officer for marking out when and where necessary the roads, streets, lanes, and thoroughfares which now are, or shall hereafter be, under or subject to the care, construction, or management of the Council, and the carriage or foot ways in each of such roads, streets, lanes, or thoroughfares.

Cattle or animals may be impounded off roads or reserves.

24. Any officer or person duly authorized by the Council shall have the power to impound in the nearest public pound all cattle and animals of every description found straying on the public roads or thoroughfares, or reserves, in the Municipal District of Broughton Vale.

As to interference with Officer of Council in enforcing by-laws.

25. Any person who shall obstruct or interfere with any officer of the Council or other person doing or performing any duty or act under any of the by-laws of the said Municipal district, shall forfeit and pay a penalty not exceeding twenty pounds nor less than two pounds.

Penalties to be paid over to Treasurer.

26. All penalties under any of the by-laws shall be paid over to the Treasurer of the Municipality, to be appropriated as the Council may direct.

Provision as to amount of minimum penalty.

27. In any conviction under these by-laws where a minimum penalty has not been named the convicting Justices or Court shall impose a minimum penalty of not less than five shillings.

Provision as to costs.

28. Where any conviction has taken place or a penalty has been imposed under the authority of any of these by-laws, wherein no provision has been made for the recovery of costs, the convicting Justices or Court shall in each and every such case, together with the fine or penalty, adjudge and order the payment of costs of suit.

PART VI.

Extirpation of weeds.

Council may cause officer to inspect lands and report on the same. Notice to be served.

1. The Council may at any time cause an inspection of all lands within the Municipality to be made by an officer appointed for that purpose, whose duty it shall be, on making such inspection, to report to the Council on the state of the growth of the Scotch thistle, the Bathurst burr, the cotton plant, or other weeds that may be detrimental to good husbandry on all such lands, and the Council may direct such officer to serve a notice, signed by the Council Clerk or other officer, on the owner, tenant, or occupier of any such lands to destroy all such weeds within a reasonable time, not being more than sixty days nor less than fourteen days from the date of the service of such notice; and if such owner, tenant, or occupier shall fail or neglect to destroy all such weeds as aforesaid within the time required by such notice, he or she shall on conviction for every such offence forfeit and pay any sum not less than one pound nor more than ten pounds; and the Court may order all such weeds to be destroyed at the expense of such owner, tenant, or occupier forthwith, in addition to any penalty that may be inflicted upon him or her as aforesaid, together with the costs of suit: And such officer may at any time enter on all lands within the Municipality for the purpose of inspecting the same without any further warrant than the authority of these by-laws.

Made and passed by the Mayor and Aldermen of the Municipal Council of Broughton Vale, at their meeting, the twenty-sixth day of October, in the year of our Lord one thousand eight hundred and seventy-two.

(L.S.) JOHN DAVEY,
Mayor.

By order of the Council,—
THOMAS BOYCE,
Council Clerk.

1872-3.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPALITY OF ULMARRA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 7th January, 1873.

MUNICIPALITY OF ULMARRA.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Ulmarra,—for regulating their own proceedings and the duties of the officers and servants of the Council—for the collection and enforcement of rates, and for the management of the roads, streets, and public places within the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the Municipalities Act of 1867.

HENRY PARKES.

PART I.

BY-LAWS FOR THE MUNICIPAL DISTRICT OF ULMARRA.

Meetings of the Council.

1. The Council shall meet for the despatch of business at the hour of 5 o'clock P.M., on the second Thursday of every month, unless such day shall happen to be a public holiday. In the latter case, the meeting shall be held on such other day as the Mayor may appoint.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect, from among themselves, a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute-book. Two-thirds of the above Council to form a quorum.

Order of business.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
- (2.) Petitions (if any) to be presented and dealt with.
- (3.) Correspondence to be read, and, if necessary, ordered upon.
- (4.) Reports from committees, and minutes from the Mayor (if any), to be presented and ordered upon.
- (5.) Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and any statements as to any facts, matters, or circumstances, requiring attention by the Council, or any of its committees or officers, to be made.

(6.) Motions, of which notice has been given, to be dealt with as they stand on the business-paper.

(7.) Orders of the day to be disposed of as they stand on the business-paper: Provided that it shall be competent to the Council at any time, by resolution without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business-paper, without any formal suspension of this section. Also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

4. At special meetings of the Council, the business—after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting—shall be taken in such order as the Mayor or the Alderman at whose instance such special meeting shall have been called may have directed.

5. The business-paper for every meeting of the Council other than a special meeting shall be made up by the Council Clerk not less than two nor more than three days before the day appointed for such meeting; he shall enter on such business-paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he shall have received, or shall have been required or directed so to enter, in due course of law, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 3 of this "part" of these by-laws in the same order as such notice, requisition, or direction shall have been received.

6. The business-paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Alderman calling such meeting.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business-paper for such meeting, and shall embody the substance of such business-paper.

8. The business-paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business-paper of the mode in

which each matter entered thereon has been dealt with, and such business-paper so noted shall be a record of the Council.

9. All notices of motions and all requisitions from Aldermen and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting shall be numbered by the Council Clerk as they are received, and each such notice, requisition, and direction shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been so disposed of, shall have been duly verified as required by section 3 of this "part" of these By-laws: Provided however that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk shall be at liberty to withdraw the same at any time before the making up of the business-paper.

10. After the business-paper shall have been made up as aforesaid all the said notices of motions, requisitions, and directions as to which entries have been made thereon shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and Amendments.

11. Except by leave of the Council, motions shall be moved in the order in which they stand on the business-paper, and if not so moved or postponed shall be struck from such business-paper and be considered to have lapsed.

12. No motion of which notice shall have been entered on the business-paper shall, except as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given; unless by some other Alderman producing a written authority for that purpose from the first-named Alderman.

13. No motion in Council shall be discussed unless and until it be seconded.

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

15. No motion or amendment shall be discussed until it shall have been reduced into writing.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

17. If an amendment be carried, the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

18. If any amendment—either upon an original question or upon any question amended as aforesaid—shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

19. No discussion shall be permitted on any motion for adjournment of the Council, and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business-paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

20. Every requisition by an Alderman that any particular matter of business be brought before the Council shall be regarded and treated as a notice of motion by such Alderman, that such business be taken into consideration by the Council. And he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit, in reference thereto, which shall be consistent with the notice of such business and with good order. And if such Alderman be absent, or if being present and so called upon he shall make no such motion, then it shall be open to any other Alderman to make such motion. And when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given; subject, however, to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order. And if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business-paper.

Orders of the Day.

21. The Orders of the Day shall consist of any matters, other than motions on notice, which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business-paper for consideration.

22. Section 20 of this "Part" of these By-laws shall be considered applicable to Orders of the Day. And the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such Order of the Day relates, shall be the person called upon to move: Provided that as to any Order of the Day entered as aforesaid

by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

Petitions.

23. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

24. All petitions shall be received only as the petitions of the parties signing the same.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received; or that it be received and referred to one of the Permanent Committees hereinafter mentioned; or that it be received, and that its consideration stand an Order of the Day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

Correspondence.

26. The Mayor shall have the same duty in reference to letters addressed to the Council, before directing the same to be read, as by section 23 of this Part of these By-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

27. Section 25 of this "Part" of these By-laws shall be considered as fully applicable to letters addressed to the Council as to petitions.

28. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council: Provided however that any notice of motion consistent with good order may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council, which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports from Committees and Minutes from the Mayor.

29. All reports from Committees shall be written on foolscap-paper, with a margin of at least one-fourth of the width of such paper; and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

30. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction, or official cognizance, by a minute in writing. Every such minute shall be written upon paper of the same kind, and with the same margin, as a report from a Committee, and shall be signed by the Mayor.

31. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee, or a minute from the Mayor, except that the same be received, or that it be received, and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given the due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction, as aforesaid, as will enable such Council Clerk to make the necessary entry on the business-paper, and to give such due notice.

Questions and Statements.

32. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this part of these by-laws.

33. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and if necessary for a reference to other persons or to documents.

34. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

35. Every such question must be put categorically, without any argument or statement of fact.

36. Every such statement must be made without argument.

37. No discussion shall be permitted as to any such question, or as to any reply, or refusal to reply thereto, or as to any such statement at the time when such question is put, or such reply, or refusal to reply, is given, or such statement is made: Provided however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

Order of Debate.

38. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor, or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner. But in every such case the question so put and the answer thereto shall be subject to every legal objection, on the ground of disorder or irrelevancy, and all Members of the Council shall on all occasions, when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

39. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as hereinbefore provided.

40. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

41. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

42. No Alderman shall digress from the subject under discussion, or shall make any personal remarks on—nor impute improper motives to—any other Alderman.

43. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

44. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

45. Any Alderman may request the question or matter under discussion to be read or stated, for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided, however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or to materially interrupt the discussion; also that if such request or requisition shall appear to the Mayor or Chairman not to have been made *bona fide*, it shall not be complied with.

46. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question, as provided for by section 3 of this "Part" of these By-laws, except as is further provided for by section 38 of the same; but such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking, unless prevented by some bodily infirmity from so doing, but shall be considered as still presiding.

Questions of Order.

47. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided.

48. Every member of the Council who shall commit a breach of any section of this "Part" of these By-laws, or who shall move, or attempt to move, any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise, or attempt to raise, any question, or shall address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the

common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

49. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

50. Every member of the Council shall have the right of calling the attention of the Mayor or other Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member, which such first-named member may consider out of order.

51. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission, such member may explain, retract, or apologize, for the matter or remark alleged to have been out of order, and if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member, on being called to order, shall ask such permission to explain, retract, or apologize as aforesaid, the Mayor or Chairman may, of his own authority, grant or refuse such permission as he may think fit, unless any member shall require the sense of the Council at once and without discussion, as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered, by permission of the Mayor or other Chairman, the latter shall in like manner decide, or if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient; if such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with: Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be reopened: And provided further, that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order, after the same shall have been discussed.

52. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provisions, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

53. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected, and whenever anything done or said in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction, or apology, as the case may require.

54. Any member of the Council who shall have been called to order, and who after having been twice directed to withdraw as aforesaid, shall refuse to do so, or who shall persist in any line of conduct or argument or observations which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction, or apology as aforesaid, when required so to do, or who shall be guilty of any other act of disorder as defined in section 48 of this "Part" of these By-laws, and shall refuse to make such explanation, retraction, or apology, as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction for the first offence to a penalty of not less than ten shillings, nor more than five pounds; and on a second conviction for the like offence he shall be liable to a penalty of not less than one pound, nor more than ten pounds; and on a third conviction, and for every further conviction for the like offence, he shall be liable to a penalty of not less than two pounds nor more than twenty pounds.

55. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice, may, by motion on notice, respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar question of order or of practice which may thereafter arise: Any rule or principle thus laid down shall be binding upon all parties, unless and until it be rescinded, but shall have no retroactive operation: Provided, however, that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which in his opinion is contrary to law.

56. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon; and he shall be at liberty to put any such question as often as shall be necessary to enable him to form and declare his opinion as to the opinion of the majority.

57. Any Alderman shall be at liberty to call for a division. In such case the question shall be put first in the affirmative and then in the negative, and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for and shall not vote on such division, not being disabled by law from so voting, shall be liable for every

such offence to a penalty of not less than ten shillings nor more than three pounds.

58. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must however be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute-book, but if in the opinion of the Council it be inconsistent with the truth, or disrespectfully worded, it may (by resolution of the Council on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin to the resolution ordering such expunction.

59. The following sections of this "Part" of these by-laws shall (except as in herein excepted) be taken to apply to the conduct of business in Committee of the whole Council, namely—sections 14 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded), 15, 16, 17, 18, 38, 39, 42, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, and 57.

60. Whenever any member of the Council shall while the Council is in Committee of the Whole be considered guilty of an offence against good order within the meaning of section 54 of this "Part" of these By-laws it shall be competent to any Alderman to move that the Council resume its sittings, and that such matter be reported, and if such motion be carried such matter shall be reported accordingly, and an entry of such report shall be made in the minute-book. And whenever any Alderman shall have failed to vote on any occasion in Committee of the whole Council as required by section 57 of this "Part" of these by-laws the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the minute-book: Provided that in the case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary; but it shall be the duty of the Chairman of such Committee of the Whole, in making his report of the proceedings in such Committee, whenever such report may be made to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

61. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council, under the provisions of section 47 of this part of these by-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried, such decision shall be so embodied in such report, whenever the same shall be made.

62. Any Alderman may at any time during the meeting of a Committee of the whole Council, move that the Chairman report progress or no progress, as the case may be, and that leave be asked to sit again at a later period of the same day or any future day; or that no leave be asked to sit again. And if any such motion be carried, the Council shall resume its sittings and a report shall be made accordingly, but no discussion shall be permitted on any such motion; and if the same shall be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

63. All reports of proceedings in Committee of the whole Council shall be made to the Council *vivâ voce* by the Chairman of such Committee, and a report of such proceedings shall be made in every case, except when it shall be found on counting the number of members during the sitting of any such Committee that there is not a quorum present. In the latter case the sitting of the Council shall be resumed without any motion for that purpose; and the proceedings in Committee shall be considered to have lapsed: Provided that in making of any such report as aforesaid, it shall not be necessary to report any such proceedings in full, but only to state the result, general effect, or substance of such proceedings.

64. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute-book, but except as hereinafter mentioned no report shall be considered as adopted by the Council, nor shall any such application as aforesaid, for leave to sit again, be considered to have been granted by such Council until a motion shall have been made and passed for such adoption, or for the granting of such leave; and every such motion for the adoption of a report, or for the granting of leave as aforesaid, and the order of debate on such motion, shall be subject to all the same rules as other motions in Council and the order of debate on such other motions: Provided however that where a report shall have been made under section 60 of this "Part" of these By-laws of disorderly conduct in Committee, or under section 57 of this "Part" of these By-laws of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof, and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.

65. A call of the Council may be made or ordered, by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

66. There shall, without any special order to that effect, be a call of the Council for the consideration of every motion which may be made under section 55 of this "Part" of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

67. The call shall be made immediately before the motion of business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

68. Any member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent and not so excused, shall fail to show that by reason of extreme illness or any other sufficient cause he has been unable to send an excuse in writing as aforesaid, or who having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration; and the provisions herein, as to penalties for absence, shall have reference to such further call. And if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

69. There shall be four Standing Committees, namely—a By-law Committee, a Committee for Works, a Finance Committee, and a Committee for General Purposes. These Committees shall be reappointed every year at the first meeting of the Council which shall be holden after the election of the Mayor.

70. Each of the three Committees first-named in the last preceding section shall consist of three members to be taken from the Aldermen of each Ward, and the Committee for General Purposes shall consist of the whole Council.

71. The reappointment of the three said first-named Committees may, on resolution of the Council, be made by ballot. In such case a list or lists of the members for each ward shall be handed to each member then present, who shall mark against the name of each such member the title of the Committee to which in his opinion such member ought to belong. And the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result. And if there shall be an equal number of votes, for the appointment of any two or more members to any one of such first-named Committees, such Mayor or Chairman shall decide which of such members shall be appointed to such Committee.

72. The By-law Committee shall prepare for the consideration of the Council, drafts of all such By-laws as may be required for the good government of the district. They shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the district, and shall take such steps as may be necessary for the prevention or punishment of offences against such by-laws or statutes and for the preservation of public health, order, and decency.

73. The Committee for Works shall have the general directions of all works ordered or sanctioned by the Council; and the general inspection of all roads, streets, ways, bridges, public reserves, and other public places, under the care and management of the Council. They shall also inquire and report, from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

74. The Finance Committee shall examine and check all accounts and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect or to be likely to affect the finances of the district. And as to such matters or subjects of the like nature as they may be directed, by resolution from the Council, to inquire into and report upon.

75. The Committee for general purposes shall take cognizance of every matter subject or question within the jurisdiction of the Council not coming within the province of one or other of the beforementioned standing Committees, and shall from time to time inquire into and report any such subject, matter, or question as they may think necessary, or as they may be

directed by resolution of the Council to inquire and report upon.

76. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which in the opinion of the Council a special Committee ought to be appointed. And no Standing Committee shall interfere with the performance of any duty which may for the time-being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to any such special Committee. The mover of any such resolution may name therein such members as in his opinion ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot, and in the latter case or if an amendment to the effect that such special Committee be appointed by ballot be carried, each member then present shall receive a list of all the members of the Council from which list he shall strike out all the names but those of the persons whom in his opinion such special Committee ought to be composed. And the Mayor or Chairman shall examine such lists, and shall declare the result, and in the event of its becoming necessary, through an equality of votes, to decide as to which of two or more Aldermen shall serve on such Committee, such Mayor or Chairman shall so decide.

77. Every Committee of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee, within seven days after their appointment.

78. Appointments to the By-law Committee, the Committee for Works, and the Finance Committee shall be for the whole municipal year; the Chairman of these three Committees as appointed or removed from the Chairmanship of the same, shall be thereby and without any further order, regarded as having been appointed to or removed from the Committee for general purposes; the appointment of every special Committee shall be considered to endure until the duties for which such Committee have been appointed, shall have been fully performed: Provided however that nothing herein contained shall be held to affect in any way the right of any such Committee to remove any Chairman of such Committee, or to appoint another such Chairman in his stead, or to militate against the general provisions as to Committees in sections 109 and 110 of the Municipalities Act of 1867, and that so much of this by-law as relates to the appointment, powers, and duties of Committees, shall be read and interpreted in connection with such last-mentioned general provisions.

79. The Council Clerk shall call a meeting of any Committee whenever requested so to do by the Chairman or any two members of such Committee.

80. The Chairman of each standing Committee shall make or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall on ceasing to be such Chairman hand over to his successor.

81. With the exception of emergent matters, hereinafter specially provided for, no work affecting the funds of the district shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

82. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

(1.) By order of the Committee for Works, or of the Mayor and one member of such Committee,—for repairs or emergent works, to the extent of five pounds.

(2.) By order of the Mayor,—for necessary current expenses, to the extent of two pounds.

(3.) By order of the Mayor and any two Aldermen, or without the Mayor, of any four Aldermen,—for any emergent purpose, to the extent of five pounds: Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting; such report to be signed by the Chairman of the Committee of Works, or the Mayor and Aldermen, or the Aldermen without the Mayor, as the case may be, by whom such outlay shall have been authorized; also that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council; and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

83. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee, before any order shall be made for payment of such accounts or demands.

84. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing

that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment before recommending payment: Provided, however, that such special report as last herein mentioned may be embodied with the report by which payment of the amount in question is recommended: Provided also, that in cases of special expenditure under section 82 of this Part of these By-laws, the report directed by that section to be laid before the Council shall, if the outlay shall have been lawfully incurred, be deemed a sufficient certificate; and provided further that, in regard to salaries and wages of labour, for officers, servants, and labourers, employed at fixed rates of payment, by order of the Council, the certificate of the Mayor of the amount due to any such officer, servant, or labourer, and the order of such Mayor for payment of such amount, shall be a sufficient authorization for such payment; and such certificates, memoranda, and authorizations shall be attached respectively to the reports of the Finance Committee, on the payments or outlays to which such certificates, memoranda, and authorizations shall have reference.

Common seal and records of the Council.

85. The common seal and the press to which the same shall be secured by a cover or box which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk; such common seal and press shall be in the custody and care of the Council Clerk.

86. The common seal shall not be attached to any document without an express order of the Council. In every case where such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

87. The Treasurer shall keep such books of account, and such records, statements, and memoranda of receipts and expenditure, in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of accounts, records, statements, and memoranda from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect, or appearance of inefficiency which they may have discovered in the keeping of the same; also to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

88. The minute-book, letter-book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls and other records relating to elections, business-papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business, addressed to the Council or to the Mayor, or to any officer or servant of the Council, orders, reports, returns and memoranda relating to municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. All such records, other than the minute-book, and other than electoral rolls and other records relating to elections, shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. Upon the face of every such document thus registered to which there is any reference in the minute-book, there shall be a note of the page wherein it is so referred to. And when any order has been made by the Council, or a report has been brought up by any Committee thereof, in reference to any document so registered as aforesaid, a note of such order or report shall be made upon such document. It shall be the duty of the By-law Committee to inspect the records from time to time, to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

89. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same, without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable, on conviction, for the first offence, to a penalty of not less than five shillings nor more than one pound; for a second offence, to a penalty of not less than one pound nor more than five pounds; and for a third and every subsequent offence, to a penalty not less than five pounds nor more than twenty pounds.

90. Any person removing any such book or other record of the Council as aforesaid from the Council Chamber, or the place where by direction of the Council such book or other record is usually kept, without leave for such removal having been first obtained from the Council, or without other lawful cause for such removal, as hereinafter provided, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds; and nothing herein contained shall be held to affect the further liability of any person who shall have

removed such book or other record as aforesaid and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law for detention of the same, as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor, in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform. Also, that the Mayor, or the Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit at law, by, against, or at the instance of the Council; but in all such cases, such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed: And provided also that the Mayor, Council Clerk, or other officer of the Council, who may be subpoenaed to produce any book or other record of the Council in a Court of law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall, before removing the same, leave at the Council Chamber a receipt for such or other record as aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid shall be legally responsible for the safe keeping and return of the same.

91. Any person destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than five pounds nor more than fifty pounds.

Officers and servants.

92. No appointment to any permanent office at the disposal of the Council shall take place until a notice shall have been given to the whole of the Aldermen, and a resolution passed by the Council inviting applications from qualified candidates for the same. The salary or allowance attached to such office shall in every case be fixed before inviting applications for the same.

93. Every such appointment shall be made in such mode as may at the time be determined upon, whenever there is more than one applicant for such permanent office.

94. Nothing herein contained shall be held to prevent the appointment by the Council of any salaried officer or servant of the Corporation to any other permanent office or employment at the disposal of the Council to which no further salary is attached; or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid for by allowances proportionate to the extent of such duties; or to prevent any similar appointment or employment by the Mayor or by any Committee or officer of the Council, of any such officer or servant, under the authority of any By-law; or to prevent the employment as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of the district.

95. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited with the bankers of the Corporation as the Council may order; and no officer or servant of the Council shall be received as surety for any such other officer or servant.

96. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the district under the provisions of the said Municipalities Act; he shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council; he shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

97. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 87 of this Part of these By-laws, and shall be responsible for the safe keeping of the same. Any officer of the Council may have any other records thereof committed to his charge by an order of the Council, and in such case shall be responsible for the safe keeping of such records.

98. The duties of all officers and servants of the Corporation shall be defined by such regulations as may from time to time and in accordance with law be made, as follows, namely: as to duties of the Council Clerk and his assistants, if any, by the Mayor; as to the Treasurer and all collectors of rates, Bailiffs, Bailiffs' assistants, and other officers and servants employed in and about the collection of revenue, whose superintendence is not hereinafter specially entrusted to any other Committee, by the Finance Committee; as to all surveyors, architects, clerks of works, overseers, inspectors of drainage, or other officers and servants employed in or about the public works of the district, whose superintendence is not herein specially entrusted to any other Committee, by the Committee of Works; as to the

Attorney for the Corporation, health officer, inspector of nuisances, inspector of public vehicles, toll-keepers, inspector of slaughter-houses, poundkeepers, and other officers and servants employed in and about the carrying out and enforcement of the general provisions of the Municipalities Act of 1867, and of any other statute of which the operation has been extended to the district, and of the By-laws for the general good government of such district, whose superintendence is not herein specially entrusted to any other Committee, by the By-law Committee; and as to the librarian, clerk of markets, wharfingers, managers of public reserves under the charge of the Council, all officers and servants employed in or about any matter over which the Council has control, and whose superintendence is not herein specially entrusted to any other Committee, or to the Mayor, by the Committee for general purposes: Provided that all such regulations shall be in writing, and shall be in all cases laid before the Council at the first meeting thereof which shall be holden after the making of any such regulations, and shall be in strict accordance with any such orders or directions as may have been at any time given by such Council touching the matters to which any such regulations may have reference.

99. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation, or information is on record as hereinbefore provided, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *vivâ voce* or put into writing, as the Mayor may direct.

100. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing, or is anonymous. All such complaints must be addressed to the Mayor, who, immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same; and if any such complaint be made to the Council, or to any member or officer thereof, it shall be referred to and investigated by the Mayor before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by such Council: Provided that every report, explanation, and information which may be made or rendered in reference to every such complaint shall be in writing. And such Mayor shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith; and such complaint, with all reports, explanations, and information as aforesaid in connection therewith, and the Mayor's statement as aforesaid thereon, shall be laid before the Council at the next meeting thereof which shall be holden after the Mayor shall have made such statement, and shall be duly recorded: Provided further, that nothing herein contained shall be held to affect in any way the special powers conferred on the Mayor by section 152 of the Municipalities Act of 1867, or other special power which now is or hereafter may be conferred by statute upon such Mayor.

Miscellaneous.

101. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by resolution of the Council adopted after due notice.

102. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work or the supply of such materials shall be called for by public notice, as hereinafter provided.

103. A draft of every intended By-law shall be in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any rate-payer who may desire to inspect the same, and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

104. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage after due notice, as hereinbefore provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

105. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may

be ordered by resolution of the Council after due notice, and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

106. Such suits or informations for the enforcement of penalties for or in breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute the operation of which may have been extended to the district as may have been directed by the Council, or by the By-law Committee, or by the Mayor to be commenced or laid, shall be so commenced or laid as follows, namely:—When against a member of the Council, or an Auditor, or any officer of the Corporation—by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed by the Council for that purpose, or the By-law Committee, or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor, except by order of such Council, nor shall any similar proceeding be taken against any officer of the Council, except on the order of such Council or of the Mayor, nor against any other person, except upon the order of the Council, or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid as aforesaid, except on an express resolution of the Council, in any case where the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council, or where on the trial or hearing of any such suit or information the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may, on the order of the Council, be entrusted to an attorney.

107. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation done, made, or passed, or proposed to be made, done, or passed by the Council, or by any Committee thereof, or by the Mayor, or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same twice in some newspaper circulating in the district.

108. In all cases not herein provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as they are applicable to the proceedings of the Council.

109. Any section or sections of this Part of these By-laws, or any portion or portions of such sections or section as are not hereinafter excepted, may be suspended by resolution, on notice at any meeting of the Council: Provided that there shall be a distinct statement in every such resolution, and in the notice of the motion whereon the same shall have been adopted, of the purpose for which such suspension is required, and that for every separate matter or business as to which such suspension is so required, there shall be a separate resolution as aforesaid: And provided also that the following sections hereof shall never be suspended, nor shall any one of them, on any pretence whatever, namely:—Sections 5, 6, 7, 8, 9, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 34, 38, 39, 42, 44, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 95, 98, 99, 100, 101, 104, 106, 107, and 108.

PART II.

Collection and enforcement of rates—times and modes of collection.

1. All rates levied or imposed by the Council, under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be collected by half-yearly instalments; each such instalment shall, as to every such rate and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

2. All rates levied or imposed by the Council, under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may, by resolution, at the time of making or imposing such rates, or any of them, have been appointed.

3. All persons liable to pay any rates as aforesaid shall pay the amount thereof within the time prescribed by the Act, into the office of the Council Clerk, during office hours, that is to say, every Monday and Thursday, between the hours of 10 o'clock A.M. to 3 P.M.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Enforcement by distress.

6. The Bailiff shall be appointed by resolution of the said Council, and shall be any time removable by a like resolution.

7. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of twenty pounds each, for the faithful performance of his duty.

8. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

9. All levies and distresses shall be made under warrant, in the form of schedules A hereto, under the hand of the Mayor, or any Alderman who may for the time being be duly authorized to perform the duties of that office.

10. If the for which any such distress shall have been made shall not be paid with costs as hereinafter provided, on or before the expiration of five days the Bailiff shall sell the goods so distrained by public auction, either on the premises or at such other place within the said District as the said Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

11. At the time of making a distress the Bailiff shall make out a written inventory, in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made, and the Bailiff shall give a copy of the inventory to the ratepayer on demand at any time within one month after the making of such distress.

12. The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates, as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

13. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods or chattels shall in such case be put up for sale according to such direction.

14. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

15. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto marked C.

SCHEDULE A.

Warrant of distress.

I, the _____ of the Municipal District of Ulmarra, do hereby authorize you, _____, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house, or in and upon the land or premises of _____, situate at _____, for the sum of _____, being the amount of rates due to the said district of Ulmarra, this _____ day of _____, for the said dwelling-house or land, and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____, 18 _____.

Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Municipal District of Ulmarra, dated _____, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of _____, within the said Municipality, for the sum of _____, being the amount of rates due to the said Municipality to the _____ day of _____, 18 _____.

Dated this _____ day of _____, 18 _____.

Bailiff.

SCHEDULE C.

Costs.

Bailiff to be allowed five shillings per day while in possession, five per cent. on amount of sales, and one shilling per mile for every mile distant from the Council Chambers.

PART IV.

1. No new public road, street, or way, or other place proposed to be dedicated to the public, shall be taken under the management of the Council until after such road, street, way, or other place shall have been examined by the Committee for Works, and reported upon to the Council by such Committee.

2. Whenever any proprietor or proprietors of land within the said shall open any road, street, or way, or lay out any other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, or other place, he or they shall furnish the Council with a plan or plans, signed by himself, or herself, or themselves, showing clearly the position and extent of such road, street, or way, or other place as aforesaid.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument, dedicating such road, way, or other place to public use or recreation as aforesaid, as may be considered necessary by the Committee for general purposes; and such further instrument of dedication shall also be preserved as a record of the Council.

4. The Committee for Works, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council on that behalf, fix and lay out the levels of all public roads, streets, and ways within the district, and the carriageways and footways thereof; and it shall be the duty of such Committee, officer, or person, to place posts at the corners or intersections of such public roads and streets and of the carriage-ways and footways of such roads and streets wherever the same may be considered necessary or desirable by the Council.

5. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any road or street or other public place within the said district, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

6. The Committee for Works, or any officer acting under the authority of such Committee, may at any time cause the traffic of any street, road, way, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such road, street, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

7. Any person who shall haul, draw, or cause to be hauled or drawn upon any part of any road, street, or public place within the said district, any timber, stone, or other thing, otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such road, street, or public place, to the injury thereof, shall upon conviction for every offence forfeit and pay a sum of not more than forty shillings nor less than five shillings, over and above the damage occasioned thereby.

8. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth and annoyance, or any matter or thing in or upon the carriage-way or the foot-way of any road, street, or other public place in the said district, shall upon conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings.

9. Any person who shall damage any public buildings, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, watercourse, or other public property within the said district, shall pay the cost of repairing the same; and if such damage be wilfully done, shall forfeit and pay any sum not exceeding twenty pounds nor less than five pounds.

10. Whosoever shall, without the consent in writing of the Council, place any dam or embankment in or across any river, creek, or natural watercourse, shall forfeit any sum not less than one pound nor more than ten pounds for every offence, and shall remove such dam or embankment within a reasonable time after such conviction, or shall forfeit any sum not less than five pounds nor more than twenty pounds; and if after such second conviction, such person shall fail to remove such dam or embankment within a further reasonable time, shall forfeit and pay a sum of not less than twenty pounds nor more than thirty pounds.

11. It shall not be lawful without notice to the Council, or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewers, or into any drain or sewer communicating or to communicate therewith, without such notice or otherwise than aforesaid, every person so offending shall for every offence forfeit and pay any sum not exceeding thirty pounds.

12. Every owner or occupier of land in, adjoining to, or near any road, street, or lane, cutting, or laying open any drains into any of the public roads, streets, or lanes, or shall cause or permit the opening of any drains into any of the public roads, streets, or lanes, shall be liable to a penalty not exceeding five pounds over and above the damage occasioned thereby; and if the aforesaid drains are not stopped and made secure within a reasonable time after receiving notice from the Council, the aforesaid owner or occupier of such lands shall be liable, upon a second conviction, to a penalty not exceeding twenty pounds nor less than five pounds.

By-laws for the Municipal District of Ulmarra, framed and passed by the Municipal Council of Ulmarra, on the 25th day of March, in the year of our Lord one thousand eight hundred and seventy-two.

1872-3.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF ARMIDALE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 10th January, 1873.

BOROUGH OF ARMIDALE.—BY-LAWS.

THE following By-laws, made by the Council of the Borough of Armidale, for the regulation of the "Armidale Free Library and Reading-room," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS for the regulation of the Armidale Free Library and Reading-room.

1. The Library and Reading-room shall be open daily, excepting Sundays, Good Fridays, and Christmas Days, from 10 a.m. to 1 p.m., from 3 p.m. to 5.30 p.m., and from 6.30 p.m. to 9 p.m.

2. Every person who shall enter the Library or Reading-room shall, immediately on entering the same, write his or her name and address in a book to be kept for such purpose, and to be called the "Visitors' Book"; and if such person shall be unable to write, then such name and address may be so written by any other person, or shall be written by the officer of the Council having the custody of the Institution, at the request of such person; and no person who shall refuse to comply with this regulation shall be permitted to remain in such Library or Reading-room; and it shall be the duty of the officer of the Council in charge to enforce this by-law.

3. Any person who being intoxicated shall enter such Library or Reading-room shall be at once removed from the premises; any person who shall use therein any abusive, improper, or unbecoming language,—or who shall, by unnecessarily loud talking, or by any other noise, or otherwise, disturb or annoy the persons using or resorting to such Library or Reading-room,—or who shall, without lawful excuse, but without felonious or larcenous intent, remove any property from such Library or Reading-room,—shall forfeit and pay any sum not less than ten shillings nor more than ten pounds; and in the event of any such person not leaving the premises when requested by the Librarian to do so, Police constables, on receiving information thereof, shall give such assistance as may be necessary to effect the offender's removal.

Free use of books.

4. All books, statutes, newspapers, periodicals, maps, or other publications, shall be accessible, without fee, for use only in the Library or Reading-room; all books must be received from, and when done with returned to, the Librarian.

Loan of books.

5. Any ratepayer, or any member of his or her family over fourteen years of age, or any person known to be of good character and permanently residing in the Borough, may, with the sanction of any one member of the Borough Council, upon paying to the officer in charge the sum—to cover loss from extra wear and damage likely to accrue—during a period of three months, obtain the loan of books from Class A, one work only at a time being allowed to such person, and not to be retained for any period exceeding fourteen days, but may be returned on any day within the hours specified during which it is provided the Library shall be open. No book, under any pretence, shall be removed from the Library until the officer in charge shall have been made acquainted with its title and number.

Expired periods renewable.

6. Any person desiring to retain a book for a longer period than the above, may renew the loan on making his or her desire known to the Librarian on its expiration, provided no other person shall have expressed a wish in the mean time to have the book. Every person who shall retain a book longer than the specified time shall be fined 6d. for the first seven or portion of seven days, and 1s. for each and every additional seven or portion of seven days.

Exceptions.

7. All publications received from the Government Printing Office, and certain books purchased with the Government grant, also books marked N, shall not be considered within the class of books persons may borrow. No periodical shall be considered within the Class A until it shall have been in the Reading-room two months.

8. Any society or class for mutual improvement or instruction, or for study or experiments, may, with the consent of the Council, when suitable accommodation shall have been provided, be formed in connection with, or may hold its meetings or carry on its studies or experiments at, the Institution: Provided that the general free access to and use of the Library and Reading-room, by persons who are not members of such society or class, be not thereby interfered with: Provided, however, that no rule made by the members of any such society or class, for the management of the same, shall conflict in any way with these by-laws or with any regulations made by the said Council hereunder.

9. Any person who shall wilfully damage any visitor's book, catalogue, copy of by-laws, or other book or record, kept at such Library or Reading-room for the general use thereof, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than ten pounds: Provided also, that all fines, penalties, and forfeitures, incurred under any of these by-laws, may be recovered in a summary way before any two Justices in Petty Sessions, according to the provisions of the Act 14th Victoria, No. 43, and the Acts therein adopted.

10. It shall be the duty of the Librarian to report at every meeting of the Library Committee any infraction of these rules or any injury to the books.

11. The foregoing rules shall be printed, framed, and suspended in the rooms, for the information of visitors.

Passed by the Municipal Council of Armidale, this 26th day of November, in the year of our Lord one thousand eight hundred and seventy-two.

WM. EWINS,
Council Clerk.

B. NAUGHTEN,
Mayor.

1872-3.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF CAMPERDOWN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 13th January, 1873.

BOROUGH OF CAMPERDOWN.—BY-LAWS.

THE following By-laws, made by the Council of the Borough of Camperdown, for the regulation of the Camperdown Free Library, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS FOR THE REGULATION OF THE CAMPERDOWN FREE LIBRARY.

1. The Library shall be open every Monday, Wednesday, and Friday from 7.30 to 9 p.m., and on Tuesday, Thursday, and Saturday from 2 to 4 p.m. In connection with the Library there shall be a Reading-room, which shall be open every lawful day from 2 to 5 p.m. and from 7 to 10 p.m., except Tuesdays.

2. Every person who shall enter the Library or Reading-room, shall, immediately on entering the same, write his or her name and address in a book to be kept for such purpose at each such Library and Reading-room, and to be called the "Visitors' Book"; and if such person shall be unable to write, then such name and address may be so written by any other person, or shall be so written by the proper officer of the Council at such Library or Reading-room, at the request of such persons; and no person who shall refuse to comply with this regulation shall be permitted to remain in such Library or Reading-room, and it shall be the duty of the officer of the Council in charge of the Library or Reading-room to enforce this by-law.

3. Any person who, being intoxicated, shall enter such Library or Reading-room, shall be at once removed from the premises. Any person who shall use therein any abusive, improper, or unbecoming language,—or who shall by unnecessarily loud talking, or by any noise or otherwise, disturb or annoy the persons using or resorting to such Library or Reading-room,—or who shall, without lawful excuse but without felonious or larcenous intent, remove any property from such Library or Reading-room,—shall forfeit and pay any sum not less than ten shillings nor more than ten pounds; and any such person may be forthwith removed by any officer of the Council in charge of such Library or Reading-room.

Loan of books.

4. Any ratepayer, or any member of his or her family over 14 years of age, may take, on obtaining a written order from any Alderman, and depositing with the Librarian 2s. 6d. per annum, not more than one volume, at a time of any work marked "L" in the Library, and retain the same for any period not exceeding fourteen days; provided he or she make known to the Librarian the title of the work he or she may desire to take away.

Renewable.

5. Any person desiring to retain a book for a longer period, may renew the loan on making his or her desire known to the

Librarian at the expiration of fourteen days, provided no other person shall have expressed a wish to have the book in the mean time. Every person who shall retain a book longer than the specified time shall be fined 3d. for the first seven days, and 6d. for each and every additional seven days.

Exceptions.

6. All publications received from the Government Printing Office, and certain books purchased with the Government grant, also books marked "R," shall not be considered within the class of books persons may borrow. No periodical shall be considered within the Class L until it shall have been on the Library table for two months.

Miscellaneous.

7. Any society or class for mutual improvement or instruction or study for experiments, may, with the consent of the Council, be formed in connection with, or hold its meetings or carry on its studies or experiments at, the said Library or Reading-room; provided that the general free access to and use of the said Library or Reading-room by persons who are not members of such society or class be not thereby interfered with: Provided, however, that no rule made by the members of any such society or class for the management of the same, shall conflict in any way with these By-laws, or with any other regulation made by the said Council hereunder.

8. Any person who shall wilfully damage any Visitors' Book, Catalogue, copy of By-laws, or any other book or record kept at such Library or Reading-room for the general use thereof, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than ten pounds.

9. It shall be the duty of the Librarian to report at any meeting of the Library Committee any infringement of these Rules or any injury to the books.

10. The foregoing Rules shall be printed, framed, and suspended in the Library Room, for the information of Visitors.

Passed by the Municipal Council of the Borough of Camperdown, this twenty-ninth day of April, in the year of our Lord one thousand eight hundred and seventy-two.

WM. PIDCOCK, Council Clerk.

THOMAS A. HINDS,
Mayor.

1872-3.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF ALBURY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 20th February, 1873.

BOROUGH OF ALBURY.—BY-LAWS.

The following By-laws, made by the Council of Albury, relating to the Suppression of Nuisances, and for the Regulation of Carters and Carriers and Public Vehicles,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council,—are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

On and after the date of the publication hereof, the Albury Borough By-law, No. 6, of part 2, "Suppressing Nuisances" will be rescinded, and the following By-law substituted in lieu thereof:

Suppressing Nuisances.

Upon the complaint of any ratepayer that the house, premises, or yards of neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose; and if such premises shall be found to be a nuisance or otherwise offensive, notice shall be given in writing, to the proprietor or resident of such premises, that if within three days after such notice the nuisance shall not be removed, the proprietor or resident of the aforesaid premises shall be liable to a penalty not exceeding ten pounds nor less than forty shillings.

Passed by the Borough Council of Albury, on the 24th day of July, 1872.

W. M. EDMONDSON,
Mayor.

SAMUEL MUDGE,
Council Clerk.

Carters and Carriers.

1. The Council shall from time to time license to ply for hire within the Borough of Albury, such carts as respectively, after inspection by the By-law Committee, shall be found fit for public use, and also such carts to be used within the said Borough in hawking wood or water for sale respectively, or both wood and water, and also such cart to be used and ply for hire within the said Borough as shall after the like inspection be found fit for such purpose respectively; and for every such license there shall be paid to the Council such sum as, with respect to each kind of cart aforesaid, is set out in Schedule A hereto.

2. Every such license shall be numbered and registered by the Council Clerk, and shall be in force for one year, terminating on the 30th June and 31st December respectively; and the owner named in such license shall cause to be painted or marked, on some conspicuous place on the right or off side of cart thereby licensed, the name of the Borough, with the number of such license, in legible letters and figures one inch in length and of a proportionate breadth, and the words "Licensed Cart" in like letters; and every such owner who shall omit or fail to comply with the provisions of this section shall forfeit a sum not exceeding forty shillings.

3. The word "Cart" shall for the purposes of this "Part" of these By-laws, include every waggon, dray, or other such carriage, whatever be its construction, drawn by horse or horses or other animals, used wholly or chiefly for the carriage of burdens or heavy goods; the word "Wood-cart" shall mean a cart used in the hawking of firewood for sale; the word "Water-cart" shall mean a cart used in the hawking of water for sale.

4. Parties carting their own produce, and carriers passing through the Borough and not plying for hire within the said Borough, shall not require to be licensed.

5. For every offence against the provisions of this "Part" of these By-laws to which no specific penalty has been attached herein, the offender shall pay a penalty not exceeding ten pounds nor less than five shillings.

SCHEDULE A.

Table of Charges for Carters' and Carriers' Licenses.

	£	s.	d.
Wood, water, and other carts, payable half-yearly, in advance, per annum.....	2	0	0

SCHEDULE B.

Form of License.

THIS is to certify that a certain cart, No. _____, of which _____ of _____ is the owner, hereby licensed to ply for hire as a _____, within the Borough of Albury, from _____ to the _____ next; subject nevertheless to all the By-laws, Rules, and Regulations in force relating thereto.

Given under the Common Seal of the Borough Council of Albury, this _____ day of _____, 187 _____.

Mayor.

Passed by the Borough Council of Albury, this sixth day of November, in the year of our Lord one thousand eight hundred and seventy-two.

W. M. EDMONDSON,
SAMUEL MUDGE,
Council Clerk. Mayor.

Public Vehicles.

1. No vehicle shall ply for hire, nor shall any person act as the driver or the conductor of any such vehicle, within the Borough of Albury, unless licensed in the manner hereinafter described.

2. Before any license for plying a vehicle, or to drive or conduct the same, shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of Schedule A hereto or to the like effect, and shall duly fill up and sign the same, and deliver it to the Council Clerk, and in the case of drivers and conductors shall obtain a certificate from two respectable ratepayers to the effect that the applicant is of good character and competent to act as such driver or conductor as the case may be. And meetings for the purpose of granting such licenses shall be held by the By-law Committee.

3. No license shall be granted in respect of any vehicle which, in the opinion of the By-law Committee, shall be unsafe or in bad repair, or otherwise unfit for the accommodation and conveyance of passengers.

4. Licenses for proprietors, drivers, or conductors of vehicles shall be in the form of Schedule B hereto.

5. Every license granted under these By-laws shall be in force from the date of such license, until the thirtieth day of June and the thirty-first day of December, respectively, and no such license shall include more than one vehicle: Provided that where the licensed vehicle shall be under repair, if the proprietor shall so desire, he may be permitted to substitute another for a period to be thereby specified by endorsement on the license, under the hand of the Council Clerk.

6. Licenses may be renewed each year by endorsement thereon under the hand of the Council Clerk for the time being.

7. For every such license and renewal thereof there shall be paid to the Treasurer of the Borough the several rates set forth in Schedule C hereto.

8. No license shall be granted to any person to drive any vehicle unless he be twenty-one years of age, nor to act as conductor unless he be fourteen years of age.

9. All licenses shall be made out by the Council Clerk, and numbered in consecutive order.

10. No proprietor shall be at liberty to part with or lend his license, nor to part with his licensed vehicle to any person, without the knowledge and approval of the By-law Committee, and the registry of the name of the purchaser in the books of the Council Clerk.

11. The person or persons in whose name or names a license shall appear to have been obtained, shall be deemed the owner of the vehicle in respect of which the same shall have been taken out.

12. The license of the proprietor, driver, or conductor of any vehicle may be revoked or suspended by the By-law Committee as they shall deem right.

13. No vehicle shall ply for hire within the said Borough unless there shall be painted the number of the license of such vehicle on some conspicuous part of the same.

14. Such person or persons as may from time to time be in that behalf appointed by the Council, shall be Inspector or Inspectors during the pleasure of the said Council of all licensed vehicles plying for hire within the Borough, and such Inspector or Inspectors shall every three months examine all such vehicles and report to the By-law Committee, and shall at all times see that as far as possible these By-laws are duly observed.

15. Licenses for any of the within purposes may be granted by the By-law Committee on payment of one pound, such license to expire on the 30th June and 31st December respectively.

16. For every offence against the provisions of this "Part" of these By-laws to which no specific penalty has been attached herein, the offender shall pay a penalty not exceeding ten pounds nor less than five shillings.

SCHEDULE A.

A Requisition for License to "The Municipal Council of the Borough of Albury."

I, _____ residing in _____ street, do hereby request that a License may be granted to me to No. _____, within the said Borough.

Dated 187 _____

SCHEDULE B.

License.

This is to certify that _____ is hereby licensed to _____ a certain No. _____ within the Borough of Albury, from the date hereof to the day of _____ next, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Given under the Common Seal of the Municipal Council of the Borough of Albury, this _____ day of _____, 187 _____

(L.S.)

Mayor.

SCHEDULE C.

FOR every public vehicle plying for passengers—rate per annum, payable half-yearly in advance.....	£	s.	d.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF NOWRA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 13th March, 1873.

MUNICIPAL DISTRICT OF NOWRA.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Nowra, relating to the preservation of public health, the removal of offensive and unwholesome matter, offences against public decency, the impounding of cattle, the collection and enforcing payment of rates and fines, the licensing of timber-carriages, quarries, &c., the care and management of the public thoroughfares within the Municipality, and for the general good government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

MUNICIPAL DISTRICT OF NOWRA.

BY-LAWS for the preservation of the public health, the removal of offensive and unwholesome matter, offences against public decency, impounding of cattle, collecting and enforcing payment of rates and fines, licensing of timber-carriages, quarries, &c., &c., and the care and management of the public thoroughfares within the Municipal District of Nowra, and for the general good government of the same.

1. That if any person shall throw, deposit, place, or leave, or permit or suffer to run or flow, any night-soil, offal, putrid meat or fish, or entrails of fish, carrion, dead animals, blood; dung, manure, oyster-shells, bone, broken glass, earthenware, or china, cut or broken pieces of tin, zinc, hoop-iron, dust, ashes, refuse of fruit or vegetables, or other offensive or dangerous matter or thing, or earth thrown out from excavations, into or upon any public thoroughfare, court, market, wharf, highway, or reserve within the said Municipality, or into any drain, channel, sink, creek, well, or watercourse,—or shall allow any such, or any deleterious matter or thing, whereby the health and safety of the inhabitants might be endangered, to accumulate or remain upon any private premises, land, or property within the said Municipality,—every person so offending shall for such offence forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay a fine or sum not exceeding five pounds nor less than forty shillings: Provided always, that in cases of necessity the Council may grant licenses to applicants to use in certain places such matters otherwise offensive as may be required for building, manufacturing, or other purposes, for a limited time, or from time to time, as the Council may deem for the public good.

2. That if any person shall permit or suffer to be at large in any public thoroughfare, street, market, wharf, highway, or reserve, within the said Municipality, any bitch in heat, ferocious dog or bitch, not being muzzled,—or if any person shall, after public notice given by the Mayor or his deputy

directing dogs to be confined on suspicion of canine madness, permit or suffer any dog or bitch to go at large,—or if any dog or bitch otherwise quiet shall at any time run after and annoy any person on foot or horseback or riding in any vehicle so as to cause alarm and danger,—then the owner of such dog or bitch shall for such offence forfeit and pay the fine or sum of ten shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings.

3. That if any person shall ride or drive any horse, mare, or other animal, or wheelbarrow, dray, cart, waggon, gig, truck, or any other carriage or vehicle drawn by horse, mule, bullock or other animal, on or along any footway in the public thoroughfares of the said Municipality, every person so offending shall for such offence forfeit and pay the fine or sum of five shillings, and for every subsequent offence shall forfeit and pay the fine or sum of ten shillings.

4. That if any person shall draw any timber, stone, or other weighty matter, on or along any road, street, or highway maintained at the cost, or being under the control or management of the Municipal Council, without the articles being placed upon or suspended from a wheeled carriage,—or shall lock or cause to be locked the wheel or wheels of any timber carriage, dray, or other vehicle,—every person so offending shall for every such offence forfeit and pay the fine or sum of ten shillings, and for the second offence shall forfeit and pay the fine or sum of twenty shillings, and for every subsequent offence shall forfeit and pay the sum of five pounds.

5. That if any person riding or driving any horse, or driving any horse, mule, or other animal harnessed to any cart, dray, waggon, truck, gig, or other carriage or vehicle, shall, within the said Municipality, ride or drive the same furiously, so as to create alarm and danger to the public or to endanger the safety of any person on any public thoroughfare in the said Municipality, every person so offending shall for such offence forfeit and pay the fine or sum of ten shillings, and for a second offence shall forfeit and pay the sum or fine of twenty shillings, and for every subsequent offence shall forfeit and pay the fine or sum of forty shillings.

6. That if any person or persons shall fence across, or fence in any way, or obstruct any public street, road, thoroughfare, or highway within the said Municipality, such person or persons so offending shall upon conviction forfeit and pay the fine or sum of not less than two pounds nor more than five pounds for every such offence.

7. Any person trespassing by erecting a fence on any public street, thoroughfare, or lane, and any person having any fence or other obstruction erected or placed on any street, road, or by-road in any part of the said Municipality, shall be compelled to remove the same within three months after notice to that effect has been duly served on the parties, subject to the fine or penalty of five pounds for every week the same may remain after the expiration of the time stated in such notice.

8. Any person encroaching upon any public street, thoroughfare, or lane, by erecting or causing to be erected any house or building in whole or any part thereof, shall for every such offence forfeit and pay a sum not less than ten pounds nor exceeding twenty pounds: And in the event of such obstruction being permitted to remain one month after such conviction and notice to remove the same, a further fine or penalty of one pound each day shall be inflicted whilst such obstruction remains, agreeably with the provisions of 2nd Victoria No. 2, section 48; also, such obstruction or obstructions may be removed by order of the Mayor or his deputy, at the cost of the party or parties so offending.

9. Any person trespassing upon any cemetery or public burying ground within the said Municipality, by falling or removing timber, or depasturing cattle, horses, sheep, or swine therein, or by destroying or removing any gate or fence belonging to said cemetery or public burial ground, shall, for every such offence, forfeit and pay a sum not less than forty shillings nor exceeding ten pounds.

10. No slaughter-house or place for slaughtering cattle, sheep, and swine, shall be allowed within one hundred yards of any public road or street in the Nowra Municipal District; and any person or persons using any premises as a place for slaughtering cattle, sheep, or swine, being situated within the distance of one hundred yards of any public road or street within the said Municipality, shall upon conviction forfeit and pay for each and every such offence a fine or sum not exceeding five pounds nor less than ten shillings, with costs of suit.

11. No new place, road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by the Committee for Works, and reported upon to the Council by such Committee.

12. Whenever any proprietor or proprietors of land within the said Municipality shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, park, way, or other place as aforesaid.

13. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or other place to public use or recreation, as aforesaid, as may be considered necessary by the Committee for Works; and such further instrument of dedication shall also be preserved as a record of the Council.

14. The Committee for Works, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipality, and the carriage-ways and footways thereof. And it shall be the duty of such Committee, officer or person, to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council, as hereinafter directed.

15. Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, the Committee for Works shall cause a plan and section showing the proposed cuttings and fillings to be exhibited at the Council Chambers for fourteen days, for the information and inspection of rate-payers, and shall notify by advertisement in some newspaper circulating in the Municipality that such plan is so open to inspection. At a subsequent meeting of the Council, the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

16. Any person who shall form dig, or open, any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil,

gravel, stone, or other material, in or from any part of the carriage or foot way of any street or other public place within the said Municipality, without leave first had and obtained from the Council,—or who shall wantonly break up or otherwise damage any such carriage or foot way,—shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

17. Any person who shall make any cellar, or any opening, door, or window, in or beneath the surface of the foot-way of any street or public place within the said Municipality, shall, on conviction, forfeit and pay the sum of five pounds over and above the expense of filling up, remedying, or removing such cellar, opening, door, or window.

18. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole, adjoining or near to any street or public place within the said Municipality, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purposes whatever, or shall erect or pull down any building, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Municipality,—or shall keep up or cause to be kept up and continued such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure,—shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

19. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last-known place of abode or on the said premises, shall on conviction forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

20. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped, for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

21. Any person who shall be desirous of blasting any rock within two chains of any street or public place in the said Municipality, shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall on conviction forfeit and pay for every such offence any sum not less than two pounds nor more than twenty pounds.

Public property.

22. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

23. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice-bridge, culvert, sewer, watercourse, well, pump, or other public property within the said Municipality, shall pay the costs of repairing the same; and if such damage be wilfully done shall forfeit and pay a sum not exceeding twenty pounds nor less than two pounds.

24. Any person who shall wilfully and without the authority of the Council cut, break, bark, or root up, or otherwise destroy or damage, the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any enclosed place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Nuisances.

25. Any person who shall breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditament situate and being in or within forty yards of any street

or public place in the said Municipality, or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray, or go about, or to be tethered or depastured, in any such street or public place, shall, on conviction, forfeit and pay for such offence a sum not exceeding forty shillings nor less than five shillings.

26. Any owner or occupier of any house or place within the said Municipality who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall, on conviction, forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

27. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council, from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellmongering establishments in the said Municipality, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

28. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the Officer of the Council shall have full power, without any other authority than this By-law, to go upon such for the aforesaid purpose.

29. Every person who, in any street or other public place or passage within the said Municipality, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds.

Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every blacksmith, whitesmith, anchor-smith, nail-maker, metal-founder, lime-burner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door or window or aperture fronting or opening into or towards any street, lane, or passage, and not closing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, or placing a screen before the same every evening within one hour after sunset, so as to effectually prevent the light from showing through the door-way, window, or aperture, next or upon such street, lane, or passage.

Every person who shall be the keeper of, or have any dog or other animal, which shall attack or endanger the life or limb of any person who may have the right of way or use of any private yard, alley, street, or any other place within the said Municipality.

Offences against public decency.

30. Any person who shall bathe near to or within view of any inhabited house, or of any public wharf, quay, bridge, street, road, or other place of public resort within the limit of the said Municipality, between the hours of six o'clock in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding one pound and not less than two shillings and sixpence for every such offence.

31. Any individual who shall offend against decency, by the exposure of his or her person in any street or public place within the said Municipality, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds nor less than ten shillings.

Reports from Special Committees or Committee for Works.

32. Reports from Special Committees or Committee for Works shall be received, but not taken into consideration or adopted until the next day of meeting, by the usual notice on the business paper under section 31 of the By-laws.

BY-LAWS for determining the time and modes of collecting and enforcing payment of Rates levied or imposed by the Council of the Municipal District of Nowra.

33. All rates levied or due by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be collected yearly or half-yearly, as may be determined upon from time to time by resolution of Council when fixing the rate for the municipal year.

34. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or for any of the purposes mentioned therein; shall be collected in such manner, and shall be held to be due and payable on and after such days as the Council may by resolution, at the time of making or imposing such rates or any of them, have appointed.

35. All persons liable to pay any rates as aforesaid, shall pay the amount within the time prescribed by the Act, into the office of the Council Clerk, on such days and office hours as the Council may by resolution at the time of making or imposing such rates or any of them have appointed.

36. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the terms fixed for payment of the same as aforesaid.

37. It shall be the duty of the Mayor to cause such defaulters to be sued for the amount of such rates, in a Court of competent jurisdiction.

38. Any person who has been assessed and served with a rate-paper in error shall, within fourteen days from the date of the service thereof, return the same to the Council Clerk, failing which he shall be liable to pay to the Council the amount of rate for which such assessment has been made.

Impoundings.

39. The Mayor shall be empowered to issue instructions in all cases to any officer or servant of the Council to impound all horse and cattle stock, swine, sheep, goats, or other animal found straying on the public roads, streets, or reserves, cemetery, or other public place within the Municipality, in the nearest Pound; and place whatever amount the law may direct as a trespass or driving fee thereon, provided the ownership thereof at the time is unknown.

BY-LAWS for licensing Timber-carriages, Quarry Reserves, &c.

1. No timber-carriage, or drays attached as a substitute, for the conveyance of timber or other material, will be allowed to ply or work within the Municipality, unless the same be licensed. This clause only to apply to timber-carriages working for or employed by saw-mills, or drawing timber for shipment.

2. Every license granted under these By-laws, within the Municipality, shall be in force from the date of such license, until the termination of the municipal year.

3. Meetings for the purpose of granting all licenses within the Municipality shall be held by the Mayor and Aldermen, at the Council Chambers, on such days and times as may be fixed by resolution of said Council.

For every such annual license and renewal thereof, there shall be paid to the Treasurer of the Municipality, for the benefit of said Municipality, the sum of five pounds. Licenses to be renewed quarterly.

Before any licenses shall be granted, the party or parties requiring such license shall forward a requisition in form of Schedule A hereto attached, shall duly fill up and sign the same, and deliver it to the Council Clerk.

4. Whenever it shall appear necessary to suspend the traffic or working of any timber-carriage or drays attached as a substitute thereof on the public roads of the Municipality, and that in the opinion of the Mayor and any two Aldermen such traffic by the said conveyances aforesaid would be likely to seriously injure and damage said roads, then a notice shall be served on the party licensed to work such timber-carriage, or his agent, and in the absence of said parties on the driver of said conveyance; and such notice to be signed by the Mayor and Aldermen aforesaid, requesting the suspension of the working of said timber-carriage or substitute thereof on the roads of the Municipality for such time as may be determined in said notice.

5. That before any action is taken by the Mayor in suspending the working of any such timber-carriage, that a certificate shall be signed by the Aldermen aforesaid and Mayor, certifying to the necessity thereof, which certificate shall be deposited with the Clerk of the Council, to be reported by the Mayor at the first meeting of the Council.

6. Any person found working any timber-carriage or any drays attached for drawing timber or other material, after receiving notice not to work the same on any public road within the Municipality, shall for every such day or part of a day found working the said timber-carriage or substitute thereof on said roads as aforesaid, be liable to a penalty not exceeding ten pounds and not less than five pounds.

7. All licenses shall be made out by the Council Clerk, and numbered in such order as he may think fit.

8. Any timber-carriage, or drays attached as a substitute, found working within the Municipality without being licensed and duly registered in accordance with sections 9, 12, and 13, shall be liable to a penalty not exceeding ten pounds and not less than two pounds, for every day or part of a day found working without a license.

LICENSES.

THIS is to certify, that _____ is hereby licensed to _____, within the Municipal District of Nowra, from the date hereof to the end of the municipal year, or _____ next, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Given under the common seal of the Municipal Council of the Municipal District of Nowra, this _____ day of _____, 187 ____.

No.

9. All timber-carriages licensed by the Council of the Municipal District of Nowra, to be numbered, and the words "Duly licensed" and name of owner painted on a conspicuous part of said conveyance. Owners of timber-carriages not complying with this regulation to be liable to a penalty not exceeding ten shillings and not less than two shillings and six-pence.

10. Timber-carriages employed drawing logs to saw-mills and not otherwise will be allowed to cross the public roads of the Municipality, on being duly authorized by the Council, in the manner hereinafter provided.

11. That application shall be made, by the proprietor or person interested in any timber-carriage, to the Council of the Municipality for permission to cross the public roads at certain points to be particularly defined in said application, and on the proprietor or applicant aforesaid guaranteeing to protect the water-tables, and placing proper culverts where necessary at said crossings at their own expense, and agreeing to keep the said culverts and water-tables on said crossings in efficient repair, to be approved of by the Committee of Works, the Council being satisfied with the said conditions shall have full power to grant or refuse such application.

12. All timber-carriages, receiving permission as aforesaid to cross the public roads, for purpose of drawing logs to saw-mills, shall have the words "Log Tender," number, and name of owner conspicuously painted thereon, under a penalty not exceeding ten shillings and not less than two shillings and six-pence.

13. All timber-carriages so classed as log-tenders, and approved of by the Council, shall be registered and properly numbered by the Council Clerk in the Licensing Register Book on receiving the fee of two shillings and six-pence from the owner of the said timber-carriage—the said fee to be paid for the registration of said timber-carriage for the municipal year or portion thereof, to be renewed at the expiration of municipal year. Timber-carriages found working without being registered as aforesaid, shall subject the owner to a penalty not exceeding ten shillings and not less than two shillings and six-pence.

14. Should any of the said crossings, for which application has been applied for and granted, for timber-carriage traffic across the public roads of the Municipality not be kept in proper repair, to the satisfaction of a majority of the Committee for Works, the Council shall be empowered on receiving such a report from said Committee to suspend all traffic on or across any public road within the jurisdiction of the Council, by the timber-carriages using said crossings which have not been kept in proper repair; and notice of such resolution shall be served on the proprietor, agent, or driver of said timber carriage, duly signed by the Mayor on behalf of the Council of the Municipality.

15. Any timber-carriage, or substitute by drays attached, crossing the roads of the Municipality at any point other than where permission has been granted by the Council, or found crossing the public roads of the Municipality after permission has been withdrawn and proper notice to that effect served on the proprietors, agent, or driver, of said timber carriage, by the Mayor or agent on his behalf, shall subject the owners of said timber-carriage or person working and interested in the profits thereof to a penalty not exceeding five pounds nor less than ten shillings.

16. No penalty herein to apply to the owner or interested party in any timber-carriage traversing the public roads of the Municipality for the ostensible purpose of being repaired; provided the said timber-carriage is not loaded with any material not exceeding five hundredweight.

Quarrying on reserves.

1. Any person found quarrying or removing stone from the public reserves of the Municipal District of Nowra, without being licensed to do so by the Council of said Municipality, shall be liable to a penalty not exceeding five pounds and not less than five shillings.

2. All applications to quarry stone on the public reserves of the Municipality shall be made to the Council, the license fee having been fixed by the Council at two pounds per year for each separate application to be allowed to quarry, payable quarterly.

SCHEDULE A.

To the Council of the Municipal District of Nowra.

I, _____, residing at _____, do hereby request that License may be granted to me, _____, within the said Municipality.

Dated _____ 18 ____
No. _____

Fines.

1. All fines or penalties imposed by authority of any of the By-laws passed by the Council of this Municipality, shall be paid over to the Treasurer, for and on behalf of the said Council.

2. Where a fine or penalty has been imposed under any of these By-laws, without any express provision for the payment of costs, the convicting Justices shall in all cases, together with the fine or penalty, adjudge and order the payment of the costs of suit.

3. All penalties awarded under said By-laws to be recovered in the usual way at the nearest Court of Petty Sessions.

Made and passed by the Council of the Municipal District of Nowra, this fifth day of December, in the year of our Lord one thousand eight hundred and seventy-two.

MUNICIPALITIES.

(BOROUGH OF RANDWICK—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 15th March, 1873.

BOROUGH OF RANDWICK.

BY-LAWS.

THE following By-laws made by the Council of the Borough of Randwick, for establishing and regulating a General Cemetery within that Borough, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF RANDWICK.

BY-LAWS No. 3, for establishing and regulating a General Cemetery in the Borough of Randwick

1. The eight acres three roods and thirty-six perches of land situate on the Long Bay Road, in the said Borough, now purchased from the Government by the Municipal Council of Randwick, for a General Cemetery for the interment of the dead as hereinafter provided, shall on the publication of these By-laws in the New South Wales Government Gazette, be thereby dedicated and set apart as a Cemetery for the interment of the dead, for ever, under and subject to the following By-laws, Rules, and Regulations, and to such Amended By-laws, Rules, and Regulations as the Council of the said Borough may make, and which shall have been approved by the Governor and Executive Council.

2. The land above referred to shall be designated "The Randwick General Cemetery."

3. The Council of the said Borough shall, on or before the publication of these By-laws, cause the said land to be divided and set apart for the interment of the dead, as follows:—

1. For the interment of the dead belonging to the Church of England, four acres.
2. For the interment of the dead belonging to the Roman Catholic Church, one and a half acres.
3. For the interment of the dead belonging to the other Denominations, three acres one rood and thirty-six perches:

And thereupon the portion so set apart for each of the said Denominations shall be set apart for ever for the interment of the dead, accordingly.

4. The Council shall lay out the said Cemetery in such manner as may be most convenient for the said division, and for the burial of the dead; and may embellish the same with such walks, avenues, roads, trees, and shrubs as may appear to them proper; and enclose the same with a proper fence; and erect such walls, gates, and entrance, and all houses, offices, and other necessary buildings; make and repair all drains; and do and perform all and every matter, act, or thing which may be required for the proper and efficient management of the said Cemetery.

5. The Clergyman of each Denomination residing, or regularly officiating as such, within the said Borough, shall be the proper officer to perform religious rites within the said Cemetery, in the respective divisions to which the corpse belongs; but any duly appointed or recognized Clergyman may officiate for any or either of the said officers, on producing to the Manager an authority so to act from the proper officiating Clergyman, or from the head of the Church to which the corpse belongs.

6. The said Council may sell and grant land within the said Cemetery, for the exclusive right of burial, in perpetuity or for any definite period, in each and every portion or division of the

said Cemetery; and also the right of erecting any vault, monument, tomb, tablet, grave-stone, or monumental inscription: And such rights as aforesaid shall be considered as the personal estate of the grantee, and may be assigned in his lifetime, or bequeathed by his will, subject nevertheless to all the rules and regulations of the said Cemetery.

7. The Council may order the removal or alteration of any vault, monument, tablet, grave-stone, monumental inscription, kerbing, railing, or any other erection, which shall have been erected or placed in either of the said divisions of the said Cemetery, which may be contrary to the rules and regulations provided in the Schedule annexed marked A, or which may have been erected or placed there without the authority of the Manager or officer in charge.

8. The Council may charge and receive, for and in connection with the interment of bodies in the said Cemetery, and for the erection of any vault, or for the enclosure of any land for the exclusive right of interment therein, and for the right of erecting and placing therein or thereon any monument, tablet, grave-stone, kerbing, monumental inscription, or other erection, the fees and charges provided in the Schedule annexed marked B.

9. The Council shall appoint their own Manager, and such other officer or servants as may be necessary for the maintenance and proper management of the Cemetery: And the Manager or person acting as such for the time-being shall have the full care, charge, and authority of the said Cemetery, and of each division therein; he shall receive all fees, demands, and charges, and shall regulate, manage, and decide all matters of detail in connection with the said Cemetery under these By-laws, Rules, and Regulations.

10. The Manager shall keep proper books for the entry of all fees, charges, and amounts of money received by him on account of the said Cemetery, according to the aforesaid divisions; and shall give a printed receipt for each amount so received; and shall mark on the butt of each receipt the name of the person for whom the amount is paid, also the amount and the Denomination; and he shall duly pay in to the Treasurer of the said Borough, every calendar month, all the fees and other sums of money received by him on account of the said Cemetery; he shall also prepare and produce to the Auditors of the said Borough, at each of their half-yearly meetings, a return of all amounts of money received and paid on account of the said Cemetery, and for each division of the same, together with all books and vouchers, if required.

11. The Manager or officer in charge shall duly and properly enter in a book, for each of the said divisions, when possible, the name, age, qualification, residence, No. of grave or vault, section, date of death, and burial of each corpse interred in every portion of the said Cemetery; and each such entry shall be signed by the Clergyman or person officiating at the interment.

12. The Treasurer of the said Borough shall pay, every calendar month, if demanded, to each Clergyman who shall have officiated at any interment in the said Cemetery as aforesaid, the following fees for his services, namely:—

	£	s.	d.
For each interment in vault or stone grave	1	0	0
For each interment in grave	0	7	6

13. The Council shall apply all the fees, charges, and income arising from the said Cemetery as follows:—

1. To pay all fees, salaries, and wages to their officers and servants.
2. To pay the interest, and ultimately the principal amount, of the purchase of land, fencing, and improvements.
3. To pay the expenses incurred in laying out, draining, and embellishing the Cemetery, and for the repair and proper maintenance thereof.

14. Any person who shall wilfully damage any property whatever within or in any way connected with the said Cemetery,—or shall cause any riot or disturbance therein or thereon,—or shall wilfully break any of these By-laws, Rules, or Regulations,—shall on conviction thereof before any Justice of the Peace, forfeit and pay the amount of such damage, and be subject to any fine, in addition to such damage, not exceeding five pounds nor less than one pound.

15. To prevent the interment of corpses from without the boundaries of the said Borough, except in lands which may have been purchased, the Council of the said Borough may, by resolution at any time, charge, demand, and receive for each such interment double the amount of fees mentioned in the schedule B.

Made and passed by the Municipal Council of the Borough of Randwick, this 8th day of January, 1873.

Given under my hand and the seal of the said Council, on the day and date above mentioned.

(L.S.) WALTER BRADLEY,
Mayor.

GEO. B. GOUGH, Council Clerk.

SCHEDULE A.

RULES AND REGULATIONS.

1. The portion of land set apart for each of said Denominations shall be divided by the Manager into "Sections," and called as follows:—"Vault Sections," "Selected Sections," "Common Sections," and "Pauper Sections."

2. All vaults to be erected according to plan at the Manager's Office, built of stone, set in cement, and properly connected with main drain, under the supervision and according to the instructions of the Manager or officer in charge.

3. The Cemetery Contractor will undertake to build vaults for urgent cases, and such vaults can be procured on payment of the proper cost of erection, &c., and the fees and charges set forth in the annexed Schedule B.

4. All land taken in the "Vault Sections," must be enclosed with stone kerbing 9 x 15 inches, clean-cut and rounded on top. The number cut on the top of kerb, and painted in with black. If railing is required, it shall be of iron, as per plan at the Office, and painted stone or lavender colour. The areas for vaults will be 6 x 12 feet, 12 x 12 feet, and 12 x 24 feet.

5. No interment shall be made in the "Selected Sections," unless the land has been previously purchased for that purpose. And all such purchased land must be enclosed with stone kerbing 6 x 14 inches, clean-cut, rounded on top, and numbered as aforesaid, within two months from the date of purchase. If railing is required, it shall be of iron, as per plan at Office, and painted as aforesaid. Areas for graves 3 x 8 feet, 6 x 8 feet, 9 x 8 feet, 12 x 8 feet, or 24 x 8 feet.

6. All land purchased in the "Common Sections" shall be inclosed, numbered, and painted, in the same manner, and subject to the same restrictions and conditions except price, as provided in the previous rule.

7. Every grave shall be six feet deep, and not more than two adults shall be interred in each; two infants will be considered equal to one adult.

8. All tombs, tablets, monuments, and erections, over vaults or graves, or within the said Cemetery, shall be of stone or iron; and the plan of each, and a copy of each inscription, shall be submitted to the Manager, and approved by him in writing previous to its being brought on the premises; and any monument, tablet, tomb, or other article, matter, or thing brought on the ground of the said Cemetery, or erected on any portion of the same, shall be removed by the orders of the Manager, and the person who shall have been guilty of such offence shall pay all costs of such removal, and be liable to prosecution as aforesaid.

9. No trees or shrubs shall be planted in any portion of the Cemetery except those species which shall be approved by the Manager.

10. Masons and all other workmen shall properly clear away all refuse made, by them, when required so to do by the Manager or officer in charge, and shall make good all damages caused by

them or their workmen without delay; and in case of any neglect or refusal on the part of the person making the refuse or committing the damage, the Manager may cause the work to be performed at the cost of the offender.

11. All tombs, monuments, and other erections must be kept in order by the proprietors, or in case of danger the work will be performed at the risk and cost of the owner.

12. All tombs, monuments, or other matters requiring removal for re-opening of vault or grave, must be removed at the risk and cost of the proprietor, and re-erected under the same provision.

13. Notice of all interments, and the legal certificate of death, must be produced to the Manager or officer in charge, and all fees, costs, and charges paid to him, at least twelve hours before interment; and no stone or other material can be brought on the ground until the said fees, costs, and charges have been paid as aforesaid.

14. The hours of interment will be 4 p.m. on each day when required, but special interments may be made at 10 a.m. on giving twenty-four hours notice to the Manager.

Made and passed by the Municipal Council of the Borough of Randwick, this 8th day of January, 1873.

(L.S.) WALTER BRADLEY,

Mayor.

GEO. B. GOUGH, Council Clerk.

(BOROUGH OF PETERSHAM—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 5th April, 1873.

BOROUGH OF PETERSHAM—BY-LAW.

THE following By-law, made by the Council of the Borough of Petersham, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF PETERSHAM.

BY-LAW No. 5 of Part 4, as amended—Change of Street Levels.

Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, to an extent exceeding 3 feet, the Committee of Works shall cause a plan and section, showing the proposed cuttings, to be exhibited at the Council Chambers for fourteen days, for the information and inspection of rate-payers; and shall notify, by advertisement in some newspaper circulating in the Borough, that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk; and such plan and section, so signed and countersigned, shall be a record of the Council: Provided that where it shall be considered necessary to alter the level as aforesaid, to an extent not exceeding 3 feet, the said alteration of level shall be first submitted to the Council by the Committee of Works, and, if adopted by the Council, notice of such alteration of level shall be advertised once in each week, for two successive weeks, in some newspaper circulating in or near to the Borough.

Passed by the Municipal Council of the Borough of Petersham, this tenth day of March, in the year of our Lord one thousand eight hundred and seventy-three.

W. H. PIGOTT,
Mayor.C. F. WILSON,
Council Clerk.

MUNICIPALITIES.

(BOROUGH OF WAVERLEY—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 18th April, 1873.

BOROUGH OF WAVERLEY.—BY-LAW.

THE following By-law, made by the Council of the Borough of Waverley, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF WAVERLEY.

WHEREAS it is expedient to amend the By-laws of 28th September, 1868, regulating the Proceedings of the Council of the Borough of Waverley, by the omission of the following sections, viz., 25, 33, 34, 35, and 36, of the said By-laws, and the substitution thereof of one section, for the better conduct of the business of this Council: It is hereby ordered by the said Municipal Council, by virtue of the powers and authority of the Municipalities Act of 1867, and subject to the provisions therein contained, that the following By-law shall be enforced within the Borough, as section 25:—"Besides such Special Committees as may from time to time be found necessary, there shall be two Standing Committees, viz., Finance and Improvement Committees; such Committees shall consist of the Whole Council, five to form a quorum, and the Mayor to have a casting vote only."

Passed by Borough Council of Waverley, this 4th day of March, A.D. 1873.

JONATHAN WILEY,
Council Clerk.

STEPHEN DICKSON,
Mayor.

1872.

NEW SOUTH WALES.

DESTITUTE CHILDRENS' ASYLUM.

(ALTERATIONS AND ADDITIONS TO BY-LAWS.)

Presented to Parliament pursuant to Act, 20 Vic. No. 19, Sec. 4.

Alterations and Additions to the By-laws of the Society for the Relief of Destitute Children, laid before Parliament in May, 1871.

18. The management of the Institution shall devolve upon a Board of Directors, consisting of the officers mentioned in the preceding rule and all Life Directors, together with not less than sixteen members nor more than twenty-three, to be elected, except as hereinafter mentioned, at the Annual or Special General Meeting,—eight of whom shall retire at the end of each year, being those members who have attended the meetings of the Board the least number of times, but who, nevertheless, shall be eligible for re-election. No person, whose subscription for the past year has not been paid, shall be qualified to be nominated as a Director.

ADDITIONAL RULES, VIZ. :—

19. In the event of more candidates being nominated for the office of Director than there are vacancies, the election of Directors under rule eighteen shall be determined by ballot, at a Special General Meeting, on a day to be fixed at the Annual General Meeting.

20. The Board of Directors of the preceding year shall appoint five or more Directors from amongst their number to superintend the ballot, who shall have power to make all necessary regulations for conducting the same; three of such Directors shall be constantly present during its progress, and at least four of such Directors shall be present at its close, to determine the result.

21. Those only of the annual subscribers shall be qualified to vote who shall have paid their subscription before the end of the previous year. All votes shall be tendered by the intending voters personally, and should objection be made to any vote, the question shall be referred to the Directors present, having charge of the ballot, and their decision, or that of a majority of them, shall be final.

22. Life Directors, Life Members, and subscribers, shall be entitled to vote for the election by ballot of the office-bearers and Directors of the Society in the manner following, namely :—A contributor of £1 per annum shall have one vote, a contributor of £2 per annum shall have two votes, a contributor of £5 and upwards per annum shall have three votes, Life Directors and Life Members shall have three votes: Provided, nevertheless, that no new subscribers shall be entitled to vote in any election by ballot as aforesaid who has not been a contributor for at least three months preceding the election then about to take place, but Life Directors and Life Members shall at once be entitled to every privilege.

Amended Rule 26 (now 30).

30. The Board shall, at its first meeting after each Annual General Meeting of the Society, nominate, from among the members thereof, a House-committee, who shall be elected by a ballot then to be taken, and the Board shall have power to make the requisite arrangements for conducting the proceedings of such election; the committee so elected shall consist of not less than nine nor more than twelve members, exclusive of the Treasurer and Secretary, who, *ex officio*, shall be members of the House-committee, three to be a quorum, whose duty shall be—

- 1st. To meet once a week, or oftener if they deem necessary, on such day or days and at such hour as they may from time to time appoint, there to inspect and manage the domestic affairs of the Institution.
- 2nd. To receive applications for the admission of children, and to decide upon them.
- 3rd. To hire and discharge servants.
- 4th. To give instruction to the Superintendent on all points connected with the duties of his office.
- 5th. To receive and decide upon tenders for supplies, and to order the necessary purchase of utensils, clothing, furniture, articles of food, fuel, &c., where no tenders are required, and to inspect the monthly bills.
- 6th. To submit to the Board the monthly accounts, as well as to lay before it the minutes of their proceedings during the preceding month.

1872-3.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

GOVERNMENT ASYLUMS.

(REPORT FROM BOARD RELATIVE TO EXPENDITURE FOR 1872.)

Ordered by the Legislative Assembly to be printed, 10 April, 1873.

THE SECRETARY TO THE GOVERNMENT ASYLUMS FOR THE INFIRM AND DESTITUTE TO THE PRINCIPAL UNDER SECRETARY.

Sydney, 2 April, 1873.

SIR,

I am directed by the Board of Management to transmit, for the information of the Honorable the Colonial Secretary, returns of the expenditure of the Government Asylums for the Infirm and Destitute, for the year 1872, with a comparative statement of the expenditure of those Institutions for the ten years, 1863 to 1872 inclusive, and to request that, as has been customary, they may with this Report be laid before Parliament.

The Board desire me to call attention to the following facts connected with the management of these Asylums, as brought out in these returns:—

1. The average number in the three Asylums during the year 1872 was:—

Hyde Park—Females	216
Liverpool—Males	630
Parramatta—do.	259
							— 889
Total	<u>1,105</u>

Showing an increase in the daily average over the numbers in the Institutions during the previous year of 140 persons, viz., 131 males and 9 females. The average number of inmates since the year 1862, when the Asylums were taken over by the Government from the Benevolent Society, has been nearly doubled. The facilities afforded by the Government for the transmission of vagrants and infirm persons from the country gaols and hospitals to these Institutions has tended in a great degree to the swelling of the numbers in the Asylums under the Board's control.

2. The Asylum at Hyde Park, with its daily average of 216 old women, has been overcrowded during the whole year. The additional accommodation which the old Volunteer quarters should have afforded, has not, owing to their continued dilapidated condition, been available for the reception of the women. Were these premises habitable the accommodation would be ample for all present requirements.

3. The Liverpool Asylum, including the separate hospital, has afforded shelter to 630 inmates—a much larger number than it is properly capable of accommodating. The temporary wooden building which has been sanctioned, and the new wing, are now in course of erection, which, when completed, will relieve the main building, and enable the Board to remove the hospital patients from the present unsuitable building, rented for the purpose.

4. The Parramatta Asylum, with 260 inmates, has been in a very overcrowded state throughout the year, but owing to the local opportunities for exercise and sea bathing, which the inmates are allowed the advantage of, the inconvenience has not been so apparent as at the Asylums at Sydney and Liverpool, where similar advantages cannot be enjoyed.

5. The average rate of expenditure for the year, as compared with 1871, has been increased by 5s. 0½d. per head. This increase is attributable to the advanced price of provisions and clothing, and to the necessity for adding to the staff of wardsmen at the Liverpool Asylum.

6. A sum of £112 5s. 5d., realized by the sale of refuse fat, bones, &c., has been handed to the Treasury during the course of the year, which, if deducted from the total expenditure, would reduce the cost per head from £11 9s. 7½d. to £11 7s. 7d. Until the Audit Act came into operation the Board were authorized to use moneys derived from this source in the purchase of books and periodicals for the use of the inmates. These have since been purchased out of the vote, and the proceeds of the refuse credited to the Revenue.

I have, &c.,
FREDERIC KING,
Secretary.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES, No. 26. THURSDAY, 19 DECEMBER, 1872.

5. PRINCE ALFRED HOSPITAL BILL (*“Formal” Motion*):—Mr. Fitzpatrick moved, pursuant to Notice,—
(1.) That the Bill to incorporate the Prince Alfred Hospital be referred to a Select Committee for consideration and report, with power to send for persons and papers.
(2.) That such Committee consist of Mr. Abbott, Mr. Hay, Mr. Hill, Mr. Lackey, Mr. Oakes, Mr. Stewart, and the Mover.
And Mr. Raphael requiring that the said Committee be appointed by Ballot,—
Question,—(1.) That the Bill to incorporate the Prince Alfred Hospital be referred to a Select Committee for consideration and report, with power to send for persons and papers,—put and passed.
Whereupon the House proceeded to the Ballot, and the Speaker declared the following to be the Committee duly appointed:—Mr. Fitzpatrick, Mr. Oakes, Mr. Lackey, Mr. Stewart, Mr. Abbott, Mr. Hill, and Mr. Hay.

VOTES, No. 39. FRIDAY, 31 JANUARY, 1873.

4. PRINCE ALFRED HOSPITAL BILL:—Mr. Fitzpatrick, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 19th December, 1872, together with Appendix.
Ordered to be printed.

PRINCE ALFRED HOSPITAL BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on the 19th December, 1872, the "*Bill to Incorporate the Prince Alfred Hospital,*"—beg to report to your Honorable House,—

That they have examined the witness* named in the margin (whose *Mr. J. G. Ross. evidence will be found appended hereto), and that the preamble having been satisfactorily proved by the evidence of that gentleman, they proceeded to consider the clauses of the Bill, in which it was not deemed necessary to make any amendment.

Your Committee now beg to lay before your Honorable House the Bill without amendment.

MICHL. FITZPATRICK,

Chairman.

*No. 2 Committee Room,**Sydney, 30 January, 1873.*

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 23 JANUARY, 1873.

[In consequence of the Sitting of the House of the 22nd instant not having been concluded at the time appointed for the meeting of the Committee this day, such meeting could not be held.]

THURSDAY, 30 JANUARY, 1873.

MEMBERS PRESENT:—

Mr. Fitzpatrick,		Mr. Hill,
Mr. Hay,		Mr. Oakes.

Mr. Fitzpatrick called to the Chair.

Entry in Votes and Proceedings, appointing the Committee, *read* by the Clerk.

Printed copies of the Bill *referred*, and original Petition to introduce the same, before the Committee.

Parties called in.

Present:—Mr. A. Cathcart (*on behalf of Messrs. Holdsworth and Brown*), Solicitors for the Bill.

Mr. W. Owen (*Counsel*).

Mr. J. Grafton Ross called in and examined.

Witness *produced* original Minute-book containing proceedings of meetings relative to establishment of "Prince Alfred Hospital," and *handed in* copies of the same. (*Vide Appendices A 1 to A 5.*)

Room cleared.

Preamble *read* and considered.

Question,—"That this preamble stand part of the Bill,"—*put* and *passed*.

Bill *read* and *agreed* to.

Chairman to report the Bill to the House without amendment.

WITNESS.

Mr. J. Grafton Ross

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PRINCE ALFRED HOSPITAL BILL.

THURSDAY, 30 JANUARY, 1873.

Present:—

MR. FITZPATRICK,
MR. HILL,

MR. HAY,
MR. OAKES.

MICHAEL FITZPATRICK, Esq., IN THE CHAIR.

Mr. Owen appeared as Counsel for the Promoters of the Bill.

J. Grafton Ross, Esq., called in and examined:—

1. *Chairman.*] Your Bill sets out in the first recital of the preamble that (*the Honorable Member quoted the first recital of the preamble*). We must now call upon you, Mr. Owen, to prove this recital.
2. *Mr. Owen.*] You are one of the Joint Secretaries of the Prince Alfred Hospital Committee? I am, and I am also one of the original conveners of the public meeting at which it was resolved to establish the hospital.
3. You were one of the conveners of the public meeting held on the 28th March, 1868? I was.
4. Do you produce the original minutes of that meeting? I do; they are here. (*Minute-book produced.*)
5. Those minutes have been signed by you, I believe? Yes, by myself.
Mr. Owen said—Perhaps in putting in the minute-book the Committee will allow me to put in copies of the entries which I have had made?
- Chairman.*] The Committee will receive them if they are certified to be true copies.
6. Will you now inform the Committee what took place at that meeting? In the first place there was a requisition, signed by a very large number of citizens, and addressed to the Mayor, asking him to convene a meeting for the purpose mentioned in the requisition. On this requisition the Mayor convened a meeting at the hall of the Sydney Exchange, on the 20th March, 1868. That meeting was attended by a large number of the most influential citizens of all classes of the community, of all shades of political opinion, and of all religious denominations. His Worship the Mayor occupied the chair, and the first resolution was put to the meeting. (*Witness read the resolution. See Appendix A 1.*)
7. Was that resolution carried? Yes; it was carried unanimously. The second resolution was also carried unanimously, to the following effect. (*Witness read the second resolution. See Appendix A 1.*) The third resolution was also carried unanimously, in the following terms. (*Witness read the third resolution. See Appendix A 1.*)
8. *Chairman.*] That resolution is not embodied in the recital? No. There were certain reasons which led to a change in the proposal first made.
9. Have you any idea how many persons were present at that meeting? I should say between 4,000 and 5,000. The meeting was held in the large hall of the Exchange, and the room was crowded to excess.
10. Do you know, or can you guess, within a reasonable limit, how many of those present were subscribers to the hospital fund? I should think that every one there present subscribed to the fund either then or afterwards.
11. They were not subscribers at the time? Not till the proposal was made at the meeting, but names were taken down and promises were received at the meeting.

J. G. Ross,
Esq.

30 Jan., 1873.

J. G. Ross, Esq. 12. *Mr. Owen.*] At that meeting a committee was appointed to collect subscriptions, and generally to carry out the objects of the resolutions agreed to? Yes; a committee was appointed by the fourth resolution. (*Witness read resolution 4. See Appendix A 1.*)

30 Jan., 1873. 13. Do you produce extracts from the minutes of the meetings of the committee on the 23rd March, 1868, the 25th March, 1868, the 15th April, 1868, and the 21st September, 1868? Yes. (*Witness produced extracts. See Appendices A 2, 3, 4, and 5.*)

14. At each of these meetings a certain number of persons were added to the committee? Yes, there were names added to the committee on each of these occasions.

15. Now, as to the third recital in the preamble, do you know as a matter of fact that a large number of persons resident in all parts of the Colony and elsewhere have subscribed to the hospital fund? Yes, there have been an immense number of subscribers from every city, town, and hamlet, in New South Wales, and even from places beyond the Colony, and from England also. In proof of this I produce the published list of subscribers to the fund (*List produced*); and besides these there are many more whose subscriptions have been received, but whose names have not been published; these amounts have been collected frequently by gentlemen in the interior, and by clergymen of the various religious denominations, and the names of subscribers have been sometimes omitted.

16. *Chairman.*] I should like to ask you what sum of money you now have in the hands of your Treasurer? I produce deposit receipts from the London Chartered Bank of Australia and the Commercial Bank, for £22,616 7s. 2d., besides which there is a cash balance, and accrued interest to be taken into account.

17. *Mr. Owen.*] Will you turn to the minutes of the meeting of the 25th June, 1870, in which there is given an abstract of the Treasurer's report, showing the amount of cash in hand? That will not give the amount in hand, for there has been an increase of £1,800 or £2,000 since then.

18. *Chairman.*] Your next recital is that the money has been subscribed by persons of all shades of religious opinion and belief;—is this shown in any way from your lists? Yes, you may gather that from the names of the clergymen which appear there, and from the amounts collected by them. If you look through the list you will soon see as a matter of fact that the money has been collected in the way stated.

19. But do you know of your own knowledge that the money has been subscribed in the way recited? Yes, and I know that it has been received.

20. The latter part of the recital—that it is deemed expedient that the institution should be of an unsectarian character—seems rather a matter of opinion than of fact? It is a fact however, as far as the committee are concerned, for they were very positive on this point.

21. Have you anything on record to show this? Yes. I will read you an extract from minutes of the meeting of the committee, held on the 3rd December, 1872. It is as follows:—

The draft Act was then read *verbatim*. Exception was taken to the latter part of clause 10, which proposed to exclude Ministers from the Board of Directors. Discussion ensued, during which it was stated that the sub-committee had given much anxious thought to this clause, and after grave consideration had determined to recommend its adoption, because they were convinced of the growing necessity of doing away with sectarian influences in the management of charitable institutions. The first part of the clause gave ministers of religion the right to visit the hospital to comfort and console patients of their own denomination, and it was strongly urged that no slight or indignity was intended to be offered to the clergy, but that being relieved from secular duty they would have the more time to devote to the spiritual needs of the patient. After this the clause was agreed to.

22. And was this carried by a large majority of the committee? Yes; there were only two dissentients. It was moved that the draft Act be adopted, and two members of the committee moved an amendment in clause 10. Their amendment was rejected by a large majority, and the draft Bill was agreed to, with this clause as it now stands.

23. And the Act referred to is the one now before the Committee? Yes; it is identically that Act, without alteration.

24. *Mr. Owen.*] You have stated that there are a large number of subscribers to the fund from all parts of the Colony? Yes; not only from every city, town, and hamlet in New South Wales, but also from England and from the neighbouring Colonies.

25. Is it not a matter of fact that in consequence of this large number of subscribers, scattered all over the Colony and even in neighbouring Colonies, that it has been found impossible to hold a meeting of subscribers for the purpose of selecting Directors in the first instance? Yes, quite impossible, as a reference to the names on the printed list and the residences of the subscribers will at once show.

26. Will you again refer to the meeting of the 3rd December, 1872, and read the resolution selecting certain gentlemen to be appointed by Parliament the first Directors of the Hospital? Yes. The resolution is as follows:—

The following gentlemen were then unanimously nominated to be appointed by Parliament the first Directors of the Prince Alfred Hospital, viz., The Hon. the Colonial Secretary for the time being, the Chancellor of the University of Sydney for the time being, Ewen Wallace Cameron, Esq., Robert Coveny, Esq., Eyre Goulburn Ellis, Esq., John Fairfax, Esq., the Hon. Thomas Holt, Esq., Edward Knox, Esq., Lewis Wolfe Levy, Esq., Alfred Roberts, Esq., John Smith, M.D., Professor, Sydney University, and John Brown Watt, Esq.

27. At that meeting the Act now before the Committee was fully considered and adopted? Yes. I have already read the resolution referring to it.

28. Referring now to that part of the preamble wherein it is stated that a portion of land has been granted to the hospital—can you state what negotiations have taken place with the Government with reference to this land? Yes. The committee having failed to make arrangements with the Directors of the Sydney Infirmary, applied to the Government of the day for a grant of a suitable piece of land for the erection of an hospital. The Government for the then time being promised to do all in its power to find us a suitable site; after looking about in all directions it was found that the most suitable site available was part of the land which had been granted to the Sydney University. The Senate of the University were communicated with, and after some consideration agreed on certain conditions that part of their land should be devoted to the erection of an hospital; the negotiations went on for a very long time, until at last, on the 2nd April, 1872, we received a communication from the Colonial Secretary's Office, signed by Mr. Halloran, the Under Secretary, informing us that the land would be granted to us. It was in the following terms:—

“Colonial Secretary's Office, Sydney, 2 April, /72.

“Gentlemen,

“With reference to the interview which took place at this office on the 14th September last, between the Colonial Secretary and the Solicitor General, on the part of the Government, and representatives of the University of Sydney, the Presbyterian and Wesleyan bodies, and the Prince Alfred Hospital Fund, respectively, with regard to the allotment of land within

within the University Grant, I am now directed to inform you that the following modified arrangement for the distribution of the land available for Colleges within the University, having received the concurrence of the Senate of the University, subject to certain conditions imposed by that body, has been approved by the Government, and that the necessary steps will be taken for carrying the same into effect.

The Prince Alfred Hospital to
have apportioned to it 11 acres of the land extending from St. John's College grant along the Missenden Road, say 534 feet,
and thence having lines to include such an area."

J. G. Ross,
Esq.

30 Jan., 1873.

29. *Chairman.*] Do I understand that the land referred to in this letter is now out of the Government? Yes. It was originally granted to the Senate of the Sydney University.

30. Then it is intended to be resumed, but is now actually out of the Crown? Yes. It has been granted by the Crown to the Senate, but the religious bodies to whom it was intended to devote the land for the erection of affiliated Colleges having failed to do so within the time specified by the Act, the Government have the power to resume the land should they see fit to do so—as they have done in this case, with the assent of the Senate.

31. Under the Sydney University Act the Government have the power of resumption? Yes.

32. Then, though the land is at present out of the Crown, it is intended to resume it? Exactly.

33. *Mr. Owen.*] Since the receipt of that letter there have been some further negotiations I believe, relative to the grant of this land to the hospital? Yes. A deputation of the Committee waited on the present Colonial Secretary to urge on him the necessity of at once carrying out the promise contained in his letter of the 2nd April, 1872. On that occasion the Hon. Colonial Secretary promised to give the matter his earliest consideration.

34. Are you aware whether the Government are considering the matter? I had rather not answer that question, as I received the information as a privileged communication, which I do not consider myself justified in making use of.

35. You have not received any intimation or notification cancelling that promise in the letter you have just read? No; on the contrary, I believe there will be no difficulty about our having the land.

36. Is it in your opinion expedient for the purpose of erecting, managing, and governing the hospital—the contributors being so numerous and so scattered,—that the hospital should be incorporated with the powers, privileges, restrictions, and provisions mentioned in this Act? Yes; and it is not only my individual opinion but it is also the opinion of the committee at large. The committee believe that it is impossible to get any better representation of the subscribers than the gentlemen whom the people at large have sent into Parliament to represent them. In fact, the committee ask the Parliament, as representing the Colony at large, to represent the subscribers in this instance—these subscribers being virtually the Colony at large. That is why the committee ask the Parliament to appoint the Directors, all the committee have done being to recommend certain names to Parliament for appointment.

PRINCE ALFRED HOSPITAL BILL.

APPENDIX.

A 1.

RESOLUTIONS passed at a public meeting held in the hall of the Exchange, Friday, March 20th, 1868.

IN pursuance of a requisition, signed by a large number of citizens and addressed to the Mayor of Sydney, a public meeting was held in the hall of the Sydney Exchange, on Friday, March 20th, 1868, and was attended by a large number of the most influential colonists of all classes and denominations. His Worship the Mayor was unanimously voted into the chair, and called upon Mr. Alfred Roberts to read some letters received from certain gentlemen stating their inability to attend. They were from His Honor the Chief Justice, the Hon. E. Deas Thomson, C.B., the Very Reverend Vicar-General S. A. Sheehy.

The first resolution was moved by SIR WILLIAM MANNING, seconded by the REV. A. B. DAVIS,—

“That this meeting regards with the deepest interest the steady progress of His Royal Highness the Duke of Edinburgh towards recovery from the dangerous wound inflicted by an assassin during his sojourn in Sydney, and determines that a substantial and permanent monument shall be erected in commemoration of the heartfelt gratitude of the inhabitants of New South Wales for the preservation of His Royal Highness.” Carried unanimously.

It was moved by the REV. D. BADHAM, and seconded by the REV. THOMAS SMITH,—

“That this meeting is of opinion that the form of memorial most appropriate to the object in view and best calculated to represent the feelings of the community will be a hospital for the relief of the sick and the maimed, possessing all modern appliances necessary for the effective treatment of disease and comfort of the inmates, including a ward for convalescents until suitable accommodation is provided for such.”

Before the above resolution was put, an amendment was moved by T. S. MORT, ESQ., and seconded by the Hon. T. A. MURRAY, ESQ., President of the Council, which was as follows:—

“That a committee, to consist of the following gentlemen, with power to add to their number, be appointed to raise funds for the purpose of erecting a permanent and substantial memorial in this Colony as a token of the heartfelt gratitude of the inhabitants of New South Wales for the recovery of His Royal Highness the Duke of Edinburgh, and that it be a direction from this meeting to such committee, that their special consideration should be given to the finishing and endowing of the Sailors' Home as such memorial, and that in the event of their selecting that institution as the object of such memorial, it should for all time be styled “Prince Alfred's Home for Sailors.”

The amendment having been put and lost, the original resolution was put and carried unanimously.

The third resolution was moved by the REV. JOHN GRAHAM, and seconded by EDWARD S. P. BEDFORD, ESQ., and was as follows:—

“That in the opinion of this meeting the proposed edifice should be erected upon the site of the present main front building of the Sydney Infirmary, and be named the ‘Prince Alfred Hospital.’” Carried unanimously.

The fourth resolution was moved by JOHN FAIRFAX, ESQ., and seconded by the REV. G. F. DILLON, and was as follows:—

“That the following gentlemen be requested to form a committee for carrying out the objects of this meeting, with power to add to their number, to appoint a working committee, sub-committees in the country districts, and the necessary office-bearers, and to collect subscriptions:—The Chief Justice, the President and Members of the Legislative Council, the Speaker and Members of the Legislative Assembly, the Mayors and Aldermen of the City of Sydney and the suburbs, the Lord Bishop of Sydney, Archbishop Polding, and others, as per list published in the *Sydney Morning Herald*, March 21st. The Chief Justice, the President and Members of the Legislative Council, the Speaker and Members of the Legislative Assembly, the Mayors and Aldermen of the City of Sydney and the suburbs, the Lord Bishop of Sydney, Archbishop Polding, the Very Rev. S. J. A. Sheehy, V.G., the Venerable J. M'Encroe, Archdeacon, Professor Badham, Rev. A. B. Davis, Rev. G. F. Dillon, Rev. John Dwyer, Rev. John Dougall, Rev. John Graham, Rev. James Milne, Rev. A. H. Stephen, Messrs. John Alger, W. M. Alderson, M. Alexander, John Barlow, Edward Butler, S. P. Bedford, H. H. Beauchamp, B. Buchanan, Charles Cowper, Jas. C. Cox, Robert Coveny, James Curtis, E. W. Cameron, Frederick Dangar, H. C. Dangar, Jeremiah Donovan, John Fairfax, James R. Fairfax, John Flavell, J. H. Goodlet, Alexander Gordon, W. O. Gilchrist, Edward Goddard, F. Holt, John Hughes, P. Sydney Jones, Edward Knox, George King, Walter Lamb, William Laidley, S. W. Levy, Frederick Lassetter, John E. Manning, Thomas Mort, Henry Mort, James Macgregor, Charles Nathan, Thomas Peate, J. G. Raphael, Lieutenant-Colonel John Richardson, Alfred Roberts, Rev. T. Smith, Grafton Ross, M. H. Stephen, Alexander Stewart, E. Vickery, William Watkins, Thomas Walker, John Young, R. Jones, S. C. Burt, James Mullins, John Isaacs, William Vial, Edward Allen, George Russell (P. N. Russell & Co.'s), T. Macarthur, John Burt, John Booth (Balmain), William Jolly, and James S. Banks.”

The resolution having been put, was carried unanimously.

A list of donations was then read to the meeting, which had been spontaneously offered. A list was also brought forward by the Rev. A. B. Davis, of donations offered by certain members of the Hebrew persuasion, amounting to £921.

On the motion of SIR WILLIAM MANNING, seconded by E. KNOX, ESQ., a vote of thanks was passed to the Mayor of Sydney for his conduct in the chair.

I certify that these minutes are correct,—

GRAFTON ROSS, Hony. Secretary.

I hereby certify that the within extracts are correct,—having examined the same with the original thereof.

A. CATHCART,
Clerk to Mr. Holdsworth, Solicitor.

A 2.

Minutes of General Committee Meeting of the 23rd March, 1868.

MARCH 23rd, 1868, was held the first general committee meeting in the Chamber of Commerce, at the Sydney Exchange. Mr. John Fairfax was voted into the chair:—There were present: Messrs. W. Lamb, J. G. Ross, Alfred Roberts, W. M. Alderson, R. Coveny, Rev. J. Dougal, Rev. J. Dwyer, E. Knox, H. E. Allan, — Bedford, Richard Jones, M. H. Stephen, Rev. J. Graham, John Alger, Rev. Thos. Smith, J. G. Raphael, James Curtis, F. Lassetter, J. R. Fairfax, John Bird, D. S. P. Jones.

* * * * *

Mr. WALTER LAMB proposed, Mr. E. KNOX seconded,—“That the names of the following gentlemen be added to the general committee:—Mr. J. Baptist, Mr. John Barnett, John Dalley, W. B. Dalley, Alfred Fairfax, Edward Flood, James Gordon, Dr. Hansard, T. S. Harrison, J. G. Hanks, C. Kidman, Wm. Long, W. A. Long, Rev. G. H. Moreton, Capt. M'Leerie, R. T. Moodie, Rev. P. Newman, A. Nathan, Professor Pell, Henry Prince, M. Rousseau, T. B. Rollin, Professor Smith, P. L. C. Shepherd, J. B. Wilson, and G. F. Wise.” The motion was agreed to.

* * * * *

Mr. H. E. A. ALLAN moved, Mr. R. COVENEY seconded,—“That Mr. A. Roberts and Mr. J. G. Ross be the Honorary Secretaries, and Mr. Walter Lamb and Mr. E. Knox the Honorary Treasurers, of the Prince Alfred Hospital Fund.” Carried unanimously.

I hereby certify that the foregoing extracts are correct,—having examined the same with the original thereof.

A. CATHCART,
Clerk to Mr. Holdsworth, Solicitor.

A 3.

General Committee Meeting, held March 25th, 1868, at the Chamber of Commerce, at 4 o'clock, p.m.

PRESENT:—Mr. John Fairfax in the chair, Messrs. A. Roberts, J. G. Ross, J. R. Fairfax, W. Lamb, Rev. J. Dougal, F. H. Dangar, J. Isaacs, Rev. John Dwyer, R. Jones, and John Alger.

The Chairman announced that this meeting had been convened for the formal business of adding names to the list of the general committee. The list of names was:—Mr. R. P. Raymond, E. S. Hill, J. R. Street, Sigmond Franck, Sir W. Macarthur, Adolph Feez, John Neal, Thomas Icely, W. Piesley, Henry Bell, George Hill, Richard Hill, the Rev. John Dougal, and the Rev. John West, the Rev. S. Rabone, Rev. H. H. Gaud, Rev. G. Hurst, Mr. Thomas Buckland, the Directors of the Sydney Infirmary, E. G. Ellis, Joseph Thomson, Edward Butler, Charles Myles, and the Rev. Brown Cave.

I hereby certify that the foregoing extracts are correct,—having examined the same with the original thereof.

A. CATHCART,
Clerk to Mr. Holdsworth, Solicitor.

A 4.

General Committee Meeting, held April 15th, 1868, at the Chamber of Commerce, at 4 o'clock, p.m.

MR. JOHN FAIRFAX in the chair. Messrs. A. Roberts, E. Knox, J. R. Fairfax, Professor Smith, Rev. Cave Brown, Rev. A. B. Davis, J. G. Raphael, R. Jones, H. Prince, Rev. John Dwyer, and H. E. A. Allan.

The following gentlemen were added to the list of the general committee:—Mr. Justice Cheeke, Mr. Justice Faucett, Mr. Justice Hargrave, Mr. A. T. Holroyd, Mr. Deffell, the Hon. John M'Farlane, M.D., Mr. James Mullins, J. T. Neale, E. T. Penfold, W. T. Pinhey, Sam. Watson, W. G. Ainsworth, W. R. Piddington, Geo. Thompson, C. Myles, R. T. Ford, Rev. S. Kent, and Dr. Eichler.

I hereby certify that the foregoing extracts are correct,—having examined the same with the original thereof.

A. CATHCART,
Clerk to Mr. Holdsworth, Solicitor.

A 5.

Adjourned meeting, held Monday, September 21st, 1868, pursuant to advertisement.

PRESENT:—Mr. Richard Jones in the chair. Messrs. Roberts, Ross, Knox, Lamb, Piddington, Alger, Alderson, Raphael, J. R. Fairfax, J. Richardson, J. R. Street, Rev. Brown Cave, W. C. Windeyer, Dr. Jones, S. D. Gordon, R. Coveny, J. Mullins, G. F. Wise, Rev. J. Dwyer, W. Vial, John E. Manning, M. H. Stephen, and the Rev. A. B. Davis.

Mr. A. Roberts proposed that Mr. J. L. Montefiore and Dr. Manning be elected additional members of the general committee. The resolution was seconded and carried unanimously.

I hereby certify that the foregoing extracts are correct,—having examined the same with the original thereof.

A. CATHCART,
Clerk to Mr. Holdsworth, Solicitor.

1872-3.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ORPHAN, REFORMATORY, AND INDUSTRIAL SCHOOLS.
(RETURNS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 14 February, 1873.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 10 December, 1872, That there be laid upon the Table of this House,—

“ A Return of the number, names, and ages of the Children in the Orphan
“ Schools at Parramatta, the Destitute Children’s Asylum at Randwick,
“ and the Reformatory School at Biloela, and on board the “Vernon”;
“ specifying, in each instance, whether—
“ (1.) Both parents ;
“ (2.) Father or Mother only are dead ; and stating the residence and
“ employment of the surviving parent.
“ Private Fees contributed to each Institution, adding Industrial Schools
“ and Reformatory.”

(*Captain Onslow.*)

ORPHAN, REFORMATORY, AND INDUSTRIAL SCHOOLS.

Protestant Orphan School,
Parramatta, 13 January, 1873.

SIR,

In reply to your letter of the 14th ultimo, requesting me to furnish certain information which had been called for by the Legislative Assembly, I have now the honor to enclose a Return of the number, names, and ages of all Children in this Institution on the 17th December last, showing whether both parents, father or mother only are dead, the residence and employment of surviving parent, and also the private fees contributed to the Institution.

I have, &c.,
M. BETTS,
Matron.

RETURN of the number, names, and ages of the Children in the Protestant Orphan School on the 17th of December, 1872, specifying in each instance whether both parents, father or mother only are dead, and stating the residence and employment of the surviving parent, and showing the private fees contributed to the Institution.

(Prepared in reply to the Principal Under Secretary's letter of the 14th December, 1872.)

Roman Catholic Orphan School.

THE VICAR-GENERAL TO THE PRINCIPAL UNDER SECRETARY.

Vicar General's Office,
8 February, 1873.

SIR,

I have the honor to transmit herewith Returns from the Roman Catholic Orphan School, amended as directed by your letter of the 4th instant. The headings were given, but they had not been ruled off by lines from the columns. Under the two headings, "Mother's occupation and residence" and "Remarks," there is given all the information we have on record, and perhaps all that, without great expense, could be obtained, because the poor women, mothers of the children, frequently change both residences and occupation.

No private fees have been contributed to the Institution, except a sum of £13 14s. 4d. (thirteen), received from Mr. Benjamin Osborne, through Mr. Sheriff M'Lean, for the benefit of children of John Gray, convicted of the murder of his wife somewhere in Illawarra.

I have, &c.,
S. J. A. SHEEHY,
V.G.

RETURNS

RETURNS from the Roman Catholic Orphan School, showing,—

1. Numbers and age of children.

No private fees have been contributed to the Institution, except £13 14s. 4d. from Mr. Benjamin Osborne, for benefit of John Gray's children.

29th January, 1873.

MARY A. ADAMSON,
Matron, Catholic Orphan School.

Randwick Asylum for Destitute Children.

THE HONORARY SECRETARY, RANDWICK ASYLUM, to THE PRINCIPAL UNDER SECRETARY.

Sydney, 16 January, 1873.

SIR,

Referring to your letter of the 14th ultimo, requesting a Return, with certain information, relative to the Children in the Randwick Asylum,—I have the honor to forward herewith a Return of the Number, Names, and Ages of the Children in the Asylum on 31 December, 1872; noting also, when practicable, the residence of the parent or parents, furnished to the Board of Directors at the time of the admission of such children.

2. I have also the honor to forward a Return showing the amount received, during the past year, from parents, on account of maintenance of their children, viz., £590 0s. 6d. The amount paid by parents in 1871 was £562 13s. 11d.

I have, &c.,

GEORGE F. WISE,
Honorary Secretary, Randwick Asylum.

RETURN of Fees received from Parents on account of their Children in the Randwick Asylum, during the year ending 31st December, 1872:—

To cash received in		£	s.	d.

Industrial School, Biloela.

THE SUPERINTENDENT OF THE INDUSTRIAL SCHOOL FOR GIRLS, BILOELA, TO THE PRINCIPAL UNDER SECRETARY.

Industrial School for Girls,
Biloela, 16 January, 1873.

SIR,

In reply to your letter of the 14th December last, calling upon me to furnish the Honorable the Colonial Secretary with a Return of the girls in the Institution under my superintendence,—I have the honor herewith to enclose a Return, showing the number of girls, whether both parents living, or only father, or mother alive, parents' residence, and their employment. The particulars of these children are not always procurable, as many of them are without any history of their parentage.

I beg respectfully to say that no fee or contribution is paid by any of the friends or parents of children now in the Institution.

I have, &c.,
GEORGE LUCAS,
Superintendent.

INDUSTRIAL SCHOOL FOR GIRLS, BILOELA, 1873.

NEW SOUTH WALES.

HOSPITAL FOR THE INSANE, GLADESVILLE.

(REPORT FOR THE YEAR 1872.)

Presented to both Houses of Parliament, by Command.

THE MEDICAL SUPERINTENDENT OF THE HOSPITAL FOR THE INSANE, GLADESVILLE, TO THE COLONIAL SECRETARY.

Hospital for the Insane, Gladesville,
10 March, 1873.

SIR,

I have the honor to present to you a Report on the general condition and progress of the Institution under my superintendence during the year 1872, with an Appendix of Statistical Tables.

The number of patients in Hospital on December 31st, 1871, was 485, of whom 229 were males and 256 females.

The admissions during the year were 164 males and 104 females—a total of 268. Of this number, 219 were admitted for the first time, and 49 had been at some previous time under treatment.

The total number under care during the year was 753—393 males and 360 females, and the average daily number resident was 487.

The number discharged during the year was 241, of whom 119 had recovered, 15 were relieved, and 107 were transferred to other Institutions for the Insane as not improved.

The deaths were 38—29 males and 9 females; and the total number of patients discharged and died during the year was 279.

The number of patients in Hospital on December 31st, 1872, was 474—of whom 215 were males and 259 females.

These figures are set forth in a tabular form in the Appendix (Table I).

The number of admissions (268) has been greater than in any previous year in the history of the Institution, with the exception of the year 1871, when the number was 277. Of these, however, 12 had been temporarily absent from the Hospital, and had been accommodated in another Institution for the Insane, so that the admissions during 1872, considered apart from the exigencies of statistics, are really in excess of those for any previous year.

The character of the cases has not been markedly different from those admitted in previous years. The number of chronic cases has been large; and the cases of imbecility, dementia, and insanity due to or complicated by epilepsy, have been somewhat more numerous than in former years. The main cause of increase appears to be due to the increase of population, bringing with it its ordinary ratio of insane persons. The mining excitement of the past year does not appear as yet to have in any marked degree been the producer of insanity. I have not been able to trace more than two out of the total number of admissions directly to this cause.

The number of readmissions (49) is a large one, and demands some explanation. It is necessary, in the first place, to state that this number includes not only the cases discharged as recovered, and who were readmitted, therefore owing to a relapse, but those also discharged to the care of friends, as still of unsound mind, and for whom readmission was sought, owing in some cases to the death, or a change in the circumstances of those having charge of them; and in others, to an exacerbation of their mental symptoms, rendering Hospital treatment and care again necessary. Of these cases 13 were readmitted during the year; and I may remark, in this connection, that the Lunacy Statutes of New South Wales do not allow absence from the Hospital on trial, as is the case in Great Britain, in Victoria, and in other Colonies, so that every case must be absolutely discharged, and if found to be unsuited for home life, can be readmitted only after further medical certificates and warrant are obtained.

It must be remembered, also, that the older the Institution, the greater as a rule will be the proportion of readmissions; the total being drawn from the numbers discharged during every year since the opening of the Institution. This Hospital has during the past year entered on its thirty-fourth year, and one patient was readmitted who had been absent therefrom for the long period of thirty-one years. The average time of absence in the cases readmitted was three years and eight months. The special causes which render patients more liable to relapse in this Country are referred to in former Reports.

Condition of patients on admission.

I have again, as in former years, to notice the satisfactory bodily condition in which the patients have as a rule reached me. Many were thin, worn, and ill; some in a state of excitement, and not a few infirm and helpless; but the large majority were free from marks of bruise or other injury, and clean; a condition which is most creditable to the officers of the Police charged with their escort, and to the staff of the Gaols and Reception House.

From the Return, Appendix A, it will be seen that a total number of 194 cases have been sent to the Reception House during the year, of whom 173 have been forwarded to this Institution.

Recoveries.

The number discharged during the year as recovered was 119, a percentage on the admissions of 44.44. With this result, in comparison with the returns from other Institutions for the Insane in Great Britain* and the Colonies, I have reason to feel satisfied, especially as few cases reach the Hospital in their acute stage, except from the Metropolitan District, and as the milder cases are discharged from the Gaols and the Reception House. From the latter alone 12 cases were discharged as recovered during the past year. From a more extended point of view, however, the results of all Hospital treatment, as applied to affections of the brain, is infinitely saddening. In upwards of 50 per cent. of the total number admitted, a general amelioration of the symptoms is all that is effected—relief, not recovery.

The number discharged to the care of friends during the year was 15.

Of the 107 patients discharged as “not improved,” 68 were transferred to the Lunatic Asylum, Parramatta, 29 to the Asylum for Imbeciles, &c., Newcastle, and 10 to the Licensed House for Lunatics at Cook’s River. The large majority, when transferred, were in such a mental condition that they could be allowed to sleep in associated dormitories.

Deaths.

The number of deaths during the year was 38, a percentage of 7.80 on the average number resident. As in former years, the death-rate among the males has far exceeded that among the females; the former showing a percentage of 12.55, the latter of 3.51 only.

The causes of death are shown in the Appendix, Table 5. One sudden death from apoplexy was the subject of inquiry before the Coroner for the District, as was also a lamentable case of suicide, which has been already reported to you.

Among the patients who died was the “oldest inhabitant.” He was admitted at the opening of the Institution, having been transferred from the old Liverpool Asylum, and succumbed to cancer of the liver, after a residence of upwards of thirty-three years.

The number remaining in Hospital on December 31st, 1872 (474), was less than at the same date of the previous year; but this was owing to a number having been recently transferred to the Lunatic Asylum at Parramatta, and represents no permanent diminution of numbers, which have already, at the time I write, risen to 504.

General health of inmates.

The general health of the inmates has been on the whole satisfactory; but a form of purpura, due mainly to sleeping in a vitiated atmosphere, one of the results of the overcrowded condition of the Institution, has been constantly seen in the wards. The dread of an invasion of small-pox made me think revaccination necessary, and permission having been obtained, the whole of the patients in the male division, and all such as could not show cicatrices of prior vaccination in the female division, were vaccinated by Dr. Joseph.†

A case of scarlet fever, and a case of anomalous eruption, which so much resembled small-pox as to cause considerable alarm, were isolated from the commencement, and no further cases occurred.

The accidents during the year have, with two exceptions, been of a very trivial character. A female patient fractured both legs by jumping from a window, but made an excellent recovery, and a male patient fractured one of the bones of his leg in an epileptic fit during the night.

Alterations and improvements.

Various minor alterations and improvements have been effected, but the crying wants of the institution—new kitchen, laundry, and store-rooms—still remain unfulfilled. The Hospital is without any means whatever of extinguishing fire, although engines, &c., have been several times asked for. The frightful consequences of a fire in an Institution of this character, are an ever-present thought to those in charge, and harrowing accounts of two fires in similar Institutions in America, during the past year, have not tended to allay anxiety on this head.

Efforts have been made, by planting, turfing, and by the addition of extra furniture and minor articles of ornament, to make the yards and rooms more homely and cheerful; and it is a matter of note that instances of wilful destruction have been few and infrequent. I fully agree with my friend Dr. Needham,‡ that acts of destruction often “depend on the absence of things worth preserving, and the surest method of making insane persons destructive is to lower their surroundings to the level of their apparent mental condition”; and I am satisfied with him that “the influence of furniture and general surroundings is not yet sufficiently appreciated in reference to insane persons; that they are really important elements of cure, and that the insane man is too often a man de-civilized, and to him the various processes of civilization have again to be applied.”

The vineyard which was planted four years ago bore well this year, the oidium having been checked by repeated applications of sulphur. The garden is becoming more productive, and a return showing the amount of garden produce during the year is given in Appendix B.

An

* The percentage of recoveries for the United Kingdom in 1871, excluding the transfers from the admissions, was 40. The percentage in English Asylums, including transfers, was 33.87.

† Dr. Joseph reports:—“I have vaccinated 214 males and 15 females, making a total of 229. In no case was vaccine lymph transferred from patient to patient, but a continuous supply was obtained by the vaccination of upwards of 50 persons, 45 of whom were young children, residing in the neighbourhood of the Hospital. No serious after-effects were observed. Of the 229 cases, 174 were successful, and 55 failed. The following is an Analysis of the cases:—

“Males	214	{	167 previously vaccinated	{	132 successful.
			47 unvaccinated	{	45 unsuccessful.
“Females.....	15	{	Unvaccinated	{	30 successful.
				{	17 unsuccessful.
				{	12 successful.
				{	3 unsuccessful.

Only those females were vaccinated who had not been previously subjected to the operation, as by the time vaccination in the female division was commenced the fear of an epidemic of small-pox had in great measure subsided.”

‡ Reports on the York Lunatic Hospital, 1870 and 1871, by Fredk. Needham, M.D., Medical Superintendent.

An additional fowl-yard has been made, and the pig-sties have been enlarged and improved.

The total number of insane persons, including idiots, under official cognizance in the Colony, on December 31st, 1872, was 1,440, and their distribution was as follows:—

	Males.	Females.	Total	Number of insane person in the Colony, and proportion to population.
Hospital for the Insane, Gladesville	215	259	474	
Lunatic Asylum, Parramatta	Free ...	205	710	
	Convict...	33	7	40*
	Criminal .	36	3	39†
Asylum for Imbeciles, Newcastle	102	33	135	
Licensed House for Lunatics, Cook's River	3	39	42‡	
	894	546	1,440	
Total number on December 31st, 1871... ..	879	508	1,387	
Increase during the year 1872	15	38	53	

No statement approaching to accuracy can be made in regard to the number of persons of unsound mind in the Colony living with friends and supported from private resources.

The increase in numbers during the year is not accurately represented by the above figures, as seventeen persons formerly maintained in the Lunatic Asylum, Parramatta, as "invalids" have been placed under lunacy certificates, and the invalid establishment abolished. All these had been of unsound mind for years, and the real increase in numbers is therefore 36.

The estimated population of the Colony on December 31, 1872, was 295,680 males and 243,510 females, making a total of 539,190. The number of insane persons, as above stated, at the same date, was 1,440. The proportion to population was therefore 1 in every 374: the proportion of insane males to the male population being 1 in 330, and the proportion of insane females to the female population 1 in 446. There is no reason, however, to think that insanity is much more prevalent among males than females in the Colony. The disparity in numbers is largely due to the fact that for many years the male population was greatly in excess of the female, and that during this period there was a larger accumulation of chronic and incurable cases of the male sex.

It is interesting to note that the proportion of insane persons to the population has not increased during the year, even though the "invalids," who might long since have been reckoned among the insane, have this year swelled the total number. So far as I can ascertain, this is the first year for a long period, if not since the foundation of the Colony, in which the proportion has not increased, although the increment has during the past four years been small.

The proportion is below that in the United Kingdom, which was, on December 31, 1871, 1 in every 350.

The increase of population in the Colony during the last three years has been, according to the Registrar General's returns, about 20,000 per annum, and there is every probability that the amount will steadily increase. The given ratio of insane persons in every civilized country, where accurate statistics have been obtained, appears to approximate to 1 in 350. The ratio existing at present in this Colony, as above stated, is 1 in 374. With mere increase of population, therefore, the total number of insane is likely to increase at the rate of fifty-seven per annum, and provision for their accommodation must be a matter of most serious consideration to every one interested in their welfare or charged with their care. The Lunatic Asylum at Parramatta now contains the fullest number which can be safely packed within its walls. The Asylum for Imbeciles at Newcastle has already twenty in excess of the number for whom there is proper accommodation, and in this Institution, calculated to hold only 400, there are at this time 504.

The need for further accommodation is most urgent, and I would beg to invite to this subject your serious attention.

Every effort has been made to relieve the monotony of hospital life, and to promote the recovery of the patients by amusements of various kinds. I am deeply indebted to neighbours and friends for assistance in this respect.

Captain Middleton, Mr. Labertouche, and a number of other gentlemen, gave early in the year an amateur theatrical performance, which was in all respects a success. The Australian Christy Minstrels, under the direction of Mr. Humfress, gave an excellent Ethiopian entertainment. Mr. H. G. Benson and Mr. Webster gave an entertainment consisting of ventriloquism, sleight of hand, the Davenport rope trick, with comic and character songs. Mr. Frank Sewell arranged a concert, at which Miss Wiseman, Mrs. and Miss Caldwell, Mr. and Mrs. Jackson, and Mr. Andrew Fairfax, most kindly assisted; and Mr. Beaver exhibited a number of pictures by the help of the magic lantern.

Mrs. Isler has again allowed the use of a paddock for the purpose of cricket and other out-door amusements, and Mr. C. E. Jeannerett most kindly placed a steamer at my disposal, free of all expense, on the occasion of the annual picnic.

The Director of the Botanic Gardens has, as in former years, given me a number of shrubs and plants for the grounds of the Institution.

The fortnightly dances, commenced last year, were continued throughout the winter months. Cricket is always attractive, and there have been few fine days throughout the summer on which a number of patients have not enjoyed the game. The annual picnic to Clontarf took place on November 7th, and a party of nearly 250, including patients, attendants, children, and visitors, appeared thoroughly to enjoy themselves.

The religious services (Protestant and Catholic) have been conducted with the utmost regularity, and with the best possible effect on the minds of the patients. Attendance is purely voluntary, and there is always a large and attentive congregation. The Chaplains have been prompt in their attendance when called to any case of urgent sickness, and their ordinary visits have been sufficiently frequent. I believe that the religious services and the ministrations of the Chaplains have been most useful to the patients, and I should regard their discontinuance as a real calamity.

The

* British convicts still at the charge of the Imperial Treasury.

‡ 32 of these are maintained at the public expense.

Donations, &c.

The proprietors of the following newspapers,—The Social Reformer, the Burrangong Argus, Bathurst Free Press, Bathurst Times, Clarence and Richmond Examiner, Dubbo Dispatch, Deniliquin Chronicle, Goulburn Herald and Chronicle, Grafton Observer, Illawarra Mercury, Kiama Independent, Maitland Mercury, Macleay Herald, Monaro Mercury, Mudgee Advertiser, Newcastle Chronicle, Queanbeyan Age, Southern Argus (Goulburn), Wagga Wagga Express, Wagga Wagga Advertiser, Western Examiner (Orange), Western Post, Yass Courier,—have forwarded, free of all charge, and with the greatest punctuality, a copy of every issue throughout the year. My best thanks are due on behalf of the many patients who have benefited by this disinterested kindness.

Early in the year I received the sum of £50 from the Executors and Trustees of the late Mr. Mark Hillas, being a sum bequeathed to me as Superintendent of the Hospital. Owing to the kind suggestion of a friend, the bequest was made for the amusement of the patients, and was to be expended at my discretion. I at once sent to England for two good magic lanterns, with all necessary fittings, and a number of slides. These have arrived, and have several times been used for the purpose of entertainment, with excellent effect. I have received, and very thankfully acknowledge, the following special donations:—Mrs. Darvall, £5 (to be expended for the benefit of the patients), two handsome sunlight-burners and reflectors for the amusement-room, and two loads of fruit; Mrs. and Miss W., £5 (to be expended for the amusement of the patients), illustrated cards, pictures, dolls, &c., &c.; Mr. C. Wilson, 2 guineas (to be expended in amusements), and copies of the Sydney Mail (every issue); the Revd. Edward Probert, £2 (to be expended in amusements); Mr. F. Salter, 12 Bramah fowls, illustrated papers, &c., (several donations); Messrs. J. Fairfax & Sons, magazines, &c., &c. (a large number); Mrs. Barton, a fine collection of plants and shrubs, a cover for the communion table, books, &c.; Mr. Justice Hargrave, illustrated newspapers; Mr. W. Buchanan, Post Office, Sydney, ten large bags of newspapers; Union Club, illustrated and other papers (monthly donation); Mr. Edward Smith, illustrated papers and magazines (monthly donation); Mr. J. G. Ross, illustrated and other papers; Mrs. A. Cummins, two bundles Illustrated London News; Mr. C. J. Manning, illustrated papers; Mr. Stanger Leathes, London Punch, four years, and Illustrated London News, three years, complete; Mr. Allen, books, magazines, &c.; Mr. Cohen, illustrated papers; Mr. Edey Manning, illustrated papers; Mrs. R. Stewart, illustrated papers; Mr. C. W. Gardiner, illustrated papers; Mr. J. Hazeland, magpies and butcher bird; Mr. Edward Gerrard, wallaby; Mr. Wrigley, Newcastle, native bear; Mr. Silas Sheather, water hen; Anonymous, three guinea pigs, and several packages of illustrated and other papers.

Some changes in the staff have occurred during the year. Mr. Morrison Knight, the Assistant Medical Officer, died at the Hospital, to many of the inmates of which his kindly disposition had greatly endeared him, after a long and painful illness; and Mr. Henry W. Statham resigned his appointment as Assistant Superintendent. The vacancies thus caused have been filled entirely to my satisfaction. From Dr. Morgan Joseph I have received the most cordial co-operation; and it is a duty and a pleasure to state that I have never seen the Institution in better order than when I relieved him of its charge, after an absence from duty of nearly a month. I wish especially to acknowledge the services of the Matron, who has during the past year completed her twenty-fifth year in the Institution. Her mature judgment, her constant care, and her unvarying kindness, have relieved me of much anxiety; and it is to her that the creditable condition of the female division of the Hospital is mainly due.

The attendants, nurses, and servants have, as a rule, performed their duties most satisfactorily, and have rendered willing and efficient assistance in carrying out the great objects of the Institution.

I have the honor to be,

Sir,

Your most obedient servant,

F. NOBTON MANNING, M.D.,
Medical Superintendent.

APPENDIX.

THE Tables in this Appendix consist of,—(1st) those recommended by the Medico-Psychological Association for general use in Institutions for the Insane, and approved by the English Commissioners in Lunacy; (2nd) those having a domestic character, or a more immediately local interest. The revised series of statistical tables, recommended by the Medico-Psychological Association, and which have been already adopted in most of the English and Scottish, and in some Colonial Institutions, are ten in number. They are confined to medical statistics, and include the main and more important facts required for statistical comparison.

Table I gives the number of admissions, readmissions, discharges, and deaths, with the average numbers resident during the year, the sexes being distinguished under each head.

Table II gives the same results for the entire period the Asylum has been in operation.

Table III furnishes a history of the yearly results of treatment since the opening of the Asylum.

The table also embraces a column for the mean population or average numbers resident in each year. In other columns are shown, for each year, the proportion of recoveries calculated on the admissions, and the mean annual mortality, or the proportion of deaths, calculated on the average numbers resident. It is of the first importance that these two principal results under Asylum treatment, when given, should be calculated on a uniform plan, and according to the methods here pointed out.

Table IV gives a history of each year's admissions: how many, for example, of the patients admitted, say in 1855, have been discharged as cured, how many have died, and how many remained in the Asylum in 1865.

The value of this table, in regard to the vexed question of the increase of insanity, is evident. The table is adopted from the Somerset Asylum Reports.

Table V shows the causes of deaths, classified under appropriate heads. This form is adopted from the Reports of the Commissioners in Lunacy for Scotland, with some addition and modification. It appears sufficiently detailed for statistical purposes.

Table VI gives the length of residence in the Asylum of those discharged recovered, and of those who died, during the year.

Table VII shows the duration of the disorder on admission, in the admissions, discharges, and deaths of each year, according to the four classes recommended by Dr. Thurnam in his work on the Statistics of Insanity.

Table VIII shows the ages of the admissions, discharges, and deaths of each year, in quinquennial periods.

Table IX shows the condition, in reference to marriage, of the admissions, discharges, and deaths of the year.

Table X shows the causes, apparent or assigned, of the disorder, in the admissions, discharges, and deaths of the year.

As stated in my Report for the year 1869, in which the first six of the tables were given, it has been found impossible, owing to the form in which the records of this Institution have been kept, to make the returns retrospective, without an amount of labour altogether out of proportion to the value of the result; the statistics therefore commence with the year 1869.

TABLE I.—Showing the admissions, discharges, and deaths, during the year 1872.

	Male.	Female.	Total.
In the Hospital on 31st December, 1871	229	256	485
	Male.	Female.	Total.
Admitted for the first time during the year	141	78	219
Readmitted during the year	23	26	49
	164	104	268
Total under care during the year	393	360	753
Discharged or removed—			
Recovered	70	49	119
Relieved	11	4	15
Not improved.....	68	39	107

* Including over-work, mental excitement in mining, speculation, &c.

† Only given as a separate cause in cases where the immediate exciting cause was not known.

‡ Including over-lactation, &c.

The difficulties still experienced in obtaining trustworthy information concerning patients on their admission have prevented any increase in the number of the statistical tables having a social or domestic interest.

The three following—XI, XII, XIII—are a continuation of those in the Report for the year 1871 :—

TABLE XI.—Showing natiivities of patients remaining on 31st December, 1868, and admitted since that date.
